Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables, are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Explanation of Credit Research Valuation Methodology, Ratings and Risk to Ratings:
J.P. Morgan uses a bond-level rating system that incorporates valuations (relative value) and our fundamental view on the security. Our fundamental credit view of an issuer is based on the company's underlying credit trends, overall creditworthiness and our opinion on whether the issuer will be able to service its debt obligations when they become due and payable. We analyze, among other things, the company's cash flow capacity and trends and standard credit ratios, such as gross and net leverage, interest coverage and liquidity ratios. We also analyze profitability, capitalization and asset quality, among other variables, when assessing financials. Analysts also rate the issuer, based on the rating of the benchmark or representative security. Unless we specify a different recommendation for the company's individual securities, an issuer recommendation applies to all of the bonds at the same level of the issuer's capital structure. We may also rate certain loans and preferred securities, as applicable. This report also sets out within it the material underlying assumptions used.

We use the following ratings for bonds (issues), issuers, loans, and preferred securities: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark); Neutral (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark). J.P. Morgan Emerging Markets Sovereign Research uses Marketweight, which is equivalent to Neutral. NR is Not Rated. In this case, J.P. Morgan has removed the rating for this particular security or issuer because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating no longer should be relied upon. An NR designation is not a recommendation or a rating. NC is Not Covered. An NC designation is not a rating or a recommendation.

For CDS, we use the following rating system: Long Risk (over the next three months, the credit return on the recommended position is expected to exceed the relevant index, sector or benchmark); Neutral (over the next three months, the credit return on the recommended position is expected to match the relevant index, sector or benchmark); and Short Risk (over the next three months, the credit return on the recommended position is expected to underperform the relevant index, sector or benchmark).

J.P. Morgan Credit Research Ratings Distribution, as of July 02, 2022

	Overweight	Neutral	Underweight
Global Credit Research Universe*	32%	53%	15%
IB clients**	62%	60%	60%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
The Credit Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designations are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below, this material has been distributed by the legal entity responsible for production. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

kevin.l.kwan@jpmorgan.com

retail investors or any other investors that do not fall into the classes of "accredited investors," "expert investors" or "institutional investors," as defined under Section 4A of the SFA. Recipients of this material in Singapore are to contact JPMSS or JPMCB Singapore in respect of any matters arising from, or in connection with, the material. As at the date of this material, JPMSS is a designated market maker for certain structured warrants listed on the Singapore Exchange where the underlying securities may be the securities discussed in this material. Arising from its role as a designated market maker for such structured warrants, JPMSS may conduct hedging activities in respect of such underlying securities and hold or have an interest in such underlying securities as a result. The updated list of structured warrants for which JPMSS acts as designated market maker may be found on the website of the Singapore Exchange Limited: http://www.sgx.com. **South Africa**: J.P. Morgan Equities South Africa Proprietary Limited and JPMorgan Chase Bank, N.A., Johannesburg Branch are members of the Johannesburg Securities Exchange and are regulated by the Financial Services Board. **Taiwan**: J.P. Morgan Securities (Taiwan) Limited is a participant of the Taiwan Stock Exchange (company-type) and regulated by the Taiwan Securities and Futures Bureau. Material relating to equity securities is issued and distributed in Taiwan by J.P. Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material. **Thailand**: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission, and its registered address is 3rd Floor, 20 North Sathorn Road, Silom, Bangrak, Bangkok 10500. **UK:** Unless specified to the contrary, research is distributed in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. JPMS plc is registered in England & Wales No. 2711006, Registered Office 25 Bank Street, London, E14 5JP. This material is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. Research issued by JPMS plc has been prepared in accordance with JPMS plc's policy for prevention and avoidance of conflicts of interest related to the production of Research which can be found at the following link: J.P. Morgan EMEA - Research Independence Policy. **U.S.**: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. Any data discrepancies in this material could be the result of different calculations and/or adjustments. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this

ALE – 2Q Beat; Transmission and Non-Reg Execution Bring Fresh Opportunities as Key Case Events Loom (see note HERE)

PPL – Low Key 2Q on the Heels of RI Close (see note HERE)

EXC – Tax Policy and Equity Update Cloud an Otherwise Straightforward Quarter (see note HERE)

ETR – 2Q Strong EPS Beat; Strong Usage and Weather Trend Restores Contingency Flex and Helps Customer Bill Offsets (see note HERE)

DUK – reports 2Q22 adj. EPS of $1.14 vs Gugg/cons at $1.09/$1.07; reaffirms 2022 adj. EPS guidance of $5.30–$5.60 ($5.45) vs Gugg/cons $5.48/$5.45; 5%-7% EPS CAGR reaffirmed

NJR – reports F3Q22 NFE of -$0.04 vs Guggenheim/consensus at $0.17/$0.06; raising FY22 NFE guidance to $2.40-$2.50 ($2.45) vs $2.30-$2.40 ($2.35 midpoint) previously, vs Gugg/cons $2.35/$2.35

SR – reports F3Q22 net economic EPS of $0.01 vs Gugg/consensus at $0.04/$0.02; reaffirms FY22 NEEPS guidance of $3.75-3.95 ($3.85) vs Gugg/cons $3.84/3.90

SRE – SRE reported 2Q22 EPS of $1.98 beating a $1.81 consensus; 2022 EPS guidance reiterated and now in top half

OGE – OGE reported 2Q22 adjusted EPS of $0.45 vs. $0.43 consensus and our $0.41 estimate; 2022 EPS guidance reiterated; now in top half

CPK – CPK reported 2Q22 EPS of $0.96 vs. $0.83 consensus and our $0.83 estimate; Near term Capex delays, but Reiterated LT guidance

CEG – CEG reports 2Q22 earnings

NRG – NRG reports 2Q22 earnings

EVRG – EVRG reports 2Q22 earnings

NWN – NWN reports 2Q22 earnings

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

SO – Southern gets permission to load fuel for Vogtle Unit 3

PCG/CA – CA undergrounding legislation gets first reading in Assembly committee

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

DUK – reports 2Q22 adj. EPS of $1.14 vs Gugg/cons at $1.09/$1.07; reaffirms 2022 adj. EPS guidance of $5.30–$5.60 ($5.45 midpoint) vs Gugg/cons at $5.48/$5.45; 5%-7% EPS CAGR reaffirmed

- +$0.10 2Q22 weather vs normal; net +$0.09 weather vs 2Q21 (2Q21 was +$0.01 vs normal)
- +1.5% rolling 12-month retail load growth through 2Q22; DUK expects that figure to moderate to raised guidance for 2022 of **2.0% load growth** vs **1.5% previously**
- +1.8% total customer growth vs 2Q21
- **Announced strategic review of commercial renewables business**
  - **~3.5 GW net ownership** of ~5.1 GW of operational wind and solar at Commercial Renewables (**details on slide 17**)
  - Duke Energy's smallest segment, representing **less than ~5% of consolidated earnings**, with a slower growth trajectory than regulated electric and gas utilities
  - If sold, majority of proceeds would be used for debt repayment and avoidance
- Reaffirmed 5%-7% EPS CAGR through 2026 off of base of 2021 original guidance midpoint of $5.15
- Call is at **10:00am ET** at **888-510-2359;** Access code**: 2999899**

NJR – reports F3Q22 NFE of -$0.04 vs Guggenheim/consensus at $0.17/$0.06; raising FY22 NFE guidance to $2.40-$2.50 ($2.45 midpoint) vs $2.30-$2.40 ($2.35 midpoint) previously, compares vs Gugg/consensus at $2.35/$2.35

- Outperformance at Energy Services once again drove the increase to FY22 guidance to $2.40–$2.50 from previously issued guidance of $2.30–$2.40
- CEV has a >675 MW pipeline of projects under contract, construction or exclusivity through fiscal 2027
- Construction at Adelphia Gateway scheduled to be completed by Dec 31, 2022
- ~1.7K new customers additions at NJNG in F2Q22 vs +1.8K in F2Q22
- Reiterated 7%–9% LT annual growth off FY22's original guidance midpoint of $2.25
- Earnings call will be held today at **10:00 AM ET.** Dial-in: **844-200-6205;** Access code: **901964**

SR – reports F3Q22 net economic EPS of $0.01 vs Gugg/consensus at $0.04/$0.02; reaffirms FY22 net economic EPS guidance of $3.75-3.95 ($3.85 midpoint) vs Gugg/consensus at $3.84/3.90

- Reiterates confidence in 5-7% long-term EPS growth
- Capex: $3.1bn budget through 2026 remains unchanged
- FY22 capex guidance unchanged at $540m (*reflecting the deferral of non-operational overhead costs for Spire Missouri into a regulatory asset*)
- Reiterates 7-8% annual rate base growth
- *Presentation and accompanying details not yet released*
- Earnings call will be held today at 1**:00 PM ET.** Dial-in: **844-824-3832** (**no access code**)

SRE – reported 2Q22 EPS of $1.98 beating a $1.81 consensus; 2022 EPS guidance reiterated and now in top half

- SRE reported 2Q22 EPS of $1.98 per share, beating consensus of $1.81 and our $1.52 estimate
- SRE reiterated 2022 EPS guidance range of $8.10 to $8.70 and is guiding to the high end.
- SRE also is affirming its full-year 2023 EPS guidance range of $8.60 to $9.20.

OGE – reported 2Q22 adjusted EPS of $0.45 vs. $0.43 consensus and our $0.41 estimate; 2022 EPS guidance reiterated and now in top half; OGE completed majority of ET ownership sale in July

- OGE reported earnings of $0.36 per diluted share including midstream, and $0.45 per share on a comparable basis vs $0.43 consensus and our $0.41 estimate
- OG&E contributed net income of $100.7M, or $0.50 per share in the second quarter, compared to $85.1M, or $0.42 per share.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

- Results in 2Q were driven largely by weather.
- Other Operations resulted in a loss of $0.05 per share in the second quarter compared to a loss of $0.02 per share in the same period of 2021; Driven by a partial reversal of a tax benefit
- OG&E's 2022 earnings guidance is unchanged; $1.87 to $1.97 per share; OGE anticipates results in the top half of its 2022 earnings guidance range due to strong weather and sales.

CPK – reported 2Q22 EPS of $0.96 vs. $0.83 consensus and our $0.83 estimate; Near term Capex delays, but Reiterated LT guidance

- CPK reported 2Q22 EPS of $0.96 vs. our $0.83 estimate and consensus
- 2Q results Included a one-time gain of $1.9 million or $0.08 in EPS related to a building sale
- Performance in the first half of 2022 was driven by the acquisition of Diversified Energy, pipeline expansions, natural gas organic growth, regulatory initiatives and higher earnings in the Company's unregulated businesses during the first half of the year.
- CPK experienced delays in capex deployment in 2Q; lowering its full year capital expenditure guidance range to $140 to $175M
- CPK expects these delays in timing to be temporary and reiterates its long-term capital expenditures and EPS guidance ranges of $750M to $1B in 2021 through 2025 and $6.05 to $6.25 for 2025 (respectively).

CEG ─ reports 2Q22 earnings

- CEG reported EBITDA of $603mm vs. Gugg/Consensus $501/565
- Reaffirmed 2022 guidance of $2,350-2,750 (vs. Gugg $2,547)
- 2023 gross margin +$200mm vs. 3/31
- 2023 volumes ~90% hedged
- Call at 10am ET - registration HERE

NRG ─ reports 2Q22 earnings

- NRG reported EBITDA of $358mm vs. Gugg/Consensus $350/363mm
- Reaffirmed 2022 guidance of $1,950-2,250mm (vs. Gugg $2,000mm)
- Reaffirmed FCF guide $1,140-1,440mm
- WA Parish outage and growth/other dragged $90mm
- Executed $102mm in share repurchases between 5/1 and 7/31

EVRG ─ reports 2Q22 earnings

- EVRG reported $0.86 vs. Gugg/Consensus $0.82/0.84
- Reaffirmed 2022 guidance of $ $3.43 to $3.63 (vs. Gugg $3.52)
- $0.06 of weather, 4% increase in weather-norm demand (+$0.10)
- Details minor IRP shifts in slides, alongside regulatory calendar
- KS rate case to be filed in April of '23
- Call at 9am ET – register HERE

NWN ─ reports 2Q22 earnings

- NWN reported $0.05 vs. Gugg/Consensus ($0.06)
- Reaffirmed 2022- guidance of $2.45-2.65 (vs. Gugg $2.56)
- Reaffirmed 4-6% LT EPS growth guide
- Call at 11am ET - 1-844-200-6205 password: 452188

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

SO – Southern gets permission to load fuel for Vogtle Unit 3

- Southern Nuclear Operating received permission from the US Nuclear Regulatory Commission Aug. 3 to load fuel at the long-delayed 1,150-MW Vogtle-3 nuclear unit in Georgia, although the company has said the milestone is likely to take place in late October.
- More HERE

Guggenheim takeaway: *A positive surprise versus widely held investor expectations of permission to load fuel coming later this fall.*

PCG/CA – CA undergrounding legislation gets first reading in Assembly committee

- CA Senate SB884 legislation was read the first time in the Assembly natural resource committee and placed on suspense file
- The assembly committee on utilities previously removed the language around a delayed investment recovery for undergrounding projects.
- The language was replaced with a mandate for an accountability process that would be CPUC driven.
- CA Senate undergrounding bill text here (SB884).
- Legislative session runs through August.

Guggenheim takeaway: *The bill is once again gaining traction at the Assembly level. As history has shown, the legislative process can see bills amended or gutted almost entirely until the tail end of the session in August. The amendments remove a large portion of the contested language that would potentially be at odds with incentivizing undergrounding, and instead shows the political will for alignment on wildfire safety.*

Company Information

Market Cap: $25.7bn

DTE Energy Co. (DTE) operates as a diversified energy company, which engages in the development and management of energy-related businesses and services. It operates through the following segments: Electric, Gas, DTE Vantage, Energy Trading, and Corporate and Other. The Electric segment consists of generation, purchase, distribution, and sale of electricity to residential, commercial, and industrial customers in southeastern Michigan. The Gas segment is involved in the purchase, storage, transportation, distribution, and sale of natural gas to residential, commercial, and industrial customers throughout Michigan, and the sale of storage and transportation capacity. The DTE Vantage segment focuses on projects that deliver energy and utility-type products and services to industrial, commercial, and institutional customers, produce reduced emissions fuel, and sell electricity and pipeline-quality gas from renewable energy projects. The Energy Trading segment covers energy marketing and trading operations. The Corporate and Other segment composed of various holding company activities, holds certain non-utility debt, and holds certain investments, as well as funds supporting regional development and economic growth. The company was founded in January 1995 and is headquartered in Detroit, MI. (Source: FactSet)

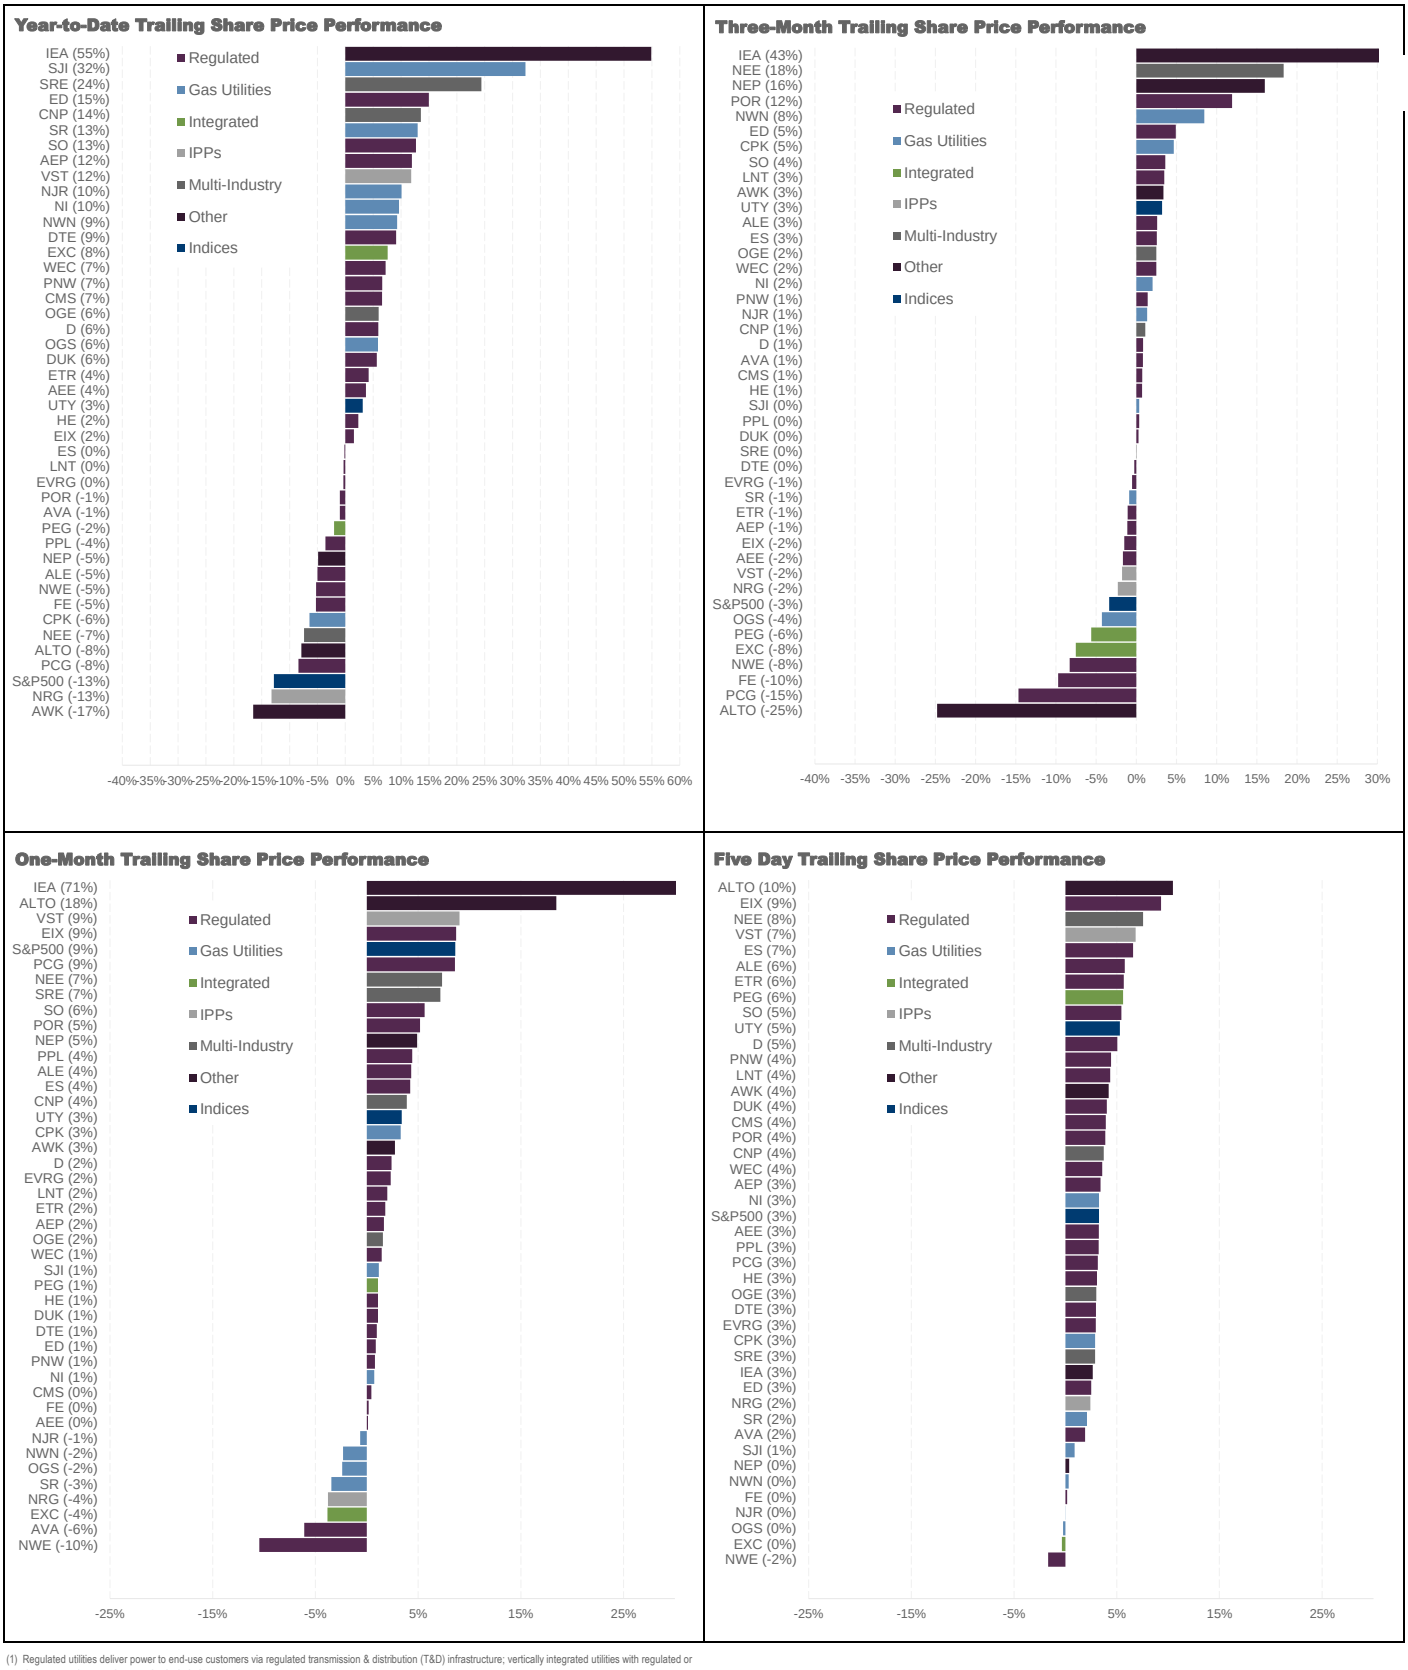
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

The Wolfe Byte
EXC Q2 missed but FY22 guidance was affirmed. The stock fell 400bp relative to the UTY after EXC said it plans to issue $500M of equity by YE22 and estimates a $300M/yr reduction from the corp alternative minimum tax in the IRA bill. Reaction understandable but overdone.

Guidance and 6-8% EPS growth affirmed; but stock hit on equity, IRA comments. EXC reported 2Q22 EPS of $0.44, missing consensus of $0.46. EXC affirmed 2022 guidance of $2.18-2.32, as a tailwind from higher than expected 30Y UST yields, which directly benefits ComEd, were partially offset by small unexpected charges in 1H22 and higher interest costs. EXC also noted potential summer storms. EXC will update guidance on the Q3 call. Notably, EXC now plans to issue $500M by YE 2022 through an ATM or block. EXC also projects a $300M/yr reduction in FFO from corporate AMT in the IRA bill. The stock underperformed the UTY by ~405bp and now trades at a 1x discount to the utility avg P/E on 2024E. While the timing was sooner, EXC had previously announced $1B of equity through 2025. And the AMT comments sounded like a worst case impact to EXC, and we read it as a message to policymakers that the tax bill has unintended consequences, reminiscent of what NEE did on the Q1 call on solar AD/CVD. EXC still sees 6-8% EPS growth even with the AMT. Our PT remains $49, as we reduce our premium multiple to a half-turn from full-turn, but our group avg P/E rises to 18.5x 2024 from 18.0x. We still see a modest premium, given EXC's low-risk T&D business and above avg LT EPS growth. But a track record of execution will be needed to get to a big premium.

AMT impact may be conservative; partial offsets possible. EXC projects 13-14% FFO/Debt on avg in 2022-24 vs 12% downgrade threshold at rating agencies. The $300M/yr impact from the AMT would reduce FFO/Debt by 70-80bp, we estimate. EXC assumes the AMT is determined at the consolidated level, meaning potential benefits from lower deferred taxes (= higher rate base) would not materialize at the utility subs. But that is TBD.

Trim 2023-24E on equity earlier than expected. We are shaving $0.01 off our 2023-24E on the $500M equity in late 2022. We previously had $250M/yr. Our 2025E is unchanged at $2.80 and implies 7% growth (off 2021A of $2.10).

ESTIMATES

($)	2022E	2023E	2024E	2025E
EPS FY	2.27 E	2.39 E	2.56 E	2.80 E
Prior	-	2.40 E	2.57 E	-
P/E	19.5x	18.5x	17.3x	15.8x

WOLFE RESEARCH

August 3, 2022

Investment Conclusion

We believe EXC is a low-risk utility stock with ESG-friendly investments. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%. We see upside from multiple expansion over time, as the stock still trades at a discount and well below low-risk, high-quality utilities.

Valuation

Our $49PT is based on a half-turn premium to our utility group P/E of 18.5x 2024E. We think a half-turn premium is warranted given EXC is a T&D, coal-free utility growing EPS above the industry average and operating under constructive regulatory frameworks.

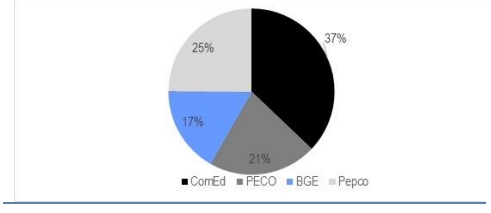
Exhibit 3: 2024 EPS by Subsidiary



Source: Wolfe Utilities & Power Research

Company Description

Chicago-based EXC is a large T&D (wires-only) regulated utility company, providing mostly electric service to roughly 10 million customers in the Mid-Atlantic and northern IL. It has no coal or other generation. ComEd serves northern IL and is EXC's largest utility sub, representing ~40% of rate base. Pepco serves DC, DE, MD and southern NJ and represents 25% of rate base. PECO, which serves southeastern PA, and BGE, which serves Baltimore, each represent nearly 20% of rate base. A little over 90% of EXC's total rate base is electric, with the rest gas LDC.

Investment Thesis

We believe EXC is a low-risk utility stock with ESG-friendly investments. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%. We also see upside from multiple expansion over time.

Valuation

Our $49PT is based on a half-turn premium to our utility group P/E of 18.5x 2024E. We think a half-turn premium is warranted given EXC is a T&D, coal-free utility growing above the industry average and operating under constructive regulatory frameworks. Risks are less capex, lower returns than projected, more equity needs than estimated, and unfavorable regulatory outcomes.

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:23 PM.

Sales growth sensitivities

EXC sees no signs of recession in its service territory, in Northern IL and the Mid-Atlantic. EXC's utility sales are 75-80% decoupled from usage for every 100bp change is sales growth. EXC has not provided EPS sensitivities to changes in sales growth. We estimate every 100bp change in total sales (which would only impact PECO and Delmarva-DE) is $0.01.

Relative stock performance and Comps

As shown in Exhibit 4, EXC has given back about half of its YTD outperformance vs large cap peers. EXC trades at a 1x discount to regulated peers and well below low-risk, high-quality utility names; see Exhibit 5.

Exhibit 4: EXC Relative Performance vs. Large-Cap Utilities

EXC-NSDQ	Rating	Price: Aug-3	Target ↑	Total Rtn
	Outperform	$44.31	$51.00	18%

Crosswinds Blowing Across The Windy City - Buyers Of The Weakness

Bottom Line:

EXC underperformed by over 4% due to a combination of both a modest acceleration of its common equity program and a larger-than-expected "cash" impact from the AMT provision included in the Inflation Protection Act of 2022. While we understand that EXC was one of the first managements to outline a net negative impact from the proposed Federal legislation, we believe today's reaction was overdone, and we see only a modest potential impact to the company's EPS should the legislation pass as written. **We reiterate our Outperform Rating on EXC shares.**

Key Points

Current Equity Plan More Front End Loaded But Impact Negligible to EPS and Stock Price. We estimate the EPS impact in 2022 and 2023 to be (~$0.01/share) relative to our previous assumption of only $250mm being issued via the company's ATM program over the course of both years.

Our take on AMT Impact. If unmitigated we see EXC's CFO Pre-WC to Total Debt declining -80 b/p from its already healthy ~13.5% range in 2023. Not only would this unmitigated impact leave the company's credit metrics well above its 12% downgrade threshold, but we see several mitigation actions available to the company including EPS-accretive O&M management as well as modestly dilutive capex reductions and incremental equity financing available to manage the potential impacts. Although sustainability will be the primary limitation, we see O&M management as the best and most impactful mitigant. Modest incremental equity is the next best option relative to any reduction in capex given it does not reduce the FFO associated with new investment. **Should management target at least a 50% mitigation of the 80 b/p of estimated impact to its CFO Pre-WC to Total Debt, a combination of O&M cuts ($45mm or 10 b/p), lower capex ($500mm 10 b/p) and higher equity ($500mm 20 b/p) could add 40 b/p and be roughly breakeven to our current forecast.**

As such we reiterate our Outperform Rating on EXC shares and would be buyers of the name at its attractive 7% discount to the group. Our target price moves to $51 as we mark to market our group multiples. We have slightly adjusted our 2022-2023 EPS to reflect the change in timing of the company's current equity financing program. Our estimates move to $2.24 and $2.40, respectively. Our 2024 and 2025 estimates remain unchanged at $2.60, and $2.78, respectively.

Our Thesis

We see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans. We believe the company's low-risk T&D business profile, strong and visible fundamental growth outlook, and supportive regulatory environment position the company well to drive multiple expansion.

Source: BMO Capital Markets, Company Reports

Scenarios

Valuation

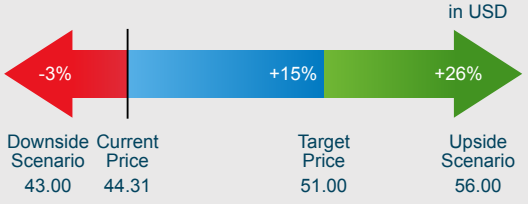
We value EXC on a sum-of-the-parts valuation. Our framework begins with the relevant sector average P/E multiple using 2024E EPS as a base, which we then adjust (premium, discount, or no change) to reflect the relative fundamentals for each segment.

Upside Scenario $56.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $43.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.



Key Catalysts

We see EXC management now in execution mode post its separation from Constellation Energy. With nearly 75% of the company's revenues decoupled from volumes and 100% of its capital covered through alternative recovery mechanisms, we see EXC achieving our target price over the next 12-18-month as management executes against its capital and regulatory plans.

Company Description

Exelon is the largest utility by customer count with over 10mm electric and natural gas customers spread across its six-state footprint. It is the fourth largest utility by rate base with one of the lowest business risk and ESG-friendly profiles given the company's pure T&D asset mix with electric distribution and transmission representing over 85% of rate base.

EXC-NSDQ Research

Glossary

Company Models

Crosswinds Blowing Across The Windy City

Bottom Line: EXC shares underperformed the broader utility sector by over 4% due to a combination of both a modest acceleration of its common equity program as well as a larger-than-expected "cash" impact from the AMT provision included in the Inflation Reduction Act of 2022 (if passed as proposed). While we understand that EXC was one of the first managements to outline a net negative impact from the proposed Federal legislation, we believe today's reaction was overdone and we see only a modest potential impact to the company's EPS should the legislation pass as written. Specifically, if unmitigated we see EXC's CFO Pre-WC to Total Debt declining -80 b/p from its already healthy ~13.5% range in 2023. Not only would this unmitigated impact still leave the company's credit metrics well above its 12% downgrade threshold, but we see several mitigation actions available to the company including EPS-accretive O&M management as well as modestly dilutive capex reductions and incremental equity financing available to management to manage the potential impacts. Although sustainability will be the primary limitation, we see O&M management as the best and most impactful mitigant. Modest incremental equity is the next best option relative to any reduction in capex given it does not reduce the FFO associated with new investment. **So should management target at least a 50% mitigation of the 80 b/p of estimated impact to its CFO Pre-WC to Total Debt, a combination of O&M cuts ($45 million or 10 b/p), lower capex ($500 million 10 b/p) and higher equity ($500 million 20 b/p) could add 40 b/p and be roughly breakeven to our current forecast. As such we reiterate our Outperform Rating on EXC shares and would be buyers of the name at its attractive 7% discount to the group. Our target price moves to $51 as we mark to market our group multiples. We have slightly adjusted our 2022-2023 EPS to reflect the change in timing of the company's current equity financing program. Our estimates move to $2.24 and $2.40, respectively. Our 2024 and 2025 estimates remain unchanged at $2.60, and $2.78, respectively.**

EXC reported 2Q22 EPS of $0.44 vs our $0.45 and consensus $0.46 estimates. YoY results increased by +$0.08 with a flat contribution from Utilities (ComEd +$0.03, BGE ($0.01), PHI ($0.05), and PECO +$0.03). The Holdco segment was overall flattish Y-O-Y (-7c vs -6c) after removing the negative impact of the BSC allocations adjustment for discontinued operations in 2Q21. On a consolidated basis EXC's TTM ROE was down modestly to 8.8% from 8.9% in 1Q22 and 9.2% in 4Q21, but the company reaffirmed their 9-10% target range by year-end as the timing of equity contributions at the regulated OPCOs balances out. **The Company reaffirmed 2022 guidance at $2.18-2.32 (street at $2.26 and $2.25 for BMO) as well their 6-8% EPS growth target for the 2021-2025 period. Management also reaffirmed the ~$29bn capital plan over the 2022-2025 period and continues to expect to issue a maximum of $1 billion of equity through 2025.**

Current Equity Plan More Front End Loaded But Impact Should be Negligible to EPS and Stock Price. With 2Q22 results, management provided additional details on the cadence and potential methods for satisfying its current $1 billion equity needs. Specifically, management announced it would issue $500mm (~11mm shares at last price or 1.7 days of volume) in 2022 or half of its $1bn program. This could come via their to-be-established ATM program, a block offering or combination of the methods. The company expects to complete the remaining $500 million over the 2023-2025 period. While the front end loaded equity issuance is not a welcome announcement, we believe this provides the clarity investors were looking for in terms of the expected dilution from the equity issuance and remains relatively small compared to ADV. We estimate the EPS impact in 2022 and 2023 to be (~$0.01/share) relative to our previous assumption of only $250 million being issued via the company's ATM program over the course of both years.

Inflation Reduction Act of 2022 – First Potential Net Negative Impact. Management started out the call addressing head on the potential impact to the company of the AMT provision contained in the Inflation Reduction Act of 2022 (IRA) if passed as currently written. In its current form, management believes the AMT provision could represent ~$300 million increase in cash taxes paid annually beginning in 2023. Management was quick to note that the legislation's provisions and associated impacts still remain fluid

given the legislation is not yet finalized and the company continues to work through its own internal analysis of the bill which is only a week old. As such the company was only able to provide several high level mitigating actions it could take to address the "cash" impact including: 1) additional O&M management; 2) the timing and overall level of capital investment; and 3) the issuance of additional equity outside of its current $1 billion program. The company expects to provide an updated financing plan on the 4Q call, as per its normal cadence, to allow for enough time to complete its year end budgeting process.

Although only a preliminary analysis of the potential sensitivity to the company's mitigation options, we see only a modest potential impact to the company's EPS should the legislation pass as written. Firstly, if unmitigated we see EXC's CFO Pre-WC to Total Debt declining ~80 b/p from its already healthy forecast range of ~13.5% in 2023 ($4.9bn FFO and $36.5b of total debt). While this unmitigated impact would still leave the company's credit metrics well above its 12% downgrade threshold, we understand management continues to target a healthy cushion above this level and will likely employ one or more mitigation actions to address the cashflow impacts on its credit metrics: 1) O&M cost management - Although sustainability will be the primary limitation, we see O&M management as the best and most impactful mitigant. With total O&M of ~$4.5-4.6b, a 100 b/p reduction in pre-tax O&M could reduce the 80 b/p impact by 10 b/p and it would be 3.5-4c/share accetive too EPS; 2) Modest incremental equity is the next best option relative to any reduction in capex given it does not reduce the FFO associated with new investment. Each $250 million in incremental equity (in lieu of debt financing) would add 10 b/p to EXC's CFO Pre-WC to Total Debt at the cost of ~1c/share; and 3) a reduction in capex we find to be the least impactful due to the fact that the positive impacts from lower overall debt is offset by the loss of FFO generated by the avoided capex. Specifically, we see for each $500 million of lower capex (7% of our 2023 estimate) EXC's CFO Pre-WC to Total Debt improves by only 8-10 b/p and is ~2-3c dilutive.

So should management target at least a 50% mitigation of the 80 b/p of estimated impact to its CFO Pre-WC to Total Debt, a combination of O&M cuts ($45 million or 10 b/p), lower capex ($500 million 10 b/p) and higher equity ($500 million 20 b/p) could add 40 b/p and be roughly break even to our current forecast. This would be consistent with management comments on the call today that they remain committed to the 6-8% earnings CAGR through 2025 and will provide additional details on financing requirements along with its financing plan on the 4Q call.

Illinois Regulatory Update. In addition to a final order in its last formula rate case coming this December, ComEd continues to work on the components of the new regulatory framework outlined in SB2408, including proposed performance metrics, with an expected final order by the end of 3Q22. In addition, on July 1st, ComEd filed its first beneficial electrification plan with ICC as required by the CEJA. ComEd proposes spending approximately $300 million from 2023 to 2025. The plan is designated to reduce barriers to beneficial electrification, including barriers to electric vehicles like adoption of costs and charging availability. As a reminder, ComEd's first multi-year rate plan (MYRP) filed under the new provision outlined in SB2408 will be filed in early 2023 for rate effective in 2024.

On the regulatory front, the company had a relatively quiet quarter with just one notable race case filing. On May 19, Delmarva Power Maryland filed its first multi-year plan with MD PSC. The filing outlines the company's plans to invest hundreds of millions of dollars in the local energy grid and other customer experience improvements during the 3-year period from 2023 to 2025. Specifically, the plan includes investments in the electric distribution system to continue to improve reliability and customer service, advance technologies to modernize the distribution system and provide tools to assist customers in managing their usage. The company expects an order by the end of the year.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in Exelon in United States.

Methodology and Risks to Target Price/Valuation for Exelon (EXC-NSDQ)

Methodology: We value EXC using our sum-of-the-parts valuation analysis to derive our target price. Our valuation takes into account the quality of EXC generation assets relative to its peers and the company's regulated business rate base growth and funding sources.

Risks: Failure to pass a version of the "Clean Energy Jobs Act" in the upcoming legislative session that sufficiently expands financial support for EXC Gen's nuclear plants would cause us to re-evaluate our rating, all else equal. The Governor's opposition to the existing Formulaic Based Rate Plan in IL may result in a new set of regulations that could be adverse to the company's ComEd Utility. Nuclear operations are subject to additional safety and regulatory oversight.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Dissemination of Research

Dissemination of fundamental BMO Capital Markets Equity Research is available via our website https://researchglobal0.bmocapitalmarkets.com/. Institutional clients may also simultaneously receive our fundamental research via email and/or via services such as Refinitiv, Bloomberg, FactSet, Visible Alpha, and S&P Capital IQ.

BMO Capital Markets issues a variety of research products in addition to fundamental research. Institutional clients may request notification when additional research content is made available on our website. BMO Capital Markets may use proprietary models in the preparation of reports. Material information about such models may be obtained by contacting the research analyst directly. There is no planned frequency of model updates.

The analyst(s) named in this report may discuss trading strategies that reference a catalyst or event that may have a near or long term impact on the market price of the equity securities discussed. In some cases, the impact may directionally counter the analyst's published 12 month target price and rating. Any such trading or alternative strategies can be based on differing time horizons, methodologies, or otherwise and are distinct from and do not affect the analysts' fundamental equity rating in the report.

Research coverage of licensed cannabis producers and other cannabis-related companies is made available only to eligible approved North American, Australian, and EU-based BMO Nesbitt Burns Inc., BMO Capital Markets Limited, Bank of Montreal Europe Plc and BMO Capital Markets Corp. clients via email, our website and select third party platforms.

~ Research distribution and approval times are provided on the cover of each report. Times are approximations as system and distribution processes are not exact and can vary based on the sender and recipients' services. Unless otherwise noted, times are Eastern Standard and when two times are provided, the approval time precedes the distribution time.

Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

Alternative Minimum Tax Would Present A Headwind

Management disclosed that should the Inflation Relief Act become law and include the Alternative Minimum Tax language as currently written at 15% this could present a $300mm per year cash shortfall to EXC vs. the status quo. This would be the impact before any mitigation efforts on the part of the company. We estimate, before any offsets, this could impact EXC's FFO/Debt by ~70bps. Importantly, we see EXC's current FFO/Debt at close to 14% vs. the 12% threshold the rating agencies apply to them. If EXC needed to finance the cash shortfall we think the impact to 2025 would be a ~5c or 1.6% hit to EPS. The company stressed it would need to review any potential change in the tax law in a holistic way as part of its longer-term financial planning and analysis. We believe the company has shown dexterity in the past with overcoming headwinds and we believe would likely be able to do so again. We believe the long-term earnings growth story of 6-8% through 2025 remains unchanged.

Equity Issuance Update Entirely Consistent With Plan

EXC will be establishing an At-the-Market (ATM) equity program to assist in the issuing the previously guided $1.0bn of equity it anticipates needing '22-'25. For 2022, EXC will issue $500mm, with the rest done over '23-'25. Issuing half of the targeted amount in '22 will allow the company to pay down short-term debt that was issued at the time of the Constellation separation. We had previously assumed ratable equity issuances, so our 2023/2024 EPS estimates have come down by 1c to $2.36/$2.54.

Earnings Remain On Track For the Year

EXC reported 44c of operating earnings vs. consensus of 46c and UBS of 42c, while reaffirming 2022 EPS guidance of $2.18-$2.32. While the company missed consensus slightly, we believe the timing around some O&M items were a drag in the quarter but should reverse out likely in Q4. The rise in interest rates has been a help given the way the allowed ROE in Illinois floats with the 30 YR treasury yield, but this benefit is being offset in 2022 by higher than expected financing costs on ST debt. We do believe that EXC should capture more of the benefit from a higher ROE in IL in 2023. The company will update its long-term capital expenditure and financing guidance on the Q4'22 call.

Valuation:

We maintain our price target of $49 premised on a 5% premium to the group multiple of 18.3x on our $2.54/share earnings forecast for 2024.

Forecast returns

Forecast price appreciation	+10.9%
Forecast dividend yield	3.5%
Forecast stock return	+14.3%
Market return assumption	8.1%
Forecast excess return	+6.3%

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price toearnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. Firstquartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) ESG: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-offAdjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

We maintain our price target of $49 premised on a 5% premium to the group multiple of 18.3x our $2.54/share earnings forecast for 2024. Our 5% net premium is derived from a 5% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond rounded down to the nearest 5%, a 5% premium for ESG attributes and a 5% discount for the regulatory ranking overall.

Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 03 August 2022 08:02 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	57%	32%
Neutral	FSR is between -6% and 6% of the MRA.	35%	26%
Sell	FSR is > 6% below the MRA.	9%	21%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client´s profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [MCI (P) 026/08/2021 and Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Distributed by UBS AG, Tokyo Branch to Professional Investors (except as otherwise permitted) in relation to foreign exchange and other banking businesses when relevant. **Australia:** Clients of UBS AG: Distributed by UBS AG (ABN 47 088 129 613 and holder of Australian Financial Services License No. 231087). Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This Document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd.,

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of

UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. EXC – Tax Policy and Equity Update Cloud an Otherwise Straightforward Quarter

Key Message: An otherwise straightforward update came with two key datapoints on tax policy and equity as EXC reported 2Q results just below our expectations and reaffirmed its 2022 guidance. Specifically, management laid out potential cash tax impact of $300mm/yr under the current incarnation of the IRA's 15% minimum tax, while deferring on the discussion of specific balance sheet impacts as the legislation remains in process. In our view, like the earlier solar tariff chatter, these comments were partially meant for ears outside of the direct financial community as factions in DC continue to harden their positions around certain provisions. Closer to home, management also announced that it will issue half of the $1bn in planned 2022-205 equity by year end, potentially via a block. We caught up with management after the call, which helped further our understanding of the rationale here – see below. While investors today have expressed to us some exasperation over the prospects of a block in the NT, we subscribe to the view that the overall size relative to the market cap remains small. Most importantly, management repeatedly stressed that its core 6-8% earnings CAGR remains the guidepost.

As a reminder, we very recently hosted EXC management for a multi-day NDR – see our note from those meetings HERE.

Tax policy implications and equity plans buffet an otherwise straightforward quarter… Management opened today's update with a resounding criticism of the IRA's 15% minimum tax, striking a more specific tone than almost every other corporate this earnings cycle. The team put a $300mm figure on the potential 2023-onward annual cash drag, while repeatedly emphasizing that it remains too early in the process to discuss further as they do not know how even the draft legislation may interact with the opcos vs. consolidated holdco. Thinking back to the 2017 tax cuts and associated remeasurements of ADIT, we asked on the call about how this could interact with the MYPs across the mid-Atlantic utilities; however, management noted, again, that it remains too early to say. We also asked about the potential for an update by 3Q/EEI should the legislation pass as-is; however, the team noted that it would have to get through its normal capital planning process (and pension remark) at YE before introducing any tweaks to the current financing plan. It remains unclear to us how the AMT for larger utilities would even interact with the opcos.

On the financing plan, management also announced that it anticipates it will issue $500mm out of its $1bn in total equity by year end via the ATM, a block, or a combo. In our view, the move to open the door to a larger upfront block vs. a more prolonged ATM dribble may have caught some investors off guard, and while we had not expected or modeled a band-aid rip to this degree, hindsight on the timeline constraints does help us understand management's rationale. Specifically, a combination of post-spin filing requirements and blackout periods narrowed the opportunity in 1H22, with management facing additional challenges in the balance of the calendar around 3Q blackouts, ongoing market volatility, and a rising rate backdrop against a ST debt balance it has sought to whittle down. **Given these factors we understand why management decided to act decisively, while also giving itself some cushion for the balance of the need in the current plan.**

EXC reported 2Q22 performance of $0.44, just below our estimate of $0.46, which was in line with the Street… YoY earnings were $0.08 higher on another quarter of slightly noisy 2021 comps, with higher distribution rates at the utilities partially offset by a variety of different factors. Across the opcos, ComEd earnings were +$0.03 YoY thanks to another quarter of higher distribution rates (investment and treasuries). Earnings were $0.03 higher at PECO from higher distribution rates, while a series of puts and takes at PHI ultimately dragged $0.05. Specifically, higher rates (+$0.02) were fully offset by D&A (-$0.01), weather (-$0.01), credit loss expense (-$0.01), income tax timing (-$0.01) and other expenses (-$0.03) related to O&M timing and interest expense. BG&E was $0.01 lower YoY on the back of higher D&A and other items, which offset $0.01 of higher rates. As expected, the quarter also featured ongoing noise at the parent on the back of the generation separation, with the

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:23 PM.

allocation adjustments for BSC netting to $0.09, which was partially offset by higher interest expense. **Looking ahead, management affirmed 2022 EPS guidance in the range of $2.18 to $2.32 vs. our $2.27,** which remains unchanged.

Valuation

Our valuation is based on our 2024E EPS of $2.58 applied to a 19.5x regulated utility multiple, which is based on our regression model using the correlation between electric utility valuations and forward interest rate expectations over the past 30+ years. To this 19.5x multiple, we continue to apply a one-turn premium to each of EXC's subsidiaries for favorable recovery mechanisms (riders, MYPs) and underlying growth/incremental investment opportunities, except for ComEd. This blended 20.2x multiple, applied to our 2024E EPS and discounted back one year, equals our $49 PT.

Risks

EXC comprises regulated distribution and transmission assets, which face traditional risk factors and upside drivers inherent with all utilities, including: (1) positive/negative rate case outcomes above/below our expectations, (2) higher/lower capex outlooks, and (3) interest rate changes above/below what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

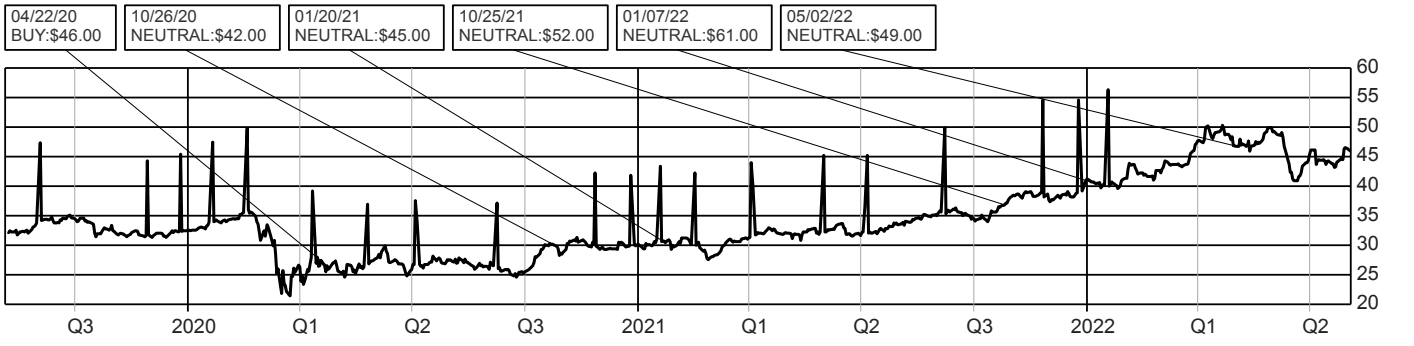
IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 08-02-2022



Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:23 PM.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Exelon Reports Solid Second Quarter Results as it Plans to Issue Equity to Fund Capital Investment Plan

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Analyst Note 03 Aug 2022

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon announced plans to issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.

Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.

Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.

