Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Analyst Note 09 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

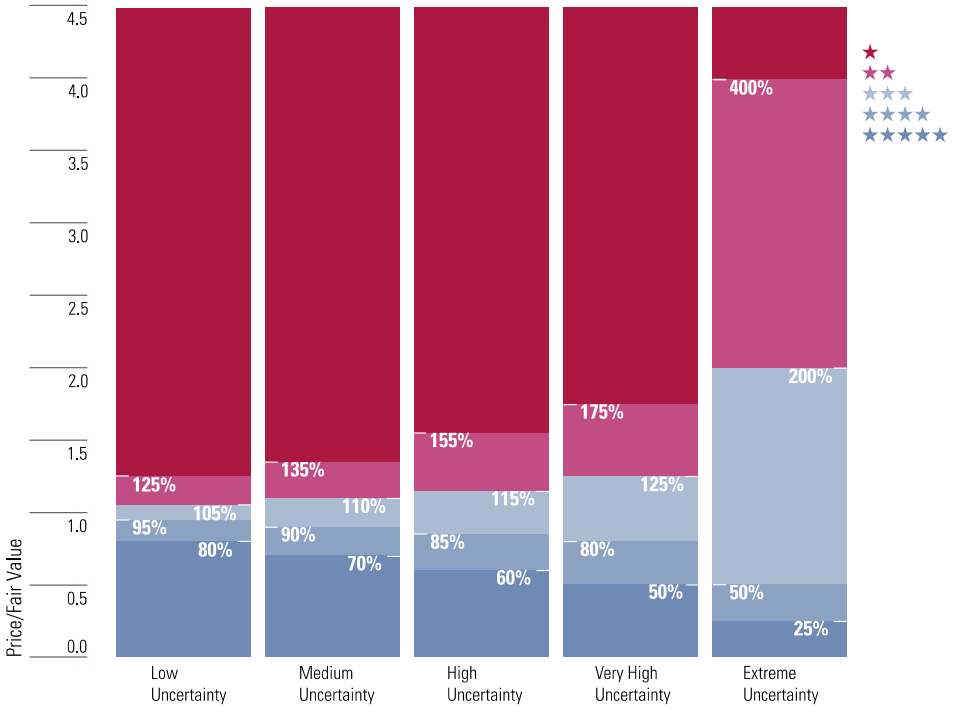
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Industry
Utilities - Diversified

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

We view the separation positively for shareholders. We previously valued Exelon at a discount to its fully regulated peers in large part because of its generation and retail operations. A stand-alone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024 or default to traditional ratemaking. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity

prices that have dragged down returns recently.

- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

Exelon Corp EXC ★★ 6 May 2022 21:23, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.06 USD 6 May 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.21	46.13 USD Bil 6 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

Our fair value estimate is $39.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed

Exelon Corp EXC ★★ 6 May 2022 21:23, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.06 USD 6 May 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.21	46.13 USD Bil 6 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes Archive

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term

Exelon Corp EXC ★★ 6 May 2022 21:23, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.06 USD 6 May 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.21	46.13 USD Bil 6 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate Andrew Bischof, CFA, CPA, Senior Equity Analyst, 2 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Exelon Corp EXC ★★ 6 May 2022 21:23, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.06 USD 6 May 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.21	46.13 USD Bil 6 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Exelon Edging Closer to Spinning Off Merchant Unit; Reports Q3 Earnings Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Nov 2021

We are increasing our fair value estimate to $48 per share from $45 after Exelon announced third-quarter adjusted earnings per share of $1.09 compared with $1.04 in the same year-ago period. Management narrowed their full-year EPS guidance to $2.70-$2.90 from their previous $2.60-$3.00

Exelon Corp EXC ★★ 6 May 2022 21:23, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.06 USD 6 May 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.21	46.13 USD Bil 6 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

range. Our fair value estimate increase is due to an increase in Morningstar's midcycle natural gas price to $3.30 per thousand cubic feet from $2.80, which boosted the nuclear fleet's midcycle margins. Our narrow moat and stable moat trend ratings are unchanged.

Recently management secured $700 million in subsidies from Illinois legislation that will keep the company's Dresden and Byron nuclear plants operating. We assume that subsidies for the plants will continue beyond 2025 given the role nuclear must play as Illinois pursues its aggressive clean energy goal. Management has successfully lobbied for subsidies across its merchant nuclear fleet. Policymakers view of nuclear generation is beginning to align with our view that nuclear' s clean energy attributes and reliable generation will be instrumental in meeting aggressive emission reduction goals.

Exelon continues to progress on the spin-off of its competitive merchant unit. The company has received FERC approval, and continues progress toward receiving approvals from New York regulators and the Nuclear Regulatory Commission. Exelon has named a management team for the new unit, to be named Constellation, which we view is a sign management is confident they can complete the spin-off. Management expects to complete the transaction in the first quarter of 2022.

In the quarter, rate increases and ongoing utility investments supported earnings. Lower capacity revenue, increased nuclear outage days, and unrealized and realized gains on equity investments had a negative impact on generation segment earnings. Trailing 12-month returns were 9.3%, down from 9.4% last quarter.

Exelon Secures Another Legislative Win; Byron and Dresden to Remain Open Andrew Bischof, CFA, CPA, Senior Equity Analyst, 14 Sep 2021

We are increasing our Exelon fair value estimate to $45 per share from $42 after Illinois lawmakers passed energy legislation that would provide subsidies to Exelon's Dresden and Byron nuclear plants. Gov. J.B. Pritzker has indicated he plans to sign the legislation, and Exelon has said it is in the process of refueling both plants. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon has taken a hard line with Illinois policymakers on the future of its unregulated nuclear facilities in the state. Last year, Exelon announced plans to close the two nuclear generating stations. After filing Post Shutdown Decommissioning Activity Reports with the Nuclear Regulatory Commission in July, Exelon is now preparing to refuel both Byron and Dresden nuclear facilities. We had previously estimated the plants were running at break-even, resulting in no change to our fair value estimate.

The $700 million in subsidies Exelon will receive from the legislation was the primary source of our fair value estimate increase. We assume that the subsidies will continue beyond our five-year forecast, in part to help the state meet the legislation's 100% clean energy target by 2050. The legislation also sets targets for Illinois that include zero carbon emissions by the end of 2045 and 50% renewable energy by

Exelon Corp EXC ★★ 6 May 2022 21:23, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
47.06 USD 6 May 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.21	46.13 USD Bil 6 May 2022	Narrow	Stable	Low	Standard	4 May 2022 05:00, UTC

2040. Dresden's operating license expires later this decade and Byron's operating license expires for both of its units by 2046. Time-value appreciation since our last update increased our fair value estimate $1 per share.

We previously thought Exelon faced an uphill battle to secure additional subsidies for its nuclear fleet in the state, in large part due to the deferred prosecution agreement Exelon entered into last year related to the company's lobbying practices in the state. However, the state's clean energy goals, and the contribution of Exelon's nuclear fleet to those goals, ultimately led to successful lobbying efforts.

Exelon Reports Improved Second-Quarter Earnings; Byron and Dresden Near Retirement Andrew Bischof, CFA, CPA, Senior Equity Analyst, 4 Aug 2021

We are maintaining our $42 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.89, compared with $0.55 earnings per share in the same year-ago period. Management reaffirmed its $2.60 to $3.00 per share earnings guidance. Our narrow moat and stable moat trend ratings are also unchanged.

Last week, Exelon filed Post Shutdown Decommissioning Activity Reports with the Nuclear Regulatory Commission for its Byron and Dresden nuclear facilities. Management has long sought additional subsidies for the two nuclear plants, with the most recent proposals failing to pass in the spring legislative session. State legislators continue to work on clean energy legislation; however, there is only a narrow window for legislation to pass, given the plants' pending closures this fall. We estimate the plants are running at break-even, resulting in no change to our fair value estimate. Potential subsidies could add up to $1 per share to our fair value estimate.

Regulatory filings with New York regulators, FERC, and the Nuclear Regulatory Commission are ongoing for the company's proposed spin-off of its merchant unit. We continue to view the separation positively, as we value Exelon at a discount to its fully regulated peers, in large part because of its merchant operations. Management expects to complete the transaction in the first quarter of 2022.

Exelon's utilities received constructive rate outcomes across its PECO, Pepco, and ACE subsidiaries. Allowed returns range from 9.275% to 10.25% and were in line with our expectations. Trailing 12-month returns were 9.4%, up from 8.9% last quarter.

In the quarter, earnings were supported by absence of storm restoration costs and recovery of ongoing utility investments. Generation earnings were also up, supported by realized gains on nuclear decommissioning fund, unrealized and realized gains on equity investments, and fewer nuclear outage days.

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

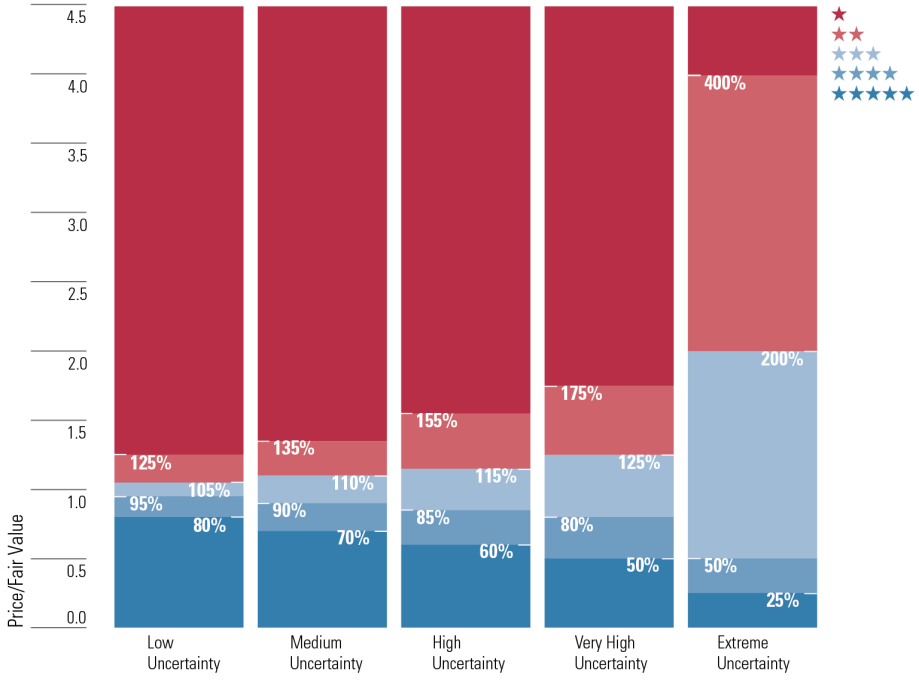
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close

Morningstar Equity Research Star Rating Methodology



tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

KeyBanc Capital Markets

Alert

May 09, 2022

Energy: Electric Utilities

NYSE: EXC

Exelon Corporation

EXC: Delivering on Track Results as a Regulated Utility

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

EXC reported an in line quarter and maintained its 2022 guidance. This was EXC's first report since the spin of Constellation. The path forward appears well-defined with a 6-8% long-term EPS growth rate targeted and a $1B equity issuance plan through 2025. The timing of the equity will depend on the markets and the need for liquidity. In the short term, the proceedings to finalize the rate framework in IL bears watching. EXC will decide on the path forward based on the outcome of the PBR workshops, whether to file for a multiyear rate case in 2023 or a traditional future test year plan. We remain OW and maintain that EXC should be a core utility holding in a risk-off environment.

1Q22 Earnings in Line, Guidance Maintained:

- EXC reported an in line quarter with adjusted EPS of $0.64 matching our forecast (albeit missing the consensus of $0.66). Earnings across the utilities were mostly in line with our model.
- Management reiterated the 2022 adjusted EPS guidance of $2.18-2.32 (our estimate is $2.25) while also maintaining the long-term operating earnings target of 6-8% through 2025 (off the 2021 midpoint).

Figure 1 - 1Q22 Earnings Comparison

1Q22	EXC	KBCM
ComEd	$0.20	$0.22
PECO	0.21	0.17
BG&E	0.20	0.21
PHI	0.14	0.14
Parent	(0.11)	(0.10)
EXC	**$0.64**	**0.64**
Consensus	**0.66**	

Source: Company Reports, KBCM Estimates

ROE improvement targeted through year-end; no change to equity plans: EX reported a 12-month trailing earned ROE of 8.9% but maintained its goal of moving it up to the targeted 9-10% range by the end of the year through a combination of new rate implementation and ongoing operating efficiency measures. Management also maintained its equity issuance targets of $1B by 2025 but timing and the exact format remain TBD, hinging both on market conditions and the need for liquidity.

Regulatory Update:

- **ComEd IL formula rate plan:** ComEd filed a formula rate plan proposal for a $199M revenue increase premised on 7.85% ROE, 49.45% equity, and a rate base of $13.9B. The calculation of the ROE in the FRP is formulaic and set by the FRP statute. ComEd's previous rate plan was approved at 7.36% ROE in 2021. A final decision is expected toward the end of the year with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL. At present, EXC is engaged with stakeholders and the ICC to finalize the performance metrics that will make it into the final PBR framework. A final outcome on that is expected in 3Q, at which point ComEd will decide on whether to file a four-year rate plan in 2023 or a traditional future test year plan. A filing is expected in early 2023.
- **DPL DE gas rate case:** EXC is seeking a $14.5M rate increase based on a 10.3% ROE and 49.94% equity. The increase includes $5.8M for the distribution system improvement charge, or DSIC, making the net increase requested $13.7M. EXC is seeking rates to be effective August 14, based on a 2021 test year. The previous gas rate case concluded in 2021 and authorized a rate increase of $6.7M increase based on a 9.6% ROE and 50.37% equity layer.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

- **PECO PA gas rate case in PA:** PECO is seeking an $82M rate increase on a 10.95% ROE, 53.41% equity, and a rate base of $2.9B. The rate increase intends to cover for gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at 10.24% ROE in mid-2021. A final decision is expected by the end of 2022 with new rates effective in January 2023.

Valuation: Based on a stock price of $47.06 (5/6/22 close) and our 2023E EPS of $2.40, shares of EXC are trading at a P/E ratio of ~20x, in line with Integrated Utilities trading at ~20x. Our Overweight rating and $53 price target assume that EXC can trade at a 2x premium to our fair value sector multiple of 20.0x.

Risks: EXC's regulated utilities are exposed to a number of risks, including regulatory risk in its jurisdictions and on the federal level, weather variations affecting electricity demand and the reliability of its system, interest rate risk affecting its cost of capital, and macroeconomic risk as underlying economic activity affects demand for electric power and gas. Should the impacts of these risks be greater than we currently anticipate, the Company and the shares may underperform relative to our expectations. Conversely, should the impact of these risks be less than currently anticipated, the Company and the shares may outperform relative to our current expectations. These risks could impede the stock from achieving our price target.

Disclosure Appendix

Important Disclosures

Exelon Corporation - EXC

We have managed or co-managed a public offering of securities for Exelon Corporation within the past 12 months.

Exelon Corporation is an investment banking client of ours.

We have received compensation for investment banking services from Exelon Corporation during the past 12 months.

We expect to receive or intend to seek compensation for investment banking services from Exelon Corporation within the next three months.

During the past 12 months, Exelon Corporation has been a client of the firm or its affiliates for non-securities related services.

As of the date of this report, we make a market in Exelon Corporation.

Current analyst Sophie Karp assumed coverage on June 4, 2019. Rating and price target activity prior to that date was the work of a previous analyst.

Rating System

Overweight - We expect the stock to outperform the analyst's coverage sector over the coming 6-12 months.

Sector Weight - We expect the stock to perform in line with the analyst's coverage sector over the coming 6-12 months.

Underweight - We expect the stock to underperform the analyst's coverage sector over the coming 6-12 months.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC (“KBCMI”), and KeyBank National Association (“KeyBank N.A.”), are marketed.

KeyBanc Capital Markets Inc. (“KBCMI”) does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst’s compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

Forecast returns

Forecast price appreciation	+14.7%
Forecast dividend yield	3.1%
Forecast stock return	+17.9%
Market return assumption	7.7%
Forecast excess return	+10.1%

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price to earnings based. The adjustments applied fall into 5 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 5) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-parts analysis applying business/region appropriate valuations to those diversified businesses; 6) One-off Adjustments: In special situations, we value risk on an issue specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk.

We value Exelon at $54/share premised on a 17% premium to the group multiple of 19.3x our $2.37/share earnings forecast for 2023. Our 17% net premium is derived from a 10% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond rounded down to the nearest 5%, a 2% premium for a 2nd quartile regulatory ranking overall, a 5% premium for 1st quartile earnings growth.

Risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 09 May 2022 01:51 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please click https://neo.ubs.com/quantitative, or speak to your UBS sales representative for access to the report.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	56%	32%
Neutral	FSR is between -6% and 6% of the MRA.	35%	28%
Sell	FSR is > 6% below the MRA.	8%	22%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2.**Switzerland:** Distributed by UBS AG to persons who are institutional investors only. Where an analyst of UBS Europe SE, France Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, France Branch. **Spain:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Spain Branch. Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch.**South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client's profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [MCI (P) 026/08/2021 and Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Distributed by UBS AG, Tokyo Branch to Professional Investors (except as otherwise permitted) in relation to foreign exchange and other banking businesses when relevant. **Australia:** Clients of UBS AG: Distributed by UBS AG (ABN 47 088 129 613 and holder of Australian Financial Services License No. 231087). Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This Document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. This material is intended

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Greece**: UBS AG and its subsidiaries and affiliates (UBS) are premier global financial services firms offering wealth management services to individual, corporate and institutional investors. UBS AG and UBS Switzerland AG are established in Switzerland and operate under Swiss law. UBS operates in over 50 countries and from all major financial centers. UBS is not licensed as a bank or financial institution under Greek legislation and does not provide banking, nor financial services in Greece. Consequently, UBS provides such services from branches outside of Greece, only. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in Greece. Therefore, this document may not be considered as a public offering made or to be made to residents of Greece. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: UBS Securities India Private Ltd. a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt.**Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: UBS AG and its branches and subsidiaries (UBS) are not licensed, supervised or regulated in Nigeria by the Central Bank of Nigeria or the Nigerian Securities and Exchange Commission (SEC) and do not undertake banking or investment business activities in Nigeria. The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Nigerian SEC. If you are interested in products of this nature, please let us know and we will direct you to someone who can advise you. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). Any material relating to Collective Investment Schemes has been provided to you at your specific unsolicited request and for your information only. The investment products mentioned in such material are not being offered or made available for sale by UBS in Nigeria and they have not been submitted for approval nor registered with the Nigerian SEC. **Philippines:** This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37.**Singapore**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the United Arab Emirates (UAE) by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed.**USA**:Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliários Ltda., UBS Asesores México, S.A. de C.V., UBS SuMi TRUST Wealth Management Co., Ltd., UBS Wealth Management Israel Ltd. and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

ERCOT – Early heat wave prompts ERCOT warning, outages rescheduling

Uranium – DOE initiates interagency process to study uranium supply chain and potential bans

FERC – Joint Federal-State Task Force on Electric Transmission holds third meeting

DUK reports 1Q22 adj. EPS of $1.30 vs Gugg/cons at $1.35/$1.33; reaffirms 2022 adj. EPS guidance of $5.30–$5.60 ($5.45 midpoint) vs Gugg/cons at $5.48/$5.46; 5%-7% EPS CAGR reaffirmed

- $-0.03 1Q22 weather vs normal; net $-0.01 weather vs 1Q21 (1Q21 was $-0.02 vs normal)
- $-0.07 of storm expenses in 1Q22
- Commercial Renewables was $-0.02 YoY; $-0.06 due to fewer projects placed in service, offset by $+0.04 Texas Storm Uri impact from 1Q21
- Commercial Renewables YoY operations saw GWh increase +15.5% vs 1Q21 and +10.7% net proportional MW in service

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- +3.8% rolling 12-month retail load growth through 1Q22; DUK expects that figure to moderate to **1.5% load growth in 2022** (equivalent to a ~0.4% load growth CAGR since 2019)
- +1.8% total customer growth vs 1Q21
- Reaffirmed 5%-7% EPS CAGR through 2026 off of 2021 original guidance midpoint of $5.15
- Call is at **10:00am ET** at **833.927.1758;** Access code**: 527418**

Guggenheim takeaway: *We caught up with the company ahead of the earnings call and clarified that storm costs in 1Q21 were both normal and representative of what's embedded in ongoing guidance. The $-0.07 of storm costs booked in 1Q22 were therefore in excess of normal and in our view should be backed out for comparability, resulting in DUK's adjusted 1Q22 result actually being $1.37 for comparability. We also note that while 1Q22 may appear to be off to a slow start to some, we expect O&M timing (from plant outages, etc.) to result in a strong 2H22. We have been getting questions from investors on DUK's Commercial Renewables segment and remind investors that the lack of changes to the commercial business in our view is because DUK was ahead of the curve and already right-sized expectations on the 4Q21 call to $150m.*

EXC ─ EXC reports 1Q22 results

- EXC reported 1Q22 EPS of $0.64, as compared to Gugg/Cons $0.62/0.65
- Reaffirmed 2022 EPS guidance of $2.18-$2.32 vs. Gugg/Cons of $2.27/2.26
- TTM ROE of 8.9% (vs. 9.2% as of 1Q22)
- Provides regulatory roundup of utility activities to date (ComEd, FRP, Delmarva, etc.)
- Earnings package with statistics HERE
- Slides HERE
- Call at 10am (833)-397-0944, Code 5895167

HE – HE reports 1Q EPS Beat; Solid Fundamentals, Sold EV charging equity investment

- HE reported 1Q EPS of $0.63 vs. $0.45 consensus and our $0.45 estimate
- Results included $8M gain on the sale of equity investments
- The ASB bank also recorded a $3M negative provision for credit loss
- Earnings call today at 4:15pm ET; Dial in: 1-844-200-6205, Passcode: 275546.

CMS/ETR – Palisades closure media coverage suggests MI climate goals are at risk

- Media coverage of the Palisades closure suggested Michigan climate goals are at risk if nuclear retirement is not avoided.
- The coverage picks up after MI governor started looking for federal assistance to keep the plant running.
- More here.

Guggenheim takeaway: *FYI. More thoughts on Palisades retirement here.*

CNP – CNP Ohio gas utilities likely to see large bill increases

- CNP Ohio gas utility has received media coverage for supply charge increases
- The increase is a part of the broader gas supply pricing inflation.
- More here.

Guggenheim takeaway: *FYI.*

NEE – KCC regulator offers dissent on intervention for transmission planning

- The KCC chairman offered a partial dissent and acceptance of a KCC order limiting a party's intervention status.
- The KCC order allows intervention with only retail rates commentary for a late filer.
- The Intervention is related to the NEE Wolf Creek Blackberry project.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- More here.

Guggenheim takeaway: *FYI.*

OGE – OK Supreme Court criticized AG for weak intervention on utility rates

- Oklahoma Supreme Court criticized the office of the Attorney General for not intervening more aggressively in OG&E's utility ratemaking.
- The criticism came from the latest securitization for winter storm costs.
- More here.

Guggenheim takeaway: *FYI.*

PCG – Stakeholder groups critical of CA Governor Newsom's call to extend Diablo Canyon operations

- Stakeholder groups voiced opposition to the CA Governor Newsom statements regarding extension of operations at Diablo Canyon Nuclear.
- Groups feel any decision making at this point could be wasteful or detrimental to the established plans for decommission.
- More here.

Guggenheim takeaway: *FYI.*

D – ODEC comments in CVOW docket

- ODEC, one of the largest cooperatives in VA, has provided comments in the CVOW rider docket emphasizing that costs like the transmission interconnections not be allocated to it
- More HERE

Guggenheim takeaway: *Part of the process in our view – there were also several procedural filings on confidentiality, for your awareness.*

ERCOT – Early heat wave prompts ERCOT warning, outages rescheduling

- The state could see prolonged 100-degree days through Tuesday across most of the ISO's territory
- "Generators and transmission owners have worked with us to reschedule maintenance outages. Those changes, along with a slight drop in forecasted temperatures, have given us sufficient reserves," - ERCOT
- More HERE

Guggenheim takeaway: *ICYMI heading into the weekend – while lower outages and peak temperature forecasts have taken some pressure off the emergency, the market remains tight in the NT.*

Uranium – DOE initiates interagency process to study uranium supply chain and potential bans

- The revelation came during the DOE Secretary's budget meeting before the Senate
- "We want to make sure, for example, that we are able to supply HALEU as well as low-enriched uranium to our civilian nuclear fleet. If we move away from Russia, we want to make sure we have the ability to continue to keep the fleet afloat." – Granholm to the ENR
- More HERE

Guggenheim takeaway: *For more on the current state of affairs in the uranium supply chain* ***see our recent baseline note HERE.***

FERC – Joint Federal-State Task Force on Electric Transmission holds third meeting

- "To the extent we can have a more anticipatory, longer-term transmission planning process that takes into account some of these issues, and a lot of the transmission is built as it should be through the transmission planning process, I think what that does is it will certainly result in a much more expedited interconnection process…I think to the extent we can make some significant progress, and I think we can on transmission planning, the results will be over the medium and longer terms a much better interconnection process as well." – Chair Glick via Platts
- Webcast of meeting HERE

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- Docket HERE

Guggenheim takeaway: *For your awareness, and hot on the heels of the recent cost allocation NOPR. This process has been part of FERC's effort to work with the states on planning improvements – a delicate area in our view, although all parties appear to be interested in improvements.*

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings

Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite

Location: TBD

Tuesday, July 12th

11:30 AM | Lunch

Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience

Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game

Southern Company C-Suite will host in their private box. Dinner will be served.

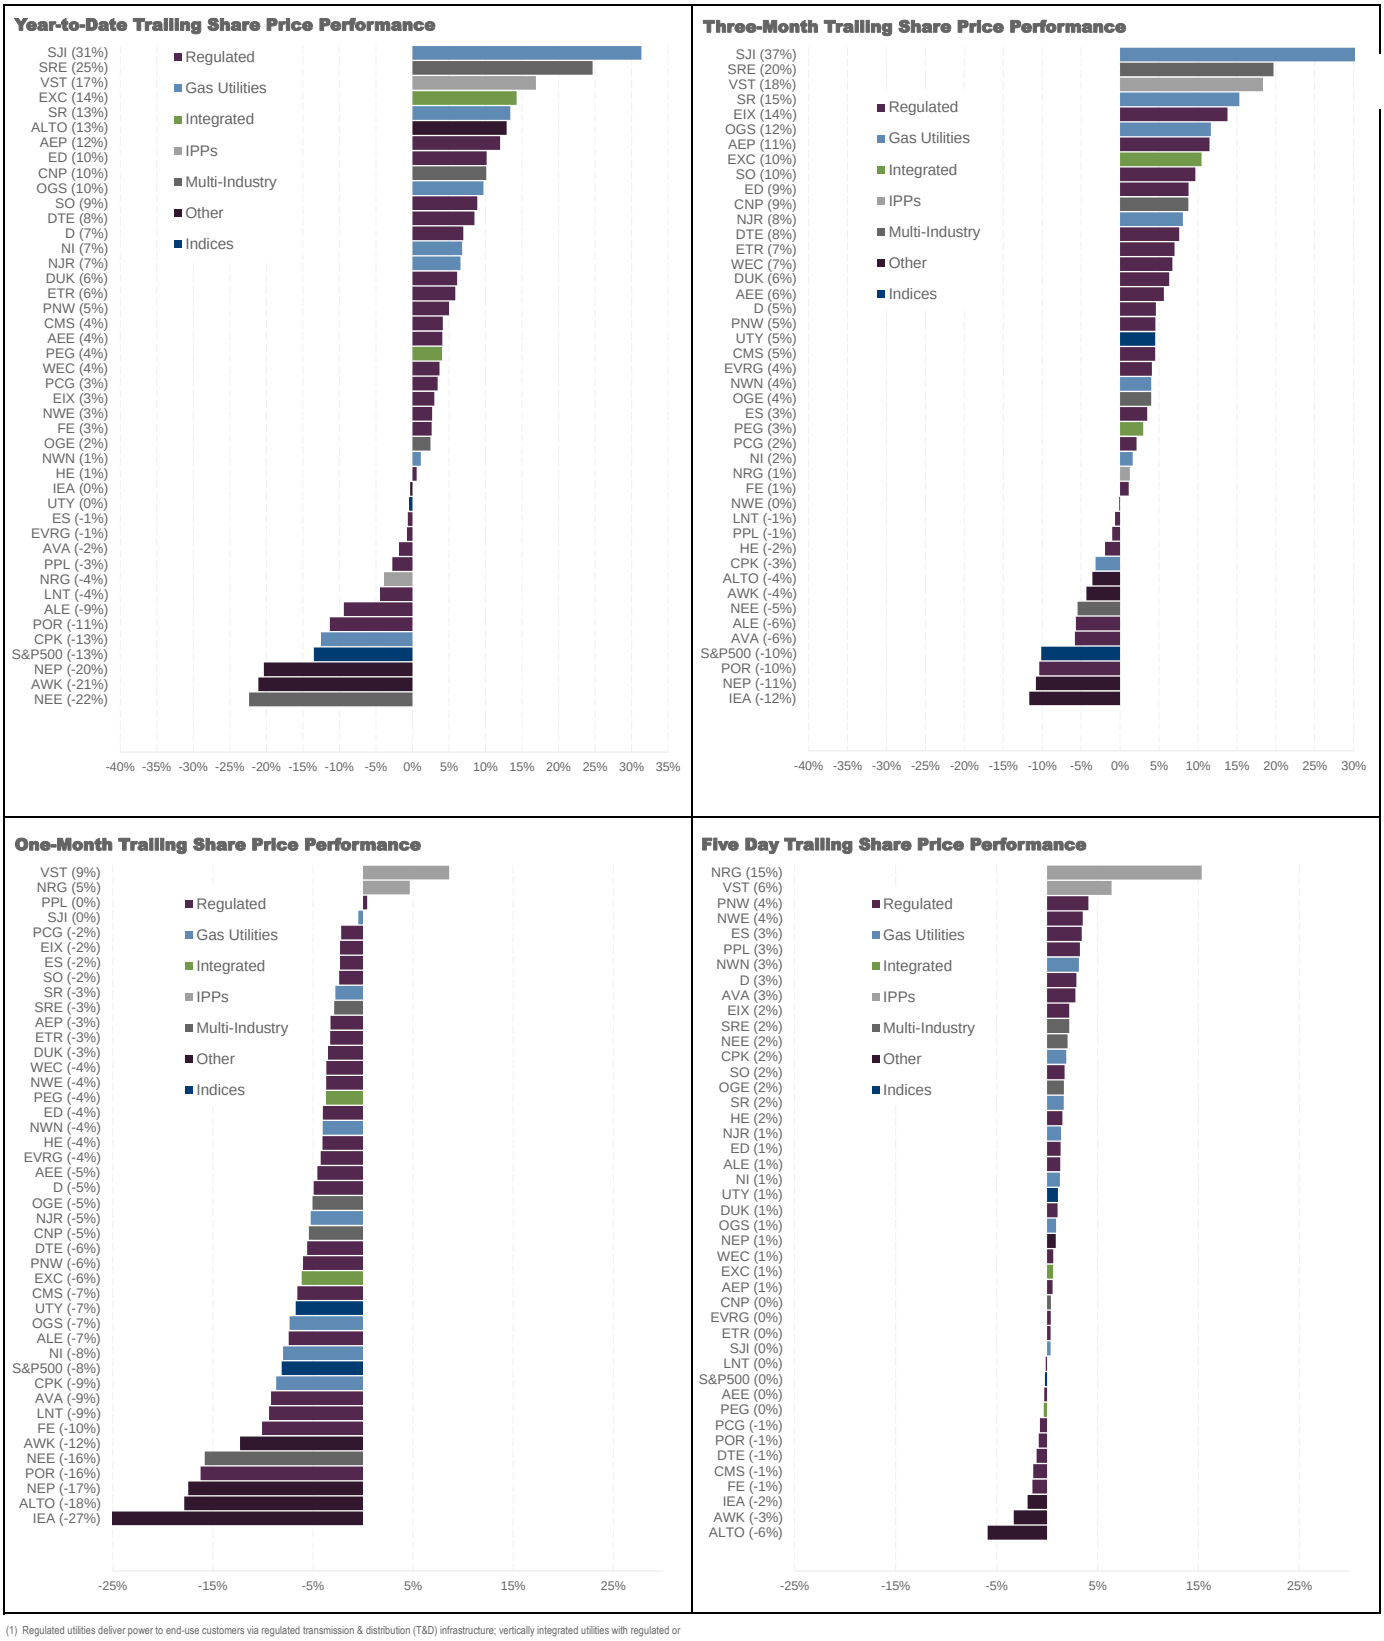
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Exelon Corporation

1Q22 results in line with consensus; reiterates 2022 EPS guidance

Sentiment: Neutral

Our view: We expect Exelon to perform in line with peers this morning despite a penny miss. We believe the spotlight will center on ComEd's earnings expectations under a supportive rate environment. Exelon expects a 4-cent positive EPS impact per 50-bps increase in distribution ROE. On the call, we expect management to cover regulatory updates, inflation, headroom for ratemaking, and balance sheet management.

First impression:

Exelon Corp. reported 1Q22 adjusted EPS of $0.64, same as our estimate and a penny below consensus. EXC reaffirmed full-year 2022 adjusted EPS guidance of $2.18-$2.32.

Regulatory updates: ComEd filed its last annual distribution formula rate update with the ICC earlier in April. An approval is due by December with rates effective starting 2023. The filing is based on a ROE of 7.85%, reflecting average monthly yields for 30-year treasuries plus 580 bps. Turning to PECO's gas distribution rate case, EXC expects a final order some time in 4Q22.

Below are segment results for the quarter compared to our estimates:

- Utilities: $0.75 vs. $0.74 RBC
- Corp: -$0.11 vs. -$0.10 RBC

A conference call is scheduled for 10AM ET. Please dial in at 833-397-0944, pass code 5895167.

Sector Perform

NYSE: EXC; USD 47.06

Price Target USD 46.00

All values in USD unless otherwise noted.
Priced as of prior trading day's market close, EST (unless otherwise noted).

RBC Capital Markets appreciates your consideration in the 2022 Institutional Investor All-America and All-Canada Research Team survey.

Capital Markets

Company description

Exelon is one of the largest power companies in the U.S. Its six T&D utilities (ComEd, PECO, BG&E, PEPCO, DPL, ACE) serve more than 10 million electric and gas customers in DE, DC, IL, NJ, PA, and MD. Exelon operates 11,160 miles of regulated electric transmission lines and expects to have a total rate base of $52 billion by 2022. EXC separated from its generation business, Constellation, in February 2022.

Required disclosures

Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1 or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Exelon Corporation in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Exelon Corporation in the past 12 months.

RBC Capital Markets, LLC makes a market in the securities of Exelon Corporation.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Exelon Corporation during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Exelon Corporation.

RBC Capital Markets is currently providing Exelon Corporation with non-investment banking securities-related services.

RBC Capital Markets has provided Exelon Corporation with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Exelon Corporation with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.
As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

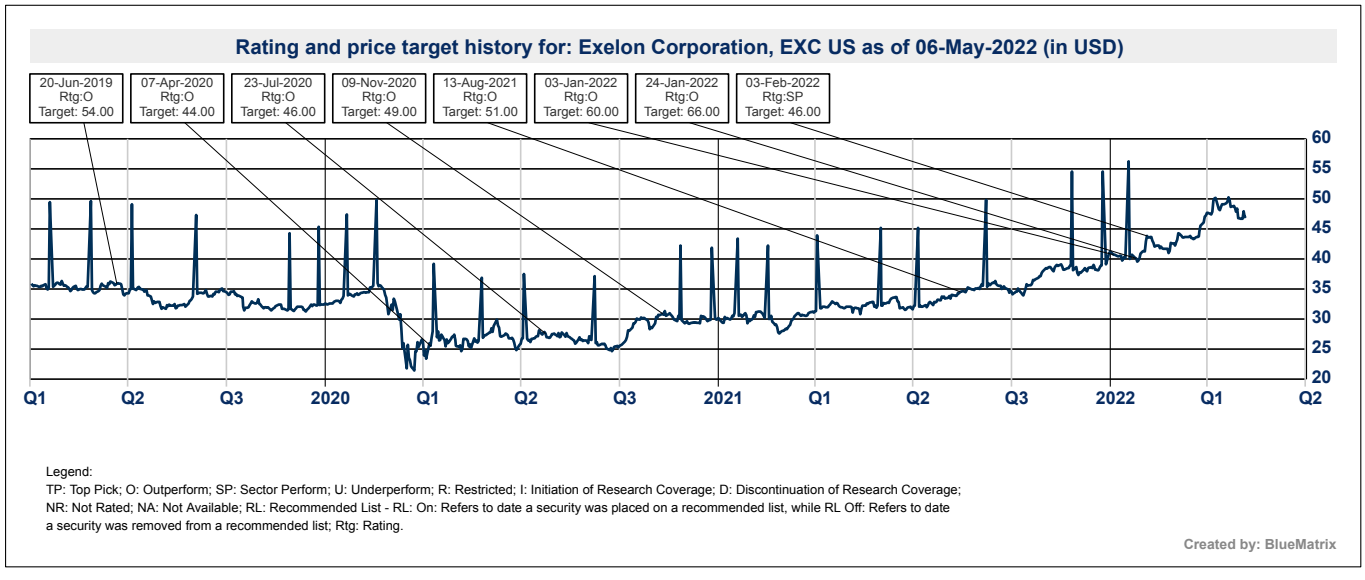
For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings

RBC Capital Markets, Equity Research

As of 31-Mar-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	841	57.68	330	39.24
HOLD [Sector Perform]	569	39.03	172	30.23
SELL [Underperform]	48	3.29	3	6.25



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

RBC Capital Markets

Exelon Corporation

Valuation

Our $46 price target assumes a 19.1x P/E multiple on 2023E utilities EPS of $2.42. Our multiple reflects a slight 4% discount to our base case blended electric and gas multiple of 19.8x, resulting in equity value per share of $46. While we believe Exelon utilities have a similar profile to industry peers (6–8% EPS CAGR and 7–8% rate base CAGR), we give consideration for some regulatory overhang and lower ROE at ComEd. Our price target supports a Sector Perform rating.

Risks to rating and price target

- Deteriorating credit metrics at utilities limit capital investments and/or lead to equity dilution
- Dividend growth slows
- Approval of decoupling mechanisms for remaining utilities leads to improved earnings and cash flow stability

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research content simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets provides eligible clients with access to Equity Research Reports and to SPARC on the Firm's proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in Research Reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published Research Reports reflecting the Research Analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.
For a list of all recommendations on the company that were disseminated during the prior 12-month period, please click on the following link: https://rbcnew.bluematrix.com/sellside/MAR.action
The 12 month history of SPARCs can be viewed at https://www.rbcinsightresearch.com.

Exelon Corp. (EXC): First Take: 1Q2022 misses GS, a little light of consensus; reiterating 2022 guidance

Michael Lapides
+1(212)357-6307 | michael.lapides@gs.com

Goldman Sachs & Co. LLC

John Miller
+1(801)884-4034 | john.y.miller@gs.com
Goldman Sachs & Co. LLC

Exelon Corp (EXC, Neutral) reported 1Q2022 operating EPS of $0.64, below the GSe of $0.68 and Factset consensus of $0.65. For 2022, EXC reaffirmed its EPS guidance range of $2.18-$2.32 which compares to GS/consensus of $2.19/$2.26. The company also reiterated its long-term EPS growth target of 6%-8%.

Highlights from EXC's release and results include:

- **In 1Q2022, EXC beat at PECO and missed at ComEd and the Parent segment - relative to our forecasts.** ComEd, EXC's largest segment, reported 1Q2022 operating earnings of $0.20, below GS estimate of $0.23 and compared to 1Q2021 EPS of $0.20. Among the other subsidiaries, PECO reported $0.21 vs GS at $0.18, BGE at $0.20 vs GS at $0.20 and the PHI utilities at $0.14 vs GS at $0.14. Parent EPS of ($0.11) compared to our ($0.06) view although we note EXC's slides highlight +$0.07 impact for corporate allocations in 1Q2022.
- **EXC maintained guidance for the year,** despite higher interest rates likely leading, due to the authorized RoE formula in Illinois, to higher potential earnings power for its distribution business there.

Topics to monitor on EXC's call include: (1) current inflationary environment and impact to customer bills, (2) sources of potential upside for capital spending, (3) financing needs (including equity, if any), (4) updates in various rate case filings, especially the gas rate case at PECO, and (5) O&M cost management.

We are Neutral rated on EXC with a $45, 12-month price target based on a 19x P/E multiple on our 2023 EPS. Key risks include utility regulation, cost management and financing.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

I, Michael Lapides, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Exelon Corp. is/are relative to the other companies in its/their coverage universe: Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., Constellation Energy Corp., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., The AES Corp., WEC Energy Group, Xcel Energy Inc.

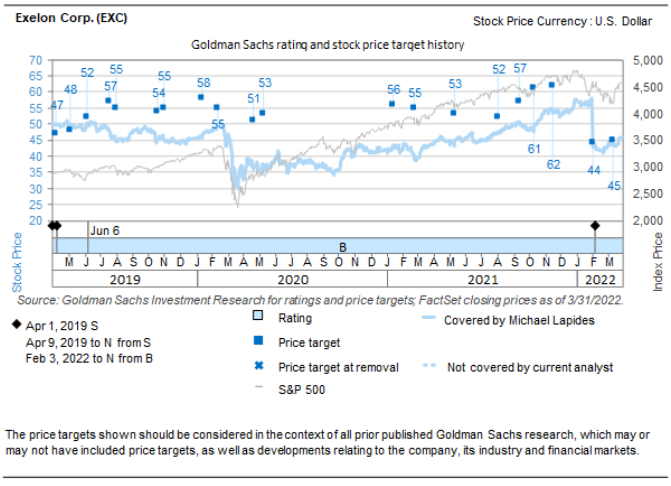
Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at:

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) have been suspended pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Effective from the date of the United Kingdom's departure from the European Union and the European Economic Area ("Brexit Day") the following information with respect to distributing entities will apply:

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: GSI, authorised by the PRA and regulated by the FCA and the PRA, disseminates research in the following jurisdictions within the European Economic Area: the Grand Duchy of Luxembourg, Italy, the Kingdom of Belgium, the Kingdom of Denmark, the Kingdom of Norway, the Republic of Finland, the Republic of Cyprus and the Republic of Ireland; GS -Succursale de Paris (Paris branch) which, from Brexit Day, will be authorised by the French Autorité de contrôle prudentiel et de resolution ("ACPR") and regulated by the Autorité de contrôle prudentiel et de resolution and the Autorité des marches financiers ("AMF") disseminates research in France; GSI - Sucursal en España (Madrid branch) authorized in Spain by the Comisión Nacional del Mercado de Valores disseminates research in the Kingdom of Spain; GSI - Sweden Bankfilial (Stockholm branch) is authorized by the SFSA as a "third country branch" in accordance with Chapter 4, Section 4 of the Swedish Securities and Market Act (Sw. lag (2007:528) om värdepappersmarknaden) disseminates research in the Kingdom of Sweden; Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research in the Federal Republic of Germany and those jurisdictions within the European Economic Area

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

where GSI is not authorised to disseminate research and additionally, GSBE, Copenhagen Branch filial af GSBE, Tyskland, supervised by the Danish Financial Authority disseminates research in the Kingdom of Denmark; GSBE - Sucursal en España (Madrid branch) subject (to a limited extent) to local supervision by the Bank of Spain disseminates research in the Kingdom of Spain; GSBE - Succursale Italia (Milan branch) to the relevant applicable extent, subject to local supervision by the Bank of Italy (Banca d'Italia) and the Italian Companies and Exchange Commission (Commissione Nazionale per le Società e la Borsa "Consob") disseminates research in Italy; GSBE - Succursale de Paris (Paris branch), supervised by the AMF and by the ACPR disseminates research in France; and GSBE - Sweden Bankfilial (Stockholm branch), to a limited extent, subject to local supervision by the Swedish Financial Supervisory Authority (Finansinpektionen) disseminates research in the Kingdom of Sweden.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

J.P. Morgan Securities LLC

- **1Q22 results in line with consensus.** EXC reported 1Q22 adjusted EPS of $0.64, in line with the Street median $0.65 and shy of the JPMe $0.68. ComEd represented the largest delta versus our estimates, with a customer refund driving lower earnings YoY. New rates across EXC's utilities largely drove YoY growth, before partial offsets from higher expenses and other factors. Results also include a -1c storm cost headwind at PHI. Additionally, EXC's Parent drag reflects -2c of BSC costs related to ExGen that do not qualify for discontinued operations, which the company has factored into its 2022 guidance. EXC reaffirmed its $2.18-2.32 2022 guidance range (JPMe/Street median $2.28/$2.26).
- **Minor regulatory updates highlight a quiet quarter.** At the end of March, PECO Gas filed a request for an +$82mm rate increase, with a decision expected by year-end. Outside of PECO, EXC's regulatory calendar remains light, with only small Delmarva cases currently in progress. Moreover, last month ComEd filed its last distribution formula rate update in IL for rates that would take effect in 2023. Early next year, ComEd will make its first multi-year plan filing under recent IL legislation transitioning the state away from formula rates. We remain focused on the proceeding given potential increases to ComEd's ROE and will look for a progress update on the call.
- **Conference call details.** EXC will host a conference call to discuss 1Q22 results on Monday, May 9, at 10:00 AM EDT. Dial-in: 833-397-0944; PIN: 5895167.

Table 1: EXC 1Q22 Results

Income Statement:	Actual 1Q21	Actual 1Q22	JPM 1Q22E	% Chg Y/Y	% Chg vs JPMe	YoY Drivers
Adj Op EPS by Segment						
ComEd	$0.20	$0.20	$0.22	-3%	-10%	+1c distribution rates, -1c other
PECO	$0.17	$0.21	$0.20	22%	7%	+4c distribution rates
BGE	$0.22	$0.20	$0.21	-6%	-5%	+1c T&D rates, -1c D&A, -2c other
PHI	$0.13	$0.14	$0.15	4%	-10%	+3c T&D rates, -1c storm costs, -1c D&A
Corporate & Other	($0.20)	($0.11)	($0.10)	-48%	3%	Includes a -2c discontinued ops adjustment
Adjusted Operating EPS	**$0.52**	**$0.64**	**$0.68**	**22%**	**-6%**

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

J.P.Morgan

J.P. Morgan Equity Research Ratings Distribution, as of April 02, 2022

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	52%	47%	36%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	75%	68%	51%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Morgan Stanley | RESEARCH

UPDATE

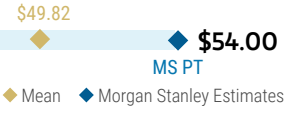
Risk Reward – Exelon Corp (EXC.O)

Low Risk, Wires-Only Utility at an Attractive Entry Point

PRICE TARGET $54.00

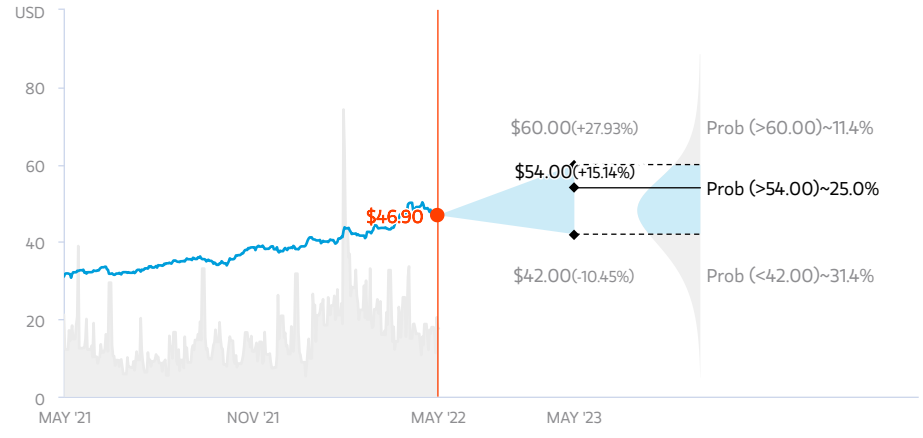
We value the regulated utilities' 2023 earnings by applying the large-cap regulated group P/E multiple at a 10% premium to account for above average earnings growth of 6-8%, a lower business risk profile, long tail of investment opportunities, strong ESG profile, and low exposure to physical risks of climate change.

Consensus Price Target Distribution



Source: Refinitiv, Morgan Stanley Research

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)



Key: Historical Stock Performance Current Stock Price Price Target

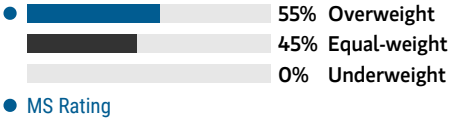
Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 05 May, 2022. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology here

OVERWEIGHT THESIS

Post-spin of the merchant business EXC becomes a low risk, wires-only utility that, in our view, deserves to trade at a valuation premium to the large cap electric group given:

- Above-average EPS growth of 6-8% vs. a typical annual 6% growth rate for peers;
- Low business risk associated with being a wires-only utility;
- Material need for transmission infrastructure in the country that drives a long tail of strong growth opportunities;
- Strong ESG profile with no generation exposure (no exposure to fossil fuels); and
- Low exposure to physical risks from climate change

Consensus Rating Distribution



Source: Refinitiv, Morgan Stanley Research

BULL CASE $60.00

10% premium to peer group

Earnings that grow at a 10% annual rate from 2021 levels and a 15% premium to the large cap electric peer group that reflects the higher growth profile.

BASE CASE $54.00

10% premium to peer group

We value the regulated utilities' 2023 earnings by applying the large-cap regulated group P/E multiple at a 10% premium to account for above average earnings growth of 6-8%, a lower business risk profile, long tail of investment opportunities, strong ESG profile, and low exposure to physical risks of climate change.

BEAR CASE $42.00

In-line P/E multiple

Lower earnings driven by a 9.5% ROE and a 45% equity ratio and an in-line P/E multiple to the peer group.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Global Research Conflict Management Policy

Morgan Stanley Research has been published in accordance with our conflict management policy, which is available at www.morganstanley.com/institutional/research/conflictpolicies. A Portuguese version of the policy can be found at www.morganstanley.com.br

Important Regulatory Disclosures on Subject Companies

As of April 29, 2022, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Duke Energy Corp, Edison International, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Spire Inc.
Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Algonquin Power & Utilities Corp, Ameren Corp, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, PG&E Corp, Sempra Energy, Southern Company, Spire Inc, Xcel Energy Inc.
Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Algonquin Power & Utilities Corp, Ameren Corp, AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, PPL Corp, Sempra Energy, Southern Company, Xcel Energy Inc.
In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.
Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, Southern Company, Spire Inc, Xcel Energy Inc.
Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.
Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.
Morgan Stanley & Co. LLC makes a market in the securities of Ameren Corp, Atmos Energy Corp., CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, ONE Gas Inc, PG&E Corp, Pinnacle West Capital Corp, PPL Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.
The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.
Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.
Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Morgan Stanley | RESEARCH

UPDATE

Global Stock Ratings Distribution

(as of April 30, 2022)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm. For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

	COVERAGE UNIVERSE		INVESTMENT BANKING CLIENTS (IBC)			OTHER MATERIAL INVESTMENT SERVICES CLIENTS (MISC)	
STOCK RATING CATEGORY	COUNT	% OF TOTAL	COUNT	% OF TOTAL IBC	% OF RATING CATEGORY	COUNT	% OF TOTAL OTHER MISC
Overweight/Buy	**1424**	**40%**	**374**	**44%**	**26%**	**626**	**40%**
Equal-weight/Hold	**1564**	**44%**	**373**	**44%**	**24%**	**705**	**45%**
Not-Rated/Hold	**0**	**0%**	**0**	**0%**	**0%**	**0**	**0%**
Underweight/Sell	**564**	**16%**	**95**	**11%**	**17%**	**219**	**14%**
TOTAL	**3,552**		**842**			**1550**	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC & E*TRADE Securities LLC Customers

Important disclosures regarding the relationship between the companies that are the subject of Morgan Stanley Research and Morgan Stanley Smith Barney LLC or Morgan Stanley or any of their affiliates, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to www.morganstanley.com/researchdisclosures.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC and E*TRADE Securities LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

Morgan Stanley & Co. International PLC and its affiliates have a significant financial interest in the debt securities of Algonquin Power & Utilities Corp, Ameren Corp, Atmos Energy Corp., AVANGRID, Inc, CenterPoint Energy Inc, CMS Energy Corp, Consolidated Edison Inc, Dominion Energy Inc, DTE Energy Co., Duke Energy Corp, Edison International, Entergy Corp, Eversource Energy, **Exelon Corp**, FirstEnergy Corp, PG&E Corp, Sempra Energy, South Jersey Industries Inc, Southern Company, Spire Inc, Xcel Energy Inc.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at http://www.morganstanley.com/matrix.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at http://www.morganstanley.com/matrix.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (http://www.morganstanley.com/terms.html). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (http://www.morganstanley.com/terms.html). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

ALE: MN Power Heads Into Key Regulatory Stretch (see our note HERE)

D: Solid Quarter Comes with Excellent Solar Update, and No, Millstone Still Isn't For Sale (see our note HERE)

ED: 1Q EPS Largely In-Line With a Sense of Normalcy in a Turbulent Market; No Surprises as ED Turns in a Benign Quarter, But Valuation Remains Elevated (see our note HERE)

ES: Is 1Q the New 4Q? Offshore Wind Goes on the Block – We Fully Agree, Time to Focus on Basics (see our note HERE)

EVRG: Good Start to 2022 as MO Cases Come Into Focus (see our note HERE)

NJR: Energy Services One-Timer Drives Beat and 2022 Raise; 7%–9% Annual Growth Reiterated Despite Solar Capex Cuts but Questions Remain (see our note HERE)

OGE – 1Q EPS Beat: Post COVID Recovery in Full Swing; ET Transformation Coming Together (see our note HERE)

PPL: Ocean State? More Like Waiting State… (see our note HERE)

SRE: 1Q Beat Sets Strong Start for '22; All Focus on LNG Gyrations; We See Path to 45 MTPA but Timeline Still Unclear (see our note HERE)

VST – VST reports 1Q22 results; call at **8:00am ET**

NRG – NRG to report 1Q22 results; call at **9:00am ET**

AEE – AEE reports 1Q22 results; call at **10:00am ET**

SR – SR reports F2Q22 results; call at **11:00am ET**; Net economic EPS of $3.42 vs Gugg/consensus at $3.10/$3.12; narrows FY22 net economic EPS guidance of to $3.75-3.95 ($3.85 midpoint unchanged)

Solar – DOE secretary voices concern of DOC solar tariff anti-circumvention investigation

PCG – PCG issues $3.6B securitization

EXC – Rebuttal testimony filed in ComEd performance docket

Nuclear/CT – New nuclear construction legislation advances in CT

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

SR reports F2Q22 net economic EPS of $3.42 vs. Gugg/consensus at $3.10/$3.12; narrows FY22 net economic EPS guidance to $3.75-3.95 ($3.85 midpoint unchanged) vs. $3.70-4.00 ($3.85) previously, and compared to Gugg/consensus at $3.84/3.95

- Narrowed FY22 midpoint of **$3.85 compares vs. Gugg at $3.84** and consensus at $3.95.
- Reiterates confidence in 5%-7% long-term EPS growth.
- Capex: $3.1bn budget through 2026 remains unchanged.
- FY22 capex now expected to be $540m (reflecting the deferral of non-operational overhead costs for Spire Missouri into a regulatory asset).
- Reiterates 7%-8% annual rate base growth.
- *Presentation and accompanying details not yet released.*
- Earnings call will be held today at **11:00 AM ET**… Dial-in: **844-824-3832**…(**no access code**)

Solar ─ DOE secretary voices concern of DOC solar tariff anti-circumvention investigation

- Energy Secretary Jennifer Granholm voiced concern over the DOC warned a Senate panel that the investigation could be detrimental to clean energy goals and economic development.
- "At stake is the complete smothering of the investment and jobs and the independence that we would be seeking as a nation to get our fuel from our own generation sources," Granholm from Senate budget meeting.
- More media coverage here.

Guggenheim takeaway: FYI. The voices from within the administration now appear clearly supportive, in our view, of an expedited resolution to the DOC investigation.

PCG ─ PCG issues $3.6B securitization

- PCG announced the PG&E has entered into an agreement to issue the $3.6B rate neutral securitization bonds as part of the post-bankruptcy financing approval.
- More on PG&E SEC filings here.

Guggenheim takeaway: FYI, as we anticipated, PG&E continues to move through post-bankruptcy securitization. The mechanisms for securitization have been scrutinized and first bond issuances are commencing.

EXC ─ Rebuttal testimony filed in ComEd performance docket

- "Staff and many intervenors provided a variety of perspectives on that proposal in their direct testimonies. ComEd appreciates the feedback and proposals provided by Staff and Intervenors and we considered all of them carefully. While ComEd continues to believe its original proposal was worthy of approval, ComEd has decided to voluntarily modify seven (7) of its eight (8) proposed performance metrics and two (2) of the tracking metrics, and add two (2) new tracking metrics for a total of 13 tracking metrics." - EXC
- More HERE.

Guggenheim takeaway: *Minor FYI – this docket is part of the performance opportunities introduced with CEJA.*

Nuclear/CT ─ New nuclear construction legislation advances in CT

- HB5202 appears to have passed the House and Senate.
- More HERE.

Guggenheim takeaway: *Minor FYI – the bill appears to be narrowly tailored to the Millstone site and has waste requirements.*

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings

Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite

Location: TBD

Tuesday, July 12th

11:30 AM | Lunch

Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience

Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game

Southern Company C-Suite will host in their private box. Dinner will be served.

