D, DUK — SC legislature introduces bill to tackle utility regulation in the state: SB 909 proposes increasing gas and nuclear generation in SC and slowing or limiting coal plant retirement to ensure reliability. The bill also proposes reducing the seven-member PSC down to five commissioners. The bill was referred to the Senate Judiciary Committee on the first day of the 2024 SC legislative session, which commenced on January 9, and is scheduled to adjourn on May 6. DUK filed its 2023 IRP in SC in August to incorporate the NC Carbon Plan, including exiting coal generation by 2035 and seeking to replace the coal facilities by extending the lives of DUK's 11 nuclear plants and the license of the Bad Creek hydro facility. DUK also proposed investments in new advanced nuclear technology, including small modular reactors.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

KBCM Research LLC ("KeyBanc Capital Markets Research"), an SEC registered investment advisor, is a wholly owned subsidiary of KeyBanc Capital Markets Inc. KeyBanc Capital Markets Research provides objective and sophisticated **Research Services**, primarily in the form of published Research Reports, to an institutional client base in exchange for a cash fee. KBCM Research does not provide particularized investment advice with regard to any specific institutional client, on the basis of specific sector or company requests from a client. Our advisory relationship with our clients is strictly limited to the provision of **Research Services**, which are not to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Additional information about KBCM Research LLC also is available on the SEC's Investment Adviser Public Disclosure (IAPD) website.

Feedback on Our AEP and EXC Rating Changes

We recently published two rating changes, AEP to Neutral from Buy (Country Roads, Don't Take Me Home) and EXC to Buy from Neutral (What's Wrong With Average). For AEP we are becoming more concerned with the company's ability to obtain balanced regulatory outcomes to achieve its plan to narrow the under-earnings by 50 bps over five years and downgraded to Neutral. Investors did not push back on the uncertainty of AEP's regulatory strategy but highlighted the company's 7% P/E discount and how it always hits its EPS guidance. For EXC, investors pushed back on the timing given the 4Q call is the "consensus-clearing event" with some concerns about the potential need for equity post-IL decision.

Company	Symbol	Price (1/11)	Rating	PT
American Electric Power Company	AEP	$80.40	Neutral	$83.00
Exelon Corporation	EXC	$36.21	Buy	$39.00

Source: Bloomberg and Mizuho Securities USA

AEP Feedback

1. Regulatory issues are nothing new for AEP - several investors noted that AEP has overcome challenging regulatory issues for quite some time and the decision in the WV fuel recovery proceeding doesn't have a major impact to AEP's balance sheet.

2. Compelling discount - even if you take into account the recent regulatory issues, several investors pointed to the 7% P/E discount and said it is all priced in. AEP's WV exposure (APCo and Wheeling) acounts for approximately 10% of the company.

3. They always hit numbers- one item that could not be debated was AEP's ability to hit its EPS guidance. Although bears may point to the quality of 2024 guidance that contains $0.12 of assets slated for divestiture, AEP has a track record of meeting hitting guidance. Only once since 2010 has AEP not delivered results that were *above* the midpoint of annual guidance.

EXC Feedback

1. Too soon - the biggest pushback we received on the EXC upgrade was from investors who believe the "clearing" event will be the 4Q call and felt they have time, particularly if you believe the EPS CAGR will be cut from 6-8% to 5-7%.

2. Equity overhang needs to clear up - although the IL decision cuts capex by ~ $1.0B a year, some investors believe the company's equity needs will increase. Our forecast does not show any need for incremental equity and view the IL decision as an earnings negative but a credit positive.

3. Damaged Illinois regulation will keep the P/E at a discount - our upgrade was based on a group average P/E since IL represents only ~25% of 2026 earnings and we believe a supportive PA + FERC jurisdiction contributes ~45% of earnings. Investors were pushing back on the SOTP approach to EXC's valuation and see it trading between a 5-10% P/E discount.

Note title feedback: For some reason we get a decent amount of emails with suggestions of titles we did not use. For our downgrade note on AEP titled Country Roads Don't Take Me Home, we got one notable suggestion: Mountain Mama Mia.

Investors should consider this report as only a single factor in making their investment decision.

Price Target Calculation and Key Risks

American Electric Power Company

Price Target Calculation: Our price target is derived as follows:

(1) Regulated Electric Distribution and Transmission: we derive a PT of $100.00, applying a 16.1x multiple, a 12.5% P/E premium to the electric utilities group, on our 2026E electric EPS estimate of $6.23.

(2) Adjusting for unallocated debt reduces the price by $17.00.

Consistent with our methodology our price targets are dynamic changing with the group average P/E multiples and EV/EBITDA multiples recalculated on a daily basis.

Key Risks: General economic conditions, changes in state and/or Federal regulation, environmental compliance, execution risk with new construction, weather, ongoing business operational risk, broader macroeconomic conditions, and interest rate movements were among the key risks to our prior rating and expected stock performance.

Exelon Corporation

Price Target Calculations: Using a sum of the parts analysis on 2026 results we derive a price target of $39.00 per share. Our price target is derived as follows:

(1) Regulated electric distribution and transmission: we derive a PT of $42.50, applying a 7% premium (15.4x) to the electric utility group average P/E multiple;

(2) Regulated Gas Distribution: we derive a PT of $6.50, applying a 7% P/E premium (14.7x) to the gas utility group average multiple;

(3) Adjusting for unallocated debt reduces the PT by $10.00.

Consistent with our methodology our price targets are dynamic changing with the group average P/E multiples and EV/EBITDA multiples recalculated on a daily basis.

Key Risks: Regulatory outcomes, general economic conditions, changes in state and/or Federal regulation, weather, ongoing business operational risk, broader macroeconomic conditions, and interest rate movements are among the key risks to our rating and expected stock performance.

IMPORTANT DISCLOSURES

The disclosures for the subject companies of this report as well as the disclosures for Mizuho Securities USA LLC entire coverage universe can be found at https://msusa.bluematrix.com/sellside/Disclosures.action or obtained by contacting EQSupervisoryAnalystUS@mizuhogroup.com or via postal mail at Equity Research Editorial Department, Mizuho Securities USA LLC, 1271 Avenue of the Americas, 2nd FL, New York NY, 10020.

Investment Risks and Valuation Methods can be located in the following section of this research report - Price Target Calculation and Key Risks.

Receipt of Compensation

Mizuho Securities USA LLC and or its affiliates has received compensation for investment banking services for American Electric Power Company in the past 12 months.

Mizuho Securities USA LLC and or its affiliates expects to receive or intends to seek compensation for investment banking services for American Electric Power Company in the next 3 months.

Mizuho Securities USA LLC and or its affiliates has managed or co-managed a public offering of securities for American Electric Power Company in the past 12 months.

Mizuho Securities USA LLC and or its affiliates have provided investment banking services for American Electric Power Company who is or was a client in the past 12 months.

The compensation of the research analyst writing this report, in whole or part, is based on MSUSA's annual revenue and earnings and is not directly related to any specific investment banking compensation. MSUSA's internal policies and procedures prohibit research analysts from receiving compensation from companies covered in the research reports.

Regulation Analyst Certification (AC)

I, Anthony Crowdell, hereby certify that the views expressed in this research report accurately reflect my personal views about any and all the subject companies. No part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

Rating Definitions

Mizuho Securities USA investment ratings are based on the following definitions: Anticipated share price change is based on a 12-month time frame. Return expectation is based on the stock’s total return. For disclosure purposes (for purposes of the FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Buy, Neutral, and Underperform.

Buy: Stock's total return is expected to appreciate above the average total return of the analyst's industry coverage universe, on a risk-adjusted basis, over the next 12 months.

Neutral: Stock's total return is expected to be within the average total return of the analyst's industry coverage universe, on a risk-adjusted basis, over the next 12 months.

Underperform: Stock's total return is expected to depreciate below the average total return of the analyst's industry coverage universe, on a risk-adjusted basis, over the next 12 months.

RS: Rating Suspended - rating and price objective temporarily suspended.

NR: No Rating - not covered, and therefore not assigned a rating.

Rating Distribution

(As of January 11)	% of coverage	IB service past 12 mo
Buy (Buy)	59.65%	56.13%
Hold (Neutral)	37.92%	53.80%
Sell (Underperform)	2.44%	27.27%

For disclosure purposes only (NYSE and FINRA ratings distribution requirements), our Buy, Neutral and Underperform ratings are displayed as Buy, Hold and Sell, respectively.

CMS – CMS electric rate case exceptions to PFD filed

NWE – NorthWestern's South Dakota rate case settlement approved

SRE – ALJ proposed decision approves interim rates on certain wildfire spend in the 2024 General Rate Case for SCG and SDG&E

AEP – Clarifies 4Q23 charge relating to WV PSC order disallowing $232m of under-recovered fuel costs

EXC/IL – ICC denies several rehearing items, partially grants some

PCG – PG&E files addendum to the wildfire certification application with OEIS

CNP – CNP files a $500M equity distribution agreement

ES – PURA adopts 30 min response standard to wire incidents; imposes modest fine for reporting issue

PJM – RTO finalizes Wagner retirement RMR

ERCOT – ERCOT issues cold weather watch for 1/15-1/17

CMS – CMS electric rate case exceptions to PFD filed

- Intervenors filed exceptions to the proposal for decision in the CMS electric rate case including Staff.
- The replies from stakeholders argue for certain revisions to the PFD to reflect individual positions, overall more constructive than the PFD.
- The range of outcomes currently contemplated includes a company supported $169M revenue increase (vs. $216M original ask), $105M revenue increase recommended by staff and $86M recommended by the PFD.
- Notably Staff rec is premised on a 99%+ approval of capex / rate base request ($13.76B request vs. $13.73B for Staff)
- Staff was supportive of the infrastructure recovery mechanism.
- PFD was premised on a 9.8% ROE (similar to prior cases) vs the current approved ROE of 9.9%.
- Docket: U-21389

Guggenheim takeaway: *While the staff rec is around 60% of the request, the differences are largely explained by cost of capital and non-earnings impacting items like O&M, timing of capex (i.e. if capex is in service ahead of staff schedule, CMS still earns AFUDC). Mgmt. has been optimistic around the IRM and undergrounding as new constructs that the MPSC can get excited about, and overall sees the briefs as workable for a litigated outcome. We are monitoring cost of capital as staff recommendations have started to recognize a tighter capital markets environment, and staff testimony in particular had stretched assumptions relative to the near term bond indices.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 13-Feb-2024 06:21 PM.

NWE – NorthWestern's South Dakota rate case settlement approved

- Yesterday, the South Dakota PUC posted an order approving NWE's settlement with Staff.
- The settlement's $21.5m revenue deficiency has now been authorized as a rate increase in the state.
- Recall that the company had filed for a ~$31m rate increase, based on a 7.54% return on rate base, which included a 10.7% ROE and 50.5% equity layer.
- The ROE and equity layer from the utility's last SD rate case in 2015 were part of a black box settlement, but the rate of return was disclosed as 7.24%.
- Docket EL23-016

Guggenheim takeaway: *While not unexpected because settlements have generally been the way in which SD rate cases have been resolved over the years, we still view this development as constructive even though specific cost of capital details are unavailable, due to it being a black box settlement.*

SRE – ALJ proposed decision approves interim rates on certain wildfire spend in the 2024 General Rate Case for SCG and SDG&E

- CPUC ALJ issued a proposed decision approving interim rate relief for SRE in the 2024 General Rate Case.
- This decision authorizes SDG&E to recover $289.9 million of the potentially under collected WMPMA balance in rates during 2024 and 2025.
- SDGE and SCG along with several intervenors previously filed the partial settlement agreements on specific issues within the 2024 GRC.
- The settled issues are generally close to SDGE/SCG requests.
- CPUC previously adjusted the filing schedules, moving other procedural items further by around 2 weeks, but the target PD date remains in 2Q24.
- Dockets: A2205015 / A2205016

Guggenheim takeaway: *FYI. The interim rates demonstrate the flexibility in CPUC approach to the GRC process and demonstrates the ability to get constructive outcomes. The settlements are very piecemeal in addressing the rate cases holistically, but individual issue settlement is a constructive step to simplify the litigation going further (resolve around 30% of the GRC spending issues). While certain settlements are not unanimous they present a good foundation for resolution and SRE mgmt. has previously commented on the willingness to negotiate partially settled issues. As a reminder, SDG&E is seeking an increase in rates of $286 million for the 2024 test year and also seeking incremental, post-test year combined electric and gas rate increases of $363.2 million in 2025, $338.1 million in 2026 and $306.9 million in 2027; and SoCalGas is seeking a $767 million increase in gas rates for the 2024 test year and also seeking incremental, post-test year gas rate increases of $292 million in 2025, $267 million in 2026 and $413 million in 2027.*

AEP – Clarifies 4Q23 charge relating to WV PSC order disallowing $232m of under-recovered fuel costs

- As a result of the WVPSC's final order, AEP anticipates recording a pretax, non-cash disallowance of approximately $222 million (approximately $127 million attributable to APCo and approximately $95 million attributable to WPCo) in the fourth quarter of 2023.
- The West Virginia PSC issued an order disallowing ~$232m of the total of $553m of under-recovered costs which APCo and Wheeling had sought to recover.
- The allowed costs of ~$321m will be recovered over 10 years with a 4% carrying charge, vs AEP's prior assumption of recovery of the full $553m over 20 years (via securitization).
- Recall that the utilities had filed a settlement at the end of December which had also proposed recovering the full under-recovery via securitization (along with plant costs and other items).
- Docket 23-0377-E-ENEC

Guggenheim takeaway: *We previously caught up with the company after the order was issued, and in light of today's announcement, still do not expect AEP's cash flows to be* ***materially impacted*** *over its five-year planning horizon. As a reminder, while Moody's includes securitization debt as part of total debt, it is our understanding that S&P would not necessarily treat it the same way, leading to a ~15bps-20bps FFO/debt impact in 2025 on credit metrics which would have otherwise excluded that securitized debt from its calculations, and to account for additional financing costs. While there are certainly many*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 13-Feb-2024 06:21 PM.

moving parts and considerations which remain to be ironed out, ***in our view, the most material factor here is once again the company's credibility around guiding to and achieving successful regulatory outcomes on a consistent basis.***

EXC/IL – ICC denies several rehearing items, partially grants some

- In a hearing yesterday the ICC agreed to revisit the revenue requirement for 2024-2027 (awaiting written order), alongside a denial of the request on ROE, equity layer, and the pension asset
- Earlier ALJ memo HERE
- Docket HERE

Guggenheim takeaway: *Heads up on the rehearing puts and takes, with a written rehearing order still pending for more specificity on the potential revenue requirement tweaks. While this is a modest potential positive, the overall process for a protracted grid plan approval appears intact.*

PCG – PG&E files addendum to the wildfire certification application with OEIS

- PG&E filed an addendum to the wildfire certification application with the OEIS.
- The addendum notifies the OEIS that all statutory requirements have been met for certification including the final approval of the WMP.

Guggenheim takeaway:*FYI. As anticipated, PG&E is moving towards completion of the annual wildfire certification after addressing the WMP requirements.*

CNP – CNP files a $500M equity distribution agreement

- CNP announced a $500M equity distribution agreement which supports the previously announced intention to run on a $250M AT program.
- The agreement provides flexibility for forward sales agreements for the issuance.

Guggenheim takeaway:*FYI. This is in line with CNP's prior intentions for an ATM equity support plan, which was engaged after capex increases in lieu of LDC sales. The ATM / forward sale concept is more modular and flexible for near term equity needs, and remains an efficient instrument for mgmt. Mgmt. previously re-committed to optimize the funding costs which includes both equity instruments and noncore asset sales*

ES – PURA adopts 30 min response standard to wire incidents; imposes modest fine for reporting issue

- The tighter timelines were imposed after a blue-sky wires incident with a vehicle had an hourlong response time
- *"In the August 9, 2023 Decision in Docket No. 23-01-39, that Authority found that Eversource's delayed response to the Accident was due to imprudent actions taken by the Company. In addition, the Authority found that Eversource's reporting of the Accident was deficient and may have violated applicable statutes and regulations. To address these deficiencies, the Authority: Directed Eversource to reduce its Priority 1 call response target from 60 minutes to 30 minutes; Directed the Company to review and revise its accident response procedures to ensure compliance with the accident reporting requirements; and Ordered additional reporting requirements to ensure that PURA is fully informed of all accidents in Eversource's territory." - PURA*
- More HERE

Guggenheim takeaway: *Another PURA data point for your awareness - this is the same issue we had previously flagged as it drew the ire of the line workers' union in public commentary criticizing the response time as onerous and unsafe.*

PJM – RTO finalizes Wagner retirement RMR

- "After conducting its standard generator deactivation studies, PJM's Jan. 4 response (PDF) informed Talen [OTCMKTS: TLNE] that the deactivation of units 3 and 4 would adversely affect the reliability of the system absent transmission upgrades. These required upgrades were part of the solution identified to address reliability violations following the announced retirement (PDF) of the adjacent 1,295 MW Brandon Shores facility, also owned by Talen and also requested to deactivate on June 1, 2025." - PJM
- More HERE

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 13-Feb-2024 06:21 PM.

Guggenheim takeaway: *This is a formalization of the process we have covered for some time – as a reminder the related Brandon Shores retirement was also a key driver of the ongoing mitigating transmission work needed in EXC' BGE territory – see our note HERE for more.*

ERCOT – ERCOT issues cold weather watch for 1/15-1/17

- "ERCOT has issued a Weather Watch from January 15-17 due to forecasted extreme cold weather across the ERCOT region, higher electrical demand, and the potential for lower reserves. Grid conditions are expected to be normal during an ERCOT Weather Watch. ERCOT continues to monitor conditions closely and will deploy all available tools to manage the grid, continuing a reliability-first approach to operations. In 2023, January peak demand was 65,632 MW, with the current all-time peak demand record of 85,508 MW, set on August 10, 2023." - ERCOT
- More HERE

Guggenheim takeaway: *Minor FYI.*

Guggenheim Hosted Commissioner Roundtable Event

Please join Guggenheim Research Analyst Shar Pourreza for a roundtable discussion with utility commissioners on key regulatory trends, among other topics.

Date & Time

Thursday, January 18, 2024
8:00AM – 9:30AM

Location

Guggenheim Office
330 Madison Ave
New York

Commissioner Participants

**More Commissioners expected to be added for a total of 4 or more*
Commissioner Kim David, *Oklahoma Corporation Commission*
Chairman Erik Helland, *Iowa Utilities Board*

Participating Analyst

Shar Pourreza, *Senior Managing Director, Equity Research Analyst – Power & Utilities*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 13-Feb-2024 06:21 PM.

Equity Research | Corporate Access

Duke Energy Corporation (DUK)

Lynn Good, *Chair, President & Chief Executive Officer*
Abby Motsinger, *Vice President, Investor Relations*

Dates & Locations
February 13-14, 2024
Boston

Meeting Format
NDR - 1:1 Meetings & Group Meeting

Company Information
Market Cap: $76.5bn
DUK Energy Corporate (DUK) engages in the distribution of natural gas and energy related services. It operates through the following segments: Electric Utilities and Infrastructure, Gas Utilities and Infrastructure, and Other. The Electric Utilities and Infrastructure segment conducts operations in regulated electric utilities in the Carolinas, Florida and the Midwest. The Gas Utilities and Infrastructure segment focuses on Piedmont, natural gas local distribution companies in Ohio and Kentucky, and natural gas storage and midstream pipeline investments. The Other segment includes interest expense on holding company debt, unallocated corporate costs, and Bison which is a wholly owned captive insurance company. The company was founded on April 30, 1904 and is headquartered in Charlotte, NC. (Source: FactSet)

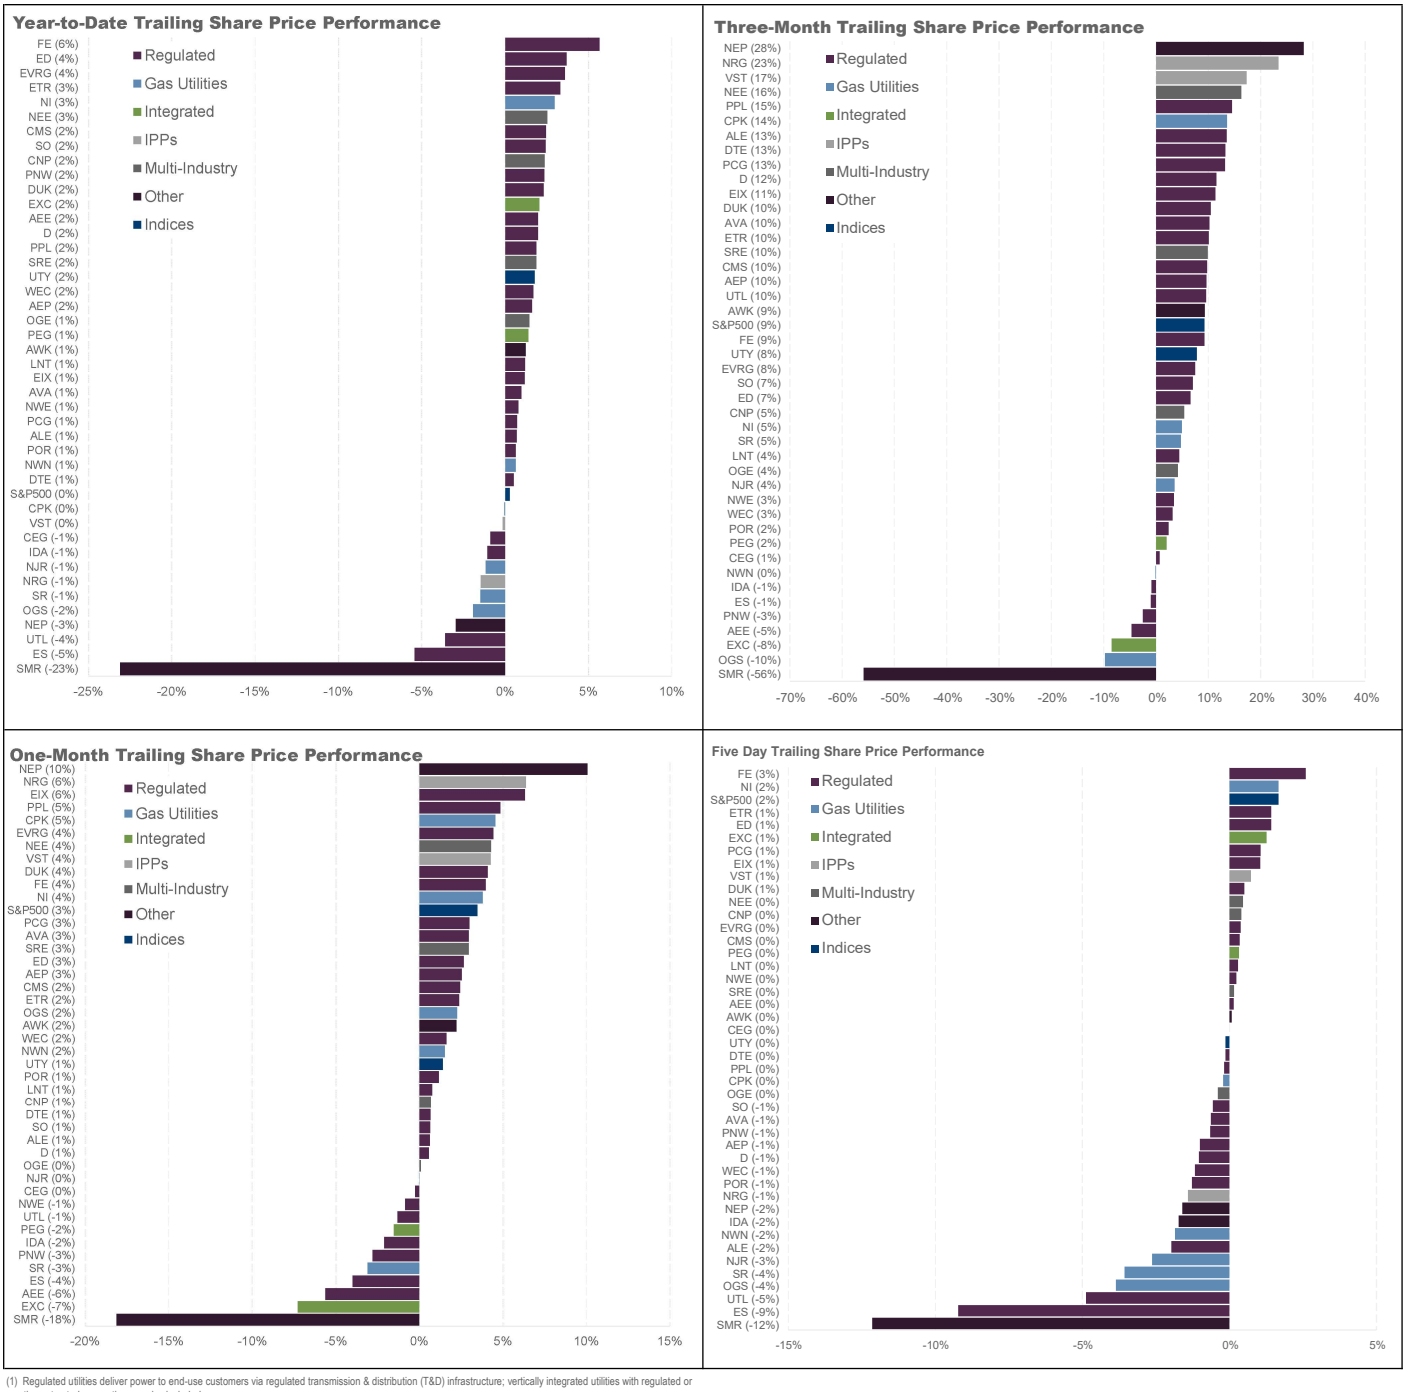
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. This research was prepared by personnel who are associated with both Guggenheim Securities, LLC (a FINRA-registered broker-dealer, “Guggenheim Securities”) and Guggenheim Securities Research Services, LLC (an investment adviser, “GSRS,” and together with Guggenheim Securities, “Guggenheim”). If you are paying separately for this research, it is being provided to you by GSRS. Otherwise, it is being provided by Guggenheim Securities. Guggenheim does not create tailored or personalized research and all research provided by Guggenheim is impersonal advice. Other than disclosures relating to Guggenheim and our affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Guggenheim Securities' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to Guggenheim Securities' clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim and certain of our affiliates conduct an

investment management business, trade for their own accounts, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim research and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them will fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as “relevant persons”). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person, or otherwise in a territory where it is not intended to, or may not, be distributed, should not act or rely on this document or any of its contents.

GUGGENHEIM

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 13-Feb-2024 06:21 PM.

Q. SDR-ROR-11 If applicable, please supply a listing of all common equity infusions from the parent to the Company over the past five years. In each case, identity date and dollar amount.

A. SDR-ROR-11 The following equity infusions were made from the parent to the Company over the last five years (12 months ending December 31):

2019 - $174 Million
2020 - $231 Million
2021 - $395 Million
2022 - $227 Million
2023 - $330 Million

Q. SDR-ROR-12 If applicable, please identify the Company's common dividend payments to its parent for each of the last five years.

A. SDR-ROR-12 PECO's dividends on common stock paid to its parent for the last five years are as follows:

2019 - $359,000,000
2020 - $340,000,000
2021 - $340,000,000
2022 - $398,400,000
2023 - $404,800,000

Q. SDR-ROR-13 Please provide the latest year-by-year financial projections for the Company for the next five years. Also, please indicate the date these projections were prepared; whether approved by management; and whether the projections have been submitted to bond rating agencies.

A. SDR-ROR-13 Refer to Attachment SDR-ROR-13(a.1) and Confidential Attachment SDR-ROR-13(a.2) for the 2024-2028 projections that the Company prepared in January 2024, which were approved by management. This information has not been provided to bond rating agencies.

ATTACHMENT SDR-ROR-13(a.2) IS CONFIDENTIAL AND IS SUBMITTED ONLY IN THE NON-PUBLIC VERSION TO THE COMMISSION.

PECO Gas
Statement of Income - 12 Months ending December 31
($ in Thousands)

		Year 2024	Year 2025	Year 2026	Year 2027	Year 2028
1	**Total Operating Revenues**	**$706,767**	**$759,445**			
2	**Total Operating Expenses:**					
3	Operation & Maintenance Expenses	$394,977	$437,992			
4	Depreciation & Amortization Expense	98,197	110,707

Q. SDR-ROR-14 Please provide the Company's five-year construction budget.

A. SDR-ROR-14 See Attachment SDR-ROR-14(a) for the Company's construction budget through the fully projected future test year.

See Confidential Attachment SDR-ROR-14(a) for the Company's construction budget for years 2026-2028.

THE CONFIDENTIAL ATTACHMENT IS SUBMITTED ONLY IN THE NON-PUBLIC VERSION FILED WITH THE COMMISSION.

Year	Capital Budget
2024	$399,700,469
2025	$385,763,011
2026	**CONFIDENTIAL**
2027	**CONFIDENTIAL**
2028	**CONFIDENTIAL**

The information for 2026- 2028 is CONFIDENTIAL AND IS SUBMITTED ONLY IN THE NON-PUBLIC VERSION FILED WITH THE COMMISSION.

Q. SDR-ROR-15 Please identify the Company's and, if applicable, its parent's, capital structure targets (percentages of capital types). Provide the complete basis for the capital structure targets.

A. SDR-ROR-15 The Company's long term capitalization target is 53% in order to support the Company's strong investment grade credit rating and ability to issue debt even during difficult capital market conditions.

Exelon Corporation's capital structure is not the basis for the Company's claim and is therefore not applicable.

Q. SDR-ROR-16 For each month, of the most recent 24 months, please supply the Company's

a) short-term debt balance;
b) short-term debt interest rate;
c) balance of construction work in progress; and
d) balance of construction work in progress which is eligible for AFUDC accrual.

A. SDR-ROR-16

a) Please refer to Attachment SDR-ROR-16(a)
b) Please refer to Attachment SDR-ROR-16(a)
c) Please refer to Attachment SDR-ROR-16(c)
d) Please refer to Attachment SDR-ROR-16(d)

Q. SDR-ROR-17 If applicable, please provide the currently authorized returns on equity for each of the parent's utility subsidiaries of the same industry type as the Company. In each case identify the approximate date when the current return on equity was approved by the state commission.

A. SDR-ROR-17 Please see Note 3 – Regulatory Matters of Exelon's recent 10-K filings posted to the SEC website for the requested information.

Q. SDR-ROR-18 Has the utility reacquired or repurchased any debt within the last five years? If so, provide a summary of each gain or loss on reacquired debt, the date on which the utility commenced amortization of such a gain or loss, the regulatory commission decision addressing the treatment of such gain or loss on reacquired debt, if any, on interest expense.

A. SDR-ROR-18 No, PECO has not reacquired or repurchased any debt within the last five years.

Q. SDR-ROR-19 Fully identify all debt (other than instruments in public markets) owed to all shareholders, corporate officers, or members of the board of directors, its affiliates, parent company, or subsidiaries.

A. SDR-ROR-19 PECO Energy Capital Corp (PECC), PECO Energy Capital Trust III (PECO Trust III), and PECO Energy Capital Trust IV (PECO Trust IV) are non-consolidated subsidiaries of PECO that have issued preferred securities and lent the proceeds to PECO.

As of December 31, 2023 PECO's long-term debt owed to affiliates consisted of the following:

Description	Interest Rate	Maturity Date	Debt Outstanding
PECO Energy Capital Corp loan to PECO	Variable	On Demand	$805,206
PECO Trust III Subordinated Debentures	7.380%	4/6/2028	80,520,619
PECO Trust IV Subordinated Debentures	5.750%	6/15/2033	103,092,784
		Total	$184,418,609

Q. SDR-ROR-20 Provide a summary statement of all stock dividends, splits, or par value changes during the two (2) year calendar period preceding the rate case filing.

A. SDR-ROR-20 During the calendar years 2022 and 2023, there were the following:

	Common Stock Dividends Declared ($ Millions)	Preferred Stock Dividends Declared ($ Millions)	Stock Splits	Par Value Changes
2022				
Exelon Corporation	$1,336	$0	None	None
PECO Energy Company	$398.4	$0	None	None
2023				
Exelon Corporation	$1,436	$0	None	None
PECO Energy Company	$404.8	$0	None	None

Q. SDR-ROR-21 If a claim of the filing utility is based on utilization of the capital structure or capital costs of the parent company and system--consolidated, the reasons for this claim must be fully stated and supported.

A. SDR-ROR-21 The Company has not proposed the use of the capital structure or capital costs of the parent company and system consolidated in this filing.

Q. SDR-ROR-22 To the extent not provided in SDR ROR-13, supply projected capital requirements and sources of the filing utility, its parent and system - consolidated - for the test year and each of three (3) comparable future years.

A. SDR-ROR-22 Refer to Attachment SDR-ROR-22(a.1) and Confidential Attachment SDR-ROR-22(a.2) for the Company's projected capital requirements and sources. Forward looking data for Parent and System consolidated is not applicable.

ATTACHMENT SDR-ROR-22(a.2) IS CONFIDENTIAL AND IS SUBMITTED ONLY IN THE NON-PUBLIC VERSION TO THE COMMISSION.

Q. SDR-RR-1 Please provide a copy of the Company's detailed quarterly balance sheet and monthly income statements for the historic test year through the most recent month available.

A. SDR-RR-1 Please see attachments:

- Attachment SDR-RR-1(a.1) (PECO Income Statements – 2023)
- Attachment SDR-RR-1(a.2) (PECO Balance Sheets – 2023)
- Attachment SDR-RR-1(a.3) (PECO Income Statements – 2022)
- Attachment SDR-RR-1(a.4) (PECO Balance Sheets – 2022)

Name of Respondent: PECO Energy Company	This report is: (1) ☑ An Original (2) ☐ A Resubmission	Date of Report: 03/31/2023	Year/Period of Report End of: 2023/ Q1

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)
Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
Use page 122 for important notes regarding the statement of income for any account thereof.
Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

Name of Respondent: PECO Energy Company	This report is: (1) ☑ An Original (2) ☐ A Resubmission	Date of Report: 06/30/2023	Year/Period of Report End of: 2023/ Q2

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)
Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
Use page 122 for important notes regarding the statement of income for any account thereof.
Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

Name of Respondent: PECO Energy Company	This report is: (1) ☑ An Original (2) ☐ A Resubmission	Date of Report: 09/30/2023	Year/Period of Report End of: 2023/ Q3

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)
Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
Use page 122 for important notes regarding the statement of income for any account thereof.
Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)
Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
Use page 122 for important notes regarding the statement of income for any account thereof.
Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

Name of Respondent: PECO Energy Company	This report is: (1) ☑ An Original (2) ☐ A Resubmission	Date of Report: 03/31/2022	Year/Period of Report End of: 2022/ Q1

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)
Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
Use page 122 for important notes regarding the statement of income for any account thereof.
Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

Name of Respondent: PECO Energy Company	This report is: (1) ☑ An Original (2) ☐ A Resubmission	Date of Report: 06/30/2022	Year/Period of Report End of: 2022/ Q2

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)
Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
Use page 122 for important notes regarding the statement of income for any account thereof.
Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

Name of Respondent: PECO Energy Company	This report is: (1) ☑ An Original (2) ☐ A Resubmission	Date of Report: 09/30/2022	Year/Period of Report End of: 2022/ Q3

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)
Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
Use page 122 for important notes regarding the statement of income for any account thereof.
Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

Name of Respondent: PECO Energy Company	This report is: (1) ☑ An Original (2) ☐ A Resubmission	Date of Report: 03/28/2023	Year/Period of Report End of: 2022/ Q4

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

Do not report fourth quarter data in columns (e) and (f)
Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.
Use page 122 for important notes regarding the statement of income for any account thereof.
Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.
If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.
Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

Q. SDR-RR-5 If past weather normalized sales or sales trends are used in models or otherwise relied on in reaching sales projections, please provide actual and normalized throughput by rate schedule as of December 31 for the last three years. Where applicable, separately identify sales and transportation throughput.

A. SDR-RR-5 For an explanation of the Company's sales forecasting model and variables related to weather, please see the Company's responses to SDR-RR-9 and SDR-RR-10.

For actual and weather normalized sales for the last three years, refer to the tables below.

Actual Usage by Rate Class (Mmcf) Year Ended December 31

	G	GH	TCS	GC	IS	L	Other	Trans	Total
2021	4,035	35,545	95	20,829	16	6	436	25,094	86,056
2022	4,525	37,611	65	22,897	17	14	486	25,011	90,626
2023	3,691	32,152	79	20,623	26	24	480	23,741	80,816

Weather Normalized Actual Usage by Rate Class (Mmcf) Year Ended December 31

	G	GH	TCS	GC	IS	L	Other	Trans	Total

Q. SDR-RR-6 *If past weather normalized sales or sales trends are used in models or otherwise relied on in reaching sales projections, please provide actual and normalized throughput by month by rate schedule from the beginning of the historic test year and the future test year through the most recent month available and update as additional data become available. Separately identify sales and transportation throughput and provide the workpapers, which develop normalized sales.

* Indicates a request for which updated data is explicitly requested as it become available.

A. SDR-RR-6 For an explanation of the Company's sales forecasting model and variables related to weather, refer to the Company's response to SDR-RR-9 and SDR-RR-10.

For actual and weather normalized sales for the historic test year, refer to Attachment SDR-RR-6(a) for the following rate classes:

G - Residential Domestic;
GH - Residential Heating;
TCS - Temperature Controlled Service;
GC - General Service - Commercial and Industrial;
IS - Interruptible Service;
L - Large High Load Factor Service;
Other - Motor Vehicle Service and Interdepartmental; and
Trans - Transportation.

Q. SDR-RR-7 Please provide the workpaper developing the Company's FTY load growth adjustment.

A. SDR-RR-7 The Company's sales forecast is based on budgeted sales for the fully projected future test year ending December 31, 2025, as adjusted by various annualization and normalization adjustments. The budget and adjustments thereto are described in PECO Statement No. 3, the Direct Testimony of Michael J. Trzaska, and documented in Exhibit MJT-1, Schedule D-5.

For a description of the Company's sales forecasting model, and its various inputs, refer to the responses to SDR-RR-5, 6, 10, and 11.

Q. SDR-RR-8 Please provide a complete copy of the computer output generated by the Company's statistical analysis package for all residential, commercial, public authority and industrial econometric models of gas demand estimated by the Company, but not presented in the filing.

* Indicates a request for which updated data is explicitly requested as it become available.

A. SDR-RR-8 Refer to Attachments SDR-RR-10(a.1), SDR-RR-10(a.2), SDR-RR-10(a.3), SDR-RR-10(a.4), SDR-RR-11(a.1), SDR-RR-11(a.2), SDR-RR-11(a.3) and SDR-RR-11(a.4).

Q. SDR-RR-9 Identify the historical data source(s) for each dependent and independent variable utilized to develop the econometric models of gas demands for each forecasted customer group.

A. SDR-RR-9 The dependent variable for Gas Residential (Res) and Gas Commercial (GC) Sales are Use Per Customer Per Day. The dependent variables for Temperature Control Systems (TCS) are Sales Per Day. The dependent variables for Large (L), Interruptible Service (IS), Other, Direct Pipeline Transportation (DPL) and Non-Direct Pipeline Transportation (Non-DPL) are Sales.

Use Per Customer is Sales divided by the average number of Customers. Both Sales and Customers are gathered from the Sales and Customers reports by month. The number of Customers requires additional forecasting before it is used in the class gas volume models.

