subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation 09 Mar 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate 02 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its

Analyst Notes

lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Exelon Edging Closer to Spinning Off Merchant Unit; Reports Q3 Earnings 03 Nov 2021

We are increasing our fair value estimate to $48 per share from $45 after Exelon announced third-quarter adjusted earnings per share of $1.09 compared with $1.04 in the same year-ago period. Management narrowed their full-year EPS guidance to $2.70-$2.90 from their previous $2.60-$3.00 range. Our fair value estimate increase is due to an increase in Morningstar's midcycle natural gas price to $3.30 per thousand cubic feet from $2.80, which boosted the nuclear fleet's midcycle margins. Our narrow moat and stable moat trend ratings are unchanged.

Recently management secured $700 million in subsidies from Illinois legislation that will keep the company's Dresden and Byron nuclear plants operating. We assume that subsidies for the plants will continue beyond 2025 given the role nuclear must play as Illinois pursues its aggressive clean energy goal. Management has successfully lobbied for subsidies across its merchant nuclear fleet. Policymakers view of nuclear generation is beginning to align with our view that nuclear' s clean energy attributes and reliable generation will be instrumental in meeting aggressive emission reduction goals.

Exelon Corp EXC (NAS) | ★★

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
43.60 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

Exelon continues to progress on the spin-off of its competitive merchant unit. The company has received FERC approval, and continues progress toward receiving approvals from New York regulators and the Nuclear Regulatory Commission. Exelon has named a management team for the new unit, to be named Constellation, which we view is a sign management is confident they can complete the spin-off. Management expects to complete the transaction in the first quarter of 2022.

In the quarter, rate increases and ongoing utility investments supported earnings. Lower capacity revenue, increased nuclear outage days, and unrealized and realized gains on equity investments had a negative impact on generation segment earnings. Trailing 12-month returns were 9.3%, down from 9.4% last quarter.

Exelon Secures Another Legislative Win; Byron and Dresden to Remain Open 14 Sep 2021

We are increasing our Exelon fair value estimate to $45 per share from $42 after Illinois lawmakers passed energy legislation that would provide subsidies to Exelon's Dresden and Byron nuclear plants. Gov. J.B. Pritzker has indicated he plans to sign the legislation, and Exelon has said it is in the process of refueling both plants. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon has taken a hard line with Illinois policymakers on the future of its unregulated nuclear facilities in the state. Last year, Exelon announced plans to close the two nuclear generating stations. After filing Post Shutdown Decommissioning Activity Reports with the Nuclear Regulatory Commission in July, Exelon is now preparing to refuel both Byron and Dresden nuclear facilities. We had previously estimated the plants were running at break-even, resulting in no change to our fair value estimate.

The $700 million in subsidies Exelon will receive from the legislation was the primary source of our fair value estimate increase. We assume that the subsidies will continue beyond our five-year forecast, in part to help the state meet the legislation's 100% clean energy target by 2050. The legislation also sets targets for Illinois that include zero carbon emissions by the end of 2045 and 50% renewable energy by 2040. Dresden's operating license expires later this decade and Byron's operating license expires for both of its units by 2046. Time-value appreciation since our last update increased our fair value estimate $1 per share.

We previously thought Exelon faced an uphill battle to secure additional subsidies for its nuclear fleet in the state, in large part due to the deferred prosecution agreement Exelon entered into last year related to the company's lobbying practices in the state. However, the state's clean energy goals, and the contribution of Exelon's nuclear fleet to those goals, ultimately led to successful lobbying efforts.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

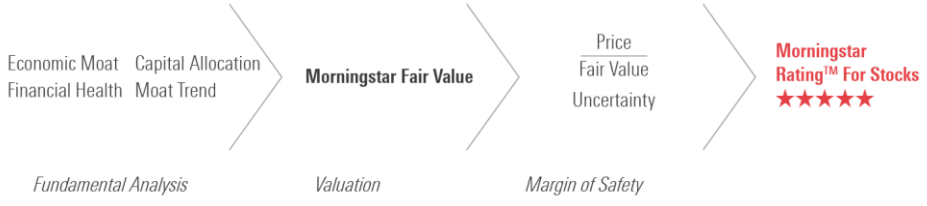
The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies



2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

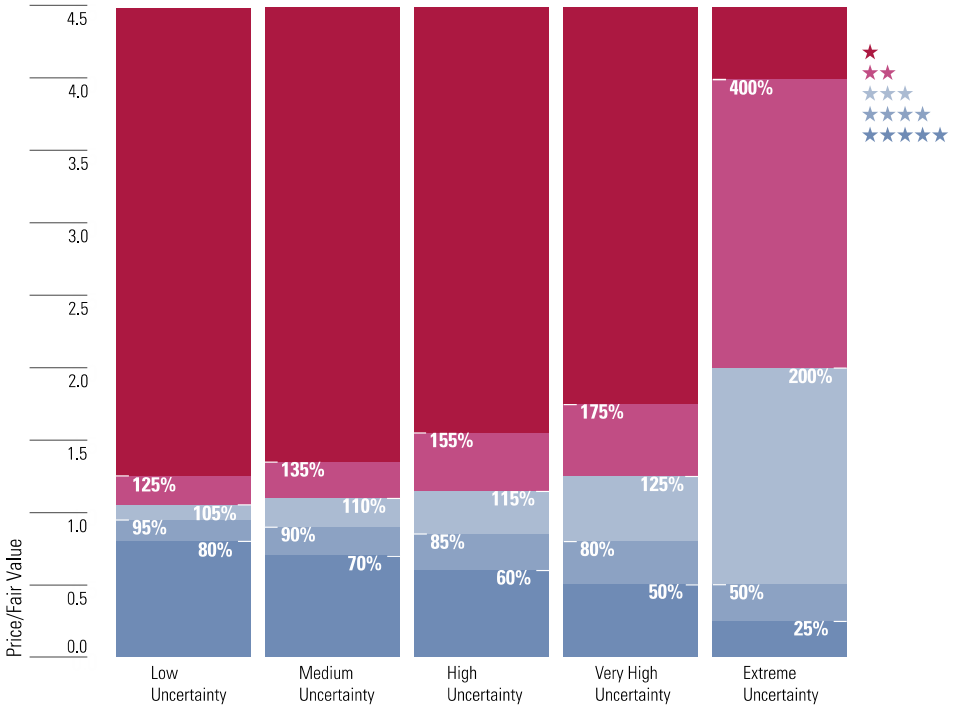
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Business Strategy and Outlook 09 Mar 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

We view the separation positively for shareholders. We previously valued Exelon at a discount to its fully regulated peers in large part because of its generation and retail operations. A stand-alone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024 or default to traditional ratemaking. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates.

Morningstar Analysis

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Fair Value & Profit Drivers 09 Mar 2022

Our fair value estimate is $39.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Scenario Analysis

Our uncertainty rating for Exelon is low. The company's regulated rate structure and transparent growth outlook reduce the difference between our bull- and bear scenarios.

In our bull-case scenario, we assume rate-case outcomes are 25% higher and operating expenses are 2% lower than in our base-case scenario. This results in a $5 per-share increase to our base-case fair value estimate. In our bear-case scenario, a similar decline in rate-case outcomes and increase in operating expense results in a $5 fair value estimate decrease.

If operating expenses increase by 100 basis points, our fair value estimate would drop by $2 per share, all else equal.

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
43.49 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Economic Moat

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Moat Trend

We assign Exelon a stable moat trend rating. The regulatory environments in Illinois, Pennsylvania, and Maryland have stabilized, allowing the company's distribution utilities fair returns. Nearly all of Exelon's rate-base growth will have rate trackers or formula rates, minimizing regulatory lag. Exelon faces the biggest challenge boosting regulated earned returns.

Exelon's stable business model and difficult-to-replicate asset base support our view that the firm's narrow moat is stable. We don't anticipate a change in the regulatory compact between utilities and ratepayers that ensures capital providers earn a fair return on their investments. As with all regulated utilities, we think revenue caps preclude Exelon from establishing a wide economic moat.

Regulated utilities' moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations.

Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether

fundamental changes will make it more difficult for a utility to earn its cost of capital. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities that we cover.

Bulls Say/Bears Say

Bulls Say

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Financial Strength

With over 4.0 times interest coverage, Exelon's financial health is sound for a regulated utility, particularly given its stable, low-risk business model. With our forecast for $36 billion of capital spending planned through 2026, Exelon will be a frequent debt issuer. The company has manageable long-term debt maturities and we anticipate it will be able to refinance its debt as it comes due, maintaining its current debt/capital ratio. We expect the company to issue $1.0 billion in equity to fund its capital investment plan, in line with management's expectations.We expect total debt/EBITDA to remain in the 4.5-5.0 times range. Exelon will target a 60% dividend payout ratio. We expect dividend growth in line with our 7% annual earnings per-share growth forecast through 2026.

Risk & Uncertainty

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor

Capital Allocation 09 Mar 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate 02 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its

lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Exelon Edging Closer to Spinning Off Merchant Unit; Reports Q3 Earnings 03 Nov 2021

We are increasing our fair value estimate to $48 per share from $45 after Exelon announced third-quarter adjusted earnings per share of $1.09 compared with $1.04 in the same year-ago period. Management narrowed their full-year EPS guidance to $2.70-$2.90 from their previous $2.60-$3.00 range. Our fair value estimate increase is due to an increase in Morningstar's midcycle natural gas price to $3.30 per thousand cubic feet from $2.80, which boosted the nuclear fleet's midcycle margins. Our narrow moat and stable moat trend ratings are unchanged.

Recently management secured $700 million in subsidies from Illinois legislation that will keep the company's Dresden and Byron nuclear plants operating. We assume that subsidies for the plants will continue beyond 2025 given the role nuclear must play as Illinois pursues its aggressive clean energy goal. Management has successfully lobbied for subsidies across its merchant nuclear fleet. Policymakers view of nuclear generation is beginning to align with our view that nuclear' s clean energy attributes and reliable generation will be instrumental in meeting aggressive emission reduction goals.

Exelon Corp EXC (NAS) | ★★

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
43.49 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

Exelon continues to progress on the spin-off of its competitive merchant unit. The company has received FERC approval, and continues progress toward receiving approvals from New York regulators and the Nuclear Regulatory Commission. Exelon has named a management team for the new unit, to be named Constellation, which we view is a sign management is confident they can complete the spin-off. Management expects to complete the transaction in the first quarter of 2022.

In the quarter, rate increases and ongoing utility investments supported earnings. Lower capacity revenue, increased nuclear outage days, and unrealized and realized gains on equity investments had a negative impact on generation segment earnings. Trailing 12-month returns were 9.3%, down from 9.4% last quarter.

Exelon Secures Another Legislative Win; Byron and Dresden to Remain Open 14 Sep 2021

We are increasing our Exelon fair value estimate to $45 per share from $42 after Illinois lawmakers passed energy legislation that would provide subsidies to Exelon's Dresden and Byron nuclear plants. Gov. J.B. Pritzker has indicated he plans to sign the legislation, and Exelon has said it is in the process of refueling both plants. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon has taken a hard line with Illinois policymakers on the future of its unregulated nuclear facilities in the state. Last year, Exelon announced plans to close the two nuclear generating stations. After filing Post Shutdown Decommissioning Activity Reports with the Nuclear Regulatory Commission in July, Exelon is now preparing to refuel both Byron and Dresden nuclear facilities. We had previously estimated the plants were running at break-even, resulting in no change to our fair value estimate.

The $700 million in subsidies Exelon will receive from the legislation was the primary source of our fair value estimate increase. We assume that the subsidies will continue beyond our five-year forecast, in part to help the state meet the legislation's 100% clean energy target by 2050. The legislation also sets targets for Illinois that include zero carbon emissions by the end of 2045 and 50% renewable energy by 2040. Dresden's operating license expires later this decade and Byron's operating license expires for both of its units by 2046. Time-value appreciation since our last update increased our fair value estimate $1 per share.

We previously thought Exelon faced an uphill battle to secure additional subsidies for its nuclear fleet in the state, in large part due to the deferred prosecution agreement Exelon entered into last year related to the company's lobbying practices in the state. However, the state's clean energy goals, and the contribution of Exelon's nuclear fleet to those goals, ultimately led to successful lobbying efforts.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

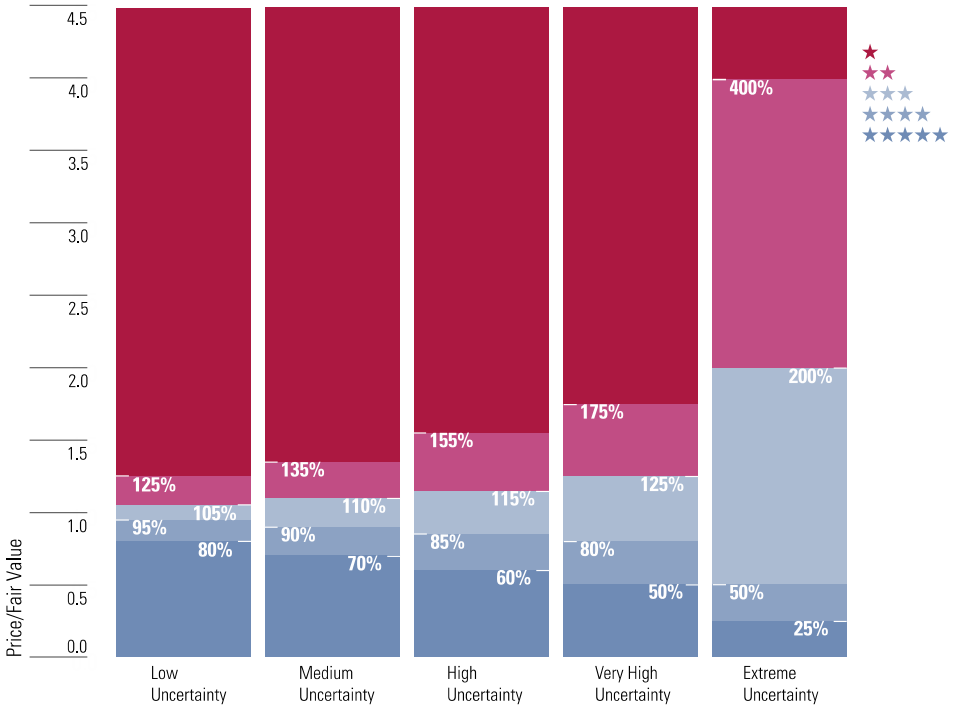
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

The analysis within this report is prepared by the person(s) noted in their capacity as an analyst for Morningstar's equity research group. The equity research group consists of various Morningstar, Inc. subsidiaries ("Equity Research Group)". In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Equity Research Group commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis and Morningstar Star Rating for stocks are statements of opinions; they are not statements of fact.

The Equity Research Group believes its analysts make a reasonable effort to carefully research information contained in the analysis. The information on which the analysis is based has been obtained from sources believed to be reliable such as, for example, the company's financial statements filed with a regulator, company website, Bloomberg and any other the relevant press sources. Only the information obtained from such sources is made available to the issuer who is the subject of the analysis, which is necessary to properly reconcile with the facts. Should this sharing of information result in considerable changes, a statement of that fact will be noted within the report. While the Equity Research Group has obtained data, statistics and information from sources it believes to be reliable, neither the Equity Research Group nor Morningstar, Inc.performs an audit or seeks independent verification of any of the data, statistics, and information it receives.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Analyst Note 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

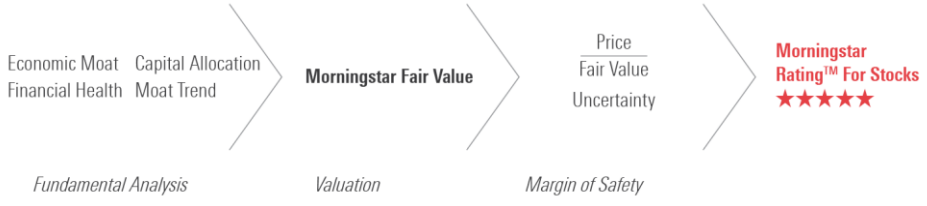
The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies



2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

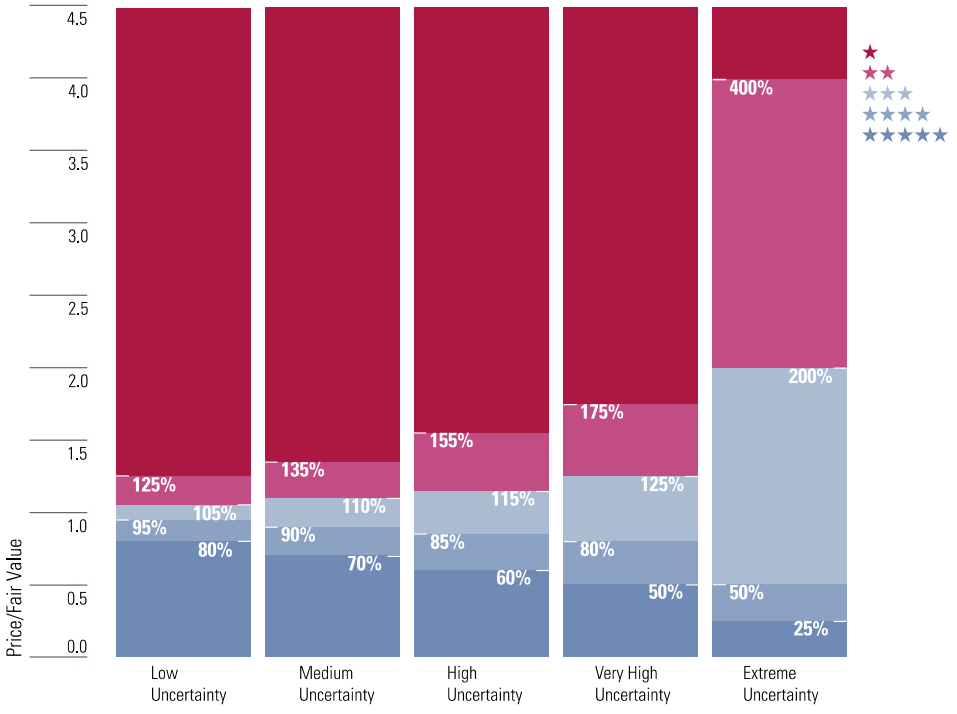
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Reiterating Buy and $60 target. Late last week CEG put out their 2021 10-K but did not issue a release or hold a call. This was an unusual filing since separation from Exelon had not closed at year-end and the balance sheet does not reflect key items, most notably $1.75B of cash contributed at closing by Exelon. After digesting the filing, we make several model tweaks but keep our $60 target unchanged. CEG has been quite volatile to date, but we continue to see strong fundamentals based around the largest US carbon-free generation fleet, significant cash flows and an attractive play on incremental policy support aimed at sustaining nuclear with a view to advancing decarbonization plans while helping with energy security.

Financial pointers from the 10-K. At closing, CEG repaid $258M of intercompany notes, made a pension contribution of $192M (similar to 2021) and paid off one $200M term loan. Other expected pay-downs include $500M of senior notes maturing this month and another $523M in June. An $880M term loan funding the CENG buyout also matures in June and we expect CEG to pay this off too. This would see CEG exceed the $1.8-$2.2B de-leveraging target for 2022-2023 by mid-year and we add some incremental short-term borrowings from H2.

Collateral swing increased year-end debt. The year-end balance sheet showed $700M higher short-term debt after CP issuance during 4Q. As with the lower cash forecast from the January Analyst Day, the key driver was collateral postings related to hedges and commodity price moves. Collateral was $1.2B net positive at the 3Q stage but had swung to $1.2B net negative by year-end. This created a 4Q cash headwind of $2.4B, larger than we thought based on the January slides. While higher net debt at year-end initially read like a valuation negative, we believe it is fair to assume collateral normalizes over time as hedges roll off.

Penciling in a buyback placeholder for 2023. Capital allocation remains TBD and CEG have indicated an update may come in H2. The extent to which we get clarity on potential federal support for nuclear (i.e. PTC) is one consideration, along with how CEG stock trades. While nothing has particularly changed here, we now pencil in a modest stock buyback placeholder of $500M in 2023. We also note that the 1Q quarterly dividend declaration ($0.141) could potentially imply a share count reduction yet in 2022.

No change to valuation methodology. We continue to employ a dual-factor valuation with a 50:50 weighting of EV/EBITDA ($56) and FCF Yield ($61) plus $1.50 for risked nuclear PTC upside. As shown in Figure 2, we base our EV/EBITDA on 6.0x 2024E EBITDA of $3,050M with forecast net debt below $500M absent allocation to something more accretive beyond the $500M buyback assumed for 2023. We base our FCF value on target yield of 12.5%. Our $1.50 nuclear PTC value uses $425M of modeled net upside potential at our 2024E price deck and applies a conservative 20% probability factor. Securing the PTC would add $7-$8 to our value out of the gate, on top of which we likely would argue for an increase to our overall multiple based on resulting improved cash flow visibility and duration.

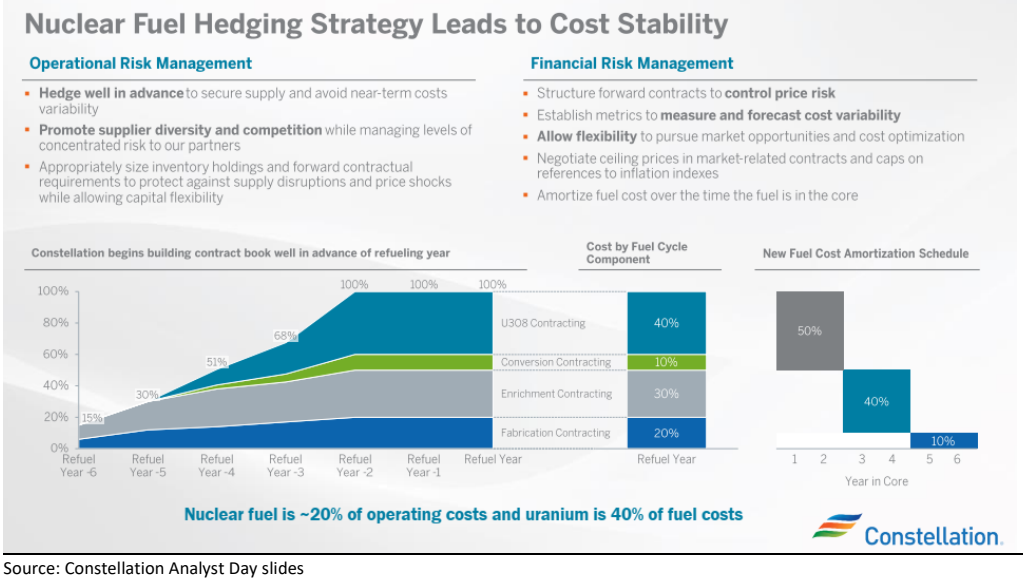
Thought for the Day: What about uranium?

Nuclear fuel supply and price risk in focus. Given the evolving situation with Russia and Ukraine, we have received questions regarding both physical supply and price risk for nuclear fuel (i.e. uranium). This is understandable and we offer some perspective below. While we are clearly operating in uncharted territory, there are several factors leading us not to be overly concerned at this point. Some key observations would be: 1) Russian sources of nuclear fuel have been limited to 20% of overall US supply under the Russian Suspension Agreement which was recently extended and runs to 2040; 2) nuclear fuel including the uranium component typically represents only 20% of the average US nuclear plant's operating costs; 3) long lead times and hedging mean CEG is not too exposed to short term price volatility in nuclear fuel stack components; 4) average nuclear fuel costs per MWh are low relative to current power prices, which would likely increase by more and more quickly than supply costs in a broader energy crisis; and 5) CEG's overall hedging policy leaves the business much more open to power prices than to fuel costs in the 2-3 year forward window. Whereas CEG employ a ratable 3-year forward hedging program on the revenue, their nuclear fuel hedging program starts from six years before each refueling outage. Comparing the target percentages this means the fuel side tends to be locked in around two years earlier than the revenues are hedged fuel currently 100% priced through at least 2024 at this stage.

Nuclear remains out of the sanctions discussion to date. To date the sanctions imposed on Russia do not encompass nuclear fuel and uranium since they fall under the broader energy complex. We have seen reports in the past few days that the power industry is actively lobbying to ensure nuclear fuel and uranium remain exempt, even if future sanctions do end up being extended to include Russian oil and gas. On this front, we are encouraged to see nuclear left out of the bipartisan Ban Russian Energy Imports Act proposed in the Senate yesterday. This bill seeks to prohibit "importation of Russian crude oil, petroleum, petroleum products, LNG and coal" rather than imposing blanket sanctions across energy in general. A similar measure is expected in the House and lead sponsors of the Senate version are Senators Machin (D-WV) and Murkowski (R-AK) in their roles as Chairman and Ranking Member of the Senate Energy and Natural Resources Committee.

Russia supplies ~20% of US nuclear fuel needs. In comments quoted by Bloomberg yesterday, CEG point to long lead times involved with nuclear fuel and have said they are "well situated to deal with any potential supply disruptions". From recent SEC filings, we know that around 50% of CEG uranium needs for 2022-2026 come from three suppliers. Industry sources indicate that Russia supplies around 20% of total US nuclear industry needs, although we note that their activity is more weighted towards other components of the fuel production process (fabrication, enrichment and conversion) versus supply of uranium itself. While CEG have not given a specific number for the Russian contribution to their overall fuel supply, we would be surprised if it deviated too dramatically from the industry average given CEG's leading market position in nuclear generation. The 10-K states that CEG believe they can obtain replacement uranium concentrate supplies in the event of non-performance by contracted suppliers, albeit likely at unfavorable prices versus current supply agreements. This is good to hear, since the more concerning risk for investors, and the power system more broadly, may be not being able to effectively procure physical supply.

Figure 3: Constellation Nuclear Fuel Hedging Strategy



Source: Constellation Analyst Day slides

Uranium price exposure dampened by long-term hedging. In terms of price, we note that uranium represents only a relatively modest portion of overall nuclear generation cost. The slide provided in the Analyst Day deck and shown in Figure 3 estimates nuclear fuel comprises ~20% of operating costs, with uranium representing 40% of fuel cost and therefore 8% of the total. Based on an average supply cost of $6/MWh (see below) this implies that the uranium piece works out at less than $2.50/MWh. Other components are Conversion (10%), Enrichment (30%) and Fabrication (20%) although we note that we have relatively little insight as to how much of this overall supply chain could have some exposure to Russia and therefore potentially subject to sanctions or other disruption. The CEG slide also shows how their contracting seeks to have fuel needs hedged well in advance, starting six years ahead of a given refueling outage and looking to have 100% locked down two years in advance. Further smoothing comes from the amortization schedules and there is a structural mismatch under CEG's typical year ratable hedging program on the power side versus the six-year timeframe used for fuel.

Structurally more levered to power than fuel. From a margin perspective, uranium supply disruptions might well contribute to upside for power prices in the markets where CEG plants are located. One point is that the marginal wholesale power price tends to be a function of natural gas and on a per MWh basis is currently 5x to 10x the level of nuclear fuel costs per MWh. While CEG does not disclose its own fuel costs per MWh, the Nuclear Energy Institute (NEI) provides average industry data in their annual Nuclear Costs in Context publication. The most recent data (2020) shows an average of $5.76/MWh for nuclear fuel, which is clearly a low number in the context of power prices. For comparison, Figure 4 below illustrates power pricing at current market (grey block) and at our current model price deck (blue) relative to NEI average nuclear fuel costs (yellow diamonds) and all-in average production costs (orange circles). Two points here are 1) open gross margin has benefited more from the recent upward moves in power price than they would be hurt by even a huge (e.g. 50%) increase in embedded nuclear fuel costs and 2) such an increase on the fuel side is hard to imagine given the lead time and hedging factors described above.

Analyst Certification

Each of the Vertical Research Partners, LLC analysts whose names appear on the front page of this research report hereby certifies that the recommendations and opinions expressed in this report accurately reflect such analyst's personal views about the subject securities and issuers and that no part of his or her compensation was, is or will be directly or indirectly related to the specific recommendations or views contained in this research report. Analysts named in this report may have from time to time discussed with our clients or may discuss in this report or elsewhere, trading strategies or ideas that reference events that may have a near-term or medium-term impact on the market price on the securities in this report. This impact may be directionally counter to the analyst's published price targets, forecasts and other expectations. Any such trading strategies or ideas are distinct from and do not affect the analyst's fundamental rating for such securities, and the fundamental rating reflects the analyst's current 12-month view of total return as described in the analyst's report. VRP has no obligation to update, modify or amend this report or otherwise notify a recipient if any opinion, forecast or estimate contained in this report changes or becomes inaccurate. Coverage and the frequency of changes in market conditions and in both general and company-specific economic prospects make it difficult to update research at defined intervals. When updates are published is at the sole discretion of the coverage analyst or company management.

Transactions in Securities

Vertical Research Partners, LLC is a provider of equity research services. We are not a registered broker-dealer and do not trade or carry proprietary positions with firm capital in any covered or other securities.

Employees and partners of Vertical Research Partners, LLC may from time to time own beneficial positions in securities of the issuers we cover or derivatives thereof ("covered securities'). Our employees and partners are prohibited from transacting in such covered securities once we have begun the analytical process that may result in a change of recommendation, or within 48 hours after a change of recommendation or initiation of coverage. We require our employees and partners to pre-clear all transactions in covered securities with us. Please contact us if you are interested in further information.

Working through year-end disclosures. Exelon filed their 2021 10-K at the end of last week along with an 8-K which included slides. As expected, management did not host an earnings call or provide their typical earnings release detail. With ExGen (now Constellation) still part of Exelon as of year-end, the 10-K is on a consolidated basis while the 8-K gave adjusted EPS consolidated and pro forma for the separation (utilities plus parent). The slides also provided adjusted EPS for the individual utilities and parent. We have now caught up with our model although this took longer than planned given limited transition year disclosures.

Operating EPS of $2.82 for 2021, $2.08 excluding ExGen. Operating earnings for 2021 came in at $2.82 versus our consolidated $2.80E. Excluding ExGen, the operating number was $2.08 and therefore a couple of pennies shy of the midpoint of the $2.06-$2.14 range given at the January analyst day. As noted in our Spotlight, variance versus the midpoint was largely the result of O&M items including stock compensation, which came in higher than forecast due to robust EXC stock price performance.

Utilities fell short of our 4Q estimates. In our Figure 3 inside, we show segment numbers for 4Q imputed from the annual and 9M numbers (full year segments are in Figure 1). As shown, each of the utilities printed slightly below our estimates amounting to $0.06 overall with a further $0.01 of drag at the Corporate cost center. This shortfall was more than offset by a higher than forecast final operating contribution out of ExGen (+$0.09 vs. estimate).

Raising 2024E on 50bp higher ComEd ROE; rolling out 2025E. We saw no substantive changes to forward looking materials provided at the analyst day. Following our model scrub, we are raising our 2024E valuation year by $0.05 factoring in a slightly higher ROE for ComEd once the current formula rate plan ends and the return no longer has a direct peg to the 30Y Treasury yield. Revisiting assumptions and considering an upward bias in cost of capital proxies in recent weeks, we have increased our estimate for longer-term allowed returns at ComEd by ~50bp, largely accounting for our higher 2024E. We also publish our initial 2025E at $2.80 implying an EPS CAGR of 7.5% from the $2.10 midpoint of the pro forma 2021 base range for 2021. Since we fielded this question during the week, EXC have confirmed to us that their 6-8% guidance remains based on $2.10 and not the $2.08 number reported.

Raising PT by $1 on higher 2024E with our 5% target premium unchanged. Reflecting higher 2024E we raise our price target by $1 to $46 and continue to embed a premium of 5% over our 17x average utility target multiple. We continue to believe EXC will be able to achieve and sustain a premium to regulated peers over time given continued strong execution of a visible growth plan and its unique larger-cap multi-state regulated profile. The latter has potential to make EXC a core holding in the group and we would not be surprised to see the stock continue to do well with a risk-off tape. While we see some room for upside, we remain on the sidelines in view of more compelling regulated value opportunities elsewhere on our list.

Exelon Corp.

Adjusting Our PT and Estimates Post Spin; Reiterate N

We revise our estimates post the Constellation Energy (formerly Exelon Generation) spin-off. For the new look Exelon, we see growing electrification trends, as highlighted in our 2022 Outlook, supporting a premium growth platform, including a $29bn investment opportunity set. Additionally, the combination of an 8.1% rate base CAGR, 6-8% annual EPS and dividend growth, and limited near-term regulatory actions all underpin a solid outlook, in our view. Moreover, IL's return to more traditional utility rate-making versus current electric ROEs pegged to the 30-year Treasury could provide earnings upside at the back end of the 2022-2025 plan. Separately, legacy ComEd issues and the utility's deferred prosecution agreement (set to end in 2023) could represent a potential drag for some investors, despite EXC's notable steps to rectify past practices. All-in-all we see these issues as fairly balanced and remain Neutral rated on EXC with a new $46 price target, from prior $58 pre-spin.

Summary Investment Thesis and Valuation

Expected solid rate base CAGR drives above-average growth. Earned ROEs benefit from management's operational focus, which has successfully raised the PHI utilities' consolidated earned ROE to >9% from a position of substantial under-earning. Additionally, composition as wires-only utilities with lower-risk distribution-focused capital programs screens as higher quality within the group. Moreover, IL's return to more traditional utility rate-making versus current electric ROEs pegged to the 30-year Treasury could provide earnings upside post-2023. Separately, legacy ComEd issues and the utility's deferred prosecution agreement (set to end in 2023) could represent a potential drag, despite EXC's notable steps to rectify past practices.

Our December 2022 price target of $46 is based on a SOTP valuation using our 2023 estimates. We use an average 19.6x P/E multiple for the regulated utility and corporate business segments, which is largely in line with pure-play regulated peers.

Investment Thesis, Valuation and Risks

Exelon Corp. *(Neutral; Price Target: $46.00)*

Investment Thesis

Expected solid rate base CAGR drives above-average growth. Earned ROEs benefit from management's operational focus, which has successfully raised the PHI utilities' consolidated earned ROE to >9% from a position of substantial under-earning. Additionally, composition as wires-only utilities with lower-risk distribution-focused capital programs screens as higher quality within the group. Moreover, IL's return to more traditional utility rate-making versus current electric ROEs pegged to the 30-year Treasury could provide earnings upside post-2023. Separately, legacy ComEd issues and the utility's deferred prosecution agreement (set to end in 2023) could represent a potential drag, despite EXC's notable steps to rectify past practices. All-in-all we see these issues as fairly balanced and remain N rated on EXC with a new $46 price target.

Valuation

We lower our December 2022 price target to $46 from $58, prior, post the spin out of Constellation Energy. Our valuation is based on a sum-of-the-parts analysis using our 2023 forecasts. We use an average 19.6x P/E multiple for the regulated utility and corporate business segments, which is largely in line with pure-play regulated peers. Our lower price target is due to the spin-out of Constellation Energy (formerly Exelon Generation).

Risks to Rating and Price Target

- Regulated electric and gas utilities are subject to strict federal and state regulation, including determinations of allowed revenues. Any change to regulations may cause future earnings power to differ materially from current expectations.
- ComEd currently operates under a deferred prosecution agreement (set to end in 2023) due to past lobbying practices in Illinois. These legacy issues bring up the potential for negative headline risk if new information comes to light.
- The company possesses attractive leverage to growing electrification trends. If these investments develop faster than we anticipate it could lead to a stronger earnings outlook than we currently forecast.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

J.P. Morgan Equity Research Ratings Distribution, as of January 01, 2022

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	52%	37%	11%
IB clients**	53%	46%	34%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	74%	68%	50%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

Energy: Electric Utilities

Midweek Thoughts — XEL, PEG, ED, SO, D, AEP, DUK, EXC

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We published a 4Q earnings recap highlighting some key themes; CO PUC approved XEL's transmission expansion plan; NJ BPU rescheduled the third offshore wind solicitation for January 2023; NY AG requested information from ED regarding the recent spike in power prices; Vogtle co-owners approve construction to continue; VA Senate voted against HB 118; PUCT agrees to rehear SWEPCO's TX rate case; DUK plans to accelerate the W.S Lee gas plant retirement; and oral arguments conclude in the WV vs. EPA case at the Supreme Court.

ICYMI

Movers and Shakers — 4Q21 Earnings Recap: We published a recap of the recently concluded 4Q21 earnings season, highlighting some key themes. See our note here.

News on Companies in Our Coverage

XEL — CO PUC approves transmission expansion: CO PUC approved XEL's planned transmission project. XEL's Power Pathway is a $1.7B project that will include 560 miles of 345 kV lines, new and expanded substations that will allow the transition from fossil fuels to renewables — allowing 5.5 GW of renewable generation to connect. A settlement with staff on the proposal and related rider recovery was reached last year and a decision was imminent. The renewable generation expansion is part of XEL's CO ERP where a final decision is awaited.

PEG — NJ BPU updates timeline for third offshore wind solicitation: The third solicitation for 1.2 GW is now scheduled for January 2023, vs. September 2022, and the awards will be announced in 4Q23. The new schedule better coordinates with the timing of a BPU decision on the offshore wind related transmission expansions. BPU is in technical consultation with the PJM on the transmission expansions that will be needed to support the 7.5 GW of offshore wind. A BPU decision on the projects approved as part of the transmission solution is expected in 2H22. The delay in the scheduling of the wind solicitations also helps the winning bidders of the recent NY Bight auction with time to plan development of the lease areas acquired. The fourth and fifth solicitations for 1.2 GW and 1.34 GW are scheduled for 2Q24 and 2Q26, respectively.

ED — NY AG writes to ED requesting information on recent spikes in power prices: In the letter, AG James requests that ED provide reasons for the rate increases, a description of anticipated rate increases in the next year, and the associated reasons. The letter is also requesting that ED offer clear communication to customers in anticipation of increases and clear communication moving forward, including reminders to consumers about affordability solutions. Rate increases were anticipated given the spike in wholesale power prices (led in turn by the increase in fuel prices — especially natural gas) in January. Note that ED does not own generation and passes the cost of fuel to customers as is customary. The company did issue notifications to customers alerting them to expect higher bills and to reach out for bill assistance. The timing of this letter lines up with ED's CECONY rate case where it is seeking a ~$1.2B electric rate increase and a gas rate increase of $0.5B, effective January 2023. Both requests are based on a 10% ROE and 50% equity layer.

SO — Co-owners vote for construction to proceed: 100% of the ownership group voted to continue construction on Vogtle units 3 and 4 after the recent delays triggered a vote requiring 90% of the group to agree. Units 3 and 4 are expected to enter service in 4Q22-1Q23 and 3Q23-4Q23, respectively. The favorable outcome is not particularly surprising given the advanced stage of progress at both units and that the cost of the co-owners is capped. The schedule extension beyond the timeline of November 2022 and 2023, respectively, required a vote from the co-owners to proceed. See our earnings note here for a detailed discussion on Vogtle.

D — Bill to effectively repeal VCEA fails in VA State Senate (as expected): The bill was defeated in the Senate with a 12-3 vote. The action was expected given the Democratic majority in the State Senate. The bill in question, HB 118, was introduced effectively to repeal VA's landmark Clean Energy Act. VA General Assembly voted in favor of the bill in mid-February.The bill sought to undo current provisions that require regulation of CO_2 from power generating facilities, and repeal provisions of the VCEA that say that solar, wind,

and energy storage facilities are in the public interest. HB 118 provided that planning of new nuclear generation would be in the public interest. A bill relating to VA's withdrawal from the RGGI has also been withdrawn in the Senate.

AEP — Commission agrees to a rehearing in SWEPCO's TX rate case: The Commission agreed to AEP's rehearing request and expects to rule on it within 45 days. Staff recommended that the motion to rehear be denied since it raised issues already litigated. AEP requested a rehearing following the final order that included a rate increase of $55M on a 9.25% ROE. SWEPCO's original ask was for a $100M rate increase at a 10.35% ROE. SWEPCO, in its request for a rehearing, contended that it does not support the 9.25% ROE, which is the lowest awarded in decades and disagrees with the Commission's proposed methodology for recovering the investments in Dolet Hills, which is being retired early. The Commission ordered that a regulatory asset for the remaining net book value be created and amortized without a return, using the original end of useful life date of 2046.

DUK — DUK notifies SC PSC of intent to accelerate retirement of gas plant: As part of its 2020 IRP, DUK will retire the 173 MW W.S. Lee Unit 3 at the end of this month vs. a perviously scheduled 2030 retirement. DUK converted the unit to natural gas from coal in 2015, but the plant is only used as a peaker since DUK energized a modern 809 MW CC plant at the same site in 2018.

ED, EXC — Oral arguments conclude in West Virginia vs. EPA: The issue in front of the Supreme Court is whether the U.S. Constitution allows Congress to delegate broad authority to the EPA related to GHG emissions and whether the EPA can issue broad rules to recast the nation's electricity grid and decarbonize various sectors of the economy. The Biden EPA is expected to issue a proposed carbon rule this summer—likely around the time that the Supreme Court hands its ruling on the case. In our view, the market has evolved considerably since the CPP was first introduced and, to a large extent, industry and state driven decarbonization mandates have assumed more significance, thus rendering emissions reduction targets handed down by the EPA as less significant.