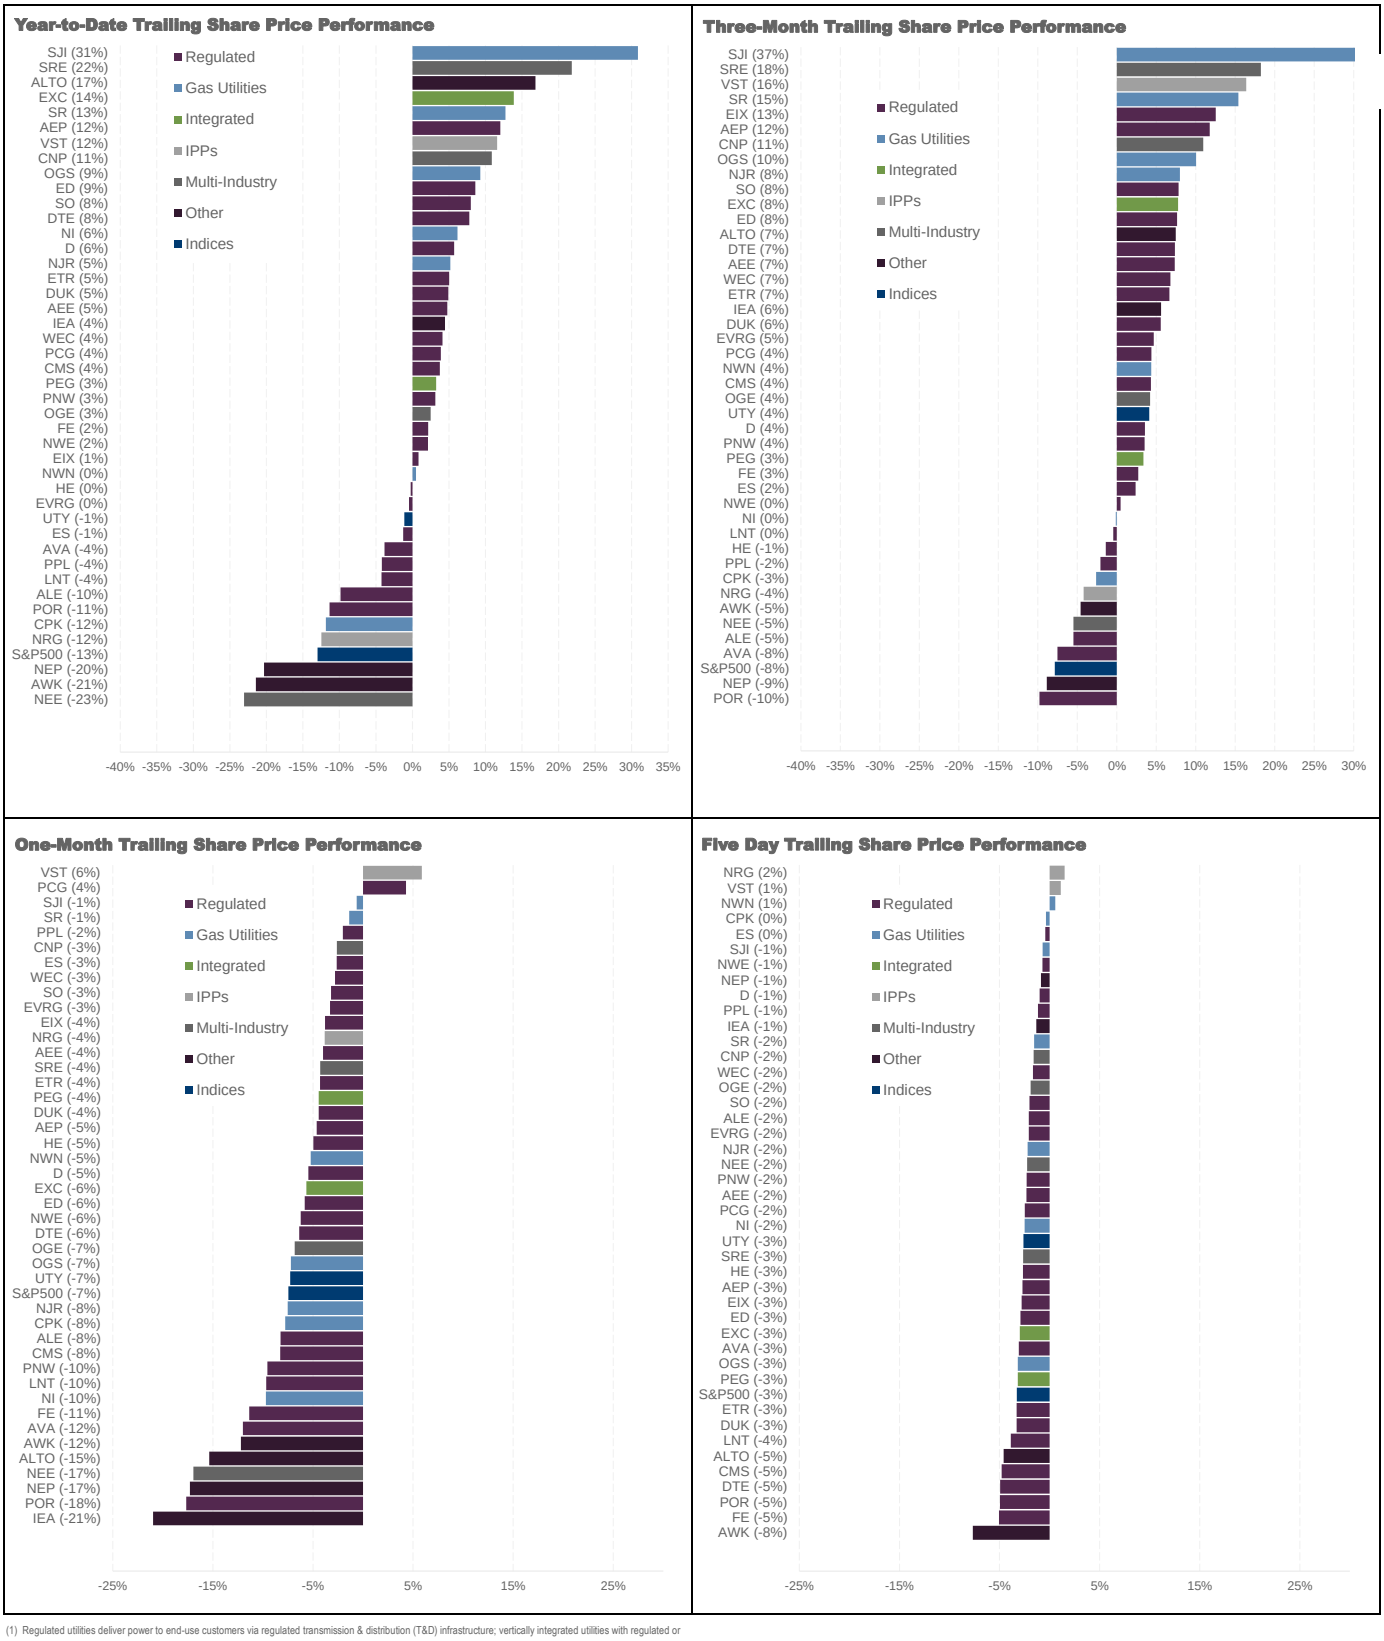
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.

ES – ES reports 1Q22 results

SRE – reported 1Q EPS beat; guidance reiterated; CA/TX rate case filings this month; minor LNG progress

OGE – reported 1Q EPS beat; reiterated OG&E guidance; sold 21M ET Shares

NJR — NJR reports F2Q22 NFEPS of $1.36 vs. Guggenheim at $1.30 and consensus of $1.26; raising FY22 NFEPS guidance

AEP – KY PSC approves AEP sale of Kentucky businesses

D – $61mm in additional VC Summer refunds headed to DESC customers

MISO/IL – Concerns over downstate power supplies continue to propagate

EXC/MD – Gov Hogan appoints new commissioner following resignation

CNP – IURC approves CNP solar PPAs related to the IN IRP

ES – ES reports 1Q22 results

- ES reported 1Q22 EPS of $1.28, as compared to Gugg/Cons of $1.20.
- Reaffirmed 2022 EPS guidance of $4.00-$4.17 vs. Gugg/Cons of $4.10.
- Management has announced a strategic review of the non-regulated offshore wind portfolio, including a potential full sale of the JV.
- The review will be completed 'during' 2022.
- "Eversource expects potential proceeds from such transaction would likely be used to support Eversource's regulated investments in strengthening, modernizing and decarbonizing its regulated energy and water delivery systems" - release.
- CFO Phil Lembo will also retire, to be succeeded by John Moreira.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- Slides provide an update on wind portfolio metrics since the 4Q21 update – no changes (total investment to date has increased, as expected).
- Regulated capex unchanged.
- $1.2bn ATM expected to commence in 2Q22.
- More HERE.
- Slides HERE.

SRE reported 1Q EPS beat; guidance reiterated; CA/TX rate case filings this month; minor LNG progress

- SRE reported first-quarter EPS of $2.91, beating $2.80 consensus and our $2.70 EPS estimate.
- Cameron LNG Phase 2 expansion project reached HOAs with its partners at the Cameron LNG joint venture (provides the commercial framework for the expansion of the facility).
- SRE previously announced an MOU with TotalEnergies for the Vista Pacífico LNG.
- SRE affirmed its full-year 2022 adjusted EPS guidance range of $8.10 to $8.70, and full-year 2023 EPS guidance range of $8.60 to $9.20.
- SRE will be filing general rate cases in TX and CA later this month.
- SRE completed $750M of share repurchase through April 2022; $132/sh average price.

OGE reported 1Q EPS beat; reiterated OG&E guidance; sold 21M ET Shares

- OGE reported 1Q EPS of $1.39 (inclusive of gains on ET shares and tax timing).
- Excluding the 283M pretax gain on ET shares at a statutory tax rate of ~30%, OGE reported 1Q EPS of $0.40 vs. $0.15 consensus and our $0.18 estimate.
- OG&E Utility reported EPS of $0.19 vs. $0.18 embedded in our estimate.
- OGE's reported Other Operations net income of $10.4M includes a tax benefit impact due to a consolidating tax adjustment of $11.9M, which is due to reverse in the remainder of 2022.
- Through the end of April 2022, OGE has sold 21.75M shares of Energy Transfer (ET) resulting in pre-tax net proceeds of $246M and a remaining ownership percentage of ~2% (~80M).

NJR reports F2Q22 NFEPS of $1.36 vs. Guggenheim at $1.30 and consensus of $1.26; raising FY22 NFEPS guidance to $2.30-$2.40 ($2.35 midpoint) vs. $2.20-$2.30 ($2.25 midpoint), previously

- Outperformance at Energy Services drove the increase to FY22 guidance to $2.30-$2.40 from previously issued guidance of $2.20-$2.30.
- Reiterated 7%-9% LT annual growth off FY22.
- Revised FY22's business mix guidance ranges of:
  - New Jersey Natural Gas: **60%-62%** (vs. *60%-65%* prior)
  - Clean Energy Ventures: **17%-20%** (vs. *20%-23%* prior)
  - Storage and Transportation: **5%-8%** (vs. *5%-10%* prior)
  - Energy Services: **13%-15%** (vs. *9%-11%* prior)
  - Home Services and Other: **~0%-1%** (vs. *0%-1%* prior)
- CEV has a ~680 MW pipeline of projects under contract, construction or exclusivity through fiscal 2027.
- Construction 90% completed at Adelphia Gateway; flowing gas to its South Zone (serving the Philadelphia metro area).
- ~1.8K new customer additions at NJNG in F2Q22 vs. +1.7K in F1Q22.
- Earnings call will be held today at **10:00 AM ET**… Dial-in: **844-200-6205**…Access code: **373548**

AEP – KY PSC approves AEP sale of Kentucky businesses

- **"Final Order Entered: 1. Liberty's acquisition of Kentucky Power from AEP is approved subject to the modifications set forth in this Order.** 2. Kentucky Power

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

shall record a $30 million regulatory liability for increased transmission expenses in 2022 and 2023. 3. Three years of the $15 million annual subsidization of transmission costs is suspended conditioned on the Joint Applicants, including AEP, immediately and actively seeking the best solution for Kentucky Power and its customers regarding Kentucky Power either establishing its own PJM zone, joining another PJM zone, or another solution that results in Kentucky Power and its customers receiving benefits commensurate with its cost of participation. 4. Within five days of the closing of the acquisition, Liberty shall file a written notice setting forth the date of the acquisition. 5. Kentucky Power shall record a $43.561 million regulatory liability for deferred distribution restoration expenses. 6. The $40 million FAC Credit, as modified in the body of this Order, is approved. 7. The BSDR Deferral, as modified in the body of this Order, is approved. 8. Within ten days of receipt of regulatory and judicial decisions on pending applications, Joint Applicants shall file notice of all regulatory and judicial approvals that are pending as of the date of this Order."

- Docket HERE.
- Also… "**Final Order Entered: 1. Kentucky Power's request for approval of the Mitchell Ownership Agreement and the Mitchell O&M Agreement, as contained in the March 15, 2022 amended application and the April 14, 2022 post-hearing brief, is granted** subject to the modifications discussed in this Order. 2. Within 20 days of the date of this Order, Kentucky Power shall file the modified Mitchell Agreements, as approved in this Order, into the post-case correspondence file and reference this case number. 3. This case is closed and removed from the Commission's docket."
- Docket HERE.

Guggenheim takeaway: *AEP is to file any remaining approvals required with the KY PSC within 10 days of this order and looks to us to be on track to close the sale of its Kentucky businesses to AQN-TSX's US subsidiary in 2Q22 as originally contemplated. For more, see our recent thoughts HERE.*

D ─ $61mm in additional VC Summer refunds headed to DESC customers

- A judge has reportedly approved $61mm in refunds to SC customers following the successful sale of several properties associated with the defunct nuclear project.
- The ultimate avenue of flowback to customers remains under evaluation.
- More HERE.

Guggenheim takeaway: *Minor FYI and not a surprise to us as this is the second round of refunds.*

MISO/IL ─ Concerns over downstate power supplies continue to propagate

- An IL House committee heard yesterday from manufacturers and retailers concerned about the downstate impact of fossil plant closures, with the groups pushing for the recently tabled amendment 8.
- More HERE.
- "Because of self-inflicted overburdensome regulation of Illinois' energy supply by Governor Pritzker and the state power agency, residential ratepayers could see as much as $41 more a month on their electricity bill. This is outrageous. Something can and must be done and we can start by allowing 2 of our clean coal-fired power plants scheduled to close this year to stay open" – Rep. Dan Caulkins Op-Ed HERE
- "There are major plants in central and southern Illinois that right now are trying to figure out how they're going to run their operation in eight years because wind and solar don't generate steam…There are major facilities that employ thousands of people and jobs that average $100,000 a year. They're calling me and telling me we don't know how we're going to operate in eight years." - IMA President and CEO Mark Denzler HERE

Guggenheim takeaway: *Yet another IL data point flagged for your awareness and zero surprise in our view given the noise to date.*

EXC/MD ─ Gov. Hogan appoints new commissioner following resignation

- Commissioner Mindy Herman reportedly resigned effective yesterday, with Gov. Hogan appointing Patty Bubar to her place on the 5-person PSC.
- More HERE.

Guggenheim takeaway: *FYI.*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

CNP – IURC approves CNP solar PPAs related to the IN IRP

- CNP Indiana South received approval from the Indiana Utility Regulatory Commission (IURC) for 2 solar PPAs for 335 MWs.
- PPAs are part of CNP IN part of the long-term electric generation transition plan (IRP).
- PPA terms are 15-20 years.
- More here.

Guggenheim takeaway: *FYI.*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Exelon Corporation (EXC) operates as a utility services holding company, which engages in the energy generation, power marketing, and energy delivery business. It operates through the following segments: Mid Atlantic, Midwest, New York, Electric Reliability Council of Texas (ERCOT) and other Power Regions. The Mid-Atlantic segment represents operations in the eastern half of PJM, which includes New Jersey, Maryland, Virginia, West Virginia, Delaware, the District of Columbia and parts of Pennsylvania and North Carolina. The Midwest segment operates in the western half of PJM, which includes portions of Illinois, Pennsylvania, Indiana, Ohio, Michigan, Kentucky and Tennessee, and the United States footprint of MISO, excluding MISO's Southern Region, which covers all or most of North Dakota, South Dakota, Nebraska, Minnesota, Iowa, Wisconsin, the remaining parts of Illinois, Indiana, Michigan and Ohio not covered by PJM, and parts of Montana, Missouri and Kentucky. The New York (NY) segment provides operations within ISO–NY, which covers the state of New York in its entirety. The ERCOT segment includes operations within the Electric Reliability Council of Texas, covering most of the state of Texas. The Other Power Regions consist of the operations in New England, South, West, and Canada. The company was founded in February 1999 and is headquartered in Chicago, IL. (Source: FactSet)

Company Information

Market Cap: $16.2bn

American Water Works Co., Inc. is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, Florida, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, New Jersey, Florida, Tennessee, and Maryland. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA. (Source: FactSet)

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings

Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite

Location: TBD

Tuesday, July 12th

11:30 AM | Lunch

Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience

Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game

Southern Company C-Suite will host in their private box. Dinner will be served.

Participating Guggenheim Analyst

Shahriar (Shar) Pourreza, *Senior Managing Director – Power & Utilities*

Logistics

Transportation details, logistics and hotel recommendations to follow

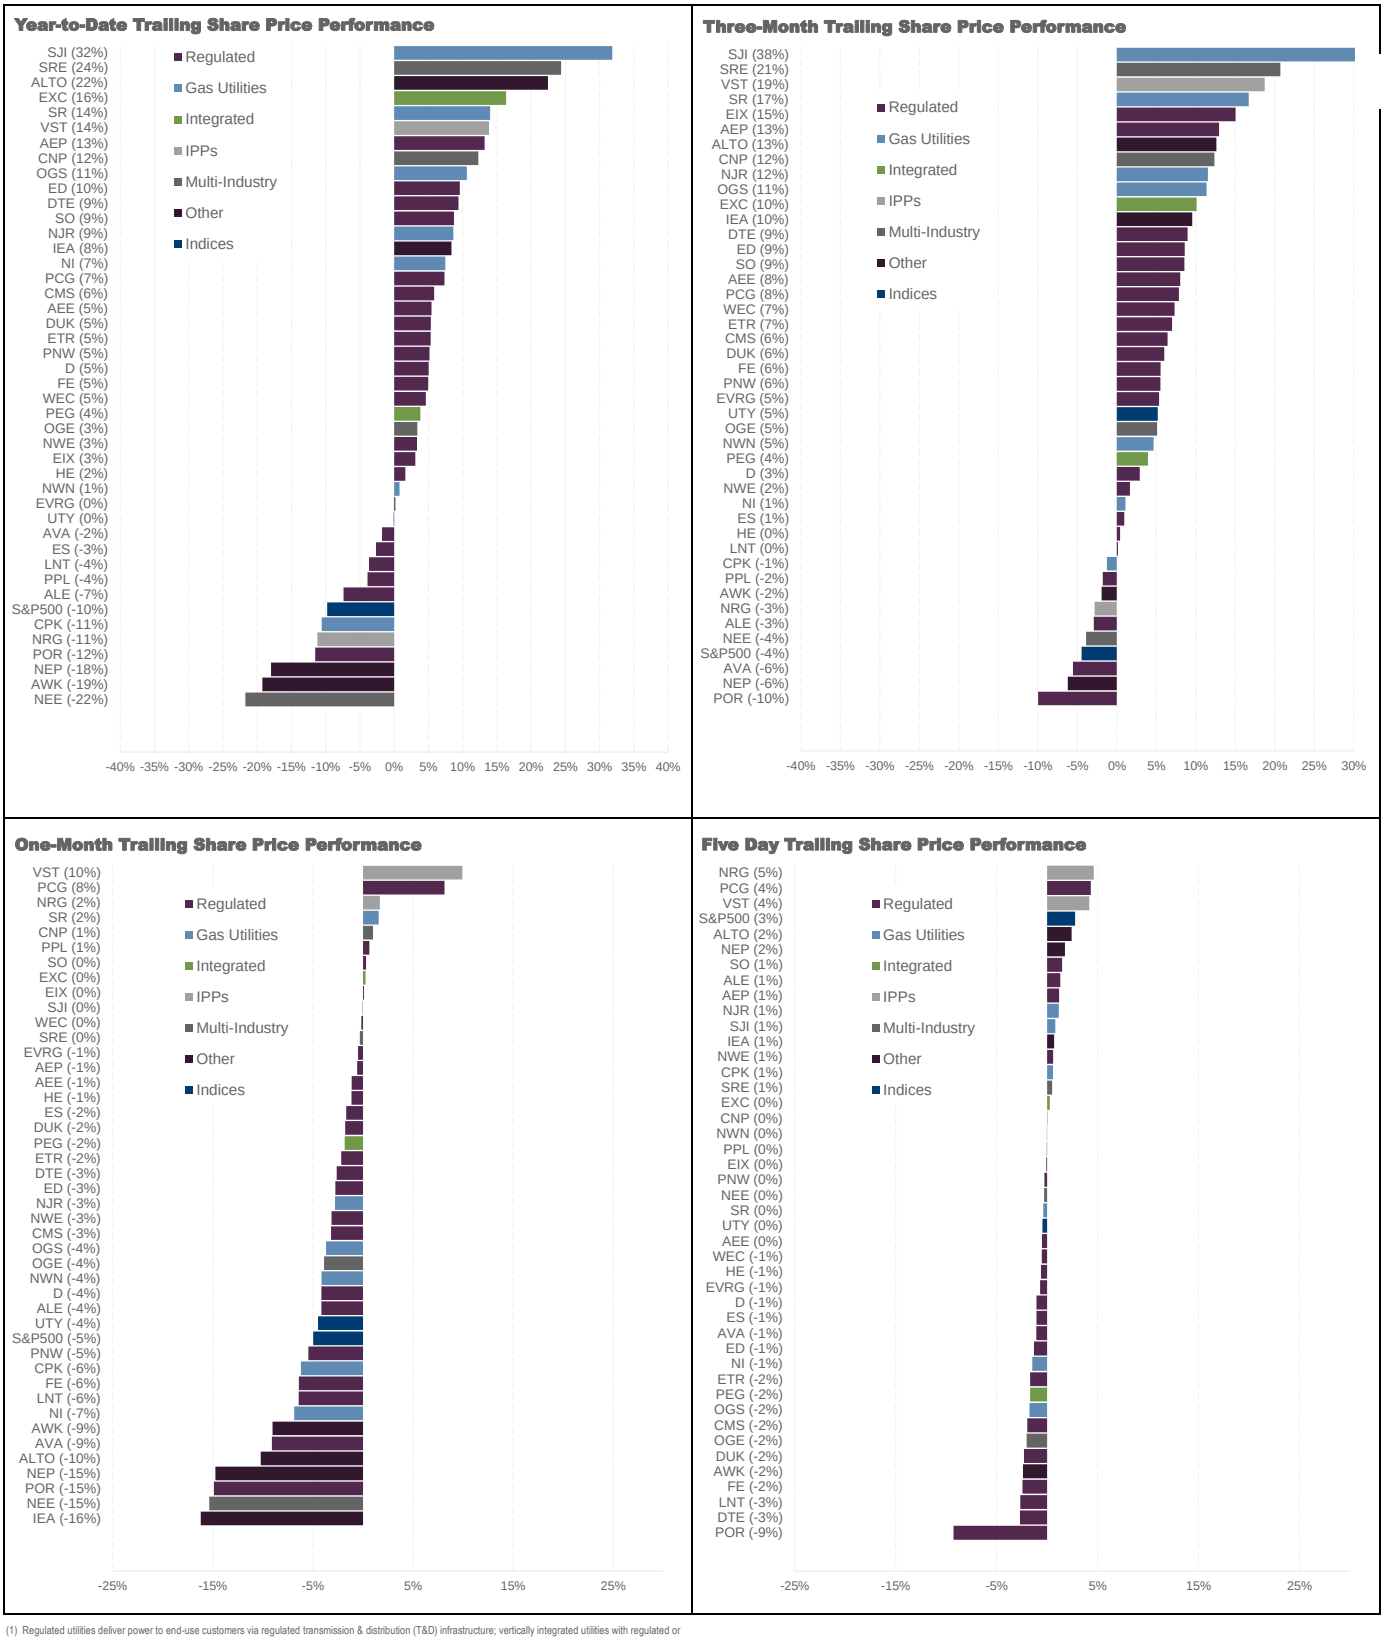
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Energy: Electric Utilities

Midweek Thoughts — Update on AD/CVD Investigations, NOVA, EXC, ES, AEE, XEL, CNP

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

1Q earnings dominate the news flow. WEC, CNP, CMS, OTTR, PEG, EIX, HASI, AVA, and PNW reported results earlier this week. ES, D, SRE, ED, AEE, and RUN are on tap for the remainder of the week. We provide an update on the AD/CVD investigations as it relates to the DoC issuing a memo clarifying certain components of the investigation; NEE and TSLA make filings putting forward their case against the investigation and a group of 22 U.S. senators write to the president requesting an expedited conclusion to the proceedings. NOVA announced a new market-rate-based energy plan for new customers that would set rates at a specific discount to utility rates for a 25-year period; MD governor appoints new commissioner at PSC following an off-cycle vacancy; CT legislature passes ambitious EV target for state fleet; FERC rejects a MISO proposal to allow transmission owners to self-fund HVDC network upgrades, and CNP received commission approval for 335 MW of solar PPAs in IN.

Upcoming Earnings Reports

ES, D, and SRE report BMO tomorrow (Thursday). **ED** is scheduled to report results AMC tomorrow and **AEE** reports BMO on Friday. Among our renewable names, **RUN** reports AMC today. Our recently published preview includes our thesis, expectations, and estimates for our coverage.

Earlier this week, **WEC, CNP, CMS, OTTR, PEG, EIX, HASI, AVA, and PNW** reported earnings. Scroll down for our takeaways.

Industry News and News from Companies in Our Coverage

AD/CVD Investigation Update: The DoC issued a memo providing some clarification on the pending investigation. NEE and TSLA made filings with the DoC outlining their position, and a bipartisan group of senators is urging the administration for a speedy ending to the investigation.

- The DoC issued some clarification on the pending investigation. The memo outlines the certification process that it has used in prior CV inquiries where the department has made affirmative determinations. The memo also says that wafers produced outside China with polysilicon sourced from China are not subject to the CV inquiries. Commerce clarified that if Chinese origin wafers are used in the completion of solar cells or modules in the four targeted counties and were supplied by a Chinese manufacturer under specific rate structures, and if the DoC makes an affirmative determination, the cash deposit for the relevant imports will be the same as that currently applied for that Chinese manufacturer or the exporter's company-specific rate. The memo, in our opinion, provides some boundaries on what an affirmative determination could entail for importers.
- TSLA and NEE made filings with Commerce. TSLA called the investigation overly broad and based on false assumptions and offered proof that the components in solar cells imported from the four mentioned countries are not always produced using Chinese inputs. NEE argued that the process of cell production is complicated, highly technical, and exceeds the legal bar of minor manufacturing that is needed to prove circumvention.
- A bipartisan group of 22 senators has written a letter to the president to request an expedited outcome in the pending AD/CVD investigations initiated by the DoC. The letter requests that the administration make an expedited preliminary determination and that the determination make careful consideration regarding policy ramifications and reject the request for retroactive tariffs. The four Southeast Asian countries subject to the investigation contribute more than 80% of the CSPV panel imports into the U.S. and more than half of the total U.S. panel supply. Thus far, it appears that there has been no change in the DoC's schedule and the deadline for a preliminary determination remains August 29. Based on our expert call, a deliberate process will be time-consuming and a determination is unlikely before the August 29 deadline.
- Earnings commentary from companies in our coverage thus far has been consistent—2022 projects are on track, and the industry may hit an air pocket in six to nine months, potentially delaying 2023 schedules or warranting a pivot from solar to wind. NiSource (Not Covered), however, expects a delay in the development of several solar projects, including two under construction, and will

postpone the retirement of two coal-fired units in IN (~722 MW) that were previously scheduled to be retired in 2023. NiSource management said that it expects a delay of 6-18 months for most solar projects scheduled for COD in 2022/2023.

NOVA — NOVA is launching an energy plan that offers new customers a fixed percentage discount on utility rates: NOVA is offering a 25-year market-based rate as a new solar rate option where the market-based rate will move with market rates. The Company will monitor utility rates and adjust customer pricing to the targeted discount percentage rate for that year. The discount percentage will vary by market but will remain the same vs. the local utility rate over the life of the contract. The plan allows customers to benefit from market-based variability in utility rates vs. traditional plans that are set at the contract and built-in annual escalators regardless of market pricing.

CNP — CNP IN-S receives approval for 335 MW of solar PPAs: IURC approved that CNP Indiana South can enter into two PPAs for an additional 335 MW of solar energy. The PPAs are part of CNP's energy transition plan in the state. The PPAs consists of a 15-year PPA for 185 MW of solar power and 150 MW under a 20-year PPA. CNP is awaiting approval to construct two natural gas combustion turbines to replace a portion of its coal-fired generation fleet.

EXC — Commissioner turnover at the MD PSC: Commissioner Herman resigned her position effective May 4, prompting Governor Hogan (R) to appoint Patrice Bubar as a replacement. The appointment is subject to confirmation by the MD Senate. Commissioner Herman's term did not expire until 2024. Bubar has been the deputy director of the MD DEP since 2015. Their prior experience includes positions at EPS and NRC. If the Senate approves the appointment, Bubar will hold the position until 2024. The MD Commission consists of five members. Governor Hogan is not eligible for reelection during this November's gubernatorial elections. EXC does not have any open GRC proceedings in MD at present.

ES — CT legislature passes a bill requiring 100% of the state vehicle fleet to be EV by 2030: The legislature passed SB 4, which sets a goal for 50% of its fleet to be light-duty EVs by 2026, 75% by 2028, and 100% by 2030. The state will not approve diesel-fueled buses for purchase starting in 2024. The bill sets a target for 30% of the state's buses to be zero emissions by 2030. The bill is expected to be signed into law by Governor Lamont (D) and will bring CT EV targets roughly in line with those in place in CA.

AEE, XEL — FERC rejects MISO's proposal that transmission owners self-fund HVDC network upgrades: FERC rejected that MISO could allow incumbent transmission owners to unilaterally pay for, and earn a return on, upgrades needed to interconnect merchant HVDC transmission facilities. FERC ruled that MISO did not provide adequate justification for not extending other funding options to merchant developers. Renewable power project developers opposed MISO's proposal as one that would force clean energy developers to pay for the regulated return on the investments made by the transmission owners. FERC previously made a similar decision against NYISO and a PJM proposal for transmission owners to earn a 10.3% return on network upgrades is pending with the FERC. SPP also recently approved a self-funding proposal. FERC in its ruling classified the merchant HVDC connection as a necessary upgrade with only one way to fund it and thus the transmission owner designs and builds the necessary upgrade at the expense of the merchant developer. Developers needing network upgrades, on the other hand, have more options, including constructing the infrastructure themselves, and thus allowing incumbent transmission owners to build and earn a return on such upgrades would be discriminatory.

Earnings Recap

PNW — PNW reported EPS of $0.15, which was ahead of our consensus matching estimate of $0.06. The Company continued to experience strong customer and sales growth, which has largely mitigated the inflationary pressures so far. 1Q22 was relatively quiet as PNW builds toward filing a new rate case and continues through its Appeals process. See our note here.

AVA — AVA reported EPS of $0.99, which was ahead of our estimate of $0.95 and consensus of $0.91, as a result of tax benefits from its recent rate cases going into effect. The Company maintained 2022 consolidated guidance, but pointed toward the lower end, as the Utility segment is expected to come in below the lower end of the segment's range due to higher power supply costs, which will be partially mitigated by its recent inclusion in the Western EIM. Longer-term, management expects to mitigate higher power costs through its pending GRC filings and reaffirmed its 2023 EPS guidance. See our note here.

HASI — HASI reported a mostly in-line quarter and reiterated the long-term growth rate of 10-13% for distributable EPS and 5-8% for dividends. Thus far, the Company has navigated the rising rate environment and inflationary backdrop effectively as it has not seen spread compression. That said, the ongoing AD/CVD investigations could potentially involve a pivot away from solar to other technologies if the investigation continues on the current timeline. See our note here.

EIX — EIX reported an operationally uneventful 1Q, beating both consensus and our estimates as revenue increases more than offset operational cost increases and higher D&A. The Company edged closer to the resolution of the outstanding wildfire claims and is eyeing late 2023 for potential recovery filing, which we view as an encouraging development. See our note here.

PEG — PEG reported a strong quarter as the Power segment earnings beat our forecasts. Nonetheless, the Company maintained guidance for the year. A BPU outcome on the Infrastructure Advancement Plan and the Coastal Wind Link offshore transmission

outcome are both expected later this year and would inform the next capex reiteration that PEG could offer in the fall. In the meantime, the Company continues to execute on the simplified asset base while waiting on a long-term solution from the Federal government on the nuclear tax credits. See our note here.

OTTR — OTTR had another strong performance with another beat and raise as the Plastics segment continued to benefit from market conditions. Overall, OTTR posted EPS of $1.72 vs. a consensus of $1.18 and raised 2022 EPS guidance by ~35%. OTTR is now forecasting for conditions in the PVC resin market to continue into the 2Q and begin to taper in the latter half of the year, although recent data has suggested longer-term trends benefiting PVC resin prices and sales prices. Management is in the midst of a strategic review process and will connect with the Board this summer to discuss long-term strategy, which will include plans around the Plastics segment. We should expect additional color on the 2Q earnings call. See our note here.

CMS — CMS reported a strong quarter as weather helped results. Full-year guidance is unchanged, and management reiterated confidence in achieving the high end of the 6-8% EPS long-term growth rate. A constructive settlement in the MI IRP provides CMS with a long runway of capital opportunities and potentially extends the tenure of the 6-8% EPS growth rate beyond the current 5-year horizon. Management addressed inflation concerns by alluding to its labor contracts and its procurement policies to mitigate the impact of rising material costs. See our note here.

CNP — There were no surprises in CNP's 1Q22 release. EPS tracked in line with expectation and guidance was reiterated. Management remains committed to its 10-year $40B+ capex plan and tweaked the 2021-2025 plan up by $100M to $19.3B. This is the second capex upgrade since analyst day, but is probably not the last as management highlighted that the Resilient Now program under development at Houston Electric and industrial demand growth in the Greater Houston area are likely to add further capex upside. See our note here.

WEC — WEC started 2022 off strong with EPS of $1.79, vs. a consensus of $1.67. Subsequently, WEC introduced 2Q22 guidance of $0.82-$0.84 and raised its 2022 guidance to $4.34-$4.38, up $0.05 at the midpoint. Near the end of last week, WEC filed five rate cases across its WI jurisdictions, which will be worth monitoring after a stay-out in 2021. Overall, WEC feels confident in its $17B five-year capital plan but could see some shifting on a year-over-year basis or between investments. See our note here.

NWE: Laurel Construction Underway but Capacity Shortfall Still Large and Unknown Until Colstrip Clarity Arrives; Mid-2022 Rate Case Positives (see our note HERE)

WEC – WEC reports 1Q22 EPS of $1.79 vs Gugg estimate of $1.76 and consensus at $1.69; raises 2022 guidance

HE – ASB reports 1Q earnings; consistent bank performance

PCG/CA – CA reconsidering Diablo Canyon retirement decision, could be different than Palisades situation in MI

AEE/IL – Ameren and other parties begin getting the message out on the customer impacts of MISO's latest PRA

Uranium – Germany reportedly open to sanctioning Russian civil nuclear industry

D – Dominion issues RFP for solar, wind, and storage projects

AWK – PA American Water files new rate case in PA

EXC – ComEd 2023 FRP status hearing scheduled for 5/12

BBB – Senator Manchin records ad criticizing BBB for Republican candidate

DOE – $2.3bn BIF grid mod program begins seeking public comment

DOE – DOE head talks budget, policy, in Senate budget hearing

ERCOT – ISO starts new supply chain map

ERCOT – New proposed rule could have implications for generator outages

SRE/CA – Media reports 350k customers behind on bills in SDG&E territory

PNW – ACC files APS Customer Education and Outreach Plan decision to docket

DUK – 'Bigger fights': Opposition to solar farms growing in NC

WEC reports 1Q22 EPS of $1.79 vs Gugg estimate of $1.76 and consensus at $1.69; raised 2022 EPS guidance to $4.34-$4.38 (pointing to $4.38 top end) vs prior guidance of $4.29-$4.33 ($4.31 midpoint) and $4.29/$4.30 for Gugg/consensus

- One-time items included $-0.02/sh from Rabbi Trust Performance and a $0.01/sh gain on Clean Energy Fund
- +0.01/sh from higher weather-normalized sales volumes
- +0.05/sh from weather in 1Q22 YoY
- Weather diverged significantly across Wisconsin, with Wisconsin Public Service seeing HDDs of +5.4% vs normal, and Wisconsin Electric seeing HDDs of +1.8% vs normal

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- +0.7% YoY weather-normalized retail electric sales vs 1Q21 (excluding the iron ore mine); +3.6% YoY weather-normal natural gas deliveries vs 1Q21
- **Recall 2022 sales expectations:** +0.5% weather-normal electric deliveries (excluding iron ore mines), +0.5% YoY weather-normal natural gas deliveries.
- Wisconsin rate cases filed April 28th; requesting unchanged ROEs and +50bps to equity layers
  - Order expected in 4Q22 for new rates effective Jan 1, 2023

- Earnings call will be at **2:00 PM ET** — Dial-in: **833-968-2232;** Conference ID **9378353.**

HE – ASB reports 1Q earnings; consistent bank performance

- HE's American Savings Bank (ASB) reported 1Q earnings.
- ASB reported first quarter 2022 net income of $23.9M, compared to $22.1M in the fourth, or linked quarter of 2021.
- Net interest margin was 2.79% in the first quarter, consistent with the linked quarter
- ASB recorded a negative provision for credit losses of $3.3M compared to a negative provision for credit losses of $3.5M in the linked quarter.
- Total loans were $5.2 billion as of March 31, 2022, consistent with December 31, 2021 as lower commercial markets, PPP and residential loan balances were offset by higher loan balances across the remainder of the loan portfolio, primarily in commercial real estate.

Guggenheim takeaway: *The 1Q report from ASB was ahead of our net income contribution estimate of $21.5M, which excludes the negative provision for credit losses. The overall performance is in-line with our expectations for ASB, as the bank remains a consistent performer in a low yield environment.*

PCG/CA – CA reconsidering Diablo Canyon retirement decision, could be different than Palisades situation in MI

- Media reported that CA Governor Newsom's administration is considering alternatives to the Diablo Canyon Shutdown.
- Speaking to the LA Times, Newsom stated the state would look at the federal support program to keep the plan open.
- PG&E is on track to shut down the first reactor in 2024, and the second in 2025 upon conditions set as part of a long debated CPUC proceeding and replacement resources already contracted

Guggenheim takeaway: *Obviously everyone seeing the headlines over the weekend. We did catch up with the company this morning. There are productive discussions with the State occurring including around midterm reliability with the Governor. In our view, while the directive is to decommission and retire the asset, PCG could be open to exploring options within a regulated constructive. This situation could turn out differently than the Palisades nuclear plant in MI – i.e., PCG has more time to pivot if possible.*

AEE/IL – Ameren and other parties begin getting the message out on the customer impacts of MISO's latest PRA

- "We're anticipating bill impacts on a typical residential customer in excess of $500 a year," - Jim Blessing, Ameren Illinois's vice president of regulatory policy and energy supply
- "It's about $15 to $20 a month, is what we're estimating. So I think that's consistent. Look, there's no question that that's a difficult situation" - David Kolata, Citizens Utility Board
- "This price spike suggests that we need to move even faster than the timeline in that bill," - CUB
- More HERE

Guggenheim takeaway: *As we have highlighted repeatedly in recent weeks, the outcomes of the PRA for Zone 4 continue to create noise within IL – as expected.*

Uranium – Germany reportedly open to sanctioning Russian civil nuclear industry

- Politico reported last night that 5 EU diplomats had indicated Germany now supports efforts by the bloc to sanction Russian civil nuclear activities, setting off additional schisms within the bloc
- More HERE

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Guggenheim takeaway: *The nuclear industry has largely avoided anything crippling to date, so interesting to see the Germans open to further action.* ***For more on the current state of affairs in the uranium supply chain see our recent baseline note HERE.***

D – Dominion issues RFP for solar, wind, and storage projects

- "In a Request for Proposals (RFP) issued today, Dominion Energy Virginia (DEV) is soliciting proposals for the acquisition of up to 1,200 megawatts (MW) of new solar and onshore wind development assets, as well as approximately 125 MW of energy storage. The company will host an informational webinar for interested bidders at 1 p.m. ET on June 9, 2022. A separate RFP seeking proposals for Power Purchase Agreements (PPA) will be issued on September 1, 2022." - D
- More HERE

Guggenheim takeaway: *Part of the process for D's VCEA buildout – flagged for your awareness.*

AWK – PA American Water files new rate case in PA

- "In today's filing, Pennsylvania American Water is seeking an annual revenue increase of approximately $173.2 million. If the company's proposed rates are approved as requested, the monthly water bill for the average residential customer using 3,212 gallons per month would increase from the current charge of $60.49 to $75.49, and the average monthly residential wastewater bill would increase from $76.64 to $95.69. Any new rates would not take effect until early 2023 except for certain recently acquired systems where the rate increases are proposed to take effect at later dates." - AWK
- More HERE

Guggenheim takeaway: *Zero surprise following the 1Q call last week (see HERE) – we expect the regulatory cycle to pick up over the balance of the year following filings in NJ and IL in 1Q and the recent beginning of interim ratesin VA.*

EXC – ComEd 2023 FRP status hearing scheduled for 5/12

- "Notice is hereby given by the Administrative Law Judges that a status hearing in the above entitled matter will be held on May 12, 2022, in Chicago, Illinois, at the hour of 10:00 A.M. The hearing will be held via WebEx" - Filing
- More HERE

Guggenheim takeaway: *For your calendar.*

BBB – Senator Manchin records ad criticizing BBB for Republican candidate

- The ad is in support of David McKinley, a Republican candidate
- ""I've always said, 'If I can't go home and explain it, I can't vote for it. And that is why I opposed Build Back Better." - Senator Manchin
- More HERE

Guggenheim takeaway: *Another nail in the BBB plan, although Senator Manchin remains open to energy legislation in our view.*

DOE – $2.3bn BIF grid mod program begins seeking public comment

- The program, which will seek to support grid modernization across the states and tribal areas is seeking comments on the structure of the program
- Comments are due June 27
- More HERE

Guggenheim takeaway: *Interesting BIF data point.*

DOE – DOE head talks budget, policy, in Senate budget hearing

- The program, which will seek to support grid modernization across the states and tribal areas, is seeking comments on the structure of the program
- "We have done everything we can to encourage the oil and gas community to increase supply at this moment," – U.S. Energy Secretary Granholm
- "I think the chairman and FERC itself have been listening and have pulled back a bit to be able to take into account the concerns of those who want to see certainty for the oil and

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

gas industry…They're an independent agency, but I believe that they are very concerned about making sure that they are responsive to this moment as well." – Granholm via Platts
- More HERE
- Granholm opening remarks HERE

Guggenheim takeaway: *While these budgetary hearings are part of the process, they have taken on new importance in light of the ongoing geopolitical backdrop.*

ERCOT – ISO starts new supply chain map

- The ISO has adopted a supply chain map identifying more than 65,000 critical points in support of reliability following the passage of SB3 last year
- More HERE, HERE

Guggenheim takeaway: *Minor FYI.*

ERCOT – New proposed rule could have implications for generator outages

- The proposed change would require ERCOT approval for outages scheduled more than 45 days in advance, reversing prior policy
- NPRR1108 HERE
- More HERE

Guggenheim takeaway: *Minor FYI.*

SRE/CA – Media reports 350k customers behind on bills in SDG&E territory

- Media reported that ~350,000 customers are still behind on bills in the SDG&E service territory.
- CA had a strong moratorium on shutoffs during the pandemic.

Guggenheim takeaway: *FYI.*

PNW – ACC files APS Customer Education and Outreach Plan decision to docket

- Based on feedback received by the Commission, Utilities Division Staff was directed to investigate the implementation of the CEOP to determine whether the dissemination of the information was delivered by APS to its customers in a reasonable and comprehensive manner.
- Overall, Staff found that the CEOP Focus Area plans APS has detailed are appropriate and should achieve a sufficient level of education to minimize customer confusion.
- Staff did make several recommendations however, including that APS begin using text messages as a means of more quickly reaching a broader audience.
- Decision HERE

Guggenheim takeaway: *ICYMI – while docketed only late last week, the filing relates to the ACC's vote at its April 12th/13th meeting.*

DUK – 'Bigger fights': Opposition to solar farms growing in NC

- State policy and the desire by solar developers to get a return on their sizeable upfront investments have driven the growing size of new arrays, leading to several municipalities denying permits. Now, at least four North Carolina counties have instituted moratoriums on new solar farms.
- "You're seeing bigger fights ... because of the size of these projects," Abele said. "At the same time, we've seen more organization from opposition groups in the state that have gone out and teed up op-eds and talking points to communities in opposition of solar… I anticipate it continuing to happen." – NCSEA Director of Communications Matt Abele
- More HERE

Guggenheim takeaway: *FYI – something to watch as DUK's Carbon Plan is filed (by May 16th), and during the stakeholder review processes expected to occur between then and a final Carbon Plan being approved by the NCUC by Dec 31, 2022.*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Company Information

Market Cap: $17.9bn

CenterPoint Energy, Inc. is a holding company, which engages in the business of power generation and distribution. It operates through the following segments: Houston Electric Transmission & Distribution (T&D), Indiana Electric Integrated, Natural Gas Distribution, Energy Services, Infrastructure Services, Midstream Investments, and Corporate and Other. The Electric T&D segment offers electric transmission and distribution services. The Indiana Electric Integrated segment includes energy delivery services to electric customers and electric generation assets to serve electric customers and optimize those assets in the wholesale power market. The Natural Gas Distribution segment provides regulated natural gas distribution services. The Energy Services segment offers non-rate regulated natural gas sales to, and transportation and storage services, for commercial and industrial customers. The Infrastructure Services segment focuses on underground pipeline construction and repair services. The Midstream Investments segment consists of the equity method investment in Enable. The Other Operations segment consists of office buildings and other real estate used for business operations and home repair protection plans. The company was founded in 1866 and is headquartered in Houston, TX. (Source: FactSet)

Meeting Format
NDR - 1:1 Meetings, Group Meeting

Company Information
Market Cap: $49.1bn
Exelon Corporation (EXC) operates as a utility services holding company, which engages in the energy generation, power marketing, and energy delivery business. It operates through the following segments: Mid Atlantic, Midwest, New York, Electric Reliability Council of Texas (ERCOT) and other Power Regions. The Mid-Atlantic segment represents operations in the eastern half of PJM, which includes New Jersey, Maryland, Virginia, West Virginia, Delaware, the District of Columbia and parts of Pennsylvania and North Carolina. The Midwest segment operates in the western half of PJM, which includes portions of Illinois, Pennsylvania, Indiana, Ohio, Michigan, Kentucky and Tennessee, and the United States footprint of MISO, excluding MISO's Southern Region, which covers all or most of North Dakota, South Dakota, Nebraska, Minnesota, Iowa, Wisconsin, the remaining parts of Illinois, Indiana, Michigan and Ohio not covered by PJM, and parts of Montana, Missouri and Kentucky. The New York (NY) segment provides operations within ISO–NY, which covers the state of New York in its entirety. The ERCOT segment includes operations within the Electric Reliability Council of Texas, covering most of the state of Texas. The Other Power Regions consist of the operations in New England, South, West, and Canada. The company was founded in February 1999 and is headquartered in Chicago, IL. (Source: FactSet)

Meeting Format

NDR - 1:1 Meetings, Group Meeting

Company Information

Market Cap: $16.2bn

American Water Works Co., Inc. is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, Florida, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, New Jersey, Florida, Tennessee, and Maryland. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA. (Source: FactSet)

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings

Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite

Location: TBD

Tuesday, July 12th

11:30 AM | Lunch

Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience

Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game

Southern Company C-Suite will host in their private box. Dinner will be served.

Participating Guggenheim Analyst

Shahriar (Shar) Pourreza, *Senior Managing Director – Power & Utilities*

Logistics

Transportation details, logistics and hotel recommendations to follow

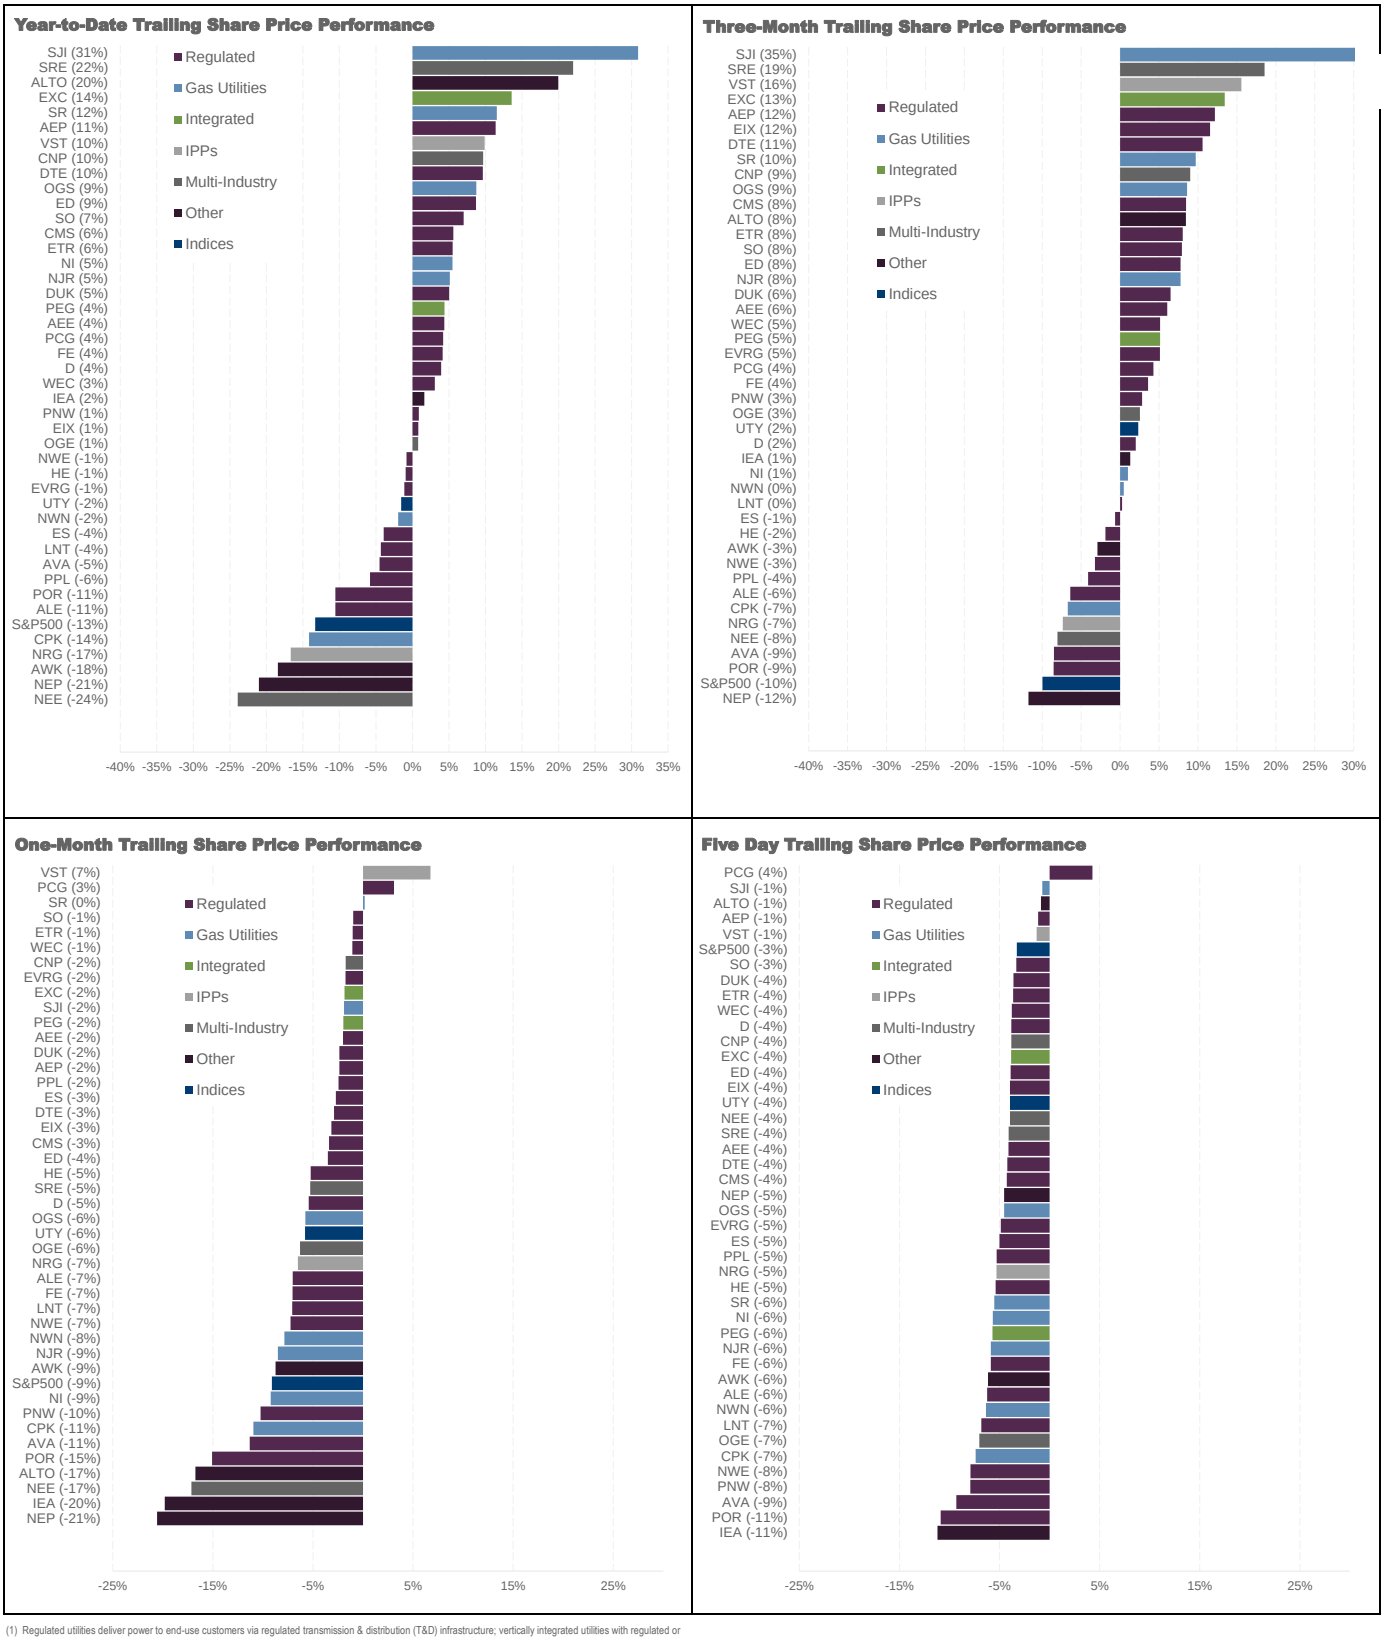
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Exelon Now a Fully Regulated Utility After Constellation Spinoff

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

We view the separation positively for shareholders. We previously valued Exelon at a discount to its fully regulated peers in large part because of its generation and retail operations. A stand-alone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital.

Utilities - Diversified

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024 or default to traditional ratemaking. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on

demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022
Our fair value estimate is $39.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
46.78 USD 29 Apr 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.20	47.38 USD Bil 28 Apr 2022	Narrow	Stable	Low	Standard	6 Apr 2022 05:00, UTC

regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's

lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes Archive

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate Andrew Bischof, CFA, CPA, Senior Equity Analyst, 2 Feb 2022

Exelon Corp EXC ★★ 29 Apr 2022 21:16, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
46.78 USD 29 Apr 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.20	47.38 USD Bil 28 Apr 2022	Narrow	Stable	Low	Standard	6 Apr 2022 05:00, UTC

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

Exelon Corp EXC ★★ 29 Apr 2022 21:16, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
46.78 USD 29 Apr 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.20	47.38 USD Bil 28 Apr 2022	Narrow	Stable	Low	Standard	6 Apr 2022 05:00, UTC

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Exelon Edging Closer to Spinning Off Merchant Unit; Reports Q3 Earnings Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Nov 2021

We are increasing our fair value estimate to $48 per share from $45 after Exelon announced third-quarter adjusted earnings per share of $1.09 compared with $1.04 in the same year-ago period. Management narrowed their full-year EPS guidance to $2.70-$2.90 from their previous $2.60-$3.00 range. Our fair value estimate increase is due to an increase in Morningstar's midcycle natural gas price to $3.30 per thousand cubic feet from $2.80, which boosted the nuclear fleet's midcycle margins. Our narrow moat and stable moat trend ratings are unchanged.

Recently management secured $700 million in subsidies from Illinois legislation that will keep the company's Dresden and Byron nuclear plants operating. We assume that subsidies for the plants will continue beyond 2025 given the role nuclear must play as Illinois pursues its aggressive clean energy goal. Management has successfully lobbied for subsidies across its merchant nuclear fleet. Policymakers view of nuclear generation is beginning to align with our view that nuclear' s clean energy attributes and reliable generation will be instrumental in meeting aggressive emission reduction goals.

Exelon continues to progress on the spin-off of its competitive merchant unit. The company has received FERC approval, and continues progress toward receiving approvals from New York regulators and the Nuclear Regulatory Commission. Exelon has named a management team for the new unit, to be named Constellation, which we view is a sign management is confident they can complete the spin-off. Management expects to complete the transaction in the first quarter of 2022.

In the quarter, rate increases and ongoing utility investments supported earnings. Lower capacity revenue, increased nuclear outage days, and unrealized and realized gains on equity investments had a negative impact on generation segment earnings. Trailing 12-month returns were 9.3%, down from 9.4% last quarter.

Exelon Secures Another Legislative Win; Byron and Dresden to Remain Open Andrew Bischof, CFA,

Exelon Corp EXC ★★ 29 Apr 2022 21:16, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
46.78 USD 29 Apr 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.20	47.38 USD Bil 28 Apr 2022	Narrow	Stable	Low	Standard	6 Apr 2022 05:00, UTC

CPA, Senior Equity Analyst, 14 Sep 2021

We are increasing our Exelon fair value estimate to $45 per share from $42 after Illinois lawmakers passed energy legislation that would provide subsidies to Exelon's Dresden and Byron nuclear plants. Gov. J.B. Pritzker has indicated he plans to sign the legislation, and Exelon has said it is in the process of refueling both plants. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon has taken a hard line with Illinois policymakers on the future of its unregulated nuclear facilities in the state. Last year, Exelon announced plans to close the two nuclear generating stations. After filing Post Shutdown Decommissioning Activity Reports with the Nuclear Regulatory Commission in July, Exelon is now preparing to refuel both Byron and Dresden nuclear facilities. We had previously estimated the plants were running at break-even, resulting in no change to our fair value estimate.

The $700 million in subsidies Exelon will receive from the legislation was the primary source of our fair value estimate increase. We assume that the subsidies will continue beyond our five-year forecast, in part to help the state meet the legislation's 100% clean energy target by 2050. The legislation also sets targets for Illinois that include zero carbon emissions by the end of 2045 and 50% renewable energy by 2040. Dresden's operating license expires later this decade and Byron's operating license expires for both of its units by 2046. Time-value appreciation since our last update increased our fair value estimate $1 per share.

We previously thought Exelon faced an uphill battle to secure additional subsidies for its nuclear fleet in the state, in large part due to the deferred prosecution agreement Exelon entered into last year related to the company's lobbying practices in the state. However, the state's clean energy goals, and the contribution of Exelon's nuclear fleet to those goals, ultimately led to successful lobbying efforts.

Exelon Reports Improved Second-Quarter Earnings; Byron and Dresden Near Retirement Andrew Bischof, CFA, CPA, Senior Equity Analyst, 4 Aug 2021

We are maintaining our $42 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.89, compared with $0.55 earnings per share in the same year-ago period. Management reaffirmed its $2.60 to $3.00 per share earnings guidance. Our narrow moat and stable moat trend ratings are also unchanged.

Last week, Exelon filed Post Shutdown Decommissioning Activity Reports with the Nuclear Regulatory Commission for its Byron and Dresden nuclear facilities. Management has long sought additional subsidies for the two nuclear plants, with the most recent proposals failing to pass in the spring legislative session. State legislators continue to work on clean energy legislation; however, there is only a narrow window for legislation to pass, given the plants' pending closures this fall. We estimate the plants are running at break-even, resulting in no change to our fair value estimate. Potential subsidies

46.78 USD 29 Apr 2022	39.00 USD 2 Feb 2022 16:41, UTC	1.20	47.38 USD Bil 28 Apr 2022	Narrow	Stable	Low	Standard	6 Apr 2022 05:00, UTC

could add up to $1 per share to our fair value estimate.