45.83 USD	41.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

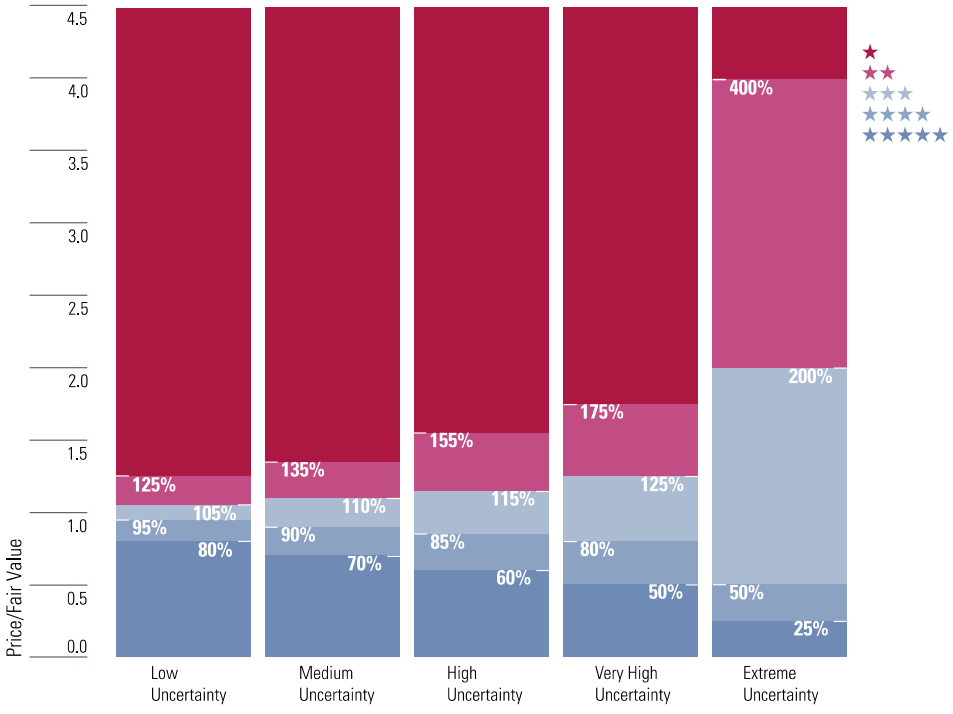
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Exelon's Equity Issuance To Support Capital Investment Plan

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Business Strategy and Outlook 03 Aug 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2025, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $29 billion of capital investment through 2025. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should gradually increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Morningstar Analysis

Exelon Reports Solid Second Quarter Results as it Plans to Issue Equity to Fund Capital Investment Plan 03 Aug 2022

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon announced plans to issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.

Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.

Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.

In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Fair Value & Profit Drivers 03 Aug 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2025, the midpoint of management's 6% to 8% earnings guidance. We forecast $29 billion of capital expenditures through 2025 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Scenario Analysis

Our uncertainty rating for Exelon is low. The company's regulated rate structure and transparent growth outlook reduce the difference between our bull- and bear scenarios.

In our bull-case scenario, we assume rate-case outcomes are 25% higher and operating expenses are 2% lower than in our base-case scenario. This results in a $5 per-share increase to our base-case fair value estimate. In our bear-case scenario, a similar decline in rate-case outcomes and increase in operating expense results in a $5 fair value estimate decrease.

If operating expenses increase by 100 basis points, our fair

value estimate would drop by $2 per share, all else equal.

Economic Moat

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing. Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Moat Trend

We assign Exelon a stable moat trend rating. The regulatory environments in Illinois, Pennsylvania, and Maryland have stabilized, allowing the company's distribution utilities fair returns. Nearly all of Exelon's rate-base growth will have rate trackers or formula rates, minimizing regulatory lag. Exelon faces the biggest challenge boosting regulated earned returns.

Exelon's stable business model and difficult-to-replicate asset base support our view that the firm's narrow moat is stable. We don't anticipate a change in the regulatory compact between utilities and ratepayers that ensures capital providers earn a fair return on their investments. As with all regulated utilities, we think revenue caps preclude Exelon from establishing a wide economic moat.

Regulated utilities' moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations.

Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or

overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of capital. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities that we cover.

Bulls Say/Bears Say

Bulls Say

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Financial Strength

With over 4.0 times interest coverage, Exelon's financial health is sound for a regulated utility, particularly given its stable, low-risk business model. With our forecast for $29 billion of capital spending planned through 2025, Exelon will be a frequent debt issuer. The company has manageable long-term debt maturities and we anticipate it will be able to refinance its debt as it comes due, maintaining its current debt/capital ratio. We expect the company to issue $1.0 billion in equity to fund its capital investment plan through 2025, with $500 million issued in 2022, in line with management's expectations.

We expect total debt/EBITDA to remain in the 4.5-5.0 times range. Exelon will target a 60% dividend payout ratio. We expect dividend growth in line with our 7% annual earnings per-share growth forecast through 2025.

Risk & Uncertainty

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to

resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation 03 Aug 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes

Exelon Reports Solid Second Quarter Results as it Plans to Issue Equity to Fund Capital Investment Plan 03 Aug 2022

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon announced plans to issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.

Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.

Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.

In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates 14 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-

Analyst Notes

last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Dominion Energy has transitioned to a predominantly rate-regulated utility operating in highly constructive regulatory environments. The company's five-year $37 billion capital investment plan focusing on clean energy supports our 6.5% annual earnings growth forecast. Virginia is the company's most important subsidiary and has the most constructive regulation. Dominion expects 90% of its capital investment in the region will be eligible for rate riders, reducing regulatory risk in an inflationary environment.

We think Entergy has several advantages over its peers in an inflationary environment. The company's five southeast utilities should benefit from a jump in U.S. energy demand, constructive state regulation, and substantial opportunities for clean energy growth. More than 90% of Entergy's investments flow through customer rates with little regulatory lag. This minimizes the impact from inflation. We expect Entergy to invest $4 billion annually through 2025 to upgrade its expansive grid and replace coal generation with mostly solar. This supports our annual earnings growth estimate at the high end of management's 7%-9% target.

Constructive regulation in Florida supports industry-leading returns and growth for NextEra Energy. Florida's highly constructive rate-setting mechanisms support investment in the state. NextEra benefits from one of the highest allowed returns in the industry. The utility also has among the lowest electricity bills and highest customer growth across its peer group, helping protect itself in an inflationary environment. At the company's competitive renewable business, NextEra is well positioned to for the clean energy transition. A U.S. Department of Commerce anti-circumvention investigation regarding the import of solar panels from certain Asian countries had created uncertainty to the company's near-term development program; however, the Biden administration's recent decision to not apply solar panel tariffs for at least the next two years brings near-term clarity.

NiSource's transition from coal to renewable energy in Indiana along with regulatory support in the states where it operates natural gas systems should support more than $10 billion of investment over the next four years and 8% annual earnings growth, among the highest in the sector. We think this is an opportunity to buy a high-growth utility at a discount to recent market acquisitions involving similar natural gas distribution utilities. New CEO Lloyd Yates could shake up NiSource's portfolio to capitalize on those market valuations while boosting the share of earnings from its high-growth electric business.

For a more detailed analysis of how inflation affects utilities, see our latest reports, "Inflation Unraveling U.S. Utilities' Safety Net" and "Utility Regulation Critical To Manage Inflation Risk."

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
45.83 USD	41.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest reports, "Inflation Unraveling U.S. Utilities' Safety Net" and "Utility Regulation Critical To Manage Inflation Risk."

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected 06 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
45.83 USD	41.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

For more on our long-term solar growth outlook for U.S. utilities, see our report, "U.S. Utility-Scale Solar: Top Picks Hiding In Shadows." Our most recent utilities sector report, "Constructive Utility Regulation Critical to Reduce Inflation Risk," addresses key issues that we think will impact our top utilities picks, including NextEra Energy and NiSource.

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results 09 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities

Analyst Notes

Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

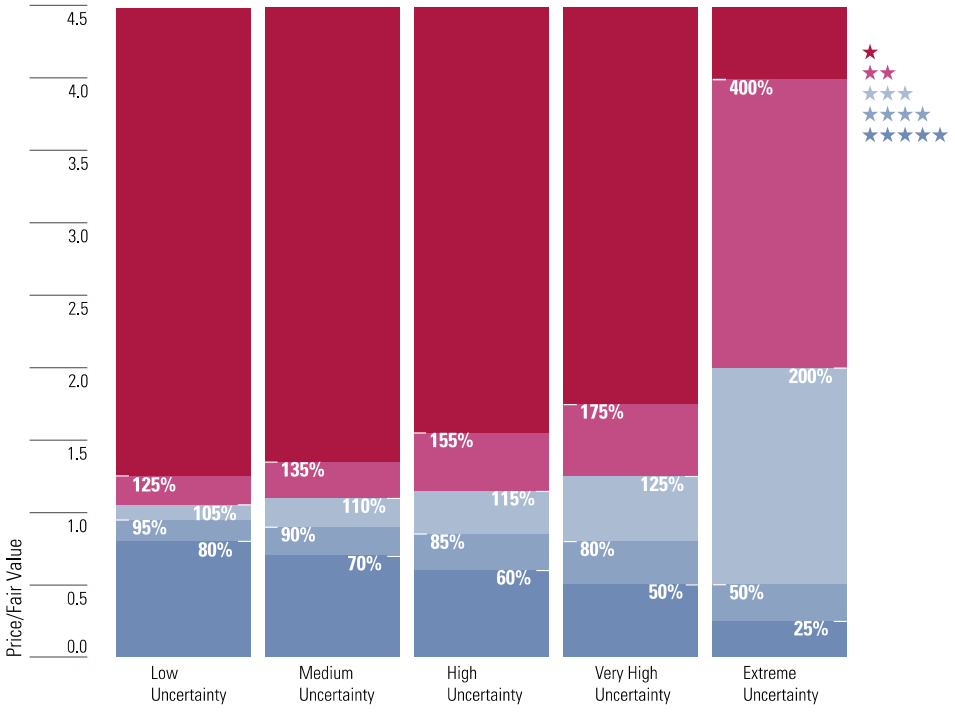
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Exelon Reports Solid Second Quarter Results as it Plans to Issue Equity to Fund Capital Investment Plan

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon announced plans to issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.

Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.

Sector
Utilities

Industry
Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.

In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2025, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $29 billion of capital investment through 2025. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should gradually increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2025, the midpoint of management's 6% to 8% earnings guidance. We forecast $29 billion of capital expenditures through 2025 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing

Exelon Corp EXC ★★ 2 Aug 2022 21:20, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
45.83 USD 2 Aug 2022	41.00 USD 11 May 2022 20:37, UTC	1.12	44.92 USD Bil 2 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Exelon Corp EXC ★★ 2 Aug 2022 21:20, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
45.83 USD 2 Aug 2022	41.00 USD 11 May 2022 20:37, UTC	1.12	44.92 USD Bil 2 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Andrew Bischof, CFA, CPA, Senior Equity Analyst, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

Exelon Corp EXC ★★ 2 Aug 2022 21:20, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
45.83 USD 2 Aug 2022	41.00 USD 11 May 2022 20:37, UTC	1.12	44.92 USD Bil 2 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected Andrew Bischof, CFA, CPA, Senior Equity Analyst, 6 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an

initial DOC report this fall.

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results
Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 May 2022
We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022
We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Exelon Corp EXC ★★ 2 Aug 2022 21:20, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
45.83 USD 2 Aug 2022	41.00 USD 11 May 2022 20:37, UTC	1.12	44.92 USD Bil 2 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate Andrew Bischof, CFA, CPA, Senior Equity Analyst, 2 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

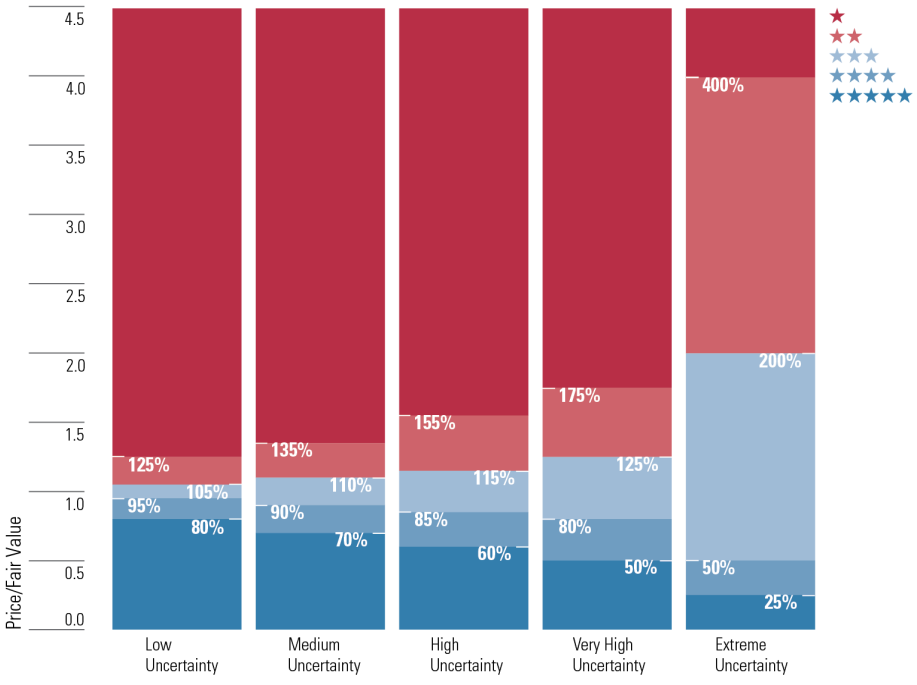
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close

Morningstar Equity Research Star Rating Methodology



tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the suitability of such investments and recommendations in the light of their own investment objectives, experience, taxation status and financial position.

The information, data, analyses and opinions presented herein are not warranted to be accurate, correct, complete or timely. Unless otherwise provided in a separate agreement, neither Morningstar, Inc. or the Equity Research Group represents that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction the recipient is located.

Except as otherwise required by law or provided for in a separate agreement, the analyst, Morningstar, Inc. and the Equity Research Group and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions within the report. The Equity Research Group encourages recipients recipients of this report to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an in vestment decision and when deemed necessary, to seek the advice of a legal, tax, and/or accounting professional.

The Report and its contents are not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Morningstar, Inc. or its affiliates to any registration or licensing requirements in such jurisdiction.

Where this report is made available in a language other than English and in the case of inconsistencies between the English and translated versions of the report, the English version will control and supersede any ambiguities associated with any part or section of a report that has been issued in a foreign language. Research Methodology for Valuing Companies

- Morningstar, Inc. may hold a long position in the security subject of this investment research report that exceeds 0.5% of the total issued share capital of the security. To determine if such is the case, please click http://msi.morningstar.com and http://mdi.morningstar.com.
- Analysts' compensation is derived from Morningstar, Inc.'s overall earnings and consists of salary, bonus and in some cases restricted stock.
- Neither Morningstar, Inc. or the Equity Research Group receives commissions for providing research nor do they charge companies to be rated.
- Neither Morningstar, Inc. or the Equity Research Group is a market maker or a liquidity provider of the security noted within this report.
- Neither Morningstar, Inc. or the Equity Research Group has been a lead manager or co-lead manager over the previous 12-months of any publicly disclosed offer of financial instruments of the issuer.
- Morningstar, Inc.'s investment management group does have arrangements with financial institutions to provide portfolio management/investment advice some of which an analyst may issue investment research reports on. However, analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them.
- Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a financial institution the security of which is the subject of this report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s proxy statement, "Security Ownership of Certain Beneficial Owners and Management" section https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx
- Morningstar, Inc. may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Further information on Morningstar, Inc.'s conflict of interest policies is available from https://shareholders.morningstar.com. Also, please note analysts are subject to the CFA Institute's Code of Ethics and Standards of Professional Conduct.

For a list of securities which the Equity Research Group currently covers and provides written analysis on please contact your local Morningstar office. In addition, for historical analysis of securities covered, including their fair value estimate, please contact your local office.

For Recipients in Australia: This Report has been issued and distributed in Australia by Morningstar Australasia Pty Ltd (ABN: 95 090 665 544; ASFL: 240892). Morningstar Australasia Pty Ltd is the provider of the general advice ('the Service') and takes responsibility for the production of this report. The Service is provided through the research of investment products.

To the extent the Report contains general advice it has been prepared without reference to an investor's objectives, financial situation or needs. Investors should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. KeyBanc Capital Markets

Alert

August 03, 2022

Energy: Electric Utilities

NYSE: EXC

Exelon Corporation

EXC: No Surprises in the Quarter, but the IRA Could Bring a Bigger Tax Bill

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

EXC reported an in line quarter, reiterated guidance, and detailed progress on the regulatory activity underway at its various jurisdictions. Of note is the Company providing additional color on the $1B planned equity issuance, with $500M scheduled for 2022. Management also quantified the potential impact of the minimum corporate tax proposed in the Inflation Reduction Act of 2022 — pegging it at $300M of additional cash taxes starting in 2024. It is still not clear what the additional cash taxes will mean for long-term capital plans or financial plans, or what the net impact could be after mitigants are considered. That said, the 2022 EPS guidance of $2.18-$2.32 remains intact as is the 6-8% long-term EPS growth rate.

2Q22 earnings mostly in line, guidance unchanged:

- EXC reported a mostly in line quarter with adjusted EPS of $0.44 modestly below our forecast and consensus of $0.46. Below we present a breakdown of our segment estimates vs. reported results.
- Management reiterated the 2022 adjusted EPS guidance of $2.18-$2.32 (our estimate is $2.26) while also maintaining the long-term operating earnings target of 6-8% through 2025 (off the 2021 midpoint).

Figure 1 - 2Q22 Earnings Breakdown

2Q22	EXC	KBCM
ComEd	0.23	0.26
PECO	0.14	0.08
BG&E	0.04	0.04
PHI	0.10	0.14
Parent	(0.07)	(0.06)
EXC	**0.44**	**0.46**
Consensus	**0.46**	

Source: Company Reports, KBCM Estimates and Thomson Reuters

Equity issuance to commence; ROE improvement should follow: EXC reported a 12-month trailing earned ROE of 8.8%, but maintained a goal of moving it up to the targeted 9-10% range by the end of the year through a combination of new rate implementation (including the transition of ComEd away from an FRP to standard rate making), ongoing operating efficiency efforts, and a planned equity infusion. Management provided some details on the planned $1B equity issuance through 2025. The Company plans to establish a $1B ATM program and anticipates using half of that in 2022 through one or more methods, including an ATM, or a block offering. Timing for the remainder $500M issuance remains TBD.

Inflation Reduction Act — the positive impact of clean energy tax credits could be partially offset by the 15% minimum corporate tax rate: EXC outlined the impact that the 15% minimum corporate tax rate could have on EXC's cash tax payments. If passed into law as currently written, the bill would result in ~$300M in additional cash taxes for EXC per year effective 2024. It is unclear how this development will impact EXC's multi-year capex plan, the Company's financing plans, or how the mechanics of the higher cash taxes will flow through to customers. Management is unlikely to provide an update earlier than the normally timed annual update scheduled for early 2023, but in the meantime will evaluate potential offsets, including prioritizing capital projects, O&M management, etc.

Regulatory update:

- **ComEd IL FRP:** Proceedings continue in EXC's FRP in IL. Staff filed testimony recommending a $195M revenue increase, in line with ComEd's formula rate plan proposal for a $199M revenue increase. Staff and ComEd's increases are premised on a 7.85% ROE, 49.45% equity, and a rate base of ~$14B. ROE calculation in the FRP is formulaic. ComEd's previous rate plan was approved at a 7.36% ROE in 2021. A final decision is expected toward the end of the year, with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL. EXC is currently engaged in finalizing the PBR framework that will make its way into the next rate case, which is expected to be filed in early 2023 for rates effective in 2024.
- **PECO PA gas rate case:** PECO is seeking an $82M rate increase on a 10.95% ROE, 53.41% equity, on a rate base of $2.9B. The rate increase intends to cover gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at a 10.24% ROE in mid-2021. A final decision is expected by the end of 2022 with new rates effective in January 2023.
- **Delmarva MD multi-year rate case:** This is Delmarva's first multi-year plan filing in MD after the PSC adopted rules in 2020 allowing multi-year rate plans. EXC is requesting a cumulative rate increase of $37.5M for the three years 2023-2025, based on a 10.25% ROE and 50.5% equity layer. DP&L is requesting (Docket No. 9681) a net increase in rates after accelerating the refund of certain regulatory liabilities of $11.4M in 2023, $11.6M in 2024, and $14.5M in 2025. A PSC decision is expected before the end of the year with new rates effective Jan 1, 2023.
- **Delmarva's DE gas rate case:** Staff recently ordered interim rates of $20.3M effective August 14, subject to refund. EXC is expected to file rebuttal testimony on August 15, after Staff proposed a $9.0M revenue increase premised on a 9.28% ROE and 49.94% equity. Excluding the $5.8M DSIC currently in rates, the proposed net increase is $3.8M. This compares to EXC's request for a $20.3M rate increase based on a 10.3% ROE and 50.63% equity. The increase includes $5.8M for the distribution system improvement charge, making the net increase requested $14.5M. A decision is expected in early 2023.

Disclosure Appendix

Important Disclosures

Exelon Corporation - EXC

We have managed or co-managed a public offering of securities for Exelon Corporation within the past 12 months.

Exelon Corporation is an investment banking client of ours.

We have received compensation for investment banking services from Exelon Corporation during the past 12 months.

We expect to receive or intend to seek compensation for investment banking services from Exelon Corporation within the next three months.

During the past 12 months, Exelon Corporation has been a client of the firm or its affiliates for non-securities related services.

As of the date of this report, we make a market in Exelon Corporation.

Current analyst Sophie Karp assumed coverage on June 4, 2019. Rating and price target activity prior to that date was the work of a previous analyst.

Power & Utilities August 3, 2022

The Guggenheim Daily Transmission: Pensions, WEC, PEG, CNP, OGS, PNW, PPL, ETR, NI, EXC, ALE, AVA, Policy, Uranium, IL/MISO, NRG/PJM

For details on our Guggenheim-hosted client Utility events including: our DTE NDR; POR NDR; NEE NDR; CEG NDR; WEC NDR; OGS NDR; and other events, scroll down…

Utilities — Life, Death… and Pension Expense? (see our note HERE)

WEC – 2Q22 Beat and Raise; Firing on All Cylinders (see note HERE)

PEG – 2Q in Line; Pension Impacts Cast a Cloud, but Nuclear and OSW Value Debate Continues (see note HERE)

CNP – 2Q EPS Beat; Optimization and Organic Growth Build on "Resiliency Now" Upside with Financing Flexibility (see note HERE)

OGS – Q2 Pension Plan Remeasurement Removes 2022 Overhang; Strong Regulatory and Operational Execution Continues (see note HERE)

PNW reports 2Q22 EPS of $1.45 vs. Gugg/consensus at $1.46/$1.31; maintained 2022 guidance of $3.90-$4.10 ($4.00 midpoint) vs. Gugg/consensus at $4.05/$4.01; maintained 5%-7% EPS CAGR through 2026 (based off of current 2022 guidance midpoint)

PPL – **PPL reports 2Q22 earnings**

ETR reported 2Q22 EPS of $1.78 vs. $1.37 consensus and our $1.43 estimate; 2022 EPS guidance reiterated and now in top half

NI reports 2Q22 net operating EPS of $0.12 vs Gugg/consensus at $0.15/$0.12; maintains 2022 guidance of $1.42-$1.48 ($1.45 midpoint) vs Gugg/consensus at $1.45/$1.45; reiterates 7%-9% 2021–2024 CAGR based on 2021's $1.37 actual, and 5%-7% growth through 2023

EXC – **EXC reports 2Q22 earnings**

ALE – **ALE reports 2Q22 earnings**

AVA reports 2Q22 EPS of $0.16 vs Gugg/consensus at $0.29/$0.16; maintained existing 2022 EPS range of $1.93-$2.13 (pointing to lower end), and compared to Gugg/consensus at $1.94/$1.95; reiterated 2023 EPS guidance of $2.42-$2.62 ($2.52 midpoint) vs Gugg/consensus at $2.47/$2.47

Policy – Inflation Reduction Act could see floor vote as soon as this week

AVA – Washington Public Counsel opposes rate increase requests by Avista Utilities

Uranium – Additional uranium producers point to restarts as secondary stockpiles dwindle

IL/MISO – IPA approves operating permit for new CCGT; draws pushback from ICJC

NRG/PJM – NRG files to deactivate additional PJM units

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

PNW reports 2Q22 EPS of $1.45 vs. Gugg/consensus at $1.46/$1.31; maintained 2022 guidance of $3.90-$4.10 ($4.00 midpoint) vs. Gugg/consensus at $4.05/$4.01; maintained 5%-7% EPS CAGR through 2026 (based off of current 2022 guidance midpoint)

- +$0.20 weather impact vs. normal in 2Q22
- No quantification of currently projected 2023 pension/OPEB drag; recall that our estimate stands at $0.38 (see our note HERE)
- Reiterated 1.5%-2.5% customer growth guidance through 2024
- Reiterated ~1.5%-2.5% weather-normalized retail electricity sales growth in 2022, and electric sales growth of 3.5%-4.5% through 2024
- Capex plan unchanged: $4.7bn for 2022-2026 reiterated; rate base guidance reiterated as well
- Still no plans to issue equity before conclusion of yet-to-be-filed next rate case
- 2019 GRC: Court of Appeals process remains ongoing **(**more **HERE)**
- Original 2022 guidance was $3.80-$4.00 ($3.90 midpoint); LT CAGR grows off higher 2022 guidance, not this figure, however
- Conference call will be at **11am ET: 888-506-0062 (PIN: 507998)**

PPL — PPL reports 2Q22 earnings

- PPL reported $0.30 vs. our $0.28 and Cons $0.29
- Reaffirmed guidance of $1.30-1.45 (partial year of RI) and 6-8% LT growth off proforma 2022 $1.40-1.55
- Provides color on O&M savings targets to '25 in deck (HERE)
- Call at 11am ET - 1-888-346-8683 code 0662630

ETR reported 2Q22 EPS of $1.78 vs. $1.37 consensus and our $1.43 estimate; 2022 EPS guidance reiterated and now in top half

- ETR reported 2Q22 EPS of $1.78 vs. $1.37 consensus and our $1.43 estimate.
- ETR recorded $$0.24 benefit vs. normal weather in 2Q and weather adjusted sales were 4.6% above the same quarter last year.
- ETR anticipates the benefits of sales volumes to be partially offset by flex spending increases, higher interest costs (-5c utility, -10c holdco)
- ETR now expects 2.9% annualized load growth vs. 2.0% prior.
- ETR reiterated 2022 EPS guidance of $6.15-6.45, and is now in the top end of the range.
- ETR LT EPS guidance reiterated.

NI reports 2Q22 net operating EPS of $0.12 vs Gugg/consensus at $0.15/$0.12; maintains 2022 guidance of $1.42-$1.48 ($1.45 midpoint) vs Gugg/consensus at $1.45/ $1.45; reiterates 7%-9% 2021–2024 CAGR based on 2021's $1.37 actual, and 5%-7% growth through 2023

- Reaffirmed 2024 EPS guidance with unchanged (2Q22 HERE, and 1Q22 HERE) slide 8 of presentation detailing EPS increments/decrements to **maintain 2024 EPS guidance** despite delayed solar in-service dates vs prior plans.
- NI continues to guide to $10bn in 2021–2024 capex, with ~$2bn for renewable projects expected, primarily between 2022–2024, with **any remainder expected in 2025** (*this is the same 2025 messaging as per 1Q22 call*)
- Reiterated rate base CAGR guidance of 10%–12% **for each of the company's businesses through 2024**.
- Reiterated coal retirement plans from 1Q22 call: Schahfer Generating Station Units 17 & 18 (the last two coal units) are now expected to retire by the end of 2025 vs 2023 previously. However, Michigan City Generating Station still expected to retire on schedule between 2026-2028.
- Maintained 2021–2024 financing plan and target of LT adjusted FFO/total debt of **~14%–15%**
- **2021 IRP update:** new RFP solicitation process expected to launch in August 2022
- Conference call will be held at **11:00am ET —** Dial-in: **(888) 330-2391...** Access code: **28323**

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

EXC – EXC reports 2Q22 earnings

- EXC reported $0.44 vs. Gugg/Consensus $0.46
- Reaffirmed 20222 guidance of $2.18-2.23 (vs. Gugg $2.27)
- Results include $0.07 of drags at PHI ($0.05, net of higher distribution rates)
- Expects to issue $500mm in equity via ATM over remainder of year, or a block (a part of the previously-disclosed $1bn by '25)
- Call at 10am EST - registration HERE

ALE – ALE reports 2Q22 earnings

- ALE reported $0.67 vs. Gugg $0.64, Consensus $0.60
- Results included $0.07 of adjustments and $0.03 of fees tied to the purchase of NEE
- ALE reaffirmed 2022 guidance of $3.60-3.90 (vs. Gugg $3.75)
- Results included a drag at ACE from SPP congestion and 'extreme volatility' impacting the Caddo wind farm
- NEE has contributed ~$17mm in revenue since April
- Call at 10am EST – registration HERE

AVA reports 2Q22 EPS of $0.16 vs Gugg/consensus at $0.29/$0.16; maintained existing 2022 EPS range of $1.93-$2.13 (pointing to lower end), and compared to Gugg/consensus at $1.94/$1.95; reiterated 2023 EPS guidance of $2.42-$2.62 ($2.52 midpoint) vs Gugg/consensus at $2.47/$2.47

- "Other business" segment contribution to 2022 EPS guidance raised by $0.10
  - "Earnings at our other businesses increased due to net investment gains recognized during the period primarily due to fair value adjustments in certain equity investments, resulting in net unrealized gains." - AVA 2Q22 earnings release
- Avista Utilities' segment contribution to 2022 EPS guidance lowered by $0.10
  - "Earnings at Avista Utilities were lower than expected, primarily due to a write-off of the Dry Ash Disposal project at Colstrip as agreed upon in our 2022 Washington rate case settlement, as well as increased costs due to the impacts of rising interest rates and inflation." – AVA CEO
- Alaska Electric Light & Power filed a general rate case in July, as planned
- **Financing plans:**
  - **Debt:** $400m of LT debt issued in 1Q22, with no expectation of further issuances this year
  - **Equity:** AVA expects to issue $135m of equity in 2022 (vs $120m previously), including $60.8m issued during 1H22
- Conference call will be held at **10:30am ET —** Dial-ins use **personal PIN numbers**, generated by registering HERE

Policy – Inflation Reduction Act could see floor vote as soon as this week

- The timing data point from the Washington Post comes as Senator Sinema's stance remains unclear
- "We are on schedule to consider this bill later this week" - Senator Schumer
- More HERE

Guggenheim takeaway: *Interesting timing data point as Senator Sinema's views remain shrouded and Republicans continue to hammer on the legislation. As noted by the Washington Post, this will likely be a more protracted process given the intricacies of reconciliation and the ability for roadblocks to be thrown up in the process.*

AVA – Washington Public Counsel opposes rate increase requests by Avista Utilities

- "For Avista, the unit says the settlement provides rates over two years that are about $47 million too high for electric rates and $7 million too high for natural gas rates." - Washington Attorney General's office
- Public Counsel's announcement HERE

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

- Rate case docket HERE

Guggenheim takeaway: *No surprise, as the Public Counsel always takes this stance. The question now is how much influence the Public Counsel's opinion will have in swaying the final order, given supportive legislation and a settlement involving all relevant parties other than the Public Counsel itself.*

Uranium – Additional uranium producers point to restarts as secondary stockpiles dwindle

- Additional operators are restarting mines according to attendees at the Digger & Dealers Mining Forum in Australia, with one CEO putting the forecasted annual deficit at 40mm lbs. in the coming years
- More HERE

Guggenheim takeaway: *Minor FYI.* ***See our deep dive uranium baseline note from 1Q HERE for more thoughts.***

IL/MISO – IPA approves operating permit for new CCGT; draws pushback from ICJC

- The 1.1GW CCGT would be operational in 2024 and have the ability to co fire varying levels of hydrogen
- Plant HERE
- More HERE

Guggenheim takeaway: *Interesting power data point following the passage of CEJA last year as MISO Zone 4 remains tight on capacity.*

NRG/PJM – NRG files to deactivate additional PJM units

- Joliet Units 6-8 represent 1.3GW of gas-fired ST capacity, with NRG requesting deactivation by 06/2023
- More HERE

Guggenheim takeaway: *Zero surprise given NRG's retirement actions following last year's BRA.*

Equity Research | Corporate Access

DTE Energy Company (DTE)

Jerry Norcia, *Chief Executive Officer*

Barbara Tuckfield, *Director, Investor Relations*

Date

August 8 & 9, 2022
New York

Meeting Format

NDR - 1:1 Meetings, Group Meeting

Company Information

Market Cap: $25.7bn

DTE Energy Co. (DTE) operates as a diversified energy company, which engages in the development and management of energy-related businesses and services. It operates through the following segments: Electric, Gas, DTE Vantage, Energy Trading, and Corporate and Other. The Electric segment consists of generation, purchase, distribution, and sale of electricity to residential, commercial, and industrial customers in southeastern Michigan. The Gas segment is involved in the purchase, storage, transportation, distribution, and sale of natural gas to residential, commercial, and industrial customers throughout Michigan, and the sale of storage and transportation capacity. The DTE Vantage segment focuses on projects that deliver energy and utility-type products and services to industrial, commercial, and institutional customers, produce reduced emissions fuel, and sell electricity and pipeline-quality gas from renewable energy projects. The Energy Trading segment covers energy marketing and trading operations. The Corporate and Other segment composed of various holding company activities, holds certain non-utility debt, and holds certain investments, as well as funds supporting regional development and economic growth. The company was founded in January 1995 and is headquartered in Detroit, MI. (Source: FactSet)

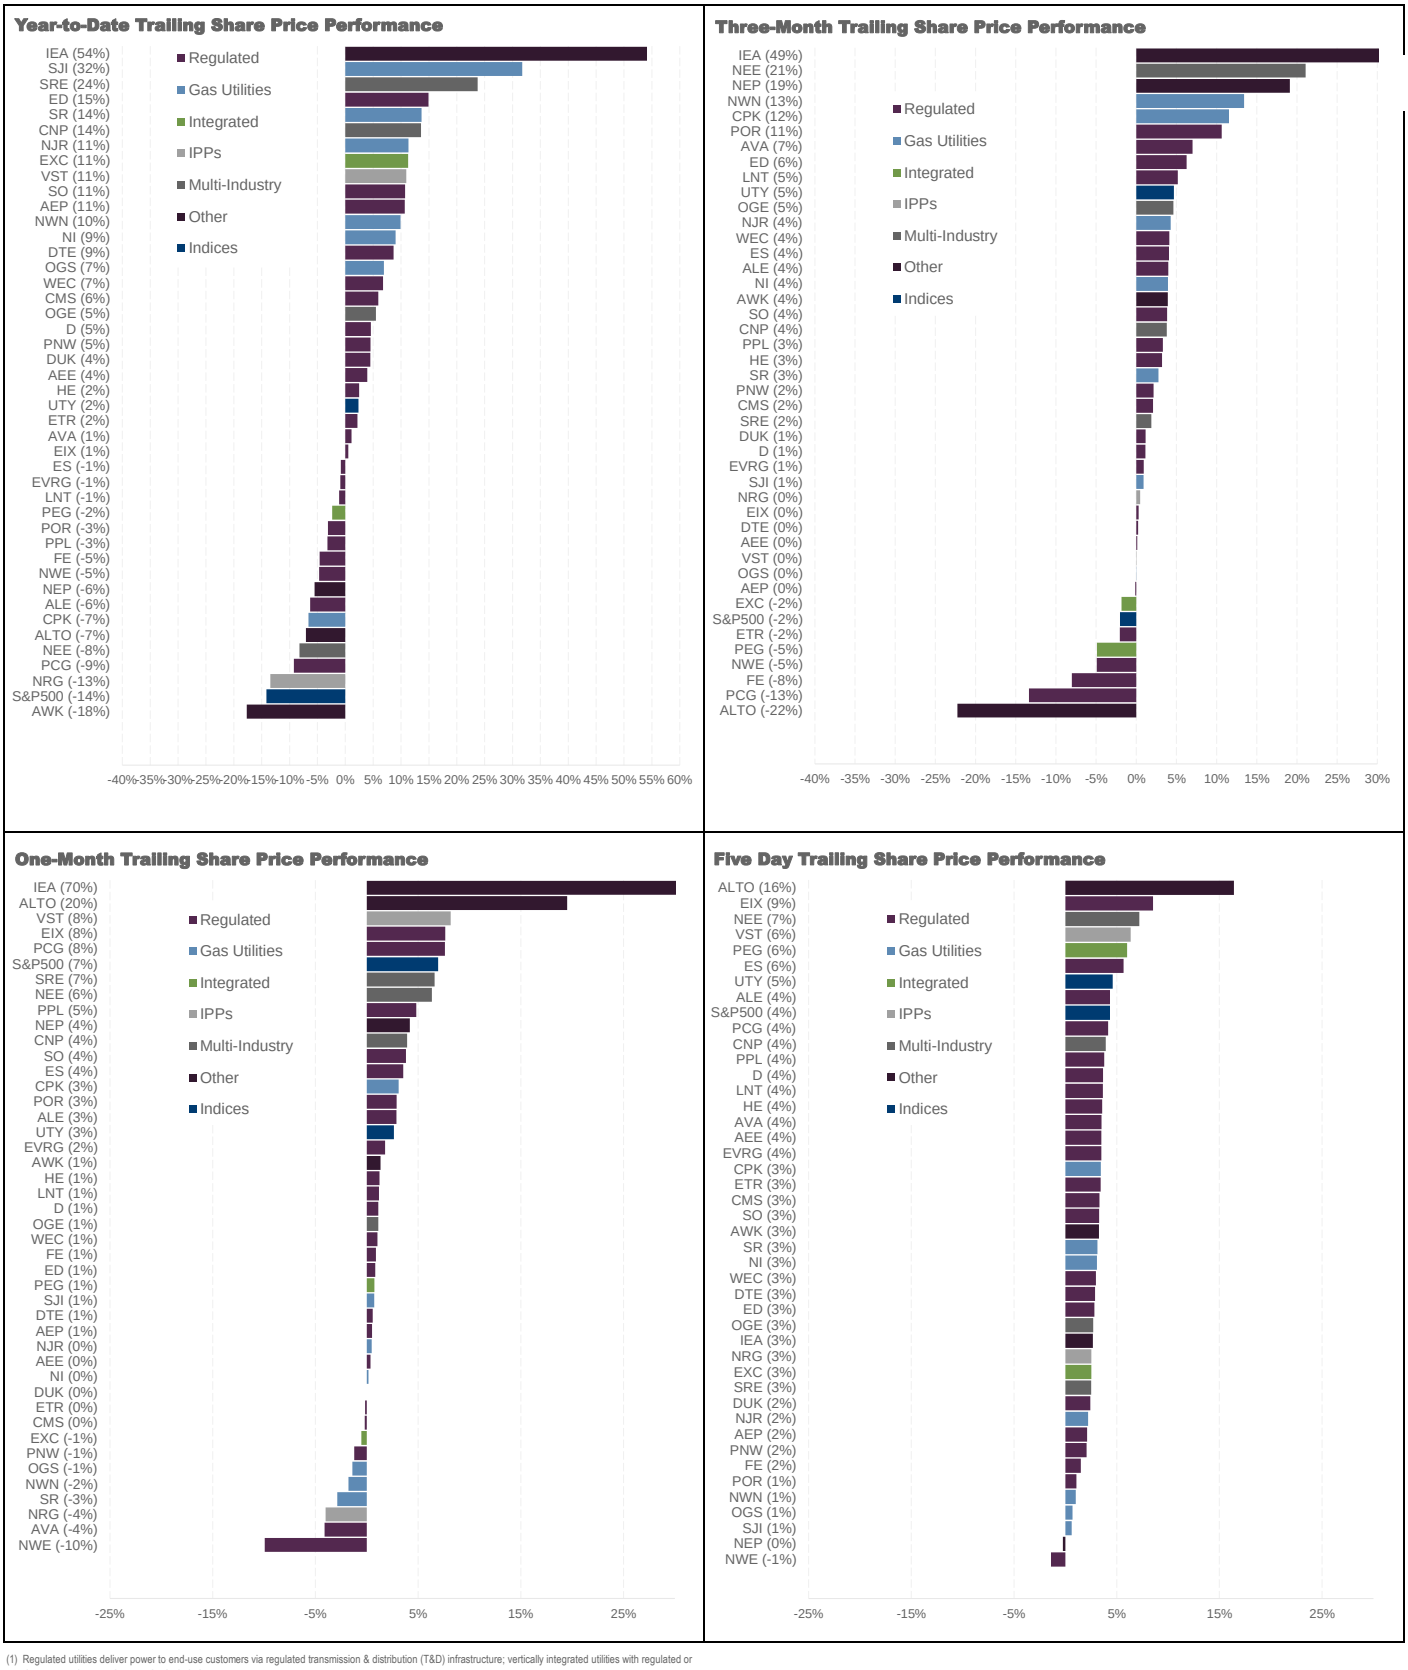
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

J.P. Morgan Securities LLC

- **2Q22 lands just below estimates; 2022 EPS guide reaffirmed.** EXC reported 2Q22 adj EPS of $0.44, slightly behind the $0.46 JPM/Street median estimate, but consistent with the 44-46c range implied by EXC's 2022 guidance and 20% 2Q earnings seasonality. Distribution rate increases boosted ComEd and PECO by +3c each. BGE landed -1c lower YoY, as higher D&A and other more than offset higher rates. Similarly, PHI declined -5c YoY on unfavorable weather/load (-1c), credit losses (-1c) and several timing items (-4c), net of several other drivers. Excluding ExGen separation impacts on comparability, EXC's parent drag widened -1c on higher interest expense. EXC reaffirmed its 2022 guidance range of $2.18-2.32 (JPMe/Street median $2.29/$2.26).

- **Financing update identifies $500mm of 2022 equity, clarifying timing to $1bn total plan equity need.** EXC reiterated its $1bn total 2022-2025 equity need and now expects to issue $500mm in 2022 using the ATM or a one-time offering (or combination of both), leaving the remaining $500mm for 2023-2025. This update brings the first incremental clarity to equity timing since EXC's January analyst day and meaningfully defines overall timing considerations relative to the company's prior market conditions/potential cash need-focused messaging. The somewhat front-end loading is generally unsurprising given management's prior commentary around 1Q equity infusions into the utilities. With the company's to-be-established $1bn ATM sized to cover all targeted equity, we see the annual issuance needs as modest overall, although acknowledge the potential for a block issuance could create a minor equity overhang.

- **MD/DC regulatory backdrop improvement underappreciated.** Our NARUC meetings continue to highlight MD's commitment to maintain an improved regulatory environment, even after three RRA upgrades over the past three years. This dynamic extends to stated aspirations for future RRA upgrades, plus ongoing commission modernization efforts (new docket to modernize) and an expanding PSC headcount. Even with employing gradualism, our conversations lead us to believe that MD will continue to authorize ROEs above industry averages and utilize multi-year planning to mitigate regulatory lag. DC also highlighted a constructive outlook. Bottom line, we continue to believe the market underappreciates the material improvements in the MD regulatory environment, which fed into our EXC upgrade.

- **Conference call details.** EXC will host a webcast to discuss 2Q22 results on Wednesday, August 3 at 10:00 AM EDT.

See page 3 for analyst certification and important disclosures.
J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Table 1: EXC 2Q22 Results

Income Statement:	Actual 2Q21	Actual 2Q22	JPM 2Q22E	% Chg Y/Y	% Chg vs JPMe	YoY Drivers
Adj Op EPS by Segment						
ComEd	$0.20	$0.23	$0.22	18%	4%	+3c distribution rates
PECO	$0.11	$0.14	$0.11	26%	19%	+3c distribution rates
BGE	$0.05	$0.04	$0.05	-19%	-17%	+1c distribution rates, -1c D&A, -1c other
PHI	$0.15	$0.10	$0.15	-30%	-30%	+2c distribution rates, -1c w eather/load, -1c credit losses, -1c D&A, -1c tax timing, -3c other timing

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Coverage Universe: Tonet, Jeremy: AltaGas Ltd (ALA.TO), Ameren Corporation (AEE), American Electric Power (AEP), Antero Midstream Corp (AM), Aris Water Solutions, Inc (ARIS), CMS Energy Corporation (CMS), CenterPoint Energy, Inc. J.P. Morgan Equity Research Ratings Distribution, as of July 02, 2022

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	52%	37%	12%
IB clients**	50%	44%	34%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	72%	65%	52%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

EQUITY RESEARCH QUICK TAKE

RBC Capital Markets, LLC
Shelby Tucker, CFA (Analyst)
(212) 428-6462, shelby.tucker@rbccm.com

August 3, 2022

Exelon Corporation

2-cent miss on 2Q22 earnings; reaffirms 2022 guidance range

NYSE: EXC | USD 45.83 | Sector Perform | Price Target USD 47.00

Sentiment: Neutral

Our view: Despite a modest earnings miss, we believe the stock should perform in line with peers. We incorporated $500M equity issuance in the remainder of 2022 and do not believe the equity issuance update should impact our earnings estimates for the year. We expect questions today related to the cadence of remaining $500M issuances during 2023-2025. On the call, we expect topics to cover corporate minimum tax rate, potential opportunities from the Inflation Reduction Act, expectation on ComEd's next rate filing, conversations with credit rating agencies, and other regulatory activities.

EXC reported 2Q22 adjusted EPS of $0.44, compared to our estimate of $0.48 and consensus of $0.46. EXC reaffirms 2022 adjusted EPS range of $2.18-$2.32. EXC's trailing 12-month ROE was 8.8%, down from 8.9% last quarter. EXC expects ROE to return to 9-10% targeted range by year-end.

Update on equity issuance. EXC continues to expect $1 billion of equity issuance through 2025. In 2022, EXC will establish a $1 billion ATM program and anticipates issuing $500M either through this ATM, a one-time common equity offering, or a combo of these methods. EXC expects to complete the remaining $500M in 2023-2025 and will provide updates on ATM activities in future earnings calls.

Regulatory updates. EXC anticipates final order of the DPL Delaware gas base rate case in 1Q23 and that for PECO gas base rate in Nov-Dec 2022. For electric, the company expects a final order for ComEd and DPL Maryland cases in Dec 2022.

Below shows segment results compared to our estimates:

- **Utilities: $0.51 vs. $0.56 RBCe.** Negative variance primarily due to higher operating expenses and higher credit loss expense at PHI. Higher operating expenses included a 3-cent expense this quarter related to higher contracting costs partially due to timing of maintenance projects and higher interest expense.
- **Corporate: -$0.07 vs. -$0.08 RBCe.** No noteworthy variances.

A conference call is scheduled for 10AM ET. Please register for a dial-in here.

All values in USD unless otherwise noted. Priced as of prior trading day's market close, EST (unless otherwise noted).

Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Exelon Corporation in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Exelon Corporation in the past 12 months.

RBC Capital Markets, LLC makes a market in the securities of Exelon Corporation.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Exelon Corporation during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Exelon Corporation.

RBC Capital Markets is currently providing Exelon Corporation with non-investment banking securities-related services.

RBC Capital Markets has provided Exelon Corporation with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Exelon Corporation with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.
As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

Capital Markets

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

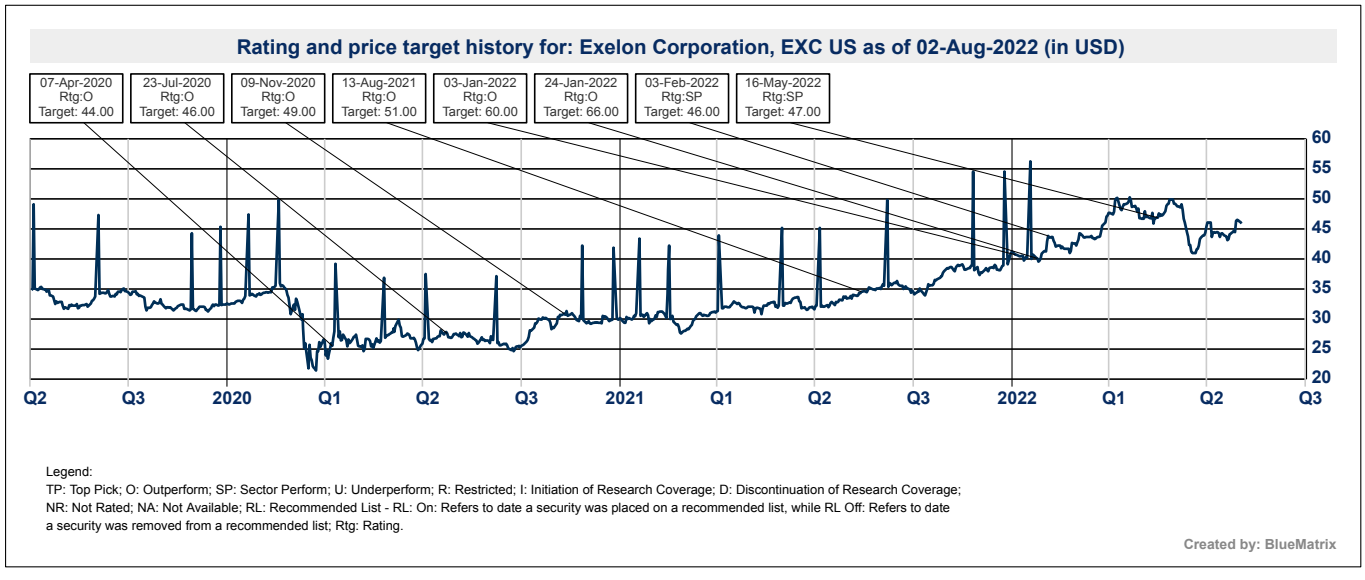
For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings

RBC Capital Markets, Equity Research

As of 30-Jun-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	851	58.41	290	34.08
HOLD [Sector Perform]	560	38.44	169	30.18
SELL [Underperform]	46	3.16	6	13.04



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Exelon Corporation

Valuation

Our $47 price target assumes a 19.3x P/E multiple on 2023E utilities EPS of $2.42. Our multiple reflects a slight 2.5% discount to our

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

base case blended electric and gas multiple of 19.8x, resulting in equity value per share of $47. While we believe Exelon utilities have a similar profile to industry peers (6–8% EPS CAGR and 7–8% rate base CAGR), we give consideration for some regulatory overhang and lower ROE at ComEd currently. Our price target supports a Sector Perform rating.