Independent variables come in the following groups:

A. Weather –

a. Heating Degree Days Spline (HDD Spline). The HDD Spline variable is a composite of HDD variables with different temperature breakpoints. Multiple HDD breakpoints are used to model the rate or slope at which customers use natural gas changes with temperature. The HDD Spline combines the different HDD breakpoints into one variable to more effectively describe fluctuating weather's impact on gas usage. For the Company's Per Day models, HDD Spline is divided by number of billing days to produce an HDD Per Day variable. HDD Spline is also interacted with seasonal binaries to measure the relationship between weather and gas heating by season. The raw data collected to calculate the HDD Spline is provided by DTN, a weather service company. For the HDD Spline formula with the weights assigned to HDD breakpoints, see SDR-RR-10.

1. HDD Per Day = CycWthrT.HDDSpline/CycWthrT.BillDays
2. WinterHDD = Sum(Monthly.Dec, Monthly.Jan, Monthly.Feb, Monthly.Mar)*CycWthrT.HDD_PerDay
3. SpringHDD = (Monthly.Apr+Monthly.May)*CycWthrT.HDD_PerDay
4. FallHDD = (Monthly.Oct+Monthly.Nov)*CycWthrT.HDD_PerDay

b. THI Degree Days Spline (TDD Spline). TDD Spline is an independent variable included in the Transportation models and primarily captures increases in gas generation during summer months. The variable is composed of only one TDD base (i.e., 70). The calculation utilizes a Temperature Humidity Index (THI) that is a function of dry bulb temperature and humidity. PECO uses the same Temperature Humidly Index (THI) formula as PJM, where humidity becomes a factor when temperature rises above 58 degrees:

THI = DB - .55 x (1- Hum) x (DB - 58)
Where:
DB is dry bulb temperature
Hum is relative humidity

B. Economic – Economic data is sourced from IHS Markit which collects historical data from government sources and provides forecasts for international, U.S., state, and metropolitan areas. The Company uses five economic variables to support sales and customer forecasting. These variables are Total Non-farm Employment (EMP), Real Gross Metropolitan Product (GMP), Number of Households (HH), Real Personal Disposable Income (Income), and Consumer Price Index (CPI). This data is provided in a monthly format and directly used or transformed for the modeling and evaluation purposes. For further detail and the formulas used in the models, see SDR-RR-10.

C. Price – Price is incorporated within the Res and GC Gas models through variables that represent normal monthly natural gas bills. The tariff-level normal monthly bill variables are based on a

monthly moving average of the Purchased Gas Cost (PGC) rate deflated by Consumer Price Index and interacted with weather (HDD Spline). Historical PGC prices are provided by the Company's Rates Department. For further detail and the formulas used in the models, see SDR-RR-10.

D. Binaries – Some models contain a number of monthly binary variables. Binary variables are best described as variables that that take the value of 0 or 1 to indicate the absence or presence of some categorical effect that might be expected to shift the outcome. The Company's models contain two types of binary variables – monthly binary variables (Ex. January, February, March, etc.) to capture any non-weather-related load consumption changes and specific month and year binary variables (Ex. January 2015, October 2018, etc.) to correct for outliers in historical data.

Q. SDR-RR-10 Identify the source(s) and supporting documentation for the FTY value of each independent variable which required forecasting in the Company's gas demand models.

A. SDR-RR-10 There are four variable types that require additional forecasting before being used in the Company's gas volume models.

1. Customers - The Residential and GC Sales Volume forecasts are based on Use Per Customer (UPC) models, requiring customer forecasts as additional inputs. Customer forecast models utilize historical customer numbers through September 2023, gathered from Sales and Customers reports by month.

    a. The Residential customer forecast is derived from an Econometric model with monthly customers as the dependent variable. Number of Households (HH) and monthly binary variables are used as the independent variables.
    b. The GC customer forecast is derived from an Exponential Smoothing model with trend and seasonality.

Refer to Attachment SDR-RR-10(a.1) for Residential and GC customer forecasts and HH.

2. Weather - PECO uses 30 years of weather history from 1993 to 2022 to calculate the weather normals used for gas volume forecasts. The Heating Degree Day (HDD) Spline is calculated using HDDs of different breakpoints. The breakpoints are weighted according to their impact on gas volume change. An HDD_PerDay variable is also created for use with the Company's Sales or UPC Per Day models by dividing number of days from the monthly HDDSpline variable. The THI Degree Day (TDD) Spline is composed of only one breakpoint. The calculation utilizes a Temperature Humidity Index (THI) that is a function of dry bulb temperature and humidity. The TDD Spline captures increases in

gas generation of Transportation customers during summer months.

a. HDDSpline is described by the following equation, using historical weather actuals (HDD) for the model estimation period and weather normals (NHDD) for the forecast period. A fully weather normal version of the spline, NHDDSpline, is also calculated by the Company, using NHDD for both the estimation and forecast periods.

   HDDSpline = -0.08 * (CycWthr.HDD30, NCycWthr.NHDD30) +
   0.15 * (CycWthr.HDD50, NCycWthr.NHDD50) +
   0.27 * (CycWthr.HDD55, NCycWthr.NHDD55) +
   0.31 * (CycWthr.HDD60, NCycWthr.NHDD60) +
   0.35 * (CycWthr.HDD65, NCycWthr.NHDD65)

   HDD_PerDay = CycWthrT.HDDSpline/CycWthrT.BillDays

b. The TDDSpline is described by the following equation, using historical weather actuals (TDD) for the model estimation period and weather normals (NTDD) for the forecast period.

   TDD Spline = (CycWthr.TDD70, NCycWthr.NTDD70)

Refer to Attachment SDR-RR-10(a.2) for weather normals used in the Company's gas volume models.

3. Economics- Economic data is sourced from IHS Markit which collects historical data from government sources and provides forecasts for international, U.S., state, and metropolitan areas. The Company uses five economic variables to support gas volume and customer forecasting. These variables are Real Personal Disposable Income (RDInc), Total Non-farm Employment (EMP), Real Gross Metropolitan Product (GMP), Number of Households (HH) and Consumer Price Index (CPI). This data is provided in a monthly format and directly used or transformed for the modeling

and evaluation purposes. The August 2023 economic vintage was used for the Company's forecast.

a. RDInc_PerHH_NHDD is an independent variable used in the Residential model to forecast household income's impact on heating usage

   RDInc / HH * NHDD_PerDay

b. Econ_Index is an independent variable used in the GC usage per customer model to forecast economic related volume growth

   Econ Index = Emp_Index^0.5 * GMP_Index^0.5
   Emp_Index is EMP indexed to January 2012
   GMP_Index is GMP indexed to January 2012

c. A EMP is an independent variable used in the Transportation (Non-Direct Pipeline) model to forecast economic related volume growth

Refer to Attachment SDR-RR-10(a.3) for economic variables used in the Company's gas volume models.

4. Price – To model the price impact on demand, Residential and GC usage per customer models include normal monthly gas bill variables which are a product of HDD_PerDay and Purchased Gas Cost (PGC) deflated by CPI (Real_Rate). The PGC's commodity price is forecasted to grow at the annual growth rate of the Henry Hub Natural Gas Futures Price projected at the time of the forecast (sourced 9/30/2023 from https://www.cmegroup.com/markets/energy/natural-gas/natural gas.settlements.html). See Residential and GC normal bill formulas below:

   Residential =
   MA3_Real_Rate * (70.764 + 19.012*NCycWthrT.HDD_PerDay)/1000*30.41
   GC =
   MA3_Real_Rate * (541.947 + 96.095*NCycWthrT.HDD_PerDay)/1000* 30.41

Where:
Real_rate = PGC_Rate / CPI05
CPI05 is CPI indexed to January 2005
MA3_Real_rate is a 3 month moving average of a real rate

Refer to Attachment SDR-RR-10(a.4) for variables used to model gas price impact on demand.

Q. SDR-RR-11 Please provide in hard copy and on a computer diskette in Lotus 1-2-3, QuattroPro or other spreadsheet format, the dependent and independent variable databases relied upon to produce the Company's gas demand models. For variables based on averages, include the observations which comprise the average (e.g., gas prices).

A. SDR-RR-11 Refer to attachments:

1. Attachment SDR-RR-11(a.1) – January 2025 to December 2025 Gas Model Specs - This includes the individual class model variables, coefficients, standard error and t-statistics.

2. Attachment SDR-RR-11(a.2) – January 2025 to December 2025 Budget Data for Models - This includes the data for each variable for both the historical period and the estimation period that is used in each class model.

3. Attachment SDR-RR-11(a.3) – January 2025 to December 2025 Budget Gas Model Summary - This is the output from the model on a monthly basis for each class model.

4. Attachment SDR-RR-11(a.4) – January 2025 to December 2025 Budget PECO Gas Forecast - This is the final budget for January 2024 to December 2025

Q. SDR-RR-12 In the form identical to the previous question, please provide a database for all independent variables, which were analyzed by the Company, but exclude from the filed gas demand models.

A. SDR-RR-12 All independent variables that were analyzed by PECO Energy Company are included in the attachments provided in response to SDR-RR-11.

Q. SDR-RR-13 For each customer receiving service at less than the maximum applicable tariff rate, please provide:

a) actual consumption for the two most recent calendar years;
b) actual consumption for the HTY and the most recent twelve month period for which data is available;
c) the currently applicable rate;
d) an explanation for the rate discount.

A. SDR-RR-13

a) Please refer to Table 1-1 below.
b) Please refer to Table 1-1 below.
c) Please refer to Table 1-1 below.
d) For the customers listed below, the rates were discounted due to the possibility of bypass or an ability to use an alternative fuel or both.

Customer	2022 Annual Consumption (MCF)	2023 Annual Consumption (MCF)	Current Rate	Rate per MCF
001	599,341	633,568	TSI	$0.320
002	4,450,748	4,266,711	TSI	$0.060
003	2,895,272	2,688,239	TSF	$0.370
004	246,369	412,933	TSI	$0.852
005	147,526	119,969	TSI	Jan23-Mar23 $0.08 Apr23-Dec23 $0.8522

Q. SDR-RR-14 Provide a copy of the Company's detailed capital budgets for the preceding and current calendar years which underlie the projected test year capital additions in this case.

A. SDR-RR-14 Please see Attachment SDR-RR-14(a).

	2023 Actual	2024 Budget	2025 Budget
New Business Connections	$ 56,497,148	$57,184,367	$47,736,051
System Performance	$ 210,737,369	$271,697,287	$288,041,230
Corrective Maintenance	$ 6,114,747	$7,469,685	$8,154,147
Capacity Expansion	$ 3,280,006	$17,243,150	$4,806,555
Facility Relocation	$ 17,574,581	$12,636,838	$11,415,705
Back Office Allocation	$ 6,469,046	$13,182,991	$6,316,598
Common IT Projects	$ 23,717,512	$13,925,690	$12,664,099
All Other Project Types	$ 9,627,616	$6,360,461	$6,628,626
Total	$ 334,018,026	$399,700,469	$385,763,011

Q. SDR-RR-15 Please provide a variance or other similar report comparing actual and budgeted construction expenditures at the conclusion of each budget period for the past three years and as of the most recent data available.

A. SDR-RR-15 See Attachment SDR-RR-15(a).

	Plan	Actual	Variance (Over) / Under Budget
2021	$334,994,503	$358,520,929	($23,526,426)
2022	$316,948,779	$342,999,614	($26,050,835)
2023	$319,529,572	$334,018,026	($14,488,454)

Q. SDR-RR-16 Please provide a breakdown of other gas revenue for the three preceding calendar years.

A. SDR-RR-16

	2021	2022	2023
Capacity Release Revenue	$ 1,369,574	-	
Other Revenue from Affiliates	74,843	140,456	142,059
Gas Training Expense	-	342,717	783,538
Miscellaneous	22,741	1,790	1,500
Other Gas Revenues	**$ 1,467,158**	**$ 484,963**	**$ 927,097**

Q. SDR-RR-17 For those items for which data is available, please provide the following actual monthly balance by account for the historic and future test periods to present:

a) depreciable utility plant in service
b) non-depreciable utility plant in service
c) construction work in progress
d) accumulated deferred income tax
e) materials and supplies
f) customer advances for construction
g) contributions in aid of construction
h) accumulated depreciation
i) prepayments by type
j) customer deposits
k) injury and damages reserve

A. SDR-RR-17 Refer to Attachment SDR-RR-17 for a summary of the items listed above. See the following attachments for:

Attachment SDR-RR-17(a) for item a) depreciable utility plant in service;
Attachment SDR-RR-17(b) for item b) non-depreciable utility plant in service;
Attachment SDR-RR-17(d) for item d) accumulated deferred income tax;
Attachment SDR-RR-17(h) for item h) accumulated depreciation.

PECO Energy Company

NOTE: All items are in Total (Gas and Electric) except as noted.

Refer to Attachment SDR-RR-17(a.1) for a summary of the items listed above and Attachments SDR-RR-17(a.2) through Attachment SDR-RR-17(h) for applicable details

(a.2) - Refer to Attachment SDR-RR-17(a.2) for depreciable utility plant in service for the historical test year, future test year and fully projected future test year.
(b) - Refer to Attachment SDR-RR-17(b) for nondepreciable utility plant in service for the historical test year, future test year and fully projected future test year
(d) - Refer to Attachment SDR-RR-17(d) for accumulated deferred income taxes for the historical test year, future test year and fully projected future test year
(e) - For Materials and Supplies refer to Exhibit MJT-1, Schedule C-11 for the fully projected future test year, Exhibit MJT-2, Schedule C-11 for the future test year and Exhibit MJT-3, Schedule C-11 for the historical test year.
(f) - For Customer advances for construction refer to Exhibit MJT-1, Schedule C-9 for the fully projected future test year, Exhibit MJT-2, Schedule C-9 for the future test year and Exhibit MJT-3, Schedule C-9 for the historical test year.
(g) - PECO does not maintain contributions in aid of construction monthly balances by account.
(h) - Refer to Attachment SDR-RR-17(h) for accumulated depreciation for the historical test year, future test year and fully projected future test year.
(i) - For Prepayments refer to Exhibit MJT-1, Schedule C-4 for the fully projected future test year, Exhibit MJT-2, Schedule C-4 for the future test year and Exhibit MJT-3, Schedule C-4 for the historical test year.
(j) - For Customer deposits refer to Exhibit MJT-1, Schedule C-7 for the fully projected future test year, Exhibit MJT-2, Schedule C-7 for the future test year and Exhibit MJT-3, Schedule C-7 for the historical test year.

Q. SDR-RR-18 Please provide a copy of all workpapers supporting the Company's lead/lag study.

A. SDR-RR-18 Refer to Exhibit MJT-1, Schedule C-4, for the fully projected future test year, Exhibit MJT-2, Schedule C-4, for the future test year and Exhibit MJT-3, Schedule C-4 for the historic test year.

Q. SDR-RR-19 Please provide the payroll distribution showing the percentage of wages charged to O&M and other categories for each of the preceding three calendar years and the most recent annual period available.

A. SDR-RR-19 Please refer to Attachment SDR-RR-19(a).

PECO Energy Company

Balance at end of year	$ 97,657	$ 89,734	$ 89,229
Percentage charged to Operation and Maintenance Expense	**54.03%**	**57.97%**	**57.72%**

Q. SDR-RR-20 Please state whether the future test year budgeted labor includes any increases or decreases in the number of employees during the future test year. If increases have been budgeted, please state whether the future test year includes budgeted positions which have not been filled.

A. SDR-RR-20 The future test year includes an increase of 5 employees with an additional increase of 4 employees during the fully projected future test year. These increases are allocated to Gas field and support positions. The future test year and fully projected future test year includes these unfilled positions in the budget. The positions will be filled during the future test year and the fully projected future test year.

Q. SDR-RR-21 Please explain how the Company has treated routine or normal position vacancies which occur as a result of terminations or retirements in its budgeted labor projections.

A. SDR-RR-21 The Company includes a labor reduction or "vacancy rate" in its staffing plan to account for estimated vacancies (e.g., retirements, resignations, transfers, layoffs, etc.) throughout the year based on historical trends and current staffing plans. This vacancy rate equates to approximately 2% of the overall approved staffing complement per the Company's staffing plans. The vacancy rate is utilized by applying it to the overall staffing complement and then deducting the resulting product to produce the Company's budgeted labor projections. The Company's budgeted labor projections are used as the basis for its future test year and fully projected future test year employee expense claims.

Q. SDR-RR-22 Please provide the most recent insurance premiums for each type of insurance coverage (i.e., employee benefit and those purchased by the Company) reflected in the Company's filing. If available, please provide estimated premiums for the subsequent calendar year.

A. SDR-RR-22 Refer to Attachment SDR-RR-22(a) for 2023 Company-paid premium amounts, and 2024 estimated Company-paid premium amounts, for medical, dental, vision and hearing, life insurance, accidental death and dismemberment and long-term disability benefits.

Q. SDR-RR-23 Please provide a copy of the Company's two most recent FERC Form 2.

A. SDR-RR-23 Not applicable. The Company is not subject to the FERC Form 2 filing requirements.

Q. SDR-RR-24 Please provide a description of each employee benefit program or plan.

A. SDR-RR-24 Please refer to the Confidential Attachments listed below:

Confidential Attachment SDR-RR-24(a.1) SPD - Medical & EAP All Employees
Confidential Attachment SDR-RR-24(a.2) Side by Side Benefits Descriptions
Confidential Attachment SDR-RR-24(a.3) Plan Overview for All Employees

The document Confidential Attachment SDR-RR-24(a.1) SPD – Medical & EAP All Employees, while dated February 1, 2022, does contain the current information for 2024.

THE ATTACHMENTS ARE CONFIDENTIAL AND ARE SUBMITTED ONLY IN THE NON-PUBLIC VERSION TO THE COMMISSION.

Q. SDR-RR-25 Please provide a description of the Company's merit and cost of living wage rate increase policies.

A. SDR-RR-25

General Wage Increase:

NON-UNION (Non-Exempt Craft)

The Company establishes estimated future wage increases in its annual budgeting process and its long-term financial planning. Estimates are established by reviewing local and regional wage trends for hourly positions at the Company that require similar trade backgrounds. Each fall, local trends for the coming year are analyzed and if an adjustment from budget is required based on maintaining competitive wages, the proposal is reviewed and approved in the September/October time frame by Company and parent company management.

The point of reference is competitive wage comparisons consistent with the 50th percentile (statistical mean) of the local/regional labor market through independent third party and governmental wage surveys. This concept is consistent with the concept of prevailing wage used in state contract bidding, though the Company's wages are not subject to the state prevailing wage provisions.

UNION

The Company establishes its wages through a collective bargaining process, with the employee wages for the Company's hourly trade and service employees established under contract with IBEW Local 614. PECO's latest collective bargaining agreement was ratified in April 2021, for a five-year term effective April 1, 2021 through March 31, 2026.

MERIT INCREASES (Exempt and Non-Exempt Non-Represented)

The Company establishes estimated future aggregate salary levels in its annual budgeting process and its long-term financial planning. Estimates are established by looking at regional and national salary trends for management positions at the Company that require similar backgrounds. Each fall, salary increase trends for the coming year are analyzed and if an adjustment from budget is required based on maintaining competitive

salaries, the proposal is reviewed and approved in the September/October time frame by the Company and parent company management.

Q. SDR-RR-26 Please provide the following monthly labor data for the year prior to the HTY, the HTY and the FTY through the most recent date available:

a. Number of actual employees broken down between type (e.g. salaried, hourly, union, non-union, temporary, etc.);
b. Regular payroll broken down between expensed, capitalized, and other;
c. Overtime payroll broken down between expensed, capitalized and other;
d. Temporary payroll broken down between expensed, capitalized and other; and
e. Other payroll (specify).

A. SDR-RR-26

a. Headcount has been provided based on a mix of union/non-union and salaried/hourly employees. Temporary headcount is not included in the Company's official headcount but is provided for this response. Refer to Attachment SDR-RR-26(a) for monthly Headcount.

b. Refer to Attachment SDR-RR-26(b) for Regular Monthly Payroll.

c. Refer to Attachment SDR-RR-26(b) for Overtime Monthly Payroll.

d. Temporary payroll is included in the expense and capital payroll provided and was approximately $178,000 and $231,000 in 2022 and $152,000 and $311,000 in 2023, respectively.

e. PECO Energy Company does not have Other payroll historically or budgeted for 2024 or future years.

Q. SDR-RR-27 Please provide a copy of all incentive compensation and/or bonus plans and provide the level of related payments included in cost of service.

A. SDR-RR-27 Refer to the following attachments:

Confidential Attachment SDR-RR-27(a.1) (2023 AIP PECO Brochure).

Confidential Attachment SDR-RR-27(a.2) (2023 AIP for those represented by Local 614).

Confidential Attachment SDR-RR-27(a.3) (2023 Utilities Long Term Performance Program (LTPP) Summary).

Confidential Attachment SDR-RR-27(a.4) (2023 Restricted Stock Unit Award (RCU) Summary).

Confidential Attachment SDR-RR-27(a.5) (2023-2025 Exelon Long-Term Performance Share Award Program Summary).

Confidential Attachment SDR-RR-27(a.6) (2023-2025 Exelon Long Term Performance Cash Award Program).

Refer to the Attachment III-A-21(a-h) for the level of related payments.

CONFIDENTIAL ATTACHMENTS SDR-RR-27(a.1-a.6) ARE CONFIDENTIAL AND ARE SUBMITTED ONLY IN THE NON-PUBLIC VERSION TO THE COMMISSION.

Q. SDR-RR-28 Please provide the percentage wage increases granted by the Company by date and employee category for the three most recent calendar years and the current year to date.

A. SDR-RR-28

	Average Wage Increase for Hourly Employees	Average Merit Increase Pool for Management Employees
2021	2.5%	2.0%
2022	2.5%	2.5%
2023	2.5%	4.0%
2024	2.5%	3.0%

Q. SDR-RR-29 Please provide an analysis (description, date and amounts) of any gains or losses on utility property sold for the lesser of the last three years or since the Company's last rate case or anticipated during the FTY. Explain how such amounts have been treated for ratemaking purposes.

A. SDR-RR-29 PECO did not sell gas utility property in the last three years and does not plan to sell gas utility property in the future test year or fully projected future test year.

Q. SDR-RR-30 Please provide the level of each of the following which is included in the Company's cost of service by separate type and/or payee, which are incurred directly by the Company or are allocated or billed to the Company by affiliates or its parent company.

a. fines and penalties
b. contributions and donations
c. membership dues
d. lobbying expense
e. employee activity costs (e.g. picnics, parties, awards)
f. investor relations expenses

A. SDR-RR-30

a. None. These costs are not included in the Company's test year claim.

b. None. These costs are not included in the Company's test year claim.

c. Refer to Attachment SDR-RR-30(c).

d. None. These costs are not included in the Company's test year claim.

e. Refer to Attachment SDR-RR-30(e).

f. The budgeted allocations from Exelon Business Services Company to PECO Gas Distribution for investor relations expenses in 2024 and 2025 are $40,185 and $42,496, respectively.

c. Membership Dues (Gas Only)

Q. SDR-RR-31 Please provide a description and the purpose for membership for each organization listed in the previous response.

A. SDR-RR-31 Please Refer to Attachment SDR-RR-31(a).

PECO Energy Company
Membership Purposes
Gas Only

Association	Description	Purpose
American Gas Association	National Gas Industry Group	The American Gas Association (AGA) represents companies delivering natural gas safely, reliably, and in an environmentally responsible way to help improve the quality of life for their customers every day. AGA's mission is to provide clear value to its membership and serve as the indispensable, leading voice and facilitator on its behalf in promoting the safe, reliable, and efficient delivery of natural gas to homes and businesses across the nation.
Energy Association of PA	PA Gas Industry Group	The Energy Association of Pennsylvania is an advocate for its members on policy issues before the General Assembly, the Public Utility Commission, and various other state governmental agencies. The association also helps its members better serve their customers by acting as a clearinghouse for information on best practices within the industries.
OTD Operations Tech Development	Non-profit in the Gas Industry	OTD developments are providing solutions to a wide-range of challenges and changes for natural gas delivery systems from integrity enhancements to efficiency improvements. New technology is playing a major and necessary role in helping companies address integrity concerns, rising costs, and environmental issues.
R&D Memberships	NYSearch	NYSearch is a collaborative Research, Development & Demonstration organization that serves its gas utility member companies. Members of NYSearch participate in projects and programs to target R&D areas that directly address their unique challenges and opportunities. The core of the NYSearch model is joint collaboration and guidance from participating members.
ICE Data LP	Leading global operator of regulated exchanges, clearing houses and listings venues, and a provider of data services for commodity, financial, fixed income and equity markets	Provides comprehensive set of market insights and information such as pricing and analytics, indices and exchange data.
Greater Philadelphia Chamber of Commerce	Chamber of Commerce	Brings area businesses and civic leaders together to promote growth and create opportunity in the Greater Philadelphia region. Members represent eleven counties, three states, and roughly 600,000 employees from thousands of member companies and organizations.
Economy League of Greater Philadelphia	Economy League	To support an independent, non-partisan organization that addresses research and encourages regional participation in economic development projects. This organization addresses critical issues facing Greater Philadelphia by providing impactful research, connecting diverse leaders, and advancing shared solutions.
PA Chamber of Business and Industry Education Foundation	Research and Education	The Pennsylvania Chamber of Business and Industry Educational Foundation is an organization created to fund research and educational programs that will positively impact Pennsylvania's economic future and enhance the quality of life for all Pennsylvanians. In addition, it seeks to enrich discussions among policymakers, business leaders, and the public concerning ways to improve Pennsylvania's economy and business climate, and increase the competitive advantage of Pennsylvania businesses.
Greater Philadelphia Hispanic Chamber of Commerce	Chamber of Commerce	A non-profit organization devoted to promoting the advancement and economic growth of Hispanic businesses and professionals in the greater Philadelphia region.
World Trade Center of Greater Philadelphia	World Trade Center	A non-profit and membership-based organization that accelerates global business growth for companies in Southeastern Pennsylvania and Southern New Jersey by providing customized, one-on-one trade counseling, market research, educational programs, trade mission support, business networking events, and powerful connections to customers and partners worldwide.
Independence Business Alliance	Chamber of Commerce	Provides opportunities, access, and resources to LGBT professionals and allies in the Greater Philadelphia area.
Greater Philadelphia Alliance for Capital and Technologies	Non-profit organization that drives innovation and growth for Philadelphia businesses and entrepreneurs through capital, talent, and customers	Aims to positively impact a member company's life cycle by facilitating interaction, information, and education – through four main pillars: Capital Connect, Customer Connect, Mentor Connect, and Talent Connect.

Philadelphia Convention & Visitors Bureau	The Philadelphia Convention & Visitors Bureau (PCVB), a private nonprofit membership corporation, is the official Tourism Promotion Agency for the City of Philadelphia, and the primary sales and marketing agency for the Pennsylvania Convention Center	To support the work of an organization which impacts economic development by marketing the region to attract tourism and conventions.
Main Line Chamber of Commerce	Chamber of Commerce	This organization strives to strengthen the economy by extending members' reach into the community through collaboration, support, education, and advocacy. The Chamber represents the interests of more than 900 companies located primarily in the Pennsylvania counties of Delaware, Chester, and Montgomery.
Delaware County Chamber of Commerce	Chamber of Commerce	Used as a resource hub for businesses in Delaware County, Pennsylvania that aims to create growth and stability in the region.
Life Sciences Pennsylvania	Life Sciences	A statewide trade association for the commonwealth's life sciences industry that works to ensure Pennsylvania is a life sciences leader by facilitating the formation, growth, and success of the life sciences ecosystem through public policy advocacy and connecting people and resources.
NEUAC National Energy & Utility Affordability Coalition	NEUAC works to highlight the energy needs of income-constrained households and advocate for policies and programs to help reduce their energy burdens	A broad-based non-profit coalition of diverse member organizations and individuals nationwide. NEUAC works to highlight the energy needs of income-constrained households and advocate for policies and programs to help reduce their energy burdens. NEUAC's coalition members represent the voices of millions of households who struggle to afford heating and cooling needs year-round. NEUAC educates policy makers on the need for national programs such as LIHEAP (Low-Income Home Energy Assistance Program – a federal program that provides energy grants and weatherization services to low-income households).
CEWD	Center for Energy Workforce Development	A non-profit intermediary that unites employers, labor, educators, non-profits and associations, community-based organizations, workforce systems and other stakeholders to prioritize solutions that will ensure the industry is people-ready for the energy transition. CEWD is committed to developing a skilled, diverse workforce for a clean energy future.
Hire Philly	Non-profit that connects Philadelphians to employment	A membership based non-profit organization that aligns the assets, interests, and advocacy of local employers to provide a united perspective on regional workforce development issues plus opportunities, and effectively connecting Philadelphians to employment.

Q. SDR-RR-32 Please provide the level of payments made to industry organizations included in cost of service along with a description of each payee organization or project.

A. SDR-RR-32 For payments, refer to Attachment SDR-RR-32(a). Refer to Attachment SDR-RR-31(a) for descriptions of the payee organizations in Attachment SDR-RR-32(a).

c. Membership Dues (Gas Only)

Allocation of Exelon's 2023 dues per Eric Rice:

BG&E	**$**	**360,943**
PECO		**384,931**
Pepco		**39,777**

Combined 2023 Dues: $ 785,651

AMERICAN GAS ASSOCIATION
2023 DUES RULES

U.S. Energy Utilities

1. AGA dues for U.S. Energy Utility members are based on the average of 2019, 2020 and 2021 gas operating income* and the following income blocks and rates:

Block 1	First	$ 10,000,000	1.0468%
Block 2	Next	$ 7,500,000	.6710%
Block 3	Next	$ 20,000,000	.4481%
Block 4	Next	$ 40,000,000	.3200%
Block 5	Next	$ 80,000,000	.2550%
Block 6	Over	$ 157,500,000	.1500%

   In applying the above formula, the maximum annual increase for any company equals 4.38%. No company's dues will decrease starting in 2023.

2. For companies that merge or are acquired whose dues would have decreased, the dues of the resulting company will equal the combined dues of the merging companies immediately prior to the merger for 4 years with no dues increases for increased operating income. After 4 years, the company's dues will be assessed via the formula structure, and any reduction in dues will be phased-in over a 4-year period or until the phased-in amount equals the formula dues, whichever comes first.

3. If necessary, the Board may approve the redistribution of any remaining AGA budget deficit to the members based on each company's share of total dues revenue.

4. For distribution companies with less than 75,000 meters, the maximum distribution company dues are equal to $0.90/meter**. When dues are capped at $0.90/meter, the maximum annual increase/decrease provision does not apply.

5. No company, whose consolidated or subsidiary meets the eligibility standards of a U.S. Energy Utility company, will be allowed to join a different AGA membership class. All regulated U.S. gas distribution subsidiaries of a parent organization must be included in the dues calculations.

6. Minimum Gas Company 2023 dues are $2,230.

*Gas operating income is defined as Line 11, Schedule II of the Uniform Statistical Report.

**Meters are defined as Line 17 (total), Schedule XX of the Uniform Statistical Report.

Please contact Terri Oliva, Chief Financial Officer at (202) 824-7092 regarding any questions about the invoice or rules.

American Gas Association (AGA)

About AGA

The American Gas Association (AGA) represents more than 200 energy companies that provide natural gas service to 180 million Americans. Founded in 1918, the American Gas Association (AGA) educates the public about the importance of natural gas, supports natural gas utilities in their efforts to make their operations safer, more efficient and more environmentally-friendly, and serves as a resource for local, state and federal policymakers when it comes to regulating the natural gas industry. AGA members support the safe, reliable, affordable and sustainable delivery of natural gas to millions of Americans.

Vision Statement

Provide America with essential life-sustaining energy.

Mission Statement

The American Gas Association (AGA) develops and advocates for informed, innovative, and durable policy that fulfills our nation's energy needs, environmental aspirations and economic potential. Additionally, the AGA provides state-of-the-art solutions for AGA members to safely and securely deliver reliable and affordable natural gas and advanced fuels to homes and businesses across the nation.

Q. SDR-RR-34 Please provide a copy of the most recent FERC audit findings, the Company's response and final disposition of audit exceptions.

A. SDR-RR-34 Refer to Attachment SDR-RR-34(a).

FEDERAL ENERGY REGULATORY COMMISSION
WASHINGTON, D.C. 20426

In Reply Refer To:
Office of Enforcement
Docket No.PA18-3-000
November 21, 2019

Exelon Corporation
Attention: Thomas S. O'Neill
Senior Vice President and General Counsel
10 S. Dearborn St., 48th Floor
Chicago, IL 60603

Dear Mr. O'Neill:

1. The Division of Audits and Accounting (DAA) within the Office of Enforcement (OE) of the Federal Energy Regulatory Commission (Commission) has completed an audit of Exelon Corporation (Exelon) and its public utility subsidiaries (collectively, the Companies).[1] The audit covered the period from January 1, 2013 through March 26, 2019.

2. The audit evaluated whether the Companies complied with the conditions established in the Commission's November 20, 2014 order authorizing the merger of Exelon and Pepco Holdings, Inc.[2] The audit also evaluated the Companies' compliance with: (1) the tariff requirements governing their FERC jurisdictional rates; (2) accounting regulations in 18 C.F.R. Part 101; and (3) financial reporting regulations in 18 C.F.R. Part 141, focusing primarily on the transactions and costs associated with the merger. The enclosed audit report contains 4 findings and 17 recommendations that require Exelon to take corrective action.

3. On November 5, 2019, you notified DAA that Exelon accepts all 4 findings and 17 recommendations in the draft audit report and will submit within 30 days of the issuance of the final audit report a plan for implementing the audit recommendations. A copy of your verbatim response is included as an appendix to this report. I hereby approve the audit report.

[1] This includes Pepco Holdings, Inc. and its public utility subsidiaries prior to the merger transaction.

[2] Order Authorizing Proposed Merger, *Exelon Corp.*, 149 FERC ¶ 61,148 (2014).

4. Exelon should submit its implementation plan to comply with the recommendations within 30 days of this letter order. Exelon should make quarterly submissions to DAA describing the progress made to comply with the recommendations, including the completion date for each corrective action. As directed by the audit report, these submissions should be made no later than 30 days after the end of each calendar quarter, beginning with the first quarter after this audit report is issued, and continuing until all the corrective actions are completed.

5. The Commission delegated the authority to act on this matter to the Director of OE under 18 C.F.R. § 375.311. This letter order constitutes final agency action. Exelon may file a request for rehearing with the Commission within 30 days of the date of this order under 18 C.F.R. § 385.713.

6. This letter order is without prejudice to the Commission's right to require hereafter any adjustments it may consider proper from additional information that may come to its attention. In addition, any instance of noncompliance not addressed herein or that may occur in the future may also be subject to investigation and appropriate remedies.

7. I appreciate the courtesies extended to the auditors. If you have any questions, please contact Mr. Steven D. Hunt, Director and Chief Accountant, Division of Audits and Accounting at (202) 502-6084.

Sincerely,

Larry R. Parkinson
Director
Office of Enforcement

AUDIT REPORT

Audit of Exelon Corporation's Compliance with:

- Conditions established in the Commission's November 20, 2014 Merger Order;
- Tariff requirements governing Exelon's FERC jurisdictional rates;
- Accounting regulations in 18 C.F.R. Part 101; and
- Financial reporting regulations in 18 C.F.R. Part 141.

Docket No.PA18-3-000
November 21, 2019

Exelon's Response to Draft Audit Report 30

I. Executive Summary

A. Overview

The Division of Audits and Accounting (DAA) within the Office of Enforcement of the Federal Energy Regulatory Commission (Commission) has completed an audit of Exelon Corporation (Exelon) and its public utility subsidiaries (collectively, the Companies). The audit evaluated whether the Companies complied with the conditions established in the Commission's November 20, 2014 order authorizing the merger of Exelon and Pepco Holdings, Inc. (PHI). The audit also evaluated the Companies' compliance with: (1) the tariff requirements governing Exelon's public utilities' rates; (2) accounting regulations in 18 C.F.R. Part 101; and (3) financial reporting regulations in 18 C.F.R. Part 141, focusing primarily on the transactions and costs associated with the merger. The audit covered the period from January 1, 2013 through March 26, 2019.

B. Exelon Corporation

Exelon is a public utility holding company that is headquartered in Chicago, Illinois and Washington, DC. Exelon is the parent company of six public utilities and two service companies.[1] Through its public utility subsidiaries, Exelon distributes electricity and natural gas to approximately 10 million customers in Delaware, Illinois, Maryland, New Jersey, Pennsylvania, and the District of Columbia. In addition, through Exelon Generation Company, LLC, Exelon has a diverse portfolio of electric generation capacity which includes nuclear, natural gas, hydroelectric, wind, solar, landfill gas, and oil energy and engages, through its customer-facing business, Constellation, in power marketing and sales of electric power and natural gas to its wholesale and retail customers.

[1] The six public utility companies are PECO Energy Company (PECO), Baltimore Gas and Electric Company (BG&E), Potomac Electric Power Company (Pepco), Delmarva Power & Light Company (DPL), Atlantic City Electric Company (ACE), and Commonwealth Edison Company (ComEd).

The two services companies are PHI Service Company (PHISCO) and Exelon Business Services Company, LLC (EBSC).

C. Summary of Compliance Findings

Below is a summary of audit staff's compliance findings. Audit staff identified four areas of noncompliance. Section IV discusses in detail the noncompliance findings in the following areas:

- *Merger-Related Regulatory Assets* – BG&E improperly included the amortization of merger-related regulatory assets approved by a retail regulator in wholesale transmission formula rates. As a result, BG&E overstated its wholesale transmission revenue requirements and overbilled its wholesale customers by approximately $1.4 million.

- *Transmission Formula Rate Allocators* – Exelon's public utilities improperly included merger-related costs in their transmission formula rate allocators when they computed wholesale transmission revenue requirements. As a result, Exelon's public utilities overstated their wholesale transmission revenue requirements, which led to overbilling wholesale transmission customers by approximately $333,056.

- *Merger Commitment Costs* – Exelon's public utilities improperly included merger commitment costs for the Exelon and PHI merger in their transmission revenue requirements. As a result, Exelon's public utilities overstated their transmission revenue requirements, which led to overbilling wholesale transmission customers.

- *Amortization of Retail Regulatory Asset* – Exelon's public utilities improperly recorded the amortization of certain regulatory assets and improperly included the amortization of the regulatory assets in their wholesale transmission formula rates without Commission approval to recover such amounts. As a result, Exelon's public utilities overstated their wholesale transmission revenue requirements and overbilled their wholesale customers.

D. Summary of Recommendations and Corrective Actions Taken

Below is a summary of audit staff's recommendations to remedy the findings in this report. Detailed recommendations are in Section IV. Audit staff recommends that Exelon and its public utilities:

Merger-Related Regulatory Assets

1. Establish, update, and implement policies and procedures to ensure BG&E accurately excludes merger-related costs, including regulatory assets created

due to the merger, not approved by the Commission from wholesale transmission formula rates, as required by the hold harmless provisions in the 2012 and 2014 Merger Orders and the 2015 Audit Report recommendations accepted by BG&E.

2. Submit a refund analysis, within 60 days of receiving the final audit report, to DAA that explains and details: (1) calculation of refunds that include the amount of inappropriate merger-related regulatory asset amortizations included in wholesale transmission formula rates and the refunds resulting from inclusion of the amortizations in wholesale formula rates, plus interest; (2) determinative components of the refund; (3) refund method; (4) customers to receive refunds; and (5) period(s) in which refunds will be made.