Regulatory filings with New York regulators, FERC, and the Nuclear Regulatory Commission are ongoing for the company's proposed spin-off of its merchant unit. We continue to view the separation positively, as we value Exelon at a discount to its fully regulated peers, in large part because of its merchant operations. Management expects to complete the transaction in the first quarter of 2022.

Exelon's utilities received constructive rate outcomes across its PECO, Pepco, and ACE subsidiaries. Allowed returns range from 9.275% to 10.25% and were in line with our expectations. Trailing 12-month returns were 9.4%, up from 8.9% last quarter.

In the quarter, earnings were supported by absence of storm restoration costs and recovery of ongoing utility investments. Generation earnings were also up, supported by realized gains on nuclear decommissioning fund, unrealized and realized gains on equity investments, and fewer nuclear outage days.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

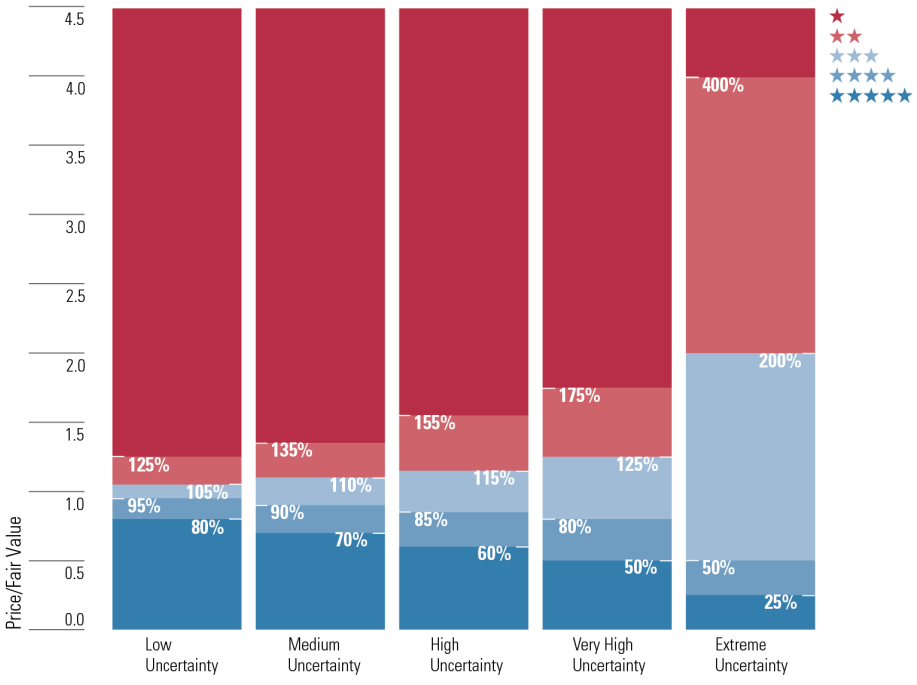
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thor ough and ongoing analysis, raise or lower their fair value estimates as warranted.

Morningstar Equity Research Star Rating Methodology



Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the suitability of such investments and recommendations in the light of their own investment objectives, experience, taxation status and financial position.

The information, data, analyses and opinions presented herein are not warranted to be accurate, correct, complete or timely. Unless otherwise provided in a separate agreement, neither Morningstar, Inc. or the Equity Research Group represents that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction the recipient is located.

Except as otherwise required by law or provided for in a separate agreement, the analyst, Morningstar, Inc. and the Equity Research Group and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions within the report. The Equity Research Group encourages recipients recipients of this report to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an in vestment decision and when deemed necessary, to seek the advice of a legal, tax, and/or accounting professional.

The Report and its contents are not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Morningstar, Inc. or its affiliates to any registration or licensing requirements in such jurisdiction.

Where this report is made available in a language other than English and in the case of inconsistencies between the English and translated versions of the report, the English version will control and supersede any ambiguities associated with any part or section of a report that has been issued in a foreign language. Neither the analyst, Morningstar, Inc., or the Equity Research Group guarantees the accuracy of the translations.

This report may be distributed in certain localities, countries and/or jurisdictions ("Territories") by independent third parties or independent intermediaries and/or distributors ("Distributors"). Such Distributors are not acting as agents or representatives of the analyst, Morningstar, Inc. or the Equity Research Group. In Territories where a Distributor distributes our report, the Distributor is solely responsible for complying with all applicable regulations, laws, rules, circulars, codes and guidelines established by local and/or regional regulatory bodies, including laws in connection with the distribution third-party research reports.

Conflicts of Interest

- No interests are held by the analyst with respect to the security subject of this investment research report.

Research Methodology for Valuing Companies

- Morningstar, Inc. may hold a long position in the security subject of this investment research report that exceeds 0.5% of the total issued share capital of the security. To determine if such is the case, please click http://msi.morningstar.com and http://mdi.morningstar.com.
- Analysts' compensation is derived from Morningstar, Inc.'s overall earnings and consists of salary, bonus and in some cases restricted stock.
- Neither Morningstar, Inc. or the Equity Research Group receives commissions for providing research nor do they charge companies to be rated.
- Neither Morningstar, Inc. or the Equity Research Group is a market maker or a liquidity provider of the security noted within this report.
- Neither Morningstar, Inc. or the Equity Research Group has been a lead manager or co-lead manager over the previous 12-months of any publicly disclosed offer of financial instruments of the issuer.
- Morningstar, Inc.'s investment management group does have arrangements with financial institutions to provide portfolio management/investment advice some of which an analyst may issue investment research reports on. However, analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them.
- Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a financial institution the security of which is the subject of this report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s proxy statement, "Security Ownership of Certain Beneficial Owners and Management" section https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx
- Morningstar, Inc. may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Further information on Morningstar, Inc.'s conflict of interest policies is available from https://shareholders.morningstar.com. Also, please note analysts are subject to the CFA Institute's Code of Ethics and Standards of Professional Conduct.

For a list of securities which the Equity Research Group currently covers and provides written analysis on please contact your local Morningstar office. In addition, for historical analysis of securities covered, including their fair value estimate, please contact your local office.

For Recipients in Australia: This Report has been issued and distributed in Australia by Morningstar Australasia Pty Ltd (ABN: 95 090 665 544; ASFL: 240892). Morningstar Australasia Pty Ltd is the provider of the general advice ('the Service') and takes responsibility for the production of this report. The Service is provided through the research of investment products.

To the extent the Report contains general advice it has been prepared without reference to an investor's objectives, financial situation or needs. Investors should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. LNT – LNT reports 1Q22 results

NWE – 1Q22 Adj. Non-GAAP EPS of $1.09, vs Gugg/cons at $1.14/1.17; 2022 guidance unch; LT EPS CAGR; Rate base CAGR unch

WEC – Wisconsin rate cases filed; requesting unchanged ROEs and +50bps to ratemaking equity layers

EXC/CEG/IL – CMC credits to flow to ComEd customers

PCG/CA – CA Senate undergrounding legislation set for hearing May 9

NJ – NJ and ORSTED announce agreement on New Jersey Wind Port to be utilized for Ocean Wind I construction

Coal – CO House passes coal support legislation

OGE – OG&E posts draft RFP for flexible resource procurement

PCG: 1Q EPS Beat; Transformation Back in the Crosshair, Execution Datapoints Continue to Build; Dividend, Undergrounding and S&P Inclusion w/in Sight (see our note HERE)

DTE: 1Q EPS Beat Keeps Building on Contingency for 2022; DTE Remains Primed for Growth With Resiliency and Energy Transition (see our note HERE)

POR: Deferrals Charge Overshadows RFP Shortlist (see our note HERE)

AWK: Strong Quarter as AWK Continues to Settle Around Its LT Regulated Plan with Key Mgmt Bench in Place (see our note HERE)

LNT – LNT reports 1Q22 results

- LNT reported $0.77 vs. Gugg/street $0.72
- Reaffirmed 2022 guidance of $2.67 - $2.81 vs. Gugg $2.75
- Received verbal approval of WPL solar tranche 2's CA at the PSCW's open meeting yesterday
- Provided details on recent changes to the IA corporate tax rate, which could provide additional cushion to customer rates in the state over time
- Presentation HERE

NWE reported 1Q22 Adj. Non-GAAP EPS of $1.09, vs Gugg/cons at $1.14/1.17; maintains 2022 EPS guidance of $3.20-$3.40 ($3.30 midpoint) vs Gugg/cons of $3.34/ $3.30; reiterates 3%-6% LT EPS growth rate and 4%-5% rate base growth

- Compared to 1Q21:
  - +0.04 from higher MT electric transmission

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- +0.01 higher retail electric sales
- –0.01 lower nat gas volumes
- –0.01 reduced nat gas production rates
- +0.01 other/misc

- NWE estimates **supply chain issues** have increased 2022 capital spend by **+2%,** and anticipates the potential for further impacts
- Nearing completion of 58 MW SD generation project
- Site work at 175 MW Laurel project in MT is underway
- Snowfall last week significantly improved Snow Water Equivalent %; now only slightly below 30yr medians
- Laurel construction just began in recent weeks; $50m of $275m budget incurred through end of 1Q22; company projecting COD by 4Q23/1Q24
- MT GRC on track for mid-2022 filing as expected, with 2021 test year; rate case asks to include lag reducing mechanism including cash flow generation
- Continuing to target 14%-15% FFO/debt ratio
- **Earnings call today at 2:30 PM Eastern… no dial-in (even sell-side)…** sign up here: www.northwesternenergy.com/earnings-registration

WEC – Wisconsin rate cases filed; requesting unchanged ROEs and +50bps to ratemaking equity layers

- If WEC's ask is approved, rates would be set using a 53.0% equity layer vs 52.5% at present.
- The PSCW will conduct hearings on the We Energies proposals and is expected to make a final decision later this year. **New rates are expected to take effect in January 2023**.
- Company release HERE

Guggenheim takeaway: Investors should recall that while the level of equity for ratemaking purposes is certainly meaningful, WEC's greater strength is arguably its earnings sharing mechanisms and equity layer ranges, allowing the utilities to vary their capitalization between 50%–55% equity.

EXC/CEG/IL – CMC credits to flow to ComEd customers

- "The Illinois Commerce Commission announced today that Commonwealth Edison ("ComEd") has submitted a filing indicating that for the June 1, 2022-May 31, 2023 delivery year, it will provide a credit to all of its delivery customers equal to 3.087 cents per kWh. This credit will lower consumer bills by about $19.71 per month for customers of ComEd, saving the average family $237 per year." - ICC release HERE, also repeated by the Governor HERE
- More HERE
- Filing HERE
- The news comes as the ICC has reportedly had difficulty procuring peak power for the upcoming season on behalf of ComEd customers - HERE

Guggenheim takeaway: In case you missed it, and not a surprise given the current state of energy markets but nonetheless interesting to see the CMC in action already. Like CT with the Millstone contract, the ComEd zone has found itself well hedged against rising gas prices thanks to prior policy action. In our view the situation further inflames intrastate frictions over CEJA and resource adequacy, with the recent Zone 4 results in the MISO PRA kick starting downstate concerns over costs and reliability. We expect IL to remain somewhat noisy in the NT.

PCG/CA – CA Senate undergrounding legislation set for hearing May 9

- CA undergrounding bill in the CA Senate is set for Hearing on May 9.
- As proposed, the CPUC would be mandated to introduce and administer an undergrounding program for CA.
- CA Senate undergrounding bill text here (SB884).

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- CA Assembly side efforts on undergrounding (AB-2889)
- Legislative session runs through August.

Guggenheim takeaway: The bill has been gaining media attention despite the relatively early inning of the legislative session. We acknowledge the uncertainty surrounding the investment recovery mechanisms as currently written (i.e., 60 month deferred earnings performance mechanism) but do not see the bill functional as-is. Procedurally, the bills are still in early stages as they would first have to get passed out of their respective chambers by end of May. As history has shown, the legislative process can see bills amended or gutted almost entirely until the tail end of the session in August. PCG has made the 10,000 mi undergrounding goal without legislative support. Catching up with PCG on the bills in their current state, mgmt. sees it too early to draw any conclusions or plan for outcomes. Given the uncertain constructs in some of the bills we do not see it feasible for PG&E to put capital at risk, and more broadly we don't see the bills as proposed achieving the objective of guiding investment and supporting regulatory constructs.

NJ ─ NJ and ORSTED announce agreement on New Jersey Wind Port to be utilized for Ocean Wind I construction

- NJ Governor Murphy's office and ORSTED announced an agreement for use of the NJ Wind Port for construction of Ocean Wind I.
- New Jersey Economic Development Authority (NJEDA) signed a Letter of Intent (LOI) with Ørsted on use of the new facility to be deployed in Salem County NJ, bringing offshore wind construction work to NJ.
- NJ agreed on the investment in developing the first purpose-built port for offshore wind in the United States, and the Ocean Wind I project seized the opportunity to utilize the New Jersey Wind Port, being the first to officially join the state's effort to develop the nation-leading wind power supply chain.
- More here.

Guggenheim takeaway: FYI. Orsted and Ocean Wind I (A joint venture with PEG) continue to build a foundation for collaboration in NJ and the mid-Atlantic.

Coal ─ CO House passes coal support legislation

- The legislation would shift $15mm from the general fund to transition efforts
- More here.

Guggenheim takeaway: Interesting development and not unlike other efforts we have seen in coal-heavy states.

OGE – OG&E posts draft RFP for flexible resource procurement

- OG&E issued the RFP for flexible resources in OK.
- The requirements are a 30-year life, multi-cycle operations on a daily basis, 50-500MW of capacity and availability in service no later than May 1, 2027.
- The final RFP issue date will be June 1, 2022 and Bids will be due by September 15, 2022 (selection and negotiation through January 27, 2023).
- The OG&E IRP included 850MW of retirements and a plan to replace capacity through RFPs for preferred resources.
- More here

Guggenheim takeaway: *The RFP is part of the vetted IRP process. OG&E previously planned to issue an RFP(s) for the resources identified in the preferred plan which includes solar replacement capacity (counted at 60% efficacy) and CTs.*

Company Information
Market Cap: $49.1bn
Exelon Corporation (EXC) operates as a utility services holding company, which engages in the energy generation, power marketing, and energy delivery business. It operates through the following segments: Mid Atlantic, Midwest, New York, Electric Reliability Council of Texas (ERCOT) and other Power Regions. The Mid-Atlantic segment represents operations in the eastern half of PJM, which includes New Jersey, Maryland, Virginia, West Virginia, Delaware, the District of Columbia and parts of Pennsylvania and North Carolina. The Midwest segment operates in the western half of PJM, which includes portions of Illinois, Pennsylvania, Indiana, Ohio, Michigan, Kentucky and Tennessee, and the United States footprint of MISO, excluding MISO's Southern Region, which covers all or most of North Dakota, South Dakota, Nebraska, Minnesota, Iowa, Wisconsin, the remaining parts of Illinois, Indiana, Michigan and Ohio not covered by PJM, and parts of Montana, Missouri and Kentucky. The New York (NY) segment provides operations within ISO–NY, which covers the state of New York in its entirety. The ERCOT segment includes operations within the Electric Reliability Council of Texas, covering most of the state of Texas. The Other Power Regions consist of the operations in New England, South, West, and Canada. The company was founded in February 1999 and is headquartered in Chicago, IL. (Source: FactSet)

Equity Research | Corporate Access

Southern Company (SO), Racing Porsches, Mets/Braves Game & GA Commissioner Meetings? Yes, Please!

What do Racing Porsches, Southern Company C-Suite meetings, Georgia Commissioner meetings and the Mets/Braves have in common? Almost nothing! But we are combining all of them for an action-packed 1.5 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2022
Atlanta, Georgia

Schedule

Monday, July 11th

1:00 PM | Georgia PSC Meetings

Meetings with Chairman Pridemore, Commissioner Echols, Commissioner Shaw and potentially others.
Location: 244 Washington St. SW, Atlanta, GA 30334
NOTE: *Times may slightly change but plan on early afternoon arrival for PSC meetings*

6:00 PM | Client Dinner with Southern Company (SO) C-Suite

Location: TBD

Tuesday, July 12th

11:30 AM | Lunch

Lunch with Southern Company and Georgia Power C-Suite teams
Location: Southern Co Headquarters, 30 Ivan Allen Jr. Blvd. NW, Atlanta, GA 30308

1:30 PM – 5:30 PM | Porsche Racing Experience

Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

6:30 PM | Braves/Mets Game

Southern Company C-Suite will host in their private box. Dinner will be served.

Participating Guggenheim Analyst

Shahriar (Shar) Pourreza, *Senior Managing Director – Power & Utilities*

Logistics

Transportation details, logistics and hotel recommendations to follow

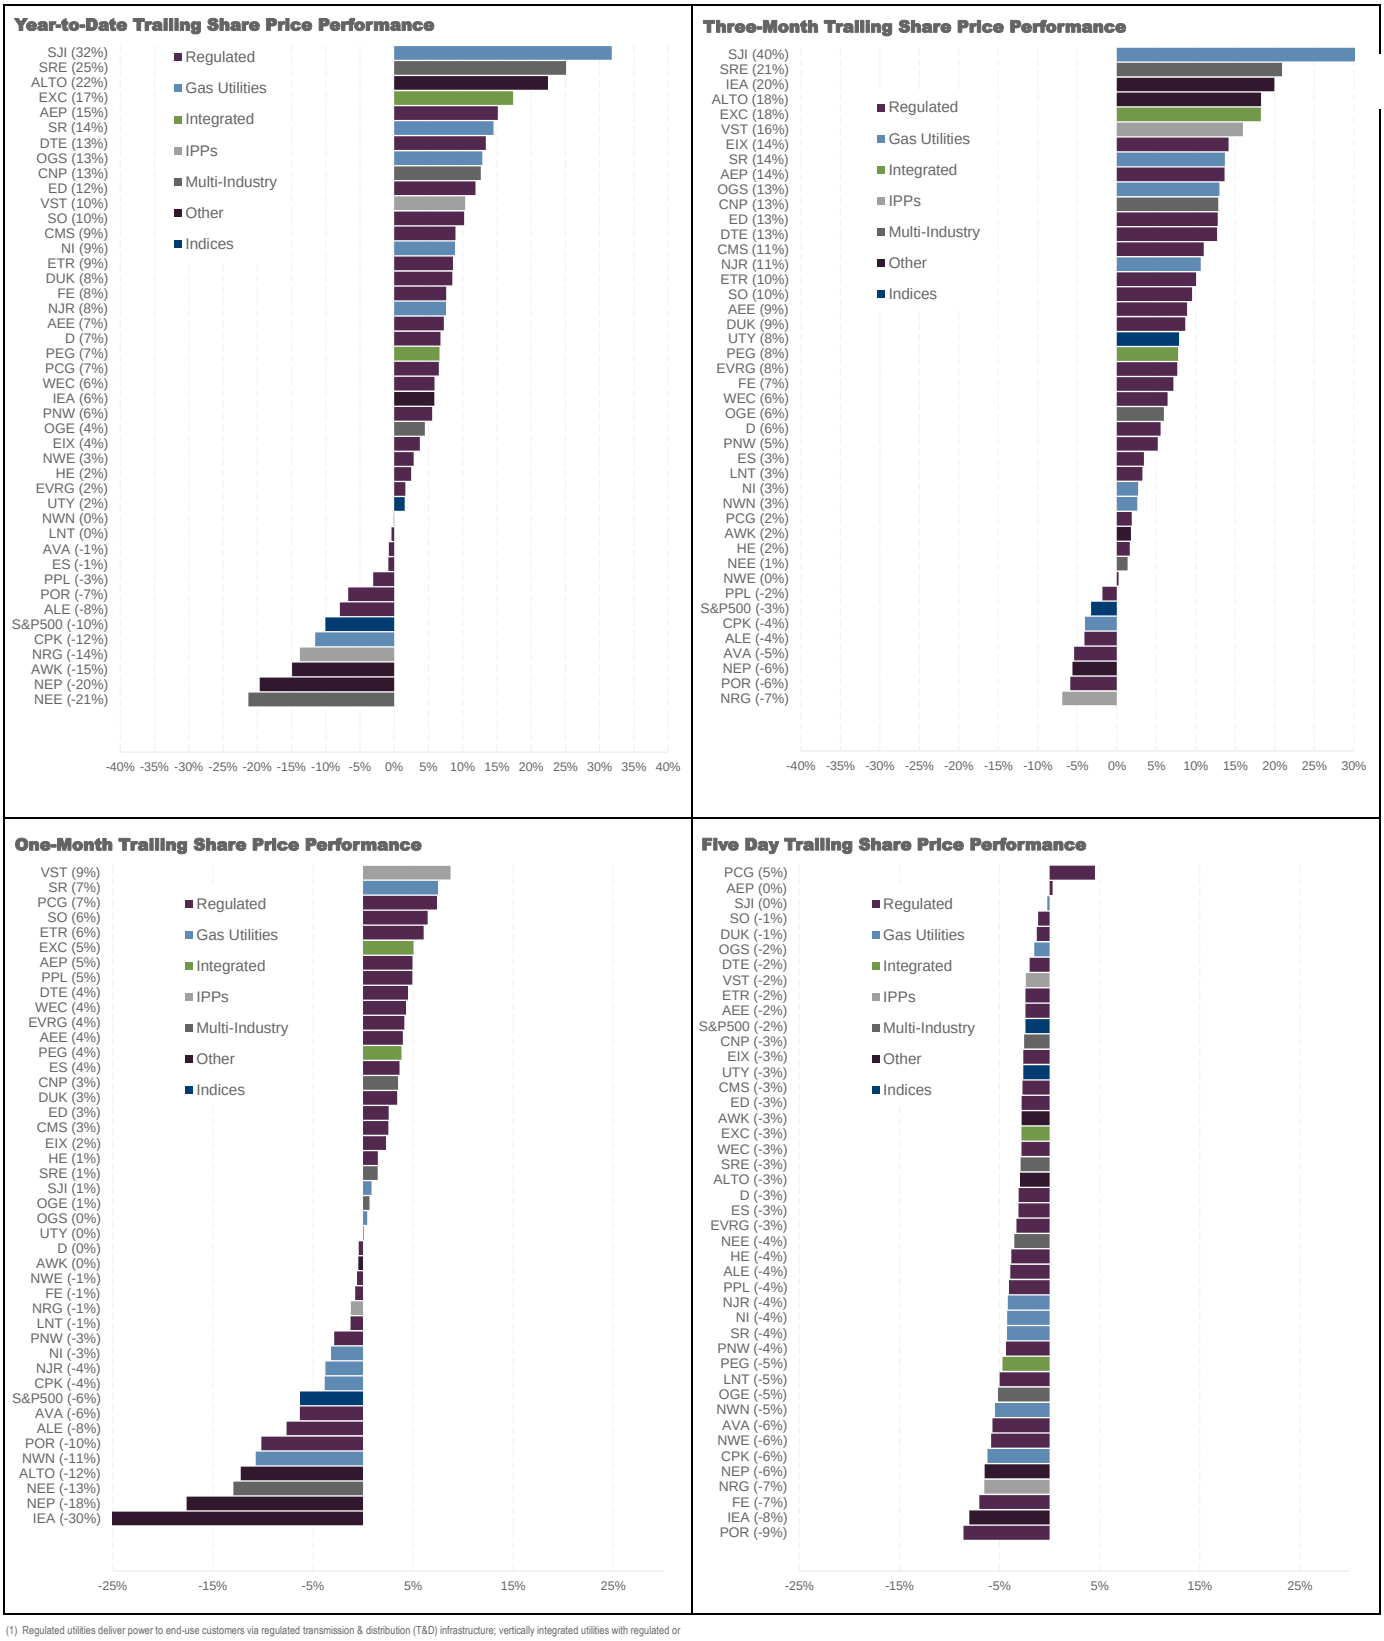
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Energy: Electric Utilities

Midweek Thoughts — CMS, POR, AVA, XEL, PEG, FE, EXC, DUK, AGR, Onshore Wind, Climate Legislation

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

1Q earnings dominate the news flow. ETR, AGR, and ENPH reported results earlier this week. AEP, DTE, XEL, POR, SO, NWE, NOVA, and FSLR are on tap for the remainder of the week. GE discusses weakness in U.S. onshore wind demand; discussions pick up in Congress on the climate bill; DoC to consider climate implications in policymaking; CMS files a summary for the impending electric GRC filing; POR receives an order in the electric GRC; WA state updates commercial energy code to increase electrification; XEL files an updated settlement and proposes a 2031 retirement of Comanche 3, OR PUC approves Wildfire Mitigation plan; Ocean Wind 1 awarded three EPC contracts; WV PSC conditionally approves 50MW of solar projects; PA is set to join the RGGI on July 1; DUK invests in two RNG facilities, and a federal judge in Mexico orders the CRE to restore a self-supply generation permit for Iberdrola's combined cycle plant.

Upcoming Earnings Reports

AEP, DTE, XEL, POR, and SO report BMO tomorrow (Thursday). **NWE** is scheduled to report results AMC on Thursday with a call on Friday morning. Among our renewable names, **NOVA and FSLR** report AMC today and tomorrow, respectively. Our recently published preview includes our thesis, expectations, and estimates for our coverage.

Earlier this week, **AGR, ETR,** and **ENPH** reported earnings. Scroll down for our takeaways.

Industry News and News from Companies in Our Coverage

Onshore wind — GE's 1Q commentary for renewables focuses on supply chain constraints and U.S. policy inaction: GE reported weaker than expected renewable energy results, led by lower U.S. onshore deliveries and margin contraction from inflation. Wind repowering earnings were strong. As we head into the thick of 1Q22 earnings, we see GE's commentary as a harbinger of things to come, in terms of renewables' commentary from utilities. Reasons for the weak renewable results include U.S. policy inaction (lack of clarity on the timing of renewal of PTCs), margin pressure from steel and transportation cost inflation, and supply chain shortages. Higher inflation is impacting project economics and likely delaying investment decisions, while supply chain shortages are delaying equipment deliveries. COVID-19 shutdowns in China were also cited as adding to the supply chain constraints. GE management expects some deliveries originally planned for 2022 to move into 2023. Note that most of the Chinese shutdowns did not occur until late in 1Q/early 2Q, thus putting 2Q deliveries also at some risk. NEE on its 1Q22 call cited increased demand for wind power to offset the slowdown in solar installations caused by the DoC investigations. GE's comments would indicate that even wind projects may face delays.

Climate and Energy Bill conversations rekindled: Press reports on meetings between Democrats and Republicans in Congress on the possibility of Clean Energy legislation appear to have picked up. In recent days, members have met to negotiate a version of the clean energy provisions included in the BBB. We would caution against any exuberance given that Senator Manchin is said to favor a bipartisan bill in the flavor of the Infrastructure Bill, whereas most other Democrats want to construct a carve-out that can pass as part of the Reconciliation bill. Given that we are nearing the midterms, it is hard to get too excited about the prospect of another bipartisan bill taking shape. That said, it appears that a 10-year extension of renewable and energy storage tax credits is being discussed, as is a nuclear production tax credit, an extension of the carbon capture credit, and incentives for domestic manufacturing of clean energy equipment. From our vantage point, an extension of ITC and PTC for wind and solar investments will be most valuable in providing a clear line of sight into renewables development for utilities, as well as the renewable names in our coverage.

DoC to consider climate implications in policymaking: Secretary Raimondo issued a department administrative order on Earth Day to integrate climate considerations into policymaking. The statement notes that the department is prepared to leverage all of its bureaus to ensure that communities have the data, tools, and resources to mitigate the impacts of climate change. The department intends to coordinate its broader climate work, including on WH initiatives. We do not expect that this statement in any way changes

the DoC's process concerning the recently initiated AD/CVD investigations — which we expect will work through the Department's normal course of business unless the complaint is withdrawn. See our note here.

CMS — CMS files summary of upcoming electric rate case: In a summary filed with the MPSC, CMS plans to request a $272M base rate increase on 10.25% ROE. CMS has a gas rate case pending that is requesting a 10.5% ROE. The electric rate case filing was expected and follows a somewhat restrictive outcome in the 2021 rate case where the commission disallowed the inclusion of $128M of capex related to a solar project, which we presumed to be due to the timing of the approval of a certain project and will potentially be included in the planned rate case. The main drivers of the present case include investments in new solar and natural gas-fired generation, system reliability, and resilience.

POR — OR PUC issues an order in the pending electric GRC: As part of the order, the PUC adopted the four previous stipulations and approved a revised rate. The Commission authorized a revenue increase of $10M, based on a 9.5% ROE and 50% equity with rates effective May 9. The ROE was set in the first partial stipulation. Regarding the storm accrual mechanism that collects funds from ratepayers based on a 10-year average of storm outage costs, the PUC ruled that POR can carry a negative balance, subject to a cap of 2x the annual accrual amount. The PUC also expanded the scope of outage events to include uninsured wildfire costs. Cost recovery treatment for the Faraday hydro plant was moved to the next GRC when the project is in service. PUC did not include any rate adjustment mechanisms for wildfire mitigation and vegetation management, but asked POR to file a cost recovery filing under SB 763 (discussed below). The PUC authorized deferrals of costs related to the 2020 retirement of the 575 MW Boardman coal generation facility and will conduct an earnings test to evaluate if the continued recovery of Boardman costs in rates resulted in ratepayers overpaying. If allowed, POR would be allowed to earn a return of 20 bps below the authorized ROE. Lastly, while the decoupling mechanism was eliminated, the PUC directed POR to justify why the PUC should not re-implement the mechanism during the next GRC.

XEL — XEL files a settlement to close Comanche 3 in 2031: As expected, XEL filed a modified settlement agreement with the CO PUC to close the 750 MW Comanche 3 coal unit in 2031 vs. the prior plan of 2034 as was proposed in the ERP settlement. The modified settlement agreement is likely to be considered at the Commissioners' meeting on April 27. Recently all three Commissioners expressed opposition to the settlement for a 2034 retirement date and proposed to agree to a more complete analysis to plan for a 2029 retirement. XEL is expected to seek securitization treatment for the $690M net book value. If a regulatory asset is approved for the recovery of the remaining plant balance of Comanche, XEL will agree to earn a cost of debt for the carrying cost related to the regulatory asset. XEL will gradually phase down operations at Comanche to 33% of the annual capacity factor by 2029. As for replacement generation, XEL will conduct competitive solicitations. XEL will own ~$690M in capex or 500 MW of the accredited capacity for the resources that replace Comanche 3.

POR — OR PUC approves Wildfire Mitigation Plan: OR PUC approved the 2022 WMP for OR utilities as was required by the passage of SB 762. The bill encourages the establishment of standards for electric utility wildfire mitigation plans, including identifying the high-risk area and establishing protocols to minimize PSPS. The OR law requires that utilities file WMP annually. PUC has asked that the utilities collaborate with staff to improve the 2023 plans based on the conditions of the approval of the 2022 plans.

PEG — Offshore wind project Ocean Wind 1 awards three EPC contracts: The awards are for two high voltage substations and ~nine miles of underground cable that will connect the offshore wind farm to the onshore grid at two landfall points. Construction is estimated to begin in September 2023. Ocean Wind 1 is a 1.1 GW offshore wind project that is the first in NJ and is planned to come online in 2025. PEG is a partner in the project through a JV with Orsted.

FE — WV PSC issues conditional order for solar projects: The order conditionally approved 50MW of solar projects across WV for ~$100M. The approval is contingent on FE securing customer commitments to either purchase 85% of the capacity or SRECs produced by the project. FE must also obtain approval from the off-takers for the proposed cost recovery surcharge. Those subscribing to the project will pay a $40/MWh voluntary renewable electricity rider and also be liable for any cost recovery deficiency through a surcharge. PSC approved a 9.8% ROE for the project. The projects are expected to be in service by 2025.

EXC — PA is scheduled to join RGGI on July 1: After a series of back and forths, including in the state legislature and the courts, PA is set to join the RGGI after the Commonwealth Court reversed the prior stay of the rule filed by the PA DEP for the state to join the RGGI. We expect the debate in PA on RGGI to reemerge in the upcoming PA governor's elections. Since the rules were not implemented by statute, a subsequent administration could alter the rules. The RGGI is a cooperative cap and trade effort. The system targets a CO_2 reduction of 30% from 2020 to 2030. Allowances are offered through quarterly, regional CO_2 allowance auctions that are sealed-bid, uniform price auctions open to all participants, resulting in a single quarterly clearing price. All power plants with a capacity of 25 MW or more need to purchase CO_2 allowances for each ton of carbon emitted. PA will become the 12th state in the RGGI.

DUK — DUK announces investments in two RNG facilities: The two projects will convert landfill gas from two NC landfills into RNG, and Piedmont will transport the gas through its infrastructure to third-party customers. Each project is expected to produce ~500k Dth and enter service by the end of 2022. Construction is underway.

AGR — Mexican Courts asks Energy Regulatory Commission to restore a self-supply generation permit for AGR parent Iberdrola: A federal judge in Mexico ordered that the Energy Reg Commission (CRE) restore a self-supply generation permit for Iberdrola's 300 MW combined cycle power plant (Dulces Nombres). The CRE has repeatedly refused to renew the permit for the plant, which expired on Jan 31. We believe that the new ruling stems from the recent rejection in the Mexican legislature of AMLO's plan to increase the CFE's role in domestic power markets. The proposal, if passed, would have canceled long-term energy contracts and clean energy PPAs. The plan would have put state-owned coal/gas plants first in line to sell power into the grid and take precedence over private natural gas/renewable plants.

AVA — WA updates the state's commercial energy code in favor of electrification: The Washington State Building Code Council voted to update the commercial energy code to require all-electric space and water heating in new commercial and multifamily construction. The council also advanced proposals to restrict fossil fuel use in residential buildings. If approved, the residential proposal would go into effect in 2023, at the same time as the commercial code is updated. WA is the first state to approve an electrification mandate into its statewide energy code, which aligns with state law and requires the council to adopt energy codes that reduce annual net energy consumption in buildings by 70% from 2006 levels by 2031.

Earnings Recap

AGR — AGR's 1Q results were helped by the gain on offshore lease restructuring, and management maintained the 2022E EPS guide of $2.20-$2.38, which includes ~$0.47 benefit from the lease restructuring. Offshore wind projects are continuing apace with certain milestones achieved and Vineyard Wind 1 is still on plan for a 2024 COD. Onshore renewables projects for 2022 appear on the track, but the ongoing AD/CVD investigations, inflation, and supply chain constraints could render some 2023 COD dates somewhat fluid. Higher power prices should help against the inflationary backdrop, but policy initiatives create an overhang on project decisions. With a new CEO scheduled to start fairly soon, we would expect a detailed rundown of long-term strategy and outlook either on the 2Q earnings call or a standalone Analyst Day. See our note here.

ETR — ETR reported EPS of $1.32, which was below our estimate of $1.43 and consensus of $1.34. Despite the miss, the Company reaffirmed its $6.15-$6.45 2022 EPS guidance, slightly upped its volume growth expectations, and maintained its long-term EPS growth forecast. ETR highlighted that its 2022 solar projects remain secure; however, it expects some delays in other near-term solar projects. The Company also discussed securitization recovery progress and reiterated its commitment to exiting merchant nuclear. ETR will be hosting an analyst day on June 16, where it will provide longer-term outlooks. See our note here.

ENPH — ENPH reported strong 1Q results ahead of our consensus estimates on most metrics and introduced 2Q22 guidance above the Street/our estimates. The Company reported no significant disruptions to its supply chain at the moment, offered a measured assessment of the U.S. solar policy implications, and highlighted growth opportunities in Europe. We maintain that ENPH is the best-positioned name in our Alternative Energy coverage given the current backdrop. See our note here.

ICYMI

We published our **quarterly preview** for our utilities and alternative energy coverage — Boring IsGood.

Upcoming Earnings Reports

NEE and **NEP** kick off 1Q earnings season and will report before market opens tomorrow (Thursday). **FE** is scheduled to report on Thursday after market close followed by a call on Friday morning.

News from Companies in our Coverage

CMS — CMS reaches a settlement in the IRP:

- **What is included?:** As part of the settlement, CMS will retire all coal generation by 2025 and collect the unrecovered book value of Campbell units 1-3 through the design life of the units (2031 for units 1-2 and 2039 for unit 3). CMS will earn a 9% ROE on the retired assets. As proposed, CMS will buy the Covert gas plant for $815M in 2023. The ALJ was critical of the timing of the Campbell 3 retirement, positing that more work was needed before making a decision, thus its inclusion in the settlement is a positive for CMS. CMS was not in favor of relegating the cost recovery of the coal units into a separate proceeding. To that end, the settlement is constructive in including cost recovery for the coal units.
- **What is not?:** Instead of acquiring assets from Enterprise, as CMS had proposed, the settlement calls for the company conducting an RFP for PPAs of up to 700 MW of MI-based capacity starting in 2025. Enterprises can participate in the RFP. CMS had requested approval to acquire 2 GW of natural gas fired units for $1.34B—four units in total—the largest of which is the Covert plant (cost: $815M, capacity 1.2 GW), and put them in the rate base. The other three plants would have ~1 GW of capacity, cost $530M, and include the DIG plant, of which CMS already owns a portion.

XEL — XEL is exploring plans to close Comanche earlier than planned: XEL may file a modified settlement agreement early next week (potentially April 26). In the plan, XEL is expected to propose closing Comanche 3 (750 MW) earlier than the current plan of 2034 as proposed in the ERP settlement. The company informed the PUC that it is in discussions with parties to potentially modify the settlement. Recently all three Commissioners expressed opposition to the settlement for a 2034 retirement date and proposed to agree to a more complete analysis to plan for a 2029 retirement. The view of the Commissioners likely stems from the fact that the unit was in an extended outage since late January, and had two outages in 2020. Comanche 3 is among the newer coal units in the country and came into service in 2010.

EXC, AEE — IL electric distribution utilities file annual FRPs

- **EXC — ComEd files annual formula rate planin IL:** EXC's ComEd filed a proposal for a $223M revenue increase premised on 7.85% ROE, 49.45% equity, and a rate base of $13.9B. The calculation of the ROE in the FRP is formulaic and set by the FRP statute. ComEd's previous rate plan was approved at 7.36% ROE in 2021. A final decision is expected toward the end of the year with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL.
- **AEE — Similar to ComEd, AEE's IL sub also filed an annual formula rate plan:** AEE is seeking an $85M rate increase on a 7.85% ROE, 53.99% equity, and a rate base of $3.9B. ComEd's previous rate plan was approved at 7.36% ROE in 2021. A final decision is expected by the end of 2022 with new rate effective in January 2023.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

- **The 2021 IL Energy Legislation ends FRP and introduces PBR with multi-year rate plans instead:** Utilities may file four-year Multi-Year Rate Plans by 2023 for rates effective 2024. Final metrics for the PBR are currently being debated. Importantly, the bill breaks the link to U.S. Treasuries and provides authority to the ICC to set ROE and allows up to 50% equity ratio, with a higher equity ratio requiring specific commission approval. An extended period of low Treasury rates has led to both AEE's and EXC's authorized ROEs in IL to trend below peers in other parts of the country.

ED — ED proposes plan for offshore wind transmission: ED filed a plan with NY regulators for $1B in cost recovery to build a grid hub to support offshore wind power. The plan, Brooklyn Clean Energy Hub, proposes repurposing two Brooklyn gas turbine locations to create eight new points of interconnection for offshore wind and other renewables. In tandem with two existing substations, the energy hub would be able to handle ~6GW of electricity. The plan responds to the NY PSC's request in January for ED to draw up a detailed proposal for a grid hub capable of connecting 5-6 GW of offshore wind. ED's plan is designed to link the output from the offshore wind projects to a high-voltage system. NY has a plan to install 9 GW of offshore wind power by 2035 to meet the commitments in the NY Climate Bill (Climate Leadership and Community Protection Act). Phase 1 of the Brooklyn Hub project is anticipated to be energized by the end of 2027. ED has commenced engineering on the project and plans to begin long lead time equipment procurement this year. Later this year, offshore developers are expected to present plans on how they plan to feed power into a shared offshore transmission network (mesh) that would ultimately connect to the Brooklyn Hub. ES is a partner in the 130 MW South Fork Wind project being built offshore NY.

WEC — Iowa regulators deny a pause in construction of the Cardinal-Hickory Creek transmission line: The 100-mile, 345-kV Cardinal-Hickory Creek transmission line received a ruling from the Iowa Utilities Board denying the request for a pause of construction of the transmission line that is designed to cross the Upper Mississippi National Wildlife Refuge. Ongoing litigation in federal courts has delayed the line's construction and risks the construction timeline. In January, a federal judge ruled that the environmental review was inadequate. The project is being developed jointly by WEC's subsidiary ATC, ITC Midwest, and Dairyland Power Cooperative. The utilities are appealing the decision blocking the Mississippi River crossing. The project is expected to be complete by the end of 2023. When complete, the transmission line will be entered into MISO and help supply renewable resources to the region.

ETR — MI Governor rethinks closure of Palisades nuclear plant: Palisades is a 777 MW capacity nuclear plant in MI that is owned by ETR. ETR announced plans in 2017 to retire the plant in the spring of 2022 (the plant is licensed to operate until 2031). Governor Whitmer's optimism to save the plant from an early retirement stems from the DOE's announcement that it is seeking applications for the $6B Civil Nuclear Credit Program that was implemented as part of the Bipartisan Infrastructure Bill. The program is designed to preserve existing nuclear reactors that are uneconomic to continue operating. The first award cycle for which applications are currently open will prioritize reactors that have already announced an intent to cease operations and plan to permanently cease operations before September 2026. The credits, if awarded, will be allocated over a four-year period. According to ETR, the plant is scheduled to shut down at the end of May and the company is already in contract to transfer ownership to Holtec for a decommissioning process. The deadline to apply for assistance through the CNC is May 12. There are many questions if Palisades does continue to operate beyond the currently stated timeline and those would include the potential ownership of the plant and whether it would be operated as a state regulated utility or as a merchant power plant.

CEG — CEG receives a DOE award to explore direct air capture technology: DOE awarded a $2.5M grant to CEG and its project partners to study the benefits of direct air capture at the Byron nuclear plant in IL. Even though the plant does not produce any carbon emissions, the technology would remove CO_2 directly from the atmosphere. In the proposed study, a chemical solution would be added to water flowing through the facility's main condenser on the non-nuclear side of the plant. After traveling through the condenser, the water would travel out to the cooling towers, where CO_2 in the air will attach itself to the chemical solution and become captured and sequestered for later use. The study is expected to conclude in 2023 and will inform on future decisions to integrate such a direct air capture technology with a nuclear plant.

PEG — CEO Ralph Rizzo to retire at the end of 2022: Ralph Izzo, Chair, President, and CEO of PEG, will retire at the end of 2022. Current COO Ralph LaRossa will assume the role of President and CEO effective September 1, and Dr. Izzo will remain executive chairman of the Board through the end of the year. We view the announcement as a planned senior management transition.

SRE — Mexican legislature blocks AMLO's plan to increase CFE's role in domestic power markets: As a background, the Mexican President had introduced a constitutional reform plan to modify the country's Electric Industry Law that would have led to the cancelation of multiple private power plants that sell power into the national grid and declare illegal others that sell power directly to C&I customers. The proposal would also cancel long-term energy contracts and clean energy PPAs. The plan put state-owned coal/gas plants first in line to sell power into the grid and take precedence over private natural gas/renewable plants. The legislature did allow some modifications to the Electric Industry Law, including prioritizing CFE owned hydropower units in dispatch sequencing over others. Some components of the law are still tied up in courts. Importantly, the vote in the legislature is a positive for SRE, even though the company has a very small generation portfolio in the country and a vast majority of its generation projects are not connected to CFE, but rather dispatch directly to CAISO.

WEC — Governor Evers introduces the WI Clean Energy Plan: The plan is meant to act as a blueprint for meeting the Governor's goal of carbon-free electricity generation by 2050 in the state. The plan calls for providing clean energy technology through a $100M rate payer funded program, updating emission goals for electricity generation, reducing demand through EE, updating building codes, and supporting the transition to EVs. Additionally, the plan calls for additional development of utility-scale solar projects and the phaseout of natural gas-fired plants. WEC expects to phase coal out by 2035 and has a long-term net-zero carbon emission goal from its generation fleet by 2050.

Clear Eyes, Full Hearts, Compelling Landscape: Upgrade to OW

▲ **Overweight**
Previous: Neutral

EXC, EXC US
Price (19 Apr 22): $49.50

▲ **Price Target (Dec-22): $55.00**
Prior (Dec-22): $47.00

In its transition to a pure-play regulated utility, Exelon has refocused its core operations around an advantaged T&D portfolio with leverage to infrastructure renewal efforts across an aging urban network and long-term electrification tailwinds (as highlighted in our 2022 Outlook). Years of regulatory engagement have yielded multi-year plan frameworks in MD and DC amid improving regulatory outcomes across both jurisdictions (as discussed in our NARUC Meeting Takeaways), plus the prospects of ROE normalization in IL's upcoming ratemaking transition. We see earned ROE upside under both and incremental to the company's already attractive 6-8% EPS growth. EXC's projected 8.1% rate base CAGR screens as top tier and is coupled with B/S flexibility to absorb incremental capital investment as grid needs increase with incremental renewables, broader economy electrification, and growing system resiliency/reliability needs. Additionally, we see near-term qualitative benefits in the company's relatively light regulatory calendar over the balance of 2022 and long-term tailwinds from its T&D portfolio amid ever increasing ESG forces. At EXC's current -0.8% 2024 P/E discount, we see compelling upside to high quality peers AEE, CMS, WEC, and XEL, which currently stand at an ~10% average premium to the group. As a result, we upgrade EXC to Overweight (YE22 PT to $55, from $47).

- **Light regulatory calendar this year ahead of IL filing in early 2023.** We expect a relatively quiet regulatory update after EXC successfully implemented multi-year plans in MD and DC and settled the PECO electric late last year. In IL, workshops remain ongoing in the state's effort to transition away from formula rates/treasury tied ROEs. With the first filing expected early next year, the key focus remains on a potential ROE step-up in 2024. Recall, the 30-year US treasury + 580bps currently drives ComEd's ROE and could step up ~70bps, assuming an ROE in line with the 9.45% sector average. That said, the recent rates run-up has helped mitigate the severity of the prospective step, which we view as a clear positive from an optics standpoint.

- **Electrification & other tailwinds set to drive long-term benefits.** EXC has an advantaged T&D portfolio with leverage to infrastructure renewal efforts across an aging urban network and long-term electrification tailwinds. Owning no electric generation, EXC's premium growth platform targets $29bn of capex focused on low risk T&D investments supporting expanded electrification and reliability. Moreover, EXC's constructive regulatory mechanisms allow for favorable recovery across ~98% of the company's rate base growth.

- **Valuation stands out amid premium qualities.** At EXC's current -0.8% 2024 P/E discount, we see compelling upside to high quality peers AEE, CMS, WEC, and XEL, which currently stand at an ~10% average group premium. We see legacy ComEd concerns fading and lift our relative multiple.

Summary Investment Thesis and Valuation

In its transition to a pure-play regulated utility, Exelon has refocused its core operations around an advantaged T&D portfolio with leverage to infrastructure renewal efforts across an aging urban network and long-term electrification tailwinds. Years of regulatory engagement have yielded multi-year plan frameworks in MD and DC amid improving regulatory outcomes across both jurisdictions, plus the prospects of ROE normalization in IL's upcoming ratemaking transition. We see earned ROE upside under both and incremental to the company's already attractive 6-8% EPS growth. EXC's projected 8.1% rate base CAGR screens as top tier and is coupled with balance sheet flexibility to absorb incremental capital investment as grid needs increase with incremental renewables, broader economy electrification, and growing system resiliency/reliability needs. At EXC's current -0.8% 2024 P/E discount, we see compelling upside to high quality peers AEE, CMS, WEC, and XEL, which currently stand at an ~10% average premium to the group. As a result, we upgrade EXC to Overweight (Dec 2022 PT to $55, from $47).

Our December 2022 price target of $55 is based on a SOTP valuation using our 2023 estimates. We use an average 22.9x P/E multiple for the regulated utility and corporate business segments, which is at a modest premium to peers given the constructive regulatory setup and robust electrification investment opportunity.

Investment Thesis, Valuation and Risks

Exelon Corp. *(Overweight; Price Target: $55.00)*

Investment Thesis

In its transition to a pure-play regulated utility, Exelon has refocused its core operations around an advantaged T&D portfolio with leverage to infrastructure renewal efforts across an aging urban network and long-term electrification tailwinds. Years of regulatory engagement have yielded multi-year plan frameworks in MD and DC amid improving regulatory outcomes across both jurisdictions, plus the prospects of ROE normalization in IL's upcoming ratemaking transition. We see earned ROE upside under both and incremental to the company's already attractive 6-8% EPS growth. EXC's projected 8.1% rate base CAGR screens as top tier and is coupled with balance sheet flexibility to absorb incremental capital investment as grid needs increase with incremental renewables, broader economy electrification, and growing system resiliency/reliability needs. Additionally, we see near-term qualitative benefits in the company's relatively light regulatory calendar over the balance of 2022 and long-term tailwinds from its T&D portfolio amid ever increasing ESG forces. At EXC's current -0.8% 2024 P/E discount, we see compelling upside to high quality peers AEE, CMS, WEC, and XEL, which currently stand at an ~10% average premium to the group. As a result, we upgrade EXC to Overweight (Dec 2022 PT to $55, from $47).

Valuation

We raise our December 2022 price target to $55 from $47 prior. Our valuation is based on a sum-of-the-parts analysis using our 2023 forecasts. We use an average 22.9x P/E multiple for the regulated utility and corporate business segments, which is at a modest premium to peers given the constructive regulatory setup and robust electrification investment opportunity. Our higher price target due to higher peer average multiples, stronger 2023 earnings from rising treasury yields, and a higher premium assigned to utility operations due to the improving regulatory environment and fading ComEd concerns.

Risks to Rating and Price Target

- Regulated electric and gas utilities are subject to strict federal and state regulation, including determinations of allowed revenues. Any change to regulations may cause future earnings power to differ materially from current expectations.
- ComEd currently operates under a deferred prosecution agreement (set to end in 2023) due to past lobbying practices in Illinois. These legacy issues bring up the potential for negative headline risk if new information comes to light.
- The company possesses attractive leverage to growing electrification trends. However, if these investments develop slower than we anticipate it could lead to a weaker earnings outlook than we currently forecast.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Coverage Universe: Tonet, Jeremy: AltaGas Ltd (ALA.TO), Ameren Corporation (AEE), American Electric Power (AEP), Antero Midstream Corp (AM), CMS Energy Corporation (CMS), CenterPoint Energy, Inc. J.P. Morgan Equity Research Ratings Distribution, as of April 02, 2022

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	52%	47%	36%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	75%	68%	51%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. ALE – New Energy Equity transaction closes

Policy/ESG – Climate change lobbying report calls out multiple US utilities for 'negative engagement'

EXC – ComEd files 2023 FRP

ES/MA – Multiple filings docketed in DPU's EV docket

NY/Solar – NY Governor Hochul announces framework for 10GW of distributed solar by 2030

PCG/CA – CA Undergrounding legislation reset for committee hearing on April 20, continues to advance through legislative process

Wind / ND – North Dakota counties are looking to review wind development ordinances

LNT – IPL dockets joint schedule proposal in solar ratemaking docket

DUK – DUK kicks off community solar program in FL

VA – Governor Youngkin signs property tax exemption for resi/small solar

NYISO – CHPE HVDC line gets contract approval from PSC

NEE – FPL acknowledges natural gas cost impacts on supply costs

ES/NH – NH lawmakers continue to advance DER legislation

ALE – New Energy Equity transaction closes

- The $165.5mm transaction has closed, bringing ALE's nonregulated arm a new line of business in distributed solar development, with a focus on C&I
- "More New Energy Equity, with headquarters in Annapolis, Maryland, has successfully completed more than 250 distributed solar projects across the nation totaling more than 330 megawatts. The company has a development pipeline of about 2 gigawatts across 26 states over the next three years." - ALE
- More HERE

Guggenheim takeaway: *Heads up and as expected, with more details on the acquisition forthcoming on the 1Q call in our view. As a reminder, ALE has a track record of executing on nonregulated businesses lines like these (e.g., ACE), and had been exploring different ways to expand into new opportunities for over a year now. The acquisition comes at a busy time for solar developer M&A (e.g., PPL and Safari – see HERE), with a specific focus, in this case, on C&I and smaller ground mount systems across the Midwest and Northeast (incl. a significant presence in MN). The comp set for transactions like these is admittedly small, but the ~8x 21 EBITDA does not seem particularly expensive – management has indicated that the transaction will be accretive in the first full year - we look forward to more details now that the deal has closed.*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Policy/ESG – Climate change lobbying report calls out multiple US utilities for 'negative engagement'

- The report calls 11 of 25 analyzed utilities 'laggards,' with their work on opposing gas bans specifically cited as an obstructionist activity by the authors
- More HERE

Guggenheim takeaway: *Flagged for your awareness as the report has been generating some local headlines in recent days (e.g., HERE).*

EXC – ComEd files 2023 FRP

- The company has filed a $199mm rate increase, which could potentially be dampened by a concurrent $65 EDIT flowback proposal and lower YoY capacity prices
- "The evidence submitted herewith establishes that ComEd's rates should be designed to recover a 2023 Rate Year Net Revenue Requirement of $ $2,910,460,000. That sum includes a 2023 Initial Rate Year Revenue Requirement of $2,860,028,000, a reconciliation adjustment of $60,241,000, including interest, based on a 2021 Reconciliation Revenue Requirement of $2,733,799,000, and a ROE Collar adjustment of ($9,809,000). Those revenue requirements and their calculation are described in detail in the testimony of ComEd witness Diccion" - filing
- Docket HERE
- More HERE
- CUB statement HERE

Guggenheim takeaway: *The final FRP lands as-expected, setting off a process that will run for 8 months ahead of new rates in '23. While CUB's initial comments are part of the process, we continue to monitor IL, alongside other jurisdictions, for any signs of rate fatigue in the current inflationary environment.*

ES/MA – Multiple filings docketed in DPU's EV docket

- Multiple stakeholders, including EV infrastructure providers and consumer advocates, have filed their initial briefs in the ongoing process for the Phase II EV infrastructure program
- "The companies' proposed plans are necessary to increase transportation electrification in all of the communities served by the companies and assist Massachusetts in achieving its decarbonization goals. Therefore, CLF recommends that the Department approve the companies' proposed plans, subject to several improvements aimed at increasing support for environmental justice ("EJ") populations and increasing support for transportation electrification in the critical medium-duty and heavy-duty ("MD-HD") fleet sector." - Conservation Law Foundation
- More HERE

Guggenheim takeaway: *Multiple filings for your awareness in the ongoing EV docket. As a reminder, EV spending remains a relatively smaller, but growing, share of current spend vs. other irregular opportunities like AMI and offshore wind interconnections.*

NY/Solar – NY Governor Hochul announces framework for 10GW of distributed solar by 2030

- NY Governor Hochul announced last week the approval of a distributed solar framework to help reach a 10GW distributed solar target in New York State.
- Per the Governor's announcement, the framework would include a $1.5 billion investment of ratepayer-funded incentives (NY-Sun program) and the state agencies anticipate another $4.4 billion in private investment

Guggenheim takeaway: *FYI and in case you missed from last week. The framework seeks to add incentives and investment into distributed solar, with a specific focus of access for low-income customers. On a wholesale level, distributed solar remains a high-cost resource in our view, especially in lower irradiation geographies.*

PCG/CA – CA Undergrounding legislation reset for committee hearing on April 20, continues to advance through legislative process

- CA undergrounding bill is set hearing in the senate Government and Finance committee on April 20, 2022.

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- As proposed, the CPUC would be mandated to introduce and administer an undergrounding program for CA.
- CA undergrounding bill text here (SB884).
- Legislative session runs through August.

Guggenheim takeaway: *FYI. The bill is getting some media attention as legislators vent frustration at the speed of wildfire mitigation – in particular undergrounding at PG&E. While PCG has made the 10,000 mi undergrounding goal without legislative support, a more formal program could accelerate deployment in a non-GRC construct, which would potentially be accretive to our valuation and EPS forecasting/growth rate.*

Wind / ND – North Dakota counties are looking to review wind development ordinances

- McLean and Mercer counties are considering new ordinances that could allow for zoning rules to include wind development.
- McLean County adopted zoning restrictions making it harder to interconnect new wind and Mercer County had a two year moratorium on new wind projects implemented.
- The counties are working on proposals to balance the needs of landowners, existing generation and new wind development.
- North Dakota is a very coal and wind rich geography.
- More here.

Guggenheim takeaway: *FYI. Interesting debate on new wind development potential in North Dakota. The developers included in the debate of the ordinance are private developers as well as NEER (NEE).*

LNT – IPL dockets joint schedule proposal in solar ratemaking docket

- The joint proposal would see rebuttal testimony due June 20th and hearings in mid August
- More HERE

Guggenheim takeaway: *Heads up for your calendars, and not a surprise after IPL's April 5th motion.*

DUK – DUK kicks off community solar program in FL

- The roughly 750MW program will see allocations across C&I, resi, municipal, and low income customer classes
- More HERE

Guggenheim takeaway: *Minor FYI.*

VA – Governor Youngkin signs property tax exemption for resi/small solar

- The legislation creates a property tax exemption for solar systems up to 25kw
- More HERE

Guggenheim takeaway: *Interesting data point in light of some of the political noise in the state.*

NYISO – CHPE HVDC line gets contract approval from PSC

- The state PUC approved on a 5-2 vote the proposed 25-year contract for the project
- More HERE

Guggenheim takeaway: *ICYMI last week.*

NEE – FPL acknowledges natural gas cost impacts on supply costs

- FPL acknowledged with regulators on Friday that natural gas costs have contributed to near-term supply cost inflation.
- FPL is not currently seeking to pass through increased commodity costs to bills.
- Fuel and Purchase Power Docket: 20220001

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

- Media here.