Risks to rating and price target

- Deteriorating credit metrics at utilities limit capital investments and/or lead to equity dilution
- Dividend growth slows
- Approval of decoupling mechanisms for remaining utilities leads to improved earnings and cash flow stability
- Accelerated increase in treasury rates could support higher ROEs at ComEd in the near-term

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

Exelon Corp

Slight Miss vs. Consensus; $500mm in Equity Coming in 2022

Q: How did the results compare vs expectations?

A: EXC reported 44c of operating earnings vs. consensus of 46c and UBS of 42c. The company reported 36c for Q2 '21.

Q: What were the most noteworthy areas in the results?

A: Higher distribution rates were +9c yoy, while higher interest costs and timing of O&M were -4c. The absence of legacy Constellation costs at the Parent was +9c.

Q: Has the company's outlook/guidance changed?

A: The company reaffirmed 2022 guidance of $2.18-$2.32/share. The company updated its equity financing plan. The previous plan was $1.0bn issued '22-'25, EXC continues to see $1.0bn issued, but will be establishing an ATM program and anticipates issuing $500mm through the program or via one-time offering in 2022.

Q: How would we expect investors to react?

A: Neutral to negative. The slight miss vs. consensus and the front loading of half equity issuance into 2022 may weigh on the stock.

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) ESG: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/ Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

We maintain our Price Target of $49 premised on a 5% premium to the group multiple of 18.3x our $2.55/share earnings forecast for 2024. Our 5% net premium is derived from a 5% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond rounded down to the nearest 5%, a 5% premium for ESG attributes and a 5% discount for the regulatory ranking overall.

Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 03 August 2022 11:57 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2.**Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of

UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have

received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering

UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the United Arab Emirates (UAE) by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Exelon Corp. (EXC): First Take: EXC beats GS, misses consensus slightly, updates 2022 financing plans

Goldman Sachs & Co. LLC

John Miller
+1(801)884-4034 | john.y.miller@gs.com
Goldman Sachs & Co. LLC

Exelon Corp (EXC, Neutral) reported 2Q22 operating EPS of $0.44, a bit above our $0.43 estimate, but below FactSet consensus of $0.46. For 2022, EXC reaffirmed its EPS guidance range of $2.18-$2.32 which compares to GS/consensus of $2.18/$2.26. The company also outlined equity financing plans for the year — with a $500mn issuance planned for 2H2022. This comes as part of the company's previously disclosed plans to issue $1bn in new common equity between 2022-2025.

Highlights from EXC's release and results include:

- **In 2Q2022, EXC missed our forecast at ComEd, its largest segment, while beating elsewhere.** We note, on a net income basis, ComEd came in roughly $16mn below our forecast, mostly on timing given the formula rate plan structure. The PECO subsidiary, however, more than offset this, beating our view by $20mn and PHI beat by $11mn, offset by holding company costs and a small miss at BG&E.
- **EXC maintained guidance for the year,** despite higher interest rates likely leading, due to the authorized RoE formula in Illinois, to higher potential earnings power for its distribution business there.

Topics to monitor on EXC's call include: (1) current inflationary environment and impact to customer bills, (2) sources of potential upside for capital spending longer term, (3) financing needs for 2023+, (4) updates in various rate case filings, especially the gas rate case at PECO and new cases filed elsewhere and (5) insights into the ComEd electrification plan filed and the upcoming potential multi year rate plan docket in 2023.

We are Neutral rated on EXC with a $47, 12-month price target based on a 18x P/E multiple on our 2024 EPS. Key risks include utility regulation, cost management and financing.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Disclosure Appendix

Reg AC

I, Michael Lapides, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Exelon Corp. is/are relative to the other companies in its/their coverage universe: Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., Constellation Energy Corp., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., The AES Corp., WEC Energy Group, Xcel Energy Inc.

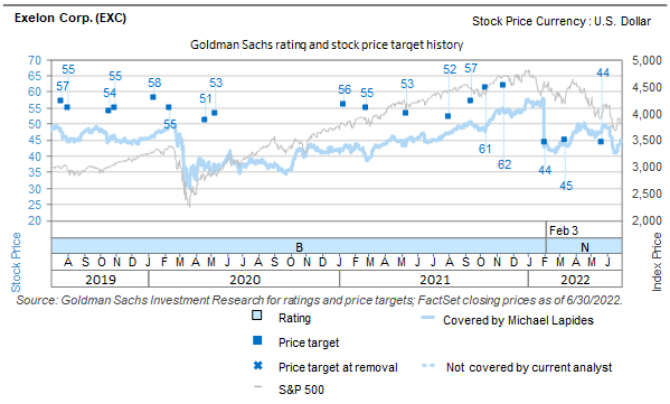
Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at:

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) have been suspended pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Effective from the date of the United Kingdom's departure from the European Union and the European Economic Area ("Brexit Day") the following information with respect to distributing entities will apply:

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: GSI, authorised by the PRA and regulated by the FCA and the PRA, disseminates research in the following jurisdictions within the European Economic Area: the Grand Duchy of Luxembourg, Italy, the Kingdom of Belgium, the Kingdom of Denmark, the Kingdom of Norway, the Republic of Finland, the Republic of Cyprus and the Republic of Ireland; GS -Succursale de Paris (Paris branch) which, from Brexit Day, will be authorised by the French Autorité de contrôle prudentiel et de resolution ("ACPR") and regulated by the Autorité de contrôle prudentiel et de resolution and the Autorité des marches financiers ("AMF") disseminates research in France; GSI - Sucursal en España (Madrid branch) authorized in Spain by the Comisión Nacional del Mercado de Valores disseminates research in the Kingdom of Spain; GSI - Sweden Bankfilial (Stockholm branch) is authorized by the SFSA as a "third country branch" in accordance with Chapter 4, Section 4 of the Swedish Securities and Market Act (Sw. lag (2007:528) om värdepappersmarknaden) disseminates research in the Kingdom of Sweden; Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research in the Federal Republic of Germany and those jurisdictions within the European Economic Area

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

where GSI is not authorised to disseminate research and additionally, GSBE, Copenhagen Branch filial af GSBE, Tyskland, supervised by the Danish Financial Authority disseminates research in the Kingdom of Denmark; GSBE - Sucursal en España (Madrid branch) subject (to a limited extent) to local supervision by the Bank of Spain disseminates research in the Kingdom of Spain; GSBE - Succursale Italia (Milan branch) to the relevant applicable extent, subject to local supervision by the Bank of Italy (Banca d'Italia) and the Italian Companies and Exchange Commission (Commissione Nazionale per le Società e la Borsa "Consob") disseminates research in Italy; GSBE - Succursale de Paris (Paris branch), supervised by the AMF and by the ACPR disseminates research in France; and GSBE - Sweden Bankfilial (Stockholm branch), to a limited extent, subject to local supervision by the Swedish Financial Supervisory Authority (Finansinpektionen) disseminates research in the Kingdom of Sweden.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Alert

August 01, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: XEL, EXC, ED, AGR, ES, SO, SRE, CNP

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We continue with earnings with CNP, PEG, OTTR, WEC, EXC, AVA, ETR, PNW, CEG, DUK, SRE, ED, and AEE scheduled to report. AY, RUN, and HASI within our alternative energy coverage will also report. Aside from earnings, we are tracking proceedings in XEL's CO gas rate case and EXC's PA gas rate case. In other news, NYS issues the third offshore wind solicitation for at least 2,000 MW; DE Staff approves interim rates in Delmarva's gas rate case; SO completes the ITAAC process for Vogtle Unit 3; SRE seeks extension for construction of Port Arthur; NY Bill credit program to assist low-income households with utility bills will be implemented August 1; and SO CEO Tom Fanning is reportedly planning to retire.

ICYMI

Don't be fooled by the name — the Inflation Reduction Act of 2022 is largely an energy/climate bill. The bill includes $370B in clean energy/climate provisions, long-dated (10 years) ITC and PTC credits, loans for zero-emission technologies, transmission expansion, and more. In our view, the legislation goes even beyond the defunct BBB in that it includes technology-agnostic ITC and PTC credits until potentially 2032 for non-GHG-emitting technologies. If passed, which we think is likely, the bill would be the largest support mechanism for alternative energy that we have seen in a long time (maybe even a decade). It is all the more surprising since just two weeks ago we thought all hopes for a comprehensive climate bill were lost. The technology-agnostic credit through 2032 should go a long way toward smoothing out the differences between the incentives for solar, wind, hydrogen, and nuclear and provide the much-needed scaffold for emerging tech such as clean hydrogen. To a large extent, the bill renders moot the many solar overhangs that have handicapped the industry for the last couple of years. Our nuclear spotlight event focused on policy support to provide the nuclear power industry with long-term support in decarbonizing the electricity generation sector. We believe that the newly introduced bill goes a long way toward doing just that.

Takeaways from a Week of Earnings

We went through a whirlwind of utility and alternative energy last week. The overarching themes as expected were: 1) are there any obvious signs of an economic slowdown, how are companies handling inflationary pressures, the potential impact of the stock market weakness on pension funding status and on the P&L, and the most recently introduced Inflation Reduction Act of 2022.

Based on management commentary, utilities are not seeing any decline in volumes that could signal a slowdown in economic activity. Companies reported a post-COVID recovery in C&I volumes even as residential load growth slowed to reflect a return to physical work and school. C&I volumes were strong in the Midwest, Southeast, and Northwest. Most companies that reported last week demonstrated a strong handle on inflationary pressures in labor and material costs through bundling of services, signing long-dated contracts, and procuring essential materials ahead of time. Few companies raised O&M expense budgets for the year. Pension, which has been a concern given asset performance this year, has so far been a non-factor for most companies as higher discount rates offset asset performance for the purposes of calculating levels of funding. With respect to impact on earnings, FE stood out given its annual MtM accounting approach. Last but not the least, all managements were asked their view on the newly introduced Inflation Reduction Act. We heard unequivocal support for the bill. According to the management teams, the legislation will go a long way toward supporting the clean energy transition, provide a technology-agnostic support mechanism, and provide a much-needed 10-year runway to achieve the decarbonization objectives. The minimum 15% corporate tax rate should not be a significant drag for the utilities given the many mechanisms for offset.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.

Note: ED does not host a conference call.

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

XEL — Settlement and supporting testimony in PSCo's gas rate case is due on August 3: In rebuttal, PSCo (Docket: 22AL-0046G) lowered the requested revenue increase by $12.6M to a $94.5M net revenue increase, which is net of the $107.5M revenue being collected through the PSIA rider. Other parameters including the 10.25% ROE, 55.66% equity layer, and 2022 test year are unchanged. XEL also maintained the $40M and $41M revenue increases for November 2023 and November 2024, respectively. The revised revenue request in rebuttal reflects the use of updated actual data. This compares to CO PUC Staff's filed testimony recommending a $31M net revenue increase, based on a 9% ROE and 55% equity layer. Staff recommended that the PUC uses a historical test year and that the commission reject the revenue increases requested for 2023 and 2024. A final decision is expected in October, and PSCo requests rates to be effective on November 1.

EXC — Surrebuttal testimony in PECO's PA gas rate case is scheduled for August 4: Rebuttal testimony was filed on July 21 and intervenor testimony was filed on June 22. PECO is seeking an $82M rate increase on a 10.95% ROE, 53.41% equity, on a rate base of $2.9B. The rate increase intends to cover gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at a 10.24% ROE in mid-2021. A final decision is expected by the end of 2022 with new rates effective in January 2023.

Recent Developments for Companies Under Our Coverage

From our midweek: In other news, MISO announces projects in Tranche 1 of the Long Range Transmission Planning process; the ICC asks AEE to look into the cost-benefit of being a MISO member vs. a PJM member; AGR confirms Patricia Cosgel as CFO; ETR implements temporary shut-off moratorium to help customers during peak summer and hurricane season; the ME PUC approves new performance standards for utilities; and the Western Market Exploratory Group adds 11 new members.

ED, AGR, ES — NYS issues third offshore wind solicitation: The state is seeking RFPs for at least 2,000 MW of offshore wind power. The solicitation includes $500M of investment in related ports, manufacturing, and supply chain infrastructure. The state has a 9,000 MW target for offshore wind by 2035 as set in the Climate Leadership and Community Protection Act. Of this, 5,700 MW have been allocated in the previous RFPs. There are currently five projects under various stages of development in NY totaling over 4,300 MW (see our offshore wind discussion here and the table below). NYSERDA's deadline for proposal submissions is December 22, with contracts expected to be awarded and executed during 1Q23 and contracts executed in 2Q23.

Figure 2 - NY Offshore Wind Projects

Project Owners	Project Name	Capacity (MW)
Orsted/Eversource	Southfork Wind	130
Orsted/Eversource	Sunrise Wind	924
Equinor/BP	Empire Wind	816
Equinor/BP	Empire Wind 2	1,260
Equinor/BP	Beacon Wind	1,230
		4,360

Source: Industry reports, KeyBanc Capital Markets Inc. estimates

EXC — Staff approves interim rates in Delmarva's DE gas rate case: Staff ordered interim rates of $20.3M effective August 14, subject to refund. As part of the same order, Staff adjusts the current DSIC rate from 7.50% to 0.51%. EXC will file rebuttal testimony on August 15, after Staff proposed a $9.0M revenue increase premised on a 9.28% ROE and 49.94% equity. Excluding the $5.8M DSIC currently in rates, the proposed net increase is $3.8M. This compares to EXC's request for a $20.3M rate increase based on a 10.3% ROE and 50.63% equity. The increase includes $5.8M for the distribution system improvement charge, making the net increase requested $14.5M.

SO — SO completes ITAAC process for Vogtle Unit 3: After announcing on last week's earnings call that there were only two ITAACs remaining, SO followed up with the announcement that it had filed the last ITAAC. Next, SO will likely submit a completion letter and await the 103(g) letter from the NRC, which could take up to 17 days. This is a pivotal step in the process and precedes the pre-operational tests and commencement of fuel load in October. Vogtle Unit 3 is expected to enter service during 1Q23.

SRE — SRE seeks extension for construction of Port Arthur: SRE filed a request with FERC for a four-year extension to build the Port Arthur LNG facility and associated natural gas pipelines due to uncertainties created by the pandemic. The current deadline for the facility to be in service is April 2024. SRE is requesting a new deadline of June 18, 2028. The eventual two-train 13.5 MTPA facility remains in the development stage. The project's location on the TX/LA coast makes it more suited for cargoes to Europe. SRE recently signed an agreement with COP for an equity stake in Phase 1, providing offtake certainty and the investment needed to bring the project to fruition.

ED, AGR — Bill credit program to assist low-income households to be implemented August 1: Low-income customers are expected to receive bill credits beginning on August 1. The governor previously announced that she is making $567M available to low-income households to help defray past utility bills, benefiting more than 327,000 households. The NY PSC is leveraging $250M from the FY23 State Budget to require utilities to provide one-time COVID-19-related relief to customers enrolled in the Energy Affordability Program to eliminate unpaid utility bills accrued through May 1, 2022. In addition, the State Office of Temporary and Disability Assistance's Emergency Rental Assistance Program will provide $100M of relief, and $36M will come from utility shareholder contributions made to date. To make up the $567M, utility ratepayers will bear $181M of burden. Additionally, the state has begun working on a second program for customers that do not qualify for low-income programs and small commercial customers that have $1.7B of outstanding bills. NY has taken the longest to devise a framework for COVID-related bill relief, and it is encouraging to see some progress in this regard.

SO — CEO Tom Fanning expected to announce retirement: According to reports, Tom Fanning is expected to announce his retirement from his position as CEO of Southern Company. The timing is not certain as he is likely to remain at the helm until the completion of the Vogtle project, which is expected in 4Q23. SO has reportedly begun a search for Mr. Fanning's successor. Fanning has been at SO since 1980 and CEO since 2010.

CNP — CNP enters an agreement with Invenergy to buy a 130 MW solar project upon completion: The transaction is part of CNP's IN IRP and will be subject to IURC approval. If approved, it will take CNP's solar generation in IN to nearly 800 MW.

Earnings Recap

ES — ES reported an in-line quarter and narrowed 2022 guidance with the midpoint up modestly. The offshore wind portfolio is being actively marketed and the level of interest from potential acquirers appears robust—not surprising given the strong policy tailwinds and recent transaction history. Management spent a decent amount of time addressing the capital allocation priorities once the wind portfolio sale is concluded as it makes up for the EPS loss from offshore wind and maintains its targeted 5-7% long-term EPS growth range. See our note here.

NWE — NWE posted an in-line quarter in 2Q22 and maintained its 2022 EPS guidance. NWE is ramping up for a busy period as it looks to file electric and natural gas rate cases in MT in August. Additionally, the Company will be filing IRPs in SD and MT later this year and might be receiving some clarity around the future of Colstrip within the coming weeks. NWE will be proceeding through these filings with new leadership, as current COO Brian Bird will be stepping into the CEO role upon Bob Rowe's retirement at the end of the year. See our note here.

EIX — EIX reported quarterly results that were ahead of our estimates and consensus. Management reiterated 2022 core guidance of $4.40-$4.70 and the long-term 5-7% EPS CAGR. 2023 guidance will hinge on the outcome of the CoC docket in which EIX is seeking a higher ROE than the current 10.3%. Track 4 proceedings in the 2021 GRC have commenced, wildfire claim resolutions continue with ~89% of claims settled, and the timing to file for cost recovery with the CPUC is still late 2023. See our note here.

SO — SO reported EPS of $1.07 vs. our $0.81 estimate and guidance of $0.80, as it saw strong tailwinds from sales growth as the Southeast continues to outpace the rest of the country in growth. SO also benefited from much warmer weather including the second warmest June in the past fifty years. Although SO has performed well in the first half of the year, the Company maintained guidance and will look at refreshing the range along with its 3Q earnings release. SO continues to progress on Vogtle 3, with only 2 ITAACs remaining, and will subsequently file for the 103(g) letter. Specifically, SO narrowed in-service dates to the back half of its previous ranges, which are 1Q23 and 4Q23 for Units 3 and 4, respectively. See our note here.

POR — POR posted EPS results of $0.72, which was significantly ahead of our $0.61 estimate and consensus of $0.55. POR was better positioned in 2Q22 due to favorable hydro conditions resulting from record snowfall and rainfall in the April-June period, allowing the Company to capitalize on favorable power markets. The beat led to POR raising its GAAP guidance and the introduction of non-GAAP guidance to adjust for the Company's future earnings power and remove the recent deferral ruling from operating earnings, which we view as a welcome development. POR noted that it is experiencing significant tailwinds from the industrial growth in its service territory, which should be further aided by the recent Chips act. In line with prior expectations, POR hopes to conclude its RFP process before the end of the year and could see elevated prices after the bidders refresh pricing due to inflation. See our note here.

CMS — CMS reported better than expected results and reiterated 2022 guidance. Favorable weather and O&M management in 1H provide a reasonable cushion as CMS heads into 2H. Constructive rate case outcomes further de-risk the 2022 earnings guide. With the IRP approved, we are looking next at a capex refresh and the potential options for financing the Covert gas plant that CMS agreed to buy as part of the IRP. The newly proposed Inflation Reduction Act should support renewables development as provided in the recent IRP. CMS is consistently executing on its core priorities and is well positioned to deliver on the 6-8% targeted long-term growth outlook, in our view. See our note here.

XEL — XEL posted an in-line quarter and subsequently reaffirmed 2022 guidance. Sales and customer growth remained strong, resulting in XEL raising its electric sales growth to 2% for the year even though the Company expects these benefits to be largely offset by inflationary pressures on O&M and higher interest costs. XEL maintained its five-year capital plan and noted that it will roll forward the plan with 3Q22 earnings, which could include the recent MISO Future 1 decision and incremental investment opportunities in transmission and renewables. See our note here.

DTE — DTE reported a lighter than expected quarter but raised guidance as some O&M factors leading to the 2Q miss level off in 2H. Guidance for 2022 was raised by $0.10 at the midpoint — expressing confidence in O&M management in the current inflationary environment. Load trends are shifting to pre-pandemic breakdowns (in line with expectations) and weather trends early in 3Q are pointing toward some tailwinds. The upcoming MI IRP remains the main item to watch in 2H. The recently announced Inflation Reduction Act of 2022 (aka revised BBB) should offer positive impetus for renewable developments as the energy transition unfolds. Thus far it appears that the headwinds from the minimum corporate income tax will be minimal. All in all, DTE continues to execute the plan with a firm handle on operations and regulations and is on target to deliver on the $18B 5-year capex plan and long-term 5-7% EPS growth targets. See our note here.

FE — FE reported an in-line quarter with EPS of $0.53 vs. our estimate of $0.52. The Company results were boosted by contributions from a JV in a MT mining facility and lower interest expenses as a result of retiring ~$2.4B of Holdco debt in 1H22. Consequently, FE has received upgrades from Fitch and pulled its 13% FFO/debt target to 2023. The pension remains a headwind for the Company, which now expects a $0.30 drag on 2023 earnings as a result of market volatility. FE has identified a number of measures in the near term to offset the EPS impact and remains confident in its 2023 range and long-term EPS growth rate, while it has begun initial steps in exploring long-term alternatives. See our note here.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

AEP — AEP reported 2Q22 EPS roughly in line with our and consensus estimates as it continues to experience strong load growth across its customer base. Specifically, the load has surpassed pre-pandemic levels and is in an expansion phase, which has the management team cautiously optimistic for the latter half of the year. However, management has kept 2022 forecasts the same, including an expected reduction in Commercial sales, up 4.1% YTD. We expect an update to load growth assumptions at the Company's analyst day on October 4. Other updates expected at the analyst day include an update on the KY Power sale, incremental data points to the contracted renewable asset sale, and the introduction of 2023 guidance. See our note here.

AGR — AGR reported strong 2Q results and maintained guidance for the year. Results bested our forecast on outperformance in the network segment. We expect the upcoming investor day to be the next pivot point at which management is likely to outline long-term financial targets and capital allocation optionality, including potential asset rotation or partnerships to fund the offshore capex, as well as a potential PNM closing. In the meantime, we are tracking the many rate cases in progress and an imminent court ruling on the NECEC project. See our note here.

FE — FE reported an in-line quarter with EPS of $0.53 vs. our estimate of $0.52. The Company's results were boosted by contributions from a JV in a MT mining facility and lower interest expenses as a result of retiring ~$2.4B of Holdco debt in 1H22. Consequently, FE has received upgrades from Fitch and pulled its 13% FFO/debt target to 2023. The pension remains a headwind for the Company, which now expects a $0.30 drag on 2023 earnings as a result of market volatility. FE has identified a number of measures in the near term to offset the EPS impact and remains confident in its 2023 range and long-term EPS growth rate, while it has begun initial steps in exploring long-term alternatives. See our note here.

NEE — NEE reported results ahead of expectations as FPL benefited from capex spending and NEER from stronger wind resources in the quarter. The call offered few incremental data points as it followed a detailed analyst day and the EPS guidance was maintained. NEER continues to show strong growth as management navigates the challenges posed by the UFLPA and the AD/CVD investigations. Notably, the 24-month tariff reprieve provided by the administration has resulted in projects being halted as a result of the investigation being restarted. As such, the growth from new projects at NEER will be back-end-loaded in the year. See our note here.

NEP — NEP reported results above our expectations and maintained YE22 run rate guidance. Management once again reiterated the 12-15% distribution growth target. Following a detailed analyst day, there were few incremental data points, but the core thesis remains unchanged. NEP is well positioned to benefit from the decarbonization cycle — especially given the support from NEER's asset portfolio. Higher borrowing costs should be effectively offset by higher PPA prices and by NEP's access to multiple funding options. As the headwinds from the solar investigations begin to abate, we believe that NEP's robust portfolio of long-dated, contractual assets will drive investor interest. See our note here.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. Alert

July 25, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: SO, DUK, EXC, AGR, SRE, AVA, XEL, DTE, FERC, NERC

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We are entering the first full week of earnings, with AEP, AGR, FE, DTE, CMS, XEL, POR, SO, NWE, EIX, and ES scheduled to report. ENPH, NOVA, and FSLR, within our alternative energy coverage, will also report. Aside from earnings, we are tracking proceedings in SO's VCM 26, Piedmont's natural gas rate case, and ComEd's FRP. In other news, NERC cautions against premature transition away from gas to renewables and proposed transmission expansion; AGR gets a reprieve in ME as the DEP upholds a permit for NECEC; GA PSC approves GP's 2022 IRP settlement; SRE and CFE to expand infrastructure partnership; AEL&P files AK GRC; XEL begins planning for a 140-mile transmission line in MN and an RNG deal could have implications for DTE's Vantage segment.

Earnings Calendar

2Q earnings continue: AEP, AGR, FE, DTE, CMS, XEL, POR, SO, NWE, EIX, and ES are scheduled to report this week (see calendar below). Our recently published preview includes our thesis, expectations, and estimates for our coverage.

Figure 1 - Earnings Calendar

2Q22 Earnings Calls

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

SO — Rebuttal testimony in VCM 26 is due on July 25: Previously, in testimony Staff mentioned that Unit 3 COD by February 2023 as shown in the current risk-adjusted schedule is reasonable but not without risk. The risk to the February 2023 schedule stems from the significant amount of work to be completed after fuel load when the plant is subject to the technical specifications or the operating rules for a nuclear power plant. Unit 4 COD on a risk-adjusted basis is forecast to be December 2023, assuming the Company learns the lessons from the delays in Unit 3. Staff believes that the Company will be able to complete the project at the cost estimate provided by the Company in February of this year — assuming COD in February and December 2023, respectively. GP's VCM 26 pertains to the July-December 2021 period. In this filing, GP presents $584M in capex for review only and does not request the Commission to

take any action at this time. In VCM 26, GP also projects an increase in its share of the project cost to $10B (+$745M since VCM 25) and provides new in-service dates. The estimated remaining capex to complete the project is ~$1.5B, including GP's share of project contingency.

DUK — Rebuttal testimony in Piedmont's natural gas rate case is due on July 26: In previously provided testimony Staff recommended a $2.7M revenue increase premised on 9.3% ROE and 53.05% equity. After factoring in ~$2.8M associated with the cost of gas demand revenues to align with fixed gas costs, rates would see a net decrease of ~$187K. As a reminder, Piedmont is seeking a $9.6M revenue increase on a 9.9% ROE (54.56% equity with a $505M YE21 rate base). This is Piedmont's first rate-case filing in nearly two decades. After factoring in $3M associated with the cost of gas demand revenues to align with fixed gas costs, the net increase sought is $6.7M. Piedmont is also seeking continued reg asset treatment for certain environmental remediation expenses and a continuation of previously approved depreciation rates. The utility has been operating under SC's Rate Stabilization Act since 2005. This allows the gas utility to adjust rates regularly based on gas prices and other factors.

EXC — Rebuttal testimony in the ComEd FRP filing is scheduled for July 27: Previously Staff filed testimony recommending a $195M revenue increase, in line with ComEd's formula rate plan proposal for a $199M revenue increase. Staff and ComEd's increases are premised on a 7.85% ROE, 49.45% equity, and a rate base of ~$14B. ROE calculation in the FRP is formulaic and set by statute. ComEd's previous rate plan was approved at a 7.36% ROE in 2021. A final decision is expected toward the end of the year, with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL. EXC is currently engaged with stakeholders and the ICC to finalize the performance metrics that will make it into the final PBR framework. An outcome is expected in 3Q, at which point ComEd will decide whether to file a four-year rate plan in 2023 or a traditional future test year plan. A filing is expected in early 2023.

FERC — FERC's Open Meeting is scheduled for July 28: A copy of the Sunshine Notice is included here.

Recent Developments for Companies Under Our Coverage

From our midweek: We published our 2Q22 earnings preview, and 2Q earnings season begins with NEE and NEP scheduled to report results on Friday. In other news, the CPUC launches proceedings to improve demand flexibility through real-time electric rates; FE files for a $626M OH Grid Mod II program; XEL files rebuttal testimony in PSCo's gas rate case; Kingsport Power reaches a settlement in its TN electric GRC; the NY PSC issues an order for customer credits in the event of prolonged outages; ApCo receives an SCC approval for ~500 MW of solar and wind power; and AEP announces a fuel-flexible linear generator pilot in OK.

NERC warns against premature shift away from natural gas and emphasizes the importance of added transmission infrastructure sharing as climate-related grid failures rise. NERC's 2022 State of Reliability report underscores the challenges faced by the grid as it grapples with the transition to renewables and with extreme weather events.

- The report emphasizes the importance of maintaining gas as a bridge fuel for grid reliability. According to the report, a failure of gas generation was one of the reasons for the outages in TX during Storm Uri. As a result of the winter storm event, the amount of unserved energy caused by operator-initiated load shedding was the highest since NERC started keeping records and 100x higher than the previous year (1,015 GWh in 2021 vs. 13 GWh in 2020). The report also singled out grid interconnection-related emergencies in TX and CA where solar generation tripped as inverters ceased operation. Inverters are one of the most critical components in a solar generation system, enabling the conversion of DC to AC. Growing renewable generation (500 GW of solar and 400 GW of wind expected to come online over the next 10 years) makes added transmission an imperative. The grid tripping highlights the need for more interregional electric transmission to allow different regions to share power when grid conditions become tight.
- To this end, FERC has initiated rule-making proceedings to jumpstart the grid buildout (Docket RM21-17) and interconnection procedures (Docket RM22-14).
- Democratic Congressmen from CA have proposed two bills in Congress that if enacted could address the NERC's concerns. The two bills address the issues of reinforcing the power grid against extreme weather. One bill called the Reinforcing the Grid Against Extreme Weather Act would require the FERC to establish minimum transfer capacity requirements between RTOs and would fall under the Federal Power Act. The other bill, the Grid Resilience Act would direct FERC and NERC to jointly study a reliability standard for thermoelectric power plants during droughts.

AGR — DEP upholds permit for NECEC transmission project, a positive for AGR: The ME DEP made a unanimous decision to uphold a previously issued permit. The permit was suspended in November last year after a ME Superior Court judge rendered a one-mile lease issued by the Bureau of Public Lands invalid. Recall that construction on the NECEC project has been halted since the referendum of 2020 when the DEP suspended the work license. The ME Supreme Judicial Court is currently deliberating on two separate cases related to NECEC: 1) whether NECEC has a valid lease to cross a stretch of state land; and 2) whether the November referendum affects NECEC's right to continue construction along the planned route. The DEP's decision to uphold the previously issued permit may render the first issue moot if the Court decides to send the issue back to the BPL. A decision from the court is expected this summer. See our more detailed write-up on the pending issues here and here.

SO — GA PSC approves GP's 2022 IRP settlement: The GA PSC approved the IRP settlement between SO and interveners, which will put SO on a trajectory to retire all company-operated coal units by 2028, except for Plant Bowen Units 1-2 (806 MW, 789 MW), which will be re-evaluated as part of the next IRP. If the units are kept open past the end of 2027, GP would be allowed cost recovery. To support the transition, the PSC approved SO to add 2,300 MW of renewables over the next three years and 6,000 MW by 2035. SO will also make additional investments at two of its hydro plants — Sinclair and Burton. The PSC has tentatively approved the 265 MW McGrau Ford Battery facility, which will undergo additional review before construction. SO received approval for an incremental 500 MW of battery storage and will acquire 2 GW of natural gas-fired capacity via PPAs to maintain reliability. We wrote about SO's initial IRP filing here.

SRE — SRE and CFE to expand infrastructure partnership: SRE and Mexico's Federal Electricity Commission (CEF) agreed to advance the joint venture in developing energy infrastructure. The agreements include advancing service restoration of the Guaymas-El Oro pipeline, defining the configuration of the proposed Vista Pacifico LNG terminal (planned as a 4 MTPA facility), and studying the potential for developing an LNG terminal in Salina Cruz, Oaxaca. Vista Pacifico is planned to be located near an existing refined products terminal owned by SRE and will have access to Permian gas through two existing pipelines currently under-utilized. All of these projects have the potential to use existing natural gas infrastructure to increase global LNG supply.

AVA — AEL&P files AK GRC: AVA filed an electric rate case in AK, requesting a $3.2M revenue increase premised on 13.45% ROE and 60.7% equity layer. AVA is requesting that $1.6M in interim rates become effective Sept. 1, subject to a refund. The last AK rate case was settled in 2017 with a $3.4M rate increase based on 11.95% ROE and 58.18% equity. A decision is expected no later than 4Q23.

XEL — XEL begins planning for a 140-mile transmission line in MN: XEL is planning a 140-mile transmission line to connect renewable resources to the existing grid at the 2.2 GW Sherco coal plant. Construction is expected to start in 2026 with a project completion timeline of 2028. The line will use the existing substation infrastructure at Sherco and the project is expected to cost $500M. The MN PUC approved the project as part of the recent IRP order.

DTE — BlackRock is acquiring an RNG operator: BlackRock agreed to buy privately held RNG operator Vanguard Renewables. According to the WSJ, BLK paid $700M for Vanguard Renewables and plans to invest at least $1B to build out its anaerobic digester network. Vanguard runs 6 anaerobic digesters across MA and VT and plans to commission over 100 anaerobic digesters to produce natural gas in the U.S. by 2026. Vanguard mitigates GHG emissions from food waste and cow manure through an anaerobic co-digestion process that converts inedible food and beverage waste and dairy manure into RNG and liquid low-carbon fertilizer. DTE within our utility coverage has an RNG business (Vantage), which we have viewed as a business that the Company may monetize at the right value.

Earnings Recap

NEE — NEE reported results ahead of expectations as FPL benefited from capex spending and NEER from stronger wind resources in the quarter. The call offered few incremental data points as it followed a detailed analyst day and the EPS guidance was maintained. NEER continues to show strong growth as management navigates the challenges posed by the UFLPA and the AD/CVD investigations. Notably, the 24-month tariff reprieve provided by the administration has resulted in projects being halted as a result of the investigation being restarted. As such, the growth from new projects at NEER will be back-end-loaded in the year. See our note here.

NEP — NEP reported results above our expectations and maintained YE22 run rate guidance. Management once again reiterated the 12-15% distribution growth target. Following a detailed analyst day, there were few incremental data points, but the core thesis remains unchanged. NEP is well positioned to benefit from the decarbonization cycle — especially given the support from NEER's asset portfolio. Higher borrowing costs should be effectively offset by higher PPA prices and by NEP's access to multiple funding options. As the headwinds from the solar investigations begin to abate, we believe that NEP's robust portfolio of long-dated, contractual assets will drive investor interest. See our note here.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

Investment Thesis, Valuation and Risks

Exelon Corporation (EXC)

Investment Thesis

Our Equal Weight rating reflects our view that the current share price adequately reflects EXC's risk/reward proposition. Positive attributes including a healthy projected EPS CAGR (8%) and wires-centric asset mix are balanced by our view that the company's regulatory jurisdictions are average to below average.

Target Price Valuation for EXC: $52.00 from $50.00

Our $50/sh price target is based on a P/E multiple analysis. We apply a P/E of 20.5-21.0X to our 23E EPS of $2.42. Our multiple is in line with the '22 Regulated Electric peer group median as we balance positive features (strong 8% EPS CAGR and predominantly electric wires strategy) with our perception that EXC's regulatory jurisdictions are average to below average. We apply the '22 median to our 23E EPS due to the forward-looking nature of our price target.

Our DDM analysis supports a forward valuation in excess of $55/sh. Key assumptions include long-term earnings and dividend growth of 3% and a 6.75% discount rate.

Risks to Our Price Target and Rating for EXC

Risks to our thesis include favorable/unfavorable regulatory developments (upside/downside) and greater-than-expected ESG appetite for a wires-centric company (upside).

Wells Fargo Securities, LLC has provided investment banking services for 34.7% of its Equity Research Underweight-rated companies.

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Important Disclosure for International Clients

United Kingdom – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the United Kingdom, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a UK incorporated investment firm authorised and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 (the "Act"), the content of this report has been approved by WFSIL, an authorised person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

EEA – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by WFSIL or Wells Fargo Securities Europe S.A. ("WFSE"). WFSE is a French incorporated investment firm authorized and regulated by the Autorité de contrôle prudentiel et de résolution and the Autorité des marchés financiers. WFSE does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). This report is not intended for, and should not be relied upon by, retail clients.

Australia – Wells Fargo Securities, LLC and Wells Fargo Securities International Limited are exempt from the requirements to hold an Australian financial services license in respect of the financial services they provide to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under the laws of the United States and Wells Fargo Securities International Limited is regulated under laws of the United Kingdom. All such laws differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC or Wells Fargo Securities International Limited in the course of providing the financial services will be prepared in accordance with the laws of the United States or United Kingdom and not Australian laws.

Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We published a deep-dive on the renaissance in the nuclear power industry. The report builds on our virtual Spotlight event from the prior week and discusses all the key considerations for the industry as well as takeaways from the experts who anchored the panels. This week we are tracking regulatory proceedings in AEE's IL FRP and EXC's PA gas rate case, and expect a commission decision from the GA PSC on SO's GA IRP. In other news, it appears that Senator Manchin will not support the clean energy initiatives that were to be included in the reconciliation bill; Sempra enters an agreement with COP on Port Arthur; FE's derivative lawsuit settlement takes a detour as the judge seeks to appoint counsel to review the settlement; Staff files testimony in Delmarva's gas rate case and EXC files for interim rates; SC Staff files testimony in Piedmont's SC gas rate case; and OTTR files an application for a grid infrastructure rider in ND.

ICYMI

Entering the Nuclear Renaissance: We published a deep-dive on the renaissance in the nuclear power industry. The report builds on our virtual Spotlight event from the prior week and discusses all the key considerations for the industry as well as takeaways from the experts who anchored the panels. Find a copy of the report here.

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

SO — GA PSC is expected to issue a decision in the pending 2022 IRP on July 21: SO and the interveners reached a settlement in the pending 2022 IRP. GP had filed to retire a series of coal-fired units and leave Bowen Units 3 and 4 operating. The stipulation maintained SO's plans for Wansley coal Units 1-2 to be retired in August this year. The settlement also grants SO the retirement of peakers Wansley Unit 5A and Plant Boulevard Unit 1 by August 2022 as planned. With respect to Bowen Units 1 and 2, SO filed to retire them by the end of 2027 but the parties agreed that a retirement date for Bowen Units 1-2 (806 MW, 789 MW) be determined via a separate docket—contingent upon the completion of certain transmission system improvements. If the units are kept open past the end of 2027, GP would be allowed cost recovery. The other coal plants (Scherer Unit 3, Gaston Units 1-4) will be retired by the end of 2028 as planned. Gas peaker Gaston Unit A will also be retired at the end of 2028 as originally framed by SO. The parties agreed to SO's plan for installing scrubbers to comply with ELG mandates for Bowen Units 3-4 (952 MW each) and Scherer Units 1-2.

AEE — Rebuttal testimony in AEE's IL FRP is scheduled for July 21: In testimony, the Staff proposed a 50% equity layer vs. the Company's proposed 53.99% equity and is recommending a $62M rate increase. AEE is presently seeking an $85M rate increase on a 7.85% ROE, 53.99% equity, and a rate base of $3.9B. The ROE of 7.85% is formulaic. A final decision is expected by the end of 2022, with new rates effective in January 2023. This may be AEE's last FRR filing in IL with the next rate review likely being an MYRP until the IL Energy Transition Law. The ICC is expected to approve PBR to be used under the new framework this fall.

EXC — Rebuttal testimony in PECO's PA gas rate case is scheduled for July 21: Intervenor testimony was filed June 22 but was not made public. PECO is seeking an $82M rate increase on a 10.95% ROE, 53.41% equity, and a rate base of $2.9B. The rate increase intends to cover gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at 10.24% ROE in mid-2021. A final decision is expected by the end of 2022 with new rates effective in January 2023.

Recent Developments for Companies Under Our Coverage

From our midweek: We hosted a virtual meeting with the MI PSC to discuss the MI regulatory environment. In other news, we published a note following a short seller report on HASI's accounting practices and earnings quality; CNP reaches a settlement in its TX DCRF application; FPL withdraws T&D winterization program from 10-year Storm Protection Plan; TX bankruptcy judge orders

Talen to come up with a plan for Colstrip; SCE continues wildfire mitigation work with 3,500 miles of covered conductors completed; NY State officials are working on a second customer assistance program for unpaid utility bill; VA SCC approves minimum bill for community solar users; NEET commissions 20-mile NY transmission line; NEER completes TX wastewater acquisition; the Spanish government announces special taxes on utilities and banks; and ETR COO Paul Hinnenkamp announces retirement.

Senator Manchin takes his ball and goes home:

- **Will he or won't he?** After months of behind-the-scenes negotiations, the latest iteration of the news cycle is suggesting that Manchin has informed the Senate majority leader that he will oppose the package it if includes climate or energy provisions. In a previous version, it appeared that Manchin was mostly in line with the climate provisions except for the direct pay provision and credits for EVs and would have required more provisions to support domestic oil & gas drilling. The reason du jour appears to be the headline inflation data from last week. Since this report, the WV senator has also been quoted as saying to a WV TV channel that he wants to see the July CPI before making a decision and that he remains committed to energy funding. It appears that the president would like the reconciliation package to go through without the climate provisions and follow up with executive action on his climate/clean energy priorities.
- **So, now what?** On a big picture basis, we believe that the energy transition is here to stay. There is enough support at the state level and from C&I users of electricity to continue transitioning toward cleaner sources of power. The companies in our coverage have not factored in any of the key provisions of the BBB into guidance or projections. That said, the ITC and PTC provisions for wind and solar have a history of being renewed, and we would still expect that a tax extender package for their renewal could materialize before year-end (see the table provided here for a snapshot of the timeline of current wind and solar ITC and PTC).
- **That said, we do not want to underplay the importance of a long-term climate framework for the alternative energy space.** The bipartisan infrastructure bill has one-time funding for several initiatives—including existing nuclear plants (civil nuclear credit program), the creation of hydrogen hubs, and R&D dollars for emerging tech. But to make long-term investments, the industry needs more than one-time funding and a scaffold of durable tax credits to allow it to bend the cost curve down over time (see the evolution of the solar and wind industry as an example).
- **Who does this impact the most?** CEG is a merchant nuclear power producer that would have benefited from the nuclear tax credit, over the longer term. At present, there are adequate state levels credits for the plants to continue running, all CEG's units within PJM cleared the recent auction and merchant power prices are at elevated levels to support merchant generators. Residential solar providers and solar component companies were all weak on Friday as were fuel cell names. Fuel cell companies would have benefited meaningfully from the hydrogen tax credit proposed in the climate provisions. However, the fuel cell companies are more global in their operations, and given the higher level of support in Europe and elsewhere for hydrogen infrastructure, we expect the impact to be somewhat moderated through international expansions.
- Several utilities and renewables companies have written to elected representatives requesting swift passage of comprehensive energy and climate provisions to reduce GHG emissions and ensure energy security and price stability through the development of robust domestic supply chains. See our note on the provisions in the BBB for what could have been.

SRE — Sempra enters an agreement with COP on Port Arthur, taking the project closer to FID: SRE announced a partnership framework with COP that includes a plan to develop Port Arthur LNG.

- SRE announced that it has entered an HOA with COP whereby COP could enter into a definitive agreement with SRE for a 20-year LNG tolling arrangement for 5 MTPA of capacity at Phase 1 of Port Arthur LNG. The HOA also provides for COP to take a 30% equity interest in Phase 1. COP will supply natural gas to the facility. The agreement also includes the option for COP to acquire LNG offtake and equity ownership from future developments at Port Arthur. SIP would have the option to participate in carbon capture and sequestration projects developed by COP in connection with the Port Arthur LNG project. The HOA also includes provisions for collaborating on LNG offtake, natural gas supply, and equity investments in ECA Phase 2 that could include up to a third of the exported LNG volumes.
- The HOA with COP brings SRE to a point where it has mostly completed marketing Phase 1 of the project. The Company previously signed HOAs with INEOS for 1.4 MTPA, with PGNiG for 1-3 MTPA, and with RWE for 2.25 MTPA. The COP HOA takes the total to 9.65-11.65 MTPA, Port Arthur Phase 1 is a permitted project and will have a capacity of up to 13.5 MTPA and include two trains. Sempra is also marketing a similar-sized Phase 2 project. ECA Phase 2 on the other hand is in earlier stages of development while Phase 1 is currently under construction. Separately, SRE is also working on Cameron LNG Phase 2, which will include a 6.75 MTPA train.
- The strong demand for LNG exports following natural gas supply disruptions caused by the war in Europe has helped SRE bring Port Arthur to a point where it can complete FEED and potentially FID sooner than originally planned. The location of the project on the TX/LA coast makes it more suited for cargoes to Europe. A wide-ranging partnership with COP should be a positive for SRE as it provides offtake certainty as well as the investment needed to bring the project to fruition.

FE — Derivative lawsuit settlement takes a detour: Judge Adams of the Northern District of OH, who issued an order rejecting a $180M settlement to resolve the shareholder derivative lawsuits, said that he will appoint a counsel to diligently prosecute the settlement. The judge, in rejecting the order, believed that the settlement was unfair and violated the first to file doctrine, which requires

that the court in which the first suit was filed (Northern District) be the one proceeding to judgment. The settlement was filed and approved by a judge in the Southern District.

EXC — Staff files testimony in Delmarva's DE gas rate case; EXC files for interim rates: Staff filed a proposal for a $9.0M revenue increase premised on a 9.28% ROE and 49.94% equity. Excluding the $5.8M DSIC currently in rates, the proposed net increase is $3.8M. The lower ROE and rate base adjustments are the main drivers of the delta. After Staff's testimony, EXC filed for interim rates to be effective August 14, subject to a refund. As a reminder, EXC is requesting a $20.3M rate increase based on a 10.3% ROE and 50.63% equity. The increase includes $5.8M for the distribution system improvement charge, making the net increase requested $14.5M. Rebuttal testimony is due on August 15. The previous gas rate case concluded in 2021 and authorized a rate increase of $6.7M based on a 9.6% ROE and 50.37% equity layer.

DUK — Staff files testimony in Piedmont's SC gas rate case: Staff filed a proposed $2.7M revenue increase premised on a 9.3% ROE and 53.05% equity. After factoring in ~$2.8M associated with the cost of gas demand revenues to align with fixed gas costs, rates would see a net decrease of ~$187K. As a reminder, DUK's natural gas utility is seeking a $9.6M revenue increase on a 9.9% ROE (54.56% equity with a $505M YE 2021 rate base). This is Piedmont's first rate-case filing in nearly two decades. After factoring in $3M associated with the cost of gas demand revenues to align with fixed gas costs, the net increase sought is $6.7M. Piedmont is also seeking continued reg asset treatment for certain environmental remediation expenses and a continuation of previously approved depreciation rates. The utility has been operating under SC's Rate Stabilization Act since 2005. This allows the gas utility to adjust rates regularly based on gas prices and other factors.

OTTR — OTTR files an application for grid infrastructure rider in ND: In the filing, OTTR is requesting an Advanced Grid Infrastructure Cost Recovery Rider to recover forecasted costs of $3.1M in 2023 for the construction of three projects, including AMI, demand response, and outage management systems. OTTR previously received approval for the AMI and DR projects from the ND PSC through an Advanced Determination of Prudence filing. OTTR has evaluated and included the three multiyear projects as part of the Company's Innovation 2030 Initiative, through which it seeks to improve the reliability and safety of its system.

PM Summary

Utilities do not screen attractively for investors seeking outsized returns, but do offer a defensive alternative in this volatile market. Relative valuation versus the market does not appear overly compelling – we forecast just 6% total return on average across our utilities coverage — but the regulated business model likely shields utilities, relative to other sectors in the S&P, from major EPS negative revisions. We believe regulated utilities' earnings growth profile remains largely intact despite the current macro-economic environment, offering 5-8% EPS growth and 3-4% average dividend yield for an ~8-12% long-term or multi-year total return proposition as per our estimates. That said, the current sector P/E multiple of 19.1x reflects a 20%/25% premium to the S&P 500 on 2023 GSe/FactSet consensus EPS estimate, which screens elevated relative to historical relationship in a 3+% 10-year treasury yield environment that warrants a multiple more in-line or at a modest discount to the broader market. On an absolute basis, the multiple screens modestly above the 5-year average P/E of 18x but below the 21.6x peak multiple (in early 2020).

We recommend investors remain selective in gaining utility sector exposure while maintaining a balanced approach, acknowledging that increasing recession risk — and concerns that the S&P 500 could face downward earnings revisions — could support current utility valuations near-term. With this note, we roll forward our valuation year, now applying a 17x base utility P/E multiple on 2024E EPS (versus 18x P/E on 2023E prior), which screens modestly below Factset consensus S&P500 target P/E of ~18x.