- WV vs. EPA is a Supreme Court case involving the scope of the powers granted to the EPA through the Clean Air Act. In 2015, the Obama EPA established the Clean Power Plan to create guidelines for GHG emission reduction from existing power plants. The plan was never implemented, but in 2019 the Trump EPA implemented the Affordable Clean Energy Rule, significantly narrowing the scope of EPA's mandate and repealing and replacing the CPP. Several groups challenged the legality of the ACE in federal court and the U.S. Court of Appeals for the DC Circuit vacated the EPA's repeal of the CPP and the ACE rule and sent it back to the EPA for further proceedings.
- The plaintiffs' lawyers invoked the "major questions" doctrine, which allows the EPA to take actions that can have a dramatic impact only under clear directive from Congress. They also argued that the EPA's authority to regulate power plants is limited to steps that plants can take "inside the fence line" — an interpretation that was challenged by the liberal justices. Conservative justice Alito seemed concerned that the case could provide EPA too broad a berth to go a lot further than it did with the CPP. None of the conservative justices seem to think that the Court of Appeals erred in rejecting the ACE rule, and Justice Gorsuch agreed with the defendant that states are not being harmed since there is no rule in place. The suit is confusing since it is asking to apply a doctrine to a rule that is no longer in effect.
- Several large utilities, including ED and EXC, are siding with the EPA in that the CPP offers more flexibility in actions to reduce GHG emissions.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: XEL, AVA, AEP, CMS, POR, EXC, CEG, NEE, AGR, PEG, EIX, SRE, NWE, AEE, SO, ETR

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Earnings are drawing to a close with only FSLR and AY scheduled to report this week. We are watching regulatory proceedings in XEL's ND gas rate case, AVA's OR gas rate case, AEP's electric rate case in AR, CMS's IRP in MI, POR's electric rate case in OR. In other news, EXC reported in line 2021 results, NRC reverses license renewals for NEE's Turkey Point and CEG's Peach Bottom nuclear units, NY Bight lease sale yields record results, a UN report highlights the global wildfire crisis, locals are questioning a permit issued for NWE's Laurel Generating Station, CO PUC is asking XEL for details on the Comanche 3 outage, AEE may close Rush Island as soon as this fall, SO is in partnership with Terra Power to develop a prototype for a next generation nuclear reactor, DUK is thinking of combining operations at its Carolinas utilities, CPUC approved RNG standards for CA, LA PSC approved ETR's storm cost settlement, and IURC approved AEP's rate settlement at Indiana-Michigan.

Regulatory Calendar

A full regulatory calendar is provided later in the report. Below we provide details on events scheduled for this week.

XEL — Direct testimony in NSP's ND gas rate case is due on March 1: NSP recently filed a rate case (PU-21-381) seeking a $7M rate increase premised on a 10.5% ROE (52.54% equity) for a 2022 test year. The request includes $1.25M previously approved amortization of costs related to remediation of a former gas plant and thus the net impact of the rate increase would be $7.1M. NSP's previous rate case in ND was decided in 2007 with a settlement.

AVA — Staff and Intervenor testimony in AVA's OR gas rate case is scheduled for March 2: AVA and related parties have already reached a partial settlement stipulation in the OR rate case. The parties reached a settlement on all the issues in the docket regarding CoC including cap structure and ROE. The settlement reduces the requested $3.8M rate increase to $2.6M, agrees on the 50% equity ratio, and reduces the ROE from the requested 9.9% to 9.4% (thus, causing the decline in revenue increase). AVA intends to use deferred tax credits and other tax deferrals to fully offset the impact on customer rates. AVA's previous rate case in OR was settled at a 9.4% ROE, 50% equity (Docket: UG 433).

AEP — Settlement conference in AEP's AR rate case is scheduled for March 4: In surrebuttal, Staff proposed a $47M proposed rate increase based on a 9.3% ROE and an equity layer of 45%. During rebuttal, SWEPCO reduced the revenue request to $81M, from the original $85M on a 10.35% ROE. Driving the delta is the lower ROE, proposed rate of depreciation, and amortization of unrecovered balance at Dolet Hills. Staff supports the FRR rider after the utility removed the tax deferral mechanism. The primary drivers of the rate case are investments in generation and T&D infrastructure along with plans to retire certain coal units or to modify operations at them. SWEPCO has also requested for rates to be regulated under the FRP statute, and to that end, AEP provided a proposed FRR rider with the filing (Docket: 21-070-U).

CMS — Proposed decision in the IRP is expected on March 4: The primary area of difference between CMS and Staff at present appears to be in the plan to retire the 840 MW Campbell 3 in 2025, and purchasing the remainder of DIG and including it in the rate base. Management has been clear in its thinking that all three units of Campbell need to be closed in 2025 to realize the savings and that the most cost-effective and reliable offset to the coal retirements will be to acquire 2 GW of natural gas-fired units for $1.34B—four units in total—the largest of which is the Covert plant (cost: $815M, capacity 1.2 GW). The other three plants would have ~1 GW of capacity and includes the DIG plant, of which CMS already owns a portion.

POR — Oral arguments in POR's electric rate case in OR are scheduled for March 4: POR has already reached four settlements in the pending rate case. The most recent settlement included the reimbursement of ~$3.3M to customers for the Trojan Nuclear Decommissioning Trust. Through the three prior settlements, the parties have settled on a $30.7M electric rate increase—below POR's $59M original request and a 9.5% ROE and 50% equity layer, based on an average rate base of $5.6B. POR continues to

work on outstanding issues, including wildfire and vegetation mitigation, wildfire emergency, ice storm recovery mechanisms, and the Boardman deferrals. A final order is expected by April 25, and POR has proposed that new rates go into effect May 9th.

Recent Developments for Companies Under Our Coverage

From our midweek: The White House announced a series of investments to establish a domestic rare earth supply chain to support battery, solar, and wind equipment manufacturing; PEG completes the sale of its fossil generation assets; a GA state senator introduced a bill to securitize Vogtle debt; Staff recommends that PUCT deny AEP a rehearing in the TX rate case; NOVA launched a repair service for solar installations; Staff recommend the approval of XEL's CO Uri cost recovery settlement; MS PSC makes recommendations to utilities in the aftermath of winter storm Uri; D is seeking expedited approval to acquire solar resources in OH; and Prysmian is building a facility in MA to manufacture subsea cables to support AGR's offshore projects.

EXC — EXC published 2021 results in a 8K/10K filing: In lieu of an earnings call, EXC published 2021 results in related SEC filings. 2021 adjusted EPS of $2.82 was in line with ours and consensus estimate of $2.80. Excluding the recently spun out merchant segment, EPS would be $2.08 - also in line with our $2.07 forecast. The filings do not include much that is incremental beyond the recently provided details at the analyst meeting. Starting with the 1Q22 10Q filing, Generation's results will be marked as discontinued operations for the period prior to the spin on February 1, 2022.

CEG, NEE — NRC reverses decision to extend licensed for two Turkey Point and Peach Bottom reactors, pending further environmental review: NEE's FPL operates Turkey Point while CEG operates Peach Bottom. A previous NRC with a Republican majority had approved the extension of the operating license for the reactors for another 20 years to 2052/2053/2054. It also ordered a new review of potential environmental risks, including those posed by climate change. The plants are still good to operate until 2032/2033/2034 under a previous 20-year extension. The rationale for the reversal appears that the previous Commission did not adequately consider the risks of climate change and flooding from sea level rise. Turkey Point is located south of Miami, FL and Peach Bottom is in PA. The NRC has asked the operators to go through a full environmental review before the Commission agrees to another 20-year extension. This decision may have implications for other reactors that are seeking approvals to operate for 80 years. Other plants seeking similar renewals include D's North Anna, NEE's Point Beach and St Lucie plants, and DUK's Oconee Nuclear Station. Another plant that recently received an extension — D's Surry Nuclear Plant was not identified for additional review. It appears that the parties have until March 31 to file responses to the ruling.

AGR, PEG — BOEM lease sale yields record bids: AGR and PEG were registered bidders but did not win any bids in the NY Bight Lease Sale that extended over three days with more than 50 rounds of bidding. This was the first offshore wind auction under the Biden administration and the high level of interest in the lease sale bodes well for the acreage previously secured by AGR, PEG, D, and ES either through lease sales or JV agreements. As AGR, ES, and PEG move from permitting to construction, given the level of interest among oil companies and European utilities to own U.S. offshore wind assets, there should be attractive opportunities to monetize the projects either through financing partnerships or stake sales.

Figure 1 - NY Bight Lease Sale Provisional Winners

Provisional Winner	JV Partners	Lease Area	Acres	Capacity (MW)	Winning Bid ($M)	Cost per KW ($)
OW Ocean Winds East, LLC	EDP Renewables (POR), Engie (FRA)	OCS-A 0537	71,522	868	765	881
Attentive Energy LLC		OCS-A 0538	84,332	964	795	825
Bight Wind Holdings, LLC	RGE (GER), National Grid (GBR)	OCS-A 0539	125,964	1,390	1,100	791

Invenergy Wind Offshore LLC	Invenergy (USA)	OCS-A 0542	83,976	934	645	691
Mid-Atlantic Offshore Wind LLC	Shell (NED), EDF Renewables (FRA)	OCS-A 0544	43,056	523	285	545
			488,201	**5,603**	**4,370**	780

Source: BOEM, Company Reports, KBCM

In other offshore leasing news, BOEM has identifies three areas offshore OR that could hold total installed capacity of 17 GW and plans to narrow them down into WEA, which could support 3 GW in the near term. A lease sale is expected in 1Q24. The next lease sale to watch will however be the Carolina Long Bay auction scheduled for May 2022, followed by Northern & Central CA auction in September 2022, and GOM in late 2022.

EIX, POR, AVA, SRE, XEL, NWE — UN Report Highlights a Global Wildfire Crisis: A report from the United Nations concludes that risks from intense wildfires will increase meaningfully in coming years as climate change intensifies. The report shows that brush fires such as those in the western U.S. have intensified over the last 10 years and are burning larger areas, and that the extreme heat wave in the Pacific Northwest in 2021 would not have occurred but for global warming. The prolonged drought in the west (according to scientists it is the worst in over 1,200 years) is triggering wildfires earlier than usual. The paper advocates for a change in government spending on wildfires, shifting the investments from reaction to prevention and preparation. Governments should be spending two-thirds of the dollars on planning, prevention, and preparedness and only one-third on response. Currently, response receives more than half of the total expenditure and planning receives less than 1%. The report also discusses power line failures as a cause of

wildfires and identifies poorly maintained and dated power infrastructure as a contributing factor. See our note here on the wildfires in the west and our note here on the physical risks from climate change for utilities.

NWE — Locals are requesting a hearing over a floodplain permit issued in relation to the Laurel Generating Station: In an appeal, residents along the south bank of the Yellowstone River claim that the permit was issued erroneously and that the permit must be rejected as it authorizes the construction of a gas pipeline that would likely become exposed by future erosion thus creating an unsafe structure within the floodway. The Yellowstone County Commissioners are scheduled to hold a hearing on March 15. The pipeline will serve NWE's 175 MW gas fire Laurel Generating Station. For the most part, NWE plans to use a repurposed oil pipeline but needs to build an extension across the river to reach the generator.

XEL — CO PUC asks XEL for a report on Comanche 3 outage: Comanche 3 (750 MW) has been shut down for repairs since early February. It is among the newer power plants and came into operation in 2010. According to XEL the outage was triggered by electrical problems and that the generator needs to be disassembled for repairs. The plant also had two outages in 2020. The recent settlement in XEL's CO ERP calls for the plant to be retired by the end of 2034 (vs. XEL's plan to retire it in 2040) and to limit the capacity to 33% by 2030.

AEE — Rush Island may close as early as September this year: Based on press reports, AEE has filed court documents with an aim to suspend operations at Rush Island starting on September 1. The company does however offer to MISO to keep it in service as a support resource so that it could continue operations if deemed necessary for energy reliability. As we wrote in our earnings note, AEE has submitted an assessment of reliability impacts from the accelerated retirement of Rush Island (1.2 GW), which includes transmission upgrades and additional voltage support needed to ensure reliability. MO PSC will review AEE's plans to retire the plant but is under no deadline to issue a report. Nonetheless, AEE plans to file an update to the 2020 IRP in 1H22. The updated IRP is likely to include a comprehensive update to include potential investment from the retirement of Rush Island.

SO — SO and Terra Power finalize agreement to design a next generation nuclear reactor: The companies signed a subrecipient agreement to design, construct, and operate a molten chloride reactor experiment. It will be the world's first salt reactor and will be based at the Idaho National Lab. The project has funding from the DOE's Advanced Reactor Demonstration Program. The agreement is supported by $170M of cost-shared funding agreement over a five-year period. The alliance will work on an integrated effects test to learn how the MCFR technology will scale and operate at larger, commercially relevant sizes. The MCFR technology operates at higher temperatures than conventional reactors, thus generating electricity more efficiently and also offers potential for process heat applications and thermal storage.

DUK — DUK plans to combine operations at DEC and DEP: DUK may seek regulatory approval to combine the operations of DEC and DEP but this would not constitute a full merger. It would still require NC, SC Commission approvals as well as FERC approval. The combination would combine generation and transmission assets to form a single balancing area and benefit from the larger scale with lower reserve needs and improved service reliability.

EIX, SRE — CPUC approves RNG standards: The CPUC voted to approve a renewable natural gas standard that will require gas distribution companies to procure 73 bcf of biomethane per year by 2030. By 2030 all the CA gas utilities will have to source biomethane equal to 12.2% of their annual gas demand. RNG will count towards the target and there are several restrictions on what does and does not qualify as biomethane within this ruling. The CPUC will re-evaluate the target in 2025 to assess progress. SoCalGas incidentally is already up to 4% RNG deliveries to core customers at the end of 2021 and is targeting 20% by 2030.

ETR — LA PSC approve settlement for 2020 storm costs and $1B escrow for Hurricane Ida: The PSC voted to approve $3.34B in storm costs. ETR sought recovery of $2B in costs related to damages from Hurricanes Laura, Delta, Zeta, and winter storm Uri; $290M to replenish the storm reserve; and an incremental $1B for Hurricane Ida costs.

AEP — IURC approves Indiana Michigan's rate settlement: The commission approved the rate settlement for a rate decrease over two phases — a 1% decrease in mid-2022 and a larger $95M decrease in 2023. It appears that the rate decrease is a function of removing coal-fired Rockport Unit 2 from customer rates starting in January 2023 as part of a separate settlement reached earlier this year and incorporation of riders into base revenue. The settling parties agreed to an authorized ROE of 9.7% — vs. I&M's original ask of 10% and intervenor recommendation of 9.1%. Indiana Michigan had filed a request for a multi-step rate increase, seeking a net $106M increase to take effect in two steps—the first step of $73M at the time of approval and the second step of $31M in 2023. The requested rate increase reflected infrastructure investments, COVID bad debt costs, and COVID-related O&M.

Earnings Recap

SRE — 4Q results came in ahead of our expectations, and management reiterated 2022 guidance of $8.10-$8.70. Incrementally, SRE provided a 2023 EPS guide of $8.60-$9.20 and a long-term growth rate of 6-8%. We believe that the much anticipated long-term outlook, and the $1B planned stock buyback in 2023 is likely to generate a positive near term reaction from investors. SRE also rolled forward the five-year capex to 2026. The 2022-2026 capex of $36B is $4B higher than the prior iteration and is 94% dedicated to the CA and TX utilities. We see strong momentum in the LNG pipeline as SRE works through current projects in hand, FID's Cameron expansion in 2023, and potentially signs additional offtake agreements as energy security concerns take center stage in Europe and Asia. See our note here.

PNW — PNW posted strong 4Q21 results with EPS of $0.24, ahead of our $0.09 estimate and consensus of $0.06. The Company continues to benefit from strong economic trends within its service territories with retail sales up 6.7% in 4Q21 and +4.2% in 2021. 2022 guidance of $3.90-$4.10 assumes sales growth of 1.5-2.5%. The 5-7% long-term EPS growth guide is based on 3.5-4.5% sales growth. Regulatory proceedings to watch include those at the AZ Court of Appeals with respect to the 2019 GRC and an impending GRC filing with the ACC in mid-2022. See our note here.

EIX — EIX reported a stronger than expected quarter, beating the recently adjusted 2021 EPS guidance. As expected, y/y results benefited from the Track 1 outcome of the GRC. In line with its stated 5-7% long-term EPS growth cadence, the Company provided 2022 guidance of $4.40-$4.70. Encouragingly, the wildfire settlements continue apace and EIX has settled 78% of the claims outstanding. Capex and equity plans are both largely unchanged, although both will be front-end-loaded as the Company received approval for $1B in spending on storage to meet peak summer needs. See our note here.

PEG — PEG reported results for the 4Q ahead of our forecasts and consensus as Power EPS beat our forecast. 2022 guidance is narrowed, but the midpoint is unchanged at $3.45. Long-term growth rate of 5-7% through 2025 is unchanged, as is the $15B-$17B capex plan for 2021-25. We should get more clarity in 2H on capex expansion as PEG hears from the BPU on the Infrastructure Advancement Program and on the outcome of the proposals for offshore transmission expansion. Nuclear assets remain in PEG's portfolio for now, as management evaluates potential federal or state level solutions. See our note here.

AEP — AEP reported a strong 4Q21 with EPS of $0.98, which was ahead of consensus expectations of $0.93. The Company also raised its 2022 guidance vs. the prior levels indicated at 2021 EEI, and tightened the LT target growth rate to 6-7% (vs. 5-7% prior). Additionally, AEP announced its intention to explore selling 1.6GW of its unregulated renewables, which will fund its regulated renewables and transmission businesses as the Company strategically shifts to more regulated growth. A potential transaction is also likely to offset some NT equity need depending on how well the timing would align. See our note here.

NOVA — NOVA reported 4Q results that were in line with expectations and maintained its 2022 financial guidance as well as its intermediate growth targets. NCCV per customer grew 8% q/q to $10.8K, and the Company recently launched its repair services business for homeowners who do not have a Sunnova installed system. See our note here.

ETR — ETR reported a strong 4Q with adjusted EPS of $0.76, which was ahead of our estimate of $0.69 and consensus of $0.70. The Company reaffirmed its $6.15-$6.45 2022 EPS guidance and maintained its long-term EPS growth. Additionally, ETR slightly increased its three-year capital plan to ~$12B, up from the $11.7B preliminary plan released at EEI. ETR reduced its equity need to $700M for the three-year time frame and is progressing through its securitization proceedings, which will add to customer bills. ETR will be hosting an analyst day on June 16, where it will provide longer-term outlooks. See our note here.

AGR — AGR reported 4Q results ahead of our expectations and provided 2022 guidance that included investment gains from recent offshore lease restructuring. Notably, excluding this gain, 2022 "core" earnings are implied to be below 2021 levels. However, 2021 also included a sizable one-off benefit from higher power prices during Storm Uri. Adjusting out both items would imply y/y growth in line with AGR's outlined trajectory. However, since the Company did not provide a clear bridge, we expect questions about the quality of earnings to linger. On the offshore returns, another hot topic *du jour*, the Company reiterated its target on returns and costs and highlighted progress in multiple areas. No changes in the status of the PNM merger have been reported as the case is before the NM Supreme Court. We expect a detailed breakdown on guidance, offshore wind plans, investments, and potential monetization scenarios when AGR hosts a virtual analyst day on March 22. See our note here.

AVA — AVA reported EPS of $0.71, which was ahead of consensus expectations of $0.67 despite the weakness in AVA's core Utilities segment, which reported FY results below the lower end of prior guidance. The Utilities segment experienced opex headwinds in 2021; however, AVA kept its guidance unchanged for 2022 and beyond. "Other" segment is expected to be a net positive contributor to earnings going forward; however, the ultimate goal of earning close to allowed ROE in the core business remains somewhat elusive and is predicated on in line regulatory outcomes across AVA's jurisdictions as well as effective cost management. Achieving this goal could set the Company up for the LT growth rate of 4-6%, which the Company reiterated. See our note here.

CNP — CNP reported an in-line quarter and reiterated 2022 guidance. With ENBL and LDCs sales concluded, the focus is on effective execution on the targets set at last year's analyst meeting. Recent TX legislation following Storm Uri appears constructive for capex

growth as CNP seeks to put mobile generation into rate base in the short term while developing plans for grid resiliency and expanded EV Infrastructure over the medium term. See our note here.

AEE — AEE reported in-line 4Q and 2021 results. The 2022 outlook is also in line with the stated 6-8% LT EPS growth target. The new five-year capex roll-out is largely flat from the previous one, but we see the potential for significant upside as AEE files an updated MO IRP to incorporate an accelerated retirement of Rush Island, expanded transmission, and renewables opportunities since the original 2020 filing. MISO Future 1 project approvals scheduled for mid-2022 should also be capex incremental. With a recent MO rate review and the IL energy legislation behind it, the focus for 2022 will be on big-ticket capex items such as coal retirements and transmission upgrades. While there is nothing material thus far on supply chain and cost inflation, we believe AEE's cadence of adding renewables to its portfolio bears watching as it fulfills the mandate laid out in the 2020 MO IRP. See our note here.

RUN — RUN reported 4Q21 customer and capacity additions in line with our expectations and guided for 20%+ growth in 2022, which is above our current model (KBCM +15%). That said the Company has faced growing backlog and lagging installations, which became a drag on the margins and will likely continue to see similar dynamic at least through 1Q22. See our note here.

HASI — HASI reported strong 4Q results and increased its outlook for distributable EPS growth to 10-13% from 7-10% and dividends per share growth to 5-8% from 3-5%. Management also extended its outlook through 2024 from 2023 at the higher growth rates and raised its quarterly dividend to $0.375 per share from $0.35 per share previously. While there is currently macro and policy uncertainty with higher rates on the horizon, we think HASI has demonstrated an ability historically to manage through a higher rate environment, and the guidance raise and extension give us confidence in its ability to continue to deliver results at attractive net margin levels. See our note here.

ED — ED posted 4Q21 EPS of $1.00, which was ahead of consensus of $0.85. The Company benefited from the ruling that allowed it to recognize late payment charges, which contributed $0.22 of upside. ED provided its 2022 EPS guidance for $4.40-$4.60 and included its long-term growth rate of 5-7% off of 2022. Additionally, ED increased its three-year capital plan to $15.7B and the CECONY rate case will be the item worth watching in 2022. See our note here.

SO — SO reported 4Q adj EPS of $0.36, which was in line with ours and consensus estimates of $0.35. Additionally, SO introduced 2022 guidance of $3.40-$3.50 and maintained its long-term growth rate of 5-7%, which will be fueled by its $41B capital plan and 2022 GA IRP. SO announced another delay to the Vogtle project with in-service dates now expected for 4Q22-1Q23 for Unit 3 and 3Q23-4Q23 for Unit 4, which is more aligned with expert testimony in the VCM process. The co-owners will vote if the projects proceed due to the latest delay, but we do not see much risk and note that SO has already voted to proceed. While we view the latest delay as a speed bump, SO continues to experience strong growth in its territories and has a significant capital investment opportunity ahead. See our note here.

POR — POR's 4Q EPS came in at the low end of the guidance range, at $0.73, in line with our $0.72 estimate. POR posted $2.72 for 2021, and provided 2022 EPS guidance of $2.75-$2.90 vs. our estimate of $2.80. POR rolled out its capital forecast to 2026, which is now $3.2B, and ~$300M higher for the comparable 2022-2025 period; no additional equity needs are forecasted at this point. POR continues to work through the rate case with a decision expected this April, and the Company has proposed rates go into effect in May. POR's hydro resources are in a better position than in 2020, which should help with summer load. See our note here.

ES — ES reported 4Q results that were mostly in line with expectations and reiterated expectations of core EPS growth rate toward the high end of 5-7%. Management provided color on the three offshore wind projects under various stages of permitting/construction. The expected ROE on the projects is likely to be in the 11-13% range with $5.1B-$5.8B of total expected investments for its 50% share. 2026 net income could see a 6-7% boost from offshore wind contribution. Management also raised expectations for equity needs from a total of $2B to $2.5B with an additional $100M from treasury stock for ESOP. In terms of regulatory activity, we are watching the NSTAR electric GRC in MA. Given that the domestic offshore industry is in very early stages of development, we believe that investors will watch progress on the project closely. See our note here.

OTTR — OTTR reported EPS of $1.23, vs. our estimate of $1.19 and provided guidance of $3.78-$4.08 for 2022. We are currently modeling $3.48 for full-year 2022. While the unique market conditions experienced in the Plastics segment have continued into 2022, conditions are expected to return to more normal levels throughout the year. OTTR will begin to shift its focus to the Electric segment in 2022 as it looks to reach its 70/30 mix over the long term. The Electric and Manufacturing segments are forecasted to grow ~6% and ~7%, respectively. This will be more than offset by the decline in the Plastics segment as it faces challenging comps. See our note here.

NWE — NWE reported EPS of $1.04 vs. our estimate of $1.08 and consensus of $1.06 and reaffirmed 2022 guidance of $3.20-$3.40 (including a $0.23-$0.28 impact from share dilution), and a long-term growth rate of 3-6%. Our current 2022E EPS is $3.40/consensus is $3.37. NWE is not immune to supply chain challenges and expects a ~2% increase to the $582M 2022 capex. NWE will file a GRC in MT in 2022 and an updated IRP in late 2022/early 2023. The outcome of the IRP will determine the RFPs for projects to reduce the ~725MW capacity shortage forecasted for 2025. Key points to focus on in the rate case include a request to increase the PCCAM cost forecast; and add $275M capex for Laurel into base rates. We are preliminarily modeling a ~$50M revenue increase in 2023.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

FE — FE reported an in-line quarter with EPS of $0.51, vs. our estimates of $0.52, and full-year EPS of $2.60. In tandem with its earnings release, FE announced the term sheet regarding the settlement in a bulk of shareholder derivative lawsuits as the Company continues to move past its legacy issues. FE maintained its 2022 EPS guidance and provided 1Q guidance of $0.55-$0.65, which will provide a solid base for its 6-8% long-term growth rate. See our note here.

D — D reported an in-line quarter with EPS right at the midpoint of the guidance range. 2022 guidance of $3.95-$4.25 aligns with the long-term growth rate of 6.5%. Management announced a roll-over of capex to include 2026 into the five-year period—the focus being decarbonization including the VA offshore wind project. D announced the sale of its WV gas utility at 2x rate base, further rationalizing its portfolio to focus on scalable regulated utilities. Supply chain and inflation concerns were addressed. ~70% of the offshore wind capex is under fixed price contracts, and while management is facing shortages and price inflation in procuring for 2023 solar projects, so far project schedules do not appear to be impacted. See our note here.

DUK — DUK reported 4Q21 EPS of $0.94, slightly below our estimate of $0.98, and introduced 2022 guidance of $5.30-$5.60, with the midpoint slightly below consensus of $5.47. DUK is seeing some impact of supply chain pressures and pushed out ~400Mw of renewables projects to 2023 due to equipment availability, which partially drives the more subdued 2022 view. DUK's long-term capital plan of $63B for the 2022-2026 period, followed by $70B-$75B in the 2027-2031 time frame, gives management confidence in reaching the upper half of its long-term growth rate, and we are inclined to look past the near-term challenges. See our note here.

DTE — DTE reported a strong quarter—ahead of our guidance and consensus. Management raised guidance for 2022 with a new midpoint that implies +7% over the original 2021 guide. The long-term EPS growth rate of 5-7% is maintained. We expect the recently filed electric GRC and the impending IRP to dominate discussions this year and also define the cadence of the long-term capital outlook. Overall, we believe that DTE continues to execute on plan throughout its portfolio. See our note here.

ENPH — ENPH reported strong 4Q results, which were ahead of our and consensus estimates on most metrics, and introduced 1Q22 guidance above the Street/our estimates. The Company noted impending price increases later in the year and discussed multiple growth avenues in the U.S. and Europe, highlighting its ability to maintain attractive growth trajectory despite localized speed-bumps such as NEM 3.0 process in California and ongoing global supply chain challenges. See our note here.

WEC — WEC reported another beat of $0.71, vs. our estimate of $0.68. The Company introduced 1Q22 guidance of $1.68-$1.70, while reaffirming its 2022 guidance. WEC continues to benefit from a strong economic recovery among its C&I customers and expects customer growth to continue. WEC has two of its wind projects coming online this year, and while it has not seen any cost impacts, its Badger Hollow project saw some delays due to supply constraints. The next big item will be the rate case filing before May 1. See our note here.

CMS — CMS reported 4Q results ahead of consensus and in line with our forecast. 2021 EPS of $2.65 was at the high end of guidance. Management provided a constructive earnings update—raising 2022 guidance and guiding to the top end of 6-8% for long-term earnings growth. Capex is rolled forward to 2026 and is 8% higher than for the 2021-2025 period with meaningful upside potential depending on the outcome of the IRP. In terms of items to watch, a PD on the IRP is next on the calendar for March, and proceedings in the gas rate case will follow. An electric rate case filing is coming up in April. See our note here.

XEL — XEL reported EPS of $0.58 vs. our estimate of $0.57 and consensus of $0.58. XEL reaffirmed guidance of $3.10-$3.20 for 2022 and maintained a 5-7% long-term growth rate off the 2021 midpoint of $2.96. The regulatory picture will become clearer in early 2022 with several settlements expected to receive final decisions in 1Q22. See our note here.

NEE — NEE reported full-year 2021 results that were in line with our expectations, consensus, and the upper end of guidance. Management rolled forward guidance by a year to 2025, reiterated its 6-8% target for EPS growth and 10% for dividend growth, and maintained its bias to the top end of the provided ranges. 2022 EPS guidance of $2.75-$2.85 implies +10% at the midpoint. The Company made management transition announcements that are in line with expectations and will be hosting an analyst event on June 14 in NYC. FPL is executing on its recently approved multiyear rate settlement and NEER continues to show considerable growth while developing its expertise beyond the traditional wind and solar projects to include storage, wind repowerings, green hydrogen, and clean fuels into the mix. See our note here.

NEP — NEP reported in-line results and raised YE21 run rate for EBITDA and CAFD to more accurately reflect growth potential from the recent NEE drop-down and a third-party acquisition. Management reiterated its 12-15% annual distribution growth target. The volatility (and the upward move) in interest rates, lack of BBB momentum, and ongoing supply chain challenges and inflation concerns have led to a meaningful rotation out of growth-oriented renewable names. That said, we would not put NEP into the same category as high beta names. The Company has long-dated PPAs that secure its revenue stream, access to NEE's prolific pipeline of assets, and access to attractive financing options. Additionally, NEP's 2021 acquisitions go a long way toward de-risking its 2022 and 2023 outlook. See our note here.

Exelon Corporation (EXC): 2021 results in line with consensus; reaffirms 2022 EPS guidance range

Sentiment Indicator : neutral

Produced by Tucker, Shelby (RBC Capital Markets, LLC) on Sunday, February 27, 2022, 10:34 AM ET

Disseminated on Sunday, February 27, 2022, 14:21 PM ET

Our view: We expect Exelon to trade in line with peers Monday given in-line results.

Exelon Corp. (EXC; $42.60; Sector Perform; PT $46) reported 2021 full year adjusted EPS of $2.08, one cent behind consensus of $2.09 and four cents ahead of our estimate of $2.04. Management reaffirmed 2022 EPS guidance range of $2.18-$2.32.

Including Constellation, Exelon reported 2021 full year adjusted EPS of $2.82, compared to our estimate of $2.80.

As previously announced, there is no conference call.

DTE: More to come on that …
PCG: Communication breakdown
CMS: Back on the compounding track
EXC: Strategic mission accomplished; downgrade to Hold
CEG: Low carbon power leader breaks loose

What's in the Spotlight? After navigating last week's earnings onslaught (barely) there was plenty to digest and we have some catching up to do. One item we reviewed over the weekend is Friday's 2022 Wildfire Mitigation Plan filing by **PCG** and updated 2023 General Rate Case (GRC) testimony. The punchline is lower revenue requested for 2023 (-0.8%) and 2024 (-0.2%) with increases to 2025 (+0.8%) and 2026 (+1.8%). Big moving pieces are higher CapEx (+$7.3B) for undergrounding offset by $1B lower spend on vegetation management as 1) miles are put underground and 2) unit costs are reduced ~20% with process and efficiency gains. The utility also asks to include Enhanced Powerline Safety Settings (EPSS) program costs in the GRC. This makes sense to us given interplay between WMP elements, but it could meet some procedural resistance since EPSS was not included in the original GRC scoping. PCG request an ALJ ruling on their Motion to Amend by March 4 and propose a schedule largely consistent with a recent Joint Motion filed along with TURN and the Public Advocates Office and calls for the main hearing in June, update testimony hearings in August and the PD and decision in 2Q of 2023.

EXC and CEG file 10-Ks. Also crossing the tape on Friday were 10-K filings from **EXC** and **CEG** but neither held a call. EXC posted $2.82 of operating EPS for 2021 versus our $2.80E and the pro forma (excl. CEG) number was $2.08 versus the $2.10 midpoint of the Analyst Day range. Catching up with IR, we understand that variance versus the midpoint was higher final stock comp expense and O&M items. **CEG** reported a 2021 GAAP loss of $205M although focus is more on the forward outlook with an updated slide deck showing no substantive changes.

NRC rolls back license extensions. One recent item noted by **CEG** was the NRC reversal of second 20-year license extensions for the two Peach Bottom units, jointly owned with **PEG.** This happened on Thursday with similar action for Turkey Point **(NEE)** and the NRC directed staff to conduct further reviews under the National Environmental Policy Act (NEPA). How this plays out is unclear, although there may be ongoing earnings exposure if depreciation schedules change. NRC process challenges could also affect CEG plans to apply for second extensions across the fleet, although this would run contrary to growing federal policy support for nuclear in context of growing political consensus around decarbonization objectives.

Utility outperformance continues. Utilities posted a second consecutive winning week with the S&P Utilities gaining 2% and outperforming the S&P 500 by 120bp with 90bp of this coming in Friday's big rally. Further flattening of the yield curve (2Y10Y -6bp) likely helped the group overall, although macro volatility clearly remains elevated and it is hard to gauge at this point how the market mood may interpret rapidly evolving events. With the S&P Utilities trading at a modest (3%) premium on 24M forward P/E we would not see sector valuation as a particular impediment to further relative gains given continued market volatility.

Big week (and bigger Friday) for SRE. Clean energy names had a strong week (ICLN +7.2%) although **CEG** (-3.3%) was a notable exception. **SRE** (+4.4%) was the top performer from our coverage and had a particularly strong day on Friday gaining 5.4% and outperforming 220bp on the back of a well-received call including 2023 guidance, a new LT forecast earnings growth rate of 6-8% and a new stock buyback announcement ($1B in 2023). While it was not a core part of our SRE thesis when we upgraded in our 2022 Outlook, current geopolitical developments seem supportive for longer-term LNG development prospects and may be helping the stock gain traction versus utility peers in this tape. We anticipate revisiting our SRE numbers as we address our post-earnings backlog over the coming days.

PCG: 2022 WMP and GRC update

PCG files 2022 WMP and updated GRC testimony. After the close on Friday, PG&E announced the filing of its 2022 Wildfire Mitigation Plan (WMP) and submitted its Motion to Amend its testimony in the pending 2023 General Rate Case (GRC). On the earnings call, management pointed to only "minimal" impact on customer bills during the current GRC period (2023-2026) from starting on the plan to underground 10,000 miles of power lines. The punchline from Friday's submission is a net reduction in the filed revenue requirement for the first 2 years with 2023 down $122M (-0.8%) and 2024 down $34M (-0.2%). The following 2 years see increases of $132M in 2025 (+0.8%) and $312M in 2026 (+1.8%) while for the combined 4-year GRC period PG&E's updated revenue requirement amounts to an increase of $288M (+0.4%).

Figure 1: PG&E 2023 GRC Update Revenue Requirement Change

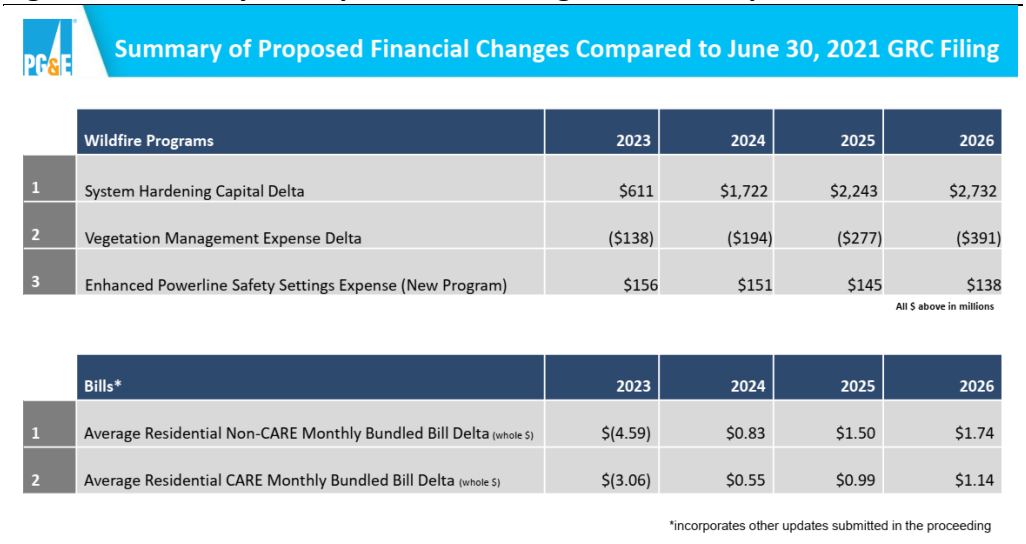
	2023	2024	2025	2026	2023-2026
June 2021 Filing	15,461	16,391	16,981	17,362	66,195
February 2022 Update	15,339	16,357	17,113	17,674	66,483
Net Change ($)	(122)	(34)	132	312	288
Net Change (%)	-0.8%	-0.2%	0.8%	1.8%	0.4%

Source: Company Filing

Lower vegetation management expense, higher undergrounding capital. Some helpful slides were included in ex parte materials submitted to President (Alice) Reynolds' office as well as Commissioner (John) Reynolds. As a side note, the Chief ALJ reassigned the GRC from former President Batjer to Commissioner (John) Reynolds during the week with Reynolds participating in his first CPUC meeting on Thursday. Those following the NEM proceeding will note this should allow for rescheduling of the delayed oral argument, which seems likely to be the next procedural step. Returning to PCG, our Figure 2 shows the major components with incremental system hardening (mostly undergrounding) adding a total of $7.3B to the capital budget over the GRC period. Meanwhile, PG&E proposes reducing its vegetation management expense by $1B over the four years with this saving ramping up to over $390M by 2026. In the intro to their proposed update testimony, PG&E highlight two cost reduction components in the vegetation management plan, namely 1) reducing routine work commensurate with amount of system hardening undergrounding miles completed; and 2) reducing unit costs by around 20% through targeted adjustments that "refine process and improve efficiency". While we have not located this detail, our sense is the 20% target unit cost reduction is likely the bigger piece.

Also requesting roll in of EPSS. PG&E also asks the commission to expand the scope of the GRC to include the Enhanced Powerline Safety Settings (EPSS) program, which like undergrounding was not contemplated at the time of the original filing. This is an important nuance, since the Scoping Memo specifically provided for an update to address undergrounding and we would expect some parties to push back on the request to now include EPSS as well. We believe the filing makes a strong case for a holistic approach and it is clear from the materials that EPSS is a key component of the near-term risk mitigation plan and one the CPUC might want to encourage in view of these numbers. We also understand that the incremental EPSS expense partly relates to adding resources to improve customer communications while reducing the duration of resulting customer outages. Putting this together the estimated impact on residential customer bills would be a reduction of $3-$5/month in 2023 with increases in the $1-$2/month by 2026. We would also note that the slide in Figure 2 mentions that customer bill impacts from the updated filing also incorporate other elements included in PG&E's updated testimony and we have not yet had the opportunity to review these in detail.

Figure 2: Summary of Proposed GRC Changes and Bill Impact



Summary of Proposed Financial Changes Compared to June 30, 2021 GRC Filing

	Wildfire Programs	2023	2024	2025	2026
1	System Hardening Capital Delta	$611	$1,722	$2,243	$2,732
2	Vegetation Management Expense Delta	($138)	($194)	($277)	($391)
3	Enhanced Powerline Safety Settings Expense (New Program)	$156	$151	$145	$138

All $ above in millions

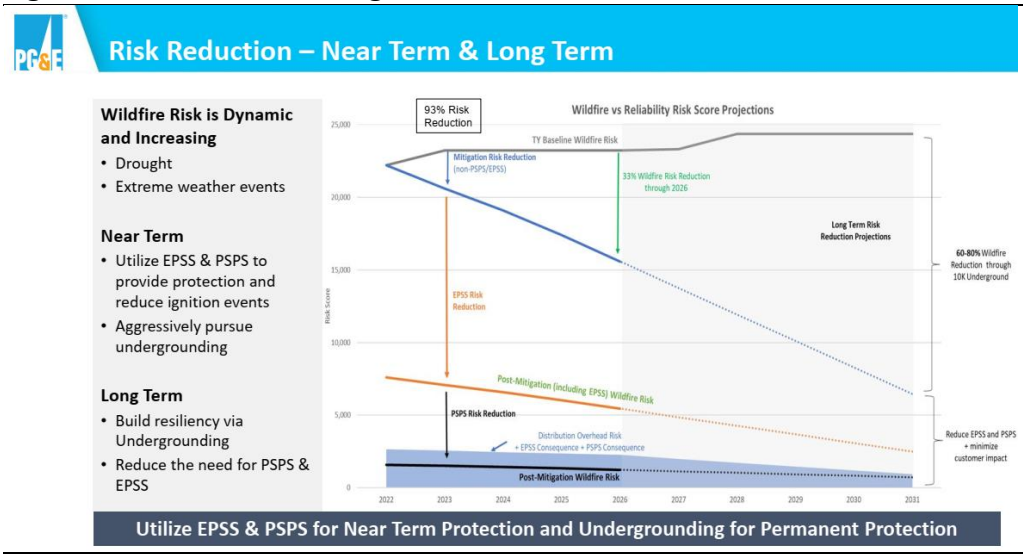
	Bills*	2023	2024	2025	2026
1	Average Residential Non-CARE Monthly Bundled Bill Delta (whole $)	$(4.59)	$0.83	$1.50	$1.74
2	Average Residential CARE Monthly Bundled Bill Delta (whole $)	$(3.06)	$0.55	$0.99	$1.14

*incorporates other updates submitted in the proceeding

Source: Company Filing

From EPSS and PSPS to a more permanent solution. Another slide (Figure 3) showed a view of the risk reduction timeline, illustrating the interplay between the more permanent protection offered by undergrounding and the near term use of programs such as PSPS (Public Safety Power Shut-Offs) and EPSS. As shown in the graphic, PG&E estimate achieving a 93% reduction in wildfire risk score by 2023, with the EPSS program delivering the lion's share of protection, followed by PSPS and only a relatively modest contribution from physical hardening such as undergrounding. As these programs ramp up, the analysis shows hardening eventually delivering 60-80% risk score reduction with the contributions from (and need for) both EPSS and PSPS shrinking over time. For the GRC period (i.e. by 2026) PG&E show undergrounding contributing 33% with proportionate reductions in the need for the other programs.