3. File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

4. Refund the amounts disclosed in the refund report to wholesale transmission customers, with interest calculated in accordance with section 35.19a of Commission regulations.

Transmission Formula Rate Allocators

5. Establish, update, and implement policies and procedures to ensure Exelon's public utilities exclude merger costs from their transmission formula rate allocators when computing their annual transmission revenue requirements as required by the hold harmless provisions in the 2014 Merger Order.

6. Submit a refund analysis, within 60 days of receiving the final audit report, to DAA that explains and details: (1) calculation of refunds and the amount of improper recoveries that resulted from including merger costs in the transmission formula rate allocators for computing transmission revenue requirements during the audit period, plus interest; (2) determinative components of the refund; (3) refund method; (4) customers to receive refunds; and (5) period(s) in which refunds will be made.

7. File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

8. Refund the amounts disclosed in the refund report to wholesale transmission customers, with interest calculated in accordance with section 35.19a of Commission regulations.

Merger Commitment Costs

9. Establish, update, and implement policies and procedures to ensure Exelon's public utilities exclude costs to implement merger commitments made to federal and state regulators from their transmission revenue requirements, as required by the hold harmless provisions in the 2014 Merger Order.

10. Submit a refund analysis, within 60 days of receiving the final audit report, to DAA that explains and details: (1) calculation of refunds and the amount of improper recoveries that resulted from including merger commitment costs in the transmission revenue requirements during the audit period, plus interest; (2) determinative components of the refund; (3) refund method; (4) customers to receive refunds; and (5) period(s) in which refunds will be made.

11. File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

12. Refund the amounts disclosed in the refund report to wholesale transmission customers, with interest calculated in accordance with section 35.19a of Commission regulations.

Amortization of Retail Regulatory Assets

13. Revise procedures for computing wholesale transmission formula rate billings to wholesale customers to exclude amortization of regulatory assets that have not been approved by the Commission.

14. Provide training to staff on the revised regulatory assets accounting and rate development methods. Also, develop a training program that supports the provision of periodic training in this area, as needed.

15. Submit a refund analysis to DAA, within 60 days of receiving the final audit report from DAA, that explains and details: (1) calculation of refunds that include the amount of inappropriate regulatory asset amortizations included in wholesale formula rates and the refunds resulting from inclusion of the amortizations in wholesale formula rates during the audit period, plus interest; (2) determinative components of the refund; (3) refund method; (4) customers to receive refunds; and (5) period(s) in which refunds will be made.

16. File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

17. Refund the amounts disclosed in the refund report to wholesale customers, with interest calculated in accordance with section 35.19a of Commission regulations.

E. Compliance and Implementation of Recommendations

Audit staff further recommends that Exelon submit for audit staff review the following:

- A plan for implementing the audit recommendations within 30 days after the final audit report is issued in this docket;

- Quarterly reports to DAA describing Exelon's progress in completing each corrective action recommended in the final audit report. Exelon should make these nonpublic quarterly filings no later than 30 days after the end of each calendar quarter, beginning with the first quarter after submission of the implementation plan, and continuing until Exelon completes all recommended corrective actions.

- Copies of written policies and procedures developed in response to the recommendations in the final audit report. The documents should be submitted for audit staff's review in the first quarterly filing following their completion.

II. Background

A. Exelon Corporation and Pepco Holdings, Inc. Merger

On April 29, 2014, Exelon and PHI entered into a merger agreement whereby Exelon acquired PHI in an all-cash transaction at a purchase price of $27.25 for each outstanding share of PHI's common stock. On May 30, 2014, Exelon and PHI, together with their respective public utilities filed a merger application in Docket No. EC14-96-000 requesting Commission approval of the merger.

On November 20, 2014, the Commission issued an order approving the Exelon and PHI merger application (2014 Merger Order).[2] The merger also required approval from several state agencies[3] since the PHI businesses to be acquired operated in those jurisdictions. The merger was consummated on March 23, 2016, after all approvals from federal and state regulatory agencies were obtained. Under the terms of the merger agreement, PHI became an indirect wholly owned subsidiary of Exelon. PHI's public utilities[4] were placed under Exelon Energy Delivery Company, LLC along with Exelon's other public utilities.[5] PHI's unregulated subsidiaries were placed in separate branches of the Exelon holding company structure. Following the merger, PHI was renamed Pepco Holdings LLC.

As part of the Commission's approval of the merger, Exelon agreed to merger conditions that required Exelon, among others things, to: (1) hold transmission customers harmless from all merger-related costs, including transaction costs incurred to consummate the merger and transition costs incurred to achieve merger synergies, for a period of five years; (2) submit informational filings with the Commission; and (3) protect transmission customers from cross-subsidization.

---

[2] Order Authorizing Proposed Merger, *Exelon Corp*., 149 FERC ¶ 61,148 (2014) (2014 Merger Order).

[3] The following state agencies approved the merger: Virginia State Corporation Commission - October 7, 2014; New Jersey Board of Public Utilities - March 6, 2015; Maryland Public Service Commission - May 15, 2015; Delaware Public Service Commission - June 2, 2015; and District of Columbia Public Service Commission - March 23, 2016.

[4] PHI public utilities prior to the merger were Pepco, DPL, and ACE.

[5] Exelon public utilities prior to the merger were PECO, BG&E, and ComEd.

B. Accounting and Financial Reporting for Merger Costs

Exelon paid approximately $7.14 billion for the acquisition of PHI, which was recorded in Exelon's books. In addition to the total purchase price, between 2014 and 2017, Exelon and its subsidiaries incurred approximately $1.14 billion in other merger-related costs. The $1.14 billion is comprised of transaction costs of $309 million and transition costs of $832 million. The transaction costs included, among other things, internal labor and third-party costs for legal, consulting, and professional services to consummate the merger. The transition costs included integration, internal labor, and other operational costs incurred to achieve merger synergies.

To comply with the Commission's hold harmless provision and accounting requirements, Exelon implemented procedures which led to the creation of project codes and cost centers in its accounting system to track and accumulate merger costs separately from normal operational costs. These projects codes and cost centers were created to separately track transaction and transition costs. The transaction costs were recorded in the books both of Exelon and of PHI. The transition costs were recorded in Exelon and its subsidiaries' books. The public utilities recorded the transition costs in several FERC accounts that are included in their respective transmission formula rates. The merger costs recorded in FERC accounts that were inputs to the transmission formula rates were excluded from wholesale transmission rates billed to wholesale customers except for those merger costs identified in the findings and recommendations section of the audit report.

C. Transmission Formula Rate

Exelon's six public utilities are transmission owners in PJM and therefore operate their transmission assets under PJM's direction pursuant to PJM's Open Access Transmission Tariff (OATT). The six public utilities recover their costs of owning, operating, and maintaining their respective transmission systems using the transmission formula rates approved by the Commission, each of which is included in Attachment H of PJM's OATT.[6] The transmission formula rates were designed to provide a reasonable opportunity to recover (1) the costs and expenses associated with providing transmission service, and (2) a reasonable return on transmission investments. The development of transmission revenue requirements in the transmission formula rates for wholesale

[6] *See* ACE's transmission formula rate, PJM Tariff, Attachment H-1A; BGE's transmission formula rate, PJM Tariff, Attachment H-2A; ComEd's transmission formula rate, PJM Tariff, Attachment H-13A; DPL's transmission formula rate, PJM Tariff, Attachment H-3D; PECO's transmission formula rate, PJM Tariff, Attachment H-7A; and Pepco's transmission formula rate, PJM Tariff, Attachment H-9A.

billings relies, to the extent feasible, on costs recorded in each of the public utilities' Annual Report of Major Electric Utilities, Licensee and Others, FERC Form No. 1 (FERC Form No. 1). This means accurate accounting of costs and transmission investments in the FEEC Form No. 1 is important for the development of the transmission revenue requirements and the related billings to wholesale transmission customers.

III. Introduction

A. Objectives

The audit evaluated whether the Companies complied with the conditions established in the 2014 Merger Order. The audit also evaluated the Companies' compliance with: (1) the tariff requirements governing Exelon's public utilities' rates; (2) accounting regulations in 18 C.F.R. Part 101; and (3) financial reporting regulations in 18 C.F.R. Part 141, focusing primarily on the transactions and costs associated with the merger transaction. The audit covered the period from January 1, 2013 through March 26, 2019.

B. Scope and Methodology

Audit staff performed the following to facilitate testing and evaluation of Exelon's compliance with Commission requirements relevant to the audit objectives:

- *Reviewed Public Information* – Conducted an extensive review of public information before commencing the audit. This review provided a high-level understanding of Exelon's corporate structure, the services it provides, major events affecting operations and finances, mergers, significant contracts, prior audit issues and other key regulatory and business activities. Examples of materials reviewed include Exelon's annual reports and SEC Form 10-Ks, PHI's Proxy Statement (Schedule 14A), FERC Forms No. 1 and 60, prior FERC audit reports, company-related web sites and other relevant regulatory and media sources.

- *Identified Standards and Audit Criteria* – Identified the regulatory requirements and criteria for evaluating Exelon's compliance with the Commission's merger requirements, including the Commission's November 20, 2014 Merger Order, 2016 Policy Statement on mergers and acquisitions, and accounting and merger-related rules and regulations.

- *Issued Data Requests* – Issued data requests to collect information not commonly available to the public. This information related to internal policies, procedures and controls; business practices; risk management; corporate structure; contractual agreements; financial accounting and reporting activity; corporate compliance; regulatory filings; and other pertinent information. These data were used to test and evaluate compliance with Commission requirements relevant to audit objectives.

- *Conducted Teleconference Interviews* – Conducted multiple teleconferences with Exelon employees to discuss audit objectives, testing, data request responses, technical and administrative matters, and compliance concerns.

- *Conducted Site Visits* – Made four site visits to Exelon's offices to discuss and observe controls and procedures related to audit objectives. For example, to understand Exelon's controls and procedures for tracking merger costs, audit staff interviewed accounting and compliance managers and the staff that actually perform such work on a daily basis.

- *Conferred with Commission Subject-Matter Experts* – Conferred with other Commission staff on compliance issues to ensure audit findings were consistent with Commission precedent and policy.

- *Evaluated Internal Controls* – Audit staff evaluated Exelon's Internal Audit department, i.e., its place in the corporate structure and access to Exelon's Board of Directors, to assess Internal Audit's effectiveness and independence. Audit staff also reviewed internal audit reports to identify compliance issues relevant to Commission regulatory oversight authority, and the corrective measures taken to resolve them.

Audit staff evaluated Exelon's compliance with all relevant requirements related to this audit's objectives through examining the following:

<u>Compliance with Merger Conditions</u>

- Reviewed the Companies' merger applications, merger orders, and all other related filings, including customer protests and comments, expert testimony submitted as evidence, and rebuttals;

- Examined the merger transactions and identified the merger conditions applicable to the Exelon and PHI merger;

- Evaluated the actions taken by the Companies to ensure compliance with the conditions imposed by the Commission in the merger order;

- Examined the Companies' compliance filings to verify compliance with the 2014 Merger Order's requirements;

- Examined the Companies' procedures to ensure compliance with hold-harmless commitment and how to account for merger-related costs;

- Reviewed compliance filings to determine whether the Companies sought to recover merger-related costs through wholesale transmission rates; and

- Reviewed supporting documentation of merger-related costs and performed substantive tests of sample data to determine whether the Companies improperly recovered merger-related costs from jurisdictional customers through rates during the audit period.

Compliance with Accounting and Reporting Regulations in the USofA

To evaluate compliance with the Commission's accounting and reporting regulations in the USofA under 18 C.F.R. Parts 101 and 141 for merger-related costs during the audit period, audit staff:

- Reviewed and evaluated the Companies' processes, procedures, and controls to track and account for merger-related costs;

- Interviewed employees that operate the Companies' financial accounting systems to assess the adequacy of accounting and reporting oversight controls related to the merger;

- Reviewed FERC Form No. 1 and Annual Report of Centralized Service Companies, FERC Form No. 60 notes and disclosures related to tracking, accounting, and reporting of merger-related costs;

- Tested selected information reported in the FERC Form No. 1, particularly related to mergers, and compared it to the Companies' books and records to ensure the required information was reported accurately and consistently; and

- Tested a sample of the Companies' required USofA accounts for compliance with the Commission's orders that authorized the mergers as well as with the Companies' internal policies and procedures.

IV. Findings and Recommendations

1. Merger-Related Regulatory Assets

BG&E improperly included the amortization of merger-related regulatory assets approved by a retail regulator in wholesale transmission formula rates. As a result, BG&E overstated its wholesale transmission revenue requirements and overbilled its wholesale customers by approximately $1.4 million.

Pertinent Guidance

- In the 2014 Merger Order, the Commission accepted the applicants' commitment to hold transmission customers harmless for the merger transaction costs. The 2014 Merger Order states in part:

> We accept Applicants' commitment to hold transmission customers harmless for five years from costs related to the Proposed Merger. We interpret Applicants' commitment to apply to all merger-related costs, including costs related to consummating the Proposed Merger and transition costs (both capital and operating) incurred to achieve merger synergies, incurred prior to the consummation of the Proposed Merger or in the five years after merger consummation. Further, we clarify that, if Applicants seek to recover merger-related costs that are the subject of a hold harmless commitment, they must submit a *new* filing under the Federal Power Act (FPA) section 205, and a concurrent informational filing in this docket, in order to do so.[7]

- In the 2012 Merger Order for the merger of Exelon and Constellation, the Commission accepted the applicants' commitment to hold transmission customers harmless for the merger transaction costs. The 2012 Merger Order states in part:

> We accept Applicants' commitment to hold transmission customers harmless from costs related to the merger. We interpret Applicants' hold harmless commitment to apply to all transaction-related costs, including costs related to consummating the Proposed Transaction

[7] 2014 Merger Order, *Exelon Corp.*, 149 FERC ¶ 61,148, at P 105 (footnotes omitted).

and transition costs (both capital and operating) incurred to achieve merger synergies.[8]

Background

In June 2015, DAA issued an audit report to BG&E in Docket No. FA13-13-000. The audit evaluated among other things BG&E's treatment of merger-related costs stemming from the Exelon and Constellation merger in 2012. In the audit report, DAA recommended BG&E establish, implement, and update its policies and procedures to ensure it excluded merger-related costs from its annual formula rate update, as required by the hold harmless provision in the 2012 Merger Order. BGE agreed to comply with the recommendation.

In the current audit, audit staff evaluated Exelon and its public utilities' compliance with DAA's 2015 audit recommendations and the Commission's hold harmless provision in the 2012 and 2014 Merger Orders. Based on discussions with and information obtained from Exelon and its public utilities, on site visits, and data request responses, audit staff discovered that BG&E included $1,458,287 of merger integration costs in its 2015, 2016, and 2017 transmission revenue requirements. BG&E stated that the merger costs included in wholesale transmission rates were related to retail regulatory assets approved by the MD PSC.[9]

In 2013 and 2016, the Maryland Public Service Commission (MD PSC) approved three regulatory assets for recovery in retail rates related to merger integration costs that stemmed from the Exelon and Constellation, and Exelon and PHI merger transactions. BG&E recorded the deferral of the merger integration costs in Account 182.3. The regulatory assets recorded in Account 182.3 were amortized to various administrative and general expense accounts and included in the wholesale transmission revenue requirement billed to wholesale transmission customers.

Audit staff found that BG&E's recovery of merger-related costs through the amortization of the MD PSC approved merger regulatory assets was contrary to the hold harmless provisions in the Commission's 2012 and 2014 Merger Orders and the 2015 audit report recommendations accepted by BG&E. In the 2012 and 2014 Merger Orders, Exelon and its public utilities committed to holding transmission customers harmless from merger-related costs for a five year period and to only recover merger costs from wholesale customers upon obtaining express Commission pre-approval. Since Exelon

[8] 2012 Merger Order, *Exelon Corp.,* 138 FERC ¶ 61,167, at P 118 (2012).

[9] The MD PSC approved three merger-related regulatory assets in Order Nos. 85374, 8606 and 87591 for BG&E.

and BG&E did not obtain Commission approval before recovering the merger regulatory assets in the transmission formula rate, the amounts included in the transmission revenue requirement were improper and led to overstatements of billings to wholesale transmission customers.

Recommendations

We recommend that Exelon and BG&E:

1. Establish, update, and implement policies and procedures to ensure BG&E accurately excludes merger-related costs, including regulatory assets created due to the merger, not approved by the Commission from wholesale transmission formula rates, as required by the hold harmless provisions in the 2012 and 2014 Merger Orders and the 2015 Audit Report recommendations accepted by BG&E.

2. Submit a refund analysis, within 60 days of receiving the final audit report, to DAA that explains and details: (1) calculation of refunds that include the amount of inappropriate merger-related regulatory asset amortizations included in wholesale transmission formula rates and the refunds resulting from inclusion of the amortizations in wholesale formula rates, plus interest; (2) determinative components of the refund; (3) refund method; (4) customers to receive refunds; and (5) period(s) in which refunds will be made.

3. File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

4. Refund the amounts disclosed in the refund report to wholesale transmission customers, with interest calculated in accordance with section 35.19a of Commission regulations.

Corrective Actions Taken

BG&E refunded the $1.4 million plus interest to wholesale transmission customers in its 2018 formula rate update filed with the Commission on May 04, 2018. BG&E also updated its policies and procedures for its transmission formula rate update and implemented additional internal controls to mitigate the risk of including merger-related regulatory assets not approved by the Commission in wholesale transmission formula rates and billings to wholesale transmission customers. Therefore, BG&E has fully satisfied Recommendations 1 through 4.

2. Transmission Formula Rate Allocators

Exelon's public utilities improperly included merger-related costs in their transmission formula rate allocators when they computed wholesale transmission revenue requirements. As a result, Exelon's public utilities overstated their wholesale transmission revenue requirements, which led to overbilling wholesale transmission customers by approximately $333,056.

Pertinent Guidance

- In the 2014 Merger Order, the Commission accepted the applicants' commitment to hold transmission customers harmless for the merger transaction costs. The 2014 Merger Order states in part:

> We accept Applicants' commitment to hold transmission customers harmless for five years from costs related to the Proposed Merger. We interpret Applicants' commitment to apply to all merger-related costs, including costs related to consummating the Proposed Merger and transition costs (both capital and operating) incurred to achieve merger synergies, incurred prior to the consummation of the Proposed Merger or in the five years after merger consummation. Further, we clarify that, if Applicants seek to recover merger-related costs that are the subject of a hold harmless commitment, they must submit a *new* filing under FPA section 205, and a concurrent informational filing in this docket, in order to do so.[10]

Background

On November 20, 2014, the Commission issued the 2014 Merger Order, which authorized the merger of Exelon, PHI, and their public utility subsidiaries, subject to certain conditions. The Commission conditioned the authorization of the merger on Exelon and PHI holding their transmission customers harmless from costs related to the merger for five years.

Exelon's public utilities recover their costs of providing transmission service through transmission formula rates approved by the Commission and included in the PJM

[10] 2014 Merger Order, *Exelon Corp.*, 149 FERC ¶ 61,148, at P 105 (footnotes omitted).

OATT.[11] The transmission formula rate template is populated with data reported in accounts and schedules of each public utility's FERC Form No. 1, and each public utility company's record information. The transmission formula rate template for each public utility is used to compute its annual transmission revenue requirement using costs that are directly traceable to providing transmission services and an allocable portion of costs that are indirectly related to providing transmission service. The allocable portion of costs assigned to providing transmission service is computed using transmission allocators.[12] Transmission allocators are determined using information from each public utility's FERC Form No. 1. This means that merger costs appropriately recorded in FERC Form No. 1 should be excluded from the wholesale transmission revenue requirement in accordance with the hold harmless provision in the merger order.

Audit staff reviewed Exelon's public utilities' allocator computations to determine whether the public utilities excluded merger costs when they computed their transmission allocators. Audit staff determined DPL and ComEd improperly included merger costs when computing their transmission allocators, which resulted in overstatement of their annual transmission revenue requirements and billing to wholesale transmission customers. Per the Commission's 2014 Merger Order, Exelon and PHI were required to hold wholesale transmission customers harmless from merger-related costs; therefore, DPL and ComEd's inclusion of merger costs in computing their transmission allocators and transmission revenue requirements was not in compliance with the Commission's 2014 Merger Order.

Recommendations

We recommend that Exelon and its public utilities:

5. Establish, update, and implement policies and procedures to ensure Exelon's public utilities exclude merger costs from their transmission formula rate

[11] *See* ACE's transmission formula rate, PJM Tariff, Attachment H-1A; BGE's transmission formula rate, PJM Tariff, Attachment H-2A; ComEd's transmission rate formula, PJM Tariff, Attachment H-13A; Delmarva's transmission rate formula, PJM Tariff, Attachment H-3D; PECO's transmission rate formula, PJM Tariff, Attachment H-7A; and Pepco's transmission rate formula, PJM Tariff, Attachment H-9A.

[12] The public utilities' transmission allocators include Gross plant, Net plant, and Wage & Salary allocators. The Gross plant allocator is the ratio of transmission plant divided by total plant. The Net plant allocator is the ratio of net transmission plant divided by net total plant taking into consideration accumulated depreciation and amortization. The Wages and Salary allocator is the ratio of transmission wages/salary over total wages and salary excluding A&G wages and salary.

allocators when computing their annual transmission revenue requirements as required by the hold harmless provisions in the 2014 Merger Order.

6. Submit a refund analysis, within 60 days of receiving the final audit report, to DAA that explains and details: (1) calculation of refunds and the amount of improper recoveries that resulted from including merger costs in the transmission formula rate allocators for computing transmission revenue requirements during the audit period, plus interest; (2) determinative components of the refund; (3) refund method; (4) customers to receive refunds; and (5) period(s) in which refunds will be made.

7. File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

8. Refund the amounts disclosed in the refund report to wholesale transmission customers, with interest calculated in accordance with section 35.19a of Commission regulations.

3. Merger Commitment Costs

Exelon's public utilities improperly included merger commitment costs for the Exelon and PHI merger in their transmission revenue requirements. As a result, Exelon's public utilities overstated their transmission revenue requirements, which led to overbilling wholesale transmission customers.

Pertinent Guidance

- In the 2014 Merger Order, the Commission accepted the applicants' commitment to hold transmission customers harmless for merger transaction costs. The 2014 Merger Order states in part:

> We accept Applicants' commitment to hold transmission customers harmless for five years from costs related to the Proposed Merger. We interpret Applicants' commitment to apply to all merger-related costs, including costs related to consummating the Proposed Merger and transition costs (both capital and operating) incurred to achieve merger synergies, incurred prior to the consummation of the Proposed Merger or in the five years after merger consummation. Further, we clarify that, if Applicants seek to recover merger-related costs that are the subject of a hold harmless commitment, they must submit a *new* filing under FPA section 205, and a concurrent informational filing in this docket, in order to do so.[13]

Background

Exelon consummated its merger with PHI on March 23, 2016. To obtain regulatory approvals for the merger transaction, Exelon and PHI made numerous commitments to federal and state regulators, which included providing rate credits to customers, filing specific annual reports, establishing a special purpose entity to hold one hundred percent of the equity interest in PHI, obtaining legal opinions on ring-fencing measures, and holding transmission customers harmless from merger-related costs. From 2016 to 2018, Exelon incurred costs related to its efforts to fulfill the commitments it made to federal and state regulators.

[13] 2014 Merger Order, *Exelon Corp.*, 149 FERC ¶ 61,148 at P 105 (footnotes omitted).

Audit staff evaluated Exelon's and its public utilities' controls for tracking, accounting, and recovering merger commitment costs to determine whether they complied with the hold harmless provisions in the 2014 Merger Order. Exelon created specific work orders and cost centers to track and accumulate merger-related costs incurred for the Exelon and PHI merger. Audit staff found that some costs incurred to implement the merger commitments were not tracked in merger work orders or cost centers; therefore, they were not accounted for as merger-related costs.

Specifically, Exelon incurred approximately $1.6 million in costs to implement the merger commitments between 2016 and 2018.[14] Of this amount, Exelon tracked $1.33 million in merger work orders and cost centers. The remaining $277,000 were tracked in non-merger-related work orders and cost centers. Merger commitment costs accumulated in the merger work orders and cost centers were excluded from the public utilities' transmission revenue requirements. Merger commitment costs accumulated in the non-merger work orders and cost centers were included in the public utilities' transmission revenue requirements as well as in billings to wholesale transmission customers.

Audit staff found that the merger commitments were necessary for Exelon and its public utilities to obtain regulatory approval for the merger, and the costs associated with implementing the commitments are merger-related costs. The Commission's 2014 Merger Order required Exelon and its public utilities to hold transmission customers harmless from all merger-related costs. Therefore, all costs associated with implementing the merger commitments should have been excluded from the public utilities' transmission revenue requirements.

The Commission, in the 2014 Merger Order, directed Exelon and its public utilities to make a filing under section 205 of the FPA if the companies sought to recover merger-related costs subject to the hold harmless provisions in the 2014 Merger Order. Exelon and its public utilities did not seek Commission approval to recover any of the merger costs subject to the hold harmless provision. Therefore, inclusion of merger commitment costs in their transmission revenue requirements and billings to wholesale transmission customers was contrary to the 2014 Merger Order and resulted in overstatement of Exelon's public utilities' annual transmission revenue requirements and billings to wholesale transmission customers.

[14] The merger commitment costs included internal labor and third-party costs for legal, consulting, and professional services.

Recommendations

We recommend that Exelon and its public utilities:

9. Establish, update, and implement policies and procedures to ensure Exelon's public utilities exclude costs to implement merger commitments made to federal and state regulators from their transmission revenue requirements, as required by the hold harmless provisions in the 2014 Merger Order.

10. Submit a refund analysis, within 60 days of receiving the final audit report, to DAA that explains and details: (1) calculation of refunds and the amount of improper recoveries that resulted from including merger commitment costs in the transmission revenue requirements during the audit period, plus interest; (2) determinative components of the refund; (3) refund method; (4) customers to receive refunds; and (5) period(s) in which refunds will be made.

11. File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

12. Refund the amounts disclosed in the refund report to wholesale transmission customers, with interest calculated in accordance with section 35.19a of Commission regulations.

4. Amortization of Retail Regulatory Assets

Exelon's public utilities improperly recorded the amortization of certain regulatory assets and improperly included the amortization of the regulatory assets in their wholesale transmission formula rates without Commission approval to recover such amounts. As a result, Exelon's public utilities overstated their wholesale transmission revenue requirements and overbilled their wholesale customers.

Pertinent Guidance

- In Order No. 552, which created Account 182.3 and related accounts for the recording of regulatory assets, the Commission states in relevant part:

> As proposed, Account 182.3 would include costs incurred and charged to expense *which have been, or are soon expected to be, authorized for recovery through rates* and which are not specifically provided for in other accounts.[15]

- 18 C.F.R. Part 101, Account 182.3, states:

A. This account shall include the amounts of regulatory-created assets, not includible in other accounts, resulting from the ratemaking actions of regulatory agencies. (See Definition No. 30.)

B. The amounts included in this account are to be established by those charges which would have been included in net income, or accumulated other comprehensive income, determinations in the current period under the general requirements of the Uniform System of Accounts but for it being probable that such items will be included in a different period(s) for purposes of developing rates that the utility is authorized to charge for its utility services.…The amounts recorded in this account are generally to be charged, concurrently with the recovery of the amounts in rates, to the same account that would have been charged if included in income when incurred.…

- In *Ameren Corp.,* the Commission states:

[15] Order No. 552, *Revisions to Uniform System of Accounts to Account for Allowances under the Clean Air Act Amendments of 1990 and Regulatory-Created Assets and Liabilities and to Form Nos. 1, 1-F*, *2 and 2-A,* 58 Fed. Reg. 17,982, at 18,000 (April 7, 1993), *FERC Statutes and Regulations* ¶ 30,967 (1993) (emphasis added).

> The Commission has explained that, "in approving any formula rate, the Commission approves the formula itself, the algebraic equation used to calculate the rates. It does not approve the inputs into the formula or the charges resulting from the application of the inputs to the algebraic equation."[16]

- In *PJM Interconnection, L.L.C. and Virginia Electric and Power Co.,* the Commission held in 2005 that any party desiring to recover claimed costs in a period other than the period in which they would ordinarily be charged must submit a filing with the Commission seeking approval of such recovery:

> [W]e [have] provided guidance applicable to any transmission owner seeking to recover a regulatory asset in its rates. We [have] stated, for example, that our accounting rules require "a utility to recognize a regulatory asset where it [the utility] determines it is probable that a cost that would otherwise be charged to expense in one period will be recovered in rates in another." We [have] also stated that "any party desiring to recover [its claimed costs] in rates other than [in] the period in which they would ordinarily be charged to expense must submit a filing demonstrating that their retail rates in effect applicable to that period [do not or will not permit recovery of those costs in that period] and a rate plan for recovery of them in a different period."[17]

- In *Midwest Independent Transmission System Operator, Inc.*, the Commission stated, in 2004, that the regulatory assets approach includes a filing demonstrating that retail rates will not permit recovery of certain identified costs in the ordinary period, and including a "rate plan for recovery" of such costs in a different period:

> With regard to the regulatory asset approach, as the Commission has stated in previous orders, the Commission will continue to apply the existing standard as set forth in 18 C.F.R. Part 101, Account No. 182.3 (2003).

---

16 *Ameren Corp.,* 147 FERC ¶ 61,225, at P 27 (2014) (footnotes omitted), *quoting, respectively*, *American Electric Power Serv. Corp.,* 124 FERC ¶ 61,306, at P 34 (2008); *id.* P 35; and *id.* P 35 & n.51.

17 *PJM Interconnection, L.L.C. and Virginia Electric and Power Co.,* 110 FERC ¶ 61,234, at P 41 (2005) (footnotes omitted), *quoting, respectively*, *Midwest Independent Transmission System Operator, Inc.*, 106 FERC ¶ 61,337, at P 13 (2004); *id.* at P 15.

> In general, this standard requires a utility to recognize a regulatory asset where it determines it is probable that a cost that would otherwise be charged to expense in one period will be recovered in rates in another. Accordingly, any party desiring to recover the Schedule 16 and 17 charges [at issue in this proceeding] in rates other than [in] the period in which they would ordinarily be charged to expense must submit a filing demonstrating that their retail rates in effect applicable to that period do not or will not permit recovery of those costs in that period and a rate plan for recovery of them in a different period.[18]

Background

Exelon's public utilities provide electric and gas distribution services to customers in multiple state jurisdictions. Due to the ratemaking actions of the state jurisdictions, Exelon's public utilities were approved to defer certain costs as regulatory assets and recover the retail portion of those costs in retail rates. Audit staff reviewed the costs recorded as regulatory assets in the Exelon public utilities' Account 182.3, Other Regulatory Assets, to determine whether the costs were accounted for in accordance with the Commission's accounting regulations.

Audit staff found that Exelon's public utilities recorded several regulatory assets based on ratemaking actions of retail regulators (retail regulatory assets) in Account 182.3. The public utilities also amortized these regulatory assets over the period authorized by the retail regulators. Exelon's public utilities, however, did not seek Commission approval to recover any portion of the retail regulatory assets in their wholesale transmission formula rates. Audit staff found that the amortization of the retail regulatory assets by the Exelon public utilities inappropriately increased their wholesale transmission revenue requirement and wholesale formula rate billings.

A description of the regulatory assets inappropriately included in each of the Exelon public utilities' transmission revenue requirements follows.

[18] *Midwest Independent Transmission System Operator, Inc.*, 106 FERC ¶ 61,337, at PP 14-15 (2004) (footnotes and paragraph number omitted).

ComEd

In 2006, the Illinois Commerce Commission (ICC) approved ComEd's request to recover severance expenses related to the Exelon Way Initiative.[19] The Exelon Way Initiative was a cost reduction measure undertaken in 2003 to integrate and centralize support functions, consolidate and align business units, and standardize and simplify operating processes within Exelon. ComEd incurred $158 million for severance costs associated with the Exelon Way Initiative. The ICC approved for retail ratemaking purposes recovery of approximately $141 million[20] of the $158 million of severance costs associated with the Exelon Way Initiative. The amount approved for recovery by the ICC from retail customers was deferred as a regulatory asset and amortized over 7.5 years, consistent with the ICC's approval. In addition to the $141 million of severance costs approved by the ICC as a regulatory asset, ComEd recorded the remaining $17 million of severance costs as a regulatory asset and amortized this amount over 7.5 years similar to the amount approved by the ICC. Audit staff found that ComEd did not seek Commission approval to recover portions of the $17 million of severance cost in its wholesale transmission formula rate during the audit period. Based on ComEd's inclusion of the regulatory assets in wholesale transmission formula rates, the company over recovered approximately $3.6 million from wholesale transmission customers during the audit period. Since ComEd did not seek approval from the Commission to recover the regulatory asset from wholesale customers, ComEd should have kept this amount in Account 182.3, without amortization, until the costs were approved for rate recovery. Alternatively, ComEd should have recorded the severance costs as an expense in the year the cost was incurred.

Audit staff found that ComEd amortized the entire retail regulatory asset to Account 920, Administrative and General Salaries, and Account 926, Employee Pensions and Benefits. ComEd's wholesale transmission formula rate references Accounts 920 and 926 in the computation of its wholesale transmission revenue requirement. However, because the retail regulatory asset was not approved by the Commission for rate recovery, audit staff believes that ComEd should have excluded such costs from the wholesale revenue requirement. Furthermore, audit staff finds that, while ComEd appropriately excluded $141 million of the retail regulatory asset from the wholesale transmission

[19] The Exelon Way Initiative was approved by the Illinois Commerce Commission in Docket No. 05-0597 in 2006. The regulatory asset was not approved by the Commission.

[20] The amount approved by the ICC for recovery in retail rates was determined by applying the wage and salary allocators to the amortization amount reported for each year during the 7.5 year amortization period.

revenue requirement to prevent double recovery, the remaining retail regulatory asset should not have been amortized to Accounts 920 and 926 because it was never approved by the Commission for rate recovery and amortization. Audit staff found that the retail regulatory asset amortized to Accounts 920 and 926 was not removed from those accounts for purposes of computing billings to wholesale transmission customers. Consequently, retail regulatory asset of approximately $3.6 million was incorrectly recovered in wholesale transmission rates.

BG&E

In 2003, the MD PSC approved a settlement agreement related to retail standard offer services (SOS).[21] The settlement provides for the provision of residential SOS and three other types of non-residential SOS to Maryland retail customers to enhance competition in the electric supply market in Maryland. The SOS is an alternative for retail customers to purchasing electric supply from a competitive supplier in Maryland. Based on the settlement, BG&E provided SOS to its Maryland retail customers and incurred incremental cost for providing such services. The incremental cost represented the difference between the cost of providing SOS and the revenues collected for recovery of those costs. BG&E recorded the deferral of the incremental cost of providing SOS to Maryland's retail electric customers in Account 182.3. The regulatory asset recorded in Account 182.3 was authorized for full recovery in retail rates by the MD PSC and amortized to Account 904, Uncollectible Accounts, and Account 921, Office Supplies and Expenses. BG&E's wholesale transmission formula rate references Account 921 in the computation of its wholesale transmission revenue requirement. Audit staff found that the portion of the SOS regulatory asset amortized to Account 921 was not removed from the account for purposes of computing billings to wholesale transmission customers as required by the Commission's regulations. Consequently, the SOS regulatory asset was incorrectly included in wholesale transmission rates.

[21] The MD PSC approved the retail standard offer services in case number 8908 (MD PSC Order No. 78400). The settlement agreement signatories include Baltimore Gas & Electric, Building Owners and Managers Association of Metropolitan Baltimore, Inc., Choptank Electric Cooperative, Inc., Constellation NewEnergy, Inc., Delmarva Power & Light d/b/a Conectiv Power Delivery, Maryland Energy Administration, Maryland Energy Users Group, Maryland Industrial Group, Maryland Office of People's Counsel, Maryland Public Service Commission Staff, Maryland Retailers Association, Mid-Atlantic Power Supply Association, Mirant Mid-Atlantic, LLC, Pepco Energy Services, Inc., Power Plant Research Program of the Department of Natural Resources, The Potomac Edison Company d/b/a Allegheny Power, Potomac Electric Power Company, Southern Maryland Electric Cooperative, Inc., and Strategic Energy, LLC.

ACE

Between 2011 and 2017, ACE experienced damages to its distribution systems due to major storms (i.e., Hurricane Sandy, Hurricane Irene, and Winter Storm Jonas). The New Jersey Board of Public Utilities approved a retail regulatory asset for recovery in retail rates related to the incremental costs of storm damage incurred by ACE on its distribution systems between 2011 and 2017.[22] ACE recorded the deferral of the incremental costs of storm damage in Account 182.3. The regulatory assets recorded in Account 182.3 were approved for full rate recovery in retail rates and amortized to Account 593, Maintenance of Overhead Lines (Major Only); Account 903, Customer Records and Collection Expenses; and Account 408.1, Taxes Other than Income Taxes, Utility Operating Income. ACE's wholesale transmission formula rate references Account 408.1 in the computation of its wholesale transmission revenue requirement. Audit staff found that the portion of the regulatory asset amortized to Account 408.1 was not removed from the account for purposes of computing billings to wholesale transmission customers as required by the Commission's regulations. Consequently, approximately $33,000 of the regulatory asset was recovered in wholesale transmission rates.

Pepco

In 2014, the MD PSC approved a regulatory asset for recovery in retail rates related to Accenture services costs.[23] The Accenture services costs were for a PHI initiative designed to reduce operating and maintenance expenses through renegotiation of engineering, construction services, and other miscellaneous contracts. Pepco recorded the deferral of the Accenture services costs in Account 182.3. The regulatory asset recorded in Account 182.3 was approved for full recovery in retail rates by the MD PSC and amortized to Account 923, Outside Services Employed. Pepco's wholesale transmission formula rate references Account 923 in the computation of its wholesale transmission revenue requirement. Audit staff found that the regulatory asset amortized to Account 923 was not removed from the account for purposes of computing billings to wholesale transmission customers as required by the Commission's regulations. Consequently, approximately $40,000 of the Accenture regulatory asset was recovered in wholesale transmission rates.

---

[22] The deferral of major storm costs was approved by the New Jersey Board of Public Utilities in NJ Docket No. ER16030252, and NJ Docket No. ER17030308.

[23] The deferral of the Accenture services costs was approved by the MD PSC in Order number 85724 in 2013. In 2014, in Order no. 86441, the MD PSC approved the recovery of the Accenture services costs deferred in 2013.

DPL

In 2008 and 2011, the Delaware Public Service Commission (DE PSC) and MD PSC approved a regulatory asset for DPL to recover, in its retail rates, costs related to Advance Metering Infrastructure (AMI) and storm damage.[24] AMI represented initial costs for the installation of smart meters and early retirement of legacy meters for Delaware distribution customers. Storm damage costs represented the incremental costs for the repair and restoration of DPL's Maryland distribution systems due to a storm in February 2010. DPL recorded the deferral of the AMI and storm damage costs in Account 182.3. The regulatory asset recorded in Account 182.3 for storm damage was approved for full recovery in retail rates and amortized to Account 593, Maintenance of Overhead Lines (Major Only); Account 935, Maintenance of General Plant; and Account 903, Customer Records and Collection Expenses. The regulatory asset recorded in Account 182.3 for AMI was approved for full recovery in retail rates and amortized to Account 923, Outside Services Employed. DPL's wholesale transmission formula rate references Accounts 923 and 935 in the computation of its wholesale transmission revenue requirement. Audit staff found that the regulatory assets amortized to Accounts 923 and 935 were not removed from those accounts for purposes of computing billings to wholesale transmission customers as required by the Commission's regulations. Consequently, approximately $33,000 of the regulatory asset was recovered in wholesale transmission rates.