In our coverage universe of Regulated Utilities and Diversified Utilities, we highlight Buy rated DTE (on CL), and XEL as premium defensive oriented business models we find attractive, while also recommending value oriented stocks like FE, PPL, ETR and PCG. Among Diversified Utilities, AES screens attractively as a sum of the parts story — and in this note, we upgrade large cap SRE from Neutral to Buy on attractive valuation, solid growth at its Texas/California utility and its exposure to potential LNG export capacity growth projects.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Risk/reward for relative utility valuations skewed to the downside, but market earnings power remains key

Key Summary: While US utilities trade below their peak P/E multiples — almost 11% below these levels — the sector on a relative basis screens at a ~20% premium to the S&P 500 (on GSe) which we do not view as attractive. That said, we do see a 6% total return to our US utilities coverage universe and view utilities as an appropriate investment option to position defensively. We recommend a selective approach to investing in utilities.

US utility valuations screen elevated versus historical relationship with 10-year yields... US utilities have outperformed the S&P 500 by ~17% year-to-date, despite US 10-year treasury yields rising from 1.6% to 3+% during the period. Over the past 20 years during periods of 3-3.5% 10-year treasury yields, utilities have traded relatively in-line with the broader market, while at a relative discount at yields over 3.5% (Exhibit 5). We note the current 25% P/E premium (on FactSet Consensus) is near the top of the historical range, although absolute valuations at 19.1x/17.9x on 2023E/2024E stand relatively in-line with its 5-year average levels. In addition, since 2000, utilities have traded at a discount to the market in periods when dividend yields are lower than the 10-year treasury yield (Exhibit 7); utilities currently offer a 3.3% average dividend yield versus 10-year yield at 3.1%.

...although more justified on a real-yield basis... In our 2022 outlook note, we noted how real rates in recent history had better explanatory power, with utilities trading at a relative discount in periods of negative real rates. From this perspective, with real rates (as measured by 10-year TIPS) now positive at 0.7% (Exhibit 8), this relationship implies the current utility valuation premium as justified, although still screening as largely reflected with limited further upside.

...and in a flattening term structure environment. Since 2010, during periods of bear flattening yield curve (10yr minus 2yr yield spread), utilities have outperformed all other sectors in the S&P 500 except for the energy sector (Exhibit 10). This seems logical, given recession concerns warrant some level of flight-to-safety to a relatively stable and defensive sector like utilities. Given increasing recession risk driving the current market downturn, we believe utilities could still trade at a relative premium valuation near-term; that said, we see risk/reward skewed negatively at current levels.

Broader market earnings power could dictate future relative performance... Utilities' current 20% P/E premium is based on the 2023 S&P 500 EPS estimate of $239 (GSe). If realized, we expect utilities to underperform the broader market and see a relatively in-line multiple as warranted. However, in a recession scenario - hair-cutting the S&P 500 EPS estimate by the 13% median historical recession earnings revision (per our GS strategy team analysis) - utilities screen in-line to the S&P 500. **We see meaningful S&P 500 downward earnings revisions as the key risk to our cautious relative sector view.**

...given utilities earnings remain resilient. We continue to see utilities' earnings

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

power as largely intact, with 5-8% EPS growth and 3-4% dividend yield offering 8-12% total return proposition per our estimates. For regulated utilities, which comprise the bulk of our coverage companies' earnings, higher costs - including fuel/purchased power and operational costs - represent either pass-through items or are periodically recovered via customer bills with no net income impact. That said, customer bill increases remain a key concern, which could elevate regulatory scrutiny over time as utilities look to recover its costs while also executing on its capital investments that drive earnings growth.

Remain selective and balanced in investing in utilities. With this macro backdrop, we see a balanced investing strategy between premium defensive utilities and dislocated value plays as appropriate. On the premium side, we recommend Buy-rated large-cap regulated utilities DTE Energy (DTE, on Conviction List) and Xcel Energy (XEL) for their consistent execution track record with above-average earnings growth. On the value side, we recommend Entergy (ETR), FirstEnergy (FE) and PPL Corp (PPL) for attractively valued regulated utility exposure, along with AES Corp (AES) for global clean energy exposure at a SOTP discount.

Exhibit 5: Current utility valuations screen elevated based on historical relationship in a 3-4% 10-year yield environment.

Rolling forward valuations to 2024E; see 6% total return to our coverage universe

We roll forward our coverage valuations, now utilizing 2024E EPS, while applying a 17x base P/E multiple for electric/gas utilities (versus 18x on 2023E EPS prior), below current FY3 trading P/E of 17.9x. While our GS strategy team has not yet forecasted target S&P 500 price and earnings for YE2023/2024E, we note our 17x base multiple screens as a modest discount to the FactSet consensus S&P 500 target P/E. For water utilities, we set a base P/E of 27x on 2024E, or a 10x premium to the electric/gas multiple, to continue reflecting our calculated fundamental advantages (and some scarcity factor) for water utility growth.

We see 6% total return to our coverage universe, with the highest total return for companies including PCG, EIX, and FE, and with negative total returns for companies including SO, AGR, and AEP.

Upgrade SRE to Buy: Attractive SOTP story with leverage to LNG development growth and robust Texas electric demand

PM Summary

We upgrade Sempra Energy (SRE) from Neutral to Buy given (1) a more attractive valuation on a sum of the parts, after shares lagged peers in the past 2 months, (2) exposure – given multiple potential growth projects – to the major theme of LNG development, especially as we only give partial credit in our sum of the parts analysis to several growth projects, (3) solid demand growth in its Texas utility that could lead to potential rate base and earnings upside there, and (4) potential resolution by year-end of the California cost of capital docket given the schedule published by the CPUC stating a target year-end resolution could alleviate an overhang – we already embed an RoE reduction in estimates for three California utilities. We also note, in the near term, SRE maintains a solid FCF outlook and capital allocation could still come in above peer group levels in the coming years. We now see more than 11.8% total return potential to our revised $167/sh target price, which we derive via a sum of the parts analysis.

What changes in our views?

As with all utility stocks in our coverage, we roll forward valuation from 2023 to 2024 – a year where we see continued growth in the company's California and Texas utilities, with limited growth in that year for its non-regulated LNG and Mexico businesses. We capture some potential long term upside related to LNG development in the sum of the parts. We maintain our EPS estimates, so the bulk of our change comes in our target price update.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

Source: Goldman Sachs Global Investment Research

Valuation appears compelling on a sum of the parts basis — and we note SRE screens attractively on a P/E multiple as well. We utilize a sum of the parts to value SRE, in order to incorporate (1) credit to various LNG growth projects or initiatives that may not impact EPS or EBITDA until 2025+, (2) recognize uncertainty exists on when each of these potential LNG projects may move forward, so giving partial, different credit for each of them on a probability weighted basis and (3) a premium multiple for SRE's high growth Texas utility franchise and a discount one for its California business, given continued – albeit modest relative to its California peers – wildfire and regulatory risks ahead. As LNG projects move forward in the permitting and contracting aspects, we recognize probabilities may change – presenting upside risk to our sum of the parts analysis. We also note that on P/E multiples, SRE trades at an attractive level – at P/E multiples of 16.9x/15.9x on 2023/2024 earnings versus the large cap median (excluding PCG/EIX given wildfire risks) at 19.8x on 2023 and 17.9x on 2024 earnings.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

...and yet we recognize risks still exist. For the regulated businesses in the US, we note the outstanding rate cases in both Texas and California present risks to revenues — with the Texas case likely getting resolved by year-end given rate cases generally take 180 days to resolve in Texas but the California one continuing well into 2023 given CPUC schedule. While we – as described earlier – already embed a lower authorized RoE for SRE's California utilities than the current authorized level, we recognize the ongoing Cost of Capital docket also presents risks to our view if the authorized RoE or equity ratio comes in below our expectation. Delays in LNG project development or in contracting present a risk to that part of the Sempra Infrastructure Partners (SIP) segment, while operating risk exists still (in terms of volumes or pricing) for the various assets (renewable, gas generation especially) in the Mexico portion of SIP.

...and what events should investors monitor from here?

We highlight a number of events investors should monitor in the coming 12 months, starting with the company's regulated utilities in TX and CA... SRE maintains an active regulatory calendar this year for its US utility businesses — with a rate case just filed at its Texas utility and two proceedings in California, with its cost of capital docket and its rate cases there. We expect resolution of the Texas rate case late this year – and in fact note that upside risk to our estimates could emerge if SRE gains approval for a higher authorized equity ratio in Texas, a level closer to 45%, as we still assume slightly lower in our forecasts. We note SRE's Texas business maintains one of the lower authorized equity ratios among utilities under coverage – a higher level authorized by the state utility regulators there could drive upside risk to EPS in 2023+. SRE's California utilities remain involved in the cost of capital mechanism proceeding in California, a docket we expect to get resolved in late 2022 or early 2023 – we assume that this results, in 2023+, in a reduced authorized RoE level, despite all 3 utilities there (PCG, EIX and SRE) noting in public filings that the wildfire related risks they bear warrant a higher, not a lower authorized RoE. While we recognize this risk remains, we note the RoEs in California already remain above those authorized for most utilities under coverage – and we assume a very small reduction (25-30 bps) in our forecasts. Finally, SRE's utilities in California just filed general rate case proceedings – we do not expect resolution of this until late 2023 or so, and given the need for new electric infrastructure for the state's clean energy and vehicle electrification efforts (EVs), we do not see material downside risk or see these cases as serving as an overhang on SRE's shares, especially given the state generally approved 85%-90%+ of the company's capital spend and rate base requests in prior cases.

...and development activities at the LNG business within Sempra Infrastructure Partners (SIP) could drive material growth post 2025 – with contract announcements and permitting authorizations key to monitor from here. Given the rise in global natural gas prices and the focus on energy supply sources over the past 1-2 years – especially after the Russia/Ukraine conflict started this year – SRE via its Sempra Infrastructure Partners (SIP) venture continues development of multiple different LNG projects. We already include the small expansion (2.5 mtpa) at the Costa Azul site in Mexico — which adds to earnings only starting in 2025, given a multi year construction timeline. We do not give full credit to the other projects, like the Cameron

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

expansion (6-7 mtpa), the greenfield Port Arthur LNG (13.5 mtpa), the large scale Costa Azul expansion (12 mtpa), or the potential Vista Pacifico project (3-4 mtpa) – we only give partial or limited credit in our valuation analysis for these projects, given continued uncertainty on off-take contracting, permitting and project construction agreements. We see the Cameron LNG expansion as likely first in line owing to more commercial contracting and ownership agreements already announced relative to the other projects – with potential announcements of incremental contracts coming in the next 6+ months and with expected FERC approvals of the site design change in 1H2023, which could lead to a project FID in the next 9-12 months as per company guidance.

Key risks to our rating include:

(1) Rate case and regulatory risk given ongoing cases in both CA and TX — and the cost of capital docket in CA — our CA forecasts already assume a 25-30 bps reduction to the authorized RoE but a greater reduction could present downside.

(2) Wildfires in Southern CA — we do not embed wildfire related costs in our forecasts but recognize this could, if one occurs in the San Diego area where SRE owns an electric utility business, impact cash flows.

(3) Failure to move ahead with LNG export growth projects due to permitting or contracting challenges — cancellations would weigh on our target price as we assume partial credit for these projects.

(4) Cost management — higher than expected O&M expenses driven by inflation or other factors would reduce earnings potentially.

Exhibit 24: 38.6 Mtpa of potential capacity that SIP could get leaves a lot of room for upside

EVRG	16x P/E on 2024 EPS	Neutral	$69	$66	$66.81	2.33	3.5%	7%	**Upside:** 1) cost management. **Downside:** 1) Utility regulation, 2) power demand and 3) financing
ES	19x P/E on 2024 EPS	Neutral	$89	$88	$87.15	2.55	2.9%	5%	**Upside:** 1) improved offshore wind return forecasts, 2) reduced permitting/construction hurdles, 3) additional rate base investments. **downside:** 1) ineffective cost management, 2) slowing rate base growth, 3) utility regulatory environment
EXC	18x on 2024 EPS	Neutral	$47	$44	$46.07	1.35	2.9%	5%	**Upside:** 1) cost management. **Downside:** 1) Utility regulation, 2) power demand and 3) financing
FE	15x P/E on 2024 EPS	Buy	$44	$46	$39.33	1.56	4.0%	16%	**Downside:** 1) utility regulation, 2) power demand, and 3) financing.
PCG	50% weight each to (1) 13x P/E on 2024 EPS and, (2) DDM analysis on 35% dividend payout in 2025.	Buy	$16	$15	$10.24	0.00	0.0%	56%	**Downside:** 1) 2023 GRC proceeding, 2) general regulatory risk in CA, 3) wildfire related risk, 4) financing needs through both debt (including securitization) and equity issuance.
PPL	17x P/E on 2024 EPS	Buy	$32	$32	$27.76	0.88	3.2%	18%	**Downside:** 1) power demand in KY – a decrease in expected demand growth in Kentucky would negatively impact PPL earnings until future rate cases occur, 2) state utility regulation -- as negative regulatory outcomes would impact revenue set for PPL's regulated subsidiaries and 3) cost management – failure to reduce costs after successful completion of the Rhode Island acquisition could hamper earnings.
SO	13x P/E on 2024 EPS	Sell	$53	$51	$73.14	2.71	3.7%	-24%	**Upside**: 1) faster than expected completion of Vogtle Units 3 and 4, 2) greater than anticipated rate base growth, 3) financing, and 4) better than anticipated power demand or operating costs
WEC	21x P/E on 2024 EPS	Neutral	$102	$100	$102.58	2.91	2.8%	2%	1) utility regulation and rate cases, 2) power/gas demand in Wisconsin, & 3) rate base growth, renewable development, and the gas main replacement program in Northern Illinois.
XEL	21x P/E on 2024 EPS	Buy	$77	$76	$72.63	1.95	2.7%	9%	**Downside:** 1) Negative rate case outcomes, 2) XEL realizes less generation into rate base vs. PPA, impacting rate base growth & 3) PPA buyouts do not materialize, 4) Rising commodity prices
Regulated Utilities - Large Cap (median)							**3.2%**	**5.8%**	
Regulated Utilities - Large & Small Cap (median)							**3.1%**	**6.7%**	

DTE is on the Americas Conviction List

Exhibit 28: Price Target Methodologies and Key Risks

Time frame for price targets is 12 months

Price Target Methodologies and Key Risks

Ticker	Price Target Methodology	Rating	Price Target (New)	Price Target (Old)	7/1/2022 Close	2022 DPS	Dividend Yield	Total Return (%)	Key Risks
Regulated Utilities (Small-Cap)									
ATO	18x P/E on 2024 EPS	Neutral	$116	$113	$115.15	2.72	2.4%	3%	**Upside**: 1) demand growth, and 2) ATO reduces annual equity needs through creation of a holding company or via accretive gas utility divestitures, **Downside:** 1) sustained elevated gas fuel cost pressure customer bills 2) Texas regulatory environment turns negative, and 3) market sentiment on gas utility business turns more negative, impacting absolute and relative P/E multiples.
AWK	30x P/E on 2024 EPS	Neutral	$155	$168	$153.43	2.57	1.7%	3%	**Upside:** 1) cost management, 2) ESG fund flows. **Downside:** 1) water quality issues, 2) regulatory environment
AEE	20x P/E on 2024 EPS	Neutral	$93	$92	$92.19	2.39	2.6%	3%	**Upside:** 1) utility investments to accelerate rate base/earnings growth,2) cost management, 3) outcomes in the upcoming Missouri electric rate case, **Downside:** 1) 30-year Treasury yields, and 2) equity financing needs.
CMS	22x P/E on 2024 EPS	Buy	$75	$72	$69.03	1.84	2.7%	11%	**Downside:** 1) Michigan's regulatory environment turns negative, impacting CMS's ability to earn a healthy rate of return, and 2) CMS's ability to achieve consistent cost savings slows, reducing bill headroom for future investments.
NI	18.35x Blended multiple on 2024 EPS	Buy	$32	$31	$30.05	0.94	3.1%	10%	**Downside:** (1) NI continues to face additional solar development delays which potentially pressure earnings power, (2) unfavorable outcome in the outstanding and upcoming rate cases which lowers allowed returns, (3) NI fails to realize rate base additions and instead has more PPA generation, and (4) NI announces strategic initiatives that are dilutive to EPS.
PNW	15x P/E on 2024 EPS	Sell	$68	$67	$74.68	3.42	4.6%	-4%	**Upside:** 1) AZ commission authorizes a higher ROE in the 2022 rate case, 2) PNW receives approval for contemporaneous recovery/return of clean energy investments, 3) robust electric demand growth, & 4) constructive federal renewable tax policies reduce future equity needs.
POR	17x P/E on 2024 EPS	Buy	$52	$52	$49.82	1.81	3.6%	8%	**Downside:**□1) POR secures little to no owned clean generation in the current RFP, capping earnings growth upside, 2) Oregon utility commission disallows recovery of a significant portion of the 2020-2021 significant events (ice storm, wildfire, power costs), impacting the balance sheet and elevating future equity issuance needs, and 3) POR experiences meaningful cost inflation that impacts EPS and/or requires filing another rate case near-term to seek recovery.
WTRG	SOTP 29x P/E on 2024 water EPS, 18x P/E on 2024 gas EPS	Buy	$52	$55	$47.44	1.11	2.3%	12%	**Downside**: 1) PA regulation turns less constructive, which impacts earnings growth potential given the bulk of WTRG's earnings are derived from the state's water/gas operations, 2) water system acquisitions do not receive necessary approvals for completion, which could impact longer-term water rate base growth outlook, and 3) equity issuances are meaningfully higher than expected, which dilutes EPS power.
Regulated Utilities - Small Cap (median)							**2.6%**	**5.7%**	
Regulated Utilities - Large & Small Cap (median)							**3.1%**	**6.7%**

Disclosure Appendix

Reg AC

We, Michael Lapides, Insoo Kim, CFA and John Miller, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosures

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: American Electric Power Company, Inc., Evergy, Inc., Eversource Energy

The rating(s) for Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NextEra Energy Inc., NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., The AES Corp., WEC Energy Group and Xcel Energy Inc. is/are relative to the other companies in its/their coverage universe: Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., Constellation Energy Corp., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., The AES Corp., WEC Energy Group, Xcel Energy Inc.

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	50%	35%	15%	65%	57%	45%

As of April 1, 2022, Goldman Sachs Global Investment Research had investment ratings on 3,143 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) have been suspended pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Effective from the date of the United Kingdom's departure from the European Union and the European Economic Area ("Brexit Day") the following information with respect to distributing entities will apply:

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: GSI, authorised by the PRA and regulated by the FCA and the PRA, disseminates research in the following jurisdictions within the European Economic Area: the Grand Duchy of Luxembourg, Italy, the Kingdom of Belgium, the Kingdom of Denmark, the Kingdom of Norway, the Republic of Finland, the Republic of Cyprus and the Republic of Ireland; GS -Succursale de Paris (Paris branch) which, from Brexit Day, will be authorised by the French Autorité de contrôle prudentiel et de resolution ("ACPR") and regulated by the Autorité de contrôle prudentiel et de resolution and the Autorité des marches financiers ("AMF") disseminates research in France; GSI - Sucursal en España (Madrid branch) authorized in Spain by the Comisión Nacional del Mercado de Valores disseminates research in the Kingdom of Spain; GSI - Sweden Bankfilial (Stockholm branch) is authorized by the SFSA as a "third country branch" in accordance with Chapter 4, Section 4 of the Swedish Securities and Market Act (Sw. lag (2007:528) om värdepappersmarknaden) disseminates research in the Kingdom of Sweden; Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research in the Federal Republic of Germany and those jurisdictions within the European Economic Area where GSI is not authorised to disseminate research and additionally, GSBE, Copenhagen Branch filial af GSBE, Tyskland, supervised by the Danish Financial Authority disseminates research in the Kingdom of Denmark; GSBE - Sucursal en España (Madrid branch) subject (to a limited extent) to local supervision by the Bank of Spain disseminates research in the Kingdom of Spain; GSBE - Succursale Italia (Milan branch) to the relevant applicable extent, subject to local supervision by the Bank of Italy (Banca d'Italia) and the Italian Companies and Exchange Commission (Commissione Nazionale per le Società e la Borsa "Consob") disseminates research in Italy; GSBE - Succursale de Paris (Paris branch), supervised by the AMF and by the ACPR disseminates research in France; and GSBE - Sweden Bankfilial (Stockholm branch), to a limited extent, subject to local supervision by the Swedish Financial Supervisory Authority (Finansinpektionen) disseminates research in the Kingdom of Sweden.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: POR, ED, AGR, SRE, SO, WEC, ETR, PNM, DUK, XEL, EXC, EIX, AEE, PCG, DOE, SCOTUS, CA Energy Legislation, NEM 3.0

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We hosted POR for a series of meetings in NY and the Mid-Atlantic last week. We are not tracking any specific events this week, but we highlight rate cases where we are awaiting outcomes later this year, including ED and AGR's rate cases in NY, SRE's Oncor rate case in TX, SO's GP rate case, and WEC's rate cases in WI. In other news, the Supreme Court ruling in WV vs. EPA is unlikely to have an impact on clean energy investments; CA legislature passes a bill to support reliability reserve; the DOE amends the eligibility and agrees to extend the deadline, likely allowing PCG to apply for the Civil Nuclear Credit; we review the reply comments in CA's NEM 3.0 proceedings; ETR files TX GRC; PNM files emergency motion to stay a PRC order; ETR NO makes a $1.5B grid hardening and resilience filing; DUK files OH natural gas rate case; XEL files SD electric GRC; Staff files testimony in ComEd's FRP; CPUC issues a final order in Track 3 of the GRC filing; IL utilities file plans to meet Climate and Equitable Jobs Act requirements, and ETR Arkansas issues RFP for 1 GW of resources.

ICYMI

We hosted POR's senior management for two days of constructive meetings in New York City and the Mid-Atlantic. Investors were focused on the long runway for capital investment, potential for growth rate revisions, equity/funding needs, timing of the next rate cases, and regulatory strategy in OR. See our note here.

Regulatory Calendar

We are not tracking any specific events in this holiday shortened week. We summarize key rate cases where we are awaiting outcomes later this year.

ED — Settlement discussions in the CECONY rate cases to commence this week: Settlement negotiations are set to begin on July 6 as the procedural schedule has been put on pause to allow parties time to pursue discussions. ED is seeking rate increases of $1,037M and $402.2M for its electric and gas utilities, respectively, beginning January 1, 2023, and has included illustrative rate increases for 2024 and 2025 (electric: $744M, $615M, and gas: $205M, $176M) that could potentially be taken up in settlement discussions. Staff recommendation came in below expectations with a proposed rate increase of $299.5M for electric and $165.4M for gas based on 8.80% ROE (vs. ED's 10.00% request). The lower ROE directly resulted in a decrease of the revenue requirement by ~$260.7M and $95.7M for electric and gas, respectively. Property tax adjustments are another point of contention that account for ~$102.5M and $22.6M of the difference for the electric and gas rate cases, respectively. In rebuttal testimony, ED disagreed with the Staff's decision to reduce O&M by $200M for electric and gas by $44M. ED also objected to the use of three-year averages with no escalation in determining the proposed O&M. ED pointed out that the Staff's O&M reduction arbitrarily reduces programs to achieve a reduction in revenue requirements and is based on general growth rates with no basis in an actual program plan. For a detailed write-up on staff testimony and our take, see our note here.

AGR — NY rate case proceedings begin later this summer: AGR recently filed one-year electric and gas rate cases for both its NY utilities NYSEG and RGE. AGR is seeking a 10.2% ROE and 50% equity layer vs., the last rate filing, which settled at an 8.8% ROE and 48% equity (ED's previous rate case settled at 8.8%, and staff testimony in the present case has proposed an 8.8% ROE and 48% equity). AGR requests new rates to be effective May 1, 2023, just as its prior three-year rate case ends. The present rate case focuses on investments in increased reliability; storm response; spending related to the implementation of NY's Climate Law, which mandates 70% renewable generation by 2030; and the residual rate pressure deferred from the last rate case. Higher O&M and higher interest rates led by the inflationary trend also contribute to the requested rate increase. AGR seeks to expand NYSEG's vegetation management program from $57M annually to an annual five-year average of $64M. Storm cost treatment request is also tweaked vs. the last settlement in that AGR is seeking deferral treatment for both minor and major storms vs. the previous settlement that called for

deferrals of major storm expenses ($25.6M in the case of NYSEG Electric). AGR seeks a 6% inflation adjustment from the 2021 test year to RY1. The Company has filed traditional one-year rate cases but strongly supports a settlement process to achieve a multiyear settlement (as was the case in AGR's last NY rate cases that reached a three-year settlement), in which settlement negotiations would begin after the intervenor testimony (September 26). The first date to watch is August 12 when updated testimony is due.

SRE — Oncor rate case proceedings expected to commence this summer: Oncor filed a GRC in May, seeking a $251M net increase in rates ($287M increase in distribution rates offset by a $36.5M reduction in transmission rates) with a 10.3% ROE, 45% equity layer, and a 2021 rate base of $18.8B. Oncor's last rate case was settled in 2016 at 9.8%, 42.5% equity layer. The primary factors contributing to the proposed rate increase are the move to a higher equity layer and a higher ROE, the growth in Oncor's under-recovered self-insurance reserve balance to about $588M (driven by winter storm Uri), and expenses associated with COVID response, among others. While the ROEs in TX have come under some pressure, the comparatively lower equity ratio of 42.5% likely has room to come up and be an offsetting factor should ROEs remain pressured. The following dates bear watching: intervenor testimony is due on August 26 and Staff testimony is due on September 2. A PFD is expected by January 3.

SO — GP rate case proceedings will ramp up this fall with a decision expected by year-end: In June, GP filed a three-year rate case requesting a $1B revenue increase spread over three years—$852M in 2023, followed by $107M in 2024 and $45M in 2025. The request is based on an 11% ROE and 56% equity. Other items in the filing include a continuation of the Alternate Rate Plan that has been in place since 1995. Base rates exclude any cost recovery for Vogtle Units 3 and 4, which will be added later following a prudence review once the units reach COD. GP received a constructive outcome in the previous rate case, receiving ~97% of the cumulative ask ($909M vs. $942M), based on a 10.5% ROE and 56% equity. GP is seeking a continuation of earnings to be evaluated against a dead band of 9.5-12%, with 80% of the earnings above the 12% ROE being shared with ratepayers and the remaining 20% retained by the utility. GP is also seeking to continue the option to file for interim cost recovery if earnings fall below the low end of the dead band. Staff and intervenor testimony should be filed by October 17, and the Commission should offer a decision by December 20.

WEC — WI rate cases expected to conclude by year-end, with rates effective in January: WEC filed five rate cases across its WI utilities, seeking a cumulative $472M rate increase while maintaining the currently authorized returns on equity (10% for WEPCO and WPSC and 10.2% for WG). The utilities request an equity layer of 53% vs. the current 52.5%. The drivers for the rate case include capital investments in wind, solar, and battery storage—several of which have already received PSC approvals (including the Badger Hollow II solar project where WEC will own 100 MW and the Paris solar+storage project). The rate increase requested also reflects grid hardening and reliability investments. A procedural schedule in the proceedings is still pending.

Recent Developments for Companies Under Our Coverage

From our midweek: AVA reaches a multiparty settlement in the first multiyear GRC in WA; PEG receives BPU approval for Infrastructure Advancement Program; ETR completes exit from merchant nuclear business with the transfer of Palisades; AEE MO announces acquisition of a 200 MW solar facility; CNP receives IURC approval for building a natural gas-fired generation facility; Staff testimony in AEE's IL FRR proceeding proposes a lower equity ratio; utilities and interest groups submit comments on the EPA's proposed smog rule and CA braces for generation capacity shortfalls by implementing legislative fixes; and CAISO is attempting to ease the interconnection logjam.

Supreme Court ruling in WV vs. EPA is unlikely to have an impact on clean energy investments: In a 6-3 ruling, the SCOTUS ruled against the EPA and in favor of WV in that the EPA cannot set up programs that use generation-shifting among a fleet of power plants, as was advocated in Obama's Clean Power Plan. Since Obama's 2015 CPP, much has evolved as renewables' economics, state-driven decarbonization mandates, and RPS have assumed more significance and the generation transition is well underway. Besides, the ruling appears to be narrowly focused on the generation mix and should still allow the EPA to make rules such as the proposed smog rule. The court did not overturn Section 111, which means that the EPA can still require existing power plants to use the best available technology to reduce emissions (as is proposed in the smog rule—see our writeup here).

- The issue in front of the Supreme Court was whether the U.S. Constitution allows Congress to delegate broad authority to the EPA related to GHG emissions and whether the EPA can issue broad rules to recast the nation's electricity grid and decarbonize various sectors of the economy. The court ruled that Obama's CPP's approach to curbing power plant emissions (by mandating a change in the generation mix) exceeded the agency's authority. The court applied the "material questions" doctrine to say that the EPA can take actions that can have a dramatic impact only under a clear directive from Congress. The suit seemed confusing to begin with since it asked to apply a doctrine to a rule that was never in effect.
- Background: WV vs. EPA involved the scope of the powers granted to the EPA through the Clean Air Act. In 2015, the Obama EPA established the Clean Power Plan to create guidelines for GHG emission reduction from existing power plants. The plan was never implemented, but in 2019 the Trump EPA implemented the Affordable Clean Energy Rule, significantly narrowing the scope of EPA's mandate and repealing and replacing the CPP. Several groups challenged the legality of the ACE in federal court and the U.S. Court of Appeals for the D.C. Circuit vacated the EPA's repeal of the CPP and the ACE rule and sent it back to the EPA for further proceedings.

Parties submit reply comments in NEM 3.0 proceedings: Parties submitted comments in the reopened NEM proceedings. The utilities submitted joint comments emphasizing support for the PD and commenting that if changes are to be made, then the Commission defer setting the specific market transition mechanism, whether it be MTC or ACC plus to the implementation phased and should not be based on the inflated cost of solar. The utilities reiterated their preference for an MTC to the ACC plus and maintain that assessing non-bypassable charges is lawful and legally required. SEIA on the other hand contends that the Commission lacks jurisdiction to assess NBCs on BTM consumption and also that there is no cost causation link between BTM consumption and NBCs. SEIA concludes that an adequate ACC plus construct that is correctly structured to extend over a sufficient period of time and without an NBC or a Grid Access Charge would serve the Commission's purpose. There are no further dates on the docket calendar, so it is not clear when the Commission will issue an amended decision.

CA legislature passes bill to support reliability reserve: As a follow-up to our CA generation update included in the midweek (see here), the state legislature passed AB 205, which Governor Newsom negotiated to address CA's power generation capacity heading into the summer months. The bill if signed by the governor will create a Strategic Reliability Reserve to be overseen by the Department of Water Resources and will include up to 5 GW of capacity and allow the agency to build, own, operate, or purchase power from any facility that furthers the state's reliability objectives. The funding provided by the bill will allow the DWR to decide if it wants to purchase power from the Diablo Canyon nuclear units. More on the future of the Diablo Canyon units below.

DOE amends the requirements and agrees to extend the deadline for applying for the Civil Nuclear Credit Program, making it easier for Diablo Canyon to apply: The DOE expanded the eligibility of plants applying for the Civil Nuclear Credit and extended the deadline to apply to September 6 (from May 19). The change in eligibility requirements was requested by Governor Newsom and since then PCG has said that it would consider applying for the credit if the deadline were to be extended. Under original guidelines, only units operating in competitive markets and scheduled to close by 2026 were allowed to participate. DOE expanded eligibility to include plants that operate under regulated frameworks and recover costs from ratepayers—including Diablo Canyon (2,240 MW). The revised guidelines add a new condition that regulated utilities must have demonstrated the need for federal funding and that they have exhausted all other means.

ETR — ETR files TX GRC: As anticipated, ETR filed an electric rate case in TX requesting a $131M revenue increase based on a 10.8% ROE (10.5% ROE + a 30 bps performance added) and 51.21% equity layer. Investments of ~$2.3B since the 2018 GRC are driving the rate increase, including the addition of the Montgomery County power station and the Hardin County peaking facility, which are currently recovered under the GCRR rider. ETR proposes resetting the GCRR, DCRF, and TCRF rider balances to zero. The revenue increase is adjusted for new depreciation rates for earlier retirement dates for Nelson Unit 6 (524 MW) and Big Cajun II, Unit 3 (557 MW), and the extended useful lives of Sabine 1 (213 MW) and the Spindletop natural gas storage facility. The last rate case concluded in a black box settlement to reduce the net revenue requirement by $69M in Year 1, and $122M credit through the TCJA rider. ROR and rate base metrics were silent, but ETR TX was to utilize a 9.65% ROE based on a 50.9% equity layer for all other regulatory purposes.

PNM (not covered) — PNM files emergency motion to stay a PRC order: PNM filed an emergency motion to stay a NM PRC order that requires the utility to issue immediate rate credits of $128M over 2022-2023 following the retirement of the 847 MW San Juan coal unit. PNM was authorized, as part of the Energy Transition Act, to issue securitization bonds to recover the undepreciated investments in San Juan Units 1 and 4 upon their retirement. The Commission ruled that the PNM is employing delay tactics until after the Commission rules on the rate case that it will file at the end of 2022 (new rates effective in 2024) and the cost of the delay on PNM's part to issue the bonds should not be borne by ratepayers. PNM believes it is being penalized for delaying its rate case filings, which it did in consideration of the ongoing pandemic. PNM plans to file an appeal with the NM Supreme Court barring a stay from the Commission and file an emergency motion with the court seeing an interim stay of the order. Recall that AGR is in merger proceedings with PNM, and PNM is appealing the PRC's rejection of the proposed merger.

ETR — ETR NO makes a $1.5B grid hardening and resilience filing: ETR's New Orleans sub has filed a $1.5B resilience plan with the Commission. The plan includes several options (docket # UD-21-03) for the Commission to choose from, including grid resilience, hardening projects, and alternative technologies including microgrids. The project would cost $1.5B over a 10-year horizon. During the recent analyst day, ETR noted it would be recommending $4B of resilience spending to regulators across its service territories and that the overall resilience plan calls for $15B of spending over the next 10 years.

DUK — DUK files OH natural gas rate case: Duke Energy OH filed a GRC in OH requesting ~$49M revenue increase based on a 10.3% ROE and a YE22 test year with rates expected to go into effect in April 2023. Since the last rate case filing in OH in 2012, DUK has made capital investments of $1.4B that it is seeking to add to the rate base, as well as rolling the accelerated main replacement program rider into base rates. In the 2012 rate case, DUK entered a settlement to leave gas rates unchanged and used a 9.84% ROE and 53.5% equity layer.

XEL — XEL files SD electric GRC: XEL subsidiary Northern States Power Company, filed an electric GRC (docket # EL22-017) in SD seeking a $44M revenue increase based on a 10.75% ROE and 53% equity layer and based on a 2021 test year. The rate increase is

fueled by ongoing investments since the last rate case in 2014. In the previous rate case, XEL settled for a $15.2M revenue increase but did not disclose the ROE and equity layer (vs. the initial request of a $24.6M increase, 10.25% ROE, 53.86% equity layer).

EXC — Staff files testimony in ComEd's FRP: Staff filed a proposed $195M revenue increase, in line with ComEd's formula rate plan proposal for a $199M revenue increase. Staff and ComEd's increases are premised on a 7.85% ROE, 49.45% equity, and a rate base of ~$14B. ROE calculation in the FRP is formulaic and set by statute. ComEd's previous rate plan was approved at a 7.36% ROE in 2021. A final decision is expected toward the end of the year, with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL. EXC is currently engaged with stakeholders and the ICC to finalize the performance metrics that will make it into the final PBR framework. An outcome is expected in 3Q, at which point ComEd will decide whether to file a four-year rate plan in 2023 or a traditional future test year plan. A filing is expected in early 2023.

EIX — CPUC issues a final order in Track 3 of the GRC filing: CPUC authorized the recovery of Track 3 incremental O&M of $385M and Track 2 capital-related revenue requirement of $15M. $385M is ~81% of SCE's request of $476M. The approved revenue requirements will be amortized over a 36-month period. The PUC also found reasonable $465M in wildfire mitigation capex, which is ~68% of SCE's ask of $679M. SCE had filed with the CPUC in 2021 for a rate recovery request of $497M associated with the 2020 wildfire mitigation and other costs that are tracked through memorandum and balancing accounts. The final order is very close to the amounts authorized by the ALJ in the PD.

EXC, AEE — IL utilities file plans to meet Climate and Equitable Jobs Act requirements: AEE IL and ComEd filed plans with the ICC to meet the targets set by the CEJA, including 50% renewable energy by 2040 and 100% clean energy by 2050. AEE's plan calls for creating four new customer education programs and riders for Real-Time Pricing and Power Smart Pricing. AEE forecasts revenue requirement of $3M and $5M in 2023 and 2024, respectively. ComEd's plan calls for the creation of a residential program and C&I program, each of which will have sub-programs supporting EV adoption programs for non-transportation electrification, and customer education programs, among others. ComEd plans to spend $100M annually between 2023 and 2025 and will recover the costs through a rider. The programs are expected to start by January 1, 2023.

ETR — ETR Arkansas issues RFP for 1 GW of resources: ETR Arkansas issued an RFP for 1 GW of solar and wind resources that will enter service between May 2025 and December 2026. Solar projects must be located in ETR's AR service territory, while the wind resources must be located in MISO or SPP. ETR will procure the resources through a combination of PPAs, BOT agreements, and self-build. The RFP should help fulfill ETR's AR long-term capacity requirement as it expects a deficit of >770MW by 2028 based on assumptions regarding capacity retirements, according to its 2021 IRP filing.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

OGE – Intervenors and OGE reach unopposed settlement for OG&E 2022 rate case

EPA/Policy – Supreme Court limits ability of EPA to regulated GHGs under CAA

PCG/CA – CA undergrounding legislation set for hearing in Assembly

ED – NY PSC allows extension for CECONY gas customer use analysis filing

AWK – AWK wins NAS Mayport contract

DOE/PCG – DOE amends CNC eligibility and timeline to potentially accommodate Diablo Canyon

EXC – ICC Staff file direct testimony in FRP, point to support for ComEd ask

DOI/Policy – House Appropriations Committee approves 2023 DOI funding bill

OGE – Intervenors and OGE reach unopposed settlement for OG&E 2022 rate case

- Intervenors in the OG&E rate case have signed on to a modified settlement agreement with OG&E, with no opposing parties (most intervenors signed on, AARP does not oppose).
- The updated settlement maintains ROE and capital structure at 9.5% and 53.3%, respectively, allows cost recovery of all the investments and extending the Grid Enhancement Mechanism.
- The net revenue increase will be $30M, down from $45M prior on non-EPS-impacting items like:
  1. $8.8M reduction by amortizing EDIT over 5 years instead of 10 years (non-earnings impact)
  2. $5.9M reduction by amortizing pension asset over 15 years (non-earnings impact)
  3. The grid enhancement mechanism cap is changed to $6 million for each program year ’22, ’23, and ‘24. The mechanism will expire no later than July 1, 2025.
- ALJ recommended approval and is awaiting a proposed order filing.
- Docket: PUD202100164 available through search.

Guggenheim takeaway: *The updated settlement is a big step in addressing the bid-ask from prior settlements/positions without sacrificing earnings power. We caught up with mgmt. and noted a constructive resolution to the rate case. Mgmt. continues to anticipate implementing interim rates on July 1, 2022, and incorporating the latest settlement. The final order timing is uncertain, but even with the prior more litigated path the schedule would have run through end of September (i.e., with an unopposed settlement an order could come significantly sooner). As a reminder, we just hosted C-Suite for a well-attended NDR in NY.*

EPA/Policy – Supreme Court limits ability of EPA to regulated GHGs under CAA

- The Court ruled 6-3 that the EPA’s ability to regulate carbon dioxide emissions under the Clean Air Act is limited.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

- "Capping carbon dioxide emissions at a level that will force a nationwide transition away from the use of coal to generate electricity may be a sensible 'solution to the crisis of the day,'…A decision of such magnitude and consequence rests with Congress itself, or an agency acting pursuant to a clear delegation from that representative body." - Chief Justice John Roberts
- Useful overview HERE.
- Opinion HERE.
- More HERE.

Guggenheim takeaway: *In our view, this decision does not come as a surprise given the Court's makeup, the 2016 stay of the Obama-era Clean Power Plan (withdrawn by the subsequent administration), and the lines of questioning during arguments in February. While it presented a potential tool for the executive branch to proceed with changes at the federal level, in our view many of the states and utilities have already moved forward with carbon reductions independently, aware of the legal headwinds at the federal level. The EPA still has levers at its disposal (Good Neighbor/NOX) that will drive pollution mitigation and potential retirements, but the window for a wholesale Agency-led transition is now smaller.*

PCG/CA – CA undergrounding legislation set for hearing in Assembly

- CA Senate SB884 legislation was set for hearing on August 3, 2022 in the Assembly.
- The assembly committee on utilities previously removed the language around a delayed investment recovery for undergrounding projects.
- The language was replaced with a mandate for an accountability process that would be CPUC driven.
- CA Senate undergrounding bill text here (SB884).
- Legislative session runs through August.

Guggenheim takeaway: *The bill has been gaining media attention despite the relatively early inning of the legislative session. As history has shown, the legislative process can see bills amended or gutted almost entirely until the tail end of the session in August. The amendments remove a large portion of the contested language that would potentially be at odds with incentivizing undergrounding, and instead shows the political will for alignment on wildfire safety.*

ED – NY PSC allows extension for CECONY gas customer use analysis filing

- NYPSC approved an extension of time to file a CECONY gas use analysis.
- The extension allows for filings until July 15, 2022.
- Docket: 19-G-0066

Guggenheim takeaway:*FYI.*

AWK – AWK wins NAS Mayport contract

- "American Water Military Services LLC, Camden, New Jersey, has been awarded a $341,583,001 fixed-price with economic-price-adjustment contract for the ownership, operation and maintenance of the wastewater utility system at Naval Station Mayport, Florida. This was a competitive acquisition with four responses received. This is a 50-year contract with no option periods. Location of performance is Florida, with a Feb. 28, 2073, performance completion date. Using military service is Navy. Type of appropriation is fiscal 2022 through 2073 Navy operations and maintenance funds. The contracting activity is the Defense Logistics Agency Energy, Fort Belvoir, Virginia (SP0600-22-C-8343)." - DOD
- More HERE.

Guggenheim takeaway: *Right on the schedule management laid out on its 1Q call, and another strong win for MSG. While the segment is not a particularly large contributor to consolidated earnings, it remains a core competency for the company and strong proving ground for some of the nation's more challenging water conditions (e.g., contamination).*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

DOE/PCG – DOE amends CNC eligibility and timeline to potentially accommodate Diablo Canyon

- "DOE recently amended the Guidance for applying to the Civil Nuclear Credit (CNC) Program. To incorporate these changes into the Guidance for the current award cycle and give potential applicants the time they need to respond, we have extended the application period to September 6, 2022. This will allow any reactors impacted by the change the time to submit an application based on the Amended Guidance." - DOE
- More HERE.

Guggenheim takeaway: *Zero surprise to us given the ongoing dialogue between the stakeholders, with DOE creating a pathway for PCG and the state to seek the necessary funds.*

EXC – ICC Staff file direct testimony in FRP, point to support for ComEd ask

- ICC Staff largely aligned with ComEd's FRP filing in their direct testimony, with Staff supporting a $220mm increase in the revenue requirement vs. the company's $223mm.
- More HERE.

Guggenheim takeaway: *Minor ICYMI as the final FRP works its way through the normal process.*

DOI/Policy – House Appropriations Committee approves 2023 DOI funding bill

- "In total, the bill includes $44.8 billion in regular appropriations, an increase of $6.8 billion – 18 percent – above the FY 2022 enacted level. There is also an additional $2.55 billion of funding provided under the fire suppression cap adjustment." – HAC
- The bill is roughly a 7% bump over the prior year's appropriation and includes boosts across the Department's traditional and renewable energy touch points (BOEM).
- More HERE.

Guggenheim takeaway: *Policy data point for your awareness as the fiscal process churns in the background on the Hill.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

Equity Research | Corporate Access

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings
Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite
Location: TBD

Tuesday, July 12th

11:30 AM | Lunch
Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience
Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game
Southern Company C-Suite will host in their private box. Dinner will be served.

Company Information

Market Cap: $79.3bn

Southern Co (SO) is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, and Tennessee. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA.

Equity Research | Corporate Access

DTE Energy Company (DTE)

Jerry Norcia, *Chief Executive Officer*
Barbara Tuckfield, *Director, Investor Relations*

Date
August 8 & 9, 2022
New York

Meeting Format
NDR - 1:1 Meetings, Group Meeting

Company Information
Market Cap: $25.7bn
DTE Energy Co. (DTE) operates as a diversified energy company, which engages in the development and management of energy-related businesses and services. It operates through the following segments: Electric, Gas, DTE Vantage, Energy Trading, and Corporate and Other. The Electric segment consists of generation, purchase, distribution, and sale of electricity to residential, commercial, and industrial customers in southeastern Michigan. The Gas segment is involved in the purchase, storage, transportation, distribution, and sale of natural gas to residential, commercial, and industrial customers throughout Michigan, and the sale of storage and transportation capacity. The DTE Vantage segment focuses on projects that deliver energy and utility-type products and services to industrial, commercial, and institutional customers, produce reduced emissions fuel, and sell electricity and pipeline-quality gas from renewable energy projects. The Energy Trading segment covers energy marketing and trading operations. The Corporate and Other segment composed of various holding company activities, holds certain non-utility debt, and holds certain investments, as well as funds supporting regional development and economic growth. The company was founded in January 1995 and is headquartered in Detroit, MI. (Source: FactSet)

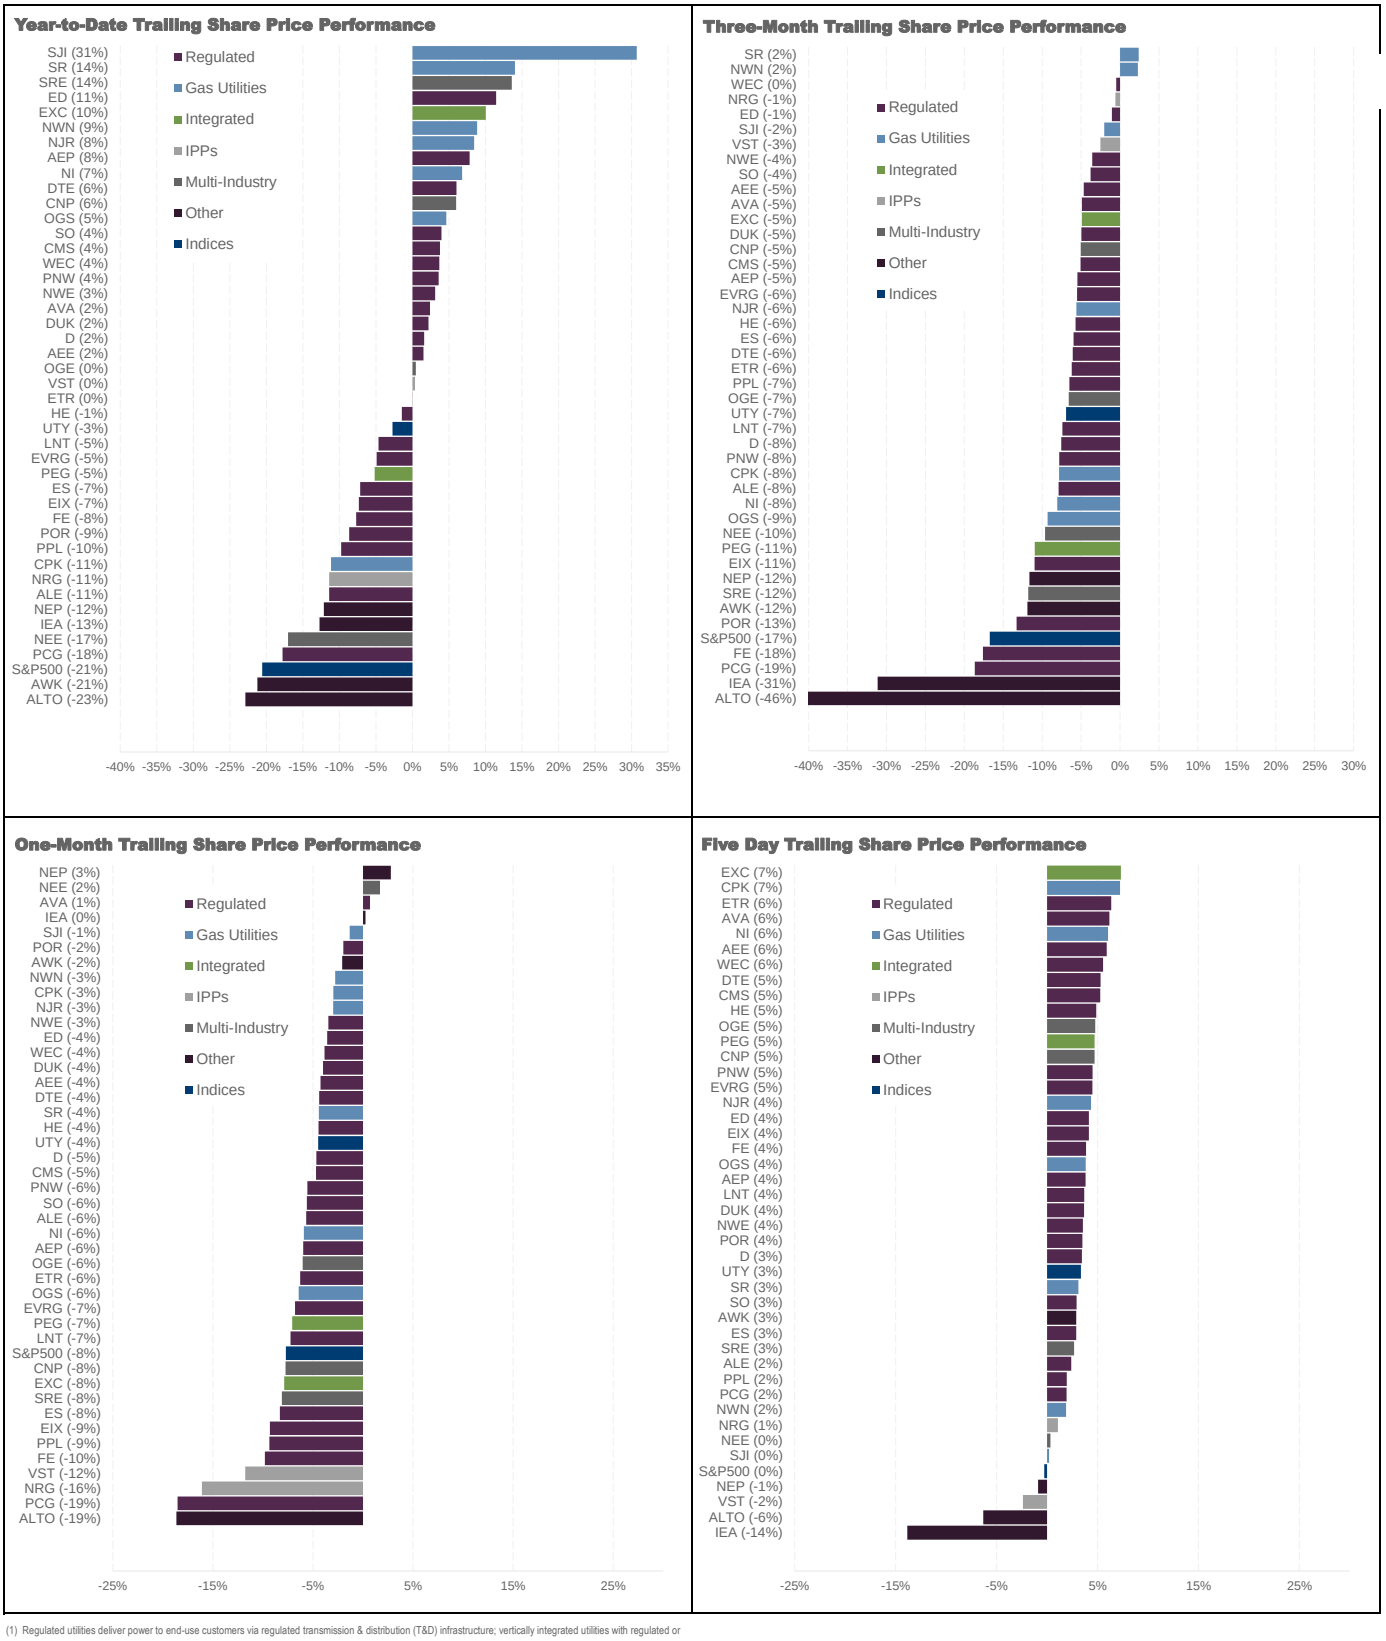
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from American Water Works Company, Inc., Consolidated Edison, Inc., Exelon Corporation, OGE Energy Corp. and PG&E Corporation in the next 3 months.