Figure 3: PG&E Wildfire Programs and Risk Reduction Timeline



Source: Company Filing

EXC and CEG: Friday 10-K learnings

Not much new in EXC filing, results in line. Crossing the tape on Friday were the 10-K filings by **EXC** and **CEG** with neither planning to hold an earnings call. EXC posted operating EPS for 2021 including Constellation of $2.82 versus our same basis $2.80E. Operating earnings for the utilities and parent were $2.08 versus the indicative range of $2.06-$2.14 given in January at the pre-separation Analyst Day. We caught up with IR on Friday afternoon and asked about the $0.02 shortfall versus the midpoint of the January range. This was attributable to two primary factors, the first being higher final stock compensation expense given robust share price performance. In addition, some O&M categories including vegetation management also came in a little higher. Exelon also posted new slides along with their 8-K filing affirming guidance for 2022 ($2.18-$2.32) and highlighting the pro forma (ex-CEG) operating results. There was little new to see in these slides apart from the historical 2021 numbers including operating EPS by utility, each of which were within a penny or two of our model.

CEG posts 2021 GAAP loss. CEG also posted its 2021 10K with a GAAP loss of $205M which we do not view as particularly meaningful. We also recall that the $1.75B cash infusion from EXC at separation did not come through until the separation close in January. CEG also has a new slide deck up for February and March investor meetings but we saw nothing new of substance in there beyond the Analyst Day materials. Hopefully this is a sign that management will be doing the rounds with investors and participating in upcoming conferences since it has now been some time since the January 11 Analyst Day and first quarter earnings are not expected until early April. While we understand the rationale for keeping a relatively low profile while potential federal nuclear subsidies remain under discussion, lackluster stock performance since the separation suggests CEG have some work to do broadening and deepening investor support for what we see as their unique, large-scale clean generation and cash flow story.

NRC reverses Peach Bottom license extensions (and Turkey Point). One new item discussed in the CEG 10-K is the Nuclear Regulatory Commission (NRC) reversing its approvals of second 20-year license extensions for the Peach Bottom nuclear units (jointly owned by EXC and PEG) as well as Turkey Point (FPL/NEE). Peach Bottom 2 and 3 received second 20-year license extensions out to 2053 and 2054 in 2020, but on Thursday the NRC responded to a request for rehearing finding that National Environmental Policy Act (NEPA) reviews were incomplete and did not adequately address environmental impacts including climate change. The NRC directed staff to change the Peach Bottom license expiration dates back to 2033 and 2034 until completion of further NEPA analysis. How this plays out remains unclear, although shortening the licenses, even temporarily, could require re-working depreciation schedules and trigger non-cash charges. In terms of financial reporting, changing depreciation might not be so impactful to **CEG** since their guidance currencies are now EBITDA and cash flow rather than earnings. By contrast, Peach Bottom joint owner **PEG** mostly guides to earnings, as does **NEE,** although all three would see an economic impact from shorter lives. For context, the two Peach Bottom units represent 1,324 MW of net capacity for CEG based on their 50% ownership and this is some 6% of overall CEG nuclear capacity. Rather than the direct implications for Peach Bottom, a greater concern would be if second 20-year license extensions become harder to get since CEG is planning to seek these across its entire fleet. As shown on the Analyst Day, Clinton and Nine Mile Point 1&2 were expecting to start NRC license extension projects this year with Dresden 2&3 and Ginna in 2023 and others from 2026 to 2034. This slide was absent from the deck posted on Friday, but we hesitate to read too much into this since the deck was quite a bit shorter overall. It also seems possible the NRC will simply refine its process and move forward, with plenty of recent evidence that policy support for nuclear as part of the supply mix is on the rise, along with political consensus around prioritizing decarbonization objectives.

Exelon 4Q'21 and 2021 Results

Exelon Corp issued an 8-K that reported stand alone non-GAAP adjusted EPS of $0.42 for 4Q'21 and $2.08 for 2021. GAAP stand alone numbers were $0.36 and $1.95, respectively. This compares to $2.18 consensus; however, we believe consensus may have included some consolidated estimates. Company guidance of stand alone results given at the analyst day in January was $2.06-$2.14.

2022 Guidance Reiterated

In the 8-K filing management also reiterated 2022 Adj. EPS guidance of $2.18-$2.32. A 10-K was also filed but is reflective of pre-spin consolidated results.

Recast of Financials for 2021 - Discontinued Ops Accounting

As Exelon reports results in 2022, the quarterly financials from 2021 will be recast post separation and due to accounting standards related to discontinued operations, the annual non-GAAP adjusted EPS for continuing operations is unlikely to be $2.08 as reported above. Our understanding is the $2.08 is reflective of utility and parent only results using the consolidated accounting standards reflected in the 10-K. That said, guidance for 2022 remains unchanged and compares to consensus estimates of $2.28 and UBSe of $2.21.

Valuation:

We value Exelon at $50/share premised on a 17% premium to the group multiple of 17.9x our $2.37/share earnings forecast for 2023. Our 17% net premium is derived from a 10% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond rounded down to the nearest 5%, a 2% premium for a 2nd quartile regulatory ranking overall, a 5% premium for 1st quartile earnings growth.

Forecast returns

Forecast price appreciation	+17.4%
Forecast dividend yield	3.5%
Forecast stock return	+20.8%
Market return assumption	6.6%
Forecast excess return	+14.3%

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 5 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 4) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 5) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk.

We value Exelon at $50/share premised on a 17% premium to the group multiple of 17.9x our $2.37/share earnings forecast for 2023. Our 17% net premium is derived from a 10% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond rounded down to the nearest 5%, a 2% premium for a 2nd quartile regulatory ranking overall, a 5% premium for 1st quartile earnings growth.

Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 25 February 2022 10:50 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please click https://neo.ubs.com/quantitative, or speak to your UBS sales representative for access to the report.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	55%	32%
Neutral	FSR is between -6% and 6% of the MRA.	35%	29%
Sell	FSR is > 6% below the MRA.	10%	26%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 December 2021.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries,

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 06-May-2022 11:35 AM.

branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice. UBS Evidence Lab may provide services to other internal and external clients.

Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This Document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. This material is intended for professional/institutional clients only and not for distribution

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 06-May-2022 11:35 AM.

to any retail clients. **Malaysia:** This material is authorized to be distributed in Malaysia by UBS Securities Malaysia Sdn. Bhd (Capital Markets Services License No.: CMSL/A0063/2007). This material is intended for professional/institutional clients only and not for distribution to any retail clients. **India:** Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number: INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html **Taiwan:** Except as otherwise specified herein, this material may not be distributed in Taiwan. Information and material on securities/instruments that are traded in a Taiwan organized exchange is deemed to be issued and distributed by UBS Securities Pte. LTD., Taipei Branch, which is licensed and regulated by Taiwan Financial Supervisory Commission. Save for securities/instruments that are traded in a Taiwan organized exchange, this material should not constitute "recommendation" to clients or recipients in Taiwan for the covered companies or any companies mentioned in this document. No portion of the document may be reproduced or quoted by the press or any other person without authorisation from UBS. **Indonesia:** This report is being distributed by PT UBS Sekuritas Indonesia and is delivered by its licensed employee(s), including marketing/sales person, to its client. PT UBS Sekuritas Indonesia, having its registered office at Sequis Tower Level 22 unit 22-1,Jl.Jend. Sudirman, kav.71, SCBD lot 11B, Jakarta 12190, Indonesia, is a subsidiary company of UBS AG and licensed under Capital Market Law no. 8 year 1995, a holder of broker-dealer and underwriter licenses issued by the Capital Market and Financial Institution Supervisory Agency (now Otoritas Jasa Keuangan/OJK). PT UBS Sekuritas Indonesia is also a member of Indonesia Stock Exchange and supervised by Otoritas Jasa Keuangan (OJK). Neither this report nor any copy hereof may be distributed in Indonesia or to any Indonesian citizens except in compliance with applicable Indonesian capital market laws and regulations. This report is not an offer of securities in Indonesia and may not be distributed within the territory of the Republic of Indonesia or to Indonesian citizens in circumstance which constitutes an offering within the meaning of Indonesian capital market laws and regulations.

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 06-May-2022 11:35 AM.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Greece**: UBS AG and its subsidiaries and affiliates (UBS) are premier global financial services firms offering wealth management services to individual, corporate and institutional investors. UBS AG and UBS Switzerland AG are established in Switzerland and operate under Swiss law. UBS operates in over 50 countries and from all major financial centers. UBS is not licensed as a bank or financial institution under Greek legislation and does not provide banking, nor financial services in Greece. Consequently, UBS provides such services from branches outside of Greece, only. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in Greece. Therefore, this document may not be considered as a public offering made or to be made to residents of Greece. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: UBS Securities India Private Ltd. a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt.**Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)

(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

BMO Capital Markets

EXC-NSDQ	Rating	Price: Feb-16	Target ↓	Total Rtn
	Outperform	$42.00	$47.00	15%

Refreshing Stand-Alone Forecast (Again) - Sticking With Outperform on EXC Shares

Bottom Line:

With EXC's corporate separation completed on February 2, we are updating our forecast for the separation and other disclosures. Although we published our EXC-standalone estimates in our January 11 note, with our recent update our 2022-2024 EPS move to $2.25, $2.41, and $2.60, from $2.24, $2.36, and $2.53, respectively. We are also introducing our 2025 estimate of $2.78. Our target price moves to $47 reflect the recent mark-to-market of our peer group multiples. We remain Outperform-rated on EXC given the company's attractive fundamental profile and total return expectation of 15%.

Key Points

EXC completed its separation from Constellation Energy (CEG-NSDQ; $47.20; Outperform) on February 2. With the split and updated pro-forma disclosures earlier this month we refreshed our estimates for standalone EXC and rolled our forecast out to 2025. Our 2021E-2025E EPS are now $2.10, $2.25, $2.41, $2.60, and $2.87, respectively. Our forecast implies ~7.3% EPS CAGR through 2025 supported by the company's $29bn capital program (2022-2025) and rate base growth of 8.1%. Our $47 SOTP target price implies an ~8% premium to the group average electric multiple.

What drives our premium valuation outlook? Although we see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans, **we believe the company's business profile, strong and visible fundamental growth outlook, and supportive regulatory environment positions the company well to drive multiple expansion**. Specifically, we would highlight the following positives: 1) the largest utility by customer with over 10.3mm electric & gas customers; 2) low business risk and ESG-friendly profile given the company's pure T&D business with electric distribution and transmission representing over 95% of rate base; 3) over 75% of the company's revenues are decoupled, which reduces both EPS and cash flow volatility (only PECO and DPL Delaware are not decoupled); 4) solid investment grade ratings at S&P and Moody's (BBB/Baa2, respectively) with 100-200 bps of cushion above its industry-low 12% FFO/Debt downgrade threshold; 5) visible 8%+ rate base growth with only ~50 bps of share dilution though 2025 drives our 7%+ EPS CAGR (2021-2025); and 6) enhanced ESG story and disclosures at its recent Analyst Day in January.

EXC will not hold a 4Q conference call. However, our 4Q21 and full-year estimates remain unchanged at $0.44 and $2.10, respectively. Our bridge for 4Q21 is illustrated in Exhibit 4.

Key Changes

Target	Estimates	Q4 / 21E	2021E	2022E
$47.00↓	EPS	$0.44	$2.10	$2.25
$63.00	*Previous*	*$0.92*	*$2.84*	*$3.32*
	DPS		$1.53	$1.35
	Previous		*$1.23*	*$1.34*
	EBIT		$3,303	$3,679
	Previous		*$4,170*	*$5,198*

Notes : Prior numbers reflect our pre-spin estimates

Our Thesis

We see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans. We believe the company's low-risk T&D business profile, strong and visible fundamental growth outlook and supportive regulatory environment positions the company well to drive multiple expansion.

New Scenarios

Valuation

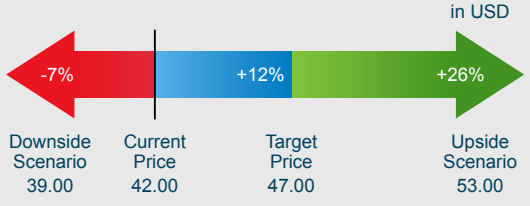
We value EXC on a sum-of-the-parts valuation. Our framework begins with the relevant sector average P/E multiple using 2024E EPS as a base, which we then adjust (premium, discount or no change) to reflect the relative fundamentals for each segment.

Upside Scenario $53.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $39.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.



Key Catalysts

We see EXC management now in execution mode post its separation from Constellation Energy. With nearly 75% of the company's revenues decoupled from volumes and 100% of its capital covered through alternative recovery mechanisms, we see EXC achieving our target price over the next 12-18-month process as management executes against its capital and regulatory plans.

Company Description

Exelon is the largest utility by customer count with over 10mm electric and natural gas customers spread across its six-state footprint. It is the fourth largest utility by rate base with one of the lowest business risk and ESG- friendly profiles given the company's pure T&D asset mix with electric distribution and transmission representing over 85% of rate base.

EXC-NSDQ Research

Glossary

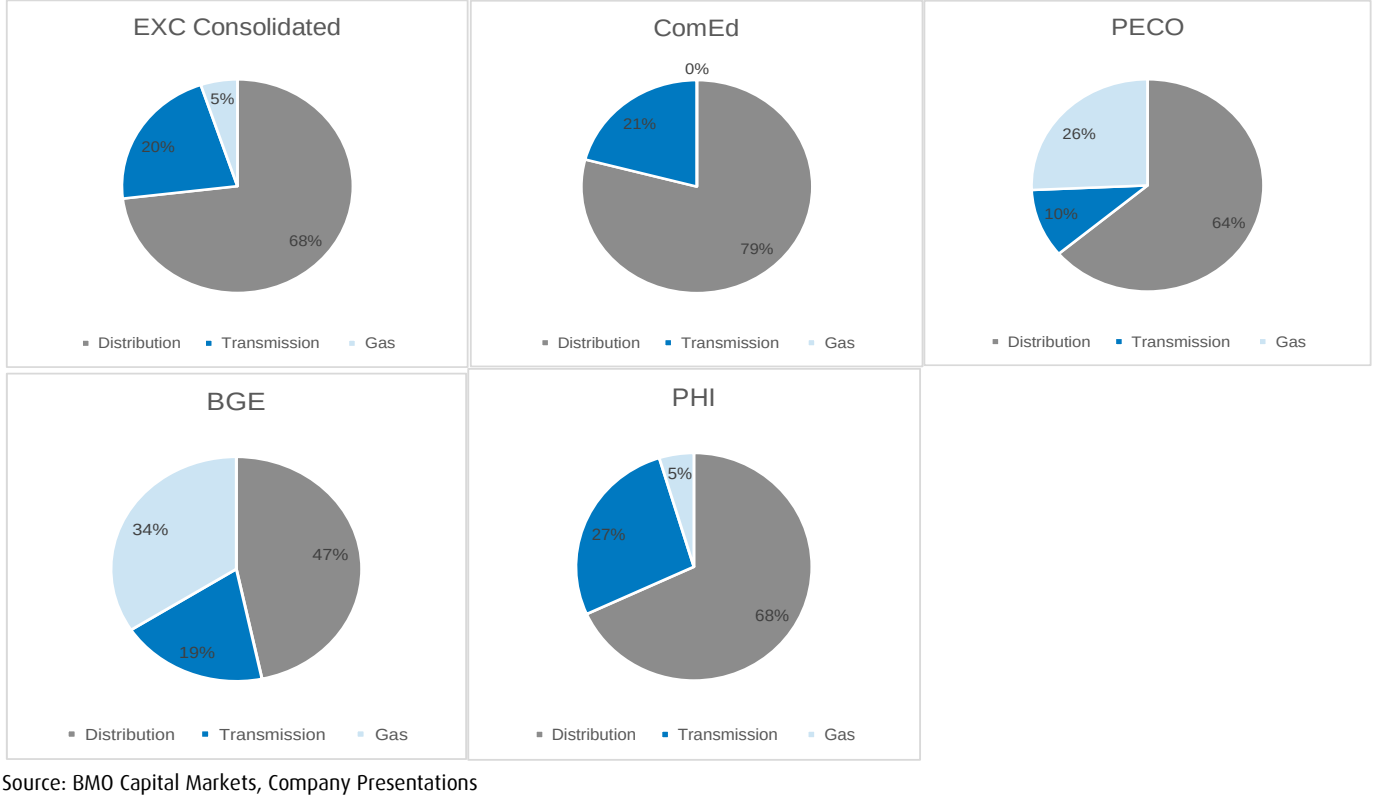
Company Models

Party Time, EXCellent – Sticking With Outperform on EXC Shares

With its corporate separation completed on February 2, we are updating our forecast for the separation and other disclosures. Although we had published our EXC-standalone estimates in our January 10 note, with our recent update our 2022-2024 EPS move to $2.25, $2.41, and $2.60, from $2.24, $2.36, and $2.53, respectively. We are also introducing our 2025 estimate of $2.87. Our five-year (2021-2025) EPS growth rate of 7.3% is just above the midpoint of the company's stated long-term 6-8% EPS growth rate. Assuming ~60% payout ratio, we see EXC's dividend growing at ~6.5% through our forecast suggesting a 3.2% current yield using our 2022E DPS of $1.35.

Our target price moves down modestly to $47, reflecting the recent mark-to-market of our peer group electric (16.6x) and gas (15.2x) multiples implying an 8% premium on a consolidated basis. Consistent with our SOTP framework utilized across our coverage universe we breakout transmission earnings separately and apply a premium multiple to this business segment. This drives our consolidated multiple above the sector average multiples given EXC's 20% exposure to transmission (% of total rate base – Exhibit 1). **We remain Outperform rated on EXC shares given the company's attractive fundamental profile and total return expectation of 15%.**

Exhibit 1: Premium 95% Distribution & Transmission Rate Base Breakdown



Source: BMO Capital Markets, Company Presentations

What drives our premium valuation outlook? Although we see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans, **we believe the company's business profile, strong and visible fundamental growth outlook, and supportive regulatory environment positions the company well to drive multiple expansion**. Specifically we would highlight the following positives: 1) the largest utility by customer with over 10.3 million electric & gas customers; 2) low business risk and ESG-friendly profile given the company's pure T&D profile with electric distribution and transmission representing over 85% of rate base; 3) over 75% of the company revenues are decoupled, which reduces both EPS and cash flow volatility (only PECO an DPL Delaware are not decoupled); 4) solid investment grade ratings at S&P and Moody's (BBB/Baa2, respectively) with 100-200 bps of cushion above its industry-low 12% FFO/Debt downgrade threshold;

5) visible 8%+ rate base growth with only ~50 bps of share dilution though 2025 drives our 7%+ EPS CAGR (2021-2025); and 6) enhanced ESG profile and disclosures at its recent Analyst Day in January.

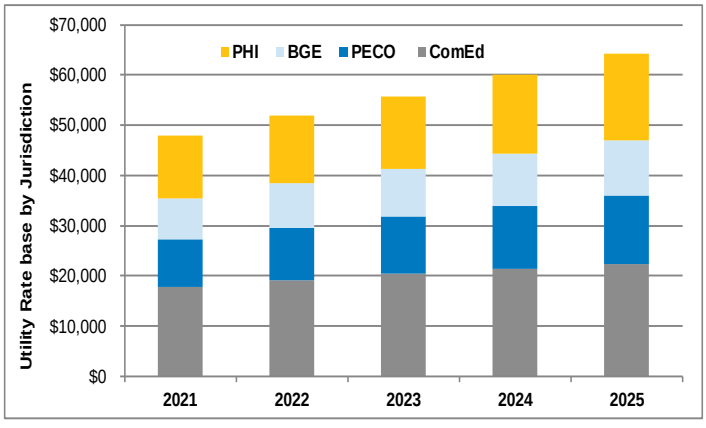
Analyst Day Adds Visibility to Standalone Growth Outlook

Exelon held a pre-spin analyst day in mid-January where it outlined the standalone prospects for its utility-only, Exelon Utilities operations. Although the profile of the regulated remainco did not change materially, the company did provide positive updates across several fronts including added visibility to its growth outlook, external financing plan as well as stand-alone dividend plan through 2025.

On the earnings front, management reaffirmed its 2021 UP&O equivalent range at $2.06-2.14/share and initiated its 2022 outlook at $2.18-2.32, suggesting a 7% growth midpoint over midpoint. Driven by continued regulate investment, PECO's electric and gas GRC's, lower depreciation and amortization, and modest dilution, the midpoint of this range was roughly 5c higher than our initial $2.20/share estimate for 2022. The company's 2022 forecast assumes non-corporate O&M is up $150 million year over year and management stated its confidence in being able to mitigate any dis-synergies associated with the corporate separation. The company's regulated-only, long-term growth rate remained in line with its previous 6-8% regulated utility growth using its 2021 range as the new base for this updated five-year outlook. Management reiterated its confidence in its ability to achieve its growth outlook including a stress test of the various earned return scenarios at both ComEd and PECO. As the recent IL legislation impacting ComEd's allowed ROE methodology does not affect earnings until 2024, the company embeds a current 30-year treasury curve (~1.94%) in its longer-term outlook, which is consistent with our current forecast. We conservatively have not assumed a step up in the ROE at ComEd in 2024 as we await clarity pending the ICC establishing its revised regulatory framework over the next 12 months.

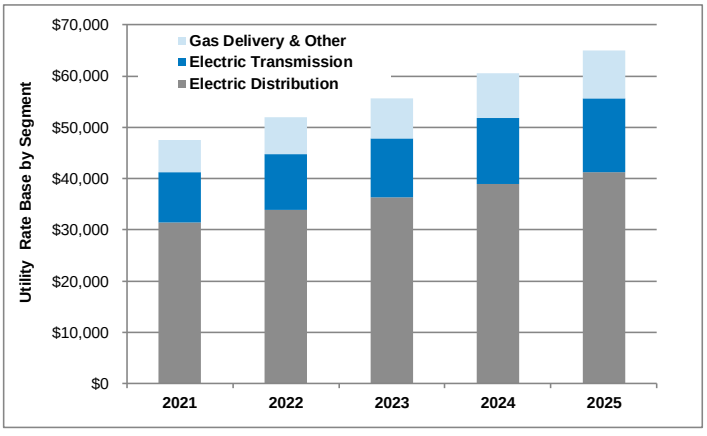
With the recent Analyst Day update and what will now be a normal 4Q event, Exelon updated its five-year capital program (now 2022-2025), with the total spending outlook increasing to $29 billion or ~7-8% higher over its previous five-year outlook (2021-2024). This higher level of spending, which includes a ~5% step up on an annualized basis in 2024 and 2025 compared to our previous estimates, helps drive a modest increase in expected rate base growth to 8.1% from 7.6% previously through 2025 (Exhibits 2 and 3). The additional $350-400 million of spending is expected to receive contemporaneous recovery through multi-year rate plans across various jurisdictions and represents capital opportunities tied to accelerated electrification, cybersecurity, and continued resiliency programs. As nearly 98% of its capital spending has alternative cost recovery mechanisms and its regulated utility portfolio is 76% decoupled by volume investors should have good visibility into the company's growth over the forecast period. Through cost control and a focus on continuous improvement, EXC expects to focus on keeping its customer rates competitive and its current $29 billion capital plan can be executed with rate impacts at or below inflation.

Exhibit 2: Rate Base by Major Jurisdiction



Source: BMO Capital Markets, Company Presentations

Exhibit 3: Rate Base by Major Function



Source: BMO Capital Markets, Company Presentations

On the financing side, management continues to see ~$1 billion of external equity through 2025, which we see as manageable both in terms of dilution and capital markets access at roughly 0.5-0.6% annually relative to its current market cap of ~$41 billion. This commitment to balance sheet strength will maintain its credit metrics in the 13-14% FFO/Debt level on average over the 2022-2024 time frame and leave the company with plenty of financial flexibility above its 12% downgrade threshold.

With the separation, EXC's stand-alone 2022 dividend was established at $1.35/share representing a 60% payout of operating earnings. When adding this dividend to that established by Constellation Energy (CEG-NSDQ; $47.20; Outperform), roughly 18c on an EXC-equivalent basis, EXC shareholders were made whole relative to our previous forecast consolidated dividend for EXC of $1.53. With only modest equity needs and starting out at sector-low payout objective of 60%, EXC expects dividend growth in line with its operating EPS growth or 6-8% through 2025. Based on this initial dividend level and the stock's current price, we see a dividend yield in the 3.2% range, which is on par or just slightly below the sector average of 3.3%.

Although we had already published our initial standalone EXC estimates with the company's January Analyst Day, we have updated our model and are revising our 2022-2024 estimates and introducing our 2025 outlook. Our estimates have moved up modestly to reflect both the slightly lower equity needs through 2024 and higher capex in 2023 and 2024. Our 2021E-24E standalone EXC EPS forecast are $2.10, $2.25, $2.41, and $2.60, respectively. We are also introducing our 2025 estimate of $2.78.

With an achievable growth outlook in line with the sector's high multiple peers, geographic diverse footprint, pure T&D business model, and a pro-forma potential market cap of at least $41 billion, we believe Exelon Utilities has the potential to be one of the go-to names in the sector post separation. Our standalone target price moves down to $47 from $48/share in our previous consolidated SOTP framework reflecting the lower MTM sector multiples for both electric and gas 2024E EPS used in our SOTP valuation framework (Exhibit 7).

Given the timing of the company's analyst day and the reaffirmation of its 2021 outlook, EXC will not hold its normal 4Q conference call. However, our 4Q21 and full-year estimates remain unchanged at $0.44 and $2.10, respectively. Our bridge for 4Q21 vs. 4Q20 is illustrated in Exhibit 4 below.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in Exelon in United States.

Methodology and Risks to Target Price/Valuation for Constellation Energy Corporation (CEG-NSDQ)

Methodology: Our target price is derived from a blend of both EV/EBITDA and FCFY valuations, consistent with our valuation applied to the other companies in our coverage universe within the IPC and diversified utility segments.

Risks: Constellation's wholesale and retail businesses are subject to commodity price risk including power, natural gas and uranium, as well as counterparty non-performance. The company faces other business risks including regulatory, nuclear operational risk, cyber threats and capital market volatility.

Methodology and Risks to Target Price/Valuation for Exelon (EXC-NSDQ)

Methodology: We value EXC using our sum-of-the-parts valuation analysis to derive our target price. Our valuation takes into account the quality of EXC generation assets relative to its peers and the company's regulated business rate base growth and funding sources.

Risks: Failure to pass a version of the "Clean Energy Jobs Act" in the upcoming legislative session that sufficiently expands financial support for EXC Gen's nuclear plants would cause us to re-evaluate our rating, all else equal. The Governor's opposition to the existing Formulaic Based Rate Plan in IL may result in a new set of regulations that could be adverse to the company's ComEd Utility. Nuclear operations are subject to additional safety and regulatory oversight.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited is exempt from the requirement to hold an Australian financial services licence under the Corporations Act and is regulated by the UK Financial Conduct Authority under UK laws, which differ from Australian laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001) and Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, Bank of Montreal is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). The materials on this website have not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly the materials must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 15 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

Utilities

Industry
Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

No utility was trading below our fair value estimate mid-last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should graudally increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity

prices that have dragged down returns recently.

- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Exelon Corp EXC ★★ 29 Jun 2022 21:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
44.34 USD 29 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.08	43.01 USD Bil 28 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed

Exelon Corp EXC ★★ 29 Jun 2022 21:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
44.34 USD 29 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.08	43.01 USD Bil 28 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think Exelon's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes Archive

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Andrew Bischof, CFA, CPA, Senior Equity Analyst, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Exelon Corp EXC ★★ 29 Jun 2022 21:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
44.34 USD 29 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.08	43.01 USD Bil 28 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected Andrew Bischof, CFA, CPA, Senior Equity Analyst, 6 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to

Exelon Corp EXC ★★ 29 Jun 2022 21:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
44.34 USD 29 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.08	43.01 USD Bil 28 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results

Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices Andrew Bischof, CFA, CPA,

Exelon Corp EXC ★★ 29 Jun 2022 21:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
44.34 USD 29 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.08	43.01 USD Bil 28 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

Senior Equity Analyst, 9 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate Andrew Bischof, CFA, CPA, Senior Equity Analyst, 2 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share

Exelon Corp EXC ★★ 29 Jun 2022 21:17, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
44.34 USD 29 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.08	43.01 USD Bil 28 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

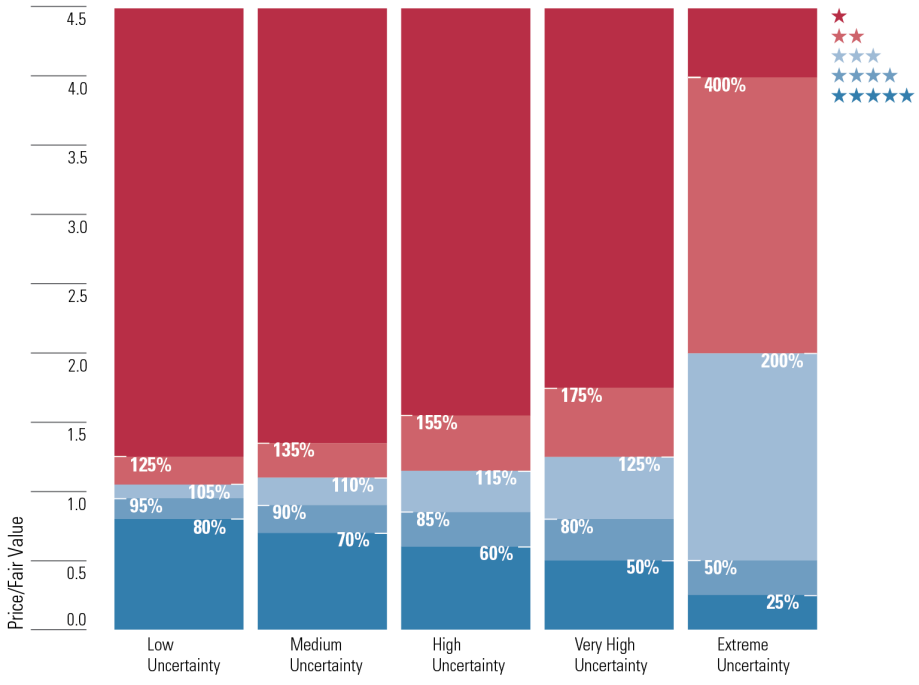
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Morningstar Equity Research Star Rating Methodology



Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Research Methodology for Valuing Companies

- Morningstar, Inc. may hold a long position in the security subject of this investment research report that exceeds 0.5% of the total issued share capital of the security. To determine if such is the case, please click http://msi.morningstar.com and http://mdi.morningstar.com.
- Analysts' compensation is derived from Morningstar, Inc.'s overall earnings and consists of salary, bonus and in some cases restricted stock.
- Neither Morningstar, Inc. or the Equity Research Group receives commissions for providing research nor do they charge companies to be rated.
- Neither Morningstar, Inc. or the Equity Research Group is a market maker or a liquidity provider of the security noted within this report.
- Neither Morningstar, Inc. or the Equity Research Group has been a lead manager or co-lead manager over the previous 12-months of any publicly disclosed offer of financial instruments of the issuer.
- Morningstar, Inc.'s investment management group does have arrangements with financial institutions to provide portfolio management/investment advice some of which an analyst may issue investment research reports on. However, analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them.
- Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a financial institution the security of which is the subject of this report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s proxy statement, "Security Ownership of Certain Beneficial Owners and Management" section https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx
- Morningstar, Inc. may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Further information on Morningstar, Inc.'s conflict of interest policies is available from https://shareholders.morningstar.com. Also, please note analysts are subject to the CFA Institute's Code of Ethics and Standards of Professional Conduct.

For a list of securities which the Equity Research Group currently covers and provides written analysis on please contact your local Morningstar office. In addition, for historical analysis of securities covered, including their fair value estimate, please contact your local office.

For Recipients in Australia: This Report has been issued and distributed in Australia by Morningstar Australasia Pty Ltd (ABN: 95 090 665 544; ASFL: 240892). Morningstar Australasia Pty Ltd is the provider of the general advice ('the Service') and takes responsibility for the production of this report. The Service is provided through the research of investment products.

To the extent the Report contains general advice it has been prepared without reference to an investor's objectives, financial situation or needs. Investors should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. Refer to our Financial Services Guide (FSG) for more information at http://www.morningstar.com.au/fsg.pdf.

For Recipients in Hong Kong: The Report is distributed by Morningstar Investment Management Asia Limited, which is regulated by the Hong Kong Securities and Futures Commission to provide services to professional investors only. Neither Morningstar Investment Management Asia Limited, nor its representatives, are acting or will be deemed to be acting as an investment professional to any recipients of this information unless expressly agreed to by Morningstar Investment Management Asia Limited. For enquiries regarding this research, please contact a Morningstar Investment Management Asia Limited Licensed Representative at https://shareholders.morningstar.com.

For recipients in India: This Investment Research is issued by Morningstar Investment Adviser India Private Limited. Morningstar Investment Adviser India Private Limited is registered with the Securities and Exchange Board of India (Registration number INA000001357) and provides investment advice and research. Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Investment Management LLC. In India, Morningstar Investment Adviser India Private Limited has one associate, Morningstar India Private Limited, which provides data related services, financial data analysis and software development. The Research Analyst has not served as an officer, director or employee of the fund company within the last 12 months, nor has it or its associates engaged in market making activity for the fund company.

*The Conflicts of Interest disclosure above also applies to relatives and associates of Manager Research Analysts in India # The Conflicts of Interest disclosure above also applies to associates of Manager Research Analysts in India. The terms and conditions on which Morningstar Investment Adviser India Private Limited offers Investment Research to clients, varies from client to client, and are detailed in the respective client agreement.

For recipients in Japan: The Report is distributed by Ibbotson Associates Japan, Inc., which is regulated by Financial Services Agency. Neither Ibbotson Associates Japan, Inc., nor its representatives, are acting or will be deemed to be acting as an investment professional to any recipients of this information.

For recipients in Singapore: For Institutional Investor audiences only. Recipients of this report should contact their financial professional in Singapore in relation to this report. Morningstar, Inc., and its affiliates, relies on certain exemptions (Financial Advisers Regulations, Section 32B and 32C) to provide its investment research to recipients in Singapore.

Alert

June 27, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: POR, CMS, ES, EXC, WEC, AEE, SO, AGR, AEP

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We are hosting POR for a series of meetings in NY and the mid-Atlantic on Tuesday and Wednesday. In the current week, we are tracking regulatory proceedings in ES's NSTAR electric GRC, ComEd's FRP in IL, Delmarva's DE gas rate case, and AEP's TN Kingsport rate case. Reply comments in the NEM 3.0 proceedings are also due this week. In other news, GP files a rate case, MI PSC approves CMS's IRP settlement, WEC delays the closure of certain coal units, AEE MO releases an updated IRP, Vogtle cost recovery conflicts emerge as the project nears completion, ME PUC approves CMP's request for an upgrade to a transmission line, and AEP petitions for a rehearing in a recently concluded AR rate case.

ICYMI

AGR, WEC — A recent sector pullback has created a number of relative valuation dislocations that we believe will be short-lived. We view AGR and WEC as two such dislocations. As such, we downgraded AGR from Sector Weight to Underweight with a $40 downside price target and upgraded WEC from Sector Weight to Overweight with a $104 price target. Our detailed notes on both are available here (AGR) and here (WEC).

ETR — Last week, ETR MS and SERI filed a settlement with FERC that will resolve all outstanding proceedings. As a result of the settlement, ETR will be recording a pre-tax regulatory charge of ~$551M in 2Q22, which includes $253M for the MS settlement and the additional $353M for a potential settlement with AR, LA, and New Orleans (which have yet to sign on to the settlement). We wrote about the settlement here.

Upcoming Calendar Events

POR — We are hosting **POR**'s senior management for a series of in-person meetings in NYC tomorrow, June 28. Please contact your sales representative or us to schedule a meeting. Our recent research on POR is available here and here.

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

ES — Evidentiary hearings in the NSTAR Electric rate case in MA are scheduled to begin on June 27: A final order is expected at the end of 2022 with rates going into effect in 2023. ES has a history of constructive outcomes in MA (EGMA has an eight-year rate plan and NSTAR Gas has a multiyear rate plan in place) and a settlement may still be in the offing. In rebuttal testimony, ES reiterated its request for a 10.25-10.75% range for ROE as appropriate while pointing out that the AG's recommendation of an 8.95% ROE ignores the current market environment of record-high inflation and rising rates, especially in light of NSTAR's proposal for a rate stay out and extending the existing PBR for 10 years. A low ROE would hurt the Company's ability to recover future increases in capital costs over the stay-out period. ES also rebutted the AG's stand that a PBR reduces NSTAR's risk relative to other utilities, and therefore a lower ROE is warranted. ES contends that the analysis is flawed in that the peer group also enjoys PBR-type mechanisms and further discount applied to the comparable rate structure would be unwarranted. ES is seeking a revised $87.6M rate increase phased in over two years—2023 and 2024. ES is also seeking changes to the storm fund construct, increasing the threshold for qualifying storm events and an increase in the annual storm fund contribution included in base rates. ES is requesting a continuation of the revenue decoupling mechanism. The last NSTAR electric rate case was decided in 2017 at a 10% ROE (Docket: MA DPU 22-22).

EXC — Staff and Intervenor Testimony in the ComEd formula rate plan filing is scheduled for June 29: ComEd's formula rate plan proposal for a $199M revenue increase is premised on a 7.85% ROE, 49.45% equity, and a rate base of ~$14B. The calculation of the ROE in the FRP is formulaic and set by the FRP statute. ComEd's previous rate plan was approved at a 7.36% ROE in 2021. A final decision is expected toward the end of the year with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL. At present, EXC is engaged with stakeholders and the ICC to finalize the performance metrics that will make it into the final PBR framework. A final outcome on that is expected in 3Q, at which point ComEd will decide on whether to file a four-year rate plan in 2023 or a traditional future test year plan. A filing is expected in early 2023.

SRE, EIX, RUN, NOVA — Reply comments in NEM 3.0 are due on July 1: Reply comments in the delayed NEM 3.0 proceedings are scheduled to be submitted this week. In comments submitted earlier, SEIA opined that the CPUC should adopt the proposed glide path for transitioning from the current NEM framework to NEM 3.0 that starts with an export compensation rate steeply discounted from the applicable retail rates, but then would be lowered until an export rate based on the ACC is reached. If the commission does not adopt the glide path, then it should choose the ACC Plus mechanism over the Market Transition Credit (MTC). SEIA also thinks the commission should reject the assessment of non-bypassable charges on BTM consumption and should create a new track of the proceeding to determine "how the elements of the general market net billing tariff need to be altered, and the extent of the needed changes, to serve as a basis for creating a viable community solar program." Sierra Club's comments supported a glide path with a gradual capacity-based step-down from reductions in retail rate to avoided cost. Like SEIA, Sierra Club expressed a preference for an ACC plus approach vs. MTC since it could be designed to mirror a glide path-based approach. CA utilities provided joint comments stating that transition credits were not necessary, but if they were to be implemented, then they favor the MTC over the ACC plus approach arguing that an MTC approach is more conducive to encouraging the use of storage while an ACC plus mechanism increases the value of exports and would discourage paired storage installs. See our notes on the NEM proceedings here, here, and here.

EXC — Staff/Intervenor Testimony in Delmarva's DE Gas rate case is scheduled for July 1: EXC is seeking a $20.3M rate increase based on a 10.3% ROE and 50.63% equity. The increase includes $5.8M for the distribution system improvement charge, or DSIC, making the net increase requested $14.5M. EXC is seeking rates to be effective August 14, based on a 2021 test year. The previous gas rate case concluded in 2021 and authorized a rate increase of $6.7M increase based on a 9.6% ROE and 50.37% equity layer.

AEP — Rates in the Kingsport Power rate case in TN scheduled to become effective July 1: A delay may be in the offing since a hearing scheduled for June 20 was canceled with no follow-up date issued. AEP is requesting a $14.4M rate increase. After the transfer to base rates of ~$7.5M (collected through the Targeted Reliability Plan and Major Storm Rider), the net impact would be an overall rate increase of ~$7M. The rate filing is premised on a 10.2% ROE and 48.9% equity. The previous Kingsport case was authorized in 2016 at a 9.85% ROE and 40.25% equity. In intervenor testimony, TN AG is recommending a $3.2M rate increase on a 7.35% ROE. The intervenor did not deviate from AEP's requested equity layer of 48.9%. The delta between AEP's filing and the intervenor testimony appears to be a combination of a lower suggested ROE, lower rate base, and differences in the adjustments to operating income.

Recent Developments for Companies Under Our Coverage

From our midweek: U.S. solar developers form a consortium to support the domestic expansion of the solar supply chain; House includes funding for Biden's solar DPA in the fiscal 2023 Energy-Water spending bill; PJM auction for 2023-2024 delivery year yields a $34.13/MWd clearing price; all CEG capacity in PJM clears the auction; NY announces bill credit program to assist low-income households with utility bills unpaid since COVID; ETR TX prepares to file a new GRC; SIP signs another HOA for Gulf Coast LNG; NC Supreme Court rules to allow rooftop solar panels on the front of houses; PUCO is investigating AEP's power shut-offs during recent storms; and SC passes a bill allowing securitization of storm costs.