Guggenheim takeaway: *FYI. Sustained high natural gas prices have started to permeate supply cost conversations, and we continue to monitor broader impacts from commodity cost pressure.*

ES/NH – NH lawmakers continue to advance DER legislation

- SB321 would create a pilot program to update compensation for projects in the 1-5MW range
- "SB 321 appears to seek to provide limited producers, as defined in the statute, a venue to sell energy to entities other than the investor-owned electric company, specifically non-residential customers or to competitive suppliers… This proposal raises jurisdictional issues under the Federal Power Act under which energy sales for resale are the jurisdiction of FERC." - EEI
- More HERE
- Bill HERE

Guggenheim takeaway: *Minor heads up on another statehouse DER/NEM conversation.*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Date

Monday, May 9, 2022 – Baltimore/New York
Tuesday, May 10, 2022 – New York

Meeting Format

In-person NDR - 1:1 Meetings, Group Lunch, Group Dinner

Company Information

Market Cap: $17.9bn

CenterPoint Energy, Inc. is a holding company, which engages in the business of power generation and distribution. It operates through the following segments: Houston Electric Transmission & Distribution (T&D), Indiana Electric Integrated, Natural Gas Distribution, Energy Services, Infrastructure Services, Midstream Investments, and Corporate and Other. The Electric T&D segment offers electric transmission and distribution services. The Indiana Electric Integrated segment includes energy delivery services to electric customers and electric generation assets to serve electric customers and optimize those assets in the wholesale power market. The Natural Gas Distribution segment provides regulated natural gas distribution services. The Energy Services segment offers non-rate regulated natural gas sales to, and transportation and storage services, for commercial and industrial customers. The Infrastructure Services segment focuses on underground pipeline construction and repair services. The Midstream Investments segment consists of the equity method investment in Enable. The Other Operations segment consists of office buildings and other real estate used for business operations and home repair protection plans. The company was founded in 1866 and is headquartered in Houston, TX. (Source: FactSet)

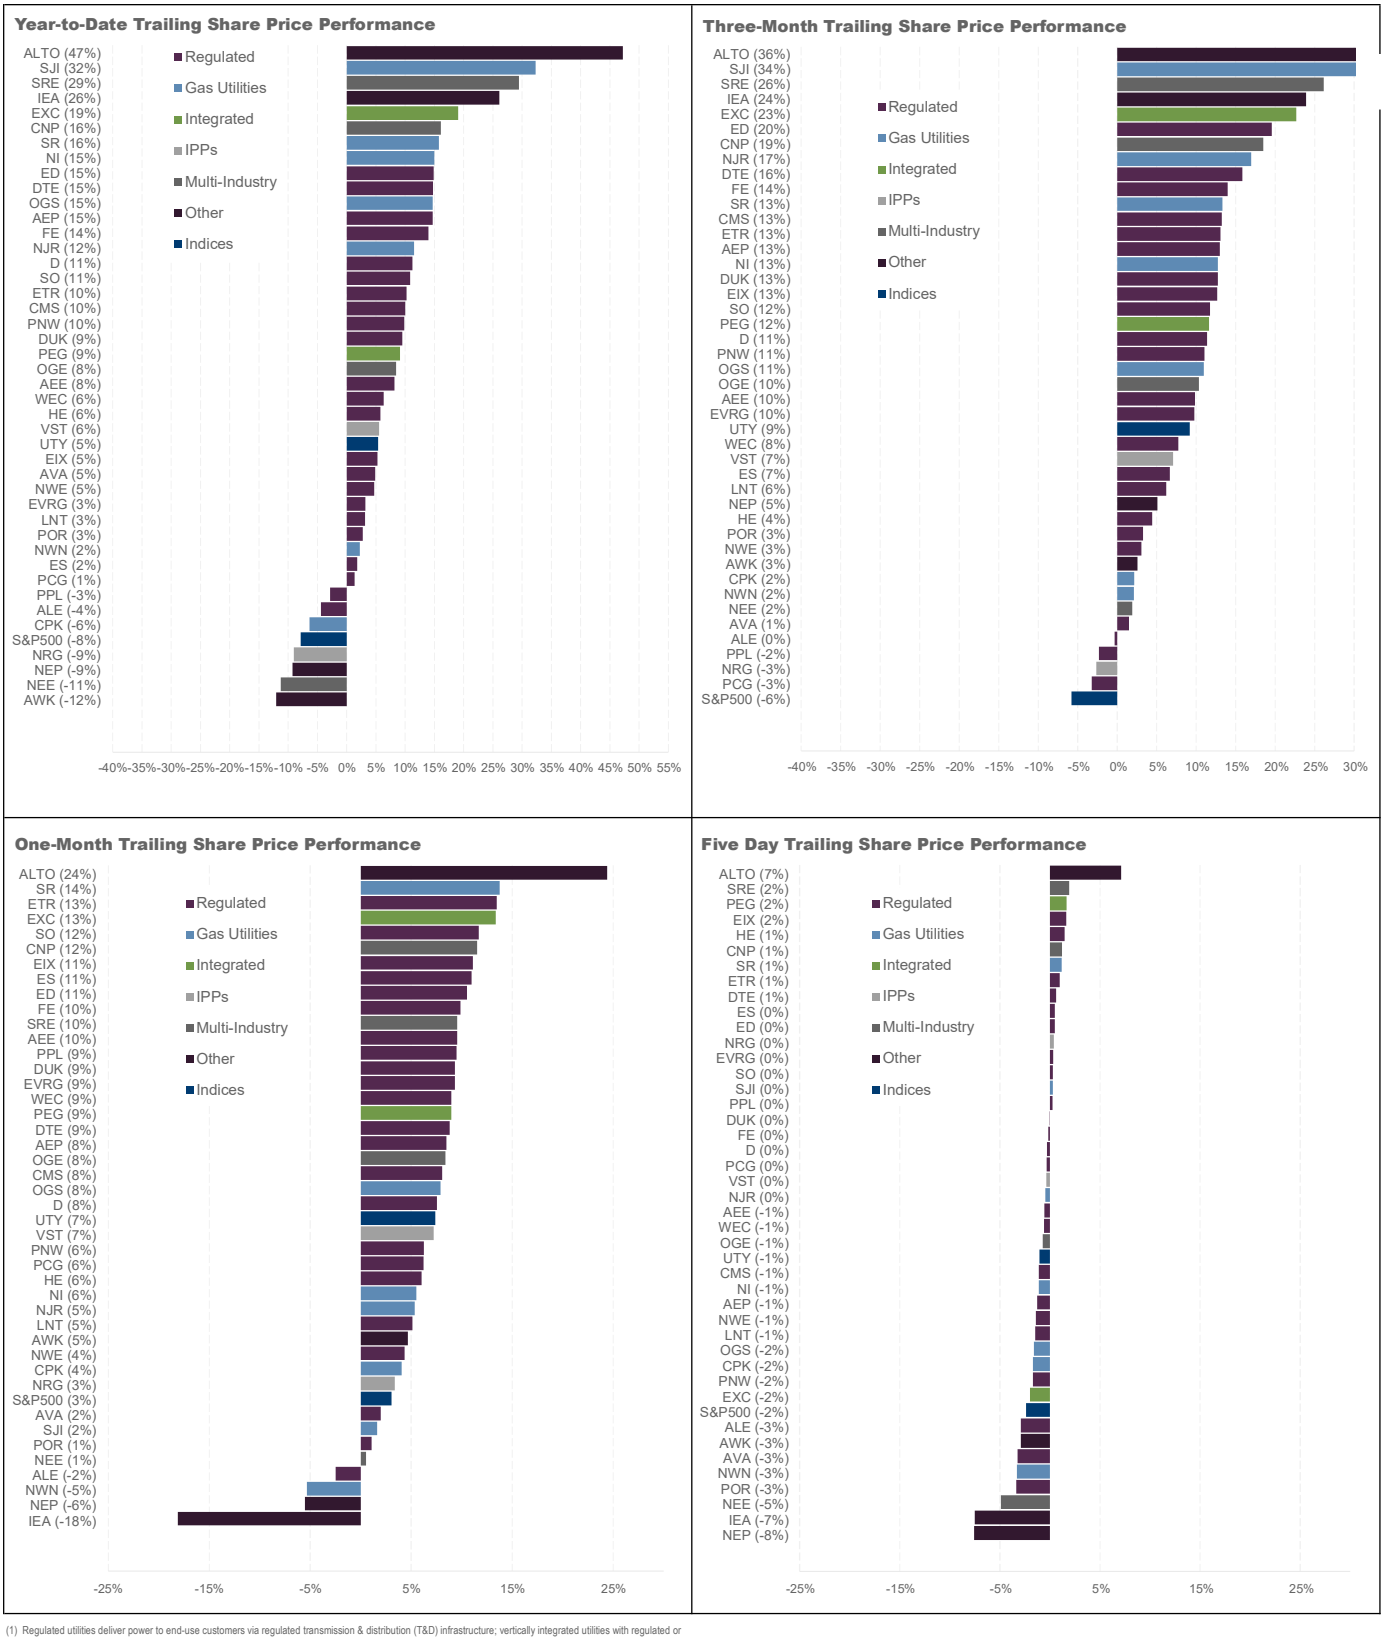
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Power & Utilities April 8, 2022

The Guggenheim Daily Transmission: Nuclear, SO, Renewable Fuels, LNG, EXC/IL, ERCOT, ES/Wind, Hydro

For details on our Guggenheim-hosted client Utility events including our CNP NDR, AGA Conference meetings, EVRG NDR, AWK NDR, EXC NDR, LNT NDR, ES NDR, SO NDR, CMS NDR, DTE NDR, OGE NDR, EIX NDR, POR NDR and OGS NDR, among other events, scroll down…

Nuclear – HALEU enrichment legislation introduced in Senate

SO – Georgia Power exec testifies on coal ash plans, including 10 ash ponds which will be capped in place by 2028

Renewable Fuels – US Senate introduces a bill for renewable diesel and aviation fuel

LNG – NextDecade LNG and ENN sign 20-year LNG purchase agreement

EXC/IL – Direct testimony lands in ComEd performance metrics docket

ERCOT – March GIS report details new capacity additions

ES/Wind – South Fork developers ink helicopter services contract

Wind – Offshore wind providers point to reversal of longstanding declining cost trends

Hydro/POR/AVA – Northwest snow melt occurring earlier than usual due to dry and warm conditions

Nuclear – HALEU enrichment legislation introduced in Senate

- "This legislation will ensure a domestic supply of high-assay, low-enriched uranium (HALEU) for advanced nuclear reactors. It will direct the Department of Energy (DOE) to prioritize establishing a domestic HALEU enrichment capability. It will also direct DOE to make HALEU available from their inventories to ensure advanced reactors have the fuel they need until U.S. commercial enrichment is available." - Barrasso
- More HERE

Guggenheim takeaway: *Interesting heads up as this is something, we expected following our recent uranium baseline (see our research note HERE). While in our view the prospects for individual pieces of legislation like this remain murky amid a busy calendar, we expect this to remain a bipartisan priority going forward.*

SO – Georgia Power exec testifies on coal ash plans, including 10 ash ponds which will capped in place by 2028

- Aaron Mitchell, Georgia Power's director of environmental affairs, testified to the Georgia PSC on the subject of coal ash ponds during the second of two days of hearings related to Georgia Power's 2022 IRP. Although excavating and physically removing coal ash from ponds would ensure no groundwater contamination occurs, Mr. Mitchell testified the EPA has declared both removal and closure in place are acceptable.
- "EPA has said both methods are equally as protective of the environment if the performance standards are complied with," he said. "We believe our designs are compliant." – Aaron Mitchell on Georgia PSC webcast
- More HERE
- Docket HERE

Guggenheim takeaway: *Headlines around coal ash are always touchy. SO is balancing federal and state requirements over the next decade along with its own efforts to*

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

decarbonize. We expect that as has historically been the case, the Georgia PSC will arrive at a pragmatic solution to the coal ash issue in the state. We continue to monitor the IRP docket in the state.

Renewable Fuels – US Senate introduces a bill for renewable diesel and aviation fuel

- U.S. Senator John Barrasso (R-WY) as lead sponsor, along with Senators Dianne Feinstein (D-CA), Bill Cassidy (R-LA), Ben Ray Luján (D-NM), and Steve Daines (R-MT) introduced the Renewable Diesel and Sustainable Aviation Fuel Parity Act of 2022.
- The bill would require the Department of Energy to track foreign imports and domestic production of renewable diesel and sustainable aviation fuel.
- The bill also provides incentives to produce renewable fuels domestically and eliminate regulations that limit the use of renewable diesel in California.
- Bill text here.

Guggenheim takeaway: *FYI. There continues to be bipartisan support for renewable fuels and alternative transportation fuels.*

LNG – NextDecade LNG and ENN sign 20-year LNG purchase agreement

- NextDecade (NEXT) and ENN (ENN NG 600803.SH) signed a 20-year supply agreement for LNG from the Rio Grande LNG terminal.
- The agreement is for a term of 20 years and supply will be from the first two trains at NextDecade's Rio Grande LNG export project in Brownsville, Texas.
- The first train scheduled to start commercial operations as early as 2026 (per NEXT).
- More here

Guggenheim takeaway: *FYI. Constructive signal for the Global LNG market warming up. This is a constructive signal for SRE in our coverage as the company is working towards FID on Cameron 4 expansion and has multiple East and West coast projects in pre-FID phases (Port Arthur, Vista Pacifico, ECA II). The ET contract is 20 years but is not as de-risked as SRE's fixed price tolling arrangements.*

EXC/IL ─ Direct testimony lands in ComEd performance metrics docket

- Direct testimony continues to land in the process, with the ICC staff and consumer reps opposing parts of the framework proposed by ComEd
- More HERE

Guggenheim takeaway: *Minor FYI – this docket is a part of setting up the final performance incentives/penalties, and it is not a surprise to see somewhat of a bid-ask in the initial comments across intervenors/stakeholders. In our view this remains a positive process and supportive of what we see as an improving regulatory backdrop in IL.*

ERCOT ─ March GIS report details new capacity additions

- The ISO's latest monthly report detailed a large volume of battery storage, wind, and solar expected to come online in the coming quarters, in addition to several GWs of newly synchronized resources
- The latest synchronization include the ~400MW Rabbs Power Station gas CT, alongside a ~350MW solar project and a 100MW storage project
- More HERE

Guggenheim takeaway: *Important month to month details on the underlying market dynamics, however with gas still the marginal fuel for most intervals, pricing in Texas remains subject to the interaction of both renewables volatility and natural gas commodity volatility. Both have fed into strong forwards and elevated sparks. While the overall supply/demand backdrop remains bearish from a reserve margin standpoint thanks to a large tranche of solar and storage planned, we continue to monitor for project delays and scarcity events. As a reminder the PUCT continues to look at Phase II of its design process – focused on resource adequacy.*

ES/Wind ─ South Fork developers ink helicopter services contract

- As a crew transport service, helicopters reportedly enable longer on-site hours and higher productivity vs. sea transfers
- More HERE

Provided for the exclusive use of Lindsay Cox at Exelon Corp on 26-Jul-2022 11:43 AM.

Guggenheim takeaway: *Interesting data point as the process continues to build momentum.*

Wind – Offshore wind providers point to reversal of longstanding declining cost trends

- Several major offshore wind executives have pointed to a new era of pricing dynamics for offshore wind projects in light of rising costs, per an S&P recap of WindEurope 2022
- "We are living in a different world right now… Whoever thought that [levelized cost of energy] is a one-way road that just goes down, down, down — that doesn't work anymore." - Martin Neubert, chief commercial officer and deputy CEO Ørsted, via S&P [CPSE:ORSTED]
- ""If we have to pay £1 billion to get our hands on a site, that's a lost opportunity and lost money that we need to [invest in] the supply chain" - Iberdrola rep [BME:IBE]

Guggenheim takeaway: *Zero surprise as many of these data points were driven home during the YE calls and subsequently in developer comments following the NY Bight results, with manufacturers growing increasingly sensitive to margin compression in current contracts/backlog.*

Hydro – Northwest snow melt occurring earlier than usual due to dry and warm conditions

- Precipitation improved across the southwestern US in March but not enough to get out of below-normal levels while conditions were dry and warm in the Northwest leading to an earlier snowmelt, according to hydrologists during regional water supply briefings yesterday, April 7th. – Platts
- More HERE

Guggenheim takeaway: *Weather conditions have kept the summer hydro outlook weak for most of the West as drought conditions continue. Summer supply concerns caused Mid-C and NP15 power forwards to reach highs this week.*

Date

Monday, May 9, 2022 – Baltimore/New York
Tuesday, May 10, 2022 – New York

Meeting Format

In-person NDR - 1:1 Meetings, Group Lunch, Group Dinner

Company Information

Market Cap: $17.9bn

CenterPoint Energy, Inc. is a holding company, which engages in the business of power generation and distribution. It operates through the following segments: Houston Electric Transmission & Distribution (T&D), Indiana Electric Integrated, Natural Gas Distribution, Energy Services, Infrastructure Services, Midstream Investments, and Corporate and Other. The Electric T&D segment offers electric transmission and distribution services. The Indiana Electric Integrated segment includes energy delivery services to electric customers and electric generation assets to serve electric customers and optimize those assets in the wholesale power market. The Natural Gas Distribution segment provides regulated natural gas distribution services. The Energy Services segment offers non-rate regulated natural gas sales to, and transportation and storage services, for commercial and industrial customers. The Infrastructure Services segment focuses on underground pipeline construction and repair services. The Midstream Investments segment consists of the equity method investment in Enable. The Other Operations segment consists of office buildings and other real estate used for business operations and home repair protection plans. The company was founded in 1866 and is headquartered in Houston, TX. (Source: FactSet)

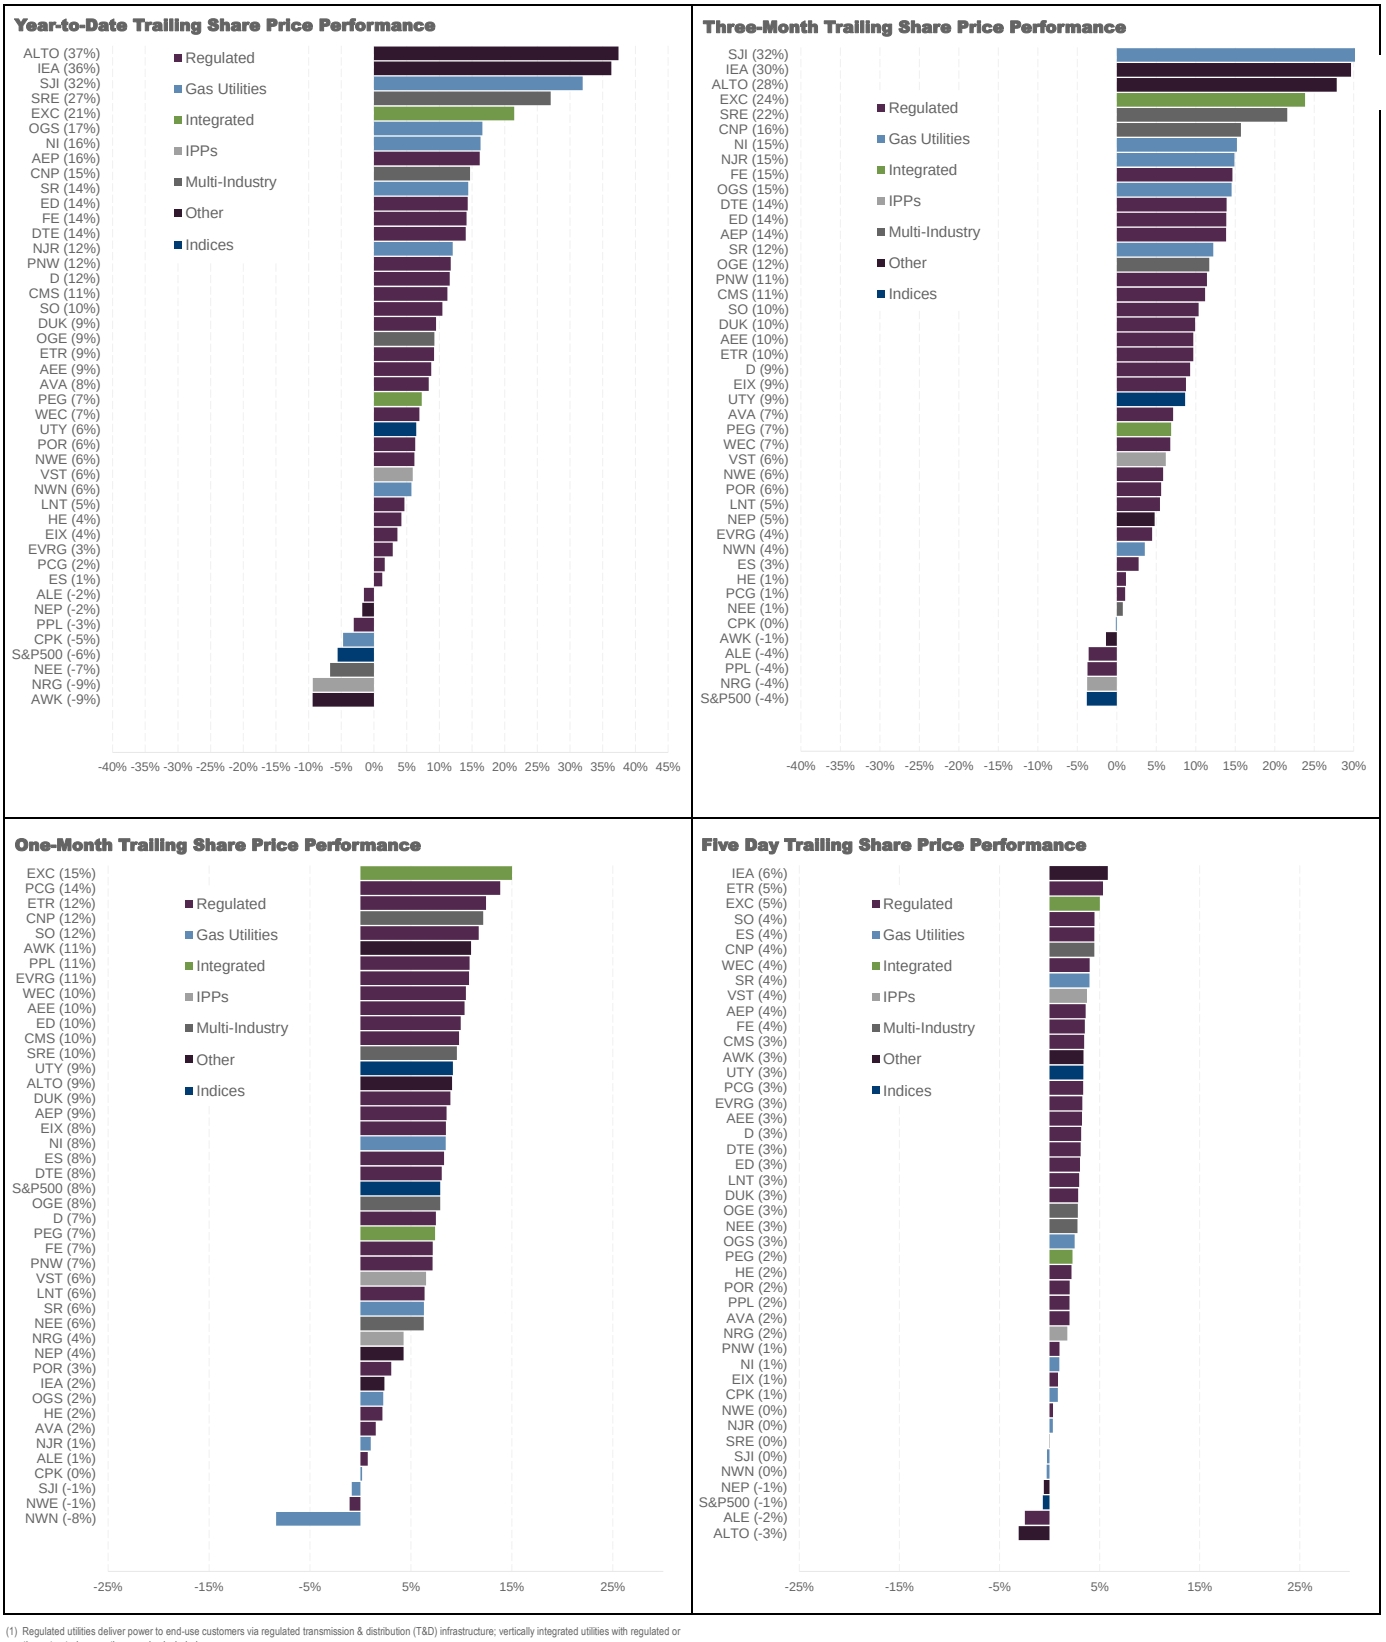
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Exelon Now a Fully Regulated Utility After Constellation Spinoff

Updated Forecasts and Estimates from 09 Mar 2022

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Business Strategy and Outlook 09 Mar 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2026, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $36 billion of capital investment through 2026. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

We view the separation positively for shareholders. We previously valued Exelon at a discount to its fully regulated peers in large part because of its generation and retail operations. A stand-alone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given allegations of inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon subsequently entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024 or default to traditional ratemaking. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates.

50.02 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Morningstar Analysis

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Fair Value & Profit Drivers 09 Mar 2022

Our fair value estimate is $39.

We expect 7% average earnings growth through 2026, the midpoint of management's 6% to 8% earnings guidance. We forecast $36 billion of capital expenditures through 2026 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Scenario Analysis

Our uncertainty rating for Exelon is low. The company's regulated rate structure and transparent growth outlook reduce the difference between our bull- and bear scenarios.

In our bull-case scenario, we assume rate-case outcomes are 25% higher and operating expenses are 2% lower than in our base-case scenario. This results in a $5 per-share increase to our base-case fair value estimate. In our bear-case scenario, a similar decline in rate-case outcomes and increase in operating expense results in a $5 fair value estimate decrease.

If operating expenses increase by 100 basis points, our fair value estimate would drop by $2 per share, all else equal.

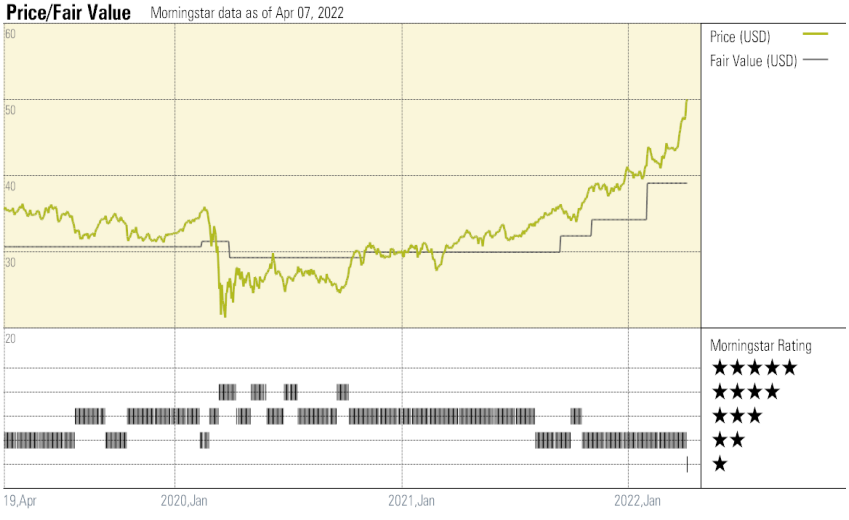
Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
50.02 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	



Economic Moat

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Moat Trend

We assign Exelon a stable moat trend rating. The regulatory environments in Illinois, Pennsylvania, and Maryland have stabilized, allowing the company's distribution utilities fair returns. Nearly all of Exelon's rate-base growth will have rate trackers or formula rates, minimizing regulatory lag. Exelon faces the biggest challenge boosting regulated earned returns.

Exelon's stable business model and difficult-to-replicate asset base support our view that the firm's narrow moat is stable. We don't anticipate a change in the regulatory compact between utilities and ratepayers that ensures capital providers earn a fair return on their investments. As with all regulated utilities, we think revenue caps preclude Exelon from establishing a wide economic moat.

Regulated utilities' moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations.

Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether

fundamental changes will make it more difficult for a utility to earn its cost of capital. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities that we cover.

Bulls Say/Bears Say

Bulls Say

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Financial Strength

With over 4.0 times interest coverage, Exelon's financial health is sound for a regulated utility, particularly given its stable, low-risk business model. With our forecast for $36 billion of capital spending planned through 2026, Exelon will be a frequent debt issuer. The company has manageable long-term debt maturities and we anticipate it will be able to refinance its debt as it comes due, maintaining its current debt/capital ratio. We expect the company to issue $1.0 billion in equity to fund its capital investment plan, in line with management's expectations.We expect total debt/EBITDA to remain in the 4.5-5.0 times range. Exelon will target a 60% dividend payout ratio. We expect dividend growth in line with our 7% annual earnings per-share growth forecast through 2026.

Risk & Uncertainty

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor

subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation 09 Mar 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Analyst Notes

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Exelon Completes Constellation Spin-Off; Initiating $39 Standalone Fair Value Estimate 02 Feb 2022

Our stand-alone fair value estimate for Exelon is $39 after the company completed the spinoff of its merchant generation unit, Constellation. We think Exelon's narrow moat is strengthened by the divestiture as the company is now fully regulated, and has divested its merchant generation and retail businesses that had experienced earnings volatility due to fluctuating commodity prices. Our stable moat trend rating remains unchanged.

We expect 7% average annual earnings growth through 2025 for the stand-alone Exelon, in line with management's 6% to 8% guidance, supported by the company's plan to invest $29 billion over this time period. Exelon's dividend policy is to pay out 60% of earnings, which we view as appropriate given the company's sound balance sheet and low revenue cyclicality. The company's planned $1.35 per-share payout currently yields 3.3%, in line with the median utility yield as of early February.

Exelon will now house rate-regulated gas and electric utilities across the Midwest and Northeast. Regulatory relationships have at times been strained across its Northeast utilities, resulting in lower allowed returns than its peer group. Alternative recovery mechanisms help reduce regulatory risk for growth investment across the regions.

Regulatory relationships at the company's most important subsidiary, Comed, will likely remain strained given its

lobbying practices tied to previously passed utility legislation. However, recently passed legislation should provide opportunities for higher returns and the potential to earn performance incentives after 2023, when the legislation takes effect.

New York Regulatory Approval Moves Exelon Closer to Merchant Separation 17 Dec 2021

We are maintaining our $48 per share fair value estimate for Exelon after the company received New York regulators' approval for the company's plan to separate into two companies. Our narrow moat and stable moat trend ratings remain unchanged.

The New York State Public Service Commission approved the settlement agreement that Exelon earlier reached with the State Attorney General's Office, commission staff, and other interested parties. The approval will allow the company to transfer its state nuclear facilities to Constellation, the name of the new merchant generation company. We considered New York regulatory approval the most challenging to receive. Management is to be commended for its ability to work with regulators to receive approval. Entergy abandoned its nuclear separation after failing to receive New York regulatory approval in 2010. FERC and the Nuclear Regulatory Commission recently approved the separation.

The only remaining approvals are the final sign off from Exelon's board of directors and Form 10 registration with the SEC. New York regulatory approval puts the company on track to complete the separation in the first quarter of 2022.

We continue to believe the separation is a positive for shareholders. Constellation will consist of approximately 31 gigawatts of merchant generation and its retail unit. The unit's nuclear fleet produces nearly 12% of clean energy in the U.S. and has benefited recently from higher power prices and additional subsidies in Illinois.

Legacy Exelon will house the company's seven regulated utilities in the Midwest and Northeast. The unit's $27 billion capital investment plan supports 7.5% annual rate base growth and should support 6% to 8% earnings growth. Management must continue to work with regulators to earn timely and fair returns on its investments. The conversion to a fully regulated utility strengthens Exelon's narrow moat and could lead us to lower our cost of capital assumption.

Exelon Edging Closer to Spinning Off Merchant Unit; Reports Q3 Earnings 03 Nov 2021

We are increasing our fair value estimate to $48 per share from $45 after Exelon announced third-quarter adjusted earnings per share of $1.09 compared with $1.04 in the same year-ago period. Management narrowed their full-year EPS guidance to $2.70-$2.90 from their previous $2.60-$3.00 range. Our fair value estimate increase is due to an increase in Morningstar's midcycle natural gas price to $3.30 per thousand cubic feet from $2.80, which boosted the nuclear fleet's midcycle margins. Our narrow moat and stable moat trend ratings are unchanged.

Recently management secured $700 million in subsidies from Illinois legislation that will keep the company's Dresden and Byron nuclear plants operating. We assume that subsidies for the plants will continue beyond 2025 given the role nuclear must play as Illinois pursues its aggressive clean energy goal. Management has successfully lobbied for subsidies across its merchant nuclear fleet. Policymakers view of nuclear generation is beginning to align with our view that nuclear' s clean energy attributes and reliable generation will be instrumental in meeting aggressive emission reduction goals.

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
50.02 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

Exelon continues to progress on the spin-off of its competitive merchant unit. The company has received FERC approval, and continues progress toward receiving approvals from New York regulators and the Nuclear Regulatory Commission. Exelon has named a management team for the new unit, to be named Constellation, which we view is a sign management is confident they can complete the spin-off. Management expects to complete the transaction in the first quarter of 2022.

In the quarter, rate increases and ongoing utility investments supported earnings. Lower capacity revenue, increased nuclear outage days, and unrealized and realized gains on equity investments had a negative impact on generation segment earnings. Trailing 12-month returns were 9.3%, down from 9.4% last quarter.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

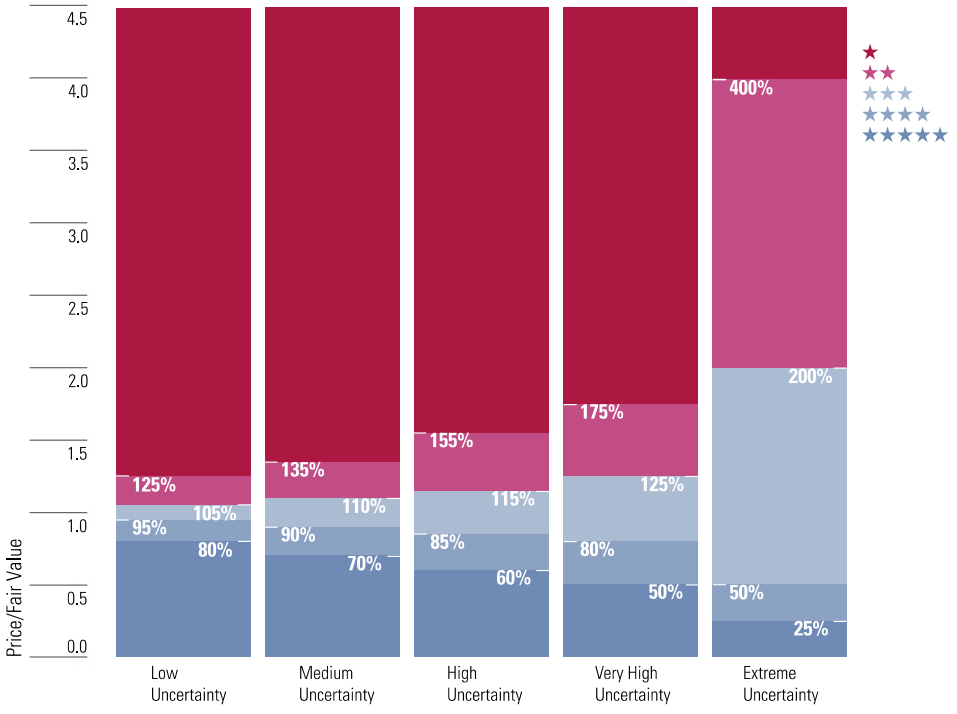
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Energy: Electric Utilities

Midweek Thoughts — SRE, NEP, NEE, POR, AVA, ED, AEP, EXC, CNP

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

SRE announces plans for Cameron Phase 2; NEP sells TX natural gas pipeline; NEE and DOJ enter agreement on eagle fatalities; parties reached a settlement in lawsuit relating to POR's trading losses; public comments highlight the challenges ahead for ED's proposed rate increases; members of KY legislature and KY AG oppose AEP's sale of Kentucky Power; spring storms cause outages in AVA and POR's service areas; EXC's PECO files a natural gas rate case in PA; CNP files a $1.6B DCRF in TX; and CNP signs up with Itron to install gas smart meters.

SRE — Building on LNG momentum with an HOA on Cameron LNG Phase 2:

- SRE signed an HOA with Mitsubishi, Mitsui, and Total (all partners in Cameron Phase 1) for development of Cameron LNG Phase 2. Phase 2 includes adding a 6.75 MTPA Train 4 to the existing Cameron Trains 1-3 (total capacity 12 MTPA), and increasing the capacity of the existing trains by 25% through debottlenecking. Terms of the HOA for Cameron Train 4 are similar to that of Phase 1 in that SIP will have 50.2% of the production capacity of Train 4 under tolling agreements and the remaining capacity will be allocated to the three partners. SIP will sell the LNG pertaining to its capacity under a long-term agreement before an FID is taken (similar to its position for Trains 1-3). SIP will own 25% of the projected debottlenecking capacity (debottlenecking expected to add 1 MTPA gross).
- Based on prior comments, an FID on Cameron expansion is expected in 2023 and the project is expected to take another four years after that to complete (3Q27 project completion target). SRE filed an amendment with the FERC earlier this year to add a single 6.75 MTPA train for the expansion project vs. the prior plan for two ~5 MTPA trains. The revised plan includes a plan to use electric drives (to reduce emissions) and tie-ins to allow for carbon sequestration.
- Our view — We see the announcement as a directionally positive one. SRE has long argued that the global LNG markets were headed into a tight supply-demand situation as Asian demand rises. The energy crisis in Europe, led by the war, has validated this thesis sooner than anticipated. However, we do not believe that there is much that can be done by SIP to accelerate bringing LNG to market given the usual lead times with approvals and construction. That said, SRE is strongly positioned to expand its LNG footprint over time with Cameron expansion and potentially bringing the 10 MTPA Port Arthur facility back in the mix.
- In other news, SRE announced a partnership with Korea Gas to explore opportunities to transition toward lower carbon and zero carbon fuels through project developments in LNG, CCS and hydrogen infrastructure.

NEP — NEP announces sale of gas pipeline, reiterates guidance: NEP announced that it has completed the sale of a TX pipeline. Monument Pipeline is a 156-mile pipeline with a capacity to transport 250 mmcf/d. NEP received $203M from the transaction. Proceeds will be redeployed to higher yielding renewable assets. NEP still has an interest in three other pipelines in TX and one in PA. NEP also took the opportunity to reiterate guidance of a YE22 run-rate adjusted EBITDA of $1.775B-$1.975B and CAFD of $675M-$765M. NEP also reiterated its expectation pf 12-15% annual growth in limited distributions through 2024.

NEE — NEER sub and DOJ enter agreement on eagle fatalities at wind farms: NEER subsidiary ESI Energy was sentenced by the DOJ for violations of the Migratory Birth Treaty Act (MTPBA). ESI pled guilty to three misdemeanor counts of violating the MBTA on deaths of eagles from wind turbine blades where ESI did not have necessary permits. The sentence includes up to $35M in fines, restitution, and implementation of an Eagle Management Plan. The agreement pertains to NEER's wind facilities in WY or NM. In a statement NEE said that it disagrees with the government's underlying enforcement policy, but sought the most expedient solution to resolve the dispute.

POR — Parties reach a settlement in shareholder derivative suit relating to trading losses: The initial lawsuit was filed in November 2020, a month after POR announced the trading losses in its energy portfolio. As part of the settlement, POR will create a new subcommittee of the Risk Committee that will oversee Power Operations trading and Power Operations risk management. POR will also make changes to the Audit and Risk procedures to its Board Composition. As part of the settlement, POR will pay $750K for plaintiff's legal costs. The settlement helps to remove an overhang on the company.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

ED — Public comments highlight challenges ahead for proposed rate increases: NY PSC concluded public hearings in ED's gas and electric rate cases. Ratepayers, public advocates, and state politicians provided testimony during public comments. Comments included requests for debt forgiveness on unpaid balances and the impact from increased rates on ratepayers already feeling the impact from rising inflation and recovery from a COVID slowdown. NY still has a shut-off moratorium in place that is expected to end soon. As a reminder, ED is requesting a ~$1.2B electric rate increase and a gas rate increase of $0.5B, effective January 2023. In effect, ED is seeking an 11% increase in electric rates and an 18% increase in gas rates. Both requests are based on a 10% ROE and 50% equity layer (in comparison to an 8.8% ROE and 48% equity that is in its 2020 three-year rate plan). ED plans to explore options for a multiyear rate plan in settlement discussions.

AEP — Members of KY legislature and KY AG oppose AEP's sale of Kentucky Power: AEP announced in October that it was selling its KY sub to Liberty, a subsidiary of Algonquin Power. In the alternative, the group opposing the transaction are demanding that the utility refund a portion (90%) of the profits from the sale to ratepayers.

POR, AVA — Spring storm causes power outages: High winds and mountain snow in parts of the Pacific Northwest on Monday led to POR and AVA both reporting that customers had lost power. As of Monday evening, ~10K POR customers had lost power in OR and ~5K AVA customers were without power in WA and OR. A winter storm warning was in effect until Tuesday morning.

EXC — PECO files gas rate case in PA: EXC's PECO sub is seeking an $82M rate increase on a 10.95% ROE, 53.41% equity, and a rate base of $2.9B. The rate increase intends to cover for gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at 10.24% ROE in mid-2021. A final decision is expected by the end of 2022 with new rate effective in January 2023.

CNP — CNP files DCRF application in TX, its first since the 2019-2020 GRC: CNP is seeking $1.6B in distribution capex over the three-year period from 2019-2021. The primary factors driving the investments include system improvement projects (including rehab of existing distribution infrastructure such as wires, poles and insulators), load growth projects (to serve the increasing demand from electrification and population growth in the Greater Houston area), and intelligent grid projects (including investments in remote switches and automated equipment to locate line outages and other issues in real time). The DCRF also includes cost recovery for deploying emergency mobile generation facilities as passed by the legislature (as part of the reforms post Uri).

CNP — CNP signs up with Itron to install smart meters: Through the agreement, Itron will provide 3M natural gas smart meters to CNP for installing through CNP's natural gas footprint across IN, LA, MN, MS, OH, and TX. The smart meters include a built-in automatic shutoff valve that can be configured to shut off automatically in the event of a high flow or high temperature incident to minimize an explosion risk.

Raising U.S. Electricity Demand Growth Outlook, Reaffirming Utilities Fair Value Estimates

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 27 Sep 2022

We are reaffirming our fair value estimates for U.S. utilities after raising our 10-year annual U.S. electricity demand growth forecast to 1.4%, up from 1.2% in our previous forecast two years ago. We also are reaffirming our economic moat and moat trend ratings for all U.S. utilities.

We believe the path to eliminate carbon emissions and meet environmental targets will lead to accelerating electricity demand growth and new infrastructure growth investment opportunities for utilities. We forecast 6%-8% annual earnings and dividend growth for most utilities through the decade to support electricity demand growth. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 8%-9% long-term annualized total returns even if valuations compress, as we think they will. We consider the sector 5% overvalued on a median basis as of Sept. 27.

Our new electricity demand forecast is more bullish than most. We think other forecasts underestimate the speed and scale of the U.S. clean energy transition. With many regions already facing strained electric grids, electricity demand growth presents opportunities and challenges for utilities as they manage the surge of electric vehicles, Big Data, building electrification, and other mandates.

We expect electricity demand from electric vehicles will grow faster than any other new source of electricity demand in our forecast, climbing 15-fold by 2032. Data centers, already sizable electricity

Sector Utilities

Industry Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

users, are the second-fastest-growing new source of electricity demand in our forecast. Building and industrial electrification represents upside to our forecast.

Energy efficiency gains will offset some of the core electricity demand growth that we forecast. We expect U.S. electricity intensity of the economy to fall 12% over our forecast period. Energy efficiency gains have held U.S. electricity demand mostly flat for the last decade.

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2025, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $29 billion of capital investment through 2025. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should gradually increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

▶ Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity

prices that have dragged down returns recently.

- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.
- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2025, the midpoint of management's 6% to 8% earnings guidance. We forecast $29 billion of capital expenditures through 2025 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing

37.46 USD 30 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	0.91	37.50 USD Bil 29 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Exelon Corp EXC ★★★★ 30 Sep 2022 21:22, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
37.46 USD 30 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	0.91	37.50 USD Bil 29 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

Exelon Reports Solid Second Quarter Results as it Plans to Issue Equity to Fund Capital Investment Plan Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon announced plans to issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.

Exelon Corp EXC ★★★★ 30 Sep 2022 21:22, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
37.46 USD 30 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	0.91	37.50 USD Bil 29 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.

Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.

In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates Andrew Bischof, CFA, CPA, Senior Equity Analyst, 15 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Andrew Bischof, CFA, CPA, Senior Equity Analyst, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected Andrew Bischof, CFA, CPA, Senior Equity Analyst, 6 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar

Exelon Corp EXC ★★★★ 30 Sep 2022 21:22, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
37.46 USD 30 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	0.91	37.50 USD Bil 29 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results

Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating is designed to capture the range of potential outcomes for a company's intrinsic value. This rating is used to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating is

Research Methodology for Valuing Companies

aimed at identifying the confidence we should have in assigning a fair value estimate for a given stock.

Our Uncertainty Rating is meant to take into account anything that can increase the potential dispersion of future outcomes for the intrinsic value of a company, and anything that can affect our ability to accurately predict these outcomes. The rating begins with a suggested rating produced by a quantitative process based on the trailing 12-month standard deviation of daily stock returns. An analyst overlay is then applied, with analysts using the suggested rating, historical rating data, and their own knowledge of the company to inform them as they make the final Uncertainty Rating decision. Ultimately, the rating decision rests with the analyst. Analysts take into account many characteristics when making their final decision, including cyclical factors, operational and financial factors such as leverage, company-specific events, ESG risks, and anything else that might increase the potential dispersion of future outcomes and our ability to estimate those outcomes.

Our recommended margin of safety—the discount to fair value demanded before we'd recommend buying or selling the stock—widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the potential dispersion of outcomes, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the Uncertainty Rating provides guidance in portfolio construction based on risk tolerance.

Our Uncertainty Ratings are: Low, Medium, High, Very High, and Extreme.

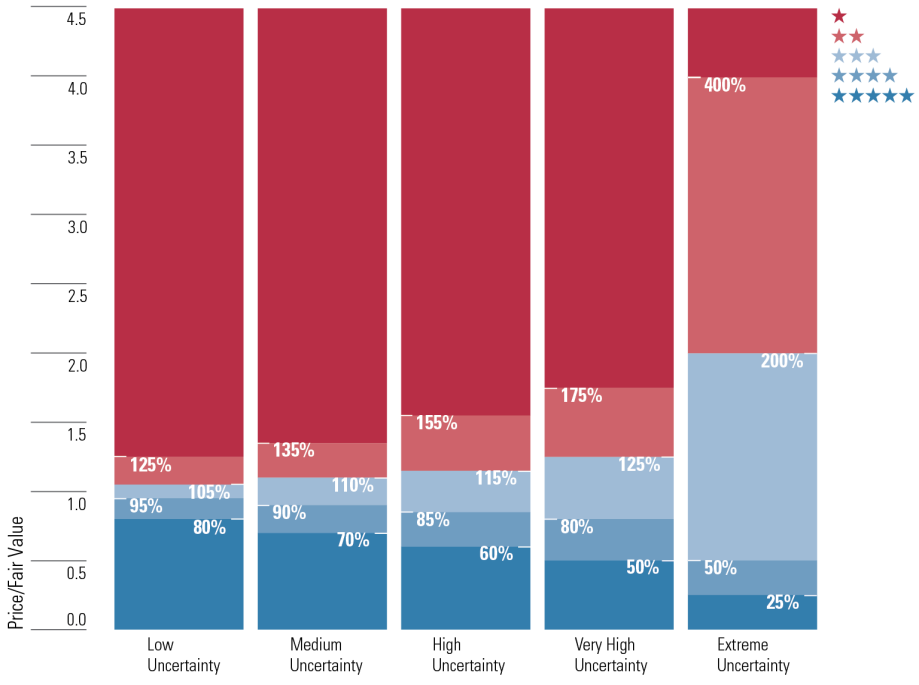
	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

Our uncertainty rating is based on the interquartile range, or the middle 50% of potential outcomes, covering the 25th percentile–75th percentile. This means that when a stock hits 5 stars, we expect there is a 75% chance that the intrinsic value of that stock lies above the current market price. Similarly, when a stock hits 1 star, we expect there is a 75% chance that the intrinsic value of that stock lies below the current market price.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

Morningstar Equity Research Star Rating Methodology



For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Research Methodology for Valuing Companies

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors. Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Power & Utilities September 28, 2022

The Guggenheim Daily Transmission: NEE, SO, Policy/MVP, AEE/EXC, ERCOT, OH/VST, Uranium

For details on our Guggenheim-hosted client Utility events including our EEI Conference meetings; and other events, scroll down…

NEE – New public comments being filed in FPL rate case against additional increases

SO – Southern Environmental Law Center (SELC) follows through with July announcement to sue Alabama Power over coal ash

NEE – FERC approves transmission rate consolidation for FPL & Gulf Power

Policy/MVP – Senator Manchin's Energy Independence Act removed from the budget extension package

AEE/EXC — ICC issues final orders in PBR dockets

ERCOT — Texas manufacturing survey points to growth, services weaken

OH/VST — Ohio governmental aggregator responds to Dynegy complaint at PUCO; seeks dismissal

Uranium — Nuclear energy likely excluded from EU's seventh Russian sanctions package

NEE – New public comments being filed in FPL rate case against additional increases

- New public comment is being filed in the FPL rate case docket in opposition of additional rate increases after interest rates triggered an ROE band adjustment.
- FPSC filed a notice of public hearing to take comments on the ROE band adjustment and implementation as dictated by the adopted FPL settlement in the FPL rate case.
- FPSC previously issued an order on the FPSC ROE band adjustment as stipulated in the FPL rate case settlement.
- The settlement allowed for an ROE adjustment with rising quantitative cost of capital factors, which reset the band 20bp higher.
- FPL's authorized ROE shall, after an elective filing by FPL, be increased by 20 basis points to be within a range of 9.8% to 11.8% with a mid-point of 10.8%.
- Docket: 20210015

Guggenheim takeaway: *FYI. The FPSC regulatory jurisdiction is now the first to account for the quantitative factors in cost of capital ratemaking. Simultaneously, utility bills have been a volatile subject in Florida between base rate increases and rising fuel costs.*

SO – Southern Environmental Law Center (SELC) follows through with July announcement to sue Alabama Power over coal ash

- "On July 20, 2022, Mobile Baykeeper, through its counsel Southern Environmental Law Center, released an advance notice of intent to sue Alabama Power for alleged violations of the Resource Conservation and Recovery Act (RCRA) and regulations governing CCR. Mobile Baykeeper claims that Alabama Power's plan to close the Plant Barry ash pond under the closure-in-place methodology violates regulations governing CCR and the RCRA. Under the RCRA, Mobile Baykeeper is **required to give Alabama Power advance notice of intent at least 60 days before filing suit**." – SO's 2Q22, 10-Q pg 137
- SELC's July announcement is HERE.
- Current media coverage HERE, and HERE.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

- Also, see Note 6 to the financial statements in Item 8 of SO's 2021 10-K for a discussion of Alabama Power's ARO liabilities related to facilities that are subject to the CCR Rule and the related state rule.

Guggenheim takeaway:*Well telegraphed and anticipated by the company (see 10-Q/K filings above for more). Ultimately, SELC wants to make Alabama Power abandon what it refers to as "an illegal plan" to purportedly leave more than 21m tons of coal ash in an unlined pit at Plant Barry, located north of Mobile along the Mobile River.*

NEE – FERC approves transmission rate consolidation for FPL & Gulf Power

- FERC approved consolidation of the FPL and Gulf transmission tariff but set a hearing for further inputs on reasonableness.
- The consolidation request came after Gulf Power's merger with FPL, and Gulf Power's tariff will be canceled.
- The consolidation also raised questions of additional facts to determine if the formula rates are just and reasonable.
- Docket: ER22-1836, ER22-1837 via FERC search.

Guggenheim takeaway: *FYI. Procedural items at FERC for consolidation of formula rates.*

Policy – Senator Manchin's Energy Independence Act removed from the budget extension package

- Senator Manchin's proposed Energy Independence Act is now taken out of the budget extension.
- Manchin removed the permitting reform elements due to lack of support from across the aisle and a desire to keep the budget portion running smoothly.
- The Act includes language on FERC jurisdiction over hydrogen pipeline regulation.
- Energy Independence and Security Act of 2022 text can be found here.

Guggenheim takeaway:*FYI. As previously disclosed, Senator Manchin is looking at a comprehensive energy infrastructure reform but that vote will be delayed until a later date when parties can find consensus. Any improvements with hydrogen process/regulation could be a strong read to many of our utilities, including CEG, NEE etc. Regarding energy projects, for now it's really MVP with modest benefits for NEE (31% ownership, 1-2% of market cap at current $6.6B cost estimate) and ED (~10% ownership, similarly 1-2% of market cap) within our coverage.*

AEE/EXC – ICC issues final orders in PBR dockets

- The ICC issued final orders in AEE and EXC's PBR dockets, calling for 24 and 32bps, respectively.
- "Based on the proposed metrics offered by ComEd and other parties in this proceeding, the Commission adopts ComEd's and Staff's proposal on exceptions to approve a total of 32 basis points. However, the Commission disagrees with ComEd's and Staff's proposed overall points allocation and allocates basis points as discussed in Section IV.B of this Order." - ICC
- "The Commission approves Ameren's proposed 24 BPs, but assigns the basis points to each of the approved metrics as discussed below. The Commission agrees with Staff and Intervenors that in this first Multi-Year Rate Plan it is best to start with a lower total; as we enter this new ratemaking structure, the outcomes are unclear." – ICC
- "As an initial matter, the Commission agrees that there is no evidence in the record to suggest that the incentive structure that is appropriate for Ameren would be equally appropriate for ComEd. The fact that a different total number of basis points is being adopted in the Ameren proceeding is immaterial to the appropriate amount of basis points that should be awarded in this proceeding." - ICC
- EXC HERE.
- AEE HERE.

Guggenheim takeaway: *Good to get closure on the process, with the final landing points not a major surprise in light of the preceding positions in the case history (e.g., Staff) this summer. The finalization of the performance metrics is a key part of the implementation of multiyear rate plans, which we expect both utilities to file next year.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

ERCOT – Texas manufacturing survey points to growth, services weaken

- The two gauges painted a mixed picture of activity in the state as both sectors remained in growth mode, partially dampened by negative perceptions of business conditions.
- "Growth in Texas factory activity picked up in September, according to business executives responding to the Texas Manufacturing Outlook Survey. The production index, a key measure of state manufacturing conditions, rose eight points to 9.3, a reading suggestive of stronger output growth." – Fed HERE
- "Activity in the Texas service sector increased at a slower pace in September, according to business executives responding to the Texas Service Sector Outlook Survey. The revenue index, a key measure of state service sector conditions, weakened from 7.2 in August to 5.9 in September, although the share of firms reporting increasing revenues remained steady at 30 percent." Fed HERE

Guggenheim takeaway: *Economic growth continues in Texas despite the increasingly volatile macro backdrop, with economic activity a multiplier for both total load in the ISO, and ongoing capital investment needs at the T&D level.*

OH/VST – Ohio governmental aggregator responds to Dynegy complaint at PUCO; seeks dismissal

- NOPEC spends most of 13 pages denying the complaint paragraph-by-paragraph with boilerplate language, alongside a separate lengthy motion to dismiss.
- "Throughout its Complaint, Dynegy makes speculative (and some would say cataclysmic) claims of the effect the return of NOPEC's customers will have on the future competitive electric market in Ohio. Like much of its Complaint, Dynegy's claims are over-stated and simply wrong. If there is any merit to Dynegy's claims, then ample processes are available for Dynegy to seek an amendment to the SSO agreements that bind it to serve SSO customers, or to seek reform to the electric distribution utility competitive bid process design. Dynegy cannot solve its business problems on the backs of Ohio consumers." - NOPEC
- More HERE.

Guggenheim takeaway: *Flagged for your awareness as this will likely remain noisy in the press and at PUCO. For more context, see our notes HERE, HERE.*

Uranium – Nuclear energy likely excluded from EU's seventh Russian sanctions package

- The industry will remain outside of the current sanctions regime according to EU diplomats, following pushback from several member states who rely upon Russian technology and raw materials.
- More HERE.

Guggenheim takeaway: *Not a surprise to us, but the prospects for further sanctions remain a possibility – as a reminder, we did a deep dive on the uranium supply chain last spring – see HERE.*

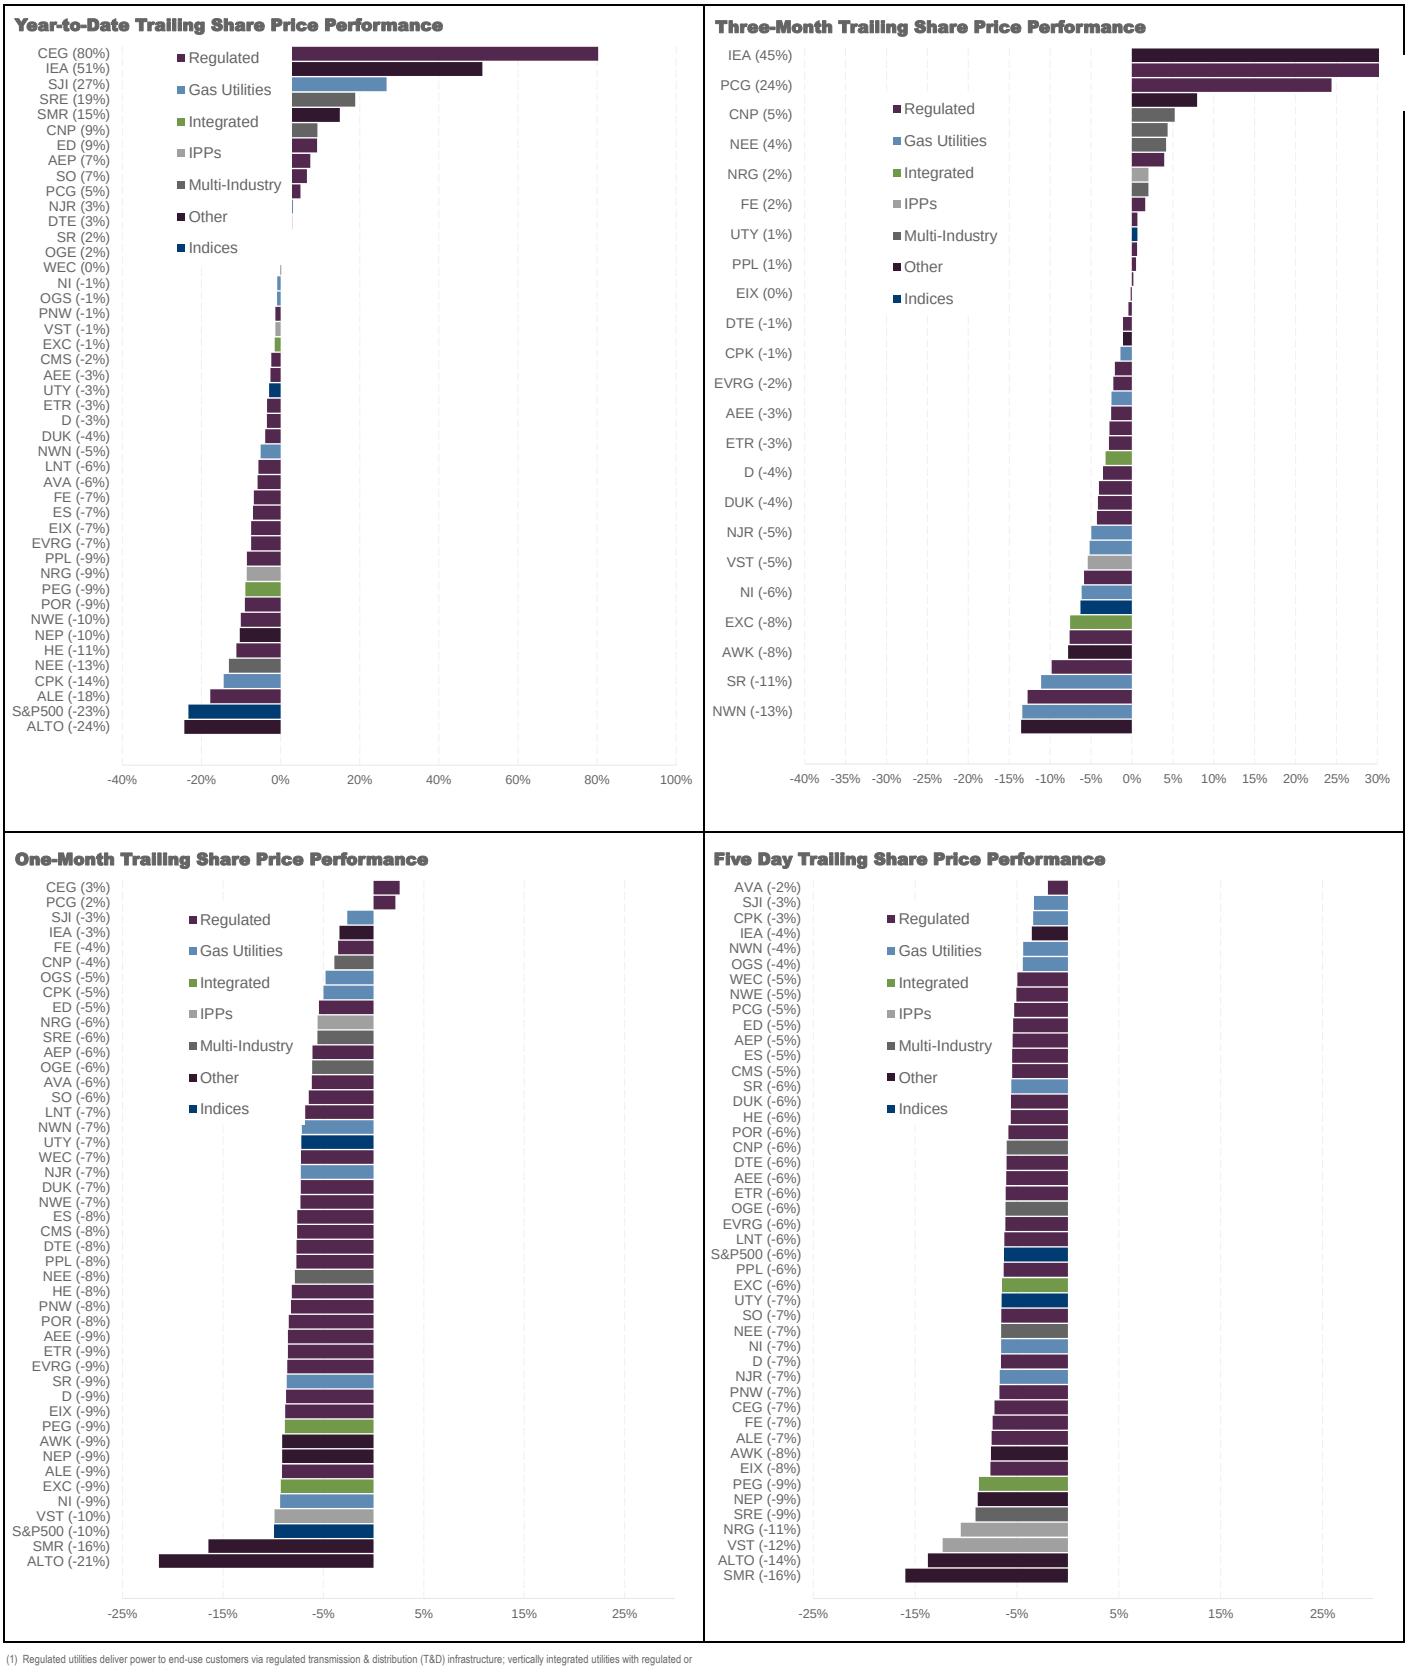
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Ameren Corporation, Exelon Corporation, NextEra Energy, Inc., Southern Company and Vistra Energy Corp. in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Raising U.S. Electricity Demand Growth Outlook, Reaffirming Utilities Fair Value Estimates

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 27 Sep 2022

We are reaffirming our fair value estimates for U.S. utilities after raising our 10-year annual U.S. electricity demand growth forecast to 1.4%, up from 1.2% in our previous forecast two years ago. We also are reaffirming our economic moat and moat trend ratings for all U.S. utilities.