Guggenheim Securities, LLC makes a market in the securities of OGE Energy Corp..

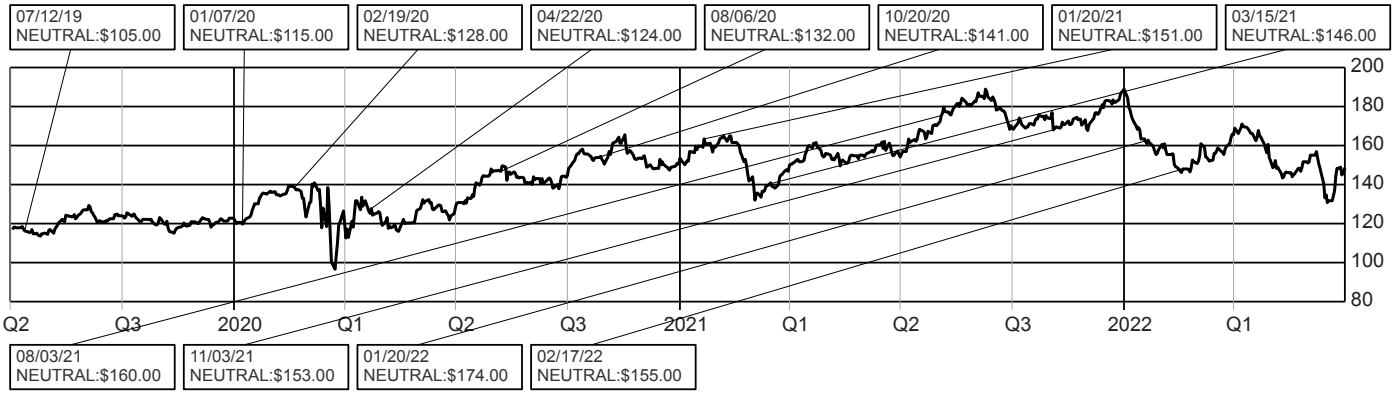
Guggenheim Securities, LLC managed or co-managed a public offering of securities for PG&E Corporation during the past 12 months.

PG&E Corporation is or was during the 12-month period preceding the date of the distribution of this report a client of Guggenheim Securities, LLC. Guggenheim Securities, LLC provided PG&E Corporation investment banking services.

Guggenheim Securities, LLC or its affiliates received compensation for investment banking services from PG&E Corporation during the past 12 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

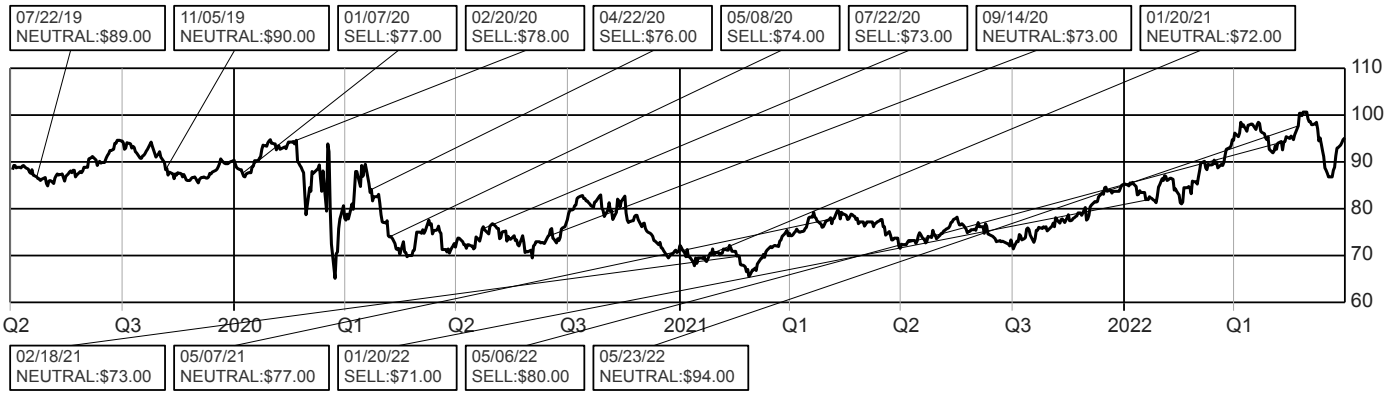
Rating and Price Target History for: American Water Works Company, Inc. (AWK) as of 06-30-2022



Created by: BlueMatrix

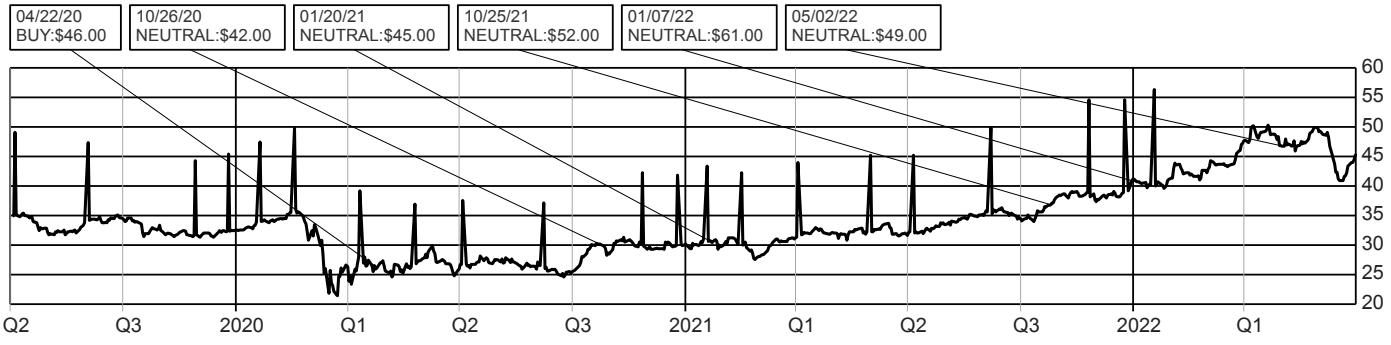
Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

Rating and Price Target History for: Consolidated Edison, Inc. (ED) as of 06-30-2022



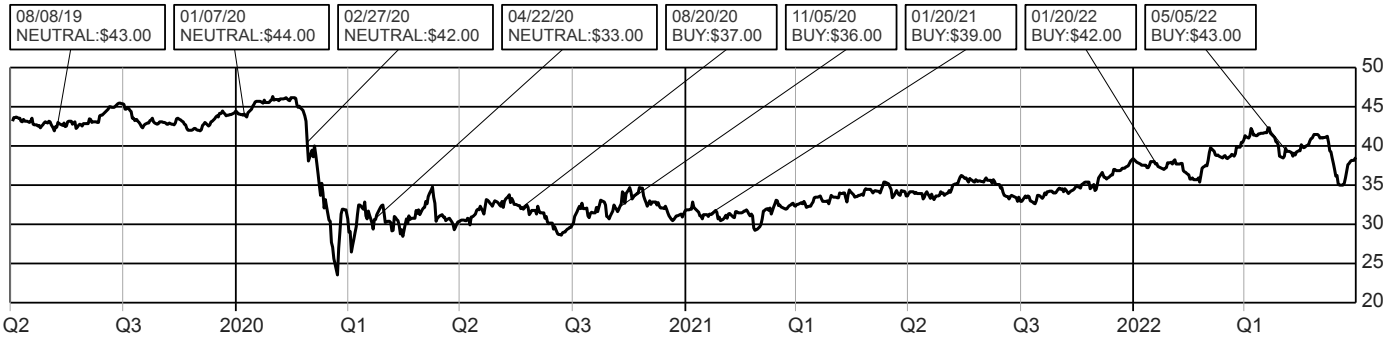
Created by: BlueMatrix

Rating and Price Target History for: Exelon Corporation (EXC) as of 06-30-2022



Created by: BlueMatrix

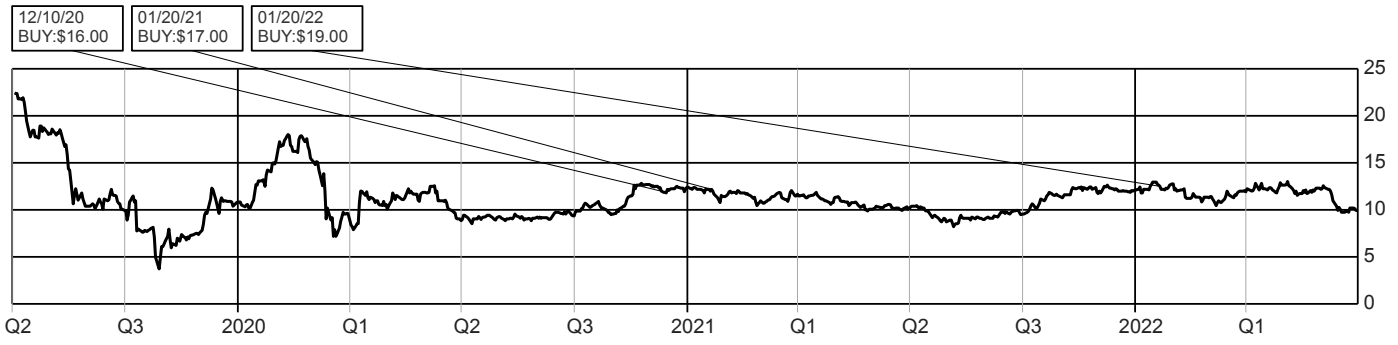
Rating and Price Target History for: OGE Energy Corp. (OGE) as of 06-30-2022



Created by: BlueMatrix

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

Rating and Price Target History for: PG&E Corporation (PCG) as of 06-30-2022



Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: AGR, XEL, EXC, DUK, CMS, AEP, WEC, CNP, SO, DTE, AVA, NWE, PNW, POR

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

In the week ahead we are tracking proceedings in AGR's CT electric rate case, XEL's MN electric GRC, FERC's interconnection NOPR, EXC's MD rate case, DUK's SC rate case, the CA NEM docket, and CMS's electric rate case. In other news, the ME Staff filed testimony in CMP's rate case; AEP filed an electric rate case in OK; the WI PSC approved WEC to acquire a solar plus storage project; the MN PUC denied reconsideration of CNP's and XEL's Uri-related storm cost proceedings; GP completed cold-hydro testing on Vogtle Unit 4; DTE announced the retirement of two coal plants; AVA announced a hydroelectric PPA; the transformer shortage has attracted the attention of Congress, and the options for a Western regional market expanded.

Regulatory Calendar

AGR — Staff and intervenor testimony in UIL's CT electric rate case is due on December 13: UIL is seeking a $102M rate increase in RY1, $17M in RY2, and $17M in RY3. In line with AGR's recent rate filings such as those in NY, the Company is seeking a symmetric inflation tracker, which would adjust the ROE annually to reflect market conditions and avoid regulatory lag in the current inflationary backdrop. The filing also includes a rate levelization proposal in which the proposed increase in RY1 would be spread over the three years of the rate plan such that the annual rate increase would be $54M. AGR's filing is premised on 10.2% ROE and 52% equity. This is UIL's first filing since 2019 and the utility aims to invest ~$600M over the three-year period—mostly on grid reliability and grid modernization.

XEL — Evidentiary hearings in the MN electric rate case are scheduled to begin December 13: In surrebuttal testimony, the MN DOC increased its recommendation to a cumulative $324M revenue increase over three years (vs. $274M), while maintaining its initial recommendation for a 9.25% ROE and 52.5% equity layer. This compares to XEL's rebuttal testimony request for a cumulative $498M rate increase over three years, based on a $234M increase in RY1 and increases of $94M and $170M in RY2 and RY3, respectively. XEL maintained the requested 10.2% ROE and 52.5% equity ratio sought in the initial filing. The lower revenue requirement includes recommendations from intervenors to adjust for the extension of the Monticello nuclear plant (-$35M adjustment), the MISO PRA Auction results (-$111M adjustment), and the EV rebate proposal (-$16M adjustment). XEL included revenue requirements for these items in its initial filing for a $677M cumulative rate increase as it did not know the outcome of the pending cases at the time. A final PUC decision is expected in 2Q23.

Reply comments on FERC's interconnection NOPR are scheduled for December 14: The reply comments follow opening comments from October 13 (see our writeup here). Under Docket RM22-14, FERC issued a NOPR to address the backlogs in the interconnection queue and proposed improved procedures. Among the proposals are: 1) implement a first-ready, first-served cluster study process in which the transmission providers will conduct large studies that include multiple generating facilities rather than individual studies for each facility; 2) improve the processing speed by imposing firm deadlines and penalties if transmission owners fail to complete the interconnections on time; 3) use technological advancements into the process to allow more than one resource to co-locate on a shared site behind a single point of interconnection and share a single interconnection request; and 4) update modeling and performance requirements to improve system reliability for non-synchronous generating facilities.

EXC — Commission decision in Delmarva's MD multi-year electric rate case is scheduled for December 15: EXC (Docket No. 9681) reached a partial settlement in its electric rate case for a $16.9M increase in 2023, followed by $6.0M increases in 2024 and 2025. The parties also agreed to a 9.6% ROE and 50.5% equity layer. The outstanding items include the Bill Stabilization Adjustment and the reconciliation mechanism. Previously, Staff filed testimony for a cumulative rate increase of $23.7M for the three years from 2023-2025. The increase is premised on a 9.55% ROE and 50.50% equity layer. This compares to EXC's request for a cumulative rate increase of $37.5M for the three years 2023-2025, based on a 10.25% ROE and 50.5% equity layer. DP&L requested a $22.7M increase in 2023, followed by $7.9M and $6.8M in 2024 and 2025, respectively. This is Delmarva's first multiyear plan filing in MD after the PSC adopted rules in 2020 allowing multiyear rate plans. New rates are expected to go into effect January 1, 2023.

DUK — Rebuttal testimony in DEP's SC electric rate case is due on December 15: Staff recommended a ~$40M revenue increase premised on a 9.4% ROE and 52.43% equity layer. This compares to DEP's request for an ~$89M revenue increase premised on a 10.2% ROE and 53% equity. The delta can largely be attributed to the lower ROE, cost differences in the coal ash adjustments, and adjustments to DUK's deferred costs. As a reminder, DEP proposed accelerating the return of deferred income tax benefits, resulting in a net ~$68M rate increase. DEP also proposed to layer in the rate increase over two years, with a $53M rate increase in RY1 and a $15M increase in RY2. The main drivers for the rate increase include capital investments since the last rate case and the recovery of costs associated with coal ash pond closures. DEP last filed an SC electric rate case in 2018 and was granted a $41.5M rate increase based on a 9.50% ROE and 53% equity. DUK requests a decision by March 1, 2023, with rates effective April 1, 2023.

EIX, SRE, PCG, NOVA, RUN, ENPH — Voting meeting in the NEM 3.0 docket in CA scheduled for December 15: The meeting follows a PD issued on November 10 (see our writeup here). The exact date when NEM 3.0 becomes effective depends on when a final decision is reached. The sunset date for customers to receive the more lucrative NEM 2.0 tariff structure is 120 days after a final decision is reached. See our earlier notes on the NEM proceedings here, here, here, here, and here.

FERC's Open Meeting is scheduled for October 20: A copy of the Sunshine Notice is included here.

CMS — PFD in CMS's MI electric rate case scheduled for December 16: In reply briefs, MI PSC Staff recommended a $140M net revenue increase, premised on 9.70% ROE and 51.0% equity. CMS is seeking a net revenue increase of $287M based on a 10.25% ROE, a 51.5% equity layer, and a projected YE23 test year. The drivers of the present case include investments in new solar and natural gas-fired generation, system reliability, resilience, and cost recovery for the planned acquisition of the Covert plant in 2023. CMS requested rates to be effective March 1, 2023.

Recent Developments for Companies Under Our Coverage

From our midweek: This week, the MN PUC voted to approve XEL's plan to offset the 2023 interim rate increase with excess revenue from the MISO Planning Auction; SIP signed another SPA for Port Arthur Phase 1; SIP's Cameron LNG and ETR announced a renewable ESA; NYSEG announced it will suspend late payment charges through the winter; an OH judge approved a class settlement involving FE; PNM filed its 2022 NM rate case; the MO PSC asked utilities to present opportunities from the application of the IIJA and IRA; MISO published a 2022 Regional Resource Assessment highlighting near-term capacity constraints; the Federal appeals court issued a ruling in FERC's MISO transmission case; the CO PUC issued new guidelines for state natural gas systems to help reach emission reduction targets; ISO NE issued a statement that it is adequately prepared for a mild-moderate winter, and the EIA's December STEO is out.

AGR — ME Staff files testimony in CMP rate case: In testimony, Staff recommended a 9.0% ROE and maintained CMP's 50% equity layer request. Staff raised concerns regarding CMP's $590M forecasted capital plan for 2023-2025 and the capital adjustment mechanism. Staff is requesting the Company provide new metrics and quantifiable means to verify the required revenue is spent on projects that provide maximum customer value and improve service and reliability. In the intervenor testimony, the OPA did not calculate the required revenue for AGR but recommended a $25.3M reduction to AGR's request in RY1, and recommended an 8.79% ROE and 47% equity layer. The primary items of difference between CMP's filing and the OPA proposal are differences in the ROR and capital structure with other reductions being in the late payment revenue and payroll expenses. The OPA also recommended that the Commission allow AGR only a single-year rate increase. As a reminder, AGR filed testimony seeking an increase to revenue requirements of $51.2M in RY1, $27.6M in RY2, and $23.0M in RY3, based on a 10.2% ROE, and 50% equity. The drivers for the increase include a higher ROE, recovery of investments, O&M associated with CMP's vegetation management program, and an increase in actual storm expenses. AGR is requesting for rates to become effective August 1, 2023. The last rate case in ME was authorized at an 8.25% ROE and 50% equity layer. The ROE included a 100 bps penalty that was recently removed.

AEP — AEP files OK rate case: AEP's subsidiary PSO filed an electric rate case with the OK Corporation Commission requesting a $173M net revenue increase, premised on a 10.4% ROE, 54.6% equity, and a $4.5B rate base as of June 30, 2022. The drivers of the rate increase include shifting the North Central Energy Facilities into the rate base, the acquisition of the Rock Falls Wind Facility, and the acceleration of the rate of depreciation for Northeastern Unit 3 to align with the 2026 retirement date. PSO is requesting a one-year formula-based rate pilot with a 100 bps deadband. If the OCC decides against the FBR pilot, PSO's alternative preference would include improving the current SPP Transmission Cost Tariffs, implementing a Grid Enhancement and Resiliency Rider, and changes to the Effective Tax Reserve rider. At the end of 3Q22, PSO had earned a 6.9% TTM ROE compared to a 9.4% authorized ROE. PSO requests a final decision by May 21, 2023, and for new rates to go into effect by January 1, 2024. In its 2021 rate case, AEP was authorized a $153.4M revenue increase premised on a 9.4% ROE.

WEC — WI PSC approves WEC to acquire a solar plus storage project: The WI PSC issued an order approving WEC's acquisition of the 250 MW Darien Solar Farm and the 75 MW battery energy storage facility. WEC's subsidiaries WEPCO and WPSC will acquire 187.5 MW and 37.5 MW of solar, respectively. The two subsidiaries will also acquire 56.25 MW and 11.25 MW of storage, respectively. MGE will acquire the remaining 25 MW of solar and 7.5 MW of storage. At the time of the filing in March 2021, the total project costs were estimated to be $446M, and WEC estimates its share of costs at ~$400M. The project was expected to be in service by January 2024 but experienced an eleven-month delay due to supply chain challenges, resulting in a new in-service date of November 2024. In

response, WEC delayed the retirement of four coal-fired units at Oak Creek to manage delays in the construction of the Darien Solar and Battery project and a 12-month delay at the Paris Battery project.

CNP, XEL — MN PUC denies reconsideration of CNP's and XEL's Uri-related storm cost recoveries: The MN PUC ruled not to reconsider its decision regarding CNP and XEL's Uri-related storm costs that were previously disallowed ($35.7M and $19M for CNP and XEL, respectively). CNP filed a petition with the MN PUC requesting the Commission to reconsider its decision and adopt the MN ALJ's recommendation for a full recovery of the ~$409M of costs associated with the February 2021 winter storm. XEL also filed a petition requesting the Commission to reconsider its decision to disallow $19M in natural gas. CNP and XEL sought a prudence review of the full amounts of $409M and $179M, respectively.

SO — Vogtle Unit 4 completes cold hydro testing as it progresses toward the 4Q23 in-service date: GP has completed cold hydro testing on Vogtle Unit 4. The cold hydro testing confirmed that the reactor's coolant system functions properly and verified that the welds, joints, pipes, and other components of the coolant system and associated high-pressure systems do not leak when under pressure. After the completion of cold hydro testing, SO is expected to begin hot functional testing in March 2023. HFT is the last series of major tests ahead of fuel load and is critical in verifying the successful operation of reactor components and systems together and confirm that the reactor is ready for fuel load. Fuel load is expected to begin in July 2023. SO maintained timelines, including Unit 3 entering service in 1Q23, followed by Unit 4 in 4Q23.

DTE — DTE announces the retirement of two coal plants: DTE announced the retirement of St. Clair and Trenton Chanel coal plants. The last operating units at the facilities were St. Clair Units 2-3 and 6-7, 1,065 MW in aggregate, and the 495 MW Trenton Channel Unit 9. DTE began the retirement process for both plants earlier this year, including placing the St. Clair units on standby-only status since the beginning of summer. The announcement aligns with the 2022 retirement date DTE agreed to in the 2019 IRP. DTE recently filed the 2022 IRP (read our note here), which includes the Company's plans to exit coal by 2035.

AVA — AVA announces PPA for 145 MW of hydroelectric generation: AVA finalized a PPA with Columbia Basin Hydropower for 145 MW of hydropower generation from seven hydro facilities. The contracts have a total duration of 23 years, and AVA will begin receiving deliveries from the projects as older contracts for the seven facilities expire. The agreement will help AVA to reach its carbon reduction goals and comply with the WA Clean Energy Transformation Act. The CETA was enacted in 2019 and requires all electricity in WA to be GHG-neutral by 2030 and 100% renewable or generated from zero-carbon sources by 2045.

Transformer shortage attracts the attention of the U.S. Congress: A group of House Democrats is lobbying Congress to enact the Defense Production Act and seek $1.8B in emergency funding to develop a domestic supply chain to produce transformers. The attention in Congress follows a letter from power industry groups to Congress asking for $1B in DPA funding to help address the supply chain crisis for electric distribution transformers. The delays in securing transformers could potentially impact grid reliability, delay grid expansion to accommodate renewable sources and create challenges for building out EV infrastructure. Lead times for transformers have increased by 443% from 2020 to 2022, leading to construction and electrification projects being deferred or canceled by utilities and the housing industry. Labor shortages and material availability are the most significant near-term challenges. A continuing resolution to fund the federal government expires on December 16, and the legislation could provide a chance to provide additional funding to support the transformer manufacturing crisis. The coalition includes the heads of the National Rural Electric Cooperative, American Public Power Association, EEI, Leading Builders of America, NAHB, and Associated General Contractors of America.

AVA, NWE, PNW, POR, XEL — Options for a Western regional market continue to expand:

- **Eleven members joined the Western Resource Adequacy Program:** AVA, POR, and nine other utilities became the first participants to join the Western Power Pool's Western Resource Adequacy Program. The WRAP is a region-wide reliability planning and compliance program allowing participants to share resources across the Western Interconnection. The WRAP proposes establishing consistent reliability metrics across the region and pooling resources to balance supply and demand amongst its participants. WPP requested a FERC decision on its WRAP tariff by Dec. 12.
- **CAISO's EDAM preparing to present the final proposal**: PacifiCorp announced its intention to join CAISO's Extended Day Ahead Market. The EDAM is a day-ahead market that will allow voluntary participation amongst its members and builds on CAISO's real-time Western Energy Imbalance Market, which is the most relatable option to a regional market that the Western Interconnection provides. The WEIM will grow to 22 participants by 2024. The EDAM final proposal will be presented to the CAISO Board of Governors and WEIM Governing Body at a joint meeting on Dec. 14, and a final decision is expected on Feb. 1, 2023. CAISO is targeting a 2024 launch for the EDAM.

New CEO Likely To Maintain Exelon's Focus on Regulated Utilities

Business Strategy & Outlook Andrew Bischof, Senior Equity Analyst, 5 Dec 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2025, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will invest $29 billion through 2025, supporting 8% rate base growth. This investment plan supports our earnings forecast and for dividend growth to be in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. We expect earned returns to be within management's 9%-10% goal.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Sector
Utilities

Industry
Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

Bulls Say Andrew Bischof, Senior Equity Analyst, 5 Dec 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, Senior Equity Analyst, 5 Dec 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Fair Value and Profit Drivers Andrew Bischof, Senior Equity Analyst, 5 Dec 2022

Our fair value estimate for Exelon is $41.

We expect 7% average earnings growth through 2025, the midpoint of management's 6% to 8% earnings guidance. We forecast $29 billion of capital expenditures through 2025 at the company's regulated operations, supporting 8% rate-base growth. We assume consistent regulatory treatment across Exelon's service territories. We assume earned returns are at the low end of management's 9%-10% goal.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Economic Moat Andrew Bischof, Senior Equity Analyst, 2 Feb 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated

Exelon Corp EXC ★★★ 5 Dec 2022 22:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.75 USD 5 Dec 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.19 USD Bil 2 Dec 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Moat Trend Andrew Bischof, Senior Equity Analyst, 2 Feb 2022

We assign Exelon a stable moat trend rating. The regulatory environments in Illinois, Pennsylvania, and Maryland have stabilized, allowing the company's distribution utilities fair returns. Nearly all of Exelon's rate-base growth will have rate trackers or formula rates, minimizing regulatory lag. Exelon faces the biggest challenge boosting regulated earned returns.

Exelon's stable business model and difficult-to-replicate asset base support our view that the firm's narrow moat is stable. We don't anticipate a change in the regulatory compact between utilities and ratepayers that ensures capital providers earn a fair return on their investments. As with all regulated utilities, we think revenue caps preclude Exelon from establishing a wide economic moat.

Regulated utilities' moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations.

Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of capital. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities that we cover.

Risk and Uncertainty Andrew Bischof, Senior Equity Analyst, 5 Dec 2022

We rate Exelon with a Morningstar Uncertainty Rating of Low.

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks.

Exelon Corp EXC ★★★ 5 Dec 2022 22:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.75 USD 5 Dec 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.19 USD Bil 2 Dec 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Financial Strength Andrew Bischof, Senior Equity Analyst, 5 Dec 2022

With over 4.0 times interest coverage, Exelon's financial health is sound for a regulated utility, particularly given its stable, low-risk business model. With our forecast for $29 billion of capital spending planned through 2025, Exelon will be a frequent debt issuer. The company has manageable long-term debt maturities and we anticipate it will be able to refinance its debt as it comes due, maintaining its current debt/capital ratio. We expect the company to issue $1.0 billion in equity to fund its capital investment plan through 2025, with $500 million issued in 2022, in line with management's expectations.

We expect total debt/EBITDA to remain in the 4.5-5.0 times range. Exelon will target a 60% dividend payout ratio. We expect dividend growth in line with our 7% annual earnings per-share growth forecast through 2025.

Capital Allocation Andrew Bischof, Senior Equity Analyst, 5 Dec 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary. However, new legislation in Illinois incorporating traditional ratemaking could help boost returns at the unit.

CEO Chris Crane's retirement at the end of 2022 is earlier than we anticipated due to health issues. Crane dealt with low power prices through most of his tenure before separating the nuclear merchant generation business leaving a regulated-only utility. We think this move was in shareholders' best interest. He also navigated through Exelon subsidiary ComEd's bribery scandal, agreeing to a deferred prosecution agreement with federal prosecutors. Crane successfully lobbied for significant subsidies for Exelon's nuclear fleet.

Replacing Crane is Calvin Butler, who was promoted to president and COO earlier this year, adding to his responsibilities as executive of the company's utilities group. We expect Butler to continue Exelon's focus on improving regulatory relationships and executing on the company's regulated growth opportunities.

Recent Analyst Notes

Exelon CEO to Step Down; Reports Third-Quarter Earnings Andrew Bischof,Senior Equity Analyst,3 Nov 2022

We are reaffirming our $41 per share fair value estimate for Exelon after it reported third-quarter adjusted earnings per share of $0.75 up from $0.61 in the same year-ago period. Comparable earnings were adjusted for the Constellation Energy divestiture earlier this year and discontinued operations.Management narrowed its 2022 full-year earnings guidance to $2.21-$2.29 per share from previous guidance of $2.18-$2.32. Our unchanged estimate remains within the new guidance range. Management reaffirmed Exelon's long-term 6%-8% annual earnings growth through 2025, with growth initially below this range and accelerating through the timeframe. Our narrow moat and stable moat trend ratings remain unchanged.The company announced that CEO Chris Crane will retire at the end of 2022, earlier than we anticipated, due to health issues. Crane dealt with low power prices that impacted Constellation's performance through most of his tenure. We viewed the Constellation divestiture and focus on becoming a regulated-only utility a positive for investors. Crane also navigated Exelon through subsidiary ComEd's bribery scandal, helping reach a deferred prosecution agreement with federal prosecutors. Crane successfully lobbied for significant subsidies for Exelon's nuclear fleet.Calvin Butler, who was promoted to president and COO earlier this year, will replace Crane. Butler is also an executive of the company's utilities group. We expect Butler to continue Exelon's focus on improving regulatory relationships and executing the company's regulated growth plan.Exelon's returns on equity continued improved notably in the quarter. The company's trailing 12-month earned returns on equity were 9.3%, up from 8.8% in the second quarter and now within management's 9%-10% target range. Timing of equity infusions and regulatory outcomes aided returns. In the quarter, rate increases and lower storm costs lifted earnings, partially offset by higher depreciation and interest expenses.

Raising U.S. Electricity Demand Growth Outlook, Reaffirming Utilities Fair Value Estimates Andrew Bischof,Senior Equity Analyst,27 Sep 2022

We are reaffirming our fair value estimates for U.S. utilities after raising our 10-year annual U.S. electricity demand growth forecast to 1.4%, up from 1.2% in our previous forecast two years ago. We also are reaffirming our economic moat and moat trend ratings for all U.S. utilities.We believe the path to eliminate carbon emissions and meet environmental targets will lead to accelerating electricity demand growth and new infrastructure growth investment opportunities for utilities. We forecast 6%-8% annual earnings and dividend growth for most utilities through the decade to support electricity demand growth. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 8%-9% long-term annualized total returns even if valuations compress, as we think they will. We consider the sector 5% overvalued on a median basis as of Sept. 27.Our new electricity demand forecast is more bullish than most. We think other forecasts underestimate the speed and scale of the U.S. clean energy transition. With many regions already facing strained electric grids, electricity demand growth presents opportunities and challenges for utilities as they manage the surge of electric vehicles,

Exelon Corp EXC ★★★ 5 Dec 2022 22:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.75 USD 5 Dec 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.19 USD Bil 2 Dec 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

Big Data, building electrification, and other mandates.We expect electricity demand from electric vehicles will grow faster than any other new source of electricity demand in our forecast, climbing 15-fold by 2032. Data centers, already sizable electricity users, are the second-fastest-growing new source of electricity demand in our forecast. Building and industrial electrification represents upside to our forecast.Energy efficiency gains will offset some of the core electricity demand growth that we forecast. We expect U.S. electricity intensity of the economy to fall 12% over our forecast period. Energy efficiency gains have held U.S. electricity demand mostly flat for the last decade.

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth Andrew Bischof,Senior Equity Analyst,16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

Exelon Reports Solid Second Quarter Results as it Plans to Issue Equity to Fund Capital Investment Plan Andrew Bischof,Senior Equity Analyst,3 Aug 2022

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.Exelon announced plans to

Exelon Corp EXC ★★★ 5 Dec 2022 22:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.75 USD 5 Dec 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.19 USD Bil 2 Dec 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates Andrew Bischof,Senior Equity Analyst,15 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.No utility was trading below our fair value estimate mid-last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Andrew Bischof,Senior Equity

Exelon Corp EXC ★★★ 5 Dec 2022 22:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.75 USD 5 Dec 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.19 USD Bil 2 Dec 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

Analyst,10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value. Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar Equity Research Star Rating Methodology

Research Methodology for Valuing Companies

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns. An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

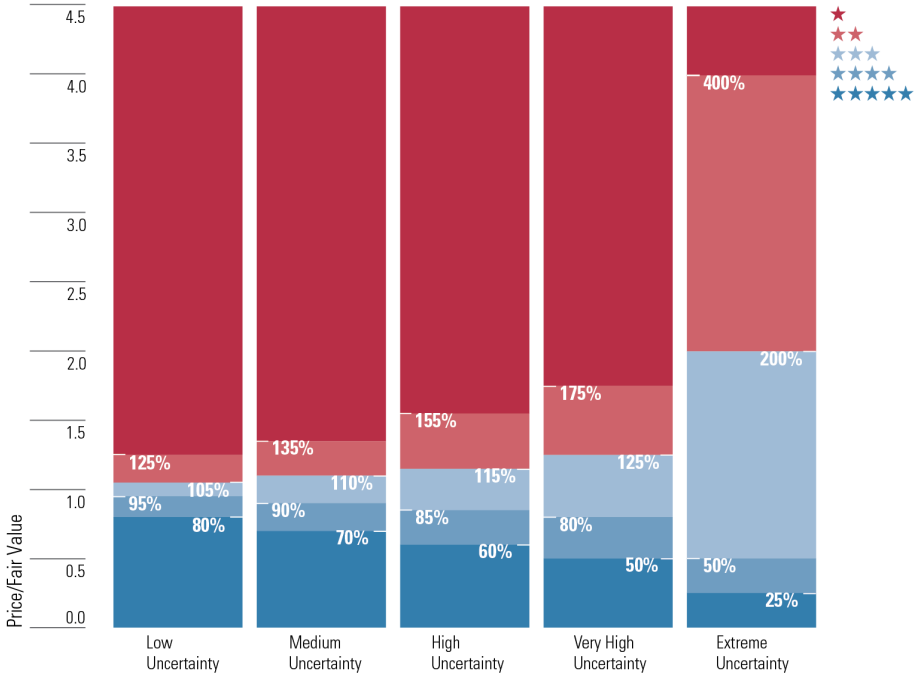
Our recommended margin of safety—the discount to fair value demanded before we'd recommend buying or selling the stock—widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the potential dispersion of outcomes, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the Uncertainty Rating provides guidance in portfolio construction based on risk tolerance.

Our Uncertainty Ratings are: Low, Medium, High, Very High, and Extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

Morningstar Equity Research Star Rating Methodology



4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear

Research Methodology for Valuing Companies

time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

New CEO Likely To Maintain Exelon's Focus on Regulated Utilities

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 5 Dec 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2025, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will invest $29 billion through 2025, supporting 8% rate base growth. This investment plan supports our earnings forecast and for dividend growth to be in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. We expect earned returns to be within management's 9%-10% goal.

Utilities

Industry
Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 5 Dec 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 5 Dec 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 5 Dec 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation

offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 5 Dec 2022

Our fair value estimate for Exelon is $41.

We expect 7% average earnings growth through 2025, the midpoint of management's 6% to 8% earnings guidance. We forecast $29 billion of capital expenditures through 2025 at the company's regulated operations, supporting 8% rate-base growth. We assume consistent regulatory treatment across Exelon's service territories. We assume earned returns are at the low end of management's 9%-10% goal.

Exelon Corp EXC ★★★ 5 Dec 2022 22:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.75 USD 5 Dec 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.19 USD Bil 2 Dec 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 5 Dec 2022

We rate Exelon with a Morningstar Uncertainty Rating of Low.

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 5 Dec 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice

Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary. However, new legislation in Illinois incorporating traditional ratemaking could help boost returns at the unit.

CEO Chris Crane's retirement at the end of 2022 is earlier than we anticipated due to health issues. Crane dealt with low power prices through most of his tenure before separating the nuclear merchant generation business leaving a regulated-only utility. We think this move was in shareholders' best interest. He also navigated through Exelon subsidiary ComEd's bribery scandal, agreeing to a deferred prosecution agreement with federal prosecutors. Crane successfully lobbied for significant subsidies for Exelon's nuclear fleet.

Replacing Crane is Calvin Butler, who was promoted to president and COO earlier this year, adding to his responsibilities as executive of the company's utilities group. We expect Butler to continue Exelon's focus on improving regulatory relationships and executing on the company's regulated growth opportunities.

Analyst Notes Archive

Exelon CEO to Step Down; Reports Third-Quarter Earnings Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Nov 2022

We are reaffirming our $41 per share fair value estimate for Exelon after it reported third-quarter adjusted earnings per share of $0.75 up from $0.61 in the same year-ago period. Comparable earnings were adjusted for the Constellation Energy divestiture earlier this year and discontinued operations.

Management narrowed its 2022 full-year earnings guidance to $2.21-$2.29 per share from previous guidance of $2.18-$2.32. Our unchanged estimate remains within the new guidance range. Management reaffirmed Exelon's long-term 6%-8% annual earnings growth through 2025, with growth initially below this range and accelerating through the timeframe. Our narrow moat and stable moat trend ratings remain unchanged.

The company announced that CEO Chris Crane will retire at the end of 2022, earlier than we anticipated, due to health issues. Crane dealt with low power prices that impacted Constellation's performance through most of his tenure. We viewed the Constellation divestiture and focus on becoming a regulated-only utility a positive for investors. Crane also navigated Exelon through subsidiary ComEd's bribery scandal, helping reach a deferred prosecution agreement with federal prosecutors. Crane successfully lobbied for significant subsidies for Exelon's nuclear fleet.

Calvin Butler, who was promoted to president and COO earlier this year, will replace Crane. Butler is also an executive of the company's utilities group. We expect Butler to continue Exelon's focus on

improving regulatory relationships and executing the company's regulated growth plan.

Exelon's returns on equity continued improved notably in the quarter. The company's trailing 12-month earned returns on equity were 9.3%, up from 8.8% in the second quarter and now within management's 9%-10% target range. Timing of equity infusions and regulatory outcomes aided returns. In the quarter, rate increases and lower storm costs lifted earnings, partially offset by higher depreciation and interest expenses.

Raising U.S. Electricity Demand Growth Outlook, Reaffirming Utilities Fair Value Estimates Andrew Bischof, CFA, CPA, Senior Equity Analyst, 27 Sep 2022

We are reaffirming our fair value estimates for U.S. utilities after raising our 10-year annual U.S. electricity demand growth forecast to 1.4%, up from 1.2% in our previous forecast two years ago. We also are reaffirming our economic moat and moat trend ratings for all U.S. utilities.

We believe the path to eliminate carbon emissions and meet environmental targets will lead to accelerating electricity demand growth and new infrastructure growth investment opportunities for utilities. We forecast 6%-8% annual earnings and dividend growth for most utilities through the decade to support electricity demand growth. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 8%-9% long-term annualized total returns even if valuations compress, as we think they will. We consider the sector 5% overvalued on a median basis as of Sept. 27.

Our new electricity demand forecast is more bullish than most. We think other forecasts underestimate the speed and scale of the U.S. clean energy transition. With many regions already facing strained electric grids, electricity demand growth presents opportunities and challenges for utilities as they manage the surge of electric vehicles, Big Data, building electrification, and other mandates.

We expect electricity demand from electric vehicles will grow faster than any other new source of electricity demand in our forecast, climbing 15-fold by 2032. Data centers, already sizable electricity users, are the second-fastest-growing new source of electricity demand in our forecast. Building and industrial electrification represents upside to our forecast.

Energy efficiency gains will offset some of the core electricity demand growth that we forecast. We expect U.S. electricity intensity of the economy to fall 12% over our forecast period. Energy efficiency gains have held U.S. electricity demand mostly flat for the last decade.

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth Andrew Bischof, CFA, CPA, Senior Equity Analyst, 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are

Exelon Corp EXC ★★★ 5 Dec 2022 22:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.75 USD 5 Dec 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.19 USD Bil 2 Dec 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

Exelon Reports Solid Second Quarter Results as it Plans to Issue Equity to Fund Capital Investment Plan Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon announced plans to issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.

Exelon Corp EXC ★★★ 5 Dec 2022 22:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.75 USD 5 Dec 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.19 USD Bil 2 Dec 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.

Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.

In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates Andrew Bischof, CFA, CPA, Senior Equity Analyst, 15 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Andrew Bischof, CFA, CPA, Senior Equity Analyst, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is

Research Methodology for Valuing Companies

aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns. An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

Our recommended margin of safety—the discount to fair value demanded before we'd recommend buying or selling the stock—widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the potential dispersion of outcomes, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the Uncertainty Rating provides guidance in portfolio construction based on risk tolerance.

Our Uncertainty Ratings are: Low, Medium, High, Very High, and Extreme.

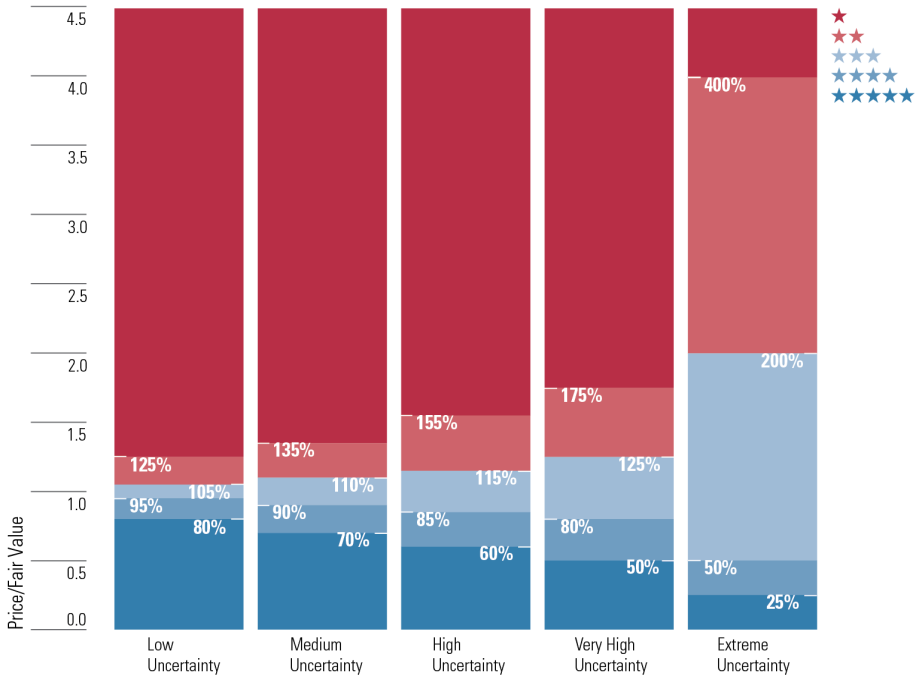
	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

Morningstar Equity Research Star Rating Methodology



For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors. Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Exelon CEO to Step Down; Reports Third-Quarter Earnings

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Nov 2022

We are reaffirming our $41 per share fair value estimate for Exelon after it reported third-quarter adjusted earnings per share of $0.75 up from $0.61 in the same year-ago period. Comparable earnings were adjusted for the Constellation Energy divestiture earlier this year and discontinued operations.

Management narrowed its 2022 full-year earnings guidance to $2.21-$2.29 per share from previous guidance of $2.18-$2.32. Our unchanged estimate remains within the new guidance range. Management reaffirmed Exelon's long-term 6%-8% annual earnings growth through 2025, with growth initially below this range and accelerating through the timeframe. Our narrow moat and stable moat trend ratings remain unchanged.

The company announced that CEO Chris Crane will retire at the end of 2022, earlier than we anticipated, due to health issues. Crane dealt with low power prices that impacted Constellation's performance through most of his tenure. We viewed the Constellation divestiture and focus on becoming a regulated-only utility a positive for investors. Crane also navigated Exelon through subsidiary ComEd's bribery scandal, helping reach a deferred prosecution agreement with federal prosecutors. Crane successfully lobbied for significant subsidies for Exelon's nuclear fleet.

Calvin Butler, who was promoted to president and COO earlier this year, will replace Crane. Butler is also an executive of the company's utilities group. We expect Butler to continue Exelon's focus on improving regulatory relationships and executing the company's regulated growth plan.

Sector
Utilities

Industry
Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

Exelon's returns on equity continued improved notably in the quarter. The company's trailing 12-month earned returns on equity were 9.3%, up from 8.8% in the second quarter and now within management's 9%-10% target range. Timing of equity infusions and regulatory outcomes aided returns. In the quarter, rate increases and lower storm costs lifted earnings, partially offset by higher depreciation and interest expenses.

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2025, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $29 billion of capital investment through 2025. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should gradually increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity

prices that have dragged down returns recently.

- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2025, the midpoint of management's 6% to 8% earnings guidance. We forecast $29 billion of capital expenditures through 2025 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing

Exelon Corp EXC ★★★ 28 Nov 2022 22:20, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
40.23 USD 28 Nov 2022	41.00 USD 11 May 2022 20:37, UTC	0.98	39.82 USD Bil 25 Nov 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes Archive

Raising U.S. Electricity Demand Growth Outlook, Reaffirming Utilities Fair Value Estimates Andrew Bischof, CFA, CPA, Senior Equity Analyst, 27 Sep 2022

We are reaffirming our fair value estimates for U.S. utilities after raising our 10-year annual U.S. electricity demand growth forecast to 1.4%, up from 1.2% in our previous forecast two years ago. We

Exelon Corp EXC ★★★ 28 Nov 2022 22:20, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
40.23 USD 28 Nov 2022	41.00 USD 11 May 2022 20:37, UTC	0.98	39.82 USD Bil 25 Nov 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

also are reaffirming our economic moat and moat trend ratings for all U.S. utilities.

We believe the path to eliminate carbon emissions and meet environmental targets will lead to accelerating electricity demand growth and new infrastructure growth investment opportunities for utilities. We forecast 6%-8% annual earnings and dividend growth for most utilities through the decade to support electricity demand growth. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 8%-9% long-term annualized total returns even if valuations compress, as we think they will. We consider the sector 5% overvalued on a median basis as of Sept. 27.