CMS — MI Commission approves IRP settlement agreement: MPSC approved the settlement agreement in the IRP. As part of the settlement, CMS will retire all coal generation by 2025, and collect the unrecovered book value of Campbell units 1-3 through the design life of the units (2031 for units 1-2 and 2039 for unit 3). CMS will earn a 9% ROE on the retired assets. As proposed, CMS will buy the Covert gas plant for $815M in 2023. Peakers Karn 3 and 4 (1.2 GW) will be retired in 2031, allowing sufficient lead time to procure replacement generation. The plan also includes adding ~8 GW of solar generation and 550 MW of energy storage by 2040. The settlement includes cost recovery for the coal units. Instead of acquiring assets from Enterprise, as CMS had originally proposed, the settlement calls for the Company to conduct an RFP for PPAs of up to 700 MW of MI-based capacity starting in 2025. Enterprise's DIG can participate in 500 MW of that RFP and intends to do so. For now, CMS has a $14.3B five-year capex plan; we expect a refresh later this year as the impact of the IRP is incorporated. Management has reiterated that it does not plan to issue equity through 2025.

SO — GP files a three-year GRC: GP is requesting a $1B revenue increase spread over three years—$852M in 2023 followed by $107M in 2024 and $45M in 2025. The request is based on an 11% ROE and 56% equity. Base rates exclude any cost recovery for Vogtle Units 3 and 4, which will be added at a later time following a prudence review once the units reach COD. SO is seeking a continuation of the Alternate Rate Plan that has been in place since 1995. GP received a constructive outcome in the past rate case, receiving ~97% of its cumulative ask ($909M vs. $942M), based on a 10.5% ROE and 56% equity layer. GP is seeking a continuation of earnings to be evaluated against a dead band of 9.5-12% with 80% of the earnings above the 12% ROE being shared with GP ratepayers and the remaining 20% being retained by the utility. GP is also seeking to continue to option to file for interim cost recovery if earnings fall below the low end of the dead band.

Figure 1 - Proposed Levelized Rate Increase

Effective Date ($M)	1-Jan-23	1-Jan-24	1-Jan-25
Traditional Base	739		
Environmental Compliance Cost Recovery (ECCR)	63	78	47
Demand Side Management (DSM)	30	27	(2)
Municipal Franchise Fee (MFF)	20	2	1
Total	**852**	**107**	**46**

Figure 2 - Drivers for the Revenue Increase

Components of Revenue Increase ($M)	
T&D Reliability & Resiliency	476
Fleet Transition	249
Environmental Compliance CCR ARO	189
Non availability of the TCJA benefits	220
Non Fuel O&M Savings	(163)
Other	33
Total 2023-2025 Revenue Requirement	**1,004**

Source: GA PSC filings, KeyBanc Capital Markets Inc.

WEC — WEC delays the closure of coal units: WEC announced that it is delaying the closure of four coal units at Oak Creek. The retirement of Units 5 and 6 will be delayed by a year to May 2024 and that of Units 7 and 8 will be delayed by 18 months to late 2025. With this announcement, WEC is extending the availability of 1,100 MW of resources to tide over the tight supply-demand balance at MISO (as highlighted by the recent capacity auction—see our note here) and the potential delay in COD for renewables caused by supply chain disruptions and by the impact of the AD/CVD tariff investigations. We expect that the units will be used as peakers and thus should not change the emissions control targets set by WEC. NiSource recently announced an intent to delay closing specific coal units for similar reasons.

AEE — AEE MO releases an updated IRP: AEE MO released an updated 20-year IRP to accommodate the earlier retirement of Rush Island, among other changes. In the new draft, Rush Island is projected to close in 2025, subject to court rulings and MISO's system reliability assessment. As part of the new plan, AEE will add 2.8 GW of wind + solar by 2030, 400 MW higher than the prior plan. For the 2031-2040 period, it plans to add 1.9 GW of wind + solar and 800 MW of energy storage (the prior plan included 2.3 GW of wind + solar from 2031-2040). Also included in the plan now is a new 1.2 GW Gas/Hydrogen Combined Cycle plant scheduled to be in service in 2031. With respect to retirements, AEE plans to extend the retirement of the 972 MW Sioux Energy Center to 2030 (from 2028), retire a 494 MW fossil unit in 2029, and keep the Callaway nuclear (1,193 MW) retirement at 2045. A combination of the updated IRP and the impending MISO transmission project allocations all point to a likely upgrade in the capital plans.

SO — Vogtle cost recovery conflicts emerge as the project nears completion: Last week, Oglethorpe, the second largest owner in Vogtle (after GP) said that it was freezing its participation in the project (in accordance with a 2018 owners agreement, which allows it to do so). Oglethorpe and the Municipal Authority of GA (the third largest owner) are asking a court to determine whether a threshold allowing the partners to force the 2018 owners agreement has been reached. In 2018 the four co-owners of Vogtle 3 and 4 jointly agreed to a co-owner cost-sharing agreement to meet future potential cost increases. As part of that agreement, if the total sharable cost of the project increased by $2.1B from the time of the agreement, each co-owner, excluding GP, would have a one-time option to freeze its capex in the project. Since the project cost has increased by $3.4B since the signing of the cost-sharing agreement, Oglethorpe decided to exercise its option. GP contends that Oglethorpe's exercise of the option to freeze capex is not valid and that some additional costs are the result of an unforeseen event (i.e., the pandemic) and should not be included in calculating the cap that triggers the option to freeze (see more about the Oglethorpe decision in our weekly here).

AGR — ME PUC approves upgrade to transmission line: ME PUC issued an order approving $64M in upgrades to a 115 kV, 23-mile transmission line—an approval that CMP had been seeking since 2008. CMP will share the cost of the expansion with ISO-NE with CMP ratepayers' share being ~9%. In 2020, CMP made an official filing to the commission noting that the rebuild could not be deferred any longer as consistent power overloads proved the need to rebuild.

AEP — SWEPCO AR seeks rehearing of PSC order: SWEPCO filed a petition seeking a rehearing of the electric GRC order. Specifically, SWEPCO is seeking a review of the 45% equity layer that the Commission ordered (vs. AEP's request of 52%) since it inhibits the Company from earning a reasonable return. SWEPCO argues that due to its multi-jurisdictional nature, it cannot match the higher approved capital structures in LA and TX, which immediately puts it in an underearning position. As a reminder, SWEPCO filed the GRC in July 2021, requesting a revenue increase of ~$85M, based on a 10.35% ROE, and was granted a ~$39M revenue increase, based on a 9.5% ROE.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: NEE, ES, ETR, EXC, AEE, SO, ED, AGR, CMS, AVA, EIX, SRE, FE, XEL, DUK, FERC, PJM

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Last week, we hosted meetings with ES, and NEE/NEP and ETR held analyst days in NYC. The UFLPA goes into effect this week and on our regulatory calendar we are tracking proceedings in EXC's PECO gas rate case, AEE's IL FRP, ES's NSTAR electric rate case, and an impending GP rate case. In other news, the UTY declined 900 bps last week, in tandem with the market, and forward PE for our large-cap group declined by 2x as investors weigh the likelihood of a recession; FERC and PJM propose reforms to the interconnection review process to address backlog; FERC initiates rulemaking to improve grid reliability in times of extreme weather; ED hires an advisor to initiate the sale of its renewable portfolio; a partner in Vogtle decides to freeze its capital commitment, leading GP to likely bear the difference; a ME House member focuses on efforts to municipalize state utilities; Staff files testimony in XEL's CO gas rate case; ED files rebuttal testimony and proposes settlement proceedings; GA PSC Staff present testimony in SO's VCM 26; CMS reaches settlement in natural gas GRC; AVA reaches settlement in WA multi-year GRC; the CPUC imposes fines on CA utilities for violations of PSPS tools during the 2020 wildfire season; NY PSC imposes fines on AGR for failing to meet reliability targets in 2021; the WA UTC approves AVA's Clean Energy Implementation Plan; AEE MO files a 60-day notice to file a new rate case; NEE and DUK file 10-year storm protection plans in FL; NEE makes a water acquisition in PA; and the PA PUC releases the results of its audit of FE's PA subs to the public.

ICYMI

Electric Utilities Industry Primer — We published our electric utility industry primer — a useful guide for seasoned investors and those new to the industry. See the primer here.

NEE — We attended NEE and NEP's analyst day last week. See our key takeaways on both companies here and here.

ES — We hosted ES management for a series of meetings and published our key takeaways here.

ETR — ETR also hosted an analyst day last week. See our note here.

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

Uyghur Forced Labor Prevention Act goes into effect on June 21: The U.S. CBP will start enforcing the UFLPA on June 21. See our Solar Coaster note in which we discuss the law in detail. The industry has had a headstart in preparing for the implementation of the law but the specific implementation strategy and the list of entities being targeted by the DHS will be provided on the day the law goes into effect — likely causing some short-term uncertainty. Solar industry groups have worked to move the supply chains out of Xinjiang and have implemented traceability protocol to avoid disruptions. According to industry research, Xinjiang produces close to 50% of the global supply of polysilicon.

The law makes a presumption that any goods that were produced even in part in the Xinjiang region will be prohibited in the country (no minimum percentages and no *de minimis* thresholds) unless importers can prove effectively otherwise through a well-documented paper trail. In an Operational Guidance document, the CBP provides some information on the documentation that will be sought - highlighting that imports from factories that source polysilicon from within Xinjiang or outside risk being subject to detention as it may be difficult to verify that the supply chain is clean of forced labor.

Intervenor Testimony in PECO's PA gas rate case is scheduled for June 22: PECO is seeking an $82M rate increase on a 10.95% ROE, 53.41% equity, and a rate base of $2.9B. The rate increase intends to cover gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at 10.24% ROE in mid-2021. A final decision is expected by the end of 2022 with new rates effective in January 2023.

Staff and Intervenor Testimony in AEE's IL FRP is scheduled for June 23: AEE IL recently filed an annual formula rate plan seeking an $85M rate increase on a 7.85% ROE, 53.99% equity, and a rate base of $3.9B. ComEd's previous rate plan was approved at 7.36% ROE in 2021. A final decision is expected by the end of 2022, with new rates effective in January 2023. This may be AEE's last FRR filing in IL with the next rate review likely being an MYRP until the IL Energy Transition Law. The ICC is expected to approve PBR to be used under the new framework this Fall.

Georgia Power's GRC is expected to be filed on June 24: SO's Georgia Power is expected to file a rate case this week, which we expect will be a multi-year rate case per usual. SO's last rate case was settled on time at very constructive terms including a 10.5% ROE and 56% equity layer. GP's earnings are currently evaluated against a dead band of 9.5-12% with earnings above 12% split between reduction of reg assets, customer refunds, and 20% remaining with the Company. The 2022 rate filing will likely include provisions for additional coal retirements and potential Vogtle cost recovery.

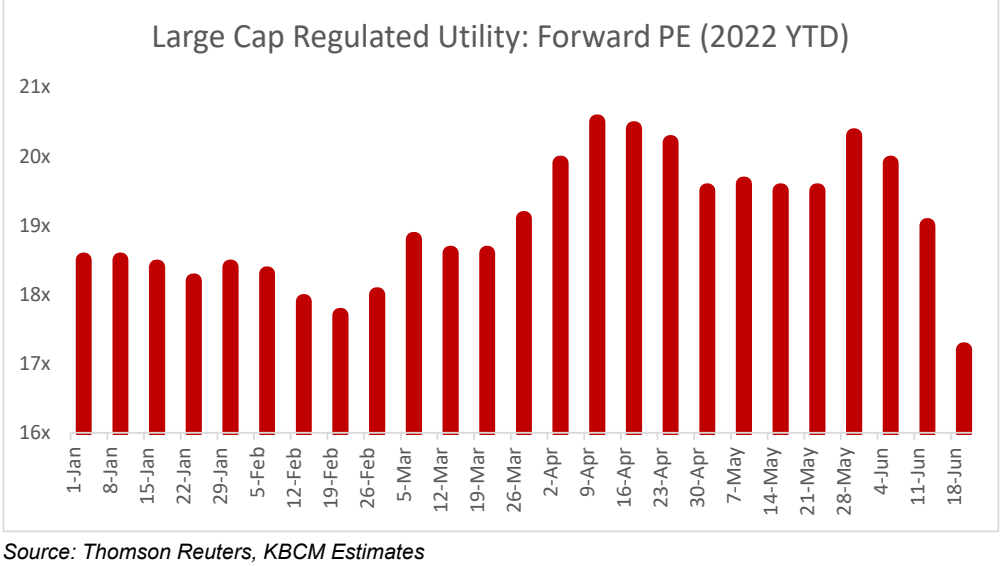
Intervenors' Surrebuttal Testimony in NSTAR Electric's rate case is scheduled for June 24: In rebuttal testimony, ES reiterated its request for a 10.25-10.75% range for ROE as appropriate while pointing out that the AG's recommendation of an 8.95% ROE ignores the current market environment of record high inflation and rising rates, especially in light of NSTAR's proposal for a rate stay out and extending the existing PBR for 10 years. A low ROE, in that case, would hurt the Company's ability to recover future increases in capital costs over the stay-out period. ES also rebutted the AG's stand that a PBR reduces NSTAR's risk relative to other utilities, and therefore a lower ROE is warranted. ES contends that the analysis is flawed in that the peer group also enjoys PBR-type mechanisms and further discount applied to the comparable rate structure would be unwarranted. ES is seeking a revised $87.6M rate increase phased in over two years—2023 and 2024. ES is also seeking changes to the storm fund construct, increasing the threshold for qualifying storm events and an increase in the annual storm fund contribution included in base rates. ES is also requesting a continuation of the revenue decoupling mechanism. The last NSTAR electric rate case was decided in 2017 at a 10% ROE (Docket: MA DPU 22-22).

Recent Developments for Companies Under Our Coverage

From our midweek: APS delayed the timing of the filing of the 2022 GRC; SO and interveners reach a settlement in the GA IRP docket; PUC members raise concerns about the cost of coal retirements; above-average precipitation causes NWE to manage water flows at Hebgen dams; storms cause power outages in the Midwest and OH valley, and Doral Renewables closes construction project financing for Phase 1 (AEP has a long-term PPA for the project).

Throwing in the towel? The Philadelphia Utility Index UTY was down 900 bps in the past week and large-cap regulated PE ('23E) was down 2-17x and has now fallen 4.5x since the peak in early April. The Federal Reserve's decision to hike the Fed Funds Rate by 75 bps likely cemented recession fears in the minds of several, prompting the sell-off. The relative outperformance of the UTY vs. the SPX has remained largely unchanged at 10 percentage points. The utility multiple compression does not come as a surprise given our long-standing thesis that utility multiples tend to contract as recessionary expectations are realized and the multiples appear to be trending towards the ~16x forward multiple that we had calculated as a fair multiple when we published our 1Q preview.

Figure 1 - Trend of Large Cap Regulated Utility Multiple



Source: Thomson Reuters, KBCM Estimates

FERC proposes reforms to the interconnection process to address backlog: Under Docket RM22-14 FERC issued a NOPR to address the backlogs in the interconnection queue and proposed improved procedures. Among the proposals are: 1) implement a first-ready, first-served cluster study process in which the transmission providers will conduct large studies that include multiple generating facilities rather than individual studies for each facility; 2) improve the processing speed by imposing firm deadlines and penalties if transmission owners fail to complete the interconnections on time; 3) use technological advancements into the process to allow more than one resource to co-locate on a shared site behind a single point of interconnection and share a single interconnection request; and 4) update modeling and performance requirements to improve system reliability for non-synchronous generating facilities. Comments are due in 100 days.

FERC initiates rulemaking to improve the reliability of power systems against the threat of extreme weather: The Commission (FERC Docket RM22-10) is planning to require NERC to develop reliability standard modifications that require benchmark planning cases that include extreme heat or cold weather events; transmission providers conduct studies of extreme weather conditions and the potential change in resource mix needed during such conditions; and develop corrective actions in cases where the performance requirements in such extreme conditions are not met.

PJM files with FERC to reform the interconnection review process: PJM is proposing to the FERC to overhaul its interconnection process by moving to a first-ready, first-served model that reviews and approved projects in clusters. The proposed program is not that different from that proposed by MISO region utilities to the FERC in relation to the FERC's transmission NOPR. PJM's proposal will aim to clear out a backlog of pending interconnection requests by expediting projects that require little to no transmission upgrades. PJM also plans to weed out speculative projects by requiring readiness deposits. Specifically, there is a proposal to fast-track projects that do not need more than $5M in transmission upgrades such that the backlog of such projects is cleared by 2025. The remaining projects will be reviewed in two cycles with the entire backlog cleared by mid-2026. PJM is requesting FERC approval by October 3. PJM has 2,700 projects in its interconnection queue representing more than 250 GW.

ED — ED hires an advisor to initiate the sale of the renewable portfolio: According to Bloomberg, ED has hired bankers to identify potential buyers for the renewable energy portfolio. Con Ed has previously announced its intent to consider strategic alternatives for its Clean Energy Business. The CEB has ~3 GW of utility-scale wind and solar assets in its portfolio spread across various states including TX, CA, NE, SD, and MT. According to ED filings, the business had a $519M EBITDA in 2021. Based on the BBG article, the assets could be valued at $4B, implying a 7.8x EV/EBITDA multiple on trailing numbers.

SO — Oglethorpe Power, a partner in Vogtle, opts to freeze its capital cost commitment: Oglethorpe Power announced that it has exercised a one-time contractual option to freeze its capital costs for the construction of Vogtle 3 and 4. With this decision, the utility is maxing its commitment to the project at $8.1B, which will likely put its ownership at 28% instead of 30% and increases GP's share from 45.7% to 47.7%. Other partners in the project include the Municipal Electric Authority of GA, which has a 22.7% share, and the city of Dalton, which owns 1.6%. Some background — in 2018, the four co-owners of Vogtle 3 and 4 jointly agreed to a co-owner cost-sharing agreement to meet future potential cost increases. As part of that agreement, if the total sharable cost of the project increased by $2.1B from the time of the agreement, each co-owner, ex GP, would have a one-time option to freeze their capex in the project. Since the project cost has increased by $3.4B since the signing of the cost-sharing agreement, Oglethorpe has decided to exercise its option.

AGR — Renewed efforts to municipalize ME state utilities: A ME House member will not run for re-election but will instead focus on a statewide referendum effort to create a consumer-owned utility company. Representative Berry (D) said that he is stepping away from running again to focus on the Our Power initiative that is seeking to replace IOUs CMP and Versant with Pine Tree Power, which will be privately operated but run as a not-for-profit utility. The plan is to have Our Power on the ballot for a referendum in November 2023. This is not the first time this has been tried in ME. An advocacy group came up short on its plan to include this initiative on the November 2022 ballot. A legislative attempt at municipalization was vetoed by the governor in mid-2021.

XEL — CO Staff submits testimony in PSCo's gas rate case: CO PUC Staff filed testimony in PSCo's rate case (Docket: 22AL-0046G) recommending a $31M revenue increase, based on a 9.00% ROE and 55.0% equity layer. Additionally, Staff recommended that the PUC use a historical test year and that it rejects the additional revenue increases in 2023 and 2024. Below we show XEL's original filing and testimony from Staff and Intervenor UCA. Overall, XEL is seeking a gas rate net increase of ~$107M effective November 2022 and an incremental $40M and $41M in November 2023 and November 2024, respectively. The request is based on a 10.25% ROE and 55.66% equity layer and a 2022 current test year. The total increase to the base rate totals $215M, which includes $108M of previously recovered costs through the Pipeline System Integrity Adjustment rider. The next data point to watch is the rebuttal testimony on July 13. A statement of position is expected on September 21. PSCo has requested for rates to be effective on November 1.

Figure 2 - XEL GRC Filing Update

XEL Revenue Requirement ($M)	PSCo
Rate Base Current Test Year	3,595.5
ROE	**10.25%**
Equity to Total Cap	**55.66%**
ROR	7.32%
Cost of Debt (Implied)	3.64%
O&M	245.8
Depreciation & Amortization	194.4
Operating Expenses (Net AFUDC)	64.1
Revenue Requirement	825.2
Base Revenue	610.5
Revenue Deficiency	**214.6**

Staff and Intervenor Testimony ($M)	Staff	UCA
Filed base revenue request	215.0	215.0
Less: previously authorized costs (existing riders)	108.0	108.0
Filed net increase to revenue	**107.0**	**107.0**
Recommended adjustments:

ROE	(42.0)	(42.0)
Weather normalization adjustment	0.0	(7.0)
Depreciation expense change	14.0	0.0
Other, net	(15.0)	(5.0)
Total recommendation adjustments	(76.0)	(95.0)
Total proposed revenue change	**31.0**	**12.0**

Source: Regulatory Filings, Company Filings, KBCM Estimates

ED — ED filed rebuttal testimony a request to postpone evidentiary hearings as it pursues settlement proceedings: ED is requesting that evidentiary hearings be postponed by 30 days to August 5 to permit settlement negotiations. The Company has filed a notice to start settlement negotiations on July 6. In rebuttal, ED expressed strong disagreement with the Staff's decision to reduce O&M by $200M for electric and for gas by $44M. According to ED, the cumulative impact of O&M reductions will prevent the Company from recovering the cost of service. ED also objected to the use of three-year averages with no escalation in determining the proposed O&M. ED pointed out that the Staff's O&M reduction arbitrarily reduces programs to achieve a reduction in revenue requirements and is based on general growth rates with no basis in an actual program plan. For background on the rate case and Staff testimony, see our note here.

SO — Staff presents testimony in VCM 26: Staff provided testimony in SO's VCM 26. Staff believes that Unit 3 COD by February 2023 as shown in the current risk-adjusted schedule is reasonable. There is a risk to the February 2023 schedule as well as it relies on a significant amount of work to be completed after fuel load when the plant is subject to the technical specifications or the operating rules for a nuclear power plant. Unit 4 COD on a risk-adjusted basis is forecast to be December 2023, assuming the Company learns the lessons from the delays in Unit 3. Staff believes that the Company will be able to complete the project at the cost estimate provided by the Company in February of this year — assuming COD in March and December 2023, respectively. GP's VCM 26 pertains to the July-December 2021 period. In this filing, GP presents $584M in capex for review only and does not request the Commission to take any action at this time. In the VCM 26, GP also projects an increase in its share of the project cost to $10B (+$745M since VCM 25) and provides new in-service dates. The estimated remaining capex to complete the project is ~$1.5B including GP's share of project contingency.

CMS — CMS reached a multiparty settlement in the pending natural gas GRC: The Company filed a settlement agreement for a $170M revenue increase predicated on a 9.9% ROE (same as the last rate settlement) and an assumed equity ratio of 50.75%. New rates will be effective on October 1 with the start of the new test year. The ROE in the settlement is in line with precedent and as we had expected, bridges the gap between the Staff recommendation of 9.6% and CMS's ask of 10.5%. The revenue increase proposed in the settlement compares with Staff testimony for $172M and CMS's request for $278M.

AVA — Parties reach a settlement in the multi-year GRC in WA: According to a docket filing, the WA UTC staff has indicated that the parties have reached a full multiparty settlement in principle. A status conference is scheduled for June 21 to discuss a revised procedural schedule. The settlement comes as a surprise given that this is the first multi-year rate case filing in the state, based on our conversations with management, we had expected it to be a fully litigated proceeding (even though AVA does have a record of reaching settlements in WA). Terms of the settlement are not known, but AVA is looking to reset ERM, which would be done 60 days before the rates go into effect. The elimination or a material modification of the ERM is unlikely, as the commission in the state historically favored the mechanism. The current interest rate environment should be supportive of the existing level of ROEs, with the most recent authorization in the state sitting at 9.5%.

EIX, SRE — CPUC imposes fines on CA utilities for violations of PSPS tools in 2020: The fines imposed on SRE's SDG&E are minimal but EIX's SCE was fined $10M and PCG was fined $12M. The fines relate to the 2020 wildfire season and apparent violations of the rules related to public safety power shut-offs that are intended as actions for conducting precautionary power outages and protecting the power lines from igniting the fires. The PSPS rules have been further refined since 2020 and utilities have put in place improved communications and outreach programs to provide advance notice to customers. The utilities have also undertaken grid hardening investments to reduce the need for PSPS. The utilities will have 30 days to make the payments and implement the corrective actions proposed.

AGR — NY PSC imposes fines on NY state utilities for failing to meet reliability targets in 2021: The Commission imposed a $7M fine on NYSEG and $5M on RG&E for failing to meet reliability targets. Other NY utilities were fined for exceeding the duration of service interruptions. NYSEG and RG&E will also face fines for failing to meet certain bill metrics targets. Any shortcomings on the part of ED will be addressed in the ongoing GRC.

AVA — WA Commission approves AVA's Clean Energy Implementation Plan: AVA filed a Clean Energy Implementation Plan with the WA UTC last October to comply with the Clean Energy Transformation Act (CETA). CETA was enacted in 2019 and requires that all electricity in the state be GHG neutral by 2030 and 100% renewable or generated from zero carbon sources by 2045. The plan is now approved by the Commission. Under the plan, AVA will serve 80% of WA customer demand with renewable energy starting in 2022, increasing the target by 5% every two years. In addition, AVA plans to reduce customer demand by 2% over the next four years through EE incentives and programs.

AEE — AEE MO is preparing to file a base rate case with the MO PSC: GRC proceedings should commence in August for Union Electric. The Company filed a 60-day notice on June 1. The previous rate case was decided in December 2021 when the Commission approved settlements reached in both the electric and natural gas rate cases. In a black box settlement, signatories agreed to a $220M revenue increase for the electric utility, an equity ratio of 51.97%, but the ROE was not specified.

NEE, DUK — FPL and DEF file 10-year Storm Protection Plans: The filings we made under a 2019 law that directs each FL utility to file a 10-year Storm Protection Plan, update the plan at least every three years, and direct the PSC to conduct an annual proceeding to determine the prudence of the SPP costs incurred to allow cost recovery through a rider separate from base rates. This planning process takes the place of IRP filings in the state.

FPL filed two plans — a "business as usual" plan and a recommended plan. In the recommended plan, FPL bases resource planning on two severe winter events from 1989 and 2010 when energy demand spiked. FPL is also proposing the addition of 700 MW in new winter-only gas capacity by upgrading existing CCGT and keeping 1.8 GW of gas capacity in operation for peak winter demand (vs. the previous plan to retire the facility) and also adding 1.9 GW of battery storage between 2027-2031. Both the plans include retiring coal generation by 2028, building the North Florida Resiliency Connection transmission line, and adding a 1.2 GW CCGT in 2022. The plans also include adding more than 9 GW of solar over 10 years and adding 1.8-3.2 GW of storage depending on the option chosen.

DEF's plan includes retirements of older combustion turbines to be replaced with planned investments in solar and storage. Previously approved 1.5 GW of solar projects will come online through 2024 and beyond. The Company plans to add 300 WM of utility scale solar per year to add a total of over 3.5 GW of solar by the end of the planning period while retiring 1.5 GW of fossil generation.

NEE — NEER makes wastewater acquisition: NEER subsidiary NextEra Water announced that it is acquiring a wastewater system owned by the Towamencin Township in PA. The transaction, subject to regulatory approval, is expected to close in 3Q23. This is NEE's second water acquisition after the $45M investment in Quadvest was announced in 2021 for long-term contracted water and wastewater utility assets around Houston. The Quadvest transaction is expected to close later in 3Q22. The transaction is in line with NEE's strategy of creating a national water treatment footprint as an adjacency to its regulated assets.

FE — PA PUC released the results of the audit of FE's PA operations: The PA PUC released the results of the Management and Operations audit and FE's Implementation Plan. The PUC made 27 recommendations for improvement, including cooperating in all ongoing investigations, tracking and documenting activities related to the investigations, maintaining the transparency of additional costs associated with the inquiry, strengthening the internal controls, and improving reliability performance. The audit report details potential annual cost savings of approximately $39M and one-time cost savings of $13.5M-$22.5M. FE responded with an Implementation Plan, accepting 17 of the PUC's recommendations and partially accepting eight others. It rejected two recommendations, related to the staffing levels and a recommendation to enter into an agreement with EEI for safety-related benchmarking data for regulatory review. The PA PUC periodically conducts such audits of utilities.

The Guggenheim Daily Transmission: ETR, DUK, OGE, CMS, SRE, Power, ES/NH, PJM, FERC, POR, ALE/Steel, EXC/IL

For details on our Guggenheim-hosted client Utility events including: our DTE NDR; OGE NDR; EIX NDR; Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings Guggenheim Event 7/11-12; POR NDR; NEE NDR; WEC NDR; OGS NDR; and other events, scroll down…

ETR Analyst Day – Back in Step and Then Some: LT EPS Growth Set to 6-8%, Plan Reset to Solid Yet Conservative Trajectory; Maintain Buy, Estimates (See note HERE)

DUK – HB 4831 ratified; South Carolina displaying real interest in studying offshore wind potential

OGE – Non-settling Intervenors file alternative settlement for OG&E 2022 rate case

CMS – CMS Gas reaches settlement in CMS Gas 2022 rate case

SRE – CPUC ALJ sets prehearing for SDG&E and SoCalGas 2024 General Rate Cases

Power – PE firm sells 3 midwestern gas plants

ES/NH – Upward supply charge adjustments filed in NH

PJM – Additional emergency actions taken in Ohio, PAI

FERC – FERC issues transmission interconnection NOPR

POR – POR files comments in RFP docket

ALE/Steel – Steel producers decline to provide 2H22 forecasts

EXC/IL – Testimony filed in performance metrics docket

DUK – HB 4831 ratified; South Carolina displaying real interest in studying offshore wind potential

- The bill proposes a joint resolution to direct the Department of Commerce to conduct an economic development study to evaluate the state's business advantages, economic climate, workforce readiness, and any other relevant state assets to create a roadmap to effectively compete in attracting offshore wind energy supply chain industries to the state; and to provide for the purpose and duties of the study.
- HB 4831 HERE

Guggenheim takeaway: *The Carolina Long Bay leases, which DUK won half of last month, are close enough to being connected to South Carolina's grid. This may present the best chance for SC to obtain energy from offshore wind if that's what the state is after, as a lack of federal/state incentives provide limited impetus for non-mandated development, while a Trump-era moratorium on new offshore leases in the Southeastern U.S. is scheduled to take effect on July 1, 2022, blocking new lease areas south of North Carolina for the next decade.*

OGE – Non-settling Intervenors file alternative settlement for OG&E 2022 rate case

- Intervenors in the OG&E rate case settlement that did not ascribe to the OG&E settlement have filed an alternative settlement with the OCC.
- Intervenors include: Oklahoma Industrial Energy Consumers, Walmart, AARP, Oklahoma association of Electric Cooperatives, Petroleum Alliance of Oklahoma.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- The alternative settlement proposes changes to ROE, cap structure and depreciation that achieves a slight rate reduction ($0.75M).
- Key dates are:
  - 6/22: Responsive Testimony
  - 6/23: Pre-Hearing Conference
  - 6/27: Hearing on merits
- Settling parties include OG&E and PUD Staff, the Attorney General, Sierra Club, Oklahoma Sustainability Network, and the OGE Shareholders Association.
- Settlement key points are:
  - Base rate increase of $45M
  - Cost recovery of all investments
  - ROE of 9.5% at actual OG&E capital structure of ~53%
  - Extension of the grid enhancement mechanism through 2024
  - Improvement of depreciation rates
  - PBR proposal is withdrawn
- Docket: PUD202100164 available through search.

Guggenheim takeaway: *The schedule is now set for an early resolution by mid-year, although a competing settlement presents some challenges for the OCC to reconcile. The OG&E settlement maintains status quo and is supportive of the current capex program for OG&E.*

CMS – CMS Gas reaches settlement in CMS Gas 2022 rate case

- CMS Gas reached a $170M revenue increase settlement in the CMS Gas rate case.
- The settlement will maintain an ROE of 9.9% and assumes an equity ratio of 50.75%.
- New rates will commence October 1st with the start of the test year.
- Discovery responses filed under confidentiality.
- Docket: U-21148

Guggenheim takeaway: *FYI and in case you missed it. Settlement is largely in line with our expectations and represents an early (and constructive) outcome from MI regulation.*

SRE – CPUC ALJ sets prehearing for SDG&E and SoCalGas 2024 General Rate Cases

- CPUC ALJ issued an order setting prehearing for Wednesday, July 27, 2022, commencing at 2:00 PM.
- The proceeding is assigned to Administrative Law Judge Manisha Lakhanpal.
- Dockets: A2205015 / A2205016

Guggenheim takeaway: *FYI. The ALJ assignment is one of the initial stages of formulating a procedural schedule and consolidation of the cases helps cover both case issues under a single process. As a reminder, SDG&E is seeking an increase in rates of $286 million for the 2024 test year and also seeking incremental, post-test year combined electric and gas rate increases of $363.2 million in 2025, $338.1 million in 2026 and $306.9 million in 2027; and SoCalGas is seeking a $767 million increase in gas rates for the 2024 test year and also seeking incremental, post-test year gas rate increases of $292 million in 2025, $267 million in 2026 and $413 million in 2027.*

Power – PE firm sells 3 midwestern gas plants

- ArcLight [PRIVATE] has reportedly sold the 656 MW Lincoln and the 328 MW Crete plants in IL, according to SparkSpread.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- The 850 MW Rolling Hills plant in OH has also sold, according to the same reports.
- More HERE.

Guggenheim takeaway: *More asset-level comps for your awareness, although pricing remains unclear.*

ES/NH – Upward supply charge adjustments filed in NH

- NH utilities, including ES, have filed for supply charge adjustment in NH for increases of approximately 10 cents/kwh from ~$0.11 to ~$0.22.
- More HERE.

Guggenheim takeaway: *Interesting heads up, as this was something we discussed on our recent NDR (see HERE), with some regions in NE seeing less of an impact as the typically-higher winter rates roll off to summer.*

PJM – Additional emergency actions taken in Ohio, PAI

- "At 12:30 p.m. Eastern today (June 16) PJM declared a Pre-Emergency and Emergency Load Management Reduction Action in the Marion subregion of PJM in and around Columbus, Ohio. The purpose of a Pre-Emergency and Emergency Load Management Reduction Action is to provide additional load relief by using PJM controllable load management programs…These actions triggered a Performance Assessment Interval (PAI) at 1:00 p.m. They are separate from the two previous PAIs issued Tuesday and Wednesday (June 14-15)." - PJM
- More HERE.

Guggenheim takeaway: *The fallout from this week's storms continues.*

FERC – FERC issues transmission interconnection NOPR

- The 5-0 rulemaking is intended to streamline what has become a massive backlog of primarily renewables projects across the nation's RTOs.
- "The notice of proposed rulemaking (NOPR) aims to address significant current backlogs in the interconnection queues by improving interconnection procedures, providing greater certainty and preventing undue discrimination against new generation."- FERC
- More HERE.

Guggenheim takeaway: *In our view, this has been a longstanding issue within the RTOs, so not a major surprise to see further efforts or the unanimous vote.*

POR – POR files comments in RFP docket

- The company has provided a series of comments and responses following Staff and stakeholder comments.
- More HERE.

Guggenheim takeaway: *Minor FYI flagged for your awareness – nothing jumps out as particularly surprising in the comments.*

ALE/Steel – Steel producers decline to provide 2H22 forecasts

- Several US steel producers have reportedly declined to give outlooks on the second half of the year, a departure from past practice.
- More here (Bloomberg): {NSN RDKU10T1UM0W <GO>}

Guggenheim takeaway: *Potential taconite data point for your awareness.*

EXC/IL – Testimony filed in performance metrics docket

- Multiple parties have filed testimony in the docket in conjunction with the start of hearings.
- Initial Briefs are due July 8th.
- More HERE.

Guggenheim takeaway: *Heads up and part of the process.*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Equity Research | Corporate Access

DTE Energy Company (DTE)

Jerry Norcia, *Chief Executive Officer*
Barbara Tuckfield, *Director, Investor Relations*

Date
June 27 & 28, 2022
New York

Meeting Format
NDR - 1:1 Meetings, Group Meeting

Company Information
Market Cap: $25.7bn
DTE Energy Co. (DTE) operates as a diversified energy company, which engages in the development and management of energy-related businesses and services. It operates through the following segments: Electric, Gas, DTE Vantage, Energy Trading, and Corporate and Other. The Electric segment consists of generation, purchase, distribution, and sale of electricity to residential, commercial, and industrial customers in southeastern Michigan. The Gas segment is involved in the purchase, storage, transportation, distribution, and sale of natural gas to residential, commercial, and industrial customers throughout Michigan, and the sale of storage and transportation capacity. The DTE Vantage segment focuses on projects that deliver energy and utility-type products and services to industrial, commercial, and institutional customers, produce reduced emissions fuel, and sell electricity and pipeline-quality gas from renewable energy projects. The Energy Trading segment covers energy marketing and trading operations. The Corporate and Other segment composed of various holding company activities, holds certain non-utility debt, and holds certain investments, as well as funds supporting regional development and economic growth. The company was founded in January 1995 and is headquartered in Detroit, MI. (Source: FactSet)

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Equity Research | Corporate Access

OGE Energy Corp. (OGE)

Bryan Buckler, *Chief Financial Officer*
Jason Bailey, *Director, Investor Relations*

Date
Wednesday, June 29, 2022
New York

Meeting Format
NDR - 1:1 Meetings, Group Meeting

Company Information
Market Cap: $8.2bn
OGE Energy Corp. (OGE) is a holding company that engages in the provision of physical delivery and related services for both electricity and natural gas. It operates through the Electric Utility and Natural Gas Midstream Operations segments. The Electric Utility segment generates, transmits, distributes, and sells electric energy in Oklahoma and Western Arkansas. The Natural Gas Midstream Operations segment involves gathering, processing, transporting, storing, and marketing of natural gas. The company was founded in August 1995 and is headquartered in Oklahoma City, OK. (Source: FactSet)

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings
Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite
Location: TBD

Tuesday, July 12th

11:30 AM | Lunch
Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience
Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game
Southern Company C-Suite will host in their private box. Dinner will be served.

Company Information

Market Cap: $79.3bn

Southern Co (SO) is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, and Tennessee. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA.

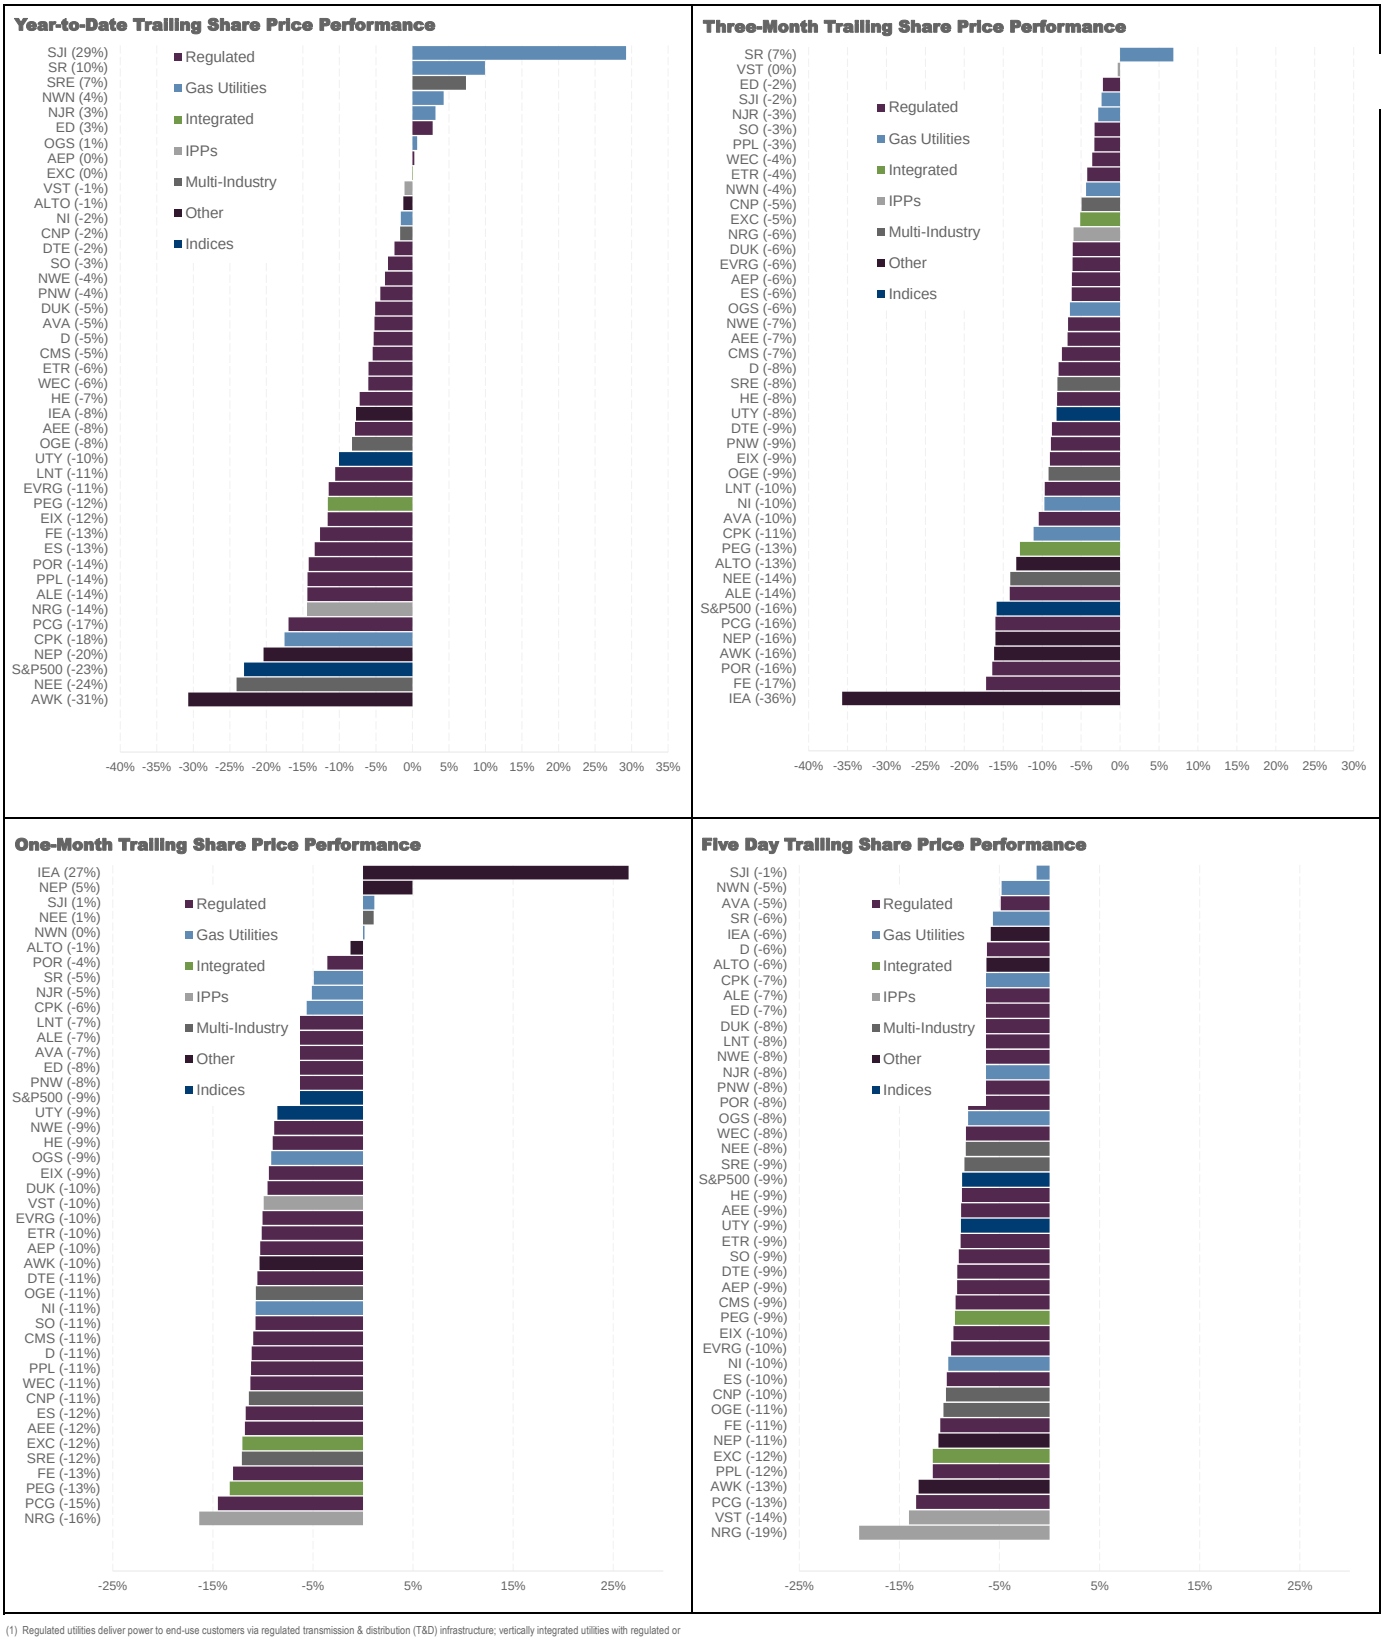
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Analyst Note 14 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy,

and NiSource our top picks.