Summary

Audit staff determined that the regulatory assets discussed above were not approved by the Commission for recovery in FERC jurisdictional rates. The Commission has stated, in Order No. 552 and subsequent orders, that any party desiring to recover expenses in rates other than in the period in which they would ordinarily be charged to expense must receive approval to recover the deferred cost and approval of the amortization period for recovery.[25] Such a required filing is not a mere formality; it is a

[24] The deferral of the AMI costs was approved by the DE PSC in Order No. 7420. The deferral of the storm damage costs was approved by the MD PSC in Order No. 84170.

Part 101, Account No. 182.3 (2002). Accordingly, any parties requesting regulatory asset treatment will be required to demonstrate that the costs at issue are both unrecoverable in existing rates and that it is probable that such costs will be recoverable in future rates."), *aff'd sub nom., Midwest ISO Transmission Owners v. FERC*, 373 F.3d 1361 (D.C. Cir. 2004); Order No. 552, 58 Fed. Reg. at 18,000 ("Account 182.3 would include costs . . . *which have been, or are soon expected to be, authorized for recovery through rates*") (emphasis added).

[26] *See, e.g.*, *PJM Interconnection, L.L.C. and Virginia Electric and Power Co.,* 110 FERC ¶ 61,234, at P 41 ("any transmission owner seeking to recover a regulatory asset in its rates . . . must submit a filing"); *Midwest Independent Transmission System Operator, Inc*., 104 FERC ¶ 61,012, at P 29 (discussing "standard to review rate filings for regulatory asset treatment" and holding "we will continue to apply the existing standard" which is that "any parties requesting regulatory asset treatment will be required to demonstrate that the costs at issue are both unrecoverable in existing rates and that it is probable that such costs will be recoverable in future rates.").

Although Exelon and its public utilities received approval from retail commissions to recover all or portions of the regulatory assets in retail rates, they did not seek Commission approval before recovering any amounts of the regulatory assets in wholesale transmission rates. Additionally, portions of regulatory assets not authorized for rate recovery by the Commission, a retail regulator, or other regulatory agencies may not be amortized under the Commission's accounting regulations. Therefore, the regulatory assets included in the public utilities' wholesale transmission revenue requirements were improper and led to unauthorized billings to wholesale transmission customers.

Recommendations

We recommend that Exelon and its public utilities:

13. Revise procedures for computing wholesale transmission formula rate billings to wholesale customers to exclude amortization of regulatory assets that have not been approved by the Commission.

14. Provide training to staff on the revised regulatory assets accounting and rate development methods. Also, develop a training program that supports the provision of periodic training in this area, as needed.

15. Submit a refund analysis to DAA, within 60 days of receiving the final audit report from DAA, that explains and details: (1) calculation of refunds that include the amount of inappropriate regulatory asset amortizations included in wholesale formula rates and the refunds resulting from inclusion of the amortizations in wholesale formula rates during the audit period, plus interest; (2) determinative components of the refund; (3) refund method; (4) customers to receive refunds; and (5) period(s) in which refunds will be made.

16. File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

17. Refund the amounts disclosed in the refund report to wholesale customers, with interest calculated in accordance with section 35.19a of Commission regulations.

Re: Exelon Corporation, Docket No. PA18-3-000
Response to Draft Audit Report

Dear Mr. Hunt:

This letter is in response to the draft audit report ("Draft Report"), dated October 21, 2019, issued by the Federal Energy Regulatory Commission (the "Commission), Office of Enforcement, Division of Audits and Accounting to Exelon Corporation ("Exelon").

The Draft Report evaluated Exelon and its public utility subsidiaries'[1] compliance, during the period from January 1, 2013 through March 26, 2019, with: (1) conditions established in the Commission's November 20, 2014 order authorizing the merger of Exelon and Pepco Holdings, Inc., (2) tariff requirements governing Exelon's public utilities' rates, (3) accounting regulations in 18 C.F.R. Part 101, and (4) financial reporting regulations in 18 C.F.R. Part 141.

The Draft Report identifies four areas of noncompliance and 17 recommendations to remedy the noncompliance findings. Exelon does not contest the Draft Report and generally agrees to the recommendations and corrective actions contained in the Draft Report in order to bring resolution to the audit. However, as described further in Attachment A, Exelon provides comments on the Draft Report's conclusions on several issues.

[1] Exelon's six public utility subsidiaries are Commonwealth Edison Company ("ComEd"), Baltimore Gas & Electric Company ("BGE"), PECO Energy Company ("PECO"), Atlantic City Electric Company ("ACE"), Delmarva Power & Light Company ("DPL"), and Potomac Electric Power Company ("Pepco").

Exelon takes its compliance obligations seriously and welcomes the opportunity to comment on the Draft Report in accordance with Part 41 of the Commission's regulations.[2] Exelon also notes the Commission audit staff's time and professionalism throughout the audit with appreciation.

Respectfully submitted,

/s/ *Thomas O'Neill*
Exelon Corporation
Senior Vice President and General Counsel
10 S. Dearborn St., 48th Floor
Chicago, IL 60603

ATTACHMENT A

Audit Staff Finding:

1. *Merger-Related Regulatory Assets*

Audit staff confirmed that BGE improperly included the amortization of merger-related regulatory assets approved by a retail regulator in wholesale transmission formula rates.

Exelon Response:

Exelon accepts this finding and the corresponding recommendations 1 through 4. BGE has updated its policies and procedures for its transmission formula rate update and implemented additional internal controls to mitigate the risk of including merger-related regulatory assets not approved by the Commission in wholesale transmission formula rates and billings to wholesale transmission customers. Taking a proactive stance to this issue, and resulting from BGE's identification of the amounts included in the transmission rates, BGE refunded $1.4 million plus interest to wholesale transmission customers in its 2018 formula rate update filed with the Commission on May 4, 2018. As noted in the Draft Report, BGE has fully satisfied recommendations 1 through 4.[3]

Audit Staff Finding:

2. *Transmission Formula Rate Allocators*

Audit staff found that ComEd and DPL improperly included merger costs when computing their transmission allocators, which resulted in overstatement of their annual transmission revenue requirements and billing to wholesale transmission customers.

Exelon Response:

Audit staff concludes that ComEd and DPL improperly included merger costs as a result of computing the transmission allocators. ComEd and DPL do not object to that finding and, as described further below, will undertake the corrective actions to the extent that they have not already done so.[4] The Exelon public utilities will implement policies to ensure that the merger costs are excluded from their transmission formula rate allocators.

[3] Exelon Corp., Docket No. PA18-3-000, Draft Audit Report of Exelon Corp., p. 14 (October 21, 2019).

[4] ComEd has established policies to ensure that it excludes merger costs from its transmission formula rate allocators and has included the refund amounts in its 2018 transmission formula rate update. ComEd will submit that information to the Commission consistent with the final audit report.

Audit Staff Finding:

3. *Merger Commitment Costs*

Audit staff found that ComEd, BGE, PECO, ACE, DPL, and Pepco improperly included merger commitment costs for the Exelon and Pepco Holdings, Inc. merger in their transmission revenue requirements.

Exelon Response:

Exelon undertook significant efforts to apply the Commission's hold harmless commitments and ensure that transmission customers did not receive costs that resulted from merger costs as defined by the Commission. With respect to the finding that the Exelon utilities improperly included merger commitment costs in the transmission revenue requirement, Exelon accepts this finding and the associated actions. Exelon agrees that certain costs incurred solely to implement merger commitments are appropriately excluded from the formula rates.

Exelon further appreciates the recognition by the audit staff that a distinction is to be made between merger costs incurred solely to fulfill merger commitments and costs that both fulfill merger commitments as well as continuing compliance obligations that existed previously or were incurred prior to, and independent of, the merger. In addition, some costs were incurred post-merger resulting from operations of a newly merged business, and do not constitute merger-related costs for which customers should be held harmless. Accordingly, as audit staff agrees and understands, not all costs associated with the many memorialized merger commitments are 'merger related' costs as described by the Commission or the 2014 Merger Order.

For these reasons, Exelon views as overly broad and therefore potentially inaccurate the Draft Report characterization that "all costs associated with implementing the merger commitments should have been excluded from the public utilities' transmission revenue requirements." Rather, it is only as to those costs that fall within hold harmless category of merger related costs as defined by the Commission for which corrective action has been properly prescribed by this audit, and to which Exelon concurs.

4. *Amortization of Retail Regulatory Asset*

Audit staff found that ComEd, BGE, ACE, DPL, and Pepco improperly recorded the amortization of certain regulatory assets and improperly included the amortization of the regulatory assets in their wholesale transmission formula rates without Commission approval to recover such amounts.

Exelon Response:

The affected Exelon utilities agree to provide refunds associated with the retail regulatory assets as generally described in the Draft Report for the January 1, 2013 through March 26, 2019 period of the audit in order to resolve the issue raised by audit staff. Exelon understands that this will resolve the issues with respect to all of the subject regulatory assets and that no further action will be taken or permitted pertaining to those regulatory assets. Exelon also agrees to the corrective actions noted in the Draft Report concerning the rate treatment of retail regulatory assets, without agreeing or conceding that actions taken were inappropriate or improper.

While not contesting the finding and corrective actions, Exelon respectfully submits that the policy guidance referenced in the Draft Report does not address the specific factual circumstances present regarding the formula rates and protocols of the Exelon utilities, and fails to both establish clear precedent for the result reached by the audit and to demonstrate that the amounts were improperly recorded in any respect. To the contrary, the annual amortizations relating to the regulatory assets identified were properly recorded by each utility in Accounts 920 and 926 and reported on the respective Form 1 in each year. Those accounts are automatically recovered in the Formula Rate of each utility because the Commission-approved formulas for each utility require that A&G expense be based on the amounts reported in the Form 1 and then allocated to transmission using the wages and salaries allocator. Given that the approved formula is the rate on file, the amounts included were proper not only for accounting purposes, but for ratemaking purposes as well. See *Pub. Utils. Comm'n of Cal. v. FERC*, 254 F.3d 250, 254-55 (D.C. Cir. 2001) (explaining that the formula is the rate and that underlying materials that impact the cost levels that will be charged through the rate need not be separately filed).

Moreover, recovery under similar circumstances has been approved and upheld by the Commission. Exelon invites your attention to Opinions 509 and 509-A, which support the conclusion that state-approved regulatory asset amortization amounts accounted for in specific FERC accounts may be flowed through a formula rate, as long as the formula rate specifically references and identifies that account. *La. Pub. Serv. Comm'n v. Entergy Corp*., Opinion No. 509, 132 FERC ¶ 61,253 (2010), *order on reh'g*, Opinion No. 509-A, 137 FERC ¶ 61,101 (2012).

Q. SDR-RR-35 Please provide the annual level of forfeited discounts or late payment charges for the preceding three calendar years. Identify the level of sales revenue with which these are associated.

A. SDR-RR-35 See below for late payment charges and associated revenue for the preceding three calendar years:

Year	Late Payment Fees	Sales Revenue*
2021	$ 265,067	$ 532,089,450
2022	$ 1,745,945	$ 723,928,874
2023	$ 2,107,505	$ 672,940,927

* Sales Revenue includes Residential, Commercial & Industrial and Gas Transportation revenues.

Q. SDR-RR-36 If not reflected in the lead-lag study, please provide a listing of the various types of employee withholdings, garnishments and other employee funds held by the Company for remittance at a later date.

Q. SDR-RR-37 Please provide all detailed workpapers supporting the adjustments to rate base and operating income.

A. SDR-RR-37 Refer to Exhibit MJT-1, Exhibit MJT-2, Exhibit MJT-3 and PECO Statement No. 3, the direct testimony of Michael J. Trzaska.

Q. SDR-RR-38 Please provide a copy of the Company's most recent SFAS 106 plan actuarial study.

A. SDR-RR-38 Refer to Confidential Attachment SDR-RR-38(a), which has been redacted to remove certain information that is not applicable to PECO.

THE ATTACHMENT IS CONFIDENTIAL AND IS SUBMITTED ONLY IN THE NON-PUBLIC VERSION TO THE COMMISSION.

Q. SDR-RR-39 Please reconcile the historical and future test year SFAS No. 106 expense levels with the amount identified in the actuarial report.

A. SDR-RR-39 Refer to Attachment SDR-RR-39(a).

PECO Energy
Postretirement Benefits Other than Pension ASC 715 (formerly SFAS No. 106) Costs
(in thousands)

	12 Months Ended 12/31/2023		12 Months Ended 12/31/2024 (Projected)		12 Months Ended 12/31/2025 (Projected)	
Operating & Maintenance						
Electric Distribution	$ 36		$ 528	B	$ 1,212	B
Electric Transmission	$ 3		$ 39		$ 93	
Gas	$ 11		$ 164		$ 377	
Non-Utility	$ 0		$ 5		$ 11	
Total Operating & Maintenance	$ 50		$ 735		$ 1,692	
Total Capital	$ 40		$ 639		$ 1,509	
Total Company Activity - Operating & Maintenance and Capital	$ 91	A	$ 1,375	A	$ 3,201	A

A - PECO's total costs agree to actuarial studies performed by Towers Watson**;** Refer to SDR-RR-38.
B - The above costs were allocated based on PECO's labor profile.

Q. SDR-RR-40 Please identify the actual or projected amounts contributed to SFAS No. 106 funds for the historic and future test years. Identify the actual or projected dates and amounts of the contributions.

A. SDR-RR-40 The Company contributed $13,890 to its total company Medical/Dental Trust Post Retirement (OPEB) contributions in December 2023. The Company is forecasted to contribute $1,279,000 and $3,190,000 in December 2024 and December 2025, respectively.

Q. SDR-RR-41 Please explain the funding options or plans which are being used for SFAS No. 106 costs. Identify the portion of the costs which are eligible for tax preferred funding.

A. SDR-RR-41 A voluntary employees' beneficiary association (VEBA) is a tax-exempt trust set up by an employer to cover employee eligible medical welfare benefits. The two VEBA trusts used to fund postretirement benefits are the Medical/Dental VEBA Trust and the Life Insurance VEBA Trust. The Life Insurance VEBA is used to pay life insurance benefits and the Medical/Dental VEBA is used to pay medical and dental benefits.

Q. SDR-RR-42 Is the company studying and/or anticipating any changes to its postretirement benefits offered to employees as a result of SFAS No. 106 or for other reasons? If yes, please provide such study and/or explain the anticipated change.

A. SDR-RR-42 At this time, the Company is not anticipating any changes to its post-retirement benefits offered to employees. The Company periodically reviews the competitiveness and cost of its post-retirement benefits and has been monitoring ongoing health care legislation as part of a continuing effort to assess whether changes should be made to these benefits; however, no changes are being considered by senior management at this time.

Q. SDR-RR-43 Please state whether the Company has included expenses related to SFAS No. 112 in its test year claim. If so, please provide complete details and include a copy of the actuarial study.

A. SDR-RR-43 With the exception of Exelon Business Service Company (BSC) severance expenses, there are no other ASC 712 (SFAS No. 112) related expenses included in the Company's test year claim. The 2024 and 2025 BSC severance expenses are $92,435 and $95,247 respectively, which are based on historical trend. There is no actuarial study available for severance expenses.

Q. SDR-RR-44 Please provide all documentation supporting the uncollectible accrual rate reflected in the Company's filing.

A. SDR-RR-44 Refer to PECO Statement No. 3, the direct testimony of Michael J. Trzaska, and Schedule D-10 of each of Exhibit MJT-1, Exhibit MJT-2 and Exhibit MJT-3.

Q. SDR-RR-45 Please provide all workpapers and documentation supporting the Company’s claimed balance of gas stored underground-¬current. Include support for the monthly injections and withdrawals and the gas cost rate.

A. SDR-RR-45 Refer to response I-A-16.

SDR-RR-46
Marissa Humphrey

Q. SDR-RR-46 Please provide a comparison between actual and budgeted O&M expenses by budget cost element for the historical test year and explain any budget variances of 10 percent or more.

A. SDR-RR-46

PECO Energy Company
Gas Business
Operating and Maintenance Actual vs Budget
(In Thousands)

	2023 Actual	2023 Planned	Over + / Under - Variance	% Change
Bad Debt	$ 2,895	$ 3,747	$ (852)	-23%
Base Payroll	$ 37,424	$ 40,210	(2,785)	-7%
BSC Contracting	$ 32,356	$ 29,994	2,362	8%
Contracting/Materials	$ 43,896	$ 46,494	(2,598)	-6%
Incentive	$ 5,539	$ 5,690	(151)	-3%
Overtime	$ 8,067	$ 6,542	1,526	23%
Pensions & Benefits	$ 4,631	$ 5,178	(547)	-11%
Transportation	$ 6,234	$ 6,553	(319)	-5%
Travel, Meals & Entertainment	$ 717	$ 665	52	8%
Reg Asset O&M	$ 2,694	$ 2,811	(117)	-4%
Other Net	$ 7,991	$ 8,546	(555)	-6%
Total	**$ 152,445**	**$ 156,429**	**$ (3,984)**	**-2.5%**

Bad Debt

Bad debt expenses were lower by $0.9M primarily due to the lower billing/revenue.

Overtime

Overtime was $1.5M higher primarily driven by higher gas odor investigation costs, damage work and emergent leaks. This is offset by lower base payroll.

Pensions & Benefits

Pension and Benefits were lower by $0.5M primarily due to lower base payroll.

Q. SDR-RR-47 Please provide the most recent actual number of eligible participants in each of the employee medical and dental plans reflected in the Company's filing.

A. SDR-RR-47 Refer to Attachment SDR-RR-47(a).

Q. SDR-RR-48 Please provide work papers showing the derivation of future test year Social Security and Medicare FICA taxes based on future test year labor expense. Identify both the total and O&M amounts.

A. SDR-RR-48 Refer to Exhibit MJT-1, Schedule D-16, for the requested tax expenses for the fully projected future test year and Exhibit MJT-2, Schedule D-16, for the requested tax expenses for the future test year.

Q. SDR-RR-49 Please provide work papers showing the derivation of future test year federal and state unemployment taxes. Show both the total and O&M amounts.

A. SDR-RR-49 Refer to Exhibit MJT-1, Schedule D-16 and Exhibit MJT-2, Schedule D-16.

Q. SDR-RR-50 Please provide workpapers showing the derivation of future test year capital stock taxes.

A. SDR-RR-50 The Pennsylvania Capital Stock tax has been eliminated by the Commonwealth of Pennsylvania, and the Company is not making a claim for that tax in this case. Refer to Exhibit MJT-1, Schedule D-16, and Exhibit MJT-2, Schedule D-16, for the fully projected future test year and future test year, respectively.

Q. SDR-RR-51 If applicable, please provide a copy of the billing and payment terms for all contracts between the Company and its parent or an affiliated company for services. Further, to the extent that the parent or affiliated company provides service to non-affiliated companies, please provide the corresponding billing and payment terms.

A. SDR-RR-51

The Company has two over-arching agreements that govern the provision of services with affiliates, the General Services Agreement (GSA), which governs services provided by Exelon Business Services Company (EBSC), and the Mutual Services Agreement (MSA), which governs services provided by PECO to other affiliates or services received by PECO from non-EBSC affiliates, both of which were approved by the Commission on January 1, 2001 as part of the ComEd/Exelon merger, and then re-approved by the Commission in 2013 in G-2010-2211383. In addition, the MSA/GSA was submitted to the Commission for informational purposes in the 2022 rate case.

The payment terms for services provided under the GSA are set forth in Exelon's Cost Allocation Manual and Service Catalog.

The payment terms for services provided under the MSA are set forth in PECO's Cost Allocation Manual and associated work orders, known as Affiliate Level Arrangements ("ALAs"). Copies of PECO's Cost Allocation Manual and the ALA template showing the pricing rule table are attached as Attachments SDR-RR-51(a.5) and (a.6).

Since April of 2013, PECO has been providing the Commission with its Service Level Agreements ("SLAs") and ALAs, for informational purposes only, as those arrangements are modified.

Exelon's parent and affiliated companies typically do not provide services to non-affiliated companies except for limited circumstances. For example, PECO's utility affiliates provide utility service to their customers pursuant to their regulated tariffs. In addition, Exelon Utility companies may provide mutual storm and emergency assistance to other utilities on a cost basis pursuant to industry-wide mutual assistance agreements.

Refer to Attachment SDR-RR-51(a.1) for Exelon's GSA.
Refer to Attachment SDR-RR-51(a.2) for PECO's MSA.
Refer to Attachment SDR-RR-51(a.3) for Exelon's Cost Allocation Manual.
Refer to Attachment SDR-RR-51(a.4) for Exelon's Service Catalog.
Refer to Attachment SDR-RR-51(a.5) for PECO's Cost Allocation Manual.
Refer to Attachment SDR-RR-51(a.6) for PECO's ALA Template.

GENERAL SERVICES AGREEMENT

BETWEEN

EXELON BUSINESS SERVICES COMPANY

AND

EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC; COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC.; AND THE SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY.

THIS AGREEMENT, made and entered into this 1st day of January, 2001, by and between the following Parties: EXELON BUSINESS SERVICES COMPANY ("Services Company"), EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC; COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC; AND THE SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY (collectively, the "Client Companies");

WITNESSETH:

WHEREAS, Client Companies, including EXELON CORPORATION, which is registered under the terms of the Public Utility Holding Company Act of 1935 (the "Act") and its other subsidiaries, affiliates and associates desire to enter into this agreement providing for the

performance by Services Company for the Client Companies of certain services as more particularly set forth herein;

WHEREAS, Services Company is organized, staffed and equipped and has filed with the Securities and Exchange Commission ("the SEC") to be a subsidiary service company under Section 13 of the Act to render to EXELON CORPORATION, and other subsidiaries, affiliates and associates of EXELON CORPORATION, certain services as herein provided; and

WHEREAS, to maximize efficiency, and to achieve merger related savings, the Client Companies desire to avail themselves of the advisory, professional, technical and other services of persons employed or to be retained by Services Company, and to compensate Services Company appropriately for such services;

NOW, THEREFORE, in consideration of these premises and of the mutual agreements set forth herein, the Parties agree as follows:

Section 1. Agreement to Provide Services

Services Company agrees to provide to Client Companies, upon the terms and conditions set forth herein, the services hereinafter referred to and described in Section 2, at such times, for such period and in such manner as Client Companies may from time to time request. Except with respect to "Corporate Governance Services" as defined in Section 7 hereof, the Services Company shall perform only those services as are requested by the Client Companies. Services Company will keep itself and its personnel available and competent to provide to Client Companies such services so long as it is authorized to do so by the appropriate federal and state regulatory agencies. In providing such services, Services Company may arrange, where it deems

appropriate, for the services of such experts, consultants, advisers and other persons with necessary qualifications as are required for or pertinent to the provision of such services.

Section 2. Services to be Provided

The services expected to be provided by Services Company hereunder may, upon request by a Client Company, include the services as set out in Schedule 2, attached hereto and made a part hereof. In addition to those identified in Schedule 2, Services Company shall provide such additional general or special services, whether or not now contemplated, as Client Companies may request from time to time and Services Company determines it is able to provide.

Notwithstanding the foregoing paragraph, no change in the organization of the Services Company, the type and character of the companies to be serviced, the factors for allocating costs to associate companies, or in the broad general categories of services to be rendered subject to Section 13 of the Act, or any rule, regulation or order thereunder, shall be made unless and until the Services Company shall first have given the SEC written notice of the proposed change not less than 60 days prior to the proposed effectiveness of any such change. If, upon the receipt of any such notice, the SEC shall notify the Services Company within the 60-day period that a question exists as to whether the proposed change is consistent with the provisions of Section 13 of the Act, or of any rule, regulation or order thereunder, then the proposed change shall not become effective unless and until the Services Company shall have filed with the SEC an appropriate declaration regarding such proposed change and the SEC shall have permitted such declaration to become effective.

Section 3. Changes in Parties

New direct or indirect subsidiaries, affiliates and associates of EXELON CORPORATION, which may come into existence after the effective date of this Services Agreement, may become additional Client Companies of Services Company and subject to this General Services Agreement. In addition, entities which are, as of the effective date of this General Services Agreement, direct or indirect subsidiaries, affiliates and associates of EXELON CORPORATION, may thereafter leave the holding company system, in which case they will no longer be subject to this General Services Agreement. The parties hereto shall make such changes in the scope and character of the services to be provided and the method of assigning, distributing or allocating costs of such services as may become necessary to achieve a fair and equitable assignment, distribution, or allocation of Services Company costs among associate companies taking into account both the new subsidiaries and the subsidiaries which have left the holding company system, subject to the provisions of Section 2 above.

Section 4. Compensation of Services Company

As compensation for the services to be rendered hereunder, Client Companies listed in Attachment A hereto, as revised from time to time, shall pay to Services Company all costs which reasonably can be identified and related to particular services provided by Services Company for or on Client Company's behalf (except as may otherwise be permitted by the SEC). All other Client Companies and their affiliates and associates (see Attachment B) shall pay to Services Company charges for services that are to be no less than cost (except as may otherwise be permitted by the SEC), insofar as costs can reasonably be identified and related by Services Company to its performance of particular services for or on behalf of Client Company.

The services described herein or contemplated to be provided hereunder shall be directly assigned, distributed or allocated by activity, project, program, work order or other appropriate basis. The factors for assigning or allocating Services Company costs to Client Company, as well as to other associate companies, are set forth in Schedules 1 and 2 attached hereto. Attachments A and B and Schedules 1 and 2 are each expressly incorporated herein and made a part hereof.

Any charges to the Client Companies on account of use of capital shall reflect a reasonable and efficient capital structure.

Section 5. Securities and Exchange Commission Rules

It is the intent of the Parties that the determination of the costs as used in this Agreement shall be consistent with, and in compliance with, the rules and regulations of the SEC, as they now exist or hereafter may be modified by the Commission.

Section 6. Service Review

The parties shall review each service covered by this Agreement on an as needed basis, to assess the quality of the service and to determine the continued need therefor, and shall, subject to the provisions of Section 2 above, amend the scope of services, delete services entirely from this Agreement, and/or decline services which are not "Corporate Governance Services," as defined in Section 7 hereof, as they determine to be necessary or desirable.

Section 7. Corporate Governance Services.

Whether or not requested by the Client Companies, the Services Company may provide to all Client Companies, and Client Companies shall pay Services Company for, "Corporate Governance Services." Corporate governance consists of those activities and services reasonably determined to be necessary for the lawful and effective management of Exelon System businesses. Corporate Governance Services may be supplied from functions such as accounting, finance, executive, strategic planning, legal, human resources/benefits, audit, corporate communications and public affairs, environmental, health and safety, government affairs and policy, and investor relations. Corporate Governance Services may include, but are not limited to, the following: planning and project evaluation; finance and treasury; accounting and analysis; risk management; tax; shareholder and investor relations; merger and acquisition services; strategic planning; diversity; employee and labor relations; HR planning and development; compensation and benefits; legal services in the areas of securities, PUHCA, employment, regulatory, contract, litigation and intellectual property laws; legal and administrative support to the Board of Directors; environmental compliance activities; ethics and compliance programs; management services for compliance with Federal laws, regulations and other policy requirements, including relationship management with the U.S. Congress and Federal agencies; corporate communications; branding; corporate events; charitable support; community relations and communications to local organizations; and communications to employees.

Section 8. Payment

Payment shall be by making remittance of the amount billed or by making

appropriate accounting entries on the books of the companies involved. Invoices shall be prepared on a monthly basis for services provided hereunder.

Section 9. EXELON CORPORATION

Except as authorized by rule, regulation, or order of the SEC, nothing in this Agreement shall be read to permit EXELON CORPORATION, or any person employed by or acting for EXELON CORPORATION, to provide services for other Parties, or any companies associated with said Parties.

Section 10. Client Companies

Except as limited by law or order of the SEC, Client Companies, their subsidiaries, affiliates and associates may provide services described herein to other Client Companies, their subsidiaries, affiliates and associates on the same terms and conditions as set out for the Services Company.

Section 11. Effective Date and Termination

This Agreement is executed subject to the consent and approval of all applicable regulatory agencies, and if so approved in its entirety, shall be deemed effective from the date that the merger between PECO ENERGY COMPANY and UNICOM CORPORATION was consummated, and shall remain in effect from said date unless terminated by mutual agreement or by any Party giving at least 90 days' written notice to the other Parties prior to the beginning of any calendar year, each Party fully reserving the right to so terminate this Agreement.

This Agreement may also be terminated or modified to the extent that performance may conflict with any rule, regulation or order of the SEC adopted before or after the making of this Agreement. This Agreement shall be terminated with respect to any Client Company immediately upon such Client Company ceasing to be a member of the Exelon holding company system.

The Parties' obligations under this Agreement which by their nature are intended to continue beyond the termination or expiration of this Agreement shall survive such termination or expiration.

Section 12. Access to Records

Records will be maintained in accordance with 17 C.F.R. §257 and in any event no less than seven years following a transaction under this Agreement. The Client Company may request access to and inspect the accounts and records of the Services Company, provided that the scope of access and inspection is limited to accounts and records that are related to such transaction.

Section 13. Assignment

This Agreement and the rights hereunder may not be assigned without the mutual written consent of all Parties hereto.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed and attested by their authorized officers as of the day and year first above written.

MUTUAL SERVICES AGREEMENT

BETWEEN

PECO ENERGY COMPANY

AND

EXELON CORPORATION AND ANY OR ALL OF ITS SUBSIDIARIES AND/OR AFFILIATES WHOLLY OR PARTLY-OWNED BY EXELON CORPORATION

AND

EXELON GENERATION COMPANY, LLC AND ANY OR ALL OF ITS SUBSIDIARIES AND/OR AFFILIATES WHOLLY OR PARTLY-OWNED BY EXELON GENERATION COMPANY, LLC

AND

EXELON ENTERPRISES, LLC AND ANY OR ALL OF ITS SUBSIDIARIES AND/OR AFFILIATES WHOLLY OR PARTLY-OWNED BY EXELON ENTERPRISES COMPANY, LLC

AND

COMMONWEALTH EDISON COMPANY AND ANY OR ALL OF ITS SUBSIDIARIES AND/OR AFFILIATES WHOLLY OR PARTLY-OWNED BY COMMONWEALTH EDISON COMPANY

THIS AGREEMENT, made and entered into this 1st day of January, 2001, by and between the following: PECO ENERGY COMPANY ("PECO"), a Pennsylvania Corporation; and Exelon Corporation ("Exelon") and any or all of its subsidiaries and/or affiliates wholly or partly-owned by Exelon Corporation; Exelon Generation Company, LLC ("Genco") and any or all of its subsidiaries and/or affiliates wholly or partly-owned by Genco; Exelon Enterprises Company, LLC ("Enterprises") and any or all of its subsidiaries and/or affiliates wholly or partly-owned by Enterprises; and Commonwealth Edison Company ("ComEd") and any or all of its subsidiaries and/or affiliates wholly or partly-owned by ComEd (hereinafter collectively the "Affiliates," PECO and its Affiliates are collectively referred to as "Parties.")

WITNESSETH:

WHEREAS, the Parties desire to enter into this Agreement providing for the performance of certain services as more particularly set forth herein; and

WHEREAS, to maximize efficiency, and to achieve cost savings, the Parties desire to avail themselves of the benefits of having services provided by the least cost provider thereof whenever possible, and to compensate such provider appropriately for such services;

NOW, THEREFORE, in consideration of these premises and of the mutual agreements set forth herein, the Parties agree as follows:

Section 1. Definitions

Commission – the Pennsylvania Public Utility Commission.

Providing Company – one or more Parties to this Agreement that have agreed to provide requested services to another Party in accordance with the terms of this Agreement.

Requesting Company – one or more Parties to this Agreement that are requesting services to be provided by another Party in accordance with the terms of this Agreement

Section 2. Agreement to Provide Services

PECO and Affiliates agree to provide, upon the terms and conditions set forth herein, services including but not limited to those services hereinafter referred to and described in Section 3, at such times, for such period and in such manner as Requesting Company may from time to time request and Providing Company concludes it is able and willing to provide. In providing such services, Providing Company may arrange, as it deems appropriate, for the services of such experts, consultants, advisers, and other persons with necessary qualifications as are required for or pertinent to the provision of the requested services.

Section 3. Services to be Provided

A Providing Company shall render services as Requesting Company may request from time to time and Providing Company determines it is able and willing to perform.

Section 4. New Affiliates

New direct or indirect affiliates of PECO, which may come into existence after the effective date of this Mutual Service Agreement, may become parties to this Agreement. The Parties hereto shall make such changes in the scope and character of the services to be provided and the method of assigning, distributing or allocating costs of such services as may become necessary to achieve a fair and equitable assignment, distribution, or allocation of costs among all Requesting Companies, including the new affiliates.

Section 5. Compensation of Providing Company

As compensation for the services to be provided hereunder, a Requesting Company shall generally pay to Providing Company charges for services that are no more than the cost thereof (except as otherwise directed or permitted by an appropriate regulatory authority), insofar as costs can reasonably be identified and related to the particular services in question or otherwise fairly and equitably allocated to such services. To the extent that PECO or its affiliated Electric Generation Supplier (as that term is defined in the Pennsylvania Public Utility Code) are participants in a particular transaction, the Requesting Company shall pay to Providing Company charges for services that comply with the Commission's decisions, rules and regulations, including the Commission-approved settlement of Docket Nos. R-00973953 and P-00971265 and Appendices G and H thereto. In addition, all transactions conducted hereunder shall be subject to the Public Utility Holding Company Act of 1935, as administered by the Securities and Exchange Commission.

Section 6. Service Requests

The services described herein or contemplated to be provided hereunder shall be directly assigned, distributed or allocated by activity, project, program, work order or other appropriate basis.

Section 7. Payment

Payment shall be by making remittance of the amount billed or by making appropriate accounting entries on the books of the companies involved. Invoices shall be prepared on a monthly basis for services provided hereunder.

Section 8. Effective Date and Termination

This Agreement has been approved by the Commission in Docket No. A-110550F0147 and shall become effective as of the date of execution and shall remain in effect from said date unless terminated by the Commission or by mutual agreement. Any Party may withdraw from this Agreement by giving at least sixty days written notice to the other Parties prior to withdrawal.

Section 9. Access to Records

For the seven years following a transaction under this Agreement, the Requesting Company may request access to and inspect the accounts and records of the Providing Company, provided that the scope of access and inspection is limited to accounts and records that are related to such transaction.

Section 10. Assignment

This Agreement and the rights hereunder may not be assigned without the mutual written consent of all Parties hereto.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed and attested by their authorized officers as of the day and year first above written.

VERIFICATION

I, Richard A. Schlesinger, hereby declare that I am Manager, Retail Rates of PECO Energy Company; that, as such, I am authorized to make this verification on its behalf; that the facts set forth in the foregoing Request for Contract Approval are true and correct to the best of my knowledge, information and belief; and that I make this verification subject to the penalties of 18 Pa.C.S. §4904 pertaining to false statements to authorities.

Richard A. Schlesinger

Date: November 17, 2010

EXELON BUSINESS SERVICES COMPANY

ASSOCIATE TRANSACTION PROCEDURES MANUAL

January 2023

Introduction

Exelon Business Services Company, LLC (BSC or Services Company) provides a variety of administrative, management and support services to Exelon Corporation and other Exelon system companies and business units (Client Companies). BSC is subject to the rules and regulations of the Federal Energy Regulatory Commission (FERC) pursuant to the Public Utility Holding Company Act of 2005 (PUHCA). In addition, each of the individual state regulated public utility companies have additional requirements related to associate transactions. Where applicable, these requirements have been incorporated into these Policies and Procedures.

Service Agreements and Work Orders

BSC has entered into a General Services Agreement or Service Agreement with Client Companies that is substantially similar to the General Services Agreement (GSA) attached hereto as Exhibit A. The Service Agreement sets forth in general terms the services to be performed by BSC directly or indirectly for Client Companies. BSC and each Client Company will prepare Work Orders, in the form of Service Level Arrangements (SLA), to specify the services to be performed by BSC for a Client Company. A sample SLA is attached hereto as Exhibit B. Additional documentation of work to be performed pursuant to SLAs may be used by the parties.

The purpose of the SLA is to establish service expectations between BSC and each Client Company. Each SLA will be reviewed and agreed upon on an as needed basis by authorized representatives of BSC and each Client Company. In conjunction with this review of SLAs, the allocation methods and ratios presented in Service Agreement Schedules 1 and 2, attached to the GSA, shall be reviewed and agreed upon by the parties.

An SLA typically contains the following elements:

1. Scope of Services
2. Service Level Expectations
3. Unit Cost Expectations
4. Performance Measures
5. Billing Process

Each SLA is approved by the individual(s) authorized to represent BSC and the Client Company related to the services to be provided.

BSC currently has three distinct processes related to SLAs.

1. The SLA process starts with the BSC Service Providers and the Client Companies representatives meeting to agree upon services to be provided over a future period of time, generally one to three years in duration. As BSC has been in operation for over ten years, most services have been defined and have been agreed to by the parties, and have been delivered efficiently and consistently to the Client Companies for a period of time. New service areas and services may be added in the future, or may be removed from the BSC services offerings. The SLA meetings focus on changes to service offerings and on refining the expected quantities to be consumed, as well as on improvements in providing the services or changes in the operational requirements around providing the services, including benchmarking and performance metrics, definition of responsibilities and other provisions between Service Providers and customer. The Service Providers are responsible for the over-all content in the Exelon BSC Service Catalog. Portions of the SLA template and Exelon BSC Service Catalog are reviewed by Legal. Early in the SLA process, the Legal review concentrates on the scope, governing agreement and certain terms and conditions. The Accounting review of the Exelon BSC Service Catalog and SLA drafts takes place near the end of the process and concentrates on the billing approach and pricing table sections of the Exelon BSC Service Catalog for compliance to the GSA and other PUHCA 2005 requirements. BSC Finance will check completed SLAs to make sure that changes are not made after Legal and Accounting review, or if such changes have been made, will obtain Legal and/or Accounting review of the changes. BSC Finance shall retain documentation evidencing the required SLA reviews in accordance with the record retention requirements. BSC works with the accounting and finance departments in the Client Companies to set-up the code block that the customer wants to be charged for the various services, and the level (company level, intermediate level, or department level) at which they wish to be billed. BSC Accounting works with BSC Finance to set up the appropriate accounting – cost capture pools on BSC's books. For most customers, the BSC Billing Systems journalize the actual monthly charges on the customer's books during the financial close.

2. The second process relates to change orders and other emergent work that appear after budgets have been locked down and the actual year has begun. Similar to the SLA process, BSC Accounting is involved to review any change orders for GSA and PUHCA compliance, and work with the customers' accounting departments to set-up and bill each item appropriately.

3. The third process relates to acquisitions or other new potential business for BSC. The BSC Service Providers interface with the M&A Team. The BSC support services costs are developed and include one-time and on-going support costs. Emergent work projects are set-up to collect one-time charges of adding the acquisition into BSC established services. BSC may prepare a proposal capturing integrated support service scope, schedule, budget, and assumptions. Linkage to an existing customer SLA is generally preferred, otherwise a new SLA may need to be created. For new SLA work, general terms and conditions are reviewed and signed by the controlling customer authorizing the work to proceed. BSC Finance and BSC Accounting gets involved in similar roles as mentioned above for the other processes.

Accounting Procedures

BSC will maintain processes which allow it to accumulate costs in Cost Centers and cost pools. Where possible, these costs will be charged out to Client Companies using direct charging methodologies, including time and materials and unit price (standard rate) basis. Cost Centers and cost pools collect resource costs for services and activities described in the Exelon BSC Service Catalog. This process supports the philosophy of billing costs to the Client Company on

an appropriate basis. BSC will use this process to maintain accounting systems to record all of its costs.

Costs will be billed to Client Companies as work is performed and costs are incurred. When a service requested by a Client Company has not been previously specified, a new SLA may be created or the existing one revised. BSC Accounting is responsible for ensuring that all of the billing methodologies are consistent with the GSA.

Direct Costs are defined as those that can be identified as applicable to services performed for a single Client Company or group of Client Companies. Direct costs include the fully distributed cost of providing a particular service. The fully distributed costs include labor costs, labor related costs (such as pensions and benefit costs, and facility costs), IT costs, outside services where applicable, back office support costs of running BSC, and other non-labor costs such as materials and supplies. Direct Costs will be charged to the Client Company or Companies responsible for the activity.

BSC will use direct charging (e.g., standard costing or unit prices and/or time and materials) and cost allocations to bill Client Companies. Under a standard costing methodology, as product or service units are used by the Client Companies, the services are directly billed to Client Companies at standard rates. Standard rates are fully cost burdened billing unit rates used by a specific department for a specified service. These rates are established for a number of services offered by the Services Company including invoice processing cost per invoice, mainframe computing cost per CPU usage, and IT desktop support cost per desktop computer. In general, these standard rates are calculated by estimating the fully distributed cost of providing the service for the year divided by the expected number of units (selected as the unit of measurement) to be consumed by all associated customers.

Residual amounts or costs that cannot be directly billed using reasonable measures will remain in the Cost Center to be allocated to Client Companies on an appropriate basis.

Indirect Costs include those costs of a general nature such as general services, and other support costs which cannot be specifically identified to a specific client company or smaller group of companies or to a specific service and therefore must be allocated. An example of Indirect Costs includes most corporate governance services that benefit all companies, which consists of, for example, functions such as accounting, finance, executive, strategic planning, investor relations, government affairs and policy, and corporate communications. The allocation methods used to assign costs to Client Companies will be based on factors identified in Schedule 1 attached to the GSA.

Services and Service Level Arrangements (SLA)

Based on experience and discussions with the Client Companies, BSC has made available a list of service offerings that are defined in the Exelon BSC Service Catalog for the SLA period. Responsibilities of Client Companies for requesting services are defined in the Exelon BSC Service Catalog. A listing of current SLAs and the Exelon BSC Service Catalog can be found on the Exelon Intranet under Operating Companies – BSC.

Services provided will be reviewed on an as needed basis by BSC and Client Companies. SLAs will be prepared for on-going and for special services, which benefit one or more Client Companies. Examples of on-going services are payroll processing and IT desktop support. SLAs will be approved by the individual(s) authorized to represent BSC and each Client Company in accordance with Company Capital Approval Policies. In all cases, the authorized approvers representing BSC and the Client Company will be different individuals.

When a new service or project is identified, BSC Finance and BSC Accounting will determine whether a new SLA shall be used or whether the costs shall be captured in an existing SLA. One or more of the following criteria should be considered in determining the need for a new SLA:

1. No existing SLA uses the billing methodology that is needed for the new service project.

2. No existing SLA charges costs to the benefiting Client Company for the new service or project.

3. There is a specific regulatory requirement to allocate costs in a specific manner regardless of amount for the new project/service.

4. No existing SLA captures similar activity or services.

5. The total estimated annual cost of the new service or project is greater than $500,000.

SLA (Work Order) Monitoring and Control

BSC Finance and BSC Accounting are responsible for reviewing, monitoring and maintaining the SLA (Work Order) and Exelon BSC Service Catalog documentation. BSC Finance and BSC Accounting will also authorize new SLAs as necessary. A formal annual review will be required of all SLAs including a review by legal. As part of the annual review, inactive SLAs will be removed.

Allocation Factors Update and Revisions

Allocation factors will be based on cost drivers specifically applicable to the service provided. BSC Accounting will have the primary responsibility for ensuring that allocation factors are correct, accurate and current. BSC Finance and the Service Providers will assist in gathering required usage and other data to calculate the allocation factors.

BSC Accounting will be responsible for evaluating new allocation methodologies and will consult the Legal Department as needed. Adequate supporting documentation shall be obtained from all associate companies/business units for the raw data used in the allocation methodologies, and maintained in accordance with record retention requirements set forth in the Exelon record retention policy and schedule.

A list of current allocations will be filed annually with the FERC on FERC Form No. 60.

Time Reporting

All BSC employees, including executives, shall keep, within reasonable cost, time records supporting labor charged to separately identifiable goods and services performed for Client Companies. Time records are kept in a timekeeping management system or manually on time sheets.

Employees will record time weekly in a minimum of one-hour increments. Departments may elect to record employees' time in increments smaller than an hour to meet special needs.

The employee's immediate supervisor will review and approve time reports. The BSC Controller's organization will be the authorized delegate for the review of executive time records. Time records will be maintained in accordance with record retention requirements set forth in the Exelon record retention policy and schedule.

Billing and Review

BSC shall prepare a monthly invoice report detailing the services / products provided by Service Area for each Client Company. Payment shall be made by the Client Company by making remittance or by making (offsetting) accounting entries of the amount billed. Payment term (or appropriate offsetting accounting entries) is within thirty days of receipt.

Dispute Resolution Procedure

In the event there is a dispute between the Client Company and BSC regarding a billing methodology and/or amount, representatives of the Services and Client Companies will meet to discuss the issue. If a resolution cannot be reached among the Parties, the issue will be referred to each Party's executive management for final resolution.

Internal Audit Control

Internal Audit, under the direction of the General Auditor, will conduct periodic reviews of BSC's business processes and systems to ensure that the services provided are properly documented and charged to the Client Companies on an appropriate basis. Reviews shall be performed such that all major service areas are evaluated over time. Internal Audit will also conduct reviews of transactions and SLA charge methods to assess whether they comply with

regulatory requirements. Internal Audit will also review the BSC allocations and corporate governance costs every two years.

Internal Audit maintains an independent role and has direct contact to Exelon's Audit Committee. Audit findings, recommendations and progress toward resolution of findings are reported to the Audit Committee and Senior Management as appropriate.

Budgeting

Budgeting for BSC will be a joint effort between it and other Client Companies. Renewal / revision of SLAs for the upcoming budget period will provide the basis for preparing budgets.

Evaluation

BSC will review its costs for competitiveness on a regular basis. Benchmarking and other measurement techniques will be used to the extent deemed appropriate by senior management. Additionally, BSC will also initiate a customer review process to gauge the value and quality of the services provided. Results will be shared with the Client Companies to allow them to evaluate cost effectiveness and assess alternate options.

EXHIBIT A

GENERAL SERVICES AGREEMENT

BETWEEN

EXELON BUSINESS SERVICES COMPANY

AND

EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC; COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC.; AND THE SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY.

THIS AGREEMENT, made and entered into this 1st day of January, 2001, by and between the following Parties: EXELON BUSINESS SERVICES COMPANY ("Services Company"), EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC; COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC; AND THE SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY (collectively, the "Client Companies");

WITNESSETH:

WHEREAS, Client Companies, including EXELON CORPORATION, which is registered under the terms of the Public Utility Holding Company Act of 1935 (the "Act") and its other subsidiaries, affiliates and associates desire to enter into this agreement providing for the

performance by Services Company for the Client Companies of certain services as more particularly set forth herein;

WHEREAS, Services Company is organized, staffed and equipped and has filed with the Securities and Exchange Commission ("the SEC") to be a subsidiary service company under Section 13 of the Act to render to EXELON CORPORATION, and other subsidiaries, affiliates and associates of EXELON CORPORATION, certain services as herein provided; and

WHEREAS, to maximize efficiency, and to achieve merger related savings, the Client Companies desire to avail themselves of the advisory, professional, technical and other services of persons employed or to be retained by Services Company, and to compensate Services Company appropriately for such services;

NOW, THEREFORE, in consideration of these premises and of the mutual agreements set forth herein, the Parties agree as follows:

Section 1. Agreement to Provide Services

Services Company agrees to provide to Client Companies, upon the terms and conditions set forth herein, the services hereinafter referred to and described in Section 2, at such times, for such period and in such manner as Client Companies may from time to time request. Except with respect to "Corporate Governance Services" as defined in Section 7 hereof, the Services Company shall perform only those services as are requested by the Client Companies. Services Company will keep itself and its personnel available and competent to provide to Client Companies such services so long as it is authorized to do so by the appropriate federal and state regulatory agencies. In providing such services, Services Company may arrange, where it deems

appropriate, for the services of such experts, consultants, advisers and other persons with necessary qualifications as are required for or pertinent to the provision of such services.

Section 2. Services to be Provided

The services expected to be provided by Services Company hereunder may, upon request by a Client Company, include the services as set out in Schedule 2, attached hereto and made a part hereof. In addition to those identified in Schedule 2, Services Company shall provide such additional general or special services, whether or not now contemplated, as Client Companies may request from time to time and Services Company determines it is able to provide.

Notwithstanding the foregoing paragraph, no change in the organization of the Services Company, the type and character of the companies to be serviced, the factors for allocating costs to associate companies, or in the broad general categories of services to be rendered subject to Section 13 of the Act, or any rule, regulation or order thereunder, shall be made unless and until the Services Company shall first have given the SEC written notice of the proposed change not less than 60 days prior to the proposed effectiveness of any such change. If, upon the receipt of any such notice, the SEC shall notify the Services Company within the 60-day period that a question exists as to whether the proposed change is consistent with the provisions of Section 13 of the Act, or of any rule, regulation or order thereunder, then the proposed change shall not become effective unless and until the Services Company shall have filed with the SEC an appropriate declaration regarding such proposed change and the SEC shall have permitted such declaration to become effective.

Section 3. Changes in Parties

New direct or indirect subsidiaries, affiliates and associates of EXELON CORPORATION, which may come into existence after the effective date of this Services Agreement, may become additional Client Companies of Services Company and subject to this General Services Agreement. In addition, entities which are, as of the effective date of this General Services Agreement, direct or indirect subsidiaries, affiliates and associates of EXELON CORPORATION, may thereafter leave the holding company system, in which case they will no longer be subject to this General Services Agreement. The parties hereto shall make such changes in the scope and character of the services to be provided and the method of assigning, distributing or allocating costs of such services as may become necessary to achieve a fair and equitable assignment, distribution, or allocation of Services Company costs among associate companies taking into account both the new subsidiaries and the subsidiaries which have left the holding company system, subject to the provisions of Section 2 above.

Section 4. Compensation of Services Company

As compensation for the services to be rendered hereunder, Client Companies listed in Attachment A hereto, as revised from time to time, shall pay to Services Company all costs which reasonably can be identified and related to particular services provided by Services Company for or on Client Company's behalf (except as may otherwise be permitted by the SEC). All other Client Companies and their affiliates and associates (see Attachment B) shall pay to Services Company charges for services that are to be no less than cost (except as may otherwise be permitted by the SEC), insofar as costs can reasonably be identified and related by Services Company to its performance of particular services for or on behalf of Client Company.

The services described herein or contemplated to be provided hereunder shall be directly assigned, distributed or allocated by activity, project, program, work order or other appropriate basis. The factors for assigning or allocating Services Company costs to Client Company, as well as to other associate companies, are set forth in Schedules 1 and 2 attached hereto. Attachments A and B and Schedules 1 and 2 are each expressly incorporated herein and made a part hereof.

Any charges to the Client Companies on account of use of capital shall reflect a reasonable and efficient capital structure.

Section 5. Securities and Exchange Commission Rules

It is the intent of the Parties that the determination of the costs as used in this Agreement shall be consistent with, and in compliance with, the rules and regulations of the SEC, as they now exist or hereafter may be modified by the Commission.

Section 6. Service Review

The parties shall review each service covered by this Agreement on an as needed basis, to assess the quality of the service and to determine the continued need therefor, and shall, subject to the provisions of Section 2 above, amend the scope of services, delete services entirely from this Agreement, and/or decline services which are not "Corporate Governance Services," as defined in Section 7 hereof, as they determine to be necessary or desirable.

Section 7. Corporate Governance Services.

Whether or not requested by the Client Companies, the Services Company may provide to all Client Companies, and Client Companies shall pay Services Company for, "Corporate Governance Services." Corporate governance consists of those activities and services reasonably determined to be necessary for the lawful and effective management of Exelon System businesses. Corporate Governance Services may be supplied from functions such as accounting, finance, executive, strategic planning, legal, human resources/benefits, audit, corporate communications and public affairs, environmental, health and safety, government affairs and policy, and investor relations. Corporate Governance Services may include, but are not limited to, the following: planning and project evaluation; finance and treasury; accounting and analysis; risk management; tax; shareholder and investor relations; merger and acquisition services; strategic planning; diversity; employee and labor relations; HR planning and development; compensation and benefits; legal services in the areas of securities, PUHCA, employment, regulatory, contract, litigation and intellectual property laws; legal and administrative support to the Board of Directors; environmental compliance activities; ethics and compliance programs; management services for compliance with Federal laws, regulations and other policy requirements, including relationship management with the U.S. Congress and Federal agencies; corporate communications; branding; corporate events; charitable support; community relations and communications to local organizations; and communications to employees.

Section 8. Payment

Payment shall be by making remittance of the amount billed or by making

appropriate accounting entries on the books of the companies involved. Invoices shall be prepared on a monthly basis for services provided hereunder.

Section 9. EXELON CORPORATION

Except as authorized by rule, regulation, or order of the SEC, nothing in this Agreement shall be read to permit EXELON CORPORATION, or any person employed by or acting for EXELON CORPORATION, to provide services for other Parties, or any companies associated with said Parties.

Section 10. Client Companies

Except as limited by law or order of the SEC, Client Companies, their subsidiaries, affiliates and associates may provide services described herein to other Client Companies, their subsidiaries, affiliates and associates on the same terms and conditions as set out for the Services Company.

Section 11. Effective Date and Termination

This Agreement is executed subject to the consent and approval of all applicable regulatory agencies, and if so approved in its entirety, shall be deemed effective from the date that the merger between PECO ENERGY COMPANY and UNICOM CORPORATION was consummated, and shall remain in effect from said date unless terminated by mutual agreement or by any Party giving at least 90 days' written notice to the other Parties prior to the beginning of any calendar year, each Party fully reserving the right to so terminate this Agreement.

This Agreement may also be terminated or modified to the extent that performance may conflict with any rule, regulation or order of the SEC adopted before or after the making of this Agreement. This Agreement shall be terminated with respect to any Client Company immediately upon such Client Company ceasing to be a member of the Exelon holding company system.

The Parties' obligations under this Agreement which by their nature are intended to continue beyond the termination or expiration of this Agreement shall survive such termination or expiration.

Section 12. Access to Records

Records will be maintained in accordance with 17 C.F.R. §257 and in any event no less than seven years following a transaction under this Agreement. The Client Company may request access to and inspect the accounts and records of the Services Company, provided that the scope of access and inspection is limited to accounts and records that are related to such transaction.

Section 13. Assignment

This Agreement and the rights hereunder may not be assigned without the mutual written consent of all Parties hereto.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed and attested by their authorized officers as of the day and year first above written.

All other Client Companies and their affiliates and associates not referred to in Attachment A.

Service Agreement Schedule 1

Allocation Ratios:

General:

Direct charges shall be made so far as costs can be identified and related to the particular transactions involved without excessive effort or expense. Other elements of cost, including taxes, interest, other overhead, and compensation for the use of capital procured by the issuance of capital stock, shall be fairly and equitably allocated using the ratios set forth below.

Revenue Related Ratios:

Revenues
Sales - Units sold and/or transported
Number of Customers

Expenditure Related Ratios:

Total Expenditures
Operations and Maintenance Expenditures
Capital Expenditures
Service Company Billings
Service Company SLA Billings (Non-governance)

Labor/Payroll Related Ratios:

Labor / Payroll
Number of Employees

Units Related Ratios:

Usage (for example: CPU's, square feet , number of vendor invoice payments)
Consumption (for example: tons of coal, gallons of oil, MMBTU's)
Capacity (for example: nameplate generating capacity, peak load, gas throughput)
Other units related

Assets Related Ratios:

Total Assets
Current Assets
Gross Plant

Composite Ratios:

Total Average Assets and 12 months ended Gross Payroll
Modified Massachusetts Formula
Other composite ratios

Introduction

This EBSC Service Catalog describes all EBSC Services and standard levels of service delivery offered and provided by EBSC Practice Areas to all Exelon's Client Companies.

Practice Areas are:

- Compliance, Audit and Risk
- Corporate & Information Security Services (CISS)
- Corporate Affairs
- Corporate Strategy, Innovation, & Sustainability (CSIS)
- Executives (Includes GCAs)
- Exelon Utility Operations (Includes Transmission Strategy & Compliance)
- Finance, Investments, Development, and Risk
- Government and Regulatory Affairs & Public Policy
- Human Resources
- IT
- Legal Services (Includes Corporate Governance)
- Real Estate
- Supply
- Transportation

Exelon Business Services Company ("BSC" or "EBSC") establishes a Service Level Arrangement (SLA) document with each Client Company to which they provide services. Each EBSC SLA between EBSC and a Client Company documents the specific list of EBSC Services by Practice Area provided to each Client Company as well as any additional Affiliate Specific Assumptions that may be uniquely requested by or provided to that Client Company.

Service Table Definition

Service Table includes:

- **Service ID and Service Name,** which identifies the service within the Inter-Company Billing system.

- **Service Description**, which describes the content and scope of the EBSC Practice Area Services.
- **Service Owner,** leader accountable for the definition, direction and delivery of the service, typically a VP or higher.

FERC Account and Billing Approach Table includes:

- **Service ID and Service Name,** which identifies the service within the Inter-Company Billing system.
- **Major Client FERC Account,** identifies the account per the Federal Energy Regulatory Commission (FERC) uniform system of accounts **Billing Approach**, which includes Allocated and Direct:
    - **Allocated**: When the services provided are not specifically assignable to one specific client company and will benefit multiple client companies, the service cost is allocated to the client companies based on a cost causative method.
    - **Direct**: Typically used when resources or costs are attributable to service delivery to one specific customer. Examples include Time and Material costs that are tracked and billed to customers and **R*Q (Unit Based):** Used when service cost is tied to units of a service consumed by a customer (service driver). During the planning period, demand is forecasted, total cost of service delivery is budgeted, and Unit Price (Rounded) is determined by: [Service Budget] / [Total Forecasted Demand]. Monthly charge is based on [Actual monthly BU Demand] * [Unit Price]. Direct charges can also be billed through positive time reporting or projects billed to a specific customer.
- **Basis,** which describes the demand or allocation driver or basis of the billing method.

Performance Measurement Table:

The Performance Management section is optional and can be used to outline the standard by which the practice area monitors and reports performance, the level of service that will be expected to be met at a minimum, and target levels that will be expected to be met or exceeded on negotiated timelines (if applicable).

Responsibilities Table:

The Responsibilities section of the SLA is optional and can be used to provide clarity and ownership of the responsibilities between EBSC and the Client Company and/or Identify who is responsible for each activity or decision that is required to provide or receive a service.

Compliance, Audit and Risk Services

Compliance, Audit and Risk Services Introduction

The Compliance, Audit and Risk Services function encompasses three separate but complementary teams: Compliance & Ethics, Enterprise Risk Management, and Exelon Audit Services.

Compliance, Audit and Risk Services Table

Service Table

Service ID	Service Name	Service Description	Service Owner

646	Exelon Audit Services	• Provide internal controls assurance and stewardship as well as operational assurance including, but not limited to:
		  • Review the reliability and integrity of financial and operating information and the means used to identify measure, classify, and report such information.
		  • Review the means of safeguarding assets and, as appropriate, verify the existence of such assets.
		  • Review and test established systems of internal control to ascertain whether they are functioning as designed.
		• Coordinate with other control and monitoring functions (e.g. risk management, compliance, CISS, legal, ethics, environmental, external auditors, etc.) and enable control owners and self-assessors.
		• Service offerings include Assurance and Business Enablement (inclusive of Sarbanes Oxley and anti-fraud).
			SVP, Audit Services

953	Compliance & Ethics	• Provides governance and oversight for Exelon's compliance with its regulatory and compliance obligations, including working with business units to ensure compliance risks are regularly assessed, appropriate controls are designed, implemented, and tested, and appropriate guidance is provided regarding compliance issues. • Provides enterprise-wide support and representation of business units on bulk electric system reliability and cybersecurity compliance matters. • Oversees and supports the delivery of training and awareness communications across the enterprise on topics implicating regulatory compliance and ethics risks.	EVP Compliance, Audit and Risk

Service ID	Service Name	Service Description	Service Owner
		• Serves as the primary resource for ethics advice and interpretation of the Code of Business Conduct, including management of Code disclosures and attestations. • Maintains a Help Line and a dedicated web portal (hosted by a third-party) for stakeholders to report concerns regarding potential ethical, compliance or legal violations. The Ethics Help Line and web portal offer anonymous reporting options 24-hours a day, every day of the year. • Actively monitors the receipt of Help Line reports or other reports of potential violations of the Code of Business Conduct and ensures each report is properly assessed and, when warranted, oversee and complete objective investigations and participate in the process for determining appropriate corrective action when wrongdoing is substantiated. •	
638	BSC Enterprise Risk Management Services	• Enterprise risk management, governance, and oversight • Responsible for the development of a comprehensive enterprise risk framework with policies/processes and implementation of enterprise reporting of risk metrics and limits • Understand and assist in mitigating all potential enterprise-wide risks • Administration and governance of OpCo level Risk Management Committee (RMC) meetings & content	EVP Compliance, Audit and Risk
233	Risk As Requested	• As requested services represent emergent work requiring additional resources relative to the plan and are services specifically requested by a Client Company, Exelon's CEO or Board of Directors	EVP Compliance, Audit and Risk
833	BSC Revenue Adjustment	The difference between actual cost and revenues from billings to the Client Companies is "trued up" each year by allocating it pro rata to the Client Companies based on their share of Total Service Billings.	EVP Compliance, Audit and Risk
904	BSC Costs to Achieve	Costs associated with establishing operations as a result of a merger, acquisition, split, or divestiture.	EVP Compliance, Audit and Risk

FERC Account and Billing Approach Table

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
646	Exelon Audit Services	923 – Outside Service Employed	Direct - 529050	Time and Materials
			Allocated - 529060	Modified Massachusetts Formula
833	BSC Revenue Adjustment	923 – Outside Service Employed	Allocated - 529210	Modified Massachusetts Formula
904	BSC Costs to Achieve	923 – Outside Service Employed	Direct - 529700	Fully Distributed Costs
			Allocated - 529710	Cost Causative Method
953	Compliance & Ethics	923 – Outside Service Employed	Direct - 529200	Modified Massachusetts Formula
			Allocated - 529210	
638	BSC Risk Management Services	923 – Outside Service Employed	Direct - 529050	Modified Massachusetts Formula
			Allocated - 529060	
233	Risk As Requested	923 – Outside Service Employed	Direct - 529050	Time and Materials

Responsibilities

Exelon Audit Services provides an independent, objective assurance and advisory activity designed to add value and improve operations. It works to help an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluating and improving the effectiveness of risk management, control, and governance processes. The role and responsibilities of Audit Services is overseen by the Audit and Risk Committee of the Board of Directors of Exelon and is part of the Exelon Compliance, Audit, and Risk organization.

Compliance & Ethics works across the enterprise to identify, assess, and ensure the mitigation of risks concerning Exelon's compliance with applicable laws, regulations, the Exelon Code of Business Conduct and other company policies, and sustain a culture of integrity. It also is responsible for receiving and ensuring the independent investigation of concerns about potential violations of regulatory compliance obligations and company policies, including the Code of Business Conduct.

BSC Enterprise Risk Management has responsibility for Enterprise Risk Management governance and oversight.

BSC Compliance, Audit and Risk

Corporate & Information Security Services (CISS)

Corporate & Information Security Services Introduction

BSC Corporate & Information Security Services ("CISS") provides governance and functional oversight for physical and cyber security controls and services.

CISS Services Table

Service Table

Service ID	Service Name	Service Description	Service Owner
444	Cyber Security Projects	Exelon CISS Project Delivery Services provides deliverables for projects including planning, design, and implementation of solutions	SVP, CSO
445	Physical Security Projects	Exelon CISS Project Delivery Services provides deliverables for projects including planning, design, and implementation of solutions	SVP, CSO
833	BSC Revenue Adjustment	The difference between actual cost and revenues from billings to the Client Companies is "trued up" each year by allocating it pro rata to the Client Companies based on their share of Total Service Billings.	SVP, CSO
904	BSC Costs to Achieve	Costs associated with establishing operations as a result of a merger, acquisition, split, or divestiture.	SVP, CSO

Service ID	Service Name	Service Description	Service Owner
930	Business Continuity and Crisis Management	**Business Continuity** • Business Continuity Services encompass governance, oversight, support, and perform functions; in addition to an established 'all-hazard' methodology; annual business continuity plan reviews and consultation with all BUs; new business continuity plan development; major exercise design and facilitation; business impact analysis; Business Unit scorecards; LDRPS system administration; Business Continuity Planners assist with minor updates throughout the year to their respective business continuity plan(s). **Crisis Management** • Crisis Management facilitates effective Business Unit and Corporate response to emergencies; on-call support; maintain and automate Business Unit crisis management notification protocols; support corporate crisis management team; provide situational awareness and monitor adverse conditions; maintain and staff incident command center; administer Company's automated mass notification system and conduct site notification drills; provision GETS/WPS for BSC.	SVP, CSO
940	CISS Governance, Oversight and Strategy	Overall executive and oversight of all CISS services provided throughout the enterprise to include security Governance and Oversight of the entire Exelon security infrastructure. **Strategy and Planning** • Develop and provide CISS strategic and business planning, operational and financial performance reporting, financial management, project management, contract administrative support, executive and organizational support **Awareness and Training and Change Management:** • Develop and provide CISS communications and change management services; develop and provide security related security awareness and training materials to business units (i.e., Phishing susceptibility, general security awareness, workplace violence, street awareness, security in the field, fraud detection)	SVP, CSO

Service ID	Service Name	Service Description	Service Owner
		Policy Governance and Oversight, Security Risk Management • Security policies development. Provides stakeholders with an assessment of the adequacy of the organization's security controls to protect the confidentiality, integrity, and availability of assets and information. Strategic/regulatory policy liaison with EEI, AGA, FERC, NERC, DHS, LLEA, and engagement with Exelon executives on external security policy and compliance matters. • Establish policies and programs which align with National Institute of Standards and Technology (NIST) Cybersecurity Framework (CSF) subcategories. Manage the development, review, approval, dissemination, and retirement of Exelon security program documents. • Support the organization in assessments and annual certification for in-scope assets to ascertain adherence to the security controls. Track risks associated with not meeting security controls on per exception basis. • Support the organization in developing security controls, countermeasures and safeguards that can cost effectively mitigate risk exposure to an acceptable level (includes exceptions analyses). **Third Party Risk Management** • Perform assessments of third party's security measures, addressing third party risk management, and managing third-party threat response process; work with asset owners to develop plans to mitigate or resolve risks	
941	Identity and Access Management & Personnel Screening	• Physical Access provisioning/de-provisioning of employee & contractor physical access to facilities for Exelon non-nuclear BUs. Includes the setup of request workflows, access levels, and approvers groups, as well as encompasses all reporting required for SOX and CIP compliance. • Logical Access provisioning and revocation of Active Directory accounts in Exelon domains, as well as cyber access to applications, file shares, and designated email functions in Exelon domains. Additionally, it covers workflow development and approver group creation,	SVP, CSO

Service ID	Service Name	Service Description	Service Owner
		conversions for contractors to employees, affiliate transfers, and new large scale application deployment in Exelon domains. Also includes the creation of AD accounts, accounts not assigned to a person, the setup of new locations, and all reporting required for SOX and Critical Infrastructure Protection (CIP) compliance in Exelon domains. • Background Investigations - Personnel Risk Assessments (PRA) conducted on candidates for new hire, staff augmentation contractors, employees being promoted to the E05 and above; and on any employee or contractor requiring access to a NERC CIP asset per the requirements of CIP-004 R3.	
942	Exelon Security Operations Center (ESOC)	• Alarm Monitoring and Response: Exelon Security Operations Center (ESOC) includes operation of 24/7 monitoring and response for enterprise non-NERC and NERC CIP-related intrusion detection and access control system. 24-hr hub for all emergencies reporting including access control monitoring, security officer dispatch, 911, and other emergency responses; video surveillance including active and passive monitoring; alarm point monitoring including video alarm and duress alarm; and technical project management/ implementation. • Physical Protection: Security Call Center; Security System Maintenance Tracking; Substation Ingress/Egress Access Tracking. Aligned with ESOC. • Enterprise Physical Security Systems Management: Administrator and business owner of non NERC and NERC CIP-related enterprise security alarm and access management systems. • Tuning and calibration of electronic access control points, intrusion detection system, and video surveillance systems, and system administrator for Security Applications incl. CCure, ExcaqVision, ESM, DMP, JIRA. Design, manage, and review access control groups. Business owner of Security Applications, support and coordinate SCP activities to mitigate impacts to BUs. • PACS Operation (Access Control, Video and intrusion detection hardware and software). PACS System enhancements - above and beyond compliance innovations. NERC Ancillary	SVP, CSO

Service ID	Service Name	Service Description	Service Owner
		Systems Support (i.e. eKey, ACAS, IT Server and Network. PSZ and LPAP), physical security control implementation. • Provide BUs with support when new or redesign of non-NERC security systems (intrusion detection, electronic access control, video surveillance systems) are required. Includes managing design, installation, integration, and ESOC acceptance and turnover testing. Service includes providing technical details/scope of work for RFPs.	
945	Cyber and Information Security Services	**Cyber Defense Operations** • Provides 24/7 proactive monitoring of security risks for IT, ICS and other OT Systems. This function receives alerts from a variety of defense mechanisms such as web and email filtering, anti-virus protections, custom rules and signatures, and then prioritizes these alerts for analysis. Key sub-functions include: • System Engineering is dedicated to ensuring the operation of cybersecurity monitoring systems. Systems Engineering's primary area of focus is Endpoint (AV) protection, Security Monitoring Logging and ingress/egress Intrusion Protection System/Intrusion Detection System implementation. • Cyber Threat Intelligence (CTI) provides proactive and predictive indications and actionable intelligence by utilizing information from federal, state, local and open source entities to the following: o Cybersecurity Monitoring– Provide indicators of compromise (IOCs) gleaned from available reporting for inclusion into network defenses o Incident Response – After vetting intelligence, CTI analysts work alongside forensic team members during investigations o Forensics – As requested, CTI analysts work alongside forensic team members during investigations o Engagement with Federal Agencies (FBI, DHS, E-ISAC, etc.) – when an investigation is completed or new information that is deemed shareable is made discovered, the CTI analyst will share the information to various Cyber Intelligence groups **Incident Response**	SVP, CSO

Service ID	Service Name	Service Description	Service Owner
		• Primary objective is to respond to incidents in a methodical manner following these phases: (1) Detect, (2) Contain, (3) Eradicate, (4) Recover, (5) Post Incident Analysis. Incident Response is the escalation point for incidents identified by Monitoring and is responsible for handling any issues that necessitate further investigations. • Engages in proactive threat hunting, reviewing data from CSOC and ESOC tools looking for advanced threats. • Routinely prepares for responding to cybersecurity and physical security incidents by planning and executing drills, hosting Lunch & Learn information sessions, attending technical training, and cross training with other members of the team. **Cyber Security Architecture and Engineering** • Oversee and maintain system and application controls to protect unauthorized access, disclosure, modification and deletion of information. Key activities include: • Integrate cybersecurity architecture requirements and controls into the Exelon System Development, Project Management, and Procurement Lifecycles • Establish repeatable enterprise cybersecurity architecture templates and design standards • Incorporate cyber security requirements from legislation, directives, policies, regulations, standards, best practices, and relevant guidance into enterprise cyber security architecture and engineering templates and solutions • Conduct cybersecurity risk assessments on new projects to ensure requirements are established and maintained throughout the project lifecycle • Provide cybersecurity expertise to the ICS/SCADA and other Operations Technology (OT) systems used to support reliable operations for Exelon's electric operations, gas operations, and customer operations functions • Supervise changes in software, hardware, facilities, telecommunications and user needs to ensure security is maintained • Provide NERC CIP program support to registered entities in the development of RSAWs, Self-Assessment and Certification process, audit preparation/presentation, and mitigation plan development and implementation for OT assets	

Service ID	Service Name	Service Description	Service Owner
		• Provide guidance and support to protect systems that support flight operations, logistics, and maintenance activities from compromise, including supply chain considerations. **Cyber Vulnerability Detection & Management** Vulnerability Management: Performs risk-driven vulnerability assessments of Exelon's key Electronic Information Assets, identifies vulnerabilities, and tracks remediation. Key activities include: • Inform and work with Security Patch Administrators regarding identifying and analyzing appropriate security patches · Perform rotating weekly vulnerability scans of all EIA in Exelon's major datacenters, identify vulnerabilities, identify asset owners, and track remediation • Monitor security advisories for vulnerabilities in security patches • Communicate critical patch information, as necessary, to all appropriate stakeholders • Review security configurations on Electronic Information Assets • Review proposed changes to the existing firewall rule base, assess the change for risk and approve/reject requests **Digital Forensics Incident Response** The Digital Forensics Team manages the collection and analysis of electronic evidence to help form a better understanding of an incident or investigation, followed by the reporting of those findings in a clear, concise manner. Incidents generally refer to cyber intrusions, while investigations generally refer to inquiries from Legal or HR. Throughout the investigation process, steps are taken to prove evidence is NOT modified in any way by the investigator or tampered with by others.	

Service ID	Service Name	Service Description	Service Owner
		Systems Support Team provides internal support to CISS cybersecurity monitoring and response infrastructure (i.e., intrusion prevention systems, security information and event management systems	
946	CISS Executive Security & Transportation	Administers and carries out the executive protection program, responsible for planning security surrounding official functions, 24/7 emergency response and secure transportation of executives as assigned.	SVP, CSO
947	CISS Physical Client Services	CISS Physical Client Services functions are performed for the Corporate BU. Security Site Assessments (SVAs): Security (threat/risk) assessment, findings, and remediations of facilities and critical operating processes. Investigations: Includes the key functions of Investigations. Investigations: Partnering with HR, Ethics/Legal, Audit and BUs to provide objective and independent reviews of allegations or concerns. The methodology is established for completing analytical documentation & forensic reviews, conducting interviews, and providing detailed investigative reports to management. Personnel Security / Non-Investigative Client Services: Includes the key functions of: • Training: Develop and implement annual In-Service Training to ensure adherence with the Exelon Use of Force and Firearms Policy. Provides training, knowledge and equipment to those who may be tasked with the responsibility of responding to an unexpected medical emergency or critical incident which contributes to the safety and security of Exelon employees and assets. The program provides a tactical-level training platform for proprietary security personnel, in particular, those who are required to carry a firearm. Also, develop and facilitates Workplace Violence Prevention Program: assessments, training, and response to mitigate the potential effect of any allegation or adverse act. • Guard Force Deployment: deploys uniformed armed and unarmed contract Security Officers	SVP, CSO

Service ID	Service Name	Service Description	Service Owner
		and/or Off Duty Law Enforcement at various locations throughout the enterprise to perform both routine and emergency security duties. • Security personnel maintain a robust liaison program with a wide spectrum of Law Enforcement and Security-related agencies. These relationships and memberships provide Exelon with timely security intelligence reports or threats and assists management with valuable benchmarking data. Provide oversight for aligned utility focused Security Programs of client companies to support business objectives and drive performance.	
949	Regulatory Requirement Compliance	CISS NERC CIP Services – Physical: CIP-006 and CIP-014 Program Development and Maintenance; Regulatory NERC Audit Support. Preventive and Corrective Maintenance efforts and documentation; Event Response; BU self-assessments and self-certifications; Investigation/evidence collection efforts, corrective actions, mitigation plans; NERC physical security training development and delivery; Management model documentation and maintenance. CISS NERC CIP Services – Cyber: Enterprise Standard Owner (ESO): Programmatic ownership of the CIP- 004, -006, -008, -013, -014 CIP standards for the Enterprise, perform control obligations and oversee performance by BUs; drive continuous improvements; drive collaboration to define standard approach to meet operational and compliance requirements (Exelon Compliance Review Team (CRT)) Security Control Functions: Perform operational security control obligations on behalf of the Registered Entities; establish and implement internal controls for Security Control Functions to reduce security and compliance risk; provide guidance and support on implementing security	SVP, CSO

Service ID	Service Name	Service Description	Service Owner
		control functions for new/upgrade projects; collect, review and approve performance evidence; represent Security Control Functions as Subject Matter Experts during regulatory audits. CISS Owned NERC Assets (CIP-002 obligations): Maintain in-scope CIP Cyber Assets as compliant with the requirements (patching, baseline management, etc.). Other regulatory support (incl Defense Federal Acquisition Regulations compliance) DHS Chemical Facility Anti-Terrorism Standards (CFATS): Provide governance and oversight for implementation of CFATS and partner with the Business Units to ensure compliance.	
936	Intelligence and Threat Analysis	Security Intelligence Services provides intelligence gathering and analytical services across the enterprise. This includes analysis of cyber and physical threats as well as tracking of special events and threats to determine the potential impact and development of mitigation strategies. Security Awareness and Analytical Training on demand includes the development and delivery of security-related training addressing common cyber threats, requested reports and special event and analytical project support. Foreign Travel Program Management provides Security Services for international travelers to include tracking of employees worldwide, emergency alerts to employees, a hotline for international travel issues as well as political and medical emergency extraction services.	SVP, CSO
924	As Requested CISS Projects	As requested services represent emergent work requiring additional resources relative to the plan and are services specifically requested by a Client Company, Exelon's CEO or Board of Directors.	SVP, CSO

Corporate Affairs

Corporate Affairs Introduction

Corporate Affairs' role is to protect and enhance Exelon and OpCos' reputations; foster a strong corporate character based on purpose, culture and values; build, manage and balance the interests of multi-stakeholder relationships; and serve as strategic business partners and trusted counselors to leaders. To maximize our impact and cost effectiveness, we focus our team and resources on strategic priorities and data-driven campaigns that advance Exelon and the OpCos' business and policy goals.

Corporate Strategy, Innovation & Sustainability

Corporate Strategy, Innovation & Sustainability Introduction

The Corporate Strategy, Innovation & Sustainability (CSIS) group provides strategic support for senior leadership; program leadership for Exelon's sustainable growth strategy; and corporate-wide governance, oversight and support for the innovation and sustainability functions.

CSIS will manage strategic issues of the company, set context for strategic decisions and long-term investments, articulate a corporate strategic plan, and support the development and communication of Exelon's vision, and de-risk opportunities for the business units by leading enterprise-focused technology development adoption. CSIS supports the chief executive officer, board of directors and Executive Committee in identifying and analyzing strategic issues, and coordinates with the business units and various corporate functions to address these issues.

CSIS will provide governance and oversight to ensure that Exelon maintains effective programs for developing climate strategy, setting and tracking voluntary sustainability goals, and reporting sustainability performance.