Our new electricity demand forecast is more bullish than most. We think other forecasts underestimate the speed and scale of the U.S. clean energy transition. With many regions already facing strained electric grids, electricity demand growth presents opportunities and challenges for utilities as they manage the surge of electric vehicles, Big Data, building electrification, and other mandates.

We expect electricity demand from electric vehicles will grow faster than any other new source of electricity demand in our forecast, climbing 15-fold by 2032. Data centers, already sizable electricity users, are the second-fastest-growing new source of electricity demand in our forecast. Building and industrial electrification represents upside to our forecast.

Energy efficiency gains will offset some of the core electricity demand growth that we forecast. We expect U.S. electricity intensity of the economy to fall 12% over our forecast period. Energy efficiency gains have held U.S. electricity demand mostly flat for the last decade.

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth Andrew Bischof, CFA, CPA, Senior Equity Analyst, 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Exelon Corp EXC ★★★ 28 Nov 2022 22:20, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
40.23 USD 28 Nov 2022	41.00 USD 11 May 2022 20:37, UTC	0.98	39.82 USD Bil 25 Nov 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

Exelon Reports Solid Second Quarter Results as it Plans to Issue Equity to Fund Capital Investment Plan Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon announced plans to issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.

Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.

Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.

In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates Andrew Bischof, CFA, CPA, Senior Equity Analyst, 15 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Andrew Bischof, CFA, CPA, Senior Equity Analyst, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Exelon Corp EXC ★★★ 28 Nov 2022 22:20, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
40.23 USD 28 Nov 2022	41.00 USD 11 May 2022 20:37, UTC	0.98	39.82 USD Bil 25 Nov 2022	Narrow	Stable	Low	Standard	2 Nov 2022 05:00, UTC

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected Andrew Bischof, CFA, CPA, Senior Equity Analyst, 6 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be

delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is

Research Methodology for Valuing Companies

aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns. An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

Our recommended margin of safety—the discount to fair value demanded before we'd recommend buying or selling the stock—widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the potential dispersion of outcomes, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the Uncertainty Rating provides guidance in portfolio construction based on risk tolerance.

Our Uncertainty Ratings are: Low, Medium, High, Very High, and Extreme.

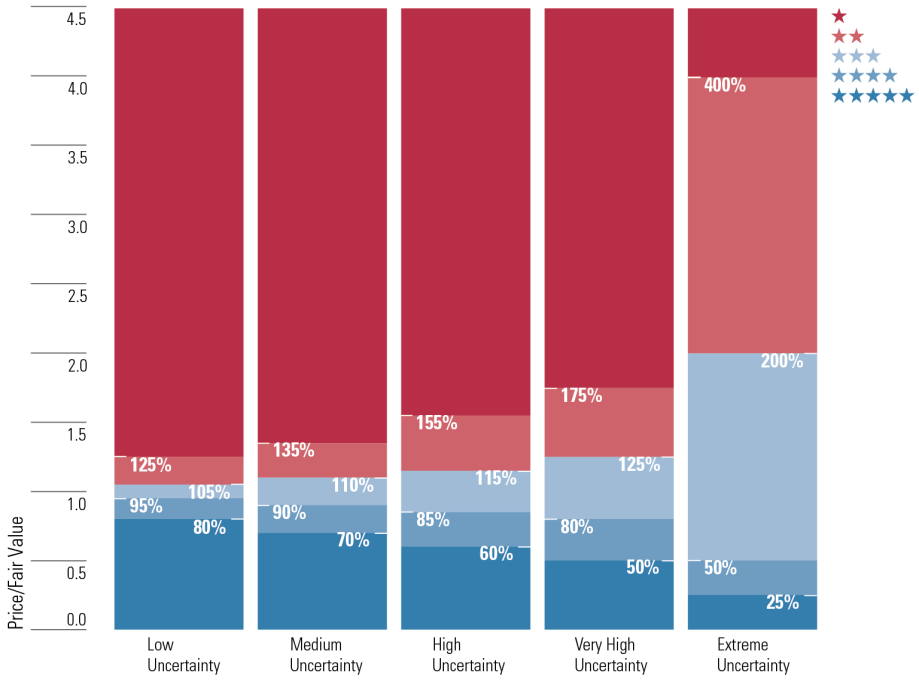
	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

Morningstar Equity Research Star Rating Methodology



For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Research Methodology for Valuing Companies

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors. Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Conflicts of Interest

- No interests are held by the analyst with respect to the security subject of this investment research report.
- Morningstar, Inc. may hold a long position in the security subject of this investment research report that exceeds 0.5% of the total issued share capital of the security. To determine if such is the case, please click http://msi.morningstar.com and http://mdi.morningstar.com.
- Analysts' compensation is derived from Morningstar, Inc.'s overall earnings and consists of salary, bonus and in some cases restricted stock.
- Neither Morningstar, Inc. or the Equity Research Group receives commissions for providing research nor do they charge companies to be rated.
- Neither Morningstar, Inc. or the Equity Research Group is a market maker or a liquidity provider of the security noted within this report.
- Neither Morningstar, Inc. or the Equity Research Group has been a lead manager or co-lead manager over the previous 12-months of any publicly disclosed offer of financial instruments of the issuer.
- Morningstar, Inc.'s investment management group does have arrangements with financial institutions to provide portfolio management/investment advice some of which an analyst may issue investment research reports on. However, analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them.
- Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a financial institution the security of which is the subject of this report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s proxy statement, "Security Ownership of Certain Beneficial Owners and Management" section https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx
- Morningstar, Inc. may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Further information on Morningstar, Inc.'s conflict of interest policies is available from https://shareholders.morningstar.com. Also, please note analysts are subject to the CFA Institute's Code of Ethics and Standards of Professional Conduct.

KeyBanc Capital Markets

Alert

November 21, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: D, ES, DTE, ETR, EXC, AEP

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

On our regulatory calendar, we are tracking proceedings in VEPCO's limited reconsideration of the CVOW project approval and Aquarion's water rate case. In other news, the DOE announces financing for the electric grid's expansion and modernization; the DOE rejects funding to reopen Palisades nuclear plant; NERC publishes the 2022-2023 Winter Reliability Assessment report highlighting key vulnerabilities; the MI PSC issues an order in the electric rate case; FERC approves the global settlement between SERI and MS PSC; the IL ICC issues a final order in EXC's last IL FRP; PSO requests OCC approval for 996 MW of renewable generation, and DTE receives NY PSC approval for a RNG project.

ICYMI

We attended 25 meetings with utility management at the EEI Financial Conference in FL. See links to our notes below where we provide key thematic takeaways as well as individual company write-ups.

EEI: Conference Recap and Notes from Day Three - NEE, NWE, ETR, SO, AEE, CMS, OTTR, AVA, PEG, AY

EEI Day Two: Notes from Meetings — DUK, AGR, PNW, EXC, CNP, EIX, DTE, AEP, POR, FE

EEI Day One: Notes from Meetings — ES, ED, XEL, SRE, WEC

Regulatory Calendar

D — Settlement hearings in VEPCO's limited reconsideration of the CVOW project approval are scheduled for November 21: D entered into a settlement with the VA Office of the AG, and other intervenors to replace the performance guarantee in the CVOW approval with a cost-sharing approach for capital costs exceeding the budget and includes an enhanced SCC review of operating performance. The issue arose when the SCC ruled that D cannot pass the cost of procuring replacement power should the capacity factor at CVOW fall below 42% on a three-year rolling average. As part of the settlement, D will agree to share 50% of all costs in the range of $10.3B-$11.3B and shareholders will bear 100% of the costs in the range of $11.3B-$13.7B. There is no voluntary cost sharing for costs exceeding $13.7B. The current capex for the project is estimated at $9.8B. D will not guarantee an energy production level but will provide details on any shortfall in power production from the projected amount.

ES — Evidentiary hearings in ES's Aquarion water rate case set to begin November 22: In intervenor testimony, the OCC recommended a $6.7M rate increase for RY1 premised on a 9% ROE and 50.15% equity layer. The lower ROE is the primary driver of the delta. The PURA EOE staff recommended an 8.33% ROE and 48.43% equity layer, which would result in an $18.6M lower revenue requirement. ES filed a three-year rate case with the CT PURA for Aquarion Water, requesting a ~$27.5M rate increase in RY1, ~$13.6M in RY2, and ~$8.8M in RY3. The request is based on a 10.35% ROE, 53.06% equity, and a 2021 test year, with rates effective March 15, 2023. The Company has invested ~$740M on infrastructure investments since the last rate case in 2013, with only 25-30% of water capex covered under trackers, creating a regulatory lag (ES earning ROE at the 7% level vs. the authorized 9.63%). In its last rate case, Aquarion received a ~$14M revenue increase based on a 9.6% ROE and 51.5% equity.

Recent Developments for Companies Under Our Coverage

From our midweek: CPUC held hearings in the NEM 3.0 proceedings, and we summarize the highlights in this note—the utilities believe that a grid access fee should be implemented (albeit means-tested) while the solar lobby believes that the ramp from net metering rates to avoided costs should be longer and more gradual. In other news, Fitch lowered its outlook for the utility industry to negative from stable, AGR is asking the DPU to keep open the Commonwealth Wind PPA proceedings as it finds ways to move ahead with the project, FSLR selects AL for its new manufacturing facility, SRE signed an HOA with Williams for LNG takeaway and natural gas supply. ES announced a regulated water acquisition in MA.

KeyBanc Capital Markets Inc. | Member FINRA/SIPC

DOE announces $13B financing for the electric grid's expansion and modernization: The program's funding was set aside in the IIJA of 2021. The DOE is accepting applications for first-round funding ($3.8B) under the $10.5B Grid Resilience Innovation Partnership. The $3.8B will be spread across three areas: resilience, smart grid deployment, and innovation. DOE also released the first solicitation for the new Transmission Facilitation Program (TFP) that aims to support the construction of sizable interregional transmission lines by playing the role of an anchor tenant. The DOE can borrow up to $2.5B for this program and in certain cases would potentially own 50% of the line's capacity for as long as 40 years. Once the demand for takeaway increases, the DOE could sell its share to recycle the capital. The deadline for Phase funding is February 1, 2023. The TFP program is most suited for shovel-ready projects in regions that rely on point-to-point transmission.

DOE rejects funding to reopen Palisades nuclear plant: The DOE rejected Holtec International's application for funding from the $6B CNC program to reopen the Palisades nuclear power plant in MI according to the Company. Holtec had previously purchased the 805 MW nuclear power plant in May to decommission the facility and was potentially looking at funding under the new program to explore reopening the power plant. Holtec previously said if it had received funding under the CNC program it could potentially reactivate the Palisades nuclear reactor until SMRs become commercially available, but the plant is out of nuclear fuel, needed to fix a control rod drive seal issue, and potentially needed a new company to operate the facility.

NERC publishes 2022-2023 Winter Reliability Assessment report highlighting key vulnerabilities: NERC's Winter Reliability Assessment covers three months from December-February. In addition to highlighting the risks of LNG constraints in New England this winter (which ES has also put a spotlight on), the report highlights risks from lower coal inventories. The report highlights limited coal stocks and supply uncertainty caused by staffing shortages in the rail industry. Low fuel storage levels are creating risks for winter reliability, while domestic LNG supplies are competing with overseas demand. In addition to New England, the report highlights other vulnerable regions this winter. ERCOT is projected to have a reserve margin of -21.4% in the event of freezing weather due to a lack of generators and fuel supply infrastructure retrofitted for freezing weather. MISO is projected to have a reserve margin of -7.6% in a similar scenario due to the retirement of 4.2 GW of nuclear and coal-fired generation since last winter, resulting in a 500 bps decrease in the reserve margin, creating a risk of outages in Southern MISO territory due to inadequate weatherization. MISO is filing for changes to the resource adequacy construct to increase the winter Planning Reserve Margin to 25.5% beginning in the 2023/2024 winter period, vs. 8.7% previously. The Northwest is at a lower risk of supply shortages, given the forecast for an improved winter hydro outlook. The SPP is also at a lower risk due to the addition of 3,700 MW of natural gas generation since last winter.

ETR — FERC approves the global settlement between SERI and MS PSC: FERC issued an order approving the global settlement reached between SERI and MS PSC. As a result of the settlement, SERI will refund $235M to ETR MS, which announced that it would use the funds to credit customers to offset fuel surcharges. The approved settlement also specifies an ROE of 9.65% and a capital structure not to exceed 52% equity to be used in UPSA billings effective July 1, 2022, for four years. At the time of the settlement, which we wrote about here, SERI recorded a $551M pre-tax regulatory charge in 2Q to reflect the potential refunds, which included $116M, $95M, and $142M to be refunded to NO, LA, and AR customers, respectively. The NOCC, LPSC, and APSC all separately declined to opt into the settlement in favor of pursuing their claims through litigation. ETR remains in discussions with the three regulatory bodies, and based on our recent conversations with ETR management, we believe the FERC approval should open the door for LA, AR, and New Orleans to pursue a similar settlement.

DTE — MI PSC issues an order in the electric rate case with a reasonably restrictive outcome:

- DTE received a commission order on the pending electric rate case that appears somewhat restrictive at first glance. The PSC ordered a $30.5M rate increase on a 9.9% ROE and a 50% equity layer. While the ROE and the equity layer align with expectations, the revenue increase of $30.5M compares against DTE's revised ask of $368M, staff's brief of $145M, and a PD of $146M.
- The biggest driver appears to be the Commission's stance on residential sales forecasts post-COVID. The AG argued that DTE's residential sales forecasts are unreasonably low and that residential load continues to surge despite the end of pandemic-related disruptions. The Commission sides with the AG's argument that even though C&I volumes are increasing, electricity usage by the average residential customers continues to be elevated. By our initial math, but for the Commission's take on higher residential sales (and a related offset in fuel costs), the approved increase would have been ~$167M or a modest increase from the staff's brief and the PD, and in line with our current model, which assumes a $169.5M increase effective on January 1, 2023. Rates are expected to go into effect on November 25.
- Among other items, DTE requested approval for 17 pilot programs in its rate case request, several of which were approved for full or partial recovery in rates. The Commission, however, is discouraging the Company from including pilot proposals within a rate filing going forward, but rather seek stakeholder feedback in advance of filings and file them outside the GRC process. To this end, the PSC intends to provide guidance on a staff-proposed Expedited Pilot Review for Innovative Projects. PSC agreed with the ALJ on excluding the costs of a BESS pilot but encouraged the Company to seek recovery in future rate cases when the benefits and outcome are better known. The PSC also agreed with the ALJ on excluding the costs of a hydrogen pilot at Blue Water Energy Center.

EXC — The IL ICC issues a final order in EXC's last IL FRP: The ICC issued an order approving ComEd for a $199M revenue increase, premised on a 49.45% equity layer and a $13.9B 2023 Initial Rate Year Rate Base. The ROE is set at 7.78% for the 2021 Reconciliation Year and 7.85% (which is formulaic) for the 2023 Rate Year. The order is in line with EXC and Staff's joint proposed draft order for a $199M revenue requirement premised on a 7.85% ROE, 49.45% equity, and a rate base of ~$14B. EXC's initial request was for a $223M revenue increase. New rates will go into effect on January 1. EXC will file a multiyear rate plan in IL in early 2023, for rates effective from 2024-2027. EXC will make a separate filing for reconciling 2022 costs in April 2023.

AEP — PSO requests OCC approval for 996 MW of renewable generation: PSO submitted an application with the Oklahoma Corporation Commission seeking approval of a 996 MW renewable portfolio that is expected to cost $2.4B. The portfolio consists of six projects composed of three solar projects totaling 443 MW of solar and 553 MW of wind, with in-service dates expected by the end of 2025. The projects were selected as part of a competitive bidding process that PSO completed in connection with its 2021 IRP. The IRP preferred plan determined that PSO would need to acquire 4,150 MW of new renewable resources, including 1,400 MWs of wind generation for each of the years 2024 and 2025 and 900 MWs of solar generation in 2024, and 450 MWs of solar generation in 2025.

DTE — DTE receives NY PSC approval for RNG project: The NY PSC approved DTE's subsidiary Bluebird Renewable Energy's CPCN to build, own, and operate an RNG project in New York. The project will include the construction of two pipelines, including a 5.5-mile pipeline that would run from the Aurora Ridge Dairy's anaerobic digester to the Sunnyside Farm processing facility. The second pipeline will be 1,500 feet long and transport raw biogas from the Sunnyside Farm digester to the processing facility at the Sunnyside farm. The NY Department of Public Service determined that over the life of 30 years, the project will result in a reduction in CO_2 GHG emissions to comply with the Climate Leadership and Community Protection Act requirements. The order also approves Bluebird to a lightened ratemaking regulation; the NY PSC has approved similar measures for other gas pipeline owners that operate exclusively at wholesale.

Energy: Electric Utilities

EEI Day Two: Notes from Meetings — DUK, AGR, PNW, EXC, CNP, EIX, DTE, AEP, POR, FE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We attended a full day of meetings on day 2 of the EEI conference. Our meetings covered offshore wind planning, extensive integrated resource plans to meet the opportunities presented by the generation transition, benefits of the IRA in accelerating the transition to non emitting power and the challenges of ensuring reliability and resilience as utilities shift to increased percentage of renewables. We also discussed company specific rate case activity and the impact that higher inflation and interest rates could have on rate case outcomes and customer bill affordability.

Duke Energy Corporation (DUK)

We held meetings with DUK, where discussions were focused on the Carolinas, the pending Carbon Plan decision, subsequent IRPs in SC and NC, and the potential merger of DEC and DEP.

NC Carbon Plan the first domino: The NCUC is expected to issue a decision by December 31, which will be the near-term catalyst that will set the trajectory for the Carolinas. The plan will guide the NC IRP, and DUK will incorporate the results into its 2023 SC IRP filing. The SC IRP will be filed in 2H23. DUK noted substantial benefits from the "dual state" resource planning (e.g., NC and SC), and envisions various paths forward. Options may include allowing each state to "opt in" to receive the benefits of new resources (and bearing proportionate costs), as well as other cost and resource allocation methods.

DUK maintains its near-term view in the Carbon Plan: DUK is requesting a near-term action plan that sets a path for the next five years and highlights slight deviations between all parties over the next few years. The significant departure begins in the 2027 timeframe and would largely depend on the target year for the 70% reduction. If the NCUC maintains the 2030 target, DUK will be required to invest significantly more capital in near-term solar and wind, rather than waiting for other technologies to become commercially viable.

DEC/DEP merger: A potential merger surfaced during Carbon Plan hearings, and DUK is exploring the consolidation of DEC and DEP in SC and NC, essentially going from four companies with four jurisdictions down to two companies in two jurisdictions. In addition to simplifying the regulatory oversight, DUK could share costs and resource capacity across DEC and DEP. An example of this benefit includes solar availability based on the more conducive topography in DEP's territory that could be supplied to DEC customers. Any potential merger will be a multi-year process, with completion likely in the back half of this decade.

Commercial renewables sale expected in 1Q: DUK expects to announce a sale in 1Q23. The Company reiterated the rationale behind its decision to sell the business, including the competition for capital in the business. The assets continue to receive strong interest, and management highlighted the IRA as a tailwind for the sale and possible price. DUK also feels that another company would be a better owner operationally for the business.

Recent Research: DUK: De-Risked and Rebased; Focus Shifts Toward the Regulated Business; DUK: Notes from Management Meetings; DUK: Reviewing Commercial Strategy; Focusing on the Regulated Business

Avangrid, Inc. (AGR)

At our EEI meeting with AGR management, we discussed the ongoing rate cases, the next steps for NECEC, and the offshore wind contract renegotiation. The next event to watch is how the Commonwealth PPA renegotiation works out as it could serve as an example for some other offshore PPAs in the area.

Ongoing rate reviews move forward: AGR has rates cases in various stages in NY, CT, and ME. In NY, AGR commenced settlement negotiations, which would result in a 3-year rate outcome similar to that in the last rate cycle. It is still very early to know the progress of the settlements, but it is likely to be a lengthy process. New rates are expected to go into effect in May 2023 so there is still time for staff and AGR to work through the various items. As for the impact that inflation could have on an MYRP, AGR believes that it

has been thoughtful in its filing and is also seeking symmetrical inflation trackers in the filing. Management is encouraged that the Commission will take a constructive approach toward the rate filing given the investments needed to implement the provisions in the CLCPA (Climate Leadership and Community Protection Act) that would involve spending to bring renewable power from upstate NY (AGR service territory) to downstate population load centers. The next step in the ME CMP multi-year rate filing will be staff testimony later this year which will follow the technical conferences.

NECEC — still waiting for the legal process to take its course: AGR is still waiting for a ME Supreme Court ruling on the lease area controversy on whether AGR has the appropriate permit for using a stretch of land and whether using that stretch would constitute a "substantial change" to state land, in which case it would need two-thirds approval of the state legislature. A trial is scheduled in the district court to determine if the referendum to ban the NECEC project was unconstitutional. The trial commences on April 23, and it is expected to be a quick trial with a short turnaround, and given the Supreme Court's unanimous decision ruling that the referendum in the case of NECEC was actually unconstitutional puts a favorable outcome for AGR as a likely outcome. AGR is still maintaining a YE 2024 timeline to finish the project while acknowledging that it may be a tight timeline to meet given the legal delays.

Offshore Wind — waiting for AGR to respond to the MA DPU: Recall that AGR requested a 30-day suspension in the PPA approval process that was denied by the DPU, but the Company was granted time until today to file a response. As we understand, the response could include a request to dismiss the case and make a new filing, AGR may let the docket move forward and then file an appeal (a new DPU slate will take office in January) once an outcome is known, or it may decide to withdraw from the PPA altogether and seek to sell the lease or bid into an RFP in another state in the area (given that almost all have ambitious offshore wind targets). AGR believes that it will not be the only one seeking offshore wind PPA renegotiations given the strong uptick in inflation, and interest rates among other factors and those other offshore leaseholders with existing PPAs in NY, CT, and NJ are also likely to seek changes to preserve returns.

Recent Research: AGR: Quarter in Line, Guidance Maintained; Offshore Wind PPA Renegotiation Bear Watching; AGR: Analyst Day Takeaways, Reiterate Underweight; AGR: 2Q Beats on Networks; Looking for Long-Term Targets at Analyst Day; AGR: Downgrading to UW on Valuation with $40 Downside PT

Pinnacle West Capital Corporation (PNW)

During our meetings with PNW, we discussed the pending rate case, Management's view on the range of outcomes, and election impacts. The rate case will be the primary catalyst for PNW in 2023 and the Company will wait until the case's conclusion to issue guidance.

This time is different? PNW noted that the 2019 rate case was materially different since the Company was called in for the GRC due to the belief that PNW was over-earning, which essentially put PNW on a path to a revenue decrease. This time around, PNW filed the 2022 rate case after deliberately taking the time to hold in-depth discussions with the ACC to understand all side's positions better. PNW incorporated the Commission's thoughts and is now seeking the recovery of investments and a higher ROE that is closer to the national average. The action by rating agencies following the unfavorable outcome of the 2019 GRC should further boost PNW's argument for a fairer return profile. Additionally, the 2019 rate case did not afford the option to settle and required full litigation.

Not expecting to settle: That said, PNW expects to pursue a fully litigated case this time around, which comes as a slight surprise to us.

Regulatory relationships and the election impact: Since the 2019 rate case, PNW has invested the time to engage in more conversations with the Commission to expand the trust and bridge the gap between parties. PNW now believes that relationships will enable some trust between the parties, and PNW does not believe the final results of the election should be too impactful on relationships. The Company noted that the ACC will likely see two new commissioners following the elections (both R), and PNW would also work with those Commissioners to build relationships.

The renewable adjustment clause could benefit all parties: PNW emphasized simplifying the mechanisms as a part of its GRC, including reducing the total number of riders from 7 to 4. The renewable adjustment clause has the potential to provide significant benefits to PNW and customers. While the mechanism would allow PNW to recover costs in a more timely fashion and therefore reduce regulatory lag, the mechanism has two benefits for customers, in addition to improved reliability. PNW is conveying the message that: 1) it believes the mechanism will reduce the lumpiness of capital investments into the rate base, reducing the more significant increases associated with rate case filings in favor of a more gradual increase over time; and 2) the renewable mechanism would allow PNW to flow the tax credits associated with new projects contemporaneously and provide customers with the benefits sooner.

Recent Research: PNW: Weather and Sales Growth Provides Reprieve from Inflationary Pressures; All Eyes on the GRC; PNW: Story Remains Similar; Pending Rate Case, but Pension Uncertainty Arises; PNW: 1Q Ahead of Estimates; Relatively Quiet Quarter as Anticipation Builds Toward GRC Filing

Exelon Corporation (EXC)

We met with EXC's recently appointed CFO and other members of the senior management team. Our discussions focused on the Company's path through its regulatory proceedings to meet the 6-8% annualized EPS growth rate with a bias toward performing better

than the midpoint. The provisions in the IIJA and the IRA both support the Company's energy transition efforts in that it accelerates the transformation while making it more affordable.

2023 EPS growth could be slower as the rate structures are realigned to minimize regulatory lag in outer years: We discussed the Company's recent earnings call where the indication was that the EPS growth rate would fall below the 6-8% rate. The nonlinearity in the EPS growth rate is primarily related to the structural variability in the rate recovery at PECO, but as the other utilities move toward multi-year rate outcomes (including ComEd) with reconciliation mechanisms built in, the regulatory lag should decline over the near term. There are second MYRP scheduled to be filed for PEPCO DC, PEPCO MD, and BGE, which would set in the reconciliation mechanisms from the first MYRP and smooth out the EPS trajectory going forward.

ComEd's first MYRP will be filed in early 2023: EXC is getting ready to file the first multi-year rate plan in IL in early 2023 that will define rate effective from 2024-2027. Recent IL legislation created the rate-making mechanism that will allow for a multi-year filing with forward test years and break the link in the ROEs from the 30-year rate. EXC will make a separate filing for the reconciliation of 2022 costs in April 2023. The new IL rate-making mechanism includes 7 PBR metrics that can add up to 32 bps of benefit/penalty depending on the performance on those specific metrics.

Operations in states with progressive decarbonization goals and high-density load centers: The management highlighted EXC's presence in major population centers of the eastern U.S. including Washington D.C., Baltimore, Philadelphia, and Chicago, putting it in a favorable position to benefit from increased electrification in its territories.

T&D utility with no large project risk: Being a T&D utility, EXC is focused on a broad set of project investments and no significant project concentration risk, which puts it in a favorable spot given supply chain constraints and trade-related headwinds. Even in cases where the Company is facing supply chain constraints, it is using its significant purchasing power and extensive footprint to procure necessary equipment for timely T&D upgrades.

Recent Research: EXC: 3Q Beats, Longer Term Growth Rate Reiterated, but Cadence Will Be Uneven; EXC: No Surprises in the Quarter, but the IRA Could Bring a Bigger Tax Bill; EXC: Delivering on Track Results as a Regulated Utility; EXC: Refreshing Estimates to Reflect Constellation Spin; Maintain Overweight

CenterPoint Energy, Inc. (CNP)

Our meeting with CNP focused largely on the regulatory outlook in TX, CNP regulatory strategy across its utilities and the Company's cost management efforts and continuing strong growth outlook.

Watching Oncor's rate case and contemplating equity ratios: CNP is watching Oncor's ongoing rate case closely to better ascertain the mood at the new Commission and refine its priorities going into the 2024 GRC. The Company fielded investor questions on equity ratios that remain comparatively low across TX utilities, an issue that Oncor is also trying to address in its current proceeding. CNP noted other potential avenues to seek equity layer increases, including utilizing the sunset review process the PUC is slated to go through this year, as well as a legislative path. A legislative fix could potentially require an alignment of factual and regulatory capital structure. That said, the Company believes that a legislative strategy would require a collective effort among stakeholders in the state.

Anticipating increased regulatory activity ahead: CNP is contemplating several rate cases in the near to medium term, and the Company's strategy involves proper sequencing in order to minimize resulting regulatory lag. CNP will likely file TX Gas rate case first. TX Gas is regulated by the Railroad Commission, and the Company anticipates to continue focusing on its pipe modernization program, TX Gas GRC would them be followed by Houston Electric GRC in 2024 and MN gas and Southern Indiana Gas in the later periods.

Strong organic growth helps offset headwinds: Similar to its peers, CNP is making efforts to mitigate inflationary cost pressures. The Company noted that it still has some "low-hanging fruit" cost-cutting initiatives in its plan, and can proactively use weather benefits to manage the timing of O&M, particularly as it moves into 2H23 (the test period for the next GRC in TX). Ongoing strong population growth which CNP envisions continuing at 2.5% helps to offset customer bill impacts, and the Company expects this trend to continue.

TX energy market remains challenged, more transmission could be the answer: CNP noted that TX energy demand continues to outpace the growth in supply. With the influx of wind and solar, the state needs sufficient firm capacity, such as gas peakers, to complement these intermittent resources. However, the existing market construct has so far failed to incentivize greater generation buildout, as generation asset owners prefer to take advantage of congestion pricing rather than taking a risk on gas new builds in the absence of capacity market. While the idea of a capacity market in TX is not likely to gain traction, CNP believes that greater transmission availability, particularly connecting renewable generation with load centers and alleviating congestion, could present a partial solution - and allow CNP additional growth avenues.

Recent Research: CNP: 3Q Beat; Long-Term Growth Visibility Keeps Us OW; CNP: On the Road with Management; CNP: Guidance Raised to Reflect 1H Strength; Capex Upgrade Coming Soon

Edison International (EIX)

Our meeting with EIX focused on the recent CoC PD from the CPUC, the Company's 2024 rate filing, plans for a CPUC filing for wildfire claims recovery and the Company's thoughts on the recent NEM 3.0 PD and recent developments of microgrids and micro utilities.

CoC PD from the CPUC came in below expectations, but the outlook appears constructive: We discussed the recent PD on the 2023 CoC proceedings, which proposed a ROE that is 25 bps below the current authorized ROE (current: 10.05%, proposed: 9.8%, SCE request: 10.75%). The Company is not likely to contest the proceedings and believes that the stricture of the CoC mechanism in CA is still a robust construct that is correlated to interest rates. The Company will file comments on the PD on 11/29 and request oral arguments. The CPUC must vote on the PD for it to become final, and the earliest that could happen would be at the December 15 Commission meeting. We do not expect EIX to contest the PD.

Filing for recovery of wildfire damages: As was outlined on the recent earnings call, EIX expects to make a filing in late 2023 for the cost recovery of claims payments for the 2017 TKM event in late 2023 with a filing for the 2018 Woolsey event likely in 2024. For both events combined, the filing is likely to seek $6B in recovery vs. $8.8B in expected claims. Much of the balance will be recovered through insurance proceeds or FERC recoveries. While the statute of limitations for the Woolsey individual plaintiffs has passed, the Company is still finalizing the total expected claims. Once a filing is made, it is expected that the proceedings would take 15-18 months through the Commission proceedings.

The next GRC filing will focus on infrastructure investments, and reliability investments as EIX prepares for load growth from increased electrification: EIX will file the next GRC in May 2023, which will determine rates through 2028. The Company believes that it has made significant progress in wildfire mitigation and while it continues to work on it in the next rate cycle, it plans to file for investments for infrastructure resilience, focus on reliability enhancements, and accommodate for load growth. Wildfire mitigation programs thus far, including the covered conductor program, have proven effective against fires and the Company believes that its learnings and increased support from the state and federal governments are improving outcomes and helping to prevent fire-related damage.

NEM 3.0, microgrids, and micro utilities: We discussed the recent NEM 3.0 PD, which EIX believes is a step in the right direction. The grid access fee is now being considered under a separate proceeding, which has a July 2024 statutory deadline for a decision. A progressive grid access fee, in EIX's opinion, would allow for a more equitable cost allocation. EIX, along with its sister utilities in CA, is opposing NOVA's micro utility application in CA as it attempts to create a utility without being subject to the same regulations as the utilities, in EIX's opinion. EIX recently entered an agreement to set up a microgrid in a housing community with SPWR and KBH that will be powered with solar and battery storage and connected to a microgrid.

Recent Research: EIX: 3Q Misses, Guidance Narrowed; LT Growth Rate Reiterated, but Wildfire Claims Dominate the Story; EIX: Wildfire Claims Settlements Continue; Guidance Unchanged; EIX: 1Q Beat and Moving Toward Legal Claims Resolution; Remain Sector Weight

DTE Energy Company (DTE)

Our meeting with DTE centered around the recently announced IRP, updated capex, and the updated EPS growth guidance. The Company announced an increase in the LT operating EPS growth rate from 5-7% to 6-8% - a change that was largely expected.

Capex increase is focused on decarbonization, reliability, and affordability: DTE announced an increase in the five-year utility capex by $3.5B vs. the prior plan (from $18.1B to $21.6B or a 20% increase from the 2022-2026 plan to the 2023-2027 plan). The overall five-year capex now stands at $23B, up from $19.5B. The updated capex plan includes ~$1B for the recently announced IRP. Given the initial favorable response to the IRP, we would expect the plan to receive a constructive response from the Commission and a follow-through increase in capex.

IRP aims to retire coal, increase renewables generation, and support infrastructure to accommodate load growth from increased electrification: DTE's IRP is a careful exercise in retiring coal sooner than planned while supplementing with adequate dispatchable resources. Belle River (1.3 GW) will stop using coal by 2026 and instead operate as a peaking gas unit. Monroe (3.2 GW) will retire in two phases by 2035. As a replacement, DTE will deploy 5.4 GW of renewable generation and 760 MW of battery storage by 2032. It will be crucial to grow battery storage and peaker plants in line with the growth in renewable generation to maintain reliability. To that end, DTE is identifying dispatchable resources to replace Monroe and has put a 950 MW natural gas unit with CCUS on the IRP. See our more detailed note on the IRP here.

EPS growth raised upped to 6-8%: DTE raised the long-term operating growth rate from 5-7% to 6-8%. Effective cost management through an energy transition to more cost-effective generation assets and load growth from EV penetration (load from 3 EVs is roughly equivalent to one average residential customer) should allow for a sustained higher growth rate than previously guided.

Recent Research: DTE: Taking a First Look at the MI IRP Filing; DTE: Solid Quarter; All Eyes on IRP, Capex Refresh and Potential Growth Update; DTE: Highlights from Our Management Meetings

American Electric Power Company, Inc. (AEP)

We held meetings with AEP, and discussions revolved around the same talking points from the Analyst Day and third-quarter earnings call. The KY Power sale and commercial renewables business remain in similar phases at this point, with activity expected to ramp up in the last month of the year and early 2023. AEP provided more granular detail around its previously refreshed guidance.

Segment guidance: AEP provided more granular guidance for 2023 of $5.19-$5.39, including a breakdown across its segments. The Vertically-Integrated Utilities (+$0.20 y/y) and AEP Transmission HoldCo (+$0.19 y/y) are expected to drive much of the increase in 2023, slightly offset by the Generation & Marketing (-$0.24) segment. The sale of unregulated renewables drives the decrease in Generation & Marketing.

Update on both sale processes: The KY Power sale timeline remains consistent with the January closing and is premised on the FERC 203 approval in December. We note that FERC previously delayed its decision by six months, but there is no indication that FERC would further delay a decision. This closing date aligns with AEP's guidance, which assumes essentially all of 2023 without KY Power. Regarding the commercial sale, AEP does not have incremental color, but the business remains on pace for a 2Q23 close, and AEP notes the continued interest from several strategic and financial players. The use of proceeds will include reducing debt needs or retiring outstanding debt, and AEP could reduce some of the equity needs in the latter part of its five-year plan.

Unlocking transmission value: AEP remains heavily concentrated in its transmission business, and AEP continues to relay its message around the underappreciated transmission assets. Transmission is expected to deliver $2.97 EPS in 2024, or ~52% of our $5.70 EPS estimate, across the vertically integrated T&D and Transco HoldCo. AEP believes the assets are four turns below peer valuations and ~10-22x below recent transactions. AEP is allocating ~$15B of capital into the transmission business with >50% under a forward tracker.

Portfolio optimization: AEP continues to work on optimizing the portfolio and reducing the regulatory lag to raise its earned ROE. The Company expects to earn a 9.4% ROE in 2023, just slightly above the 9.3% it earned as of 3Q22. Over time, AEP expects to see improvement across its jurisdictions, and an improved ROE.

Recent Research: AEP: Momentum from Analyst Day Carries into Strong 3Q; AEP: Cleaning Up Its Closet; Takeaways from the Analyst Day; AEP: In-line 2Q Supported by Continuing Load Growth; Expect More Strategy Discussion at the Analyst Day

Portland General Electric Company (POR)

We held a meeting with POR management, where discussions revolved around the RFP, a near-term resolution, and subsequent RFPs. POR is incorporating a conservative level of ownership and is confident it can currently reach the upper range of its recently raised 5-7% long-term growth rate through its base capital plan and the Clearwater wind project.

An RFP update is the next item to be watched for: POR continues negotiating with remaining bidders on the final shortlist with expectations to finalize negotiations by the end of 2022 or 1Q23. POR is still looking for 75-200 MW of renewable resources, 375 MW of non-emitting dispatchable capacity resources, and 100 MW of renewable energy in support of the Green Energy Future Impact program. With the prices refreshed after the IRA, execution risks remain the primary risk associated with the projects.

More RFPs are coming: While POR is expected to conclude this RFP soon, the Company expects to file another in mid-2023 as it looks to increase its capacity. Additionally, POR expects to file a new Clean Energy Plan and Integrated Resource Plan in 2023 that will result in future RFP issuances and incremental ownership opportunities.

Long-term growth rate highly attainable: POR recently raised its long-term growth rate to 5-7% based on the midpoint of 2022 adj. EPS, compared to the previous 4-6% growth rate, off a 2019 base. The growth rate is achievable and assumes that POR maintains the base capital plan and the $415M investment associated with Clearwater. As a reminder, POR recently introduced its 2023-2027 capital plan and is guiding for $4.2B over the next five years. The 2.0% forecasted load growth through 2027 provides further confidence in the EPS growth rate.

Equity needs to be addressed: POR began addressing its equity needs through the announced forward equity offering, which will help POR finance the Clearwater Wind project and avoid unnecessary share dilution. Moving forward, POR will need equity for 50% of projects, which will be incremental to the current forecast.

No increase in rate cases expected: POR does not expect to change the cadence of rate case filings and will continue with the typical three-year period. POR is slightly shielded from new contracts for union laborers and has managed its headcount. POR is optimistic that this is an abnormal three-year period and expects the three-year cadence will be a reasonable time between filings. POR will need to file to recover the costs associated with Faraday, which began construction in 2020 and is expected to enter service in 2023 and contribute to EPS.

Recent Research: POR: Nothing but Good News - Constructive 3Q and LT Outlook Update; POR: Strong 2Q; Capitalizing on Power Markets Volatility; We Remain SW; POR: On the Road with Management – Focus on Growth and Regulatory Climate

FirstEnergy Corp. (FE)

Our FE meeting revolved around the questions on the CEO search and the execution of the strategic plan previously outlined by the Company.

CEO search continues: The Company indicated that its CEO search continues, and FE is engaged in early stage discussions with a number of candidates with varying backgrounds in the Utilities industry. FE continues to target late 2022 or early 2023 for the announcement of the new CEO. FE noted that it would be important for the incoming CEO to embrace and continue to execute previously laid out strategic plan, which includes asset sales and balance sheet improvement as well as operational initiatives.

Incremental asset sales process continues in parallel with the CEO search: The Company is moving forward with the previously discussed process of divesting a minority stake in either FET or some of its distribution assets. A deal announcement could come out by year-end or early next year. While the Company is still evaluating a range of options, a sale of a stake in FET appears to be more easily executable. FE noted that it continues seeing strong valuations despite recent interest rates volatility and expect the transaction to strengthen its balance sheet and help the Company achieve its target FFO/Debt ratio.

Regulatory activity to pick up: FE plans to file rate cases in WV, NJ and MD in 2023, with NJ being the largest jurisdiction/rate case. NJ rate case is expected to cover AMI deployments and deferred storm costs, among other things, while WV will see a new depreciation study. MD's rate case will focus on reliability investments and is expected to be relatively small. The Company also intends to seek some form of protection from pension related earnings volatility.

Inflation presents a headwind, but FE Forward helps: The Company noted that it continues to realize savings under FE Forward, the cost management program rolled out earlier. The savings are more modest compared to the original plan and expectations due to inflationary pressures; however, FE continues to see benefits. The Company remains committed to previously outlined offsets to pension headwinds from its ongoing opex management efforts.

Recent Research: FE: Turbulence Ahead - Inflation, Pension Headwinds and Management Search Likely to Dominate in the NT; FE: Reset 2.0 — CEO to Retire; More Asset Sales Likely; Seeing 2022 at the Upper End of Guidance; FE: A Day of Management Meetings

U.S. Power & Utilities: Day 2 Recap of EEI Conference

AEP, BKH, ED, EIX, EXC, PCG, SO, WTRG

Our view: On day 2, discussions centered around a multitude of key topics, including the rising rate environment, asset sales/ M&A, and specific details on guidance for certain companies.

American Electric Power (AEP)

We met with Nicholas Akins (Chairman & CEO), Julie Sloat (President & CFO), Peggy Simmons (EVP, Utilities), Antonio Smyth (SVP, Grid Solutions), Matthew Satterwhite (SVP, Regulatory), and Darcy Reese (VP, IR)

No impact on Kentucky Power sale process from AQN's own challenges. AEP reiterated transaction close date some time in January 2023. Management noted no impact from AQN's recent earnings release. AQN is covered by our Canadian utilities analyst, Nelson Ng.

Notes tax normalization and utilization from the Inflation Reduction Act (IRA) as a benefit. Utilities will be able to claim PTCs for solar facilities and avoid normalization requirements (i.e. flow benefits to customers over a long period of time). Management also sees transferability to provide more flexibility in monetizing credits. This should increase utilities' competitiveness relative to renewable developers.

Remains bullish on transmission deployment. Despite some regulatory challenges (e.g. FERC Commissioner Glick's renewal, permitting reforms, etc.), AEP remains bullish in the space. Senator Schumer could ultimately adopt the Senator Manchin's proposal, perhaps with some changes. Currently AEP's $15B capex spend through 2027 is attributable to projects within its jurisdictions. AEP could benefit from new interstate projects given the company's jurisdictions are often located at key interconnection seams.

Maintaining current decarbonization plan. Current plan points to additional retirements or sales of coal plants through 2028. For Mitchell, AEP will regroup with Liberty Utilities post-transaction close of Kentucky Power to discuss the fate of the power plant after 2028.

Managing fuel and other recovery mechanisms. AEP's preferred treatment of fuel recovery is to minimize any deferrals and points to getting a sufficient return (i.e. WACC) to be key. As for bad debt, AEP notes no particular worries.

Electric vehicle deployment will take time. Modelling and simulating energy needs for EV appears to be complex as there is no interconnection process available. AEP will continue work on predictive analytics to understand EV growth within its jurisdictions.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Black Hills Corporation (BKH)

We met with Linn Evans (CEO), Richard Kinsley (outgoing CFO), Kimberly Nooney (Incoming CFO, previously treasurer), and Brian Iverson (Chief Compliance Officer.)

Guidance commentary. During 3Q22 earnings, BKH introduced weak 2023 EPS guidance of $4.00 - $4.25. We note that 2022 was the beneficiary of several one-timers that contributed ~29c of EPS YTD. Without the one-timers, 2022 growth would look mostly bleak. Management noted that 2022 faced some one-time O&M expense items and some projects were accelerated from 2023 to 2022, offsetting some benefits from positive one-timers. Given the acceleration of projects to 2022, management expects 2023 O&M to track flat or slightly lower than 2022. Finally, management sees enough margin drivers growth, rates, and riders to offset the impact of the one-timers that contributed to 2022.

Drivers past 2023. Management expects 5% to 7% growth off a 2022 base, which would imply growth to the higher end of the range after 2023. Management points to its robust rate base growth driven by its capital plan and robust growth through data center loads.

Gas Utility minority interest commentary. BKH previously announced its intentions to evaluate the sale of a minority interest in its gas utility portfolio. Management indicated to us a potential investment could be announced and closed by year-end. A sale of the portfolio could be a solution to push its equity needs for a few years.

Consolidated Edison, Inc (ED)

We met with Robert Hoglund (SVP & CFO), Jared Lee (IR), and Shao Moy.

CEB transaction use of proceeds. Although we previously noted that ED could drive its equity layer up to 50%, management did not view that as practical due to the fact CECONY would not be underearning. Therefore, they pointed to repurchasing shares as the remaining option for the proceeds after debt pay downs and normal utility contributions**.**

CECONY rate case and utility growth commentary. Although management did not have many new updates for us as the current settlement negotiations are ongoing, they did provide their thoughts on the reasoning for the longer-than-expected timeline. Management points to the elections cycle, clean energy intricacies, and more aggressive interveners. Management highlighted that investing in the current business provides strong utility growth, and it does not need to look elsewhere for reliable growth.

Duke Energy Corp. (DUK)

We met with Lynn Good (Chair & CEO), Stephen De May (NC State President), and Linda Miller (IR).

Commercial Renewables Proceeds. DUK expects to utilize proceeds to almost completely pay down debt and extend issuances to the extent it can. We estimate DUK has ~$3.7B of parent level coming due through 2024, which would satisfy almost the entirety of the $3.8B cash proceeds that we expect from the sale.

O&M commentary. DUK recently adjusted its 2023 O&M reduction expectation to $300M from $200M, with 75% of the reduction being sustainable long term. Management noted that ~$50M of the extra reduction is supply chain-related.

NC Carbon Plan. Management indicated the outcome of the IRA may reflect a mix of the pre- and post-IRA expectations. Additionally, a supplemental filing will be filed in 2023 to reflect the total expectations given the IRA.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Edison International (EIX)

We hosted Pedro Pizarro (President & CEO), Jill Anderson (EVP Operations, SCE), Aaron Moss (SVP & CFO, SCE) and Sam Ramraj (IR).

Takeaways from recent PD on 2023 Cost of Capital. The proposed decision called for a 25 bp reduction in the current ROE, which seems difficult to justify given the rising interest rate environment. Management noted the concerning part of the proposed decision was around bringing ROEs closer to the national utility average, as CA has historically been more generous with allowed returns. The PD still includes the cost of capital mechanism, which could result in a pickup in ROEs if rate hikes continue.

Outstanding wildfire claims. Now that the Woolsey statute of limitations has expired, it's a question of how quickly the company can work through the remaining claims. Since the company won't have 100% of the claims resolved by the timing of the filing, the proceeding will need to include a mechanism that incorporates the remaining claims. We imagine the company will explore multiple types of recovery mechanisms, such as securitization.

Essential Utilities (WTRG)

We met with Dan Schuller (EVP & CFO) and Brian Dingerdissen (VP, Investor Relations & Treasurer).

Priorities under fully staffed PA PUC. Management expects the commission's priority will be managing affordability by balancing customer bills and capital investments. With a fully-staffed commission, the hope is that commissioners will be able to take a more active role in the administrative process.

Outlook for acquisition of larger systems. Wastewater systems tend to be larger than water systems, as there are more regional wastewater authorities that serve a larger customer base, such as DELCORA. While we have recently seen noise and additional press around the acquisition of larger systems, there seem to be a decent number of takeout candidates that would be desirable acquisition targets. However, the smaller systems remain the company's primary targets.

Expect Peoples rate case in late-2023. WTRG is required to file for new rates by the end of 2023. The biggest issue in the case will likely be repair tax, as the benefit of repair tax and the resulting lower tax rate will now be adjusted for in the revenue requirement. This is the same process that occurred during the Aqua PA GRC a few rate cycles prior.

Exelon Corp. (EXC)

We met with Jeanne Jones (EVP & CFO), Carim Khouzami (President & CEO, BGE), and David Velazquez (Utility Operations, Exelon Corp.)

Expects reconciliations to reduce regulatory lag. While rate case timing could lower EPS growth in the near term, reconciliations of multi-year plan at PECO and BGE should help cost variances during the plan period and improve earnings recovery.

Controlling rising interest expense. EXC has implemented interest rate caps in most of its variable debt (~$1.9B as of 9/30/22). These caps will help limit negative earnings impact from rising interest rates but still retain flexibility should interest rates fall.

Focus on affordability. Thanks to approved carbon mitigation credits, ComEd has locked in 61% of energy supply at low $30s/MWh, providing significant benefit to customers. Any excess revenue generated by CMC-approved nuclear plants will also be returned to customers. Management also sees lower capacity pricing and backwardated forward power curves to be

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

helpful to customer bills.

Does not view meaningful impact from state elections. Incoming Maryland governor Wes Moore has a focus on greening the state and equity, which should align with EXC's goals well. Pennsylvania governorship will remain Democratic so EXC does not expect meaningful changes on the political front.

Confident about ComEd performance-based rates (PBR). As approved by the Illinois Commerce Commission, ComEd will be allowed up to 32 bps of PBR. Based on ComEd's good operating track record, management felt confident that they would be able to achieve favorable results under these PBR.

Will look to recently approved gas rate cases. Management sees ROE settling at 9.6%-9.7% to be reasonable, following recently approved cases.

Other industry tailwinds. EXC sees growth in energy demand from datacenters and electric vehicles. Energy demand from datacenters in Illinois has growth 300MW since 2019. ComEd's performance attributes – high reliability and low bills – fit well with their needs. EXC will continue to work with state commission to deploy EV infrastructure.

PG&E Corporation (PCG)

We hosted Chris Foster (EVP & CFO) and Marlene Santos (EVP & Chief Customer Officer, PG&E).

Inflationary impacts on wildfire claims. It seems the magnitude of wildfire claims have increased over the years due to multiple drivers. Management noted that California rebuild costs had already been increasing, which were exacerbated by COVID since people were spending more time at home.

CPUC Zogg penalty. Management noted that the magnitude of the CPUC Zogg penalty was not entirely surprising. The company has until November 21 to state whether it would like a hearing to be conducted, which we are expecting. The company reiterated the hope that the penalty that would not just add to the state general fund but rather be beneficial to customers, such as a capital disallowance.

Pacific Generation. Management noted it is seeing quite a bit of interest from potential buyers for the minority stake of Pacific Generation. It seems asset type is beneficial in this process, given the relatively clean nature of the generation assets. The timeline for marketing and diligence in the first quarter with a final decision before the end of 2023 remains unchanged.

Southern Company (SO)

We met with Tom Fanning (Chairman & CEO), Dan Tucker (CFO), Scott Gammill (VP IR & Treasurer), and Ashley Black (IR).

2024 guidance expected to the low end. Management previously guided to a post-Vogtle 2024 EPS of $4.00 - $4.30. While management expects to provide a narrowed and more detailed range after 4Q22, it seems likely that the range will be $4.00 - $4.10, including a 25c contribution from both Vogtle units 3 and 4. However, management previously highlighted that if Vogtle Unit 3 or 4 are delayed by 3 months, then quarterly EPS would be impacted by 3c and 5c, respectively. To get above the range, management would expect SO Power to provide the upside, which is not currently built into its investment plan.

M&A Strategy. Given the recent trend of asset sales, we asked management about the potential to sell SO Power if growth stalls over the long term. Based on our discussion, it seems that management might be willing to sell if the business lacked growth due and the market was

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

appealing.

Remaining regulatory items. Georgia Power has three key regulatory items remaining: the rate case, fuel case in early 2023, and the Vogtle prudence review in Summer 2023. Given the dynamics of the Georgia commission election, it seems likely that the current commission will work through all three of the items above.

Required disclosures

Conflicts disclosures

This product constitutes a compendium report (covers six or more subject companies). As such, RBC Capital Markets chooses to provide specific disclosures for the subject companies by reference. To access conflict of interest and other disclosures for the subject companies, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1. These disclosures are also available by sending a written request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7 or an email to rbcinsight@rbccm.com.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.
As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Capital Markets

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings
RBC Capital Markets, Equity Research
As of 30-Sep-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	844	57.18	260	30.81
HOLD [Sector Perform]	580	39.30	161	27.76
SELL [Underperform]	52	3.52	5	9.62

Conflicts policy

DTE – IRP Filing Cometh; DTE Aligns With MI Decarbonization and Strong DTE Fundamentals (see our note HERE)

ED – 3Q EPS Beat In Trademark, Strong Quarter on Fundamentals; Use of CED Proceeds Remains Debated With 2024 Equity Needs Under Evaluation (see our note HERE)

ES – Captain Nolan Finds More Buried Treasure in SEMA, Building Confidence on Wind Backfilling (see our note HERE)

EXC – Management Addresses Growth Profile Questions Head On Amid Transitional Backdrop (see our note HERE)

OGE – 3Q EPS Beat: Sales Growth Continues To Shine, Highlighting A Premium Competitive Position Into 2023 (see our note HERE)

PNW – 3Q22 Beat and 2022 Raise… But All Eyes Remain Fixed on Arizona's Regulatory Climate (see our note HERE)

SRE – Good Execution and 3Q EPS Beat Set Up Strong Base for 2023; All Eyes on LNG Puzzle Pieces (see our note HERE)

DUK – DUK reports 3Q22 adj. EPS of $1.14 vs. Gugg/cons at $1.85/$1.84; rebases growth (ex-Commercial Renewables) while maintaining 5%–7% LT EPS CAGR

AEE – AEE reports 3Q22 results

NEE – NEER reaches agreement on plan to build first RNG facility in Alabama

ERCOT – PUCT approves Brazos repayment process selected in ISO process

DUK – North Carolina regulators approve 1,200 MW procurement of solar

DUK reports 3Q22 adj. EPS of $1.14 vs. Gugg/cons at $1.85/$1.84; rebases growth (ex-Commercial Renewables) while maintaining 5%–7% LT EPS CAGR

- 2023 guidance introduced at a range of $5.55–$5.75 (midpoint $5.65) **vs. Guggenheim also at $5.65** and consensus at $5.74
  - **For more on our 2023 take ahead of the call, see our note:** DUK: Earnings Preview Focus – Rebasing 2023 for a "Clean" Slate Ahead of Q3 Announcement
- 2022 guidance lowered by $0.20 to strip out Commercial Renewables from 2022 as well; 2022 guidance is now $5.20–$5.30 (**$5.25 midpoint**) vs. previous guidance of $5.30–$5.60 (**$5.45 midpoint**), and **Gugg/cons both at $5.45/$5.45**
- **Rolled forward and reaffirmed 5%-7% LT EPS CAGR; now extends through 2027** (*vs. 2026 previously*)**, off of base of 2023 guidance midpoint of $5.65** (*vs. previous base of 2021 original guidance midpoint of $5.15*)
- **Commercial Renewables sale update:**
  - Duke reports sale process has generated "***robust interest***" in its operating assets and development pipeline
  - Mgmt. expects to announce a transaction in 1Q23 with closing by mid-year

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

- Confirmed that Commercial Renewables sale addresses equity needs through "**at least 2027**"
- Recall: the segment includes **~3.5 GW net ownership** of ~5.1 GW of operational wind and solar

- +$0.03 3Q22 weather vs. normal; weather impact YTD now +$0.10 per share
- Call is at 9**:00am ET** at **833-927-1758…** Confirmation code**: 714151**

AEE – AEE reports 3Q22 results

- AEE reported 3Q22 EPS of $1.74, as compared to Gugg/Cons of $1.71/1.73
- Results included $0.02 of favorable weather vs. norm
- 2022 EPS guide narrowed to $4.00-4.15 vs. Gugg/Cons of $4.04/4.07
- Capex, rate base CAGR, etc. unchanged
- Other key points largely unchanged, including legislative and RTO (LRTP) data points
- "Incremental annual cash tax payments due to corporate minimum tax beyond 2023 not expected to be material" – slides
- Provides select 2023 earnings considerations (slide 23)
- Slides HERE

NEE – NEER reaches agreement on plan to build first RNG facility in Alabama

- NextEra Energy Resources and Coffee County, Alabama announced plans to build the state's first landfill renewable natural gas plant.
- The project will be located at a landfill owned and operated by Coffee County and interconnect with a local pipeline.
- RNG production facility that will capture and convert 1,100 standard cubic feet per minute of landfill methane gas.
- The project is expected to begin construction in the second quarter of 2023 and be operational in early 2024.
- More here.

Guggenheim takeaway: *FYI, in case you missed from yesterday. NEER moving quickly to expand RNG footprint.*

ERCOT – PUCT approves Brazos repayment process selected in ISO process

- The PUCT approved the authorization of the settlement, according to Platts, with the defunct generator to repay $1.3bn under the accelerated recovery option selected by stakeholders.
- More on the process HERE.

Guggenheim takeaway: *Zero surprise following the process in September, with the move putting to rest another one of the major post-storm overhangs in the market.*

DUK – North Carolina regulators approve 1,200 MW procurement of solar

- The previously announced plan, which have been written about in prior dailies, was approved.
- Docket Nos. E-2, Sub 1159, E-2, Sub 1297, E-7, Sub 1156, E-7, Sub 1268

Guggenheim takeaway: *FYI – in case you missed it.*

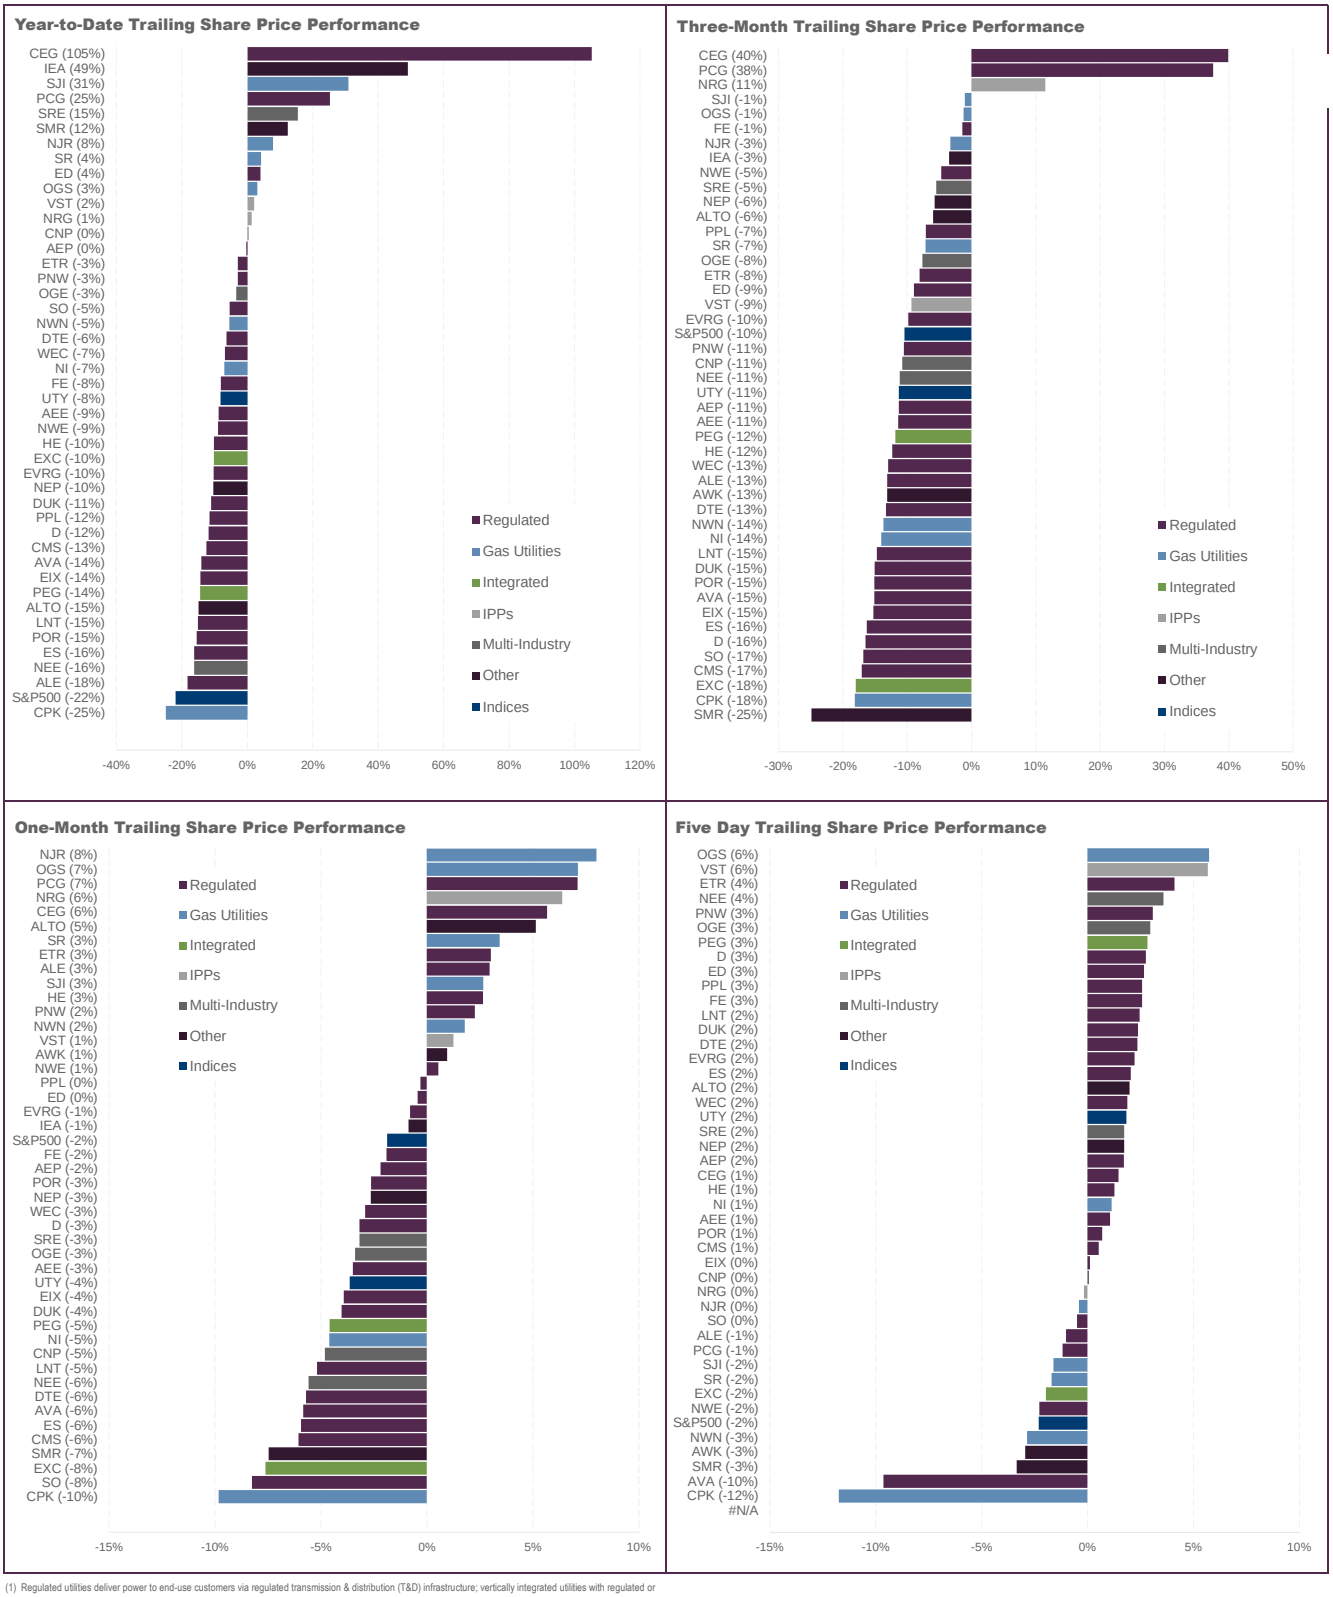
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Exelon Corporation
(NYSE: EXC)

We can live with lower '23/'24 EPS estimates, but gloomy pitches need to go; reducing PT to $42

Summary:
We knew about the timing of PECO's next electric rate case and the recent frontend-loading of EXC's equity. What surprised us was the extent of the drop in the realized ROE at PECO in between rate cases and relatively weak YTD earnings at PHI and BGE, at least partly due to credit losses. We reduced our '23/'24 earnings expectations (to $2.33/2.47 from $2.37/2.56), but our '25 EPS estimate of $2.77 remains unchanged, and we're about to start valuing utility stocks based on '25 earnings. Now that a new CEO and CFO were named, and the company successfully talked down its '23/'24 earnings, we are hoping for a more upbeat pitch of EXC's premium T&D-only rate base growth and its strong earnings execution. We stick with our Buy rating, but lower our PT to $42 (from $44). EXC trades at a large 8.3% '24 P/E discount to an average utility even based on our below-consensus '24 EPS and a 12.5% discount on our '25 estimate.

Highlights

Lowering '23/'24 estimates: We knew about the timing of PECO's next electric rate case (with higher rates starting in '25) and the recent frontend-loading of EXC's equity. What surprised us was the extent of the drop in PECO's earnings in between rate cases ('23 and '24) and relatively weak YTD earnings at PHI and BGE, at least partly related to credit losses. We reduced our '23/'24 earnings expectations (to $2.33/2.47 from $2.37/2.56) on lower earnings at PECO, PHI and BGE being partly offset by higher earnings at ComEd on the higher 30 yr T yield. Our '25 EPS estimate of $2.77 remains unchanged and assumes a 9.5% allowed/realized ROE at ComEd. Please see inside for our 2022-2025 EPS projections by state.

Valuation: We are about to roll forward utility valuations from '24 to '25, but despite unchanged '25 EPS expectations we lowered our PT for EXC to $42 (from $44) as we are rattled by unexpected management changes (CEO and CFO were replaced within the last 17 days) and gloomy quarterly earnings calls throughout 2022. We stick with our Buy rating as EXC trades at a large 8.3% '24 discount to an average electric utility on our lowered '24 EPS estimate.

Company Description:
EXC operates six electric/gas T&D utilities in IL, PA, MD, NJ, DE, D.C. and VA) serving 9.1 million customer accounts. The spin off of Constellation Energy (CEG) from EXC was completed on Feb 1, '22.

Exelon Corporation (EXC) Disclosures

I, Angie Storozynski, hereby certify: (1) that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers; and (2) that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

As with all employees of Seaport Global Securities LLC, a portion of our analysts' compensation is paid from the total collection of revenues from all areas of the firm including but not limited to Investment Banking and Sales and Trading departments. In no instance are research analysts' compensation directly derived from Investment Banking revenues.

Risks & Considerations for Exelon Corporation (EXC)

It's hard to predict the outcome of EXC's future rate cases: We assume that EXC's allowed ROE/equity ratios should remain unchanged in five ff its six jurisdictions (excl. IL/ComEd) though it's hard to predict the outcome of EXC's future rate cases even in the current inflationary environment.

ComEd's ROE remains linked to the 30 yr T yield until 2023: EXC's distribution ROE in IL (for ComEd) changes daily and is based on the 30 year T yield plus 580 bps. A recently adopted energy bill should break this formulaic ROE calculation starting in 2024 which in turn should result in a potentially higher allowed ROE for ComEd though we won't know the likely ROE/EPS uplift in IL until late 2023. It's hard for us to predict how ComEd's 2020 deferred prosecution agreement in IL should impact this future rate case in the state. Through the end of 2023, ComEd's allowed ROE will be driven by the 30 year T yield thus providing some inflationary protection.

Parent level drag increasing along with higher interest rates: EXC's earnings should be positively levered to rising interest rates as long as short-term and long-term rates rise at roughly the same pace. During 2H22, short- and medium-term interest rates rose much faster than the 30 year T yields. As a result, EXC's parent interest expense rose faster than regulated earnings at ComEd. Those recent changes are now embedded in our lowered 2022-2024 EPS estimates, but we could see more downside.

Price Target Metrics for Exelon Corporation (EXC)

17x 2024 EPS, in line with our '24 anchor P/E multiple for regulated utilities

MARKETING COMMUNICATION

The Seaport Group Europe LLP ("SGE") and Sea Port Group Securities (Europe) LLP ("SPGSE") are authorized and regulated by the Financial Conduct Authority. Due to their size and structure, their analysts may represent the interests of the firm or of companies referred to in its research. As a result, SGE or SPGSE does not hold its research out as being impartial. This research is non-independent and is classified as a Marketing Communication under the FCA's rule COBS 12.2.18. As such it has not been prepared in accordance with legal requirements designed to promote the independence of investment research and it is not subject to the prohibition on dealing ahead of the dissemination of investment research in COBS 12.2.21. However, SGE and SPGSE have adopted internal procedures which prohibit employees from dealing ahead of the publication of non- independent research, except for legitimate market making and fulfilling clients' unsolicited orders.

Analysts may forward a draft copy of the non-independent research, prior to publication, to the subject company in order to verify facts. Where such verification is sought, the analyst must remove any rating or investment summary from the non-independent research prior to forwarding it to the subject company. Any subsequent amendments to the non-independent research are to correct factual inaccuracies only. Any matters of judgment are the author's own and our analysts will not amend the non-independent research on the basis of an issuer's contrary view.

Price targets or Projections

Price targets or projections, if discussed, reflect in part the analyst's estimates for the company's earnings. The achievement of any price target or projection may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market, and may not occur if the company's earnings fall short of estimate. Past performance is not indicative of future performance.

DISCLAIMERS

This material is: (i) for your private information, and we are not soliciting any action based upon it; (ii) not to be construed as an offer to sell or a solicitation of an offer to buy any investments or other related financial instruments in any jurisdiction where such offer or solicitation would be illegal; and (iii) is based upon information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied upon as such.

Opinions expressed are current opinions as of the original publication date appearing on this material only and the information, including the opinions contained herein, are subject to change without notice. Members of Seaport Global may from time to time perform investment banking or other services (including acting as advisor, manager or lender) for, or solicit investment banking or other business from, companies mentioned herein. Further, members of Seaport Global, and / or its officers, directors and employees, may, from time to time, have long or short positions in, and buy or sell, the investments, securities, derivatives (including options) or other related financial instruments thereof, of companies mentioned herein, or related investments, securities, derivatives or other related financial instruments. In addition, members of Seaport Global may act as a market maker and principal, willing to buy and sell certain of the investments, securities or other related financial instruments

of companies mentioned herein. Further, members of Seaport Global may buy and sell certain of the investments, securities or other related financial instruments of companies mentioned herein, as agent for its clients.

Investors should consider this report as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. SGE, SPGSE and other non-US members of Seaport Global, their officers, directors and employees may, to the extent it relates to non-US issuers and is permitted by applicable law, have acted upon or used this material immediately following, its publication.

The securities described herein may not have been registered under the U.S. Securities Act of 1933 (“ACT”) , and, in such case, may not be offered or sold in the United States or to U.S. persons unless they have been registered under such Act, or except in compliance with an exemption from the registration requirements of such Act.

Unless governing law permits otherwise, you must contact a Seaport Global entity in your home jurisdiction if you want to use our services in effecting a transaction in the investments, securities or other related financial instruments mentioned in this material.

This publication has been approved for distribution in the United Kingdom by The Seaport Group Europe LLP and Sea Port Group Securities (Europe) LLP, which are authorized and regulated by the Financial Conduct Authority (FCA). It is intended only for investors who are professional clients and eligible counterparties as defined by the FCA, and may not, therefore, be redistributed to other classes of investors.

The Seaport Group Europe LLP, Sea Port Group Securities (Europe) LLP and other Seaport Global entities manage conflicts identified through the following: their Information Barrier Wall, confidentiality and conflicts of interest policies, maintenance of a Restricted List and a Watch List, personal account dealing rules, policies and procedures for managing conflicts of interest arising from the allocation and pricing of investments, securities or other related financial instruments and disclosure to clients via client documentation.

Exelon Corporation

Inflation, Pension, and Interest Rates Weigh on Future Earnings; Lower Estimates/PT

Summary

We are updating our forecast following the release of 3Q2022 results. The company expects earnings to increase by roughly 5% in 2023, 6% in 2024, and more than 8% in 2025, reflecting near-term cost pressures including pension, inflation and higher interest rates offset by longer term cost recovery in future rate cases. Our revised estimates result in 6.4% compound annual growth in earnings through 2024, which is below the midpoint of the company's 6%-8% target EPS growth through 2025.

Key Points

- Exelon 3Q2022 operating EPS was $0.75 versus consensus estimates of $0.70.
- The company narrowed its 2022 guidance to $2.21-$2.29 versus $2.18-$2.32 previously.
- Exelon expects EPS to be roughly 5% higher in 2023. This implies a range of $2.32-$2.40. Exelon will provide 2023 guidance on its 4Q2022 earnings call.
- Exelon subsidiary PECO is operating under a three-year rate plan and may not earn its authorized return until 2025 when new rates are expected to go into effect.

PLEASE REFER TO PAGE 6 OF THIS REPORT FOR IMPORTANT DISCLOSURE AND ANALYST CERTIFICATION INFORMATION. Mizuho Securities USA LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Estimate Changes

We are updating our forecast following the release 3Q2022 results.

Exhibit 1: EPS Estimate Changes

Consolidated	2022E	2023E	2024E	2025E
Current	$2.25	$2.35	$2.50	$2.70
Prior	$2.28	$2.50	$2.61	$2.70
Difference	($0.03)	($0.15)	($0.11)	($0.00)

Source: Company reports, MSUSA estimates

We are reducing our 2022-2024 EPS estimates by $0.03, $0.15 and $0.11 respectively to $2.25, $2.35 and $2.50. The reduction reflects weaker assumed utility results, particularly at PECO, due to the impact of inflation, pension and higher interest costs. These cost pressures are likely to result in Exelon utility companies under-earning their authorized returns until they are able to file for rate relief. We had previously assumed that the company could offset these rising costs with a reduction in its operating and maintenance expenses.

We are maintaining our 2025 EPS estimate of $2.70. We assume that by 2025 the company is able to recover rising costs through future rate proceedings.

Mizuho estimates compound annual growth in EPS off of the mid-pont of 2022 guidance of 6.4%, at the lower end of the company's 6%-8% EPS growth target through 2025 off of the mid-point of 2021 guidance.

Our forecast assumes FFO/Debt of 13% in 2024 which is above the company's downgrade threshold of 12%. Our forecast is consistent with management's comments that it anticipates FFO/Debt to be between 13%-14%.

Valuation

Base Case

Using a sum-of-the-parts analysis on 2024 results we derive a price target of $39 per share. Based on yesterday's closing price of $36.96, this represents price appreciation potential of 5.5% and total return potential of 9.1% including a current yield of 3.6%. Our price target is derived as follows:

We value the regulated electric distribution and transmission 2024 earnings of $2.32 using a P/E multiple of 17.3 times, a 5% premium to our electric group average multiple, resulting in a price target of $40.00.

We value the regulated gas distribution 2024 earnings of $0.48 using a P/E multiple of 16.5 times, a 5% premium to our gas group average multiple, resulting in a price target of $8.00.

Adjusting for unallocated debt, net of a 28% tax shield, reduces the price by $9.00.

Consistent with our methodology our price targets are dynamic changing with the group average P/E multiples and EV/EBITDA multiples recalculated on a daily basis.

Company Models

In the pages that follow, we highlight our detailed consolidated financial model, including both historical and projections for income statement, cash flow and balance sheet for Exelon Corporation from 2019 to 2025. To derive the consolidated results, we modeled full financials for each operating subsidiary. Clients who would like the full models may obtain them through their MSUSA representative or by direct request to the authors.

Price Target Calculation and Key Risks

Price Target Calculations: Our $39 price target is derived as follows:

Using a sum-of-the-parts analysis on 2024 results we derive a price target of $39 per share. Based on yesterday's closing price of $36.96, this represents price appreciation potential of 5.5% and total return potential of 9.1% including a current yield of 3.6%. Our price target is derived as follows:

We value the regulated electric distribution and transmission 2024 earnings of $2.32 using a P/E multiple of 17.3 times, a 5% premium to our electric group average multiple, resulting in a price target of $40.00.

We value the regulated gas distribution 2024 earnings of $0.48 using a P/E multiple of 16.5 times, a 5% premium to our gas group average multiple, resulting in a price target of $8.00.

Adjusting for unallocated debt, net of a 28% tax shield, reduces the price by $9.00.

Consistent with our methodology our price targets are dynamic changing with the group average P/E multiples and EV/EBITDA multiples recalculated on a daily basis.

Key Risks: Equity overhang, weak commodity outlook, general economic conditions, changes in state and/or Federal regulation, weather, ongoing business operational risk, broader macroeconomic conditions, and interest rate movements are among the key risks to our rating and expected stock performance.

IMPORTANT DISCLOSURES

The disclosures for the subject companies of this report as well as the disclosures for Mizuho Securities USA LLC entire coverage universe can be found at https://msusa.bluematrix.com/sellside/Disclosures.action or obtained by contacting EQSupervisoryAnalystUS@mizuhogroup.com or via postal mail at Equity Research Editorial Department, Mizuho Securities USA LLC, 1271 Avenue of the Americas, 2nd FL, New York NY, 10020.

Investment Risks and Valuation Methods can be located in the following section of this research report - Price Target Calculation and Key Risks.

Receipt of Compensation

Mizuho Securities USA LLC and or its affiliates makes a market in the following securities: Exelon Corporation

Mizuho Securities USA LLC and or its affiliates has received compensation for investment banking services for Exelon Corporation in the past 12 months.

Mizuho Securities USA LLC and or its affiliates expects to receive or intends to seek compensation for investment banking services for Exelon Corporation in the next 3 months.

Mizuho Securities USA LLC and or its affiliates has managed or co-managed a public offering of securities for Exelon Corporation in the past 12 months.

The compensation of the research analyst writing this report, in whole or part, is based on MSUSA's annual revenue and earnings and is not directly related to any specific investment banking compensation. MSUSA's internal policies and procedures prohibit research analysts from receiving compensation from companies covered in the research reports.

Regulation Analyst Certification (AC)

I, Paul Fremont, hereby certify that the views expressed in this research report accurately reflect my personal views about any and all the subject companies. No part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

Rating Definitions

Mizuho Securities USA investment ratings are based on the following definitions: Anticipated share price change is based on a 12-month time frame. Return expectation is based on the stock's total return. For disclosure purposes (for purposes of the FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Buy, Neutral, and Underperform.

Buy: Stock's total return is expected to appreciate above the average total return of the analyst's industry coverage universe, on a risk-adjusted basis, over the next 12 months.

Neutral: Stock's total return is expected to be within the average total return of the analyst's industry coverage universe, on a risk-adjusted basis, over the next 12 months.

Underperform: Stock's total return is expected to depreciate below the average total return of the analyst's industry coverage universe, on a riskadjusted basis, over the next 12 months.

RS: Rating Suspended - rating and price objective temporarily suspended.

NR: No Rating - not covered, and therefore not assigned a rating.

Rating Distribution

(As of November 3)	% of coverage	IB service past 12 mo
Buy (Buy)	61.44%	60.25%
Hold (Neutral)	37.28%	50.34%
Sell (Underperform)	1.29%	20.00%

For disclosure purposes only (NYSE and FINRA ratings distribution requirements), our Buy, Neutral and Underperform ratings are displayed as Buy, Hold and Sell, respectively.

EXC-NSDQ	Rating	Price: Nov-3	Target	Total Rtn
	Outperform	$36.96	$42.00	17%

Earnings/Growth Clarity – Now What Is The Right Multiple?

Bottom Line:

EXC reported EPS of $0.75 vs. our/consensus $0.71/$0.70. Management narrowed its 2022 guidance range to $2.21-2.29. **The call was highlighted by the company's illustrative 2023-2025 EPS which showed year-over-year growth of ~5% in 2023, ~6% in 2024 and ~8%+ in 2025 or ~6.7% '21-25. Still, we believe management's intended message was they are driving towards the midpoint or better through 2025**. We maintain our Outperform rating and our 2022 estimate is unchanged at $2.25, but our 2023-2025 estimates are now $2.36, $2.50 and $2.72, respectively.

Key Points

EXC shares underperformed by nearly 3.2% today as the company's illustrative 2023-2025 EPS and associated implied growth disappointed. Although the YOY primary drivers were largely consistent with expectations, and management continues to see rate base growth of 8.1% from 2021-2025, which underpins its 6-8% EPS growth outlook, the non-linear nature of the company's implied forward growth was even more pronounced than expected. Specifically, on a YOY basis, management's presentation would suggest growth in 2023, 2024, and 2025 of ~5%, ~6%, and ~8% +, respectively, which suggests an EPS CAGR of ~6.7% using its revised 2021 guidance range of $2.06-2.14. The primary driver of the lumpiness in the growth outlook continues to be related to the return profile at its PECO subsidiary and the associated electric rate case cycle.

We see today's announcements as a good first step towards derisking the story and at an 8%/10% discount to group on our revised 2024/2025 forecast, respectively, we believe EXC shares represent one of the more compelling relative value opportunities within our coverage over the next 12-months. However, given the recent management changes and several months of confusion regarding the company's 2023 outlook and the non-linearity of its LT growth rate, we would not be surprised to see investors remain cautious and take a more wait-and-see posture in the name. **With today's incremental clarity on the company's EPS growth path through 2025, we think investors have fewer questions on earnings power and the debate has squarely shifted to what is the right relative multiple.**

Given its lower-risk T&D profile, solid balance sheet, and constructive regulatory mechanisms (MYRP/MYPs/formula rate), we believe EXC's profile could garner a modest premium multiple over time. However, consistency and execution over the next 12-18 months will be key to the convergence of the company's multiple with its above-average growth and business profile.

Our Thesis

We see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans. We believe the company's low-risk T&D business profile, strong and visible fundamental growth outlook, and supportive regulatory environment position the company well to drive multiple expansion.

Scenarios

Valuation

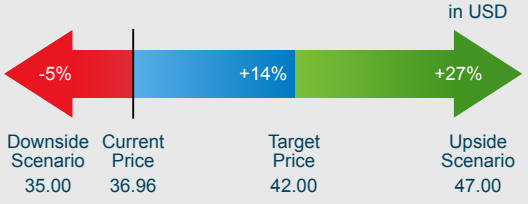
We value EXC on a sum-of-the-parts valuation. Our framework begins with the relevant sector average P/E multiple using 2024E EPS as a base, which we then adjust (premium, discount, or no change) to reflect the relative fundamentals for each segment.

Upside Scenario $47.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $35.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.



Key Catalysts

We see EXC management now in execution mode post its separation from Constellation Energy. With nearly 75% of the company's revenues decoupled from volumes and 100% of its capital covered through alternative recovery mechanisms, we see EXC achieving our target price over the next 12-18-month as management executes against its capital and regulatory plans.

Company Description

Exelon is the largest utility by customer count with over 10mm electric and natural gas customers spread across its six-state footprint. It is the fourth largest utility by rate base with one of the lowest business risk and ESG-friendly profiles given the company's pure T&D asset mix with electric distribution and transmission representing over 85% of rate base.

Glossary
Company Models

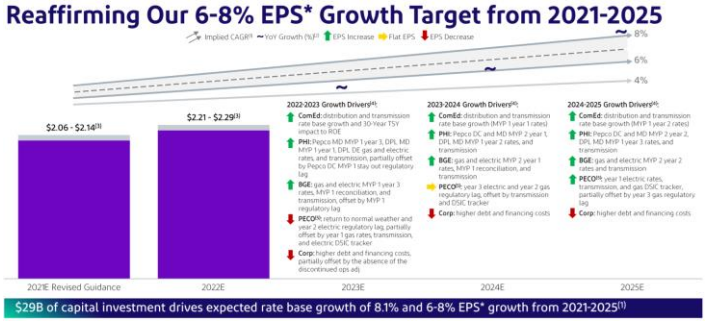
Earnings & Growth Clarity – Now What Is The Right Multiple?

Bottom Line: EXC shares underperformed the broader utility sector by nearly 3.2% today as the company's illustrative 2023-2025 EPS and associated implied growth disappointed. Although the primary drivers provided by the company were largely consistent with expectations and management continues to see rate base growth of 8.1% 2021-2025 which underpins its 6-8% EPS growth outlook, the non-linear nature of the company's implied forward growth was even more pronounced than expected. Specifically, on a year-over-year basis management's presentation would suggest growth in 2023, 2024 and 2025 of ~5%, ~6% and ~8%+, respectively which suggests an EPS CAGR of ~6.7% using its revised 2021 guidance range of $2.06-2.14/share (Exhibit 2). The primary driver of the lumpiness in the growth outlook continues to be related to the return profile at its PECO subsidiary the associated electric rate case cycle.

Given the implied growth extrapolated from the company's slide deck (Exhibit 1), there were several questions on the conference call regarding where management expected growth to be within the company's 6-8% growth target. Management said several times that given the disclosed drivers and the implied shape of the annual EPS trajectory it disclosed, that it expected to be squarely within the 6-8% range on a CAGR basis in 2025. However, in our discussion with investors there still remained sufficient confusion as to whether management is targeting the midpoint of the range. **Based on our conversations with management we believe the company's intended message was they are driving towards the midpoint or better through 2025 and it is consistent with what the shaping of its year-over-year growth illustration was intended to illustrate.**

We are revising our 2023-2025 EPS forecast to reflect a slightly more backwardated earnings path for PECO's electric and higher holding company interest rate assumptions. Our new estimates are $2.36, $2.50 and $2.72, respectively. Our revised forecast suggests a 6.7% CAGR 2021-2025 which is slightly below the midpoint of the company's 6-8% EPS growth target. **We would note that should company be able to reach the top end of the implied 2025 EPS range, our 2021-2025 CAGR would rise to 7%.**

Exhibit 1: Illustrative Year-over-Year Growth 2023-2025



Source: BMO Capital Markets, Company Presentations

Exhibit 2: Implied 2023-2025 EPS Ranges

	2021E	2022E	2023E	2024E	2025E	'21-25 CAGR
Bottom	$2.06	$2.21	$2.32	$2.46	$2.66	
Top	$2.14	$2.29	$2.40	$2.55	$2.76	
Midpoint	**$2.10**	**$2.25**	**$2.36**	**$2.50**	**$2.72**	**6.7%**
YOY Implied Growth		*7.1%*	*5.0%*	*6.0%*	*8.7%*	

Source: BMO Capital Markets

We see today's announcements as a good first step towards derisking the story and at an 8% and 10% discount to group on our revised 2024 and 2025 forecast, respectively, we believe EXC shares represent one of the more compelling relative value opportunities within our coverage universe over the next 12 months. However, given the recent management changes and several months of confusion regarding the company's 2023 outlook and the non-linearity of its LT growth rate we would not be surprised to see investors remain cautious and take a more wait-and-see posture in the name. **With today's incremental clarity on the company's EPS growth path through 2025 we think investors have less questions on the earnings power of the company and the debate has squarely turned to what relative multiple should the company trade at.**

Our forecast suggests EPS growth at just under the 7% midpoint of the company's guidance range, which is at or above the group average growth rate for the larger cap names in our coverage universe. Given the company's lower-risk T&D profile (20% transmission), solid balance sheet, and constructive regulatory mechanisms as nearly 80% of its rate base is covered under either multi-year plans or formula rates, we believe EXC's profile could garner a premium multiple over time. However, given the recent series of miscommunications and the fact that premium valuations in the sector have been ascribed after years of execution as well as more linear realized growth rates, consistency and execution over the next 12-18 months will be key to the convergence of the company's multiple with its above-average growth outlook and business profile. At an 8-10% discount on 2024/2025 we continue to find EXC an attractive relative value. **We maintain our Outperform rating and our $42 target price is unchanged which reflects our lower 2024 EPS estimate and our current MTM of our peer group electric and gas multiples.**

3Q22 Earnings & Details on Other Updates

EXC reported EPS of $0.75 vs. our $0.71 BMO estimate and $0.70 consensus estimate. Year-over-year results increased +$0.22 compared to a revised $0.53 in 3Q21 reflecting only EXC continuing operations. ComEd added +$0.07 with $0.04 attributed to distribution rates and +$0.03 of other. PECO increased +$0.06 as growth of +$0.04 from distribution rates and +$0.03 of lower storm costs were partially offset by ($0.01) of D&A. BGE added +$0.03 with distribution rates adding +$0.02 and favorable storm costs contributing +$0.01. PHI grew by +$0.01 as +$0.02 of distribution rates was partially offset by ($0.01) of D&A. Corporate declined ($0.03) with ($0.02) of interest expense and ($0.01) of other. The BSC allocations adjustment for discontinued operations added +$0.08 compared to the $0.53 3Q21 number which included a ($0.08) headwind for the same driver. The results yielded a trailing twelve month earned ROE of 9.3%, which is in line with 3Q21, but represents a 50bps improvement over 2Q22.

With today's call EXC provided several updates to its financial guidance including a revised 2022 range, illustrative 2023-2025 guidance, reiteration of its equity financing needs and an update on the impact of the Inflation Reduction Act's CMAT provision.

- For 2022 management narrowed its guidance range to $2.21-2.29 vs. $2.18-2.32 with no change to the $2.25 midpoint which is in line with both the Street's and BMO at $2.25.
- In its slide deck and illustrated in Exhibit 1 above, using the "tildes" as a guide the company sees year-over-year growth 2022 to 2023 at ~5%, 2023 to 2024 at ~6% and 2024 to 2025 growth at ~8%+.
- Given 2023's 5% YOY growth was weaker-than-expected (-1.5%) and using the implied 6% and 8% growth in 2024 and 2025 off this lower implied 2023 range, the compounding impact on the implied EPS for 2024 and 2025 created a larger impact in the outer years of -2.5% in each year.
- Using this approach would imply ranges for **2023 EPS of $2.32-2.40** ($2.36 midpoint vs. the Street at $2.40), **2024 EPS of $2.46-2.55** ($2.50 midpoint vs. the Street at $2.57) and **2025 EPS of $2.66-2.76** ($2.72 midpoint vs. the Street at $2.78) – (Exhibit 2).
- Although management sees the ~$200mm in potential cash impact from the IRA's CMAT provision as a 60-70 bps reduction in the company's FFO metrics, given its mitigation plan the company does not see the need to issue any additional equity. We would note with FFO (Pre-WC)/Debt forecast of 13-14% 2022-2024, the company also has ample cushion relative to its 12% downgrade threshold at both S&P and Moody's.
- Yesterday EXC announced that CEO Chris Crane will be retiring from CEO and the EXC Board at year-end due to health reasons. Mr. Crane will be missed, and we wish him well in his

recovery. COO and recently appointed President Calvin Butler will replace Mr. Crane as CEO and on the EXC board. As we noted in our note, Mr. Butler is a known quantity to investors which should facilitate a smooth transition.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in Exelon in United States.

Methodology and Risks to Target Price/Valuation for Exelon (EXC-NSDQ)

Methodology: We value EXC using our sum-of-the-parts valuation analysis to derive our target price. Our valuation takes into account the quality of EXC's assets relative to its peers and the company's regulated business rate base growth and funding sources.

Risks: Failure to pass a version of the "Clean Energy Jobs Act" in the upcoming legislative session that sufficiently expands financial support for EXC Gen's nuclear plants would cause us to re-evaluate our rating, all else equal. The Governor's opposition to the existing Formulaic Based Rate Plan in IL may result in a new set of regulations that could be adverse to the company's ComEd Utility. Nuclear operations are subject to additional safety and regulatory oversight.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents

have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

The Wolfe Byte
EXC had several important updates that collectively we view as providing clarity on the long-term growth story. But given the stock's reaction, we think the market is missing the forest for the trees. We see an attractive entry point and reiterate our Outperform rating.

Updates provide clarity; stock overdone. EXC's 3Q22 of $0.75 beat consensus by $0.05 mostly on timing, and EXC shaved $0.03 off both ends of FY22 guidance, now $2.21-2.29, in line with consensus. EXC reaffirmed 6-8% EPS growth through 2025 off 2021A. But for the first time, EXC illustrated year-over-year growth. The nonlinearity of its EPS growth is not new, but now we have approximations, putting to bed the uncertainty over annual EPS being within 6-8% or not. EXC also announced the retirement of long-time CEO Chris Crane due to health issues, accelerating the planned succession of Calvin Butler. And EXC clarified no incremental equity is needed despite the potential cash hit of up to $200M/yr from the AMT. These disclosures provide visibility to EXC's low-risk T&D business and EPS growth outlook. Still, the stock lagged the UTY by 320bp. We think the market is overly focused on annual EPS. EXC has line of sight to "squarely within" 6-8% growth in 2025 and seemed comfortable with at least the middle of that range in our post-call. EXC is over a 2x discount to peers on 2025 right now; we see it getting back to at least an average over time as the self-inflicted noise over guidance this year quiets down. Reiterate Outperform and raise PT to $44 on roll to 2025 valuation year.

Annual EPS growth now clear. EXC yoy growth estimates are 4-6% in 2023, a little over 6% in 2024 and over 8% in 2025, supporting its 6-8% CAGR. Positive drivers are low-risk, as they include MYPs in most of EXC's jurisdictions and 3yr cadence of new PECO rates in 2025. Higher interest cost is main negative driver. We trim 2025E by $0.02 on less PECO uplift than previously assumed.

AMT impact is worst case, could decline with IRS guidelines; no new equity needs. EXC's $200M cash hit assumes the repairs and maintenance deduction is not treated like accelerated D&A in the IRA. But the IRS has yet to issue guidelines. EXC's equity needs are unchanged and still expects 13-14% FFO/D on avg through 2024.

ESTIMATES

($)	2022E	2023E	2024E	2025E
EPS FY	2.25 E	2.33 E	2.51 E	2.76 E
Prior	-	-	-	2.78 E
Cons.	2.25 E	2.39 E	2.57 E	2.78 E
P/E	16.4x	15.8x	14.7x	13.4x

WOLFE RESEARCH

November 3, 2022

Investment Conclusion

We believe EXC is a low-risk utility stock with ESG-friendly investments. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%. We think the stock hit from IRA and nonlinear EPS growth is overdone and see it getting to at least an in-line utility multiple. We think execution and better messaging will be key over time to trade in line with the low-risk, high-quality utilities.

Valuation

Our $44PT is based on our utility group P/E of 16x 2025E.

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

More on select items:

- 6-8% EPS growth intact; nonlinear given timing of PECO lag: EXC reaffirmed its above-average 6-8% EPS growth off 2021A of $2.10 through 2025, inclusive of the $200M maximum hit to cash from the IRA, as growth is driven by its $29B capital plan through 2025. EXC provided the following EPS guidance for 2022 of $2.21-2.29 and annual growth drivers thereafter, which are mainly rate base growth under multiyear rate plans net regulatory lag at PECO until 2025 and higher debt/financing costs.
  - 2023: Positives are ComEd rate base growth and 30Y UST yield; Year 3 in Pepco MD and BG&E multiyear plans; and transmission rate base growth. Reconciliations in the MYPs could also help inform how EXC manages the next round of MYPs. Negatives are regulatory lag at PECO in Year 2 of 3-year plan and higher debt and financing costs.
  - 2024: Year 1 of ComEd 4yr distribution rate plan; Year 1 of new MYPs for Pepco DC, Pepco MD and BG&E; and transmission rate base growth. Negatives are higher debt and financing costs.
  - 2025: Year 2 of ComEd 4yr distribution rate plan; Year 2 of new MYPs for Pepco DC, Pepco MD and BG&E; and transmission rate base growth. Negatives are higher debt and financing costs

- $200M negative cash impact from IRA is worst case; no incremental equity needs: EXC assumes the AMT is determined at the consolidated level, meaning potential benefits from lower deferred taxes (= higher rate base) would not materialize at the utility subs. And EXC's $200M cash hit assumes the repairs and maintenance deduction is not treated like accelerated D&A in the IRA. The IRS has yet to issue guidelines, but the utility industry is engaged with the Treasury and hoping to get them as soon as possible. EXC also is exploring ways to mitigate the impact. If the cash hit were $200M, EXC still expects to be above the credit rating downgrade thresholds of 12% FFO/Debt but could be temporarily below its 13-14% FFO/Debt target if the $200M/yr cash hit is unmitigated. But EXC still expects to get back into 13-14% later in the plan. EXC does not see any incremental equity needs beyond the remaining $425M through 2025.

- ComEd earned returns under new MYP starting in 2024 could include up to 32bp of incentives: EXC plans to file a ComEd rate case in Jan 2023 under the new 4-year rate plan framework. In Sep, the ICC approved up to 32bp incentives to the ROE under the MYP framework, which we viewed as constructive. The ROE in 2024 and beyond is a TBD, but we believe it will be around the 9.6-9.7% ROEs authorized to gas LDCs in IL over the past two years, or possibly higher given the interest rate backdrop. Our 2022-23E reflect the forward 30Y UST yield, as of 9/30/22, plus 580bp under the current formulaic ratemaking. Every 50bp change in the 30Y UST yield is $0.04 in 2023E. Our 2024-25E, reflects ~9.5% earned returns. We do not include performance incentives that could total up to 32bp. IL regulators will determine the allowed ROE. They authorized ROEs around 9.7% for IL gas utilities over the past couple of years.

Company Description

Chicago-based EXC is a large T&D (wires-only) regulated utility company, providing mostly electric service to roughly 10 million customers in the Mid-Atlantic and northern IL. It has no coal or other generation. ComEd serves northern IL and is EXC's largest utility sub, representing ~40% of rate base. Pepco serves DC, DE, MD and southern NJ and represents 25% of rate base. PECO, which serves southeastern PA, and BGE, which serves Baltimore, each represent nearly 20% of rate base. A little over 90% of EXC's total rate base is electric, with the rest gas LDC.

Investment Thesis

We believe EXC is a low-risk utility stock with ESG-friendly investments and recently added clarity on CEO succession, EPS growth profile and equity needs. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%.

Valuation

Our $44 PT is based on our utility group average P/E of 16x 2025E. Risks are less capex, lower returns, less cash or more equity needs, and unfavorable regulatory outcomes.

Wolfe Research, LLC Fundamental Stock Ratings Key:

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Outperform (OP):	The security is projected to outperform analyst's industry coverage universe over the next 12 months.
Peer Perform (PP):	The security is projected to perform approximately in line with analyst's industry coverage universe over the next 12 months.
Underperform (UP):	The security is projected to underperform analyst's industry coverage universe over the next 12 months.

Effective August 1, 2022, Wolfe Research, LLC will no longer publish target prices for Peer Perform rated companies.

Wolfe Research, LLC uses a relative rating system using terms such as Outperform, Peer Perform and Underperform (see definitions above). Please carefully read the definitions of all ratings used in Wolfe Research, LLC research. In addition, since Wolfe Research, LLC research contains more complete information concerning the analyst's views, please carefully read Wolfe Research, LLC research in its entirety and not infer the contents from the ratings alone. In all cases, ratings (or research) should not be used or relied upon as investment advice and any investment decisions should be based upon individual circumstances and other considerations.

Wolfe Research, LLC Industry Weighting System:

Market Overweight (MO):	Expect the industry to outperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.
Market Weight (MW):	Expect the industry to perform approximately in line with the primary market index for the region (S&P 500 in the U.S.) over the next 12 months.
Market Underweight (MU):	Expect the industry to underperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.