Dominion Energy has transitioned to a predominantly rate-regulated utility operating in highly constructive regulatory environments. The company's five-year $37 billion capital investment plan focusing on clean energy supports our 6.5% annual earnings growth forecast. Virginia is the company's most important subsidiary and has the most constructive regulation. Dominion expects 90% of its capital investment in the region will be eligible for rate riders, reducing regulatory risk in an inflationary environment.

We think Entergy has several advantages over its peers in an inflationary environment. The company's five southeast utilities should benefit from a jump in U.S. energy demand, constructive state regulation, and substantial opportunities for clean energy growth. More than 90% of Entergy's investments flow through customer rates with little regulatory lag. This minimizes the impact from inflation. We expect Entergy to invest $4 billion annually through 2025 to upgrade its expansive grid and replace coal generation with mostly solar. This supports our annual earnings growth estimate at the high end of management's 7%-9% target.

Constructive regulation in Florida supports industry-leading returns and growth for NextEra Energy. Florida's highly constructive rate-setting mechanisms support investment in the state. NextEra benefits from one of the highest allowed returns in the industry. The utility also has among the lowest electricity bills and highest customer growth across its peer group, helping protect itself in an inflationary environment. At the company's competitive renewable business, NextEra is well positioned to for the clean energy transition. A U.S. Department of Commerce anti-circumvention investigation regarding the import of solar panels from certain Asian countries had created uncertainty to the company's near-term development program; however, the Biden administration's recent decision to not apply solar panel tariffs for at least the next two years brings near-term clarity.

NiSource's transition from coal to renewable energy in Indiana along with regulatory support in the states where it operates natural gas systems should support more than $10 billion of investment over the next four years and 8% annual earnings growth, among the highest in the sector. We think this is an opportunity to buy a high-growth utility at a discount to recent market acquisitions involving similar natural gas distribution utilities. New CEO Lloyd Yates could shake up NiSource's portfolio to capitalize on those market valuations while boosting the share of earnings from its high-growth electric business.

For a more detailed analysis of how inflation affects utilities, see our latest reports, "Inflation Unraveling U.S. Utilities' Safety Net" and "Utility Regulation Critical To Manage Inflation Risk."

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

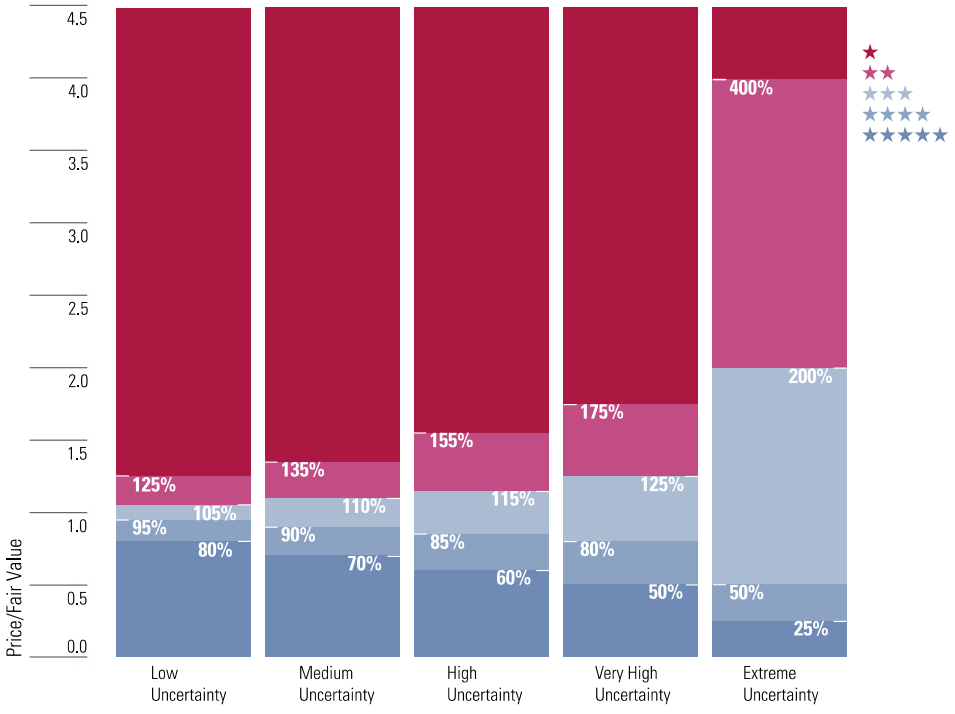
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

The Guggenheim Daily Transmission: PCG, NEE, CA, EXC/IL, Nuclear, ES, DUK, DOE

For details on our Guggenheim-hosted client Utility events including: our PPL NDR; CMS NDR; DTE NDR; OGE NDR; EIX NDR; Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings Guggenheim Event 7/11-12; POR NDR; NEE NDR; OGS NDR; and other events, scroll down…

PCG: No Surprises Analyst Day Puts Together Winning Framework; Rebuilding Trust May Take Time, but Patience Gets Rewarded (see note HERE)

NEE Analyst Day Preview: Tariff Exemption Opens Opportunity for a Constructive Update; We Expect 8% EPS Growth with Opportunity to Exceed (see note HERE)

Forward Power Curves, Genco MtM, and Weekly Commentary (see note HERE)

CA –Opening comments filed on CPUC request for alternative approaches to the NEM 3.0 proposed decision

PCG – Media maintains negative coverage of Dixie Fire CalFire investigation; PCG reiterates position of prudent operator

EXC/IL – Search warrants unsealed in Madigan-ComEd investigation alongside affidavit

Nuclear – Former UK energy minister comments on prospects of nuclear development

ES – DPU allows slight tweak to NSTAR procedural schedule

DUK – NC WARN files petition to intervene in DUK's Carbon Plan docket

DOE – DOE closes $500mm loan guarantee for hydrogen project in UT

CA – Opening comments filed on CPUC request for alternative approaches to the NEM 3.0 proposed decision

- Stakeholders filed opening comments on the CPUC's ruling meant to develop alternative net energy metering approaches.
- The crux of the discussion is around various transition mechanisms for solar NEM compensation.
- CPUC is looking for an alternative approach to the Market Transition Credit (MTC) proposed in the PD. The alternative would provide a "fixed cents per kilowatt-hour(c/kWh) export adder on top of the ACC-based hourly export credits."
- This approach, dubbed "ACC plus", would be available to new net billing tariff customers and ramp down over time for new customers.
- The utilities joint comments are focused on restoring equity to customer classes (i.e., non participants), TURN is supportive of removing uncertainty for the NEM transition and solar advocates believe ACC Plus mechanism is superior
- Docket #: R2008020; PD here

Guggenheim takeaway: *The argument around cost shift seems to be widely understood by every party, including major intervening parties and independent party representatives. Our prior meetings with ex-CPUC President acknowledged that the current NEM rules were lacking by design to incentivize a nascent industry, which all parties recognize is no longer the case with CA renewable and distributed technologies. After a vocal public and ex-parte communication the CPUC finds itself in a tough spot as distributed solar providers are at odds with utility ratemaking and cost allocation.*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:42 AM.

PCG – Media maintains negative coverage of Dixie Fire CalFire investigation; PCG reiterates position of prudent operator

- CA media continue a negative skewed coverage of the Dixie Fire and the associated CalFire report.
- The article focused on the findings that allege an excessively delayed response by PG&E.
- PG&E noted that the company has received a copy of the CAL FIRE Dixie Fire report and still sees the response as prudent given all the information already publicly available.
- PG&E previously shared an extensive amount of information on the fire and stands by the position that the company acted as a prudent operator.
- PG&E further notes that the District Attorneys (DAs) in the five counties affected by the Dixie Fire investigated the events and did not file criminal charges and settlements that were reached with the DAs demonstrate commitment to prevent catastrophic wildfires.
- PR Here.

Guggenheim takeaway: *FYI. While the report did implicate PG&E equipment as the source of the fire, the determination of neglect and ultimate liability is outside the scope of the CalFire report. PCG positions remain in line with prior stated facts. The timing of the news media reports during the Friday actual analyst day likely placed some incremental pressure on shares.*

EXC/IL – Search warrants unsealed in Madigan-ComEd investigation alongside affidavit

- Unsealed search warrants and the affidavit in District Court have laid out details of efforts by associates of Michael Madigan to reportedly garner favors and influence legislation
- More HERE

Guggenheim takeaway: *Heads up – doesn't appear to be much new here, but flagged for your awareness as there may have been some noise from this over the weekend.*

Nuclear – Former UK energy minister comments on prospects of nuclear development

- "'As a former Energy Minister I can tell you there is zero chance that this or any government will be able to build a nuclear power station a year at any point in the next decade." - Tory MP Jesse Norman
- More HERE

Guggenheim takeaway: *Minor FYI.*

ES – DPU allows slight tweak to NSTAR procedural schedule

- "In order to allow the necessary time to develop the pre-evidentiary hearing record, and consistent with the discretion afforded in 220 CMR 1.02(5) and 220 CMR 1.06(5)(b)(2), the Department grants the Company's motion. Therefore, the Company shall file the capital costs/PBR mechanism and PMR metrics rebuttal testimony on June 13, 2022. All other rebuttal testimony is due today, June 10, 2022. The Department also allows the Intervenors and Limited Intervenors an extension of time to June 28, 2022, to provide surrebuttal testimony on the limited issues raised in the rebuttal testimony that will be filed on June 13, 2022. All other surrebuttal testimony shall be filed on June 24, 2022, pursuant to the procedural schedule." - DPU
- More HERE

Guggenheim takeaway: *For your calendars.*

DUK – NC WARN files petition to intervene in DUK's Carbon Plan docket

- "NC WARN has substantial experience in energy-related dockets before the NCUC, the Federal Energy Regulatory Commission, and other governmental bodies. Further, NC WARN has significant contacts with subject matter experts having expertise in climate change, emissions, energy policy, utilities policy, and other related fields. NC WARN intends to use this experience and expertise to evaluate and provide feedback on the Companies' Carbon Plan in the above-captioned docket." – filing
- Docket HERE

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:42 AM.

Guggenheim takeaway: *FYI — investors should recall that NC WARN's mandate is focused on promoting renewable energy and rooftop solar among other alternatives to nuclear power and carbon emitting forms of electricity production.*

DOE – DOE closes $500mm loan guarantee for hydrogen project in UT

- "The facility in Delta, Utah, will combine 220 megawatts of alkaline electrolysis with two massive 4.5 million barrel salt caverns to store clean hydrogen. Advanced Clean Energy Storage will capture excess renewable energy when it is most abundant, store it as hydrogen, then deploy it as fuel for the Intermountain Power Agency's (IPA) IPP Renewed Project — a hydrogen-capable gas turbine combined cycle power plant that intends to incrementally be fueled by 100% clean hydrogen by 2045." - DOE
- More HERE

Guggenheim takeaway: *Interesting ICYMI following the earlier conditional commitment. The project is the first for LPO since 2014.*

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings
Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite
Location: TBD

Tuesday, July 12th

11:30 AM | Lunch
Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience
Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game
Southern Company C-Suite will host in their private box. Dinner will be served.

Company Information

Market Cap: $79.3bn
Southern Co (SO) is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, and Tennessee. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA.

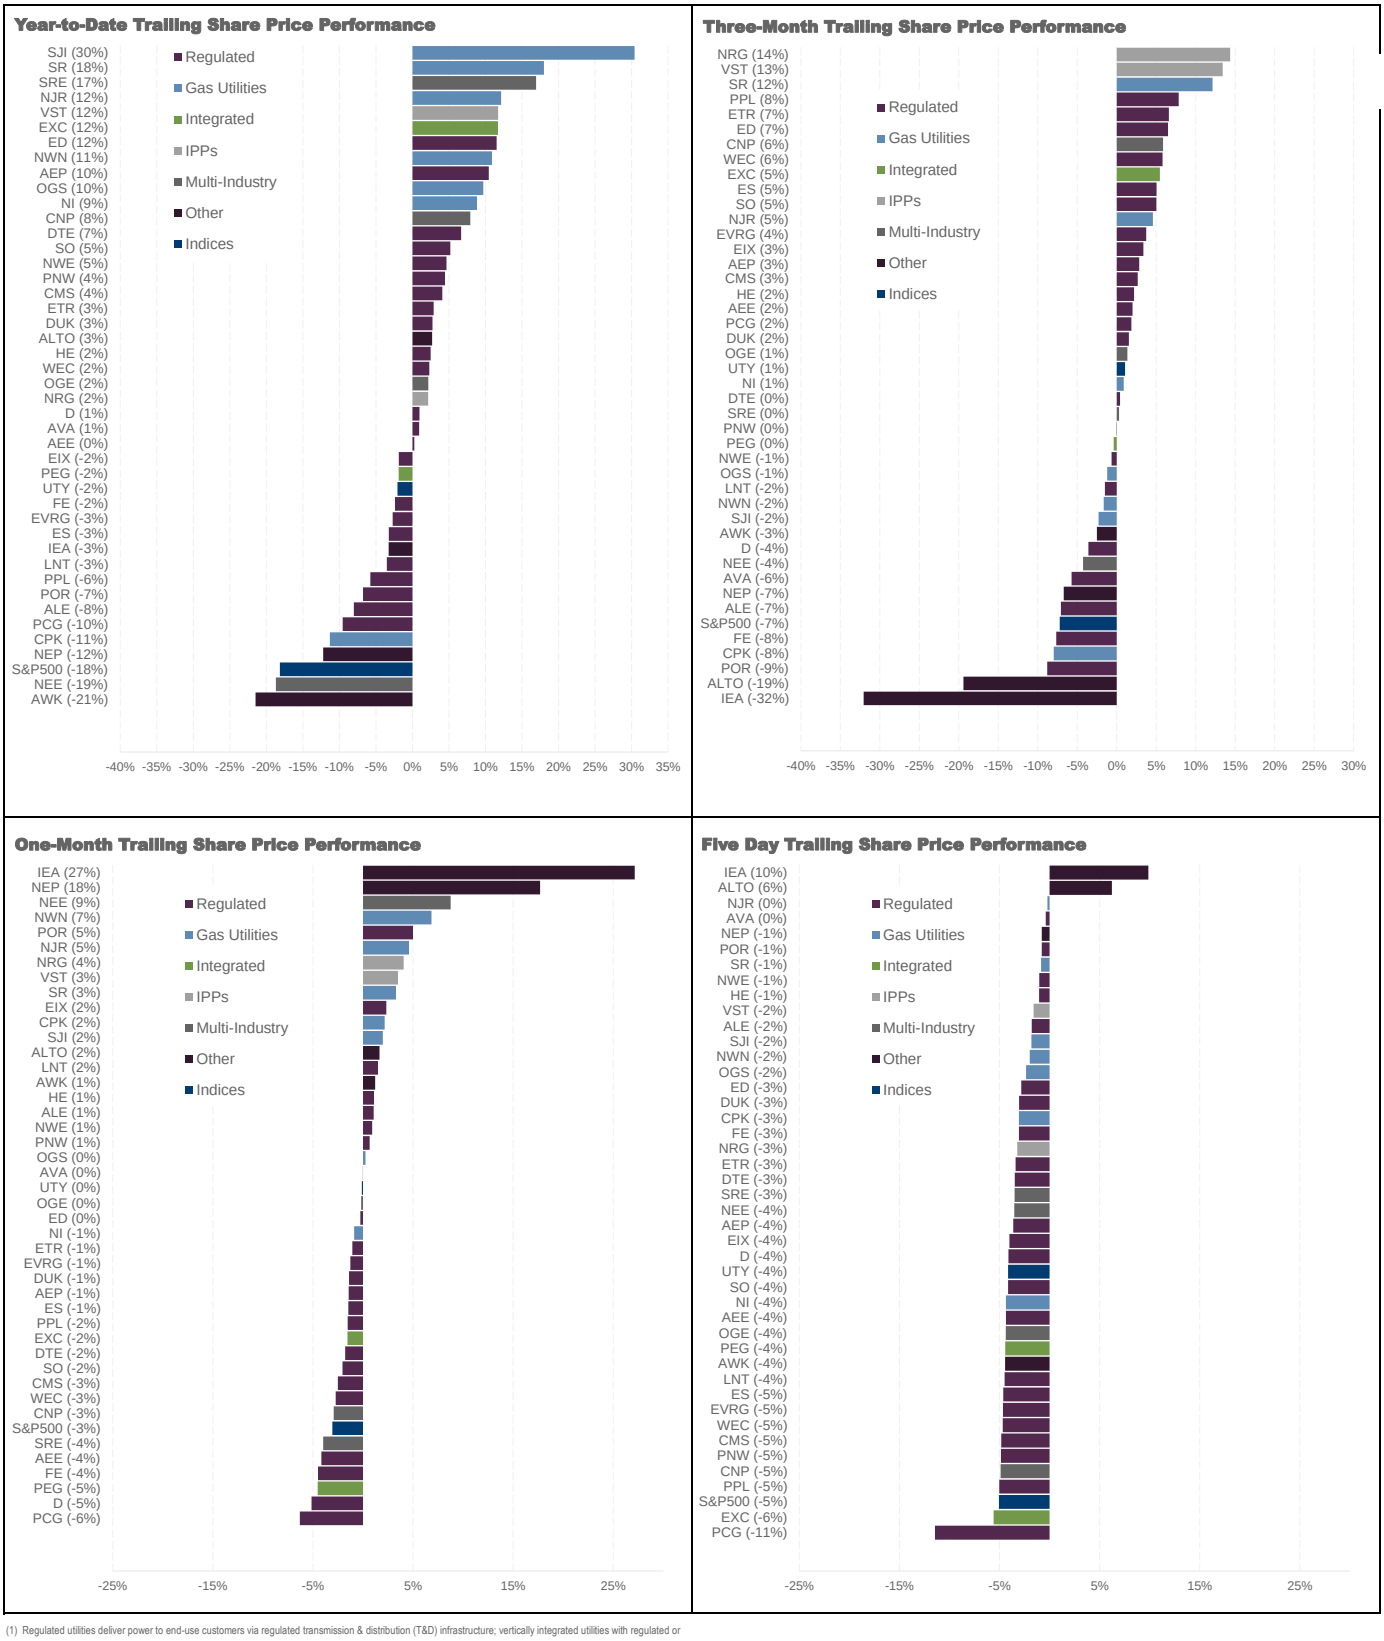
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC managed or co-managed a public offering of securities for Duke Energy Corporation and PG&E Corporation during the past 12 months.

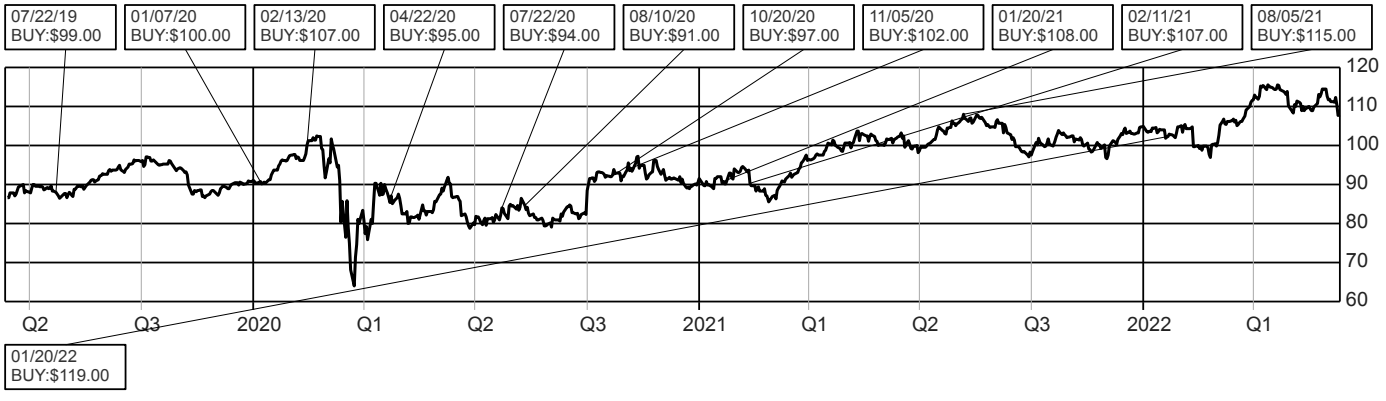
Duke Energy Corporation and PG&E Corporation are or were during the 12-month period preceding the date of the distribution of this report a client of Guggenheim Securities, LLC. Guggenheim Securities, LLC provided Duke Energy Corporation and PG&E Corporation investment banking services.

Guggenheim Securities, LLC or its affiliates received compensation for investment banking services from Duke Energy Corporation and PG&E Corporation during the past 12 months.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Duke Energy Corporation, Eversource Energy, Exelon Corporation, NextEra Energy, Inc. and PG&E Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Duke Energy Corporation (DUK) as of 06-10-2022



Created by: BlueMatrix

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:42 AM.

Rating and Price Target History for: Eversource Energy (ES) as of 06-10-2022

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Analyst Note 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate

Exelon Corp EXC (NAS) | ★★

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
46.66 USD	41.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest reports, "Inflation Unraveling U.S. Utilities' Safety Net" and "Utility Regulation Critical To Manage Inflation Risk."

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

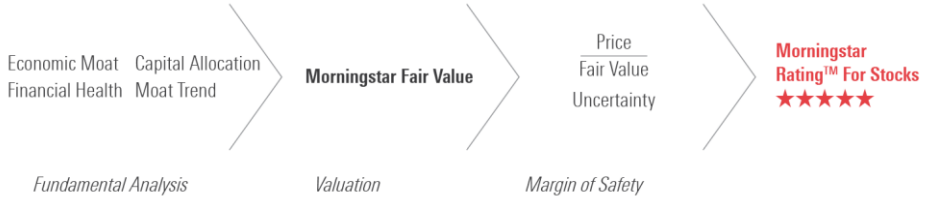
The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies



2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

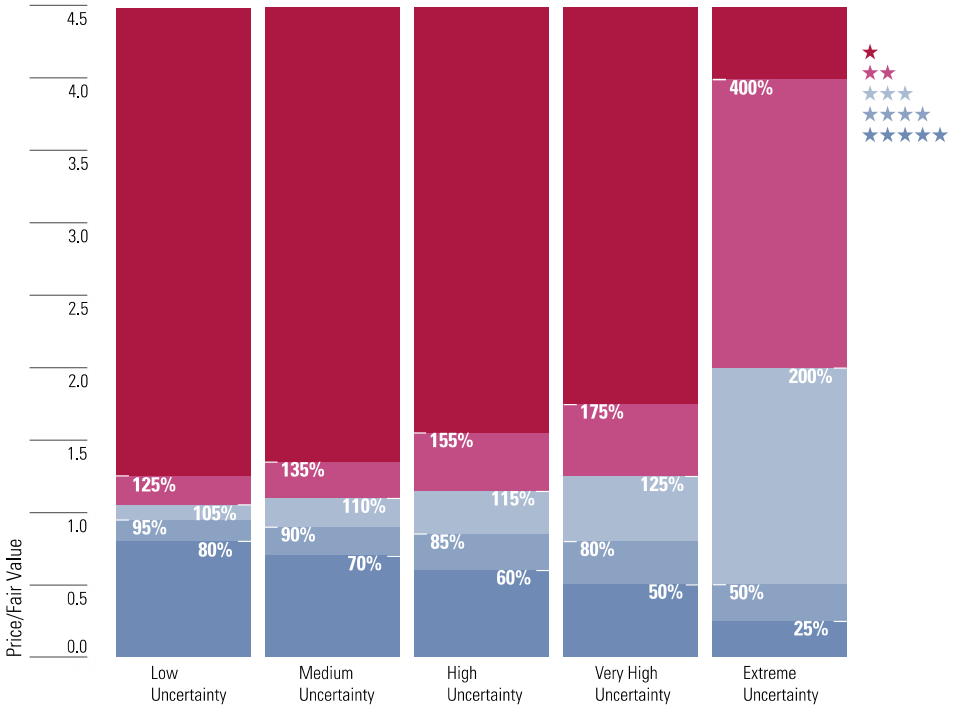
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

The analysis within this report is prepared by the person(s) noted in their capacity as an analyst for Morningstar's equity research group. The equity research group consists of various Morningstar, Inc. subsidiaries ("Equity Research Group)". In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Equity Research Group commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis and Morningstar Star Rating for stocks are statements of opinions; they are not statements of fact.

The Equity Research Group believes its analysts make a reasonable effort to carefully research information contained in the analysis. The information on which the analysis is based has been obtained from sources believed to be reliable such as, for example, the company's financial statements filed with a regulator, company website, Bloomberg and any other the relevant press sources. Only the information obtained from such sources is made available to the issuer who is the subject of the analysis, which is necessary to properly reconcile with the facts. Should this sharing of information result in considerable changes, a statement of that fact will be noted within the report. While the Equity Research Group has obtained data, statistics and information from sources it believes to be reliable, neither the Equity Research Group nor Morningstar, Inc.performs an audit or seeks independent verification of any of the data, statistics, and information it receives.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy,

Utilities

Industry
Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should graudally increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause

adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions

Exelon Corp EXC ★★ 9 Jun 2022 21:25, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
46.66 USD 9 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.14	45.74 USD Bil 9 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think Exelon's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Exelon Corp EXC ★★ 9 Jun 2022 21:25, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
46.66 USD 9 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.14	45.74 USD Bil 9 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results

Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

Exelon Corp EXC ★★ 9 Jun 2022 21:25, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
46.66 USD 9 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.14	45.74 USD Bil 9 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs

offsetting a near doubling of capital investment during the last decade.

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate Andrew Bischof, CFA, CPA, Senior Equity Analyst, 2 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

Exelon Corp EXC ★★ 9 Jun 2022 21:25, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
46.66 USD 9 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.14	45.74 USD Bil 9 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Exelon Edging Closer to Spinning Off Merchant Unit; Reports Q3 Earnings Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Nov 2021

We are increasing our fair value estimate to $48 per share from $45 after Exelon announced third-quarter adjusted earnings per share of $1.09 compared with $1.04 in the same year-ago period. Management narrowed their full-year EPS guidance to $2.70-$2.90 from their previous $2.60-$3.00 range. Our fair value estimate increase is due to an increase in Morningstar's midcycle natural gas price to $3.30 per thousand cubic feet from $2.80, which boosted the nuclear fleet's midcycle margins. Our narrow moat and stable moat trend ratings are unchanged.

Recently management secured $700 million in subsidies from Illinois legislation that will keep the company's Dresden and Byron nuclear plants operating. We assume that subsidies for the plants will continue beyond 2025 given the role nuclear must play as Illinois pursues its aggressive clean energy goal. Management has successfully lobbied for subsidies across its merchant nuclear fleet. Policymakers view of nuclear generation is beginning to align with our view that nuclear' s clean energy attributes and reliable generation will be instrumental in meeting aggressive emission reduction goals.

Exelon continues to progress on the spin-off of its competitive merchant unit. The company has received FERC approval, and continues progress toward receiving approvals from New York regulators and the Nuclear Regulatory Commission. Exelon has named a management team for the new unit, to be named Constellation, which we view is a sign management is confident they can complete the spin-off. Management expects to complete the transaction in the first quarter of 2022.

In the quarter, rate increases and ongoing utility investments supported earnings. Lower capacity revenue, increased nuclear outage days, and unrealized and realized gains on equity investments had a

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

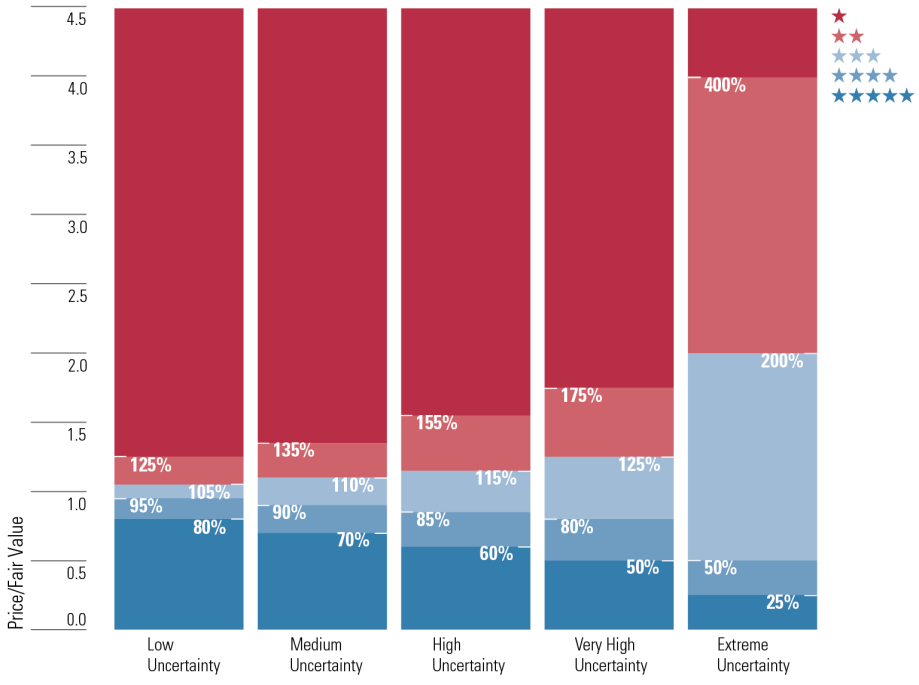
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Morningstar Equity Research Star Rating Methodology



Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Unless otherwise provided in a separate agreement, neither Morningstar, Inc. or the Equity Research Group represents that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction the recipient is located.

Except as otherwise required by law or provided for in a separate agreement, the analyst, Morningstar, Inc. and the Equity Research Group and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions within the report. The Equity Research Group encourages recipients recipients of this report to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an in vestment decision and when deemed necessary, to seek the advice of a legal, tax, and/or accounting professional.

The Report and its contents are not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Morningstar, Inc. or its affiliates to any registration or licensing requirements in such jurisdiction.

Where this report is made available in a language other than English and in the case of inconsistencies between the English and translated versions of the report, the English version will control and supersede any ambiguities associated with any part or section of a report that has been issued in a foreign language. Neither the analyst, Morningstar, Inc., or the Equity Research Group guarantees the accuracy of the translations.

This report may be distributed in certain localities, countries and/or jurisdictions ("Territories") by independent third parties or independent intermediaries and/or distributors ("Distributors"). Such Distributors are not acting as agents or representatives of the analyst, Morningstar, Inc. or the Equity Research Group. In Territories where a Distributor distributes our report, the Distributor is solely responsible for complying with all applicable regulations, laws, rules, circulars, codes and guidelines established by local and/or regional regulatory bodies, including laws in connection with the distribution third-party research reports.

Conflicts of Interest

- No interests are held by the analyst with respect to the security subject of this investment research report.

Research Methodology for Valuing Companies

- Morningstar, Inc. may hold a long position in the security subject of this investment research report that exceeds 0.5% of the total issued share capital of the security. To determine if such is the case, please click http://msi.morningstar.com and http://mdi.morningstar.com.
- Analysts' compensation is derived from Morningstar, Inc.'s overall earnings and consists of salary, bonus and in some cases restricted stock.
- Neither Morningstar, Inc. or the Equity Research Group receives commissions for providing research nor do they charge companies to be rated.
- Neither Morningstar, Inc. or the Equity Research Group is a market maker or a liquidity provider of the security noted within this report.
- Neither Morningstar, Inc. or the Equity Research Group has been a lead manager or co-lead manager over the previous 12-months of any publicly disclosed offer of financial instruments of the issuer.
- Morningstar, Inc.'s investment management group does have arrangements with financial institutions to provide portfolio management/investment advice some of which an analyst may issue investment research reports on. However, analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them.
- Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a financial institution the security of which is the subject of this report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s proxy statement, "Security Ownership of Certain Beneficial Owners and Management" section https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx
- Morningstar, Inc. may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Further information on Morningstar, Inc.'s conflict of interest policies is available from https://shareholders.morningstar.com. Also, please note analysts are subject to the CFA Institute's Code of Ethics and Standards of Professional Conduct.

For a list of securities which the Equity Research Group currently covers and provides written analysis on please contact your local Morningstar office. In addition, for historical analysis of securities covered, including their fair value estimate, please contact your local office.

For Recipients in Australia: This Report has been issued and distributed in Australia by Morningstar Australasia Pty Ltd (ABN: 95 090 665 544; ASFL: 240892). Morningstar Australasia Pty Ltd is the provider of the general advice ('the Service') and takes responsibility for the production of this report. The Service is provided through the research of investment products.

To the extent the Report contains general advice it has been prepared without reference to an investor's objectives, financial situation or needs. Investors should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. Refer to our Financial Services Guide (FSG) for more information at http://www.morningstar.com.au/fsg.pdf.

For Recipients in Hong Kong: The Report is distributed by Morningstar Investment Management Asia Limited, which is regulated by the Hong Kong Securities and Futures Commission to provide services to professional investors only. PCG: We Expect a Calm Analyst Day; Focus on Wildfire Mitigation for Dry Summer Season; FVT Sales, GRC, ROE and Capex Allocation to Stay at Status Quo (see note HERE)

PCG – PCG posts Analyst Day presentation slides; in line with our thoughts and prior disclosures

PCG – PG&E posts response to CalFire investigation around Dixie fire; reiterated position of prudent operator

PCG – PG&E issues a not guilty plea related to Zogg fire

LNG – Cheniere and Equinor sign LNG supply deal

IEA – IEA adds transportation construction contract in IL

ERCOT/Retail – Shell enters Texas resi power market

NWN – Stipulating parties file joint testimony in support of the stipulation

PCG – PCG posts Analyst Day presentation slides; in line with our thoughts and prior disclosures

- PG&E filed an 8K with the supporting materials for the Analyst Day.
- The presentation includes discussion of culture change, wildfire risk mitigation, O&M discipline and financial projections.
- Financial projections are reiterated from 1Q disclosures.
- 8K Here.

Guggenheim takeaway: *FYI. The disclosures are in line with our thoughts and thesis noted in our preview note here.*

PCG – PG&E posts response to CalFire investigation around Dixie fire; reiterated position of prudent operator

- PG&E noted that the company has received a copy of the CAL FIRE Dixie Fire report, which reflects more of the same information already publicly available.
- PG&E previously shared an extensive amount of information on the fire and stands by the position that the company acted as a prudent operator.
- PG&E further notes that the District Attorneys (DAs) in the five counties affected by the Dixie Fire investigated the events and did not file criminal charges and that settlements were reached with the DAs.
- Demonstrated commitment to prevent catastrophic wildfires.
- PR Here.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Guggenheim takeaway: *FYI. While the report did implicate PG&E equipment as the source of the fire, the determination of neglect and ultimate liability is outside the scope of the CalFire report. PCG positions remain in line with prior stated facts.*

PCG – PG&E issues a not guilty plea related to Zogg fire

- PG&E entered a not guilty plea in court related to the DA charges brought forward related to the Zogg fire in 2020.
- Previously, Shasta County District Attorney Stephanie Bridgett announced “31 charges, including 11 felonies, against PG&E, saying it failed to perform its legal duties and that its "failure was reckless and criminally negligent, and it resulted in the death of four people."
- PG&E has continued to stand by its employees and denial of any criminal wrongdoing.
- More here.

Guggenheim takeaway: *FYI. The Shasta county DA has been vocal in seeking criminal charges against PG&E for a few months. While PG&E has been working to make things right and finding settlements with wildfire victims and government agencies, the Shasta County DA has been more intent on the criminal proceeding.*

LNG – Cheniere and Equinor sign LNG supply deal

- Cheniere Energy (ticker LNG) has entered into a liquefied natural gas sale and purchase agreement with Equinor ASA (EQNR).
- Under the SPA, Equinor has agreed to purchase approximately 1.75 MTPA on a free-on-board basis for a term of approximately 15 years.
- The deliveries under the SPA will start in the second half of 2026 and reach the full 1.75 MTPA in the second half of 2027.
- Media here.

Guggenheim takeaway:*LNG markets continue to heat up with more demand for longer-term agreements under various contract structures. The macro outlook for LNG continues to favor SRE with incremental capacity available on development projects like Port Arthur.*

IEA – IEA adds transportation construction contract in IL

- IEA was awarded a $126M contract from the Illinois Department of Transportation (IDOT).
- The project will be jointly executed by White Construction and William Charles Construction, both wholly-owned subsidiaries of IEA.
- The project covers phase two of the reconstruction of the I-57 and I-74 interchange in Champaign County, Illinois.
- More from the press release here.

Guggenheim takeaway: *FYI. Data point on continued backlog adds for IEA, with incremental transportation adds while solar uncertainty persists. The project award is also a follow-on from a previous project awarded to IEA showing ability to win recurring awards.*

ERCOT/Retail ─ Shell enters Texas resi power market

- “Shell today announced the launch of the Shell Energy brand into the residential power market in the United States. Through Shell Energy Solutions ("Shell Energy") the company now offers 100% renewable electricity plans to eligible customers in Texas, expanding its portfolio of offerings and giving residential customers access to renewable electricity plans while building on the trusted relationships the company has built with Texans over decades.” – Shell [NYSE:RDS]
- More HERE.

Guggenheim takeaway: *ICYMI and not a surprise given prior data points suggesting the move but nonetheless interesting.*

NWN ─ Stipulating parties file joint testimony in support of the stipulation

- The parties to the settlement have filed joint testimony in support of the agreement in NWN’s OR GRC.
- More HERE.