We believe the path to eliminate carbon emissions and meet environmental targets will lead to accelerating electricity demand growth and new infrastructure growth investment opportunities for utilities. We forecast 6%-8% annual earnings and dividend growth for most utilities through the decade to support electricity demand growth. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 8%-9% long-term annualized total returns even if valuations compress, as we think they will. We consider the sector 5% overvalued on a median basis as of Sept. 27.

Our new electricity demand forecast is more bullish than most. We think other forecasts underestimate the speed and scale of the U.S. clean energy transition. With many regions already facing strained electric grids, electricity demand growth presents opportunities and challenges for utilities as they manage the surge of electric vehicles, Big Data, building electrification, and other mandates.

We expect electricity demand from electric vehicles will grow faster than any other new source of electricity demand in our forecast, climbing 15-fold by 2032. Data centers, already sizable electricity users, are the second-fastest-growing new source of electricity demand in our forecast. Building and industrial electrification represents upside to our forecast.

Sector
Utilities

Industry
Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

Energy efficiency gains will offset some of the core electricity demand growth that we forecast. We expect U.S. electricity intensity of the economy to fall 12% over our forecast period. Energy efficiency gains have held U.S. electricity demand mostly flat for the last decade.

For more details on our electricity demand forecast, see our Utilities Observer, "Electrifying the U.S.: Utilities Control the Path to Decarbonization."

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

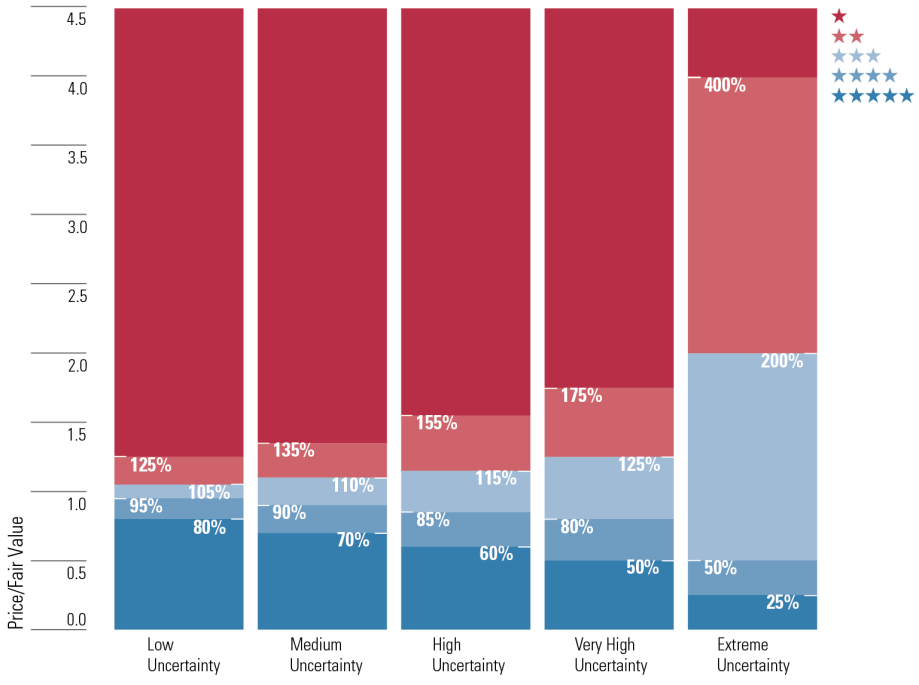
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thor ough and ongoing analysis, raise or lower their fair value estimates as warranted.

Morningstar Equity Research Star Rating Methodology



Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: AGR, EXC, SO, D, NEE, ETR, Energy Permitting Bill

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Join us at the EEI conference in FL from November 13-15 (schedule included). ICYMI, we attended the RE+ Power Conference in CA and AGR's analyst day in NY—our comments are included below. This week, we are tracking proceedings in AGR's NYSEG and RGE's rate cases, EXC's MD electric rate case, SO's GP rate case, and D's response to the reconsideration of the CVOW project approval. In other news, Senator Manchin introduced the text of the energy permitting bill, D's DESC filed an update to the IRP proposing a delay in retiring a coal unit, NEE's FPL quantifies customer savings from IRA, AGR's CT utility UIL filed a GRC, ETR and SO's MS subs are opposing the NEM rules approved by the state, and ETR LA received approval to add solar capacity in the state.

KBCM Invites You to Join Us at the EEI Financial Conference from November 13-15 in Hollywood, FL.
Scroll down for our full schedule, including dinners with **PEG** and **NWE**.

ICYMI

RE+ Power Conference — We attended the SPI/RE+ Power Conference in CA: See our key takeaways from our meetings at the event here.

AGR — AGR hosted an in-depth analyst day in NYC last Thursday: The event allowed for a formal introduction to the new management team, but in our opinion, it was not enough to warrant a refresh of our thesis. See our report for takeaways from the event.

Regulatory Calendar

AGR — Staff and Intervenor testimony in NYSEG's and RGE's electric and natural gas rate cases is due on September 26: AGR filed one-year electric and gas rate cases for both NYSEG and RGE. AGR seeks a cumulative $430M rate increase based on a 10.2% ROE and 50% equity layer vs. its last rate filing, which settled at an 8.8% ROE and 48% equity. AGR requests new rates to be effective May 1, 2023, just as its prior three-year rate case ends. We expect the Company to support a settlement process to achieve a multiyear settlement (as was the case in AGR's last NY rate cases that reached a three-year settlement). AGR is requesting approval for a multiyear capital plan of $8.6B ($7.7B for the electric utility) with a focus on increased reliability, storm response, and spending related to the implementation of NY's Climate Law, which mandates 70% renewable generation by 2030, and the residual rate pressure deferred from the last rate case. The filing includes a proposed symmetrical inflation tracker.

EXC — Evidentiary hearings in Delmarva's MD multiyear electric rate case set to begin September 27: Staff (Docket No. 9681) filed testimony for a cumulative rate increase of $23.7M for the three years from 2023-2025. The increase is premised on a 9.55% ROE and 50.50% equity layer. The Staff does not agree with the offsets in RY1 and RY2, which would result in higher revenue increases in the future. This compares to EXC's request for a cumulative rate increase of $37.5M for the three years 2023-2025, based on a 10.25% ROE and 50.5% equity layer. DP&L is requesting a $22.7M increase in 2023, followed by $7.9M and $6.8M in 2024 and 2025, respectively. The lower ROE and lower capital spending for reliability projects proposed by staff vs. EXC are driving the delta. After accelerating the refund of certain regulatory liabilities, the net increase in rates will be $11.4M in 2023, $11.6M in 2024, and $14.5M in 2025 as proposed by Delmarva. This is Delmarva's first multiyear plan filing in MD after the PSC adopted rules in 2020 allowing multiyear rate plans. The following regulatory item in the case is the rebuttal testimony due on September 19. A PSC decision is expected before the end of the year, with new rates effective January 1, 2023.

SO — Hearings in GP's electric GRC begin on September 27: In June, GP filed a rate case requesting a $1B revenue increase spread over three years—$852M in 2023, followed by $107M in 2024 and $45M in 2025. The request is based on an 11% ROE and 56% equity. Other items in the filing include a continuation of the Alternate Rate Plan that has been in place since 1995. Base rates exclude any cost recovery for Vogtle Units 3 and 4, which will be added later following a prudence review once the units reach COD. GP received a constructive outcome in the previous rate case, receiving ~97% of the cumulative ask ($909M vs. $942M), based on a 10.5% ROE and 56% equity. GP is seeking a continuation of earnings to be evaluated against a dead band of 9.5-12%, with 80% of the earnings above the 12% ROE being shared with ratepayers and the remaining 20% retained by the utility. GP is also seeking to continue the option to file for interim cost recovery if earnings fall below the low end of the dead band. Staff and intervenor testimony are expected to be filed by October 20, and a GA PSC decision is expected by December 20.

D — Company response to VEPCO's filing for limited reconsideration of the CVOW project approval is due on September 29:

- D requested the SCC for a reconsideration of the performance guarantee clause that requires D to meet a 42% net capacity factor on a three-year rolling average basis throughout the life of the project in favor of a more reasonable and flexible standard. See our note here, discussing the SCC's performance guarantee clause and D's position. D posits that the SCC lacks the authority to impose a performance guarantee of this nature and is unreasonably broad in scope, leaving D to manage factors that may be outside its control. In the filing, D says it may have to terminate all development and construction activities relating to the project if the condition is allowed to stand.
- We read through the responses submitted by various parties to D's request for a limited reconsideration. Sierra Club and Appalachian Voices objected to VEPCO's filing for limited reconsideration and support the inclusion of a performance guarantee as part of the Commission's final order in the docket as long as the requirement does not render CVOW uneconomical and also claim that the Commission is well within its authority to set performance guarantees. Other interveners held a similar view that the Commission should condition its approval on any costs or performance guarantees that may be appropriate to protect customers from financial risk. The office of the AG also opposes D's application for limited consideration.

Recent Developments for Companies Under Our Coverage

From our midweek: AGR is hosting an analyst and investor event in NYC tomorrow. This week we discuss transmission planning and pending reforms in detail, including the FERC's transmission planning NOPR, a proposed permitting roadmap from the Senate, DOE's blueprint to ease the interconnection backlog, and progress that has already been made in solving the issue of transmission planning and interconnects. In other news, BE and XEL announce plans to install an electrolyzer pilot at the Prairie Island nuclear plant; the City of San Diego explores municipalizing SDG&E, again; SRE is discussing the potential for blue hydrogen exports to Asia; AGR announces consolidation of renewables businesses under one head; the SPP is drafting scenarios for renewables deployment as part of its long-term transmission planning process; MN governor releases a climate plan aimed to reach 100% carbon-free power by 2040; DUK enters a multi-party settlement in the OH electric rate case; expert hearings continue in DUK's NC Carbon Plan; and ALJ issued a PD in DTE's pending electric rate case.

The Energy Independence and Security Act of 2022 — Senator Manchin's permitting guidelines were released last week: As we had written in our **midweek**, from the perspective of the power industry, the bill aims to do the following:

- Enhance federal permitting authority for interstate electric transmission facilities that have been determined by the Secretary of Energy and recommended by FERC to be in the national interest. The bill defines the various criteria the project must satisfy (serving an area with energy constraints, being in the interest of national energy policy, improving the ability of intermittent resources to connect to the grid, etc.). Once a project is deemed to be in the national interest, FERC would be able to issue a construction permit and allocate costs of the project to its customers and approve payments from utilities to jurisdictions impacted by the project.
- The bill sets timelines for permitting review, including a maximum of two years for NEPA reviews for major projects and one year for others.

The bill also asks that FERC be put in charge of interstate hydrogen infrastructure in that FERC would permit them and set rates. It is unclear what the path of the bill in Congress will look like. There is opposition on both sides—from the Democrats regarding the carve-out for MVP and from the Republicans regarding the FERC oversight of transmission planning. There is another strange provision in the bill: it asks that the president will designate at least 25 projects as those being of national importance, and in the first seven years, at least four of the projects will be for mining of critical minerals, six for clean energy generation or energy storage projects, five for fossil fuel-related projects, two for electric transmission, two for CCUS, and one for clean hydrogen. The makeup of the presidential projects changes after the first seven years. Even though permitting and cost allocation are the two primary barriers to the development of transmission infrastructure, it is unclear if extensive federal oversight as proposed in the bill will placate several state administrations who are already opposing the provisions.

Sophie Karp (917) 368-2361 / sophie.karp@key.com

D — DESC filed an annual update to the 2020 IRP and is proposing to delay the retirement of a coal unit by two years to 2030: SC IRP statute requires utilities to file a full IRP every third year with interim annual updates. DESC is currently working off the 2020 IRP and will file the next IRP in January 2023. In the second annual update, DESC is proposing that it delay the retirement of the 610 MW Williams coal plant by two years to 2030 as a means to preserve reliability. DESC said that its updated resource optimization modeling suggests that 2030 is the earliest feasible retirement date for Williams. DESC still plans to retire the 684 MW Wateree coal plant in 2028. As indicated in the 2021 IRP updates, DESC will seek a 20-year license renewal for the ~1 GW VC Summer nuclear plant. If the NRC approves the renewal, it will keep the plant online until 2062. The current license expires in 2042. The plant went into service in 1984.

NEE — FPL quantifies customer savings from IRA: NEE's FL utility announced that it will refund ~$400M to ratepayers over time as it receives the benefits from the recently enacted IRA and the solar PTCs contained therein. FPL is planning a one-time $25M refund in January 2023 and will phase in $360M through 2025. While limited in the near term, the refund should help to alleviate customer bill pressure caused by elevated fuel costs in 2023.

AGR — AGR's CT utility United Illuminating filed a multiyear rate case: In line with expected timing, UIL filed with the PURA proposing a three-year electric distribution rate plan for the period from September 2023 through August 2026. UIL is seeking a $102M rate increase in RY1, $17M in RY2, and another $17M in RY3. In line with its other recent rate filings such as those in NY, AGR is seeking a symmetric inflation tracker, which would adjust the ROE annually to reflect market conditions and avoid regulatory lag in the current inflationary backdrop. The filing also includes a rate levelization proposal where the proposed increase in RY1 would be spread over the three years of the rate plan such that the annual rate increase would be $54M. AGR's filing is premised on a 10.2% ROE and 52% equity. This is UIL's first filing since 2019 and the utility aims to invest ~$600M over the three-year period—mostly on grid reliability and grid modernization.

ETR, SO — MS utilities oppose NEM rules approved by the PSC: The MS PSC approved new rules in July on self-generation that are similar to net metering rules adopted in other states. The state is referring to them as Net Renewable Generation Rules since the compensation to customers is set at less than the full retail rate. The updated PSC order expands reimbursements for low-income customers, creates a rebate for residential and small business owners, and incentives for schools to install rooftop solar. ETR and SO's MS subsidiaries both filed for a stay and the PSC has granted a new hearing on September 27. ETR and SO have argued that the Commission include a customer charge for residential customers in the next annual FRP to mitigate the cost shifting caused by increased participation in net metering. Utilities in MS and elsewhere have long argued that expanding self-generation adds costs to non-participating customers (see the prolonged NEM reform proceedings in CA as a prime example). We expect parties to attempt a settlement prior to the hearings to avoid lengthy litigation that could stall solar expansion in the state.

ETR — ETR LA receives approval from the PSC to add 475 MW of solar capacity: The commission also approved a green tariff, which will provide customers the chance to subscribe and benefit from renewable resources. ETR will add the 475 MW from four solar facilities in the state that will come online in 2024 and 2025. ETR will sign 20-year PPAs for 325 MW of the capacity (three facilities) and own one 150 MW facility under a BOT agreement. DESRI is building two of the facilities that will be under the PPA. Once complete, this will nearly triple ETR's solar capacity in LA.

Sophie Karp (917) 368-2361 / sophie.karp@key.com

KBCM EEI Schedule Tentative Agenda (All Times Eastern):

Sunday, November 13, 2022

12:00 PM — Eversource Energy (ES)
1:00 PM — CenterPoint Energy, Inc (CNP)
2:00 PM — Xcel Energy Inc. (XEL)
3:00 PM — Sempra Energy (SRE)
4:00 PM — WEC Energy Group, Inc. (WEC)
5:00 PM — Atlantica Sustainable Infrastructure plc (AY)
*Dinner — Dinner with Public Service Enterprise Group Incorporated (PEG)**

Monday, November 14, 2022

8:00 AM — Duke Energy Corporation (DUK)
8:45 AM — Avangrid, Inc. (AGR)**
9:00 AM — Pinnacle West Capital Corporation (PNW)
10:00 AM — Exelon Corporation (EXC)
11:00 AM — Edison International (EIX)
12:00PM — DTE Energy Company (DTE)
1:00 PM — NorthWestern Corp (NWE)
2:00 PM — American Electric Power Company, Inc. (AEP)
3:00 PM — Portland General Electric Company (POR)
4:00 PM — FirstEnergy Corp. (FE)
*Dinner — Dinner with NorthWestern Corp (NWE)**

Tuesday, November 15, 2022

7:00 AM — Entergy Corporation (ETR)
7:00 AM — Southern Company (SO)
8:00 AM — Ameren Corporation (AEE)
9:00 AM — CMS Energy Corporation (CMS)
10:00 AM — Consolidated Edison, Inc. (ED)
11:00 AM — Avista Corporation (AVA)
11:00 AM — Otter Tail Corporation (OTTR)

**Dinner event.*
***30-minute meeting.*

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth

Analyst Note Andrew Bischof, CFA, CPA, Senior Equity Analyst, 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

Sector Utilities

Industry Utilities - Regulated Electric

Business Description

Exelon serves approximately 10 million power and gas customers at its six regulated utilities in Illinois, Pennsylvania, Maryland, New Jersey, Delaware, and Washington, D.C.

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

Business Strategy & Outlook Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

After spinning off its merchant generation and retail energy segment, Constellation Energy, through a distribution to Exelon shareholders, the new Exelon is now a pure-play electric and gas transmission and distribution utility providing investors a more stable earnings profile. We viewed the separation positively for shareholders. A standalone regulated utility strengthens Exelon's narrow moat and lowers the company's cost of capital.

Exelon's regulated utilities support our outlook for 7% earnings growth through 2025, the midpoint of the company's 6%-8% earnings growth guidance. We estimate the company will spend $29 billion of capital investment through 2025. This investment plan supports our earnings forecast and dividend growth in line with earnings growth.

Exelon operates a diverse set of regulated utilities, including five utilities in the Northeast and the largest investor-owned utility in Illinois. Regulatory relationships have at times been strained across its Northeast utilities, resulting in low allowed returns. Alternative recovery mechanisms help reduce regulatory lag and risk across the regions for Exelon's growth capital. Low earned returns below allowed regulated returns should gradually increase to within management's 9% to 10% goal.

Relationships at the company's most important subsidiary, ComEd, will likely remain strained given inappropriate lobbying practices tied to the passage of previous utility legislation. Exelon entered into a deferred prosecution agreement with federal prosecutors.

Recent Illinois legislation will bring significant changes to the state's regulatory framework. Current performance base-rate making, which ties allowed returns to the average 30-year Treasury rate, have produced some of the lowest returns among U.S. utilities. After 2023, Illinois utilities may opt in for a four-year rate plan beginning in 2024. Under the multiyear plan, ComEd would be allowed to "true-up" earned returns to allowed returns and continue usage-decoupled rates. Regulators could issue incentives and penalties based on performance. We think the legislation will likely lead to higher returns for the subsidiary.

Bulls Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

- Exelon's divestiture of its merchant generation eliminates its earnings sensitivity to cyclical commodity prices that have dragged down returns recently.
- Exelon has good regulated growth investment opportunities that should support earnings and dividend growth.
- Nearly all of the company's growth capital is recovered through constructive regulatory mechanisms that reduce regulatory lag.

Bears Say Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

- Exelon's large investment plan increases regulatory risk.
- Some of the company's regulated utilities operate in the Northeast, where regulators have a history of being less constructive relative to other jurisdictions.

- A federal lobbying scandal hurt Exelon's reputation with policymakers in Illinois, which could cause adverse outcomes in future rate proceedings.

Economic Moat Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Considering Exelon's full suite of regulated businesses, we think the firm has a narrow economic moat.

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Exelon. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to outearn their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed the costs of capital in most cases, leaving us comfortable assigning narrow moat ratings to many regulated utilities.

Fair Value and Profit Drivers Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Our fair value estimate is $41.

We expect 7% average earnings growth through 2025, the midpoint of management's 6% to 8% earnings guidance. We forecast $29 billion of capital expenditures through 2025 at the company's regulated operations, supporting rate-base growth slightly above our earnings growth outlook. We assume consistent regulatory treatment across Exelon's service territories.

In our discounted cash flow valuation, we use a 5.9% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand for a diversified equity portfolio, reflecting Exelon's lower sensitivity to the economic cycle and lower degree of operating leverage.

Risk and Uncertainty Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

Exelon's ability to earn regulatory approval for rate increases depends on maintaining constructive relations with regulators. If regulatory relations sour, regulators could cut the utility's allowed return, resulting in earnings and cash flow pressure.

Exelon Corp EXC ★★★ 22 Sep 2022 21:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.68 USD 22 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.82 USD Bil 21 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth. However, Exelon has done a solid job developing good regulatory relationships in the Northeast. New legislation in Illinois also helps mitigate some of Exelon's regulatory risk. We expect Exelon will be able to earn returns near its average allowed regulatory returns at its regulated utilities.

Exelon faces environmental, social, and governance risk, particularly with regard to corporate governance and business ethics. In 2020, Exelon reached a deferred prosecution agreement at its ComEd subsidiary helping to resolve a Justice Department investigation of its lobbying practices. ComEd admitted that it arranged jobs, vendor subcontracts, and monetary payments for various high-level elected state officials to influence and assist the subsidiary with state utility legislation. Additional oversight measures should help mitigate future risks. Exelon has less environmental risk than some of its fully integrated regulated utilities as it doesn't operate any fossil-fuel generation.

Capital Allocation Andrew Bischof, CFA, CPA, Senior Equity Analyst, 3 Aug 2022

We assign Exelon a Standard capital allocation rating. The rating reflects our assessment of Exelon's balance sheet strength, management's investment decisions, and plans to return capital to shareholders.

We think the company's 60% dividend payout policy is appropriate, given the high quality and relatively stable nature of its rate-regulated operations. We expect the balance sheet to remain sound and in line with regulatory requirements, supported by the company's low revenue cyclicality. We expect the company's investment strategy to focus on growing assets through regulated investments, which we think is a reasonable approach.

Exelon's systemwide average earned return on equity at its utilities remains below the company's peers. Falling interest rates, storms, and unfavorable weather have hurt returns recently. The company's lobbying practices in Illinois, which led to a deferred prosecution agreement with the Justice Department, have led to a difficult political and regulatory environment for Exelon's ComEd subsidiary.

CEO Chris Crane has prioritized growth investment at the regulated utilities. Crane's biggest move was the decision to separate the company's regulated utilities from its merchant generation and retail unit, Constellation Energy, in February 2022. We think Exelon's transition to a fully regulated utility is in shareholders' best interests.

Exelon Corp EXC ★★★ 22 Sep 2022 21:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.68 USD 22 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.82 USD Bil 21 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

We are reaffirming our $41 per share fair value estimate after Exelon announced second-quarter adjusted earnings per share of $0.44, up from $0.36 in the same year ago period. Comparable earnings were adjusted for the divestiture of the company's merchant generation business earlier this year. Management reaffirmed its full-year EPS guidance of $2.18 to $2.32 in 2022 and 6% to 8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings remain unchanged.

Exelon announced plans to issue up to $1 billion in equity through 2025 to help fund the company's $29 billion investment plan over this period. The equity was in line with our estimates over this period, though timing differed. Exelon aims to issue $500 million in equity this year, with the remaining completed over the remaining three years. With Exelon trading at an 11% premium to our fair value estimate as of early August, we expect the equity issuance to be slightly value accretive.

Exelon's returns on equity continued to be below its allowed returns and are among the lowest of its peers. The company's trailing 12-month earned returns on equity were 8.8%, down from 8.9% during the first quarter and below management's 9%-10% targeted range. Timing of equity infusions negatively affected returns, partially offset by increased earnings from investments.

Pending regulatory outcomes at PECO and DPL should boost earned returns. ComEd's returns are tied to 30-year Treasury rates, which should lead to higher returns next year at the subsidiary. We think new legislation supporting more traditional ratemaking starting in 2024 likely will lead to higher returns, which have been among the lowest in the sector given low Treasury rates.

In the quarter, earnings were supported by rate increases and the absence of merchant generation. Partially offsetting these benefits were higher depreciation and other expenses.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates Andrew Bischof, CFA, CPA, Senior Equity Analyst, 15 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.68 USD 22 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.82 USD Bil 21 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half of our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Andrew Bischof, CFA, CPA, Senior Equity Analyst, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net

revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected Andrew Bischof, CFA, CPA, Senior Equity Analyst, 6 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

Fully Regulated Exelon Highlights Earnings Power of Core Utilities; Reports First-Quarter Results Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 May 2022

We are reaffirming our $39 fair value estimate for Exelon after the company announced first-quarter adjusted earnings per share of $0.64 compared with $0.55 in the year-ago period. Management reaffirmed its guidance for full-year EPS of $2.18-$2.32 and 6%-8% earnings growth through 2025, in line with our expectations. Our narrow moat and stable moat trend ratings are unchanged.

Exelon Corp EXC ★★★ 22 Sep 2022 21:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
41.68 USD 22 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.82 USD Bil 21 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

Earlier this year, Exelon completed its transition to a fully regulated utility after spinning off its wholesale generation unit, Constellation Energy, into a separately traded public company. As a fully regulated utility, we see average earnings growth of 7% and $29 billion of capital investment through 2025. Alternative recovery mechanisms help reduce regulatory risk across Exelon's service territories for growth capital. Significant capital needs are designated to support electric vehicle adoption, system modernization, and customer growth.

The company's trailing 12-month earned returns on equity were low at 8.9%, down from 9.2% during the fourth quarter and below management's 9%-10% target range. ComEd should continue to benefit as rates tied to the 30-year U.S. Treasury yield will rise. New Illinois legislation also allows for traditional ratemaking. ComEd is preparing to file for new rates in 2023, effective in 2024. We think the company will chose traditional ratemaking, which should lead to higher allowed returns. The unit has also filed for proposed performance incentives, as the legislation allows.

Pending regulatory outcomes at PECO and DPL should also help management push its earned returns up into its target range by year-end.

In the quarter, earnings were supported by rate increases and ongoing utility investments. Partially offsetting these benefits were higher depreciation and storm costs.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices Andrew Bischof, CFA, CPA, Senior Equity Analyst, 9 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without

41.68 USD 22 Sep 2022	41.00 USD 11 May 2022 20:37, UTC	1.02	41.82 USD Bil 21 Sep 2022	Narrow	Stable	Low	Standard	7 Sep 2022 05:00, UTC

raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price

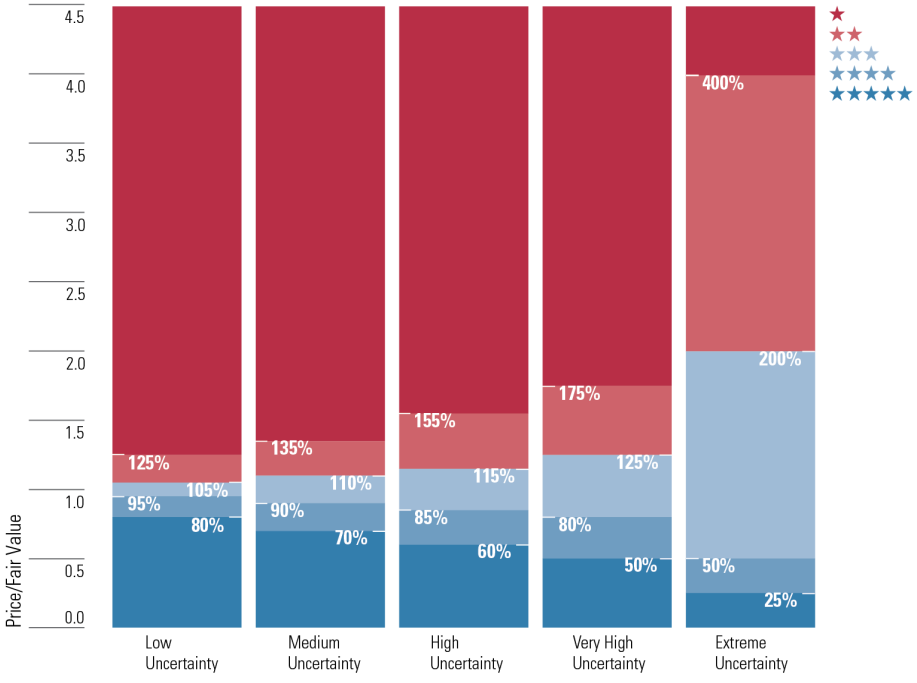
The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close

Morningstar Equity Research Star Rating Methodology



tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the suitability of such investments and recommendations in the light of their own investment objectives, experience, taxation status and financial position.

The information, data, analyses and opinions presented herein are not warranted to be accurate, correct, complete or timely. Unless otherwise provided in a separate agreement, neither Morningstar, Inc. or the Equity Research Group represents that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction the recipient is located.

Except as otherwise required by law or provided for in a separate agreement, the analyst, Morningstar, Inc. and the Equity Research Group and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions within the report. The Equity Research Group encourages recipients recipients of this report to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an in vestment decision and when deemed necessary, to seek the advice of a legal, tax, and/or accounting professional.

The Report and its contents are not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Morningstar, Inc. or its affiliates to any registration or licensing requirements in such jurisdiction.

Where this report is made available in a language other than English and in the case of inconsistencies between the English and translated versions of the report, the English version will control and supersede any ambiguities associated with any part or section of a report that has been issued in a foreign language. Neither the analyst, Morningstar, Inc., or the Equity Research Group guarantees the accuracy of the translations.

This report may be distributed in certain localities, countries and/or jurisdictions ("Territories") by independent third parties or independent intermediaries and/or distributors ("Distributors"). Such Distributors are not acting as agents or representatives of the analyst, Morningstar, Inc. or the Equity Research Group. In Territories where a Distributor distributes our report, the Distributor is solely responsible for complying with all applicable regulations, laws, rules, circulars, codes and guidelines established by local and/or regional regulatory bodies, including laws in connection with the distribution third-party research reports.

Conflicts of Interest

- No interests are held by the analyst with respect to the security subject of this investment research report.

Research Methodology for Valuing Companies

- Morningstar, Inc. may hold a long position in the security subject of this investment research report that exceeds 0.5% of the total issued share capital of the security. To determine if such is the case, please click http://msi.morningstar.com and http://mdi.morningstar.com.
- Analysts' compensation is derived from Morningstar, Inc.'s overall earnings and consists of salary, bonus and in some cases restricted stock.
- Neither Morningstar, Inc. or the Equity Research Group receives commissions for providing research nor do they charge companies to be rated.
- Neither Morningstar, Inc. or the Equity Research Group is a market maker or a liquidity provider of the security noted within this report.
- Neither Morningstar, Inc. or the Equity Research Group has been a lead manager or co-lead manager over the previous 12-months of any publicly disclosed offer of financial instruments of the issuer.
- Morningstar, Inc.'s investment management group does have arrangements with financial institutions to provide portfolio management/investment advice some of which an analyst may issue investment research reports on. However, analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them.
- Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a financial institution the security of which is the subject of this report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s proxy statement, "Security Ownership of Certain Beneficial Owners and Management" section https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx
- Morningstar, Inc. may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Further information on Morningstar, Inc.'s conflict of interest policies is available from https://shareholders.morningstar.com. Also, please note analysts are subject to the CFA Institute's Code of Ethics and Standards of Professional Conduct.

For a list of securities which the Equity Research Group currently covers and provides written analysis on please contact your local Morningstar office. In addition, for historical analysis of securities covered, including their fair value estimate, please contact your local office.

For Recipients in Australia: This Report has been issued and distributed in Australia by Morningstar Australasia Pty Ltd (ABN: 95 090 665 544; ASFL: 240892). Morningstar Australasia Pty Ltd is the provider of the general advice ('the Service') and takes responsibility for the production of this report. The Service is provided through the research of investment products.

To the extent the Report contains general advice it has been prepared without reference to an investor's objectives, financial situation or needs. Investors should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. Refer to our Financial Services Guide (FSG) for more information at http://www.morningstar.com.au/fsg.pdf.

For Recipients in Hong Kong: The Report is distributed by Morningstar Investment Management Asia Limited, which is regulated by the Hong Kong Securities and Futures Commission to provide services to professional investors only. Neither Morningstar Investment Management Asia Limited, nor its representatives, are acting or will be deemed to be acting as an investment professional to any recipients of this information unless expressly agreed to by Morningstar Investment Management Asia Limited. For enquiries regarding this research, please contact a Morningstar Investment Management Asia Limited Licensed Representative at https://shareholders.morningstar.com.

For recipients in India: This Investment Research is issued by Morningstar Investment Adviser India Private Limited. Morningstar Investment Adviser India Private Limited is registered with the Securities and Exchange Board of India (Registration number INA000001357) and provides investment advice and research. Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Investment Management LLC. In India, Morningstar Investment Adviser India Private Limited has one associate, Morningstar India Private Limited, which provides data related services, financial data analysis and software development. The Research Analyst has not served as an officer, director or employee of the fund company within the last 12 months, nor has it or its associates engaged in market making activity for the fund company.

*The Conflicts of Interest disclosure above also applies to relatives and associates of Manager Research Analysts in India # The Conflicts of Interest disclosure above also applies to associates of Manager Research Analysts in India. The terms and conditions on which Morningstar Investment Adviser India Private Limited offers Investment Research to clients, varies from client to client, and are detailed in the respective client agreement.

For recipients in Japan: The Report is distributed by Ibbotson Associates Japan, Inc., which is regulated by Financial Services Agency. For details on our Guggenheim-hosted client Utility events including: our OGS NDR; EEI Conference meetings; and other events, scroll down…

EXC – IL AG seeks larger refunds over ComEd criminality

PCG – PG&E files notice of settlement conference in the PG&E 2023 GRC

NEE – Notice of public hearing filed in FPL rate case

DUK – Hearings for DUK's NC Carbon Plan included testimony reiterating the company's case for merging its Carolinas and Progress utilities

DUK – Multiple headlines relating to EPA disclosures ranking DUK among the largest leakers of sulfur hexafluoride

PCG – PG&E Elkhorn energy storage facility fire caused by Tesla megapack module

VA/AEP/D – Advocates call for fuel clause cost sharing as increases roll through to bills

ERCOT – TRC posts gas weatherization requirements

ERCOT – ISO hosts first day of proposed Brazos settlement presentations

EXC – IL AG seeks larger refunds over ComEd criminality

- "Raoul, the city of Chicago and CUB argued that customers should receive larger refunds after ComEd financed a $200 million contribution from its parent company, Exelon Corporation, as an equity infusion to pay a criminal penalty from a July 2020 deferred prosecution agreement (DPA) ComEd entered into to resolve a federal criminal investigation. ComEd's accounting treatment is argued to have permanently increased ComEd's equity capitalization, resulting in the electric utility collecting $7 million more in revenues from its customers." – AG's office
- "According to briefs filed by Raoul's office, ComEd's accounting treatment of Exelon's $200 million contribution resulted in ComEd collecting $7 million more in revenues from its customers, which Raoul and the group recommended be refunded to customers. They also requested the equity infusion be removed in future rate proceedings to ensure customers do not pay higher rates as a result of how ComEd financed its DPA penalty payment." - release
- More HERE

Guggenheim takeaway: *Noise, especially as state transitions to a new rate format. That said, for your awareness and not a major surprise given the parties involved.*

PCG – PG&E files notice of settlement conference in the PG&E 2023 GRC

- PG&E filed a notice of settlement conference on September 28, 2022 in the GRC proceeding.
- PG&E previously filed updated testimony in the 2023 General Rate Case which incorporates updated cost escalation on O&M and capital, as well as tax law changes which impact revenue requirements.
- The updated testimony results in a 2023 base year revenue requirement increase of $835M (the bulk of the contribution from expense escalation, $641M).
- Escalation for 2024-2026 results in revenue requirement increases of $31M, $105M and $119M in the respective attrition years.
- Capital cost escalation also results in increased to rate base, with a 2023 base year step up to $50.9B (+$1.7B vs prior request) and up to $68B by 2026 (+$5.4B vs. prior request)

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

- Docket: A2106021

Guggenheim takeaway: *Despite PCG's continued efforts to balance spending with cost efficiencies, cost of service in the current inflationary environment continues to escalate. Intervenors have previously been focused on specific revenue reductions, including alternative insurance proposals, reduction in operating costs, reduction in capital programs including undergrounding, etc. Between the broader stakeholder support for undergoing, and legislative outcomes (**noted HERE**), there is a clear push to do more in CA, but we acknowledge the regulatory process bid-ask and intervenor scrutiny. Ultimately, we still see an upside to the base capex for PCG even among the bid-ask as system needs are not going away.* ***More on our thesis here. PCG still remains one of our TOP utility ideas for '22.***

NEE – Notice of public hearing filed in FPL rate case

- FPSC filed a notice of public hearing to take comments on the ROE band adjustment and implementation as dictated by the adopted FPL settlement in the FPL rate case.
- FPSC previously issued an order on the FPSC ROE band adjustment as stipulated in the FPL rate case settlement.
- The settlement allowed for an ROE adjustment with rising quantitative cost of capital factors which reset the band 20bp higher.
- FPL's authorized ROE shall, after an elective filing by FPL, be increased by 20 basis points to be within a range of 9.8% to 11.8% with a mid-point of 10.8%
- Docket: 20210015

Guggenheim takeaway: *FYI. The FPSC regulatory jurisdiction is now the first to account for the quantitative factors in cost of capital ratemaking.*

DUK – Hearings for DUK's NC Carbon Plan included testimony reiterating the company's case for merging its Carolinas and Progress utilities

- Yesterday, witnesses for DUK reiterated the company's stance on a potential merger of DEC and DEP, at the NCUC's Carbon Plan hearing.
- "The companies believe that a merger of DEP and DEC would be in the long-term best interest of customers, [and]… would provide additional benefits for customers and allow for a more efficient achievement of the (N.C. mandated) 2050 carbon neutrality target," including "balancing investments needed for a combined system …, helping to moderate rate impacts by spreading new investments over a larger customer base, development of single resource plan and joint unit commitment." – Nelson Peeler, Senior Vice President for Transmission and Fuels Policy
- A merger of the two utility subsidiaries would require regulatory approvals, including from the NCUC, SC PSC, and FERC.
- Docket No. E-100, Sub 179
- More HERE

Guggenheim takeaway: *Investors should recall that this messaging is consistent with the company's pre-filed testimony from Aug. 19th (link HERE), where DUK states its belief that a merger of DEC and DEP is in the long-term best interest of customers from an overall efficiency perspective, if it can be achieved equitably. Several hurdles would need to be resolved or at least need to have a path to resolution laid out before a merger could proceed. For example, the presumed increase to DEC bills in order to close the gap with DEP's higher rates post-merger would certainly be a focus for DEC ratepayers, and South Carolina's continued opposition to cost sharing agreements may end up necessitating the creation of* ***separate utilities*** *in that state.*

DUK – Multiple headlines relating to EPA disclosures ranking DUK among the largest leakers of sulfur hexafluoride

- Several articles were published in recent days pointing to DUK as a significant emitter of this gas, which per NBC News is purportedly "25,000 times more polluting than carbon dioxide".
- More HERE, and HERE

Guggenheim takeaway: *Flagging for your awareness, but noting that it represents a one-sided view at best. Additionally, the articles note that electric utilities in general (rather than DUK alone) make use of the gas, which serves as an insulator to prevent electrical equipment from arcing.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

PCG – PG&E Elkhorn energy storage facility fire caused by Tesla megapack module

- Tesla (TSLA) Megapack battery caught fire at the PG&E Elkhorn Battery Storage facility in Moss Landing
- The facility was disconnected from the grid as firefighters worked to contain the fire.
- PG&E said in the statement that its safety systems "worked as designed when the issue was detected".
- Media coverage here.

Guggenheim takeaway: *FYI. The incident highlights the risks with lithium ion storage systems and certainly a flag for utility investors who are very sensitive to fire related issues which tend to impact shares even when the evidence of an incident points to other parties.*

VA/AEP/D – Advocates call for fuel clause cost sharing as increases roll through to bills

- Advocates from Clean Virginia and Virginia Interfaith Power and Light have been pushing within the state to have utilities split fuel costs with customers
- More HERE

Guggenheim takeaway: *A nonstarter, but flagged for your awareness as fuel adjustments continue to prompt sticker shock across jurisdictions.*

ERCOT – TRC posts gas weatherization requirements

- The updated rules propose raising the well sizing winterization thresholds
- "The Commission proposes amendments to the list of critical gas suppliers in subsection (b)(1). The commission received multiple comments on the original proposal of §3.65 expressing concern that the list of critical gas suppliers encompassed too many facilities such that electric utilities may experience a burden in prioritizing the facilities for load-shed purposes. Similarly, comments on proposed §3.66 requested reducing facilities on the list by excluding more gas wells and oil leases with marginal production. The amendments now proposed to §3.65(b)(1) exclude gas wells producing an average of 250 Mcf of natural gas per day or less and oil leases producing an average of 500 Mcf of natural gas per day or less." - TRC
- More HERE

Guggenheim takeaway: *Minor FYI.*

ERCOT – ISO hosts first day of proposed Brazos settlement presentations

- ERCOT has posted a lengthy overview of the settlement as a part of its ongoing presentations on the matter, including illustrations of several market participant claim recoveries
- "Entire ERCOT claim amount of $1,886.6mm (Brazos Short Pay Claim) to be allowed and ERCOT will avoid further litigation" - ERCOT
- More HERE

Guggenheim takeaway: *Heads up and as expected after we highlighted the notice and the prior settlement data points. The settlement process sets up a vote deadline of October 28th as participants continue to digest the details.*

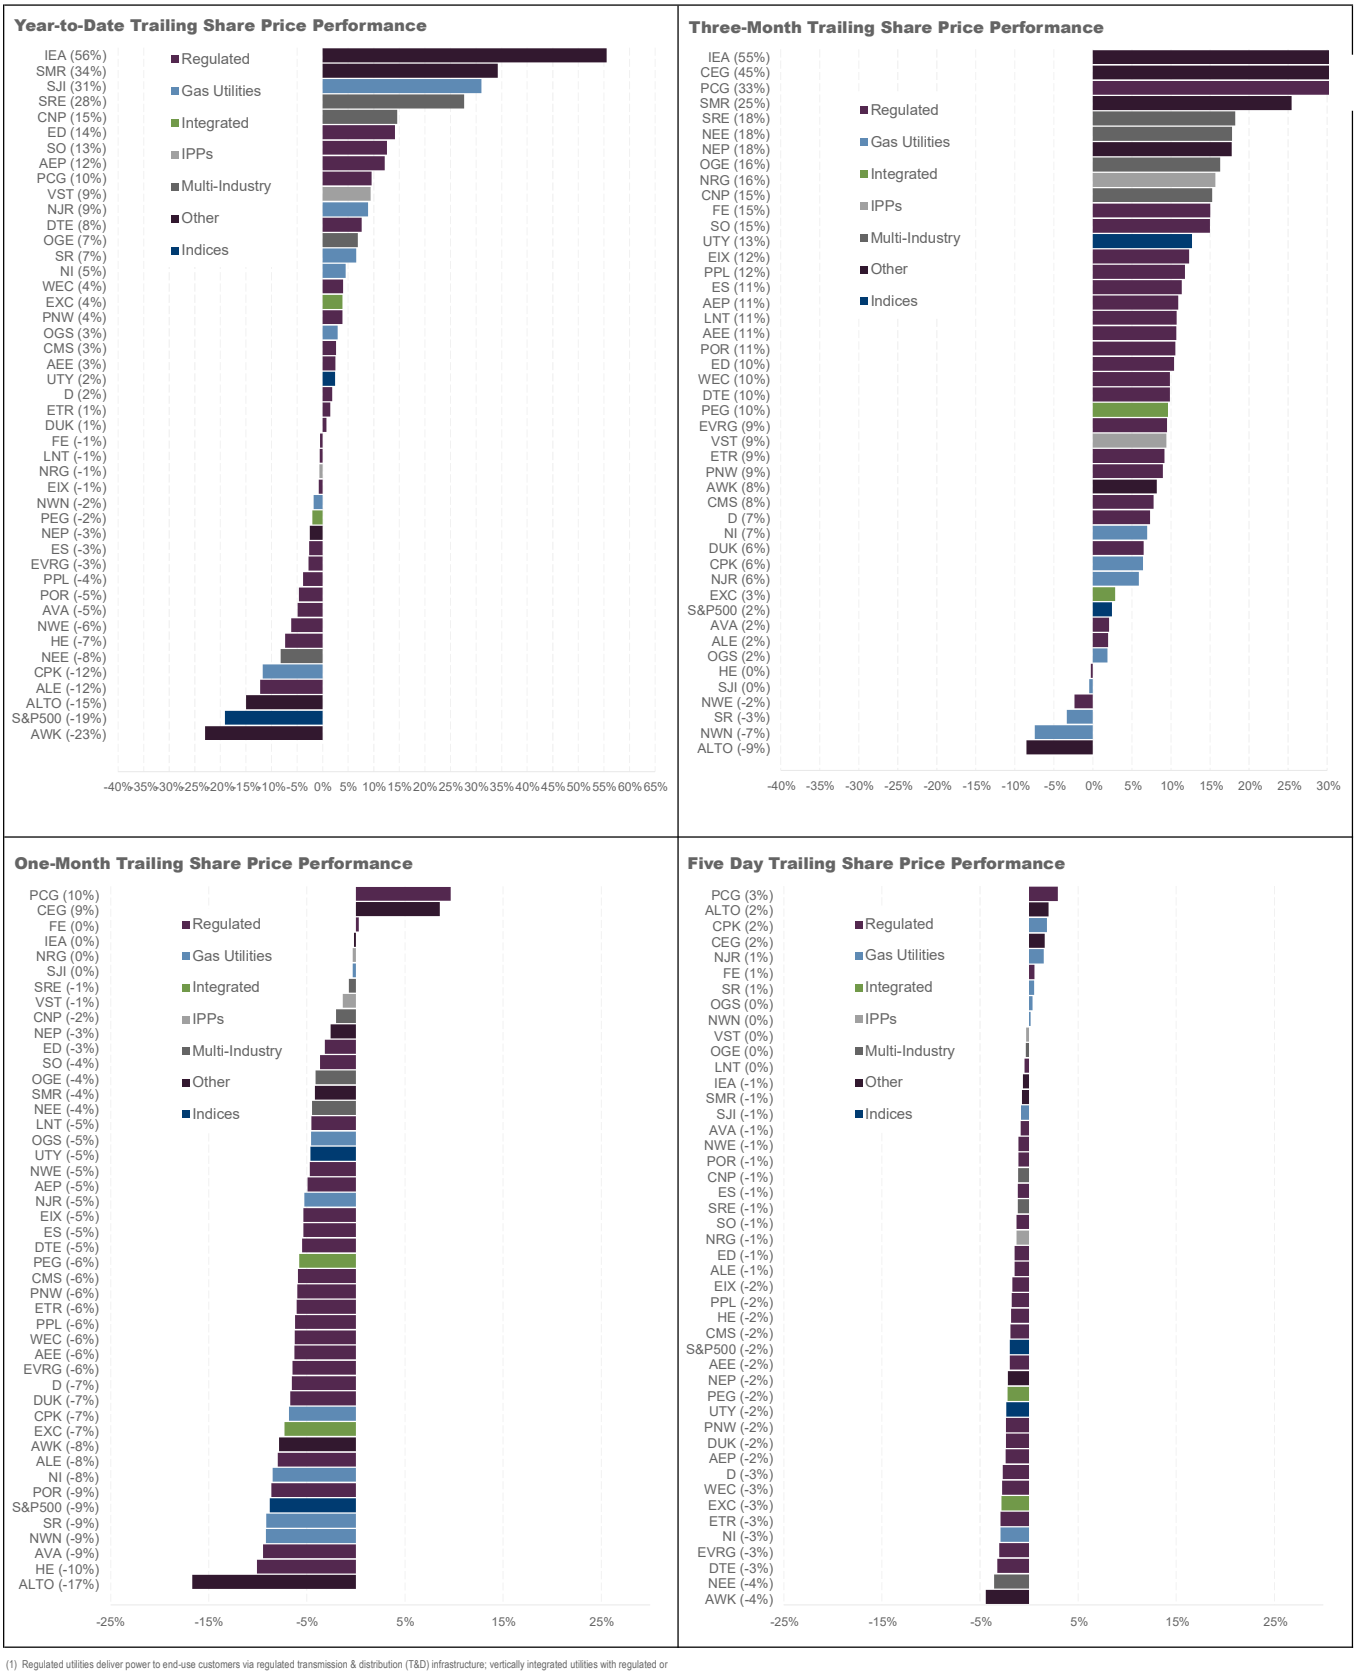
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

The Wolfe Byte
We recently hosted investor meetings with EXC management, and we came away thinking the weakness in the stock post IRA is overdone. EXC still sees 6-8% EPS growth and has already issued over half of the $1B of equity it needs through 2025. There is some upside to IL ROEs.

Takeaway from mgmt meetings is the stock hit from IRA is overdone. We recently hosted EXC's CFO Joe Nigro for investor meetings in CA, and our primary takeaway is the stock reaction to the Inflation Reduction Act is overdone. EXC's $200M estimated cash hit from the corporate AMT is a worst case and before any mitigating efforts. EXC has reaffirmed its 6-8% EPS growth target through 2025 despite the IRA impact. Another takeaway is upside to ComEd returns from a higher 30Y UST yield in 2022-23 and from higher allowed ROEs and potential incentives under multiyear rate plans beginning in 2024. EXC already issued over $500M of equity last month, with the rest by YE25. While the stock is beating the UTY by ~230bp YTD, it has meaningfully lagged since the IRA was announced. EXC now trades at a ~1.5x discount to the utility avg P/E on 2024E. Our PT remains $49, reflecting a half-turn premium to our group avg P/E, given EXC's low-risk T&D business and above avg LT EPS/div growth. We view EXC's recent weakness as more messaging than fundamentals, and we think this should be fixable in time. In our view, EXC's business is a lot more stable than recent news flow would suggest.

AMT impact is conservative, will update after IRS guidelines. EXC assumes the AMT is determined at the consolidated level, meaning potential benefits from lower deferred taxes (= higher rate base) would not materialize at the utility subs. And EXC's $200M cash hit assumes the repairs and maintenance deduction is not treated like accelerated D&A in the IRA. But the IRS has yet to issue guidelines. EXC also is exploring ways to mitigate the impact.

Upside from higher potential earned ROEs. We currently see upside to our 2023-25E earned returns mostly at ComEd, in which we estimate every 50bp is $0.04. With a potential 36bp ROE performance incentive starting in 2024, ComEd earned ROEs could be higher than our 9.5% estimate in 2024-25.

ESTIMATES

($)	2022E	2023E	2024E	2025E
EPS FY	2.27 E	2.39 E	2.56 E	2.80 E
Cons.	2.26 E	2.42 E	2.58 E	2.79 E
P/E	19.1x	18.1x	16.9x	15.4x

WOLFE RESEARCH

September 18, 2022

Investment Conclusion

We believe EXC is a low-risk utility stock with ESG-friendly investments. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%. We think the stock hit from IRA is overdone and see it getting to a modest premium to peers. But we think execution and better messaging will be key over time to trade in line with low-risk, high-quality utilities.

Valuation

Our $49PT is based on a half-turn premium to our utility group P/E of 18.5x 2024E. We think a half-turn premium is warranted given EXC is a T&D, coal-free utility growing EPS above the industry average and operating under constructive regulatory frameworks.

Select takeaways from meetings:

- **$200M negative cash impact from IRA is worst case; not expected to pressure B/S**: EXC did not update its comments from last month regarding the expected impact from the *Inflation Reduction Act*: it may result in an increase in cash taxes of up to approximately $200M/yr starting in 2023. That reflects impact from the 15% corporate alternative minimum tax at the consolidated level. While the IRA includes a provision on the deduction of accelerated depreciation, the legislation is silent on other deductions, primarily the repairs and maintenance expense. EXC is continuing to assess the net impact and potential mitigants. It will update estimates after its full budget process is done on the YE call in 1Q23. Even using the $200M hit, we believe EXC should still be above the credit rating downgrade thresholds of 12% FFO/Debt and any incremental equity needs would be minor within the 6-8% overall EPS growth rate.

- **Above-average 6-8% EPS growth intact; nonlinear given timing of PECO lag**: EXC also reaffirmed its above-average 6-8% EPS growth through 2025, inclusive of the $200M maximum hit to cash from the IRA, as growth is driven by its $29B capital plan through 2025. EXC projects earned returns to be 9-10% across its utility businesses. As mgmt. noted earlier this year, the EPS growth is not linear because EXC's PECO utility in PA tends to get rate relief every three years, with the next rate increase anticipated 1/1/25. Therefore, EPS growth off 2021A of $2.10 may be below the 6-8% midpoint in 2024, when PECO is in the final year before rate relief and therefore when PECO earned returns are projected to be at their lowest in between rate increases.

- **ComEd earned returns under new MYP starting in 2024 could include up to 36bp of incentives**: One key assumption embedded in our estimates is ComEd distribution's earned ROE. Through 2023, it will still reflect the 30Y UST yield plus 580bp under the current formulaic ratemaking. Our 2023E still assumes a 2.9% 30Y UST, but that would be 60-70bp higher using the current 30Y UST yield. Every 50bp is about $0.04 in 2023E. But in 2024, ComEd has the option to file under a multiyear rate plan framework, which is expected to include performance incentives that could total up to 36bp (6bp for each of the six metrics). That is on top of the allowed ROE, which will be determined by IL regulators. Our 2024E of $2.56 reflects about a 9.5% ROE for ComEd distribution. The IL gas utilities have been authorized ROEs around 9.7% over the past couple of years, implying over 50bp upside, or over $0.04 to our 2024-25E from both a higher allowed ROE and performance incentives. EXC has not disclosed the ComEd 2024-25 ROE forecasts but said that its 6-8% EPS growth target has "stress-tested" several assumptions.

- **2023 is busy regulatory year**: This year was relatively quiet for EXC on the rate case front, with its MD and DC utilities under multiyear frameworks, PECO just completing a rate case in 2021 and IL under formulaic rates. Next year is the opposite:
  - IL: In Jan 2023, ComEd will file a rate case, likely under the new 4-year framework starting Jan 2024, with performance-based incentives (up to 6pb for each of the six measures, or 36bp total).

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:23 PM.

- DC/MD: Also in early 2023, EXC's DC and MD utilities are expected to file reconciliations under the current MYPs, which will be the first under those plans. We don't expect significant issues with the reconciliations (i.e., recovery of costs earlier in the MYPs in 2024). But they will be important as precedent setting in those jurisdictions. Then, the next round of MYPs in those states are expected to be filed at some point thereafter.

- M&A a big focus of investors, but not front-burner for management: EXC continually gets questions on M&A. Although the company has successfully done M&A over the past decade (Constellation and PHI), management appears focused on its $29B capital plan and delivering 6-8% EPS growth. M&A in the utility space is not easy – with social, regulatory and execution hurdles. And frankly, EXC doesn't have the currency to do M&A at the moment with the stock trading at a meaningful discount to the sector.

Relative stock performance and Comps

As shown in Exhibit 1, EXC has given back nearly all of its YTD outperformance vs large cap peers. EXC trades at a nearly 1.5x discount to regulated peers and well below low-risk, high-quality utility names; see Exhibit 2.

Exhibit 1: EXC Relative Performance vs. Large-Cap Utilities

Source: Wolfe Utilities & Power Research

Company Description

Chicago-based EXC is a large T&D (wires-only) regulated utility company, providing mostly electric service to roughly 10 million customers in the Mid-Atlantic and northern IL. It has no coal or other generation. ComEd serves northern IL and is EXC's largest utility sub, representing ~40% of rate base. Pepco serves DC, DE, MD and southern NJ and represents 25% of rate base. PECO, which serves southeastern PA, and BGE, which serves Baltimore, each represent nearly 20% of rate base. A little over 90% of EXC's total rate base is electric, with the rest gas LDC.

Investment Thesis

We believe EXC is a low-risk utility stock with ESG-friendly investments. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%. We also see upside from multiple expansion over time.

Valuation

Our $49 PT is based on a 0.5x premium to our utility group P/E of 18.5x 2024E. We think a modest premium is warranted given EXC is a T&D, coal-free utility growing above the industry avg and operating under constructive frameworks. Risks are less capex, lower returns, less cash or more equity needs, and unfavorable regulatory outcomes.

ARGUS

NASDAQ: EXC

EXELON CORP

Exelon Corp. is a leading energy provider, with transmission and distribution operations in the U.S. and headquarters in Chicago. Exelon spun off its generation business, which was about 60% nuclear, as Constellation Energy at the end of 2021. Constellation is now a publicly traded company focused on generation and competitive distribution, while Exelon focuses on regulated transmission and distribution. About 90% of EXC's current revenues are from the electricity segment.

Analyst's Notes

Analysis by Marie Ferguson, September 14, 2022

ARGUS RATING: BUY

- Maintaining BUY following 2Q results
- We have a positive view of Exelon's transformation into a pure-play transmission and distribution utility through the spinoff of its competitive generation business, Constellation Energy.
- Exelon recently reported 2Q22 non-GAAP operating EPS of $0.44, up 22% from 2Q21, driven mainly by growth in the rate base.
- The company has increased its long-term debt significantly since the spinoff. The long-term debt/cap ratio at the end of 2Q22 was 60%, in line with the peer average but up from 47% at the end of 2021.
- EXC projects 6%-8% dividend growth through 2025, in line with estimated growth in operating earnings. The current yield is about 3.1%, in line with the peer average.

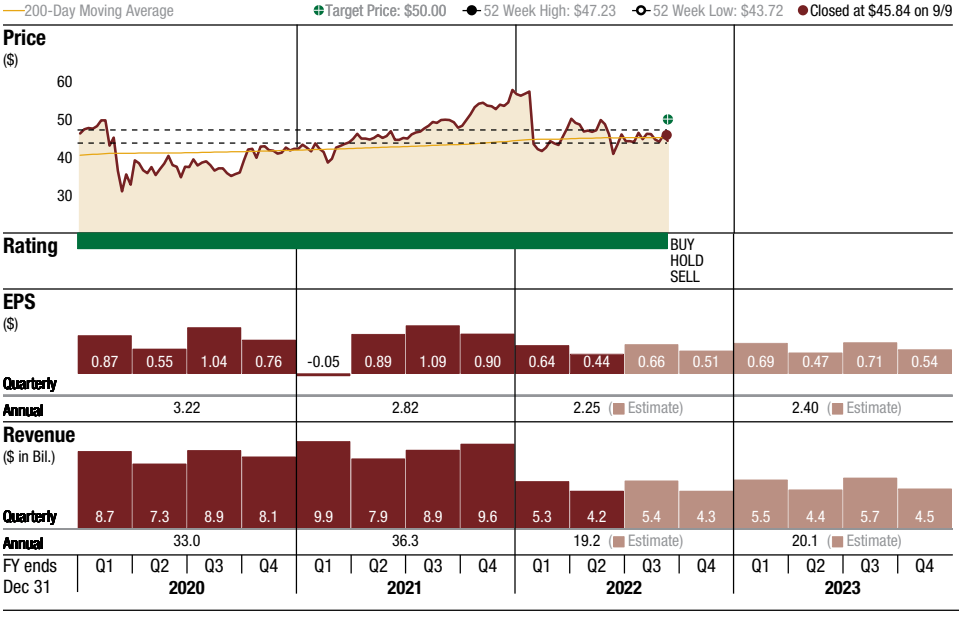
INVESTMENT THESIS

We are maintaining our BUY rating on Exelon Corp. (NYSE: EXC), which provides electricity and natural gas to about 10 million customers in Illinois, Maryland, Pennsylvania, New Jersey, Delaware, and the District of Columbia. We have a positive view of the company's transformation into a pure-play transmission utility through the recent spinoff of its competitive energy business, Constellation Energy (CEG). The move should also lower future earnings volatility. Management projects long-term earnings growth of 6%-8% from the company's utilities, which we believe is achievable. Exelon is also benefiting from favorable rate case decisions, as well as from its cleaner transmission mix and focus on hydrogen and hydro power to reduce emissions from its distribution lines.

In conjunction with the February 2022 Constellation spinoff, EXC shareholders received one share of CEG for every three shares of EXC. Exelon shares were repriced as a result of this separation. While the shares have benefited from recent strength in the Utility sector, we will monitor the company's balance sheet and growing debt for a possible rating change. Our revised target price is $50, lowered from $54. The company has managed costs better than peers, but we believe that rising interest rates and high transmission and

Market Data

Pricing reflects previous trading week's closing price.



Argus Recommendations

Twelve Month Rating	SELL	HOLD	**BUY**
Five Year Rating	SELL	HOLD	**BUY**
Sector Rating	Under Weight	**Market Weight**	Over Weight

Argus assigns a 12-month BUY, HOLD, or SELL rating to each stock under coverage.

- BUY-rated stocks are expected to outperform the market (the benchmark S&P 500 Index) on a risk-adjusted basis over the next year.
- HOLD-rated stocks are expected to perform in line with the market.
- SELL-rated stocks are expected to underperform the market on a risk-adjusted basis.

The distribution of ratings across Argus' entire company universe is: 71% Buy, 29% Hold.

Key Statistics

Key Statistics pricing data reflects previous trading day's closing price. Other applicable data are trailing 12-months unless otherwise specified

Analyst's Notes...Continued

purchased fuel costs could pressure earnings.

RECENT DEVELOPMENTS

EXC's split-adjusted shares have underperformed the S&P 500 over the past three months, rising 1% compared to a 5% gain for the index. The shares have outperformed over the past year, rising 23% compared to a 12% loss for the S&P 500 and a 12% gain for the S&P Utility Sector ETF, XLU.

Exelon recently reported 2Q22 split-adjusted non-GAAP operating EPS of $0.44, up 22% from $0.36 in 2Q21. This is the second set of quarterly results that have been adjusted for the spinoff of the generation and competitive electric business, and reflects the fact that approximately 25% of pre-spinoff revenue had come from this business. The increase in adjusted earnings was driven by strong performance at ComEd, and rate base increases at PECO and BGE, partly offset by decoupling at ACE.

Quarterly revenues rose in both the electric and gas segments. Second-quarter electric revenues rose 5% from the prior year to $3.9 billion, while natural gas revenues rose 31% to $307 million. The spinoff of the company's generation fleet was intended to reduce cost volatility, and second-quarter expenses were kept in check better than at most peers. Operating expenses rose just 3% from 2Q21, to $3.5 billion. Purchased power and purchased fuel were the largest line items.

Management is focused on capital investment to improve reliability and provide cleaner energy, with $29 billion expected to be allocated to new infrastructure by 2025. As a result, the company has significantly increased its debt.

Along with the 2Q earnings, management reaffirmed its 2022 adjusted EPS forecast of $2.18-$2.32. It also projected 6%-8% dividend growth through 2025, in line with estimated growth in operating earnings.

EARNINGS & GROWTH ANALYSIS

Following the spinoff, Exelon has six utility subsidiaries: PECO (1.7 million electric and 0.5 million gas customers near Philadelphia); PEPCO (1 million electric customers in Maryland and DC); DPL (0.5 million electric and 0.1 million gas customers in Delaware); ACE (0.6 million electric customers in New Jersey); BGE (1.3 million electric and 0.7 million gas customers near Baltimore); and ComEd (4 million electric customers in Illinois).

The company now reports adjusted operating earnings for four segments: ComEd, PECO, BGE, and PHI. PHI includes ACE, PEPCO, and DPL.

Segment results were mixed in the second quarter. At ComEd, adjusted operating earnings rose 17% from the prior year to $229 million. PECO adjusted earnings rose 25% to $134 million and BGE earnings fell 21% to $38 million, primarily due to higher depreciation expense. At PHI, earnings fell 30% to $101 million, reflecting the impact of unfavorable weather and revenue decoupling at ACE.

Going forward, the company should benefit from favorable rate

Analyst's Notes...Continued

case outcomes. In its 4Q21 report, management projected approximately 8% growth in its consolidated rate base through the end of 2025. It expects a 3% average annual increase in electric distribution during this period, and a 1% average annual increase in gas delivery and electric transmission. It plans to address rising O&M expense through multiyear labor agreements and cost-focused technology, and projects capital spending of $29 billion in 2022-2025. The spinoff of the generation and wholesale energy business should also help to reduce earnings volatility.

We expect earnings to reflect the impact of rate base growth. The company has kept expenses in check despite higher transmission and fuel costs, but we continue to watch costs in these areas. We are maintaining our EPS estimates of $2.25 for 2022 and $2.40 for 2023. We adjusted our estimates in1Q22 to reflect the Constellation spinoff.

FINANCIAL STRENGTH & DIVIDEND

Our financial strength rating on Exelon is Medium, lowered from Medium-High as a result of the Constellation spinoff. Moody's rates the company's debt at an investment-grade Baa2. S&P lowered its rating from BBB to BBB- and Fitch lowered its rating from BBB+ to BBB in 2021.

The company's 2Q22 balance sheet shows a significant increase in debt. Cash and equivalents were $816 million, up from $672 million at the end of 2021 but down from $2.5 billion at the end of 1Q22. At the end of 2Q22, the current portion of long-term debt was $505 million, down from $2.2 billion at year-end. However, long-term debt at the end of the quarter was $35.8 billion, up from $30.7 billion. The long-term debt/cap ratio at the end of 2Q22 was 60%, in line with the peer average but up significantly from 47% at the end of 2021. We note that the increase in the debt/cap ratio reflected both an increase in debt and a reduction in stockholders' equity due to the spinoff.

After the end of the quarter, the company announced the pricing of a public offering of 11,330,000 shares that it expects to generate proceeds of approximately $500 million before expenses. Management will use the proceeds to repay debt.

Following the Constellation spinoff, Exelon lowered its quarterly dividend by 12% to $0.3375 per share, or $1.35 annually. The current yield of about 3.1% is in line with peers. Our dividend estimates are $1.35 for 2022 and $1.45 for 2023.

MANAGEMENT & RISKS

The CEO of Exelon is Christopher Crane. Prior to becoming CEO in 2012, he served as the company's president and COO. Joseph Nigro is the CFO and Jeanne Jones is SVP of Corporate Finance. Mayo Shattuck II is the company's independent chairman.

Risks for Exelon shareholders include cooler-than-normal conditions during the summer air-conditioning season or warmer-than-normal temperatures during the winter heating season. The transmission business may also be hurt by extreme weather events. Other risks include those related to authorized

Peer & Industry Analysis

The graphics in this section are designed to allow investors to compare EXC versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.

- **The scatterplot shows how EXC stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how EXC might fit into or modify a diversified portfolio.**

Analyst's Notes...Continued

ROE, including exposure to state regulatory commissions and the correlation between authorized ROE and Treasury yields.

Utility stocks in general are susceptible to commodity price fluctuations, regulatory issues (especially construction cost recovery), and potential environmental and safety liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk. Utility stock performance also tends to be sensitive to interest rates; when rates rise, utility yields often rise.

COMPANY DESCRIPTION

Exelon Corp. is a leading energy provider, with transmission and distribution operations in the U.S. and headquarters in Chicago. Exelon spun off its generation business, which was about 60% nuclear, as Constellation Energy at the end of 2021. Constellation is now a publicly traded company focused on generation and competitive distribution, while Exelon focuses on regulated transmission and distribution. About 90% of EXC's current revenues are from the electricity segment.

Through its regulated utility subsidiaries, Exelon delivers electricity and natural gas to about 10 million customers, primarily in central Maryland (Baltimore Gas & Electric Co.), northern Illinois (ComEd), and southeastern Pennsylvania (PECO). In late 2021, the company announced 'Path to Clean' goals, which include cutting 15% of operations-driven emissions by 2022 relative to 2015 levels. The company plans to cut emissions by 50% by 2030 and to achieve net-zero emissions by 2050. It is also investing in hydrogen technology. The shares are a component of the S&P 500.

VALUATION

EXC shares have benefited from sector rotation into utility stocks, and have soundly outperformed both the S&P 500 and the S&P Utility Sector ETF, XLU, over the past 52 weeks. At current prices near $44, the shares are trading near the midpoint of their 52-week range of $33.87-$50.71 and appear undervalued based on several key metrics. They are trading at 19.7-times our 2022 EPS estimate, below the average of 22.4 for Argus-covered utilities. The PEG multiple of 2.4 is below the peer average of 3.9, and the price/sales multiple of 2.4 is below the peer average of 3. The EV/EBITDA multiple of 11.6 is near the peer average of 11.8.

We believe that EXC shares offer value based on the company's size and scale, and reduced earnings volatility following the Constellation spinoff. We also like Exelon's focus on clean energy and the absence of coal in its transmission mix. At the same time, the company plans to invest heavily to increase reliability and will need to manage its debt amid rising rates. We are maintaining our BUY rating with a revised target price of $50, reduced from $54.

On September 14, BUY-rated EXC traded at $44.35, up $0.33.

About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

THE ARGUS RESEARCH RATING SYSTEM

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: D, EXC, CMS, DTE, SRE, PEG, EIX, POR, XEL, DUK, NEE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Join us at the EEI conference in FL from November 13-15 (schedule included). This week, we are tracking proceedings in D's reconsideration of the CVOW project approval, proceedings in EXC's ComEd FRP in IL, CMS's electric rate case in MI, D's Questar gas case in UT, DTE's electric case in MI, and SRE's Oncor rate case in TX. In other news, PEG has made a filing with the BPU to request approval to modify pension accounting for rate-making and financial statements; SRE is alerting customers to a storm in the San Diego area and EIC and POR are contemplating PSPS as risks of wildfires grow; we provide more details on XEL's partner to exit its stake in Comanche 3; interveners have made public their testimony in EXC's PECO gas rate case; SC PSC approved a multiparty settlement in DUK's Piedmont gas rate case; NEE and partners can go ahead with an EV charging JV in the U.S. after a European Commission approval for one of the partners; NEE transmission has entered into a JV with an entity to develop and construct offshore wind transmission infrastructure in NJ; and VA's General Assembly ended its special session without electing a member to fill the third seat on the SCC.

KBCM Invites You to Join Us at the EEI Financial Conference from November 13-15 in Hollywood, FL.
Scroll down for our full schedule, including dinners with **PEG** and **NWE**.

Regulatory Calendar

D — Responses in VEPCO's limited reconsideration of the CVOW project approval are due on September 13: D requested the SCC for a reconsideration of the performance guarantee clause that requires D to meet a 42% net capacity factor on a three-year rolling average basis throughout the life of the project in favor of a more reasonable and flexible standard. See our note here, where we discuss the SCC's performance guarantee clause and D's position. D posits that the SCC lacks the authority to impose a performance guarantee of this nature and that it is unreasonably broad in scope, leaving D to manage factors that may be outside its control. In the filing, D says that it may have to terminate all development and construction activities relating to the project if the condition is allowed to stand.

EXC — Evidentiary hearings in ComEd's IL electric rate case are scheduled to begin on September 14: Staff filed rebuttal testimony recommending a $200M revenue increase, in line with ComEd's updated revenue requirement filed in rebuttal testimony. Staff and ComEd's increases are premised on a 7.85% ROE (which is formulaic), 49.45% equity, and a rate base of ~$14B. A final decision is expected toward year-end, with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL. EXC is currently engaged in finalizing the PBR framework that will make its way into the next rate case, which is expected to be filed in early 2023 for rates effective in 2024.

CMS — Rebuttal testimony in CMS's MI electric rate case is scheduled for September 15: MI PSC Staff filed testimony recommending a $170M revenue increase, premised on 9.70% ROE and 51.0% equity. The delta lies primarily in the lower recommended ROE. CMS is seeking a revenue increase of $274M (net increase of $266M) based on a 10.25% ROE, a 51.5% equity layer, and a projected YE23 test year. The drivers of the present case include investments in new solar and natural gas-fired generation, system reliability, resilience, and cost recovery for the planned acquisition of the Covert plant in 2023. CMS requests rates to be effective March 1, 2023. We view staff testimony as constructive, especially compared to the last electric case outcome, and expect the ultimate outcome to be bookended by CMS's ask and testimony offered by staff.

D — Direct testimony in Phase II of Questar's natural gas rate case is scheduled for September 15: Phase II will address the cost of service among customer classes and rate design, while Phase I will address all issues necessary to determine D's cost of capital and revenue requirement. Phase I direct testimony was previously filed, and the Division of Public Utilities recommended a $49.6M revenue increase premised on a 9.3% ROE and 53.21% equity. The main difference between DPU's recommendation and the Company's

request is the lower ROE. As background, Questar filed a distribution rate case in May seeking a $70.5M rate increase based on a 10.3% ROE and 53.21% equity layer. The primary factors contributing to the proposed rate increase are capital investments, including the Magna LNG terminal expected to enter service by the end of 2022. Questar must file a rate case every three years as part of an infrastructure replacement adjustment tracker. Questar proposes to continue the mechanism. Questar's last rate case was approved in 2020 for a $2.7M rate increase on a 9.5% ROE and 55% equity layer. A commission decision is expected by January 1.

DTE — A proposed decision in DTE's electric rate case is expected by September 16: Staff is recommending a 9.6% ROE and a 50% equity ratio vs. DTE's request of a 10.25% ROE and a 50% equity layer. Staff recommends a revenue increase of $145.1M with a lower recommended ROE, O&M, D&A, and rate base contributing. In an updated filing, DTE is requesting a $368M revenue increase. The rate filing is DTE's first since the prior case was settled in mid-2020 at a 9.9% ROE. The 10.25% ROE request is below recent requests made at 10.5%. Recent MI rate cases have been settled at 9.9%. The rate filing is driven by DTE's distribution and generation investments, and it is also seeking approval of certain accounting requests, including accounting treatment of costs to expand its EV program, the regulatory accounting treatment for costs associated with TOU rates, a COVID-19 compliance expense regulatory asset, and a customer outage credit regulatory asset. See our comments on the staff testimony here.

SRE — Oncor's rebuttal testimony in the TX electric rate case is scheduled for September 16: Staff filed testimony recommending a 9.3% ROE and a 40% equity layer—compared to Oncor's ask of 10.3% ROE and a 45% equity layer. Oncor filed a GRC in May, seeking a $251M net increase in rates ($287M increase in distribution rates offset by a $36.5M reduction in transmission rates). Staff is recommending adjusting the total revenue requirement from SRE's requested 5.8B to $5.6B—a reduction of $229.5M—thus reducing the requested revenue increase from $287M to $57.5M. The reductions span the gamut with the biggest delta attributable to the lower ROE and lower equity layer and a lower recommended federal tax allowance (staff recommended ROR is 6.35% vs. Oncor's 7.05% requested). Staff testimony appears restrictive at first glance given that Oncor's last rate case was settled in 2016 at 9.8%, 42.5% equity layer, and the uptrend in interest rates since then. Oncor's primary reasons for seeking the rate increase were the move to a higher equity layer and a higher ROE, the growth in Oncor's under-recovered self-insurance reserve balance, and expenses associated with the COVID response, among others.

Recent Developments for Companies Under Our Coverage

From our midweek: NC Staff and interveners file testimony in DUK's 2022 NC Carbon Plan; CA avoids rolling blackouts as conservation kicks in, but the state is not out of the woods yet; a Comanche Unit 3 co-owner announces its intention to exit ownership stake with XEL to acquire its stake; EIX submits a report notifying the CPUC about circuit activity on its system around the time of the Fairview Fire, and the EIA released its September Short-Term Energy Outlook.

PEG — PEG makes a filing with the BPU to modify pension accounting for rate-making purposes: PEG is seeking an accounting order from the Commission to change the method for determining the market value of pension assets for the purpose of calculating pension expense. Specifically, the subject of this petition is the treatment of the amortization of net gains or losses associated with pension assets. PEG currently uses the fair value of plan assets to determine the market value of the assets in the pension trust and would like to change that to use a smoothed-out methodology instead that recognizes the change in the fair value in a more systematic way—and thus reduce the volatility in net periodic pension expense as reflected in company earnings. PEG points to available accounting standards that permit this treatment. The issue has become pressing this year with declines in the equity indices. Most utilities use a smoothing mechanism, and we believe that PEG and FE are among the minority that use a strict mark-to-market methodology annually with no mechanism to use a calculated value that evens out the year-to-year fluctuations. PEG is requesting that the revised methodology be applied effective 2023 and that it would record the difference in the amortization of the net gain or loss component of pension expense (or income) between the current methodology and the proposed methodology for purposes of financial reporting as a regulatory asset/liability, to be reviewed in future rate case proceedings.

SRE, EIX, POR — storms and wildfires add to the mix: Following days of emergency alerts from CAISO to manage the grid during a record heat wave, the next challenges are tropical storms and wildfires.

- **SRE —** SDG&E has issued an update to prepare its customers for Tropical Storm Kay, which could bring strong winds and thus potentially cause power outages from downed electric infrastructure. The utility has activated its emergency operations center to manage the potential fallout from the current heatwave and the impending storm.
- **EIX —** SCE has issued an alert to its customers that it may have to implement Public Safety Power Shutoffs in certain communities to manage against the potential for elevated fire risk. PSPS is a preventive measure implemented during periods of high risk of wildfires to prevent the electric system from becoming the source of ignition.
- **POR —** POR has announced that it is monitoring high-risk fire conditions and may need to implement a PSPS in 10 areas within its service territory in OR deemed at high risk. A final determination will involve a review of wind speeds, temperature, and information from local fire departments.

XEL — More than what meets the eye — about a partner's decision to exit its stake in Comanche 3: We wrote in our midweek that a Comanche Unit 3 co-owner has announced its intention to exit ownership stake with XEL required to acquire its stake. As a follow-up, we have learned that CORE can only withdraw from the ownership agreement if there is a default and PSCo fails to cure the default within 180 days. If the right to withdraw is triggered, PSCo will choose an independent appraiser, subject to CORE's approval, and then buy out CORE's share at the appraiser's valuation. Under the joint owners' agreement, if the parties dispute whether a default has occurred, then the dispute must be resolved, and one of the methods to resolve it is through litigation. The parties are currently in litigation for the events that CORE claims were defaults by PSCo, and it does not appear that CORE can implement a forced withdrawal while litigation is pending.

EXC — Interveners make recommendations public in PECO's PA gas rate case: The PA Public Utility Commissions Bureau of Investigation and Enforcement and the Office of Consumer Advocate made their testimony public, in which the interveners recommended revenue requirements of $49.3M and $6.2M, respectively. The PA BIE's recommendation is premised on a 9.58% ROE, 53.41% equity layer, and a $2.9B rate base. The OCA premised its revenue requirement on an 8.75% ROE, 50% equity layer, and a $2.9B rate base. The lower ROE in both recommendations is the main driver in the delta between the interveners and the Company, while the OCA also proposes additional reductions to test year expenses including management compensation, G&A, and others. As a reminder, PECO is seeking an $82M rate increase on a 10.95% ROE, and 53.41% equity, on a rate base of $2.9B. The rate increase intends to cover gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at a 10.24% ROE in mid-2021. Evidentiary hearings were completed in August and briefs are expected to be filed in September with a final decision expected by the end of 2022, and new rates effective in January 2023.

DUK — SC PSC approves multiparty settlement in DUK Piedmont gas rate case: The Commission approved a previously reached multi-party settlement for a net revenue decrease of $0.02M premised on a 9.49% ROE and 53.5% equity layer. The net decrease includes a revenue increase of $2.88M and a $2.9M revenue adjustment for the cost of gas demand. This compares to DUK's initial request of a $6.7M net revenue increase on a 9.9% ROE (54.56% equity with a $505M YE21 rate base) and Staff's proposed $0.2M net revenue decrease premised on a 9.3% ROE and 53.05% equity. As a reminder, this was Piedmont's first rate-case filing in nearly two decades. The utility has been operating under SC's Rate Stabilization Act since 2005. This allows the gas utility to adjust rates regularly based on gas prices and other factors, but DUK reached a settlement in June, allowing the rate case to proceed instead of the rate adjustment this year.

NEE — European Commission approves Daimler's proposed EV charging JV with NEE and BlackRock: The Commission provided Daimler the required approval for the agreement that the three parties entered into earlier this year. As part of the agreement, NEER will partner with Daimler and BlackRock's renewable power fund to invest a joint $650M to build a national EV charging infrastructure for commercial vehicles. The project is meant to accelerate the transition to heavy-duty battery and hydrogen fuel cell vehicles. The charging infrastructure will be developed along the East and West Coast and TX.

NEE — NEE Transmission enters an MOU with Elia Group subsidiary to develop and construct offshore wind transmission infrastructure in NJ: NJ is scheduled to announce awards in October 2022 with winning projects likely in service by 2029. In 2021, the BPU and PJM opened a competitive solicitation for offshore wind transmission utilizing PJM's State Agreement Approach. NEE, PEG, FE, and other utilities have formed partnerships to submit bids for constructing offshore wind transmission infrastructure to support the offshore wind construction in the state.

D — VA General Assembly ends its special session without electing a new member of the SCC: The SCC's third seat has been open since February, when Angela Navarro (a Northam appointee) ended her term. The position could possibly remain open until the 2023 legislative session convenes in January and runs for 30 days. Otherwise, Governor Youngkin (R) could exercise his right to appoint an interim commissioner, or another special session could be convened. Aside from the usual rider proceedings, D has a reconsideration petition pending at the SCC regarding the CVOW project.

KBCM EEI Schedule Tentative Agenda (All Times Eastern):

Sunday, November 13, 2022

12:00 PM — Eversource Energy (ES)
1:00 PM — CenterPoint Energy, Inc (CNP)
2:00 PM — Xcel Energy Inc. (XEL)
3:00 PM — Sempra Energy (SRE)
4:00 PM — WEC Energy Group, Inc. (WEC)
5:00 PM — Atlantica Sustainable Infrastructure plc (AY)
*Dinner — Dinner with Public Service Enterprise Group Incorporated (PEG)**

Monday, November 14, 2022

8:00 AM — Duke Energy Corporation (DUK)
8:45 AM — Avangrid, Inc. (AGR)**
9:00 AM — Pinnacle West Capital Corporation (PNW)
10:00 AM — Exelon Corporation (EXC)
11:00 AM — Edison International (EIX)
12:00PM — DTE Energy Company (DTE)
1:00 PM — NorthWestern Corp (NWE)
2:00 PM — American Electric Power Company, Inc. (AEP)
3:00 PM — Portland General Electric Company (POR)
4:00 PM — FirstEnergy Corp. (FE)
*Dinner — Dinner with NorthWestern Corp (NWE)**

Tuesday, November 15, 2022

7:00 AM — Entergy Corporation (ETR)
7:00 AM — Southern Company (SO)
8:00 AM — Ameren Corporation (AEE)
9:00 AM — CMS Energy Corporation (CMS)
10:00 AM — Consolidated Edison, Inc. (ED)
11:00 AM — Avista Corporation (AVA)
11:00 AM — Otter Tail Corporation (OTTR)

**Dinner event.*
***30-minute meeting.*

Heads Up — The Week Ahead in Utilities: FE, AEE, EXC, DUK, WEC, ES, SO, D, PEG, SRE, EEI Schedule

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

ICYMI, we hosted management meetings with FE last week. A link to our notes from the meetings is below. This week, we are tracking proceedings in AEE's IL FRP, EXC's DE gas rate case, DUK's 2022 Carbon Plan, and WEC's WI rate cases. In other news, DEP sets off Carolinas rate case proceedings with an SC electric GRC filing; Aquarion files an MYRP with the CT PURA; Staff filed testimony in Oncor's TX rate case; DUK's OH electric rate case enters settlement discussions; SO files VCM 27; SO will seek a license extension for the 1.8 GW Hatch nuclear plant; Duke Energy Florida completes the last solar project of its 700 MW plan; D completes the sale of Hope Gas in WV; the VA governor plans to submit a notice to begin the rulemaking process to exit RGGI; and Ralph LaRossa assumes the role of president and CEO at PEG.

KBCM Invites You to Join Us at the EEI Financial Conference from November 13-15 in Hollywood, FL.
Scroll down for our full schedule, including dinners with **PEG** and **NWE**.

ICYMI
FE — Last week, we hosted **FE**'s senior management for a day of in-person meetings. Investors focused on the mark-to-market impact of pension expense on 2023 earnings, potential factors offsetting the drag on EPS, ongoing portfolio review, the strength of the balance sheet, and upcoming regulatory proceedings. Read more in our note here.

Regulatory Calendar
Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

AEE — Evidentiary hearings in AEE's IL FRP are scheduled to begin on September 7: In rebuttal testimony, Staff proposed a revenue increase of $61M vs. AEE's rebuttal requesting an $83.7M revenue increase. The Staff proposes a 50% equity layer vs. the Company's proposed 53.99% equity on a $3.9B rate base. The ROE of 7.85% is formulaic. A final decision is expected by the end of 2022, with new rates effective in January 2023. This may be AEE's last FRP filing in IL, with the next rate review likely being an MYRP. The ICC is expected to approve PBR to be used under the new framework this fall.

EXC — Settlement conference in Delmarva's DE gas rate case is scheduled for September 7: EXC's updated request seeks an $18.8M rate increase based on a 10.3% ROE and 49.94% equity. The increase includes $5.8M for the distribution system improvement charge, or DSIC, making the net increase requested $13.0M. DE PSC Staff previously filed testimony in Delmarva's rate case recommending a $9M revenue increase based on a 9.28% ROE and 49.94% equity layer. With the inclusion of the DSIC, the net increase is $3.2M. Interim rates of $20.3M, subject to refund, went into effect on August 14. The previous gas rate case concluded in 2021 and authorized a rate increase of $6.7M based on a 9.6% ROE and 50.37% equity layer.

DUK — Rebuttal testimony in the 2022 NC Carbon Plan is due on September 9: DUK provided testimony to address the Commission-identified issues for its 2022 Carbon Plan. DUK replied to several topics brought up by the NCUC that need to be addressed in the near term to keep DUK on the proper trajectory for the Carbon Plan. The actions include procuring substantial solar and battery resources, improvements to the transmission system to enable solar interconnections, additional coal retirements, and the addition of hydrogen-capable natural gas units. DUK does not believe it will be able to address all the issues at this time but will continue to address concerns as the Company gathers more information about market dynamics, technology, and customer behaviors. As part of the plan, DUK offered four portfolios, which outline a path to 70% carbon reduction in the early 2030s and requires the utilities to be carbon-neutral by 2050. One of the portfolios achieves 70% CO_2 reduction by 2030, and the other three achieve the target between 2032 and 2034, including offshore wind, small nuclear, or both. NCUC will rule on the plan by the end of 2022. See our note here where we discuss the Carbon Plan in detail.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

WEC — Staff and intervenor testimony in WEC's WI electric and gas rate cases is scheduled for September 9: WEC filed five rate cases across its WI utilities, seeking a cumulative $472M rate increase while maintaining the currently authorized returns on equity (10% for WEPCO and WPSC and 10.2% for WG). The utilities request an equity layer of 53% vs. the current 52.5%. The drivers for the rate case include capital investments in wind, solar, and battery storage—several of which have already received PSC approvals (including the Badger Hollow II solar project where WEC will own 100 MW and the Paris solar+storage project). The rate increase requested also reflects grid hardening and reliability investments.

Recent Developments for Companies Under Our Coverage

From our midweek: First Solar announces plans to invest in U.S. manufacturing; AGR receives some good news as the ME Law Court rules that the referendum blocking NECEC is unconstitutional; UT DPU files testimony in Questar natural gas rate case; intervenor files testimony in XEL's MN gas rate; TX bankruptcy judge allows Talen to pursue Colstrip arbitration; AK Commission approves an interim rate increase in AEL&P's case; and AVA and others commit support to SPP's Market+.

DUK — DEP sets off Carolinas rate case proceedings with an SC electric GRC filing: DEP filed an electric rate case in SC seeking a $68M net revenue increase premised on a 10.2% ROE and 53% equity layer. DEP is proposing to layer in the rate increase over a two-year period, with a $53M rate increase in RY1, followed by a $15M increase in RY2. The main drivers for the rate increase include significant capital investments since the last rate case and the recovery of costs associated with coal ash pond closures. DEP is proposing the acceleration of return of deferred income tax benefits to ratepayers to help partially offset rate increases. DEP last filed an SC electric rate case in 2018 and was granted a $41.5M rate increase based on a 9.50% ROE and 53% equity. DUK requests a decision by March 1, 2023, with rates effective April 1, 2023. This rate filing is the start of DUK's rate filings in the Carolinas. Following the SC DEP filing, we expect a similar filing in NC in 4Q22, to be followed by DEC filings in early 2023.

ES — Aquarion files MYRP with PURA: ES filed a three-year rate case with the CT PURA for Aquarion Water requesting a ~$27.5M rate increase in RY1, ~$13.6M in RY2, and ~$8.8M in RY3. The request is based on a 10.35% ROE and 53.06% equity. Aquarion is seeking revenue requirements based on a 2021 test year for rates effective March 15, 2023. The Company has invested ~$740M on infrastructure investments since the last rate case in 2013, with only 25-30% of water capex covered under trackers, creating a regulatory lag (ES earning ROE at the 7% level vs. the authorized 9.63%). In its last rate case, Aquarion received a $13.9M revenue increase based on a 9.6% ROE and 51.5% equity layer. The pre-hearing scheduling conference is set for September 8.

SRE — Staff files testimony in Oncor's TX electric rate case: Staff filed testimony recommending a 9.3% ROE and a 40% equity layer—compared to Oncor's ask of 10.3% ROE and a 45% equity layer. Oncor filed a GRC in May, seeking a $251M net increase in rates ($287M increase in distribution rates offset by a $36.5M reduction in transmission rates). Staff is recommending adjusting the total revenue requirement from SRE's requested 5.8B to $5.6B—a reduction of $229.5M—thus reducing the requested revenue increase from $287M to $57.5M. The reductions span the gamut with the biggest delta attributable to the lower ROE and lower equity layer and a lower recommended federal tax allowance (staff recommended ROR is 6.35% vs. Oncor's 7.05% requested). Staff testimony appears restrictive at first glance given that Oncor's last rate case was settled in 2016 at 9.8%, 42.5% equity layer, and the uptrend in interest rates since then. Oncor's primary reasons for seeking the rate increase were the move to a higher equity layer and a higher ROE, the growth in Oncor's under-recovered self-insurance reserve balance, and expenses associated with the COVID response, among others.

DUK — DUK's OH electric rate case proceedings are on pause as parties pursue settlement discussions: The OH PUC vacated the procedural schedule as parties pursue settlement conversations. DUK will file weekly reports to update the status of the discussions. Staff recommended a revenue increase in the range of $1.9M-$15.3M, based on an ROE range of 8.84-9.85%, and an equity layer of 50.5%. The delta vs. DUK's filing seems to be driven by the difference in the ROE. This compares to the Company's request for a $55M revenue increase on a 10.3% ROE and a 50.5% equity layer to support investments in grid upgrades and modernization.

SO — SO files VCM 27: GP's VCM 27 pertains to the January-June 2022 period. In this filing, GP presents $522M in capex for review only and does not request the Commission to take any action at this time. Under an agreement with the GA PSC, the semiannual VCM approval process will continue, but the Commission will wait until Vogtle Units 3 and 4 are complete before determining the reasonableness and prudence of the cost overruns and their attribution to ratepayers. The agreement was part of the VCM 24 Order when SO agreed that it would not seek approval of any costs exceeding the $7.3B cost recovery previously deemed reasonable by the Commission until the prudence review is complete. In VCM 27, GP's cost forecast is relatively unchanged at ~$10B and the Company maintained the in-service dates for 1Q23 and 4Q23 for Units 3 and 4, respectively. Unit 3 Fuel load is projected by the end of October, while SO expects to begin Unit 4 fuel load by July 2023. The estimated remaining capex to complete the project is ~$1.0B, including GP's share of project contingency.

SO — SO will seek a 20-year extension to the operating license for the 1.8 GW Hatch nuclear plant in GA: SO notified regulators of its intent to seek a 20-year license extension for the ~1.8 GW Hatch nuclear plant, which, if approved, will allow the plant to operate for 80 years. The Company will submit the license extension request in 2025; licenses for Units 1 and 2 are currently set to expire in 2034 and 2038, respectively. The plants are currently operating on the 20-year license extension past the original 40-year operating license. The Company received GA PSC approval to renew the licenses as part of its 2022 IRP settlement. The NRC is currently

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

reevaluating how it evaluates environmental impact reviews during the license renewal processes and thus expects license renewals to take about 24 months.

DUK — DEF completes the last solar project of the 700 MW plan: DUK completed the 75 MW Charlie Creek solar project in FL to complete the Company's plan to add 10 solar projects and 700 MW of solar from 2018-2022. The plan was part of the 2017 rate case settlement that required DEF to construct or acquire the projects and allowed the Company to earn a 10.5% ROE on the investments through the Solar Base Rate Adjustment mechanism. Earlier this year, DUK added the 75 MW Sandy Creek Solar Project into service, while the other eight solar projects were completed throughout 2018-2021. The 700 MW is a part of DUK's larger goal to invest a total of $2B in adding 1,500 MW of solar energy in FL by 2024, including 25 solar power plants across the state.

D — D completes the sale of Hope Gas: D announced that it has closed the sale of Hope Gas, its WV natural gas utility, to a portfolio company of Ullico Inc.'s infrastructure fund for $690M. With the closing, D's only WV operations include the ~1.7 GW Mount Storm coal plant, owned and operated by VEPCO. D announced the sale of Hope Gas in February. We see the transaction as another step by the Company to streamline its asset base following the sale of the GSP assets in 2020/2021. The valuation at 2x 2021 YE rate base reflects the robust valuations secured by regulated natural gas LDCs in recent years (CNP sold its AK and OK LDCs at 2.5x in 2021). Initial proceeds will be used toward parent debt reduction.

D — VA governor plans to submit a notice for the rulemaking process to exit RGGI: The governor intends to issue a notice of intended regulatory action to set the process in motion to repeal VA's participation in the RGGI. The process would likely take 18-24 months and this effort comes after the governor previously tried to issue an EO to remove the state's participation. A protracted process to exit the RGGI will likely create uncertainty for utilities, impacting resource planning decisions for vertically integrated utilities. VA is one of the 11 states in the Regional Greenhouse Gas Initiative, a cap and trade program designed to reduce CO_2 emissions from power generators. Operators buy purchase allowances through a regional auction to offset emissions that exceed a preset threshold. VA joined the RGGI in 2020. D favors exiting the RGGI since the credits purchased are funded by ratepayers and prefers more cost-effective ways to reduce emissions.

PEG — Ralph LaRossa assumes president and CEO role: As previously announced as part of the management transition, Ralph LaRossa has begun his new role as president and CEO of PEG. He replaces retiring CEO Ralph Izzo, who will remain as executive chairman of the board through the end of the year. Mr. LaRossa joined PEG in 1985 and served as COO since January 2020.

KBCM EEI Schedule Tentative Agenda (All Times Eastern):
Sunday, November 13, 2022

12:00 PM — Eversource Energy (ES)
1:00 PM — CenterPoint Energy, Inc (CNP)
2:00 PM — Xcel Energy Inc. (XEL)
3:00 PM — Sempra Energy (SRE)
4:00 PM — WEC Energy Group, Inc. (WEC)
5:00 PM — Atlantica Sustainable Infrastructure plc (AY)
*Dinner — Dinner with Public Service Enterprise Group Incorporated (PEG)**

Monday, November 14, 2022

8:00 AM — Duke Energy Corporation (DUK)
8:45 AM — Avangrid, Inc. (AGR)**
9:00 AM — Pinnacle West Capital Corporation (PNW)
10:00 AM — Exelon Corporation (EXC)
11:00 AM — Edison International (EIX)
12:00PM — DTE Energy Company (DTE)
1:00 PM — NorthWestern Corp (NWE)
2:00 PM — American Electric Power Company, Inc. (AEP)
3:00 PM — Portland General Electric Company (POR)
4:00 PM — FirstEnergy Corp. (FE)
*Dinner — Dinner with NorthWestern Corp (NWE)**

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

Tuesday, November 15, 2022

7:00 AM — Entergy Corporation (ETR)
7:00 AM — Southern Company (SO)
8:00 AM — Ameren Corporation (AEE)
9:00 AM — CMS Energy Corporation (CMS)
10:00 AM — Consolidated Edison, Inc. (ED)
11:00 AM — Avista Corporation (AVA)
11:00 AM — Otter Tail Corporation (OTTR)

**Dinner event.*
***30-minute meeting.*

Exelon Corporation

Taxman: Treatment of AMT Under IRA Remains Obscure; Adj Ests for Most Conservative Outcome

Summary

Exelon expects the most conservative implementation of the alternative minimum tax (AMT) provision of the Inflation Reduction Act (IRA) to result in a $200 million annual reduction in cash flow. The actual accounting treatment of this tax is subject to significant uncertainty until the Department of Treasury provides additional guidance. We are raising our EPS estimates to reflect higher expected returns at Commonwealth Edison (CWE), partly offset by lower cash flows and accelerated equity issuance. We remain Buy-rated on EXC shares and increase our PT to $47 (from $46) to reflect current market multiples.

Key Points

- ***Should 5% appear too small be thankful I don't take it all.*** Exelon disclosures assume that AMT payments are the obligation of the holding company, not its operating utilities.
- Exelon issued $575 million of common stock earlier this month. Current plans include an additional $425 million of equity over the period 2023-25. Management has indicated that it would update its equity needs later this year.
- Mizuho revised estimates assume an additional $675 million of equity over the same three-year period ($250 million above the company's current projection). FFO/Debt in our forecast remains at 13% or above.
- Our forecast assumes Commonwealth Edison's return on equity is reset to 9% in the upcoming general rate case filing anticipated early next year. This is consistent with the current return implied under the company's formula rate plan.
- We are increasing our 2023-24 EPS estimates and introducing our 2025 EPS estimate of $2.70.

Estimate Changes

We are updating our forecast following the release 2Q2022 results.

Exhibit 1: EPS Estimate Changes

Consolidated	2022E	2023E	2024E	2025E
Current	$2.28	$2.50	$2.61	$2.70
Prior	$2.28	$2.42	$2.57	
Difference	$0.00	$0.08	$0.04	

Source: Company reports, MSUSA estimates

We are maintaining our 2022 EPS estimate of $2.28.

We are increasing our 2023 and 2024 EPS estimates by $0.08 and $0.04, respectively, to $2.50 and $2.61. The improvement reflects stronger assumed results at Commonwealth Edison attributable to higher interest rates, partly offset by the earlier timing of equity and lower parent cash flow.

We are introducing our 2025 EPS estimate of $2.70.

Mizuho estimates compound annual growth in EPS off of the midpoint of 2022 guidance of 6.2%, at the lower end of the company's 6%-8% EPS growth target through 2025. Our forecast assumes an authorized return on equity of 9% in Illinois for 2024 following its general rate case filing early next year.

Our forecast assumes FFO/Debt between 13%-14%, which is above the company's downgrade threshold of 12%. Our forecast is consistent with management's comments that it anticipates FFO/Debt to be between 13%-14%.

Our estimates do not include possible improvement in authorized returns for Commonwealth Edison beginning in 2024, when the ICC is expected to establish new cost of capital metrics. We would anticipate return on equity to be the same or better than ROE under the current formula rate plan. We also do not include the possible benefit of incentive returns.

Alternative Minimum Tax (AMT)

A key question will be how the AMT approved under the Inflation Reduction Act will affect tax normalization. One of the primary principles of normalization states that deferred taxes should be booked at the level where economic activity occurs in order to appropriately represent the economic reality of business activities. Most of Exelon's business activities occur within its operating utilities. In a prior version of the AMT passed by Congress, the only language related to normalization was limited to depreciation differences, while the IRA is silent with respect to normalization.

Effectively this will leave decisions on how normalization will be applied to company managements, their accountants, and the Department of Treasury.

Exelon has recently asserted that the AMT included in the IRA recently passed in congress will have a $200m annual impact on cash taxes paid according to a 8-K published by the company on August 16th. This is a revision from the previous estimate of a $300m impact stated in their Q2 2022 10-Q. We believe the estimate is based on the most conservative interpretation of the new law whereby the incremental tax would be booked at the holding company (versus Exelon's operating utilities).

The primary driver that determines where the tax is booked is the tax code. Under the tax code, the Department of Treasury has encouraged companies to use the separate return method whereby each subsidiary would calculate its tax obligation on a stand-alone basis using its own books and underlying records. Using this approach, Exelon utilities would not be subject to the AMT insofar as their net income is below the $1.0 billion minimum threshold under the IRA.

Under regulatory rules, companies are permitted to make modifications to the separate returns method to reflect that they are part of a consolidated group. An example would be booking net operating losses at a level where the NOLs can be monetized if a subsidiary is incurring net losses. Given that the operating companies all have less than $1.0 bn in operating income, Exelon believes that the AMT may need to be applied at the holding company level in accordance with the separate returns method where the operating companies are treated as separate businesses for tax purposes. In our forecast, Commonwealth Edison should surpass $1.0 billion of net income in 2025 which would further mitigate Exelon exposure to the AMT using this approach. Exelon expects the Department of Treasury to provide companies with guidance on how to apply the AMT. Historically this has been done through regulations, notices, and/or private letter rulings.

A secondary determining factor of where taxes should be booked is ASC 740. This accounting standard provides wide discretion to company managements and their outside auditors as to where to book an incremental tax.

Assuming that Exelon's discretion is constrained by the separate return methodology, it would need to recognize the AMT at the holding company level (not at its operating utilities). Under this scenario we believe it would be difficult for the company to recover the lost cash flow from rate-payers. If the lower deferred tax arising from the AMT were to be booked at utility level, there would be a dollar for dollar offsetting increase in rate base. Essentially, the utilities could arrive at the same level of rate base in their forecast by spending less money on capital spending.

While the company disclosures are based on the most conservative reading of the IRA, Exelon expects the Department of Treasury to provide further guidance between now and the end of the year. Our estimates are consistent with the separate

return methodology but we believe it is too early to determine where the AMT will ultimately be booked.

Valuation

Base Case

Using a sum of the parts analysis on 2024 results we derive a price target of $47 per share. Based on yesterday's closing price of $44.06, this represents price appreciation potential of 6.7% and total return potential of 9.7% including a current yield of 3.0%. Our price target is derived as follows:

We value the regulated electric distribution and transmission 2024 earnings of $2.49 using a P/E multiple of 19.5 times, a 5% premium to our electric group average multiple, resulting in a price target of $48.50.

We value the regulated gas distribution 2024 earnings of $0.48 using a P/E multiple of 17.6 times, a 5% premium to our gas group average multiple, resulting in a price target of $8.50.

We trade EXC's utilities at a 5% P/E premium to the electric and gas groups because it operates in states with above average regulatory jurisdictions.

Adjusting for unallocated debt, net of a 28% tax shield, reduces the price by $10.00.

Consistent with our methodology our price targets are dynamic changing with the group average P/E multiples and EV/EBITDA multiples recalculated on a daily basis.

Company Models

In the pages that follow, we highlight our detailed consolidated financial model, including both historical and projections for income statement, cash flow and balance sheet for Exelon Corporation from 2019 to 2024. To derive the consolidated results, we modeled full financials for each operating subsidiary. Clients who would like the full models may obtain them through their MSUSA representative or by direct request to the authors.

Price Target Calculation and Key Risks

Price Target Calculations: Our $47 price target is derived as follows:

We value the regulated electric distribution and transmission 2024 earnings of $2.49 using a P/E multiple of 19.5 times, a 5% premium to our electric group average multiple, resulting in a price target of $48.50.

We value the regulated gas distribution 2024 earnings of $0.48 using a P/E multiple of 17.6 times, a 5% premium to our gas group average multiple, resulting in a price target of $8.50.

We trade EXC's utilities at a 5% P/E premium to the electric and gas groups because it operates in states with above average regulatory jurisdictions

Adjusting for unallocated debt, net of a 28% tax shield, reduces the price by $10.00.

Consistent with our methodology our price targets are dynamic changing with the group average P/E multiples and EV/EBITDA multiples recalculated on a daily basis.

Key Risks: Equity overhang, weak commodity outlook, general economic conditions, changes in state and/or Federal regulation, weather, ongoing business operational risk, broader macroeconomic conditions, and interest rate movements are among the key risks to our rating and expected stock performance.

Receipt of Compensation

Mizuho Securities USA LLC and or its affiliates makes a market in the following securities: Exelon Corporation

Mizuho Securities USA LLC and or its affiliates has received compensation for investment banking services for Exelon Corporation in the past 12 months.

Mizuho Securities USA LLC and or its affiliates expects to receive or intends to seek compensation for investment banking services for Exelon Corporation in the next 3 months.

Mizuho Securities USA LLC and or its affiliates has managed or co-managed a public offering of securities for Exelon Corporation in the past 12 months.

Mizuho Securities USA LLC and or its affiliates have provided investment banking services for Exelon Corporation who is or was a client in the past 12 months.

The compensation of the research analyst writing this report, in whole or part, is based on MSUSA's annual revenue and earnings and is not directly related to any specific investment banking compensation. MSUSA's internal policies and procedures prohibit research analysts from receiving compensation from companies covered in the research reports.

Regulation Analyst Certification (AC)

I, Paul Fremont, hereby certify that the views expressed in this research report accurately reflect my personal views about any and all the subject companies. No part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

Rating Definitions

Mizuho Securities USA investment ratings are based on the following definitions: Anticipated share price change is based on a 12-month time frame. Return expectation is based on the stock's total return. For disclosure purposes (for purposes of the FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Buy, Neutral, and Underperform.

Buy: Stock's total return is expected to appreciate above the average total return of the analyst's industry coverage universe, on a risk-adjusted basis, over the next 12 months.

Neutral: Stock's total return is expected to be within the average total return of the analyst's industry coverage universe, on a risk-adjusted basis, over the next 12 months.

Underperform: Stock's total return is expected to depreciate below the average total return of the analyst's industry coverage universe, on a riskadjusted basis, over the next 12 months.

RS: Rating Suspended - rating and price objective temporarily suspended.

NR: No Rating - not covered, and therefore not assigned a rating.

Rating Distribution

(As of August 30)	% of coverage	IB service past 12 mo
Buy (Buy)	63.06%	61.92%
Hold (Neutral)	35.62%	48.15%
Sell (Underperform)	1.32%	40.00%

For disclosure purposes only (NYSE and FINRA ratings distribution requirements), our Buy, Neutral and Underperform ratings are displayed as Buy, Hold and Sell, respectively.

August 29, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: AEE, XEL, DUK, EXC, SRE, CMS, D, ES, AGR, CNP

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

ICYMI, we hosted management meetings with DUK and CNP last week. Links to our takeaways are included below. In the upcoming week, we are tracking proceedings in AEE's IL FRP, XEL's MN gas rate case, DUK's 2022 Carbon Plan, ComEd's IL electric rate case, and Oncor's TX electric rate case. In other news, Staff submits testimony in CMS's MI electric rate case; the VA SCC issues an order approving limited reconsideration of the SCC approval of CVOW project; and CT PURA permits AGR and ES to resume CT shutoff moratoriums next May.

ICYMI

We held management meetings with **DUK** and **CNP** this week. You can read our notes here and here.

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

AEE — Surrebuttal testimony in AEE's IL FRP is scheduled for August 30: In rebuttal testimony, Staff proposed a revenue increase of $61M. In the Company's rebuttal testimony, AEE is requesting a revenue increase of $83.7M. The Staff proposes a 50% equity layer vs. the Company's proposed 53.99% equity on a $3.9B rate base. The ROE of 7.85% is formulaic. A final decision is expected by the end of 2022, with new rates effective in January 2023. This may be AEE's last FRR filing in IL with the next rate review likely being an MYRP. The ICC is expected to approve PBR to be used under the new framework this fall.

XEL — Direct testimony in XEL's MN gas rate case is due on August 30: NSP-MN filed a gas rate case for $36M based on a 10.5% ROE and an equity ratio of 52.5%. In addition to the filing, XEL filed a petition for approval of a deferral of depreciation expense, distribution O&M expenses, and property tax expenses for the calendar year 2022 as an alternative to litigating the rate case proceeding. A gas interim rate increase of $25M went into effect on January 1.

DUK — Staff and intervenor testimony in the 2022 NC Carbon Plan is due on September 2: DUK provided testimony to address the Commission-identified issues for its 2022 Carbon Plan. DUK replied to several topics brought up by the NCUC that need to be addressed in the near term to keep DUK on the proper trajectory for the Carbon Plan. The actions include procuring substantial solar and battery resources, improvements to the transmission system to enable solar interconnections, additional coal retirements, and the addition of hydrogen-capable natural gas units. DUK does not believe it will be able to address all the issues at this time but will continue to address concerns as the Company gathers more information about market dynamics, technology, and customer behaviors. As part of the plan, DUK offered four portfolios, which outline a path to 70% carbon reduction in the early 2030s and requires the utilities to be carbon-neutral by 2050. One of the portfolios achieves 70% CO_2 reduction by 2030, and the other three achieve the target between 2032 and 2034, including offshore wind, small nuclear, or both. NCUC will rule on the plan by the end of 2022. See our note here where we discuss the Carbon Plan in detail.

EXC — Surrebuttal testimony in ComEd's IL electric rate case is scheduled for September 2: Staff filed rebuttal testimony recommending a $200M revenue increase, in line with ComEd's updated revenue requirement filed in rebuttal testimony. Staff and ComEd's increases are premised on a 7.85% ROE (which is formulaic), 49.45% equity, and a rate base of ~$14B. A final decision is expected toward the end of the year, with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL. EXC is currently engaged in finalizing the PBR framework that will make its way into the next rate case, which is expected to be filed in early 2023 for rates effective in 2024. **Updated for rebuttal testimony.**

SRE — Staff testimony in Oncor's TX electric rate case is scheduled for September 2: In intervenor testimony, the OPUC highlights $78.6M of adjustments, implying a required revenue increase of $172M. The main differences are depreciation (~$37M) and self-insurance reserve losses ($40M). Oncor filed a GRC in May, seeking a $251M net increase in rates ($287M increase in distribution

rates offset by a $36.5M reduction in transmission rates) with a 10.3% ROE, 45% equity layer, and a 2021 rate base of $18.8B. Oncor's last rate case was settled in 2016 at 9.8%, 42.5% equity layer. The primary factors contributing to the proposed rate increase are the move to a higher equity layer and a higher ROE, the growth in Oncor's under-recovered self-insurance reserve balance, and expenses associated with COVID response, among others.

Recent Developments for Companies Under Our Coverage

From our midweek: The DoC staff recommends an extension of the deadline for preliminary determination in the AD/CVD inquiries; VEPCO files a petition for limited reconsideration of the SCC approval of the CVOW project; FE receives final approval for the $180M settlement in the shareholder derivative litigation; the Supreme Court orders a postponement in the GA PSC elections; MISO submits an SSR Agreement to extend Rush Island plant operations; Staff files testimony in Delmarva's MD multiyear electric rate case; the MN PUC approves the settlement in CNP's gas rate case; the DOJ requests PUCO to delay the investigations into FE that resulted from the bribery scandal for six months; AR contemplates joining LA's Fifth Circuit filing with reference to Grand Gulf; and AGR and ES seek to end the CT shutoff moratorium.

CMS — Staff submits testimony in CMS's MI electric rate case: MI PSC Staff filed testimony recommending a $170M revenue increase, premised on 9.70% ROE and 51.0% equity. The delta lies primarily in the lower recommended ROE. CMS is seeking a revenue increase of $274M (net increase of $266M) based on 10.25% ROE, a 51.5% equity layer, and a projected YE23 test year. The drivers of the present case include investments in new solar and natural gas-fired generation, system reliability, resilience, and cost recovery for the planned acquisition of the Covert plant in 2023. CMS requests rates to be effective March 1, 2023. We view staff testimony as constructive, especially compared to the last electric case outcome, and expect the ultimate outcome to be bookended by CMS's ask and testimony offered by staff.

Figure 1 - CMS Electric Rate Case Summary

2022E Net Income Calc ($M)	CMS	Staff
Rate Base	13,801.8	13,432.5
Projected Net Operating Income	601.3	621.8
ROR (Calculated)	4.36%	4.63%
ROR (Required)	5.84%	5.58%
Income Required	806.0	749.5
Income Deficiency	204.7	127.7

Total Net Operating Income	**601.3**	**621.8**

Source: Company filings, regulatory filings, KeyBanc Capital Markets Inc. estimates

D — SCC issues order approving limited reconsideration of recent SCC order regarding CVOW project: The SCC issues an order agreeing to reconsider the performance guarantee requirement to meet a 42% net capacity factor on a three-year rolling average basis throughout the life of the project and will allow the Rider OSW to be implemented on an interim basis. The order comes after D requested a reconsideration of the SCC's prior decision in favor of a more reasonable and flexible standard. See our note here wherein we discuss the SCC's performance guarantee clause and D's position on it. D posits that the SCC lacks the authority to impose a performance guarantee of this nature and that it is unreasonably broad in scope, leaving D to manage factors that may be outside its control. In the filing, D went as far as saying that it may have to terminate all development and construction activities relating to the project if the condition is allowed to stand. The next dates to watch are responses from objecting parties due by September 13 and D's reply by September 22.

AGR, ES — CT PURA permits AGR and ES to resume CT shutoff moratoriums beginning next May: The CT PURA will permit AGR and ES to resume service shutoff for hardship service customers with unpaid bills in May 2023. The lead time will allow the

customers adequate time to be informed and protect customers from being shut off during the winter period. CT is the last state with a shut-off moratorium in place, which went into effect at the beginning of the pandemic. The utilities have ~$171M of bills that are more than 60 days outstanding and, without any recourse from PURA, will be forced to pass the unpaid bills to ratepayers. Other states have resumed disconnections and implemented bill credit programs to assist customers with overdue bills.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

CMS/Power – Covert plant owners file with FERC for sale to CMS

EVRG – Statement of positions filed in MO cases

NWN – Closing briefs filed in GRC

WEC – Amended procedural schedule issued in Wisconsin rate cases

SO – Georgia PSC will not have November elections, special election to follow in 2023

- A judge postponed the elections a few weeks ago, ruling the electoral structure (statewide elections for regional district seats) disenfranchises Black voters.
- A week later an appeals court reversed that decision, pending the state's appeal of that first ruling.
- On Friday, the U.S. Supreme Court weighed in, ruling the elections shouldn't go forward after all while the appeal continues. The state isn't fighting that decision.
- SCOTUS Order HERE.

Guggenheim takeaway: *The elections will not happen in November, despite the state continuing to appeal the judge's ruling. Regardless of the outcome, a special election will have to happen with either the existing or revised electoral district structure, likely next year. Commissioners Tim Echols and Fitz Johnson are up for re-election. See our comprehensive note following our in-person meetings with the entire PSC in GA HERE.*

NWE – Evacuations ordered for fire burning off Eagle Bay Drive near Canyon Ferry Lake

- The fire has been named the Rising Moon Fire. According to the Sheriff's Office, the fire was first reported about 9:30 p.m.
- Officials have not released a possible cause of the fire or estimated size. The Helena area and the Big Belt Mountains saw hundreds of lightning strikes Monday night as storms rolled through the area.
- NorthWestern Energy's outage map says power is out for about 1,800 customers near the fire. Power is expected to be restored around 8:00 a.m.
- More from the Lewis & Clark County Sheriff's Office HERE.

Guggenheim takeaway: *FYI – monitoring. See our note on our expert call last year regarding inverse condemnation in Montana HERE.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:23 PM.

Supply chain – Transformer shortage hits utilities as peak U.S. hurricane season arrives

- A lack of replacements could delay recovery from major storms, although the dimensions of that risk are not clear, according to electric industry officials.
- When the American Public Power Association surveyed members at the beginning of 2022 asking how long delivery of new transformers was taking, the average was about a year, compared with an average three-month wait in 2018, according to Corry Marshall, Senior Director for Government Relations.
- More HERE.

Guggenheim takeaway: *More color regarding the ongoing supply chain shortage affecting transformers and other vital utility equipment. See our Daily write-up last week (HERE) for more.*

EXC – ComEd customers' RICO suit dismissed in federal court

- 9 ComEd customers had sought to charge the utility under the Racketeer Influenced and Corrupt Organizations Act for legislation passed under Speaker Madigan.
- More HERE.

Guggenheim takeaway: *Minor FYI – the case was dismissed on state-federal lines – not dissimilar to many industry jurisdictional lines, in our view.*

ES/CT – CT utilities seek end to COVID shutoff moratorium

- CT is the last state in the nation to have a COVID shutoff moratorium.
- Customers have accrued $171mm in bills 60+ days overdue.
- More HERE.

Guggenheim takeaway: *Interesting data points as PURA looks to strike a balance between low income customers and allocation to other classes.*

FE – U.S. District Judge issues order accusing FirstEnergy defendants of "numerous misrepresentations of fact"

- With U.S. District Judge John Adams of Akron on the verge of appointing new shareholder lawyers to resume litigating derivative claims against directors and officers of the Ohio utility FirstEnergy Corp, FirstEnergy board members tried Saturday to halt, at least temporarily, the revival of a case they regard as settled.
- Adams responded on Monday afternoon with an order accusing the FirstEnergy defendants of "numerous misrepresentations of fact." The judge rejected defendants' assertion that he "injected" false information into the record of the case by engaging in extrajudicial internet research. He also suggested that he's not going to allow FirstEnergy defendants to continue to obstruct depositions of former top executives.
- More HERE.

Guggenheim takeaway: *FYI — the HB 6 saga continues.*

CMS/Power – Covert plant owners file with FERC for sale to CMS

- The ~1.2GW CCGT will be rolled into CMS's ongoing IRP and capex plans.
- More HERE.

Guggenheim takeaway: *Part of the process – see our 2Q note HERE for more info.*

EVRG – Statement of positions filed in MO cases

- Multiple parties, including Staff and the OPC have filed their position statements.
- EVRG HERE.
- Docket HERE.

Guggenheim takeaway: *Heads up and some lengthy helpful summaries of the current bid-asks as the process heads into conferences and a key stretch for potential settlement.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:23 PM.

NWN – Closing briefs filed in GRC

- OPUC Staff and others have filed their closing briefs in the ongoing case.
- "In this brief Staff responds to arguments related to the AAC and rate spread for SB 98 projects and responds to an additional argument raised by the Coalition in its Opening Brief related to the prudence of NW Natural's Lexington RNG Project." - Staff
- Docket HERE.

Guggenheim takeaway: *Minor FYI – most of the items were included in the prior stipulations, with the remaining puts and takes relatively straightforward, in our view – Staff pushes back against many intervenor criticisms of SB98 spend.*

WEC – Amended procedural schedule issued in Wisconsin rate cases

- As below:
  - 09/09/2022 4:00 PM Offered Evidence Direct : Intervenor and Commission Staff

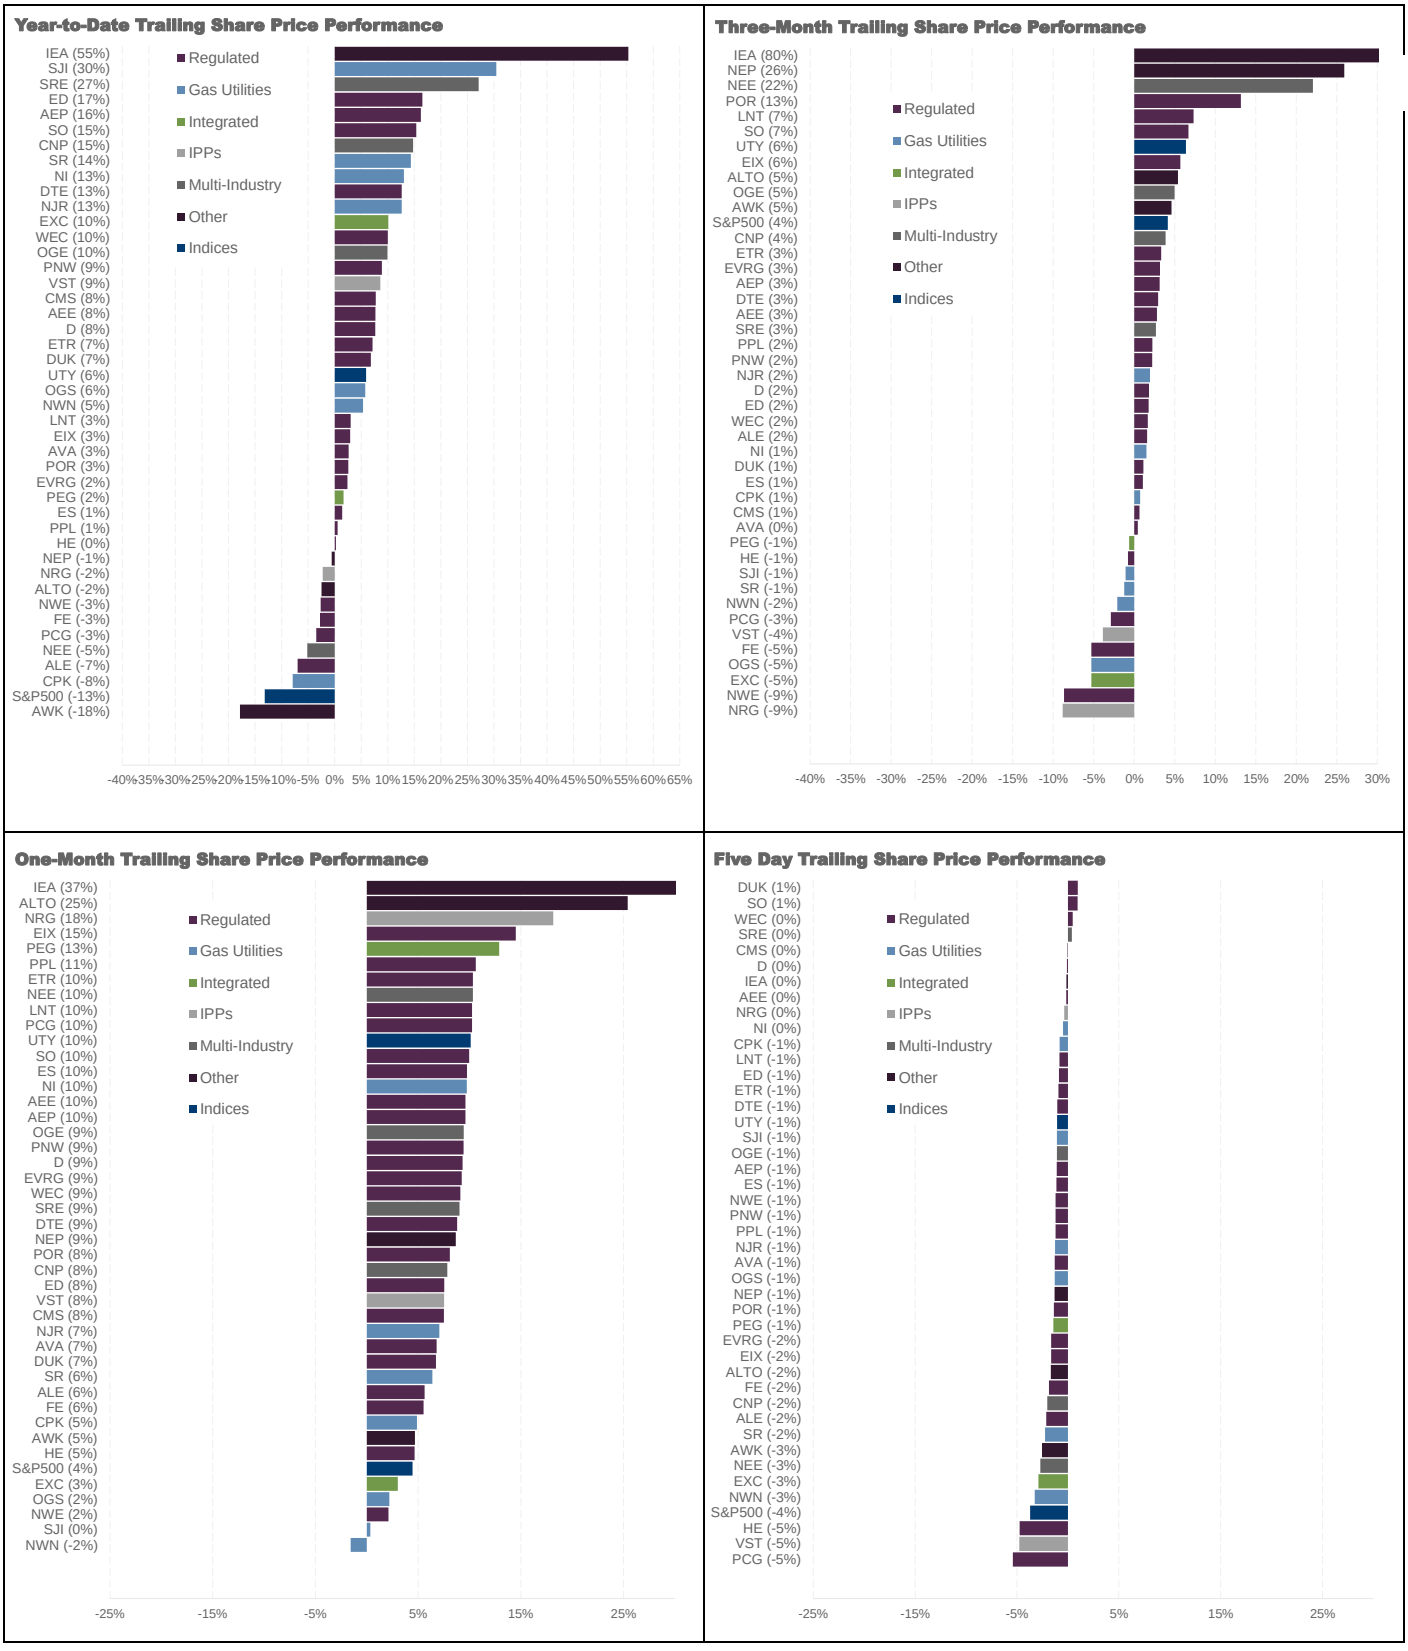
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:23 PM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Forward Power Curves, Genco MtM, and Weekly Commentary (see our note HERE)

ETR – Entergy exploring minority stake sale

ETR – LA PSC files suit over SERI process

PCG – Lawmakers draft plan pushing back on Governor's Diablo Canyon efforts

EXC – PO filed in performance metric docket

DUK – Further testimony filed in Carbon Plan docket

ES/MA – Initial briefs filed in NStar Electric case

EVRG/KS – EVRG IRP Update comment deadline extended to 8/29

PCG – CPUC to hold virtual evidentiary hearing in cost of capital docket

PEG – NY governor meets with utilities on LI ahead of storm season

PCG – PCG to begin building remote grids in 4 locations

ETR – Entergy exploring minority stake sale

- According to multiple reports late last week, ETR is exploring a stake sale in its Gulf utility holdco (AR, LA, MI, NOLA) across a two-tranche process (remaining 50% by 3Q25).
- More HERE.

Guggenheim takeaway: *Very much in line with our thoughts following the analyst day in June, when the team acknowledged the valuation arbitrage between the stock and private asset valuation and discretely called out strategic financing options in the analyst day presentation* ***(also see our NDR note here)****, although it was interesting to see that Entergy TX is not part of the potential transaction. Mgmt. did not see any jurisdiction as non-core (i.e., leaving the door open to partial OpCo equity monetization). Incremental commentary in June was mgmt. being open to strategic options, which would include some work on regulatory and stakeholder alignment. In our view, ETR continues to execute on a plan with increasing upside potential and financial headwinds continue finding constructive resolution, which in our view is a repeating and constructive signal of utility fundamentals.*

ETR – LA PSC files suit over SERI process

- The PSC has filed a suit in the US 5th Circuit Court of Appeals claiming that FERC is delaying the hearing process.
- "Because of federal preemption, (Entergy) continues to collect excessive rates and state regulators can do nothing but seek relief at FERC, which the agency puts off through delay," – lawsuit, per The Advocate
- More HERE.

Guggenheim takeaway: *As we noted following the MPSC settlement, intervenors will continue to push for incremental benefits for customers. ETR mgmt. has previously disclosed that the financial plan had already accounted for the proposed decision (FERC ALJ, noted here) on cost of capital, while the cash refund portion was not explicitly in the plan presented at analyst day, the position of the MPSC settlement was contemplated in*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

planning scenarios (and therefore ETR reaffirmed EPS guidance). We maintain our view that ETR conservatism and flex in plan can absorb the potential EPS impacts (i.e., financing $588M is within the range of the improved credit metric trajectory from Analyst day). More thoughts on the analyst day here.

PCG – Lawmakers draft plan pushing back on Governor's Diablo Canyon efforts

- The plan from lawmakers would divert the Governor's proposed funds for the plant (~$1.4bn) towards EE, transmission, and renewables, alongside separate ratepayer support efforts.
- The proposal ""feels like fantasy and fairy dust, and reflects a lack of vision and a lack of understanding about the scope of the climate problem," according to a spokesman via the AP.
- More HERE.

Guggenheim takeaway: *Another interesting point on the nuclear shutdown debate from CA. The shutdown plans have been in place for a long time including both a path to decommission and replace the resources, but with the bridge financing and administrative support from the state there is adequate time for a potential extension. PCG mgmt. previously indicated there have been productive discussions with the State including around midterm reliability with the Governor. In our view, while the directive is to decommission and retire the asset, PCG could potentially be open to exploring options within a regulated constructive. This situation could turn out differently than the Palisades nuclear plant in MI – i.e., PCG has more time to pivot, if possible.*

EXC – PO filed in performance metric docket

- The ICC has filed a lengthy proposed order in ComEd's ongoing performance metrics docket.
- "As an initial matter, the Commission agrees that there is no evidence in the record to suggest that the incentive structure that is appropriate for Ameren would be equally appropriate for ComEd. The fact that a different total number of basis points is being adopted in the Ameren proceeding is immaterial to the appropriate amount of basis points that should be awarded in this proceeding. ComEd requests that the Commission approve the statutory maximum of 60 total basis points…. Based on the proposed metrics offered by ComEd and other parties in this proceeding, and the arguments regarding basis point allocation addressed infra, the Commission approves Staff's proposal to adopt a total of 36 basis points." – ICC
- "The Commission finds that there is insufficient information on which metrics will provide the most benefits and therefore should be given more basis points. Because the Commission adopts Staff's equal division of basis points among the six statutory categories (see Section IV.B.8 of this Order), the Commission further adopts Staff's proposal to evenly distribute the six basis points within the reliability and resiliency category among Performance Metrics 1-3 that are discussed in Section VI.A of this Order." - ICC
- Order HERE.

Guggenheim takeaway: *Heads up on the lengthy order, which we continue to parse. It would appear that the ICC has hewed closer to Staff, which is not a surprise, in our view.*

DUK – Further testimony filed in Carbon Plan docket

- Public and confidential testimony filed by Duke Energy relating to its Carbon Plan in North Carolina.
- Docket HERE.

Guggenheim takeaway: *The NCUC's evaluation of DUK's Carbon Plan continues to progress towards its Dec 31st statutory deadline.*

ES/MA – Initial briefs filed in NStar Electric case

- Multiple initial briefs have been filed in the ongoing electric case, with the DOER and others continuing to focus on the PBR plans, trackers, rate term (five-year rate vs. ten) and other familiar items.
- AG continues to propose an 8.95% ROE.
- Docket HERE.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:22 PM.

Guggenheim takeaway: *Nothing jumping out in our initial reads of the briefs following the evidentiary hearings, as the window for settlement remains open ahead of the reply briefs in another ~4 weeks. As a reminder, we recently upgraded ES and held an NDR with the C-Suite where we discussed the case –* ***see those notes HERE and HERE.***

EVRG/KS – EVRG IRP Update comment deadline extended to 8/29

- "KEPCo's Motion for Extension of Time to File Comments on the Evergy Kansas Central and Evergy Metro 2022 Integrated Resource Plan Annual Update is granted…. All parties' comments to Evergy's 2022 Integrated Resource Plan Annual Update are due August 29, 2022."
- More HERE.

Guggenheim takeaway: *Minor FYI.*

PCG – CPUC to hold virtual evidentiary hearing in cost of capital docket

- "NOTICE IS HEREBY GIVEN that the Public Utilities Commission of the State of California has set a virtual evidentiary hearing in the above-entitled matter before Administrative Law Judge Brian Stevens for September 12-16, 2022" - CPUC
- More HERE.

Guggenheim takeaway: *For you calendars.*

PEG – NY governor meets with utilities on LI ahead of storm season

- The governor held a press conference and meeting to discuss the state's preparedness efforts as the peak of hurricane season approaches.
- More HERE.

Guggenheim takeaway: *Minor FYI.*

PCG – PCG to begin building remote grids in 4 locations

- The utility is deploying remote grids in an effort to lower the need for overhead transmission in high-threat areas.
- The first project in Tehama County will reportedly remove the need for 2 miles of overhead line.
- More HERE.

Guggenheim takeaway: *Interesting data point.*

Equity Research | Corporate Access

NextEra Energy, Inc. (NEE)

Kirk Crews, *Chief Financial Officer*
Jessica Geoffroy, *Head of Investor Relations*

Date
August 30–September 1, 2022
West Coast

Meeting Format
NDR - 1:1 Meetings

Company Information
Market Cap: $155.02bn
NextEra Energy, Inc. (NEE) is an electric power and energy infrastructure company. It operates through the following segments: FPL and NEER. The FPL segment engages primarily in the generation, transmission, distribution, and sale of electric energy in Florida. The NEER segment produces electricity from clean and renewable sources, including wind and solar. It provides full energy and capacity requirements services, engages in power and gas marketing and trading activities, participates in natural gas production and pipeline infrastructure development, and owns a retail electricity provider. The company was founded in 1984 and is headquartered in Juno Beach, FL. (Source: FactSet)

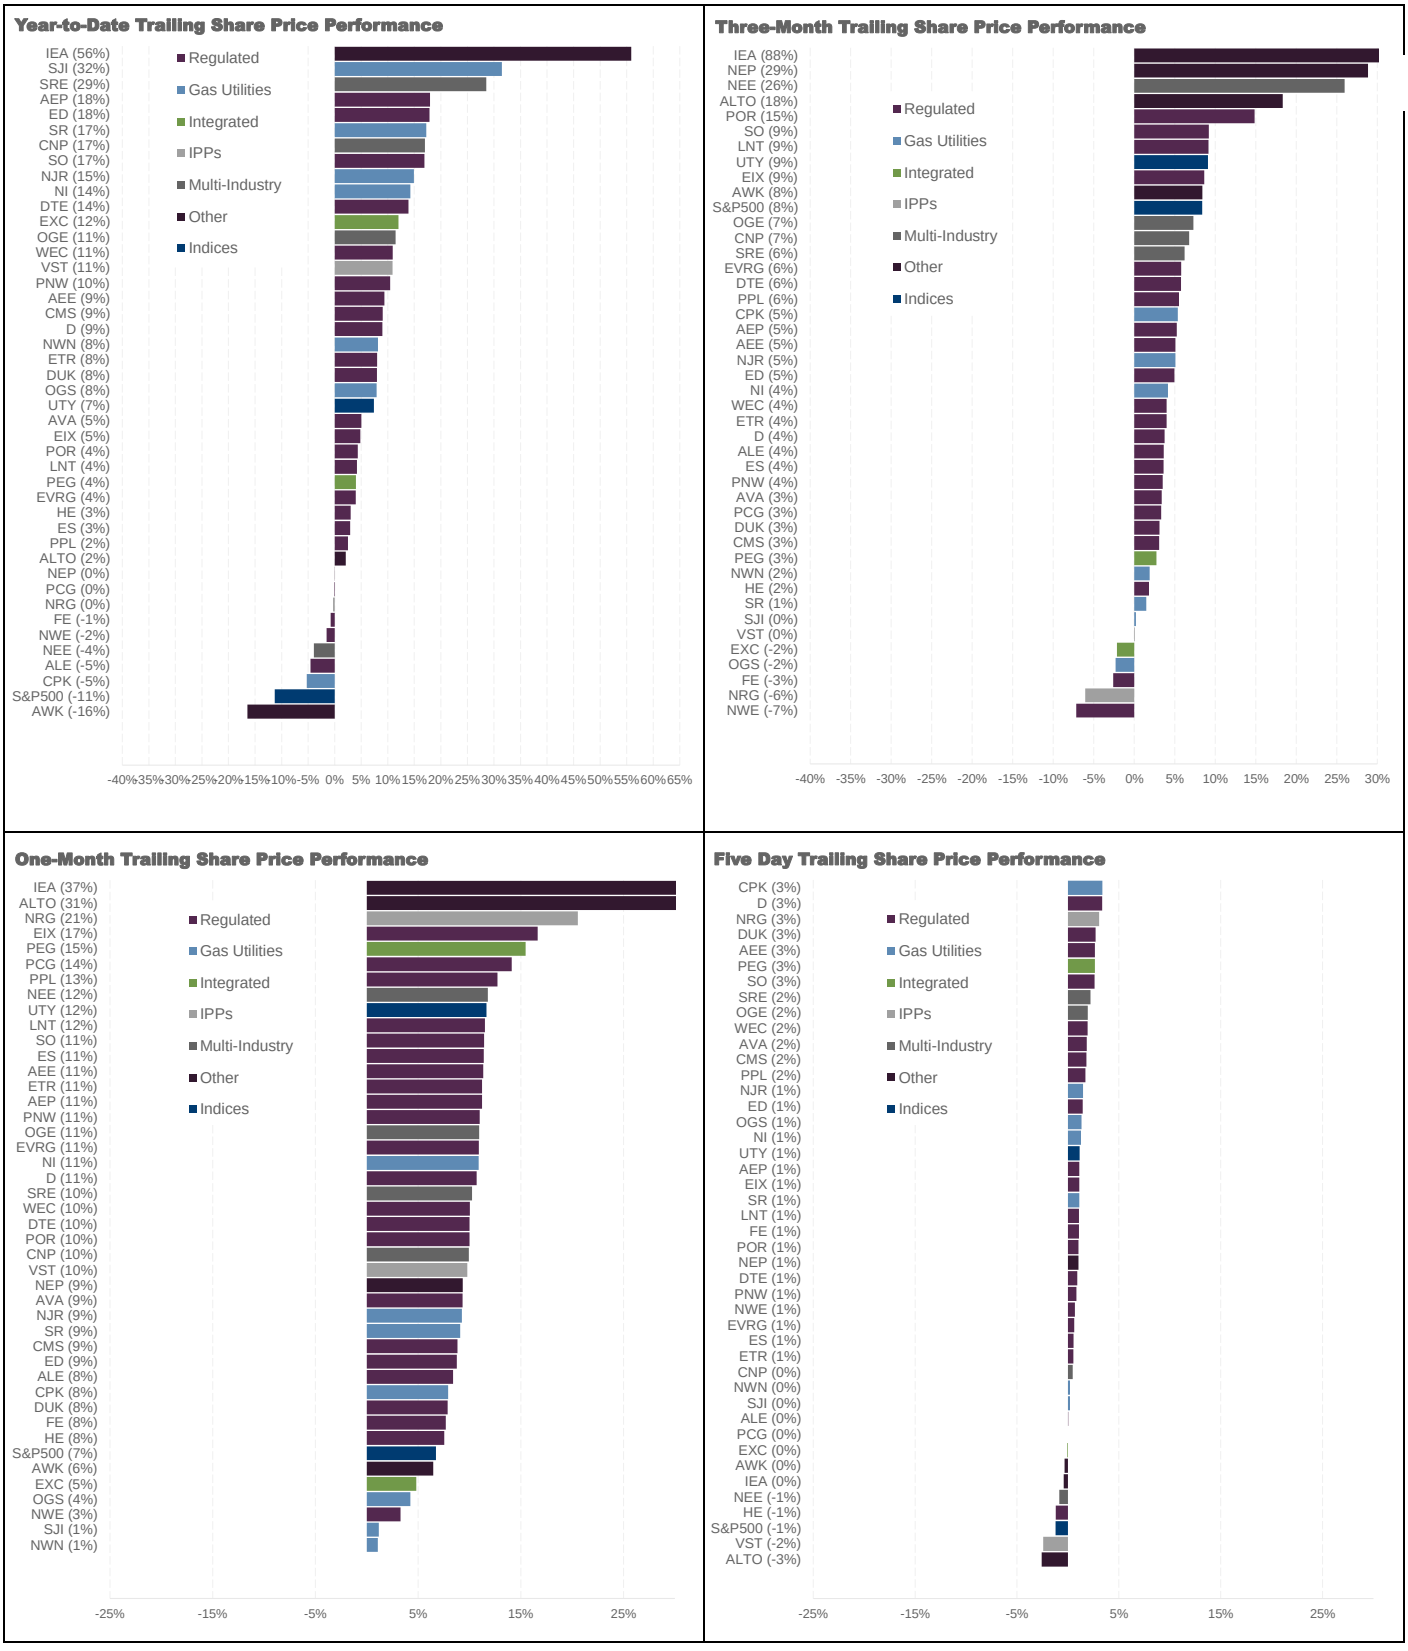
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: CMS, EXC, DUK, SRE, AEP, AVA, EIX, ETR, ES, CNP, FERC

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We have a full slate of meetings and dinners planned at the EEI and invite you to join us. In the upcoming week, we are tracking proceedings in CMS's MI electric rate case, ComEd's IL electric rate case, DUK's OH electric rate case, and Oncor's TX electric rate case. In other news, the VA Supreme Court remands APCO's 2020 rate case back to the VA SCC; AVA files rebuttal testimony for its WA electric and gas rate case settlements; DUK Piedmont reaches settlement in its SC gas rate case; CA utilities file a joint motion to include IRA provisions in net-metering proceedings; the NOCC approves ETR's New Orleans 2021 IRP; the ICC approves ComEd's $38M customer refund proposal; DUK files testimony in the 2022 NC Carbon Plan; the NH PUC approves ES's EV infrastructure program settlement; CNP delays the retirement of a 90 MW coal unit as part of its 2022 IN IRP; we review comments filed in the FERC NOPR on transmission planning; and CA legislature challenges proposed $1.4B loan to extend Diablo Canyon's operation.

KBCM Invites You to Join Us at the EEI Financial Conference from November 13-15 in Hollywood, FL. Scroll down for our full schedule, including dinners with PEG and NWE.

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

CMS — Staff and intervenor testimony in the MI electric rate case is scheduled for August 24: CMS filed an electric GRC with the MPSC requesting a $272M base rate increase on a 10.25% ROE and a projected YE23 test year. The main drivers of the present case include investments in new solar and natural gas-fired generation, system reliability, resilience, and cost recovery for the planned acquisition of the Covert plant in 2023.

EXC — Staff's rebuttal testimony in ComEd's IL electric rate case is scheduled for August 24: Staff filed testimony recommending a $195M revenue increase, in line with ComEd's formula rate plan proposal for a $199M revenue increase. Staff and ComEd's increases are premised on a 7.85% ROE, 49.45% equity, and a rate base of ~$14B. ROE calculation in the FRP is formulaic. ComEd's previous rate plan was approved at a 7.36% ROE in 2021. A final decision is expected toward the end of the year, with new rates effective in 2023. This will be EXC's last formula rate plan filing in IL. EXC is currently engaged in finalizing the PBR framework that will make its way into the next rate case, which is expected to be filed in early 2023 for rates effective in 2024.

DUK — Intervenor testimony in DUK's OH electric rate case is due on August 26: In an investigation report, Staff recommended a revenue increase in the range of $1.9M-$15.3M, based on an ROE range of 8.84-9.85%, and an equity layer of 50.50%. The delta vs. DUK's filing seems to be driven by the difference in the ROE. This compares to the Company's request for a $55M revenue increase on a 10.3% ROE and a 50.5% equity layer to support investments in grid upgrades and modernization.

SRE — Intervenor testimony in Oncor's TX electric rate case is scheduled for August 26: Oncor filed a GRC in May, seeking a $251M net increase in rates ($287M increase in distribution rates offset by a $36.5M reduction in transmission rates) with a 10.3% ROE, 45% equity layer, and a 2021 rate base of $18.8B. Oncor's last rate case was settled in 2016 at 9.8%, 42.5% equity layer. The primary factors contributing to the proposed rate increase are the move to a higher equity layer and a higher ROE, the growth in Oncor's under-recovered self-insurance reserve balance, and expenses associated with COVID response, among others.

Recent Developments for Companies Under Our Coverage

From our midweek: The Inflation Reduction Act was signed into law but will impact utilities differently. In other news, the ALJ proposes to extend the deadline for NEM 3.0 tariff structure proceedings; CMP files a three-year rate plan proposal with the ME PUC; DUK FL seeks a 25 bps increase to authorized ROE; FE receives approval to end monitoring at former coal ash landfill site and will seek to repurpose it as a solar farm; XEL seeks FERC approval to acquire 120 MW of wind; BE announces the issuance of 13M shares of common stock; NJ seeks carve-out for Ocean Wind turbines; CAISO issues Flex Alert; SoCalGas partners with Ford on Fuel Cell truck; PNW partners with Generac for DER system; ETR CEO Leo Denault will step down at the end of October and be succeeded by CFO Drew Marsh; NJ Senate confirms BPU commissioner; and ERCOT names its new CEO.

AEP — VA Supreme Court rules that the VA SCC must reconsider APCO's 2020 rate case: The VA Supreme Court sent AEP's APCO 2020 rate case (Docket: 2020-00015) back to the SCC with a ruling that APCO is allowed to record costs of early coal plant retirements as asset impairments. The ruling stems from a difference between AEP's and SCC's positions during the rate case involving the treatment of costs associated with the early retirement of certain coal and oil-fired plants. At the time, the SCC determined that APCO should have amortized the coal plants over 10 years from 2015 vs. impairing them in 2019. The reconsideration ruling from the VA Supreme Court comes after AEP appealed the decision to the Supreme Court in March 2021 and the SCC affirmed, with some modifications, its original decision during a rehearing. In its original ruling, the Commission concluded that no rate change was required as APCO had earned 9.48% for the 2017-2019 period, within the 8.72-10.12% ROE band prescribed by VA state law.

AVA — AVA files rebuttal testimony in WA electric and gas rate cases: AVA filed rebuttal testimony in response to WA AG's Public Council Unit's opposition to the WA multiparty electric and gas settlement. AVA argues that the PCU's recommendation for a lower ROR is unreasonable, resulting in a $19M reduction to the revenue requirement and would be lower than AVA's current allowed ROR. AVA would continue to under-earn its authorized ROE based on the proposed revenue requirement and would see even more regulatory lag. AVA also believes the customer has significant protection through the overall earnings test, the ERM mechanism, actual net rate base tracking, and expense balancing accounts that address $56M of the PUC's concerns. As a reminder, WA AG's PCU filed testimony opposing the multi-party settlement previously reached. In its testimony, the PCU contended that AVA overstated the request for rate increases in Y1 and Y2 and that the settlement is higher than AVA's revenue deficiency. The PCU determined that AVA requires electric revenue increases of $0.4M and $2.8M and gas revenue increases of $1.7M and $0.2M in RY1 and RY2, respectively. The PCU concludes that the ROR should be 6.46%, compared to the 7.03% ROR in the settlement. This compares to the settlement agreement for increases of $38.0M and $12.5M for electric, and $7.5M and $1.5M for gas in RY1 and RY2, respectively. Settlement hearings begin on September 19, and new rates are expected to go into effect in December 2022.

DUK — DUK Piedmont reaches settlement in SC gas rate case: DUK reached a multi-party settlement for a net revenue decrease of $0.02M premised on a 9.49% ROE and 53.5% equity layer. The net decrease includes a revenue increase of $2.88M and a $2.90M revenue adjustment for the cost of gas demand. The SC Department of Consumer Affairs reserved its right to contest the agreed-upon ROE and equity layer at the merits hearing. This compares to DUK's initial request of a $6.7M net revenue increase on a 9.9% ROE (54.56% equity with a $505M YE21 rate base) and Staff's proposed $0.19M net revenue decrease premised on a 9.3% ROE and 53.05% equity. As a reminder, this was Piedmont's first rate-case filing in nearly two decades. The utility has been operating under SC's Rate Stabilization Act since 2005. This allows the gas utility to adjust rates regularly based on gas prices and other factors, but DUK reached a settlement in June, allowing the rate case to serve instead of the rate adjustment this year.

EIX, SRE — CA utilities file a joint motion to include IRA provisions in net-metering proceedings: The CA utilities filed a joint motion with the CPUC to include provisions of the IRA into NEM 3.0 deliberations. Specifically, the extension of tax credits in the IRA will reduce solar adoption costs, reducing the payback period for customers. As a result, the modeling assumptions initially included in the ALJ's PD in December 2021 should change as those accounted for a lower tax credit and near-term phase-out of the credits. The proceeding at the CPUC to determine a tariff structure to succeed NEM 2.0 are likely to extend for another year after the ALJ recently proposed an extension to the statutory deadline for the net metering proceedings until August 27, 2023.

FERC — Initial comments on FERC's transmission planning NOPR show conflicting views on ROFR: Comments were filed last week in the FERC's NOPR to address regional transmission planning and cost allocation to facilitate renewables integration (FERC Docket RM21-17). The DOJ and the FTC are both urging FERC not to reinstate the ROFR for existing utilities as is currently included in the NOPR. The agencies have a longstanding antitrust policy and find the proposals anti-competitive and recommend replacing a ROFR with rules requiring competition in transmission buildouts. On the other hand, EEI is proposing that the FERC restore a full ROFR arguing that competition has not served the industry well in that it has caused project delays and increased costs. Transmission owners within the MISO footprint are proposing rescinding the ROFR provisions in Order 1000 entirely even though MISO itself is not taking a formal position other than to say that competitive bidding tends to delay projects and cost more. Several entities have also requested additional details on the ROFR provisions in the NOPR. FERC's last major transmission planning initiative was Order 1000, a decade ago. The NOPR proposes to amend Order 1000 to eliminate the federal right of first refusal for projects selected for regional cost allocation. We wrote here on some of the early comments that were filed.

ETR — NOCC approves ETR's New Orleans 2021 IRP: The NOCC unanimously approved ETR's New Orleans 2021 triennial IRP (Docket: UD-20-02). ETR included twelve portfolio options in the IRP but is not required to select a preferred portfolio. ETR does not see a need for additional capacity until the back half of the decade and believes it will be able to achieve future capacity needs through a combination of solar, battery, and wind. The NOCC did not specifically approve any assets or resource acquisitions as part of its approval. ETR will need to file for NOCC permission before future acquisitions. Furthermore, ETR will need to file a separate proceeding for the timing of the closing of the 2,158 MW Union Power natural gas facility. According to its analysis. ETR determined it would be more beneficial to keep the plant operating until 2033 vs. deactivation in 2025, as proposed in a portfolio that analyzed earlier generation retirement. ETR must file an IRP every three years in New Orleans that projects the future power supply need for the next twenty years while targeting net-zero carbon emissions by 2040 and reducing all CO_2 emissions by 2050.

EXC — ICC approves ComEd's $38M customer refund proposal: The IL Commerce Commission issued an order approving EXC's proposal to refund customers ~$38M. EXC proposed, in surrebuttal testimony, that it would refund $31.3M through ICC-jurisdictional rates and $5.0M plus $1.9M of interest through FERC-jurisdictional rates to address the two pending dockets (Dockets: 21-0607; 21-0739). Furthermore, the ICC rejected intervenors' proposals to reduce ComEd's equity ratio retroactively or in future rate cases and approved ComEd's proposed Rider DPA Refund to pay customers. Notably, all parties agreed that ComEd did not use any ratepayer funds toward the $200M DPA fine. The refunds are tied to the pay and benefits received by ComEd executives who were mentioned in the 2020 DPA. One of the dockets mentioned was opened in August 2021, and another one following the passage of the IL Clean Energy Bill that asked the ICC to investigate how ratepayer funds were used in connection with the conduct outlined in the ComEd DPA. See our note on the IL legislation here.

DUK — DUK files testimony in the 2022 NC Carbon Plan: DUK provided testimony to address the Commission-identified issues for its 2022 Carbon Plan. DUK replied to several topics brought up by the NCUC that need to be addressed in the near term to keep DUK on the proper trajectory for the Carbon Plan. The actions include procuring substantial solar and battery resources, improvements to the transmission system to enable solar interconnections, additional coal retirements, and the addition of hydrogen-capable natural gas units. DUK does not believe it will be able to address all the issues at this time but will continue to address concerns as the Company gathers more information about market dynamics, technology, and customer behaviors. As part of the plan, DUK offered four portfolios, which outline a path to 70% carbon reduction in the early 2030s and requires the utilities to be carbon-neutral by 2050. One of the portfolios achieves 70% CO_2 reduction by 2030, and the other three achieve the target between 2032 and 2034, including offshore wind, small nuclear, or both. NCUC will rule on the plan by the end of 2022. See our note here where we discuss the Carbon Plan in detail.

ES — NH PUC approves ES's EV infrastructure settlement: The NH PUC issued an order approving a settlement between ES and parties for the New Hampshire EV-Make Ready program. As part of the program, ES will invest $2.1M in EV service equipment that the utility will be able to book as a regulatory asset and seek to recover in its next rate case. $0.65M of that capital will be eligible to earn a return on capital. Furthermore, the PUC approved the optional Demand Charge Alternative rate for public EV charging stations, which will be offered for an initial three-year period, in addition to an optional commercial EV TOU rate and a general C&I service rate. The DCA rates will go into effect on September 1. Part of the program will be financed through NH's share of Volkswagen AG's $2.9B Environmental Mitigation Trust. The Make-Ready EV charging Infrastructure Program was included in ES's last electric rate case.

CNP — CNP delays the retirement of 90 MW coal unit as part of IN IRP: As part of the IN IRP process, CNP is delaying the retirement of the 90 MW Culley 2 coal unit by two years, and now expects to retire the plant in 2025. CNP highlighted the required investment in Culley to meet CCR rules, whether the unit remains operational or not, as partial reasoning for the delay. CNP will not need any incremental investments in Culley 2 to keep the unit running for the additional two years while reducing CNP's exposure to MISO's capacity market. The delay was announced in tandem with the commencement of the stakeholder process of the 2022 IRP. CNP will be filing the IRP in 2023 (the deadline Is June 1, 2023) and should consider the remaining coal retirements with potential benefits likely from the Inflation Reduction Act of 2022. Several utilities in MISO have recently announced plans to extend the lives of coal plants, including WEC, which attributed the decision to delays in renewable generation projects.

PCG (Not Covered) — CA legislature challenges the proposed $1.4B loan to extend Diablo Canyon's operation: CA Democratic legislators proposed to reject Governor Newsom's plan to issue a $1.4B loan to PG&E to extend operations at Diablo Canyon past its 2025 scheduled closing date. CA would instead use $1B for renewable energy, transmission buildout, and increased storage. This proposal comes after Governor Newsom recently proposed to keep Diablo Canyon operating through 2035, or 10 years past its planned closure date in 2025, by giving PG&E a $1.4B forgivable loan. The proposal was part of a draft legislative language that would exempt the Diablo Canyon extension from the CA Environmental Quality Act and other environmental rules that nuclear opponents could use to challenge the extension. State officials are worried that the grid could become compromised without Diablo Canyon, CA's single largest power source at 2,250 MW.

Scroll down for a complete EEI schedule...

KBCM EEI Schedule Tentative Agenda (All Times Eastern):
Sunday, November 13, 2022

12:00 PM – Eversource Energy (ES)
1:00 PM – CenterPoint Energy, Inc (CNP)
2:00 PM – Xcel Energy Inc. (XEL)
3:00 PM – Sempra Energy (SRE)
4:00 PM – WEC Energy Group, Inc. (WEC)
5:00 PM – Atlantica Sustainable Infrastructure plc (AY)
*Dinner – Dinner with Public Service Enterprise Group Incorporated (PEG)**

Monday, November 14, 2022

8:00 AM – Duke Energy Corporation (DUK)
8:45 AM – Avangrid, Inc. (AGR)**
9:00 AM – Pinnacle West Capital Corporation (PNW)
10:00 AM – Exelon Corporation (EXC)
11:00 AM – Edison International (EIX)
12:00PM – DTE Energy Company (DTE)
1:00 PM – NorthWestern Corp (NWE)
2:00 PM – American Electric Power Company, Inc. (AEP)
3:00 PM – Portland General Electric Company (POR)
4:00 PM – FirstEnergy Corp. (FE)
*Dinner – Dinner with NorthWestern Corp (NWE)**

Tuesday, November 15, 2022

7:00 AM – Entergy Corporation (ETR)
7:00 AM – Southern Company (SO)
8:00 AM – Ameren Corporation (AEE)
9:00 AM – CMS Energy Corporation (CMS)
10:00 AM – Consolidated Edison, Inc. (ED)
11:00 AM – Avista Corporation (AVA)
11:00 AM – Otter Tail Corporation (OTTR)

**Dinner event.*
***30-minute meeting.*

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. Industry Update — August 18, 2022

Utilities

Utility and Infrastructure Daily

Comments on ETR, EXC & Water Utilities

Our Call

Quick thoughts from Wells Fargo Securities, LLC Utility & Infrastructure Team:

Utilities

Entergy (ETR/Overweight) (Kalton) — Is there something in the water? On 8/17, ETR announced that Leo Denault would step down from the CEO role to be succeeded by CFO Drew Marsh effective 11/1/22. Mr. Denault will remain Executive Chairman until his planned retirement in '23. There have been several notable utility CEO retirements over the last several months, including AEP & NEE. Like the others, we view the ETR announcement as a natural transition. Mr. Denault has been CEO for 10 years, while Mr. Marsh has been in the CFO role since 2013 (Chief Accounting Officer Kimberly Fontan will succeed Mr. Marsh in the CFO role). We see no change to ETR's attractive regulated rate base growth strategy with an emphasis on improving storm resiliency. Longer term, we think ETR is uniquely positioned to benefit from the parallel trends of decarbonization as the company's Gulf Coast industrial base increasingly electrifies their operations.

Exelon (EXC/Equal Weight) (Kalton) — On 8/17, EXC issued an 8-K spelling out the expected annual cash flow impact of the recently passed Inflation Reduction Act. While not as bad as initially feared, EXC thinks the 15% minimum corporate tax rate will negatively impact annual cash flow by $200M (higher cash taxes) vs. prior guidance of ~$300M annually. We think the lower cash flow will necessitate additional equity needs above and beyond the $1B guidance during the period '22-25. On 8/3, EXC issued ~ $560M (including the overallotment) toward this goal.

By our math, a $200M reduction to our '23 estimated FFO has a negative 50 bps impact on FFO/Debt and would require ~$1.5B of new equity to immediately and completely offset (~3% dilution). That said, the level and timing of potential equity needs will depend on several factors including (1) potential positive cash flow offsets (i.e., cost savings), (2) balance sheet strategy — there is some wiggle room as mgmt. targets a 13-14% FFO/ Debt ratio, which is above the downgrade threshold of 12%, and (3) capex plans — while suboptimal, EXC could pare back capex plans to reduce external equity financing needs. Lastly, we highlight that mgmt. previously expressed confidence in achieving the 6-8% EPS CAGR guidance through '25 even assuming the negative $300M cash flow impact. Our analysis supports this statement, as we think potentially higher equity needs could have a negative 100 bps impact on the CAGR (prior to any mitigation).

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Water Utility Regulatory Updates (Reeder) — We highlight a few regulatory developments among our water utilities that could be of interest to investors.

- **AWK's NJ rate case settlement approval.** On 8/17, the BPU approved the 7/25 settlement, which outlined a $45.5M revenue increase premised on a 9.6% allowed ROE and 54.6% equity ratio — the return parameters were unchanged from AWK's '20 rate order. Importantly, the outcome incorporated AWK's updated estimates of production costs — items that have been impacted the most by inflation such as chemicals, fuel & power costs — as well as deferral accounting treatment for pension & OPEB expense starting 1/1/23. We view the outcome to be at least supportive of our 2022-26E EPS of $4.43, $4.82, $5.17, $5.57 & $6.05 with potential modest upside given (1) a slightly earlier effective date (9/1/22) than our model assumes, as well as (2) successfully addressing key expense pressures. We also note that AWK reached the NJ settlement days before providing the Q2'22 update. AWK still has rate cases pending in the key states of IL, MO & PA.
- **Water Cost of Capital.** While we are still awaiting a proposed decision from the ALJ, we have been keeping a close eye on the Moody's AA Utilities Bond Yield Average. Thus far in August it has traded pretty much sideways. By our calculations, it would need to average roughly 4.75% from now until the end of September, as compared to the 8/16 close of 4.47%. Certainly not impossible but each day that passes without a leg up makes it increasingly less likely. We wouldn't be surprised if the ALJ is waiting to see if the Water Cost of Capital Mechanism triggers an upward ROE adjustment effective 1/1/23 prior to issuing a proposed decision.
- **Cal Water's 2023-25 GRC.** It is taking longer than expected to reach at least a partial settlement agreement in the pending GRC. The parties had expected to file one by 8/12; however, on 8/16, the ALJ granted the parties' request to extend the time to 9/2. At least the sides are still working towards a settlement! We continue to anticipate a constructive GRC outcome and are optimistic the settlement will not only cover less controversial issues like the sales forecast and appropriate supply mix but also the capex budget and perhaps even a supply cost recovery mechanism like the Full Cost Balancing Account that is included in San Jose Water's pending GRC settlement agreement.

Acronyms

ALJ – Administrative Law Judge

BPU – Board of Public Utilities

GRC – General Rate Case

OPEB – Other Post-Employment Benefits

American Water Works (AWK/Underweight/$28.5B market cap) 8/17/22 closing price: $158.94

California Water Service (CWT/Underweight/$3.3B market cap) 8/17/22 closing price: $63.52

Entergy Corp. (ETR/Overweight/$24.0B market cap) 8/17/22 closing price: $121.27

Exelon Corporation (EXC/Equal Weight/$44.6B market cap) 8/17/22 closing price: $46.25

Investment Thesis, Valuation and Risks

American Water Works Company, Inc. (AWK)

Investment Thesis

We believe AWK is well positioned to capitalize on favorable industry dynamics that should lead to above-average rate base, EPS, and DPS growth. In addition, AWK is the only liquid, pure play water utility option for mid- and large-cap investors, including those with ESG mandates. That said, our Underweight rating reflects valuation considerations as AWK shares trade at roughly 5% P/E premiums to "large-cap" pure play water utility peers. We believe applying more of an in-line multiple to the peer group P/E median is more appropriate at this juncture as the aforementioned positive features combined with recession-concerned investor appetite for low risk, liquid names are counterbalanced by the following considerations: (1) AWK's revised regulated strategy introduces a new level of execution risk as it relates to capex deployment, regulatory recovery, maintaining bill affordability especially with current inflationary pressures, etc. (2) Water utilities as a whole trade at lofty absolute and relative valuations, including roughly 60-65% P/E premiums to regulated electric utilities and gas LDCs. We question the sustainability of the current premium multiples longer term, and since many investors consider AWK to be the "de facto" water utility to own, it may be adversely impacted the most if/when a group re-rating occurs. (3) The water utility median reflects both a scarcity premium and a takeover premium, two characteristics that we do not believe are as applicable to AWK.

Target Price Valuation for AWK: $154.00

Our $154/sh price target is based on a blend of (1) a P/E multiple analysis (~$157/sh) - apply the median 22E P/E multiple of our covered pure play water utilities of ~33x to our 23E EPS of $4.82 and (2) a DDM analysis (~$147/sh), which assumes a 6.5% discount rate. We believe applying a roughly peer group P/E median is appropriate at this juncture as above-average growth prospects and recession-concerned investors' appetite for low-risk, liquid names are counterbalanced by (1) AWK's revised regulated strategy which introduces a new level of execution risk, (2) lofty water utility group multiples and (3) the water utility median reflects both a scarcity premium and takeover premium, two characteristics that we do not believe are as applicable to AWK.

Risks to Our Price Target and Rating for AWK

Key upside risks include (1) sustainability and/or expansion of the water group's premium valuations, (2) more positive regulatory treatment resulting in higher-than-anticipated earned ROEs and (3) delivering on more than the $1.3B of regulated M&A growth that we assume over the 2022-26 period.

California Water Service (CWT)

Investment Thesis

We regard CWT as a low-risk water utility with a secure and growing dividend. EPS growth is highly dependent upon California regulation, which offers the state's utilities generally constructive regulatory principles. That said, more recently the overall constructiveness of CA regulation has been called into question (including the shift from fully decoupled rates in the years ahead) and bears monitoring. This is particularly relevant as CWT's regulatory risk profile is elevated with the pending '21 cost of capital proceeding as well as the 2023-25 GRC filing. Our Underweight rating reflects our belief that shares of CWT offer one of the lowest potential total returns over the next 12-18 months of the five water utilities that we cover. CWT shares trade at roughly 0-5% P/E multiple discounts to "large cap" pure play water utility peers on our 22-24E EPS. We believe a 5-10% discount is appropriate given a nearer-term flattish EPS outlook that is subject to execution risk, the likely downward cost of capital pressure in '22 as well as the potential added risk/volatility from the transition to the Monterey-WRAM/ICBA framework in '23.

Target Price Valuation for CWT: $58.00

Our $58/sh price target is based on a 75%/25% blend of (1) a P/E multiple analysis (~$60/sh)—apply a 5-10% discount to the median 22E P/E multiple of our covered pure play water utilities of ~33x to our 23E of $1.98 and (2) a DDM analysis (~$52/sh), which assumes a 6.5% discount rate. Our applied 5-10% P/E discount balances the constructive resolution of the 2020-22 GRC in December 2020 against execution risk as well as pending '21 regulatory filings (CA cost of capital proceeding and the 2023-25 GRC, which includes a transition to the Monterey WRAM/ICBA regulatory framework).

Risks to Our Price Target and Rating for CWT

Key risks include regulatory, execution, and minimal geographical diversity. Specific upside risks include better-than-expected regulatory outcomes in the '21 cost of capital proceeding and 2023-25 GRC, delivering cost controls that allow Cal Water to consistently over-earn the allowed ROE, and success in de-risking the transition to the Monterey-WRAM/ICBA framework.

Entergy Corp. (ETR)

Investment Thesis

Our Overweight rating reflects our assessment that the current share price does not adequately reflect ETR's strong EPS growth outlook (driven by regulated infrastructure investment) and above-average regulatory frameworks.

Target Price Valuation for ETR: $138.00

Our $138/sh price target is based on a P/E multiple analysis and supported by our DDM analysis. (1) P/E Multiple ($138/sh)—we apply a 0-5% discount the '22 Mid/Large Cap Regulated median P/E multiple of 21.0X on our 23E EPS of $6.75. (2) DDM Analysis ($137/sh)—key assumptions include 10-yr EPS and dividend per share growth of 4.5-5.0%, long-term sustainable growth of 3% and a 6.75% discount rate.

Risks to Our Price Target and Rating for ETR

Risks to our target include possible adverse regulatory outcomes (most notably SERI) and elevated storm damage risks (cost recovery) related to hurricanes due to ETR's Gulf Coast footprint.

Exelon Corporation (EXC)

Investment Thesis

Our Equal Weight rating reflects our view that the current share price adequately reflects EXC's risk/reward proposition. Positive attributes including a healthy projected EPS CAGR (8%) and wires-centric asset mix are balanced by modest balance sheet concerns and our view that the company's regulatory jurisdictions are average to below average.

Target Price Valuation for EXC: $49.00

Our $49/sh price target is based on a P/E multiple analysis. We apply a P/E of 20.0-21.0X to our 23E EPS of $2.40. Our multiple represents a 0-5% discount to the '22 Regulated Electric peer group median as we balance positive features (strong 8% EPS CAGR and predominantly electric wires strategy) with our perception that EXC's regulatory jurisdictions are average to below average. We apply the '22 median to our 23E EPS due to the forward-looking nature of our price target.

Our DDM analysis supports a forward valuation in excess of $55/sh. Key assumptions include long-term earnings and dividend growth of 3% and a 6.75% discount rate.

Risks to Our Price Target and Rating for EXC

Risks to our thesis include favorable/unfavorable regulatory developments (upside/downside) and greater-than-expected ESG appetite for a wires-centric company (upside).

Required Disclosures

We, Neil Kalton, Sarah Akers and Jonathan Reeder, certify that:

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department (“WFS Research”) personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company’s common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company’s common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company’s common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm’s fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Exelon

EXC-NSDQ	Rating	Price: Aug-16	Target	Total Rtn
	Outperform	$46.69	$51.00	12%

Cause I'm The Tax Man - Updated IRA Estimate

Bottom Line:
EXC released an 8-K this morning updating their estimated impact from the Inflation Reduction Act. **The company now expects the legislation could increase their cash tax payments by ~$200mn compared with the initial estimate of ~$300mn disclosed on the 2Q22 earnings call**. We continue to see the impact on FFO as manageable as the company has a variety of tools to offset the impact. **We reiterate our Outperform rating and $51 price target.**

Key Points

With the Inflation Reduction Act (IRA) signed into law yesterday, EXC updated their estimated impact of the 15% corporate alternative minimum tax. The company now expects that the legislation could increase cash tax payments by ~ $200mn per year, beginning in 2023. This is an approximately ~$100mn reduction from the potential ~$300mn per year impact the company had identified in conjunction with their 2Q22 results.

With the language of the final legislation being modestly tweaked after the company's 2Q call, we believe investors were expecting the company's initial estimate to be revised downward due to the inclusion of accelerated depreciation. **While the $100mn reduction is positive in absolute terms, it may have been slightly below investor expectations.**

Nevertheless, we continue to see the cash flow impact as manageable and note that the company has sufficient cushion relative to their 12% downgrade threshold. **We estimate that the ~$200mn headwind would decrease CFO Pre-WC to Total Debt by ~50bps from its current healthy ~13.5% range in 2023 (and our original ~80bps decline estimate).**

We continue to see several mitigation actions available to the company including EPS-accretive O&M management as well as modestly dilutive capex reductions and incremental equity financing available to manage the potential impacts. Although sustainability will be the primary limitation, we see O&M management as the best and most impactful mitigant. Modest incremental equity is the next best option relative to any reduction in capex, given it does not reduce the FFO associated with new investments. **A combination of O&M cuts ($45mm, 10bps, +$0.03-0.04 accretive), lower capex ($500mm, 10bps, ~$0.02-0.03 dilutive), and higher equity ($500mm 20 b/p, ~$0.02 dilutive) could offset 40bps and be roughly breakeven to our current forecast.**

We reiterate our Outperform rating and $51 price target.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in Exelon in United States.

Methodology and Risks to Target Price/Valuation for Exelon (EXC-NSDQ)

Methodology: We value EXC using our sum-of-the-parts valuation analysis to derive our target price. Our valuation takes into account the quality of EXC generation assets relative to its peers and the company's regulated business rate base growth and funding sources.

Risks: Failure to pass a version of the "Clean Energy Jobs Act" in the upcoming legislative session that sufficiently expands financial support for EXC Gen's nuclear plants would cause us to re-evaluate our rating, all else equal. The Governor's opposition to the existing Formulaic Based Rate Plan in IL may result in a new set of regulations that could be adverse to the company's ComEd Utility. Nuclear operations are subject to additional safety and regulatory oversight.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Other Important Disclosures

For Important Disclosures on the stocks discussed in this report, please go to https://researchglobal0.bmocapitalmarkets.com/public-disclosure/ or write to Editorial Department, BMO Capital Markets, 3 Times Square, New York, NY 10036 or Editorial Department, BMO Capital Markets, 1 First Canadian Place, Toronto, Ontario, M5X 1H3.

Dissemination of Research

Dissemination of fundamental BMO Capital Markets Equity Research is available via our website https://researchglobal0.bmocapitalmarkets.com/. Institutional clients may also simultaneously receive our fundamental research via email and/or via services such as Refinitiv, Bloomberg, FactSet, Visible Alpha, and S&P Capital IQ.

BMO Capital Markets issues a variety of research products in addition to fundamental research. Institutional clients may request notification when additional research content is made available on our website. BMO Capital Markets may use proprietary models in the preparation of reports. Material information about such models may be obtained by contacting the research analyst directly. There is no planned frequency of model updates.

The analyst(s) named in this report may discuss trading strategies that reference a catalyst or event that may have a near or long term impact on the market price of the equity securities discussed. In some cases, the impact may directionally counter the analyst's published 12 month target price and rating. Any such trading or alternative strategies can be based on differing time horizons, methodologies, or otherwise and are distinct from and do not affect the analysts' fundamental equity rating in the report.

Research coverage of licensed cannabis producers and other cannabis-related companies is made available only to eligible approved North American, Australian, and EU-based BMO Nesbitt Burns Inc., BMO Capital Markets Limited, Bank of Montreal Europe Plc and BMO Capital Markets Corp. clients via email, our website and select third party platforms.

~ Research distribution and approval times are provided on the cover of each report. Times are approximations as system and distribution processes are not exact and can vary based on the sender and recipients' services. Unless otherwise noted, times are Eastern Standard and when two times are provided, the approval time precedes the distribution time.

For recommendations disseminated during the preceding 12-month period, please visit: https://researchglobal0.bmocapitalmarkets.com/public-disclosure/.

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents

have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth

Andrew Bischof, CFA, CPA
Senior Equity Analyst
Morningstar

Analyst Note 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income

rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

We think the act will only exceed its target 40% carbon emissions reduction from 2005 if tax incentives lead to more electric vehicle purchases, building electrification, and energy efficiency. We estimate the transportation, residential, commercial, and industrial sectors must reduce their emissions 14% by 2030 to meet the act's target. This will take a substantial acceleration of carbon emissions reductions for these sectors, which have cut their carbon emissions by only 12% during the last 15 years, according to the U.S. Environmental Protection Agency data.

The power generation sector, which primarily contains utilities, has already cut carbon emissions more than 40% since 2005. We estimate growth in wind and solar energy will result in a 64% reduction in power generation carbon emissions by 2030 based on utilities' investment plans, state policies, and corporate renewable energy demand. We think it's unlikely the act will result in any carbon emissions reductions in the power generation sector incremental to our forecast without more solar and wind manufacturing capacity and a faster regulatory process for project development.

Fair Value per Share (USD)	**41.00**		

The data in the table above represent base-case forecasts in the company's reporting currency as of the beginning of the current year. Our fair value estimate may differ from the equity value per share shown above due to our time value of money adjustment and in cases where probability-weighted scenario analysis is performed.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

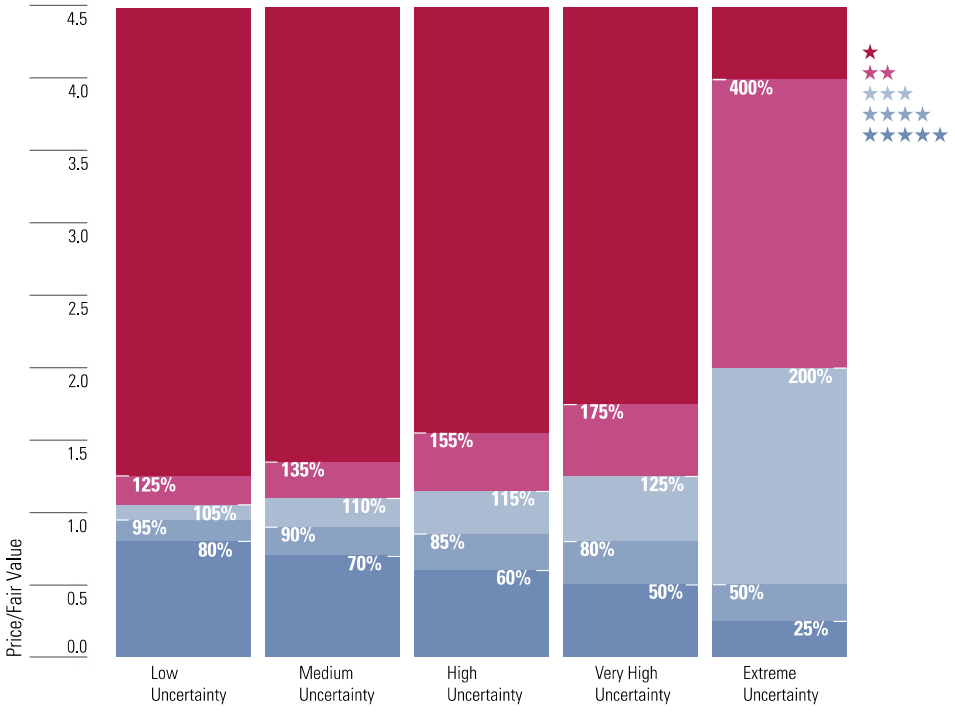
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

The analysis within this report is prepared by the person(s) noted in their capacity as an analyst for Morningstar's equity research group. The equity research group consists of various Morningstar, Inc. subsidiaries ("Equity Research Group)". In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Equity Research Group commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis and Morningstar Star Rating for stocks are statements of opinions; they are not statements of fact.

The Equity Research Group believes its analysts make a reasonable effort to carefully research information contained in the analysis. The information on which the analysis is based has been obtained from sources believed to be reliable such as, for example, the company's financial statements filed with a regulator, company website, Bloomberg and any other the relevant press sources. Only the information obtained from such sources is made available to the issuer who is the subject of the analysis, which is necessary to properly reconcile with the facts. Should this sharing of information result in considerable changes, a statement of that fact will be noted within the report. While the Equity Research Group has obtained data, statistics and information from sources it believes to be reliable, neither the Equity Research Group nor Morningstar, Inc.performs an audit or seeks independent verification of any of the data, statistics, and information it receives.

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

Alert

August 15, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: EXC, XEL, AEE, AVA, DUK, CNP, FE, NWE, SRE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We have a full slate of meetings and dinners planned at the EEI and invite you to join us. In the upcoming week, we are tracking proceedings in EXC's DE gas rate case, FERC's transmission planning NOPR, XEL's CO gas rate case, AEE's IL FRP, AVA's WA rate cases, DUK's Carbon Plan, and EXC's MD electric rate case. In other news, a federal appeals court vacates MISO's transmission ROEs set by FERC; the MN PUC issues an order in Uri-related gas cost recovery proceedings; FE reaches a settlement to keep 2 WV coal plants running past 2028; the MT PSC denies NWE's application for preapproval of the 50 MW Beartooth battery project; SDG&E partners with Mitsubishi on four CA battery projects; AEE joins partnership to plan a regional hydrogen hub in the Midwest; and the WA governor appoints a third commissioner to the UTC.

ICYMI

Renewables Reboot — Last week we published a thesis refresh on the renewable names (we upgraded FSLR to Overweight and raised our price target on Overweight-rated ENPH and NEP) following the Senate's vote to pass the IRA 2022. See our note here.

KBCM Invites You to Join Us at the EEI Financial Conference from November 13-15 in Hollywood, FL. Scroll down for our full schedule, including dinners with **PEG** and **NWE**.

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

EXC — Rebuttal testimony in Delmarva's DE gas rate case is scheduled for August 15: DE PSC Staff previously filed testimony in Delmarva's rate case (Docket: D-22-0002) recommending a $9.0M revenue increase based on a 9.28% ROE and 49.94% equity layer. With the inclusion of the DSIC, the net increase is $3.2M. EXC is seeking a $20.3M rate increase based on a 10.3% ROE and 49.94% equity. The increase includes $5.8M for the distribution system improvement charge, or DSIC, making the net increase requested $14.5M. EXC is seeking rates to be effective August 14, based on a 2021 test year. The previous gas rate case concluded in 2021 and authorized a rate increase of $6.7M based on a 9.6% ROE and 50.37% equity layer.

FERC — Initial comments on FERC's transmission planning NOPR are due by August 17: FERC issued a NOPR in April to address regional transmission planning and cost allocation to facilitate renewables integration (FERC Docket RM21-17). The NOPR focuses on encouraging long-term transmission planning with a specific focus on meeting transmission needs driven by the growth of renewable generation. The rule also provides more authority to states in terms of transmission planning. Highlights of the rule include: **1) Proposed Changes to Regional Transmission Planning —** Transmission providers will be asked to identify transmission needs and plan on a long-term basis with changes in the resource mix and demand in mind. The rule will ask that multiple long-term scenarios be used that include the effects of extreme weather, state and local laws, resource retirements, and generator interconnection requests. Under the new proposals, developers will not be able to get CWIP rate treatment, thus putting a further onus on the developers to complete the project before earning a return. **2) Proposed Changes to Cost Allocation —** The proposal gives states reasonable power in that transmission providers will be asked to seek state approvals regarding cost allocation for the transmission facilities selected and establish a cost allocation method in agreement with the states. Early buy-in from states could help in alleviating issues with project siting. FERC is also proposing incumbent transmission owners a right of first refusal for jointly owned regional projects. FERC's last major transmission planning initiative was Order 1000, a decade ago. The NOPR proposes to amend Order 1000 to eliminate the federal right of first refusal for projects selected for regional cost allocation. We wrote here on some of the early comments that were filed.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

XEL — Evidentiary hearings begin in PSCo's gas rate case on August 17: In rebuttal, PSCo (Docket: 22AL-0046G) reduced the requested revenue increase (to reflect updated data) by $12.6M to a $94.5M net revenue increase, which is net of the $107.5M revenue being collected through the PSIA rider. Other parameters including the 10.25% ROE, 55.66% equity layer, and 2022 test year are unchanged. XEL also maintained the $40M and $41M revenue increases for November 2023 and November 2024, respectively. This compares to CO PUC Staff's filed testimony recommending a $31M net revenue increase, based on a 9% ROE and 55% equity layer. Staff recommended that the PUC use a historical test year and that the commission reject the revenue increases requested for 2023 and 2024. A final decision is expected in October, and PSCo requests rates to be effective on November 1.

AEE — Staff's rebuttal testimony in AEE's IL FRP is scheduled for August 18: In rebuttal testimony, AEE increased its revenue requirement to $83.7M (+$0.5M). This compares to Staff testimony, proposing a 50% equity layer vs. the Company's proposed 53.99% equity and recommending a $62M rate increase. AEE initially requested an $83.2M rate increase on a 7.85% ROE, 53.99% equity, and a rate base of $3.9B. The ROE of 7.85% is formulaic. A final decision is expected by the end of 2022, with new rates effective in January 2023. This may be AEE's last FRP filing in IL with the next rate review likely being an MYRP. The ICC is expected to approve PBR to be used under the new framework this fall.

AVA — Rebuttal testimony in AVA's WA electric and gas rate case is scheduled for August 19: As background, WA AG's Public Council Unit filed testimony opposing the multi-party settlement previously reached. In its testimony, the PCU contends that AVA overstated the request for rate increases in Y1 and Y2 and that the settlement is higher than AVA's revenue deficiency. The PCU determined that AVA requires electric revenue increases of $0.4M and $2.8M, and gas revenue increases of $1.7M and $0.2M in RY1 and RY2, respectively. The PCU concludes that the ROR should be 6.46%, compared to the 7.03% ROR in the settlement. This compares to the settlement agreement for increases of $39.0M and $12.5M for electric, and $7.5M and $1.5M for gas in RY1 and RY2, respectively. The PCU compared its analysis to AVA's initial request due to the black-box nature of the settlement. Settlement hearings begin on September 19 and new rates are expected to go into effect in December 2022.

DUK — Direct testimony in the 2022 NC Carbon Plan is due on August 19: DUK has offered four portfolios as part of its 2022 carbon plan, which outlines a path to 70% carbon reduction by 2030 and requires the utilities to be carbon-neutral by 2050. One of the portfolios achieves 70% CO_2 reduction by 2030 and the other three achieve the target between 2032 and 2034 and include offshore wind, small nuclear, or both. NCUC will rule on the plan by the end of 2022. See our note here where we discuss the Carbon Plan in detail.

EXC — Intervenor testimony in Delmarva's MD multiyear electric rate case is due on August 19: EXC's MD sub is requesting a cumulative rate increase of $37.5M for the three years 2023-2025, based on a 10.25% ROE and 50.5% equity layer. DP&L is requesting (Docket No. 9681) a $22.7M increase in 2023, followed by $7.9M and $6.8M in 2024 and 2025, respectively. The net increase in rates after accelerating the refund of certain regulatory liabilities will be $11.4M in 2023, $11.6M in 2024, and $14.5M in 2025. This is Delmarva's first multiyear plan filing in MD after the PSC adopted rules in 2020 allowing multiyear rate plans. A PSC decision is expected before the end of the year with new rates effective January 1, 2023.

Recent Developments for Companies Under Our Coverage

From our midweek: NWE filed its 2022 MT electric and gas rate cases. In other news, ED's renewables business is seeing interest from European energy companies; DEP files a petition with the SC PSC for securitization of storm costs; PUCT gets a full house as the fifth commissioner is appointed; the city of Chicago and CEG announce a renewables power agreement; DTE and Ford announced a 650 MW solar partnership; AEP CEO Nicholas Akins will step down at the end of the year and be replaced by current CFO Julie Sloat; AVA announces management changes, and the EIA released its August Short-Term Energy Outlook.

Federal appeals court vacates MISO transmission ROEs set by FERC, taking the process back to the start line: In what has been a decade-long saga, a federal appeals court for the DC Circuit vacated a FERC order setting MISO ROE for transmission. For some history, this decision stems from a 2013 complaint that argued that MISO ROEs were too high. FERC in response, through a series of steps, lowered the MISO ROE from 12.38% to 10.32%, then revised it further down to 9.88% as it decided to remove the risk premium. At this point, the MISO transmission owners sought reconsideration from FERC and FERC added the risk premium back and set the ROE at 10.02%. The federal appeals court in its ruling said that the FERC was unable to explain its decision-making and vacated the FERC's orders taking the process back to the starting line.

CNP, XEL — MN PUC issues order in Uri-related gas cost recovery proceedings: MN PUC issued a final order in the Uri-related gas cost recovery proceedings. We see the outcome as constructive. While we are still waiting on the release of the final order on the docket, according to news reports, the PUC ruled to disallow $35.7M and $19M for CNP and XEL, respectively. The full amounts that CNP and XEL were seeking prudence review of were $409M and $179M, respectively. The companies have been recovering since September 2021. We believe that this was the last major Uri-related cost recovery docket that was pending.

FE — FE reaches a settlement to keep two WV coal plants running past 2028: As part of the settlement, FE agreed to invest $142M in the 1,098 MW Fort Martin plant and the 1,984 MW Harrison plant to meet Effluent Limitation Guidelines. The investments

include wastewater upgrades, which must be completed by 2028, and the settlement calls for extending the lives of the Fort Martin plant and Harrison plant until 2035 and 2040, respectively. FE will be allowed to recover the costs through a surcharge at a 9.8% ROE beginning January 1, 2024.

NWE — MT PSC denies the application for preapproval of 50 MW battery project: The commission formally dismissed NWE's request for the preapproval of the 50 MW Beartooth Battery project. The commission pointed to the recent decision by a MT hudge to overturn the Electric Utility Industry Generation Reintegration Act, or the MT preapproval law, as the reasoning. NWE has not determined the future path for the battery project, although the Company could still plan on building the project and then seeking recovery in a future rate case. Additionally, NWE has requested a reliability rider in its latest rate case filing, which, if approved, could potentially apply to the project offering reassurance.

SRE — SDG&E partners with Mitsubishi on four CA battery projects: SRE has selected Mitsubishi to provide storage solutions for four microgrid projects in the San Diego area. The projects have received CPUC approval and will total 39 MW of BESS. The battery storage is intended to improve grid reliability during peak-demand periods, including peak evening hours, when solar generation is unavailable. SRE has identified the need for 1.5 GW of battery storage by 2030 across SDGE's service territory to meet its net zero objectives.

AEE — AEE joins partnership to create a regional hydrogen hub: AEE announced a partnership with a number of businesses to create the Greater St. Louis and IL Regional Clean Hydrogen Hub Industrial Cluster. The collaboration aims to develop infrastructure to meet individual and regional decarbonization goals. The DOE is expected to announce a full funding opportunity in the fall of 2022 for the previously released selection criteria for up to $8B of federal funding for hydrogen development projects, over a period of five years. The department plans to designate 6-10 hydrogen hubs with each receiving up to $1.0B-$1.25B in federal funding, and preference will be given to projects led by a single entity but include "numerous key partners or sub-recipients that will bring together diverse technologies." The DOE plans to select at least one hub focused on the production of hydrogen from fossil fuels, one on renewable energy, and one on nuclear energy.

AVA — WA governor appoints third commissioner to UTC: Governor Inslee appointed Milton Doumit to the WA UTC, filling the final seat of the three-member commission and one that has been open since March. Commissioner Doumit's term will begin September 1 and extend through January 2023. Governor Inslee (D) was required to appoint a Republican or non-affiliated commissioner, as the commission is not allowed to have more than two representatives of the same party, and current Commissioner Rendahl and Chair Danner are both Democrats. AVA has a current rate case pending before the commission.

KBCM EEI Schedule

Tentative Agenda (All Times Eastern):

Sunday, November 13, 2022

12:00 PM – Eversource Energy (ES)
1:00 PM – CenterPoint Energy, Inc (CNP)
2:00 PM – Xcel Energy Inc. (XEL)
3:00 PM – Sempra Energy (SRE)
4:00 PM – WEC Energy Group, Inc. (WEC)
5:00 PM – Atlantica Sustainable Infrastructure plc (AY)
*Dinner – Dinner with Public Service Enterprise Group Incorporated (PEG)**

Monday, November 14, 2022

8:00 AM – Duke Energy Corporation (DUK)
8:45 AM – Avangrid, Inc. (AGR)**
9:00 AM – Pinnacle West Capital Corporation (PNW)
10:00 AM – Exelon Corporation (EXC)
11:00 AM – Edison International (EIX)
12:00PM – DTE Energy Company (DTE)
1:00 PM – NorthWestern Corp (NWE)
2:00 PM – American Electric Power Company, Inc. (AEP)
3:00 PM – Portland General Electric Company (POR)
4:00 PM – FirstEnergy Corp. (FE)

*Dinner – Dinner with NorthWestern Corp (NWE)**

Tuesday, November 15, 2022

7:00 AM – Entergy Corporation (ETR)
7:00 AM – Southern Company (SO)
8:00 AM – Ameren Corporation (AEE)
9:00 AM – CMS Energy Corporation (CMS)
10:00 AM – Consolidated Edison, Inc. (ED)
11:00 AM – Avista Corporation (AVA)
11:00 AM – Otter Tail Corporation (OTTR)

**Dinner event.*
***30-minute meeting.*

Alert

August 08, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: CEG, EXC, XEL, CNP, AGR, AVA, ED, D, NWE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

We wrap up 2Q earnings for the sector with D reporting results today. Aside from earnings, we are tracking proceedings in EXC's PA gas rate case, XEL and CNP's Uri-related storm cost proceedings, and NYSEG and RGE's electric and gas rate case. In other news, WA AG's office files response testimony to AVA's electric and gas rate case settlement; ED files to request an extension of the suspension date of its GRC; the SCC approves cost recovery for Coastal VA Offshore Wind Project; NWE files a notice of intent with the MT PSC for its electric and natural gas rate case filings; OR PUC approves two-partial settlements in AVA's OR natural gas rate case, and EXC announces the issuance of $500M of common stock:

It is finally happening

The Senate passed the Inflation Reduction Act of 2022 on Sunday afternoon in an expected party line vote with VP Harris casting the tie-breaking vote. We could expect a vote in the House of Representatives in the coming week with the bill signed into law soon after. ICYMI, we wrote about the key energy/climate/renewable energy provisions here.

ICYMI

CEG — With Senate passing the IRA, it becomes highly likely that the bill is signed into law, we published a note raising our price target and highlighting how the Nuclear PTC included in the bill can be transformative for CEG since the assets now will resemble long-term contracted assets vs. a merchant portfolio subject to the volatility of merchant power prices. See our detailed note here.

Takeaways from Week 2 of Earnings

We concluded week two of utility earnings (with just D left to report this week). The key themes that we outlined last week remained the key points of discussion this week. With a week to digest the elements of the Inflation Reduction Act of 2022, managements were able to afford a more nuanced view on certain aspects of the bill including the corporate minimum tax provision as well as the direct pay and transferability of tax credits.

Corporate Minimum Tax: The provision applies to companies with pre-tax book income in excess of $1B. As is currently written, it would apply for the taxable years 2023 and beyond. Most utility managements opined that the provision would have little to no impact n the cash taxes paid, or that the impact would be mostly offset by available NOLs and the package of clean energy tax credits included in the bill (since these credits could be used to offset up to 75% of the minimum tax bill). Exelon, which is a pure T&D company, quantified the cash impact of the Corporate Minimum Tax at $300M per year, and was the only company to provide a clear outline of what the tax could entail. Others including SRE, WEC, DTE, DUK, and SO all pointed to the extra cash tax payment as manageable against available credits. We believe that once the bill is final, we will learn more about the specifics as to how they apply to each company and potential mitigating factors including passing them on to ratepayers through rate case proceedings or taking advantage of the tax credit transferability provision for cash accretions.

A favorable feature of the climate bill is the transferability of tax credits: While the IRA does not have the same direct pay provisions that the BBB included (except in the case of tax-exempt entities such as munis and co-ops and for carbon sequestration and clean hydrogen projects), it does have the provision for transferability of tax credits. This means that utilities can transfer tax credits to a third party, effectively eliminating the need for a tax equity partner that has been the dominant way to monetize the tax credits until now. Under tax equity partnerships, developers typically tie up with cash-paying entities (usually banks) to enter a partnership and the process can be both expensive and complicated (not to mention that it delays the cash inflow to the developers until the tax equity partner is paid out) to execute. Several utility executives expressed support for the transferability option in that it would be simpler to execute and eliminate the need for a complicated tax equity structure. Overall, this should make it easier for utilities to own renewable projects.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

Heatwaves in TX featured on CNP, ETR, CEG, and SRE's calls: All TX-exposed utilities highlighted the stronger volumes from the persistent and record heat waves in TX. CEG provided color on the performance of its natural gas fleet during the weather event. Aside from earnings tailwinds from the heat, the companies emphasized the importance of grid resiliency, vegetation management, and supplemental/mobile generation to meet the challenge. We expect grid resiliency to be a major factor in the ongoing ETR and Oncor rate cases. CNP recently reached a settlement in the DCRF filing and is in the process of making an additional filing for the mobile generators.

Regulatory Calendar

Below we provide details on some regulatory events for this week. A detailed regulatory calendar is provided later in this report.

EXC — Evidentiary hearings set to begin in PECO's PA gas rate case on August 11: Surrebuttal testimony was filed on August 4. PECO is seeking an $82M rate increase on a 10.95% ROE, 53.41% equity, on a rate base of $2.9B. The rate increase intends to cover gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at a 10.24% ROE in mid-2021. A final decision is expected by the end of 2022 with new rates effective in January 2023.

XEL, CNP — MN Commission is expected to issue a decision in Uri-related storm cost proceedings on August 11: ALJ has previously concluded that XEL and CNP acted prudently and should be allowed full costs recovery of ~$179M and ~$409M, respectively. The MN ALJ ruling is a positive step toward resolving Uri-related dockets since the cost recovery issue in MN was complicated by a debate around the availability of LNG storage facilities when prices spiked. The MN DoC, an intervenor, recommended a $120M disallowance to XEL and a $45M disallowance to CNP.

AGR — Updated testimony in NYSEG's and RGE's electric and natural gas rate cases is due on August 12: AGR filed one-year electric and gas rate cases for both NYSEG and RGE. AGR is seeking a 10.2% ROE and 50% equity layer vs, its last rate filing, which were settled at an 8.8% ROE and 48% equity. AGR requests new rates to be effective May 1, 2023, just as its prior three-year rate case ends. The present rate case focuses on investments in increased reliability; storm response; spending related to the implementation of NY's Climate Law, which mandates 70% renewable generation by 2030; and the residual rate pressure deferred from the last rate case.

Recent Developments for Companies Under Our Coverage

From our midweek: In other news, Vogtle Unit 3 takes a big step toward fuel load with a 103(g) filing issued by the NRC, Ameren files MO electric GRC, SERI overhang drags on as LA, NOLA, and AR decline to opt into the settlement reached by MS with SERI on the Grand Gulf dockets, AGR reaches an agreement to assume operatorship of Vineyard Wind 1, DUK CFO named Chief Commercial Officer; Brian Savoy to assume the CFO position, XEL files a proposal with MN to implement a zero-carbon transportation plan by 2050, and AEP's SWEPCO issues multiple RFPs for up to 2.4 GW of renewable resources.

AVA — WA AG Office files response testimony in AVA's electric and gas rate case settlement: The WA AG's Public Council Unit filed testimony opposing the multi-party settlement previously reached. In its testimony, the PCU contends that AVA overstated the request for rate increases in Y1 and Y2 and that the settlement is higher than AVA's revenue deficiency. The PCU determined that AVA requires electric revenue increases of $0.4M and $2.8M, and gas revenue increases of $1.7M and $0.2M in RY1 and RY2, respectively. This compares to the settlement agreement for increases of $39.0M and $12.5M for electric, $7.5M and $1.5M for gas in RY1 and RY2, respectively. The PCU concludes that the ROR should be 6.46%, compared to the 7.03% ROR in the settlement, driving much of the delta. The PCU compared its analysis to AVA's initial request due to the black-box nature of the settlement. The settling parties will file a rebuttal on August 19, settlement hearings begin on September 19. New rates are expected to go into effect in December 2022.

ED — ED files to request an extension of the suspension date: ED submitted a request to extend the suspension date in the ongoing rate case proceedings from the current January 25, 2023, by another 60 days to March 26, 2023. The original suspension date was December 26. The extension would however be subject to a make-whole provision so that ED and its customers would be covered from January 1 through March 26 (i.e., the effective date of new rates would still be January 1). Delays in NY rate case settlements are not a new phenomenon and similar extensions have been made in previous NYS rate cases.

D — SCC approves cost recovery for Coastal VA Offshore Wind Project: VA SCC approves the $5.5M annual Rider PPA for cost recovery associated with the 2.6 GW CVOW project, effective September 1. As part of the order, D must file annual revisions for the Rider PPA. Furthermore, D must file a notice with the SCC within 30 calendar days if it determines the total project costs are expected to exceed the current $9.8B cost estimate or if the final turbine installation will be delayed beyond February 4, 2027. D must also file an annual rider update application and include any material changes to the project. The project is a critical part of the VCEA, which requires D to achieve 100% renewable power by 2045 and for the state to have 5.2 GW of solar by 2035. D is anticipating an in-service date by the end of 2026 and is currently securing approvals and permits for beginning construction in 2Q24.

NWE — NWE files notice of intent with MT PSC for electric and natural gas rate case filing: NWE filed the notice (docket 2022.07.078) with the expectation that it will file electric and gas rate cases in August. The rate cases will be the first MT electric and gas cases since 2018 and 2016, respectively. NWE will seek to include ~$700M in incremental investment into the rate base,

re-examine poorly functioning regulatory mechanisms such as the PCCAM, and address the need for contemporaneous recovery mechanisms in the filing. According to our math, we anticipate NWE's ask to be for ~$80M.

AVA — OR PUC approves two-partial settlements in AVA's OR natural gas rate case: The OR PUC issued an order adopting the two partial settlements as part of AVA's natural gas rate case. The adopted settlements result in a net revenue decrease of $1.4M, premised on a 9.4% ROE and 50% equity layer. The parties agreed to a $1.6M revenue increase but agreed to return annual tax credits of $2.2M and $0.8M, resulting in a net decrease. Rates will go into effect on August 22.

EXC — EXC announces the issuance of $500M of common stock: EXC announced a $500M issuance of shares, with the option for the underwriters to purchase an additional $75M of common shares within 30 days. Management has maintained its plans to issue $1B of equity by 2025, with half now complete. Timing for the remainder $500M issuance remains TBD and could come through one or more methods, including an ATM or a block offering. The potential issuance was discussed on the recent 2Q call.

Earnings Recap

AEE — AEE reported a lighter than estimated 2Q but maintained full-year guidance and the 6-8% LT growth rate. We believe that the next event to watch is a capex update that the Company usually provides with 4Q results. With an updated MO IRP (~$14B through 2040) and the recent allocations in the MISO Tranche 1 LRTP (~$1.8B+), we believe that both the five-year and 10-year capex plans have significant upside potential - lending support to the 6-8% long-term growth outlook. Otherwise, we are tracking the recently filed MO Electric GRC and a new rate filing in IL in early 2023, which will be an MYRP under the recently enacted IL Energy Law. See our note here.

ED — ED reported EPS of $0.64, ahead of our $0.56 estimate as results at CECONY exceeded our expectations. The Company maintained 2022 guidance and a long-term EPS growth rate of 5-7%. The two near-term catalysts worth watching are a potential settlement in the CECONY GRC and the outcome of the strategic review of the CEB business. See our note here.

SRE — SRE reported better than expected results as marketing and transportation revenue supported results at Sempra Infrastructure. Management reiterated guidance with a bias to the high end of 2022 estimates. At the regulated utilities, we are watching upcoming proceedings at SDG&E, SoCalGas, and Oncor. The focus of the call was the infrastructure segment where the momentum in LNG demand is allowing SRE to push forward on Cameron Phase 2 as well Port Arthur Phase 1 — both of which could potentially FID in 2023 if contracts are finalized earlier than anticipated. Progress is also ongoing on negotiations with the Mexican government on a slate of projects in Mexico. On the Inflation Reduction Act, SRE should benefit from increased electrification opportunities arising from the EV credits offered in the bill. While the Company could see the minimum corporate income tax provision raising its cash taxes, the impact should be manageable. See our note here.

DUK — DUK reported a strong quarter with results of $1.14 vs. our estimate of $1.11 and a consensus of $1.07, as it continues to see growth in usage and customers. As a result, DUK raised its growth forecast for the year to the 1.5-2% range and maintained its 2022 EPS guidance. DUK announced the commencement of a strategic review of its Commercial business and would look to use the proceeds of a sale to help strengthen the balance sheet and fund the regulated business capital plans. DUK has a significant opportunity ahead with the build-out for its clean-energy transition that will become clearer with the upcoming results of the Carbon Plan. See our note here.

CEG — CEG reported higher than expected 2Q22 EBITDA and reiterated 2022 guidance for gross margin and adjusted EBITDA. In addition, taking advantage of the stronger power curves, the Company added hedges to 2023 and 2024 and raised 2023 gross margin forecasts. The commercial business activity showed momentum in 2Q22 and could likely sustain if power prices remain elevated. Management is optimistic about the final passage of the IRA 2022, and we should hear about the capital allocation strategy on the 3Q call. In the meantime, it is business as usual as the Company continues to execute on its core operations. See our note here.

PNW — PNW reported another strong quarter on the heels of the continued customer and usage growth. The story remains the same with strong in-migration trends, guidance maintained, and PNW working toward the upcoming general rate case filing later this year. Notably, PNW maintained its O&M guidance for the year, which saw a $0.10 drag in the quarter, and is expected to see some headwinds in 2023 related to the pension as a result of market volatility, which management said would be unlikely to offset all the headwinds. See our note here.

ETR — ETR reported a strong quarter on the back of favorable weather trends and volume growth in its territory. 2Q results have substantially de-risked FY guidance, with the Company now expecting to come in at the upper half of the reaffirmed $6.15-$6.45 range while pulling forward some O&M. With that said, we expect that SERI settlement negotiations with remaining parties and related uncertainties will continue to weigh on the shares in the medium term. See our note here.

AVA — AVA reported 2Q EPS of $0.16 vs. consensus of $0.17, as the Others segment buoyed the performance of Utility. Subsequently, AVA maintained 2022 consolidated EPS guidance but lowered Utility guidance by $0.10 and offset it by raising guidance at the Other segment. AVA continues to battle challenging inflationary pressure, resulting in an increase in its capital plan and capital needs. The

Company expects some relief in 2023 with forecasts for inflation to rise at a lower level relative to this year and will recover some costs if its WA rate case settlement is approved. AVA has a busy regulatory calendar with two settlements awaiting approval, a recently filed AK rate case, and a pending ID rate case filing in 1Q23. See our note here.

EXC — EXC reported an in-line quarter, reiterated guidance, and detailed progress on the regulatory activity underway at its various jurisdictions. Of note is the Company providing additional color on the $1B planned equity issuance, with $500M scheduled for 2022. Management also quantified the potential impact of the minimum corporate tax proposed in the Inflation Reduction Act of 2022 — pegging it at $300M of additional cash taxes starting in 2024. It is still not clear what the additional cash taxes will mean for long-term capital plans or financial plans, or what the net impact could be after mitigants are considered. That said, the 2022 EPS guidance of $2.18-$2.32 remains intact as is the 6-8% long-term EPS growth rate. See our note here.

WEC — WEC reported another strong quarter to follow up 1Q, with another beat and raise in 2Q22. The Company reported EPS of $0.91, ahead of our estimate of $0.84, and raised its 2022 EPS guidance by $0.02 at the midpoint. WEC has a very executable capital plan and could see tailwinds from the IRA, EV adoption, and the MISO LRTP. The Company will be rolling forward its capital plan this fall, which could include some of these opportunities in the latter portion of the plan. WEC will also continue to work on its rate case in the back half of the year, which has historically resulted in constructive outcomes. See our note here.

PEG — PEG's 2Q results were in line and the guidance is unchanged at $3.35-$3.55, with the multi-year 5-7% CAGR also intact. Questions on the call, however, focused on the intra-period volatility in EPS as PEG addresses the potential pension headwinds depending on where the markets end the year. Management offered confidence in its ability to pursue several initiatives that could soften the potential pension impact (which could be some O&M management). On the positive, the Inflation Reduction Act, if passed, would be a significant plus for PEG's NJ nuclear portfolio and provide it with the stable long-term cash flow profile for which management has long been advocating. Capex is maintained for now, but depending on the offshore transmission awards, we could see some upside. No new details were offered on the offshore wind portfolio, but we expect that management remains open to options depending on how the market responds to assets currently on the market. See our note here.

OTTR — OTTR did not disappoint as it reported another quarter significantly ahead of consensus and raised guidance on the continued strong performance of the Plastics segment. OTTR shifted its future mix as it now expects the Plastics segment opportunity to be 25% larger than previously thought based on outside market data. OTTR maintained its long-term growth rate of 5-7%, which it reset off of 2024 earnings when it expects normalized earnings, after continued strong performance through the back half of 2022 and inventory build-up in 2023. OTTR is generating significant cash flow from its ancillary business and will use it for incremental rate base growth. See our note here.

CNP — CNP reported another strong quarter and raised 2022 guidance to reflect the strength in 1H results. Grid resiliency, especially in the wake of the recent heat waves, remains at the forefront of regulators and management, and we expect it to be a major part of the upcoming capex upgrade. The Company is benefiting from strong demographic trends and a robust C&I demand framework that does not appear to be showing any signs of a slowdown. Coal retirements and consequent renewable expansion continue in IN with another IRP expected next year. The Inflation Reduction Act is likely to play a part in how CNP structures the upcoming IRP. Overall, we expect to see more constructive capital spending opportunities with corresponding management of bill headroom through proactive O&M management. See our note here.

ES — ES reported an in-line quarter and narrowed 2022 guidance with the midpoint up modestly. The offshore wind portfolio is being actively marketed and the level of interest from potential acquirers appears robust—not surprising given the strong policy tailwinds and recent transaction history. Management spent a decent amount of time addressing the capital allocation priorities once the wind portfolio sale is concluded as it makes up for the EPS loss from offshore wind and maintains its targeted 5-7% long-term EPS growth range. See our note here.

NWE — NWE posted an in-line quarter in 2Q22 and maintained its 2022 EPS guidance. NWE is ramping up for a busy period as it looks to file electric and natural gas rate cases in MT in August. Additionally, the Company will be filing IRPs in SD and MT later this year and might be receiving some clarity around the future of Colstrip within the coming weeks. NWE will be proceeding through these filings with new leadership, as current COO Brian Bird will be stepping into the CEO role upon Bob Rowe's retirement at the end of the year. See our note here.

EIX — EIX reported quarterly results that were ahead of our estimates and consensus. Management reiterated 2022 core guidance of $4.40-$4.70 and the long-term 5-7% EPS CAGR. 2023 guidance will hinge on the outcome of the CoC docket in which EIX is seeking a higher ROE than the current 10.3%. Track 4 proceedings in the 2021 GRC have commenced, wildfire claim resolutions continue with ~89% of claims settled, and the timing to file for cost recovery with the CPUC is still late 2023. See our note here.

SO — SO reported EPS of $1.07 vs. our $0.81 estimate and guidance of $0.80, as it saw strong tailwinds from sales growth as the Southeast continues to outpace the rest of the country in growth. SO also benefited from much warmer weather including the second warmest June in the past fifty years. Although SO has performed well in the first half of the year, the Company maintained guidance

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

and will look at refreshing the range along with its 3Q earnings release. SO continues to progress on Vogtle 3, with only 2 ITAACs remaining, and will subsequently file for the 103(g) letter. Specifically, SO narrowed in-service dates to the back half of its previous ranges, which are 1Q23 and 4Q23 for Units 3 and 4, respectively. See our note here.

POR — POR posted EPS results of $0.72, which was significantly ahead of our $0.61 estimate and consensus of $0.55. POR was better positioned in 2Q22 due to favorable hydro conditions resulting from record snowfall and rainfall in the April-June period, allowing the Company to capitalize on favorable power markets. The beat led to POR raising its GAAP guidance and the introduction of non-GAAP guidance to adjust for the Company's future earnings power and remove the recent deferral ruling from operating earnings, which we view as a welcome development. POR noted that it is experiencing significant tailwinds from the industrial growth in its service territory, which should be further aided by the recent Chips act. In line with prior expectations, POR hopes to conclude its RFP process before the end of the year and could see elevated prices after the bidders refresh pricing due to inflation. See our note here.

CMS — CMS reported better than expected results and reiterated 2022 guidance. Favorable weather and O&M management in 1H provide a reasonable cushion as CMS heads into 2H. Constructive rate case outcomes further de-risk the 2022 earnings guide. With the IRP approved, we are looking next at a capex refresh and the potential options for financing the Covert gas plant that CMS agreed to buy as part of the IRP. The newly proposed Inflation Reduction Act should support renewables development as provided in the recent IRP. CMS is consistently executing on its core priorities and is well positioned to deliver on the 6-8% targeted long-term growth outlook, in our view. See our note here.

XEL — XEL posted an in-line quarter and subsequently reaffirmed 2022 guidance. Sales and customer growth remained strong, resulting in XEL raising its electric sales growth to 2% for the year even though the Company expects these benefits to be largely offset by inflationary pressures on O&M and higher interest costs. XEL maintained its five-year capital plan and noted that it will roll forward the plan with 3Q22 earnings, which could include the recent MISO Future 1 decision and incremental investment opportunities in transmission and renewables. See our note here.

DTE — DTE reported a lighter than expected quarter but raised guidance as some O&M factors leading to the 2Q miss level off in 2H. Guidance for 2022 was raised by $0.10 at the midpoint — expressing confidence in O&M management in the current inflationary environment. Load trends are shifting to pre-pandemic breakdowns (in line with expectations) and weather trends early in 3Q are pointing toward some tailwinds. The upcoming MI IRP remains the main item to watch in 2H. The recently announced Inflation Reduction Act of 2022 (aka revised BBB) should offer positive impetus for renewable developments as the energy transition unfolds. Thus far it appears that the headwinds from the minimum corporate income tax will be minimal. All in all, DTE continues to execute the plan with a firm handle on operations and regulations and is on target to deliver on the $18B five-year capex plan and long-term 5-7% EPS growth targets. See our note here.

FE — FE reported an in-line quarter with EPS of $0.53 vs. our estimate of $0.52. The Company results were boosted by contributions from a JV in a MT mining facility and lower interest expenses as a result of retiring ~$2.4B of Holdco debt in 1H22. Consequently, FE has received upgrades from Fitch and pulled its 13% FFO/debt target to 2023. The pension remains a headwind for the Company, which now expects a $0.30 drag on 2023 earnings as a result of market volatility. FE has identified a number of measures in the near term to offset the EPS impact and remains confident in its 2023 range and long-term EPS growth rate, while it has begun initial steps in exploring long-term alternatives. See our note here.

AEP — AEP reported 2Q22 EPS roughly in line with our and consensus estimates as it continues to experience strong load growth across its customer base. Specifically, the load has surpassed pre-pandemic levels and is in an expansion phase, which has the management team cautiously optimistic for the latter half of the year. However, management has kept 2022 forecasts the same, including an expected reduction in Commercial sales, up 4.1% YTD. We expect an update to load growth assumptions at the Company's analyst day on October 4. Other updates expected at the analyst day include an update on the KY Power sale, incremental data points to the contracted renewable asset sale, and the introduction of 2023 guidance. See our note here.

AGR — AGR reported strong 2Q results and maintained guidance for the year. Results bested our forecast on outperformance in the network segment. We expect the upcoming investor day to be the next pivot point at which management is likely to outline long-term financial targets and capital allocation optionality, including potential asset rotation or partnerships to fund the offshore capex, as well as a potential PNM closing. In the meantime, we are tracking the many rate cases in progress and an imminent court ruling on the NECEC project. See our note here.

NEE — NEE reported results ahead of expectations as FPL benefited from capex spending and NEER from stronger wind resources in the quarter. The call offered few incremental data points as it followed a detailed analyst day and the EPS guidance was maintained. NEER continues to show strong growth as management navigates the challenges posed by the UFLPA and the AD/CVD investigations. Notably, the 24-month tariff reprieve provided by the administration has resulted in projects being halted as a result of the investigation being restarted. As such, the growth from new projects at NEER will be back-end-loaded in the year. See our note here.

Electric Utilities & Power

Sparking Credit: 2Q22 Earnings Continued: BKH, CNP, CEG, DUK, ETR, EVRG, EXC, NI, PEG, PNM, PNW, PPL, SRE, WEC, WTRG

- **Upcoming Events and Recent Publications**
  - NRG: Steady 2Q22; FY22 EBITDA Guidance Reaffirmed
  - CWEN: Solid 2Q22, 413MW Wind Acquisition Announced
  - NEP: Strong 2Q22; New IDR fee structure in 3Q
  - HY Power & Utilities Model Book
  - IG/HY Power & Utilities Midyear Outlook Webinar Replay
- **We provide a summary of takeaways from this week's 2Q22 earnings beginning on page 2 of this report.**
- **Over the past week, Utilities tightened -3bp versus a -3bp tightening in the JULI index and a -2bp tightening in the JULI Non-Financial Index.** Utility GenCos tightened -8bp, OpCos tightened -3bp and HoldCo's tightened -5bp. Secured OpCos tightened -2bp and unsecured OpCos tightened -3bp. YTD, Utilities widened 37bp versus a 48bp widening in the JULI index and a 43bp widening in the JULI Non-Financial Index. Utilities are currently trading 3bp through to the JULI index at 160bp and OpCos are trading 24bp inside of HoldCos at 152bp.
- **Issuance ramped up this week.** Consumers Energy Co came to market with $350mn 10 year notes and $450mn 30 year notes, while DTE issued $1.3 billion 2 year notes. Additionally, Brooklyn Union Gas issued $800mn Senior Unsecureds. One Gas, EIX and NEE also issued during the week. We estimate YTD issuance of $68.52 billion, compared to our updated FY22 forecast of $90 billion.
- **Rating actions**. This week, S&P revised Dominion Energy's outlook to stable from positive and affirmed its rating at BBB+. The stable outlook reflects the agency's view that Dominion will maintain its financial metrics while undertaking elevated capital spending over the next three years.
- The last natural gas active contract traded at $8.21/mcf. Natural gas rallied by 0.9% over the last week. The EIA reported a 41 Bcf net build last week, which was bearish compared to Bloomberg consensus estimates of 30 Bcf. The build brought working gas storage volumes to 2,457 Bcf.
- **Week over week, the UTY index gained by 2.03% compared to the S&P Utilities Index which gained by 1.7% and the S&P, which gained by 2.03%.. Outperformers:** SPWR (+15.0%), OTTR (+10.9%), and MDU (+6.4%). **Underperformers:** SWX (-12.6%), FE (-3.2%), and NEP (-2.9%).

2Q22 Earnings Recap

Black Hills Corporation

BKH 2Q22 EPS of $0.52 beats Bloomberg consensus of $0.42 and 2Q21 EPS of $0.40. The y/y increase was mainly driven by new rates, rider recovery and a one-time true-up for Winter Storm Uri carrying costs, partially tempered by higher O&M costs. Management affirmed FY22 EPS guidance range of $3.95-$4.15, in-line with Bloomberg consensus of $4.06. During the call, BKH highlighted its recently filed Clean Energy Plan in Colorado, which aims to reduce GHG emissions by 90% by 2030 off a 2005 baseline. The company plans to add up to 450MW of renewable energy resources and battery storage in CO, as well as 120MW of renewables and battery in SD and WY. **On the other hand, while the company is still in the process of reviewing the proposed Inflation Reduction Act, management pointed to the tax credit transferability as particularly positive and would allow them to be more competitive in the RFPs bidding process going forward. Overall, BKH reported a decent quarter with headline beats and clean energy plan on track.**

CenterPoint Energy

CNP reported 2Q22 adjusted EPS of $0.31 compared to Bloomberg consensus of $0.27 and 2Q21 EPS of $0.24. The y/y increase was primarily driven by favorable weather, as well as strong usage and growth in the Houston area, which was partially offset by higher interest expenses. **Management also raised FY22 guidance modestly to $1.37-1.39 from $1.36-1.38, which is more in-line with Bloomberg consensus of $1.38.** The company also reaffirmed its adjusted EPS growth of 8% for 2023 and 2024, and expects to be on the high end of the range for its 6-8% EPS CAGR from 2025-2030. On the call, **the company highlighted its previously announced completion of its Vectren integration, more efficient capital structure, and expectation to recapitalize Indiana Electric with first mortgage bonds to reduce inter-company borrowings from the parent.** Overall, the CNP story remains on track as the company remains focused on its $40 billion 10 year program in a service area that has strong organic growth relative to peers. **We continue to see CNP as a steady utility that remains in execution mode and has several opportunities to grow its rate base organically. Regardless, we think bonds trade fair to its mid-BBB peers, and we maintain our Neutral rating.**

Clearway Energy

Clearway reported adjusted 2Q22 EBITDA of $366 million, beating consensus estimates of $354 million and our $364 million forecast. Compared with our estimate, the beat was driven by stronger contribution out of the company's renewable portfolio, which was slightly offset by weaker conventional segment results during the quarter. We look to the call for any commentary on the recently proposed clean energy package.

Please see link to the full note here: https://www.jpmm.com/research/content/GPS-4165626-0

Constellation Energy Corp

CEG reported 2Q22 adjusted EBITDA of $604 million, beating Bloomberg consensus of $565 million, but below 2Q21 EBITDA of $656 million. The y/y decline was primarily driven by lower capacity revenues and planned nuclear

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

outages, which was partially offset by favorable market conditions including higher energy prices and lower fuel costs at Dresden and Byron. The company also reaffirmed FY22 guidance of $2,350-2,750, compared to consensus of $2,600, and **management also highlighted its largest renewable contract to date, a 15 year, 300MW agreement with Doral Renewables to develop a solar project in Indiana**. **During the call, the company had very positive commentary on the Inflation Reduction Act, highlighting that the bill would lower customer bills, particularly for nuclear assets that could potentially provide baseload power longer than any existing renewable asset if they are granted a license extension. On the AMT, management noted that they are an increasing cash tax payer in the next few years, to the AMT impact would be relatively muted.** Management also continued to reiterate the competitive advantage of their investment grade ratings, which continues to be a core tenant for the company. **Overall, CEG reported a strong quarter and we see fundamentals for the company improving, particularly with strong power price fundamentals and broader federal support for nuclear power by way of the IRA bill.**

Duke Energy Corp

DUK reported 2Q22 adjusted EPS of $1.14, beating Bloomberg consensus of $1.08, and compared to 2Q21 adjusted EPS of $1.15.The y/y decrease was led by higher O&M and interest expenses, and the impact of GIC minority interest, mostly offset by favorable weather, higher volumes, and positive rate case contributions. Management reaffirmed FY22 adjusted EPS guidance range of $5.30- $5.60, with midpoint matching Bloomberg consensus of $5.45**. Notably, DUK announced a strategic review of its Commercial Renewable business[1], which consists of net ownership of ~3.5GW of wind and solar. Potential sales proceeds are earmarked for debt repayment and avoidance, a credit positive. Management expects to conclude the review by the end of this year or early next year.** Also, with respect to the IRA, management pointed to meaningful benefits to customers from the renewable tax credits, but at the same time mentioned that the company would be impacted by the corporate minimum tax, with specific impacts still under evaluation. **Lastly, management also said that the company does not intend to participate in a "first-of-kind' nuclear project and would be in a position to potentially invest in an advanced nuclear facility to come into service in the early 2030s, if things go well in this decade. Overall, we view the announcement of a potential sale of the Commercial Renewable business as positive, given that the company intends to focus more on its regulated business and use the sales proceeds for debt repayment and avoidance.**

Entergy Corporation

ETR reported 2Q22 adjusted EPS of $1.78, handily beating Bloomberg consensus of $1.40 and compared to 2Q21 EPS of $1.34. The y/y improvement was driven by strong retail sales from customer growth and favorable weather, as well as a strong recovery in industrial load. Management reaffirmed its FY22 EPS of $6.15-6.45, compared to consensus of $6.34, but with the 2Q beat are positioned well to meet the higher end of the range. **The company reiterated that it is on track to achieve FFO/debt just over its downgrade threshold of 14% by YE23**. During the call, management emphasized that it was very focused on offsetting increased fuel costs to customers with investments in renewables and efficient generation. **In addition, the company expects to refund $235 million to ETR-MS customers after seeing some proceeds from the partial SERI settlement, which could increase to as**

[1] Book value of ~$4bn, and the segment has a targeted 2022 net income of ~$150mn

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

much as $588 million. Management also noted that if SERI were to settle as currently written, FFO/debt could be pressured in the short-term, but the company would not expect any changes to its long-term targets. On the Inflation Reduction Act, the company sees the bill as mostly positive for the industry, and expects the ITCs to mostly offset the proposed AMT. We recognize that bill headroom remains a large concern for several of ETR's service territories, but overall we see these headwinds as manageable, particularly given the strong regulatory support in the company's respective service areas, as well as strong retail growth overall.

Essential Utilities

WTRG reported 2Q22 EPS of $0.31, matching Bloomberg consensus and compared to 2Q21 EPS of $0.32. Management affirmed FY22 EPS guidance of $1.75-$1.80, in-line with Bloomberg consensus of $1.78. The company now have pending base rate cases or infrastructure surcharges in OH, NC, TX for its regulated water segment, and expects to add ~$44.4mn in revenue once approved. WTRG currently have seven signed agreements to acquire municipal water and wastewater systems, which would add ~$418mn of rate base. During the call, management highlighted its pending transaction with Bucks County Water and Sewer Authority (BCWSA). **Aqua Pennsylvania offered ~$1.1bn, with $935mn paid at closing for the existing wastewater assets and $195mn paid over-time for the wastewater retained capacity. The completion of Asset Purchase Agreement (APA) is conditioned on a final vote by BCWSA and WTRG expects ~9-12 months of regulatory process upon signing the APA. Management also intends to keep its FFO/Debt ratio above the 12% downgrade threshold as they finance their acquisitions and capex programs.** Lastly, WTRG does not see any significant impact from the IRA at this point, as its size does not qualify for AMT. **Overall, we see WTRG reported an in-line quarter. While the size of the BCWSA transaction is significant and might temporarily constrain the company's credit metrics, we see limited impact on its rating as the assets will most likely go into the rate base.**

Evergy

EVRG reported 2Q22 adjusted EPS of $0.86, compared to Bloomberg consensus of $0.84 and 2Q21 adjusted EPS of $0.85. The y/y difference was largely attributed to higher weather-normalized demand, favorable weather and higher transmission margin, partially offset by higher O&M costs and D&A expenses. FY22 adjusted EPS guidance of $3.43 - $3.63 was reaffirmed, compared to Bloomberg consensus of $3.56. During the call, management also provided updates on its 2022 IRP, highlighting the shift of 190MW of solar and LEC coal retirement to 2024, as well as the shift of 2026 solar to wind and increased capacity, in response to supply chain pressure. The company also made further progress on recovery of Winter Storm Uri costs during the quarter**. Specifically, EVRG expects the commission financing order for the securitization of ~$300mn of storm costs in Missouri in mid-October, and received approval from KCC to recover roughly ~$120mn over two years starting in April 2023. Also, management highlighted the good performance of its wind portfolio, with over 50% capacity factor at many sites. Nonetheless, EVRG also acknowledged that there are curtailment issues in Central and Western Kansas where there is congestion. While congestion costs did not impact earnings as it flowed to the fuel costs, EVRG remains attentive and advocated projects that can reduce congestion costs for customers. Overall, we see EVRG reported a positive quarter, as it saw retail sales growth and continued to make progress on the recovery of Winter Storm Uri costs.**

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

Exelon Corporation

EXC reported 2Q22 adjusted EPS of $0.44, compared with Bloomberg consensus of $0.46 and 2Q21 EPS of $0.36. The y/y increase was driven by higher allowed electric distribution ROE at ComEd as well as higher rate increases at PECO, BGE, and PHI, which was offset by less favorable weather and volumes at ACE. Management reaffirmed FY22 guidance of $2.18-2.32, which is basically in-line with consensus of $2.26. **The company also noted a number of rate cases that are pending for PECO, ComEd, and DPL MD, with expected decisions by YE22. The company also clarified that of its $1 billion in expected equity issuance through 2025, approximately $500 million is expected to be issued in 2022 through the company's ATM, with proceeds earmarked to pay down short-term debt**. During the call, the company also commented on their interpretation of the Inflation Reduction Act, and believes that the **corporate minimum tax would offset many of the benefits of the renewable tax credits and would result in incremental taxes of $300 million per year for EXC starting in 2023. Overall, we thought the company's update went well as one of the first quarters as a T&D only utility and while we like the trajectory of the company, bonds generally trade just tight to fully regulated mid-BBB peers, which we think is fairly valued.**

NiSource

NI reported 2Q22 adjusted EPS of $0.12, mostly in-line with Bloomberg consensus of $0.11 and 2Q21 adjusted EPS of $0.13. FY22 adjusted EPS guidance was reaffirmed at $1.42-$1.48, with midpoint matching Bloomberg consensus**. Notably, NI sees projects delayed by 6-18 months by the DOC solar investigation, now with in-service dates in the 2023/24 timeframes. In order to make up for the ~$2bn delayed renewable investments and zero out impact on 2024 EPS, the company plans to pull forward ~$400-$500mn tracked/other investments into 2022/23 and reduces O&M.** The company continues to expect to retire Schahfer units 17 &18 by the end of 2025 and Michigan City unit to retire between 2026-28. During the Q&A, management also briefly discussed the ongoing strategic review and **continued to expect decision in November around its Fall investor day. Specifically, management mentioned that they viewed their standalone plants as robust and see potential O&M reduction opportunities within NI, while also comparing to see what LDCs monetization opportunities look like**. On the other hand, NI pointed out that customer bills are already up about 19-20% y/y due to higher gas prices. Nonetheless, the company tries to balance out commodities payments with adjusting prices over a 12 or 18 month period in some cases**. Lastly, the company sees no near-term material impacts to their plan if an AMT was implemented as it still has NOLs through the first half of the decade and thus does not meet the earnings thresholds. Overall, we see this as a relatively quiet quarter for NI as we continue to wait for updates on the strategic review at its upcoming Fall investor day in November.**

NRG Energy

NRG reported 2Q22 adjusted EBITDA of $358 million, which was basically in line with Bloomberg consensus of $360 million and our $372 million forecast. The company reaffirmed its FY22 EBITDA guidance of $1,950 – 2,250mn, compared to Bloomberg consensus of $2,000mn. On a y/y basis, some of the EBITDA decline was driven by the sale of 4.8GW of fossil assets in the East segment and an outage at W.A. Parish Unit 8 in Texas, which was partially offset by favorable weather.

Pinnacle West Capital Corporation

PNW reported 2Q22 EPS of $1.45, above Bloomberg consensus estimate of $1.29 and below 2Q21 EPS of $1.91, which was still mainly attributed to unfavorable outcome of the company's last general rate case. Management reaffirmed FY22 EPS guidance range of $3.90-$4.10, in-line with Bloomberg consensus of $4.00. **APS filed Notice of Intent in June for a new general retail rate case filing and expects to file the application by the end of October 2022, though the company is still in the process of appeal of last rate case.** During the call, PNW highlighted that it expects some headwind for pension in 2023 if the markets remain where they are today. However, PNW also hedged its pension so that it is agnostic to changes in interest rates from a funded status perspective to mitigate volatility of benefit costs. **Lastly, the company sees no AMT effect and generally views the IRA, if passed, as helpful to improve customer affordability. We see PNW reported a roughly in-line quarter despite of headline beats, as earnings continued to be pressured by unfavorable outcome from the last general rate case. We keep an eye out for the new retail rate case filing in the fourth quarter of this year.**

PNM Resources

PNM reported 2Q22 adjusted EPS of $0.57, compared to Bloomberg consensus of $0.53 and 2Q21 EPS of $0.55. The y/y improvement was driven by strong demand growth and favorable weather, which was partially offset by O&M increases and plant outage costs. Regardless, management noted on the call that **load growth is still behind expectations as industrial customers continue to deal with supply chain issues.** Management reaffirmed FY22 guidance of $2.50-2.60, which is in-line with guidance of $2.56. On the call management highlighted its ongoing appeal process with regulators on its merger with Avangrid, stating that the company plants to request oral arguments this week, though there is no statutory requirement or deadline for the court to respond to the request. **Management continues to expect a 12-18 month appeals process since the company's initial filing in January, which places the timeframe in 1H23 for a decision. Overall, PNM reported decent results, but the company's ongoing merger appeal with regulators continue to overshadow steady operational performance.**

PPL Corporation

PPL reported 2Q22 adjusted EPS of $0.30, which was basically in-line with Bloomberg consensus and compares to 2Q21 EPS of $0.19. The y/y increase was driven by stronger earnings from Kentucky, which saw higher rates and volumes, Pennsylvania, which had higher peak transmission demand, and the inclusion of Rhode Island in results. **Overall, the company saw strong retail demand recovering across all customer segments on a weather adjusted basis**. In addition, management reaffirmed its FY22 EPS guidance of $1.30-1.45, compared to consensus of $1.42, and reaffirmed its EPS CAGR expectation of 6-8% through 2025. On the call, management noted **that 55% of its 5 year capex plan is expected to have recoveries from riders and formula rates, which supports the company's solid credit metrics and limits the need for new equity**. **On the Inflation Reduction Act, management sees the bill as mostly positive for the company due to the production tax credits and implications on its ongoing KY generation update. In addition, management sees limited impact from the 15% AMT provision since the company is a cash tax payer. Compared to other fully regulated BBB+ names, PPL spreads look interesting, though it seems that the**

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

market is still trying to find fair value following the company's UK sale and RI acquisition, as well the potential utilization of HoldCo debt capacity.

Public Service Enterprise Group

PEG reported 2Q22 adjusted EPS of $0.64, which was basically in-line with Bloomberg consensus, and compared to 2Q21 EPS of $0.70. On a y/y basis, improved electric and gas margins were more than offset by higher O&M and interest expenses compared to the 1Q21 period. The company reaffirmed FY22 guidance of $3.35-3.55, compared to consensus of $3.48, and also reiterated its 5-7% EPS CAGR target from 2022-2025. During the call, **the company briefly addressed some of their recent financing actively to support collateral postings, which were up to $2.5 billion at the 2nd of the 2nd quarter. While we think these postings could put pressure on FFO/debt in the near-term below their mid-teens downgrade threshold, but we largely see this as a temporary decline in credit metrics that should recover as soon as hedges roll off in following quarters.** Finally, on the Inflation Reduction Act, **management noted that the proposed nuclear PTC essentially places a floor on nuclear power prices at around $25/MWh, which provides strong support for nuclear baseload going forward. Overall, PEG reported a fairly in-line quarter and we continue to think the bonds will trade just slightly tight to other mid-BBB peers as we continue to view the company as a high quality, primarily regulated utility that will continue to benefit from a strong regulatory relationship in NJ**.

Sempra Energy

Sempra reported 2Q22 adjusted EPS of $1.98, beating Bloomberg consensus of $1.77 and 2Q21 EPS of $1.63. The y/y beat was driven by higher Texas earnings, consumption growth, as well as higher base operating margins in CA. The company is also guiding to the high end of its reaffirmed FY22 EPS guidance range of $8.10-8.70, compared to consensus of $8.53, and expects the EPS growth CAGR to remain in the 6-8% range. The company highlighted the strength of its infrastructure and emissions reduction opportunities at Sempra California, strong transmission growth and hardening program at Oncor, and strong LNG market at Sempra Infrastructure. **Cameron LNG phase 2 is targeting an online date of summer 2023 while Port Arthur is progressing on its marketing efforts and could see FID as soon as 2023.** On the call, **management also highlighted the potential for increasing its capex plans at Oncor in October given the increased cadence of demand in the state.** In regards to the Inflation Reduction Act, **Sempra sees very limited impact on earnings, and the AMT would have a very slight cash tax impact, but would be manageable. Overall, SRE reported solid headline results, but execution risk remains top of mind as the management continues to juggle a number of infrastructure projects even as we think the company is positioned in some of the best markets in the country.**

WEC Energy

WEC reported 2Q22 EPS of $0.91, beating Bloomberg consensus estimate of $0.85 and 2Q21 EPS of $0.87. The y/y difference was mainly driven by favorable weather and strong performance form the infrastructure segment. **Notably, management raised FY22 EPS guidance to $4.36-$4.40, a modest increase from the prior range of $4.34-$4.38, and compared to Bloomberg consensus of $4.37.** WEC also expects to reach the top end of the EPS guidance range for the year, assuming normal weather patterns. During the call, the company also highlighted the recently announced power plant retirement schedule adjustments. **WEC now delays the retirement of Oak Creek coal plant units 5 &6 by a year until May 2024, and**

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

units 7&8 by about 18 months until late 2025, due to tight energy supply in the Midwest power market and the expected delays in renewable projects. The company only expects to use these plants seasonally at peak demand time, and remains committed to a complete coal exit by the end of 2035. Finally, on the Inflation Reduction Act, **the company sees very manageable impact from AMT, in the range of $20-30mn. Furthermore, WEC expects stronger credit metrics, benefiting from the monetization of tax credits and/or lower debt financing, as well as benefits to customers and future renewable investment opportunities**. **It is important to note that company's current $17.7bn five-year capital plan does not rely not rely on the passage of IRA, but would see some tailwind if this is passed.**