Wolfe Research, LLC Distribution of Fundamental Stock Ratings (As of November 3, 2022):

Outperform:	51%	8% Investment Banking Clients within the previous 12 months
Peer Perform:	39%	6% Investment Banking Clients within the previous 12 months
Underperform:	10%	2% Investment Banking Clients within the previous 12 months

Wolfe Research, LLC does not assign ratings of Buy, Hold or Sell to the stocks it covers. Outperform, Peer Perform and Underperform are not the respective equivalents of Buy, Hold and Sell but represent relative weightings as defined above. To satisfy regulatory requirements, Outperform has been designated to correspond with Buy, Peer Perform has been designated to correspond with Hold and Underperform has been designated to correspond with Sell.

Key Message: In line with our expectations (HERE) heading into the call, management addressed investor questions over the NT growth profile head on, providing key drivers and considerations for the remaining 3 years of the current plan ('23-25) and reaffirming the 6-8% LT EPS growth target. **In our view, today's reaction reflects the likelihood that some investors were hard-pressed to see a situation where YoY growth would come in below the lower band of the guide, despite our own cautious tone (we were <5% hence minimal change to our estimates).** In addition, while 6-8% LT growth was reiterated, to get there the back end of the plan assumes YoY growth north of that range and itself rests on obtaining constructive outcomes in several different MYPs. To that end, **one of the key items we question with this story is whether investors who own regulated utilities, especially incremental investors in T&D utilities, are more accustomed to linear growth – not growth that gyrates above and below the range. While we understand that there will be times of regulatory lag (e.g., in case of PECO), we believe investors would expect an organization of this scale, free of the commodity-exposed genco, to better smooth earnings. Is this a clearing event? Potentially.** With shares underperforming UTY by ~9% since 8/2 and most of the more pressing questions now addressed (and the new team in place), we believe investors' focus will be on how the new team, with Calvin (who we have always supported) at the helm, rebuilds credibility and stabilizes messaging. Our PT moves from $40 to $39 as we update our estimates. We caught up with Calvin and team post earnings call.

Management addresses questions over yearly growth rates; reaffirms 6-8%. Our expectations heading into the call were centered squarely on growth messaging, with the team providing a clear set of drivers for each year of the plan alongside directional YoY growth indications. In line with our prior expectations and conversations, 2023 YoY growth will be below the LT 6-8% range, with our slightly updated $2.36 EPS estimate (prior $2.34) representing 4.8% growth off of the 2022 guidance midpoint of $2.25. As ComEd transitions to an MYP and the eastern utilities renew their own MYPs, management envisions 2024-2025 growth above 8%, helping to keep the overall CAGR within the LT 6-8% band. Using the 2021 $2.10 guidance midpoint, our updated estimates reflect a ~6.9% CAGR. Coming off this update, our focus now turns to 2026 and the forthcoming roll, which remains outside our current forecast window. We asked management for any initial thoughts on that year given the specificity provided today and the strong underlying rate base growth (>8%), but with the plan not yet finalized, they were not in a position to discuss. While this part of the update took up the bulk of today's conversations, the team also reaffirmed its equity issuance plan ($425mm remaining) and the estimated cash impact of the CAMT (~ $200mm). In our view, as supported by comments from other utilities, further refinement on CAMT impacts may not be forthcoming for some time as we await IRS clarity.

EXC reported 3Q22 EPS performance of $0.75, beating our estimate of $0.68 and consensus of $0.70. YoY earnings were $0.22 higher on another quarter of slightly noisy 2021 comps, with higher distribution rates at the utilities partially offset by a variety of different factors. Across the opcos, ComEd earnings were +$0.07 YoY thanks to another quarter of higher distribution rates (investment and treasuries) alongside FRP timing. Earnings were $0.06 higher at PECO, reflecting higher distribution rates (+$0.04) and the absence of storms vs. 2021. A similar dynamic held at BGE to total +$0.03 YoY. PHI added $0.01 as higher rates were partially offset by D&A. As expected, the quarter also featured ongoing noise at the parent on the back of the generation separation, with the allocation adjustments for BSC netting to $0.08, which was partially offset by higher interest expense and other (totaling $0.03). **Looking ahead, management narrowed the 2022 EPS guidance range to $2.21-2.29 from the prior $2.18-2.32,** as compared to our $2.27, which remains unchanged. As a reminder, we hosted EXC management for a multi-day NDR this summer – see our note from those meetings HERE. We also profiled the recent C-Suite changes in our note HERE.

See pages 3 - 4 for analyst certification and important disclosures.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Valuation

Our valuation is based on our 2024E EPS of $2.50 (previously $2.58) applied to a 16x regulated utility multiple, which is based on our regression model using the correlation between electric utility valuations and forward interest rate expectations over the past 30+ years. To this 16x multiple, we continue to apply a 1-turn premium to each of EXC's subsidiaries for favorable recovery mechanisms (riders, MYPs) and underlying growth/ incremental investment opportunities, except for ComEd. This blended 16.7x multiple, applied to our 2024E EPS and discounted back 1 year, equals our $39 PT.

Risks

EXC comprises regulated distribution and transmission assets, which face traditional risk factors and upside drivers inherent with all utilities, including: (1) positive/negative rate case outcomes above/below our expectations, (2) higher/lower capex outlooks, and (3) interest rate changes above/below what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

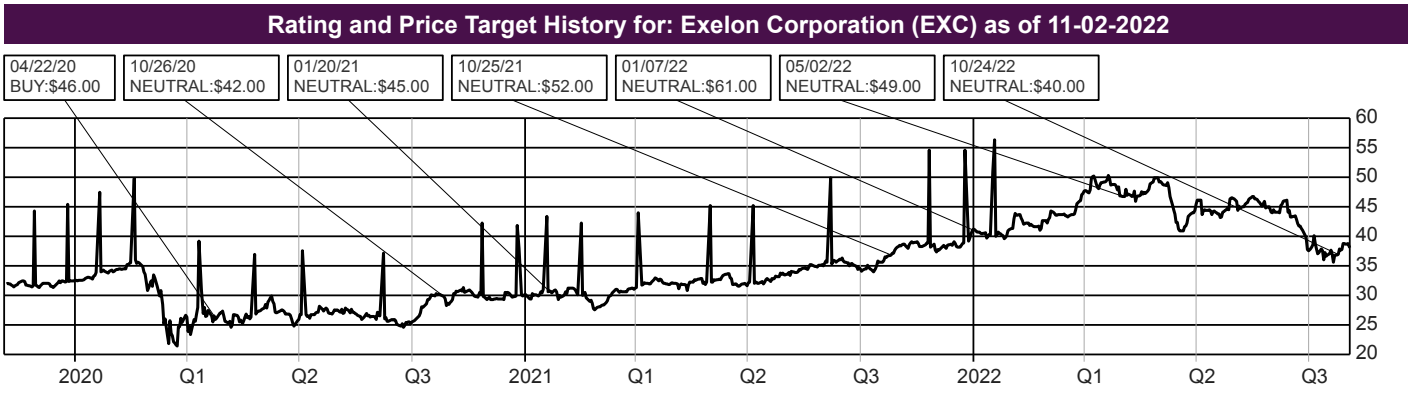
IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.



RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth,

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Alert

November 03, 2022

Energy: Electric Utilities

NYSE: EXC

Exelon Corporation

EXC: 3Q Beats, Longer Term Growth Rate Reiterated, but Cadence Will Be Uneven

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

EXC reported a quarter that was modestly ahead of our estimates and narrowed 2022 EPS guidance while maintaining the midpoint at $2.25. Regulatory activity continues apace through its various service territories with the ComEd multi-year rate plan filing in IL in 2023 likely to be the most watched. The CMT impact from the IRA will likely be ~$200M annually, although the final count may be lower as the Dept. of Treasury finalizes rules. The cash tax impact from the CMT does not change management's financing plans, which include $1B in equity issuance through 2025, of which roughly half was issued in 3Q. While management reiterated the 6-8% EPS growth rate through 2025, the commentary seems to indicate that the low end is more likely with 2023 falling below the 6-8% range. We expect to get formal 2023 guidance and a capital refresh with 4Q results. We remain Sector Weight as we await more color on the cadence of the EPS growth rate and on the corporate minimum tax.

3Q results exceeded our estimates; the 2022 guidance range narrowed: EXC reported 3Q adjusted EPS of $0.75, vs. our $0.72 estimate and the consensus of $0.70. Earnings by utility were mostly in line with our forecasts except at PECO where we underestimated the increase in distribution rates. Management narrowed 2022 guidance from $2.18-$2.32 to $2.21-$2.29, the midpoint remains at $2.25. Our current forecast is $2.27 while the consensus is at $2.26.

Figure 1 - 3Q22 Earnings Breakdown

3Q22	EXC	KBCM
ComEd	0.30	0.31
PECO	0.18	0.14
BG&E	0.07	0.05
PHI	0.29	0.27
Parent	(0.08)	(0.05)
EXC	**0.75**	**0.72**
Consensus	**0.70**	

Source: Company Reports, KBCM Estimates, Thomson Reuters

Long-term guidance reiterated — cadence will be uneven; lower end of the range appears more likely: EXC maintained the 6-8% EPS CAGR through 2025, but it appears that the cadence will be uneven and based on commentary — it is more likely to trend toward the low end of the range. Among the factors causing this variability in the growth rate are the volatility in interest rates that will still drive ComEd outcomes until the end of 2023 (when the new rates under the MYRP come into effect), some regulatory lag at PECO as it enters Y2 of the MYRP in 2023, as well as the adverse effect of higher interest rates overall. Formal 2023 guidance and a capex refresh will be provided on the 4Q22 earnings call.

Figure 2 - Potential EPS Cadence

EPS Cadence	2021	2022	2023	2024	2025	CAGR
Likely EPS based on Comments	2.10	2.25	2.34	2.48	2.68	
Growth Rate		7.1%	4.0%	6.0%	8.0%	6.3%
KBCM estimates	2.08	2.27	2.41	2.58	2.75	
Growth Rate		8.9%	6.2%	7.1%	6.6%	7.2%
Consensus estimates	2.08	2.26	2.39	2.58	2.78	
Growth Rate		8.4%	6.0%	7.7%	8.0%	7.5%

Source: Company Reports, KBCM Estimates, Thomson Reuters

Equity issuance underway, ROE moves up to the targeted 9-10% range: As planned, EXC issued equity during the quarter and has $425M of the $1B program remaining (to be issued through 2025). The Company reported a 12-month trailing ROE of 9.3% during the quarter — returning to the targeted 9-10% range, helped by the recent equity issuance and new rates coming into effect.

Impact of CMT appears lower than previously expected: The Company expects the corporate minimum tax provision included in the IRA to result in $200M in additional cash taxes annually with the potential for some mitigation depending on the final outcome of the Treasury rules expected in 2023. This is lower than EXC's preliminary assessment of a $300M impact from the CMT (provided on the 2Q call). Management intends to manage the higher tax bill through existing balance sheet tools and cash flow and the planned equity issuance of $1B is unchanged, while still maintaining an FFO/Debt ratio above the downgrade threshold of 12% (estimated 13-14% through 2024). Over time, the provisions of the IRA that lead to growth in generation investments should also have a positive impact on EXC's T&D capex.

ComEd multi-year rate filing expected in early January: Following a lengthy period of engagements with the ICC and various stakeholders, ComEd received the final order on the performance tracking mechanisms, which paves the way for the first multi-year rate filing in early 2023. All in, the Commission has identified 7 performance metrics that could yield +/- 32 bps over the determined ROE. EXC has opted for the MYRP filing with a 4-year rate structure that will be effective in 2024 and continue through the end of 2026 — over the option for a one-year plan using a future test year. The MYRP should provide long-term visibility on investment decisions and removes the year-to-year volatility of the current FRP structure.

Regulatory proceedings continue apace with constructive outcomes in several rate cases during the year: Most recently, PA PUC approved a settlement in PECO's gas rate case settlement that included a $55M net rate increase effective Jan 1. DE PSC approved the DPL settlement for the gas distribution rate case for a $7.8M net rate increase with a 9.6% ROE (interim rates are in effect). DPL's electric rate case in MD has reached a settlement on key issues for the first MYRP (2023-25) and the last IL FRP filing for ComEd is expected to receive a final order before YE.

Management transition announced: CEO Chris Crane will retire as CEO and director at the end of the year. Current President and COO Calvin Butler will take over the role of CEO.

Recent Research: EXC: No Surprises in the Quarter, but the IRA Could Bring a Bigger Tax Bill; EXC: Delivering on Track Results as a Regulated Utility

Valuation: Based on a stock price of $38.04 and our 2023E EPS of $2.41, shares of EXC are trading at a P/E ratio of ~16x, representing a 7% discount to Large-Cap Regulated Utilities trading at ~17x. We view the shares as fairly priced at current levels.

Risks: EXC's regulated utilities are exposed to a number of risks, including regulatory risk in its jurisdictions and on the federal level, weather variations affecting electricity demand and the reliability of its system, interest rate risk affecting its cost of capital, and macroeconomic risk as underlying economic activity affects demand for electric power and gas. Should the impacts of these risks be greater than we currently anticipate, the Company and the shares may underperform relative to our expectations. Conversely, should these risks' impact be less than anticipated, the Company and the shares may outperform relative to our current expectations.

Disclosure Appendix

Important Disclosures

Exelon Corporation - EXC

We expect to receive or intend to seek compensation for investment banking services from Exelon Corporation within the next three months.

During the past 12 months, Exelon Corporation has been a client of the firm or its affiliates for non-securities related services.

As of the date of this report, we make a market in Exelon Corporation.

Current analyst Sophie Karp assumed coverage on June 4, 2019. Rating and price target activity prior to that date was the work of a previous analyst.

Reg A/C Certification

Exelon CEO to Step Down; Reports Third-Quarter Earnings

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Nov 2022

We are reaffirming our $41 per share fair value estimate for Exelon after it reported third-quarter adjusted earnings per share of $0.75 up from $0.61 in the same year-ago period. Comparable earnings were adjusted for the Constellation Energy divestiture earlier this year and discontinued operations.

Management narrowed its 2022 full-year earnings guidance to $2.21-$2.29 per share from previous guidance of $2.18-$2.32. Our unchanged estimate remains within the new guidance range. Management reaffirmed Exelon's long-term 6%-8% annual earnings growth through 2025, with growth initially below this range and accelerating through the timeframe. Our narrow moat and stable moat trend ratings remain unchanged.

The company announced that CEO Chris Crane will retire at the end of 2022, earlier than we anticipated, due to health issues. Crane dealt with low power prices that impacted Constellation's performance through most of his tenure. We viewed the Constellation divestiture and focus on becoming a regulated-only utility a positive for investors. Crane also navigated Exelon through subsidiary ComEd's bribery scandal, helping reach a deferred prosecution agreement with federal prosecutors. Crane successfully lobbied for significant subsidies for Exelon's nuclear fleet.

Calvin Butler, who was promoted to president and COO earlier this year, will replace Crane. Butler is also an executive of the company's utilities group. We expect Butler to continue Exelon's focus on improving regulatory relationships and executing the company's regulated growth plan.

Exelon's returns on equity continued improved notably in the quarter. The company's trailing 12-month earned returns on equity were 9.3%, up from 8.8% in the second quarter and now within management's 9%-10% target

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is

Research Methodology for Valuing Companies

aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns.An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

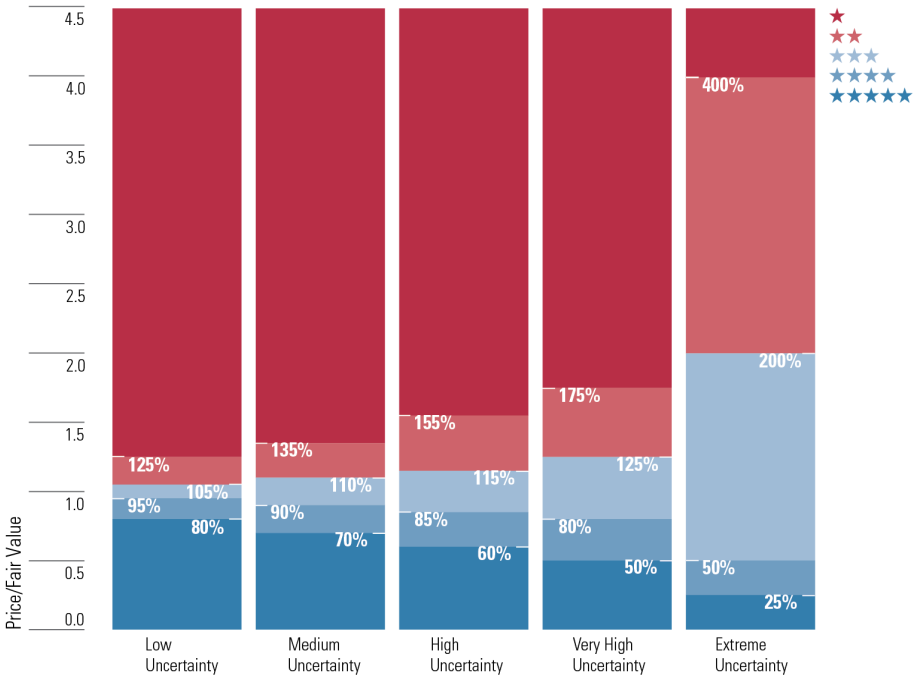
Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the

Research Methodology for Valuing Companies

quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

J.P. Morgan Securities LLC

- **2022 guidance narrowed; new 2023-2025 drivers outlined.** EXC narrowed the top and bottom end of its 2022 guidance by 3c for a revised $2.21-2.29 range (JPMe/Street median $2.29/$2.27). The company also outlined new detail on 2023-2025 EPS drivers and preliminary annual targets within its 2021-2025 6-8% EPS CAGR range. These disclosures point to ~5% YoY EPS growth in 2023, identifying headwinds from PECO's return to normal weather and year 2 regulatory lag plus higher parent debt and higher interest expense. While below EXC's long-term growth range, 2024 and 2025 disclosures point to a recovery with 6% and >8% annual EPS growth, respectively. We see the annual detail as ultimately positive in putting a floor on negative 2023 expectations and drawing a clearer picture around post-2023 growth tailwinds such as ComEd's upcoming ratemaking transition, new DC/MD MYPs, and new PECO electric rates in 2025.
- **CEO Chris Crane to retire at year-end.** Following recent executive transitions, yesterday EXC announced the retirement of CEO Chris Crane at year-end. Current President and COO Calvin Butler, will assume the CEO role upon Crane's retirement. We see the market as receptive to these changes, and look for incoming CEO Butler to continue EXC's current strategy. Alongside the company's initial succession update, management emphasized Butler's deep transaction and operation experience plus EXC's significant progress since its Constellation separation. We expect a similar message on the call.
- **3Q22 tops Street estimates on higher distribution rates and milder storm activity; in-line with JPMe.** EXC reported 3Q22 adj EPS of $0.75, surpassing the Street median of $0.70 and slightly above JPMe of $0.74. PECO landed +3c higher relative to our estimates, primarily driven by distribution rate increases and lower storm costs, partially offset by an uptick in depreciation expense. Aside from PECO, no segment meaningfully deviated from our expectations, and all results landed within 1c of our estimates. Overall, EXC delivered a strong quarter, backed by higher electric distribution rates at ComEd, and higher rate base and rate increases at PECO, BGE, and PHI, coupled with relatively mild storm activity in the period.
- **Equity financing plan remains on track; AMT impact reiterated.** EXC also reiterated its financing plan and prospective $200/yr unmitigated AMT impact. $425mm in 2023-2025 equity remains following the company's August equity issuance.
- **Conference call details .** EXC will host a webcast to discuss 3Q22 results on Thursday, November 3 at 10:00 AM ET.

See page 3 for analyst certification and important disclosures.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Coverage Universe: Tonet, Jeremy: AltaGas Ltd (ALA.TO), Ameren Corporation (AEE), American Electric Power (AEP), Antero Midstream Corp (AM), Aris Water Solutions, Inc (ARIS), CMS Energy Corporation (CMS), CenterPoint Energy, Inc. J.P. Morgan Equity Research Ratings Distribution, as of October 01, 2022

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	50%	37%	13%
IB clients**	50%	46%	33%
JPMS Equity Research Coverage*	50%	38%	12%
IB clients**	70%	68%	50%

***Please note that the percentages might not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please

According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the “Important Disclosures” in this material. **Thailand**: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission, and its registered address is 3rd Floor, 20 North Sathorn Road, Silom, Bangrak, Bangkok 10500. **UK:** Unless specified to the contrary, research is distributed in the UK by J.P. Morgan Securities plc (“JPMS plc”) which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. JPMS plc is registered in England & Wales No. 2711006, Registered Office 25 Bank Street, London, E14 5JP. This material is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 (“the FPO”); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. Research issued by JPMS plc has been prepared in accordance with JPMS plc's policy for prevention and avoidance of conflicts of interest related to the production of Research which can be found at the following link: J.P. Morgan EMEA - Research Independence Policy. **U.S.**: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be data discrepancy in this material as a result of calculations, adjustments and/or translations to different languages, as applicable. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or

ETR – 3Q Beat Continues Strong EPS Trend; No Industrial Recession in Sight, Fundamentals Support LT Growth (see our note HERE)

ES – Reports 3Q22 results

EXC – Reports 3Q22 results

OGE – 3Q EPS Beat, 2022 guidance raised, strong load growth

SRE – Reports 3Q EPS beat; raises 2022 guidance, reaffirms 2023; Port Arthur FID announced for 1Q23

EXC – Chris Crane to step down at YE; Calvin Butler named CEO

CNP – Fire Marshal clears CNP from involvement in Evansville IN gas explosion

ES/MA – MA utilities push back against efforts by developers to reopen offshore wind PPAs

ERCOT – TRA approves rules that exempt smaller gas wells from weatherization requirements

ES reports 3Q22 results

- ES reported 3Q22 EPS of $1.01 vs Gugg/Cons of $1.04/1.03
- Reaffirmed 2022 guidance of $4.04 to $4.14 per share vs. Gugg/Cons of $4.10
- Issued ~950k shares in the 4 months through October via the ATM/DRIP
- Minimal updates on offshore wind sale process – reiterated potential for full or partial sale
- Slides provide details on up to $900mm of potential T&D opportunities in support of 6 DER clusters in MA, incremental to the ~$1.5bn of previously identified incremental spend
- Reiterated not material impact from CAMT under IRA
- OSW investment increased by $300mm between July and October
- No change to OSW fixed cost %, planned total spend, or schedules
- Slides HERE

EXC reports 3Q22 results

- EXC reported 3Q22 EPS of $0.75 vs. Gugg/Cons of $0.68/0.70
- Narrowed 2022 EPS guidance from $2.18-$2.32 to $2.21-2.29, vs. Gugg/Cons of $2.27/2.26
- Reaffirmed 6-8% growth rate off of 2021 midpoint
- Minimum tax (CAMT) impact remains $200mm
- Reaffirmed $1bn equity need through 2025
- TTM ROE improved to 9.3% as of 3Q22 vs. 8.8% in 2Q22
- Provides YoY growth drivers (slide 9) indicating 2022- 2024 growth below the midpoint of guidance range

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

- 2022-2023 YoY growth of ~5%, 2023-2024 growth of ~6%, 2024-2025 growth of ~8%
- Slides HERE

OGE 3Q EPS Beat, 2022 guidance raised, strong load growth

- OGE reported 3Q EPS of $1.31 including midstream earnings
- On a comparable basis OGE reported Utility and Other EPS of $1.23 vs. $1.21 consensus and our $1.24 EPS estimate.
- OG&E expects to earn $2.08 to $2.12 EPS for 2022 (up from $1.87 to $1.97), OGE Energy HoldCo expects a loss of $0.01 to $0.03.
- On a comparable basis OGE 2022 EPS guidance is $2.07 to $2.09 vs. our $1.99 estimate and $2.05 consensus (consensus may include partial year midstream earnings, i.e., not comparable).
- As of September 30, 2022, OGE Energy sold all 95.4 million Energy Transfer limited partner units
- Customer growth for 3Q was 1.2% (ahead of the 1% embedded in planning)
- System sales grew 7.1% in 3Q driven by residential and commercial sales (gross basis)

SRE reports 3Q EPS beat; raises 2022 guidance, reaffirms 2023; Port Arthur FID announced for 1Q23

- SRE reported 3Q22 EPS of $1.97 vs. $1.81 consensus and our $1.73 estimate
- Sempra is raising its full-year 2022 adjusted EPS guidance range to $8.70 to $9.00 vs. $8.66 consensus and our $8.70 estimate
- Sempra also is affirming its full-year 2023 EPS guidance range of $8.60 to $9.20 vs. a $9.02 consensus and our $9.08 estimate
- Cameron 4 FID reiterated (Summer 2023).
- Port Arthur Progress marks substantial completion of Phase 1 marketing, FID expected Q1-2023
- SRE noted Port Arthur Phase 2 is also under active marketing

EXC – Chris Crane to step down at YE; Calvin Butler named CEO

- "Chief Executive Officer Chris Crane has announced that he will retire from his position as CEO and as a director of the Exelon Board effective Friday, Dec. 30, 2022. The Exelon Board has elected Calvin G. Butler Jr., currently president and chief operating officer (COO), to the role of president and chief executive officer as of Dec. 31, 2022. Butler also will join Exelon's Board of Directors. The company recently promoted Butler and expanded his responsibilities as a step in the company's leadership succession plans. Crane accelerated his retirement plans to focus on his health after learning in recent days that he will require treatment for significant spinal and hip issues." - release
- More HERE

Guggenheim takeaway: *We caught up briefly with the company last night, and we expect Chris Crane will be leading the call today. This is fully health-related and nothing else - we wish Chris a speedy recovery.*

CNP – Fire Marshal clears CNP from involvement in Evansville IN gas explosion

- Indiana State Fire Marshal report indicated no wrongdoing on behalf of CNP Indiana gas.
- The report further supports the CNP internal findings, determining that an accident occurred inside the house and was independent of CenterPoint Energy's system.
- More here

Guggenheim takeaway: *FYI in case you missed it from yesterday.*

ES/MA – MA utilities push back against efforts by developers to reopen offshore wind PPAs

- "With this letter, the Companies also acknowledge the respective Motions submitted by Commonwealth Wind and Mayflower Wind seeking to pause the Department's deliberations in these dockets by one month, in an effort to pursue renegotiation of key terms of the PPAs. Such a pause is unnecessary, however, given that the Companies do not intend to renegotiate the PPAs. The projects subject to the PPAs were selected by the Companies, in consultation with the DOER, pursuant to a robust competitive solicitation

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

and thorough evaluation. Moreover, the Companies negotiated the PPAs in good faith and have supported approval of the PPAs with unchallenged substantial evidence in these proceedings. Accordingly, the Companies request that the Department approve the PPAs expeditiously" - letter

- More HERE

Guggenheim takeaway: *That the utilities would take a firm line on the potential renegotiation of the PPAs comes as little surprise, with the overall situation confirmation of our view, at the time of bidding, that certain parties may have been more aggressive than others. We continue to track this process for 1) readthrough to other northeast projects underway, and 2) cost escalation data points for the industry more broadly. Stay tuned for more on ES' call today.*

ERCOT – TRA approves rules that exempt smaller gas wells from weatherization requirements

- The rules will now apply to wells larger than 250 mcf/d, versus the initial 50 mcf/d threshold, following pushback from producers
- More HERE

Guggenheim takeaway: *Zero surprise as this has been something in the works for several months following the initial rules late last year. As a reminder we flagged the recent deliberations in our note HERE.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

GUGGENHEIM

Invite: 57th EEI Financial Conference

Dates
November 13 - 15, 2022

Location
The Diplomat Beach Resort
Hollywood, FL

Company Dinners (Hosted by Guggenheim)
Sunday, November 13, 2022

5:30 p.m. | Cocktail Reception with full Guggenheim Securities Team & corporate utility clients
Hyde Beach House — 4010 South Ocean Drive, Hollywood, FL 33019

6:30 p.m. | Dinner with **Duke Energy Corp (DUK)** CEO, CFO, and others
Terrazas at Hyde Hollywood — 4111 S Ocean Drive, Hollywood, FL 33019

Monday, November 14, 2022

6:30 p.m. | Dinner with **Entergy (ETR)** CEO, CFO, and others
ETARU — 111 S Surf Rd, Hallandale Beach, FL 33009

Guggenheim Hosted Utilities Investor Discussion Panel with Shar Pourreza and Trading/Sales
Tuesday, November 15, 2022

6:00 p.m. | *Billy's Stone Crab — 400 North Ocean Drive, Hollywood, FL 33019*

Company Meetings
More Utilities may be added and we will update schedule accordingly

Sunday, November 13th	
Time	*Co.*
9:00AM	SRE
10:00AM	WEC
11:00AM	LNT
12:00PM	POR
1:00PM	ED
2:00PM	ALE
3:00PM	CNP
4:00PM	AWK
5:00PM	AVA

Monday, November 14th

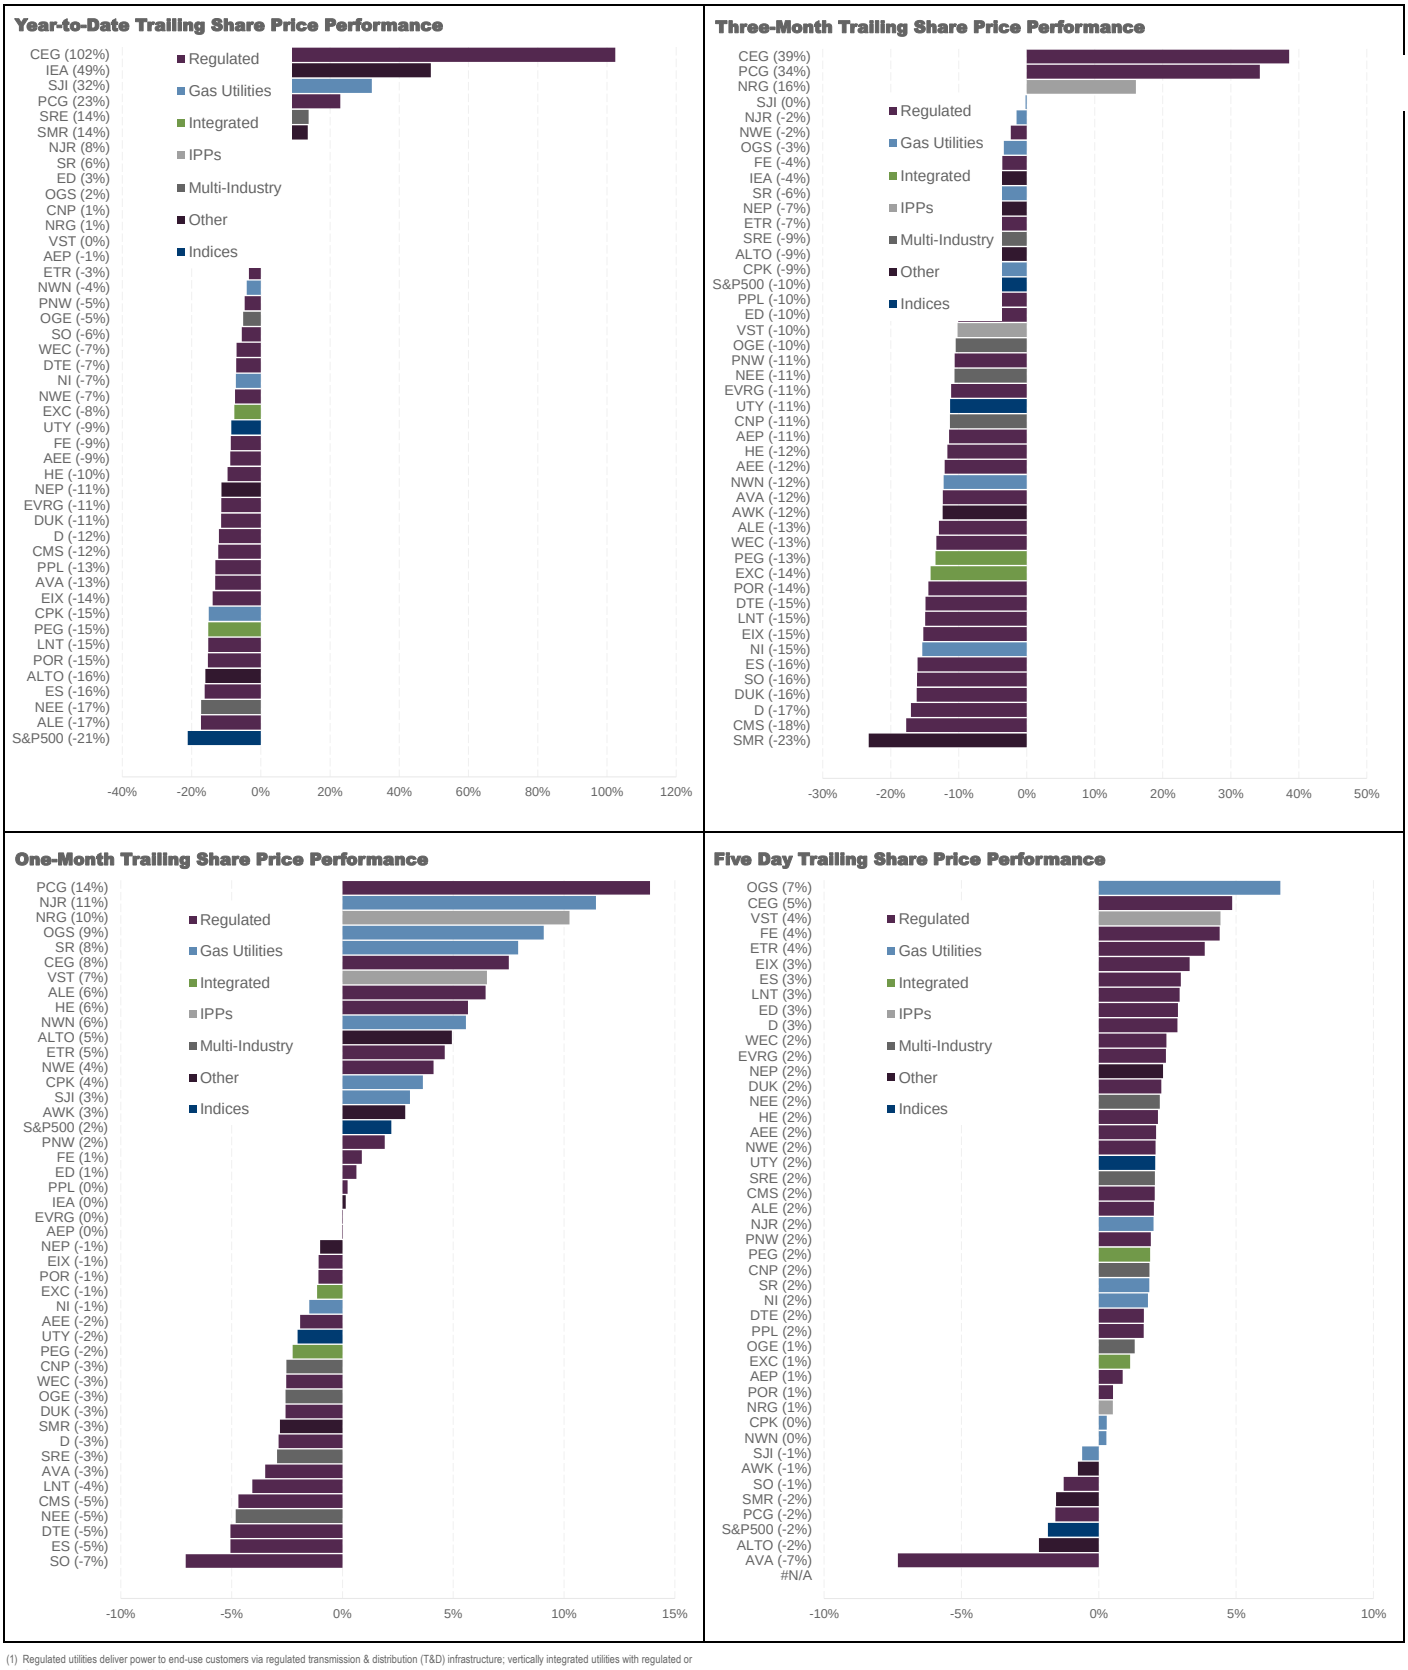
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

First Read

Exelon Corp

Solid Quarter, Another Leadership Change Announced

Q: How did the results compare vs expectations?

A: EXC reported operating Q3'22 EPS of $0.75 vs. UBS/Cons of $0.69/$0.70 and $0.53 for the comparable operations in Q3'21.

Q: What were the most noteworthy areas in the results?

A: Yesterday, after the close EXC announced the retirement of Chris Crane from his position as Chief Executive Officer and as a member of the Exelon Board, effective 12/30/2022, due to medical reasons. Calvin Butler will assume the role of President and CEO upon Mr. Crane's retirement, and he will also join Exelon's Board of Directors. In the quarter, positive drivers included a higher ROE at ComEd from the rise in treasury rates and higher rate base. At PECO, higher distribution rates and reduced storm costs were positives, partially offset by higher D&A. BGE and PHI also saw positive impacts from higher distribution rates. At corporate, higher interest costs were more than offset by the absence of BSC costs.

Q: Has the company's outlook/guidance changed?

A: EXC has narrowed 2022 adjusted EPS guidance to $2.21-$2.29 from $2.18-$2.32 vs. UBS/Cons of $2.21/$2.26. The company announced it will file its first multi-year rate plan at ComEd in January. The company reaffirmed 6-8% EPS growth from '21-'25, while noting that there is "year-over-year earnings variability from rate case timing". To that end, EXC did include a slide in the presentation that points to '23 yoy growth off the revised '22 guidance being below 6%, but then rising in '24 and '25. Additionally, the company reiterated the unmitigated cash impact from the CMT remains $200mm, but this can be absorbed on the balance sheet through the planning period. The company also stated it expects no incremental equity beyond the $1.0bn previously announced, of which $425mm remains to be issued.

Q: How would we expect investors to react?

A: Mixed. A lot of moving parts with surprise change in leadership announced, acknowledgement that '23 growth may be below the 6-8% LT target, but also affirmation that no new equity is needed. The conference call is at 10:00 AM EDT.

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) Clean Energy: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events. We maintain our price target of $44 premised on a 9% premium to the group multiple or 17.3x our $2.54/share earnings forecast for 2024. Our 9% net premium is derived from a 5% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bonds, a 5% premium for Clean Energy Transition attributes, a 5% discount for the regulatory ranking overall, and 4% premium for second quartile EPS growth. Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 03 November 2022 12:29 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2.**Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. Where an analyst of UBS Europe SE, France Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, France Branch. **Spain:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Spain Branch. Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch.**South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client's profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Distributed by UBS AG, Tokyo Branch to Professional Investors (except as otherwise permitted) in relation to foreign exchange and other banking businesses when relevant. **Australia:** Clients of UBS AG: Distributed by UBS AG (ABN 47 088 129 613 and holder of Australian Financial Services License No. 231087). Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. This material is intended for professional/institutional clients only and not for distribution to any retail clients. **Malaysia:**

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). Goldman Sachs & Co. LLC

Exelon Corp. (EXC, Neutral) reported 3Q22 operating EPS of $0.75, v/s GSe/FactSet consensus at $0.64/$0.70. EXC narrowed its 2022 EPS guidance range to $2.21-$2.29 ($2.25 mid-point) from $2.18-$2.32 ($2.25 mid-point), compared to GS/consensus of $2.16/$2.26. The company also reiterated its long-term EPS growth target of 6%-8%.

Highlights from EXC's release and results include:

- **In 3Q22, EXC beat at PECO, PHI and the Parent/Corp Segment and missed at ComEd - relative to our forecasts.** ComEd, EXC's largest segment, reported 3Q22 operating earnings of $0.30, below the GS estimate of $0.33 and compared to 3Q21 EPS of $0.23. Among the other subsidiaries, PECO reported $0.18 vs GS at $0.12, BGE at $0.07 vs GS at $0.04 and the PHI utilities at $0.29 vs GS at $0.26. Parent/Corp EPS of ($0.08) compared to our ($0.11) view.
- **EXC narrowed guidance for the year,** to $2.21-$2.29 from $2.18-$2.32 while maintaining the midpoint of $2.25 which compares to GSe/FactSet at $2.16/$2.26.
- **EXC expects to issue no incremental equity** over the $1bn previously announced and offered through a forward sale agreement earlier this year - while noting only $425mn of this remains to be issued through 2025

Topics to monitor on EXC's call include: (1) current inflationary environment and impact to customer bills, (2) sources of potential upside for capital spending longer term, (3) financing needs for 2023+, (4) updates in various rate case filings, especially the multi year plan filing coming in Illinois, and (5) O&M cost management.

We are Neutral rated on EXC with a $47, 12-month price target based on a 18x P/E multiple on our 2024 EPS. Key risks include utility regulation, cost management and financing.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Disclosure Appendix

Reg AC

We, Michael Lapides, Insoo Kim, CFA, John Miller, Shriya Dargan, Jaskaran Jaiya and Shuaib Joomun, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

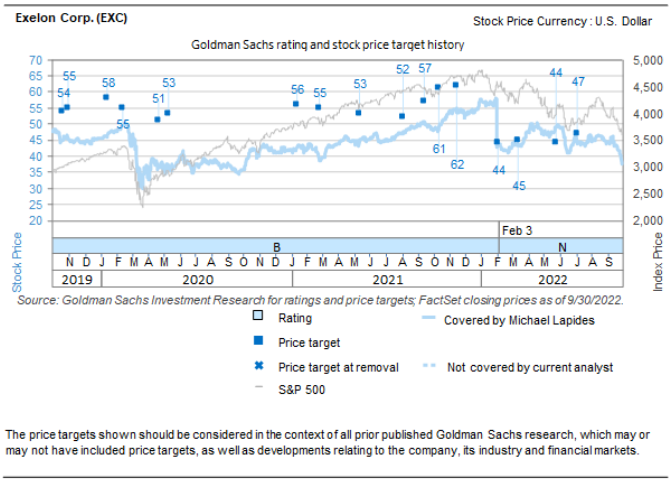
the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) have been suspended pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Deutsche Bundesbank and disseminates research in the Federal Republic of Germany and those jurisdictions within the European Economic Area where GSI is not authorised to disseminate research and additionally, GSBE, Copenhagen Branch filial af GSBE, Tyskland, supervised by the Danish Financial Authority disseminates research in the Kingdom of Denmark; GSBE - Sucursal en España (Madrid branch) subject (to a limited extent) to local supervision by the Bank of Spain disseminates research in the Kingdom of Spain; GSBE - Succursale Italia (Milan branch) to the relevant applicable extent, subject to local supervision by the Bank of Italy (Banca d'Italia) and the Italian Companies and Exchange Commission (Commissione Nazionale per le Società e la Borsa "Consob") disseminates research in Italy; GSBE - Succursale de Paris (Paris branch), supervised by the AMF and by the ACPR disseminates research in France; and GSBE - Sweden Bankfilial (Stockholm branch), to a limited extent, subject to local supervision by the Swedish Financial Supervisory Authority (Finansinpektionen) disseminates research in the Kingdom of Sweden.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

EQUITY RESEARCH QUICK TAKE

RBC Capital Markets, LLC
Shelby Tucker, CFA (Analyst)
(212) 428-6462, shelby.tucker@rbccm.com

November 3, 2022

Exelon Corporation

Reports solid 3Q22 results; reaffirms 6-8% EPS CAGR; CEO to step down by year end

NYSE: EXC | USD 38.04 | Sector Perform | Price Target USD 47.00

Sentiment: Neutral

Our view: We lean towards a mixed sentiment this morning. We like the quarterly performance guidance narrowing as well as improvement of consolidated ROE to 9.3% from 8.8% last quarter. However, interest expense pressure is clearly a drag to earnings growth. Growth in 2023-2024 may be bit muted as the presentation materials suggests, though we should see a step up in 2025. On the call, we expect topics to cover validation of EPS growth guidance, regulatory filings, inflation mitigation, ability to address interest recovery in future rate filings, and balance sheet management.

Exelon Corporation (EXC; Sector Perform; $38.04; PT $47) reported adjusted EPS of $0.75, tracking above consensus of $0.70 and our estimate of $0.72. EXC narrowed 2022 EPS guidance to $2.21-$2.29, from $2.18-$2.32 (midpoint unchanged). EXC reaffirmed its 6-8% EPS CAGR through 2025.

CEO Chris Crane to step down. Per the company's 8-K filing last night, EXC announced that Mr. Crane will retire from his current role as CEO effective 12/30/22. Calvin Butler, current President and Chief Operating Officer, will become CEO effective 12/31/22.

Regulatory calendar looks busy through mid-2023. Consistent with prior expectations, EXC announced the intent to file its first multi-year plan at ComEd. EXC plans to make the filing in January 2023. Through mid-2023, EXC expects to make a number of follow-up filings for its existing multi-year filings at BGE, PepCo DC and PepCo MD. In October, both PECO's gas rate settlement and DPL's gas rate case were approved with rates effective 1/1/23 and 11/1/22 respectively.

Financing expectations unchanged. EXC anticipates no incremental equity needs beyond the previously announced $1B through 2025. Post $575M equity offering in August, EXC plans to complete the remaining $425M issuance over 2023-2025.

Credit metrics and expectations on corporate minimum tax. EXC maintains FFO/Debt target of 13-14%, despite expectation of a 60-70 bp impact from corporate minimum tax in 2023-2025. For 2022-2024, EXC sees every $400M lower FFO or $3B higher debt to reduce FFO/Debt by ~1%. EXC expects effective tax rate of 15.1% in 2023, up from 13.6% in 2022.

Quarterly performance looks solid otherwise. This quarter's results included higher earnings at ComEd tied to higher treasury rates, better margins at PECO, BGE and PHI, partially offset by higher depreciation O&M costs.

A conference call has been scheduled for 10AM ET. Please dial in at 844-543-0451, pass code is 802164.

All values in USD unless otherwise noted. Priced as of prior trading day's market close, EST (unless otherwise noted).

RBC Capital Markets has provided Exelon Corporation with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Exelon Corporation with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Capital Markets

As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

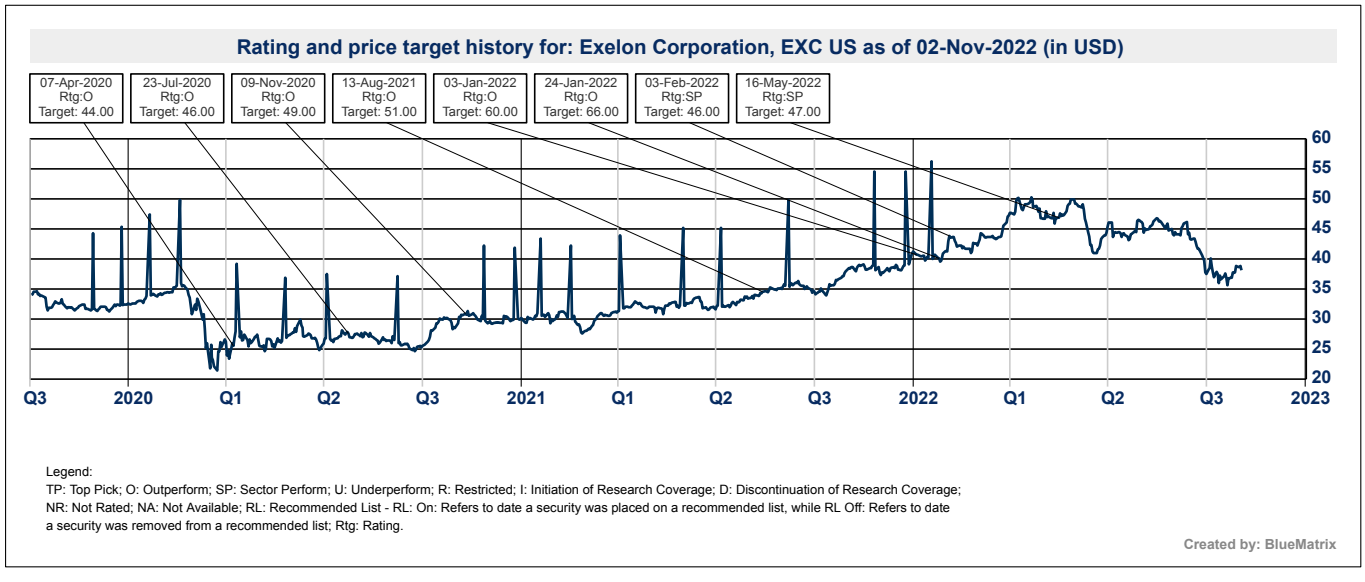
For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings

RBC Capital Markets, Equity Research

As of 30-Sep-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	844	57.18	260	30.81
HOLD [Sector Perform]	580	39.30	161	27.76
SELL [Underperform]	52	3.52	5	9.62



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Exelon Corporation

Valuation

Our $47 price target assumes a 19.3x P/E multiple on 2023E utilities EPS of $2.42. Our multiple reflects a slight 2.5% discount to our base case blended electric and gas multiple of 19.8x, resulting in equity value per share of $47. While we believe Exelon utilities have a similar profile to industry peers (6–8% EPS CAGR and 7–8% rate base CAGR), we give consideration for some regulatory overhang and lower ROE at ComEd currently. Our price target supports a Sector Perform rating.

Risks to rating and price target

- Deteriorating credit metrics at utilities limit capital investments and/or lead to equity dilution
- Dividend growth slows
- Approval of decoupling mechanisms for remaining utilities leads to improved earnings and cash flow stability
- Accelerated increase in treasury rates could support higher ROEs at ComEd in the near-term

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