Guggenheim takeaway: *Minor ICYMI and another data point in support of NWN’s solid track record before the OPUC.*

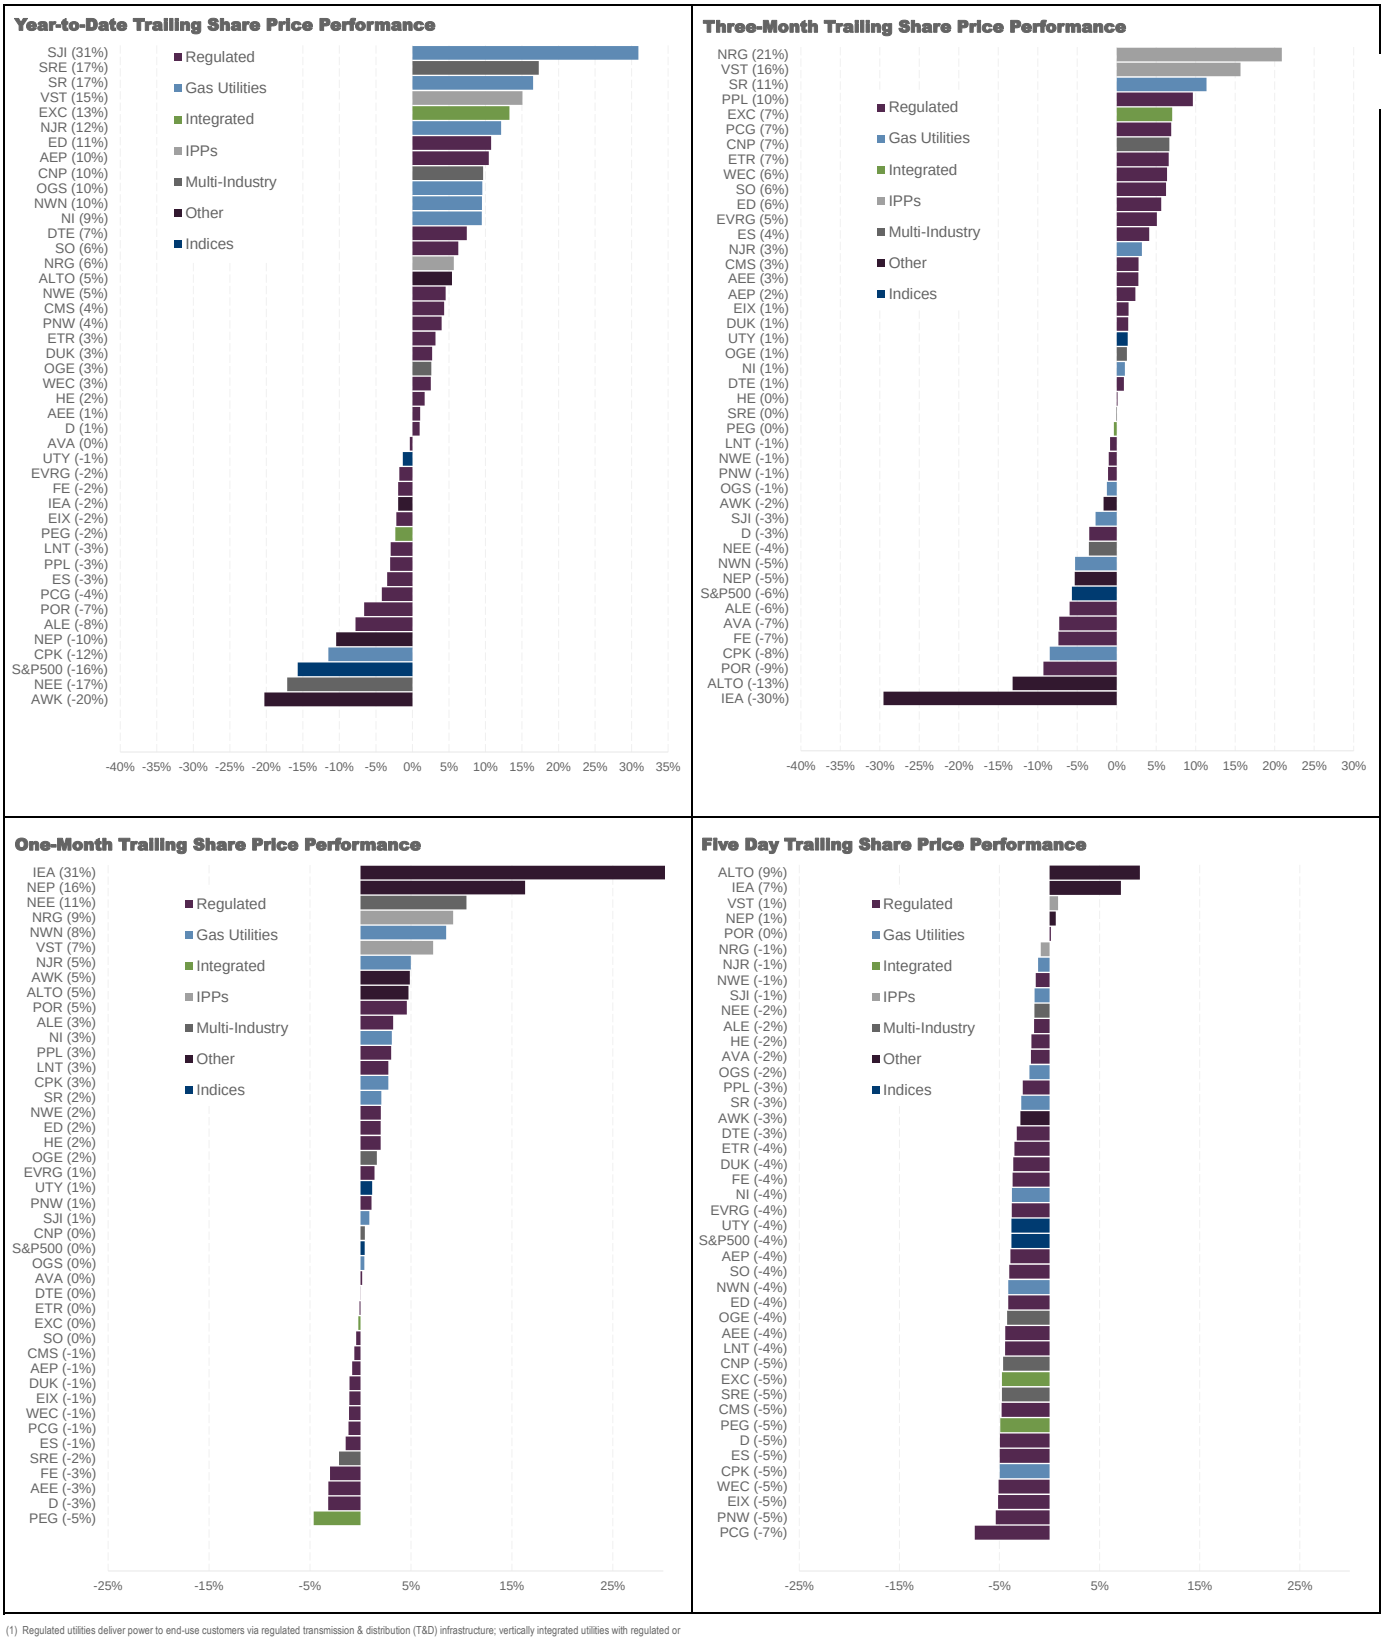
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

EXC NDR: Getting Yourself Back Out There…

Key Message: EXC remains one of the tighter top tier growth stories in our space coming out of its genco spin, augmented by a relatively straightforward T&D capex plan and quieter regulatory cycle. Our latest meetings with management largely reinforced this thesis, with management providing incremental data points on a suite of both industry themes (O&M, rates) and company-specific items (IL). While we missed the initial entry window following the spin, we continue to look for a new opportunity given what we see as EXC's differentiated story and regimented ascension into the ranks of more premium-oriented names.

We hosted EXC's Chief Financial Officer Joe Nigro, SVP of Corporate Finance, Jeanne Jones and the IR team for a dense in-person NDR with a diverse group of investors across the Midwest and Texas. Key areas of discussion included: **1)** the growth profile, including YoY drivers of changes in the shape and the delta between rate base growth and earnings growth, **2)** how EXC is navigating several industry-wide themes this year, including O&M, pension, and a rising rate environment, **3)** Illinois, including the ComEd MRP and the ongoing benefit from the newly-implemented CMCs, **4)** updates at the core utilities, including cases and separation items, and finally, **5)** strategic thoughts post-spin, including management's thoughts on different types of targets (e.g., water or generation).

6-8% growth well cemented, and while the profile may not be perfectly linear, the sheer scale of EXC helps smoothing… Investors in our meetings consistently inquired about the overall profile of EXC's 6-8% growth given its 8% underling RB growth and associated financing plans ($1bn equity), with the team highlighting several items for investor consideration across the platform. These include things like the eventual ascension of allowed ROEs in ComEd (discussed below), the nature of the PECO multi year plans, and other smaller items that can introduce YoY variance (e.g., storms). On PECO in particular, management reminded investors in our meetings that the latter 2 years of the 3-year cycle can introduce some lag as the case construct utilizes fully projected future test year (FPFTY) methodology (e.g., captures year 1). More broadly, management noted that it continues to work on ways to modulate levers to ensure some reasonable smoothing around the midpoint, with O&M one such option, in our view.

In line with our recent NDRs and the bulk of our 1Q22 calls, our conversations also touched heavily on key themes facing the industry at large, including O&M pressures, pension swings, and a volatile interest rate environment… On the first, O&M, management indicated that it is still confident in its long-term ability to control costs, with a goal to keep them as flat as possible. The historical trend through 2022 had been a 1.4% CAGR, with management pointing to puts and takes on either side of the business that could move the needle up and down going forward. These include cost controls like ongoing IT improvements, union workforce contracts (staggered expirations between now and '27), consolidating suppliers, scale purchases, and EE efforts (which shift from O&M to capital). These can be at least partially offset by not only the ongoing macroeconomic backdrop, but also certain requests/directives from regulators that have a direct drop down to O&M. On the pension front, EXC was 87% funded as of YE, with the increase in the discount rate likely offsetting much of the decline in fund assets – a neutral overall effect. Like many other utilities, EXC utilizes smoothing, dampening the impact of higher volatility. Finally, on higher interest rates, the messaging was largely the same – the team can mange through what it has seen to date, with every ~50bps roughly 1-2 pennies in drag. The goal remains to be roughly 150bps above ratings agency thresholds (~12% FFO/Debt).

ComEd MRP and performance processes continue to advance as IL bills get some relief from the nuclear CMCs… The forthcoming implementation of multiyear rate plans remains on track for a 1Q23 filing, with management including some comfortable assumptions for returns in its overall 6-8% LT EPS growth plan. The company does not see its current 8% ROEs rising to the level of gas LDCs (mid 9s) overnight in that process, with the legislation also providing a phase in option under which earnings are booked but

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

cash recovery is delayed – very similar to what we have heard from others in the state. The backdrop for implementing a change in ROEs has also been aided by the rise in treasuries, reducing some of the potential delta from what were some of the lowest ROEs in the nation. On the performance metric implementation (docket HERE), management continues to work through the process (rebuttal testimony was just filed) with an eye towards more clarity in 2H22. The company reiterated that on both of these initiatives transparency remains an overarching goal. Finally, on the subject of rates, ComEd's supply charges are currently benefiting from the fixed nature of the new Carbon Mitigation Credits (CMCs), which could be further augmented by ADIT refunds in the 2023-2025 time period as prescribed under the 2021 legislation. The company also continues to monitor the PJM capacity construct and advocate for customer-centric developments.

Core utility work skewed towards IL and ongoing separation as regulatory calendar otherwise relatively quiet… EXC's regulatory calendar remains relatively quiet, with the company in the middle of multi year plans in DC, MD, and PA, with only some reconciliation items in those jurisdictions under the plans. **On the topic of the separation,** management noted that the process is complicated but well underway, with agreements in place for shared services during the transition. Investors asked in our meetings about any ongoing dissynergies from duplications of functions, with management highlighting in response that all of the parent O&M is allocated/recovered at the opcos, so no major inefficiencies there. Finally, we note that there were no major updates to the messaging around equity, with management still thinking through the exact avenues.

With the genco gone have strategic considerations changed? Investors in our meetings were keen to dig into management's post-spin strategic thoughts, including both potential divestitures *and* acquisitions. On the former, investors specifically asked about the gas LDCs, with management indicating that they do not have a plan to move away from the segment at this time – it's only ~12% of rate base, and the company runs them well, in their view. The gas LDC (PA and MD) are also collocated with electric systems, so there are some potential dissynergies that could arise under a sale scenario. On the latter, acquisitions, management struck an open tone, although the bars remain high for targets as management is also still working to finalize its genco separation (e.g., IT). We asked about interest in either water or utilities with generation, with management indicating that the former was not a first choice and that while it could be open to owning regulated generation, it would have to come with a strong decarbonization profile/opportunity (e.g., low coal exposure). **Overall, we came away with the impression that management remains focused on its ~$29bn capex plan and organic growth story,** although it remains open to evaluating any and all opportunities.

Valuation

Our valuation is based on our 2024E EPS of $2.58 applied to a 19.5x regulated utility multiple, which is based on our regression model using the correlation between electric utility valuations and forward interest rate expectations over the past 30+ years. To this 19.5x multiple, we continue to apply a one-turn premium to each of EXC's subsidiaries for favorable recovery mechanisms (riders, MYPs) and underlying growth/incremental investment opportunities, except for ComEd. This blended 20.2x multiple, applied to our 2024E EPS and discounted back one year, equals our $49 PT.

Risks

Risks to our rating and valuation mainly encompass traditional risk factors inherent with all electric utilities including: (1) rate case risk, (2) lower CapEx outlook, and (3) interest rate changes above what we account for in our regression model.

Upside risks to our price target include: (1) improved regulatory constructs; (2) higher CapEx outlook; (3) interest rates fall lower.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

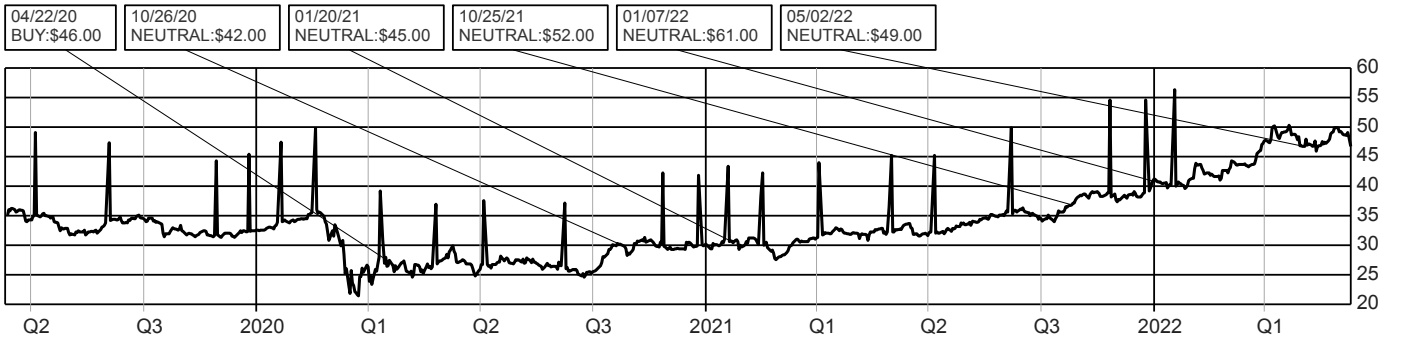
IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 06-09-2022



Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Exelon Corp | North America

Takeaways from the Road

Stock Rating	Industry View	Price Target
Overweight	In-Line	$52.00

We recently hosted EXC management for a set of constructive meetings with investors. We highlight key points and takeaways below.

Customer bills under less pressure than many peers. While EXC is facing cost inflation across many areas of the business, several aspects have helped mitigate the impacts. Union agreements on the labor side extend multiple years and will be less driven by the year to year inflation marks. Buying supplies in bulk along with buying in advance and using competitive bids continues to offer price discounts given EXC's size and breadth across multiple utility jurisdictions; lack of concentration of capex helps mitigate inflationary risk in specific components; technology investments have helped enable O&M savings. Customer bills are also helped by the company's energy efficiency programs, declining capacity prices in PJM (a passthrough to customers), and the fixed price contract in IL with CEG's nuclear plants that cover 65% of consumer requirements - A major benefit given the rise in gas and power prices this year. We think these drivers put EXC in a position where its rate base growth outlook and rate requests will get less pushback from commissioners than other utilities facing 20-30% price increases this year. We don't see the clear opportunity to accelerate rate base growth into this dynamic given the already fast 8.1% rate over the plan, but we think it lowers regulatory risk.

Continued confidence in achieving the 6-8% EPS growth rate each year through 2025. Several regulatory items could have lumpier impacts on the core revenue trajectory over the plan, such as the PECO rate case (to be effective in 2025, with returns likely declining each year until then) and new IL regulatory structure (to be implemented starting 2024). However management sees other levers in the business to maintain a smoother overall growth profile over time, and feels increasingly comfortable given this year's ComEd earnings power benefitting from rising Treasuries, and one-time negative items in 2022 that roll off in 2023 (Constellation expense drag, DPA cost allocation).

Pension not an earnings concern in the near-term. Exelon amortizes any asset losses over several years, so equity market weakness vs. the embedded asset return expectations will not have a meaningful impact on earnings.

Low risk capex plan. The capex plan is built up from a diverse set of already-identified projects with no speculative or outsized projects (no project is >1% of the total plan), increasing confidence in the 8.1% rate base growth CAGR.

Maintaining a strong balance sheet. Still planning $1b of equity over the plan, with no specific indication of timing or form. We note that capex needs pick up

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

over the course of the plan, but other market and business factors could influence management's timing and the company prefers to maintain flexibility. The company has the lowest downgrade threshold across the utilities space and management sees value in sustaining a strong balance sheet. We don't think the company is actively considering M&A as a priority given the strong organic growth outlook ahead for the core business.

Overall we still see additional multiple expansion with the potential to achieve a 10% premium to the group, up from the -1% discount currently. The company's above-average growth, low regulatory risk, lack of generation assets, ESG favorability, and strong management team all support a 10% premium in our view, with continued execution likely to unlock this upside.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Valuation Methodology and Risks

Exelon Corp (EXC.O)

We value the regulated utilities' 2023 earnings by applying the large-cap regulated group P/E multiple at a 10% premium to account for above average earnings growth of 6-8%, a lower business risk profile, long tail of investment opportunities, strong ESG profile, and low exposure to physical risks of climate change.

Risks to Upside

- Clean energy policy legislation that supports the build out of T&D infrastructure
- Material capital upside relative to current capital
- Additional O&M reduction programs

Risks to Downside

- Unfavorable regulatory/legislative outcomes
- Failure to execute on growth en-devours and to achieve cost reduction targets

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Important Regulatory Disclosures on Subject Companies

As of May 31, 2022, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Duke Energy Corp, Edison International, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Spire Inc.
Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Algonquin Power & Utilities Corp, Ameren Corp, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, PG&E Corp, Sempra Energy, Southern Company, Spire Inc, Xcel Energy Inc.
Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Algonquin Power & Utilities Corp, Ameren Corp, AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, PPL Corp, Sempra Energy, Southern Company, Xcel Energy Inc.
In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.
Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, Southern Company, Spire Inc, Xcel Energy Inc.
Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.
Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.
Morgan Stanley & Co. LLC makes a market in the securities of Ameren Corp, Atmos Energy Corp., CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.
The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.
Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.
Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Morgan Stanley | RESEARCH

UPDATE

Global Stock Ratings Distribution

(as of May 31, 2022)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm. For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

	COVERAGE UNIVERSE		INVESTMENT BANKING CLIENTS (IBC)			OTHER MATERIAL INVESTMENT SERVICES CLIENTS (MISC)	
STOCK RATING CATEGORY	COUNT	% OF TOTAL	COUNT	% OF TOTAL IBC	% OF RATING CATEGORY	COUNT	% OF TOTAL OTHER MISC
Overweight/Buy	**1398**	**39%**	**344**	**44%**	**25%**	**599**	**39%**
Equal-weight/Hold	**1576**	**45%**	**354**	**45%**	**22%**	**721**	**47%**
Not-Rated/Hold	**1**	**0%**	**1**	**0%**	**100%**	**0**	**0%**
Underweight/Sell	**565**	**16%**	**86**	**11%**	**15%**	**211**	**14%**
TOTAL	**3,540**		**785**			**1531**	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Analyst Note 06 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

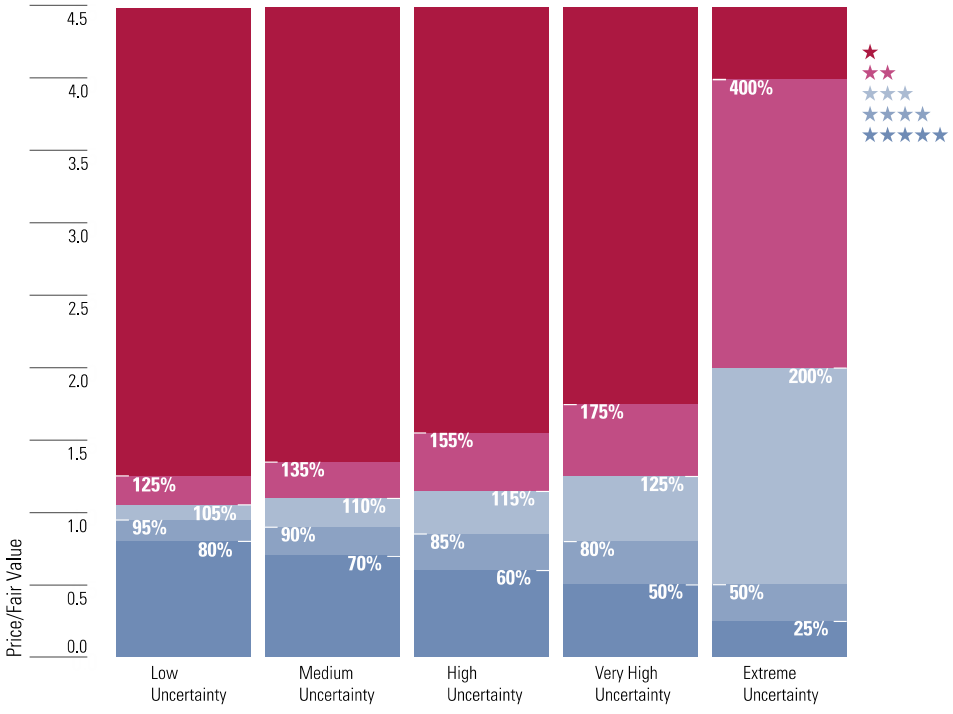
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 6 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be

Sector Utilities

Industry Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should graudally increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
48.73 USD 3 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.19	47.77 USD Bil 3 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing

Exelon Corp EXC ★★ 3 Jun 2022 21:33, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
48.73 USD 3 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.19	47.77 USD Bil 3 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think Exelon's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes Archive

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results

Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management

Exelon Corp EXC ★★ 3 Jun 2022 21:33, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
48.73 USD 3 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.19	47.77 USD Bil 3 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Exelon Corp EXC ★★ 3 Jun 2022 21:33, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
48.73 USD 3 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.19	47.77 USD Bil 3 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate Andrew Bischof, CFA, CPA, Senior Equity Analyst, 2 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and

Exelon Corp EXC ★★ 3 Jun 2022 21:33, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
48.73 USD 3 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.19	47.77 USD Bil 3 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Exelon Edging Closer to Spinning Off Merchant Unit; Reports Q3 Earnings Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Nov 2021

We are increasing our fair value estimate to $48 per share from $45 after Exelon announced third-quarter adjusted earnings per share of $1.09 compared with $1.04 in the same year-ago period. Management narrowed their full-year EPS guidance to $2.70-$2.90 from their previous $2.60-$3.00 range. Our fair value estimate increase is due to an increase in Morningstar's midcycle natural gas price to $3.30 per thousand cubic feet from $2.80, which boosted the nuclear fleet's midcycle margins. Our narrow moat and stable moat trend ratings are unchanged.

Recently management secured $700 million in subsidies from Illinois legislation that will keep the company's Dresden and Byron nuclear plants operating. We assume that subsidies for the plants will continue beyond 2025 given the role nuclear must play as Illinois pursues its aggressive clean energy goal. Management has successfully lobbied for subsidies across its merchant nuclear fleet. Policymakers view of nuclear generation is beginning to align with our view that nuclear' s clean energy

Exelon Corp EXC ★★ 3 Jun 2022 21:33, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
48.73 USD 3 Jun 2022	41.00 USD 11 May 2022 20:37, UTC	1.19	47.77 USD Bil 3 Jun 2022	Narrow	Stable	Low	Standard	1 Jun 2022 05:00, UTC

attributes and reliable generation will be instrumental in meeting aggressive emission reduction goals.

Exelon continues to progress on the spin-off of its competitive merchant unit. The company has received FERC approval, and continues progress toward receiving approvals from New York regulators and the Nuclear Regulatory Commission. Exelon has named a management team for the new unit, to be named Constellation, which we view is a sign management is confident they can complete the spin-off. Management expects to complete the transaction in the first quarter of 2022.

In the quarter, rate increases and ongoing utility investments supported earnings. Lower capacity revenue, increased nuclear outage days, and unrealized and realized gains on equity investments had a negative impact on generation segment earnings. Trailing 12-month returns were 9.3%, down from 9.4% last quarter.

Exelon Secures Another Legislative Win; Byron and Dresden to Remain Open Andrew Bischof, CFA, CPA, Senior Equity Analyst, 14 Sep 2021

We are increasing our Exelon fair value estimate to $45 per share from $42 after Illinois lawmakers passed energy legislation that would provide subsidies to Exelon's Dresden and Byron nuclear plants. Gov. J.B. Pritzker has indicated he plans to sign the legislation, and Exelon has said it is in the process of refueling both plants. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon has taken a hard line with Illinois policymakers on the future of its unregulated nuclear facilities in the state. Last year, Exelon announced plans to close the two nuclear generating stations. After filing Post Shutdown Decommissioning Activity Reports with the Nuclear Regulatory Commission in July, Exelon is now preparing to refuel both Byron and Dresden nuclear facilities. We had previously estimated the plants were running at break-even, resulting in no change to our fair value estimate.

The $700 million in subsidies Exelon will receive from the legislation was the primary source of our fair value estimate increase. We assume that the subsidies will continue beyond our five-year forecast, in part to help the state meet the legislation's 100% clean energy target by 2050. The legislation also sets targets for Illinois that include zero carbon emissions by the end of 2045 and 50% renewable energy by 2040. Dresden's operating license expires later this decade and Byron's operating license expires for both of its units by 2046. Time-value appreciation since our last update increased our fair value estimate $1 per share.

We previously thought Exelon faced an uphill battle to secure additional subsidies for its nuclear fleet in the state, in large part due to the deferred prosecution agreement Exelon entered into last year related to the company's lobbying practices in the state. However, the state's clean energy goals, and the contribution of Exelon's nuclear fleet to those goals, ultimately led to successful lobbying efforts.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

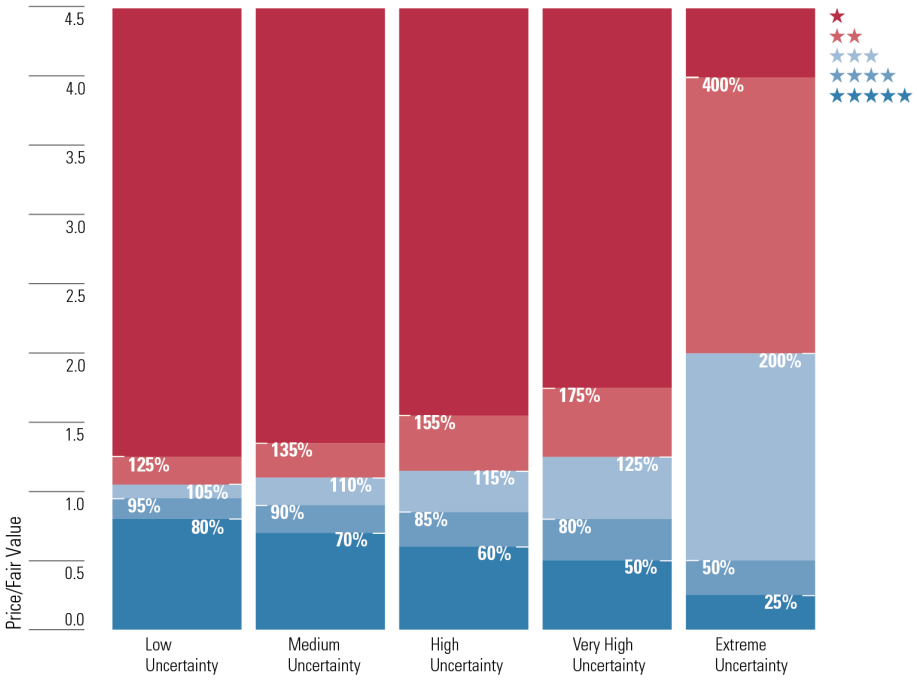
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close

Morningstar Equity Research Star Rating Methodology



tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the suitability of such investments and recommendations in the light of their own investment objectives, experience, taxation status and financial position.

The information, data, analyses and opinions presented herein are not warranted to be accurate, correct, complete or timely. Unless otherwise provided in a separate agreement, neither Morningstar, Inc. or the Equity Research Group represents that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction the recipient is located.

Except as otherwise required by law or provided for in a separate agreement, the analyst, Morningstar, Inc. and the Equity Research Group and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions within the report. The Equity Research Group encourages recipients recipients of this report to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an in vestment decision and when deemed necessary, to seek the advice of a legal, tax, and/or accounting professional.

SMRs – Philippines reportedly considering SMRs

AEE/ATC/MISO – Additional Tranche 1 project details posted by MISO

- MISO has posted a 3rd draft of the MTEP Addendum Appendix A, detailing ~150 projects that are under consideration for approval by the MISO Board in July as a part of the ~ $10bn Tranche 1 process
- The details include individual projects and the location by TO system, with several newbuild projects labeled as TBD
- Full file HERE, MTEP landing HERE

Guggenheim takeaway: *Heads up on last week's posting, which has some important, yet expected, readthrough to incremental opportunities for AEE and other regional TOs in northern MISO. As a reminder the formal approval of the projects in Tranche 1 is not expected by stakeholders until late July (7/25), and this is still a draft document. Still, AEE is tagged to roughly $2bn of opportunities, with the potential for more depending on how the newbuild 345kv lines and other less straightforward projects (potentially competitively bid) are allocated. We fully expect AEE to participate in any competitive processes. In terms of timing, the brownfield projects that are awarded could begin to flow into the 2025-2026 capex plans based on our recent AGA conversations (HERE), with the bulk of the opportunities generally weighted towards the '27/'28. Newbuilds appear to be weighted towards 2030.*

Policy – GOP unveils energy plan

- House Minority Leader Kevin McCarthy is leading a proposal from the House GOP that would focus on permitting, fossil fuel product, LNG exports, and increasing domestic sources of energy such as renewables
- More HERE, HERE

Guggenheim takeaway: *The mosaic of the various strategies and tasks forces is light on details but highly focused on natural gas and immediate supply concerns. None of the talking appear to be hostile to renewables or nuclear, with specific support for hydropower.*

PPL – RI lawmakers nix incentive adder from offshore wind legislation

- The prior owners of NECO had been pushing for a 2% fee on the state's next 600MW wind procurement, which was subsequently amended out of proposed legislation
- More HERE

Guggenheim takeaway: *Minor FYI – the incentive was not taken up and included in the prior Revolution project procurement either.*

FERC/NYISO – Commissioner Danly dissents in BSM compliance filing approval

- "I dissent from today's order because it approves a compliance filing submitted by the New York Independent System Operator, Inc. (NYISO) regarding prior approved unduly discriminatory tariff revisions to Part A of the mitigation test for its buyer-side market power mitigation rules. I have previously explained how the Commission exceeded its authority in approving tariff revisions prohibited by section 205(b) of the Federal Power Act. I will not repeat that discussion here except to say that there is no material, legitimate basis to justify NYISO's discriminatory treatment prioritizing the evaluation of Public Policy Resources before non-Public Policy Resources, independent of any other consideration, including cost." - Commissioner Danly
- More HERE

Guggenheim takeaway: *Flagged for your awareness. As a reminder, Commissioner Danly's current term runs through 6/2023.*

ERCOT – June GIS report released

- The latest GIS report indicated that 1.4GW of capacity was nearing commercial operations in May, alongside almost 1GW that was approved – most of it wind, solar, and storage
- More HERE

Guggenheim takeaway: *Minor heads up – this is a monthly tracking document and most of the projects are already familiar from places like the CDR.*

AEP – Staff files 44.54% common equity in permanent capital structure in AR SWEPCO rate case

- Reminder of the upcoming remaining filings dates below.
- June 10th: SWEPCO's compliance filing due
- June 17th: any testimony responsive to SWEPCO's filing due
- Docket HERE

Guggenheim takeaway:*FYI, and for your calendar.*

EXC/IL – Rebuttal testimony filed in performance docket

- Multiple parties have field rebuttal testimony responding to ComEd's prior filings in the PBR docket, with responses specifically focused on the minutia of the proposed performance inventive mechanism ("PIM")
- More HERE

Guggenheim takeaway: *Part of the process – flagged for your awareness.*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

D – SCC posts order on post-hearing filings

- "NOW THE COMMISSION is of the opinion and finds that it should modify its instructions for the Post-hearing Filings concerning the interplay of particular statutes of the Code of Virginia to include Code § 56-585.5 and should request additional briefing on project costs. For clarity, we will also repeat the instructions provided at the end of the hearing on May 19, 2022." - SCC
- More HERE

Guggenheim takeaway: *Very minor FYI on the follow up.*

ES – ES files initial brief in GMP track 2 process

- "As detailed below, this brief is submitted as part of the proceeding's "Track Two" which is focused on "new" investments, including new grid-facing investments under the GMP and investments contained in the AMI Implementation Plan. As discussed in detail below, the Company is seeking, consistent with the provisions of D.P.U. 15-122 and D.P.U. 20-69-A, pre- authorization to proceed with the investments. D.P.U. 15-122, at 110; D.P.U. 20-69-A at 30. The Company is not seeking preapproval of costs associated with the GMP investments or the AMI Implementation Plan (Tr. 4, at 657-658; Exh. DPU 2 -7). Instead, the Company is seeking a determination that these proposed Track Two investments are appropriate to move forward with and thus the decision to implement these Track Two investments will not be subject to any subsequent review as to whether the Company should have moved forward with the investments (id.). Cost recovery will occur in a future proceeding, subject to a full prudence review" - ES
- More HERE

Guggenheim takeaway: *Minor FYI.*

NYISO – NYSERDA awards 2.4GW in contracts to solar and storage projects

- "Governor Kathy Hochul today announced awards for 22 large-scale solar and energy storage projects that will deliver enough clean, affordable energy to power over 620,000 New York homes for at least 20 years. As the state's largest land-based renewable energy procurement to date, these projects will spur over $2.7 billion in private investment and create over 3,000 short- and long-term jobs across the state. Today's awards accelerate progress to exceed New York's goal to obtain 70 percent of the state's electricity from renewable sources by 2030 on the path to a zero-emission grid by 2040 as required by Climate Leadership and Community Protection Act. These awards will strengthen the state's current pipeline of renewables to power over 66 percent of New York's electricity from renewable sources." - NYSERDA
- More HERE

Guggenheim takeaway: *Heads up and not a surprise given NYSERDA's stated targets.*

AEP – AEP & Liberty Utilities file joint response to AG/KIUC's petition for rehearing

- "The Commission should deny the AG/KIUC's Petition for Rehearing of the Commission's May 4, 2022 Order in this docket (the "Order"). The AG/KIUC seek to relitigate issues they already addressed or could have addressed in previously filed briefing, which does not meet the legal standard for rehearing." – filing in docket
- Docket HERE

Guggenheim takeaway:*FYI and expected position of the companies.*

ERCOT – ERCOT demand could hit record this week

- Demand in the Texas ISO could surpass prior records, as heat and ongoing growth drives strong power demand
- More HERE

Guggenheim takeaway: *Heads up as the peak season gets underway.*

SMRs – Philippines reportedly considering SMRs

- More HERE

Guggenheim takeaway: *Interesting data point for potential US export markets.*

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.

Alert

May 25, 2022

Energy: Electric Utilities

Midweek Thoughts — AY, NEP, XEL, CNP, EXC, DUK, SRE, ED, AGR, NOAA

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Total agrees to acquire a 50% stake in CWEN's sponsor, which has a positive read for AY and NEP; XEL and EPA settle on coal-ash related fine in CO; MN ALJ issues a recommendation for full recovery of gas costs associated with Winter Storm Uri for XEL and CNP; EXC's Delmarva files a multi-year rate plan in MD; DUK enters a settlement with solar installers for NEM reform; NOAA forecasts an above-average hurricane season; SRE signs a participation agreement for carbon sequestration project; TX ALJ issues PD recommending stricter emission controls for the proposed Port Arthur LNG facility; SRE signs an HOA for 2.25 MTPA for the proposed Port Arthur LNG facility, and NY utilities file comments seeking clarity on proposed reimbursements for power outages.

Industry News and News from Companies in Our Coverage

AY, NEP — Total's agreement to acquire an interest in CWEN's sponsor is a positive read for AY and NEP: Total announced that it has entered an agreement with Global Infrastructure Partners to acquire a 50% interest in Clearway Energy Group (CWEN's sponsor). Specifically, Total will pay $1.6B in cash and offer a ~50% ownership in a Total subsidiary that also owns a 50.6% interest in SPWR to GIP. The transaction takes into account a $35.10 price for CWEN or a 7% premium to yesterday's close. Clearway Energy Group owns a 42% economic interest in CWEN. We believe that the transaction highlights the importance and value of renewable development portfolios and has a positive read-through for companies including AY, and NEP as well as sponsors NEE, and BEP among others that have significant renewable portfolios under development.

XEL — XEL's CO sub enters a settlement with EPA on a coal ash-related fine: EPA entered a settlement with PSCo that will result in a $925K fine and require PSCo to step up monitoring at the Comanche power plant. XEL will also commit to a groundwater monitoring system that meets EPA guidelines as specified in the EPA's rules. EPA charged XEL with violating CCR rules including monitoring and analyzing groundwater, closing a storage pond, and making relevant documents public. Comanche Units 1 and 2 are expected to retire in Dec. 2022 and Dec. 2025, respectively, and XEL has proposed a 2031 retirement for Comanche 3 in a recent IRP settlement.

XEL, CNP — MN ALJ recommends full recovery of Uri-related costs:

- **XEL —** ALJ concluded that XEL acted prudently in connection with the February 2021 storm and that the extraordinary gas costs of ~$179M that XEL incurred are recoverable from ratepayers, with no disallowance recommended. XEL has previously received a constructive decision on Uri-related gas costs in CO. The MN ALJ ruling is a positive step toward resolving Uri-related dockets since the cost recovery issue in MN was complicated by a debate around the availability of LNG storage facilities when prices spiked. XEL's LNG facilities were down for maintenance when the storm hit, which some parties pointed to as a reason for a potential disallowance. XEL pushed back on this reasoning as the facilities in question were never meant for physical hedging, but rather for emergency supply management. The MN DoC, an intervenor recommended a $120M disallowance, in line with some other intervenors.
- **CNP —** In a similar ruling, the ALJ recommended full recovery of February storm costs for CNP. The ALJ believes that the extraordinary gas costs of ~$409M incurred by CNP were prudent and that CNP should be allowed to recover all costs incurred, without recommending any disallowance as in the case of XEL, the proceeding was complicated by the debate around planning and use of LNG peak shaving facilities. The MN DoC, which intervened in the docket, recommended a $45M disallowance, other interveners recommended disallowance as well. The OAG posited that CNP and the other utilities could have avoided all extraordinary costs during the event by using financial hedges. A final MN PUC ruling is expected this summer.

EXC — Delmarva files a multi-year electric rate case in MD: EXC's MD sub is requesting a cumulative rate increase of $37.5M for the three years 2023-2025, based on a 10.25% ROE and 50.5% equity layer. DP&L is requesting (Docket No. 9681) a $22.7M increase in 2023, followed by further increases of $7.9M and $6.8M in 2024 and 2025, respectively. The net increase in rates after accelerating the refund of certain regulatory liabilities will be $11.4M in 2023, $11.6M in 2024, and $14.5M in 2025. This will be Delmarva's first multi-year plan filing in MD after the PSC adopted rules in 2020 allowing multi-year rate plans. In Delmarva's recent rate filing, the Commission ordered a $12.5M rate increase that went into effect in April. The settlement was silent on ROE and the equity layer, but

Delmarva received approval for a 9.6% ROE for certain regulatory purposes. EXC had requested 10.1% ROE in that case. A PSC decision is expected before the end of the year with new rates effective Jan 1, 2023.

DUK — DUK enters a settlement with solar installers on NEM reforms: DEC and DEP reached a settlement to make changes to the NEM policies including a delay in implementing TOU rates to at least 2026, extending the grandfathering period to 15 years (vs. the prior plan for 10 years) and implementing a bridge rate to allow rooftop solar customers to continue with NEM through 2026. The proposed bridge rate includes monthly netting at the avoided cost rate, non-bypassable charges, and a monthly minimum bill as originally proposed by DUK in its NEM proposal. The bridge rate does not however include a grid access fee or mandatory TOU rates as proposed earlier by the Company. The goal of the settlement is to provide a longer glide path from the existing mechanism to TOU rates and allow time for the parties to negotiate other incentives for rooftop solar installations. Current NEM customers can remain on their current rate plan until the end of 2026, at which point they would transition to the bridge rate or to a NEM-TOU rate in effect at the time. Effectively customers can remain on a bridge rate for 15 years less the number of years they were on the NEM rate plan prior to 2027. The settlement agreement needs Commission approval. Note that this settlement comes after solar rooftop installers appealed to the Governor spelling out objections to the settlement that DUK has filed with the NCUC regarding net metering reforms, which would have taken effect in 2023. NEM reforms stem from provisions in the NC clean energy bill HB 951 and an earlier bill HB 589 that asked for revisions in net metering rates and avoiding cross-subsidization.

ED, AGR — NY utilities seek clarity on outage-related reimbursement docket: NY's utilities filed comments on PSC staff's proposals for how to define power outages that warrant customer refunds and the procedures to implement them. The proceedings in the docket follow the Senate Bill NY SB 4824, which was signed into law by Governor Hochul. Based on this law, utilities would have to compensate customers that have been affected by widespread prolonged outages. The Commission is attempting to define the terms widespread prolonged outage and proof of loss among others to establish standards and methods needed to implement the law. Among issues raised by the utilities is the potential for unlimited financial obligations on utilities without the recourse for cost recovery. Under the staff's proposal, this would be true regardless of whether the utility is at fault for the outage or not. Other items that the utilities are seeking clarity on are how a utility can seek a waiver to allow for cost recovery and how to qualify for a widespread outage (staff recommends a 20K customer threshold while the utilities propose that it be 10% or more customers in the utility's service territory). Reply comments are due on June 13.

NOAA forecasts above average Atlantic hurricane season: NOAA is forecasting an above average hurricane season in 2022, making it the seventh consecutive above average hurricane year. NOAA is forecasting a 14 to 21 named storms (winds of 39 mph or higher), of which 6 to 10 could become hurricanes (winds of 74 mph or higher), including 3 to 6 major hurricanes (category 3, 4, or 5; with winds of 111 mph or higher). See our weekly here where we discuss summer forecasts in detail. Also, see our climate report here, where we provide a breakdown of the climate risks that each of the utilities in our coverage are exposed to. ETR would be the utility in our coverage most exposed to hurricane activity.