Corporate Strategy, Innovation & Sustainability Services Table

Service Table

Service ID	Service Name	Service Description	Service Owner
644	Lobbying & Influence Public Opinion	• Supporting environmental policy and regulatory lobbying activities, including research and other background work to support developing a corporate position. • Coordinate, and support as necessary, the development of positions, comments, testimony, etcetera for emerging environmental regulatory and legislative policy issues, in support of Exelon advocacy initiatives • Communicate Exelon's environmental, social and governance (ESG) performance through an annual corporate sustainability report, other voluntary reporting, information on websites, speeches, etcetera	SVP, Corporate Strategy, Chief Innovation & Sustainability Officer

Service ID	Service Name	Service Description	Service Owner
654	Corporate Strategy Services	• Strategic issues analysis and management ○ Maintain forward-looking agenda of key issues facing the company ○ Establish ad hoc teams to analyze issues and develop options for response ○ Maintain proactive role in keeping focus "ahead of the curve" ○ Support CEO and Leadership Team to develop key focus areas, agenda and staff support for business meetings • Corporate Strategic Planning ○ Together with Financial Planning, implement a structured approach to strategic and long-range planning that integrates analysis of strategic issues into the planning process ○ Corporate Strategic plan provides framework for aligning business planning with corporate objectives ○ Organize business content for Board Strategy Retreat • Vision, communications of vision and strategy, strategic literacy ○ Support senior leadership in defining and articulating a corporate vision ○ Cascade vision through organization, aligning and engaging employees ○ Partner with HR and Corporate Communications to drive strategic business literacy throughout the corporation ○ Provide for communications of key strategic issues by managing bi-annual Leadership Meetings ○ Compile, assess and present recommendations to senior leadership for improving Exelon's environmental and safety performance. ○ Maintain the Exelon GHG Inventory, including third-party verification, in support of publicly communicating Exelon's performance. ○ Develop and publish an annual Corporate Sustainability Report communicating Exelon's performance and plans for improving performance and addressing material sustainability issues. • Evaluation of new technology ○ Lead the Technology Exchange – an enterprise-wide cross-functional coordination on the evaluation of new technologies – and present findings to the Executive Committee ○ Partner with the Operating Companies on the execution of a technology strategy identified by the efforts of the Technology Exchange	SVP, Corporate Strategy, Chief Innovation & Sustainability Officer

Service ID	Service Name	Service Description	Service Owner
		○ Establish external relationships and create/manage a platform for collaborative research & development (R&D) efforts and process which deliver robust technology opportunities in a timely manner to support growth. ○ For the Partnership R&D, provide Exelon oversight from conceptualization, formulation and demonstration of the area of development. Investigate potential COBC violation that requires HR investigation	VP Talent Mgmt. & Org. Effective

Service ID	Service Name	Service Description	Service Owner
		3. Prepare final report and recommendation	
619	Labor Mgmt	**LABOR RELATIONS** The Labor Relations function develops and manages enterprise–wide, as well as business unit specific, strategies in partnership with the senior business leaders. The focus maximizes employee and bargaining effectiveness to achieve greater operating efficiency while advocating fair treatment for all employees based on respect, decency and integrity. It is also an integral part of Labor Relations to serve as the primary conduit between Corporation and Union Leadership, where applicable. These principles will be used to guide dealings with the unionized workforce and to assist in efforts where eligible employees choose to be non-represented. Services Include: 1. Develop and Lead Labor Strategies ○ Where a union represents employees, honor contracts and constructively engage the union. ○ Recognize it is critical to our success to have First Line Supervisors who are well informed, well trained and committed to Exelon goals and processes. ○ Develop labor strategies focused at local union perspective while balancing impacts to other union contracts and instances where eligible employees choose to be non-represented. ○ Provide assistance with employee engagement efforts. 2. Consulting / Contract Administration ○ Analyze impact of business unit initiatives on employee relations by advising management on labor/employee relations issues; interpretation of collective bargaining agreements, arbitration implications, and strategy formation. ○ Develop and provide training/education to management concerning pertinent CBA matters and other labor relations issues. ○ Respond to union leadership, management and craft employee questions related to labor and other applicable communications. ○ Support discipline/termination consensus calls for represented employees with HR Operations and Legal. ○ Conduit between Corporation and Local/International Union Leadership. ○ Provide labor guidance to Company leadership on cutting-edge labor matters and trends. ○ Provide contract interpretation guidance for line management, including but not limited to management rights, reorganization activities and workforce modifications. ○ Support business unit initiatives within contractual obligations.	VP, Labor & Employee Relations

Service ID	Service Name	Service Description	Service Owner
		○ Administer and lead protocol strategy meetings. 3. Negotiations ○ Develop labor relations strategy for negotiations in advance contract expiration and enhance the Company's position at the bargaining table. ○ Comply with the National Labor Relations Act and engagement in good-faith bargaining. ○ Use of effective negotiation tactics to achieve Company objectives during bargaining. ○ Prepare all negotiation team members for negotiations and establish negotiations support resources within the Company. ○ Ensure appropriate communications from the pre-contract expiration period the post-ratification periods. 4. Grievance/Arbitration Administration ○ Assist with the resolution and/or advocacy of mid-term contractual disputes on behalf of the companies through the grievance and arbitration procedure. ○ Ensure line management is in the best possible position to contractually answer grievance allegations. ○ Manage grievance activity and assist in arbitration preparation with HR Operations, Line Management, and Legal. ○ Risk assessment and settlement/mediation efforts, where applicable. 5. Training/Education ○ Develop and provide or procure training/education to management, for example, first line supervision orientation, labor relations fundamentals training, Collective Bargaining Agreement interpretation, Employee Standards of Conduct application, post-negotiation updates, and other employee relations counseling and advice for the FLSA non-exempt population. ○	
880	HR Compensation	**HR COMPENSATION** The Compensation function is responsible for developing corporate-wide competitive total compensation programs that attract, engage, motivate and reward employees for achieving high levels of business performance and outstanding financial results. These programs will be anchored in competitive best practices, aligned with Exelon's pay for performance compensation philosophy and will be flexible to address changing business priorities. Compensation develops, governs, and communicates compensation strategy, policies and programs, ensures all regulatory requirements are met, conducts external benchmarking and analysis, designs and	VP, Compensation

Service ID	Service Name	Service Description	Service Owner
		administers special programs, manages external vendors, and oversees the administration of all salaried employee compensation processes Executive Compensation designs and administers all executive compensation and stock programs and prepares all compensation materials for the Board of Directors' meetings Services Include: 1. Market Assessment and Surveys (including selection of survey sources and review of survey participation submissions) 2. Additional Information

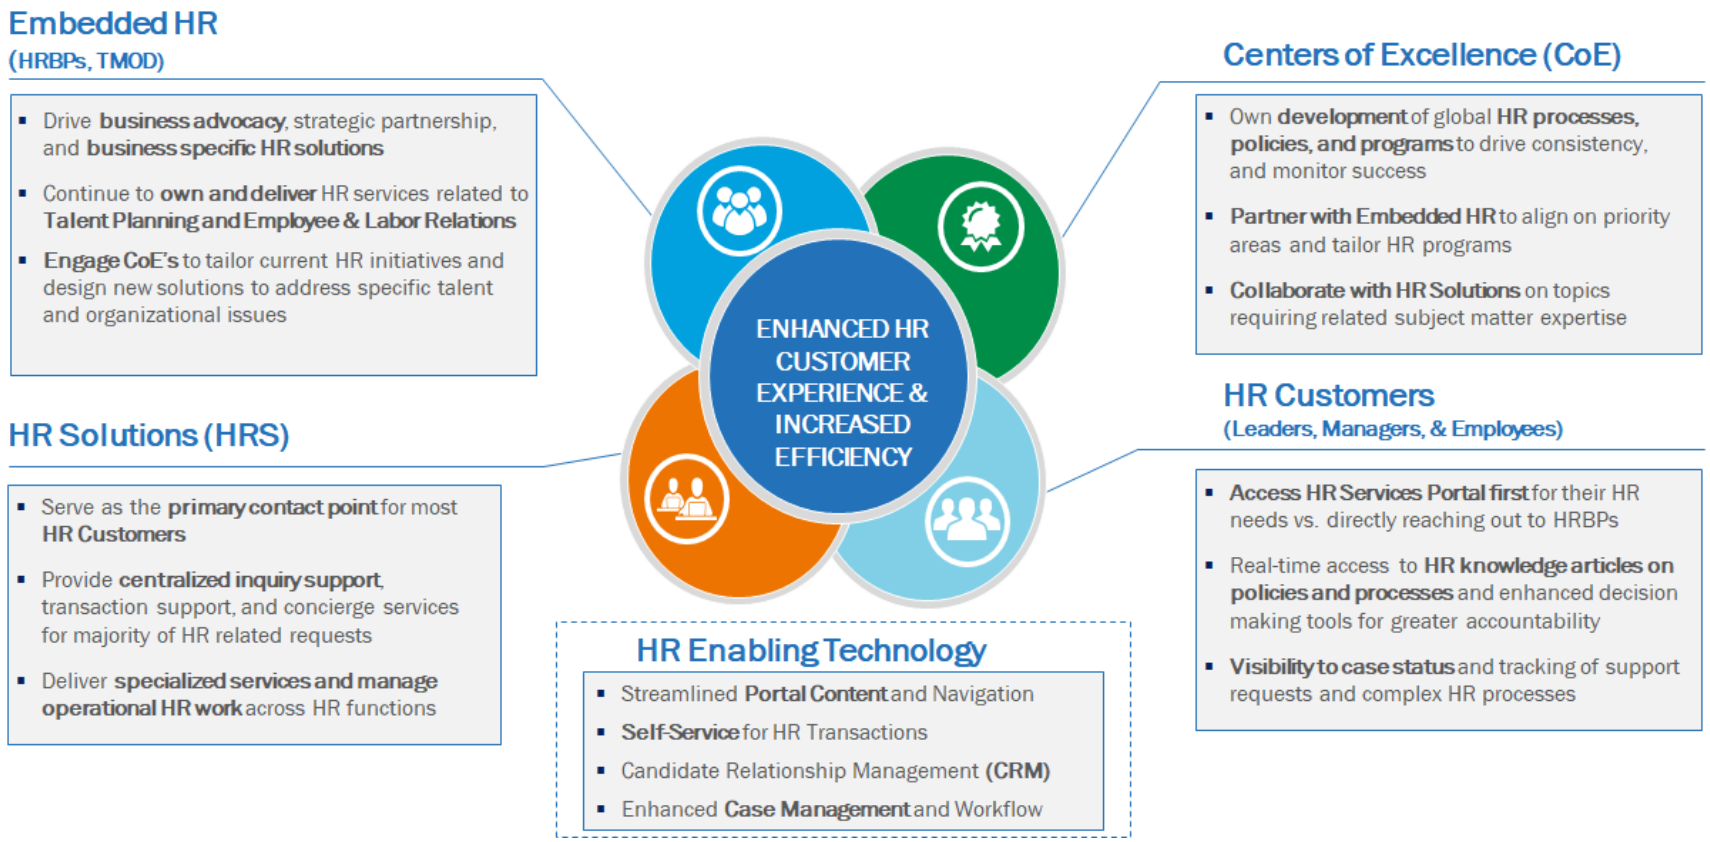
- Exelon HR Operating Model:



Business Benefits of Exelon's HR Operating Model

1. **Enhanced HR customer experiences** enabled by increased employee and manager self-service access; employees will be able to search for information on Portal and submit/track case requests on ServiceNow
2. **Improved strategic partnership with the business** to add greater value to leaders and managers; HRBPs will have additional capacity through centralization and enhanced self-service, to help perform strategic work
3. **Consistent HR processes & standardized service delivery** will reduce redundancies across OpCos; implementing industry leading HR processes and removal of unnecessary steps will streamline HR services
4. **Increased HR cost-effectiveness & operational efficiency** through a streamlined HR Operating Model; efficiencies across HR will be enabled through centralization, automation and increased HR role clarity
5. **Position HR Organization for scalable future growth** through user-friendly HR technologies and automation; these enabling technologies will provide intuitive experiences and better insights for decision making

Performance Measurement

Human Resources Performance Metrics Table

Reference the Human Resources Business Plan for performance metrics.

IT

IT Introduction

BSC IT provides standard IT services to support Exelon's businesses. These Services include End-User Support Services, IT Systems Operations Services, and IT Service Delivery. These IT services are provided by a combination of Business Unit Application Delivery and Support Departments, Cloud and Infrastructure Services Department, and Office of the CIO.

IT Service Owners include:

- VP, Office of CIO, providing IT governance, strategy, innovation, and business operations.
- VP, Enterprise-Wide Solutions, providing development and maintenance of both applications used by the BSC Practice areas, and of applications used across the enterprise.
- VPs, Technical Operations, Architecture and Engineering, providing enterprise data network, PCs, communication tools like email, phones, video conferencing, and infrastructure hosting platforms used by applications.
- VP, IT BGE, VP, IT ComEd, VP, IT PECO, and VP, IT PHI, providing development and maintenance of applications specifically used by the utility businesses.

IT Services Table

Service Table (See Appendix A for RxQ Technical Services Table)

KPI Definition Table

KPI	Definition
Service Portfolio KPI	Application service levels, including Business Value (in the *Application/ Service Scorecard* section) and DR Tier Designation (in the *Disaster Recovery* section) are listed under the relevant Application/ Service in Application Portfolio Manager (APM). Please reach out to your Service Portfolio owner for specific details.
Project Delivery KPI	90% of IT Projects completed on time, on budget, based on agreement out of Detailed Design, with tolerance of +10%.
IT Governance KPI	IT Governance KPIs are reported on monthly in the CIO Management Review Meeting. Please reach out to your portfolio owner for specific details.

Service ID	Service Name	Service Description	Service Owner	KPI Type
322	BSC BU Specific IT Projects	Exelon IT Project Delivery Services provides deliverables for IT projects including planning, design, asset acquisition, and implementation of solutions	IT VP (Project Specific)	Projects Delivery KPI
410	Client Services	Client Services cover escalated IT Service Desk incidents related to desktop and laptop support including requests, installation, move, add, change, and/or replacement of desktop PCs/Monitors, the installation of peripherals/memory, loaner support, hardware break/fix, technology refresh, manual patching, desk side support, executive support.	VPs, Technical Operations, Architecture and Engineering	Governance KPI
463	Oracle Support Services	The service provides a comprehensive deal structure that includes perpetual unlimited licenses for Oracle's entire catalog of "on premise" software at a fixed price for use across the Exelon Enterprise.	IT VP, Office of the CIO	Not Applicable – PULA Costs
505	Application and Technical Service Delivery - Finance	The service covers general areas of support and support providers. The service scope includes Financials (For Financial Services Group), Business Intelligence Architecture (For Financial Services Group), Technical Infrastructure (For Financial Services Group), Other Applications (For Tax Dept), Treasury Systems, and AP Finance. Detailed list of applications included in Enterprise Finance Portfolio Applications	IT VP, Enterprise-Wide Solutions	Service Portfolio KPI

506	Application and Technical Service Delivery - Asset Management	The Asset Management service supports applications used by Utilities Work Asset Management and Supply Asset Management numerous business processes including those associated with work management, supply chain, design engineering and safety and compliance. The process is known as EAM within BSC and is largely driven by the Asset Suite application (Passport).	IT VP, Enterprise-Wide Solutions	Service Portfolio KPI
507	Application and Technical Service Delivery - HR	Application and Technical Service Delivery - HR is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, cloud services, management, project work, compliance and technical services necessary to enable the HR Function within BSC including Oracle HCM, ePeople Talent, eTime, Compensation, Payroll, and OHS.	IT VP, Enterprise-Wide Solutions	Service Portfolio KPI
508	Application and Technical Service Delivery - Hyperion, Informatica & SharePoint	This service covers the enterprise wide use of Hyperion Reporting, Informatica and SharePoint	IT VPs, Enterprise-Wide Solutions, Cloud & Infrastructure	Service Portfolio KPI
509	Learning Management Portfolio Application Support	The Learning Management Portfolio service includes all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the Learning Management Portfolio Application (LMS).	IT VP, Enterprise-Wide Solutions	Service Portfolio KPI

510	Application and Technical Service Delivery - Corporate Applications	Application and Technical Service Delivery Corporate Application Support service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services, necessary to the BSC practice areas of Corporate Communications, Real Estate, Risk, and Audit. This service also supports the IT needs of the Management Model function	IT VP, Enterprise-Wide Solutions	Service Portfolio KPI
550	Application and Technical Service Delivery - Billing & Payment Processing	The Billing & Payment Processing service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the Billing & Payment Processing business process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
554	Application and Technical Service Delivery - Customer Care Center	The Customer Care Center service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the Customer Care Center business process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI

555	Application and Technical Service Delivery - Customer Solutions	The Customer Solutions service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the Customer Solutions business process.	IT VP of ComEd, PECO, BGE, PHI	Project Delivery KPI
557	Application and Technical Service Delivery - End User Services	The End User Services service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the end user services used by ComEd, PECO, BGE, PHI, and BSC.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
558	Application and Technical Service Delivery - Energy Procurement	The Energy Procurement service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the Energy Procurement business process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
562	IT Management & Compliance	The IT Management & Compliance service is provided to support and maintain the governance and management of the IT services delivered in ComEd, EWS, PECO, BGE, PHI, and CIO.	IT VP of ComEd, PECO, BGE, PHI, Enterprise-Wide Solutions, VPs, Technical Operations, Architecture and Engineering	Governance KPI

565	Application and Technical Service Delivery - Legacy Meter Services	The Legacy Meter Services service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the Legacy Meter Services business process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
568	Application and Technical Service Delivery - Electric Realtime	The Electric Realtime service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the Electric Realtime business process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
569	Application and Technical Service Delivery - Operate & Restore (Gas)	The Operate & Restore (Gas) service is provided to support and maintain application services, which include costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by PECO, BGE, PHI to support the Operate & Restore (Gas) business process.	IT VP of PECO, BGE, PHI	Service Portfolio KPI
571	Application and Technical Service Delivery - Operations Support	The Operations Support service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used utilities to support those processes which are not covered elsewhere by other "Application and Technical Service Delivery" Services	IT VPs of ComEd, PECO, BGE, PHI	Service Portfolio KPI

573	Application and Technical Service Delivery - Project & Work Management	The Project & Work Management service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support their Project and Work Management processes.	IT VPs of ComEd, PECO, BGE, PHI	Service Portfolio KPI
576	Application and Technical Service Delivery - Security	The CISS service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, compliance and technical services necessary to maintain the applications used by BSC.	IT VP of Enterprise-Wide Solutions	Service Portfolio KPI
580	Application and Technical Service Delivery - UCOMM	The UCOMM service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the UCOMM business process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI

583	Application and Technical Service Delivery - EU Support Services	The EU Support Services is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the following processes: Support Services, Project and Work Management. and any other services offered by Work and Asset Management that is not already covered elsewhere.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
584	Application and Technical Service Delivery - Outage Management	The Outage Management service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the Outage Management and Geospatial.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
585	Application and Technical Service Delivery - Smart Meter Operations	The Smart Meter Operations service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to Smart Meter Operations process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI

586	Application and Technical Service Delivery - BI and Data Analytics	The BI and Data Analytics service is provided to support and maintain application services, which include costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, and PHI to support the BI and Data Analytics process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
587	Application and Technical Service - Workforce & Mobile Technology	Mobile Workforce Tech Services is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the mobile applications used by ComEd, PECO, BGE, PHI to support the following processes: Support Services, Project and Work Management. and any other services offered by Work and Asset Management that is not already covered elsewhere.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
589	Application and Technical Service Delivery - Back End Meter Operations	The Back End Meter Operations service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to support the Back End Meter Operations business process of ComEd, PECO BGE, and PHI. The applications will cover the functionality required, but not limited, to the transfer of meter and reads related information from Head End systems to back office applications and the processes for remotely connecting or disconnecting meters.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI

663	Application and Technical Service Delivery - Utility of the Future	The Utility of the Future service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services, necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support the Utility of the Future business process.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI
775	IT Governance	This service is provided to support governance and oversight functions, which include costs associated with IT wide governance functions and includes the Office of the CIO (excluding the Planning function), Cost Optimization, and General Governance of IT.	IT VP, Office of the CIO	Governance KPI
777	TDE&Ops Projects	This service includes the planning, design, and implementation of TDE&Ops projects that are allocated to one or more business units	VPs, Technical Operations, Architecture and Engineering	Project Delivery KPI
854	Application and Technical Service Delivery - Legal Application Support	Application and Technical Service Delivery - Legal Application Support service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to enable general Legal and Ethics & Compliance department activities including regulatory compliance, records management compliance, and electronic discovery (eDiscovery, legal hold) compliance	IT VP, Enterprise-Wide Solutions	Service Portfolio KPI
885	BSC IT Services Rev Adjust	BSC IT Services Revenue Adjustment- “Revenue Adjustment Services” reflects the following “true up” mechanism: The difference between actual cost and revenues from billings to the Client Companies is “trued up” each month by allocating it pro rata to the Client Companies based on their share of IT Total Service Billings	SVP, CIO Exelon	Not Applicable – Financial Adjustment Mechanism

901	BSC Other PA Tech Projects	This service is comprised of planning, design, and implementation of IT projects that support BSC Practice Areas other than Finance or Human Resources.	IT VP, Enterprise-Wide Solutions	Project Delivery KPI
902	BSC HR Tech Projects	This service is comprised of planning, design, and implementation of IT projects that support the Human Resources Practice Areas of BSC.	IT VP, Enterprise-Wide Solutions	Project Delivery KPI
903	BSC Finance Tech Projects	This service is comprised of planning, design, and implementation of IT projects that support the Finance Practice Areas of BSC.	IT VP, Enterprise-Wide Solutions	Project Delivery KPI
904	BSC Costs to Achieve	Costs associated with establishing operations as a result of a merger, acquisition, split, or divestiture.	IT VP (Project Specific)	Project Delivery KPI
906	Enterprise Wide IT Projects	This service is comprised of planning, design, and implementation of IT projects related to licensing, upgrade and expansion of technology platforms including Oracle database, SQL Server database, SharePoint, and others.	IT VP, Enterprise-Wide Solutions	Project Delivery KPI
933	Office of the CIO Projects	This service is comprised of planning, design, and implementation of IT projects related to the Office of the CIO.	IT VP, Office of the CIO	Project Delivery KPI
944	NERC CIP Program Services	Provide enterprise-wide NERC CIP program and project management oversight to ensure sustained Exelon compliance	IT VP of ComEd, PECO, BGE, PHI	Governance KPI
951	NERC CIP Implementation Costs	The NERC CIP Implementation Program (VIP) is an integrated Program to support the on-going compliance NERC CIP standards. Our Program Team works together across the projects to ensure consistency and full coverage of the NERC CIP standards. Program Support Functions include: • Program Integration • Program Management Office (PMO)	IT VP (Project Specific)	Project Delivery KPI

		• Finance • Architecture • Communications & Change Management		
528	Emergency Preparedness	The Emergency Preparedness service is provided to support and maintain application services, which includes costs of all the infrastructure, labor, licenses, maintenance, support, management, project work, compliance and technical services necessary to maintain the applications used by ComEd, PECO, BGE, PHI to support EU storm readiness and emergency preparedness functions.	IT VP of ComEd, PECO, BGE, PHI	Service Portfolio KPI

FERC Account and Billing Approach Table (See Appendix A for Technical Services Table)

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
322	**BSC BU Specific IT Projects**	**FERC Account to be determined during each individual project creation**	**Direct – 529550 Allocated – 529560**	**Time and Materials or Cost Causative Method**
410	**Client Services**	**923 – Outside Services Employed**	**Direct – 529550**	**Time and Materials**
463	**Oracle Support Services**	**FERC Account to be determined during each individual project creation**	**Direct – 529550 Allocated – 529560**	**Weighted allocation based on application usage**
505	**Application and Technical Service Delivery - Finance**	**FERC Account to be determined during each individual project creation**	**Direct (to BSC Finance) – 529550**	**Time and Materials**
506	**Application and Technical Service Delivery – Asset Management**	**FERC Account to be determined during each individual project creation**	**Allocated (general application maintenance) – 529560 Direct (BU specific instance support) – 529550**	**Based on Passport users Time and Materials**
507	**Application and Technical Service Delivery - HR**	**FERC Account to be determined during each individual project creation**	**Direct (to BSC HR) – 529550**	**Time and Materials**
508	**Application and Technical Service Delivery - Hyperion, Informatica & SharePoint**	**FERC Account to be determined during each individual project creation**	**Allocated – 529560**	**Cost causative method**
509	**Learning Management Portfolio Application Support**	**FERC Account to be determined during each individual project creation**	**Allocated – 529560**	**Number of LMS users**

510	**Application and Technical Service Delivery - Corporate Applications**	**FERC Account to be determined during each individual project creation.**	**Allocated – 529560**	**% of cost attributable to each portfolio**
550	**Application and Technical Service Delivery - Billing & Payment Processing**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials or Number of Customers**
554	**Application and Technical Service Delivery - Customer Care Center**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials or Number of Customers**
555	**Application and Technical Service Delivery - Customer Solutions**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
557	**Application and Technical Service Delivery - End User Services**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
558	**Application and Technical Service Delivery - Energy Procurement**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
562	**IT Management & Compliance**	**923 – Outside Service Employed**	**Allocated – 529560**	**Cost Causative Method**
565	**Application and Technical Service Delivery - Legacy Meter Services**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
568	**Application and Technical Service Delivery - Electric Realtime**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**

569	**Application and Technical Service Delivery - Operate & Restore (Gas)**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
571	**Application and Technical Service Delivery - Operations Support**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials or Number of Customers**
573	**Application and Technical Service Delivery - Project & Work Management**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
576	**Application and Technical Service Delivery - Security**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
580	**Application and Technical Service Delivery - UCOMM**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
583	**Application and Technical Service Delivery - EU Support Services**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
584	**Application and Technical Service Delivery - Outage Management & Geospatial**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
585	**Application and Technical Service Delivery - Smart Meter Operations**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
586	**Application and Technical Service Delivery - BI and Data Analytics**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**

587	**Application and Technical Service - Workforce & Mobile Technology**	**FERC Account to be determined during each individual project creation**	**Direct – 529550**	**Time and Materials**
589	**Application and Technical Service Delivery - Back End Meter Operations**	**FERC Account to be determined during each individual project creation**	**Allocated – 529560**	**Cost Causative Method**
663	**Application and Technical Service Delivery - Utility of the Future**	**FERC Account to be determined during each individual project creation**	**Allocated – 529560**	**Cost Causative Method**
775	**IT Governance**	**923 – Outside Services Employed**	**Allocated – 529560**	**% of total IT Service Billings**
777	**TDE&Ops Projects**	**FERC Accounting to be determined with FERC Reporting groups during each individual project creation**	**Direct – 529550 Allocated – 529560**	**Time and Materials or Cost Causative Method**
854	**Application and Technical Service Delivery - Legal Application Support**	**FERC Accounting to be determined with FERC Reporting groups during each individual project creation.**	**Direct - 529550**	**Time and Materials**
885	**BSC IT Services Rev Adjust**	**923 – Outside Service Employed**	**Allocated – 529560**	**% of Total IT Service Billings to each OpCo**
901	**BSC Other PA Tech Projects**	**FERC Accounting to be determined with FERC Reporting groups during each individual project creation**	**Direct – 529550 Allocated - 529560**	**Time and Materials or Cost Causative Method**
902	**BSC HR Tech Projects**	**FERC Accounting to be determined with FERC Reporting groups during each individual project creation**	**Direct – 529550 Allocated – 529560**	**Time and Materials or Cost Causative Method (typically % of total headcount)**

903	**BSC Finance Tech Projects**	**FERC Accounting to be determined with FERC Reporting groups during each individual project creation**	**Direct – 529550 Allocated - 529560**	**Time and Materials or Cost Causative Method (typically Modified Massachusetts Formula)**
904	**BSC Costs to Achieve**	**FERC Accounting to be determined with FERC Reporting groups during each individual project creation**	**Direct – 529550 Allocated – 529560**	**Time and Materials or Cost Causative Method**
906	**Enterprise Wide IT Projects**	**FERC Accounting to be determined with FERC Reporting groups during each individual project creation**	**Direct – 529550 Allocated - 529560**	**Time and Materials or Cost Causative Method**
933	**Office of the CIO Projects**	**FERC Accounting to be determined with FERC Reporting groups during each individual project creation**	**Allocated - 529560**	**Time and Materials or Cost Causative Method**
944	**NERC CIP Program Services**	**923 – Outside Service Employed**	**Allocated – 529560**	**% of critical NERC cyber assets**
951	**NERC CIP Implementation Costs**	**923 – Outside Service Employed**	**Allocated – 529560**	**% of critical NERC cyber assets**
528	**Emergency Preparedness**	**923 – Outside Service Employed**	**Direct – 529550 Allocated - 529560**	**Time and Materials**

IT as Requested Services Introduction

Periodically, the OpCos may request additional IT project or non-standard IT support services that were not identified during the budget/LRP cycle. These costs will be funded directly by the operations area of the OpCo requesting the incremental project or non-standard support. Note, additional non-standard services may be created depending on what support is requested over the course of the SLA period.

IT As Requested Services Table

As Requested Service Table

Service ID	Service Name	Service Description	Service Owner	Performance Level / Metric with Target
779 (As Requested)	As Requested IT Projects	As requested services represent emergent work requiring additional resources relative to the plan and are services specifically requested by a Client Company, Exelon's CEO or Board of Directors.	IT VP (Project Specific)	Project Performance

As Requested FERC Account and Billing Approach Table

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
779 (As Requested)	As Requested IT Projects	FERC Accounting to be determined with FERC Reporting groups during each individual project creation.	Direct – 529500 or 529550 Allocated – 529560	Time and Materials or Cost Causative Method

Performance Measurement

The performance management section outlines the standard performance metrics across IT Services, the level of service will be expected to meet at a minimum, and target levels that will be expected to be met or exceeded on negotiated timelines (if applicable).

BSC IT

IT will monitor its service levels and performance using both cost and quality metrics on an on-going basis. IT will facilitate the definition of metrics, provide templates for data input and measurement, and consolidate the inputs to calculate end-to-end process metrics where data is available.

IT will make metrics available to Client Companies and facilitate monthly/periodic meetings with Client Company Business leaders to review metrics and discuss IT performance to service level metrics.

General information covered by performance management and reporting of IT service delivery includes the following:

- Project reporting, including estimated percentage deliverables progress towards completion compared to percent of project spend; key milestones and delays
- Financial reporting on all IT spend associated with Client Company, including budgets, actual costs, and forecasts. Detailed past, current, and expected internal and external audit activity associated with IT that supports Client Company
- Control assessments and analyses of actual events
- Risk assessments, including risks to financial outcomes, risks from personnel changes, risks to successful delivery of projects, CISS risks, audit risks, and other assessments, whether accurately quantifiable or not
- Other issues or concerns as appropriate

The following table outlines the general performance measures for Service Desk and IT Operations Services:

Standard IT Operational Metrics include:

End User Computing	Target
Service Desk Resolution • **The percentage of calls resolved by the Service Desk without escalation to Level 2 or Level 3.** • **Calculated by the aggregated number of Service Desk Resolutions completed by the Service Desk divided by the total number of interactions received by the IT Service Desk during the month**	75%
Average Wait Time for Client for Service Desk • **Data comes from Cisco Call Manager** • **Includes front-end message**	60 secs

High Business Value Application and Infrastructure Reliability and Availability	Target
• **MTTR for Major Incidents – Mean Time to Restore is the elapsed time from incident detection by or reported to the ITOC until client service is restored or workaround is in place** • **Frequency – Number of Major Incident is defined as High Business Value application or Infrastructure not available**	150 mins 170 Annually

Responsibilities

The BSC IT responsibilities along with the Client Company are different based on the type of service. For example, responsibilities related to the delivery of a personal computer will be different than that of requesting changes to an application, which is owned by Client Company.

The responsibilities are general in nature and not necessarily intended to be an all-inclusive list of responsibilities between BSC IT and Client Company for every aspect of IT service delivery and support. Responsibilities have been grouped by different types, as applicable, and include:

1. End-User Support
2. Application Support
3. IT Project Delivery

Services are requested as follows with the indicated department having primary responsibility:

Service	Primary Organization
End-User Support • Desktop Issues, End-User Equipment Requests, General Information, Report System Issues	TechOps – Service Desk
Access Requests – Access to Applications	Corporate Information CISS Services Access Request Portal
Application Maintenance Requests	EDM Request to Business Unit Application Department
Project Delivery Requests	PPM Request to Business Unit Application Department

Additional Information

Service Desk and Request Fulfillment

End users contact IT Service Desk for support (create an incident) or to request an IT asset or service. The IT Service Desk may be contacted in the following ways:

1. Calling the IT Service Desk (either 1.877.9EXELON (1.877.939.3566)
2. Via the Service Manager Self-Service on-line portal 24x7.
3. Via an email to "IT Support Center" describing the incident or request.

The IT Service Desk provides 7x24 support. Client Services Support Hours are Monday – Friday, 7:30 AM – 5:00 PM, local time to their location, with after-hours support on-call for urgent issues only.

End user incidents (incidents affecting individual user) are assigned a priority based on corporate role:

	Priority		
End User Incident	ELT	VIP	Standard

The following SLAs apply to End User Incidents:

Priority	Escalation	Resolution
Standard	30 minutes business hours	2 Business Days
VIP	30 minutes 24x7	2 hours
ELT	15 minutes 24x7	1 hour

Incidents affecting systems or multiple users will be escalated to the ITOC for coordination and escalation based on a priority which is derived from severity and urgency (see table under Service Operations Support Model).

Requests for an IT asset or service creates an IT Service Request, or 'non-incident'. Service Requests are directed to the appropriate IT service owner for fulfillment. SLAs for service requests are based on the individual service. Requests for services not associated with an operational

issue (e.g. new remote access token, additional space in a home drive) will be processed Monday through Friday 8:00am to 5:00pm, local time to client location.

Service Operations Support Model

IT Operations Services supports a vast variety of technologies in the enterprise computing environment. To do this efficiently and effectively, a standard operations support model is used to drive consistent support and delivery expectations. Applications must be registered in IT's Asset Manager/Application Portfolio Manager database to subscribe to the standard Service Operations Support Model.

TechOps offers three operational support offerings: Full Support, Limited Support, and Data Center facilities Management

- **Full Support** applies to applications where TechOps is providing Infrastructure as a Service (IaaS) support for the application hosting environment. Full support provides event monitoring, incident management, incident communications, problem management, CISS patching, and routine operational maintenance. This applies to both Physical and Virtual devices. Data Center facilities costs are above and beyond this support.
- **Limited Support** applies to applications and infrastructure where TechOps provides monitoring and escalation services but is not responsible for incident resolution and other operational tasks for the equipment. This applies to P/SaaS applications and Opco IT-supported equipment. This includes Event Monitoring, Incident Escalation, Incident Communications, and Problem Management. Data Center facilities costs are above and beyond this support for devices hosted in enterprise data centers.
- **Data Center Facilities Management** applies to applications and infrastructure where equipment resides in our Enterprise Data Centers. These charges cover the costs of space, power, and general network connectivity.

Incidents are prioritized based on Business Value (Urgency) and Impact (Severity). The following table defines Incident priorities for IT Incident Management:

Impact (Severity)	Application Business Value (Urgency)			
		High	**Medium**	**Low**
	SEV-1 (Application or Infrastructure Unavailable)	Major	Minor	Routine

BSC IT

	SEV-2 (Application or Infrastructure not performing as expected)	Minor	Minor	Business Hours
	SEV-3 (Non-client impacting proactive system events)	Routine	Routine	Business Hours
	SEV-4 (Informational Alerts)	Business Hours	Business Hours	Business Hours

The following table defines the Incident Management Targets for System Incidents:

Service Level Commitment Details				
	Support Hours	**Target Resolution**	**Status Updates**	**Level of Effort**
Major	24 x 7 x 365	2 hours	2hours	Worked continuously until workaround or resolved

Minor	24 x 7 x 365	8 hours	Open/Close	Escalated 24x7 Maybe deferred until next business day by service owner in off hours
Routine	24x7x365	24 hours	None	Escalated 24x7 Maybe deferred until next business day
Business Hours	Business Hours Monday thru Friday 7AM to 7PM ET	1 Business Day	None	Worked Business Hours Only

Incident Management & Escalation Process Overview

This section provides an overview of the process steps that IT will take to resolve an incident – service not available or performing as expected reported by an end-user or via system events to the IT Operations Center (ITOC). The purpose is to add clarity to the delivery of "Incident Response" of the Standard Operations Support Model. The support workflow for an incident follows a standard process based on support levels of IT Teams, severity/urgency of the incident, and the resolution target. This section also describes how the Client Company management may escalate issues.

The IT Service Desk can be considered **Level 0** support organization. All end user interactions, and any created incidents, are to originate via contact with the IT Service Desk. If the interaction between the end user and the IT Service Desk does not result in resolution of the issue, the interaction ticket is escalated to an incident ticket and transferred to the supporting Client Services team or designated support team for resolution.

Client Services (deskside support) can be considered **Level 1** support organization. Single instances of end user incidents which cannot be resolved by the IT Service Desk are transferred to CSDS as the **Level 1** support team. CSDS are structured by the Operating Company that they support. CSDS are positioned to be the single point of client support and requests for end user tools, such as the PC, telephone, printers. They provide initial contact and desktop support for the most critical business unit applications. The CSDS support responsibilities and response metrics are based on the individual business units.

IT Operations Center (ITOC) can be considered **Level 2** support organization for all incidents from monitored system events or end-user reported incidents transferred from the IT Service Desk, that impact multiple users. The ITOC supports all Business Units. The ITOC is positioned to be the single point of contact and coordination for all infrastructure and application-based incidents or system events. The ITOC support responsibilities and response metrics are included in the "Operations Services-Standard" service, within the IT Service Table for VPs, Cloud & Infrastructure.

For incidents experienced by a single end user, Client Services may need to transfer the ticket to a **Level 3** support organization. For system incidents, the ITOC may need to transfer the ticket to a **Level 3** support organization. Level 3 support organizations include Application Support teams and Technical Engineering teams. The support responsibilities and levels of support may vary, based on the operations support model of the application.

Escalation of operational issues follows a standard process via the

- IT Service Desk
- IT Operations Center
- Director, IT Service Operations and Network Management
- Service Owner
- Chief Information Officer

Escalation of performance issues related to an IT Service is via the IT Director responsible for that service.

Technology Refresh & Capital Investments/Depreciation

The ongoing refresh and upgrade of technology is based on ownership of the IT Asset, and how it is reflected on either BSC books or the Client Company books. There are generally two approaches that are leveraged for technology assets:

BSC IT

1. For information technology that is and will most likely always be shared or changed/leveraged across Client Companies, BSC will own the technology asset.
    a. BSC is responsible for the funding of the original investment, as capital funding, probably via a project, and must plan for and budget capital investment for future refresh and upgrades to maintain the health of the IT Asset.
    b. The IT asset investment is on BSC's books as an IT Asset.
    c. BSC will record depreciation and track this depreciation at the IT Asset Class level, such that it can be appropriately recovered from the Client Companies that leverage the shared environment, based on the Depreciation IT Services. These IT services are by asset class and billed out by rate x quantity of the appropriate shared asset counts.
    d. This is applicable to hardware infrastructure, shared PCs within BSC, as well as enterprise/infrastructure software packages, and generally includes, but is not limited to,
        i. Shared data network (networking equipment supporting more than one business unit's network traffic)
        ii. Data Center technologies for all virtual environments housed in corporate data centers
        iii. Servers/Storage for applications and IT services (Note: in situations where physical servers are dedicated to and maintained by a Client Company, these may be owned by the Client Company)
    e. During annual LRP process, Client Companies and BSC will collaborate to adequately forecast demand for technology assets.

2. For information technology that is wholly dedicated or uniquely designed to support a single Client Company, the Client Company will own the technology asset.
    a. The Client Company is responsible for the funding of the original investment, as capital funding, probably via a project, and must plan for and budget capital investment for future refresh and upgrades to maintain health of the IT Asset.
    b. For Client Company owned assets, the Client Company is expected to adhere to recommended refresh guidelines (governed by Cloud & Infrastructure) to prevent interfering with the reliability of the overall enterprise infrastructure.
    c. The IT asset investment is on the Client Company books as an IT Asset.
    d. The Client Company will hold the depreciation and must budget accordingly.
    e. In the event an Op Co does not comply with a recommended refresh schedule, support will be on a best effort basis. IT will not be accountable for performance metrics related to service support.
    f. This is applicable to hardware infrastructure, PCs, as well as software packages, and generally includes, but is not limited to,
        i. Personal Computers
        ii. Dedicated servers/storage for an Opco's use
        iii. Dedicated network equipment for specific Client Company Real-Time/SCADA systems

iv. Dedicated network equipment for specific Client Company locations
v. Application software specific to a business unit

3. Enterprise IT application software assets will be allocated and recorded on an OpCo's books at the time of purchase/ development; using an appropriate, approved cost-causative allocation method as set forth in Exelon's General Services Agreement. Generally, BSC will purchase assets on behalf of the OpCo's, with the amount recorded at the OpCo level representing a beneficial ownership right in or right-to-use the IT asset.

Enterprise Demand Manager (EDM)

The standard model for requesting IT application changes is via the Enterprise Demand Manager (EDM). The level of service for requested changes to an IT service is based on the metric, *Work Requests Delivered On-Time*. *Work Requests Delivered On-Time* is defined as the delivery of a work request (EDM) to the user acceptance test (UAT) environment by the commitment date. The standard method for tracking an application (or IT service) work request is via Enterprise Demand Manager (EDM). For those Application/Service delivery teams not using the EDM process, IT will measure the level of service using data provided by the team. For those teams using PPM/EDM, the commitment date is negotiated between the Requesting Demand Manager, the Application/Service Delivery Manager, and the Service Provider based on criticality and prioritization. Expected performance is that 90% of work requests are delivered on time.

Successful user acceptance testing (UAT) is defined as the delivery of a work request that passes UAT testing (i.e. accepted by the Client UAT tester) in a certain number of cycles based on complexity. The intention of this measure is twofold; to measure the quality of code provided by the IT Service Owner, and measure the ability of the IT Service Owner to minimize the number of cycles that users are required to go through until a successful test is achieved.

The following conditions must be met for a UAT cycle to be considered successful:

- UAT Tester confirms that the change meets the documented requirements
- No code change required by the IT Service Owner's development staff within one cycle
- No additional work required by System Administrators or Database Administrators within one cycle
- No additional application configuration work required by personnel within one cycle

Work requests are tracked in Exelon's PPM tool as Enterprise Demand Manager [EDM's]. The date that code is delivered into the appropriate UAT environment is tracked in the EDM, as is the subsequent pass/fail (acceptance or rejection) of the UAT. A successful UAT will be identified BSC IT

by a lack of failure in the workflow of the UAT. To accurately measure and enforce the intent of the measure, IT assumes that UAT will immediately fail the UAT **if** any further code, database or application configuration work is required before one a work item begins UAT.

IT Service Details

IT Application Portfolio Management database is the system of record for all applications and their support levels. Always refer to APM for the most recent listing and categorization. For specific information related to "High" Business Value applications, refer to the Business Unit-specific Service Level Agreements. NOTE: For Medium and Low Business Value applications, refer to your Business Unit's application list from the APM tool to confirm Support Service Level and DR rating.

Legal Services

Legal Services Introduction

BSC Legal Services will provide a full range of legal services, including representation, advice, counseling, training and other support, to meet the legal needs of our Affiliates and their Subsidiaries.

BSC Legal services will provide governance, management and support services for Exelon Corporation and its Subsidiaries, including services for the Exelon Board of Directors and the Subsidiaries' boards of directors, as required, legal counseling for securities matters and corporate finance, manage the Ethics and Compliance Program, including the Audit Committee's process for receiving and investigating concerns about potential violations of the Code of Business Conduct, manage the shareholder service function, coordinate the development of corporate policies and the Management Model, and coordinate records management, subsidiary management and the FERC Interlock processes.

Legal Services Table

Service Table

Service ID	Service Name	Service Description	Service Owner
914	EBSC Legal – Legal Operations	Legal Operations provides practical, proactive, and creative solutions to the current and future legal needs of Exelon and is responsible for the business functions of Exelon Legal which includes financial management, client billing, business planning and analysis, human resources, systems management, and general administration. Responsibilities

Task / Responsibility	BSC Practice Area	Client Company
Notify Legal of new matter or request for service		X
Advise client of potential legal issues that come to the attention of the Legal Area	X	
Advise Legal Area of business objectives		X
Provide Legal with requested and necessary information on a timely basis		X
Have run appropriate conflicts check for matters requiring outside counsel	X	
Open new matter in legal matter management system	X	
Assign appropriate legal resources to matter, and record internal Legal time spent on each Client Company	X	
Provide monthly billing summary and other requested reporting for each matter	X	

Task / Responsibility	BSC Practice Area	Client Company
Authorize settlement or other disposition of legal matter	X	X
Create case budgets for major lawsuits, transactions and other matters as requested by client	X	
Develop and Distribute Billing Guidelines for outside counsel	X	
Develop Model Retention Agreement for outside counsel	X	
Obtain Retention Agreement for new matters assigned to outside counsel	X	
Manage the relationship with outside counsel	X	
Recommend reserve amounts as needed	X	
Budget for and fund recommended reserve amount		x

Performance Measurement

Legal Services Performance Metrics Table

Reference the Legal Services Business Plan for performance metrics.

Real Estate

Real Estate Introduction

The BSC Real Estate (RE&F) practice area provides overall strategy development and implementation for Exelon's non-utility property holdings and utility property holdings (with the exception of substations, property tax management, land rights/railroad access management, third party attachments, etc.) with regards to portfolio & real estate planning, lease management, occupancy & project management, land management, and property management (for PHI and ComEd) for the facilities that support the Company's non-utility and utility operations.

Real Estate Services Table

Service Table

Service ID	Service Name	Service Description	Service Owner
600	Real Estate Services & Asset Management Strategy	• Real Estate Portfolio & Asset Management Strategy ○ Develop and execute real estate and portfolio strategies ○ Manage and/or deliver transactions associated with the Company's facilities and related land and infrastructure properties • Lease and Records Administration ○ Manage the company's property and lease records for Exelon's non-utility and several utility facilities, land and infrastructure property holdings ○ Administer lease payments, billing and receivables for all non-utility and several utility facilities leases, land-related obligations, easements, and infrastructure agreements for which the Company is landlord, licensee, or tenant • Land Management ○ Manage land real estate-related processes for the company's non-utility land obligations and holdings, and utility land requirements up to the Substation. ○ Maintain landowner, municipal and key stakeholder relations in support of land management activities.	VP, Real Estate & Facilities
954	Facilities Management	• Deliver on-site property management services for the non-utility office and disaster recovery locations, including occupancy, move, project, and facilities management for these locations, and utility locations, where applicable. • Deliver on-site property management services for PHI and ComEd facilities (corporate buildings and service centers).	VP, Real Estate & Facilities
605	Mail Reception Services	Provide mail delivery and reception services for KS300 and Chase facilities.	VP, Real Estate & Facilities

Service ID	Service Name	Service Description	Service Owner
606	Project Design & Construction	• Manage Real Estate & Facilities related projects throughout the project life-cycle (initiation, pre-construction, execution & control, and close-out). Real Estate and Facilities supports all projects across Exelon up to the Substation. • Workplace Strategy & Occupancy Planning ○ Manage all move request and Workplace Strategy across Exelon properties to create an employee experience and improved utilization of space ○ Develop Workplace Strategy to create consistent employee experience across Exelon properties, where appropriate Handle all move requests across Exelon in collaboration with project management and in alignment with the Workplace Strategy	VP, Real Estate & Facilities
235	Real Estate As Requested	As requested services represent emergent work requiring additional resources relative to the plan and are services specifically requested by a Client Company, Exelon's CEO or Board of Directors.	VP, Real Estate & Facilities

Responsibilities

EBSC RE&F will perform the services and functions described below, working closely with our clients to assure that goals and objectives are aligned, and that our clients are engaged at the appropriate levels of their organization.

Task / Responsibility	BSC Practice Area	Client Company
Real Estate Portfolio & Asset Management & Strategy		
Develop asset plans for facilities, incorporating business requirements, real estate considerations, market dynamics and values, and internal economic considerations	X	
Develop portfolio strategy for Exelon facilities and approved business cases which may include buy, hold, sell, or lease options. Develop and execute implementation plans in support of the strategies.	X	
Manage facilities related transactions (sale, purchase, lease, sublease, etc.) and the service providers associated with executing portfolio and asset strategies	X	
Lease Administration		
Perform lease/property administration, payment, or billing services for all facilities for which the Company is landlord or tenant.	X	
Perform lease/property administration, payment, or billing services for easement, infrastructure, agreements for which the Company is landlord or tenant, in compliance with Sarbanes-Oxley and FASB	X	
Maintain property and lease information and files for owned, leased, and external tenant leases and properties. Develop and report on property and lease data, as required	X	
Perform and participate in monthly, quarterly, and year-end financial close processes in support of lease administration services	X	
Define lease audit strategy and manage lease audit performance to recover costs from landlords	X	
Work with landlords to address or resolve lease and tenant related concerns and issues	X	

Task / Responsibility	BSC Practice Area	Client Company
Project Management		
Develop and manage capital improvement projects for all locations managed by BSC RE&F	X	
Land Management		
Perform site due diligence and landowner/document curative work for existing and acquisition projects, development projects and financing projects.	X	
Workplace Strategy & Occupancy Planning		
Develop occupancy plans and activities for facilities, including development of workplace standards, policies and strategies, space programs and space planning	X	
Develop and manage occupancy planning projects for locations managed by BSC RE&F	X	
Facilities Management		
Provide on-site management of office or headquarters sites, including management of service providers, work orders and service requests, and landlord related billing or operational activities, where applicable	X	
Manage BCP alternate location assignment, as required by department plans	X	
Manage landlord relations, vendors and contracted services in support of locations without an on-site Exelon property manager	X	
For Chicago HQ and KS300, provide receptionist services	X	
Budgeting and Billing		
Define and track the allocation of lease/owned and facilities costs by OpCo	X	
Develop OpCo RE&F budgets (held by OpCo) associated with lease/owned and facility services	X

Supply

Supply Introduction

BSC Supply / Accounts Payable will provide Strategic Sourcing, Supply Operational Support, Accounts Payable invoice processing, the Credit Card Program / Expense Reimbursement, and Supply Business Operations and Technical Services from BSC Supply to the OpCos and Subsidiaries. This does not apply to embedded Supply Services.

Supply Services Table

Service Table

Service ID	Service Name	Service Description	Service Owner
628	Strategic Sourcing for Materials	Supply negotiates strategic contracts for materials used within specific business unit and enterprise-wide, acting as an authorized agent. Strategic contracts are designed to provide materials that meet business unit specifications and requirements, to take advantage of Exelon's marketplace leverage, and to optimize processes for fulfilling orders and delivering materials to users. Supply supports the business units in managing supplier performance and creates and manages supplier performance against various metrics including expenditures, savings, quality, supplier performance, process improvements, payment channels and business placed with diverse suppliers. Strategic Supply seeks to create value for its business units by minimizing the total cost of ownership of the material's complete lifecycle (from procurement through disposal). In addition, Strategic Supply partners with the business units in forecasting and managing demand, developing spend projections/budgets, and alignment of supplier's contractual requirements to business unit needs and goals.	Director, Strategic Sourcing Materials

Service ID	Service Name	Service Description	Service Owner
671	Strategic Sourcing for Services	Supply negotiates strategic contracts for services used within specific business units and enterprise-wide, acting as an authorized agent. Strategic contracts are designed to provide services that meet business unit specifications and requirements, to take advantage of Exelon's marketplace leverage, and to optimize processes for fulfilling orders and delivering services to users. Supply supports the business units in managing supplier performance and reports metrics on such parameters as expenditures, savings, supplier performance, process improvements, payment channels and business placed with diverse suppliers. In addition, Strategic Supply partners with its clients in forecasting and managing demand, developing spend projections/budgets, and alignment of supplier's contractual requirements to business unit needs and goals.	VP, Services Sourcing
676	Supply Operations Management	Centralized support of the day-to-day field operations, enabling implementation of and compliance to standardized processes and procedures based on best practices, as well as continuous improvement. Handles emergent issues of complexity requiring off-location assistance, including support in resolving complex materials and services issues. Coordinates common projects affecting multiple locations and provides oversight and recommendations for routine program assessments, emergency response and outside organizational assessments including central purchasing.	VP, Supply Operations
678	Supply Systems, eBusiness, & Support	Provide leadership to identify technological options to improve business processes; manage the performance and effectiveness of Supply systems; implement technology infrastructure; provide data for decision-making; standardize/automate collection and reporting of data; establish and lead cross-functional business/technology teams; ensure Exelon procure-to-pay systems are Sarbanes-Oxley compliant and aligned with compliance and policy requirements; provide governance, oversight, and lead cross functional project teams in the development and implementation of high impact/high risk process improvements and strategic projects; manage multiple projects that are complex, high risk and have high organizational impact; and administer and strengthen the reliability of the annual IRS filing process, for Exelon domestic and majority of foreign transactions.	VP, Business Operations and Technical Support

Service ID	Service Name	Service Description	Service Owner
631	Supply Operations Support	Provides governance and oversight for the Sourcing and Operations groups supporting each business unit which also includes business planning, management review meetings, client meetings, and project management activities.	VP, Supply Operations
632	Investment Recovery	Management of the risk associated with the disposition of surplus and obsolete assets. Ensures that materials and equipment are disposed of in compliance with all applicable federal, state, and local regulations and in a manner that is most appropriate and returns the best possible value, using a consistent pricing strategy for the disposition of inventory and non-inventory assets.	VP, Business Operations and Technical Support
633	Inventory Management	Support Supply Operations in the management of site and enterprise-wide inventory in a consistent manner that fully complies with all applicable regulatory requirements and aligns with Business Unit needs. Provide reporting and tools to guide Supply Operations in development of goals and inventory strategies, and to measure performance.	VP, Business Operations and Technical Support
670	Strategic Sourcing for Shared Materials and Services	Supply negotiates and executes strategic contracts for materials and services needed for technology-related services and materials within and across multiple business units, acting as an authorized agent. Strategic contracts are designed to provide materials and services that meet business specifications and requirements, take advantage of Exelon's marketplace leverage, optimize processes, and maximize value in delivering materials and services to users. Supply supports the business units using such materials and services in providing category management, managing supplier performance and reports metrics to the governing business units on such parameters as expenditures, savings, supplier performance, process improvements, payment channels and business placed with diverse suppliers. In addition, Strategic Supply partners with its clients in forecasting and managing demand, developing spend projections/budgets, and alignment of supplier's contractual requirements to business unit needs and goals.	VP, Supply Corporate Sourcing

Service ID	Service Name	Service Description	Service Owner
630	CSO/Supply Governance & Compliance	Provide improved performance, accountability and consistency across Supply to ensure we provide a high level of support to our business partners through the development and management of Supply policy (management model), performance accountability (i.e. management review meetings), training strategy and support, business planning and performance indicators, communication and change management, records management, contract billing and compliance audits, compliance programs, and benchmarking. Also provides financial and analytical expertise, data visualization, supplier diversity reporting and actionable insights to drive sustainable results and savings – includes sourcing initiative support, market intelligence, risk assessment and other financial analyses.	VP, Business Operations and Technical Support

788	Supply As Requested	As requested, services represent emergent work requiring additional resources relative to the plan and are services specifically requested by a Client Company, Exelon's CEO or Board of Directors BSC will budget overtime for planned outages and emergency response activities (i.e. unplanned maintenance outages). BSC will also budget for non-labor operations support where the Client does not budget such as certain Fleet equipment (trailers) or other systems and tools to maintain operations such as oil processing equipment, cranes, warehouse docks Client will be responsible for the following financial transactions: • Budget overtime dollars for business unit directed overtime, • Labor costs for non-supply functions performed by supply (e.g. storm duty), • Cost of expediting materials, cost of disposition of shelf-life expired items and obsolescence, • Associated adjustments due to inventory cycle count discrepancies, • Rentals of supplementary handling equipment, • Client Requested Vendor Audits (non-labor costs), • Maintenance for non-Supply Inhabited Facilities, • Third party freight, shipping, and • Expedited manufacture. As requested, services represent emergent work requiring additional resources relative to the plan and are services specifically requested by a Client Company, Exelon's CEO or Board of Directors for Accounts Payable for the given Service Period. As requested, services include: • Project - A unique activity, or set of activities, that accomplishes a measurable objective, and has specific beginning and end dates, and an identified funding source. • Enhancement - Development, testing, and implementation activities which are smaller than the minimum size of a project. Small enhancements include only changes to an existing application and cannot introduce a new application into the environment. • Consulting - Providing specialist advice and expertise independent of an identified project or enhancement • Staffing – staffing shifts not normally staffed for readiness and planning purposes such as generator standby, critical venue support and storm potential AND one or more of the following exists: • Discretionary and applies to a single/small number (2-3) OpCos • Regulatory and only applies to one OpCo without the potential to apply to others	VP, Utilities Supply Operations & Sourcing; Directors/Manager of Utilities Supply Operations VP, Business Operations & Technical Support; VP, Supply Corporate Sourcing

Service ID	Service Name	Service Description	Service Owner
		• Is outside the standard platform • Requires outside services to complete	

342	BSC Accounts Payable Transactions	<u>Transaction Processing</u>
		• Support of Accounts Payable transactions requiring EBSC AP resources for entry processing (i.e. Invoices received via US Mail and email)
		• Support of Non-Accounts Payable processed transactions not requiring EBSC AP resources for entry processing (i.e. Invoices received via Electronic Data Interchange (EDI), Contract Invoice Automation (CIA))
		• Associated AP & non-AP Support Services
		  ○ Timely processing of supplier invoices
		  ○ Storage of invoices to enable short-term availability and long-term archival storage
		  ○ Facilitate resolution of invoice discrepancies
		  ○ Perform tax reporting as required by law (1099's/1042's)
		  ○ Disburse manual check requests internally per schedule
		  ○ Process cancelled checks and stop payments
		  ○ Provide support for internal and external audits
		  ○ Duplicate Payment identification and recovery
		  ○ Process add/change/expel Vendor Maintenance requests
		  ○ Manage/Govern Voucher Process
		• End user process support
			VP, Business Operations & Technical Support

324	BSC Accounts Payable Credit Card Transactions	• Corporate Credit Card Transactions
		  ○ Process new/add/change requests
		  ○ User system and process support
		  ○ Administration of Corporate Credit Card Program
		  ○ Administration of Out-of-Pocket Reimbursement Program
		  ○ Issue Management Reports documenting card usage and compliance
		  ○ Administration of file transfers, including management of accounting anomalies
		  ○ Provide monthly reporting in support of reconciliation of credit card clearing accounts
		  ○ Provide support to internal and external audits
		• Quarterly Credit Card rebate received directly from credit card provider
		• Make payments to Bank Card provider under Exelon Corporate Credit Card Program
			VP, Business Operations & Technical Support

Service ID	Service Name	Service Description	Service Owner
347	Diverse Business Empowerment	EDBE leads supplier diversity activities on behalf of Supply within Exelon Utilities. EDBE partners with Utility Sourcing to ensure inclusion of diverse-certified vendors in the sourcing process. EDBE also partners with business partners at each Utility to establish annual diverse spend goals, as well as interface with various key external stakeholders—regional and national-- on matters related to engaging diverse businesses. In addition, EDBE partners with Supply BOTS to produce regular data reports that track actual and projected diverse spend performance. EDBE also develops the overall strategy at each Utility for managing local and diverse business engagement. EDBE supports the Utilities in managing supplier diversity performance and reports metrics at Regulatory forums in various jurisdictions across the EU footprint.	Director of Exelon Diverse Business Empowerment
346	BSC AP Services Revenue Adjustment	The difference between actual cost and revenues from billings to the Client Companies is "trued up" each year by allocating it pro rata to the Client Companies based on their share of Total AP Service Billings.	Chief Supply Officer
833	BSC Revenue Adjustment	The difference between actual cost and revenues from billings to the Client Companies is "trued up" each year by allocating it pro rata to the Client Companies based on their share of Total Service Billings.	Chief Supply Officer
904	BSC Costs to Achieve	Costs associated with establishing operations as a result of a merger, acquisition, split, or divestiture.	Chief Supply Officer

FERC Account and Billing Approach Table

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
628	Strategic Sourcing for Materials	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Sourced Materials
671	Strategic Sourcing for Services	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Sourced Services
676	Supply Operations Management	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Sourced Materials and Services

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
678	Supply Systems, eBusiness, & Support	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Billed and Embedded Costs
631	Supply Operations Support	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Sourced Materials and Services
632	Investment Recovery	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Sourced Materials
633	Inventory Management	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Sourced Materials
670	Strategic Sourcing for IT Materials and Services	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Sourced Materials and Services
630	CSO/Supply Governance	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Billed and Embedded Costs
788	Supply As Requested	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Billed and Embedded Costs
342	BSC Accounts Payable Transactions	923 – Outside Service Employed	Direct – 529450	Unit Price – Per # of AP transactions processed
324	BSC Accounts Payable Credit Card Transactions	923 – Outside Service Employed	Direct – 529450	Rebate and/or Costs based on ratio of Credit Card spend

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
347	Diverse Business Empowerment	923 – Outside Service Employed	Direct - 529450	Time and Materials
			Allocated - 529460	Total Supply Sourced Materials and Services
346	BSC AP Services Revenue Adjustment	923 – Outside Service Employed	Allocated – 529460	Total AP Service Billings
833	BSC Revenue Adjustment	923 – Outside Service Employed	Allocated - 529460	Total Service Billings
904	BSC Costs to Achieve	923 – Outside Service Employed	Direct - 529700	Fully Distributed Costs
			Allocated - 529710	Cost Causative Method

Responsibilities

BSC Supply and Client Responsibilities are delineated in Supply Procedures located on the BSC Management Model Website and in the Applicable Procedures are:

- "SM-AC-XX" for All Supply
- "SM-CE-XX" for ComEd only
- "SM-PE-XX" for PECO only
- CNG-SC-1.01-1001, Processing New Item Requests, Requisitions, Request for Quotations, Issuing Purchase Orders and Revisions

Additional Exelon Management Model documents that may be applicable to BSC Supply employees, including embedded personnel, are contained in the Utilities (ED or EU) branch of the Exelon Management Model (XX-ED-## or XX-EU-##) housed in Electronic Data Management System tool (EDMS).

BSC Management Model Website is accessible via the Exelon Home Page in the Quick Links table.

Accounts Payable / Credit Card Services Task / Responsibility	EBSC	Client Company
Accounts Payable – Invoice Processing Services		
Provide accurate information for Invoice Entry (i.e. PO/Contract #, Rel, Code Block)		X
Receive and prepare manual invoices for entry	X	
Timely approval of invoices		X
Archive invoices	X	
Enter manual Invoices	X	
Process invoices for payment as defined in documented processes	X	
Respond to vendor and internal inquiries	Primary	Support
Administer processing of discrepant invoices as defined in documented processes	Primary	Support
Disburse emergency check requests internally and externally as requested	X	
Establish and maintain procedures for A/P process	X	
Issue 1099's as required by law	X	
Identify and recover potential duplicate payments and unrecovered credits	Primary	Support
Process cancelled checks and stop payments	X	
Provide accurate information for Vendor Maintenance (i.e. TIN, W-9, Remit, Address)		X
Process vendor add/change requests and respond to routine user questions	X	
Enter/Create voucher(s)		X
Respond to routine Voucher user questions & requests	X	
Provide support to internal and external audits	Primary	Support
Expense Reimbursement Services		
Use Corporate Credit Card in accordance with policy	X	X
Process card add/change requests and respond to routine user questions & requests	X	
Update system with card add/change requests received from client	X	
Process Corporate Credit Card payment requests	X	

Accounts Payable / Credit Card Services Task / Responsibility	EBSC	Client Company
Retention of records	X	
Management of monthly file posting to General Ledger	X	
Resolution of code block anomalies		X
Reconcile clearing accounts related to monthly payment to Credit Card provider	X	X
Inadvertent process administration and reconciliation	X	
Respond to routine Out of Pocket reimbursement user questions & requests	X	

Performance Measurement

Supply Performance Metrics Table

Reference the Supply Business Plan for performance metrics.

Transportation

Transportation Introduction

Transportation area provides flight transportation to authorized executives.

Transportation Services Table

Service Table

Service ID	Service Name	Service Description	Service Owner
783	BSC Use of Corporate Jet	Provide and coordinate private flight transportation to authorized executives, services include Executive Aviation Accounting Services which includes the payment of monthly maintenance and flight charge invoices, billing passengers for flight hours, maintaining passenger documentation and records, preparing executive reports, and support of internal and external audits.	Transportation Director
667	BSC Corp Jet Adjustment	The difference between actual costs and revenues from billings to the Client Companies is "trued up" by allocating it pro rata to the Client Companies based on their share of Total Transportation Service Billings.	Transportation Director
904	BSC Costs to Achieve	Costs associated with establishing operations as a result of a merger, acquisition, split, or divestiture.	Transportation Director
794	Transportation As Requested	As requested services represent emergent work requiring additional resources relative to the plan and are services specifically requested by a Client Company, Exelon's CEO or Board of Directors.	Transportation Director

FERC Account and Billing Approach Table

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
783	BSC Use of Corporate Jet	923 – Outside Services Employed	Direct - 529250	Unit price - Per occupied flight hour (variable costs) Office of CEO (fixed costs)
			Allocated- 529260	Modified Massachusetts Formula

BSC Transportation

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
667	BSC Corp Jet Adjustment	923 – Outside Services Employed	Allocated - 529260	Total Transportation Service Billings
904	BSC Costs to Achieve	923 – Outside Service Employed	Direct - 529700	Fully Distributed Costs
			Allocated - 529710	Cost Causative Method
794	Transportation As Requested	923 – Outside Service Employed	Direct - 529250	Time and Materials

Responsibilities

Task / Responsibility	EBSC	Client Company
Executive Transportation		
Timely Notification	X	
Transport the client to his/her destination; assist with any bags	X	
Maintain transportation logs	X	
Maintain and provide monthly billing log	X	
Respond to inquiries on corporate jet use	X	

Appendix A

IT RxQ Technical Services Table

Below is a list of the IT Technical Services required to support, align, and allocate to the IT Portfolio Services Cost model. These are Rate x Quantity services that include Technical Design & Engineering (TD&E) and Technology Operations (Tech Ops) Hardware and Labor costs

Service ID	Service Name	Service Description	Service Owner
401	Linux - Virtual	A service provided to application services, indicating the type of Linux-based server technical infrastructure used by the application. This is considered the standard and most applicable Linux platform. The application team and server engineering team determine the appropriate type and size of the server for the application and business criticality of the application.	VPs, Technical Operations, Architecture and Engineering
402	Linux - Physical	A service provided to application services, indicating the type of Linux-based server technical infrastructure used by the application. This is considered the standard, and most applicable, Linux platform. The application team and server engineering team determine the appropriate type and size of the server for the application and business criticality of the application.	VPs, Technical Operations, Architecture and Engineering
403	Mainframe Services	A service provided to administer and schedule the mainframe hosting environment. This is based on the CPU minutes used by the end-users using the application asset.	VPs, Technical Operations, Architecture and Engineering
404	UNIX High End	A service provided to application services, indicating the type of UNIX-based server technical infrastructure used by the application. The application team and server engineering team determine the appropriate type and size of the server for the application and business criticality of the application.	VPs, Technical Operations, Architecture and Engineering
405	UNIX Low End	A service provided to application services, indicating the type of UNIX-based server technical infrastructure used by the application. This is considered the low-end of the UNIX platform. The application team and server engineering team determine the appropriate type and size of the server for the application and business criticality of the application.	VPs, Technical Operations, Architecture and Engineering

406	UNIX Standard	A service provided to application services, indicating the type of UNIX-based server technical infrastructure used by the application. This is considered the standard, and most applicable, UNIX platform. The application team and server engineering team determine the appropriate type and size of the server for the application and business criticality of the application.	VPs, Technical Operations, Architecture and Engineering
407	Wintel Physical Server	A service provided to application services, indicating the type of server technical infrastructure used by the application. A 'physical' server provides a stand-alone technology platform for an application when a virtual environment does not support the application. The application team and server engineering team determine the appropriate type and size of the server for the application and business criticality of the application.	VPs, Technical Operations, Architecture and Engineering
409	Wintel Virtual	A service provided to application services, indicating the type of server technical infrastructure used by the application. The application team and server engineering team determine the appropriate type and size of the server for the application and business criticality of the application.	VPs, Technical Operations, Architecture and Engineering
411	IT Service Desk	A service to provide access to the IT Service Desk to report issues and service requests. This service includes the Service Desk, and service & asset management tools (includes governance and reporting of IT asset information in support of IT billing and other IT services).	VPs, Technical Operations, Architecture and Engineering
412	PC Services – Base	This service includes the software operating system for a personal computer, virtual computer, or a rugged PC, including enterprise desktop tools like NitroPro for PDF and other desktop software. Technology refresh expectations apply – see **Technology Refresh & Capital Investments/Depreciation** description in this Service Catalog. Client Companies own/lease PC hardware, per Technology Refresh Responsibilities.	VPs, Technical Operations, Architecture and Engineering
417	Remote Access	Access to the Exelon Enterprise Data Network as well as access to registered applications from remote locations or internally leveraging devices other than a traditional personal computer. BSC owns Remote Access infrastructure, per Technology Refresh Responsibilities.	VPs, Technical Operations, Architecture and Engineering
418 - 423	Depreciation – Shared Infrastructure	Costs of depreciation of shared infrastructure across IT asset classes: 418 - Depreciation Shared Network 419 - Depreciation Shared PC 420 - Depreciation Shared Storage 421- Depreciation Shared Telecom 422 - Depreciation Shared UNIX 423 - Depreciation Shared Wintel	VPs, Technical Operations, Architecture and Engineering

429	Disaster Recovery Program Management	This service provides program coordination for applications with defined Disaster Recovery plans. It includes supporting application teams developing playbooks and facilitating DR exercises.	VPs, Technical Operations, Architecture and Engineering
431	Virtual Hosting Support	This service provides the day-to-day operations and support of virtual infrastructure assets installed in the data centers, including IT Operations Center, Tier 2 Operational Support, Infrastructure Base Monitoring, Release and Problem Management, Data Center Management. This is aligned with the Standard Operations Support Model. The assumption is that Basic applications are single server, Standard applications are clustered, and Premium applications are n+1.	VPs, Technical Operations, Architecture and Engineering
437	Storage	This service provides corporate-owned storage solution for all computing purposes, including but not limited to file shares, applications and database storage for Wintel, LINUX and UNIX environments.	VPs, Technical Operations, Architecture and Engineering
442	Telephony – Desktop	This service provides an internal Exelon telephone number with access to enterprise audio conferencing and voice mail solutions, if appropriate. Includes non-labor back-end support. Client Company pays directly for circuits and usage. BSC owns central telephony infrastructure supporting infrastructure, per Technology Refresh Responsibilities. Client Company owns responsibility for individual phone systems at their locations.	VPs, Technical Operations, Architecture and Engineering
443	Unified Communications – Video Conference	Video Conference (VC) Unit Services include services covered under existing maintenance contracts. VC Units include vendor maintenance and on-site support for incidents reported through the Service Desk with an expected response of 8x5 NBD (Next Business Day). This service does not include out of warranty parts and labor which will be billed through the time and material service offering. Support to audio/visual conference equipment is also covered in locations where video conference rooms are also supported. Audio/Visual Conference Rooms are generally not covered under any maintenance contracts. Routine replacement of items such as bulbs/lamps, projectors, screens, displays, and cables are the responsibility of the BU owning the room. BUs wanting full warranty support for these rooms can purchase an agreement separately and will be billed directly. Access to this service is dependent on network capacity at a particular site. BSC owns Video Conference supporting infrastructure, per Technology Refresh Responsibilities. Client Company owns responsibility for individual Video Conference unit, and facilities where video conference is located.	VPs, Technical Operations, Architecture and Engineering
447	Load Balancing	This service provides load balancing for applications (required for High/Gold and available for Medium/Silver/-or Low/Bronze), which allows application teams to distribute the load for an application across multiple server environments.	VPs, Technical Operations, Architecture and Engineering

450	Network Operations	This service provides network operations support, including monitoring, support, and compliance as well as access to the Enterprise Data Network and User Login Services including Active Directory.	VPs, Technical Operations, Architecture and Engineering
451	Data Center Operations	This service includes monitoring and facilities support for data center hosted applications.	VPs, Technical Operations, Architecture and Engineering
452	Premium Desktop	This service includes the application license and maintenance cost for premium software applications: Adobe, Microsoft Visio and Microsoft Project	VPs, Technical Operations, Architecture and Engineering
456	Unix Virtual	A service provided to application services, indicating the type of UNIX-based server technical infrastructure used by the application. A 'virtual' server is the preferred environment for applications. The application team and server engineering determine the appropriate type and size of the server for the application and business criticality of the application.	VPs, Technical Operations, Architecture and Engineering
464	Java App Hosting Services	Hosting services for a java-based application including maintenance and support services on the shared infrastructure.	VPs, Technical Operations, Architecture and Engineering
465	Storage Backup	This service provides backup service to servers and file shares	VPs, Technical Operations, Architecture and Engineering
467	Physical Hosting Support	This service provides the day-to-day operations and support of physical infrastructure assets installed in the data centers, including IT Operations Center, Tier 2 Operational Support, Infrastructure Base Monitoring, Release and Problem Management, Data Center Management. This is aligned with the Standard Operations Support Model.	VPs, Technical Operations, Architecture and Engineering
468	SQL Server IaaS	Includes SQL Server Standard & Enterprise Edition (all versions), HA, DR, SQL Server Reporting Services, Analysis Services and Integration Services. Covers license software maintenance charges as well as labor required to support all database environments and databases.	VPs, Technical Operations, Architecture and Engineering
469	SQL Server DBaaS	Includes SQL Server Enterprise Edition (all versions), HA, DR, SQL Server Analysis Services and Integration Services. Covers license software maintenance charges as well as labor required to support all database environments and databases. Also includes TD&E and TechOps server costs. This is a shared environment with other BU applications.	VPs, Technical Operations, Architecture and Engineering

470	SharePoint - Hosting	Includes license and labor to support the corporate SharePoint platforms (all versions), HA/DR, Monitoring and Backup. Includes storage, server, and cloud consumption (for IaaS and Office365) environments	VPs, Technical Operations, Architecture and Engineering
473	P/SaaS Ops Support	This service provides monitoring and problem management for cloud-hosted solutions.	VPs, Technical Operations, Architecture and Engineering
474	Web Hosting Premium	This service provides platform support for high complexity websites. The application and engineering teams will determine whether applications warrant this level of support.	VPs, Technical Operations, Architecture and Engineering
482	Oracle Fusion Middleware	Includes the maintenance and labor to support the Oracle Fusion software for application integration, HA/ DR, Architecture, Engineering, Projects, and Monitoring. Over time, Oracle Fusion middleware will replace Tibco and IBM.	VPs EWS
484	Storage – Array Support	This storage offering is the standard storage offering for OpCo owned storage arrays. These devices still meet I&O standards providing a high- level performance and availability, but are an OpCo, not TD&E, asset. This service is an array- based charge to cover the cost of labor and maintenance but excludes depreciation costs as that is being handled directly by the OpCo.	VPs, Technical Operations, Architecture and Engineering
490	Oracle Golden Gate	Includes RDBMS (all versions), HA (VCS, RAC), DR (Dataguard, Active Dataguard, Golden Gate), Partitioning, Advanced Compression. Covers license software maintenance charges and all associated depreciation charges as well as the labor required to support all database environments and databases. Also includes TD&E server allocation charges	VPs, Technical Operations, Architecture and Engineering
491	Oracle Instance	Includes RDBMS (all versions), HA (VCS, RAC), DR (Dataguard, Active Dataguard, Golden Gate), Partitioning, Advanced Compression. Covers license software maintenance charges and all associated depreciation charges as well as the labor required to support all database environments and databases. Also includes TD&E server allocation charges	VPs, Technical Operations, Architecture and Engineering
492	Oracle Home	Includes RDBMS (all versions), HA (VCS, RAC), DR (Dataguard, Active Dataguard, Golden Gate), Partitioning, Advanced Compression. Covers license software maintenance charges and all associated depreciation charges as well as the labor required to support all database environments and databases. Also includes TD&E server allocation charges	VPs, Technical Operations, Architecture and Engineering
849	IBM WebSphere Enterprise Integration Services	Service provided to Business Application owners based on usage of the number of IBM Queue Managers, IBM Broker Instances, Java Virtual Machines (JVM), WebSphere Partner Gateway (WPG) Documents and Tivoli Monitoring. This is considered the IBM WebSphere Standard.	VPs, Technical Operations, Architecture and Engineering

593	Apigee	Platform for API Life Cycle Management. Replaces Layer7 API Gateway	VPs, EWS
594	Boomi	Cloud-based integration platform that enables cloud to cloud or cloud-on-prem integrations. Possible viable replacement for IBM MQ Broker, Tibco and Oracle Fusion technologies	VPs, EWS
996	Telephone Physical	Telephone Physical – Covers services and support associated with physical telephones through PBX or VoIP telephone systems. This includes any telephony device registered to these systems VoIP, analog or digital. Includes services or apps such as paging, fax connections, life / safety devices, call center solutions, menu options and extended services for plant or outside facilities.	VPs, Technical Operations, Architecture and Engineering
997	Office 365	Office 365 E5 is a cloud-based suite of productivity apps combined with advanced voice, analytics, security, and compliance services. Includes Word, Excel, PowerPoint, Outlook, OneNote, SharePoint, OneDrive, Teams and more.	VPs, Technical Operations, Architecture and Engineering
998	Email Operations	Provides on-prem Exchange services including mail relay, SMTP, associated Operations and Engineering support.	VPs, Technical Operations, Architecture and Engineering
F87	TIBCO Enterprise Integration Services	Includes the license and labor to support the TIBCO Middleware software (all versions), HA/ DR, Architecture, Engineering, Projects, and Monitoring (HP Diag, Hawk, BSM etc).	VPs, EWS

IT Technical Services
FERC Account and Billing Approach Table

Service ID	Service Name	Major Client FERC Account	Billing Approach	Basis
401	Linux - Virtual	923 – Outside Services Employed	Direct (R*Q) - 529550	# of “compute units" = # CPU + # gb RAM. 0-1999 gb RAM = 1; 2000-2099 gb = 2, etc e.g., 2CPU + 4gb RAM = 6 “compute units” , Compute units capped at 64mb
402	Linux - Physical	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Servers

403	Mainframe Services	923 – Outside Services Employed	Direct (R*Q) - 529550	CPU Usage (MIPS)
404	UNIX High End	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Servers
405	UNIX Low End	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Servers

411	(User) Login LAN Account	923 – Outside Services Employed	Direct (R*Q) - 529550	Count of Active Directory Accounts (LAN IDs)
412	PC Services – Base	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Desktops, Laptops, Virtual PCs, & Rugged PCs
417	Remote Access	923 – Outside Services Employed	Direct (R*Q) - 529550	# virtualized applications
418	Depreciation Shared Network	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Personal AD Accounts
419	Depreciation Shared PC	923 – Outside Services Employed	Direct (R*Q) - 529550	# of PCs
420	Depreciation Shared Storage	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Storage Units across all types
421	Depreciation Shared Telecom	923 – Outside Services Employed	Direct (R*Q) – 529500	# of Telephone Ports
422	Depreciation Shared UNIX	923 – Outside Services Employed	Direct (R*Q) - 529550	# of UNIX Servers hosting BU-based Applications
423	Depreciation Shared Wintel	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Wintel instances hosting BU-based Applications
429	Disaster Recovery Program Management	923 – Outside services employed	Direct (R*Q) - 529550	# of applications participating in DR Program

431	Virtual Hosting Support	923 – Outside Services Employed	Direct (R*Q) – 529550	# of Servers
437	Storage	923 – Outside services employed	Direct (R*Q) – 529550	# of Gigabytes of Storage
442	Telephone	923 – Outside Services Employed	Direct (R*Q) - 529500	# telephone ports
443	Unified Communications – Video Conference	923 – Outside Services Employed	Direct (R*Q) - 529500	# video conference units
447	Load Balancing	923 – Outside Services Employed	Direct (R*Q) – 529550	# of Applications with Load Balancing
450	Network Operations	923 – Outside Services Employed	Direct (R*Q) – 529550	# of LAN IDs (must also be a consumer of either service 411 and/or service 448)
451	Data Center Operations	923 – Outside Services Employed	Direct (R*Q) – 529550	# of Servers or Network Equipment
452	Premium Desktop	923 – Outside Services Employed	Direct (R*Q) – 529550	# of Adobe, Visio and Project installs
456	Unix Virtual	923 – Outside Services Employed	Direct (R*Q) – 529550	# of Servers
464	Java App Hosting Services	923 – Outside Services Employed	Direct (R*Q) - 529550	# of JVM
465	Storage Backup	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Gigabytes of Backup storage
467	Physical Hosting Support	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Servers
468	SQL Server IaaS	923 – Outside Services Employed	Direct (R*Q) - 529550	# of server Cores
469	SQL Server DBaaS	923 – Outside Services Employed	Direct (R*Q) - 529550	# of SQL databases
470	SharePoint - Hosting	923 – Outside Services Employed	Direct (R*Q) - 529550	# of instances
473	P/SaaS Ops Support	923 – Outside Services Employed	Direct (R*Q) - 529550	# of APM Applications listed as PaaS/SaaS
474	Web Hosting Premium	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Website page views
482	Oracle Fusion Middleware	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Fusion Connectors

484	Storage – Array Support	923 – Outside Services Employed	Direct (R*Q) - 529550	# of Storage Arrays
490	Oracle Golden Gate	923 - Outside Services Employed	Direct (R*Q) - 529550	# Active Gold Gate feeds
491	Oracle Instance	923 - Outside Services Employed	Direct (R*Q) - 529550	# DB Instances
492	Oracle Home	923 - Outside Services Employed	Direct (R*Q) - 529550	# software installations support
849	IBM WebSphere Enterprise Integration Services	FERC Account to be during each individual project creation.	Allocated – 529560	Based on the number of QMANAGERS
593	Apigee	FERC Account to be during each individual project creation.	Direct (R*Q) - 529500	# of connections
594	Boomi	FERC Account to be during each individual project creation.	Direct (R*Q) - 529500	# of connections
996	Telephone - Physical	923 - Outside Services Employed	Direct (R*Q) - 529550	# telephone ports for Cisco/Avaya Phones
997	O365	923 – Outside Services Employed	Direct (R*Q) – 529550	Count of Active Directory Accounts (LAN IDs)
998	Email Operations	923 – Outside Services Employed	Direct (R*Q) – 529550	Count of Active Directory Accounts (LAN IDs)
F87	TIBCO Enterprise Integration Services	FERC Account to be during each individual project creation.	Direct (R*Q) - 529500	# production services deployed in the corporate TIBCO environment.

SECTION I

INTRODUCTION AND CORPORATE STRUCTURE

A. SCOPE

This Mutual Services Agreement ("MSA") and Asset Transfer Agreement Cost Allocation Manual ("Manual") applies to transactions between PECO Energy Company ("PECO") and the Exelon Entities (as defined in Section II).

In previous years, transactions between PECO and the Exelon Entities were governed by the PUHCA rules of the SEC. After PUHCA 1935 was repealed effective February 8, 2006, these transactions were subject to the MSA. The MSA rules generally require such transactions to be priced at cost.

In 2008, the Federal Energy Regulatory Commission (FERC) issued new pricing rules for affiliate transactions involving non-power goods and services. The provision of non-power goods and services, including any goods, equipment (including machinery), materials, supplies, appliances, or similar property (including oil, coal, steam, but not including electric energy, natural or manufactured gas, utility assets, intangible property, or tangible assets such as real property, buildings, and the like) will be subject to the following pricing:

- For services provided by PECO to another affiliate (except to another state-regulated utility), the pricing standard is the higher of Fully Distributed Cost or Fair Market Value.
- For services provided by another affiliate (except by another state-regulated utility or EBSC) to PECO, the pricing standard is the lower of Fully Distributed Cost or Fair Market Value.
- EBSC will charge Fully Distributed Cost to all affiliates.
- Services between PECO and ComEd will be priced at Fully Distributed Cost, except that if there is a Prevailing Price for the service, it may only be provided if Fully Distributed Cost equals Prevailing Price.

The overall objective of the Cost Allocation System is to establish cost allocation methodologies that apportion costs between PECO and the Exelon Entities so as to preclude cross-subsidization of the Exelon Entities by PECO customers. Cross-subsidization results under cost-based regulation when the prices of a regulated company's regulated services improperly reflect the costs of associated activities.

In the event of a conflict between this Manual, the MSA and FERC, the order of priority shall be FERC, MSA, and this Manual.

Each PECO department is responsible for implementation within its organization of the policies and guidelines for associated company transactions set forth in the MSA and this Manual. All intercompany transactions shall be adequately documented. Continual monitoring and internal controls shall be maintained to assure that policy guidelines described in this Manual are observed and that potential or actual deviations are detected and corrected.

Please contact PECO's General Accounting Department and/or BSC's Legal Department to resolve any conflict between this Manual, FERC and the MSA rules.

SECTION II

DEFINITIONS

Set forth below is a definition of terms that are used throughout this Manual.

Acquiring Party: A Party who desires to acquire real property, interests in real property, tangible personal property or intangible assets from a Selling Party.

Client Company: A Party who desires to receive services or goods and has requested another Party to provide services and or goods in accordance with the terms of an Approved Services Agreement.

ComEd: Commonwealth Edison Company, PECO's affiliate.

EBSC: Exelon Business Services Company, LLC.

Exelon Entities: Exelon and all of its subsidiaries other than PECO are Exelon Entities.

Fair Market Value: The resultant price set by an arms-length transaction between a willing buyer and a willing seller, both of whom are adequately informed of the appropriate facts, and neither of whom is under any compulsion to buy or sell.

FERC: Federal Energy Regulatory Commission.

Fully Distributed Cost: Fully Distributed Cost includes the actual direct costs or allocated costs incurred by a Providing Company to provide a service or facility, plus indirect costs and other appropriate overheads. See Section IX, Fully Distributed Cost Method, for a detailed discussion as well as examples of fully distributed cost.

MSA: Mutual Services Agreement approved by the PaPUC under which PECO provides non-power services to Exelon Entities or receives non-power services from Exelon Entities other than EBSC.

PaPUC: The Pennsylvania Public Utility Commission.

Party: Party means each, and Parties means all, of the entities who are from time to time a party to the MSA.

Prevailing Price: In the case of services or facilities provided by ComEd to an Exelon Entity, Prevailing Price will only apply to services or facilities provided for sale to the general public. This includes electric service, service provided under an ICC approved pricing mechanism such as Rate CS, and Competitive Services provided to the general public. Prevailing Price is generally defined as the price that has been charged to the general public. When PECO provides a service or facility to ComEd, Prevailing Price is defined as the price charged to nonassociates if such transactions with nonassociates constitute a substantial portion of PECO's total revenues from such transactions.

Providing Company: A Party who has been requested to, and who is able and willing to, furnish facilities and/or provide services to a Requesting Company under the terms of the MSA.

PUHCA: The Public Utility Holding Company Act of 1935 ("PUHCA") was enacted in 1935 to combat abuses commonly arising in utility holding companies in the early part of the 1900's. PUHCA, enforced by the SEC, focused most specifically on the practices of the holding company extracting excessive charges from its regulated utilities for services and of unfairly allocating costs to different utilities in different states. The Energy Policy Act of 2005 repealed PUCHA 1935 effective February 8, 2006, and replaced it with PUHCA 2005.

SEC: Securities and Exchange Commission

Selling Party: A Party who is willing to sell and transfer real property, interests in real property, tangible personal property or intangible assets to an Acquiring Party.

Service Company: Any associate company within a holding company system organized specifically for the purpose of providing non-power goods or services or the sale of goods or construction work to any public utility in the same holding company system. The Service Company (EBSC) provides most administrative and general services to the subsidiaries of Exelon.

SECTION III

TRANSACTIONS INVOLVING THE PROVISION OF SERVICES AND FACILITIES

Transactions involving the provision of services and facilities between PECO and the Exelon Entities (other than services PECO receives from EBSC) will be governed by the following pricing rules:

- For services provided by PECO to another affiliate (except to another utility), the pricing standard is the higher of Fully Distributed Cost or Fair Market Value.
- For services provided by another affiliate (except by another utility or EBSC) to PECO, the pricing standard is the lower of Fully Distributed Cost or Fair Market Value.
- EBSC will charge Fully Distributed Cost to all affiliates.
- Services between PECO and ComEd will be priced at Fully Distributed Cost, except that if there is a Prevailing Price for the service, it may only be provided if Fully Distributed Cost equals Prevailing Price.

According tothe MSA, the provision of services or facilities by PECO to an Exelon Entity, or by an Exelon Entity to PECO, shall be charged to the requesting Exelon Entity at an amount not to exceed the Fully Distributed Cost incurred by the providing Exelon Entity.

For transactions between PECO and ComEd, the Providing Company's Prevailing Price will be limited to not more than Fully Distributed Cost as a means to resolve pricing conflicts between ComEd's Affiliated Interests Agreement (AIA) and the MSA which governs PECO's intercompany transactions. Under the MSA, the pricing of transactions is limited to "no more than cost".

Supporting documentation used in the determination of Fair Market Value or Prevailing Price must be forwarded to PECO's General Accounting Department.

Notwithstanding the state rules, where the FERC rules are more protective of PECO and ComEd, those must be applied. Thus, the pricing rules summarized in the bullet points above take into account both state and FERC rules, and give priority to the more protective FERC rules.

SECTION IV

SALES OF TANGIBLE AND INTANGIBLE PERSONAL PROPERTY

A. GENERAL

The purpose of this section is to assign a monetary value (price), and record all tangible or intangible personal property sold and transferred between PECO and the Exelon Entities.

Parties should evidence their agreement with respect to the sale of tangible or intangible personal property by entering into an agreement or other written memorandum.

For tangible or intangible personal property sales between PECO and the Exelon Entities, the following requires a separatePaPUC approval:

- For tangible and intangible personal property purchases, sales, leases or exchanges between PECO and the Exelon Entities, a PaPUC approval is required pursuant to 66 Pa.C.S. § 2102. There are no exceptions to this requirement. In addition, if the transaction involves property that is "used or useful in the public service," an additional approval may be required pursuant to 66 Pa.C.S. § 1102. Since each transaction covered under this heading requires that a filing be made with the Commission to obtain § 2102 approval, Legal should be contacted to determine whether the Company should also request § 1102 approval for the transaction.

For sales of FERC jurisdictional facilities (*i.e.*, facilities used for the transmission of electric energy in interstate commerce or sales of electric energy at wholesale in interstate commerce), separate approval by the FERC may be required (notify BSC Legal for guidance).

B. VALUATION OF PROPERTY

The following general principles shall be used to establish a sale price for tangible or intangible personal property transactions.

Sales of tangible or intangible personal property shall be charged by the Selling Party to the Acquiring Party at:

1) The fair market value of tangible or intangible personal property to be sold as evidenced by the price at which nonassociated vendors offer the same or similar assets for sale by reference to quoted market prices or the value ascribed to the asset by an independent appraisal or other objective valuation technique.

Or, if no such fair market value is objectively or practicably determinable,

2) The historical cost of the asset to the Selling Party, less all applicable valuation reserves (e.g. accumulated depreciation).

The determination of fair market value must be adequately documented to ensure that a

proper audit trail exists.

Supporting documentation used in the determination of prevailing price must be forwarded to PECO's General Accounting Department.

C. SALE OF PROPERTY

- Contact the appropriate Engineering Department, Life Cycle Management Department or Procurement Department to obtain the procedure for the sale of tangible personal property.

- Contact PECO's General Accounting Department for all accounting transactions, for historical cost calculations, and to determine any impact the transfer has on ratemaking.

- Notify PECO's Tax Office for tax implications and to obtain the most favorable tax treatment for any property sale.

- Notify BSC's Legal Department to review the contract concerning the transfer.

- Contact the Secretary's Office for:
  - Approval of the sale by the Board of Directors (Board).
  - Release of property from any mortgage indenture.

  Note: Board approval is required for sales of property over $10 million; for sales of $10 million and below, Board action is required only to obtain the mortgage release.

SECTION V

SALES OF REAL PROPERTY

A. GENERAL

The purpose of this section is to assign a monetary value (price), and record all real property sold and transferred between PECO and the Exelon Companies.

Parties should evidence their agreement with respect to the sale of real property by entering into an agreement or other written memorandum.

For real property purchases, sales, leases or exchanges between PECO and the Exelon Entities, a PaPUC approval is required pursuant to 66 Pa. C.S. § 2102. There are no exceptions to this requirement. In addition, if the transaction involves real property with an undepreciated book value of greater than $50,000, a PUC approval is required pursuant to 66 Pa.C.S. § 1102.

Real property includes the following: land, buildings and other forms of real property.

B. VALUATION OF PROPERTY

The following general principles shall be used to establish a sale price for real property sales between PECO and the Exelon Entities.

Sales of real property shall be charged by the Selling Party to the Acquiring Party at:

1) The fair market value of the real property to be sold as evidenced bythe price at which nonassociated vendors offer the same or similar assets for sale by reference to quoted market prices or the value ascribed to the asset by an independent appraisal or other objective valuation technique.

Or, if no such fair market value is objectively or practicably determinable,

2) The historical cost of the asset to the Selling Party, less all applicable valuation reserves.

The determination of fair market value must be adequately documented to ensure that a proper audit trail exists.

Supporting documentation used in the determination of prevailing price must be forwarded to PECO's General Accounting Department.

C. SALE OF PROPERTY

- Contact PECO's Real Estate Department to obtain the procedure and approval for the sale of real property.

- Contact PECO's General Accounting Department for all accounting transactions, historical cost calculations, and to determine any impact the transfer has on current or future ratemaking proceedings.

- Notify PECO's Tax Office for tax implications and to obtain the most favorable tax treatment for any property sale.

- Notify BSC's Legal Department to review the contract concerning the transfer.

- Contact the Secretary's Office for:
  - Approval of the sale by the Board of Directors (Board).
  - Release of property from any mortgage indenture.

  Note: Board approval is required for sales of property over $10 million; for sales of $10 million and below, Board action is required only to obtain the mortgage release.

SECTION VI

SALES/ACQUISITIONS OF FERC JURISDICTIONAL FACILITIES

Sales and/or acquisitions of "FERC jurisdictional facilities" generally require FERC approval (subject to thresholds). "FERC jurisdictional facilities" are the facilities used for the transmission of electric energy in interstate commerce, sales of electric energy at wholesale in interstate commerce (such as contracts), or existing generation facilities. FERC jurisdictional facilities do not include, for example, vehicles, computers, intangibles, land held for future use and obsolete or used inventory unconnected to the electric system. "Sales" and "acquisitions" include lease transactions. Employees must contact both BSC Legal, PECO Regulatory and the Director of PECO Accounting early in the consideration of any proposed sale/lease/acquisition of FERC jurisdictional facilities.

SECTION VII

WORK ORDERS

The Work Order Form is to be completed by a Providing Company when providing a service or facility to a Client Company. A Work Order Form must be completed for **all** services provided to Client Companies.

A separate form is not intended to be completed for each specific and separate instance where ongoing services or facilities are involved. It is intended to capture a blanket of services. For example, a Work Order Form would be prepared to provide fleet services for the time period that fleet services are provided. It would not be necessary to complete a Work Order Form for each separate vehicle. If a service or facility is provided for a finite period of time then that should be mentioned on the Work Order Form. If the service is to be provided for an undetermined time period, then the Work Order Form is valid until such time that a cancellation is requested. PECO reviews and updates all Affiliate Level Arrangements and Work Orders on an annual basis.

If at a later date there is a need to expand the scope of services related to an existing Work Order, you may prepare a Work Order Form and indicate on the form that an existing Work Order Form is being revised. Merely indicate the additional services and refer to the existing Work Order number.

Work Order Requirements

1. Each company within the holding company system must have a current Service Agreement signed by a management representative with responsibility for the service received or provided. The same employee cannot sign on behalf of both parties.
2. The Service Agreement should describe the scope of services, billing procedures and allocation methods.
3. Services should be directly charged to one benefiting company whenever possible. When more than one company benefits from a service provided, cost causative allocations must be used to distribute costs in a fair and equitable method.
4. Specific services to be provided must be evidenced by signed work orders and Affiliate Level Arrangements (ALAs) or Service Level Arrangements (SLAs). Work Orders provide the key to where the services are recorded on both the Providing Company's and the Client Company's books. Work orders, ALAs and SLAs should include the following data.
   - Work order control number (Determined by the Providing Company)
   - Purchase Order Number of Client Company, if applicable
   - Name or title of Work Order
   - Description of work to be performed
   - Start and completion date
   - Other Client Companies benefiting from the service (for purposes of allocations)
   - Allocation factors (if applicable)
   - Providing Company's code block data to capture costs of work order
   - Client Company's code block data for billing purposes (including FERC account if for a FERC jurisdictional utility)

- Budgeted / expected cost to be charged to Client Company
- Authorization signatures and dates

5. Changes to work orders must be documented.
6. The Providing Company must maintain a control log of all authorized work orders.

For services provided by PECO, Work Order numbers will be issued by PECO's General Accounting Department. Therefore, when preparing a Work Order Form, please contact PECO's General Accounting Department.

A copy of the completed, approved Work Order Form must be sent to PECO's General Accounting Department.

Originals of the completed, approved form including any supporting documentation should be kept by the Providing Department. A copy of the Work Order Form should be maintained by the Requesting Department.

INSTRUCTIONS FOR COMPLETING PECO WORK ORDER FORM

Work order number	The work order number is an eight digit code consisting of the ALA reference number (4 digits) and a 4 digit identifier provided by the PECO General Accounting Department. For example: CP01-0088.
ALA Reference Number	The ALA reference number is derived as follows: the first digit is the providing company code, the second digit is the receiving company code and the final 2 digits are numeric indicating the number of the ALA between the 2 entities. For example: CP01 where the provider is CED the receiving Company is PED and this is the first ALA between the two entities. ALA reference numbers are 4 digit identifier provided by the CED – Financial Reporting Department. The Company Codes are: C = CED P = PED E = Enterprises G = Genco B = BSG X = Corp. Center
Effective Period	The time period which the Work Order is in effect.
1. & 3. Providing/Receiving	Select companies providing/requesting services.
2. Providing Department	Identify the department responsible for providing the work to be done.
4. Client Department	Identify the department requiring the work to be done.
5. Work Order Type	One of the two types of Work Orders should be marked. A "New" or a "Revised" Work Order may be selected.
6. Work Request Title	Choose an abbreviated title to define the work to be provided.
7. Allocation Method	If the Work Order is for work that will benefit more than one department, indicate the basis of allocation. Refer to Section IX of the Affiliated Interests Agreement, Cost Allocation Methods, for more information on allocation methods.

7. Providing Company – Reclass	Providing companies reclassification code block to remove the charges from their O&Ms to be billed to an affiliate. (Debit of reclass JE.)
9. Receiving Company Distribution	Code block that the receiving company will charge to record the cost of monthly ALA services received.
10. Description of Services	Brief description of service or facility provided including budgeted or expected costs to be charged to Client Company.
11. Approvals	Both the Receiving Company and the Providing Company must indicate their approval by indicating the name and providing a signature by the appropriate Department Head or Manager. Responsible contacts should be identified by complete name and their phone number.

SECTION VIII

FULLY DISTRIBUTED COST METHOD

A. OVERVIEW

Under the fully distributed cost methodology, direct costs incurred by one Party for the provision of services to another Party are increased for indirect costs and other appropriate overheads. The objective is to assign direct costs along with the appropriate indirect costs and overheads to the benefiting Exelon Entity or Entities to prevent cross-subsidization of associates by PECO customers.

B. COMPONENTS OF FULLY DISTRIBUTED COST

Fully distributed cost is the direct costs or allocated costs (cost pools allocated to a Exelon Entity based on a cost causative measure), adjustments to direct labor costs, indirect costs and other appropriate overheads incurred by a Party to provide a service or facility to another Party.

1) Direct Costs and Allocated Costs

Direct costs consist of direct labor, direct materials and purchased services, and the direct costs of facilities, equipment, machinery, furniture and fixtures. Allocated costs are incurred for the provision of services or facilities which are not directly assignable to a specific Exelon Entity or Entities but jointly benefit more than one Party. Costs to be allocated shall be accumulated in cost pools and allocated between the appropriate Parties based on an appropriate cost causative measure that ensures an equitable allocation.

2) Direct Labor Adjustments, Indirect Costs and Other Overheads

Elements of and the current rate for PECO's Loading Factors are presented below.

Administrative and General Loading Factor 49.6 %

- Administrative and General Salaries (FERC Acct 920)
- Office Supplies (FERC Acct 921)
- Outside Services Employed (FERC Acct 923)
- Property Insurance (FERC Acct 924)
- Injuries and Damages (FERC Acct 925)
- Employee Pensions and Benefits (FERC Acct 926)
- Regulatory Commission Expenses (FERC Acct 928)
- Advertising Expenses (FERC Acct 930)
- Rents and Plant Maintenance (FERC Acct 931 and 935)

Studies to update PECO's Direct Labor Adjustment Rates and the Loading Factors will be performed by PECO's General Accounting Department annually during the second quarter and will be based on actual financial data of the prior calendar year.

The new Direct Labor Adjustment Rates and the Loading Factors will go into effect July 1st of each year.

C. FULLY DISTRIBUTED COST CALCULATION

Different adjustments are applied to direct labor charges depending on which PECO employees are charging payroll to the Exelon Entities and how their time is captured. See example calculations below.

Please note that this Section currently covers only PECO's loading factors for use in its fully distributed cost calculation. If an Exelon Entity provides a service to PECO at its fully distributed cost, then the Exelon Entity would need to calculate its own loading factors.

EXAMPLE CALCULATIONS OF FULLY DISTRIBUTED COST FOR PECO 2008 RATES

LABOR

		Payroll Costs
Direct Charges		
Direct PECO Payroll Charge		$ 100.00
Total Direct Labor Charges		$ 100.00
Indirect Charges		
1.) Adjust for Fringe, Pension, AIP and Payroll Taxes	79.97%	79.97
2.) Adjust for A&G Loading Rate	49.60%	49.60
3.) Indirect Charges (if appropriate)		0.00
Adjusted Direct Labor Charges		$ 229.57

The Fringe, Pension AIP and Payroll Taxes rates applied in this example were in effect as of 1/31/2009. These rates are updated each month based on a communication sent out by PECO General Accounting.

SECTION IX

COST ALLOCATION METHODS

Whenever possible, costs of services or facilities specifically attributable to a Party should be charged directly to such Party. These services shall be charged directly using the appropriate pricing basis. See Section III, Transactions Involving the Provision of Services and Facilities for more information. When a transaction pertains to one Client Company and the transaction is charged to such Client Company, no further allocation is necessary. For each separately identifiable good or service, a determination needs to be made of those costs that can be directly charged to that particular good or service.

For costs incurred for transactions involving the provision of services which are not directly assignable to a specific Client Company and which have joint benefit to more than one Party, an allocation method must be used to distribute the costs to the benefiting companies. Cost pools will be allocated to the Client Companies based on the respective cost causative measures.

Each Providing Company will have the primary responsibility for ensuring that the allocation factors are proper, accurate and kept up to date.

To the greatest extent possible, the allocation factors will be based on cost drivers specifically applicable to the service provided. PECO Accounting will be advised / consulted regarding allocations factors utilized in associate transactions.

PECO Accounting will be responsible for evaluating new allocation methodologies and determining if any approval is required. PECO Accounting will coordinate approval efforts, if necessary, with the Legal Department.

SECTION X

ACCOUNTING AND INTERCOMPANY BILLING

A. Overview

For PECO and the Exelon Entities, code block must be used to record the accounting distribution for intercompany transactions. The specific accounting varies according to which Exelon Entity is involved in the transaction with PECO and whether the service, facility or goods are being charged at Fully Distributed Cost ormarket price.

B. Services/Facilities charged at FULLY DISTRIBUTED COST

When the provision of a service is directly assignable to a Client Company and is charged at Fully Distributed Cost, the Providing Company shall charge the related direct and indirect costs to a unique code block combination. The codeblock combination should be stated on each work order supplied as part of the ALA process.

If costs cannot be directly charged but must be allocated based on a cost causative measure (see Section IX, Cost Allocation Methods), contact PECO's General Accounting Department and Service Company Accounting to determine an appropriate code block combination to 'pool' such costs for allocation to the benefiting companies. [Is this consistent with PECO's practice?]

C. Services/Facilities charged at MARKET PRICE

When a service is provided to a Client Company at the Providing Company's market price rather than its Fully Distributed Cost, the Providing Company must record both its expenses associated with the provision of service and the related intercompany revenues. The Client Company will record the intercompany expenses.

D. Accounting for direct labor costs

Positive time reporting methodology should be utilized. Under a positive time reporting methodology, an employee shall report in each pay period the number of hours in providing separately identifiable goods and services to Client Companies.

PECO employees prepare Weekly Time Reports to report the hours spent providing a service to a particular Party to an appropriate code block combination. These Weekly Time Reports are signed by both the employee and an appropriate supervisor who can attest that the time reported is accounted for accurately. All hours billed must be supported by timesheets.

When billing direct labor costs the fully distributed cost methodology should be utilized. Under the fully distributed cost methodology, direct costs incurred by one Party for the provision of services to another Party are increased for indirect costs and other appropriate overheads. The

objective is to assign direct costs along with the appropriate indirect costs and overheads to the benefiting Exelon Entity or Entities to prevent cross-subsidization of associates by PECO customers.

Fully distributed cost are the actual labor costs plus the addition of applicable overheads (Fringes, AIP, Pension, Payroll Tax and A&G factor). All applicable overhead rates are distributed monthly prior to the start of the accounting close. The Fringe, AIP, Pension and Payroll Tax rates are established at the beginning of the year based on budgeted costs, there are adjustments on a monthly basis to the secondary rates of the respective allocation rates. The A&G rate is updated yearly based on actual financial data of the prior calendar year. The rate is updated in June by the General Accounting Department as part of PECO's development of its billing rates.

E. ACCOUNTING ON PAYMENT DOCUMENTS, MATERIAL REQUISITION, JOURNAL ENTRIES, ETC.

Costs incurred for services provided to an Exelon Entity, which are paid by means of a PECO Payment Request should be charged to such Exelon Entity by entering the appropriate code block combination on the accounting distribution line. Enter the appropriate code block combination in the Journal Entry System, the Passport System, Transportation System and any other system used for transactional reporting.

When using a journal entry to correct for any historical payroll charges to a Client Company, use the appropriate sub accounts. This is necessary so that the correct labor adjustments, indirects and overheads are added.

F. INTERCOMPANY BILLINGS AND PAYMENTS

1) Billings

- Tariffed services provided by PECO to an Exelon Entity will be billed to the Exelon Entity in the same manner as all other customers of the tariffed service (e.g. Exelon Generation will be sent a PECO electric bill for electric service).

- All other services or facilities which are provided by PECO to Exelon Entities, whether charged at market price or at fully distributed cost, will be invoiced and billed by PECO's functional area. PECO will separately invoice each of the Exelon Entities on a monthly basis for the services and facilities provided to the respective Exelon Entity during such month. Each invoice will include descriptions of the charges by reference to the Work Orders, if applicable, as well as total indirects calculated on all direct costs billed during the month. Upon request, an explanation and/or documentation will be provided to justify charges.

- Services or facilities which are provided by the Exelon Entities to PECO, whether charged at market price or at fully distributed cost, will be invoiced and billed by each respective Exelon Entity. PECO will be invoiced from each of the Exelon Entities on a monthly basis for the services and facilities provided by the Exelon Entities during such month. Each invoice will include descriptions of the charges by reference to the Work Orders and total indirects, if applicable, calculated on all direct costs billed during the month. Upon request, an explanation and/or documentation will be provided to justify charges.

- PECO's Real Estate Department will be responsible for collecting the payment from the Exelon Entity for the sale of real property, which is due at the closing of the sale and transfer of the property. Real Estate must communicate the accounting information related to the property sale to PECO's General Accounting Department.

2) Payments

With the exception of real property and intangible asset sales, payments from Exelon Entities should be made in accordance with Exelon's Intercompany Cash Settlement Policy.

G. INTERNAL CONTROL RESPONSIBILITIES AND RECORD RETENTION

Each PECO department that enters into an associated company transaction subject to the MSA shall have primary responsibility for assuring that the policies and guidelines detailed in the MSA and this Manual are appropriately implemented and maintained.

Also, each PECO department shall establish unique code block elements in the general ledger system, which shall be used to record, associated company transactions.

PECO's General Accounting Department shall have responsibility, in addition to those responsibilities indicated elsewhere herein, for overall monitoring of procedures and controls associated with associated company transactions. In this role, an accountant will monitor Work Order Forms, transactions, billings, allocation methodologies, etc. to assure compliance with the MSA and this Manual or any other applicable manuals, and that actions will be taken to correct deficiencies as they are identified. Reviews will be performed of operating results to assure they properly reflect associated company transactions that occurred during the period reviewed based on known activity as obtained from completed Work Order Forms and other sources. PECO's General Accounting Department shall direct any participant to implement and/or revise any procedure as required to assure associated company transactions are carried out in accordance with the provisions and intent of the MSA and this Manual or any other applicable manuals.

Internal Audit will also perform periodic compliance reviews of the associated company transaction processes to further provide assurance regarding the actual operating effectiveness of the policies and guidelines as outlined in the MSA and this Manual or any other applicable manuals.

Supporting documentation for intercompany transactions will be retained per the record retention schedule.

SECTION XI

BUDGETING

The goal of the budget cycle is to develop a corporate budget for the entire Exelon organization that accurately reflects the activities performed and the resources necessary to accomplish those activities. A great deal of interactive communication needs to occur not only among the various departments within a company but also between the companies. Two-way communication should be ongoing throughout the budget cycle.

This section provides budget guidelines only with respect to transactions between PECO and the Exelon Entities.

PECO and the Exelon Entities shall be responsible for preparing their own budgets for revenues, capital and operating expenditures and employee headcount. Providing Companies are also responsible for renewing or revising Affiliate Level Arrangements and Work Orders for the upcoming budget period that will provide the basis for preparing annual budgets. These Affiliate Level Arrangements and Work Orders will provide details of the direct costs of services to be provided to Client Companies.

Budgeting for the costs of facilities and services provided by PECO to an Exelon Entity will depend on whether the Exelon Entity will be charged PECO's fully distributed cost or PECO's market price for such facility or service.

If PECO is providing a service at its fully distributed cost, then such costs will be the budget responsibility of the Exelon Entity receiving the service. The PECO department providing the service will still be responsible for preparing or revising Affiliate Level Arrangements and Work Orders.

If PECO is providing a service at its market price, then the PECO Business Unit must budget for both the revenues and expenses (including any applicable overheads charged on PECO's books) associated with the provision of the services. The PECO department providing the service will be accountable for the profit or loss on the service they provide and the Exelon Entity will have budget responsibility for the market price of the service provided.

[Insert effective years in the format of year-year] Affiliate Level Arrangement–ALA[1] No. [enter ALA/SLA number][2]

Affiliate Level Arrangement ("ALA")[1] between [insert provider business unit full company name – Area/Department providing service] ("[insert provider business unit abbreviated name]") and [insert receiver business unit full company name] ("[insert receiver business unit abbreviated name]")

Appendix A – Work Order

[work order template to be added]

Endnotes to Template

[1]**ALA/SLA:** Affiliated Level Agreement (ALA) if the providing company is ComEd, PECO, BGE, or Genco. Service Level Agreement (SLA) if the providing company is BSC.

[2]**ALA Number:** The ALA reference number is derived as follows: the first digit is the providing company code, the second digit is the receiving company code, and the final 2 digits are numeric, indicating the number of the ALA between the 2 entities. For example: PC01, where the provider is PECO, the receiving company is ComEd and this is the first ALA between the two entities. The Company codes are:

B = BSC M = BGE
C = ComEd P = PECO
G = Genco A = ACE
D = DPL E = PEPCO
S = PHISCO

Note that the ALA can be among more than 2 entities. If that is the case, digits are added so that all company codes are represented.

[3]**Governance:** This section should reference the governance of both the provider and the receiver.

ComEd – The governance is the Affiliated Interest Agreement ("AIA") and the Cost Allocation Manual ("CAM") as approved by the Illinois Commerce Commission, as appropriate.

PECO – The governance is the PECO Mutual Services Agreement ("MSA") and the Cost Allocation Manual ("CAM") as filed with or approved by the Pennsylvania Public Utility Commission, as appropriate.

BGE – The governance is the General Services Agreement ("GSA") and the BGE Cost Allocation Manual ("CAM"), both as filed with Maryland Public Service Commission.

Genco – Genco is not regulated at the state level. However, Genco is regulated by FERC and would be subject to FERC's rules on what can be charged for services between affiliates.

BSC – The governance is the General Services Agreement ("GSA") and the BSC Cost Allocation Manual ("CAM").

ACE, DPL, Pepco and PHISCO – The governance is the PHI Cost Allocation Manual ("PHI CAM"), as approved by the New Jersey Board of Public Utilities ("NJPBU") and as filed with the Delaware Public Service Commission ("DEPSC"), the District of Columbia Public Service Commission ("DCPSC") and the Maryland Public Service Commission ("MPSC"),

[4]**Fully Distributed Cost:** Fully Distributed Cost includes the actual direct costs or allocated costs incurred by a Providing Company to provide a service or facility, plus indirect costs and other appropriate overheads.

[5]**Prevailing Price:** Services will be priced at Fully Distributed Cost, except that if there is a Prevailing Price for the service, it may only be provided if Fully Distributed Cost is equal to or less than the Prevailing Price. Prevailing Price is generally defined as the price that has been charged to the general public. In the case of services or facilities provided by ComEd to an Exelon Entity, Prevailing Price will only apply to services or facilities provided for sale to the general public. This includes electric service, service provided under an ICC approved pricing mechanism such as Rate CS, and Competitive Services provided to the general public.

[6] **Fair Market Value:** The resultant price set by an arms-length transaction between a willing buyer and a willing seller, both of whom are adequately informed of the appropriate facts, and neither of whom is under any compulsion to buy or sell.

[7] **Customer Service Performance Metrics:** Customer service performance metrics are for Nuclear only.

Q. SDR-RR-52 Please provide the annual level of outside services employed for the preceding three calendar years. Include in your response a breakdown of the test year amount indicating the service provider and the type of service provided.

A. SDR-RR-52

2021 - $14,992,076
2022 - $16,370,215
2023 - $17,243,848
2024 (FTY) - $17,217,169
2025 (FPFTY) - $17,809,815

PECO does not budget by FERC account. For further detail pertaining to the FPFTY and FTY budgets by FERC account, refer to Exhibit MJT-1 and MJT-2, respectively.

Refer to Attachment SDR-RR-52(a) for the breakdown of the 2023 information by service provider and type of service. The breakdown of the FTY and FPTY budgeted data by service provider and type of service is not expected to differ significantly from 2023 breakdown.

SDR-RR-53
Marissa Humphrey

Q. SDR-RR-53 Please describe each budgeted or planned cost savings program to be implemented during the historic or future year. Please identify the cost of implementing the program and the anticipated annual savings.

A. SDR-RR-53 PECO's projected annual O&M growth rate since 2023 is nearly 30% lower than the recent average inflation rate of 6.25% in the Consumer Price Index observed since 2022. While higher than in prior years, customers have benefitted from PECO's efforts to keep the growth well below the inflation rate since our last rate case filing. Savings have been embedded through the Company's budgeting process which is designed to control O&M growth and provide funding to achieve operational goals and regulatory mandates.

Q. SDR-RR-54 Please explain how the Company has treated reserve accruals and balances for ratemaking purposes and provide the requested level of any self-funded reserve accruals by type of item.

A. SDR-RR-54 The Company's revenues and revenue requirement that form the principal basis for its proposed rate increase are based on normalized levels of revenues and expenses for the fully projected future test year ending December 31, 2025. The Company's revenues and expenses have been properly normalized and annualized to reflect known and measurable changes anticipated to occur within the fully projected future test year or shortly thereafter and do not include any accruals for, or additions to, any self-funded reserves or balances.

Similarly, the Company's rate base claim does not include reserves or similar balances. The Company's original cost of utility plant in service is based on its actual December 31, 2023 plant balances, adjusted for additions to utility plant expected to be placed in service during the future test year and fully projected future test year.

For further information explaining the development of the Company's claims, refer to PECO Statement No. 2, the direct testimony of Marissa Humphrey, and PECO Statement No. 3, the direct testimony of Michael J. Trzaska.

Q. SDR-RR-55 Please provide a copy of the corporate federal tax returns and supporting schedules for the preceding three years and, if applicable, a copy of the calculation work papers for the Company's consolidated tax savings adjustment.

A. SDR-RR-55 Refer to Confidential Attachment SDR-RR-55(a.1), Confidential Attachment SDR-RR-55(a.2), and Confidential Attachment SDR-RR-55(a.3) for the Exelon Corporation Corporate Federal income tax returns for the preceding three years, 2020, 2021, and 2022, respectively.

Refer to PECO Exhibit MJT-1, Schedule D-18, for the workpapers supporting the calculation of what the consolidated tax savings adjustment would have been in the absence of Section 1301.1(a) of the Public Utility Code.

THE ATTACHMENTS ARE CONFIDENTIAL AND ARE SUBMITTED ONLY IN THE NON-PUBLIC VERSION TO THE COMMISSION.