SRE — SRE signs participation agreement for carbon sequestration project: SRE signed a Participation Agreement with Mitsubishi, Mitsui, and Total (also partners in Cameron Phase 1) for the development of the Hackberry Carbon Sequestration project in LA. The agreement contemplates that Cameron Phase 1 and the planned Phase 2 LNG projects will serve as anchor sources for CCS. The project is expected to be the first North American carbon-capture facility designed to receive and store CO_2. The Company is seeking approval for an EPA permit to store up to 2 MTPA of CO_2.

SRE — TX Commission on Environmental Quality ALJ recommends stricter emissions controls for the proposed Port Arthur LNG project: An ALJ recommended conditional approval of the Draft Permit in a PD. The ALJ recommends that a Draft Permit be issued after revisions are made to include stricter pollution controls and lower pollution limits for certain refrigeration compression turbines. Specifically, the ALJ proposes an amendment requiring the refrigeration compression turbines to achieve NOx controls of 5 ppmvd at 15% O_2, CO controls of 15 ppmvd at 15% O_2, and the thermal oxidizers to achieve NO_x controls of 0.053 lb/MMBtu. The controls could potentially reduce pollution from the refrigeration turbines by 45% and the entire plant by 25%. When developed, Port Arthur will be a 13.5 MTPA LNG export facility.

SRE — SIP signs another HOA for Port Arthur: SIP and the RWE Supply & Trading entered into an HOA for ~2.25 MTPA LNG from SIP's Port Arthur Phase 1. The HOA aims to negotiate and finalize a 15-year LNG sale-and-purchase agreement. This announcement follows a recent announcement of an HOA between SIP and PGNiG for ~3 MTPA LNG from SIP's projects including Cameron expansion and Port Arthur. The HOA with PGNiG aims to negotiate and finalize a 20-year LNG sale-and-purchase agreement for 2 MTPA from the Cameron LNG Phase 2 project and 1 MTPA from the Port Arthur LNG project with flexibility to reallocate volumes from Cameron to Port Arthur.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

Coverage Summary

	Rating	1-Yr. Target	Return
DUK-N	SP	US$110.00	4.7%
EXC-Q	SP	US$46.00	3.3%

1Q22 Earnings Roundup: Week Four

OUR TAKE: Mixed. We provide a recap of this past week's earnings for companies under our coverage. Both **DUK** and **EXC** missed 1Q22 EPS expectations, but each seems confident in the earnings outlook for 2022 and beyond while navigating various degrees of regulatory uncertainty (we see updates from NC and IL as encouraging, but unknowns remain for each). We hope to see you in Miami next week!

In Chronological Order of Reporting:

Duke Energy Corporation (Sector Perform) – Good Progress in NC: Mixed. While we're upbeat about progress made to date and the outlook for decarbonization in NC, and though we credit management for executing well in terms of regulatory developments and cost controls, we see the peer-average valuation as reasonable given the average EPS/DPS growth and uncertainty about how the integrated NC/SC systems will handle the states' mildly divergent clean energy goals. In NC, DUK and key stakeholders continue to make progress toward implementing HB 951, the state's comprehensive clean energy legislation from 2021. Following recent stakeholder meetings on the Carbon Plan, DUK intends to file a proposed a plan that will include a range of options on May 16, targeting a 70% carbon reduction by 2030. Regulators at the NCUC will then have until year-end to determine and approve details including around the pace of transition and how each technology/fuel resource will be utilized; the plan will then be reviewed and potentially updated every two years going forward. Earlier this year, NCUC issued orders related to performance-based ratemaking (in February) and coal plant securitization of half of the remaining carrying value upon early retirement (in April). We see this legislative-driven setup as highly favorable as HB 951 will provide years of visibility into robust levels of capex required to achieve the state's and the company's ESG/decarbonization goals. Management tentatively plans to file NC rate cases for DEP in 4Q22 and for DEC in early 2023 which, among other things, will implement recently approved mechanisms including residential decoupling and multi-year plans, each of which will further improve visibility and reduce regulatory and earnings risks, in our view. That said, we continue to see challenges related to slightly mismatched decarbonization goals and strategies between NC and SC. Still, we recognize that both states are at least directionally aligned, and we agree with management that the states have had longstanding alignment on many issues; SC has also been involved in the NC process to iron out the northern state's decarbonization strategy. In IN, we're impressed with the scale of recent RFPs calling for up to 2.4GW of generation through 2027, split roughly evenly between renewables and dispatchable resources, under the state's IRP process. Recall that the 20-year plan, filed last year, calls for 7,000MW of renewables, 400MW of storage, and 2,360MW of natural gas capacity to replace coal plants, all of which will be retired by 2035. Regarding headwinds, we appreciate DUK tackling both solar challenges and inflationary pressures head-on. On solar, we agree with the company's strategy to prioritize regulated capacity additions over merchant/contracted ones given the limited availability of panels and other key pieces of equipment. Management sees no challenges to 2022 projects, and as of now, expects no delays for regulated projects in 2023. For Commercial Renewables, however, management points to a lower level of net income in 2022 given these supply chain challenges: $150m vs. the original run-rate range of $200m-$250m. In 2023, management has "line of sight" on roughly half of the planned 800MW of capacity additions for Commercial Renewables (panels are secured and PPAs are underway). Should the remaining ~400MW be delayed into 2024, that segment's income in 2023 will likely approximate the 2022 level, i.e., ~$150m. Lastly, despite general inflationary pressures, management feels confident in the company's ability to keep O&Ms flat or down slightly y/y excluding storm impacts; recall that the original budget called for a 1% reduction, but we also credit DUK for being among the most aggressive cost-cutters since the pandemic began. DUK reported 1Q22 EPS of $1.30, missing our/consensus forecasts of $1.35/$1.33.

Exelon Corporation (Sector Outperform) – Single and Loving It: Slightly negative. The slimmed-down, fully regulated, post-spinoff EXC seems well positioned to us, with guidance

Production: May 12, 2022, 16:27 ET. Dissemination: May 13, 2022, 06:22 ET.

For Reg AC Certification and important disclosures see Appendix A of this report. Analysts employed by non-U.S. affiliates are not registered/qualified as research analysts with FINRA in the U.S. unless otherwise noted within this report.

calling for above-average EPS/dividend growth of 6%-8% and a unique situation where the company's earnings actually stand to benefit from higher interest rates, at least for 2023E EPS. Still, we see the peer-average P/E as reasonable given some regulatory uncertainties. The regulatory team is as busy as usual, with several recent wins but also recent new filings. The TTM earned ROE fell from 9.2% to 8.9%, the lowest since 1Q21 and below the company's targeted 9%-10% range, though management expects to return to the range by year-end given the impacts of equity injections into the utility subsidiaries the company made in 1Q22. Further supporting earned ROEs are the recently settled Delmarva MD Electric case (approved in March), recently filed gas rate cases for Delmarva DE and PECO (orders expected in 1Q23 and by year-end 2022, respectively), and the ComEd distribution formula rate update filing (order expected in December). Encouragingly, despite the ComEd request to increase base rates, all-in residential monthly bills should fall in 2023 thanks to pass-through offsets. Overall, we like that nearly all growth capex will be covered by alternative recovery mechanisms by 2025, materially reducing rate case risks; we view EXC's regulatory environments as reasonably average overall, but with a range in terms of the quality of jurisdictions. Separately, ComEd proposed a performance metrics plan with IL regulators (ICC) earlier this year, consistent with the state's Clean Energy Jobs Act (CEJA); management expects a final order on those operational metrics by the end of September. This will help dictate the next ComEd rate case filing, coming in early 2023; the company has yet to decide if it will pursue a forward-looking test year (for rates in 2024) or a multi-year plan (to cover 2024-2027). Either way, we expect the change will result in a better financial outcome than formula rates, which have resulted in among the lowest allowed ROEs in the country given rock-bottom interest rates in recent years (even if they are rising). On the financial front, we see EXC as uniquely positioned to actually see an earnings *benefit* from rising interest rates because the uplift to formulaic distribution ROEs at ComEd has about a 4x positive EPS impact as the negative impact from rising interest expense. We also note that EXC has completed its LTD issuances planned for 2022, eliminating NT exposure to debt markets. EXC reported 1Q22 EPS of $0.64, short of our and consensus forecasts of $0.68 and $0.65, respectively.

Pertinent Data				
	Price	Rating	1-Yr. Target	1-Yr. Return
DUK-N	US$108.85	SP	US$110.00	4.7%
EXC-Q	US$45.85	SP	US$46.00	3.3%

Duke Energy Corporation (DUK-N; US$108.85)

Valuation: SoTP, using ~90% regulated utilities (18.1x 2024E EPS) and ~10% midstream/renewables (16.0x 2024E EPS)

Key Risks: Potential regulatory degradation in the Carolinas, coal ash clean up potentially not being recoverable or harming affordability in NC and SC, pace of dividend growth, and rising interest rates

Exelon Corporation (EXC-Q; US$45.85)

Valuation: 18.1x our 2024 EPS estimate

Key Risks: Uncertainties around the future of ExGen (including a potential divestiture, IL legislation, and PJM rule changes), headline and financial risks related to the bribery scandal in IL, rate cases in challenging jurisdictions, and rising interest rates

Definition of Scotiabank, Global Banking and Markets Equity Research Ratings

Scotiabank has a three-tiered rating system, with ratings of Sector Outperform, Sector Perform, and Sector Underperform. Each Research Analyst assigns a rating that is relative to his or her coverage universe or an index identified by the Research Analyst that includes, but is not limited to, stocks covered by the Research Analyst.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets Research Analyst's 12-month view on the security. Research Analysts may sometimes express in research reports shorter-term views on these securities that may impact the price of the equity security in a manner directly counter to the Research Analyst's 12-month view. These shorter-term views are based upon catalysts or events that may have a shorter-term impact on the market price of the equity securities discussed in research reports, including but not limited to the inherent volatility of the marketplace. Any such shorter-term views expressed in research report are distinct from and do not affect the Research Analyst's 12-month view and are clearly noted as such.

Ratings

Sector Outperform (SO)
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Sector Perform (SP)
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Sector Underperform (SU)
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Focus Stock (FS)
As of April 29, 2019, Scotiabank GBM discontinued the Focus Stock rating. A stock assigned this rating represented an analyst's best idea(s); stocks in this category were expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that included, but was not limited to, stocks covered by the analyst.

Other Ratings

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Tender – As of January 25, 2021, Scotiabank GBM discontinued the Tender rating.

Risk Ranking
The Speculative risk ranking reflects exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, and exceptionally high stock volatility. The Director of Research and the Supervisory Analyst jointly make the final determination of the Speculative risk ranking.

Ratings Distribution

As of April 30, 2022

	Companies Rated in Each Category		Investment Banking Service Provided in the Last 12 Months	
Rating	**Count**	**Percentage**	**Count**	**Percentage**
Sector Outperform	269	51%	87	32%
Sector Perform	234	44%	62	26%
Sector Underperform	24	5%	1	4%

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

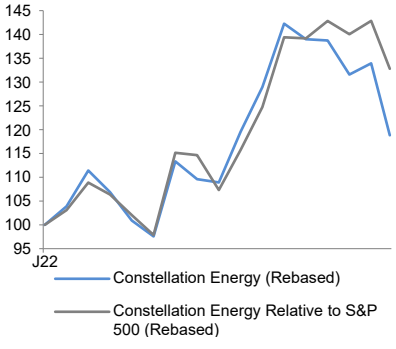
Constellation Energy	-13.6	NM	NM
Rel S&P 500	-3.4	NM	NM



Headline beat in first standalone quarter. CEG posted adjusted EBITDA of $866M in its first standalone quarter, beating our $700M estimate and $715M consensus. Without prior year quarters for the new adjusted EBITDA metric and with Winter Storm Uri affecting 1Q last year, there was relatively low visibility into this print. The base for 1Q 2021 was $465M negative and ~$750M positive adjusting for Uri. Other drivers were largely as expected with a benefit from sales out of Byron and Dresden until the Illinois CMC hedge kicks in from June.

Guidance reiterated. Adjusted EBITDA guidance was held at $2,350M-$2,750M for 2022 with gross margin essentially unchanged. For 2023 margin guidance increased $300M (+4%) and points to $650M (+9%) upside over 2022. Hedges were added for 2022 (now fully locked) and 2023 (close to 90% including CMC) while sales have also been made in the out years with CEG pointing to a similar step-up for 2024 which we now assume to be ~50% hedged.

Upbeat on policy prospects; hydrogen hub bid in the works. Prospects of securing federal policy support for nuclear are seen as having improved, but it remains to be seen whether this will materialize yet this year. CEG continue to see opportunities for their nuclear plants to be reimagined as clean energy centers and they expect to have more to share by the next call with a DOE clean hydrogen hub bid currently in the works.

Debt reduction running ahead. CEG accelerated debt reduction in 1Q taking out $2.5B and exceeding the 2022-2023 target for $1.8B-$2.2B. This is partly a function of timing and annual cash flow levels versus target metrics, but CFO comments on year-end net debt levels excluding (currently favorable) cash collateral suggested no big change to the two-year plan.

Longer-term outlook will have to wait. The stock sold off (-7%) on the day which we put down partly to a risk-off day, partly to CEG tempering near-term upside given hedging and partly to continued reticence around longer-term upside as older hedges fall off. For a crowded name, this amounted to not enough incremental good news, although we get CEG wanting to have greater visibility on policy outcomes before making further commitments to the Street. In terms of timing, an update on near-term capital allocation is planned for H2, but longer-dated (2024+) hedging and portfolio guidance seems unlikely before the year-end call.

Trimming estimates but compelling cash flow story intact. After working through the model update and folding in the first quarter of separate financials, we temper 2022E ($200M) and 2023E ($250M) while trimming $50M from our 2024E valuation year (now $3.4B). These changes notwithstanding, CEG remains a compelling cash flow story with strong leverage to forward gas and power plus growing support for nuclear. Our PT comes down $1 to $67 on lower valuation year numbers but we still only include $1 for potential PTC upside using our early April price deck and 20% probability. Moving to 100% would add ~$3/share before any multiple adder for the longer-term cash flow visibility which a PTC would likely bring.

Analyst Certification

Each of the Vertical Research Partners, LLC analysts whose names appear on the front page of this research report hereby certifies that the recommendations and opinions expressed in this report accurately reflect such analyst's personal views about the subject securities and issuers and that no part of his or her compensation was, is or will be directly or indirectly related to the specific recommendations or views contained in this research report. Analysts named in this report may have from time to time discussed with our clients or may discuss in this report or elsewhere, trading strategies or ideas that reference events that may have a near-term or medium-term impact on the market price on the securities in this report. This impact may be directionally counter to the analyst's published price targets, forecasts and other expectations. Any such trading strategies or ideas are distinct from and do not affect the analyst's fundamental rating for such securities, and the fundamental rating reflects the analyst's current 12-month view of total return as described in the analyst's report. VRP has no obligation to update, modify or amend this report or otherwise notify a recipient if any opinion, forecast or estimate contained in this report changes or becomes inaccurate. Coverage and the frequency of changes in market conditions and in both general and company-specific economic prospects make it difficult to update research at defined intervals. When updates are published is at the sole discretion of the coverage analyst or company management.

Transactions in Securities

Vertical Research Partners, LLC is a provider of equity research services. We are not a registered broker-dealer and do not trade or carry proprietary positions with firm capital in any covered or other securities.

Employees and partners of Vertical Research Partners, LLC may from time to time own beneficial positions in securities of the issuers we cover or derivatives thereof ("covered securities'). Our employees and partners are prohibited from transacting in such covered securities once we have begun the analytical process that may result in a change of recommendation, or within 48 hours after a change of recommendation or initiation of coverage. We require our employees and partners to pre-clear all transactions in covered securities with us. Please contact us if you are interested in further information.

Exelon's Fully Regulated Earnings Much More Stable

Updated Forecasts and Estimates from 11 May 2022

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Business Strategy and Outlook 11 May 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should graudally increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will

Morningstar Analysis

Fair Value & Profit Drivers 11 May 2022
Our fair value estimate is $41.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Scenario Analysis
Our uncertainty rating for Exelon is low. The company's regulated rate structure and transparent growth outlook reduce the difference between our bull- and bear scenarios.

In our bull-case scenario, we assume rate-case outcomes are 25% higher and operating expenses are 2% lower than in our base-case scenario. This results in a $5 per-share increase to our base-case fair value estimate. In our bear-case scenario, a similar decline in rate-case outcomes and increase in operating expense results in a $5 fair value estimate decrease.

If operating expenses increase by 100 basis points, our fair value estimate would drop by $2 per share, all else equal.

Economic Moat
Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Moat Trend
We assign Exelon a stable moat trend rating. The regulatory environments in Illinois, Pennsylvania, and Maryland have stabilized, allowing the company's distribution utilities fair returns. Nearly all of Exelon's rate-base growth will have rate trackers or formula rates, minimizing regulatory lag. Exelon faces the biggest challenge boosting regulated earned returns.

Exelon's stable business model and difficult-to-replicate asset base support our view that the firm's narrow moat is stable. We don't anticipate a change in the regulatory

compact between utilities and ratepayers that ensures capital providers earn a fair return on their investments. As with all regulated utilities, we think revenue caps preclude Exelon from establishing a wide economic moat.

Regulated utilities' moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations.

Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of capital. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities that we cover.

Bulls Say/Bears Say

Bulls Say

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Financial Strength

With over 4.0 times interest coverage, Exelon's financial health is sound for a regulated utility, particularly given its stable, low-risk business model. With our forecast for $36 billion of capital spending planned through 2026, Exelon will be a frequent debt issuer. The company has manageable long-term debt maturities and we anticipate it will be able to refinance its debt as it comes due, maintaining its current debt/capital ratio. We expect the company to issue $1.0 billion in equity to fund its capital investment plan, in line with management's expectations.

We expect total debt/EBITDA to remain in the 4.5-5.0 times range. Exelon will target a 60% dividend payout ratio. We expect dividend growth in line with our 7% annual earnings per-share growth forecast through 2026.

Risk & Uncertainty

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying

practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation 11 May 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think Exelon's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results 09 May 2022
We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022
We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities

Analyst Notes

increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate 02 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

Analyst Notes

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

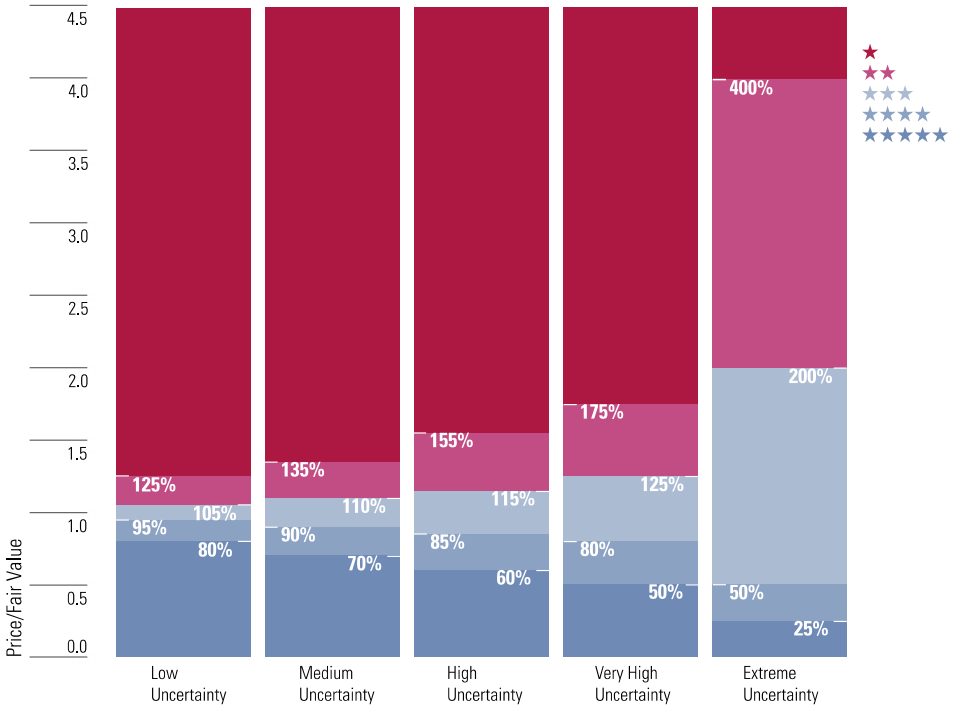
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

The analysis within this report is prepared by the person(s) noted in their capacity as an analyst for Morningstar's equity research group. The equity research group consists of various Morningstar, Inc. subsidiaries ("Equity Research Group)". In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Equity Research Group commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis and Morningstar Star Rating for stocks are statements of opinions; they are not statements of fact.

The Equity Research Group believes its analysts make a reasonable effort to carefully research information contained in the analysis. The information on which the analysis is based has been obtained from sources believed to be reliable such as, for example, the company's financial statements filed with a regulator, company website, Bloomberg and any other the relevant press sources. Only the information obtained from such sources is made available to the issuer who is the subject of the analysis, which is necessary to properly reconcile with the facts. Should this sharing of information result in considerable changes, a statement of that fact will be noted within the report. While the Equity Research Group has obtained data, statistics and information from sources it believes to be reliable, neither the Equity Research Group nor Morningstar, Inc.performs an audit or seeks independent verification of any of the data, statistics, and information it receives.

Exelon's Fully Regulated Earnings Much More Stable

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should graudally increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

MORNINGSTAR®

Exelon Corp EXC ★★ 11 May 2022 20:42, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.62 USD 11 May 2022	41.00 USD 11 May 2022 20:37, UTC	1.16	45.83 USD Bil 10 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 11 May 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think Exelon's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes Archive

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results

Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Exelon Corp EXC ★★ 11 May 2022 20:42, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.62 USD 11 May 2022	41.00 USD 11 May 2022 20:37, UTC	1.16	45.83 USD Bil 10 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate Andrew Bischof, CFA, CPA, Senior Equity Analyst, 2 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for

growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Exelon Edging Closer to Spinning Off Merchant Unit; Reports Q3 Earnings Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Nov 2021

We are increasing our fair value estimate to $48 per share from $45 after Exelon announced third-

Exelon Corp EXC ★★ 11 May 2022 20:42, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.62 USD 11 May 2022	41.00 USD 11 May 2022 20:37, UTC	1.16	45.83 USD Bil 10 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

quarter adjusted earnings per share of $1.09 compared with $1.04 in the same year-ago period. Management narrowed their full-year EPS guidance to $2.70-$2.90 from their previous $2.60-$3.00 range. Our fair value estimate increase is due to an increase in Morningstar's midcycle natural gas price to $3.30 per thousand cubic feet from $2.80, which boosted the nuclear fleet's midcycle margins. Our narrow moat and stable moat trend ratings are unchanged.

Recently management secured $700 million in subsidies from Illinois legislation that will keep the company's Dresden and Byron nuclear plants operating. We assume that subsidies for the plants will continue beyond 2025 given the role nuclear must play as Illinois pursues its aggressive clean energy goal. Management has successfully lobbied for subsidies across its merchant nuclear fleet. Policymakers view of nuclear generation is beginning to align with our view that nuclear' s clean energy attributes and reliable generation will be instrumental in meeting aggressive emission reduction goals.

Exelon continues to progress on the spin-off of its competitive merchant unit. The company has received FERC approval, and continues progress toward receiving approvals from New York regulators and the Nuclear Regulatory Commission. Exelon has named a management team for the new unit, to be named Constellation, which we view is a sign management is confident they can complete the spin-off. Management expects to complete the transaction in the first quarter of 2022.

In the quarter, rate increases and ongoing utility investments supported earnings. Lower capacity revenue, increased nuclear outage days, and unrealized and realized gains on equity investments had a negative impact on generation segment earnings. Trailing 12-month returns were 9.3%, down from 9.4% last quarter.

Exelon Secures Another Legislative Win; Byron and Dresden to Remain Open Andrew Bischof, CFA, CPA, Senior Equity Analyst, 14 Sep 2021

We are increasing our Exelon fair value estimate to $45 per share from $42 after Illinois lawmakers passed energy legislation that would provide subsidies to Exelon's Dresden and Byron nuclear plants. Gov. J.B. Pritzker has indicated he plans to sign the legislation, and Exelon has said it is in the process of refueling both plants. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon has taken a hard line with Illinois policymakers on the future of its unregulated nuclear facilities in the state. Last year, Exelon announced plans to close the two nuclear generating stations. After filing Post Shutdown Decommissioning Activity Reports with the Nuclear Regulatory Commission in July, Exelon is now preparing to refuel both Byron and Dresden nuclear facilities. We had previously estimated the plants were running at break-even, resulting in no change to our fair value estimate.

The $700 million in subsidies Exelon will receive from the legislation was the primary source of our fair value estimate increase. We assume that the subsidies will continue beyond our five-year forecast, in

Exelon Corp EXC ★★ 11 May 2022 20:42, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.62 USD 11 May 2022	41.00 USD 11 May 2022 20:37, UTC	1.16	45.83 USD Bil 10 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

part to help the state meet the legislation's 100% clean energy target by 2050. The legislation also sets targets for Illinois that include zero carbon emissions by the end of 2045 and 50% renewable energy by 2040. Dresden's operating license expires later this decade and Byron's operating license expires for both of its units by 2046. Time-value appreciation since our last update increased our fair value estimate $1 per share.

We previously thought Exelon faced an uphill battle to secure additional subsidies for its nuclear fleet in the state, in large part due to the deferred prosecution agreement Exelon entered into last year related to the company's lobbying practices in the state. However, the state's clean energy goals, and the contribution of Exelon's nuclear fleet to those goals, ultimately led to successful lobbying efforts.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

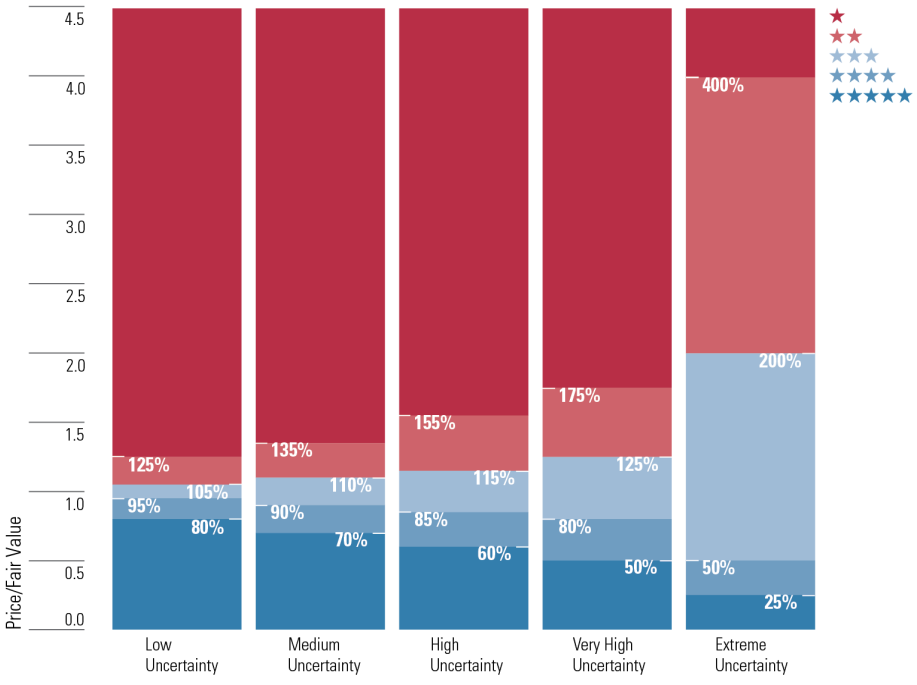
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close

Morningstar Equity Research Star Rating Methodology



tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the suitability of such investments and recommendations in the light of their own investment objectives, experience, taxation status and financial position.

The information, data, analyses and opinions presented herein are not warranted to be accurate, correct, complete or timely. Unless otherwise provided in a separate agreement, neither Morningstar, Inc. or the Equity Research Group represents that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction the recipient is located.

Except as otherwise required by law or provided for in a separate agreement, the analyst, Morningstar, Inc. and the Equity Research Group and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions within the report. The Equity Research Group encourages recipients recipients of this report to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an in vestment decision and when deemed necessary, to seek the advice of a legal, tax, and/or accounting professional.

Parties filed opening comments to the proposed decision on January 7, 2022 and reply comments on January 14, 2022. In response to these comments, I am setting aside submission of the proceeding record to further explore three elements of the proposed decision: (A.) the glide path approach, (B.) non-bypassable charges on gross consumption; and (C.) community distributed energy resources." - ALJ

Guggenheim takeaway: *Heads up on what remains an extremely noisy process. For key takes, see note from our renewables analyst Joe Osha HERE*

Power – Talen announces restructuring and recapitalization

- "Talen Energy Corporation ("TEC") [PRIVATE] today announced a major step in its corporate transformation with a recapitalization transaction that is expected to greatly strengthen the financial position of its Talen Energy Supply LLC ("TES" or the "Company") subsidiary. The transaction will include a new equity investment of up to $1.65 billion, which will accelerate TES' clean power transformation, advance carbon-free data center growth initiatives, and maximize value to stakeholders" - release
- "In order to effectuate the consensual restructuring contemplated by the RSA, TES and certain of its subsidiaries have voluntarily filed for reorganization under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the Southern District of Texas. Pursuant to the RSA, the Company plans to confirm its plan of reorganization approximately six months following the commencement of this restructuring." - release

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:42 AM.

Guggenheim takeaway: *Interesting FYI and not a surprise given media coverage of liquidity issues at the company for some time. We remain on the lookout for any potential asset divestitures as the process advances.*

ERCOT – Texas poised to set May demand record amid heatwave

- The state is reportedly poised to hit an all-time high for May demand in the coming days as temperatures remain unseasonably high across the region
- More HERE

Guggenheim takeaway: *As we highlighted yesterday. While lower outages and slightly lower peak temperature forecasts have taken some pressure off the emergency, the market remains tight in the NT.*

VT/Policy – Governor vetoes clean heat standard; legislators discuss override

- The governor vetoed legislation that would have required a step down in fuels sold for heating over time, including 15% by 2025 and 40% by 2030
- "What the Legislature has passed is a bill that includes some policy, with absolutely no details on costs and impacts, and a lot of authority and policy making delegated to the Public Utility Commission (PUC), an unelected board" – Governor
- "If this becomes law, every seller of oil heat, propane, kerosene, natural gas, and coal will have to register with the PUC, show how much fuel they bought, how much fuel they sold, where it came from, and where it was delivered" - Vermont Fuel Dealers Association
- More HERE

Guggenheim takeaway: *Interesting battle in one of the more environmentally liberal states as it is also home to significant winter heating demand.*

NRG/PJM – Indian River 4 RMR draws criticism at FERC

- Multiple parties have filed comments and protests on the MD plant's RMR agreement, which could see it run through most of 2026
- "The Market Monitor appreciates NRG's willingness to continue to operate, consistent with good utility practice and NRG's and PJM's reliability obligations. NRG has not, however, proposed just and reasonable compensation for operating the unit and its filing should be rejected." - IMM
- ER22-1539 - More HERE

Guggenheim takeaway: *Minor FYI and part of the process for RMRs (e.g., Mystic or Midway-Sunset).*

NRG/ERCOT – WA Parish Unit 8 experiences fire

- The hydrogen fire reportedly broke out late Sunday night at unit 8, and required an associated release of steam in the unit
- According to several outlets no injuries were reported, and other units at the site are expected to stay online
- More HERE

Guggenheim takeaway: *Heads up.*

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings

Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite

Location: TBD

Tuesday, July 12th

11:30 AM | Lunch

Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience

Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game

Southern Company C-Suite will host in their private box. Dinner will be served.

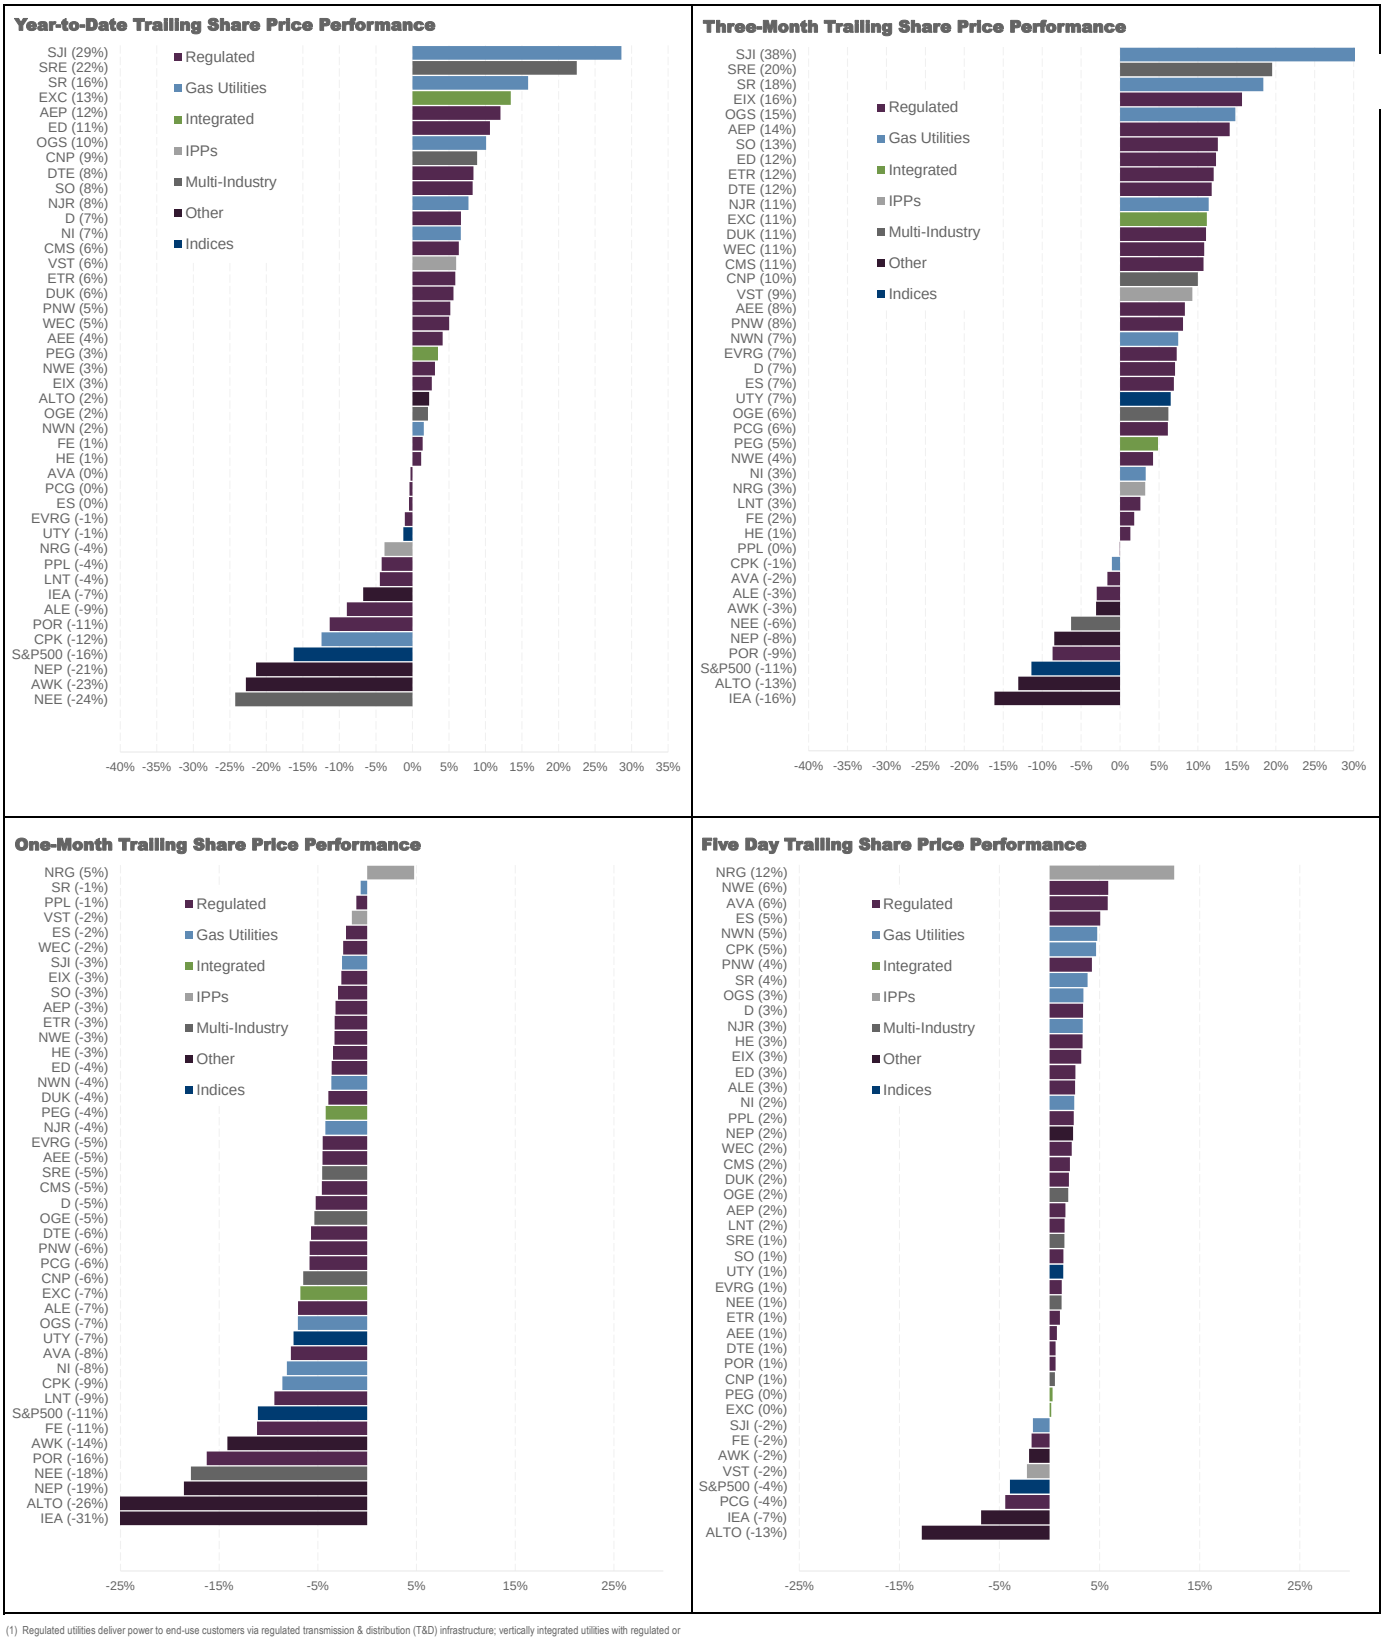
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC managed or co-managed a public offering of securities for Duke Energy Corporation during the past 12 months.

Duke Energy Corporation is or was during the 12-month period preceding the date of the distribution of this report a client of Guggenheim Securities, LLC. Guggenheim Securities, LLC provided Duke Energy Corporation investment banking services.

Guggenheim Securities, LLC or its affiliates received compensation for investment banking services from Duke Energy Corporation during the past 12 months.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Duke Energy Corporation, Exelon Corporation and NRG Energy, Inc. in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Duke Energy Corporation (DUK) as of 05-09-2022

Created by: BlueMatrix

Rating and Price Target History for: Exelon Corporation (EXC) as of 05-09-2022

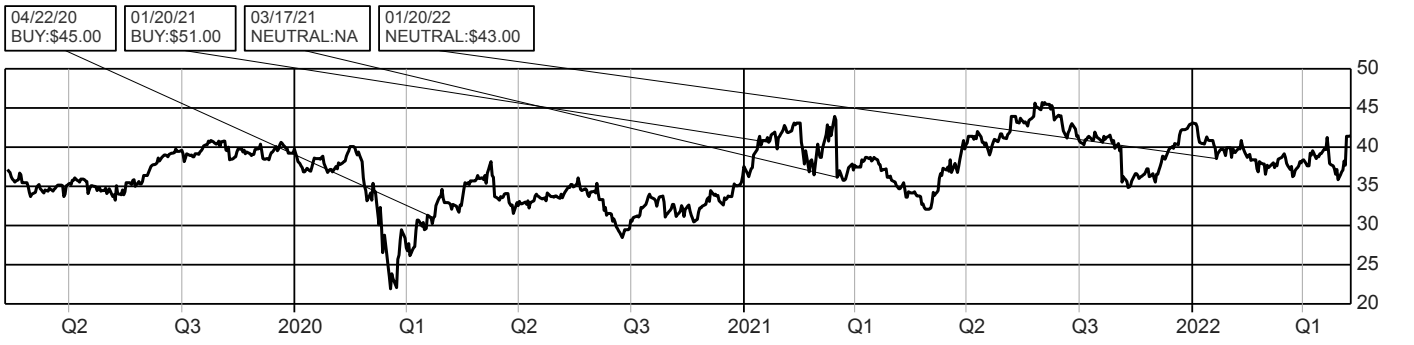
Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:42 AM.

Rating and Price Target History for: NRG Energy, Inc. (NRG) as of 05-09-2022



Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

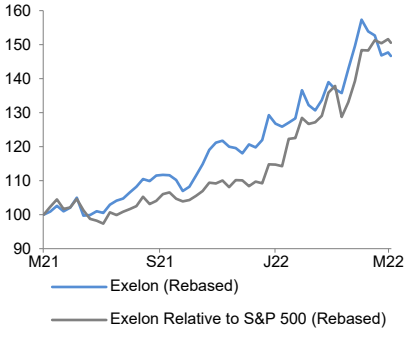
Total Return	7.7%

Capitalization Data (mn USD$)	
Shares Out (mn)	980.0
Market Cap	45,795
Net Debt	36,976
Enterprise Value	82,771

Performance (%)	1M	YTD	1Y
Exelon	-6.8	13.5	46.7
Rel S&P 500	1.5	31.1	50.6



First standalone quarter. Exelon's first standalone quarter since separating from ExGen (now CEG) delivered $0.64 of operating EPS versus our $0.65E and $0.65 consensus. GAAP EPS were $0.49 and included a deferred tax adjustment related to the separation. Under accounting rules, Exelon was required to recognize $0.02 of operating expense for January overhead that was allocated to (and paid by) ExGen before the separation. This is not expected to recur.

PECO came in ahead of our estimate and BGE missed. Looking at the segments, the combined utilities missed our estimate by a penny with Corporate rounding to a penny beat. PECO came in $0.03 above our number on higher distribution rates with less of an offset from weather and O&M than we had penciled in. BGE missed us by $0.03 on higher D&A and other costs.

Guidance and growth rate reaffirmed. Guidance for 2022 was reiterated at $2.18-$2.32 and EXC also reaffirmed their 6-8% earnings CAGR through 2025. We initially missed the growth rate but it was lurking towards the back of the slide deck. The base for 6-8% continues to be the $2.10 guidance midpoint for 2021. Average trailing 12M earned ROE dropped to 8.9% through March from 9.2% at year-end but should be back in the 9-10% target range by year-end. This was attributed to the timing of utility equity contributions from the parent, with the 10-Q revealing $1.1B infused during 1Q including over $700M going into PHI.

Rising rates an earnings benefit. EXC has positive leverage to rising interest rates, at least through 2023 while the formula ROE for ComEd remains pegged to a fixed 580bp margin over the average 30-Year Treasury yield. Management sensitivities show $0.04 per 50bp of yield, with an offsetting negative $0.01 from short-term financing cost exposure at the parent. Guidance for ComEd was set based on year-end 30-Year yields of 1.94% and the YTD average is running at almost 2.45%. This implies ~$0.04 of potential upside with a penny having materialized in first quarter. If the 30-Year stays where it is now through year-end we could see ~95bp upside and ~$0.07 of favorability to guidance holding all else equal.

EV opportunity in focus; ComEd 2023 rate offsets. EXC spent time on the call reviewing some current investment projects as well as framing out longer-term opportunities related to anticipated electric vehicle adoption in their service territories. While not a huge piece of the current growth and spending plan, there should be opportunities to drive incremental grid investment while aligning with state policy goals. Another notable item was that EXC see the recently filed ComEd formula rate for 2023 resulting in a net reduction to customer bills once latest power procurements, capacity prices and CMC credits are taken into account. This is a favorable differentiator for ComEd, particularly versus the $199M headline increase.

Estimates and PT unchanged. We leave headline estimates unchanged and update segment modeling now that we have the standalone balance sheet. Our price target remains $49 and incorporates a premium of 5% over our 18x 2024E target regulated multiple.

Analyst Certification

Each of the Vertical Research Partners, LLC analysts whose names appear on the front page of this research report hereby certifies that the recommendations and opinions expressed in this report accurately reflect such analyst's personal views about the subject securities and issuers and that no part of his or her compensation was, is or will be directly or indirectly related to the specific recommendations or views contained in this research report. Analysts named in this report may have from time to time discussed with our clients or may discuss in this report or elsewhere, trading strategies or ideas that reference events that may have a near-term or medium-term impact on the market price on the securities in this report. This impact may be directionally counter to the analyst's published price targets, forecasts and other expectations. Any such trading strategies or ideas are distinct from and do not affect the analyst's fundamental rating for such securities, and the fundamental rating reflects the analyst's current 12-month view of total return as described in the analyst's report. VRP has no obligation to update, modify or amend this report or otherwise notify a recipient if any opinion, forecast or estimate contained in this report changes or becomes inaccurate. Coverage and the frequency of changes in market conditions and in both general and company-specific economic prospects make it difficult to update research at defined intervals. When updates are published is at the sole discretion of the coverage analyst or company management.

Transactions in Securities

Vertical Research Partners, LLC is a provider of equity research services. We are not a registered broker-dealer and do not trade or carry proprietary positions with firm capital in any covered or other securities.

Employees and partners of Vertical Research Partners, LLC may from time to time own beneficial positions in securities of the issuers we cover or derivatives thereof ("covered securities'). Our employees and partners are prohibited from transacting in such covered securities once we have begun the analytical process that may result in a change of recommendation, or within 48 hours after a change of recommendation or initiation of coverage. We require our employees and partners to pre-clear all transactions in covered securities with us. Please contact us if you are interested in further information.

Other Disclosures

Although the information contained in this document has been obtained from sources we believe to be reliable, the accuracy and completeness of such information and the opinions expressed herein cannot be guaranteed. We make no warranties or representations relating to the accuracy, completeness, usefulness or timeliness of such information and opinions. We assume no responsibility to anyone relying on such information or opinions for their particular purposes. Such information and opinions are subject to change without notice, and we assume no responsibility to update or amend them. Calm Breeze in the Windy City

Bottom Line:

EXC reported 1Q22 EPS of 64c versus our 66c and consensus 65c estimates. Year-over-year results increased by 9c with the utilities adding ~+3c and the HoldCo adding 6c. **The company reaffirmed 2022 guidance at $2.18-2.32 (Street at $2.26 and $2.25 for BMO Research) as well as its 6-8% EPS growth for 2021-2025. We maintain our Outperform rating, but our target price declines to $51 as we mark to market our group multiples.** Our 2022-2025 EPS estimates remain unchanged at $2.25, $2.41, $2.60, and $2.78.

Key Points

Management continues to expect to issue a maximum of $1bn of equity through 2025. The company did not have additional explicit details on the timing or method of equity issuance, but management reiterated its commitment to maintaining a strong balance sheet and a desire to match up any issuance with the timing of cash needs rather than simply issuing the equity to have it completed. **However, we do not see the equity as a concern given that in aggregate it only represents ~2% of the company's market cap and if done ratably it would only be ~54bps per year. Nevertheless, if the company were to issue the entire balance tomorrow at ~$46, we estimate only about a ~$0.03 headwind to 2022 EPS and ~$0.05 to 2023 EPS given the full-year effect, which is rather small and manageable compared to our current 2022 and 2023 estimates of $2.25 and $2.41, respectively.**

For IL, the company filed proposed metrics with the ICC in January and workshops will continue throughout the year. ComEd will need to decide if it is going to opt into the new Multi-Year Rate Plan or proceed down a traditional single-year forward-looking test year by January 20, 2023. For 2023, the company will operate under its final year with formula rates and reiterated that every 50bps of ROE change is worth about $0.04 EPS on a full-year basis. On a consolidated basis, the company also has some exposure to floating rate debt, where every 50bps rate increase is a roughly $0.01 impact that partially offsets the ROE benefit.

Bottom Line: EXC's results were in line to start the year and the company reaffirmed its 2022 EPS guidance and long-term growth rate**. Furthermore, management continues to execute on its plan, and we expect continued execution to drive multiple expansion.**

Our Thesis

We see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans. We believe the company's low-risk T&D business profile, strong and visible fundamental growth outlook, and supportive regulatory environment position the company well to drive multiple expansion.

New Scenarios

Valuation

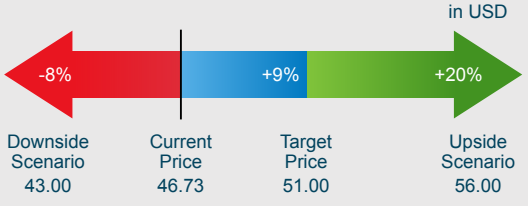
We value EXC on a sum-of-the-parts valuation. Our framework begins with the relevant sector average P/E multiple using 2024E EPS as a base, which we then adjust (premium, discount, or no change) to reflect the relative fundamentals for each segment.

Upside Scenario $56.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $43.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.



Key Catalysts

We see EXC management now in execution mode post its separation from Constellation Energy. With nearly 75% of the company's revenues decoupled from volumes and 100% of its capital covered through alternative recovery mechanisms, we see EXC achieving our target price over the next 12-18-month as management executes against its capital and regulatory plans.

Company Description

Exelon is the largest utility by customer count with over 10mm electric and natural gas customers spread across its six-state footprint. It is the fourth largest utility by rate base with one of the lowest business risk and ESG-friendly profiles given the company's pure T&D asset mix with electric distribution and transmission representing over 85% of rate base.

EXC-NSDQ Research

Glossary

Company Models

Calm Breeze in the Windy City

Bottom Line: EXC's results were in line to start the year and the company reaffirmed its 2022 EPS and long-term growth ranges. **Furthermore, management continues to execute on its plan, and we expect continued execution to drive further multiple expansion. We maintain our Outperform rating, but our target price declines to $51 as we mark to market our group multiples.** Our 2022-2025 EPS estimates remain unchanged at $2.25, $2.41, $2.60, and $2.78.

EXC reported 1Q22 EPS of 64c versus our 66c and consensus 65c estimates. Year-over-year results increased by 9c with the utilities adding ~+3c as ComEd was flat, BGE declined (2c), PHI added 1c, and PECO added 4c. The HoldCo added 6c as (1c) of Other, which reflects higher interest expense, was offset by 7c of BSC allocations adjustment for discontinued operations with ExGen. The TTM ROE was down modestly to 8.9% from 9.2% in 4Q21, but the company reaffirmed its 9-10% target range by year-end as the timing of equity infusions balances out. **The company reaffirmed 2022 guidance at $2.18-2.32 (Street at $2.26 and $2.25 for BMO Research) as well as its 6-8% EPS growth for 2021-2025.**

Management also reaffirmed the ~$29bn capital plan over the 2022-2025 period and continues to expect to issue a maximum of $1bn of equity through 2025. The company did not have additional explicit details on the timing or method of equity issuance, but management reiterated its commitment to maintaining a strong balance sheet and a desire to match up any issuance with the timing of cash needs rather than simply issuing the equity to have it completed. **However, we do not see the equity as a concern given that in aggregate it only represents ~2% of the company's market cap and if done ratably it would only be ~54bps per year. Nevertheless, if the company were to issue the entire balance tomorrow at ~$46, we estimate only about a ~$0.03 headwind to 2022 EPS and ~$0.05 to 2023 EPS given the full-year effect, which is rather small and manageable compared to our current 2022 and 2023 estimates of $2.25 and $2.41, respectively.** Of note, we see no credit-related pressure for the company to accelerate its equity requirements as the company's credit ratings are stable at all three agencies and it currently has a healthy cushion above its 12% downgrade threshold, which should allow it flexibility on the timing of any equity issuance.

In Illinois, the company filed proposed metrics with the ICC in January and workshops will continue throughout the year. ComEd will need to decide if it is going to opt into the new Multi-Year Rate Plan or proceed down a more traditional single-year forward-looking test year proceeding by January 20, 2023. Through 2023, the company will operate under its final year of formula rates and reiterated that every 50bps of ROE change is worth about $0.04 EPS on a full-year basis. Results for 1Q reflect a roughly ~$0.01 benefit for 1Q, but rates have continued to backup further in 2Q. On a consolidated basis, the company also has some exposure to floating rate debt, where every 50bps rate increase is a roughly $0.01 impact that partially offsets the ROE benefit. Going forward, in the multi-year rate plan the ROE would be set at a level deemed reasonable by the ICC. While that process remains a tad opaque, we note that recent gas awards in the state have been in the ~9.7% range, which is materially higher than the 7.85% formulaic ROE in ComEd's most recent filing.

In other updates, the company provided a breakdown of the opportunity to support customers and the jurisdictions' EV targets by providing fuel savings for customers and reduced emissions. The company expects a ~20x increase in EVs across its current jurisdictions by 2045, based on the EV targets set by the states. Though still in its infancy, we see the state policies supporting and promoting EV adoption throughout EXC's service territories as a secular tailwind to both load growth and additional capital investment.

On the regulatory front, the company had the following updates:

- On January 14, DPL DE filed an application with the DPSC seeking a $14.5mm increase in gas distribution base rates, reflecting a 10.3% ROE, to support major enhancements that are being made to the local natural gas system and key projects to strengthen and create additional capacity

in the company's natural gas delivery system that have been critical to meet growing load. As permitted by Delaware law, DPL DE will implement full allowable rates on August 14, subject to refund.

- On March 2, DPL MD received the final order for its distribution electric rate case with the MDPSC approving the proposed settlement order by the Chief Public Utility Law Judge that recommended a $12.5mm increase in annual electric distribution rates, reflecting a ROE of 9.6%.

- On March 31, PECO filed a gas distribution rate case with the PAPUC, seeking a revenue increase of $82mm to support significant investments in critical infrastructure which will modernize and enhance the natural gas system and allow EXC to continue delivering safe and reliable natural gas service and reduce methane emissions. In addition, the filing proposes enhanced energy efficiency and customer safety programs, increased customer assistance with additional low-income funding, and the continuation of small business grant programs. The company expects an order in 4Q22.

- On April 15, ComEd filed its annual distribution formula rate update with the ICC, seeking a $199mm increase to electric distribution base rates that results in a $2.20 increase in the average monthly residential bill starting January 2023. While ComEd is requesting a delivery charge increase, there will be offsets. Specifically, when considering higher energy prices based on the recent procurement auction and forwards offset by lower capacity prices, the carbon mitigation credits, and accelerated tax benefits, the company currently estimates a net reduction to the average monthly residential bill. ComEd's residential customer rates next January are expected to be at least 10% below the average of rates in the ten largest U.S. metropolitan areas. In its final formula rate filing, ComEd's request supports investments needed to sustain the record level reliability performance for residential and commercial customers and helps advance the goals of the Climate and Equitable Jobs Act passed in Illinois to address climate change, create clean energy jobs, ensure equity, and prioritize a just transition to a green economy. Management expects to receive an order by early December.

Company Specific Disclosures

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to Phillips Edison & Company, Inc. within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to Phillips Edison & Company, Inc. within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to Phillips Edison & Company, Inc. within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from Phillips Edison & Company, Inc. within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months from Phillips Edison & Company, Inc..

Disclosure 6A: Phillips Edison & Company, Inc. is a client (or was a client) of BMO Nesbitt Burns Inc., BMO Capital Markets Corp., BMO Capital Markets Limited or an affiliate within the past 12 months: A) Investment Banking Services

Disclosure 6C: Phillips Edison & Company, Inc. is a client (or was a client) of BMO Nesbitt Burns Inc., BMO Capital Markets Corp., BMO Capital Markets Limited or an affiliate within the past 12 months: C) Non-Securities Related Services.

Disclosure 9B: BMO Capital Markets makes a market in Exelon and Phillips Edison & Company, Inc. in United States.

Disclosure 19: BMO Capital Markets Corp. ("BMO CMC") is acting as an agent to Phillips Edison and Company, Inc. on an at-the-market equity offering program. BMO CMC is being paid a fee based on the program. BMO CMC follows information control procedures which prevent its research analysts who are issuing research from having access to material non-public information received by BMO CMC's investment banking personnel in connection with the transaction. Accordingly, it is possible that individual employees at BMO CMC may have material non-public information or opinions which are not included in, and may not be consistent with, the information and opinions in this research report.

Methodology and Risks to Target Price/Valuation for Exelon (EXC-NSDQ)

Methodology: We value EXC using our sum-of-the-parts valuation analysis to derive our target price. Our valuation takes into account the quality of EXC generation assets relative to its peers and the company's regulated business rate base growth and funding sources.

Risks: Failure to pass a version of the "Clean Energy Jobs Act" in the upcoming legislative session that sufficiently expands financial support for EXC Gen's nuclear plants would cause us to re-evaluate our rating, all else equal. The Governor's opposition to the existing Formulaic Based Rate Plan in IL may result in a new set of regulations that could be adverse to the company's ComEd Utility. Nuclear operations are subject to additional safety and regulatory oversight.

Methodology and Risks to Target Price/Valuation for Phillips Edison & Company, Inc. (PECO-NSDQ)

Methodology: Our target price is based on a combination of our NAV and DCF analyses, taking into account FFO/AFFO multiples relative to peers, other REITs and earnings expectations.

Risks: Primary risks including a softening leasing environment and elevated store closings, rising interest rates, rising capitalization rates, the health of the economy and fluctuations in occupancy/rent levels, availability and cost of capital, financial stability of tenants, new competitive supply, environmental matters, and higher costs of maintaining vacant space (labor, energy/utilities, repairs and maintenance, etc.).

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Other Important Disclosures

For Important Disclosures on the stocks discussed in this report, please go to https://researchglobal0.bmocapitalmarkets.com/public-disclosure/ or write to Editorial Department, BMO Capital Markets, 3 Times Square, New York, NY 10036 or Editorial Department, BMO Capital Markets, 1 First Canadian Place, Toronto, Ontario, M5X 1H3.

Dissemination of Research

Dissemination of fundamental BMO Capital Markets Equity Research is available via our website https://researchglobal0.bmocapitalmarkets.com/. Institutional clients may also simultaneously receive our fundamental research via email and/or via services such as Refinitiv, Bloomberg, FactSet, Visible Alpha, and S&P Capital IQ.

BMO Capital Markets issues a variety of research products in addition to fundamental research. Institutional clients may request notification when additional research content is made available on our website. BMO Capital Markets may use proprietary models in the preparation of reports. Material information about such models may be obtained by contacting the research analyst directly. There is no planned frequency of model updates.

The analyst(s) named in this report may discuss trading strategies that reference a catalyst or event that may have a near or long term impact on the market price of the equity securities discussed. In some cases, the impact may directionally counter the analyst's published 12 month target price and rating. Any such trading or alternative strategies can be based on differing time horizons, methodologies, or otherwise and are distinct from and do not affect the analysts' fundamental equity rating in the report.

Research coverage of licensed cannabis producers and other cannabis-related companies is made available only to eligible approved North American, Australian, and EU-based BMO Nesbitt Burns Inc., BMO Capital Markets Limited, Bank of Montreal Europe Plc and BMO Capital Markets Corp. clients via email, our website and select third party platforms.

~ Research distribution and approval times are provided on the cover of each report. Times are approximations as system and distribution processes are not exact and can vary based on the sender and recipients' services. Unless otherwise noted, times are Eastern Standard and when two times are provided, the approval time precedes the distribution time.

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory

authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

Price Target Change — May 9, 2022

Diversified Electric Utilities
Regulated Electric Utilities

DUK/EXC: Q1 Earnings Round Up

Our Call

DUK & EXC reported Q1'22 EPS on 5/9. We continue to rate both shares of both DUK & EXC Equal Weight as we think the in-line P/E multiples vs. peers are fair. That being said, the stories continue to improve. For DUK, an improving regulatory backdrop in NC + substantial energy transition opportunities post '25. For EXC, planned wires investment plus a likely improvement in ComEd's allowed ROE could result in a strong 8% EPS CAGR.

DUK. Mgmt. affirmed '22 EPS guidance of $5.30-5.60 along with the 5-yr EPS CAGR of 5-7%. The Department of Commerce's recent decision to investigate potential circumvention of AD/CVD in four southeast Asian countries is not expected to impact DUK's '22 solar plans. That being said, depending on the duration of the investigation, ~400 MW, or 50%, of Commercial Renewables '23 solar projects planned for '23 could slip into '24. All else equal, we believe this poses a roughly $0.05 impact to EPS. The amount is negligible (<1% of annual EPS power) and mgmt. does not believe that it poses a risk to the 5-7% growth rate in '23.

Separately, DUK continues to pursue substantial energy transition opportunities in the Carolinas & Indiana (pending RFP for 2,400 MW of generation). In NC, DUK plans to file a Carbon Plan with the NCUC on 5/16, which will include substantial solar/battery storage options along with onshore & offshore wind and new nuclear (small modular reactors). The outcome of the Carbon Plan will be a key driver of DUK's post '25 capex outlook. No change to our 22-26E EPS of $5.45, $5.80, $6.15, $6.50 & $6.80. We reiterate our Equal Weight rating and increase our forward price target to $120/sh (20.5-21.0X our 23E EPS) from $109/sh on materially higher peer group multiples. On a P/E multiple basis, shares trade in-line with Regulated Electric peers on our 22-24E EPS, which we view as fair given in-line EPS growth prospects (6%).

EXC. Mgmt. affirmed the '22 EPS guidance range of $2.18-2.32. While acknowledging that ComEd's formulaic ROE could be an EPS tailwind (positively linked to the 30-yr Treasury yield), mgmt. also pointed out that the higher interest rates will likely be, at least, a partial offset. Under ComEd's current construct, the allowed ROE is premised on the average 30-Yr Treasury yield for '22 plus 580 bps. The EPS sensitivity is +/- $0.04 for every 50 bps change. Year-to-date, the average 30-Year Treasury yield is ~2.4%, or 50 bps higher than the '21 year-end yield. Separately, mgmt. pointed out that a 50 bps move in interest rates across the company's variable debt has a $0.01 impact on EPS.

We maintain our 22-26E EPS of $2.30, $2.42, $2.65, $2.83 & $3.05, which represents an 8% CAGR off the 21A EPS of $2.08 (EXC guidance is 6-8%). We point out that our earned ROE assumptions for ComEd are 8.0-8.5% in '22 & '23 and 8.5-9.0% thereafter, which reflects our belief that the allowed ROE will be 9%+ once the new regulatory compact is implemented (either traditional rate-making or a performance-based model). We reiterate our Equal Weight rating and nudge down our forward price target to $50/sh from $52/sh on lower peer group multiples since our price target was last updated. We apply the '22 peer group multiple of 20.5-21.0X to our 23E EPS. That said, a case can be made for a relative premium to peers given EXC's strong growth prospects (8% CAGR based on our outlook) and low risk regulated wires & pipes strategy.

Acronyms

AD/CVD - Antidumping/Countervailing Duties

NCUC – North Carolina Utilities Commission

Investment Thesis, Valuation and Risks

Duke Energy Corp. (DUK)

Investment Thesis

Our Equal Weight rating reflects DUK's attractive regulated utility franchise and sharpened strategic focus tempered by valuation considerations.

Target Price Valuation for DUK: $120.00 from $109.00

Our $120/sh price target is based on P/E multiple and dividend discount analyses. We apply a P/E multiple of 20.5-21.0X (in line with the '21 Large/Mid Cap Regulated Electric peer group median) on our 23E EPS of $5.80. Separately, our DDM supports a price target of $120/sh. Key assumptions include long-term earnings and dividend growth of 2.5% and a discount rate of 6.75%.

Risks to Our Price Target and Rating for DUK

Risks to our price target include stronger operational execution & higher capex than embedded in our outlook (upside risk) and unexpected adverse regulatory outcomes (downside risk).

Exelon Corporation (EXC)

Investment Thesis

Our Equal Weight rating reflects our view that the current share price adequately reflects EXC's risk/reward proposition. Positive attributes including a healthy projected EPS CAGR (8%) and wires-centric asset mix are balanced by our view that the company's regulatory jurisdictions are average to below average.

Target Price Valuation for EXC: $50.00 from $52.00

Our $50/sh price target is based on a P/E multiple analysis. We apply a P/E of 20.5-21.0X to our 23E EPS of $2.42. Our multiple is in-line with the '22 Regulated Electric peer group median as we balance positive features (strong 8% EPS CAGR and predominantly electric wires strategy) with our perception that EXC's regulatory jurisdictions are average to below average. We apply the '22 median to our 23E EPS due to the forward-looking nature of our price target.

Our DDM analysis supports a forward price target in excess of $55/sh. Key assumptions include long-term earnings and dividend growth of 3% and a 6.75% discount rate.

Risks to Our Price Target and Rating for EXC

Risks to our thesis include favorable/unfavorable regulatory developments (upside/downside) and greater than expected ESG appetite for a wires-centric company (upside).

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Important Disclosure for International Clients

United Kingdom – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the United Kingdom, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a UK incorporated investment firm authorised and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 (the "Act"), the content of this report has been approved by WFSIL, an authorised person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

EEA – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by WFSIL or Wells Fargo Securities Europe S.A. ("WFSE"). WFSE is a French incorporated investment firm authorized and regulated by the Autorité de contrôle prudentiel et de résolution and the Autorité des marchés financiers. WFSE does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). This report is not intended for, and should not be relied upon by, retail clients.

Australia – Wells Fargo Securities, LLC, Wells Fargo Securities International Limited and Wells Fargo Securities Asia Limited are exempt from the requirements to hold an Australian financial services license in respect of the financial services they provide to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under the laws of the United States, Wells Fargo Securities International Limited is regulated under laws of the United Kingdom, and Wells Fargo Securities Asia Limited is regulated under the laws of Hong Kong. All such laws differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC, Wells Fargo Securities International Limited or Wells Fargo Securities Asia Limited in the course of providing the financial services will be prepared in accordance with the laws of the United States, United Kingdom or Hong Kong and not Australian laws.

Canada – This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

Hong Kong – This report is issued and distributed in Hong Kong by Wells Fargo Securities Asia Limited ("WFSAL"), a Hong Kong incorporated investment firm licensed and regulated by the Securities and Futures Commission to carry on types 1, 4, 6 and 9 regulated activities (as defined in the Securities and Futures Ordinance (Cap. 571 The Laws of Hong Kong), "the SFO"). This report is not intended for, and should not be relied on by, any person other than professional

investors (as defined in the SFO). Any securities and related financial instruments described herein are not intended for sale, nor will be sold, to any person other than professional investors (as defined in the SFO). The author or authors of this report is or are not licensed by the Securities and Futures Commission. Key Message: EXC's first post-spin earnings call was decidedly straightforward, with management utilizing the extra elbow room to detail a series of regulatory, ESG, and EV updates alongside an in-line 1Q22 print. As we expected heading into the call, there were few major incremental updates on the heels of the post-spin analyst day, with the company continuing to work the process in IL ahead of MYP filings early next year. Looking ahead, our focus will be on the regulatory front, with the FRP and PECO gas case both heading into intervenor direct testimony in June. In our view, EXC remains an attractive higher growth T&D utility without many of the carbon or capex (solar) overhangs that have permeated our coverage this year – we continue to seek an entry point.

Straightforward post-spin update… Exelon's 1Q22 update came with few major updates as management continues to hone its post-spin execution – as we had expected. Alongside the untangling of some spin accounting at the parent, management provided a series of updates on its regulatory and strategic initiatives through the quarter, with even the case cycle itself relatively quiet vs. prior quarters thanks in part to the newer MYPs in place across the mid-Atlantic. The utilities remains on track for direct testimony in the June-July time frame for each of the open cases (DPL/PECO gas, ComEd FRP), alongside ongoing progress in the ComEd PBR (see our note for rebuttal testimony HERE).

EXC's call was relatively devoid of many of the topics that have permeated almost all of the calls this quarter, namely O&M, pension, and capex challenges... We touched base with management after the call and hit on several of these, with none jumping out as particularly notable at this juncture. Specifically, the pension sat at 87% funded at YE, and while market performance has been poor YTD, the discount rate provides an almost equal offset – very consistent with many of the conversations we had last week with other utilities. On O&M, the company continues to lever its scale and purchasing power to hold down costs, and while it doesn't provide a LT target, it has a successful track record of holding cost growth well below inflation (~1.4% CAGR from '16-22). We continue to see its multistate T&D profile as potentially better positioned to weather any prolonged period of inflation vs. smaller peers. Finally, that same T&D profile removes much of the solar-specific capex risk we have heard this quarter. We continue to see EXC as a favorably differentiated story for investors as even as compared to its wires-only peers (ES, FE).

EXC reported 1Q22 performance of $0.64 just between our estimate of $0.62 and street of $0.65… YoY earnings were $0.09 higher on a noisy 2021 comp thanks to allocation adjustments for discontinued operations (ExGen). Across the utilities, ComEd earnings were flat YoY, with higher distribution rates (investment and treasuries) offset by other items (DPA). Earnings were $0.04 higher at PECO from higher distribution rates and $0.01 higher at PHI, where higher rates (+$0.03) were partially offset by D&A and storm costs during the quarter. BG&E was $0.02 lower YoY on the back of higher D&A and other items. As we expected, the quarter also featured some noise at the parent on the back of the generation separation, with the allocation adjustments for BSC netting to $0.07, which was partially offset by higher interest expense. **Looking ahead, management affirmed 2022 EPS guidance from the range of $2.18 to $2.32 vs. our $2.27,** which remains unchanged.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:42 AM.

Valuation

Our valuation is based on our 2024E EPS of $2.58 applied to a 19.5x regulated utility multiple, which is based on our regression model using the correlation between electric utility valuations and forward interest rate expectations over the past 30+ years. To this 19.5x multiple, we continue to apply a one-turn premium to each of EXC's subsidiaries for favorable recovery mechanisms (riders, MYPs) and underlying growth/incremental investment opportunities, except for ComEd. This blended 20.2x multiple, applied to our 2024E EPS and discounted back one year, equals our $49 PT

Risks

EXC comprises regulated distribution and transmission assets, which face traditional risk factors and upside drivers inherent with all utilities, including: (1) positive/negative rate case outcomes above/below our expectations, (2) higher/lower capex outlooks, and (3) interest rate changes above/below what we account for in our regression model.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:42 AM.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

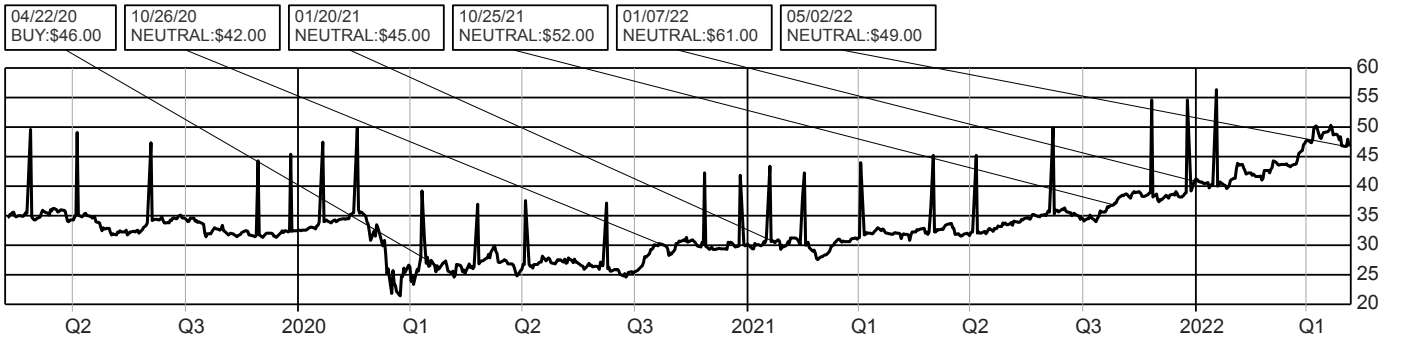
IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 05-06-2022



Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:42 AM.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

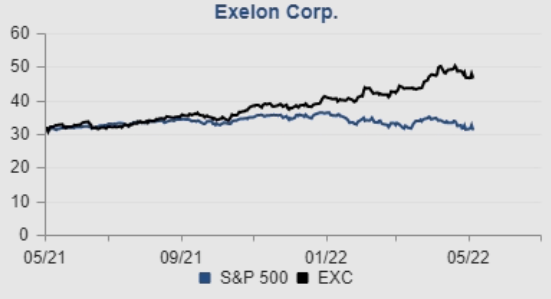
1 Year Price History



Source: FactSet

In Line Quarter, Risk/Reward Still Attractive

Exelon's 1Q22 adjusted EPS was largely in line with expectations. EXC posted 1Q22 adjusted EPS of $0.64 versus consensus of $0.65, our estimate of $0.60, and 1Q21 of $0.55. The Company's trailing 12-month ROE was 8.9% versus 9.2% for 4Q21 and Exelon continues to expect to return to the 9-10% range by year-end 2022 as the timing of equity infusions resolve. EXC maintained its 2022 EPS guidance of $2.18-2.32/share and still expects to deliver 6-8% EPS growth for 2021-2025 based off of the $2.10 midpoint of 2021 adjusted EPS guidance. EXC also reaffirmed its capex plan of $29 billion for 2022-2025, which is expected to drive 8.1% rate base CAGR for 2021-2025. Exelon still expects to finance this plan with no more than $1 billion of equity through 2025, which is intended to target a 2022-2024 average FFO to debt of 13-14% for S&P's current BBB rating which has a downgrade threshold of 12%, and CFO (pre-WC) to debt of 13-14% for Moody's current Baa2 rating which has a downgrade threshold of 12%. Exelon projects to grow its dividend in line with operating earnings through 2025, targeting a 60% dividend payout ratio. The Company highlighted that higher interest rates provide a tailwind in Illinois with a 50 bps increase in the 30-year Treasury yield translating into a net $0.03 annual EPS benefit. Exelon in its prepared remarks also highlighted material fuel cost savings from EV adoption ($1,500 gasoline costs vs $250 Illustrative EV charging cost per year) and expects 20x EV penetration over the next 20 years, bolstering their long-term investment outlook.

EXC is working with stakeholders in IL on performance metrics associated with the multi-year rate settling plan as set forth by SB 2408 passed into law last year. A commission order establishing those metrics is expected in Q3 2022, which will serve as the basis of EXC's filing in Q1 2023. Exelon has the option to establish new rates on either a traditional rate review using a future test year, or an investment and operating cost plan for a four-year period, to be submitted by January 20, 2023 to the Illinois commission for review and approval for rates effective the beginning of 2024 after the existing formula rate plan framework sunsets in 2023.

Regulatory update: On January 14, Delmarva Power filed a gas rate case with the Delaware PSC requesting a $14.5MM revenue increase with a 10.3% ROE and 49.94% equity ratio on a rate base of $497MM with a January 1, 2021-December 31, 2021 test year. On February 28th, DPL filed supplemental direct testimony requesting an updated revenue requirement of the same $14.5MM on twelve months actual test period ending December 31, 2021. A final Commission order is expected in Q1 2023. Separately, on March 31, PECO filed a gas rate case with the Pennsylvania PUC requesting a $82MM revenue increase with a 10.95% ROE and 53.41% equity ratio on a rate base of $2,884MM with a January 1, 2023-December 31, 2023 test year. A final decision is expected in November/December 2022. On April 15, ComEd filed its final annual distribution formula rate update with the Illinois commission seeking a $199MM rate increase with a 7.85% ROE and 49.45% equity ratio on a rate base of $13,883MM with a January 1, 2022-December 31, 2021 test year.

Reaffirming our Outperform rating but raising our target price. We are maintaining our 2022-2024 EPS estimates of $2.25, $2.41 and $2.57, respectively. We are increasing our target price to $50/share from $47/share as we now value Exelon on a 20.0x multiple (versus 18.9x previously), based on a slight premium to our utility target multiple of 19.0x (up from 18.0x previously) applied to our 2024 EPS estimate. We are raising our peer target multiple to 19.0x to be closer to where the group is trading today and also to be similar to our scenario 2 in our DDM analysis shown on pg. 5 of our April 24 note. The slight premium multiple we apply for our target price reflects Exelon's asset mix as a T&D utility and above-average 6-8% EPS growth rate for 2021-2025.

Please see the analyst certification and important disclosures on page 4 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

EXC Valuation

Our new base case valuation of $50/share (up from $47) applies a slight premium multiple to our new 19.0x peer target multiple (up from 18.0x) to our 2024 EPS forecast of $2.57/share, which is based on 7% annual EPS growth, the midpoint of the Company's 6-8% forecast for 2021-2025.

Our new bull case of $54/share (up from $51) applies a 20.5x multiple (still 1.0x higher than our base scenario, which is now higher, as mentioned) to a 2024 EPS forecast of $2.65/share, which is based on 8% annual EPS growth, the high end of the Company's guidance.

Our new bear case of $45/share (up from $42) applies an 18.0x multiple (still 1.5x lower than our base case which is now higher, as mentioned) to a 2024 EPS forecast of $2.50/share, which is based on 6% annual EPS growth, the top end of the Company's guidance.

Multiple	x	18.0x
Bear Case Valuation	**$/share**	**$45**

Source: Evercore ISI

VALUATION METHODOLOGY

Our valuation is based on a P/E multiple of 2024 EPS.

RISKS

Unfavorable outcomes in regulatory proceedings would cause our valuation to be lower. Higher interest rates would pull utility earnings up in IL but pressure multiples so the net impact would likely be negative overall.

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Michael Lonegan, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%

Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 05/09/2022)

Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

For investors in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as “relevant persons”). This report must not be acted on or relied on by persons who are not relevant persons.

Evercore does not have an Australian Financial Services License ("AFSL"). This report is only to be distributed to persons who fall within the definition of "wholesale" investors under section 761G of the Corporations Act 2001 (Cth). This report must not be acted on or relied on by persons who are not wholesale investors. Evercore relies on the relief provided under ASIC Corporations (Foreign Financial Services Providers—Limited Connection) Instrument 2017/182 to provide this report to wholesale investors in Australia without an AFSL.

The distribution of these materials to persons or entities in Switzerland is not intended to, and does not, constitute a financial service under the Swiss Financial Services Act (FinSA). In particular, the distribution of these materials does not constitute the provision of personal recommendations on transactions with financial instruments (investment advice) within the meaning of Article 3(c)(4) of FinSA.

This material has been prepared by Evercore Group L.L.C. for distribution in New Zealand to financial advisers and wholesale clients only and has not been prepared by Evercore for retail clients in New Zealand (as those terms are defined in the Financial Markets Conduct Act 2013 (‘FMCA’)). Evercore Group L.L.C. is not, and is not required to be, registered or licensed under the FMCA, and unless otherwise stated any financial products referred to in this material are generally only available in New Zealand for issue to those satisfying the wholesale investor criteria in the FMCA.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: https://evercoreisi.mediasterling.com/disclosure.

1Q'22 Results

EXC reported 1Q'22 Adj. EPS $0.64 vs. $0.65 consensus. For a detailed review of drivers, see our earlier note. Management stated that that the current ROE of 8.9% of 1Q'22 should increase to 9%-10% in the following quarters as the company goes through the rate cases currently active and performs as planned. Management reiterated 2022 guidance of $2.18-$2.32 with a 6%-8% long term eps growth target and up to $1Bln in equity needs through 2025.

Updates: Rate Case Schedules & Capital Investments

Back in April'22, the company filed rate case for ComEd requesting revenue of $198.8mln, which includes $55mln from 2021 annual reconciliation, requested ROE of 7.85% (7.78% ROE and 7 bps penalty). Management expects the following schedule for ComEd to take place in 2022: intervenor testimony and rebuttal testimony by June and July, evidentiary hearings by September, initial briefs and reply briefs by October with an expected order from the commission by December of this year. For PECO gas rate case filed in March'22, intervenor and rebuttal testimony expected by June and July, with evidentiary hearings by August, and initial and reply briefs by September with expected commission order by Q4'22. For rate case at DPL in DE, the intervenor and rebuttal testimony are expected by July and August, with evidentiary hearing by October. For the ComEd filing under Illinois legislation management expects an order from the IL Commission on 8 performance metrics in 3Q'22 to inform an early 2023 filing (statutorily required by Jan. 20, 2023). Stakeholder meetings will be held to determine the positioning around a traditional one year filing or a four year rate plan.

CapEx Opportunities with Electric Vehicles (EV)

Currently, EXC has ~215k EVs deployed/driving from ~17mln registered vehicle owners across its jurisdictions. Management sees upside potential in EV demand infrastructure as MD, NJ, IL, DC, and PA forecast EV demands for the next 25+ years. MD expects ~300k EVs by '25, NJ ~330k by '25 with 2mln by '35, IL 1mln by '30, DE with 20% of its registered vehicles by '25, DC with 25% by '30 and 100% by '45 and PA with 25%. The company believes that the projected expectations are indications to start building the infrastructure that will be required to sustain them and at the same time preparing the framework that will be needed to maintain it.

Valuation:

We maintain our Price Target of $54 premised on a 17% premium to the group multiple of 19.3x our $2.37/share earnings forecast for 2023. Our 17% net premium is derived from a 10% premium for the overall regulated utility group, premised upon the current

Forecast returns

Forecast price appreciation	+16.2%
Forecast dividend yield	3.2%
Forecast stock return	+19.5%
Market return assumption	7.7%
Forecast excess return	+11.7%

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price to earnings based. The adjustments applied fall into 5 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 4) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-parts analysis applying business/region appropriate valuations to those diversified businesses; 5) One-off Adjustments: In special situations, we value risk on an issue specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk.

We maintain our Price Target of $54 premised on a 17% premium to the group multiple of 19.3x our $2.37/share earnings forecast for 2023. Our 17% net premium is derived from a 10% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond rounded down to the nearest 5%, a 2% premium for a 2nd quartile regulatory ranking overall, a 5% premium for 1st quartile earnings growth.

Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 09 May 2022 06:10 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please click https://neo.ubs.com/quantitative, or speak to your UBS sales representative for access to the report.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	56%	32%
Neutral	FSR is between -6% and 6% of the MRA.	35%	28%
Sell	FSR is > 6% below the MRA.	8%	22%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research

management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Greece**: UBS AG and its subsidiaries and affiliates (UBS) are premier global financial services firms offering wealth management services to individual, corporate and institutional investors. UBS AG and UBS Switzerland AG are established in Switzerland and operate under Swiss law. UBS operates in over 50 countries and from all major financial centers. UBS is not licensed as a bank or financial institution under Greek legislation and does not provide banking, nor financial services in Greece. Consequently, UBS provides such services from branches outside of Greece, only. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in Greece. Therefore, this document may not be considered as a public offering made or to be made to residents of Greece. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: UBS Securities India Private Ltd. a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt.**Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: UBS AG and its branches and subsidiaries (UBS) are not licensed, supervised or regulated in Nigeria by the Central Bank of Nigeria or the Nigerian Securities and Exchange Commission (SEC) and do not undertake banking or investment business activities in Nigeria. The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Nigerian SEC. If you are interested in products of this nature, please let us know and we will direct you to someone who can advise you. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). Any material relating to Collective Investment Schemes has been provided to you at your specific unsolicited request and for your information only. The investment products mentioned in such material are not being offered or made available for sale by UBS in Nigeria and they have not been submitted for approval nor registered with the Nigerian SEC. **Philippines:** This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37.**Singapore**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority
