that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. RBC Capital Markets may be restricted from publishing research reports, from time to time, due to regulatory restrictions and/ or internal compliance policies. If this is the case, the latest published research reports available to clients may not reflect recent material changes in the applicable industry and/or applicable subject companies. RBC Capital Markets research reports are current only as of the date set forth on the research reports. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct, indirect or consequential loss arising from, or in connection with, any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior written consent of RBC Capital Markets in each instance.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE, SIPC), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

To Canadian Residents:
This publication has been approved by RBC Dominion Securities Inc.(member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

To U.K. Residents:
This publication has been approved by RBC Europe Limited ('RBCEL') which is authorized by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ('FCA') and the Prudential Regulation Authority, in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FCA. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.

To EEA Residents:
This material is distributed in the EU by either RBCEL on an authorised cross-border basis, or by RBC Capital Markets (Europe) GmbH (RBC EG) which is authorised and regulated in Germany by the Bundesanstalt für Finanzdienstleistungsaufsicht (German Federal Financial Supervisory Authority) (BaFin).

To Persons Receiving This Advice in Australia:
This material has been distributed in Australia by Royal Bank of Canada, Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product. This research report is not for retail investors as defined in section 761G of the Corporations Act.

To Hong Kong Residents:
This publication is distributed in Hong Kong by Royal Bank of Canada, Hong Kong Branch, which is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission (SFC) in Hong Kong, RBC Investment Services (Asia) Limited and RBC Global Asset Management (Asia) Limited, both entities are regulated by the SFC. This material is not for general distribution in Hong Kong to persons who are not professional investors (as defined in the Securities and Futures Ordinance of Hong Kong (Cap. 571) and any rules made thereunder.

To Singapore Residents:
This publication is distributed in Singapore by the Royal Bank of Canada, Singapore Branch, a registered entity licensed by the Monetary Authority of Singapore. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance. Alert

October 31, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: ETR, EXC, D, AEE, DUK, PNW, D, SRE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

3Q earnings season continues with PEG, CNP, AVA, OTTR, WEC, EIX, ETR, ES, EXC, PNW, SRE, ED, DUK, AEE, and D reporting this week. On our regulatory calendar, we are tracking proceedings in ETR's TX GRC, EXC's IL FRP, D's Questar natural gas rate case, and AEE's IL FRP. In other news, PNW filed an AZ GRC; parties filed proposed orders and briefs in DUK's NC Carbon Plan; D reached a settlement in the limited reconsideration of the CVOW project; ETR filed its 2023 LA IRP; FERC approved MISO's SSR Agreement request to extend Rush Island plant operations; the PA PUC approved PECO's gas rate case settlement; ES wrote to the Biden administration warning about potential winter gas shortages; SRE and Silicon Valley Power signed a PPA for a 300 MW wind facility; and TerraPower and PacifiCorp announced a joint study to evaluate expanding Natrium technology deployment.

KBCM Invites You to Join Us at the EEI Financial Conference on November 13-15 in Hollywood, FL.

Takeaways from a Week of Earnings

10 utilities under our coverage (AGR, FE, NWE, POR, NEE, DTE, CMS, SO, XEL, AEP) reported earnings last week. Key discussion topics revolved around inflationary pressures, regulatory proceedings, and capex updates in light of IRA and beyond. Scroll down for the full earnings recap.

Earnings Calendar

3Q earnings continue: PEG, CNP, AVA, OTTR, WEC, EIX, ETR, ES, EXC, PNW, SRE, ED, DUK, AEE, and D are scheduled to report this week (see calendar below). Our recently published preview includes our thesis, expectations, and estimates for our coverage.

Figure 1 - Earnings Calendar

3Q22 Utilities Earnings Calls			
Company Name	Ticker	Date	Time (ET)
Public Service Enterprise Group Inc	PEG	10/31/2022	11:00 AM
CenterPoint Energy Inc	CNP	11/1/2022	8:00 AM

Regulatory Calendar

ETR — Staff testimony in ETR's TX GRC is due on November 2: ETR is requesting a $131M revenue increase based on a 10.8% ROE (10.5% ROE + a 30 bps performance added) and 51.21% equity layer. Investments of ~$2.3B since the 2018 GRC including the addition of the Montgomery County power station and the Hardin County peaking facility, which are currently recovered under the GCRR rider, are driving the rate increase. ETR is proposing resetting the GCRR, DCRF, and TCRF rider balances to zero. A decision is expected by May 2023.

EXC — Proposed orders in EXC's IL FRP are due on November 2: EXC filed a draft proposed order for a $199M revenue requirement. The proposed order is premised on a 7.85% ROE (which is formulaic), 49.45% equity, and a rate base of ~$14B. This compares to EXC's initial request of $223M. A Commission decision is expected by December 12, and new rates will go into effect in 2023. This will be EXC's last formula rate plan filing in IL. EXC is currently engaged in finalizing the PBR framework that will make its way into the next rate case, which is expected to be filed in early 2023 for rates effective in 2024.

D — Surrebuttal testimony in Phase II of Questar's natural gas rate case is due on November 3: Phase II will address the cost of service among customer classes and rate design, while Phase I will address all issues necessary to determine D's cost of capital and revenue requirement. Questar's revised request for a $67M rate increase is based on a 10.3% ROE and 53.21% equity layer. This compares to Staff's direct testimony recommending a $49.6M revenue increase premised on a 9.3% ROE and 53.21% equity. The primary factors contributing to D's request are capital investments, including the Magna LNG terminal expected to enter service by YE22. Questar must file a rate case every three years as part of an infrastructure replacement adjustment tracker. Questar's last rate case was approved in 2020 for a $2.7M rate increase on a 9.5% ROE and 55% equity layer. A commission decision is expected by January 1.

AEE — Proposed orders in AEE's IL FRP are due on November 4: The parties filed position statements in AEE's IL FRP. ICC Staff and AEE agree on a 7.58% ROE but disagree on the equity layer. In its position statement, ICC Staff recommends a 50% equity layer vs. the Company's statement, requesting a 53.99% equity layer. The ROE of 7.85% is formulaic. AEE is seeking an $83.7M revenue increase vs. ICC's recommendation for a $61.0M rate increase. A final decision is expected by the end of 2022 and new rates effective in January 2023. This may be AEE's last FRP filing in IL, with the following rate review likely being an MYRP. The ICC is expected to approve PBR to be used under the new framework this fall.

Recent Developments for Companies Under Our Coverage

From our midweek: NJ BPU issues an order on the offshore wind transmission docket; POR announces a forward sale agreement for $375M of common stock; AGR's NECEC project gets a temporary setback as a requested injunction is denied; the Public Citizen is requesting that FERC expedite the ruling to name Blackstone and Icahn as FE affiliates; CO PUC prepares to decide on removing subsidies for new gas hookups; the first MN landfill gas to RNG facility commences operations; the CA DoF files a lawsuit against EIX for the Silverado Fire; and FSLR signs a 2Gw contract with Swift.

PNW — APS files 2022 electric GRC: APS filed an electric rate case (Docket: E-01345A-22-0144) in AZ seeking a net $460M revenue increase premised on a 10.25% ROE and 51.93% equity layer. The request highlights a $772M total revenue deficiency, including $108M for test year adjustor revenue transfers and $204M Day-One PSA and Renewable Energy adjustment charges. PNW requested to use a test year ending June 30, 2022, and will be able to include revenue expenses and investments from the first six months of 2022. Additionally, PNW proposed to enhance its Renewable Energy Adjustment Charge to recover renewable resources, which would smooth out investments and prevent PNW from frequently filing rate cases. This is PNW's first rate case filing since the 2019 rate case that resulted in a $120M revenue decrease and an 8.7% ROE. This rate case will reveal much about Arizona's current and future regulatory climate and will likely depend on the track PNW pursues, i.e., settlement or full litigation. PNW is requesting rates to go into effect on December 1, 2023, and the Company previously stated that it would not issue any guidance until an outcome is known.

DUK — Proposed orders and briefs filed in DUK's NC Carbon Plan: Parties filed post-hearing documents, including proposed orders, for the NC Carbon Plan.

- In DUK's proposed order, it maintained its near-term approach. It included recommendations to procure 1,200 MW of standalone solar in 2022, 2,350 MW of storage in 2023-2024, 600 MW of co-located storage, 1,000 MW of standalone storage, 600 MW of onshore wind, 800 MW of CT, and 1,200 MW of CC. DUK also proposed spending $440M to develop other technologies, including SMR, new pumped storage, and offshore wind. DUK proposes filing an IRP and information Carbon Plan update in 2023 and will file an updated IRP and Carbon Plan together in 2024.
- In Staff's proposed order, Staff proposes the NCUC select SP-5, which would meet the interim compliance date by 2032. Staff recommends that the NCUC authorize several near-term actions, including solar procurement of 1,200 MW in 2022, 2,100 MW for 2023-2024, and 800 MW of co-located storage in 2023-2024. Additionally, Staff recommends 600 MW of onshore wind and 2,000 MW of natural gas additions. Staff suggests that DUK should be able to proceed with its plans for SMR development and pumped storage hydro but not with offshore wind development until a 3P analysis has been conducted.

Sophie Karp (917) 368-2361 / sophie.karp@key.com

- The NC AG filed a brief recommending that the NCUC deny DUK's recommendations and promoted its own SP-AGO. The AG argues that it remains too early to delay the 70% target deadline, and the Commission should reject all DUK's portfolios that do not reach the target by 2030, including SP-5 and SP-6. The AG also argues that DUK's only recommended portfolio that meets the 2030 target does so without the least-cost requirement. The AG recommends that the NCUC order several near-term items allowing DUK to achieve the mandate. Therefore, the AG recommends that DUK initiate procurement for 4,200 MW of solar for 2022-2024, 900 MW of onshore wind for 2023-2025, and 1,000 MW of battery storage enter service by 2029. Additionally, the AG recommends that DUK begin activities necessary to procure 800 MW of offshore wind by the end of 2029. The NCUC should defer any natural gas additions until at least the 2024 Carbon Plan update.

Throughout the hearings, the parties, including DUK, presented 11 portfolios to the Commission that varied in technologies and timing. There is less disagreement in the shorter-term targets, and DUK is requesting the NCUC approve the proposed near-term approach (through 2026) while debating the longer-lead-term proposals and possible technologies during future carbon plan filings, which are required biannually by law. The NCUC is required to present the first NC Carbon Plan by December 31.

D – Dominion reaches a settlement with multiple parties on the CVOW performance guarantee: D entered a settlement with the VA Office of the AG, and other intervenors to reconsider the performance guarantee in the SCC's final order approving the CVOW project. The settlement calls for replacing the performance guarantee with a cost-sharing approach for capital costs exceeding the budget and includes an enhanced SCC review of operating performance. The issue arose when the SCC ruled that D cannot pass on the cost of procuring replacement power should the capacity factor at CVOW fall below 42 on a three-year rolling average. In its filings, D used 42% as the projected 30-year average net capacity factor in its cost-benefit analysis and LCOE proposal. The SCC took this a step further to hold D accountable if the 42% capacity factor is not met over a relatively short period of time. As part of the settlement, D will agree to share 50% of all costs in the range of $10.3B-$11.3B and shareholders will bear 100% of the costs in the range of $11.3B-$13.7B. There is no voluntary cost sharing for costs exceeding $13.7B. The current capex for the project is estimated at $9.8B. D will not guarantee an energy production level as was put in the SCC's final order but will provide details on any shortfall in power production from the projected amount. The settlement is subject to SCC approval.

ETR — ETR LA files its 2023 IRP: ETR filed its 2023 Integrated Resource Plan in LA for the 2023-2042 period. ETR is forecasting a capacity deficit in 2025 that will be briefly resolved in 2026 due to ELL's ongoing Renewable RFPs. That deficit returns in 2027 and expands over time as forecasted customer demand increases and existing resources reach the end of their assumed useful lives. ETR's plan introduces three portfolios and calls for coal to be retired from the fleet by 2030. The proposed portfolios focus on incremental renewable generation capacity. Additionally, the Plan calls for eight action steps, including implementing four solar projects and the Geaux Green Tariff, completing the 2021 and 2022 RFPs, continuing with frequent RFP issuances, and exploring DG and DSM opportunities. In LA, utilities must file IRPs every four years that contain a 20-year planning horizon and a five-year action plan.

Figure 2 - ETR LA Proposed Portfolios

2032-2042 Modeling Results (MW)	Portfolio 1	Portfolio 2	Portfolio 3
Total Incremental Capacity	12,640	27,973	14,158
Natural Gas Additions	1,580	0	2,635
Renewable Capacity Additions	9,300	25,800	9,300
Battery Capacity Additions	450	500	550
DSM Capacity Additions	1,310	1,673	1,673
Renewable Addition %	**74%**	**92%**	**66%**

Source: Regulatory filings, company filings, KeyBanc Capital Markets Inc.

AEE — FERC approves SSR Agreement to extend Rush Island plant operations: FERC approved MISO's proposed Rush Island System Support Resource Agreement. MISO initially filed the request with FERC to extend the life of the ~1.2 GW Rush Island coal facility until 2025. MISO currently has thin reserve margins, and forecasts call for heightened risks of rolling blackouts during peak demand periods. AEE filed with MISO to suspend operations at Rush Island beginning September 1, 2022. MISO conducted a study after the filing and determined that discontinuing operations of Rush Island would result in MISO violating reliability standards. As a result, MISO designated Rush Island Units 1 and 2 as SSR units and expects the designations to remain until four proposed transmission upgrades are completed in 2025. The SSR Agreement can be terminated if it is determined that the units are no longer needed. In an updated 20-year IRP, AEE proposed to close Rush Island in 2025.

EXC — PA PUC approves PECO's gas rate case settlement: The PA PUC adopted the ALJ's recommendation to approve PECO's PA gas rate case settlement without modification. The settlement agrees to a $62M revenue increase ($55M net rate increase and a $7M resetting of the DSIC). The settlement is silent on the ROE and capital structure and includes a rate and DSIC stay-out until March 2024. New rates will likely go into effect in January 2023.

ES — ES writes to Biden administration warning about potential winter gas shortages: ES CEO Jo Nolan has written to the Biden administration requesting that it prepare for emergency measures to prevent a potential shortage of natural gas in the winter months. The letter follows a similar acknowledgment from the FERC that ISO-NE may be the most vulnerable with respect to fuel supplies in case of a more severe than normal winter. The NE relies on natural gas for both home heating and electric power and since pipeline capacity in the region is constrained, fuel sufficiency is a standing concern in times of extreme weather. See our Alternative Energy Weekly where we discuss the natural gas shortage in the NE in greater detail, along with the region's reliance on LNG cargoes, which this year will compete with increased international demand for natural gas resulting from the war in Europe.

SRE — SRE and Silicon Valley Power sign PPA for 300 MW wind facility: SRE's subsidiary Sempra Infrastructure Partners and Silicon Valley Power announced a 20-year PPA for the 300 MW Cimarron Wind project. The project is under development in Baja, Mexico, and will interconnect to the grid via SRE's existing infrastructure. The project does not currently have a timeline. SIP operates a 1,000 MW clean energy portfolio in Mexico—five solar and two wind facilities. In addition to the Cimarron project, SIP is developing a 500 MW ESS project.

PacifiCorp — TerraPower and PacifiCorp to expand Natrium technology deployment: TerraPower announced it is undertaking a joint study with PacifiCorp to evaluate the feasibility of deploying up to five additional Natrium reactors and integrated energy storage systems in PacifiCorp's service territory by 2035. Last year, the companies announced plans to install a Natrium demonstration plant in Kemmerer, WY, where a PacifiCorp coal power plant is expected to be retired. The study will evaluate the potential to install advanced reactors located near current fossil-fueled generation sites to help PacifiCorp repurpose its existing generation and transmission assets to benefit its customers as the companies look to identify opportunities to reduce costs for customers and more broadly deploy Natrium reactors.

KBCM EEI Schedule Agenda (All Times Eastern):

Sunday, November 13, 2022

12:00 PM — Eversource Energy (ES)
2:00 PM — Xcel Energy Inc. (XEL)
3:00 PM — Sempra Energy (SRE)
4:00 PM — WEC Energy Group, Inc. (WEC)
5:00 PM — Atlantica Sustainable Infrastructure plc (AY)

Monday, November 14, 2022

8:00 AM — Duke Energy Corporation (DUK)
8:45 AM — Avangrid, Inc. (AGR) *[30 min meeting]*
9:00 AM — Pinnacle West Capital Corporation (PNW)
10:00 AM — Exelon Corporation (EXC)
11:00 AM — Edison International (EIX)
11:00 AM — CenterPoint Energy, Inc (CNP)
12:00PM — DTE Energy Company (DTE)
1:00 PM — NorthWestern Corp (NWE)
2:00 PM — American Electric Power Company, Inc. (AEP)
3:00 PM — Portland General Electric Company (POR)
4:00 PM — FirstEnergy Corp. (FE)
Dinner — Dinner with NorthWestern Corp (NWE)*

Tuesday, November 15, 2022

7:00 AM — Entergy Corporation (ETR)
7:00 AM — Southern Company (SO)
8:00 AM — Ameren Corporation (AEE)
9:00 AM — CMS Energy Corporation (CMS)
10:00 AM — Consolidated Edison, Inc. (ED)
11:00 AM — Avista Corporation (AVA)
11:00 AM — Otter Tail Corporation (OTTR)
12:00 PM — Public Service Enterprise Group Incorporated (PEG)
3:00 PM — NextEra Energy (NEE)

Sophie Karp (917) 368-2361 / sophie.karp@key.com

Earnings Recap

NEE — NEE reported 3Q results that came in ahead of our expectations and consensus, with the beat spread across FPL and NEER. Management maintained long-term guidance with a bias toward the high end of the range. The benefits of the IRA will play out for an extended period as we expect NEER to take advantage of the provisions to broaden the portfolio beyond wind, solar, and storage, as was evidenced by the $1.1 B acquisition of landfill to electric projects announced today. We expect more such announcements as NEER seeks to build scale in RNG and potentially in the clean hydrogen space over time. See our note here.

SO — SO reported EPS a tad below our and consensus estimates, as the Company faced higher O&M, but continued to benefit from strong retail growth in the Southeast. The Company maintained guidance and is looking towards the upper end of the range. SO has completed fuel load for Vogtle Unit 3 earlier this month and maintained the current in-service timeline for both units. On the regulatory front, SO continues to navigate its GA GRC, where Staff position was recently filed. SO expects a constructive outcome in the rate case in line with historical precedents on timing and recovery parameters. See our note here.

XEL — XEL posted 3Q EPS of $1.18, which was ahead of our estimates and below consensus. The Company narrowed its 2022 EPS range, with a $0.02 improvement to the midpoint, and introduced 2023 guidance in line with consensus. Additionally, XEL rolled-out a new five-year capital plan that includes incremental opportunities in the back half of the plan. XEL remains well positioned and is expected to see significant benefits from the passage of the IRA. See our note here.

AEP — AEP reported strong 3Q22 EPS as it continues to benefit from strong load growth and received a favorable outcome in its VA Triennial review. AEP maintained its guidance range and long-term EPS that was provided at the Analyst Day and will provide more color at the upcoming EEI event. Otherwise, AEP continues to work on closing the spread between its earned and allowed ROE and is working to complete all of its outstanding strategic items in 1H23. See our note here.

CMS — CMS reported an above-consensus quarter with the beat vs. our estimates spread across the segments. The Company also raised/narrowed 2022 EPS guidance to a new midpoint of $2.88 (vs. $2.87) and released preliminary 2023 EPS guidance of $3.05-$3.11 with a bias toward the top end and in line with the Company's long-standing 6-8% growth expectations. Expect growth in investments in renewables generation and energy storage as CMS works to execute the recently approved IRP. A capex refresh/ upgrade is expected in early 2023 to align with the provisions in the IRP. CMS continues to deliver on the targeted growth objectives with a disciplined approach. See our note here.

DTE — DTE reported a solid quarter, beating consensus by a couple of pennies as headwinds in Energy Trading and Corporate offset the strength in Utilities. However, we expect the upcoming IRP filing to be the bigger news, as it may pave the way for the Company to increase capex plan and potentially the LT EPS growth rate (previously seen at 5-7%). We believe the expectations of a step up in the LT growth rate have been substantially built into the investor sentiment at this point, setting the bar high for the guidance refresh at the EEI. See our note here.

FE — FE reported a strong quarter with EPS near the top end of its guidance range as the Company continued to benefit from Signal Peak mining facility earnings contribution and lower interest expenses from retiring higher-yielding debt. That said, projected pension headwinds for 2023 have grown since midyear; inflation pressures present a concern, in our view; and the Company is navigating its CEO search/transition. With no new rates until late 2023 or 2024 at the earliest, we envision that 2023 will be a challenging year for the shares. See our note here.

AGR — AGR reported a mostly in-line quarter (modestly below our expectations and consensus) and reiterated the 2022 guidance of $2.20-$2.38. Regulatory activity is underway in all key jurisdictions with settlement discussions expected to start in NY next week. Offshore wind PPA renegotiation for Commonwealth and Park City Wind, NECEC legal proceedings (likely next April), and any updates from the NM Supreme Court on the pending PNM merger remain the items to watch. See our note here.

NWE — NWE posted 3Q22 results below our and consensus estimates, as the Company saw lower transmission volumes and was impacted by higher power costs in the region. As a result, NWE lowered the top end of the 2022 guidance range, which aligns closer to our estimate for the full year. The MT GRC is the big-ticket item and will be instrumental in NWE being able to earn closer to its allowed return and recovery of future power costs in a timely manner. The interim rate implementation was a step in the right direction, and rates will be retroactively applied to October at the conclusion of the rate case. Management will wait until then to provide updated guidance. With the MT GRC and SD IRP filed, NWE will be looking to file its MT IRP by the end of the year. See our note here.

POR — POR reported solid 3Q results, settled a number of deferrals totaling ~$130M, announced a first RFP win worth $415M in capex, and raised its target LT growth rate to 5-7% (from 4-6% prior)—more in line with industry average. The slew of good news lead the shares higher intraday, and the company announced a sizable equity issuance after the close (see above). See our note here.

Figure 3 - Regulatory Calendar

State	Company	Parent	Docket	Rate Case Type	Date of Proceeding	Agenda Item
TX	Entergy Texas Inc.	ETR	D-53719	Electric	11/2/2022	Staff Testimony

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

WEC – Reply briefs filed in Wisconsin rate cases

DUK – DEF ROE increase; final order issued

NEE/ED – MVP reported to halt eminent domain cases for MVP Southgate

PCG – PG&E power shutoff warning restarted this weekend, company continues monitoring conditions

Wind – AVANGRID seeks potential changes to Commonwealth Wind PPAs

- "In response to the unprecedented economic challenges facing all major infrastructure projects, including historic price increases for global commodities, sharp and sudden increases in interest rates, prolonged supply chain constraints, and persistent inflation, AVANGRID has filed a motion with the Massachusetts Department of Public Utilities seeking a one-month suspension in the review of the Power Purchase Agreements (PPAs) for the Commonwealth Wind project. A one-month suspension in the proceeding provides a needed opportunity for AVANGRID, the Massachusetts Electric Distribution Companies, state and regulatory officials, and stakeholders to evaluate the current economic challenges facing Commonwealth Wind and assess measures that would return the project to economic viability including, but not limited to, modest changes to the PPAs." – release [NYSE: AGR]
- More HERE

Guggenheim takeaway: *AGR's move to potentially change the PPAs for the project is yet another data point supportive of our view that some of the previous bidding behavior in the Northeast may have been aggressive. The prospects for upheaval in the space is another reason we see ES' intention to exit its JV as a positive move, and while AGR's actions may raise more questions about some of the more marginal projects underway, we don't think*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

this is something that will have readthrough to ES' process or even D's regulated work off Virginia given what has been a laser focus on cost and materials from both parties to date.

EVRG – Reply briefs filed in MO cases

- OPC, MECG, EVRG, Staff, and others have filed their reply briefs on the ongoing contested portions of the MW and Metro cases, including on familiar items like Sibley and AMI.
- "The Commission should apply the same logic here, and fairly apportion risk between shareholders and ratepayers by allowing return of but not on Sibley. Evergy's arguments that "such investment was made on behalf of customers, and that customers in fact benefitted from the Company retiring an uneconomic plant"27 ignores that customers will also have to pay the costs to replace Sibley's generation.28 OPC witness Dr. Marke discusses increased costs Evergy ratepayers may face due to replacement generation costs or increased purchased power from the Southwest Power Pool (SPP).29 Evergy witness Darrin Ives discusses a capacity contract that West entered into with Metro to meet SPP capacity requirements upon the closure of Sibley.30 It is only equitable that customers not pay for both the return of a retired plant, and the replacement generation for it.31 Utilities are not entitled to recover all prudent expenditures in its rates.32 The Courts have found "the PSC has broad discretion to include or exclude expenditures to arrive at rates it deems to be "just and reasonable."33 The Commission should exercise that discretion in this case, and deny Evergy's request for return on the NBV of Sibley." – Staff
- More HERE.

Guggenheim takeaway: *With several settlements/stipulations in these cases, the crux of the remaining issues in the briefs is firmly centered on the various avenues for resolving the remaining Sibley balance, alongside several familiar tertiary items (AMI, hydro PPA, etc.). While we excerpted parts of Staff's position above and note that others have put forward their own detailed positions in the initial post hearing briefs (see our note HERE), in our view, clarity will have to come from the PSC's final order, which we expect in the coming weeks around the 3Q earnings timeline. In our view, the potential for EVRG to not earn on the remaining Sibley balance has been disseminated for some time, and we continue to see this as a discrete legacy (postmerger) issue for EVRG.* ***We hosted EVRG management for an NDR this summer to discuss Sibley and the broader regulatory backdrop – see our note from those meetings HERE.***

EXC/IL – Proposed order filed in final ComEd FRP process

- The order calls for the formulaic 7.85% ROE as calculated by the company and supported by Staff, alongside the adoption of a ~$2.9bn revenue requirement.
- "Staff's recommended 2023 Initial Rate Year Revenue Requirement is presented in Appendix A to this Order,2 Schedule 1 FY, line 1 is $2,860,265,000. The Commission approves this figure based on the extensive evidence in the record and the reasons indicated below." - ICC
- More HERE.

Guggenheim takeaway: *Heads up and generally on schedule following briefs and ahead of a final order in the weeks ahead. As a reminder, this is EXC's last FRP under the current construct, with the utility slated to transition to multiyear rates in '24, should it elect to do so with a filing in January.*

VA/Nuclear – Momentum behind nuclear R&D continues to build in VA

- Multiple lawmakers and industry groups are seeking to build off the momentum of Governor Youngkin's recent SMR funding proposal, including efforts to work with West Virginia on securing federal funds.
- More HERE.

Guggenheim takeaway: *Interesting read as the state continues to rally around nuclear as a next-generation zero carbon resource, and in line with prior all-of-the-above commentary from the administration. We continue to see VA as one of the more active states on not only advanced nuclear, but also more familiar renewable resources.*

DUK – NCUC prioritizes keeping on schedule in Carbon Plan proceeding

- "The Commission has carefully considered the Joint Intervenors' Motion and Duke's Letter. The evidentiary record in this matter was closed on September 29, 2022, following

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

a hearing during which the record was developed. In accordance with N.C.G.S. § 62-110.9, the Commission must render a final decision in this docket by no later than December 31, 2022. Time is, as it has been, of the essence." – NCUC in Docket E-100 Sub 179
- Docket E-100 Sub 179

Guggenheim takeaway: *As we expected (see our prior daily HERE), the NCUC is sensitive to its Dec 31, 2022 deadline to have a Carbon Plan approved and in place.*

SO – Staff and Intervenor testimony filed in Georgia Power rate case

- Staff recommend an ROE of 9.45% (vs. 10.5% last authorized), within the range of 9.00%–9.90%.
- Staff also recommends lowering Georgia Power's equity layer to 51% (vs. 56% last authorized), effective 2024 once Vogtle Units 3 & 4 are in service.
- Docket 44280

Guggenheim takeaway: *The PSC has historically been supportive of Georgia Power's credit metrics and financial health, and we would expect the final decision in this rate case (expected in December), to continue that trend.*

EIX/PCG/SRE – Comments filed on competing PDs in the CA Cost of Capital deferral proceeding

- Intervenors filed comments on the proposed decisions in the cost of capital proceeding (2022).
- Majority of the opposition comments focus on claims of legal errors and departure from precedent contained in the proposed decision.
- CPUC previously issued 2 proposed decisions (PD and APD) on the 2022 cost of capital deferral.
- Both PD and APD agree an extraordinary event occurred and agree to waive the automatic ROE adjustment.
- While the PD seeks to continue the proceeding to determine 2022 ROE, President Reynolds' APD seeks to maintain current ROEs and close the proceeding.
- Consumer, TURN, and various energy coalition groups have previously filed in opposition arguing for allowing CCM due to both administrative rules and customer affordability factors.
- Reply Comments are due October 25th.
- Docket: A2108014
- Summary of PD / APD here.

Guggenheim takeaway:*The intervenor comments are in line with our expectations of attempting to find legal/administrative angles to oppose a cost of capital decision that does not lower rates. While this proceeding is for interim period rates (i.e., there is a 2023 cost of capital application outstanding and in the late phases of CPUC process), there are some datapoints on CPUC process. As we anticipated, there is a push to maintain status quo, especially as quantitative inputs have changed dramatically including interest rates and Moody's bond index. The APD approach seems reasonable to us and keeps the CPUC process flowing smoothly.*

WEC – Reply briefs filed in Wisconsin rate cases

- WEC's utilities make their case for maintaining their current ROEs of 10% (10.2% for Wisconsin Gas), which were set in 2019 when interest rates were much lower than they are today. CUB, by notable comparison, recommends a departure from previous methods and lower ROEs.
- Docket 6690-UR-127
- Docket 5-UR-110

Guggenheim takeaway: *Wisconsin has historically been a reasonable jurisdiction, and we would expect that to continue in these cases. Investors should also recall that WEC's utilities have settlements in place resolving most other matters, including raising the equity layer of each utility by 50bps.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

DUK – DEF ROE increase; final order issued

- As a result of DEF's petition and by operation of the 2021 Settlement Agreement, the company's authorized ROE shall be increased by 25 basis points to a mid-point of 10.10% and the authorized range adjusted to 9.10% to 11.10%, effective as of August 1, 2022.
- Docket 2022-0143

Guggenheim takeaway: *ICYMI, and as we've previously written about.*

NEE/ED – MVP reported to halt eminent domain cases for MVP Southgate

- MVP Southgate (MVP extension) was reported to halt eminent domain land acquisitions.
- MVP has faced challenges with local permitting including air permit denials.
- The main MVP pipeline likewise remains challenged.
- More here.
- FERC Docket: CP19-14

Guggenheim takeaway: *MVP Southgate has faced multiple setbacks in the past as local permitting agencies denied requests. Given the uncertain status of the main MVP project, the activities on Southgate could become moot. WE note that NEE and ED have taken a majority of value write downs on the main MVP project.*

PCG – PG&E power shutoff warning restarted this weekend, company continues monitoring conditions

- PG&E issued a notice it could restart power shutoffs due to dangerous wildfire conditions this weekend.
- Risk has been reduced over the weekend, but PG&E continues monitoring conditions for shutoffs.
- More here.

Guggenheim takeaway: *FYI.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

GUGGENHEIM

Invite: 57th EEI Financial Conference

Dates

November 13 - 15, 2022

Location

The Diplomat Beach Resort
Hollywood, FL

Company Dinners (Hosted by Guggenheim)

Sunday, November 13, 2022

5:30 p.m. | Cocktail Reception with full Guggenheim Securities Team & corporate utility clients
Hyde Beach House — 4010 South Ocean Drive, Hollywood, FL 33019

6:30 p.m. | Dinner with **Duke Energy Corp (DUK)** CEO, CFO, and others
Terrazas at Hyde Hollywood — 4111 S Ocean Drive, Hollywood, FL 33019

Monday, November 14, 2022

6:30 p.m. | Dinner with **Entergy (ETR)** CEO, CFO, and others
ETARU — 111 S Surf Rd, Hallandale Beach, FL 33009

Guggenheim Hosted Utilities Investor Discussion Panel with Shar Pourreza and Trading/Sales

Tuesday, November 15, 2022

6:00 p.m. | *Billy's Stone Crab — 400 North Ocean Drive, Hollywood, FL 33019*

Company Meetings

More Utilities may be added and we will update schedule accordingly

Sunday, November 13th

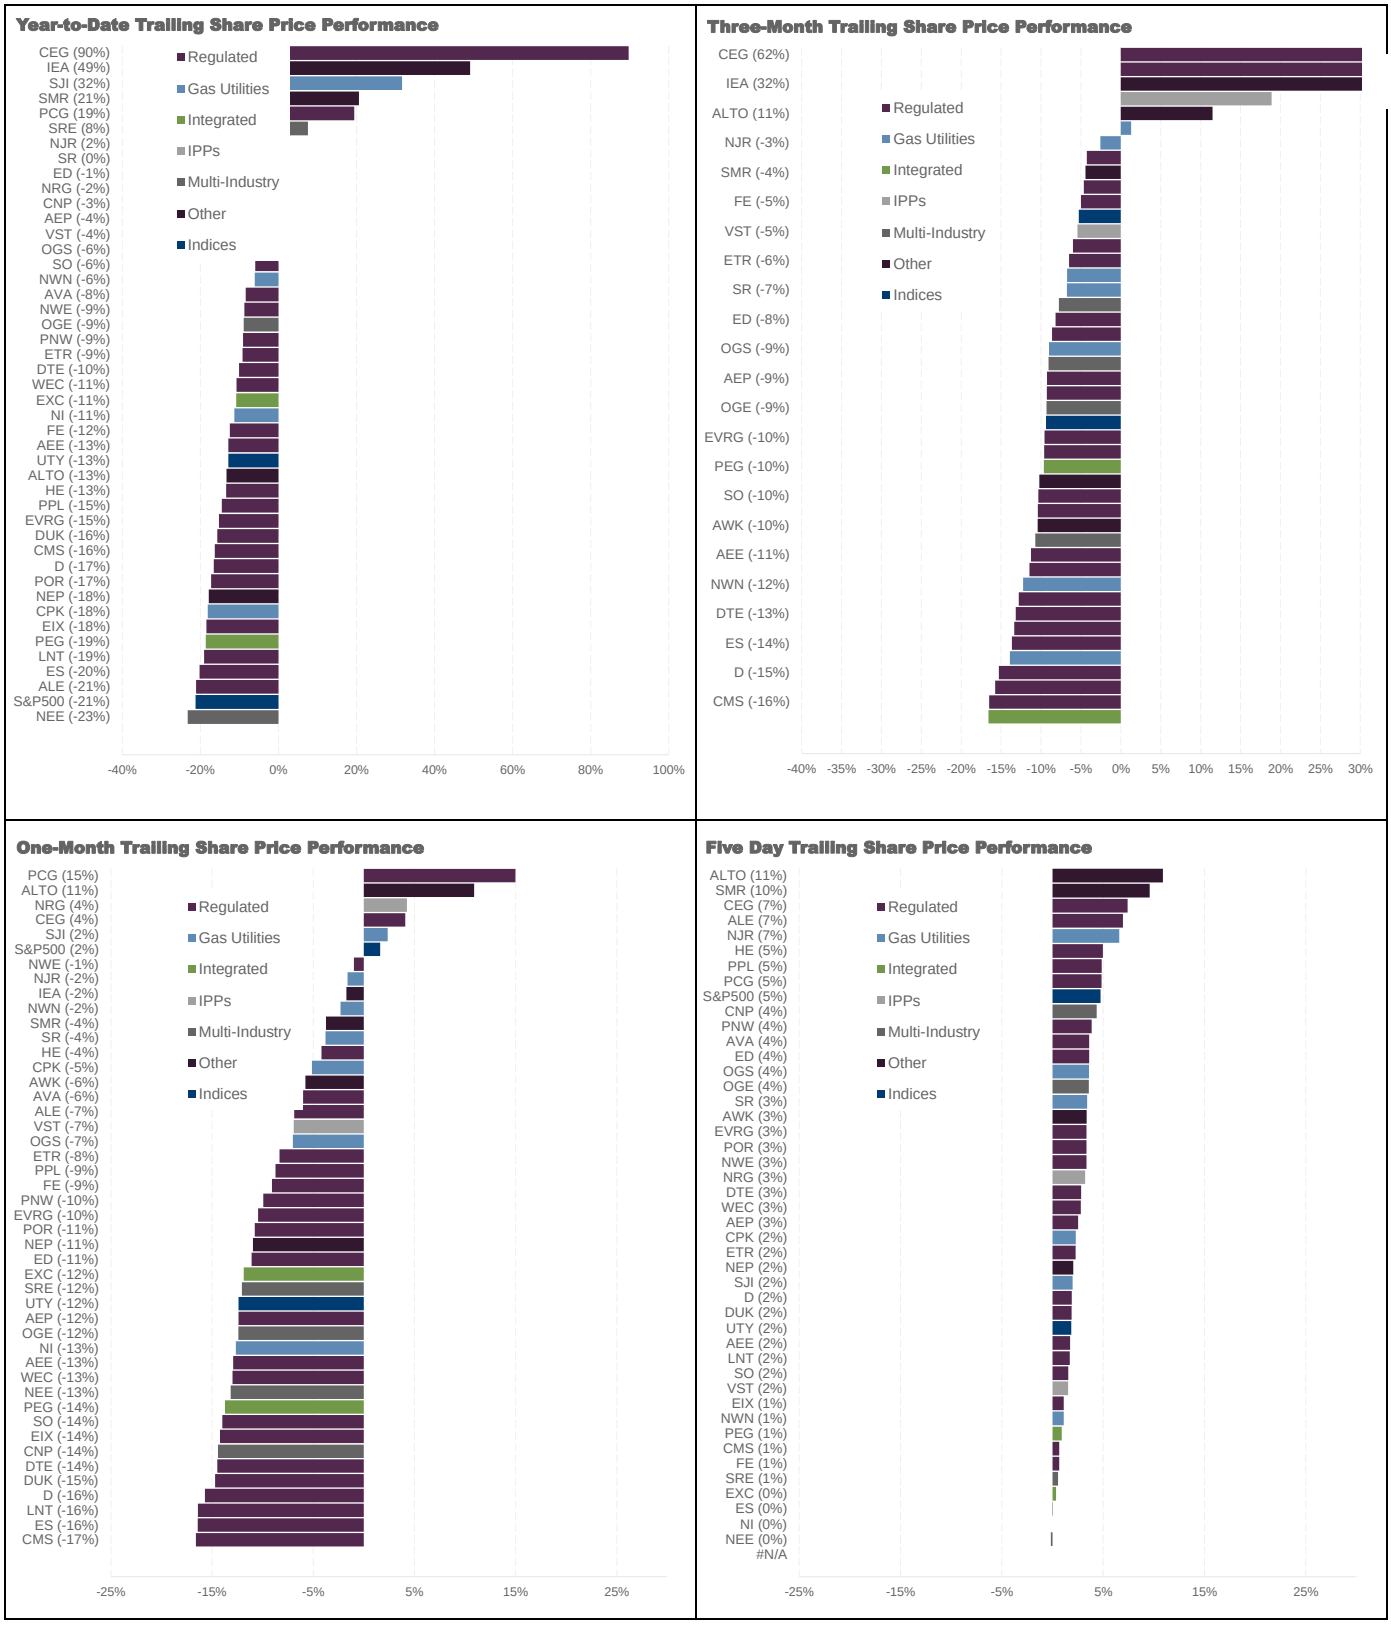
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Alert

October 24, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: DUK, CMS, ETR, ES, SO, AGR, AEP, XEL, EIX, SRE, EXC, CNP, DTE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

3Q earnings begin with POR, NWE, AGR, FE, DTE, AEP, CMS, XEL, SO, and NEE scheduled to report. Join us at the EEI conference in FL on November 13-15 (schedule included). On our regulatory calendar, we are tracking proceedings in DUK's NC Carbon Plan, CMS's MI electric rate case, ETR's TX GRC, ES's Aquarion water case, and SO's VCM 27. In other news, the GA Staff and interveners file testimony in SO's GA rate case; FERC releases its 2022/2023 Winter Assessment; AGR files to delay evidentiary hearings and commence settlement discussions in NYSEG's and RGE's electric and natural gas rate cases; PUCO Staff proposes stricter reliability standards for AEP; CO PUC considers proposing legislation to allow Community Choice Aggregation; AGR seeks a delay in the DPU's review of PPAs for Commonwealth Wind as it takes stock of inflation and supply chain constraints; CA Energy Commission adopts load management standards to reduce peak usage; XEL seeks regulatory approval for owning microgrids in MN; SRE and Bechtel execute a final EPC contract for Port Arthur LNG Phase 1; PA Senate confirms governor-appointed commissioners, returning the PUC to full strength; PA ALJ recommends approval of PECO's rate case settlement, and FERC approves a pipeline that will fuel CNP's 460 MW IN natural gas facility.

ICYMI

We published a quarterly earnings preview for our utilities and alternative energy coverage: The Average Is Over.

Earnings Calendar

3Q earnings begin: POR, NWE, AGR, FE, DTE, AEP, CMS, XEL, SO, and NEE are scheduled to report this week (see calendar below). Our recently published preview includes our thesis, expectations, and estimates for our coverage.

Figure 1 - Earnings Calendar

3Q22 Utilities Earnings Calls			
Company Name	**Ticker**	**Date**	**Time (ET)**
Portland General Electric Co	POR	10/25/2022	11:00 AM
NorthWestern Corp	NWE	10/25/2022	3:30 PM

Regulatory Calendar

DUK — Proposed orders and briefs in DUK's NC Carbon Plan are due on October 24: Parties have until October 24 to file post-hearing documents, including proposed orders. Throughout the hearings, the parties including DUK presented 11 portfolios to the Commission that varied in technologies and timing. There is less disagreement in the shorter-term targets and DUK is requesting the NCUC approve the proposed near-term approach (through 2026) while debating the longer-lead-term proposals and possible technologies during future carbon plan filings, which are required bi-annually by law. The NCUC is required to present the first NC Carbon Plan by December 31.

CMS — Briefs in the CMS MI electric rate case are due on October 26: MI PSC Staff filed testimony recommending a $170M revenue increase, premised on 9.70% ROE and 51.0% equity. CMS is seeking a revised revenue increase of $287M based on a 10.25% ROE, a 51.5% equity layer, and a projected YE23 test year. The delta lies primarily in the lower recommended ROE. The drivers of the present case include investments in new solar and natural gas-fired generation, system reliability, resilience, and cost recovery for the planned acquisition of the Covert plant in 2023. CMS requests rates to be effective March 1, 2023.

ETR — Intervenor testimony in ETR's TX GRC is due on October 26: ETR is requesting a $131M revenue increase based on a 10.8% ROE (10.5% ROE + a 30 bps performance added) and 51.21% equity layer. Investments of ~$2.3B since the 2018 GRC including the addition of the Montgomery County power station and the Hardin County peaking facility, which are currently recovered under the GCRR rider are driving the rate increase. ETR is proposing resetting the GCRR, DCRF, and TCRF rider balances to zero. A decision is expected by May 2023.

ES — Staff testimony in ES's Aquarion water rate case is due on October 26: ES filed a three-year rate case with the CT PURA for Aquarion Water requesting a ~$27.5M rate increase in RY1, ~$13.6M in RY2, and ~$8.8M in RY3. The request is based on 10.35% ROE, 53.06% equity, and a 2021 test year with rates effective March 15, 2023. The Company has invested ~$740M on infrastructure investments since the last rate case in 2013, with only 25-30% of water capex covered under trackers, creating a regulatory lag (ES earning ROE at the 7% level vs. the authorized 9.63%). In its last rate case, Aquarion received a ~$14M revenue increase based on 9.6% ROE and 51.5% equity.

SO — Company testimony in GP's VCM 27 is scheduled for October 27: GP's VCM 27 pertains to the January-June 2022 period. GP has presented a $522M capex for review only and is not seeking Commission action at this time. SO is under an agreement with the GA PSC, for a semiannual VCM approval process. The Commission will wait until Vogtle Units 3 and 4 are complete before determining the reasonableness and prudence of the cost overruns and their attribution to ratepayers. The agreement was part of the VCM 24 Order when SO agreed that it would not seek approval of any costs exceeding the $7.3B cost recovery previously deemed reasonable by the Commission until the prudence review is complete. In VCM 27, GP's cost forecast is relatively unchanged at ~$10B and the Company maintained the in-service dates for 1Q23 and 4Q23 for Units 3 and 4, respectively. The fuel load for Unit 3 has commenced and SO expects to begin the Unit 4 fuel load by July 2023. The remaining capex to complete the project is ~$1.0B, including GP's share of project contingency.

Recent Developments for Companies Under Our Coverage

From our midweek: GNRC pre-announced 3Q22 results October 19th, but we are unaware of any direct exposure ENPH, NOVA, and RUN may have. In other news, residents and environmentalists filed a lawsuit against NWE regarding its Yellowstone gas unit; the VA governor proposes $10M for energy research, including small modular reactors; an intense AZ storm causes outages in the PHX metro area over the weekend; D makes a third clean energy filing in VA; DEF follows NEE in quantifying customer savings from the provisions in the IRA; EXC announces leadership changes; the NJ BPU approves a four-year EV program for RECO; DTE and 7-Eleven announce a renewables partnership through DTE's voluntary MI Green Power.

FERC releases Winter Assessment: In the 2022/2023 Winter Assessment, FERC concludes that the U.S. should have more than adequate power supplies for normal conditions. Further, NOAA predicts a milder winter for many regions resulting in reduced natural gas and electric demand. The Northwest and West North Central regions are the only regions forecast to experience cooler-than-normal temperatures. However, some regions could experience capacity shortfalls during an extreme weather scenario, including ISO New England, MISO, TX, and parts of the Southeast. New England's grid is particularly vulnerable, given its limited natural gas pipeline capacity and high levels of gas-fired power generation. While domestic consumption will not benefit from LNG, exports are expected to increase, resulting in HH natural gas futures prices being 30% higher than last winter. Southern California and the Desert Southwest could face gas pipeline constraints due to increased exports and an ongoing pipeline outage. FERC's Winter Assessment covers the period from December-February.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

SO — We reviewed Staff and intervenor testimony in SO's GA rate case:

- Staff recommends a rate increase of $529M over three years - an $11M decrease in 2023, followed by increases of $153M in 2024 and $388M in 2025 - premised on 9.45% ROE and 56% equity layer in 2023. Staff proposes lowering the equity layer to 51% beginning in 2024 when Vogtle Units 3 and 4 come online.
- GP's filing includes a request to raise revenue by $1B over three years - $852M in 2023, $107M in 2024, and $45M in 2025. The request is based on 11% ROE and 56% equity. Other items in the filing include a continuation of the Alternate Rate Plan that has been in place since 1995. The base rate request excludes any cost recovery for Vogtle Units 3 and 4, which will be added later following a prudence review once the units reach COD.
- We are currently modeling that SO receives 60% (or $602M) of the ask and expect the outcome to fall between the $529M Staff testimony and the $1B request by GP.
- GP received a constructive outcome in the previous rate case, receiving ~97% of the cumulative ask ($909M vs. $942M) based on a 10.5% ROE and 56% equity. GP is seeking a continuation of earnings to be evaluated against a dead band of 9.5-12%, with 80% of the earnings above the 12% ROE being shared with ratepayers and the remaining 20% retained by the utility. GP is also seeking to continue the option to file for interim cost recovery if earnings fall below the low end of the dead band. A GA PSC decision is expected by December 20.
- GA SEIA filed intervenor testimony recommending that the Commission reject SO's proposal to introduce a $200 interconnection fee regardless of size and maintain the current fees of $5/kW for systems under 250 kW (which works out to ~$35 fee for an average-sized residential system). SEIA also recommends that the Commission deny SO's request to adjust revenue by $1.4M for lost revenue associated with the monthly netting cost shift, as SO has not appropriately accounted for exported energy in its cost of service study. SEIA recommends that the GA PSC reconsider the earnings band that has been part of GP's rate mechanism for a long time and calls it too wide.

AGR — AGR seeks a delay in the DPU's review of PPAs for Commonwealth Wind as it takes stock of inflation and supply chain constraints: AGR made a formal appeal to the MA DPU seeking a one-month suspension of the DPU's review of the PPAs for the 1,232 MW Commonwealth Wind project. At the recent analyst day, the management of AGR had alluded to a pause in the plans for the development of Commonwealth Wind and conversations around potential changes to PPA terms to improve the project's economics. So the formal filing does not come as a surprise. The filing asks that the DPU suspend proceedings for one month until the parties (the distribution companies and AGR) can consider the impact of the commodity price increases, interest rate hikes, and supply shortages on the viability of the project, including whether the project remains economical and whether it can continue to be financed under the current terms of the PPA. AGR intends to use the time to discuss with stakeholders and regulators the potential for changes to the PPA while still factoring in the potential benefits of the IRA.

AGR — AGR files to delay evidentiary hearings and commence settlement discussions in NYSEG's and RGE's rate cases: AGR filed with the NY PSC to request a 60-day delay (to November 2) in the evidentiary hearings to allow the parties to commence settlement negotiations. NYSEG and RGE support a settlement process incorporating a multiyear rate approval as they did in the last rate case proceedings. The parties are ~$126M apart as Staff recommends a $323 M revenue increase vs. AGR's cumulative request for $449M. Staff's revenue requirement is premised on an 8.85% ROE on 48% capital vs. AGR's ask for 10.2% ROE and 50% equity. AGR's last rate cases in NY settled at 8.8%/48% in 2020. New rates are expected to go into effect in May 2023, when the term of the last rate case ends.

XEL — XEL seeks regulatory approval for owning microgrids in MN: XEL has made a filing with the MN PUC seeking permission to own and operate microgrids that it is setting up for certain C&I customers in MN. The proposal aims for 28 projects by 2028. The filing is being met by opposition from solar developers who contend that XEL would have an unfair advantage given its incumbent status and would use its monopoly status to outcompete others. Microgrids are fast becoming a flashpoint between regulators, utilities, and clean energy developers. The creation of microgrids allows for standalone clean/renewable generation and storage infrastructure that communities can use to generate and share electricity and are a valuable resource in times of grid outages caused by downed power lines. Microgrids are also favored as a substitute for carbon-emitting backup power including diesel generators. Incidentally, a similar debate is playing out in CA where solar developer NOVA has applied to the CPUC for permission to operate a microgrid in certain newly constructed residential developments, and in that case, the utilities have filed a protest with the Commission saying that IOUs must be involved in microgrid deployment to ensure reliability.

XEL — CO PUC considers proposing legislation to allow Community Choice Aggregation: The CO PUC is considering whether to recommend to state legislators to allow CCA in the state. The PUC has been conducting a study since CO legislators signed HB 21-1269, requiring the Commission to analyze options. CCA is currently authorized in ten states, and four states are actively investigating the possibility, including CO. Those against CCA argue that it would threaten large-scale renewable projects and disrupt the clean energy transition, while those in favor believe it would allow for lower prices and faster connections to renewable power. XEL opposes the initiative saying that it would add risks without clear benefits. Previous efforts of this type — including the proposed municipalization of the grid in Boulder and Pueblo did not succeed. The PUC is expected to make its recommendation by December 15.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

EIX, SRE — CA Energy Commission adopts load management standards to reduce peak usage: The CA Energy Commission adopted standards requiring that utilities develop rates that change at least once an hour to improve grid reliability and more efficiently use renewable resources (primarily solar in CA) that tend to peak during the mid-day when demand is otherwise lower. According to the CEC, the new standards could reduce peak electricity use by 120 GWh. The new standards take effect in April 2023 and will apply to the PCG, SRE, and EIX among others.

SRE — SRE and Bechtel execute a final EPC contract for the construction of Port Arthur LNG Phase 1: SRE and Bechtel Energy executed an amended EPC contract for Port Arthur Phase 1 with an updated construction price of $10.5B, vs. $8.9B per the 2020 contract. The contract price assumes SRE issues Bechtel a full notice to proceed by February 8, 2023, with price escalations for any delays. The final contract is a critical step in advancing the project toward an FID. SRE has secured enough HOAs (9.65-11.65 MTPAs), which, if all converted to firm contracts, would be sufficient to fill the 10 MTPA offtake capacity for Phase 1. SRE recently received a 50-month extension to build the Port Arthur LNG facility and associated natural gas pipelines. SRE will now have until June 2028 to complete the project.

DTE — BP agrees to acquire U.S. RNG producer Archaea Energy for $4.1B: BP agreed to acquire Archaea Energy for $4.1B in cash and debt as part of its plans to expand its bioenergy business and meet decarbonization targets. Archaea operates 50 RNG and landfill gas-to-energy facilities in the U.S. producing ~6,000 boepd of RNG. The deal will increase BP's biogas supply volumes by 50% according to the Company. BP is targeting completing the purchase by the end of the year. DTE's Vantage business is a competitor of Archaea and we see the price paid by BP as an endorsement of the value of the asset in DTE's portfolio.

EXC — PA Senate confirms governor-appointed commissioners, returning the PUC to full strength: The PA Senate confirmed Vice Chairman John Coleman (R) and Stephen DeFrank (D) and Katie Zerfus (D) to fill the vacant seats at the PUC. The PA PUC has been operating with two of five commissioners since the beginning of October and with only three commissioners since April 2021. Coleman, whose term expired April 1 was forced to leave the commission effective October 1 based on statutory limits. The other two seats have been vacant since April 2020 and April 2021. The state legislature has been in a standoff with the Governor regarding the confirmation of the PUC Commissioners concerning the Governor's support for the state to enter the RGGI. The governor appoints the PUC commissioners to five-year terms.

EXC — ALJ recommends approval of PECO's rate case settlement: The ALJ recommended that PA PUC approve PECO's PA gas rate case settlement without modification. The settlement agrees to a $62M revenue increase, ($55M net rate increase and a $7M resetting of the DSIC). The settlement is silent on the ROE and capital structure and includes a rate and DSIC stay-out until March 2024. A final order from the Commission is expected by the end of 2022, and new rates will likely go into effect in January 2023.

EXC — EXC files a draft proposed order in ComEd IL FRP: EXC filed a draft proposed order for a $199M revenue requirement. The proposed order is premised on a 7.85% ROE (which is formulaic), 49.45% equity, and a rate base of ~$14B. This compares to EXC's initial request of $223M. A Commission decision is expected by December 12, and new rates will go into effect in 2023. This will be EXC's last formula rate plan filing in IL. EXC is currently engaged in finalizing the PBR framework that will make its way into the next rate case, which is expected to be filed in early 2023 for rates effective in 2024.

CNP — FERC approves pipeline that will fuel 460 MW IN natural gas facility: FERC approved the expansion of the Henderson City pipeline project. The expansion project is designed to deliver 220 MMBtu/d to two new natural gas generation units at the A.B. Brown Generating Station. CNP previously received approval from the Indian utility commission to build the new natural gas combustion turbines. As part of this approval, CNP will spend ~$334M on 460 MW of capacity to replace the retirement of A.B. Brown coal-fired units 1 and 2 (~490 MW) scheduled for late 2023. The investment is part of the Company's energy transition plan and stems from the 2020 IRP.

AEP — AEO and PUCO Staff diverge on reliability standards: In a reliability performance standards revision filing, PUCO Staff proposed an adjustment to AEP's reliability standards to a CAIDI of 136.52 and SAIFI of 1.16. This compares to AEP's 2022 request to increase the CAIDI to 158 and SAIFI to 1.30 for 2022 and 1.28 for 2023 and beyond. Per the 2018 settlement, which set the current standards for a CAIDI of 148 and a SAIFI of 1.18, AEP was directed to file a new application to establish new standards. AEP now believes the current targets are too optimistic given AEP's current system and challenges (e.g., falling trees), leading it to request to lower the standards. According to Staff's calculations, AEP missed the standards in 2018 and 2019. [SAIFI: System Average Interruption Frequency Index indicates the average number of interruptions experienced by a customer in a year; CAIDI: Customer Average Interruption Duration Index indicates the time elapsed between an outage and restoration of power].

SO — AL Power is accepting RFP proposals for renewable resources: AL Power issued an RFP for renewable resources expected to enter service between 2025-2027. The RFP is part of the AL PSC's 2015 order granting AL Power authority to acquire 500 MW of renewable resources by 2021; the AL PSC later extended the deadline to 2027. AL Power is seeking projects from 5-80 MW in size. The Company will consider bids for turnkey EPC agreements and PPAs for new-generation resources. The resources must be located in Alabama and connected to AL Power's system. Proposals are due by October 26, and short-listed bidders will be notified by March 20.

KBCM EEI Schedule Tentative Agenda (All Times Eastern):

Sunday, November 13, 2022

12:00 PM — Eversource Energy (ES)
2:00 PM — Xcel Energy Inc. (XEL)
3:00 PM — Sempra Energy (SRE)
4:00 PM — WEC Energy Group, Inc. (WEC)
5:00 PM — Atlantica Sustainable Infrastructure plc (AY)

Monday, November 14, 2022

8:00 AM — Duke Energy Corporation (DUK)
8:45 AM — Avangrid, Inc. (AGR)**
9:00 AM — Pinnacle West Capital Corporation (PNW)
10:00 AM — Exelon Corporation (EXC)
11:00 AM — Edison International (EIX)
11:00 AM — CenterPoint Energy, Inc (CNP)
12:00PM — DTE Energy Company (DTE)
1:00 PM — NorthWestern Corp (NWE)
2:00 PM — American Electric Power Company, Inc. (AEP)
3:00 PM — Portland General Electric Company (POR)
4:00 PM — FirstEnergy Corp. (FE)
Dinner — Dinner with NorthWestern Corp (NWE)*

Tuesday, November 15, 2022

7:00 AM — Entergy Corporation (ETR)
7:00 AM — Southern Company (SO)
8:00 AM — Ameren Corporation (AEE)
9:00 AM — CMS Energy Corporation (CMS)
10:00 AM — Consolidated Edison, Inc. (ED)
11:00 AM — Avista Corporation (AVA)
11:00 AM — Otter Tail Corporation (OTTR)
12:00 PM — Public Service Enterprise Group Incorporated (PEG)
3:00 PM — NextEra Energy (NEE)

**Dinner event.*
***30-minute meeting.*

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. Canary in the Coal Mine or Was Exelon an Unlucky One-Off? Q3 Earnings/EEI Could Provide Visibility

Key Message: After EXC's initial $300m cash flow drag warnings (later reduced to $200m with a further update expected in Q3 print), most investors we spoke with in the following days **worried about the 15% Book Minimum Tax triggering broader incremental equity needs as early as 2023, especially if credit/balance sheet capacity was an issue**. Management teams spent 2Q22 calls easing investor concerns as best they could, given hurried internal analysis performed with fairly sparse information at the time. As the industry waits for **significant clarifications and new guidelines expected from Treasury next year**, there is considerable uncertainty that is unlikely to be resolved in the meantime. However, despite being a common topic during our several weeks of recent in-person marketing meetings, as well as a regular source of inbound questions, many investors seem almost too complacent on the topic, in our view, despite management teams **continuing to revise prior guidance and messaging** on whether the BMT applies to them at all, and if so, **what the magnitude of the impact could be**. Anticipating more discussion around the Inflation Reduction Act (IRA)/BMT during 3Q22 calls and EEI meetings, our goal is to provide investors with background, visibility, and projections around the BMT — **who's potentially exposed, key drivers,** and **"known unknowns"** for which the industry is awaiting Treasury guidance.

This note **complements our LCOE report** that incorporated anticipated impacts of the IRA's revised clean energy tax credits. For a thorough analysis of current technologies' LCOEs and the IRA's impacts**, *see our 2022 LCOE note HERE*.**

Canary in the coal mine, or unlucky one-off?... EXC's 10-Q disclosure of a potential $300m BMT-driven **cash flow drag annually** set off alarm bells for utility investors that continued even after the company revised down to $200m on August 16 (with a potential further reduction when they report Q3) when the **IRA was signed into law**. Driven by concerns of 2023 cash flow reductions and resulting incremental equity needs, especially for those with minimal balance sheet/credit capacity, investors rushed to better understand who was at risk, while management teams worked to reassure nervous investors that their company would not be affected due to mitigating factors (e.g., NOLs) or tax credits on hand and being continually generated.

Do-it-yourself AFSI for investors… We were able to leverage insights gleaned from **multiple deep-dive calls** with **senior tax accounting leadership** at several very large utilities and have incorporated their feedback to develop a proxy for AFSI using only data that investors have access to vs. the contents of the company's tax filings, which are not public. Our goal was for investors to be able to determine how likely it is that the BMT applies to a given company, and then approximate the resulting tax obligation**, to better engage with company management** on the issue, if they so desire.

2023 equity fears addressed, but clarity/certainty is still a long way away… We highlight several names that we believe investors should monitor beyond **EXC** for various reasons, including: **AWK** (HOS consumed remaining NOL carryforwards and it is now a cash taxpayer), **ES** (few offsets to a cash drag from its T&D profile)**, ETR** (has some complexities with IRA implementation with regulators but is generally balanced between AMT cash tax drag and offsets from renewables investments), **DTE** (has acknowledged a potential cash drag, but the capex plan includes potential offsets through renewables allocations), and **PEG** (not immediately impacted by AMT thresholds but could see some impacts of cash taxes in later periods). **For more, see Company Discussions on page 10.** Other names that **would have been included but have zero exposure due to not meeting the $1bn pretax income threshold** include **NWE** (due to amount of capex expensed for tax purposes vs. capitalized vs. book purposes)**, CNP** (highlighted being a 10% cash taxpayer), and **PCG** (flagged affordability concerns).

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

PORTFOLIO MANAGER SUMMARY

No widespread near-term equity needs due to 15% BMT, but uncertainty likely to persist through next year.

Initially motivated by fears of widespread 2023 cash flow shortfalls driving incremental equity issuances, once satisfied that that was unlikely to happen, it appears to us that many investors simply ended their analysis of the 15% BMT. Corporates, by comparison, are quick to acknowledge that they are being forced to make many assumptions until proper clarity is provided by the federal government, likely in the form of **Treasury guidelines that could still be a year or more away**, according to senior tax experts at several of our utilities.

With important Treasury guidelines **unlikely to arrive anytime soon** and a current lack of federal guidance **requiring utilities to make significant assumptions in the meantime**, our goal in writing this note has been to provide investors with a better understanding of the 15% BMT and how it works while also incorporating **company messaging** and **insights from top tax experts** in response to investors' questions and concerns, which we gathered during several recent weeks' client meetings. **Driven by concerns around 2023 cash flow reductions resulting in incremental equity needs, investors rushed to better understand who was at risk, while management teams worked to reassure nervous investors that their company would not be affected** (*e.g., already paying significant cash taxes anyway, meaningful tax credit generation expected to offset, etc.*). While details were initially sparse, most companies have continued to provide additional clarity or even revised their original messaging since August.

While we are not accountants, we were able to leverage insights gleaned from **multiple deep-dive calls** with **senior tax accounting leadership** at several very large utilities and have incorporated their feedback to develop a proxy for AFSI using only data that investors have access to vs. the contents of the company's tax filings, which are not public. **Our goal was for investors to be able to determine how likely it is that the BMT applies to a given company, and then approximate the resulting tax obligation, to better engage with company management on not only near-term (2023) impacts, but also longer-term implications, given that many utilities' capital plans have uneven weighting between renewables/other generation/T&D from year to year throughout their respective planning horizons.**

We highlight EXC, AWK, ES, ETR, DTE, and PEG as names to continue monitoring.

2023 equity fears addressed, but clarity/certainty is still a long way away… We highlight several names that we believe investors should monitor beyond **EXC** for various reasons, including: **AWK** (HOS consumed remaining NOL carryforwards and it is now a cash taxpayer), **ES** (few offsets to a cash drag from its T&D profile)**, ETR** (has some complexities with IRA implementation with regulators but is generally balanced between AMT cash tax drag and offsets from renewables investments), **DTE** (has acknowledged a potential cash drag but the capex plan includes potential offsets through renewables allocations), and **PEG** (not immediately impacted by AMT thresholds but could see some impacts of cash taxes in later periods). **For more, see Company Discussions on page 10.** Other names that **would have been included but have zero exposure due to not meeting the $1bn pretax income threshold** include **NWE** (due to amount of capex expensed for tax purposes vs. capitalized vs. book purposes)**, CNP** (highlighted being a 10% cash taxpayer), and **PCG** (flagged affordability concerns).

Accurately calculating AFSI requires GAAP financial statements **and** values from a company's tax filings.

HOW DOES IT WORK?

Companies must calculate their adjusted financial statement income (AFSI) for each of the **three preceding years and take the average of the total**. If the three-year average of that adjusted, pretax figure exceeds $1bn, then the company is deemed to be an "**applicable corporation**". Applicable corporations must still prepare their regular federal corporate tax filing; however, they have the additional responsibility for tax years after December 31, 2022 to:

- Determine their AFSI for the current tax year.
- Apply a 15% tax rate to that figure.
- Reduce the now after-tax figure by any available tax credits, such as ITCs/PTCs, etc.
- Compare the amount of taxes owed under both the regular corporate tax regime and under the Book Minimum Tax and pay the IRS whichever is greater.
- To the extent that the company's taxes paid due to the Book Minimum Tax exceed what would have been owed under the regular tax regime, the taxpayer receives a credit that can be carried forward and applied against future corporate income tax obligations other than those arising from the BMT in future periods.

It is important to note that a company cannot accurately determine if it is an applicable corporation using only its financial statements. Calculating AFSI requires knowing values that are reported as part of the company's income tax filing, and likely nowhere else.

COMPUTING AFSI

1. Begin with GAAP (unadjusted) financial statements as reported.
2. Confirm the time tax and book financials' reported periods match or make the necessary adjustments to align them.
3. The AFSI of an affiliated group of corporations filing a consolidated return considers items on the group's AFS that are properly allocated to members of the group.
4. For items received from a corporation that is not on a consolidated return with a taxpayer, the taxpayer's AFSI considers **only the dividends** received from the other corporation and other amounts includible in **gross income.**
    a. *We believe this would include utilities with equity investments in unconsolidated affiliates,* ***e.g., WEC/LNT's stakes in ATC.***
5. **NOLs**: Reduce AFSI by the *lesser* of:
    a. The aggregate amount of financial statement NOL carryovers to the tax year.
    b. 80% of AFSI computed without regard to financial statement NOLs.
6. **Defined benefit pension plans**: Must remove all defined-benefit pension-related book income, costs, or expenses related to covered benefit plans, **including mark-to-market adjustments related to the defined benefit plan as well.**

A "Financial statement NOL" for any tax year is ***able to be carried over indefinitely****. "Financial statement NOL" is defined as* ***the amount of net loss on the corporation's AFS after applying the AFSI adjustments, for tax years ending after December 31, 2019.***

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

7. **Covered benefit plans (e.g., healthcare)**: Values from the company's tax return are used to increase AFSI by the amount included in the company's gross income under "other tax provisions" while **simultaneously reduced by the amount of any deductions permitted under other tax provisions**.
8. **Depreciation:**
    a. Apply the amount of MACRS deduction contained in the company's regular tax filing to its AFSI as well **(*see figures 6-8 for more*).**
        *i. Note that this could include individual projects and property **placed in service decades ago** which may be classified as 20-year property or longer.*
    b. Isolate the correct matching amount of straight-line depreciation included on the income statement which corresponds to all of the individual PP&E for which the previously mentioned MACRS deductions were made to AFSI.
    c. Finally, *consider other items Treasury specifies to properly account for the property*.
9. **Multiple by 15%:** Multiply the result of the above calculations by 15% to determine the initial tax obligation under the BMT.
10. **Tax credits:** Apply 75% of the value of the consolidated taxpayer's owned and applicable business credits (including ITCs/PTCs) directly to the calculated tax obligation in order to reduce the amount of income taxes actually owed.
11. **Compare and contrast:** Determine under which tax methodology the company's obligation is highest and pay that amount in taxes to the IRS.

Given the incredible complexity of undertaking the depreciation matching exercise described, we believe Treasury may end up determining a simplifying or generalizing rule to facilitate this onerous process.

OFFSETTING THE BOOK MINIMUM TAX WITH ZERO-EMISSION ENERGY CREDITS

The 15% BMT can theoretically be lowered to a floor of 3.75% if a sufficient amount of tax credits are applied in a given tax year.

The IRA contains clean energy tax provisions introduced by Senator Manchin and Majority Leader Schumer that set out to reduce greenhouse gas emissions in line with the goal of reducing greenhouse gas emissions 50-52% below 2005 levels by 2030, achieving a carbon pollution-free electricity sector by 2035 and achieving net-zero emissions by no later than 2050. Specific to renewable electricity generation, the IRA provides the potential for zero-emission projects to earn 100% ITC/PTCs through the later of 2032 or when greenhouse gas emissions for U.S. electric generation are reduced by 75% vs. 2022 levels. For example, this will allow new projects ***or repowerings*** to qualify for 10-year PTCs at the full inflation-adjusted rate through ***at least 2042***. Energy storage projects (including thermal) can now qualify for the ITC independent of connected generation facilities, as can several technologies that previously were not ITC-eligible. **Beginning in 2023, tax credits will now be able to be transferred to another party, reducing previous dependence on tax equity.** Tax-exempt entities are now eligible for "direct pay," allowing them to receive the tax credits despite the amounts naturally exceeding the amounts of federal taxes otherwise owing. Taxpaying entities will also be eligible for direct pay in the following limited specific circumstances: Section 45Q (credit for carbon capture and sequestration), Section 45V (clean hydrogen production credit), and Section 45X (advanced manufacturing production credit) for certain initial time periods.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Once Treasury guidance relating to the IRA's clean energy tax credits is issued (no timeline provided), projects beginning construction 60 days or more thereafter will be required to meet prevailing wage and apprenticeship requirements to qualify for the full ITC/PTC rate. For facilities placed in service beginning in 2025, to claim the full ITC/PTC rate, prevailing wage and apprenticeship requirements must be met. This means that laborers, mechanics, contractors, and subcontractors must be paid wages at least at prevailing rates (to be determined by the Secretary of Labor) during the construction, alteration, and repair of the facility and for either 5 years (ITC) or 10 years (PTC) thereafter. For projects beginning construction on or before December 31, 2022, 10% of the **total labor hours** must be performed by qualified apprentices, increasing to 12.5% in 2023 and finally 15% from January 1, 2024 onwards.

Additionally, projects that meet domestic content (e.g., steel, iron, manufactured products, etc.) requirements will become eligible for 10% ITC/PTC adders, meaning that an eligible project that meets prevailing wage and domestic content requirements would qualify for a 40% ITC, for example.

Figure 1: Apprenticeship and Domestic Content Requirements

Apprenticeship Requirements	2022	2023	2024	2025	2026	2027	2028+
Total labor hours applicable to a project	10.0%	12.5%	15.0%	15%	15%	15%	15%

Domestic Content % for Construction Begi	2022	2023	2024	2025	2026	2027	2028+
All projects other than offshore wind	40%	40%	45%	50%	55%	55%	
Offshore wind	20%	20%	27.5%	35%	45%	45%	

Note: Domestic content refers to the % of a project attributable to components which are mined, produced, or manufactured in the United States.

Source: H.R. 5376 and Guggenheim Securities, LLC analysis

Finally, an incremental 10% PTC and up to 20% ITC adder will be available for qualifying projects in low-income communities and "energy communities," including communities in which, after December 31, 1999, a coal mine or **after December 31, 2009, a coal-fired electric generating unit has been closed**.

SECTION 48: INVESTMENT TAX CREDIT (ITC)

Prevailing wage and apprenticeship attributes matter for full ITC credit.

The ITC was extended for projects that begin construction through 2024, with a base credit of 6% or a bonus credit of 30% of capital invested in qualified energy property being provided. To claim the higher 30% ITC rate, prevailing wage and apprenticeship requirements must be met, as described above. In addition to solar, wind, and combined heat and power (CHP) technologies, the credit is now available to energy storage projects (including thermal storage) of 5 kWh or greater, independent of associated generation facilities, as well as several previously unsupported technologies including linear generators (more HERE), microgrid controllers (more HERE), dynamic glass (more HERE), and biogas property (more HERE). Geothermal projects that begin construction through 2034 are eligible to claim the ITC as well.

Beginning in 2025, Section 48E, the Clean Electricity Investment Credit replaces the current ITC and is technology-neutral, provided that the project being placed in service generates greenhouse gas emissions of not more than zero.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Figure 2: Current ITC (assuming 75% GHG reduction by 2032) vs. pre-IRA ITC

Section 48 Investment Tax Credit	2022	2023	→	2032	2033	2034	2035	2036
Pre-IRA Investment Tax Credit	26%	22%		10%	10%	10%	10%	10%
Investment Tax Credit under the IRA								
Phaseout (assuming 75% GHG reduction by 2032)					*100%*	*75%*	*50%*	*–*
Base ITC	6%	6%		6%	6%	4.5%	3%	–
+ Adder if Labor Requirements met	24%	24%		24%	24%	18%	12%	–
= Base ITC if Labor Requirements met	30%	30%		30%	30%	23%	15%	–
+ Bonus if Domestic Content* satisfied		10%		10%	10%	7.5%	5%	–

*Note: Domestic content is defined beginning in 2023 as 100% American iron/steel and at least 40% American solar modules, inverters and electrical gear.

Source: H.R. 5376 and Guggenheim Securities, LLC analysis

PTCs no longer simply provide value for wind; solar and existing nuclear are now eligible, as well as a big boost for hydrogen.

SECTION 45: PRODUCTION TAX CREDIT (PTC)

The PTC was extended through 2024 for existing qualifying technologies, reinstated for solar energy through 2024 (the ITC can still be claimed in lieu), and new PTCs were created through 2032 for hydrogen (section 45V) and existing nuclear energy (section 45U). Beginning in 2025, a new technology-neutral credit, "Clean Energy Production Tax Credit" (Section 45Y) will be available. Projects placed in service on or after January 1, 2022 may now qualify for the full credit amount rather than a reduced phaseout amount; however, projects placed in service prior to January 1, 2022 will retain their historical phaseout-adjusted PTC amounts.

The base PTC of 0.3¢/kWh and full 100% PTC of 1.5¢/kWh (5x the base PTC) are subject to an IRS-determined Inflation Adjustment Factor which in 2022 stood at 1.7593x, resulting in a PTC of 2.6¢/kWh (the credit is rounded to the nearest multiple of 0.1 cent, or 0.05 cents in the case of the 0.3¢/kWh base PTC). **For hydrogen projects, the base PTC is set at $0.60/kg and bonus PTC of $3.00/kg, both indexed to inflation**, multiplied by the volume (in kilograms) of clean hydrogen produced by the taxpayer at a qualified facility during the taxable year. Any facility that meets the description of qualifying property under the clean electricity production credit shall be treated as five-year property under the General Depreciation System for purposes of Section 168 of the IRS Code.

Beginning in 2025, Section 45Y, the Clean Energy Production Tax Credit replaces the current PTC and is technology-neutral, provided that the project being placed in service generates greenhouse gas emissions of not more than zero.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Figure 3: PTC under IRA (phaseout timing assumes 75% GHG reduction by 2032)

Section 45 Production Tax Credit	2022	2023	→	2032	2033	2034	2035	2036
Inflation Adjustment Factor (IRS-provided)	1.7593x	1.7945x		2.1446x	2.1875x	2.2312x	2.2758x	2.3214x
YoY change	4.2%	2.0%		2.0%	2.0%	2.0%	2.0%	2.0%
PTC under the IRA (¢/kWh)								
Phaseout (assuming 75% GHG reduction by 2032)					*100%*	*75%*	*50%*	*–*
Base PTC	0.5	0.5		0.6	0.7	0.5	0.4	–
+ Adder if Labor Requirements met	2.1	2.2		2.6	2.6	2.0	1.4	–
= Base PTC if Labor Requirements met	2.6	2.7		3.2	3.3	2.6	1.7	–
+ Bonus if Domestic Content* satisfied		0.3		0.3	0.3	0.2	0.2	–
+ Bonus if "Energy Community" site		0.3		0.3	0.3	0.2	0.2	–
= Maximum PTC (ex-offshore wind)**		3.3		3.8	3.9	3.0	2.0	–

*Note: Domestic content is defined beginning in 2023 as 100% American iron/steel and at least 40% American solar modules, inverters and electrical gear.
**Note: Offshore wind qualifies for an additional 10% bonus.

Source: H.R. 5376 and Guggenheim Securities, LLC analysis

SECTION 6418: TRANSFER OF CREDITS

Tax credit transferability is a major boost for regulated utilities; BOT becomes more competitive, but the overall pie is also growing.

The IRA allows for some or all of the ITC, PTC, Section 45Y credit, and Section 48E credit to be transferred to another taxpayer under the newly created Section 6418. The election to transfer the credit must be made no later than the applicable filing date of the entity's tax return for that tax year, and once made is irrevocable. The transferee must pay for the credit in case, and the buyer may not deduct the amount paid for the credit or subsequently transfer it to another party. The cash payment received by the original generator of the credit will not be included in gross income, as it is intended to replace what otherwise would have been a reduction to the taxpayer's federal tax obligation.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

WHO COULD POTENTIALLY BE SUBJECT TO THE BMT?

Corporations with average annual AFSI that exceeds $1bn for any three consecutive tax years preceding the current tax year, beginning with tax years after 2022.

Figure 4: Trailing 3-year Unadjusted Pretax Book Income and Averages

COMPANY DISCUSSIONS

Treasury guidance will be critical in having complete visibility into applicability and magnitude, in our view.

Regulatory complexity could likewise require Treasury guidance for utilities, especially for multi-opco, smaller-sized utilities. Since utility parent companies are the taxpayer entities that would be subject to AMT, the recognition of earnings generated from operating companies and associated cash tax treatment at the operating company would require either tax sharing agreement, IRS guidance, or other regulatory agreements. **The less complex scenarios, in our view, exist for single utility holdcos, where earnings subject to AMT would be generated from a single source** (i.e., easier attribution of tax attributes). This would potentially include names such as EIX and PCG. **The notably more complex scenarios, in our view, include companies with multiple operating companies of various sizes where standalone opcos would be split on AMT applicability.** For example, companies such as ED (CECONY/O&R), CMS (electric/gas), and DTE (electric/gas) could have earnings power generated from operating companies on both sides of the AMT threshold and would require regulatory agreement to allocate parent cash taxes to operating companies. **The more complex scenarios include companies such as ETR and CNP where individual, multi-state opcos may not be subject to AMT, but the holding company would (*we await regulatory and Treasury clarification on this issue*).** While it is reasonable to assume a pro-rata allocation of cash tax down to the opco, there may need to be incremental tax agreement from multi-state regulators. While we do believe this will ultimately get resolved either through Treasury guidance or regulatory process, some utilities will carry less risk. *As we have previously noted – cash taxes paid would theoretically offset deferred tax liabilities at the opco level, resulting in net rate base accretion, albeit rather small (similar in some regards to 2018's TCJA).*

We highlight EXC, ES, ETR, DTE, and PEG as names to continue monitoring.

After evaluating our full coverage list (including names that fall below the threshold of being subject to the AMT), we summarize the puts and takes of which names warrant most warrant investors' attention and monitoring beyond EXC, in our view, along with a brief explanation: **AWK** (HOS consumed remaining NOL carryforwards and it is now a cash taxpayer), **ES** (few offsets to a cash drag from its T&D profile)**, ETR** (has some complexities with IRA implementation with regulators but is generally balanced between AMT cash tax drag and offsets from renewables investments), **DTE** (has acknowledged a potential cash drag but the capex plan includes potential offsets through renewables allocations), and **PEG** (not immediately impacted by AMT thresholds but could see some impacts of cash taxes in later periods). **For more, see *Company-Specific Comments* below.** Other names that **would have been included but have zero exposure due to not meeting the $1bn pretax income threshold** include **NWE** (due to amount of capex expensed for tax purposes vs. capitalized vs. book purposes)**, CNP** (highlighted being a 10% cash taxpayer), and **PCG** (flagged affordability concerns).

COMPANY-SPECIFIC COMMENTS

AEE will be subject to the AMT, but messaging to date has been cautiously optimistic on cash flow impacts as manageable… While a cash drag could be a headline negative, the impact would likely result in more of a customer bill issue as a passthrough cost rather than EPS pressure. The company has significant generation needs in the decade beyond its current planning period (e.g., 2027-37), as of its very recent MO IRP update, but the NT profile remains weighted towards non-renewables.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

AEP plans to use existing tax credit carryforwards along with the generation of substantially more tax credits as its renewable portfolio ramps up, **to offset the BMT.** The company expressed a very high degree of confidence at its recent analyst day that its cash flows will not be affected and expressly stated on its slide discussing the IRA and minimum tax: "**We Expect to Maintain Our Target FFO/Debt of 14%-15%**" (link HERE).

AWK is still evaluating the potential applicability and impact of the AMT on cash flows. The entirety of the company's capex is subject to 25-year MACRS and straight-line depreciation. In regards to applicability of the $1bn threshold, the company is looking at how one-time sales are reflected in the calculation (e.g., HOS in 2021). The sale of HOS last year utilized the company's remaining NOLs, and as such they have already been a cash taxpayer for 2022. Indications have been to expect further updates with the 3Q call and EEI.

CMS may not fall under AMT in the near term, but future cash tax obligations would likely be balanced with tax credits and renewables investments.

CNP will likely see a small headwind from AMT, but offsets include coal transition from Indiana, and a smaller gap on cash tax status vs. the 15%. Management acknowledged that the minimum tax will likely be a very modest headwind for the company but small enough to efficiently overcome. As CNP continues transformative moves and increases spending, any headline impacts would be muted, especially as CNP pivots to Houston resiliency and management does not see any material equity needs in the future (remaining opportunistic on further asset sales). Regulatory alignment remains a risk given the multiple opcos and jurisdictions.

D will be subject to the AMT, but the company has already messaged its initial expectations for a minor impact, if that, as it is already a cash taxpayer and could see ongoing offsets from significant ongoing investment in renewable generation and the nuclear PTC. The company has not indicated since first discussing the IRA on the 2Q22 call any potential cash drag, with a goal to provide further details around EEI. The balance of the IRA remains a positive for D from a bill headroom perspective given its generation-heavy capex plan: $22B in zero carbon resources, equivalent to ~60% of its current 5-year plan.

DTE previously acknowledged a slight cash hit but the potential offsets and net impacts from IRA remain positive. DTE has not been a cash taxpayer in the company's current financial plan through 2025 (pre-IRA). DTE has acknowledged a potential cash drag but the capex plan includes potential offsets through renewables allocations that would create tax credit benefits and accelerated depreciation that would mitigate cash issues (in our view).

DUK was one of the major utilities where we spoke to a senior tax expert directly on this topic**. The company has tax sharing agreements already in place** at the NCUC and its other jurisdictions, with **specific language addressing Alternative Minimum Tax** when applicable as well as regular tax obligations**.**

ED would likely be subject to AMT, with fewer offsets to a cash drag, but with a simple business structure we anticipate a straightforward regulatory alignment. Any cash drag would also be easily offset with proceeds from the recent CED transaction.

EIX could in time fall into the AMT threshold, but the single utility, single jurisdiction structure would help resolve issues. While a cash drag would be

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

a headline negative, the impact would likely result in more of a customer bill issue as a passthrough cost rather than EPS pressure.

ES will be subject to the AMT threshold, with fewer offsets to a cash drag from its T&D profile, but we anticipate regulatory alignment on eventual flow through to bill. The company is already a cash taxpayer, with any incremental cash drag likely offset with proceeds from the ongoing offshore wind divestiture.

ETR has some complexities with IRA implementation with regulators but is generally balanced between AMT cash tax drag and offsets from renewables investments. While ETR screens for applicability of AMT, the ultimate outcome could be mitigated by accelerated depreciation and tax credit generation from new renewable investments. ETR's current capex plan has $2.3B earmarked for renewables and $6.8B on generation capex (36% of total), which could be flexible depending on IRS guidance and IRA implementation. ETR noted that early analysis has showed a largely cash flow neutral outcome.

EXC's most recent estimates raised the prospect of a $200mm cash drag from the 15% AMT. Importantly, the company has subsequently flagged that Treasury guidance on items such as tax repairs and overhead, as detailed elsewhere in this report, could ultimately lower that figure substantially. The process at Treasury will take some time (potentially a year), and management's most recent messaging has been that while they will seek to promptly communicate developments to the Street (including potential commentary on the upcoming 3Q call), major updates may not be coming forthcoming for some time (4Q22+). The company does not own any generation.

NEE is arguably best-positioned within the group from a minimum tax (AMT) standpoint, given the opportunity for IRA tax credits to offset cash tax obligations. NEE's availability of tax credits on the balance sheet and future credits from solar/wind investments could allow the company to lower the AMT effective tax rate to 3.75%. Given the tax credit position for NEE, NEE's capex skew towards renewables/generation is not material to offsetting minimum tax via accelerated depreciation on shorter-lived assets (although it's a further layer of insulation from cash tax impacts). We anticipate a minimal level of regulatory complexity for NEE, given minimal levels of AMT and FPL's rational regulatory constructs.

NRG has acknowledged potential for a slight increase in cash drags from the minimum tax. The company has discussed the potential for an incremental ~$50mm drag post-IRA, with additional details likely forthcoming with 3Q results next month. NRG is generating significant FCF ~$1.5bn/year, and as such does not face the same financing concerns (BS/credit) as the other regulated utilities discussed herein. The company remains disciplined in allocating FCF between growth and returning to shareholders; we do not expect major capital investments in generation in our forecast window.

PCG could in time fall into the AMT threshold, but the single-utility, single-jurisdiction structure would help resolve issues. While a cash drag would be a headline negative, the impact would likely result in more of a customer bill issue as a passthrough cost rather than EPS pressure. Management is specifically looking at the affordability issues while IRS guidance will ultimately drive the impacts analysis.

PEG is not immediately impacted by AMT thresholds but could see some impacts of cash taxes in later periods. The sale of the fossil portfolio has likely mitigated AMT issues for PEG in the near term, but the T&D nature of the core

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

PSE&G business could limit the offsets to future cash drag. PSEG CFIO (in particular Nuclear) complicates the story a bit with unregulated business exposure and the associate treatment of future cash tax obligations. The official statement from management has remained muted on impacts as the company is still analyzing impacts and would look to Treasury guidance.

PPL is not anticipating a headwind from the AMT based on its current cash tax position (already close to 15%). The company has minimal renewables generation in its current capex plans – partially a function of its weighting towards T&D (~60% of 2022 pro forma EPS).

SO already expected to be a cash taxpayer around the 15% mark even before the IRA and CAMT came into being and therefore does not expect to see a material change around cash taxes paid, regardless of the 15% BMT**.**

SRE impacts from AMT would likely be minimal from a cash perspective and insignificant from EPS standpoint (per management). SRE is more complex due to the various ownership structures CA Utilities, Oncor (80%) and SIP (70%). While the headline AMT applicability would result in a cash drag, with limited offsets in our view, SRE financial plans were already based on a cash taxpayer status and the existing cash flow generation would likely dwarf any changes in cash tax status.

WEC originally saw potential for exposure to the alternative minimum tax, when questioned on its 2Q22 call. Since then, the company has been able to perform more comprehensive analysis and now expresses certainty that: "**At WEC, no material impact expected from alternative minimum tax**" [*Source: September 2022 slides*].

DEPRECIATION SCHEDULE BY CLASSIFICATION

Figure 5: MACRS required depreciation periods and rates

MACRS Property Classification				
Classification	**Examples**	**GDS Depreciation Method[2]**	**GDS Recovery Period**	**Convention**
3-year property	•Tractor units for over-the-road use. •Any race horse more than two years old when placed in service.[2] •Any horse (other than a race horse) over 12 years old when placed in service. •Qualified rent-to-own property.[3]	200%[4] Declining balance	3 years	Half-year or mid-quarter
5-year property	•Automobiles, taxis, buses and trucks. •Computers and peripheral equipment. •Office machinery (such as typewriters, calculators and copiers). •Property used in research and experimentation. •Breeding cattle and dairy cattle. •Appliances, carpets, furniture, etc., used in a residential rental real estate activity. •Certain geothermal, solar and wind energy property.	200%[4] Declining balance	5 years	Half-year or mid-quarter
7-year property	•Office furniture and fixtures (such as desks, files and safes). •Agricultural machinery and equipment.[5] •Motorsports entertainment complex placed in service after October 22, 2004 and before 2017. •Property that does not have a class life and has not been designated by law as being in any other class. •Any natural gas gathering line placed in service after April 11, 2005.	200%[4] Declining balance	7 years	Half-year or mid-quarter
10-year property	•Vessels, barges, tugs and similar water transportation equipment. •Single purpose agricultural or horticultural structure (see Tab 7). •Any tree or vine bearing fruits or nuts.[6] •Qualified smart electric meters and qualified smart electric grid systems placed in service after October 3,	200%[4] Declining balance	10 years	Half-year or mid-quarter
15-year property	•Certain improvements made directly to land or added to it (such as fences, roads and bridges). •Retail motor fuels outlet (see Tab 7). •Any municipal wastewater treatment plant. •Qualified leasehold improvement property (see Tab 7).[6] •Qualified restaurant property (see Tab 7).[6] •Qualified retail improvement property (see Tab 7).[6] •Initial clearing and grading land improvements for gas utility property placed in service after October 22, 2004. •Electric transmission property (that is Section 1245 property) used in the transmission at 69 or more kilovolts of electricity placed in service after April 11, 2005.	150% Declining balance	15 years	Half-year or mid-quarter
20-year property	•Farm buildings (other than single purpose agricultural or horticultural structures). •Municipal sewers not classified as 25-year property. •Initial clearing and grading land improvements for electric utility transmission and distribution plants placed in service after October 22, 2004.	150% Declining balance	20 years	Half-year or mid-quarter
25-year property[8]	•Property that is an integral part of the gathering, treatment or commercial distribution of water, and that, without regard to this provision, would be 20-year property. •Municipal sewers placed in service after June 12, 1996, other than property placed in service under a binding contract in effect at all times since June 9, 1996.	Straight-line	25 years	Half-year or mid-quarter
Residential rental property	Any building or structure, such as a rental home (including a mobile home), if 80% or more of its gross rental income for the tax year is from dwelling units. **Note:** Units in a hotel, motel or other establishment where more than half the units are used on a transient basis are not dwelling units (see Tab 7).	Straight-line	27.5 years	Mid-month
Nonresidential real property[9]	Section 1250 property that is neither residential rental property nor property with a class life of less than 27.5 years (see Tab 7). Examples include office buildings, stores or warehouses.	Straight-line	39 years	Mid-month

[1] Elective methods may be available. See *MACRS Depreciation Methods Available for Regular Tax* on Page 2-1.
[2] Race horses placed in service after December 31, 2008 and before January 1, 2015, regardless of age, are three-year property. [IRC §168(e)(3)(A)]
[3] Five years for qualified rent-to-own property placed in service before August 6, 1997.
[4] If used in farming, must use 150% instead of 200% declining balance.
[5] New farm equipment placed in service in 2009 was five-year property. Five-year treatment was unavailable for grain bins, cotton ginning assets, fences or other land improvements. [IRC §168(e)(3)(B)(vii)]
[6] Must use straight-line method. [IRC §168(b)(3)(E) and (e)(3)(D)(ii)]
[7] Must use 150% declining balance method. [IRC §168(b)(2)(C)]
[8] 20 years for property placed in service before June 13, 1996, or under a binding contract in effect before June 10, 1996.
[9] 31.5 years for property placed in service before May 13, 1993.

UTILITY CAPEX BY MACRS CLASS

We provide these as what we believe is a useful contextual tool for assessing which utilities have relatively more or less accelerated depreciation vs. one another. We acknowledge a frequent lack of visibility into capital that may be expensed for tax purposes rather than capitalized, capital that flows through fuel & purchased power, or otherwise through operating cash flow vs. cash from investing.

Figure 6: Utility capex by MACRS classification period

Southern Company	2022E	2023E	MACRS	
Vogtle 3 & 4	1.3	0.9	15 yrs	← *Electric Utility Nuclear Production Plant*

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

2022 LCOE Analysis – LCOE Update Shows Rising Costs, But IRA Further Improves Solar/Wind Competitiveness; Gas Dominance Continues to Fade (see our note HERE)

EXC: Management Shuffle Surprises, but Follow-Up Call Helps Clear the Air (see our note HERE)

DTE – Intervenors file replies to exceptions on proposal for decision in DTE Electric 2022 rate case

EIX – Fairview wildfire claims entered in court

D – Dominion files third clean energy filing; seeks 500MW of company owned projects, 300MW of third party PPAs

DUK – DEF seeking to pass along $56m in savings to customers

Hydrogen – Midwest states advance hydrogen hub plans

M&A – US Solar Fund is conducting strategic review

DTE – Intervenors file replies to exceptions on proposal for decision in DTE Electric 2022 rate case

- Intervenors filed replies to exceptions on the PFD in the DTE 2022 electric rate case.
- DTE replies support the original request for approval of O&M and capex, reiterate cost of capital arguments.
- The PFD largely maintains DTE fundamentals in ratemaking – with an ROE of 9.9% (flat vs. prior) and a 50% headline equity ratio (39.62% of the ratemaking capital structure, as requested, and 130bp improvement vs. prior authorized).
- PFD recommends that the Commission adopt DTE's capital structure and common equity balance, along with a long-term debt cost of 3.69%, a short-term debt cost of 1.74%.
- MPSC authorized a $146M rate increase vs. $368M requested and $167M recommended by staff.
- The PFD recommends a $777M reduction in rate base (3.7%), from $21.2B requested to $20.5B, adjusting for projected spending and plant in-service dates.
- Docket: U-20836

Guggenheim takeaway: *FYI. A generally constructive outcome resolving the rate case. We are still working through the 700+ pages of PFD testimony, but find that majority of issued are approached in a balanced manner, including cost of capital where the commission follows precedent from previous rate case final orders, noting the rate of return "should not be so high as to place an unnecessary burden on ratepayers, yet should be high enough to ensure investor confidence in the financial soundness of the enterprise." The debt parameters at DTE Electric are a bit tight given the steep rise in interest rates, but not a big issue as DTE remains a serial filer.*

EIX – Fairview wildfire claims entered in court

- Families impacted by the Fairview fire filed claims in court alleging negligence.
- Fairview fire: 20,000 acres, 44 structures damaged or destroyed.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

- More in media here.
- More on Calfire incidents here.

Guggenheim takeaway: *We continue to monitor for wildfire conditions and damage assessments but despite the continued frequency of wildfires, damage reports have been minimal. While the Fairview fire threatened some more populated areas (more than 10,000 homes), Calfire has increased containment quickly and incident reports have shown damage that is well below the $1B insurance thresholds.*

D – Dominion files third clean energy filing; seeks 500MW of company owned projects, 300MW of third party PPAs

- Dominion is seeking to add another 800MW of resources to its portfolio in support of its ongoing VCEA buildout.
- "The proposal includes 10 solar and energy storage projects, totaling nearly 500 MW, that will be owned and operated by Dominion Energy Virginia. The proposal also includes power purchase agreements (PPAs) with 13 solar and energy storage projects, totaling more than 300 megawatts, that are owned by independent developers. The PPAs were selected through a competitive solicitation process." - D
- More HERE.

Guggenheim takeaway: *This is part of what has become a familiar process for DEV under the VCEA and associated clean energy filings (riders), with the projects going towards directly supporting the VCEA-mandated decarbonization targets for the state. As a reminder, DEV's latest plan was to spend $27bn through '26.*

DUK – DEF seeking to pass along $56m in savings to customers

- "DEF has determined that the IRA's change to PTCs for DEF's solar facilities results in a change to the effective tax rate recognized by DEF in FPSC adjusted reported net operating income. This provision also changes DEF's adjusted capital structure. . The Company has computed the resulting impact to base rates, a uniform percentage decrease to reflect a total amount to be flowed back to customers of $56.0 million." – Duke Energy Florida filing
- Docket 20220172

Guggenheim takeaway: *DUK is following suit in seeking to flow back tax benefits resulting from the IRA to customers, something FPL has already begun the process for. As a reminder, DEF (and FPL) also benefited from increases to their ROEs as a result of settlement clauses that were triggered as interest rates rose. DEF's take effect Jan. 1, 2023.*

Hydrogen – Midwest states advance hydrogen hub plans

- Media reports on a number of states starting work on hydrogen infrastructure.
- Illinois, Indiana, Michigan, Ohio and Kentucky, plus Wisconsin and Minnesota, are all part of an MOU on hydrogen development.
- The states have a lot of hydrocarbon production, with opportunities for a variety of hydrogen application including electrolyzers, carbon capture and transportation.
- More here.

Guggenheim takeaway: *FYI. The hydrogen hub plans have been advancing since IRA passage. The economics would now make a variety of applications economically feasible and the Midwest stands to benefit given the region's energy resource production and consumption from manufacturing and agriculture. Overall, the media source has a good overview of the technologies and applications.*

M&A – US Solar Fund is conducting strategic review

- USF [LON: USF] is conducting a strategic review, according to reports, including the potential for up to a 100% sale of the fund.
- "Structural challenges in the US solar sector alongside a recent sustained discount of the share price to its net asset value have impeded the company's ability to grow its asset base." - USF
- More HERE.

Guggenheim takeaway: *Interesting data point for your awareness – the fund appears to have a ~$275mm market cap.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

GUGGENHEIM

Invite: 57th EEI Financial Conference

Dates
November 13 - 15, 2022

Location
The Diplomat Beach Resort
Hollywood, FL

Company Dinners (Hosted by Guggenheim)

Sunday, November 13, 2022

5:30 p.m. | Cocktail Reception with full Guggenheim Securities Team & corporate utility clients
Hyde Beach House — 4010 South Ocean Drive, Hollywood, FL 33019

6:30 p.m. | Dinner with **Duke Energy Corp (DUK)** CEO, CFO, and others
Terrazas at Hyde Hollywood — 4111 S Ocean Drive, Hollywood, FL 33019

Monday, November 14, 2022

6:30 p.m. | Dinner with **Entergy (ETR)** CEO, CFO, and others
ETARU — 111 S Surf Rd, Hallandale Beach, FL 33009

Guggenheim Hosted Utilities Investor Discussion Panel with Shar Pourreza and Trading/Sales

Tuesday, November 15, 2022

6:00 p.m. | *Billy's Stone Crab — 400 North Ocean Drive, Hollywood, FL 33019*

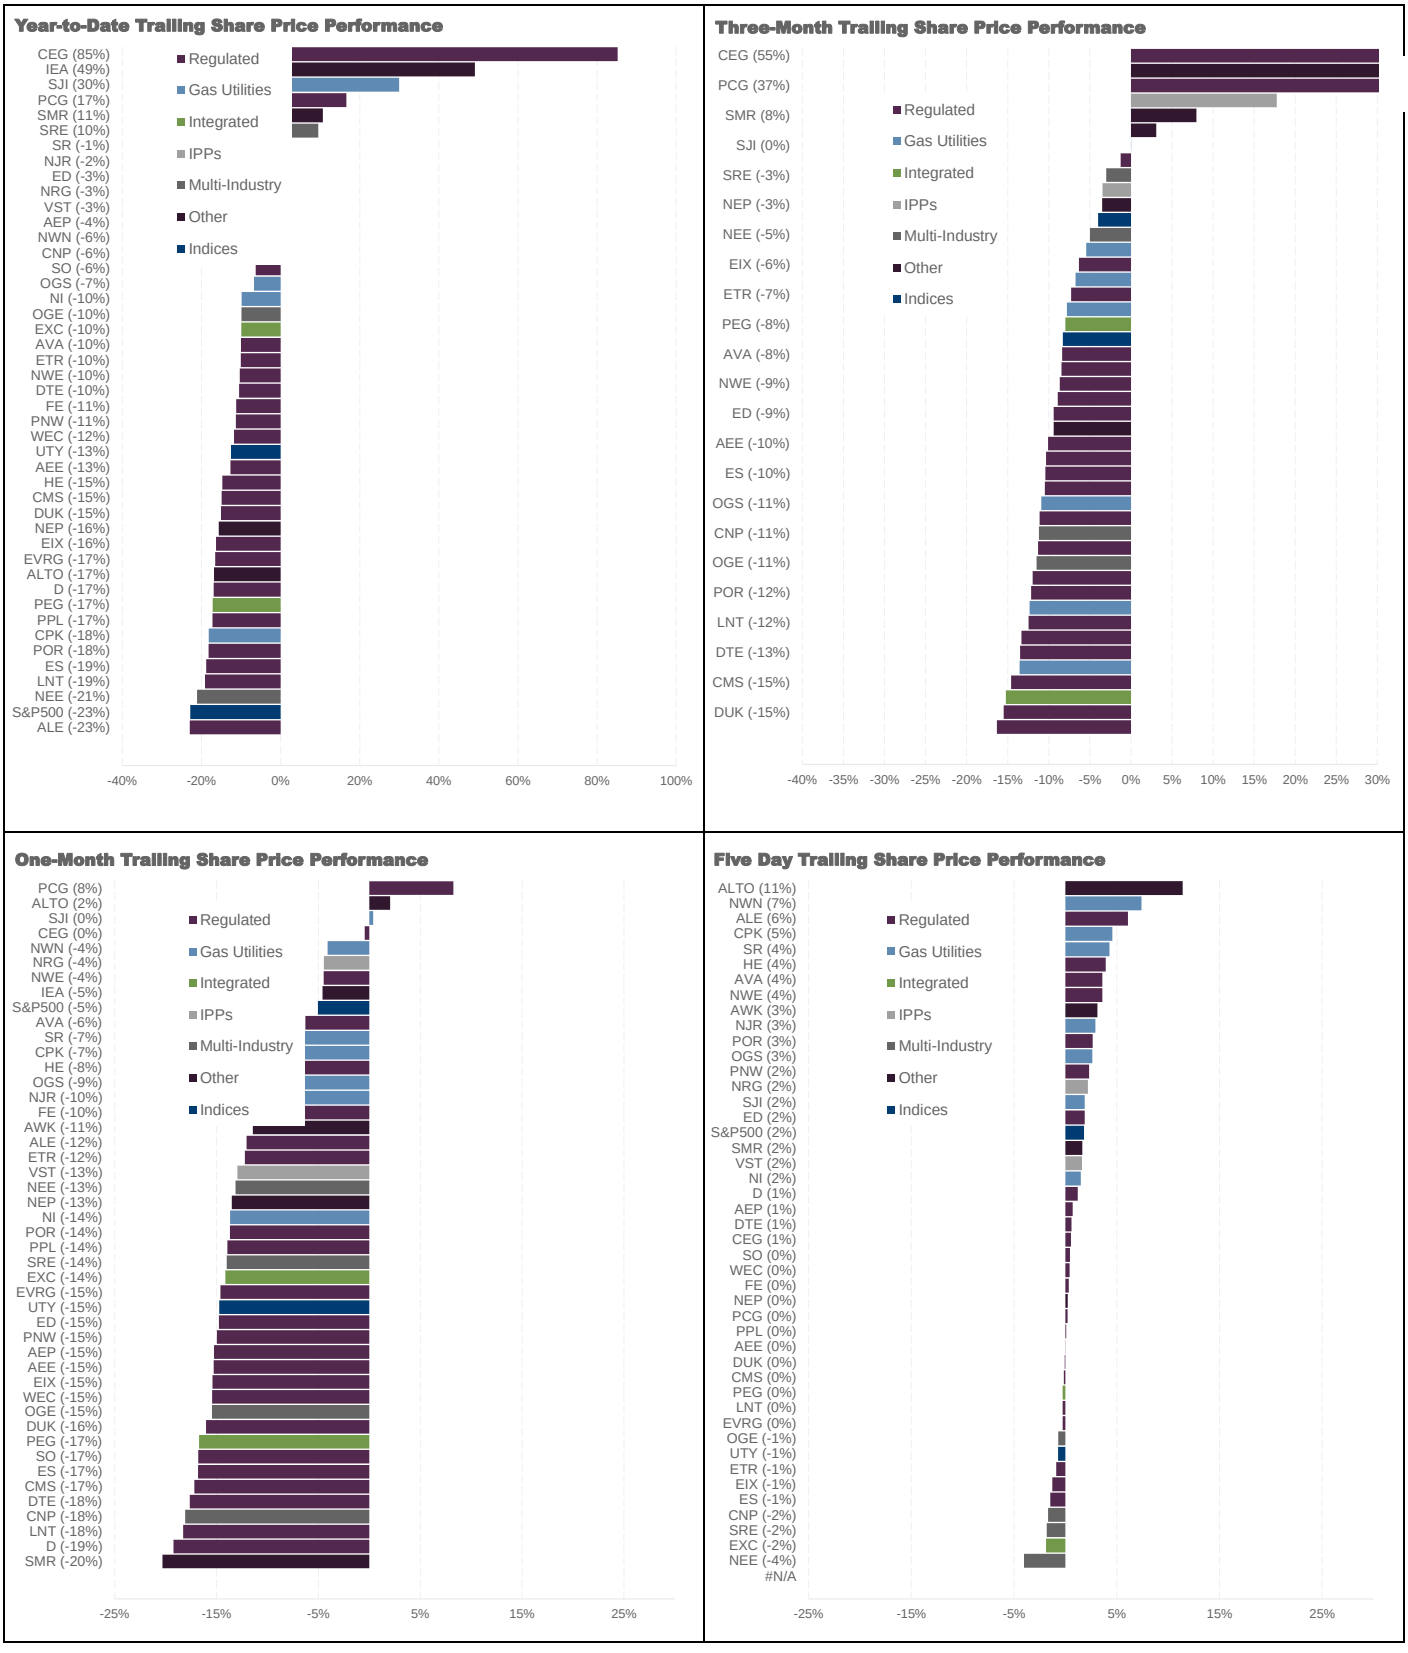
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Guggenheim Securities, LLC managed or co-managed a public offering of securities for Dominion Energy, Inc. and Duke Energy Corporation during the past 12 months.

Guggenheim Securities, LLC or its affiliates received compensation for investment banking services from Dominion Energy, Inc. and Duke Energy Corporation during the past 12 months.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Dominion Energy, Inc., DTE Energy Company, Duke Energy Corporation, Edison International and Exelon Corporation in the next 3 months.

Dominion Energy, Inc. is currently a client of Guggenheim Securities, LLC and Guggenheim Securities, LLC is currently providing investment banking services to Dominion Energy, Inc..

Duke Energy Corporation is or was during the 12-month period preceding the date of the distribution of this report a client of Guggenheim Securities, LLC. Guggenheim Securities, LLC provided Duke Energy Corporation investment banking services.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Exelon

EXC-NSDQ	Rating	Price: Oct-17	Target ↓	Total Rtn
	Outperform	$37.10	$41.00	14%

The Times Are A-Changin' - but the Story Isn't

Bottom Line:

EXC announced several changes to its senior management team as well as provided some clarity to the question of its longer-term succession planning. In addition to his title of Senior EVP & COO, Calvin Butler will also become President. Current SVP/Corporate Finance Jeanne Jones will become EVP and CFO. The company's current CFO Joseph Nigro is assuming the role of Senior Advisor to the CEO effective immediately. **We reiterate our Outperform rating but lower our target price to $41 as we mark to market our group multiples.**

Key Points

With the announcement, current Senior EVP & CFO Joseph Nigro will move to the role of Senior Advisor to Exelon's Chief Executive Officer in which he will serve until he leaves the company on March 31, 2023. SVP/Corporate Finance head Jeanne Jones will assume the title of EVP & CFO effective immediately.

Additionally, EXC announced that current COO and Senior EVP Calvin Butler will also assume the role of President effective immediately. Although we believe the announcements likely provide some additional clarity into the company's long-term succession planning, current President & CEO Chris Crane will continue serve as the company's Chief Executive Officer.

While we are admittedly surprised by the timing of the announcement and the abruptness of the changes, we believe that investors are very familiar with Ms. Jones and Mr. Butler from their current roles, which should facilitate a smooth transition. As such, we would expect no changes in the company's strategic focus and regulated growth plan.

Furthermore, with continuity at the CEO level and Mr. Butler's and Ms. Jones' involvement in the operating, regulatory and financial planning processes, **we see no change to EXC's 6-8% growth CAGR (2021-2025 using 2021 base) nor its 2022 outlook. In fact, as per usual we would expect management to narrow its $2.18-2.32 range on its 3Q earnings call (11/3).**

Additionally, while concerns of below-trend growth in 2023 continue to weigh on EXC shares due to higher interest rates, flattish y/y contribution at PECO, AMT-related mitigation and inflationary pressures, we believe management is actively looking at options and timing to help investors better frame 2023 drivers. Finally, the 2024 impacts of both ComEd's MYRP and BGE's/PHI's MYPs as well as new 2025 rates at PECO should drive growth in 2024/2025 that allows the company to meet its LT growth objectives.

Notes : Prior numbers reflect our pre-spin estimates

Our Thesis

We see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans. We believe the company's low-risk T&D business profile, strong and visible fundamental growth outlook, and supportive regulatory environment position the company well to drive multiple expansion.

Source: BMO Capital Markets, Company Reports

Scenarios

Valuation

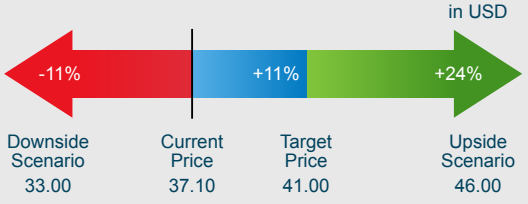
We value EXC on a sum-of-the-parts valuation. Our framework begins with the relevant sector average P/E multiple using 2024E EPS as a base, which we then adjust (premium, discount, or no change) to reflect the relative fundamentals for each segment.

Upside Scenario $46.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $33.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.



Key Catalysts

We see EXC management now in execution mode post its separation from Constellation Energy. With nearly 75% of the company's revenues decoupled from volumes and 100% of its capital covered through alternative recovery mechanisms, we see EXC achieving our target price over the next 12-18-month as management executes against its capital and regulatory plans.

Company Description

Exelon is the largest utility by customer count with over 10mm electric and natural gas customers spread across its six-state footprint. It is the fourth largest utility by rate base with one of the lowest business risk and ESG-friendly profiles given the company's pure T&D asset mix with electric distribution and transmission representing over 85% of rate base.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in Exelon in United States.

Methodology and Risks to Target Price/Valuation for Exelon (EXC-NSDQ)

Methodology: We value EXC using our sum-of-the-parts valuation analysis to derive our target price. Our valuation takes into account the quality of EXC's assets relative to its peers and the company's regulated business rate base growth and funding sources.

Risks: Failure to pass a version of the "Clean Energy Jobs Act" in the upcoming legislative session that sufficiently expands financial support for EXC Gen's nuclear plants would cause us to re-evaluate our rating, all else equal. The Governor's opposition to the existing Formulaic Based Rate Plan in IL may result in a new set of regulations that could be adverse to the company's ComEd Utility. Nuclear operations are subject to additional safety and regulatory oversight.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Other Important Disclosures

For Important Disclosures on the stocks discussed in this report, please go to https://researchglobal0.bmocapitalmarkets.com/public-disclosure/ or write to Editorial Department, BMO Capital Markets, 3 Times Square, New York, NY 10036 or Editorial Department, BMO Capital Markets, 1 First Canadian Place, Toronto, Ontario, M5X 1H3.

Dissemination of Research

Dissemination of fundamental BMO Capital Markets Equity Research is available via our website https://researchglobal0.bmocapitalmarkets.com/. Institutional clients may also simultaneously receive our fundamental research via email and/or via services such as Refinitiv, Bloomberg, FactSet, Visible Alpha, and S&P Capital IQ.

BMO Capital Markets issues a variety of research products in addition to fundamental research. Institutional clients may request notification when additional research content is made available on our website. BMO Capital Markets may use proprietary models in the preparation of reports. Material information about such models may be obtained by contacting the research analyst directly. There is no planned frequency of model updates.

The analyst(s) named in this report may discuss trading strategies that reference a catalyst or event that may have a near or long term impact on the market price of the equity securities discussed. In some cases, the impact may directionally counter the analyst's published 12 month target price and rating. Any such trading or alternative strategies can be based on differing time horizons, methodologies, or otherwise and are distinct from and do not affect the analysts' fundamental equity rating in the report.

Research coverage of licensed cannabis producers and other cannabis-related companies is made available only to eligible approved North American, Australian, and EU-based BMO Nesbitt Burns Inc., BMO Capital Markets Limited, Bank of Montreal Europe Plc and BMO Capital Markets Corp. clients via email, our website and select third party platforms.

~ Research distribution and approval times are provided on the cover of each report. Times are approximations as system and distribution processes are not exact and can vary based on the sender and recipients' services. Unless otherwise noted, times are Eastern Standard and when two times are provided, the approval time precedes the distribution time.

For recommendations disseminated during the preceding 12-month period, please visit: https://researchglobal0.bmocapitalmarkets.com/public-disclosure/.

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents

have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

Exelon Corp

Management Changes Announced

What Happened?

After the close today, Exelon announced that it promoted Calvin G. Butler Jr. to president and chief operating officer and Jeanne Jones to executive vice president and chief financial officer. Chris Crane, previously president and CEO, continues as Exelon's chief executive officer. Ms. Jones succeeds Joseph Nigro as CFO. Mr. Nigro will now serve as a senior advisor to the CEO through his departure on 3/31/23.

Why Now?

We believe these actions are the result of natural succession planning and the timing reflects the company wanting to put the new President / COO and CFO into their roles ahead of the upcoming third quarter call and EEI conference.

What's the Takeaway?

Mr. Butler previously has served as senior executive vice president and chief operating officer and has held senior leadership roles at ComED and BGE. We believe Mr. Butler was instrumental in improving earned returns at both BGE and PHI after their acquisitions by Exelon and believe he can execute in his role to focus on costs discipline to effectively manage affordability for customers. Particularly with the move of IT, Security, and Supply functions to direct responsibilities under Mr. Butler. Ms. Jones was previously senior vice president of Corporate Finance and has served as the CFO at ComEd and VP of Finance for Exelon Nuclear. We believe Ms. Jones moving to CFO will streamline investor communications with a focus on the go forward forecast through the upcoming ComEd and PECO rate filings across 2023 and 2024.

Valuation:

We maintain our Buy rating and $49 price target.

Forecast returns

Forecast price appreciation	+32.1%
Forecast dividend yield	4.1%
Forecast stock return	+36.2%
Market return assumption	9.4%
Forecast excess return	+26.7%

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) ESG: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/ Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events. We maintain our price target of $49 premised on a 5% premium to the group multiple of 18.3x our $2.54/share earnings forecast for 2024. Our 5% net premium is derived from a 5% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond rounded down to the nearest 5%, a 5% premium for Clean Energy Transition attributes and a 5% discount for the regulatory ranking overall. Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Quantitative Research Review

UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

Exelon Corp

Question	Response
1. Is the industry structure facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting worse, 3 = no change, 5 = getting better, N/A = no view)	
2. Is the regulatory/government environment facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting tougher 3 = no change, 5 = getting better, N/A = no view)	
3. Over the last 3-6 months in broad terms have things been improving/no change/getting worse for this stock? Rate on a scale of 1-5 (1 = getting a lot worse, 3 = not much change, 5 = getting a lot better, N/A = no view)	
4. Relative to the current CONSENSUS EPS forecast, is the next company EPS update likely to lead to: (1 = negative surprise vs consensus, 3 = in-line with consensus, 5 = positive surprise vs consensus expectations, N/A = no view)	
5. What's driving the difference?	
6. Relative to YOUR current earnings forecast, is there relatively greater risk at the next earnings result of:(1 = downside skew risk to earnings, 3 = equal upside or downside risk to earnings, 5 = upside skew risk to earnings, N/A = no view)	
7. What's driving the difference?	
8. Is there an upcoming catalyst for the company over the next three months?	
9. Is there an actual or approximate date for the catalyst?	
10. Is the catalyst date an actual or approximate date?	
11. What is the catalyst?

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 18 October 2022 01:10 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	56%	26%
Neutral	FSR is between -6% and 6% of the MRA.	35%	22%
Sell	FSR is > 6% below the MRA.	9%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 September 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch.**South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client's profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Distributed by UBS AG, Tokyo Branch to Professional Investors (except as otherwise permitted) in relation to foreign exchange and other banking businesses when relevant. **Australia:** Clients of UBS AG: Distributed by UBS AG (ABN 47 088 129 613 and holder of Australian Financial Services License No. 231087). Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. This material is intended for professional/institutional clients only and not for distribution to any retail clients. **Malaysia:**

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under

UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the UAE by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed. **USA**:Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliários Ltda., UBS Asesores México, S.A. de C.V., UBS SuMi TRUST Wealth Management Co., Ltd., UBS Wealth Management Israel Ltd. and UBS Menkul Degerler AS are affiliates of UBS AG. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

EXC: Management Shuffle Surprises, but Follow-Up Call Helps Clear the Air

Key Message: We caught up with the CEO, new COO, and CFO following the announced succession plans this evening.

Overall takes from our call - We caught up with EXC's senior management (CEO, COO, CFO) this evening following the surprising but also not surprising promotions of Calvin Butler and Jeanne Jones alongside a transition to an advisory role for Joe Nigro. Based on our conversations, while the move may have seemed abrupt to the market, it was grounded in a longer-running internal process, per management. That said, it was mentioned that C suite is aware of investor concerns around recent messaging and/lack of managing expectations (e.g., the recent equity issuance, 2023 expectations, IRA impact) and will be taking lessons learned from the feedback. In our view, these are "known" items by us and investors – our concern heading into the conversation with the team tonight was whether this decision was the product of "unknown" items like imprudence or something else more Draconian. To that end, management was clear that there was nothing else behind the move – e.g., no forthcoming investigations. The question we had with management was, given the fact there was clear internal and external disappointment around managing and setting expectations with above mentioned items, would this new team seek to right size expectations – i.e., in our view, management understands the importance of disclosing around 2023 sooner rather than later, and, as such: 1) they could provide 2023 guidance with 3Q earnings/EEI, and 2) that number could be below the midpoint of the LT growth rate towards the bottom end of 6-8% – some investors have floated estimates around or below the bottom end of their LT EPS growth rate in recent conversations.

What happened? EXC announced (HERE) the promotion of Calvin Butler to President and COO, from EVP and COO, and the promotion of Jeanne Jones to EVP and CFO, from SVP of Corporate Finance. The moves are effective immediately, with former CFO Joe Nigro to stay on as a Senior Advisor to CEO Chris Crane until the end of 1Q23. We caught up with EXC's management team to discuss the changes.

What's next? New management = rightsizing expectations? The move is effective immediately, with management noting that the October timing allows the team to tee up further conversations with 3Q earnings and at EEI – maximizing transparency and visibility ahead of 2023. Based on our conversation, we expect messaging will be further tweaked around the margins (e.g., IRA impacts) on the call and at EEI. **To us, the question becomes if the potential messaging and disclosures include efforts to right size expectations and potentially introduce 2023 guidance, which we believe could be unusually low given several tail risks including underearning at PECO, inflation, interest rate pressures, etc.**

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

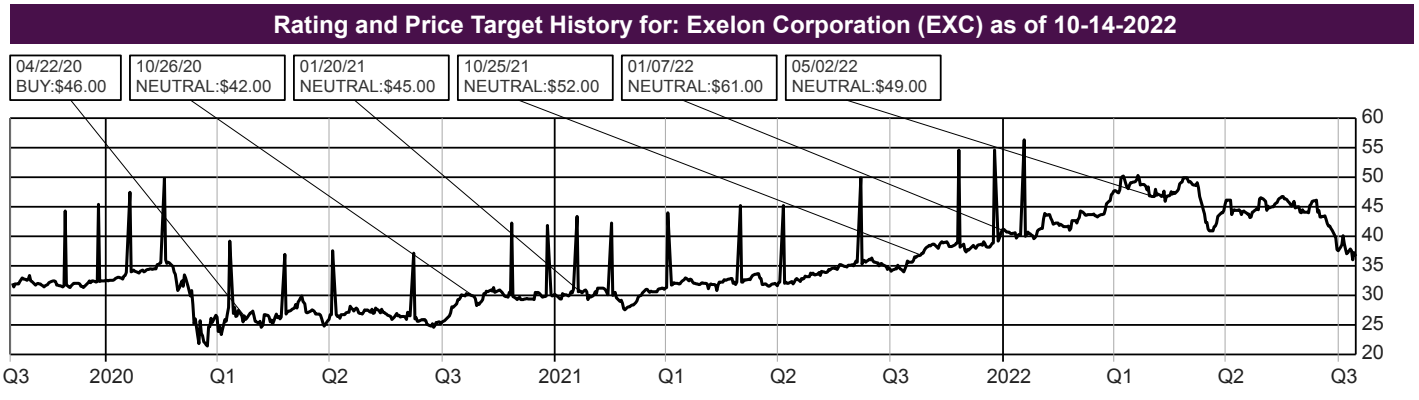
IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.



RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth,

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: AGR, D, ETR, SO, AEE, EXC, SRE, XEL, FERC

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Join us at the EEI conference in FL on November 13-15 (schedule included). On our regulatory calendar, we are tracking proceedings in AGR's rate cases, D's Questar gas rate case, ETR's AR FRP, and SO's GA GRC. In other news, we reviewed comments received by FERC on the interconnection NOPR; GP reached a significant milestone as Vogtle Unit 3 starts fuel load; AEE requests a deferral tracker in the MO electric GRC; the DE PSC approves EXC's DE gas rate case settlement; SRE receives a 50-month extension for construction of Port Arthur; SoCalGas's hydrogen blending demonstration program receives opposition; XEL requests 2023 interim rates in MN; parties file position statements in AEE's IL FRP; the VA SCC approves tariffs for shared solar programs, and the EIA published its Short-Term Energy Outlook and Winter Fuel Outlook.

KBCM Invites You to Join Us at the EEI Financial Conference on November 13-15 in Hollywood, FL.
Scroll down for our full schedule, including a dinner with **NWE**.

Regulatory Calendar

AGR — Rebuttal testimony in NYSEG's and RGE's electric and natural gas rate cases is due on October 18: Staff recommends an 8.85% ROE on 48% capital vs. AGR's ask for 10.2% ROE and 50% equity. The delta between the rate increases recommended by staff and those requested by AGR hinges largely on the lower ROE. AGR's last rate cases in NY settled at 8.8%/48% in 2020. NYSEG and RGE support a settlement process that would incorporate a multiyear rate approval as they did in the last rate case proceedings. New rates are expected to go into effect in May 2023, when the term of the last rate case ends.

D — Hearings in Phase 1 of Questar's natural gas rate case begin October 19: Phase I will address all issues necessary to determine D's cost of capital and revenue requirement, while Phase II addresses the cost of service among customer classes and rate design. Questar's revised request for a $67M rate increase is based on a 10.3% ROE and 53.21% equity layer. This compares to Staff's direct testimony recommending a $49.6M revenue increase premised on a 9.3% ROE and 53.21% equity. The primary factors contributing to D's request are capital investments, including the Magna LNG terminal expected to enter service by YE22. Questar must file a rate case every three years as part of an infrastructure replacement adjustment tracker. Questar's last rate case was approved in 2020 for a $2.7M rate increase on a 9.5% ROE and 55% equity layer. A commission decision is expected by January 1.

ETR — ETR response in the AR FRP is due on October 20: Staff filed an evaluation report in support of a $79M rate increase. Staff agrees with the $16M adjustment for the 2021 historical year and proposes a 2023 projected year revenue increase of $89M, which gets reduced to the $79M based on the 4% annual cap. As a reminder, ETR AR filed a 2022 Formula Rate Plan seeking a $79M rate increase. ETR requested a $16M adjustment for the 2021 historical year and a $105M revenue increase for the projected 2023 year but is capped at a 4% annual increase, resulting in the $79M request. The drivers for the 2023 projections include ongoing investments and changes in the cost of capital. ETR AR is allowed a return of 9.65% in the forecast year and 9.75% for the historical year. A Commission ruling on the plan is expected by December 14.

SO — Staff and Intervenor testimony in GP's electric GRC due on October 20: In June, GP filed a rate case requesting a $1B revenue increase spread over three years—$852M in 2023, followed by $107M in 2024 and $45M in 2025. The request is based on 11% ROE and 56% equity. Other items in the filing include a continuation of the Alternate Rate Plan that has been in place since 1995. Base rates exclude any cost recovery for Vogtle Units 3 and 4, which will be added later following a prudence review once the units reach COD. GP received a constructive outcome in the previous rate case, receiving ~97% of the cumulative ask ($909M vs. $942M), based on a 10.5% ROE and 56% equity. GP is seeking a continuation of earnings to be evaluated against a dead band of 9.5-12%, with 80% of the earnings above the 12% ROE being shared with ratepayers and the remaining 20% retained by the utility. GP is also seeking to continue the option to file for interim cost recovery if earnings fall below the low end of the dead band. A GA PSC decision is expected by December 20.

FERC — FERC's Open Meeting is scheduled for October 20: A copy of the Sunshine Notice is included here.

Recent Developments for Companies Under Our Coverage

From our midweek: We hosted WEC for a day of management meetings. In other news, a federal judge rules against MT state laws intended to protect Colstrip operations, and a federal judge rules that a planned expansion of the Rosebud mine that supplies coal to Colstrip was approved illegally; MA DPU approved grid mod filings made by ES; AGR and SRE enter into an HOA for green hydrogen and ammonia projects; DUK's FL operations agrees to join SEEM; Sempra enters a settlement to resolve an investigation related to the Aliso Canyon gas leak, and SDG&E begins testing a new energy storage project and commences construction on a microgrid.

FERC — FERC receives comments on the interconnection NOPR — we summarize the comments provided by EEI and SEIA:

- EEI supports the Commission's proposal to implement a first-ready, first-served cluster study process vs. the current first come, first served model that results in speculative projects or those that are not ready to crowd out the ones that are. EEI also recommends that FERC should recognize the importance of regional planning and allow the RTOs flexibility in interconnection processes (the FERC has approved changes to MISO and SPP's interconnection approaches to allow the cluster study approach). EEI also encourages FERC to look at the interconnection issue through the lens of long-term transmission planning to support the interconnection of new generation resources. As other parties have cautioned, EEI too cautions against disrupting, delaying, or precluding regional interconnection reforms. EEI supports withdrawal penalties (with a caveat) as a deterrent for speculative projects and maintaining discipline in the queue. [FERC Docket RM22-14]
- SEIA too supports the proposed rule for a first-ready, first-served cluster study process and supports higher deposit requirements to address issues that lead to cascading withdrawals of projects from the queue. SEIA recommends that FERC ask transmission providers to provide cost estimates at each stage of the interconnection process to allow developers to make more informed decisions earlier in the process. SEIA, however, opposes the proposal that interconnection customers provide either a demonstration of firm contractual obligations for the power capacity or pay a commercial readiness deposit, which would be returned later when commercial readiness is established. SEIA contends that developers should be able to demonstrate commercial readiness through means other than financial deposits of firm contracts and should be required later in the process so as not to place an undue burden on developers.

SO — It's been a long time coming — GP reaches a significant milestone as Vogtle Unit 3 starts fuel load: GP has commenced fuel load into Vogtle Unit 3. During fuel load, technicians will move the fuel assemblies to the reactor core and begin startup testing. The testing will demonstrate the integrated operation of the primary coolant system and steam supply system at design temperature and pressure with fuel inside the reactor. Completing the fuel load and testing is the last major milestone before the commercial operation, which is expected in 1Q23. According to the most recent update, GP's costs for its 45.7% share in Vogtle Units 3 and 4 are estimated at $10.5B. SO and Commission previously agreed to wait until Vogtle Units 3 and 4 are complete before determining the reasonableness and prudence of the cost overruns and their attribution to ratepayers. SO agreed that it would not seek approval of any costs exceeding the $7.3B cost recovery previously deemed reasonable by the Commission until the prudence review is complete. Unit 4 is expected to enter service in 4Q23.

AEE — IRA provisions are making their way into rate case filings — AEE requests a deferral tracker in the MO electric GRC: AEE filed supplemental testimony in the electric GRC to request a deferral mechanism to incorporate the savings from the IRA that can ultimately flow back to ratepayers. Details on several aspects of the IRA are still being finalized, but AEE has put forth preliminary estimates of savings, which will be minimal in the early years, ramping up toward the end of the decade (minimal in 2023-24, annual net savings of $50M-$100M for 2025-27 and $170M-$200M of annual savings from 2028-32). The primary source of tax credits will be solar PTCs where AEE expects $1.3B of credits over 10 years through 2032. The Company also includes potential tax credits from the nuclear generators, although given how that credit is structured, the amount could vary widely on a year-to-year basis. It highlights the transferability of tax credits as another source—if it chooses to transfer (monetize) the credits rather than hold the excess ITC or PTC for use in a future year and also factors in the impact from the corporate minimum tax (it expects to pay an additional $270M over the next decade). As a reminder, Union Electric filed an electric GRC requesting a $315.6M base rate increase to be implemented in mid-2023 and is premised on 10.2% ROE (51.93% equity).

EXC — DE PSC approves EXC's DE gas rate case settlement: The DE PSC issued an order approving the settlement in the DE gas rate case. The new rate will become effective November 1 and include a $13.4M revenue increase, premised on a 9.6% ROE and 49.94% equity layer. After excluding the $5.8M for the distribution system improvement charge, or DSIC that is currently in rates, the net increase will be $7.6M. Interim rates of $20.3M, went into effect on August 14, and EXC will have 30 days to file a refund plan. EXC sought an $18.8M rate increase based on a 10.3% ROE and 49.94% equity. The request included the $5.8M DSIC, making the net increase requested $13.0M. The previous gas rate case concluded in 2021 and authorized a rate increase of $6.7M based on a 9.6% ROE and 50.37% equity layer.

SRE — SRE receives a 50-month extension for construction of Port Arthur: FERC issued a 50-month extension to SRE to build the Port Arthur LNG facility and associated natural gas pipelines. SRE will have until June 2028 to complete the project. The previous deadline for the facility to be in service was April 2024. SRE filed a request with FERC for a four-year extension to build the facility and associated natural gas pipelines due to uncertainties created by the pandemic. The project is eventually expected to be a two-train 13.5 MTPA facility. The project's location on the TX/LA coast makes it more suited for cargo to Europe. SRE recently signed an agreement with COP for an equity stake in Phase 1, providing offtake certainty and the investment needed to bring the project to fruition.

SRE — SoCalGas's hydrogen blending demonstration program receives opposition:

- Various parties filed oppositions against SoCalGas's proposed hydrogen blending program, suggesting the filing was broad, vague, and speculative. SoCalGas filed an application earlier this year on behalf of itself, SDG&E, and Southwest Gas to establish memo accounts to record incremental costs to implement a hydrogen blending demonstration program. Sierra Club argues that blending hydrogen with natural gas will not make a meaningful dent in decarbonizing buildings and its carries significant safety risks in that it may be incompatible with existing natural gas infrastructure and appliances. Others argue that not enough details are available on the users of hydrogen infrastructure to make a decision on allowing a memo account. SoCalGas has a goal to decarbonize its operations by 2045.
- The project in question is the Angeles link hydrogen pipeline project. As proposed, the project aims to advance the CA's decarbonization and clean air goals by bringing green hydrogen into the Los Angeles Basin to support current and future green hydrogen end users, including "hard-to-electrify" industries, electric generation, and the heavy-duty transportation sector, and replace 25% of the natural gas distributed by SoCalGas with green hydrogen and ultimately lead to the closure of the Aliso Canyon underground natural gas storage. The project would also support the integration of more renewable resources that would be used for green hydrogen production.

XEL — XEL requests 2023 interim rates in MN as NSP electric rate case remains under review: XEL requested an interim rate increase of $122M to become effective on January 1, 2023. Initial comments are due by October 21. The $122M increase would be incremental to the previously approved interim rate increase of $247M for 2022. In its 2021 order setting 2022 interim rates, the PUC deferred action on XEL's request to increase interim rates in 2023. As a background, NSP-MN is seeking a $677M three-year electric rate increase based on a 10.2% ROE request and a 52.5% equity ratio. A final PUC decision is expected in 2Q23.

AEE — Parties file position statements in AEE's IL FRP: The parties filed position statements in AEE's IL FRP. ICC Staff and AEE agree on a 7.58% ROE but disagree on the equity layer. In its position statement, ICC Staff recommends a 50% equity layer vs. the Company's statement, requesting a 53.99% equity layer. The ROE of 7.85% is formulaic. AEE is seeking an $83.7M revenue increase vs. ICC's recommendation for a $61.0M rate increase. A proposed order is expected on November 4, with a final decision by the end of 2022 and new rates effective in January 2023. This may be AEE's last FRP filing in IL, with the following rate review likely being an MYRP. The ICC is expected to approve PBR to be used under the new framework this fall.

D — VA SCC approves tariffs for shared solar programs: The VA SCC issued orders approving two solar programs for customers that were created as part of the VCEA. In one order, the SCC approved a multi-family shared solar program that will include a $16.78 monthly administrative fee (lower than the proposed $87.68). Separately, the SCC issued an order confirming a prior ruling regarding the shared solar program. Parties had filed for reconsideration and clarification after the SCC ordered a $55.10/MWh minimum bill for residential users of community solar. The program is limited to 150 MW (extendable to 200 MW under certain conditions) and applies to customers who face some hindrance with respect to installing solar on their own rooftops. Under the VCEA, third-party groups develop community solar facilities, sign up interested customers, and sell the power to the utility. Participating customers get a bill credit from D in proportion to the power generated by the facility.

Takeaways from EIA's Short-Term Energy Outlook and Winter Fuel Outlook:

- Households will spend more on energy during the winter months this season relative to prior years, underpinned by higher fuel prices and higher demand due to forecasts for a colder winter season. Specifically, households are forecast to spend 28% more on natural gas and 10% more on electricity (prices +6%, usage +4%). The U.S power prices will average 14.8/KWh from October-March (+6% from last year), with prices in the NE expected to be up 8% or 20.1c/KWh.
- HH gas prices are expected to peak near $7.70/MMBtu in January before reaching $6.50/MMBtu by March (as higher production plays a role).
- Renewable generation continues to grow and EIA forecasts that wind and solar will contribute 16% of U.S. generation during the winter, up from ~15% last year. Natural gas (~36% share, flat y/y) and coal (20% share, -1% y/y) will contribute ~56% of the generation mix in the winter.

KBCM EEI Schedule Tentative Agenda (All Times Eastern):

Sunday, November 13, 2022

12:00 PM — Eversource Energy (ES)
2:00 PM — Xcel Energy Inc. (XEL)
3:00 PM — Sempra Energy (SRE)
4:00 PM — WEC Energy Group, Inc. (WEC)
5:00 PM — Atlantica Sustainable Infrastructure plc (AY)

Monday, November 14, 2022

8:00 AM — Duke Energy Corporation (DUK)
8:45 AM — Avangrid, Inc. (AGR)**
9:00 AM — Pinnacle West Capital Corporation (PNW)
10:00 AM — Exelon Corporation (EXC)
11:00 AM — Edison International (EIX)
11:00 AM — CenterPoint Energy, Inc (CNP)
12:00PM — DTE Energy Company (DTE)
1:00 PM — NorthWestern Corp (NWE)
2:00 PM — American Electric Power Company, Inc. (AEP)
3:00 PM — Portland General Electric Company (POR)
4:00 PM — FirstEnergy Corp. (FE)
Dinner — Dinner with NorthWestern Corp (NWE)*

Tuesday, November 15, 2022

7:00 AM — Entergy Corporation (ETR)
7:00 AM — Southern Company (SO)
8:00 AM — Ameren Corporation (AEE)
9:00 AM — CMS Energy Corporation (CMS)
10:00 AM — Consolidated Edison, Inc. (ED)
11:00 AM — Avista Corporation (AVA)
11:00 AM — Otter Tail Corporation (OTTR)
12:00 PM — Public Service Enterprise Group Incorporated (PEG)
3:00 PM — NextEra Energy (NEE)

**Dinner event.*
***30-minute meeting.*

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. 2022 LCOE Analysis – LCOE Update Shows Rising Costs, But IRA Further Improves Solar/Wind Competitiveness; Gas Dominance Continues to Fade (see our note HERE)

ESG: ED, EIX, AEE, D, WEC, EXC, FE, PPL, SO – 2022 Zicklin Index posted; multiple utilities labeled as political discourse and accountability 'trendsetters'

SO – Vogtle Unit 3 announces commencement of fuel load

Talen – Unsecured creditors balk at ongoing crypto spending; partner characterization

CT – DEEP Commissioner Dykes gives interview on upcoming renewables RFPs; compliments Millstone contract

AEE/IL – Reply briefs filed alongside draft order in FRP docket

PJM – PJM posts additional BRA timelines

KY – KY muni warns of tight grid conditions

OR/WA – Regional business groups join forces over hydropower lobbying

SC – South Carolina to expand highway charging station availability for electric vehicles

PCG – CA legislature working on federal tax exception for Fire Victims Trust

Hydrogen – Cummins announces electrolyzer manufacturing expansion in US

PEG – NY state legislature working on LIPA restructuring alternatives

ESG: ED, EIX, AEE, D, WEC, EXC, FE, PPL, SO – 2022 Zicklin Index posted; multiple utilities labeled as political discourse and accountability 'trendsetters'

- ED, EIX, AEE, D, WEC, EXC, FE, PPL, and SO have all been named trendsetters in political discourse and accountability by the Wharton-led group
- "With this edition, the CPA-Zicklin Index breaks new ground. From its annual benchmarking of election-related spending transparency and accountability by companies belonging to the S&P 500, the 2022 Index now expands to rating companies belonging to a stock market index twice the size, the Russell 1000." - Zicklin Index report
- More HERE

Guggenheim takeaway: *Political transparency remains a key focus for LT investors in our conversations as they continue to focus on jurisdictional quality and whether that particular construct could begin to deteriorate as we have seen in a few states as a result of having, let's say, allegedly having too close of a relationship with regulators and swaying political results – those utilities with high or improving marks stand in contrast to more opaque regions, with many of the top names not a surprise in our view.*

SO – Vogtle Unit 3 announces commencement of fuel load

- "Startup testing will begin next and is designed to demonstrate the integrated operation of the primary coolant system and steam supply system at design temperature and pressure with fuel inside the reactor. Operators will also bring the plant from cold shutdown to

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

initial criticality, synchronize the unit to the electric grid and systematically raise power to 100%. **Vogtle Unit 3 is projected to enter service in the first quarter of 2023**." – Georgia Power press release
- Georgia Power announcement HERE

Guggenheim takeaway: *With over 5 months remaining between now and the March '23 target in-service date for Unit 3, we see a strong probability that this Unit can begin to generate electricity ahead of the current 1Q target date which will be a key potential catalyst for the story and optically de-risk Unit 4 concerns especially with incremental buyers for SO shares. While the shares now trade at a modest premium to the group, post Vogtle and ~$700mm in cash flow unlocking and with GA, AL being some of the strong regulatory constructs in the country next to FL, WI etc, we see a scenario that, in time, shares could trade closer to the premium names like CMS, WEC, DTE etc.* ***For more from our recent trip to Georgia (where we met with SO's C-Suite, Georgia Power's mgmt., and all five GA PSC Commissioners) see our note HERE.***

Talen – Unsecured creditors balk at ongoing crypto spending; partner characterization

- The disagreement in the bankruptcy proceeding comes after the CEO testified that the stalled data center project adjacent to Susquehanna had a high quality customer, leading the judge to approve another $56mm disbursement towards the project, according to SparkSpread
- "The… testimony led the Committee to understand that the LOI that Cumulus had entered into was with a strategic counterparty that was the customer that would actually lease and occupy the Cumulus data center, and that such counterparty was a hyperscaler customer 'of a kind and character similar to' Amazon [AMZN], Microsoft [MSFT], Google [GOOG], and others," – UCC filing

Guggenheim takeaway: *The data center project adjacent to Talen remains an interesting first attempt at bringing load BTM, although we note that our recent meetings with CEG management raised some potential affiliate concerns as it relates to BTM gen and PTC eligibility. We continue to see Susquehanna as an attractive target for CEG –* ***see our note HERE for more.***

CT – DEEP Commissioner Dykes gives interview on upcoming renewables RFPs; compliments Millstone contract

- In a broad, high level interview, Commissioner Dykes laid out additional thoughts on upcoming solar/wind RFPs and investments to date stewarded by DEEP
- "The investments made to date are helping ratepayers survive the roller coaster of fossil fuel prices," - Dykes
- The agency will hold a procurement meeting on 10/19
- More HERE

Guggenheim takeaway: *Always interesting to get some soundbites from the Commission, with DEEP in our view very aligned with the need for spend to unlock further decarbonization pathways (e.g., OSW interconnections). As a reminder, incremental transmission and grid mod opportunities remain the key areas of incremental capex for ES in the state as it looks to identify a total $3bn of work ($1.5bn already identified) to offset the sale of the wind business.*

AEE/IL – Reply briefs filed alongside draft order in FRP docket

- Reply briefs from several parties, including ICC Staff, and a draft order have been filed in the MAP-P process
- "Staff and AIC agree that the cost of equity is 7.8520% which equals the 2.052% average of the twelve monthly 30-year U.S. Treasury bond yield averages in 2021, plus 580 basis points, as required under Section 16-108.5 of the Act. 220 ILCS 5/16-108.5(c)(3). The cost of equity for the 2022 revenue requirement is 7.8520%. Further, Staff and AIC agree the cost of equity for the 2021 reconciliation year revenue requirement must be adjusted by 0.070% for isperformance metrics penalty." - filing
- More HERE

Guggenheim takeaway: *Few major surprises in our first pass as the FRP heads into its final innings, with Staff's comments generally focused on familiar issues at this point, including the final common equity ratio (53.99% ask). As a reminder, AEE is planning to transition to MYPs beginning in '24, on the heels of a filing in 1Q23. All consistent with our model.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

PJM – PJM posts additional BRA timelines

- The RTO has posted fresh details of the upcoming RPM cycles, which we be stacked 3 months apart beginning in early December for the 24/25 cycle
- More HERE

Guggenheim takeaway: *For your awareness and calendars not that many investors are following this at this juncture.*

KY – KY muni warns of tight grid conditions

- The muni aggregator, which was created in 2019, has been warning customers of 'blackouts'
- More HERE, background HERE

Guggenheim takeaway: *While we do not view this as a major concern given the aggregators are interconnected to PPL, it is yet another data point on aggregators running into supply issues amid the current commodity backdrop.*

OR/WA – Regional business groups join forces over hydropower lobbying

- The move comes amid heightened concern over salmon stocks and river quality
- "OBI has joined with the Association of Washington Business (AWB), Washington's largest employer group, to form a coalition in support of hydropower, a low-cost, reliable and renewable energy source. The coalition will highlight the critical role that hydropower continues to play for families and employers throughout the Northwest. The Northwest dams have proven hugely successful, producing powerful results for our state, our region and our nation," Wilhelms said. "As we visit businesses and communities across the state, we hear routinely about the vital role that clean, reliable energy plays in creating opportunity today and for the future. Across the northwest, we share the same goals of a healthy environment and strong economy. It's not either-or." - release
- More HERE

Guggenheim takeaway: *The tug of war between salmon interests and hydropower remains a major flashpoint in the PNW and one that we have followed for some time given the already tight capacity landscape in the region. With Klamath as an example, we would not be surprised to see remediations of other smaller facilities in the years to come against the backdrop of federal concern.*

SC – South Carolina to expand highway charging station availability for electric vehicles

- Yesterday, Gov. Henry McMaster signed an executive order designed to "…grow [South Carolina's] charging network of approximately **918 public charging ports** with high-powered chargers along the almost **759 miles** of designated EV corridors within the state. Funding will come from **$25.3 million allocated from the Bipartisan Infrastructure Law for the fiscal years 2022 and 2023**. Over the course of the federal five-year plan (2022-2026), South Carolina would receive an estimated [~$70m] in federal funds." – Executive Order 2022–31
- Executive Order HERE

Guggenheim takeaway: *Another 'driver' of further grid modernization needs in South Carolina – utilities should begin, like CNP, to begin giving some "numbers" around EV adoption over the next couple of years as penetration begins to increase.*

PCG – CA legislature working on federal tax exception for Fire Victims Trust

- Legislators in CA are working on measures to protect fire victims from paying federal income tax on claims payouts.
- Victims are not subject to state tax, but still have to pay federal, which reduces the cash available for rebuilding.
- Many fire victims reported a lack of funds for rebuilding.
- More in media here.

Guggenheim takeaway: *FYI. Anything that helps the FVT should indirectly alleviate some pressure on PCG.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Hydrogen – Cummins announces electrolyzer manufacturing expansion in US

- Cummins (CMI) is expanding electrolyzer manufacturing in the US, with a new facility planned in Minnesota.
- The company is planning to have ~500MW of annual electrolyzer manufacturing capacity, callable to 1GW.
- The facility range of products can accommodate power needs from 1.25MW to more than 200MW for both small- and large-scale hydrogen generation projects.
- Expansion is imminent but no timeframe is set for opening date.
- PR here.

Guggenheim takeaway: *FYI. First steps for a nascent hydrogen economy starting up domestically. The general consensus from US utilities on hydrogen has been tepid due to challenges in acquiring enough hydrolyzers to see a material change in the power sector. Domestic manufacturing expansions are a first step to realize the hydrogen hub concepts for many states.*

PEG – NY state legislature working on LIPA restructuring alternatives

- NY state legislative committee tasked with LIPA restructuring reiterated the works schedule to have draft report by December and a final report done by April of next year.
- The committee is looking at outside advisory council to help move the process forward.
- The legislators noted that the process goes beyond the PSEG Long Island management contract, but will seek to restructure LIPA governance and accountability.
- More in media here.

Guggenheim takeaway: *FYI. Governance issues continue for LIPA, despite PSEG's best efforts on the operational and management contract side. While the committee has not targeted the contracted management structure it will be interesting to see the outcome of the restructuring analysis.*

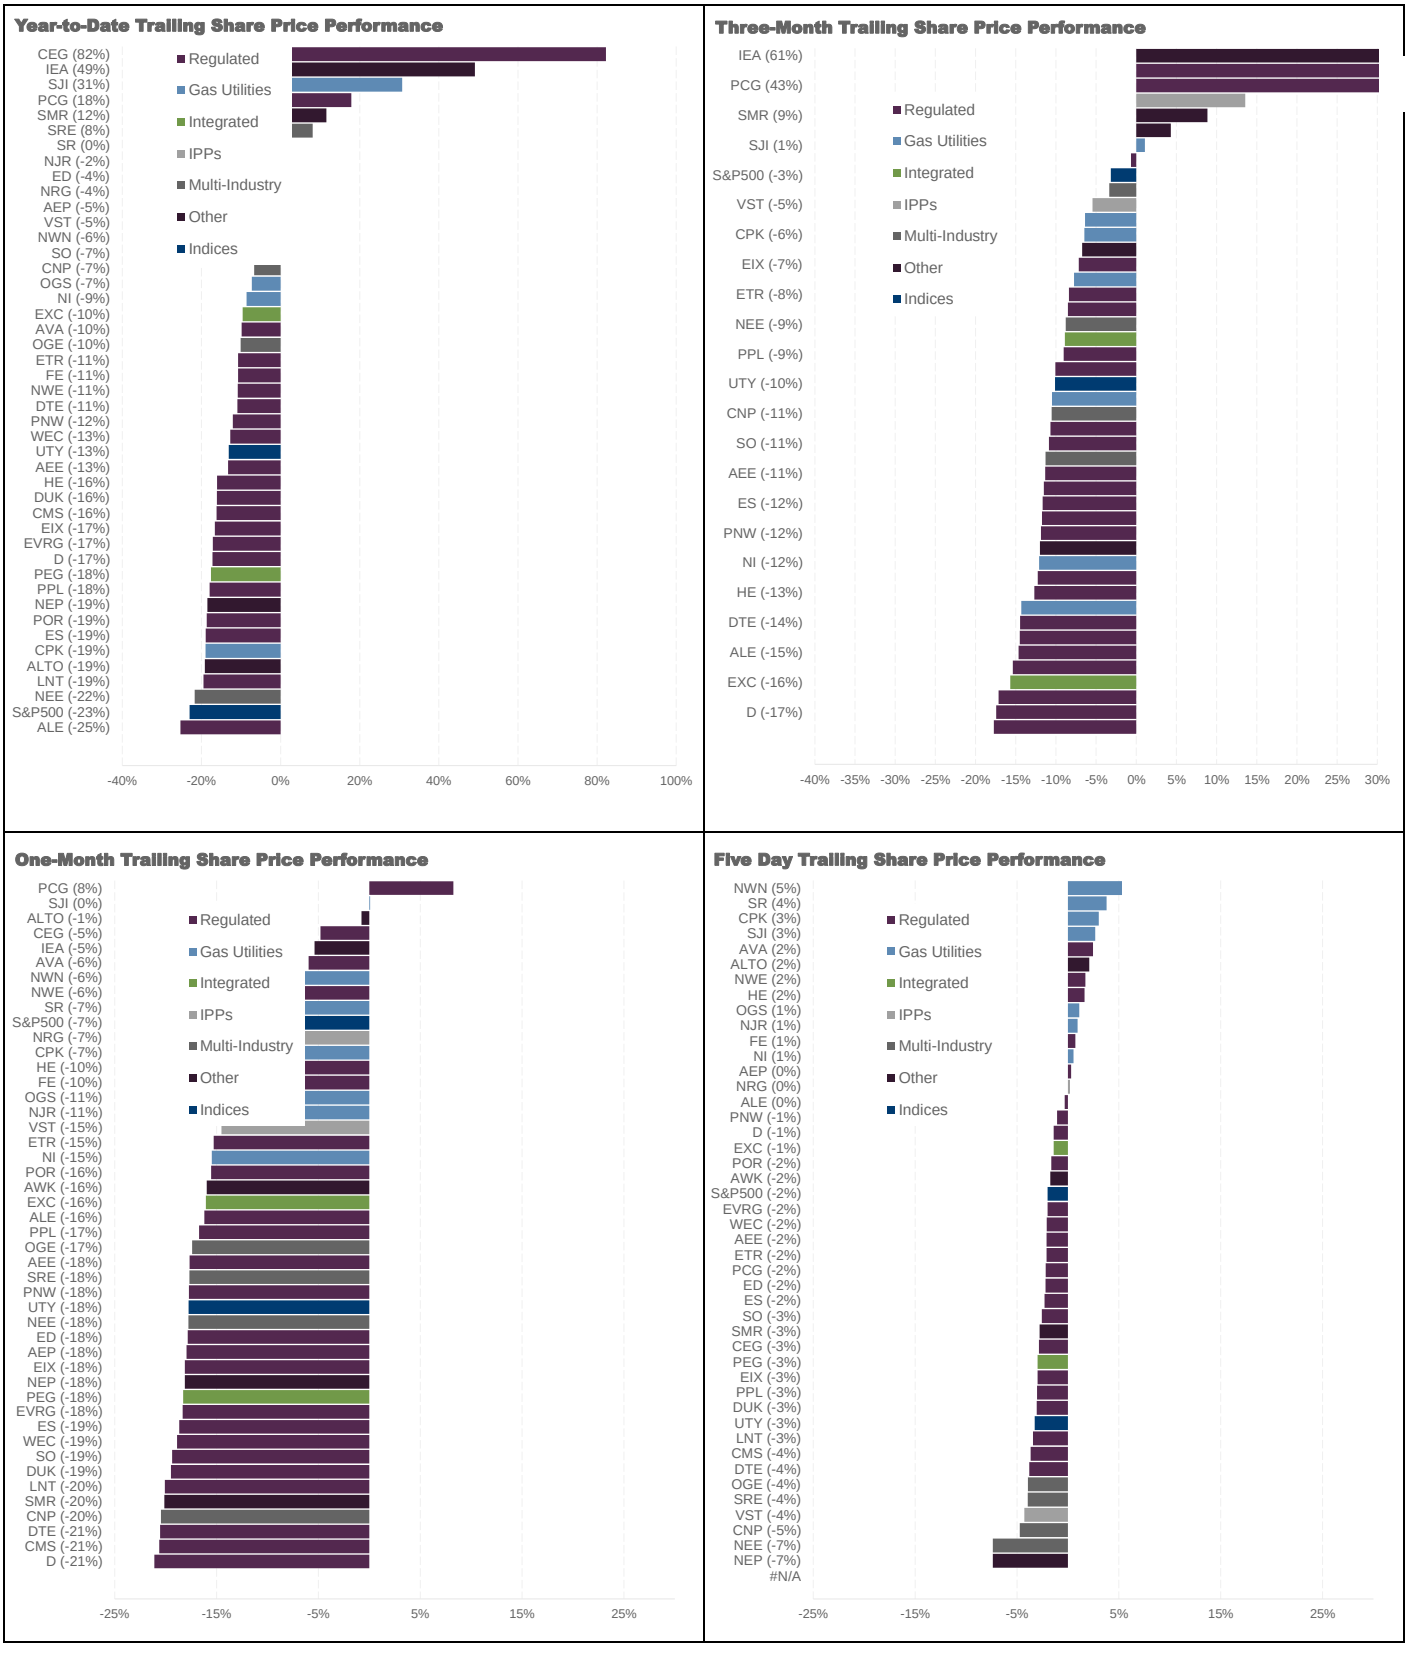
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.	
Rating Category	**Count**	**Percent**	**Count**	**Percent**
BUY	227	66.18%	40	17.62%
NEUTRAL	111	32.36%	6	5.41%
SELL	5	1.46%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions

expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: D, SRE, DUK, XEL, NEE, EXC, ETR, CMS, DTE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Join us at the EEI conference in FL on November 13-15 (schedule included). On our regulatory calendar, we are tracking proceedings in D's Questar gas rate case and SRE's Oncor electric rate case. In other news, utilities underperformed the broader market by nearly 500 bps last week; DEP filed a MYRP in NC; the MN DoC filed testimony in XEL's MN electric rate case; MI PSC orders CMS and DTE to report on compliance with outage and safety directives; FPL and DEF receive conditional approval for storm protection plans; the FL PSC approves ROE increases for DUK and NEE; EXC reached a settlement in its DE gas rate case and a partial settlement in the MD electric rate multiyear rate case; the SC PSC approved a multiparty settlement in the DUK Piedmont gas rate case; the AR PSC approves ETR's 250 MW solar project; and DUK proposes two new renewable programs in SC.

KBCM Invites You to Join Us at the EEI Financial Conference on November 13-15 in Hollywood, FL.

Scroll down for our full schedule, including a dinner with **NWE**.

Regulatory Calendar

D — Rebuttal testimony in Phase II and Surrebuttal testimony in Phase 1 of Questar's natural gas rate case is due on October 13: Phase II will address the cost of service among customer classes and rate design, while Phase I will address all issues necessary to determine D's cost of capital and revenue requirement. Phase I direct testimony recommended a $49.6M revenue increase premised on a 9.3% ROE and 53.21% equity vs. Questar's request for a $70.5M rate increase based on a 10.3% ROE and 53.21% equity layer. The main difference between DPU's recommendation and the Company's request is the lower ROE. The primary factors contributing to the proposed rate increase are capital investments, including the Magna LNG terminal expected to enter service by the end of 2022. Questar must file a rate case every three years as part of an infrastructure replacement adjustment tracker. Questar proposes to continue the mechanism. Questar's last rate case was approved in 2020 for a $2.7M rate increase on a 9.5% ROE and 55% equity layer. A commission decision is expected by January 1.

SRE — Briefs in Oncor's TX electric rate case are due on October 14: Staff filed testimony recommending a 9.3% ROE and a 40% equity layer—compared to Oncor's ask of 10.3% ROE and a 45% equity layer. Oncor filed a GRC in May, seeking a $251M net increase in rates ($287M increase in distribution rates offset by a $36.5M reduction in transmission rates). Staff is recommending adjusting the rate increase from SRE's requested 251M to $21M. The reductions span the gamut with the biggest delta attributable to the lower ROE and lower equity layer and a lower recommended federal tax allowance (staff recommended ROR is 6.35% vs. Oncor's 7.05% requested). Staff testimony appears restrictive at first glance given that Oncor's last rate case was settled in 2016 at 9.8%, 42.5% equity layer, and the uptrend in interest rates since then. Oncor's primary reasons for seeking the rate increase were the move to a higher equity layer and a higher ROE, the growth in Oncor's under-recovered self-insurance reserve balance, and expenses associated with the COVID response, among others.

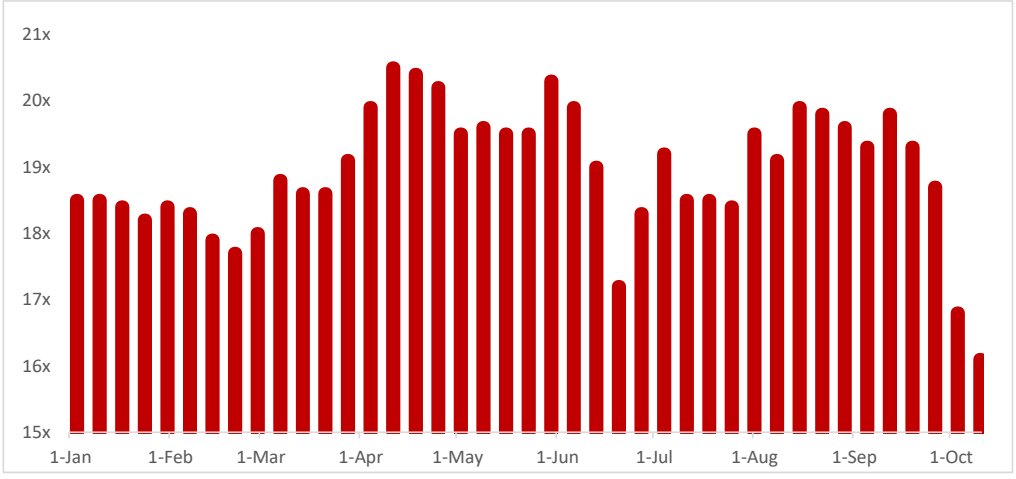
Recent Developments for Companies Under Our Coverage

From our midweek: AEP hosted an analyst day and DUK hosted a virtual energy transition event. We provide detailed updates on both in this note. In other news, the VA Governor published the 2022 Energy Plan that aims to revise key provisions included in the VCEA; WEC received a constructive rate case settlement in WI and XEL announced a constructive settlement in the MN gas rate case. MS PSC issued revised guidelines for the NEM rules after ETR and SO appealed for a stay; PNM filed a grid mod plan in NM; ES closed on the acquisition of Torrington Water, and ME PUC is initiating a periodic inquiry into grid mod filings.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

Are we there yet? The Philadelphia Utility Index UTY was down 322 bps in the past week (vs. the SPX up 150 bps). The large-cap regulated utility PEs (2023E) is currently trading at 16.1x, down ~4.4x since the peak in April and at the lowest level YTD (with virtually no earnings revisions). Notably, the UTY has maintained a steady outperformance of ~1,200 bps vs. the SPX throughout the year. The recent utility multiple compression is not surprising given our long-standing thesis that utility multiples tend to contract as recessionary expectations are realized and utilities begin to compete against cyclicals for investment dollars.

Figure 1 - Large Cap Regulated Utility: Forward P/E (2022 YTD)



Source: Thomson Reuters, KeyBanc Capital Markets Inc. estimates

DUK — DEP files first MYRP in NC: DEP filed its first multiyear rate plan in NC seeking a cumulative $615M net rate increase. The request is premised on a 10.2% ROE and 53% equity layer. The net increase includes a $326M increase in RY1, $151M in RY2, and $138M in RY3. Recovery of historical and forecasted capital investments is driving the requested revenue increase. DUK is requesting interim rates to go into effect on June 1, 2023, and for approved total RY1 rates to go into effect no later than October 2023. The filing introduces the modernized rate-making tools approved in HB 951, including multiyear rate plans, performance incentive measures, and residential decoupling, which will help reduce rate volatility. Under the newly instituted PBR, DEP's excess earnings over 50 bps above the authorized ROE will be returned to ratepayers via a rider and if DUK's earnings fall below the authorized ROE it may file a rate case prior to the end of the multiyear rate plan. An NCUC rate case typically has a 10-month duration from filing to a decision. This is the first DEP rate case filing since 2019. The rate filing is in line with the previously guided timeline.

CMS, DTE — MI PSC orders CMS and DTE to report on compliance with outage and safety directives: The MPSC is concerned about the lack of progress made by the two MI utilities and commenced proceedings to order them to report to the Commission on their compliance with regulations and past orders regarding outage response and downed lines. The Commission has directed Staff to commence a third-party audit through an external consultant to review the utilities equipment and operations of their distribution systems (Docket: U-21305).

XEL — Interveners file testimony in XEL's MN electric rate case: The MN DoC filed testimony, recommending a cumulative $274M revenue increase over three years, based on 9.25% ROE and 52.5% equity. For settlement purposes, the MN DoC included recommended revenue increases of $76M and $90M for RY4 and RY5, respectively. The RoR adjustments and rate base adjustments make up a significant portion of the delta. As far as rate base adjustments, the DoC excluded $154M of capital additions for the three years associated with an EV rebate proposal, which the PUC had not voted on at the time of XEL's filing. Other items the DoC recommended removing from the rate base include a prepaid pension asset and lower required revenue associated with the extension of the Monticello nuclear plant and XEL wind farms. As a reminder, NSP-MN filed a three-year electric rate case in 2021 requesting a $677M cumulative rate increase, with an incremental $70M in RY4 and $118M RY5 for the possibility of a five-year settlement. The rate request is based on a 10.2% ROE and a 52.5% equity ratio. An interim rate increase of $288M went into effect on January 1. The next date to watch is rebuttal testimony due on November 8 and a final PUC decision is expected in 2Q23.

NEE, DUK — FPL, and DEF receive initial approval for Storm Protection Plans: The FL PSC approved DEF and FPL's storm protection plans. The PSC approved the storm hardening plans with some modifications to mitigate customer rate impacts. The commission removed some proposed programs that it deemed were routine utility updates and not specifically related to storm resilience. The utilities will file amended plans by October 25. The filings were made under a 2019 law that directs each FL utility to file a 10-year Storm Protection Plan, update the plan at least every three years, and direct the PSC to conduct an annual proceeding to determine the prudence of the SPP costs incurred to allow cost recovery through a rider separate from base rates. Both companies highlighted recent investments as part of the reason that the grid held up relative to prior storms during Hurricane Ian.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

DUK, NEE — FL PSC approves ROE increases for DUK and NEE's FL utilities: The FL PSC approved 25 bps and 20 bps increases in DEF and FPL's authorized ROEs, respectively. The utilities previously filed requests with the FL PSC to increase their ROEs in response to rising Treasury rates. The increase results in DUK's authorized level increasing to 9.1-11.1%, or 10.1% at the midpoint. FPL's new authorized level is 9.8-11.8% or a 10.8% midpoint. The 25 bps increase to DUK's ROE results in a ~$24.4M increase to the 2023 revenue requirement. DUK is postponing the increase in base rates until January 2023 to delay ratepayer impacts. FPL will not raise base rates in response to the higher ROE. The requests were in response to the ROE adjustment trigger provision included within the rate construct, which allows the utilities to request an increase to its ROE if the 30-year Treasury increases by 50 bps or more over six months.

EXC — EXC reaches a settlement in the DE gas rate case: EXC reached a constructive settlement in the DE gas rate case. The settlement includes a $13.4M revenue increase, premised on a 9.6% ROE and 49.94% equity layer. After excluding the $5.8M for the distribution system improvement charge, or DSIC that is currently in rates, the net increase will be $7.6M. EXC is requesting an effective date of November 1. Interim rates of $20.3M, went into effect on August 14, and EXC will have 30 days after an order to file a refund plan. EXC sought an $18.8M rate increase based on a 10.3% ROE and 49.94% equity. The request included the $5.8M DSIC, making the net increase requested $13.0M. The previous gas rate case concluded in 2021 and authorized a rate increase of $6.7M based on a 9.6% ROE and 50.37% equity layer.

EXC — EXC reaches a partial settlement in the MD electric rate case: EXC reached a partial settlement in its electric rate case with the items remaining to be settled being the Bill Stabilization Adjustment and the reconciliation mechanism. The details of the settlement are not public yet. Previously, staff (Docket No. 9681) filed testimony for a cumulative rate increase of $23.7M for the three years from 2023-2025. The increase is premised on a 9.55% ROE and 50.50% equity layer. This compares to EXC's request for a cumulative rate increase of $37.5M for the three years 2023-2025, based on a 10.25% ROE and 50.5% equity layer. DP&L is requesting a $22.7M increase in 2023, followed by $7.9M and $6.8M in 2024 and 2025, respectively. After accelerating the refund of certain regulatory liabilities, the net increase in rates will be $11.4M in 2023, $11.6M in 2024, and $14.5M in 2025 as proposed by Delmarva. This is Delmarva's first multiyear plan filing in MD after the PSC adopted rules in 2020 allowing multiyear rate plans. A PSC decision is expected before the end of the year, with new rates effective January 1, 2023.

DUK — SC PSC approves multiparty settlement in DUK Piedmont gas rate case: The Commission issued an order approving the previously reached settlement. The order approves a net revenue decrease of $1.2M, and the Commission authorized a 9.3% ROE and 52.2% equity layer. The net decrease includes a revenue increase of $1.66M and a $2.9M revenue adjustment for the cost of gas demand. The settlement initially filed with the PSC was for a net revenue decrease of $0.02M premised on a 9.49% ROE and 53.5% equity layer, but one party chose to litigate the ROE and capital structure. This compares to DUK's initial request of a $6.7M net revenue increase on a 9.9% ROE (54.56% equity with a $505M YE21 rate base) and Staff's proposed $0.2M net revenue decrease premised on a 9.3% ROE and 53.05% equity. Piedmont has operated under SC's Rate Stabilization Act since 2005. This allows the gas utility to adjust rates regularly based on gas prices and other factors, but DUK reached a settlement in June, allowing the rate case to proceed instead of the rate adjustment this year.

ETR — AR PSC approves 250 MW solar project: The AR PSC approved the planned 250 MW Driver Solar Project. Lightsource BP will build the project before transferring ownership to ETR AR. The Commission previously approved the Build-to-Own transfer agreement. The development and permitting of the solar field have all been completed. The project is expected to enter service in 2024 and will be recovered through ETR AR's forward test-year FRP.

DUK — DUK proposes two new renewable programs, and changes to a current program in SC: DUK filed proposals with the SC PSC to introduce two new renewable programs for nonresidential customers. The Renewable Choice program would allow large-load customers to contract with DUK's SC utilities to provide locally sourced environmental attributes, including RECs. The Clean Energy Impact program is proposed for customers that want renewable energy credit to further their ESG goals. DUK would procure and develop new solar and battery storage facilities through a competitive process as part of the programs. DUK is also requesting to update its Green Source Advantage program to allow large customers to offset their power purchase by securing renewable energy from projects connected to DUK's grid. DUK is proposing to enable customers to contract up to 100% of their energy from renewable sources, vs. the current 30%.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

KBCM EEI Schedule Tentative Agenda (All Times Eastern):

Sunday, November 13, 2022

12:00 PM — Eversource Energy (ES)
1:00 PM — CenterPoint Energy, Inc (CNP)
2:00 PM — Xcel Energy Inc. (XEL)
3:00 PM — Sempra Energy (SRE)
4:00 PM — WEC Energy Group, Inc. (WEC)
5:00 PM — Atlantica Sustainable Infrastructure plc (AY)

Monday, November 14, 2022

8:00 AM — Duke Energy Corporation (DUK)
8:45 AM — Avangrid, Inc. (AGR)**
9:00 AM — Pinnacle West Capital Corporation (PNW)
10:00 AM — Exelon Corporation (EXC)
11:00 AM — Edison International (EIX)
12:00PM — DTE Energy Company (DTE)
1:00 PM — NorthWestern Corp (NWE)
2:00 PM — American Electric Power Company, Inc. (AEP)
3:00 PM — Portland General Electric Company (POR)
4:00 PM — FirstEnergy Corp. (FE)
*Dinner — Dinner with NorthWestern Corp (NWE)**

Tuesday, November 15, 2022

7:00 AM — Entergy Corporation (ETR)
7:00 AM — Southern Company (SO)
8:00 AM — Ameren Corporation (AEE)
9:00 AM — CMS Energy Corporation (CMS)
10:00 AM — Consolidated Edison, Inc. (ED)
11:00 AM — Avista Corporation (AVA)
11:00 AM — Otter Tail Corporation (OTTR)
12:00 PM — Public Service Enterprise Group Incorporated (PEG)

**Dinner event.*
***30-minute meeting.*

Disclosure Appendix

Important Disclosures

Important disclosures for the companies mentioned in this report can be found at https://key2.bluematrix.com/sellside/Disclosures.action.

Please refer to the analysts' recently published reports for company-specific valuation and risks.

Reg A/C Certification

The research analyst(s) responsible for the preparation of this research report certifies that:(1) all the views expressed in this research report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers; and (2) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst(s) in this research report.

Rating Disclosures

Distribution of Ratings/IB Services Firmwide and by Sector

KeyBanc Capital Markets

Rating	Count	Percent	IB Serv/Past 12 Mos. Count	IB Serv/Past 12 Mos. Percent
Overweight [OW]	295	50.17	62	21.02
Sector Weight [SW]	281	47.79	56	19.93
Underweight [UW]	12	2.04	1	8.33

Energy

Rating	Count	Percent	IB Serv/Past 12 Mos. Count	IB Serv/Past 12 Mos. Percent
Overweight [OW]	28	51.85	11	39.29
Sector Weight [SW]	23	42.59	11	47.83
Underweight [UW]	3	5.56	1	33.33

Rating System

Overweight - We expect the stock to outperform the analyst's coverage sector over the coming 6-12 months.

Sector Weight - We expect the stock to perform in line with the analyst's coverage sector over the coming 6-12 months.

Underweight - We expect the stock to underperform the analyst's coverage sector over the coming 6-12 months.

Disclosure Appendix (cont'd)

Important disclosures for the companies mentioned in this report can be found at **https://key2.bluematrix.com/sellside/Disclosures.action**.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

The Guggenheim Daily Transmission: DUK, CMS/ DTE, PCG, FE, CA/BOEM, DTE, OR, EXC, CNP, PA/ RGGI

For details on our Guggenheim-hosted client Utility events including our EEI Conference meetings; and other events, scroll down…

2022 LCOE Analysis – LCOE Update Shows Rising Costs, But IRA Further Improves Solar/Wind Competitiveness; Gas Dominance Continues to Fade (see our note HERE)

DUK – Duke Energy Progress files North Carolina multi-year rate case under HB 951 construct

CMS/DTE – MPSC orders investigation into MI utility storm response

PCG – Media reports second PG&E lawsuit related to Mosquito fire

FE – Ohio Attorney General Dave Yost is pushing back on 33% fee in First Energy ratepayer class-action settlement

CA/BOEM – Now moving towards California offshore wind lease stake by Dec. 31, 2022

DTE – Intervenors file exceptions to proposal for decision in DTE Electric 2022 rate case

OR – OR Governor signs commitment to regional clean energy initiatives

EXC – Delmarva Power files settlement with DPSC

CNP – Houston Electric sees disputes surrounding contracts for mobile generation

PA/RGGI – Gubernatorial candidates debate RGGI

DUK – Duke Energy Progress files North Carolina multi-year rate case under HB 951 construct

- Yesterday, October 6th, DUK's DEP subsidiary in North Carolina filed its planned 4Q22 rate case. The company is asking for a $623.5m rate hike spread over three years, a total increase of 16% by 2025.
- Test year: Dec 31, 2021 (year-end)
- Equity layer: 53% ask (vs. 52% currently authorized)
- ROE: 10.2% ask (vs. 9.6% currently authorized)
- Docket No. E-2, Sub 1300

Guggenheim takeaway: *Investors should recall that HB 951 brought with it not only the potential for multi-year plans to reduce costs on both sides as well as regulatory lag, but also performance-based ratemaking, performance incentive measures, residential decoupling, and sharing mechanisms. Duke Energy Carolinas (DEC) is expected to file its rate case in North Carolina in 1Q23 as per DUK's CEO on the company's 2Q22 call.* ***Next up: Commercial sale announcement where we believe Duke will achieve a very healthy multiple commensurate with recent deals.***

CMS/DTE – MPSC orders investigation into MI utility storm response

- MPSC ordered an investigation into CMS and DTE storm response from last August.
- The utilities are ordered to report on compliance with outage and safety regulations.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

- During the most recent storms on Aug. 29, with gusts exceeding 70 mph, nearly half a million Michigan customers were left without electricity for up to several days.
- The report must be filed by Nov. 4, 2022.
- Docket: U-21305
- MPSC release here.

Guggenheim takeaway:*FYI. MPSC taking proactive steps in addressing reliability issues. While the audit could be a downside risk, we note that the weather conditions could be stronger than design parameters in certain areas. Looking at past storm audits, DTE in particular scored well, with the least criticism from staff and intervenors.*

PCG – Media reports second PG&E lawsuit related to Mosquito fire

- Media has reported on a second lawsuit stemming from the Mosquito fire.
- The lawsuit was filed on behalf of residents who suffered property losses and damages due to the Mosquito Fire.
- The USFS has indicated to Pacific Gas and Electric Company an initial assessment that the fire started in the area of the Utility's power line on National Forest System lands and that the USFS is performing a criminal investigation into the 2022 Mosquito fire.
- On September 24, 2022, the USFS removed and took possession of one of the Utility's transmission poles and attached equipment.
- The Utility's investigation is ongoing.

Guggenheim takeaway: *FYI. The Mosquito fire destroyed or damaged 91 structures. While it is one of the biggest fires of 2022, the damage estimates remain below what we see as insurance thresholds. The lawsuit is standard process for fire victims to recognize their claims regardless of prudency reviews.*

FE – Ohio Attorney General Dave Yost is pushing back on 33% fee in First Energy ratepayer class-action settlement

- Ohio's AG has filed an objection (link HERE) on behalf of three state agencies, suggesting that a 10% fee is more appropriate based on the fact that the heavy lifting of discovering the crimes and stopping collection of the rider were done by the Ohio Attorney General's Office and the US Attorney.
- More HERE.

Guggenheim takeaway: *If accepted, Yost's objection would send an additional $10m. Attorneys would still receive approximately $5 million in fees. The court is scheduled to hold a hearing on objections on Nov. 9. Just more noise... we still remain on the sidelines pending more visibility around federal investigations, which can become very noisy post jury selection, Ohio investigations and CEO search… we remind investors that FE will need to file a rate case in time as well.*

CA/BOEM – Now moving towards California offshore wind lease stake by Dec. 31, 2022

- Yesterday, Oct. 6th, BOEM stated that it is working to hold a California offshore wind lease auction by the end of 2022.
- The final Environmental Assessment (EA) assesses potential impacts from the issuance of leases within nearly 240,898 acres (376 square miles) of the Morro Bay WEA off the coast of San Luis Obispo County, California.
- Recall that earlier this week, BOEM announced that it had completed its environmental review of the potential impacts of leases for offshore wind development in California's Morro Bay Wind Energy Area and proceeded to issue a "*finding of no significant impacts to environmental resources.*"
- More HERE.

Guggenheim takeaway: *Recall that the California Energy Commission (CEC) adopted an offshore wind report on Aug. 10, 2022, which set an initial goal of up to 5 GW of offshore wind by 2030 and a cumulative 25 GW by 2045 in order to achieve California's goal of 100% of its power being carbon-free by 2045. The report was developed as part of AB 525, which took effect Jan. 1st of this year, and required the commission to develop a strategic plan for offshore wind energy deployment in federal waters off of California's coast.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

DTE – Intervenors file exceptions to proposal for decision in DTE Electric 2022 rate case

- Intervenors filed exceptions to the PFD in the DTE 2022 electric rate case.
- The PFD largely maintains DTE fundamentals in ratemaking – with an ROE of 9.9% (flat vs. prior) and a 50% headline equity ratio (39.62% of the ratemaking capital structure, as requested and 130bp improvement vs. prior authorized).
- PFD recommends that the Commission adopt DTE's capital structure and common equity balance, along with a long-term debt cost of 3.69%, a short-term debt cost of 1.74%.
- MPSC authorized a $146M rate increase vs. $368M requested and $167M recommended by staff.
- The PFD recommends a $777M reduction in rate base (3.7%), from $21.2B requested to $20.5B, adjusting for projected spending and plant in service dates.
- Docket: U-20836

Guggenheim takeaway: *FYI. A generally constructive outcome resolving the rate case. We are still working through the 700+ pages of PFD testimony, but find that a majority of ratemaking issues are approached in a balanced manner, including cost of capital where the commission follows precedent from previous rate case final orders (9.9% ROE), noting the rate of return "should not be so high as to place an unnecessary burden on ratepayers, yet should be high enough to ensure investor confidence in the financial soundness of the enterprise". The debt parameters at DTE Electric are a bit tight given the steep rise in interest rates, but not a big issue as DTE remains a serial filer (annual rate case cycle).*

OR – OR Governor signs commitment to regional clean energy initiatives

- The regional policy agreement seeks a transition to cleaner energy and climate change action including:
  - expanding access by communities to low-carbon technologies,
  - extending the existing network of charging stations for electric vehicles,
  - promoting a cleaner electric grid,
  - doing more to avert wildfires and limit smoke and other impacts.
- Media Coverage here.

Guggenheim takeaway:*FYI. Continued commitment for West Coast states to adopt cleaner energy policy..*

EXC – Delmarva Power files settlement with DPSC

- DPL filed a gas rate case settlement with the Delaware PSC.
- The settlement includes DPL, Staff, Public Advocate and DEUG.
- The settlement proposes a total revenue requirement of 13.4M, with a rate effective date of November 1, 2022.
- Settlement is premised on rate of return on equity of 9.60% and an overall rate of return of 6.57% based on the company's cost of debt of 3.56% and its capital structure at December 31, 2021, consisting of 49.94% of common equity and 50.06% of long-term debt.
- Docket: 22-0002

Guggenheim takeaway:*FYI. Constructive datapoint for clearing regulatory proceedings for EXC. The settlement is small in terms of relative size but generally in line with our assumptions.*

CNP – Houston Electric sees disputes surrounding contracts for mobile generation

- Media reported on a new legal dispute with CNP over contracts signed in support of the new mobile generation program.
- CNP started the program as part of the support for state resiliency policy in the aftermath of winter storm Uri.
- Media here.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

Guggenheim takeaway:*FYI.*

PA/RGGI – Gubernatorial candidates debate RGGI

- RGGI would require power generators to pay for pollution allowances in an effort to lower emissions.
- Doug Mastriano has cast Gov. Tom Wolf's support of RGGI as ignoring Pennsylvania voters without a public benefit.
- An injunction has delayed Pennsylvania from becoming a part of RGGI.
- Media HERE, HERE, and HERE.

Guggenheim takeaway:*Interesting bill headroom data point as RGGI remains a very noisy topic in PA.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 16-Dec-2022 12:27 PM.

GUGGENHEIM

Invite: 57th EEI Financial Conference

Dates
November 13 - 15, 2022

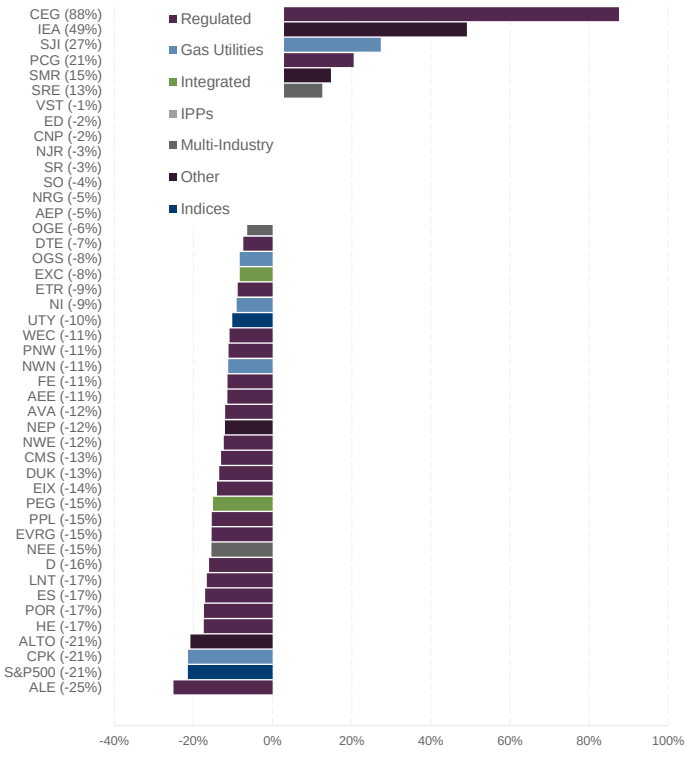
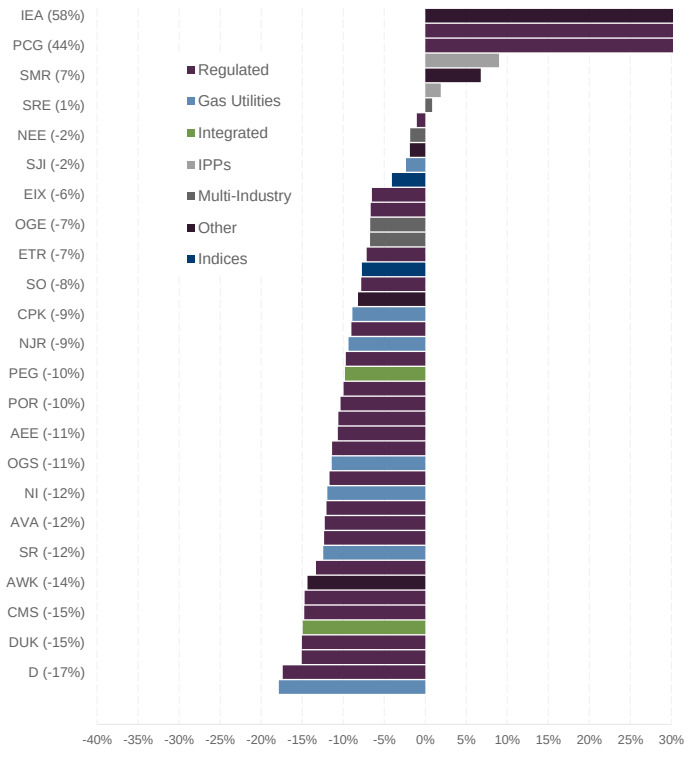
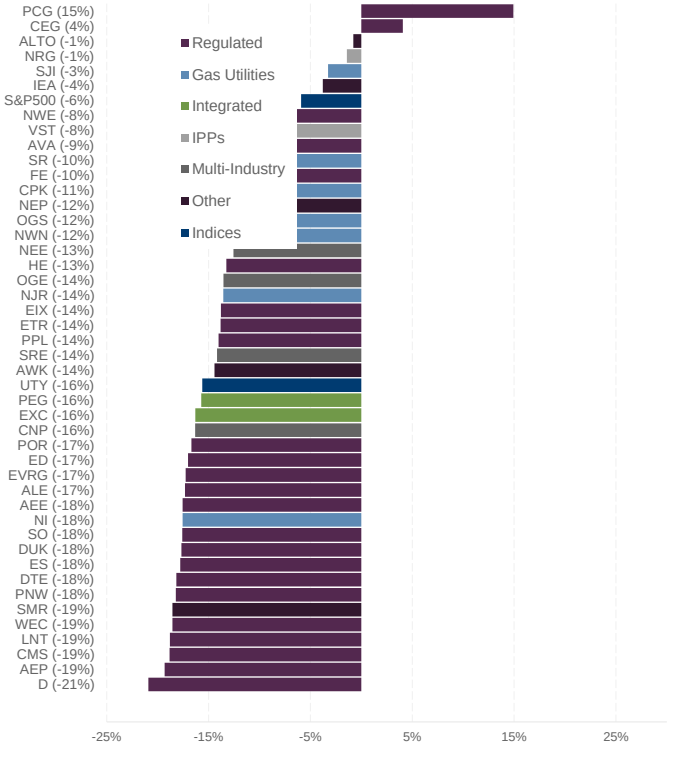
Year-to-Date Trailing Share Price Performance



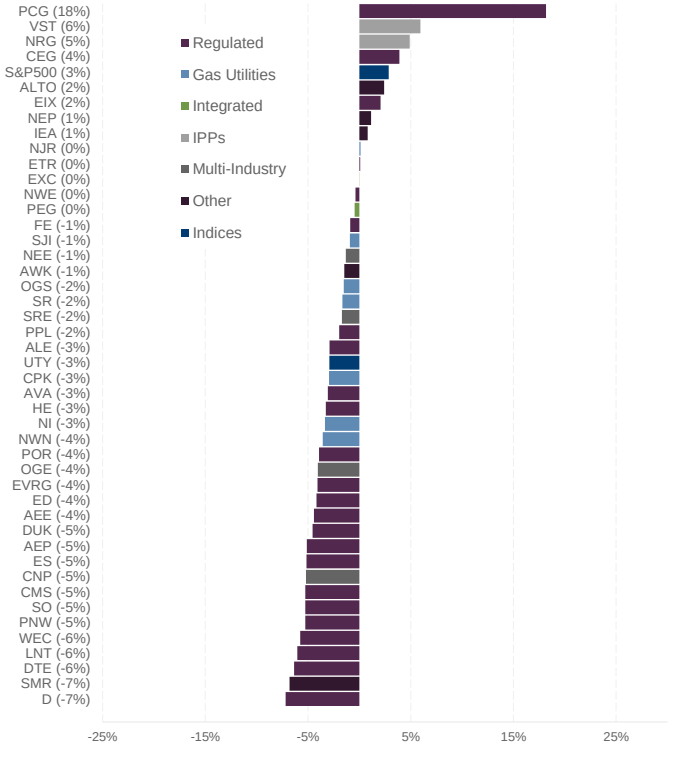
Three-Month Trailing Share Price Performance



One-Month Trailing Share Price Performance



Five Day Trailing Share Price Performance



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

For the second quarter ending June 30, 2022, the Firm did not obtain from this Research Analyst (within 30 days of the end of the quarter), a certification representing that, in connection with public appearances, the views expressed were consistent with his personal views and that no part of his compensation was related to his recommendation. The certification was provided in the first half of September.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Join us at the EEI conference in FL on November 13-15 (schedule included). ICYMI, we hosted AVA at a series of meetings. Find a link to our note below. This week, AEP is hosting an analyst day and DUK is hosting a virtual update on the clean energy transition. On our regulatory calendar, we are tracking proceedings in XEL's electric and gas cases in MN and ETR's FRP proceedings in AR. In other news, ED sells its clean energy portfolio to RWE for ~$7B; D, DUK, and NEE continue restoring power after Hurricane Ian while studying damage to infrastructure; AEP and Liberty amend an agreement for KY Power; VEPCO files a response in the matter related to the limited reconsideration of the CVOW project; expert hearings in DUK's Carbon Plan proceedings conclude; MT PSC approves interim rate increase for NWE; PCG to spin-off 49.9% interest in non-nuclear generation assets; EIX faces lawsuits from residents following Fairview Fire; ALJs issue a PD in the CoC proceedings with reference to the CA utilities SRE, EIX; a tentative court date for AGR's NECEC project review is announced; SO settles with a co-owner on certain cost-sharing provisions; AZ Supreme Court ruling could allow a single Commissioner to investigate IOUs; DUK is launching EV pilots in IN, SO announced senior management promotions; PECO reached a settlement in the PA gas rate case; and POR energized the Wheatridge facility in OR.

ICYMI

AVA — Last week, we met with AVA's management team. Read our notes from the meetings here.

KBCM Invites You to Join Us at the EEI Financial Conference on November 13-15 in Hollywood, FL.

Scroll down for our full schedule, including dinners with **PEG** and **NWE.**

In the week ahead

AEP — AEP is hosting an analyst day in NYC on October 4: We expect a thesis refresh following recent senior management promotions (including CEO), the progress on the decision to monetize the unregulated renewables portfolio, update on the recently amended KY Power sales agreement, 2023 guidance, and a traditional rollover of the five-year capital plan to include 2027. Given the new management team, we would expect a thorough review of the portfolio along with possible portfolio optimization strategies.

DUK — DUK is hosting an update on its clean energy transition on October 4: DUK is hosting a virtual event to provide an update on its clean energy transition. According to the release, the senior management team at DUK will provide updates on the Company's LT strategy and other business initiatives. DUK recently announced that it would market its portfolio of commercial renewable assets in favor of making regulated investments. Also on the radar is DUK's Carbon Plan in NC where hearings just concluded as DUK proposes plans to reduce carbon emissions by 70% by 2030.

Regulatory Calendar

XEL — Direct testimony in XEL's MN electric rate case is due on October 3: NSP-MN filed a three-year electric rate case in 2021 requesting a 677M cumulative rate increase based on 10.2% ROE and a 52.5% equity ratio. An interim rate increase of $288M went into effect on January 1. A final PUC decision is expected in 2Q23.

XEL — Rebuttal testimony in XEL's MN gas rate case is due on October 4: The MN Department of Commerce filed intervenor testimony, recommending a $17M revenue increase, premised on 9.15% ROE and 52.5% equity layer. As background, NSP-MN filed a gas rate case requesting a $36M rate increase based on 10.5% ROE and an equity ratio of 52.5%. The difference between the intervenor testimony and XEL's filing is driven by the lower ROE. The requested rate increase is net of $28.5M, which is currently being recovered through riders. An interim rate increase of $25M went into effect on January 1.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

ETR — Staff and Intervenor objections in ETR's AR FRP are due on October 5: ETR AR recently filed a 2022 Formula Rate Plan seeking a $79M rate increase. According to ETR's evaluation report, the Company requires a $16M adjustment for the 2021 historical year and a $105M revenue increase for the projected 2023 year but is capped at a 4% annual increase, resulting in the $79M request. The adjustment for the historical year includes lower revenues than projected, resulting in a $15M increase and an increase in the cost of capital requiring a $15M increase, offset by a $25M decrease for changes to O&M. The drivers for the 2023 projections include ongoing investments and changes in the cost of capital. ETR AR is allowed a return of 9.65% in the forecast year and 9.75% for the historical year. A Commission ruling on the plan is expected on December 14.

Recent Developments for Companies Under Our Coverage

From our midweek: This week, Senator Manchin's permitting reform language was dropped from the spending bill; MISO's generator interconnection queue application period ended with a record number of submissions; Staff files testimony in AGR's NY rate cases; FL utilities prepare for the aftermath of Hurricane Ian; the CPUC proposes ways to eliminate the need for the Aliso Canyon facility; OTTR and MDU announce a 95-mile transmission line; ETR LA and NO subsidiaries sign MOU for offshore wind project; and the PA governor appoints three commissioners to the PUC.

ED — RWE AG, a German energy company, agrees to buy ED's CEB for $6.8B or 11x EV/EBITDA:

- **The sale announced:** According to RWE, it is purchasing the assets at an EV/EBITDA multiple of 11x with the CEB assets EBITDA assessed at $600M. By our estimates, CEB has 3,004 MW of utility-scale renewable energy projects in service or under construction and 69 MW of BTM projects in service or under construction. Previously Bloomberg had reported an estimated $4B value for the assets (or a ~7x EV/EBITDA). The transaction is expected to close in 1H23. RWE was previously reported as one of the potential buyers of the CEB assets. The Company was also a winning bidder for one of the lease packages in the recent NY Bight offshore wind auction and has signed HOAs with SRE for LNG cargos from Port Arthur.
- **Our view:** We view the transaction multiple as attractive relative to expectations and should help to provide a basis for other renewable portfolios that are currently being marketed including those by AEP, DUK, and AGR. The passage of the IRA and the various tax incentives included therein should provide a step up for renewable portfolio valuations, and it's encouraging to see that materialize. The valuation places the transaction in line with publicly traded clean energy yield-cos (namely CWEN, BEP, and NEP) and ahead of AY.
- **ED is withdrawing plans to issue equity:** In light of the pending transaction, ED intends to forego its previously announced plan to issue up to $850M of common equity in 2022 and withdrew its equity guidance for 2023 and 2024 (previously guided at $750M over 2023-2024).

D, DUK, NEE — Hurricane Ian Update

- **The hurricane passes through FL, NC, and SC; now for the cleanup:** Hurricane Ian took another swing after passing through FL, putting more than 850K DUK customers in the Carolinas out of power. DUK has recruited technicians across its utilities and from mutual assistance organizations to stage repairs, but it may be a slow road back to recovery given the structural damage to infrastructure. D expected to restore power to all its customers in SC over the weekend. At the peak, 110K D customers in SC were without power. Meanwhile, in FL, over 1M customers' power has been restored from the original 2.5M that lost power. Most of the impact of the storm in FL appears to have been in NEE's service territory and given the catastrophic nature of the damage, the recovery may involve rebuilding portions of the grid — although according to FPL, the foundational transmission system did not lose any transmission structures during the storm.
- **Cost recovery mechanisms in FL, NC, and SC are fairly constructive:** FL offers constructive storm cost recovery mechanisms in that under a law enacted in 2019; the utilities are allowed a recovery framework for storm hardening and restoration costs through a storm protection plan cost recovery clause (SPPCRC) that is separate and apart from base rates. The PSC conducts an annual review to determine the costs that can be recovered through the recovery clause. The utilities must file an updated storm protection plan at least every three years that covers the next 10-year period. NEE, likely the one most impacted by the storm, maintains a storm and property insurance reserve fund to provide coverage toward FPL's storm damage costs. SC and NC regulations allow storm cost securitization. SC enacted SB 1077 earlier this year allowing the SC PSC to authorize the issuance of bonds to offset costs incurred for storm recovery. NC previously put securitization mechanisms in place for recovery of storm restoration costs.

AEP — AEP and Liberty amend an agreement for KY Power with a closing expected in January 2023: AEP reached an amended agreement in the pending acquisition of KY Power by Algonquin subsidiary Liberty. Per the agreement, AEP will receive $2.646B for KY Power and AEP KY Transco, $200M lower than the original agreement. The closing date of January 2023 is contingent on receiving FERC approval by December 16. To reflect the reduced sales proceeds and the changed timeline (from a prior expected Summer 2022 closing), AEP will record a $180M-$220M pre-tax loss in 3Q22 results. Also, AEP now expects net cash proceeds of $1.2B vs. the $1.4B initially expected. In exchange, Liberty agreed to waive the condition requiring the issuance of regulatory orders approving certain agreements for the Mitchell Plant. We wrote about the initial announcement of the sale here.

D —VEPCO files a response in the matter related to the limited reconsideration of the CVOW project: D filed a response to the parties in the CVOW performance guarantee docket. D maintains that the SCC does not have the authority to impose any performance guarantee that disallows reasonable and prudent costs associated with the project. D rebuts the multiple responses that have been submitted to the SCC as support for the performance guarantee clause and concludes that the performance guarantee that requires D to meet a 42% net capacity factor on a three-year rolling average basis is untenable and would prevent D from moving forward with the project, potentially resulting in the stranded cost of ~$839M of prudent and justifiable cost invested into the project to date. D requests the Commission grant reconsideration of the Final Order and amends the order to exclude the performance guarantee condition. D would remain open to the adoption of Stipulation Term 6 as an alternative, which is a performance provision and requires D to provide a detailed explanation of the factors contributing to any three-year average capacity factor less than 37%, for which the Commission could determine any appropriate remedy at that time.

DUK — Expert hearings in DUK's Carbon Plan proceedings conclude: Expert hearings in DUK's Carbon Plan concluded and parties have until October 24 to file post-hearing documents, including proposed orders, which should allow the NCUC enough time to meet its December 31 deadline to present the first NC Carbon Plan. DUK is requesting NCUC to approve the near-term approach (through 2026) while debating the longer-lead-term proposals during future carbon plan filings, which are required bi-annually by law. Throughout the hearings, the parties and DUK presented 11 portfolios to the Commission that varied in technologies and timing.

- DUK provided updated modeling assumptions to incorporate the potential benefits of the Inflation Reduction Act, which was not signed into law at the time that DUK modeled its initial portfolios (namely its preferred fifth portfolio proposal which aims for 70% carbon reduction by 2032). In DUK's updated analysis, it proposed eliminating or postponing a 1.2 GW gas generation unit at least until 2032, including 500 MW more solar and 600 MW more onshore wind and 200 MW less battery storage at least until 2032. The amended filing does not offer any changes to offshore wind, SMR, or pumped hydro.
- The intervening parties' focus has been on the cost allocation of resources between customers in NC and SC, and the potential merger of DEC and DEP by 2027 to streamline the ownership structure and rate profiles. Interveners argue that DUK's modeling assumptions will not allow DUK to achieve 70% carbon reduction by 2030 or will be at higher costs to ratepayers due to the reliance on newer, untested technologies such as small modular reactors (SMR). DUK has placed a cap on solar additions in the latter half of the decades based on assumptions for interconnection limits, which experts have argued as being arbitrary and thus restricting the potential for solar to meet the carbon reduction targets.
- DUK is optimistic that state policies will align in NC and SC, but if they do not, the utility would allocate costs based on the benefits of each resource to the respective states. DUK will file an SC IRP in 2023, informed by the outcome of the 2022 NC Carbon Plan. Notably, the variance in the proposed scenarios emerges in the medium term when it can be debated whether the longer-lead-time proposals, including offshore wind and modular nuclear, are prudent.

PCG (Not Covered) — PCG to spin off 49.9% interest in non-nuclear generation assets: In a move similar to those pursued by DUK with the sale of a 19.9% interest in Duke Energy Indiana and by FE with a sale of a minority stake in FE Transmission, PCG announced that it plans to create a separate entity called Pacific Generation, which will house the Company's non-nuclear generation assets. PCG will maintain a 50.1% interest in the new operating company and the remainder would be sold to one or more investors that are yet to be identified. The proposal will require CPUC approval and can be seen as an alternative to a potentially dilutive equity issuance (as it was in the case of DUK and FE). The proposed company would have a $3.5B rate base and 5.6 GW of generation capacity and would exclude the 2.24 GW Diablo Canyon nuclear facility that is currently in the midst of being extended through a loan from the state of CA and a potential grant from the DOE.

EIX — EIX faces lawsuits from residents following Fairview Fire: Multiple families in CA filed lawsuits against SCE alleging the utility failed to de-energize its lines resulting in the Fairview Fire. The fire is 98% contained but has burned ~28K acres and resulted in two deaths. The investigation into the cause of the fire is ongoing. As is required in CA, EIX submitted an Electric Safety Incident Report (ESIR) to the CPUC, notifying the regulator that circuit activity occurred close in time to the report time of the fire. CA utilities must submit a report in certain instances, including when significant public attention has been focused on such events, and the submission is not an admission of guilt. Parties filing the lawsuit claim that SCE failed to de-energize the lines despite a CPUC authorization to do so. This is the second instance this year of SCE being sued by homeowners following a wildfire, the first one being in Orange County following the Laguna Niguel fire.

EIX, SRE — ALJs in the CoC proceedings issue a PD, and the CPUC Chair issues an alternate PD: In response to an off-cycle CoC filing by SRE, EIX, and PCG for relief from the cost of capital mechanism because in the 12-month period from October 2020 to September 2021 the difference between the Moody's utility bond rates and the benchmark exceeded the 100 bps trigger and would lead to an automatic ROE reduction for the utilities. The utilities requested the CPUC to reject the formulaic ROE adjustment in light of the hardships caused by COVID-19 and the unprecedented Fed intervention that led bond yields to decline by as much as they did. In the PD, the assigned ALJs conclude that the CA utilities met the threshold requirements justifying the filing of the off-cycle CoC applications and that the extraordinary circumstances of the pandemic do warrant a departure from the normal CoC mechanism but do not propose alternate CoC but rather recommend the opening of a second phase to determine the fair and reasonable CoC in 2022.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

In an alternate PD, President Reynolds differs from the ALJs and proposes that the CoC remain at the levels previously approved (Decision 19-12-056) and proposes that the proceedings be closed.

Figure 1 - Summary View of ROE Comparisons

Utility	ROE for 2022 previously Approved	ROE for 2022 based on CCM Adjustment	ROE requested in off-cycle Applications
SCE (EIX)	10.30%	9.72%	10.53%
SDG&E (SRE)	10.20%	9.62%	10.55%
PG&E (PCG)	10.25%	9.67%	11.00%

Source: Regulatory Filings, KBCM Estimates

AGR — Tentative trial date announced for NECEC review: A Cumberland County District Court Judge has tentatively scheduled a trial for next April for a lawsuit related to the stalled NECEC pipeline. The schedule comes after the ME Supreme Judicial Court, in a unanimous decision, recently ruled that the referendum retroactively banning the NECEC project would be unconstitutional if the work performed on the pipeline is enough to give AGR vested rights in it before the referendum was held and the project should be allowed to resume under the terms of the agreement. If the District Court decides that NECEC had established vested rights, the project will likely move forward — although not without additional challenges, including that related to whether AGR had the appropriate permit for using a stretch of land and whether using that stretch would constitute a "substantial change" to state land, in which case it would need two-thirds approval of the state legislature.

SO — SO reaches a settlement with MEAG with respect to certain cost-sharing provisions in the joint ownership agreement; projects exposure to pending litigation with Oglethorpe and Dalton: SO reached an agreement with the Municipal Electric Authority of Georgia (MEAG) to resolve the dispute regarding the interpretation of the cost-sharing and tender provisions of the Vogtle Joint Ownership Agreement. As part of the cost-sharing provisions of the Vogtle JOA, GP would bear responsibility for up to $180M of qualifying construction costs of the other owners (including MEAG, Oglethorpe, and Dalton) of Units 3 and 4 if there are certain increases in the qualifying constructions costs for Units 3 and 4. The agreement also includes a provision for the other owners to tender a portion of its ownership interest to GP in exchange for GP paying 100% of the said owners remaining share of total construction costs in excess of the level that triggers the cap. As a result of the settlement, MEAG will not exercise its tender option and SO will pay $76M for a portion of MEAG's construction costs based on the current project capital cost forecast and 20% of all incremental construction costs above current projections. The settlement does not resolve similar lawsuits with Oglethorpe and Dalton. However, SO is estimating a further $165M pre-tax charge to income for the pending disputes with OPC and Dalton.

NWE — MT PSC approves interim rate increase: The MT PSC issued an order approving interim rates effective October 1. NWE will be able to increase electric and gas rates by $29M and ~$2M, respectively. In the same order, the PSC denied NWE's request to pass through 2022 property taxes and temporarily approved NWE to increase its PCCAM base costs to $200M, up from the current $139M. We recently met with NWE management and came away with the impression that NWE is optimistic about the regulatory process underway. As a reminder, NWE is seeking revenue increases of $171M and $23M for electric and gas operations, respectively. The rate increases are premised on a 10.6% ROE, 48.02% equity layer, and a 2021 year-end test year. 42% of the ask is flow-through costs for the PCCAM and property tax tracker, and the revenue requirement includes ~$4M associated with Colstrip Unit 4. NWE is requesting final rates to go into effect in May 2023.

PEG — NJ BPU approves the route of transmission line for Ocean Wind 1: The NJ BPU approved the proposed route that will connect the 1,100 MW Ocean Wind 1 project to the grid. The line will run through Ocean City, NJ, and connect the wind farm to the site of the former B.L. England Generating Station. PEG and Orsted are co-developing the project, which is expected to come online in late 2024. The project will use the GE Haliade-X 12 MW turbines and is ~15 miles off the coast of southern NJ and will have up to three offshore substations and export cables connecting the output to infrastructure in Ocean and Cape May counties.

IdaCorp, PacifiCorp (Not Covered) — Boardman to Hemingway transmission line receives site certificate: The proposed 300-mile 500 kV Boardman to Hemingway (B2H) transmission line received a site certificate from the OR's Energy Facility Siting Council and potentially sets the stage for a 2023 construction start (subject to additional permits from the OR and ID PUCs). The project is expected to cost anywhere between $1B to $2B and is expected to be operational in 2026 — a decade from when the project received a final EIS (environmental impact statement). The B2H transmission project is just one of nearly a dozen such projects that we are tracking in the western region where the need for transmission is very high to make up for the increased power demand from net in-migration into the mountain west states and the energy transition away from coal. The project is intended to be a bidirectional source of clean power (wind, solar and hydro) for the Pacific Northwest states in the winter months when their energy needs are at a peak and for the Mountain states in the summer when irrigation and air conditioning demand lead to peak power demand. PacifiCorp, ID Power, and BPA are the owners of the project.

PNW — AZ Supreme Court ruling will allow a single Commissioner to investigate state utilities: The AZ Supreme Court issued a ruling that will permit a single ACC commissioner to open an investigation into state utility spending. The case was filed by former Commissioner Bob Burns, who wanted to determine if PNW had funded two of his fellow commissioners' campaigns. As a reminder, AZ commissioners are elected officials, and PNW later confirmed a donation in the 2014 election. The ruling is not expected to have any immediate impact, and PNW has announced that it would no longer fund any Commissioner races in the future. APS was a defendant in the lawsuit.

DUK — DUK set to launch four EV pilots in Indiana: DUK launched four electric transportation pilot programs in Indiana on October 1. The IURC approved the pilots in June and will use the pilots to gather knowledge around preferences, behaviors, and benefits of electrifying the transportation sector. The four pilots include an off-peak charging credit for residential customers, a commercial charger rebate for commercial customers that install at least four chargers, fleet advisory consultations to fleet managers contemplating a transition, and partial funding for an electric school bus pilot program. DUK will run the pilots for two years.

SO — Senior Management changes announced: SO announced that current Southern Power President Bill Grantham will become EVP of Commercial Strategy for SO effective November 1. He has served in his current role since May 2019 and first joined SO in 1989. Mr. Grantham’s role will be assumed by Robin Boren, who currently serves as SVP of Finance and Treasurer for SO. Ms. Boren has served in her current role since January 2019. She joined AGL Resources in 2009, which later merged with an SO subsidiary in 2011. The Company also announced changes within the Finance team following Ms. Boren's promotion.

EXC — PECO reaches settlement in PA gas rate case: PECO reached a multi-party settlement in the pending gas rate case for a $62M revenue increase. The increase includes a $55M net rate increase and a $7M resetting of the distribution system improvement charge. The settlement was silent on the ROE and capital structure and includes a rate and DSIC stay-out until March 2024. The interveners recommended revenue requirements of $49.3M and $6.2M, respectively. As a reminder, PECO sought an $82M rate increase on a 10.95% ROE and 53.41% equity on a rate base of $2.9B. The rate increase intends to cover gas main replacement programs and investments to comply with safety and reliability requirements. PECO's previous rate case was approved at a 10.24% ROE in mid-2021. A final order from the Commission is expected by the end of 2022, and new rates will likely go into effect in January 2023.

ETR — AR Governor appoints chair to PSC: Governor Hutchinson announced the appointment of Katie Anderson as Chair of the PSC. Ms. Anderson currently serves as an ALJ for the AR Workers Compensation Commission. The chair's seat became open with the recent resignation of Ted Thomas, and Ms. Anderson will serve the remainder of Thomas's term, which expires in January 2027.

POR, NEE — Wheatridge Renewable Energy Facility energized in OR: The Wheatridge Renewable Energy Facility began operations in OR as the first solar+wind+storage facility in North America. The 300 MW wind + 50 MW solar facility is paired with 30 MW of storage with a four-hour duration (120 MWh) to reduce intermittency. POR and NEE are partners in the project with POR owning a third of the wind output, and it purchases all the facility’s power from NEE. NEE’s NEER developed and operates the site, in addition to owning two-thirds of the wind output, and all the solar output and storage.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

KBCM EEI Schedule Tentative Agenda (All Times Eastern):

Sunday, November 13, 2022

12:00 PM — Eversource Energy (ES)
1:00 PM — CenterPoint Energy, Inc (CNP)
2:00 PM — Xcel Energy Inc. (XEL)
3:00 PM — Sempra Energy (SRE)
4:00 PM — WEC Energy Group, Inc. (WEC)
5:00 PM — Atlantica Sustainable Infrastructure plc (AY)
*Dinner — Dinner with Public Service Enterprise Group Incorporated (PEG)**

Monday, November 14, 2022

8:00 AM — Duke Energy Corporation (DUK)
8:45 AM — Avangrid, Inc. (AGR)**
9:00 AM — Pinnacle West Capital Corporation (PNW)
10:00 AM — Exelon Corporation (EXC)
11:00 AM — Edison International (EIX)
12:00PM — DTE Energy Company (DTE)
1:00 PM — NorthWestern Corp (NWE)
2:00 PM — American Electric Power Company, Inc. (AEP)
3:00 PM — Portland General Electric Company (POR)
4:00 PM — FirstEnergy Corp. (FE)
*Dinner — Dinner with NorthWestern Corp (NWE)**

Tuesday, November 15, 2022

7:00 AM — Entergy Corporation (ETR)
7:00 AM — Southern Company (SO)
8:00 AM — Ameren Corporation (AEE)
9:00 AM — CMS Energy Corporation (CMS)
10:00 AM — Consolidated Edison, Inc. (ED)
11:00 AM — Avista Corporation (AVA)
11:00 AM — Otter Tail Corporation (OTTR)

**Dinner event.*
***30-minute meeting.*

Energy: Electric Utilities

Midweek Thoughts — TX ALJ Disappoints (SRE, CNP), Also: DUK, EIX, EXC and It's a Wrap for 2022

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

This week, the TX ALJ issues a PD in Oncor's electric rate case; DUK completes minority stake sale of DEI; SIP announces an SPA with RWE for Port Arthur capacity; the CA governor appoints a new commissioner and reappoints another to the CPUC; and the D.C. Council confirms the third commissioner to the PSC. We review some noteworthy research pieces from 2022. In particular, we discuss the CA net metering decision, the regulatory proceedings related to imports of solar panels and modules, and the Inflation Reduction Act of 2022.

Industry News and News from Companies in Our Coverage

SRE — ALJ issues PD in Oncor's TX electric rate case: The ALJ issued a PD recommending a $60M net revenue decrease, premised on a 9.3% ROE, 42.5% equity, and a $17.8B rate base. The recommended ROE is below SRE's currently authorized 9.8% ROE and in line with Staff's recommendation. At the same time, the recommended equity layer of 42.5% is in the middle of Staff's recommendation and SRE's request, and is maintained at the currently authorized level. While we are yet to see the full ALJ math, it appears that the delta between Oncor's request and the ultimate revenue decrease recommendations is largely driven by the lower ROE and equity layer. The PD dashes hopes of improved equity layer for Oncor and does not appear to be overly constructive on its face — either for Oncor and its parent SRE or other utilities in the state, notably CNP, which will be filing a rate case in 2023. If the PD is adopted as written, we expect investor sentiment on TX regulatory environment to take a hit in the NT.

As a reminder, Staff filed testimony recommending a $21M revenue increase, premised on a 9.3% ROE and a 40% equity layer, compared to Oncor's ask for a $251M net increase ($287M increase in distribution rates offset by a $36.5M reduction in transmission rates), premised on a 10.3% ROE and a 45% equity layer. Oncor's last rate case was settled in 2016 at 9.8%, 42.5% equity layer.

DUK — DUK completes minority stake sale of DEI: DUK and GIC completed the second tranche of the ~$2B minority sale of DEI for a 19.9% minority stake. The remaining 8.85% stake for $1.025B was expected to close no later than January 2023. DUK and GIC completed the transaction for the first 11% interest in 3Q21. As a reminder, the sale was first announced in January 2021 and eliminated DUK's equity needs for its five-year capital plan. See our note on the initial deal here.

SRE — SIP announces an SPA with RWE for Port Arthur capacity: SIP and RWE Supply & Trading executed a 15-year sale and purchase agreement for ~2.25 MTPA of LNG from SIP's Port Arthur LNG (TX) Phase 1. According to our estimates, ~9.6 MTPA of the 13 MTPA Port Arthur Phase 1 are under an SPA, which includes agreements with ConocoPhillips, INEOS, and ENGIE. For Phase 1, SRE is working on turning the HOAs into SPAs before taking an FID (could be as early as 1Q23) and securing project financing. See our notes from the EEI conference, where SRE discussed its LNG plans in detail.

SRE, EIX — New commissioner appointed, and another reappointed at CPUC: Governor Newsom appointed Karen Douglas to the PUC, who is likely to replace Commissioner Clifford Rechtschaffen at the end of his term in January 2023. Ms. Douglas has served as a senior advisor for energy in the Governor's office and was a CA Energy Commission member from 2008-2022. The Governor also reappointed John Reynolds after he was appointed on an interim basis in 2021 to a term set to expire in January 2023. With the CA NEM and costs of capital proceedings completed, the most pressing issues in front of the CPUC from our vantage point are matters regarding resource adequacy and several outstanding rate cases, including SRE's SDGE and SoCal Gas.

EXC — Council confirms the third commissioner to DC PSC: The Council of the District of Columbia confirmed D.C. Mayor Muriel Bowser's appointee, Ted Trabue, to the D.C. PSC. Mr. Trabue's term will be through June 2026. The confirmation fills the final seat of the three-member commission and one that has been open since November 2021. Mayor Bowser (D) was required to appoint a nominee with certain qualifications after the D.C. Council passed several acts requiring commissioners to have specific experience. The combination of actions requires one commissioner with experience in electric grid modernization and renewable energy integration, and a second member with experience in consumer protection, while the qualifications for a third commissioner were not specified.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.
KeyBanc Capital Markets Inc. | Member FINRA/SIPC

Trabue brings expertise in EE and renewable energy programs. PEPCO D.C. is scheduled to file its second MYRP in 1H23 after agreeing to a three-year rate increase in 2021.

This week, we review some noteworthy events from the past year:

Alternative Energy: In Line with Expectations, CPUC Unanimously Passes Revised NEM 3.0: The CPUC voted unanimously to approve the revised NEM 3.0 PD.

- The CPUC voted unanimously to approve the revised NEM 3.0 PD as written with a proposed tariff structure aimed at incentivizing storage attachments. The adopted PD is largely the same as the revised PD from November 2022, which made several concessions to the solar side of the docket, including establishing a longer transition path and avoiding the grid charge fee. The adopted outcome affirms four findings from the NEM 2.0 Lookback Study and adopts export compensation rates based on ACC values averaged across days in a month and, for the first five years, based on a nine-year schedule of values from the most recently adopted ACC. The decision also adopts the ACC Plus adder as a glidepath based on a cents per kWh amount and stepped down by 25% per year to zero, but is available to enrolled customers for nine years. The PD uses high differentiated time of use (TOU) rates currently available to all ratepayers and contains equity considerations for low-income households.
- After the original PD was issued in December 2021 and was widely criticized by the solar industry as overly punitive, the CPUC reopened the record and sought further comments on three areas of the original PD, with particular scrutiny directed to the glidepath approach. We discussed the original PD and its ramifications here and here, and viewed the original proposal as a significant departure from the prior net metering policy.

The Tide That Lifts All Boats: Renewable Energy Sentiment Reset: The Inflation Reduction Act of 2022, which includes $370B in clean energy/climate provisions, was signed into law.

- The passage of the IRA was a surprise development that borrowed many provisions from the rejected Build Back Better bill. Important components of the bill include extending the existing ITC and PTC through 2025, expanding solar projects to become eligible for PTC, introducing technology-agnostic PTCs for zero-emission generation past 2025, providing credits for nuclear generation, incentivizing domestic renewable manufacturing via tax credits, mandating a15% minimum corporate tax rate, and offering tax credits to individuals for EVs and EE home retrofits.
- The IRS has issued initial high-level guidance on labor protections and sustainable aviation fuel credits. The Dept will issue a notice of proposed rulemaking in March with proposed guidance on the critical minerals and battery components requirements. In 2023, the IRS will continue working toward issuing guidance on tax incentives related to energy generation, credit enhancements, homes and buildings, consumer vehicle credits, manufacturing credits, and credit monetization.

Riding the Solar Coaster: AD/CVD Investigation, Legislation, and Beyond — Expert Call Takeaways and Reference Guide: The Department of Commerce initiated an investigation into the four SE Asian countries and released preliminary determinations ruling in the affirmative in the AD/CVD inquiries.

- The U.S. Department of Commerce agreed to a petition filed by Auxin Solar to investigate whether solar cells/modules made in Cambodia, Thailand, Vietnam, and Malaysia are in effect using parts originating in China and thus bypassing the antidumping/ countervailing duties in place on Chinese imports. The DoC spent much of 2022 building up a factual record and applying the law to the facts leading up to issuing a preliminary determination on December 2. The preliminary findings provided a status on two supplies from each of the four countries under investigation: Cambodia, Vietnam, Thailand, and Malaysia. The Department found both entities from Thailand (CSIQ and Trina Solar) to be circumventing the duties against China, neither Hanwha nor Jinko to be violators, and one each from Cambodia and Vietnam to be circumventing the antidumping duties against China. However, since some companies in Malaysia, Thailand, and Vietnam did not respond to the DoC's questionnaires, the Department will follow precedent to deem that they are circumventing.
- A final determination in the proceedings (A-570-979) is expected by January 26, 2023, with the optionality of extending the deadline to April 3. Still, the President's EO imposing a two-year moratorium through mid-2024 on additional tariffs will mean that there will be no immediate impact from the final determinations — and provide the industry time to adjust its supply chains. With a combination of the IRA, the presidential EO, and the benefit of time that the EO affords, the industry will get the breathing room to find alternate suppliers, for existing suppliers to clean up the supply chains to satisfy the DoC, and for the plethora of tax credits in the IRA to spur restoring of solar investments to the U.S.

Summary Investment Thesis and Valuation

Investment Thesis

As a pure-play regulated utility, Exelon has refocused its core operations around an advantaged T&D portfolio with leverage to infrastructure renewal efforts across an aging urban network and long-term electrification tailwinds. Years of regulatory engagement have yielded multi-year plan frameworks in MD and DC amid improving regulatory outcomes across both jurisdictions, plus the prospects of ROE normalization in IL's upcoming ratemaking transition. We see earned ROE upside under both and incremental to the company's already attractive 6-8% EPS growth. EXC's projected 8.1% rate base CAGR screens as top tier, with upside potential as grid needs increase due to incremental renewables, broader economy electrification, and growing system resiliency/reliability needs.

Valuation

We are updating our Dec'23 price target to $49, based on an SOTP valuation using our 2024 estimates. We use an average 19.5x P/E multiple for the regulated utility and corporate business segments.

Investment Thesis, Valuation and Risks

Exelon Corp. *(Overweight; Price Target: $49.00)*

Investment Thesis

As a pure-play regulated utility, Exelon has refocused its core operations around an advantaged T&D portfolio with leverage to infrastructure renewal efforts across an aging urban network and long-term electrification tailwinds. Years of regulatory engagement have yielded multi-year plan frameworks in MD and DC amid improving regulatory outcomes across both jurisdictions, plus the prospects of ROE normalization in IL's upcoming ratemaking transition. We see earned ROE upside under both and incremental to the company's already attractive 6-8% EPS growth. EXC's projected 8.1% rate base CAGR screens as top tier, with upside potential as grid needs increase due to incremental renewables, broader economy electrification, and growing system resiliency/reliability needs.

Valuation

We raise our Dec'23 price target to $49/share from $45/share. Our valuation is based on a sum-of-the-parts analysis using our 2024 forecasts. We use an average 19.5x P/E multiple for the regulated utility and corporate business segments, which is at a modest premium to peers given the constructive regulatory setup and robust electrification investment opportunity. The higher price target is due to increased peer average multiples.

Risks to Rating and Price Target

- Regulated electric and gas utilities are subject to strict federal and state regulation, including determinations of allowed revenues. Any change to regulations may cause future earning power to differ materially from current expectations.
- ComEd currently operates under a deferred prosecution agreement (set to end in 2023) due to past lobbying practices in Illinois. These legacy issues bring up the potential for negative headline risk if new information comes to light.
- The company possesses attractive leverage to growing electrification trends. However, if these investments develop slower than we anticipate it could lead to a weaker earnings outlook than we currently forecast.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its

December 27, 2022

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: DUK, CMS, PEG, EXC, D, ED, ETR, CEG, AGR, ES

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

In the week ahead, we expect an NCUC decision on the 2022 NC Carbon Plan. In other news, CMS reaches a constructive multiparty settlement in MI electric rate case; PSC issues a $48M revenue increase in D's UT natural gas rate; FERC issues two orders in SERI proceedings; MA utilities urge DPU to deny AGR's request to dismiss the Commonwealth Wind PPA proceedings; Staff files surrebuttal testimony in DEP's SC electric rate case; ED nearing a joint proposal in settlement discussions; PJM delays publishing the results of the 2024/2025 capacity auction; and winter weather stresses the grid.

Holiday Reading

If you are looking for some thematic utility and clean energy reading for the holidays, we have recommendations — Electric Utilities: Industry Primer, From Microgrids to Microutilities - How DERs Are Transforming the Grid, Entering the Nuclear Renaissance, Seeing the Forest for the Trees: Physical Climate Risks to Drive Sector LT Beyond ESG and Elections

Regulatory Calendar

DUK — NCUC decision on the 2022 NC Carbon Plan is due by December 31: The NCUC is expected to issue the decision before year-end, which will guide DUK's NC IRP and be incorporated into the 2023 SC IRP. DUK's proposed order includes plans to procure 1,200 MW of standalone solar in 2022, 2,350 MW of storage in 2023-2024, 600 MW of co-located storage, 1,000 MW of standalone storage, 600 MW of onshore wind, 800 MW of CT, and 1,200 MW of CC. DUK also proposes spending $440M to develop technologies, including SMR, new pumped storage, and offshore wind. Throughout proceedings, the parties, including DUK, have presented 11 portfolios to the Commission that vary in the markup of the technologies and in timing. The parties are mostly in agreement on the short-term targets, and DUK is requesting that the NCUC approve the proposed NT approach (through 2026) while debating the longer-lead-term proposals and possible technologies during future biannual carbon plan filings. The filing is a result of HB 951, which required DUK to file a carbon plan before the end of 2022 that would outline its path to 70% carbon reduction by 2030. The law also provides the Commission leeway to push back the deadline by two years or longer if more time is needed to bring new nuclear and wind capacity online or to maintain the adequacy and reliability of the grid. Read more here.

Recent Developments for Companies Under Our Coverage

From our midweek: This week, the government funding bill proposes to increase spending in renewables; interveners file testimony in NWE's MT electric and gas rate cases; the GA PSC approves GP's electric GRC settlement with minor modifications; EXC files a DE rate case; ETR's SERI files for a rehearing of a FERC order investigating the complaint related to Grand Gulf investments; the SCC adopts the hearing examiner's recommendation for a $28M rate increase in APCO's 2020 rate case reconsideration; ETR LA files a $9.6B grid hardening and resilience plan; ECA LNG facility receives approval to send U.S. natural gas to Mexico to re-export as LNG; the FL Office of Public Counsel appeals the PSC decision in FPL and DEF Storm Protection Plans; the ME PUC denies the issuance of a one-time $75 credit by utilities to ratepayers; OR will ban sales of new cars with ICE by 2035; the BOEM releases a draft EIS for AGR's two-phase 2 GW offshore wind project; the NY State Climate Action Council approves a Scoping Plan to meet clean energy goals; reply comments were filed in FERC's interconnection reform NOPR; and NERC publishes its 2022 Long-Term Reliability Assessment report highlighting near-term concerns.

CMS — CMS reaches a constructive multiparty settlement in MI electric rate case:

- CMS, MI PSC Staff, and other interveners entered into a constructive settlement for a $161M revenue increase, including $6M for certain 2021 distribution deferrals. The parties agreed to a 9.9% ROE and 50.75% equity, the ROE in line with a series of recent MPSC rate case outcomes. In reply briefs, MI PSC Staff recommended a $140M net revenue increase, premised on 9.70% ROE/51.0% equity, while CMS sought an updated net revenue increase of $287M based on a 10.25% ROE/51.5% equity. CMS has requested rates to be effective March 1, 2023.

- Settling parties recommend that CMS be allowed to implement a pension and OPEB deferral mechanism that should help to reduce volatility in annual earnings. This rate case sets a band of $30M for pension expenses and $65.7M for OPEB beyond which a reg asset or liability will be recorded.
- The settlement includes a recommendation that the Commission approves CMS's proposed plans for decommissioning of coal units Karn 1 and 2, amortization of the related regulatory assets, and the amortization of the ash disposal costs for the Karn units as well as seven other units that the company decommissioned in 2016. The costs of decommissioning the Karn units will be amortized through 2031 (beginning in 2024) and the coal ash disposal costs for all the units will be amortized over 10 years starting in 2024.

D — PSC issues an order in D's UT natural gas rate: The UT PSC issued an order approving a $48M revenue increase, premised on a 9.6% ROE and 51% equity. The PSC also allowed the continuation of the infrastructure replacement and rural expansion trackers, which authorize $85M and $24M into base rates. The new rates will go into effect on January 1, 2023. The order compares to Questar's revised request for a $67M rate increase based on a 10.3% ROE and 53.21% equity. D must file a rate case every three years as part of the infrastructure replacement adjustment tracker.

ETR — FERC delivers two orders in SERI proceedings, dealing with the sale-leaseback issue and the treatment of uncertain tax positions (dockets EL18-152 and ER18-1182): Both orders affirmed the previously issued ALJ decisions (see: decision 1 and decision 2) with some modifications.

- **On sale-leaseback treatment,** the FERC order calls on SERI to refund customers $149M and disallows $17M in annual lease payment collections on the prospective basis. Net of the existing MS settlement, the incremental refund would amount to $89M and the prospective annual impact would be $10M. In its press release, ETR noted that it disagrees with this part of the ruling and would seek a rehearing. The Company has also reaffirmed its 2023 guidance.
- **On the uncertain tax positions treatment**, the FERC order directs SERI to compute customer refund taking into account IRS's 2015 ruling, which partially allowed some of SERI's tax positions. ETR has previously issued a one-time $25M refund associated with the 2015 IRS ruling, and has been providing ongoing rate base credit for ADIT related to the successful portion of uncertain tax position. Therefore, ETR appears to already be satisfying the remedy required by FERC in this order. The company is planning to file a compliance report supporting this view, which FERC will address separately.

ES, AGR — Utilities urge DPU to deny AGR's motion to dismiss the Commonwealth Wind PPA proceedings: As we have written before, AGR has filed a motion with the DPU to dismiss the proceedings reviewing the Commonwealth Wind PPAs since the terms no longer allow it to develop the project economically. AGR is asking that the current proceedings be dismissed and the state conduct an RFP where Commonwealth Wind can re-bid for the 1,200 MW of capacity. The utilities, including ES's NSTAR Electric, are requesting that the DPU deny the motion to dismiss since the PPAs were negotiated following a full and fair process and dismissing the process at this late stage would undermine the process that the state has established to encourage offshore wind development. Mayflower Wind (partly owned by Shell and EDP), which also bid into the same RFP that AGR is referring to, filed an answer to AGR's motion to dismiss. Mayflower remains committed to continuing to work to develop the project in line with the timelines in the PPA but recognizes that AGR is not alone in facing the pressures of inflation and higher costs of financing. Mayflower requests that the DPU allow time for discussions among interested parties before making a final decision on the Mayflower Wind PPAs.

DUK — Surrebuttal testimony in DEP's SC electric rate case was filed last week: In surrebuttal testimony, Staff raised the recommended revenue increase to $48M, from ~$40M, while maintaining a 9.4% ROE and 52.43% equity. In rebuttal testimony, DEP requested an $88.5M revenue increase ($90M previously) premised on 10.2% ROE and 53% equity. The delta between Staff and DUK results from lower ROE, cost differences in the coal ash adjustments, and adjustments to DUK's deferred costs. DEP is proposing accelerating the return of deferred income tax benefits, resulting in a $21M adjustment, and yielding a net $67.5M revenue increase. DEP proposes layering in the rate increase over two years, $52.5M in RY1 and $15M in RY2. The main drivers for the rate increase are capital investments since the last rate case and the recovery of costs associated with coal ash pond closures. In the last SC electric rate case in 2018, DEP received a $41.5M rate increase based on a 9.50% ROE/53% equity. Evidentiary hearings are set to begin on January 9. A final decision is expected by March 1, 2023, with rates effective April 1, 2023.

ED — Discussions continue, and a settlement may be imminent: In a status update, ED noted that parties, including Staff, are close to reaching a settlement with only a few issues outstanding. ED does not feel the need to request an extension to the suspension date. The ALJ responded that ED would need to file an extension of the suspension period by Dec. 23 with either a 30-day extension filing or file a joint proposal by Jan. 13. The NY PSC recently issued an extension to the suspension of proceedings through April 25, 2023. ED and Staff began settlement discussions in July. As a reminder, ED is seeking rate increases of $1,038M and $402M for its electric and gas utilities, respectively, and has included illustrative rate increases for 2024 and 2025 (electric: $744M and $615M, respectively; gas: $205M and $176M, respectively) that are most likely being reviewed in the settlement discussions. Staff recommended a proposed rate increase of $299.5M for electric and $165.4M for gas based on an 8.80% ROE (vs. ED's 10.00% request). ED requested rates to go into effect on Jan. 1, 2023, rates will be made whole for the period from January 1, 2023, to when the Commission sets new rates.

PEG, EXC, D, CEG — PJM delays releasing results of the 2024/2025 capacity auction: PJM did not receive offers from all the planned generation that it had factored into its model, thus creating an artificial shortage, especially in the local deliverability area

(LDA) covered by EXC's DPL and thus yielding a much higher clearing price than was anticipated. According to the PJM, additions of large and/or intermittent units in smaller LDAs like DPL-S can result in an increase in the reliability requirement since capacity transfers would be required to account for times when those intermittent resources are not available. So what is the remedy? PJM will have to file with the FERC to seek approval to add tariff language that will prospectively allow it to exclude resources from the LDA reliability requirement if those resources do not participate in the auctions where the reliability requirement increases materially. If approved, the PJM would recalculate the reliability requirement excluding the planned resources that did not offer. The challenge here could arise from an ideologically tied 2-2 FERC given that Chair Glick is planning to leave his position possibly by the end of the year.

Winter Storm Elliot and cold weather stress the grid: At the peak, ~1.7M customers were without power across the country due to the heavy snow and strong winds from Winter Storm Elliot and extreme winter weather driving up demand. The seasonally cold weather stressed the grid by driving demand to record levels across the country, resulting in several utilities calling for energy conservation. CNP, D, and ED called for customers to conserve energy during the cold weather. The SPP issued an Energy Emergency Alert 1 as the load exceeded a new record of 47 GW; the previous record was ~44 GW. We note that an EEA 1 indicates that the operator can currently meet demand, but reserves could be at risk if conditions worsen. PJM needed to issue an EEA Level 2, requiring customers across its territories who have agreed to curtail power during these times to do so, which is one of the last steps before implementing rolling blackouts. Customers in the Southeast seemed to be affected the most, as DUK had to implement rolling blackouts for NC customers, and the TN Valley Authority utilized rolling blackouts to shed load. ERCOT held up relatively well, even though the load reached ~80 GW and power prices spiked to $3,700/MWh before more thermal and solar came back online. In NE, gas prices reached $30/mmBtu, but the region was able to meet customer demand. The cold weather across most of the country is expected to retreat later this week. In its 2022/2023 winter assessment, NERC highlighted adequate resources this winter but noted that prolonged extreme weather could result in reliability risks in regions across the country. The regions at risk included TX, NE ISO, and MISO, and are at risk due to myriad factors, including the retirement of fossil fuel generation in MISO, lack of equipment retrofitted for winter in TX, and the LNG constraints in NE.

Sophie Karp (917) 368-2361 / sophie.karp@key.com

Energy: Electric Utilities

Midweek Thoughts — NWE, SO, EXC, ETR, SRE, NEE, DUK, AGR, AVA, POR, ED, AEP

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

This week, the government funding bill proposes to increase spending in renewables; interveners file testimony in NWE's MT electric and gas rate cases; the GA PSC approves GP's electric GRC settlement with minor modifications; EXC files a DE rate case; ETR's SERI files for a rehearing of a FERC order investigating the complaint related to Grand Gulf investments; the SCC adopts the hearing examiner's recommendation for a $28M rate increase in APCO's 2020 rate case reconsideration; ETR LA files a $9.6B grid hardening and resilience plan; ECA LNG facility receives approval to send U.S. natural gas to Mexico to re-export as LNG; the FL Office of Public Counsel appeals the PSC decision in FPL and DEF Storm Protection Plans; the ME PUC denies the issuance of a one-time $75 credit by utilities to ratepayers; OR will ban sales of new cars with ICE by 2035; the BOEM releases a draft EIS for AGR's two-phase 2 GW offshore wind project; the NY State Climate Action Council approves a Scoping Plan to meet clean energy goals; reply comments were filed in FERC's interconnection reform NOPR; and NERC publishes its 2022 Long-Term Reliability Assessment report highlighting near-term concerns.

ICYMI

From Microgrids to Microutilities — How DERs Are Transforming the Grid: Recently, we hosted a Spotlight event dedicated to the ongoing advancements in the distributed energy resources (DERs) space, and related regulatory, technical, and operational challenges. In this note, we present relevant background and key takeaways from the virtual summit.

Industry News and News from Companies in Our Coverage

Omnibus spending bill includes funding for clean energy and renewables: The $1.7T funding bill currently being debated in Congress provides ~$47B to the Department of Energy. Of that, ~$16B will be for non-defense activities, including ~$3B allocated to the DOE's Office of Energy Efficiency and Renewable Energy (EERE). The ~$260M year-over-year increase will accelerate the EERE's efforts in EV technologies, hydrogen R&D, renewable generation resources, and renewable grid integration. The bill also includes $890M toward carbon capture and storage projects, $1.8B for continued funding of advanced reactor projects and a HALEU program, and $89M for the recently established Office of Clean Energy Demonstration, which works to deploy clean energy projects at scale. Notably, the bill did not include funding to increase the domestic production of electric transformers. Both chambers of Congress will vote on the bill before Dec. 23.

NWE — Intervenor testimony filed in NWE's MT electric and gas rate cases: The MT Consumer Council recommends $66.7M and $6.7M revenue increases for electric and gas, respectively, both premised on a 9% ROE and 48.02% equity. The Council also recommends that the PSC reject the reliability rider, wildfire mitigation rider, technology rider, and the NWE proposed PCCAM adjustments, which the Council believes would inherently shift more risks to the customers or are controllable costs that do not require trackers. This compares to NWE's request for revenue increases of $171M and $23M for electric and gas operations, respectively, based on a 10.6% ROE, 48.02% equity, and a YE21 test year. The main factors driving NWE's request are the recovery of ~$835M of capital invested in the electric segment and $267M in the gas operations. NWE proposed several contemporaneous recovery mechanisms for future investments, including a reliability rider and an enhanced wildfire mitigation plan rider to reduce regulatory lag. The revenue requirement also includes ~$4.2M associated with Colstrip Unit 4. 42% of the total ask are flow-through costs for the PCCAM ($68.1M) and a property tax tracker ($13.9M). Hearings are scheduled for April.

SO — GA PSC approves settlement in GP's electric GRC with minor modifications: Earlier this week, the PSC voted to approve GP's electric GRC settlement (read more here) with modifications. The PSC approved a 9.5-11.9% earnings-sharing band and voted to maintain the sharing allocation set in the 2019 rate case for earnings above the top end of the range. 40% of the over-earnings will go toward reducing regulated assets, 40% to customers, and 20% to be retained by SO, which compares to the settlement for 70%/10%/20%, respectively. The three-year rate plan will go into effect January 1, 2023, with a cumulative rate increase of $996M

over the 2023-2025 period ($215.7M in 2023, $376.5M in 2024, and $403.3M in 2025). The PSC also approved a 10.5% ROE and 56% equity layer. As a reminder, GP's initial request sought a $1B revenue increase over three years ($852M in 2023, $107M in 2024, and $45M in 2025) based on an 11% ROE and 56% equity.

EXC — EXC files DE rate case: EXC's subsidiary Delmarva Power filed an electric rate case (Docket: 22-0897) with the DE PSC requesting a $59M net revenue increase, premised on a 10.5% ROE and 55.5% equity. The request includes a transfer of $12.4M of revenues currently recovered through the Distribution System Improvement Charge (DSIC). The driver for the rate increase, among others, is the recovery of $290M of investment in the distribution system. The Company is proposing adjustments, including leveraging a pro forma capital structure, utilizing an O&M inflation adjustment, and applying year-end treatment to its rate base. EXC expects new rates to go into effect on July 15, 2023. In its 2020 rate case filing, EXC received authorization for a $16.8M revenue increase, premised on a 9.6% ROE.

ETR — SERI files for a rehearing of a FERC order investigating the complaint related to Grand Gulf investments: SERI is requesting a rehearing on the docket or at least a clarification of FERC's November order that authorized an investigation into the Grand Gulf docket pending before the agency (docket EL 21-56-00). SERI contends that FERC's review is not based on the Commission's own precedent as the complainants were previously involved in a due process leading to the 2012 uprate and permitted full recovery of the costs after adequate time to investigate. As a reminder, the complaint filed by LA, AR, and NO PUCs alleges long-term mismanagement at Grand Gulf (the nuclear power plant owned by SERI) and requested $360M in customer refunds for replacement power purchased by utilities due to lower availability of GG from 2016-2020, as well as a refund of capital costs expended on various upgrades, including a 178 MW uprate dating back to 2012, which approximately cost $800M. The complaint specifies that further discovery is needed to determine the final price tag. FERC's order sides with the appealing parties and sets in motion the process for setting a hearing date and the appointment of a settlement judge. In the same order, FERC denied the request to modify the Unit Power Sales Agreement (UPSA) to provide for advance review of projects over $125M. The parties have 60 days (~end of January) to reach a mutual agreement before evidentiary hearings commence.

AEP — The SCC adopts the hearing examiner's recommendation for a $28M rate increase in APCO's 2020 rate case reconsideration: The SCC issued an order adopting the hearing examiner's recommendation for a $28M rate increase for the 2020 triennial earnings review (Docket: 2020-00015). AEP is required to refund customers for the excess collections ($41M in interim rates went into effect on Oct 1, 2022). The hearing examiner found that AEP earned a 7.945% ROE during the 2017-2019 review period, below the 8.72-10.12% ROE band. The hearing examiner also recommended that AEP be allowed to recover uncollected revenue for 1/1/21 to 9/30/22 using a separate surcharge over 16 months, which will be recalculated using the findings of the order. The order comes after the VA Supreme Court sent AEP's APCO 2020 rate case back to the SCC, ruling that APCO is allowed to record costs of early coal plant retirements as asset impairments. The ruling stems from a difference between AEP's and SCC's positions during the rate case involving the treatment of costs associated with the early retirement of certain coal and oil-fired plants. At the time, the SCC determined that APCO should have amortized the coal plants over 10 years from 2015 vs. impairing them in 2019. In its original ruling, the Commission concluded that no rate change was required as APCO had earned 9.48% for the 2017-2019 period, within the 8.72-10.12% ROE band prescribed by VA state law. AEP appealed the decision to the Supreme Court in March 2021.

ETR — ETR LA makes a $9.6B grid hardening and resilience filing: ETR's New Orleans sub filed a $9.6B resilience plan with the LA PSC. The plan includes two phases implemented over 2024-2033. ETR's filing relates specifically to Phase 1, which covers the first five years at an estimated cost of $4.6B. Over the 10 years, ETR is proposing 9,600 distribution and hardening projects, that will harden more than 269K structures and more than 11K line miles. Other elements include constructing dead-end structures for transmission lines, investing in the resilience of the ETR's telecom systems, and a vegetation management program. ETR is also requesting approval for the Resilience Plan Cost Recovery Rider for contemporaneous recovery of costs associated with the plan. The Company expects a decision in 4Q23. The LA filings follow the $1.5B grid hardening plan filed in NO in July, and ETR anticipates a similar fling in TX in 1H23. During the analyst day, ETR noted it would recommend ~$4B of resilience spending to regulators across its service territories and that the overall resilience plan calls for $15B of spending over the next 10 years.

SRE — ECA LNG facility receives approval to send U.S. natural gas to Mexico to re-export as LNG: The DOE issued an order allowing SRE to ship natural gas via pipeline from the U.S. to Mexico where SRE is building the Energia Costa Azul (ECA) LNG Phase 1 and Phase 2 facilities, as well as Vista Pacifico (potentially 3-4 Mtpa). Due to its geographic location on the West Coast of Mexico, ECA is well-positioned to connect to the Pacific Basin and Asia. The 3.25 Mtpa Phase facility is currently under construction, and SRE expects it to begin operations in mid-2025. SRE has signed 20-year SPAs with Mitsui and Total for a cumulative 2.5 Mtpa of offtake. Phase 2 of the facility is currently under development and will add ~12 Mtpa; SRE has signed an HOA and two MOUs for Phase 2. Vista Pacifico is in the early stages of development planning.

AGR — BOEM releases draft EIS for AGR's Park City and Commonwealth Wind projects: BOEM issued a draft EIS for AGR's two-phase offshore wind project: Park City Wind (804 MW) and Commonwealth Offshore Wind (1.2 GW). The projects share the same lease area, and AGR plans to develop Park City Wind before building Commonwealth. The draft EIS proposes alternative routes to minimize impacts on fisheries habitats. Park City Wind is expected to be in service in 2027, followed by Commonwealth in 2028 (per recent management commentary). The draft EIS for the two-phase offshore wind project starts a 60-day public comment period, which will inform the preparation of the final EIS. This is the sixth draft EIS issuance from the BOEM, with the first five being Vineyard Wind I (806 MW), South Fork (130 MW), Ocean Wind I (1,100 MW), Coastal Virginia Offshore Wind (2.6 GW), and Sunrise Wind (924 MW). The issuance of a final EIS will be the final step before a Record of Decision is issued by BOEM, at which point construction can begin. A ROD is usually issued within 30 days of a final EIS.

NEE, DUK — FL Office of Public Counsel appeals PSC decision in FPL and DEF Storm Protection Plans: The Office of Public Counsel filed an appeal with the FL Supreme Court regarding the PSC decision to approve DEF (Docket: 20220050) and FPL's (Docket: 20220051) storm protection plans. A procedural schedule for the appeal has been set, with the schedule ending on April 19. It is unclear what relief the OPC is seeking. The PSC previously approved the storm hardening plans with modifications to mitigate customer rate impacts. The Commission removed some proposed programs that it deemed were routine utility updates and not specifically related to storm resilience. The filings were made under a 2019 law that directs each FL utility to file a 10-year Storm Protection Plan, update the plan at least every three years, and direct the PSC to conduct an annual proceeding to determine the prudence of the SPP costs incurred to allow cost recovery through a rider separate from base rates. Both companies highlighted recent investments as part of the reason that the grid held up relative to prior storms during Hurricane Ian.

AGR — ME PUC denies issuance of one-time $75 credit by utilities to ratepayers: The ME PUC rejected the Office of Public Advocates' request for a one-time $75 bill credit to support low-income customers. The OPA filed the emergency petition for the credit for CMP and Versant customers participating in ME's Low-Income Assistance Program (LIAP), which the utilities could recover in its next rate case. Last year, the ME PUC did approve a one-time $90 bill credit following a joint filing by the OPA and the Governor's Energy Office. The PUC does not believe the annual rate relief is sustainable. Unlike last year's credit, which the ME State Housing Authority funded, the ME ratepayers would have funded the proposed credit.

AVA, POR — OR will ban sales of new cars with ICE by 2035: The OR Dept of Environmental Quality voted to approve the Advance Clean Cars II rule, requiring all vehicles sold in the state by 2035 to be either electric, plug-in hybrids, or hydrogen fuel cell vehicles. The ACC II will go into effect immediately with the first compliance requirement in 2026, necessitating 35% of new cars sold to be zero-emission vehicles. The rule requires annual step-ups, reaching 68% by 2030 and 100% by 2035. The ACC II builds on a previous rule set to end in 2025 and requires 7.8% of 2025 new-car sales to be zero-emission vehicles, which has been met by the state.

ED — NY State Climate Action Council approves Scoping Plan to meet clean energy goals: The Climate Action Council approved the Scoping Plan, which will now be submitted to the NY Governor by Jan. 1. The plan proposes a number of recommendations for electrification of transportation, buildings, and other industries. Recommendations include transitioning to nearly 100% zero-emission vehicles by 2050, the electrification of 85% of homes and commercial buildings, and scaling up clean energy resources. The Scoping Plan was required to be submitted by the end of the year per the Climate Leadership and Community Protection Act. The CLPCA was approved in 2019 and sets state targets for 70% renewable energy by 2030, 100% zero-emission electricity by 2040, and net-zero emissions statewide by 2050.

Reply Comments filed in FERC's interconnection reform NOPR; we reviewed reply comments filed by EEI and SEIA:

- EEI agrees with parties who propose moving to a first-ready, first-serve process for interconnection approvals. It is apparent to all parties by now, we believe, that speculative projects that enter and leave the queue render harm to projects that are otherwise ready to connect by delaying or blocking their interconnection to the network. EEI supports a significant withdrawal penalty, commercial readiness requirements, and financial assurances to bring more discipline into the interconnection process and reduce the backlog. Note that most ISO/RTOs have already moved to a first-ready, first-served model, with PJM being the most recent one. EEI recognizes that regional processes should be allowed to move forward and that FERC should allow for permitting variances in the compliance filings from the various RTOs (i.e., reasonable efforts standard should be allowed to stand vs. a regime of deadlines and penalties as proposed by the FERC). EEI is also cautioning against increasing the burden on developers of providing data and details including proposals on informational interconnection studies, alternative technologies, etc. as these would contribute to delays.
- SEIA also argues that informational studies will only provide limited value to the process and would place a drain on limited transmission-provider resources. SEIA also concurs that transmission providers should have flexibility in structuring cluster studies and determining timelines. SEIA maintains that commercial readiness requirements are commercially infeasible and unnecessary while raising consumer costs. Suppose FERC were to include a commercial readiness requirement in the final rule: in that case, it should require a demo of readiness via an affidavit certifying that the developer will sell energy, capacity, and ancillary services. Still, this attestation should not have to be paired with showing that equipment orders have been placed. A commercial readiness deposit would discriminate against IPPs, in SEIA's opinion, and withdrawal penalties should be replaced with at-risk deposits.

NERC publishes 2022 Long-Term Reliability Assessment report highlighting near-term concerns: NERC's Long-Term Reliability Assessment provided a 10-year outlook to highlight areas of concern and make recommendations to ensure reliable service. The report highlights reliability impacts as the country undergoes the energy transition. In the near term, NERC believes CAISO and MISO face a high risk of resource adequacy shortfalls during peak conditions from 2023-2027. In MISO, the report highlights a projected shortfall of 1,300 MW beginning next summer and growing throughout the 10-year outlook as more generation is retired than the amount of generation forecasted to come online. CAISO has been proactive in adding new resources, but the generation's variability could result in shortfalls ranging from 1-10 hours. The other regions in the U.S. meet the resource adequacy criteria, but TX, NE, the SPP, and the Western Interconnection could face elevated risks during extreme weather. Overall, the report highlights the integration of inverter-based resources, growth in distributed energy resources, generation retirements, fast transmission growth, and increased demand growth as contributing factors that could impact reliability over the next 10 years. The report found that ~88 GW of generating capacity will be retired across its footprint. In addition to investing in replacement capacity, NERC recommends making generation and transmission systems more resilient to extreme weather.

TRUCOST ENVIRONMENTAL SKYLINE EXPLANATORY NOTES

In a single graphic, you get a view of five different dimensions of corporate environmental impact:

- Trucost's Environmental Skyline is an assessment of the performance of an organisation across **six broad groups of environmental KPIs:** greenhouse gases, water, waste, air pollutants, natural resource use, and land/water pollutants. Environmental impacts are not just about carbon, and the Environmental Skyline gives you exactly that broader perspective, which is practically impossible to get without access to Trucost's data.

- Most organisations struggle to assess their direct impacts, let alone their indirect supply chain impacts. Trucost's Environmental Skyline offers an immediate evaluation of the **scale of direct and indirect environmental impacts** an organisation is causing, for each of the environmental KPIs listed above.

- Each organisation is assessed according to the scale of its different business activities for a particular year. Business activities are classified based upon North American Industrial Classification (NAICS) 6 digit codes. Each environmental KPI in the Environmental Skyline is offered as a **comparison to an industry benchmark**. The benchmark index of 100 represents average performance in the sector. The higher the index rating, the worse the performance of the organisation compared to its peers.

- Trucost rates an organisation's overall environmental performance by providing its **position in the benchmark**. The organisation is ranked against peers who share the same primary business activity at NAICS 3 digit code level.

- An organisation will have **a different Environmental Skyline each financial year**. The total number of organisations in the benchmark will increase as financial and environmental data becomes available for analysis by Trucost.

In essence, Trucost's Environmental Skyline offers a valuable assessment of an organisation's performance, covering issues that are near-impossible to assess without the use of Trucost's powerful data model and methodology.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: NWE, SO, DUK, D, AGR, AEP, DTE, SRE, EIX, EXC

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

In the week ahead, we are tracking proceedings in NWE's MT electric and gas rate cases, SO's GA rate case, and DUK's SC electric rate case. In other news, the SCC approved the settlement on the CVOW project; AGR filed to dismiss the Commonwealth PPA proceedings with the DPU; FERC published the order on the KY Power sale; DTE filed a petition for rehearing in the MI electric rate case; the permitting reform bill failed to pass in the Senate; FERC Chair Glick is expected to leave his position at the end of the year or in early 2023; FERC approved a NOPR to clarify the process for siting certain transmission projects; FERC asked NERC to evaluate physical security around the bulk power system; Staff and intervenors filed testimony in UIL's CT electric rate case; CPUC adopted a 25 bps reduction in the 2023 cost of capital proceedings; OH PUC approved the settlement in DUK's OH electric rate case; MD PSC adopted the settlement in Delmarva's MYRP; parties filed proposed orders in NC's NEM case; and the CA PUC issued two rulings supporting further hydrogen development.

ICYMI

AEP — FERC issued a ruling denying Section 203 approval for the sale of AEP's KY operations to Liberty. Read more here.

SO — GP reached a constructive GRC settlement with the GA PSC Staff just prior to the Commission's scheduled meeting on the docket. Read more here.

Regulatory Calendar

NWE — Staff testimony in NWE's MT electric and gas rate cases is due on December 19: NWE (read more here) is seeking revenue increases of $171M and $23M for electric and gas operations, respectively. The rate increases are premised on a 10.6% ROE, 48.02% equity, and a 2021 year-end test year. The main drivers are the recovery of ~$835M of capital invested toward its electric segment and $267M in the MT gas operations. NWE has proposed a number of contemporaneous mechanisms to seek interim recovery of future investments, including a reliability rider and an enhanced wildfire mitigation plan rider. The revenue requirement also includes ~$4.2M associated with Colstrip Unit 4, and 42% of the total ask are flow-through costs for the PCCAM and property tax tracker. Hearings are scheduled for April.

SO — The GA PSC's decision in GP's electric GRC is expected on December 20: The PSC is expected to vote on a recent rate case settlement (read more here) for a three-year alternate rate plan effective January 1, 2023. The settlement includes a revenue increase of $990M over the 2023-2025 period ($214M in 2023, $375M in 2024, and $402M in 2025) and is based on a 10.5% ROE and 56% equity. The settlement maintains the earnings-sharing mechanism, although the PSC will determine the range in the meeting. Items not settled include pricing for the Community Solar program, and the additional amount to be paid for export energy pursuant to the RNR tariff. As a reminder, GP's initial request sought a $1B revenue increase over three years (852M in 2023, $107M in 2024, and $45M in 2025) and based on 11% ROE and 56% equity.

DUK — Surrebuttal testimony in DEP's SC electric rate case is due on December 22: In rebuttal testimony, DEP lowered the revenue request to $88.5M from the $90M supplemental testimony. 10.2% ROE and 53% equity request is unchanged. The lower revenue request stems from adjustments in test year expenses. DEP is proposing accelerating the return of deferred income tax benefits, resulting in a $21M adjustment, and yielding a net $67.5M revenue increase. DEP proposes to layer in the rate increase over two years, $52.5M in RY1 and $15M in RY2. DUK's request compares to Staff's recommendation for a ~$40M revenue increase premised on a 9.4% ROE and 52.43% equity. The delta can be attributed to the lower ROE, cost differences in the coal ash adjustments, and adjustments to DUK's deferred costs. The main drivers for the rate increase include capital investments since the last rate case and the recovery of costs associated with coal ash pond closures. In the last SC electric rate case in 2018, DEP was granted a $41.5M rate increase based on a 9.50% ROE and 53% equity. DUK requests a decision by March 1, 2023, with rates effective April 1, 2023.

For analyst certification and important disclosures, please refer to the Disclosure Appendix.

Recent Developments for Companies Under Our Coverage

From our midweek: This week, the WA UTC approved AVA's WA MYRP; the BOEM released a draft EIS for D's CVOW (2.6 GW) and ES's Sunrise Wind (924 MW) offshore projects; FERC's role in the transmission siting is on the upcoming Open meeting agenda; FERC Staff issued an Environmental Analysis on the proposed Cameron Expansion; settlement discussions commenced in ETR's TX GRC; WEC introduced 2023 guidance, and DTE and Stellantis announced a 400 MW solar partnership.

D — SCC approved the settlement on the CVOW project: The VA SCC approved the settlement between D and interveners to replace the performance guarantee in the CVOW approval with a cost-sharing approach for capital costs exceeding the budget and includes an enhanced SCC review of operating performance. The issue arose when the SCC ruled that D could not pass the cost of procuring replacement power should the capacity factor at CVOW fall below 42% on a three-year rolling average. As part of the settlement, D will agree to share 50% of all costs in the range of $10.3B-$11.3B, and shareholders will bear 100% of the costs in the range of $11.3B-$13.7B. There is no voluntary cost sharing for costs exceeding $13.7B. The current capex for the project is estimated at $9.8B, and D will still need to request the recovery of any costs exceeding the $78.7M included in the Rider OSW. D expects the project to enter service in late 2026 or early 2027.

AGR — AGR files to dismiss Commonwealth PPA proceedings with the DPU, plans to participate in next RFP: AGR filed a motion with the MA DPU to dismiss the proceedings reviewing the Commonwealth Wind PPAs. The filing follows attempts by AGR to renegotiate the PPAs with off-takers, including ES, which did not progress. AGR contends that the project, under current terms,is not financially viable and would not be able to raise financing and be constructed under current terms. Instead, AGR asks that the current proceedings are dismissed and the state conducts an RFP where Commonwealth Wind can re-bid for the 1,200 MW of capacity. AGR bid into the third solicitation in September 2021 but since then the economic conditions have changed significantly, rendering the project financially unviable, per AGR. We expect that AGR views this decision as beneficial even against likely losing security deposits. We anticipate that the total financial impact from walking away from the current contract will likely be nominal and potentially put the company on a stronger footing when negotiating a new contract. It is unclear to us what the DPU's next steps would be in terms of granting AGR the request for dismissal.

AEP — FERC publishes order on KY Power sale: Last week, FERC issued a ruling denying Section 203 approval for the sale of AEP's KY operations to Liberty (read more here). In the order published since, FERC noted that AEP and Liberty failed to demonstrate that the proposed transaction would not have an adverse effect on rates. Specifically, FERC notes that the companies did not provide complete information to evaluate the impact of the transaction on rates, and potential changes to the cost of capital, including ROE, cost of debt, and capital structure. FERC also argued that AEP and Liberty did not provide enough analysis regarding rate impacts due to other costs of service components, including transmission revenue requirements, and transmission zone and zonal rates. AEP and Liberty can file a new application pursuant to section 203 but would need to provide adequate information to demonstrate effects on rates and propose protection or mitigation to address any negative rate impacts or demonstrate benefits from the transaction to offset the rate impacts.

DTE — DTE files a petition for rehearing in the MI electric rate case: DTE filed a petition with the MI PSC seeking a rehearing of the electric GRC order. DTE requests that the PSC adopt the sales forecast in the PFD and the Company's proposal to continue its voluntary credit program to refund the incremental margin to customers for any difference between the forecast and actual usage post-COVID. DTE argues that the adopted sales forecast does not accurately reflect the changing trend in customer usage. As a reminder, the PSC ordered a $30.5M rate increase on a 9.9% ROE and a 50% equity layer, vs. DTE's revised ask of $368M, staff's brief of $145M, and a PD of $146M. See our note here where we tabulate the decision. The AG in its filing argued that DTE's residential sales forecasts are unreasonably low and that residential load continues to surge despite the end of pandemic-related disruptions. The Commission sided with the AG's argument that even though C&I volumes are increasing, electricity usage by the average residential customers continues to be elevated. By our initial math, but for the Commission's take on higher residential sales (and a related offset in fuel costs), the approved increase would have been ~$167M, or a modest increase from the staff's brief and the PD.

Permitting reform bill fails to pass in the Senate: In an unsurprising turn of events, Senator Manchin's permitting reform bill could not gather the 60 votes needed for its passage in the Senate. Even if it had, it would have been an uphill task to pass it through the House of Representatives. See our write-up in the midweek where we discussed the low likelihood of the bill's passage and also the opposition from NARUC.

FERC Chair Glick is expected to leave his position at the end of the year or in early 2023: The Chairman said that he will leave FERC either at the end of 2022 or in early 2023 and that he will not seek renomination. Chair Glick was nominated by President Biden for a second term. Still, Senator Manchin, Chair of the Senate Energy and Natural Resources Committee (the one responsible for hearings on FERC nominees), has stalled a confirmation hearing with no clarity on the path forward. With his departure, the FERC will be left with four commissioners and an ideological tie, with two Democrats and two Republicans in charge. Even if the President nominates an alternative candidate, it could be 6 months before the candidate is vetted and voted into office.

FERC approves a NOPR to clarify the process for siting certain transmission projects: At the December 15 open meeting, FERC approved the draft proposal to clarify its backstop siting authority granted to the FERC under the IIJA. Congress originally gave FERC

backstop siting authority for transmission projects in DOE's National Interest Transmission Corridors as part of the Energy Policy Act of 2005. But the courts subsequently ruled that the authority only applied to projects that states did not act on, not to those that states denied. The IIJA introduced a provision clarifying FERC's authority and expanded its backstop authority over projects rejected by the states. The NOPR is meant to implement that provision.

FERC asks NERC to evaluate physical security around the bulk power system: Following a series of attacks on the physical electrical grid infrastructure in recent weeks, FERC has directed NERC to submit a report that examines the effectiveness of the current physical security standards and provides suggestions for improvements. NERC will have 120 days to provide an assessment. The Physical Security Reliability Standards were approved in 2014 and required applicable transmission owners to perform risk assessments periodically.

AGR — Staff and intervenor testimony filed in UIL's CT electric rate case: The OCC recommends an $80.6M revenue increase over the three years — $60M in RY1, $11M in RY 2, and $9M in RY3. The increase is based on a 50% equity layer and 9% ROE. This compares to UIL's request for a $136M rate increase — $102M in RY1, $17M in RY2, and $17M in RY3. Driving the difference between OCC's recommendations and UIL's filings are adjustments to O&M expenses, including payroll expenses and corporate service charges. PURA Staff's testimony did not include a revenue recommendation but recommends an 8.68% ROE and 46.04% equity layer. Staff recommended an ROE of 8.44% if the Commission adopts UIL's requested equity layer. In line with AGR's recent rate filings, such as those in NY, the Company is seeking a symmetric inflation tracker, which would adjust the ROE annually to reflect market conditions and avoid regulatory lag in the current inflationary backdrop. The filing also includes a rate levelization proposal in which the proposed increase in RY1 would be spread over the three years of the rate plan such that the annual rate increase would be $54M. AGR's filing is premised on 10.2% ROE and 52% equity. This is UIL's first filing since 2019, and the utility aims to invest ~ $600M over the three-year period on grid reliability and grid modernization. Rebuttal testimony on January 17 is the next item on the calendar and a final decision from PURA is expected by August 25.

SRE, EIX — CPUC adopts a 25 bps reduction in the 2023 cost of capital proceedings: The CA PUC adopted the ALJ's recommendation to reduce the current ROE levels by 25 bps and leave the equity layer at 52%. SRE's utilities had requested to increase the equity ratio to 54%. The PUC decision will lead SCE, SDG&E, and SCG to reduce their revenue requirements by $106M, $16M, and $36M, respectively. The ALJ left the adjustor mechanism in place through the 2023 cycle, which should provide an uplift in future periods should bond yields remain elevated. We summarize the currently approved ROEs, company requests, and 2023 approved ROEs in the table below.

Figure 1 - ROE Comparison

		ROE (%)			
Parent	Utility	Current Authorized	Proposed	PUC Adopted	Rev Req Impact ($M)
SRE	SDG&E	10.20%	10.55%	9.95%	($16)
SRE	SoCal Gas	10.05%	10.75%	9.80%	($36)
EIX	SCE	10.30%	10.53%	10.05%	($106)

DUK — OH PUC approves a settlement in DUK OH electric rate case: The OH PUC issued an order adopting the multi-party settlement in DUK's OH electric case for a $22.6M revenue increase, premised on a 50.5% equity and 9.5% ROE. The settlement maintains the existing riders, including the distribution capital investment rider, the electric service reliability rider, the distribution decoupling rider, and the distribution storm rider. The distribution capital rider will remain in place through May 31, 2025, with an annual cap that can be increased based on the Company's ability to meet certain reliability metrics. DUK's initial request was for a $55M revenue increase on a 10.3% ROE and 50.5% equity to support grid upgrades and modernization investments.

EXC — MD PSC adopts settlement in Delmarva's MYRP: The MD PSC issued an order adopting the partial settlement in EXC's first multi-year rate plan in MD (Docket No. 9681). The settlement agreed to a $16.9M increase in 2023, and $6.0M increases in 2024 and 2025, premised on a 9.6% ROE and 50.5% equity. The Commission also approved EXC's request for the Bill Stabilization Adjustment and the reconciliation mechanism, the only outstanding items from the settlement. As a reminder, EXC's initial request was for a cumulative rate increase of $37.5M for 2023-2025, based on a 10.25% ROE and 50.5% equity ($22.7M increase in 2023, $7.9M in 2024, and $6.8M in 2025). This was Delmarva's first multiyear plan filing in MD after the PSC adopted rules in 2020 allowing multiyear rate plans. New rates will become effective in the new year.

DUK — DUK and Staff file proposed orders in NC's NEM proceedings:

- DUK's proposed order includes the adoption of the NEM Tariffs and bridge rates in line with the stipulation and adoption of a critical peak pricing (CPP) method proposed by the Staff. The stipulation includes a delay in implementing TOU rates to at least 2026, extending the grandfathering period to 15 years, and implementing a bridge rate to allow rooftop solar customers to continue with

NEM through 2026. The proposed bridge rate includes monthly netting at the avoided cost rate, non-bypassable charges, and a monthly minimum bill as originally proposed by DUK. Current NEM customers would transition to the bridge rate or a NEM-TOU rate in effect after 2026. DUK proposes for the NEM tariff structure to remain in place until at least December 31, 2033. DEC and DEP previously reached a settlement with key interveners to change the NEM policies, which came after NEM reforms were included in the NC clean energy bill HB 951 and an earlier bill HB 589, which asked for revisions in net metering rates to avoid cross-subsidization.

- In its proposed order, Staff asks that NCUC approve the NEM Tariffs, with modifications, to go into effect on July 1, 2023, for a four-year period. Staff agrees with DUK's proposal for netting imports and exports within the same peak period, but Staff includes netting imports and exports during critical peak pricing (CPP) periods. Staff also proposes adopting the monthly minimum bill, grid-access fee, and non-bypassable charges, and directs DUK to build an online saving calculator to model all aspects of a customer's bill. Staff also includes a proposal for DUK to develop an opt-out program for NEM customers to retain the RECs at no cost, or DUK will use the RECs to reduce compliance costs for customers if a customer does not opt-out of utility REC ownership. Staff recommends approval of the Proposed Bridge Rate described in the Stipulation to provide multiple options for current and future NEM customers.

SRE — CA PUC issues two rulings supporting further hydrogen development:

- **The CPUC will allow SoCalGas the authority to establish a memo account for costs related to hydrogen feasibility studies:** SRE (Docket: A2202007) will be allowed to record up to $26M of costs, with an option to increase the cap by 15%, for the first phase of feasibility studies. SRE will study supply and demand metrics, potential off-takers, and pipeline configurations and storage options during Phase 1. SRE estimated that a second phase would cost ~$92M to study the feasibility of a preferred pipeline system. A third phase will likely cost over $100M. SoCalGas filed an application earlier this year to establish memo accounts to record incremental costs to implement a hydrogen blending demonstration program. As proposed, the project aims to advance the CA's decarbonization and clean air goals by bringing green hydrogen into the LA Basin to support current and future green hydrogen end users, including "hard-to-electrify" industries, electric generation, and the heavy-duty transportation sector, and replace 25% of the natural gas distributed by SoCalGas with green hydrogen and ultimately lead to the closure of the Aliso Canyon underground natural gas storage. SoCalGas has a goal to decarbonize its operations by 2045.
- **In a separate ruling, the CPUC established guidelines for hydrogen blending pilot projects:** CPUC directed utilities to evaluate low-volume blends of 0.1-5% and advance toward testing blends of 5-20%. Utilities are required to measure, monitor, and report leaks that result from hydrogen blending and conduct pilots in closed systems or systems that simulate real-world conditions. The CA Energy Division will issue a report within four years of the pilots.

WATTS COOKING? Weekly

Topics: SO; CPUC; AEP/AQN; EXC; PPL; SR

Our view: Weekly developments that we found to be of interest.

WATTS on Your Mind

This past week, investors had a lot to talk about due to industry developments. Earlier in the week, questions focused more on the macro setting for utilities, in line with conversations that we have highlighted in prior *WATTS COOKING? Weekly*. By mid-week, questions shifted to company-specific developments, starting with Georgia Power's (**SO**) settlement with Staff, and **AES**'s order in Ohio. These were followed by decisions at the California PUC and FERC. For the most part, investor reactions were mixed. Most were not surprised by GP's settlement, the CPUC's net metering 3.0 decision, FERC's permanent authorization of STL Pipeline (see comments on page 2), and even the CPUC's reduced ROEs. The FERC's decision to deny the acquisition of Kentucky Power by **AQN** (covered by Nelson Ng) came as a real surprise. Some investors now believe that the decision may give AQN an out from the deal post April 26, 2023, the date on which the agreement with **AEP** expires.

WATTS on Our Mind

On Wednesday, the MD PUC approved **EXC**'s Delmarva Power & Light's (DPL) settlement on its multi-year rate case with a 9.6% ROE and 50.5% equity layer. New rates will be effective Jan 1 of each year during a 3-year period. The settlement includes a decoupling mechanism similar to that in Baltimore Gas & Electric's approved multi-year rate case, as well as a reconciliation at the end of the 3-year period that will true up actual vs. budgeted utility spending. **Our view: The approved rate case profile looks fair with no specific hiccups. A scheduled annual increase in rates and decoupling should help smooth out EPS trajectory through 2025.**

On Thursday, **PPL** announced plans to add a variety of new generation resources to replace aging coal generators. The application calls for two 621 MW combined cycle gas plants, 120 MW of new solar and 125 MW of battery storage, and acquiring 120 MW of solar. The plan also includes securing 600 MW of solar PPAs. **Our view: The current capex plan through 2030 includes $1-$2 billion. However, any investments made prior to 2026 would be incremental to the five-year plan that goes through 2026. The plan calls for one of the gas plants to come online in 2027, with the second plant online in 2028. We think we could see some incremental investment opportunities hit the outer years of the capex plan.**

On page 2: FERC issues permanent Certificate of Public Convenience and Necessity for the Spire STL Pipeline.

We will not be publishing a *WATTS COOKING? Weekly* next weekend. We wish each and every one of you a wonderful Holiday Season and a Happy New Year. Best wishes for 2023!

WATTS on Our Mind (cont'd)

On Thursday, FERC issued a permanent Certificate of Public Convenience and Necessity for the Spire STL Pipeline, which has been operating under a temporary certificate since 12/2/21. SR highlights that this marks the fourth time that FERC has issued an operation certificate for the pipeline. **Our view: The permanent certificate came earlier than our expectations (early 2023), although it makes sense given Chairman Glick's departure and our belief that he wanted to complete the process prior to his departure. Nonetheless, we did not foresee any material risk of the pipeline ultimately not getting the certificate, especially given current market dynamics.**

Required disclosures

Conflicts disclosures

This product constitutes a compendium report (covers six or more subject companies). As such, RBC Capital Markets chooses to provide specific disclosures for the subject companies by reference. To access conflict of interest and other disclosures for the subject companies, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1. These disclosures are also available by sending a written request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7 or an email to rbcinsight@rbccm.com.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.
With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.
As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.
Risk Rating
The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings
RBC Capital Markets, Equity Research
As of 30-Sep-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	844	57.18	260	30.81

ARGUS

NASDAQ: EXC

EXELON CORP

Exelon Corp. is a leading energy provider, with transmission and distribution operations in the U.S. and headquarters in Chicago. Exelon spun off its generation business, which was about 60% nuclear, as Constellation Energy at the end of 2021. Constellation is now a publicly traded company focused on generation and competitive distribution, while Exelon focuses on regulated transmission and distribution.

Analyst's Notes

Analysis by Marie Ferguson, March 31, 2023

ARGUS RATING: BUY

- Stable earnings growth driven by increased rates
- Exelon recently reported 4Q22 operating EPS of $0.43, compared with $0.90 per share in 4Q21. The variance reflects that 4Q21 included results from Constellation Energy, which had accounted for approximately 40% of pre-spinoff revenue.
- We have a positive view of Exelon's transformation into a transmission and distribution utility through the spinoff of Constellation Energy and from the increase in rates across 4 largest utilities.
- EXC projects 6%-8% earnings growth through 2026, driven by increased gas and electric rates. When combined with the current yield of 3.5%, investors can obtain stable, moderate total returns.
- In February 2023, Exelon raised its quarterly dividend 6.6% to $0.36 or $1.44 per year.

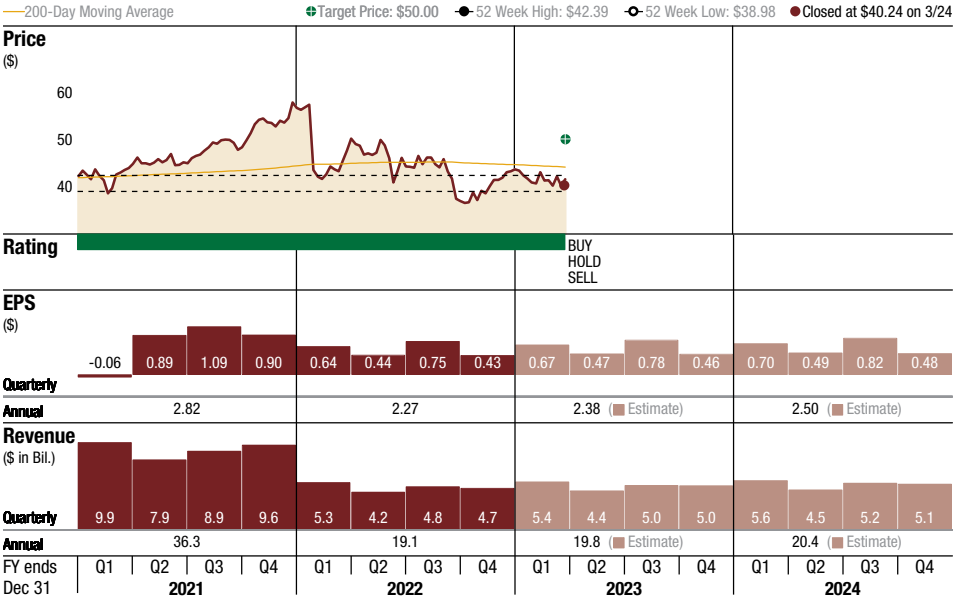
INVESTMENT THESIS

We are maintaining our BUY rating on Exelon Corp. (NYSE: EXC), which provides electricity and natural gas to about 10 million customers in Illinois, Maryland, Pennsylvania, New Jersey, Delaware, and the District of Columbia. We have a positive view of the company's transformation into a pure-play transmission utility through the recent spinoff of its competitive energy business, Constellation Energy (CEG). The move should also lower earnings volatility. Management projects long-term earnings growth of 6%-8% from the company's utilities, which we believe is achievable. Exelon is also benefiting from favorable rate case decisions, as well as from its cleaner transmission mix and focus on hydro power.

In conjunction with the February 2022 Constellation spinoff, EXC shareholders received one share of CEG for every three shares of EXC. Exelon shares were repriced as a result of this separation. The shares have participated in recent selloff, which we believe is a result of the current interest rate environment. While we will monitor the company's balance sheet and growing debt, we believe current share prices can provide a buying opportunity for income oriented investors. Our target price is $50. The company has managed costs better than peers in the past, but without generating power, high fuel costs and rising interest rates can pressure earnings.

Market Data

Pricing reflects previous trading week's closing price.



Argus Recommendations

Twelve Month Rating	SELL	HOLD	**BUY**
Five Year Rating	SELL	HOLD	**BUY**
Sector Rating	Under Weight	**Market Weight**	Over Weight

Argus assigns a 12-month BUY, HOLD, or SELL rating to each stock under coverage.

- BUY-rated stocks are expected to outperform the market (the benchmark S&P 500 Index) on a risk-adjusted basis over the next year.
- HOLD-rated stocks are expected to perform in line with the market.
- SELL-rated stocks are expected to underperform the market on a risk-adjusted basis.

The distribution of ratings across Argus' entire company universe is: 70% Buy, 29% Hold, 0% Sell.

Analyst's Notes...Continued

RECENT DEVELOPMENTS

EXC's shares have underperformed the S&P 500 over the past three months, falling 4% compared to a 5% gain for the index, but a 6% loss for both the S&P Utility Sector Index (XLU) and the Utility ETF (IDU). The shares have outperformed over the past year, falling 12%, compared to a 13% loss for the S&P 500.

Exelon recently reported 4Q22 operating EPS of $0.43, compared with $0.90 per share in 4Q21. This is the fourth set of quarterly results since the spinoff of the generation and competitive electric business as approximately 40% of pre-spinoff revenue had come from this business. For the full year, operating EPS fell to $2.27 from $2.82 in 2021.

Fourth-quarter operating revenues came to $4.67 billion, compared with restated revenues of $4.4 billion in 4Q21. For the full year, revenues rose 6% to $19.1 billion, up from restated revenues of $17.9 billion in 2021. Fourth-quarter operating expenses increased 1.4% to $3.96 billion from restated expenses of $3.90 billion in 4Q21. The spinoff of the company's generation fleet was intended to reduce cost volatility and mitigate risk from nuclear generation.

On the regulatory front, EXC completed four distribution rate cases for DPL, PECO, and ComEd. In January 2023, ComEd filed its first multi-year plan and BGE and Pepco are planning to file multi-year plans in the first half of 2023. Pennsylvania utility commission approved a $55 million increase in gas distribution revenues, effective 1Q23. Separately, DPL/Delmarva received an $8 million increase in gas distribution rates and an ROE of 9.6%, effective year-end 2022. The company's average ROE is 9.4%, which is above average of transmission peers.

Management is focused on capital investment to improve reliability and provide cleaner energy, with $31 billion expected to be allocated to new infrastructure by 2026. Management expects improvements to increase its rate base by 8% through 2026. The company has significantly increased its debt and during 3Q22, EXC issued $650 million of long-term bonds.

Along with 4Q22 earnings, management issued 2023 adjusted EPS guidance of $2.30-$2.42 per share. EXC also projected 6%-8% growth for operating earnings through 2024-2026 and for dividend growth through 2025. The main driver of earnings growth is increased rates.

EARNINGS & GROWTH ANALYSIS

Following the spinoff, Exelon has six utility subsidiaries: PECO (1.7 million electric and 0.5 million gas customers near Philadelphia); PEPCO (1 million electric customers in Maryland and Washington DC); DPL (0.5 million electric and 0.1 million gas customers in Delaware); ACE (0.6 million electric customers in New Jersey); BGE (1.3 million electric and 0.7 million gas customers near Baltimore); and ComEd (4 million electric customers in Illinois).

The company generally breaks out results for four segments: ComEd, PECO, BGE, and PHI (which includes ACE, PEPCO, and

Analyst's Notes...Continued

DPL). Compared with 2021, full-year results for the four segments is as follows: ComED revenues fell 10% while net income increased to $917 million from $742; PECO revenues rose 22% and net income earnings increased to $576 million from $504 million; BGE revenues rose 17% while net income decreased to $380 million from $408 million; PEPCO revenues rose about 12% and net income increased to $1.1 billion, up from $983 million in 2021.

Driving earnings overall were higher customer rates and favorable weather, offset by higher purchased power and fuel costs.

Going forward, the company should continue to benefit from favorable rate case outcomes and streamlined costs. The company has a mixed service region with cold winters in its Illinois region and more moderate, year-round weather in the remainder of PCG's mid-Atlantic region, which can help the company leverage costs. Argus remains positive on continued earnings drivers from economic growth in the Chicago and Philadelphia areas, offset by slower growth and higher unemployment in Baltimore. We expect the strongest segment results to be driven by rate growth from ComEd and BGE, with tighter earnings from PECO due to regulatory lag and higher debt costs.

The company's leading strength is its robust transmission improvement plans and EXC projects capital spending of $31 billion through 2025. Management has projected approximately 8% growth in its consolidated rate base through the end of 2026. The company also has solid authorized ROE across its operating segments.

EXC has been able to contain most costs and management plans to address rising O&M expense through multiyear labor agreements and cost-focused technology. The spinoff of its generation and wholesale energy business, and the accompanying high operating costs, should also help to reduce earnings volatility.

We expect earnings to reflect the impact of the rate growth. The company faces high interest rates, but has kept operating expenses in check and fuel costs have dropped in 2023. As such, we are maintaining our 2023 operating estimate of $2.38 per share. Our 2024 operating earnings estimate is $2.50 per share.

FINANCIAL STRENGTH & DIVIDEND

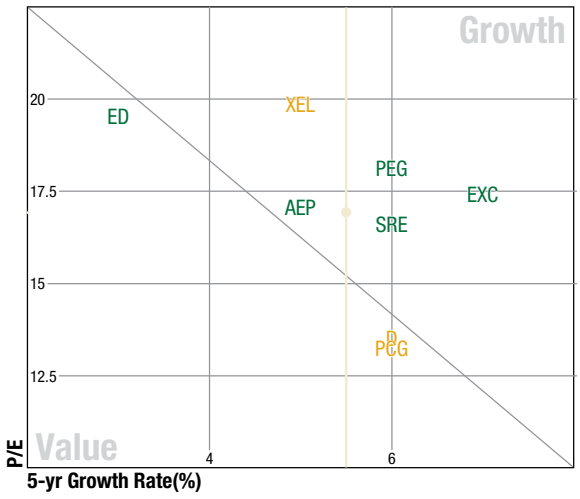
Our financial strength rating on Exelon is Medium. Moody's rates the company's debt at an investment-grade Baa2. S&P and Fitch rate the company BBB.

The company's 4Q22 balance sheet shows a significant increase in long-term debt with a reduction in current liabilities and long-term debt due maturing within one year. At the end of 2022, long-term debt was $35 billion, up from $31 billion at the end of 2021. Cash and equivalents were $407 million, down from $672 million at the end of 2021. The long-term debt/cap ratio at the end of 4Q22 was 59%, in line with the peer average but up from 47% at the end of 2021. We note that the increase in the debt/cap ratio reflected both an increase in debt and a reduction in stockholders' equity and retained earnings. EXC's weighted average long-term debt maturity is about 17 years.

Peer & Industry Analysis

The graphics in this section are designed to allow investors to compare EXC versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.

- **The scatterplot shows how EXC stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how EXC might fit into or modify a diversified portfolio.**



Ticker	Company	Market Cap ($ in Millions)	5-yr Growth Rate (%)	Current FY P/E	Net Margin (%)	1-yr EPS Growth (%)	Argus Rating

©2023 Argus Research Company

Analyst's Notes...Continued

Following the Constellation spinoff, Exelon lowered its quarterly dividend by 12% to $0.3375 per share, or $1.35 annually. In February 2023, the company increased its dividend 6.6% for the first time since the restructuring. The increase was larger than usual, as the average increase over the last 5 years was about 5.5%. The current quarterly dividend of $0.36, or $1.44 annually, provides a yield of about 3.5% versus a yield of 3.4% for peers. Our dividend estimates are $1.44, down from $1.45, for 2023 and $1.53 for 2024.

MANAGEMENT & RISKS

Christopher Crane retired as CEO at the end of 2022. In January 2023, Calvin Butler was promoted to president and COO. Joseph Nigro is the CFO and Jeanne Jones is SVP of Corporate Finance. Mayo Shattuck II is the company's independent chairman.

Risks for Exelon shareholders include cooler-than-normal conditions during the summer air-conditioning season or warmer-than-normal temperatures during the winter heating season. The transmission business may also be hurt by extreme weather events. Other risks include those related to ROE, including exposure to state regulatory commissions and the correlation between authorized ROE and Treasury yields.

Utility stocks in general are susceptible to commodity price fluctuations, regulatory issues (especially construction cost recovery), and potential environmental and safety liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk. Utility stock performance also tends to be sensitive to interest rates; when rates rise, utility yields often rise.

COMPANY DESCRIPTION

Exelon Corp. is a leading energy provider, with transmission and distribution operations in the U.S. and headquarters in Chicago. Exelon spun off its generation business, which was about 60% nuclear, as Constellation Energy at the end of 2021. Constellation is now a publicly traded company focused on generation and competitive distribution, while Exelon focuses on regulated transmission and distribution.

Through its regulated utility subsidiaries, Exelon delivers electricity and natural gas to about 10 million customers, primarily in central Maryland (Baltimore Gas & Electric Co.), northern Illinois (ComEd), and southeastern Pennsylvania (PECO). About 89% of EXC's 2022 revenues were from the electricity segment and about 42% of earnings are from the largest utility, ComEd. The company plans to cut emissions by 50% by 2030 and to achieve net-zero emissions by 2050. The shares are a component of the S&P 500.

VALUATION

EXC shares have followed sector trends and recent rotation out of utility stocks. At current prices near $42, the shares are trading at the midpoint of their 52-week range of $35-$50.71 and appear undervalued on several key metrics. They are trading at 17.6-times our 2023 EPS estimate, below the average of 19-times for Argus-covered utilities. The PEG multiple of 2.6 is below the peer average of 3.0, and the price/sales multiple of 2.0 is below the peer average of 2.6. The EV/EBITDA multiple of 10.9 is also below the peer average of 11.4.

We believe that EXC shares offer value based on the company's size and scale, and reduced earnings volatility following the Constellation spinoff. We like Exelon's regulatory environment and management's focus on renewable energy and cleaner transmissions. At the same time, the company plans to invest heavily to increase reliability and will need to manage its debt amid rising rates. Current prices could allow a buying opportunity for investors seeking a stable total return. We are maintaining our BUY rating with a target price of $50.

On March 31 at midday, BUY-rated EXC traded at $41.71, up $0.26,.

About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

THE ARGUS RESEARCH RATING SYSTEM

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

TRUCOST ENVIRONMENTAL SKYLINE EXPLANATORY NOTES

In a single graphic, you get a view of five different dimensions of corporate environmental impact:

- Trucost's Environmental Skyline is an assessment of the performance of an organisation across **six broad groups of environmental KPIs:** greenhouse gases, water, waste, air pollutants, natural resource use, and land/water pollutants. Environmental impacts are not just about carbon, and the Environmental Skyline gives you exactly that broader perspective, which is practically impossible to get without access to Trucost's data.

- Most organisations struggle to assess their direct impacts, let alone their indirect supply chain impacts. Trucost's Environmental Skyline offers an immediate evaluation of the **scale of direct and indirect environmental impacts** an organisation is causing, for each of the environmental KPIs listed above.

- Each organisation is assessed according to the scale of its different business activities for a particular year. Business activities are classified based upon North American Industrial Classification (NAICS) 6 digit codes. Each environmental KPI in the Environmental Skyline is offered as a **comparison to an industry benchmark**. The benchmark index of 100 represents average performance in the sector. The higher the index rating, the worse the performance of the organisation compared to its peers.

- Trucost rates an organisation's overall environmental performance by providing its **position in the benchmark**. The organisation is ranked against peers who share the same primary business activity at NAICS 3 digit code level.

- An organisation will have **a different Environmental Skyline each financial year**. The total number of organisations in the benchmark will increase as financial and environmental data becomes available for analysis by Trucost.

In essence, Trucost's Environmental Skyline offers a valuable assessment of an organisation's performance, covering issues that are near-impossible to assess without the use of Trucost's powerful data model and methodology.

The Guggenheim Daily Transmission: ERCOT, AEP, ES/RI, EVRG/MO, ES/CT, EXC, DUK, SMR, IL/ Nuclear, IN, AZ

For our AGA conference (May 20-23) meeting schedule, please scroll down…

For details on our Guggenheim-hosted client Utility events including our AEE NDR, PPL NDR, EXC NDR, ETR NDR, DTE NDR, PCG NDR, SMR NDR, ES NDR, LNT NDR, AWK NDR, PNW NDR, CMS NDR, POR NDR, and other events, scroll down…

Forward Power Curves, Genco MtM, and Weekly Commentary (see our note HERE)

ERCOT – Appeals court rules against PUCT price action during 2021 storms

AEP – AEP's former CEO allegedly met with now-convicted Larry Householder re: term limits

ES/RI – Eversource and Ørsted emerge as sole bidders for RI RFP

EVRG/MO – Reply briefs filed in Persimmon Creek CPCN process

ES/CT – PFD detailing Phase 1 investigation of PBRs docketed

EXC – FERC issues show-cause to ComEd over formula rate stakeholder process

DUK – Procedural schedule filing in DEC rate case

SMR – NRC comments on ongoing 77MW SDA

IL/Nuclear – IL lawmakers considering rescinding ban on new nuclear construction

DUK – Public staff filing regarding DEP's interim true-up adjustment letter for storm securitization

IN – IN house bill for greater consideration of reliability and resiliency in utility resource plans on second reading in Senate

AZ – AZ house bill requiring infrastructure planning and investment passes key senate committee action

ERCOT – Appeals court rules against PUCT price action during 2021 storms

- The Third Court of Appeals in Austin ruled in favor of a complaint brought against the PUCT over its decision to administratively set the cost of power at $9,000/MWh during the 2021 storm event for 32 hours
- The decision has been remanded for further consideration
- More HERE

Guggenheim takeaway: *While this is a surprise development, indications in media are already point to an appeal to the state supreme court. In our view the concept of going back and repricing something that occurred 2 years ago seems unlikely given the sheer complexity of untangling ITS linkages to everything from the Brazos bankruptcy process to the subsequent securitization (which has already been disbursed). Very difficult for us to see this unwound, but we continue to dig further. That said, the development could be a positive for IPPs who incurred significant losses due to the actions, like VST (who brought the suit) and CEG. However, both were also recipients of securitization proceeds as well, adding yet another layer of hypothetical complexity to the process.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

AEP – AEP's former CEO allegedly met with now-convicted Larry Householder re: term limits

- A prosecution witness claimed in last month's trial testimony that Nick Akins, former CEO of AEP, had met with Larry Householder regarding extending Ohio term limits.
- The purpose was to maintain Householder's legislative control for longer.
- More HERE

Guggenheim takeaway:*Media coverage recounting trial testimony has likely mostly concluded now that the trial is over, and a verdict has been rendered. We continue to monitor for any new developments or allegations potentially affecting any utilities with Ohio operations.*

ES/RI – Eversource and Ørsted emerge as sole bidders for RI RFP

- Revolution 2 was reportedly the only bidder into the latest RFP round following the March 13th submission deadline
- More HERE
- [CPN: Ørsted]

Guggenheim takeaway: *Interesting FYI, although not a surprise given the ongoing upheaval in the northeast (attempted MA RFP repricing). It remains unclear to us at this time how the lack of bidders may shape the ultimate process, however the commentary from the administrators in the link above indicates the evaluation will go on as normal.* ***See our note from Revolution 2's announcement HERE.***

EVRG/MO – Reply briefs filed in Persimmon Creek CPCN process

- EVRG, MO Staff, the OCC, and other intervenors have filed reply briefs in the ongoing CCN process
- "This Project does not justify its cost." - Staff
- "Staff's frequent resort to arguments more properly asserted in a general rate case must be disregarded in this Operating CCN case where the issue is simply whether Persimmon Creek is "necessary or convenient for the public service" under Section 393.170.3. Because this is not a general rate case where "all relevant factors are considered," Staff's arguments regarding rate increase and risks without any discussion of the benefits offered by Persimmon Creek must be rejected" – EVRG filing
- More HERE

Guggenheim takeaway: *Flagged for your awareness as the wind project continues to generate some stakeholder and Staff pushback in the process.*

ES/CT – PFD detailing Phase 1 investigation of PBRs docketed

- The Commission has docketed a PFD detailing its ongoing work on PBRs and advanced ratemaking tools, while detailing ongoing parameters for work on refining the process under Phase 2
- "The Decision provides, in order: (1) key procedural aspects of Phase 1 of the proceeding, including context on the need to reform the traditional utility business model, the impetus for PBR in Connecticut, other relevant work of the Authority, and how PURA sees the use of PBR, as well as major docket milestones and a summary of public comment received" – PURA
- "The Authority encourages all stakeholders to continue participating in Phase 2 of this PBR proceeding as it is only with your engagement that effective regulatory reform can be designed and implemented through Phase 2 or, indeed, the promise of PBR realized." - PURA
- More HERE

Guggenheim takeaway: *Part of the broader ongoing process at PURA to consider with stakeholders advanced regulatory mechanisms like MRPs, sharing (ESMs) and other key performance metrics. As a reminder, this process will continue through most of the year in Phase 2, with the preliminary timelines (PDF page 39-40) pointing to potential PFDs on Revenue Adjustment Mechanisms and PIMs in 2Q24. In our view PBRs would be beneficial to the overall construct given the opportunity for ROE improvements. As a reminder CT already has a fairly favorable regulatory framework in place (e.g., forward/forecasted test period)*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

EXC – FERC issues show-cause to ComEd over transmission formula rate stakeholder process

- "Based on our review, we find that ComEd's formula rate protocols on file with the Commission appear to be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Therefore, we institute an investigation pursuant to FPA section 206, in Docket No. EL23-31-000, with respect to ComEd's formula rate protocols." – FERC
- "ComEd's formula rate protocols are deficient in the three areas the Commission identified in the MISO Investigation Order: (1) the scope of participation (i.e., who can participate in the information exchange); (2) the transparency of the information exchange (i.e., what information is exchanged); and (3) the ability of customers to challenge transmission owners' implementation of the formula rate as a result of the information exchange (i.e., how the parties may resolve their potential disputes)" – FERC
- "Based on our review, we find that ComEd's formula rate protocols may limit the ability of certain parties to obtain information about annual updates from transmission owners. ComEd's formula rate protocols do not include a definition of "interested parties" to generally identify which entities can participate in the review process. Without such a definition, ComEd's formula rate protocols may not provide sufficient clarity and may provide ComEd with the discretion to determine who is an interested party, and therefore appear to be unjust and unreasonable." - FERC
- More HERE

Guggenheim takeaway: *Flagged for your awareness – this appears to be narrowly focused on tariff updates around stakeholder participation at this time, however we continue to monitor.*

DUK – Procedural schedule filing in DEC rate case

- The hearings on June 19, June 21, June 22, July 24, and July 26, 2023, will be solely for the purpose of receiving the testimony of public witnesses.
- DEC requests that the Commission allow it to recover total additional base rate service revenues of $511.3 million in Rate Year One (including the traditional general rate case increase of $371.5 million and $139.8 million for MYRP projects in Year 1), to be effective January 1, 2024, through December 31, 2024; an additional base service revenues increase of $171.5 million in Rate Year Two, to be effective January 1, 2025, through December 31, 2025; and a further base service revenues increase of $150.3 million in Rate Year Three, to be effective January 1, 2026, through such time as new rates are approved by the Commission. The base revenues increase from January 1, 2024, to January 1, 2026, totals $833.2 million.
- Docket E-7 Sub 1276

Guggenheim takeaway:*For your calendar and awareness.*

SMR – NRC comments on ongoing 77MW SDA

- "The Nuclear Regulatory Commission staff will begin reviewing most of NuScale Power LLC's application for standard design approval of the company's 77 MWe/module Small Modular Reactor design. The remainder of NRC staff's review of the design will begin once the company provides additional details on a key safety topic… The staff has determined portions of the application, discussing steam generator safety performance under certain conditions, require additional information. Once NuScale provides that information, the staff will develop a full review schedule."
- More HERE

Guggenheim takeaway: *Part of the process – see our note from last week's update HERE for more.*

IL/Nuclear – IL lawmakers considering rescinding ban on new nuclear construction

- Several different pieces of legislation to end the moratorium on new nuclear construction are working their way through the statehouse, including HB1079 and SB76
- More HERE

Guggenheim takeaway: *Minor FYI.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

DUK – Public staff filing regarding DEP's interim true-up adjustment letter for storm securitization

- The Public Staff has reviewed the filing for mathematical and clerical errors and is satisfied there are no such errors contained in the filing.
- Docket E-2 Sub 1262

Guggenheim takeaway:*Bond recovery true-up filing, for your awareness.*

IN — IN house bill for greater consideration of reliability and resiliency in utility resource plans on second reading in Senate

- IN Senate put the House bill for increased guidance on utility resource plans on second reading.
- The bill includes guidance for the regulators to consider reliability and resiliency of resources in IRPs.
- The process saw Senate add co-sponsors to the bill.
- Regulators would need to consider the ability of resources to provide dispatchable power.
- The guidance from the bill also includes affordability and competitive rates as a goal for the IURC.
- Bill text here: HB1007

Guggenheim takeaway: *FYI. The bill tries to bring a legislated balance to IN decarbonization focus (i.e., balancing reliability with intermittent resources like solar and wind). While the changes to the framework are open-ended, we could see a change in IRP approach from CNP, DUK and NI as the state's electric IOUs.*

AZ — AZ house bill requiring infrastructure planning and investment passes key senate committee action

- HB2440 has now passed in a 4-3 vote through the Senate Natural Resources, Energy and Water Committee.
- The legislation modifies existing code to stipulate required actions and planning by the AZCC and utilities operating in AZ.
- Bill text here: HB2440

Guggenheim takeaway:*FYI. The bill has already passed through the House as well as a second reading in the Senate. This bill would simplify grid and infrastructure planning for Arizona Public Service, among other AZ utilities, as it would prioritize affordability and reliability above all else. We note that environmental groups have publicly opposed this legislation as they believe it would prevent environmental considerations from being included in this process (more HERE).*

Company Information
Market Cap: $22.4bn
DTE Energy Co. (DTE) operates as a diversified energy company, which engages in the development and management of energy-related businesses and services. It operates through the following segments: Electric, Gas, DTE Vantage, Energy Trading, and Corporate and Other. The Electric segment consists of generation, purchase, distribution, and sale of electricity to residential, commercial, and industrial customers in southeastern Michigan. The Gas segment is involved in the purchase, storage, transportation, distribution, and sale of natural gas to residential, commercial, and industrial customers throughout Michigan, and the sale of storage and transportation capacity. The DTE Vantage segment focuses on projects that deliver energy and utility-type products and services to industrial, commercial, and institutional customers, produce reduced emissions fuel, and sell electricity and pipeline-quality gas from renewable energy projects. The Energy Trading segment covers energy marketing and trading operations. The Corporate and Other segment includes various holding company activities, holds certain non-utility debt, and holds certain investments, as well as funds supporting regional development and economic growth. The company was founded in January 1995 and is headquartered in Detroit, MI. (Source: FactSet)

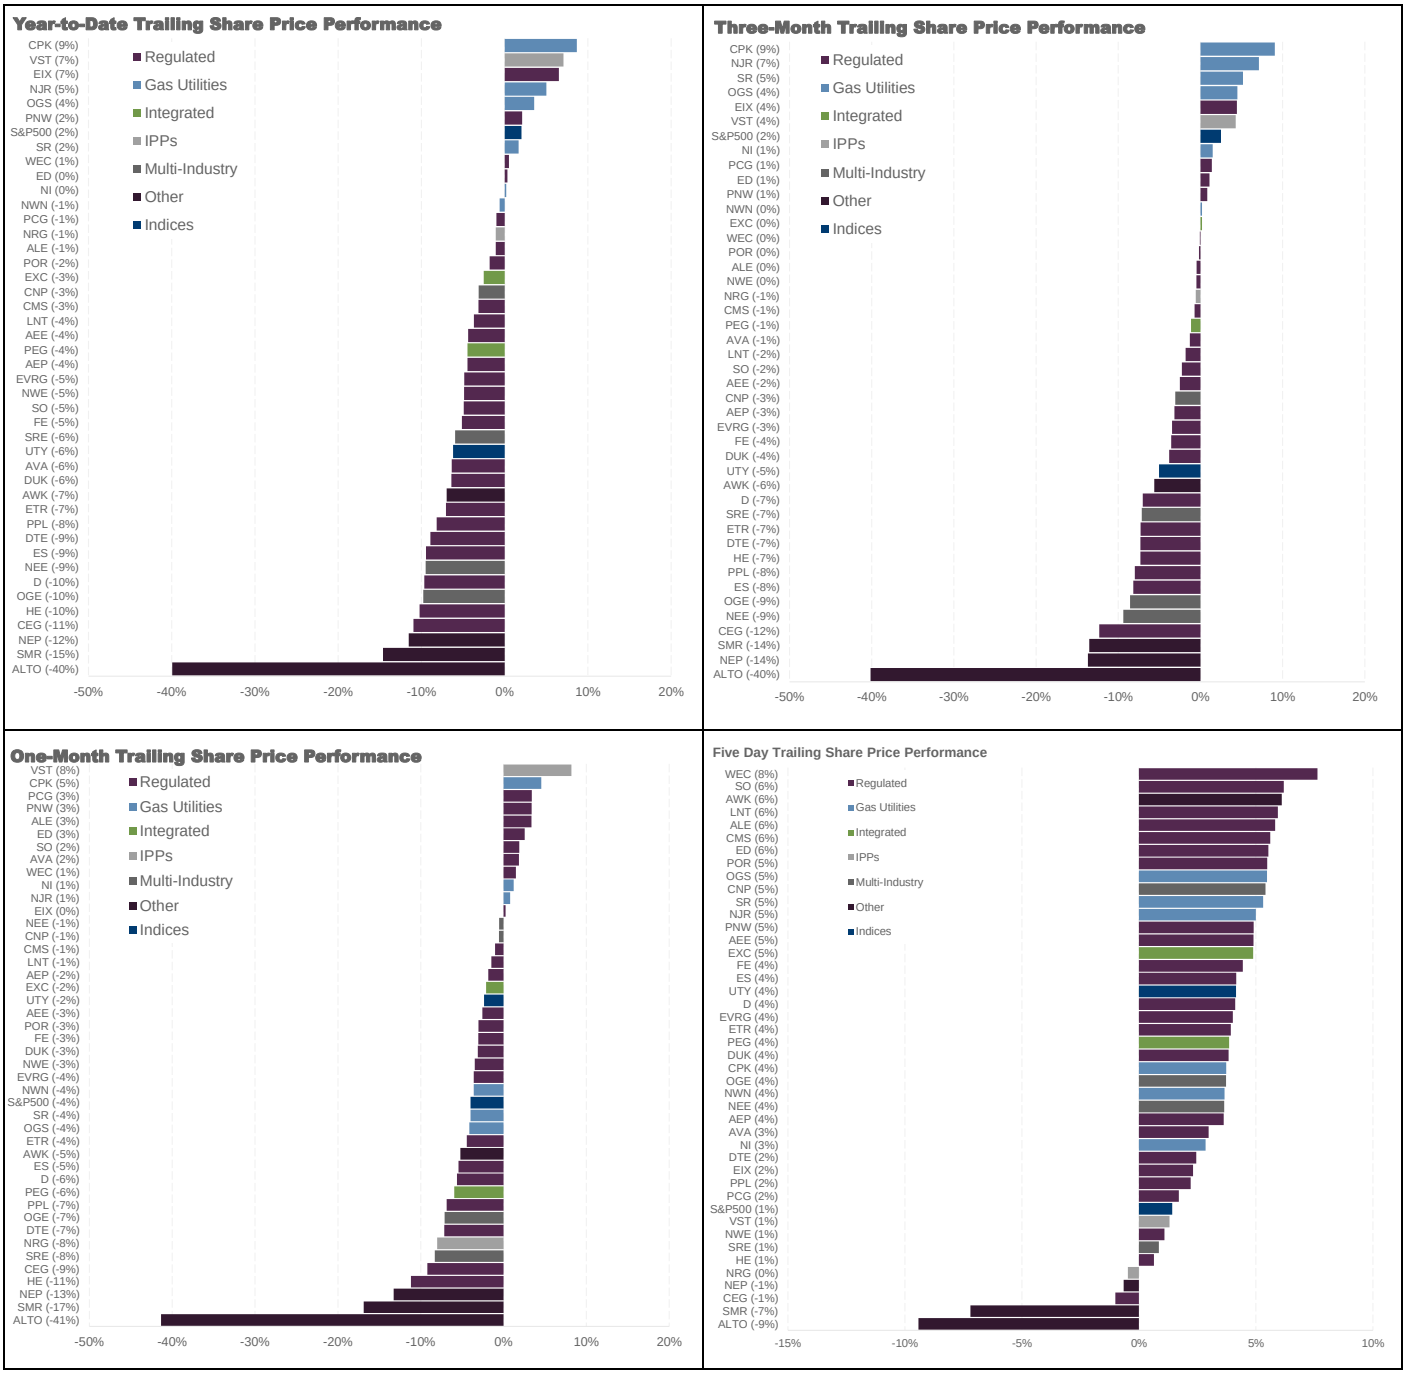
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.	
Rating Category	**Count**	**Percent**	**Count**	**Percent**
BUY	234	64.64%	46	19.66%
NEUTRAL	119	32.87%	10	8.40%
SELL	9	2.49%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

March 16, 2023

The Guggenheim Daily Transmission: SMR, ES, PCG/CNP, EVRG, DUK, ETR, EXC, NC/Wind, EPA

For our AGA conference (May 20-23) meeting schedule, please scroll down…

For details on our Guggenheim-hosted client Utility events including our NEE NDR, AEE NDR, PPL NDR, EXC NDR, ETR NDR, DTE NDR, PCG NDR, SMR NDR, ES NDR, LNT NDR, AWK NDR, PNW NDR, CMS NDR, POR NDR, and other events, scroll down…

SMR: 2023 to See Slightly Heightened Cash Usage as Focus Remains on Execution (see our note HERE)

ES – PURA issues final order in Aquarion case

PCG/CNP – PCG CFO Chris Foster to join CNP as CFO, PCG announces Carolyn Burke transition to CFO

EVRG – Transmission charge bill advances in KS committee

DUK – Additional NC public hearing to be held 4/20

ETR – Stakeholders file support for ETR TX transportation electrification, settlement in ETR TX rate case

EXC – Judge to allow release of recordings in ComEd trial

NC/Wind – 189MW onshore wind project receives DEQ approval

EPA – Final good neighbor rule issued, draws pushback from Senator Manchin

ES – PURA issues final order in Aquarion case

- The 2-1 decision came with strong comments from each of the commissioners (see below) and hews closely to the initial PFD issued last month.
- "The approved annual revenue requirement represents a decrease of $1,969,517, or approximately 0.997%, from the Company's currently approved revenue requirement. While the Company requests a 10.35% return on equity, the Authority determines that an allowed return on equity of 8.70% is appropriate." - PURA
- Replay HERE.
- See our prior note for more HERE.

Guggenheim takeaway: *The current state of regulatory affairs in Connecticut was on full display yesterday during PURA's final decision on the Aquarion case, in which Commissioners Caron and Betkoski independently lamented the process and the outcome of the case, with Caron noting he was 'appalled' by the ROE and Betkoski indicating that he had never seen a decision that excluded so many items – noting, 'I have no doubt this will be appealed' (see his dissent HERE). The 2-1 split on the decision came as Caron's vote in favor was framed as an avoidance of the implementation of the company's higher request, while also noting that "even the OCC's ROE recommendation was higher."* ***In our view the outcome fits in with what has become an established rift between Gillett and the other two commissioners****, and while Caron took time to compliment the Chair as "one of the hardest working people I have ever seen,"* ***the outcome was similar to prior splits – most notably the 2021 settlement between CL&P, the governor, and other stakeholders.*** *We would not be surprised to see an appeal over this outcome, or another fresh case in the near future.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

PCG/CNP – PCG CFO Chris Foster to join CNP as CFO, PCG announces Carolyn Burke transition to CFO

- PCG and CNP announced concurrent CFO appointments and transitions, with Chris Foster leaving the PCG CFO position and Carolyn Burke being promoted to CFO.
- PCG hosted a call to discuss the transition and reaffirm consistency in financial plans.
- Chris will serve as CFO through the first quarter PCG earnings call on May 4, 2023.
- Chris Foster has a depth of experience at PG&E including challenging restructuring, securitizations and financing, as well as a prior history of working with Jason Wells (CNP) during his time at PCG.
- Carolyn Burke has served in an advisory capacity with PCG and Chris and has a diverse background in finance and strategy including Chevron Phillips Chemical (CVX), as well as Dynegy (private), and senior controller roles at NRG and JPM commodities.

Guggenheim takeaway: We caught up with the full PCG management team including CEO Patti Poppe, CFO Chris Foster, incoming CFO Carolyn Burke, special advisor Tom Webb and other members of mgmt.*The CFO transition on the PCG side was well planned, with Carolyn joining in an advisory capacity very early in the process, as well as an extended transition period through May 4, 2023. PCG mgmt. highlighted the deep bench of functional expertise that was built under Chris Foster as a continuation of strong financial and regulatory execution, with Carolyn Burke bringing a lot of practical process improvement frameworks and a competitive efficiency mindset to the role. For PCG, the transition intersects prior relationships of the board chair Bob Flexon (ex-Dynegy and NRG), as well as Julius Cox, current PCG EVP People, Shared Services and Supply Chain (ex-Dynegy). For Chris Foster, the transition is rejoining Jason Wells (CNP, ex-PCG) and a development opportunity into a multi-state utility CFO, after a storied 10+ year tenure at PCG. Chris verbalized the transition opportunity as timely, given the stability that has been established at PCG. Overall, there is no change in plans or major internal analysis for PCG, including no change in the May 24, 2023 Analyst Day plan or timing.*

EVRG – Transmission charge bill advances in KS committee

- The bill concerning changes to EVRG's transmission delivery charges has been amended to include language around regional rate competitiveness analyses in rate cases, a requirement for more details of transmission projects over $15mm and TDC ROE updates.
- "The bill would require, beginning January 1, 2024, and before April 1, 2024, that for any utility electing to recover the costs described regarding a TDC, the KCC to adjust the return on equity used to determine the revenue requirement of such costs from FERC's jurisdictional return on equity to the KCC's authorized return on equity last used to set the utility's base rates in effect at the time of filing the TDC update….The bill would state the KCC's authorized return on equity would not impact any project that was constructed as a result of a notification to construct or similar directive from a RTO or ISO that is regulated by FERC or any successor agency." – filing
- More HERE.

Guggenheim takeaway: *One of several utility-specific pieces of legislation we continue to monitor this session – KCC Staff's testimony on regional competitiveness to the Committee is available HERE. We continue to monitor the backdrop in KS as EVRG heads into its first post-merger case this spring. The KS Legislature adjourns on May 22nd.*

DUK – Additional public hearing to be held 4/20

- "However, in order to provide additional opportunities for public witnesses to participate, the Commission finds good cause to schedule a sixth public witness hearing on DEP's application for Thursday, April 20, 2023. The hearing shall be held remotely via Webex." - filing
- More HERE.

Guggenheim takeaway: *For your calendars.*

EXC – Judge to allow release of recordings in ComEd trial

- U.S. District Judge Harry Leinenweber will allow federal recordings of participants in the alleged bribery scheme to be released publicly.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

- More HERE.

Guggenheim takeaway: *Flagged for your awareness as this process continues to generate headlines.*

NC/Wind – 189MW onshore wind project receives DEQ approval

- The 45 turbine facility would be interconnected via a ~6 mile 230Kv transmission line.
- "The North Carolina Department of Environmental Quality's Division of Energy, Mineral, and Land Resources (DEMLR) has issued a permit for the Timbermill Wind, LLC, proposal to construct, operate and decommission an onshore wind energy facility generating as many as 189 megawatts in Chowan County." - DEQ
- More HERE.

Guggenheim takeaway: *Interesting FYI as NC continues to mull potential offshore opportunities.*

EPA – Final good neighbor rule issued, draws pushback from Senator Manchin

- The final rule for NOX emissions has been promulgated by the EPA.
- "Beginning in the 2023 ozone season, power plants in 22 states will participate in a revised and strengthened Cross-State Air Pollution Rule ozone season trading program. To achieve emissions reductions as soon as possible, EPA is basing the initial control stringency on the level of reductions achievable through immediately available measures, including consistently operating emissions controls already installed at power plants. Further reductions will be phased in over several years starting in 2024 and reflect emissions levels that could be achieved through installation of new emissions controls." - EPA
- More HERE.
- "Today's reckless decision by the EPA totally disregards 23 states' existing plans to address ozone levels and completely ignores warnings from electricity reliability experts, elected officials and key manufacturing industries. This Administration is determined to advance a progressive, radical climate agenda." – Manchin HERE

Guggenheim takeaway: *This was the final step in a process that we and others have been monitoring for some time and brings closure to several resource adequacy processes (e.g., PPL's CPCN in KY). While the rule continues to generate pushback, we do not anticipate any changes in the trajectory of coal retirements nationally – especially given other regulations like ELGs and ash management.*

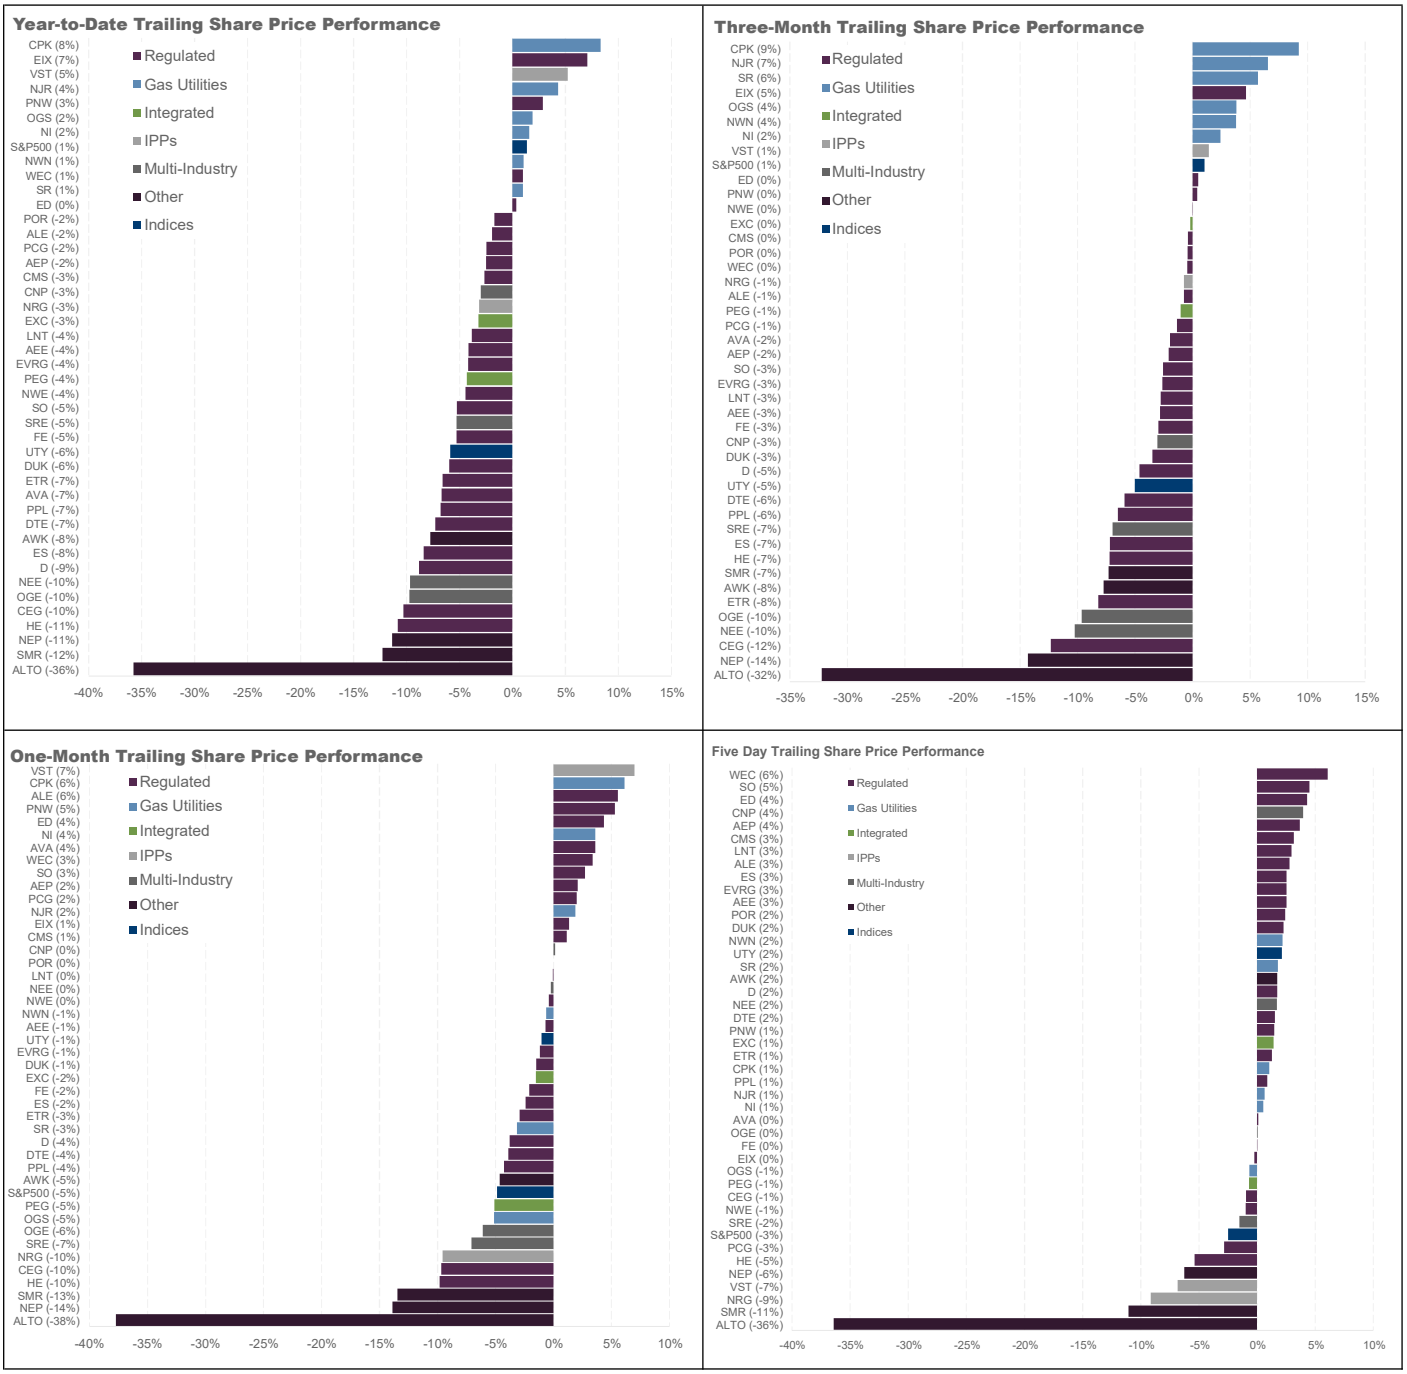
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.	
Rating Category	**Count**	**Percent**	**Count**	**Percent**
BUY	235	64.92%	45	19.15%
NEUTRAL	118	32.60%	11	9.32%
SELL	9	2.49%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

- We provide key takeaways from PCG's recent NDR, investor feedback from PNW's upgrade to Outperform, quick take on NI/CNP mgmt. change and EXC's regulatory update.

- **PCG NDR with Chris Foster, Mgmt Update & C-Suite Dinner:** We held virtual meetings with Chris Foster (CFO) on March 13-14th where discussions focused on several factors which we thought overall were in-line with expectations from the 4th Quarter Conference Call. We also attended a dinner with C-Suite (Patti Poppe CEO, Carolyn Burke Incoming CFO, Chris Foster Outgoing CFO, and Tom Webb Strategic Advisor) on March 15th with additional takeaways surrounding the recent management changes. On March 15th PCG announced that Carolyn Burke will assume the role of CFO and Executive VP effective May 4th with Foster resigning to take the CFO role at CNP. Burke was most recently Executive VP/CFO at Chevron Phillips Chemical Company, with the company expressing during an investor call on the same day that they expect her to help enable the current plan laid out at the recent AD and reaffirmed all metrics set forth from it. First, we acknowledge CFO Foster's transition could pressure sures in the near term as investors will naturally be skeptical on the move away from one the largest discount stories (-28.5% P/E on '25E) in the sector, but overall, we're expecting messaging, strategy, communication and the ability to hit financial targets including the 10% EPS growth through 2024 and 9% growth in 2025 and 2026 to remain unchanged. Outgoing CFO Foster has been with PCG for ~11 years, and spear-headed regulatory policy initiatives while also taking on a large restructuring effort with then CFO Jason Wells who will be re-joining at CNP. As the company is now in a more stable spot relative to 2 years ago, discussions noted Foster remains comfortable in making the move to a multi-state utility where he has a clear skill set which is ready for new challenges. While Carolyn Burke has not acted in a CFO capacity, we note she has already served as an advisor to Chris through her time with the company and has been in the background making key financial decisions. We believe the transaction will be natural from an operational and financial perspective leading to no big changes for the company. Bottom line: We're comfortable with the recent mgmt change seeing it neutral for the stock.

- **PCG: Additional Points Following Mgmt Discussions: Financing considerations:** The company reiterated that they do not expect to issue equity in '23 and '24 and expects to finance growth in the current plan through the debt capital market transactions and the PacGen sale which remains on track. Regarding credit, the company keeps open lines of communication with all of the rating agencies and indicated that the agencies are focused on continued wildfire risk reduction, strong policy signals from the CA Commission, as well as the outcome of the pending GRC (2Q PD expected), PacGen sale and the prior recovery of wildfire expenses. Moody's revised PCG's credit outlook to positive, and we expect continued momentum on credit as the company executes their risk reduction plans. **O&M control:** PCG was able to cut O&M by 3% this past year despite the current inflationary environment, something that could create headroom in customer bills and allow for increased investment in electrification within the service territory. PCG retains one of the highest O&M / Capital ratios in the sector which we believe is an under-appreciated long-term opportunity for shares and we note that discussions at the March 15th dinner pointed to additional cost-cutting opportunities than what the executive team highlighted just a year ago. Regarding Load, PCG sees increased load via increased EV use-- with CA's current goal of 5Mn EV's by 2030 and 2Mn of which could be within PCG's service territory-- this could lead to increased investment in electrification and ultimately the spreading of fixed costs amongst more customers, a potential hedge for customer affordability. **Dividend:** The company indicated that they expect the initial return of the dividend to be small and is currently targeting 3Q for dividend eligibility. The company is currently deliberating on the initial dividend amount (dependent on BoD approval) and growth rate guidance, and more clarity is expected in the coming quarters. We believe while PCGs pay-out ratio will remain low, the company will still be able to target dividend growth that is above peers assuming growth in-line with earnings. **Storms:** While recent storms have caused outages in the service territory, state of emergencies have been declared at various times in the state which should allow for a deferral of these costs in our view (no ongoing PnL impact). The effect on higher snowpack and rain could lead to higher veg mgmt growth but is also helping address dead trees that may have otherwise been still standing come fire season. We maintain our Outperform rating on PCG shares.

- **PNW Upgrade Feedback:** We upgraded shares of PNW to Outperform from Neutral on 3/14 and are providing feedback from investor conversations. We note investors largely agreed with our view

DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, LEGAL ENTITY DISCLOSURE AND THE STATUS OF NON-US ANALYSTS. US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

on PNW's EPS outlook post the SCR appellate court win, especially that EPS could be $5.00+ in 2024. We did receive some push back on our 2025E EPS ($5.23 vs Cons. $4.91) with some believing we're slightly too high due to parent drag and potential equity needs. We note our 2025E assumes a 9.3% allowed ROE while investors debated with us what the true level of earned returns could be where we note CSe assumes 70bps of ongoing retail lag out of the GRC. We also received push back on the timing of the call principally due to the lack of catalysts until the May '23 staff testimony, though we see ample opportunities for mgmt. to potentially communicate positive implications of the SCR appeal in the upcoming 1Q call and investor conferences. Overall while investors have agreed with the trajectory of EPS momentum, we don't believe PNW is a consensus Outperform among the buy-side and note continued bearish/neutral views from our competitors. See our upgrade note here.

- **NI: Management Rotation In-line for Shares:** On March 15th NI announced several leadership changes and additions including appointing Michael Luhrs to the executive leadership team as the VP of Strategy & Risk and Chief Commercial Officer, from Alliant Energy where he was previously the Senior VP of Customer Experience and Strategy. Additionally, Shawn Anderson will become the CFO, from his role prior as Senior VP of Risk and Chief Strategy, with Melody Birmingham to be the Executive VP of NiSource and Group President of NiSource Utilities. Donald Brown (current CFO) is transitioning to EVP and Chief Innovation Officer, succeeding Birmingham. All new appointments will begin effective March 27th. The timing of these leadership change announcements is largely due to the broader management team rotation and is not necessarily a signal of something more following the AD, based on our discussions, and is a part of less visible internal changes the company has done recently. Overall, we believe Shawn Anderson will be well received as the new CFO of the organization and we see the update as largely neutral to shares. We caught up with Anderson briefly yesterday and note the recent Indiana settlement achieved on 3/10 remains in-line with the current LT EPS growth plan and FY23 guidance. The process surrounding the NIPSCO NCI sale as communicated on the 4Q call also remains on track. We maintain our Outperform rating seeing NI as a top idea through FY23.

- **CNP: Chris Foster Incoming CFO is Positive for Shares:** On March 15th CNP announced that Chris Foster will assume the role of CFO and Executive Vice President of the company, effective May 5th. Prior to joining CNP Foster served as CFO for PCG. Foster will be rejoining Jason Wells (COO) who he previously worked closely with at PCG and we view the update as clearly positive for CenterPoint as we believe the addition of Foster adds further credibility to CNPs premium management team.

- **EXC: Watching Regulatory Moves:** We note several takeaways on EXCs regulatory outlook following commissioner changes: **1) Commissioner Turnovers:** During recent regulatory sessions, MD nominated two commissioners but one backed out due to pressure from the environmental side of intervenors, while in IL there were two vacancies on the commission but it was resolved last Friday when the governor announced Conrad Reddick and Stacey Paradis being appointed as new commissioners, pending confirmation by state Senate, but we believe the process should be relatively swift (does not require full confirmation). **2) ICC Chair Stepping Down:** Chairperson Carrie Zalewski is stepping down from her position as announced last week and will leave ICC on June 16. Governor Pritzker nominated former ICC chair Doug Scott to replace Zalewski. For the newly formed 5-person commission, no more than three commissioners from the same party are allowed and each term is five years. We note Doug Scott served as ICC chair from 2011-2015 and view having an experienced chairperson filling in as valuable to the upcoming ComEd rate case process. The Zalewski resignation does raise questions given the Madigan ComEd trial will kick off momentarily leading to some headline risk for shares, but ultimately, we're less concerned on broader fundamental impacts to EXC.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Exelon Corporation (EXC.OQ)

Method: We utilized an SOTP method to determine our target price of $46 per share and a blended P/E multiple of 16.8x for Outperform-rated EXC. We derived the blended P/E multiple by creating a proportion of each segment for the electric group, transmission group, and gas group. We based the proportion on each segment's contribution to rate base. We apply a 3% premium multiple to the current blended multiple of 16.3x. We believe that an improving regulatory environment in Illinois will be favorable for EXC investors by allowing ComEd to file a rate case that is in line with industry average. Changes in the allowed ROE structure could increase the allowed ROE by 2% in 2024. Another key driver is the execution of the $29Bn capital plan.

Risk: Risks to achieve our $46 target price and Outperform rating include: (1) management not meeting RAB projected growth; (2) not reaching stated growth metrics, including the 6-8% LT EPS CAGR; (3) increasing commodity cost for electric and gas service, natural disaster risk; (4) worse-than-expected regulatory outcomes; and (5) volatility to 30yr US Treasuries, as ComEd ROEs are linked to 30YR USTs.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $30 target price. Our base-case multiple of 18.0x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2) new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price implied P/E multiple is in line to electrics and a premium to gas LDCs. We rate NI Outperform as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Outperform rating and $30 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PG&E Corporation (PCG.N)

Method: Our target price is $19. We value PCG on an SOTP. We apply a 20% discount to our 2025E electric earnings, a 15% discount to gas earnings, and 5% discount to transmission earnings relative to the 2025E electric and gas group P/E multiples. We impute ~$1.0Bn of net wildfire liabilities, which include an additional $1Bn wildfire liability for fires to handicap incremental wildfire event risk. We see ~14% total return for PCG in our base case, which is the above average for our coverage universe. Our target price implies an 12.8x consolidated P/E, a -18% discount, which is still one of the widest across the sector. We rate PCG Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $19 target price include: PCG has a history of having utility assets involved with large wildfires in CA. Additional wildfires in 2022-24 could materially affect our valuation. PCG is subject to environmental factors such as severe weather conditions and climate change, which could increase wildfire events. PCG's higher-than-average debt/capital and lower-than-average FFO/debt, while we forecast improving lower cash flow from rate proceedings or materially adverse rate case outcomes, could drive incremental equity needs or reduce the likelihood of reinstating the dividend.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Pinnacle West Capital Corporation (PNW.N)

Method: We value PNW using a P/E approach, applying relative premiums/discounts to the various operating subsidiaries, which yields a $80 target price. We hold an outperform rated view on APS, given our view of an improving AZ regulatory climate and the pending SCR case which further strengthens the companies case around it's legacy SCR investment. We rate PNW Outperform as we expect the stock's total return to be above peers over the next 12 months.

Risk: Risks to our Outperform rating and $80 target price include: The uncertainties around the timely recovery of investment and operating expense associated with pollution control costs and earning sufficient return on equity to compensate the shareholder.

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.

Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.

Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	52%	(26% banking clients)

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

Rating	Versus universe (%)	Of which banking clients (%)
Neutral/Hold*	37%	(22% banking clients)
Underperform/Sell*	10%	(21% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A. but not an employee of Credit Suisse Bank (Europe) S.A. , with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.

Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit Suisse. Part of the author(s)´s compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/ companies or the subject securities.

This research report is authored by:

Credit Suisse Securities (USA) LLC	Nicholas Campanella ; Fei She, CFA ; Nathan Richardson

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.

Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/ manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.

An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures. For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change.

Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.

This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).
EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.
Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

Energy: Electric Utilities

Midweek Thoughts — NWE, SO, AGR, AEP, PNW, ED, DUK, PEG, EXC, FE, NOVA

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

This week, NWE files rebuttal testimony in MT electric and gas rate cases; SO's Vogtle Unit 3 reaches initial criticality; parties continue discussions to salvage the Commonwealth Wind offshore project; November ballot referendums for and against municipalization of IOUs likely to move forward in ME; OK Staff filed testimony in PSO's electric rate case; the AZ Court of Appeals issues an opinion in favor of PNW in 2019 rate case appeal; ED announces a $1B share repurchase program; the FL PSC votes to approve recovery of DUK's 2022 fuel and storm restoration costs; DUK's Pisgah Ridge Solar facility in TX begins operations; the NJ governor names two new commissioners to BPU; NOVA partners with David Energy for customers to sell power to the grid; and EIA releases its March Short-Term Energy Outlook.

Industry News and News from Companies in Our Coverage

NWE — NWE files rebuttal testimony in MT electric and gas rate cases: NWE filed rebuttal testimony and updated its revenue request to $175M and $27M for electric and gas, respectively. NWE maintained its request for a 10.6% ROE, 48.02% equity, and a YE21 test year. This compares to NWE's initial request for revenue increases of $171M and $23M, respectively, and the MT Consumer Council's recommended $66.7M and $6.7M revenue increases, respectively. The MCC's recommendation is premised on a 9% ROE and 48.02% equity. NWE continued to advocate for the need of the three proposed riders, including the reliability rider, wildfire mitigation rider, and the technology rider, after the Council recommended that the PSC reject them. Evidentiary hearings are scheduled to begin on April 11, with an outcome expected by June.

Figure 1 - NWE Initial vs. Rebuttal Ask

	Initial		Rebuttal	
($M)	E	G	E	G
Base Rates	91.8	20.2	90.6	22.4
PCCAM	68.1	n/a	69.6	n/a
Property Tax	11.1	2.7	14.5	4.2
Total	171.0	23.0	174.8	26.6

Source: Regulatory filings, KeyBanc Capital Markets Inc.

SO — Vogtle Unit 3 reaches one of the final steps before entering service: SO announced that Vogtle Unit 3 reached initial criticality, one of the last steps before the unit enters service. Initial criticality is part of startup testing and highlights the beginning of a self-sustaining nuclear reaction inside the reactor. The timeline aligns with the Company's latest schedule of reaching initial criticality in March/April. As a reminder, the unit is expected to enter service in the May-June timeframe after delays due to pipe vibrations and two other more minor issues that occurred during startup and pre-operational testing. As of the 4Q22 earnings call, the Company's total cost forecast for Vogtle is expected to be ~$10.6B. As a reminder, SO will seek a prudence review for all costs exceeding $7.3B once HFT begins at Unit 4.

AGR — Discussions continue to salvage the Commonwealth Wind offshore project; outcome uncertain:

- According to press reports, the MA secretary of energy and environmental affairs is working with AGR to negotiate an agreement on revised contract terms for the 1.2 GW offshore wind project. Based on the letter from the secretary, it appears that the utilities are also willing to negotiate. AGR on the other hand believes that contract termination is the only financially viable outcome.
- As background, AGR requested the DPU allow it to renegotiate the PPAs with the off-takers ES and National Grid due to the deteriorating project economics (a function of inflation, higher rates, and supply chain bottlenecks). The utilities declined to take AGR up on its offer, at which point AGR requested the DPU dismiss the PPA approval proceedings, which the DPU declined to do. AGR plans to terminate the contract (the process of how that will be achieved is unclear) and bid into the new RFP.
- MA's Healey administration is also suggesting that AGR could be penalized if it terminates the contracts, and the experience of bidders will be a determining factor in future bids. Other elected leaders are going as far as proposing that AGR be banned from

bidding on any future projects if AGR proceeds with terminating the contracts, adding that simply charging a penalty ($24M-$48M) and allowing it to rebid would set a bad precedent.

AGR — November ballot referendums for and against municipalization of IOUs in ME likely to move ahead: A Superior Court judge rejected a lawsuit brought by supporters of municipalization. The lawsuit was brought by supporters of Our Power, saying that several signatures secured by an opposing referendum brought by No Blank Checks were incorrectly certified. The court ruled that the backers of the suit failed to prove that the signatures were collected improperly. Our Power is a citizens group that is supporting the creation of a state-owned utility called Pine Tree Power that would replace state IOUs Versant and AGR's CMP. No Blank Checks is a ballot initiative supported by the utilities asking that any state borrowing of over $1B should require voter approval.

AEP — Staff filed testimony in PSO's OK electric rate case: Staff proposed a $161M revenue increase, premised on a 9% ROE and 54.6% equity. This compares to PSO's request for a $294M revenue increase, premised on a 10.4% ROE and 54.6% equity. The main differences are the lower ROE and lower depreciation rates. Regarding rate design, PSO requested a one-year formula-based rate pilot with a 100 bps deadband, or as an alternative, PSO proposed improving the current SPP Transmission Cost Tariffs, implementing the Grid Enhancement and Resiliency (GEAR) Rider, and changes to the Effective Tax Reserve rider, while Staff opposed the Company's implementation of a GEAR Rider. If the OCC approved the GEAR rider, Staff would support a $5M annual revenue requirement cap with recoverable costs limited to those pertaining to automation. Staff will address the formula-based rate plan in its rate design testimony due on March 20. PSO requests a final decision by May 21, 2023, and for new rates to go into effect by January 1, 2024.

Figure 2 - AEP OK Electric Rate Case Comparative Analysis

Figure 1: Net Income Calc ($M)	AEP OK	Staff Brief

Source: Regulatory filings, KeyBanc Capital Markets Inc. estimates

PNW — AZ Court of Appeals issues opinion in favor of PNW in 2019 rate case appeal: The AZ Court of Appeals issued an opinion vacating the 20 bps ROE reduction and allowing PNW to recover the costs of the Selective Catalytic Reduction projects totaling $215M. The opinion would allow PNW an ROE of 8.9%, compared to the 8.7% authorized ROE in the 2019 rate case. The case is remanded back to the ACC for further proceedings. Intervenors are able to seek an appeal at the Supreme Court. The allowed SCR recovery could provide a $200M benefit or ~$0.06 of EPS upside to current guidance.

ED — ED announces $1B share repurchase program: ED announced it entered into an accelerated share repurchase program to purchase ~8.7M shares for a total cost of ~$1B. ED made the $1B payment and received the shares on March 7. The total number

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

of shares can still change between now and when the transaction closes, which is expected to occur no later than 3Q23. ED is using a portion of the proceeds from the sale of its clean-energy business to conduct the share repurchase. ED also removed 2023/2024 equity needs and will repay $1.25B of outstanding debt from the sale proceeds.

DUK — FL PSC votes to approve recovery of 2022 fuel and storm restoration costs: DEF received Commission approval to recover $469M over 21 months for fuel costs due to higher actual fuel costs than forecast in 2022. The increase is due to the under-recovery of $1.2B in 2022, offset by a $710M reduction to DEF's fuel purchased power cost recovery clause (FCR) to reflect declining natural gas prices in 2023 compared to prior estimates. DUK will begin recovering the costs in April. Additionally, the Commission approved DEP to recover ~$442M in interim storm restoration costs related to several hurricanes. The storm costs will be recovered over a 12-month span beginning in April.

DUK — 250 MW Pisgah Ridge Solar facility in TX begins operations: DUK's subsidiary DESS began commercial operations of the 250 MW Pisgah Ridge Solar facility in TX. DUK will own and operate the project. The Company has signed PPAs for ~90% of the output, including 15-year virtual PPAs with Charles River Laboratories and Meijer for 102 MW and 83 MW, respectively. An undisclosed third company has signed a 15-year PPA, as well. DUK launched DESS in 2021, which unified Duke Energy Renewables, REC Solar, and Duke Energy One under one brand. The entity cumulatively owns and operates ~5.3 GW of renewable power projects. DUK is in the process of selling its Commercial Renewables business and expects a deal to close by 2H23.

PEG, EXC, FE — NJ governor names two new commissioners to BPU: Governor Murphy selected Christine Guhl Sadovy and Marian Abdou to replace Commissioners Bob Gordon (D) and Dianne Solomon (R), respectively. Mr. Gordon's term expires this month, while Ms. Solomon has served on an expired term since October 2019. Another commissioner, Mary-Anna Holden (R), is serving past her term, which expired in March 2021. As a reminder, the NJ BPU is made up of five commissioners that serve six-year terms. The primary proceedings we are tracking in NJ include the Offshore Wind Solicitation and EXC's ACE electric rate case, and FE expects to file a rate case by the end of the month.

NOVA — NOVA partners with David Energy for customers to sell power to the grid: NOVA announced a partnership with TX retail electric provider David Energy that will allow TX customers to sell excess capacity to the grid. The plan will bring NOVA's Adaptive Retail energy plan to TX allowing customers with solar and storage to sell the power in real-time based on the price of energy in the wholesale market. The plan will begin later this month.

EIA's March Short-Term Energy Outlook: EIA's March STEO forecasts that electricity generation will be down 1.9% in 2023 before rebounding by +1.6% in 2024. This compares to previous forecasts of -2.2% and +1.8% in 2023 and 2024, respectively. Mild weather in January and February resulted in lower natural gas demand, and the EIA now expects storage levels to be 23% higher than the five-year average at the close of the withdrawal season at the end of March, compared to February's estimate for storage levels to be at 16%. As a result, the EIA forecasts natural gas prices to drop ~53% compared to 2022 levels and average ~$3.02/MMBtu, before increasing to ~$3.89/MMBtu in 2024. This compares to prior estimates for ~$3.40/MMBtu in 2023 and $4.04/MMBtu in 2024. EIA maintained its forecasts for the electricity generation mix, which will continue the trend toward renewables, with the share of natural gas declining to 37% of U.S. generation in 2024 (vs. 39% in 2022), as solar and wind increase to 16% of U.S. generation in 2023 and 18% in 2024 (up from 14% in 2022). Coal will decline to 17% in 2023 and 17% in 2024 (from 20% in 2022). Wholesale power prices are expected to range from $30/MWh in ERCOT to $80/MWh in the Northwest. While power prices across the West are expected to decrease ~20% in 2023 compared to 2022, overall electricity demand in the region will keep power prices relatively high.

Figure 3 - EIA March STEO

Summary Investment Thesis and Valuation

Investment Thesis

As a pure-play regulated utility, Exelon has refocused its core operations around an advantaged T&D portfolio with leverage to infrastructure renewal efforts across an aging urban network and long-term electrification tailwinds. Years of regulatory engagement have yielded multi-year plan frameworks in MD and DC amid improving regulatory outcomes across both jurisdictions, plus the prospects of ROE normalization in IL's upcoming ratemaking transition. We see earned ROE upside under both and incremental to the company's already attractive 6-8% EPS growth. EXC's projected 8.1% rate base CAGR screens as top tier, with upside potential as grid needs increase due to incremental renewables, broader economy electrification, and growing system resiliency/reliability needs.

Valuation

We lower our Dec 2023 price target to $47, from prior $48, based on an SOTP valuation using our 2024 estimates. We use an average 18.6x P/E multiple for the regulated utility and corporate business segments. The lower price target is due to decreased peer average multiples.

Investment Thesis, Valuation and Risks

Exelon Corp. *(Overweight; Price Target: $47.00)*

Investment Thesis

As a pure-play regulated utility, Exelon has refocused its core operations around an advantaged T&D portfolio with leverage to infrastructure renewal efforts across an aging urban network and long-term electrification tailwinds. Years of regulatory engagement have yielded multi-year plan frameworks in MD and DC amid improving regulatory outcomes across both jurisdictions, plus the prospects of ROE normalization in IL's upcoming ratemaking transition. We see earned ROE upside under both and incremental to the company's already attractive 6-8% EPS growth. EXC's projected 8.1% rate base CAGR screens as top tier, with upside potential as grid needs increase due to incremental renewables, broader economy electrification, and growing system resiliency/reliability needs.

Valuation

We lower our Dec 2023 price target to $47, from prior $48, based on an SOTP valuation using our 2024 estimates. We use an average 18.6x P/E multiple for the regulated utility and corporate business segments, which is at a modest premium to peers given the constructive regulatory setup and robust electrification investment opportunity. The lower price target is due to decreased peer average multiples.

Risks to Rating and Price Target

- Regulated electric and gas utilities are subject to strict federal and state regulation, including determinations of allowed revenues. Any change to regulations may cause future earning power to differ materially from current expectations.
- ComEd currently operates under a deferred prosecution agreement (set to end in 2023) due to past lobbying practices in Illinois. These legacy issues bring up the potential for negative headline risk if new information comes to light.
- The company possesses attractive leverage to growing electrification trends. However, if these investments develop slower than we anticipate it could lead to a weaker earnings outlook than we currently forecast.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

investment banking services within the previous 12 months.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: NWE, AEP, DTE, SRE, DUK, CMS, XEL, PNW, ETR, EXC, CNP

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

On our regulatory calendar, we are tracking proceedings in NWE's electric and gas rate cases in MT, PSO's electric rate case in OK, DTE's MI IRP, Oncor's rate case in TX, and DUK's electric rate case in KY. In other news, MI Ice Storm and related outages bring attention back to grid resilience; the TX Legislature introduces several bills focusing on grid resilience; the CO PUC reaffirms guidelines for state natural gas systems to help reach emission reduction targets; lawmakers reject ROFR bills in MT and OK; the MT PUC approves NWE's restructuring plan; the SD PUC allows deferred accounting treatment for costs related to studying the feasibility of nuclear power; the SPP Markets+ prepares to develop an energy market for the Western states; ETR selects EPC consortium for Orange County Advanced Power Station; DEF prepares to begin construction on two solar projects, and a MD PSC nominee withdraws.

Regulatory Calendar

NWE — Rebuttal testimony in NWE's MT electric and gas rate cases is due on March 6: In intervenor testimony, the MT Consumer Council recommended $66.7M and $6.7M revenue increases for electric and gas, respectively, both premised on a 9% ROE and 48.02% equity. The Council also recommended that the PSC reject the reliability rider, wildfire mitigation rider, technology rider, and the NWE proposed PCCAM adjustments, which the Council believes would inherently shift more risks to the customers or are controllable costs that do not require trackers. This compares to NWE's request for revenue increases of $171M and $23M for electric and gas operations, respectively, based on a 10.6% ROE, 48.02% equity, and a YE21 test year. Evidentiary hearings are scheduled to begin on April 11, with an outcome expected by June.

AEP — Intervenor testimony in PSO's OK electric rate case is due on March 7: AEP's subsidiary PSO filed an electric rate case with the OCC requesting a $173M net revenue increase, premised on a 10.4% ROE, 54.6% equity, and a $4.5B rate base as of June 30, 2022. The drivers include incorporating portions (Maverick and Traverse) of the North Central Wind Facilities that are currently under rider-based recovery, into the rate base, acquisition of the Rock Falls Wind Facility (155 MW), and the accelerated depreciation for Northeastern Unit 3 (473 MW) to align with the 2026 retirement date. PSO is requesting a one-year formula-based rate pilot with a 100 bps deadband. As an alternative to the FBR pilot, PSO proposes improving the current SPP Transmission Cost Tariffs, implementing a Grid Enhancement and Resiliency Rider, and changes to the Effective Tax Reserve rider. PSO requests a final decision by May 21, 2023, for new rates to go into effect by January 1, 2024.

DTE — Staff and Intervenor testimony in DTE's MI IRP is due on March 9: DTE's IRP is an exercise in retiring coal sooner than planned while supplementing with adequate dispatchable resources. Belle River (1.3 GW) will stop using coal by 2026 and instead operate as a peaking gas unit. Monroe (3.2 GW) will retire in two phases by 2035. As a replacement, DTE will deploy 5.4 GW of renewable generation and 760 MW of battery storage by 2032. It will be crucial to increase battery storage and peaker plants in line with the growth in renewable generation to maintain reliability. To that end, DTE is identifying dispatchable resources to replace Monroe and has put a 950 MW natural gas unit with CCUS on the IRP. The plan takes the provisions of the IRA into consideration. See our detailed note on the IRP here. Management would be keen to pursue a settlement even as it expects some challenges to the timing of the retirement of the Monroe coal plant, and some pushback on adding natural gas resources.

SRE — Final order in SRE's Oncor TX rate case is expected on March 9: The Oncor rate case is on the PUCT open meeting agenda for March 9 and a formal order should follow. The ALJ issued a PD in December recommending a $60M net revenue decrease, premised on a 9.3% ROE, 42.5% equity, and a $17.8B rate base. The PD compared to Oncor's request for a $251M net increase in rates ($287M increase in distribution rates offset by a $36.5M reduction in transmission rates), premised on a 10.3% ROE and 45% equity layer. Since the ALJ report, Oncor filed reply briefs outlining several inconsistencies in the PD as well as mathematical errors pointed out by Staff since the PD was issued. See our write-up on the reply briefs here.

DUK — Intervenor testimony in DUK's KY electric rate case is due on March 10: DUK KY (Docket: 2022-00372) is seeking a $75M rate increase, premised on a 10.35% ROE and 52.51% equity layer. The drivers for the revenue increase include recovery of ~$300M in capital investments since the last rate case and adjustment of the depreciation rates for the coal-fired East Bend (600 MW) and gas peaker Woodsdale (572 MW) to align with the change in the expected lives of the plants from 2041 to 2035 for East Bend and from 2032 to 2040 for Woodsdale. Hearings are expected to commence in 2Q23, and new rates are expected to become effective in 3Q23.

Recent Developments for Companies Under Our Coverage

From our midweek: A MT bill proposes ROFR for transmission projects; AVA files a gas rate case in OR; NM PRC appears to be reviewing the AGR-PNM merger; PEG files a three-year gas system modernization program with the NJ BPU; FPL files to further reduce fuel cost true-up recovery; the WI Governor appoints new Commissioner to PSC, and ED completes the sale of its clean-energy business.

CMS, DTE — MI Ice Storm and related outages bring the need for grid resilience back to the forefront:

- MI regulators are reviewing grid resiliency measures in light of the recent ice storm that left over 700K customers (mostly in DTE's service territory, but also in CMS's territory) without power. The MPSC is undertaking a grid resilience study. While undergrounding is an option, according to Chair Scripps, it also leads to greater difficulty in restoring power from a flood-related event if the wires are underground, even though the risk of outages is lower. For now, it appears that tree trimming and vegetation management will remain the key part of grid maintenance while strengthening the vulnerable portions.
- Also, as such events tend to do, the discussion of municipalization appears to be back in the news as Ann Arbor residents ponder the option. Ann Arbor is undertaking a study currently whether to create a city-owned utility to replace DTE, the current energy provider which, in their mind, could also help accelerate the transition to renewable energy by creating a sustainable energy utility. As we have written in the past, municipalization has had a weak record in the past with recent instances of attempted municipalizations in San Diego, Chicago, and Boulder, CO all resulting in re-contracting with the incumbent utility. The EIA conducted a study in 2018 that showed that public utility customers face fewer outages than private ones and also that public utility customers tend to pay less on average for their power use than private utility customers.

CNP, ETR, AEP, XEL — Bills to watch in the current TX legislature: TX legislature is currently in session with grid security in focus. The session ends on May 29, and the outcomes of these bills will likely shape utility rate filings in the state including CNP's Houston Electric filing. We highlight some key filings below:

- **HB 3042:** HB 3042 proposes that PUCT calculates an ROIC using the capital ratio as reported on the utility's most recent financial statement before the rate case proceeding, vs. a hypothetical construct. If the equity layer exceeds 60%, the PUCT will use 60% as the equity layer.
- **SB 1015 and HB 3043:** SB 1015 and HB 3043 relate to periodic non-fuel rate adjustments petitioned by a utility, based on capital investments made. The bill proposes permitting up to two annual rate adjustments, vs. one currently.
- **HB 2262 and SB 1049:** HB 2262 and SB 1049 allow utilities to recover the costs of alternative gases (e.g., RNG, biomass, hydrogen) and the required infrastructure to acquire, interconnect, or produce the gas supply.
- **SB 1075:** SB 1075 proposes allowing T&D utilities to lease or own and operate facilities that provide temporary emergency power either when a significant outage is imminent or restoring power during a widespread power outage. The utilities would be able to procure facilities with a six-month lead time.
- **HB 2555:** HB 2555 proposes requiring T&D utilities to propose a system resiliency plan and the approach to be used over a minimum of three years. The plan would require utilities to harden electrical T&D facilities, and underground distribution lines, install lightning, and flood mitigation measures, implement cybersecurity measures, and implement vegetation management and wildfire mitigation and response.

XEL — CO PUC reaffirms guidelines for state natural gas systems to help reach emission reduction targets: The PUC issued a decision mostly reaffirming its prior decision to overhaul planning for natural gas distribution systems to help CO achieve GHG emission reduction targets. One of the few revisions the Commission made was to allow gas utilities to bank credits from capturing waste methane for future periods. Otherwise, the PUC reaffirmed the decisions regarding certificate of convenience and public necessity (CPCN) requirements (all projects exceeding $13M qualify) — a feature protested by utilities as an undue expansion of PUC authority. The PUC also maintained that customers must bear the full cost of new line extensions in connecting to the gas grid. Utilities will be required to make a bi-annual filing of planned capital projects to the PUC for approval, including every project expected to cost more than $3M. The plan will be gradually implemented over time, yielding toward a fully adjudicated process akin to rate cases. XEL will file the first gas infrastructure plan application in 2023. CO's law requires statewide GHG emission reductions of 26% by 2025, 50% by 2030, and 90% by 2050, compared to 2005 levels.

AEP, NWE — Lawmakers reject ROFR bills in MT, OK: ROFR-related bills in MT and OK, MT SB 353 and OK SB 498, failed in the current legislative sessions. SB 353 would have expanded the MT right-of-first-refusal law to include federally recognized reliability organizations (e.g., NWE) - beyond a 2017 bill that allowed rural electric co-ops ROFR in eastern MT to include the entire state. In

Sophie Karp (917) 368-2361 / sophie.karp@key.com

OK, SB 498 proposed ROFR on transmission projects to incumbent utilities in the state. Read more about recent developments of ROFR here and here.

NWE — MT PUC approves NWE's corporate restructuring plan: The MT PSC issued an order approving a settlement between NWE and interveners regarding the Company's proposed restructuring plan, which will legally separate the MT utility from the SD and NE utilities. NWE will also establish a holding company to hold the ownership interests of all subsidiaries. The MT PSC approval clears the last hurdle for the Company as the NE PSC, SD PUC, and the FERC approved the plan in 2022.

NWE — SD PUC allows deferred accounting treatment for costs related to studying the feasibility of nuclear power: The SD PUC issued an order allowing NWE to use deferred accounting for costs associated with a nuclear plant study beginning March 1. The costs will need to be approved in subsequent rate filings for recovery. NWE proposed adding an 80-320 MW nuclear plant to replace future coal generation retirements as part of its 2022 SD IRP. According to NWE, a new nuclear facility could cost between $1.2B-$1.6B. NWE will complete the study in 2023, and aim for DOE funding for new nuclear plants.

PNW — SPP Markets+ prepares to develop an energy market for the Western states: The SPP announced that it will start the first phase of developing Market+, a day-ahead, real-time energy market allowing members to participate voluntarily for those not ready to participate fully in an RTO. SPP's proposed plan includes two phases. The first phase consists of the design of market protocols and tariff structures and begins immediately. The second phase, which is dependent on FERC approvals, will include final commitments from the participating entities to fund the plan and integrate them into the system. The first development phase will begin immediately. Members committed to funding Markets+ phase one include PNW, Puget Sound, BPA, and others. CAISO's Western Energy Imbalance Market is currently the only regional market in the West.

ETR — ETR selects EPC consortium for Orange County Advanced Power Station: ETR selected a consortium of Mitsubishi Power Americas, Inc., Sargent & Lundy, and The Industrial Company to construct the Orange County Advanced Power Station located in TX. Sargent and TIC will be the engineer of record and constructor, respectively. Mitsubishi will supply the hydrogen-capable power train, which includes the gas turbines, steam turbine, steam generator, and advanced control system. The PUCT approved the 1,257 MW CT Orange County plant but did not approve ETR's proposal for a dual fuel capability for up to 30% hydrogen. Still, the Commission left the hydrogen issue open (Docket No. 52487) for now. The plant is expected to enter service in May 2026 and cost ~$1.55B.

DUK — DEF is set to begin construction on two solar projects: DUK's subsidiary DEF is preparing to commence construction on the 75 MW Mule Creek Renewable Energy Center and the 75 MW Winquepin Renewable Energy Center. The projects are expected to take 9-12 months to complete, implying a 1Q24 COD. The new facilities are part of DUK's Clean Energy Commitment, which allows customers to subscribe to solar power and earn credits toward their electricity bills without installing or maintaining their own equipment. The program comprises 10 solar generating facilities totaling 750 MW and costs ~$1B. DUK's larger goal is to invest $2B and add 1,500 MW of solar in FL by 2024, including 25 solar power plants across the state.

EXC — MD PSC nominee withdraws: MD PSC Commissioner Juan Alvarado withdrew from the PSC before receiving Senate confirmation. State legislators and environmentalists opposed Alvarado's candidacy given his prior work as an advocate for the natural gas industry. The MD PSC is a five-member commission with the governor nominating the members and the Senate confirming them. EXC's BGE and PEPCO are expected to file multiyear rate cases in MD later this year, as is FE's Potomac Edison.

Earnings Recap

SRE — SRE reported 2022 results above expectations and above the high end of the guidance range — led to a large extent by the stronger than-anticipated results at SIP (Cameron in particular) and with Oncor benefiting from more favorable weather trends. Management maintained the 2023 guidance at $8.60-$9.20, which while a step-down y/y, is +6% vs. the midpoint of the original 2022 guidance. SRE also reiterated the 6-8% long-term EPS CAGR. We expect more color on the 2023 EPS outlook, an initiation of the 2024 outlook, and a rollover of the 5-year capex with the 1Q call when the TX rate case will be in the rearview. In our view, SRE is becoming more of an LNG play with several projects either in construction (ECA Phase 1), on the cusp of starting construction (Port Arthur Phase 1), or in the advanced stages of planning (Cameron LNG Phase 2), with many others in the pipeline. See our note here.

PNW — PNW reported 4Q and 2022 results slightly below consensus but in line with guidance as ongoing headwinds from the 2019 rate case outcome and an impairment charge in the 4Q more than offset continued sales growth. The Company provided 2023 guidance amid the 2022 rate case proceedings and new rates not becoming effective until December. Recent signs have pointed to an improving regulatory construct, but we remain cautious until we see tangible data points. See our note here.

EIX — EIX reported 2022 results ahead of expectations and reiterated the 5-7% EPS CAGR through 2025, with a 2025 EPS range of $5.50-$5.90. 2023 growth will, however, be muted as higher interest costs on the wildfire claims balance eats into normal rate base growth — and making the long-term CAGR leveraged to 2024/25. That said, there is progress in putting the wildfire claims issue to rest with the first cost recovery filing planned for 3Q23. Management has also made strides in reducing the risk from wildfires through its multi-year covered conductor deployment program, which has reduced the need for PSPS. See our note here.

Sophie Karp (917) 368-2361 / sophie.karp@key.com

AEP — AEP posted 4Q results ahead of guidance and consensus estimates, while maintaining 2023 guidance and its 6-7% long-term EPS growth rate. The earnings results were overshadowed by the Company's announcement last night that it reached an agreement to sell 100% of its commercial renewable business. The announced sale in tandem with the refiling of its FERC 203 application for the KY Power sale have the ability to strengthen the balance sheet and reduce future equity needs. See our note here.

DTE — DTE reported results at the high end of the guidance range and above our and consensus estimates. Management reiterated the 2023 EPS outlook of $6.09-$6.40 with a bias toward the midpoint as it plans to implement a series of cost management initiatives to offset the recent sub-optimal electric GRC outcome while still meeting the previously provided EPS guidance. Proceedings in the IRP bear watching as staff and intervenor testimony is scheduled for March. The initial response to the filing appears constructive. Also, on tap for the coming months are proceedings in the electric GRC where DTE is seeking a $619M rate increase. Management expressed interest in reaching settlements in both proceedings, and we expect these to drive news flow in the near term. See our note here.

AGR — AGR reported an in-line quarter and provided a 2023 EPS outlook while reiterating a 6-7% EPS growth rate through 2025. What remains unclear is the contribution from the core business in the earnings cadence vs. one-off events, including historical and anticipated gains on sales. 2023 EPS guidance of $2.20-$2.35 includes a $0.30 contribution from PNM, which we are not factoring in as yet, thus implying a downside to our forecast of $2.29. On operations, there are several items to watch, including the NECEC trial in April, follow-through on the Commonwealth Wind PPA termination and AGR's plan to participate in the next MA wind solicitation, and negotiations with stakeholders regarding the Park City PPA, as well as the onshore capital recycling initiatives. See our note here.

AVA — AVA reported 4Q results above consensus and the high-end of its guidance range, as the Other segment benefited from a fair market value adjustment for one of AVA's investments. The Company maintained 2023 guidance, including $0.04-$0.06 for the Other segment. AVA will likely continue to experience a significant regulatory lag in 2023 until a new WA rate case filing goes into effect sometime in 2025. See our note here.

PEG — PEG reported an in-line quarter, maintained the midpoint of 2023 guidance (narrowing the range), and reiterated the 5-7% long-term growth rate. We expect a long-term strategy discussion at the March 10th analyst day, even though PEG has simplified its story materially over the last couple of years. The next data points relate to monetization of the offshore acreage and the expected proceeds (including the use of proceeds likely towards the regulated business), potential investment to lengthen and strengthen the life of the nuclear assets, and additional steps to mitigate pension volatility. We also expect some initial color on the upcoming NJ rate case. See our note here.

CNP — CNP continues to deliver on its EPS growth targets and reported EPS in line with the midpoint of guidance despite higher debt service costs and an O&M pull forward. Management reiterated the short-term and long-term EPS growth CAGR of 6-8% (8% in the short term), the capex plan through 2030, and the commitment to fund the growth without external equity issuance. See our note here.

NWE — NWE posted 4Q22 results below our and consensus estimates, as the Company continues to be pressured by higher power costs in the region, O&M, and inflation. NWE is working to reduce its exposure to power markets and the mechanisms in the MT GRC will be instrumental in adding new generation and allowing timely recovery of power costs. We expect an outcome in the near term, and the upcoming MT IRP filing is another near-term catalyst. Constructive outcomes in both filings will validate our thesis around the long-term investment opportunity to fuel rate base growth. See our note here.

ED — ED reported an in-line quarter with EPS of $0.81, compared to a consensus of $0.80. ED also introduced 2023 EPS guidance and maintained its long-term growth rate rebased in 2023. The biggest announcement was that ED reached a settlement in its 2022 CECONY electric and gas rate cases, although we believe ED will find it challenging to achieve its long-term growth rate. See our note here.

SO — SO reported an in-line quarter for 4Q22, while providing relatively flat guidance for 2023 and lowering its 2024 guidance range, which was consistent with our expectations. Additionally, SO further delayed Vogtle Unit 3 and extended the window for Vogtle Unit 4. The delays and associated rate impacts and carrying costs have contributed to lower guidance for 2023 and 2024 vs. previously communicated figures. Longer term, SO maintained its growth rate and refreshed its five-year capital plan, highlighting the significant capital opportunity ahead. See our note here.

CEG — CEG reported an above-forecast EBITDA for 2022 and provided constructive guidance for 2023. More importantly, the Company laid out a capital allocation strategy, which is a combination of organic growth opportunities (including a significant investment in clean hydrogen), share buybacks, and a doubling of the dividend, while still retaining dry powder should attractive M&A opportunities arise. We view this approach to capital allocation as prudent, especially as the investment opportunities from the IRA are still emerging. Higher for longer power prices provide CEG with the internal resources to pursue organic growth while being protected on the downside by the nuclear PTC enshrined in the IRA. See our note here.

ETR — ETR reported results in line with consensus estimates and reaffirmed its long-term outlook, including 2023 EPS guidance. SERI proceedings continue to be an overhang, even though the management is hopeful for a resumption of settlement talks with the

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

regulators outside of MS, which were stalled by the December 2022 order by the FERC. Outside SERI issues, the Company continues with an active regulatory schedule as it is seeking a settlement in the TX GRC and is proceeding with its LA and NO grid resiliency filings. See our note here.

POR — POR reported a slight 4Q miss and released 2023 guidance pointing at lower y/y earnings at the midpoint, which was not a surprise given the well-understood 2023 headwinds from equity dilution. More importantly, the Company reaffirmed its 5-7% long-term growth target, describing 2023 as a transition year, and provided a bullish illustrative RB growth scenario with the impact of potential future RFP wins. Our quick math suggests that a successful execution on the upside scenario could translate into a >7.5% EPS CAGR through 2027, arguably making POR one of the most attractive names in the SMID peer group. With that said, given POR's in-line valuation at present, and multiple assumptions embedded in the upside scenario, we are inclined to wait for a more attractive entry point and/or further clarity on the RFP wins and capital plan. See our note here.

AEE — AEE reported 2022 results at the high end of guidance and maintained the long-term EPS CAGR of 6-8%. 2023 guidance of $4.25-$4.45 is in line with the 6-8% growth projection. Management also provided a 2023-2027 capex plan of $19.7B, +2.4B from the previous 2022-2026 plan. We expect the capex trend to remain elevated for AEE as it invests in the MISO LRTP and MO's clean energy transition. Also higher are anticipated equity needs, with AEE now expecting $500M of annual equity issuances vs. $300M prior. Overall, we view AEE as a steady and predictable utility with meaningful capex upside to support the rate base growth targets and 6-8% EPS growth projections. 2023 is likely to be dominated by MO and IL rate proceedings. See our note here.

OTTR — OTTR reported EPS of $1.00 vs. our estimate of $0.83 and introduced 2023 guidance in line with the Street. The Plastic and Manufacturing segments are both expected to see step-downs as levels normalize and OTTR shifts toward its long-term earnings mix. OTTR is preparing to file its amended IRP to incorporate recent developments and will likely file an updated capital plan shortly after. OTTR maintained its long-term growth rate of 5-7%. See our note here.

FE — FE reported below-consensus 4Q results, which still put it in the upper half of its FY22 guidance. Strong 2022 allowed the Company to pull forward enough O&M to fully offset pension headwinds in 2023, and as a result, FE issued 2023 guidance ahead of consensus estimates and within its long-term earnings growth rate. Importantly, the Company continues to outline the path to improved earnings quality moving forward and has established a 60-70% dividend payout policy, which should return its dividend back to the growth trajectory (and consistent with our model). The new CEO announcement should be the next near-term catalyst to watch for, and FE's regulatory schedule will remain active in 2023-2024. See our note here.

EXC — EXC reported an in-line quarter as ComEd results benefited from higher ROE (linked to 30-year Treasuries). Management provided clarity on the multiyear 6-8% EPS growth rate with 2023 to be below that range as several multiyear rate plans are built into the EPS trajectory. Long term, EXC reiterated a target of a 6-8% EPS CAGR through 2026 with a bias to the midpoint or higher. We expect the inaugural IL MYRP to be the biggest item to watch in 2023 as the outcome will define the EPS outlook to a meaningful extent. Management also rolled capex by a year, with the new four-year total of $31.3B higher than the prior by $2.3B, mostly to incorporate higher spending at ComEd. See our note here.

ES — ES reported a mostly in-line quarter and provided guidance that is also mostly in line with expectations. There is no change to the EPS CAGR of 5-7% with the bias retained toward the high end. Management outlined a capex plan for $21.5B for the 2023-2027 period, which is $3.3B higher than the prior five-year plan for 2022-2026 and takes into consideration the sale of the offshore wind assets and the subsequent loss of any contribution from those assets. The sale of the offshore wind projects and acreage is taking longer than planned and management now expects a decision by 2Q with a closing likely in the 2H. While interest remains robust, the timeline for an outcome has certainly stretched, and it could be a function of the evolving offshore wind-related cost environment, a wait-and-see approach for final IRS rulings on the provisions of the IRA, and even the volatile rate environment. See our note here.

DUK — DUK reported a strong quarter with EPS of $1.11 vs. our consensus-matching estimate of $1.07, as the Company continues to benefit from strong volume growth and ongoing cost savings. DUK maintained its 2023 EPS guidance and long-term EPS growth rate, although the Company saw a slight shift in the commercial renewables sales timeline. We do not believe the delay will have a material impact on near-term earnings, and we continue to like the pro forma portfolio that includes a strong capital plan that will fuel long-term EPS and rate base growth. See our note here.

D — D reported a 4Q headline number that was in line with the midpoint, but the impairment of the solar assets made the results somewhat noisy as did other YE adjustments. More importantly, we are getting a glimpse of what a new regulatory regime may look like in VA as multiple bills move through the legislature. The de-emphasis of the contracted solar portfolio may be step one of the strategic review, but there is a lot more to come, in our opinion. We outlined various scenarios that the strategic review can take, but ultimately, we believe that investors will need to see a clear path to a "new" Dominion, even as the stock appears inexpensive on a pro forma basis. See our note here.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

WEC — WEC reported another above consensus/above guidance quarter and maintained the 2023 outlook and the 6.5-7% long-term EPS growth rate. We continue to view WEC as a top-tier utility with an extended runway for growth as coal retirements in WI create opportunities for renewables capex deployment and the recent WI rate case outcomes de-risk the 2023 outlook. See our note here.

CMS — CMS reported an in-line quarter and raised its 2023 EPS guidance by $0.01 at the midpoint. The guidance is in line with our forecast and consensus. As was expected, the Company rolled the five-year capex plan to 2023-2027, adding $1.2B vs. the prior plan (+$400M net of Covert). Also, management raised the anticipated equity issuance from up to $250M per year in the outer years of the capex plan to up to $350M—partly to fund the higher capex and to maintain financial flexibility. We expect management to be systematic in the equity raises via an ATM program. CMS's results and outlook show consistency in execution and the resulting stability in outcomes. See our note here.

XEL — XEL reported 4Q and 2022 EPS of $0.69 and $3.17, respectively, which was in line with our expectations. The Company was able to offset O&M headwinds with solid sales growth and derisk 2023. XEL maintained its 2023 EPS and long-term growth rate, which was rebased on 2022 EPS guidance. Furthermore, XEL maintained its five- and 10-year capital plans, which continue to offer incremental opportunities. Rate case activity will continue at an elevated level in 1H23, and we believe XEL will be able to continue its ability to achieve constructive regulatory outcomes, providing us confidence in the Company's long-term execution. See our note here.

NEE — NEE reported another quarter aligned with guidance and expectations and extended the 6-8% EPS cadence by another year to 2026. Management remains biased toward delivering on the high end of the guidance range. While 2022 saw a slew of regulatory headwinds, especially for solar, the long-term benefits of the IRA should provide an extended period of growth for NEER, especially as it expands its portfolio beyond solar, wind, and storage to include green hydrogen projects and previously announced initiatives in RNG. See our note here.

Figure 1 - Regulatory Calendar

Regulatory Calendar

We are not watching any items on the regulatory calendar this week.

Recent Developments for Companies Under Our Coverage

From our midweek: AY announces that it is embarking on a strategic review; the NY PSC postpones evidentiary hearings while NYSEG and RGE continue settlement discussions; the MD governor nominates two to the MD PSC; DUK partners with Daimler and Electrada to develop a micro-grid integrated EV charging center; the EPA restores 2012 Mercury and Air Toxic Standard rule for generators; FERC approves PJM's proposed rule change for the pending capacity auction; ETR requests a waiver for certain MISO seasonal capacity requirements, and VA legislature moving ahead on bills related to utility rate-making.

EXC — BG&E files Multiyear Rate Plans in MD: BG&E filed electric and gas multiyear rate plans in MD (Docket: C-9692) seeking a cumulative net increase of $602M. BG&E is seeking a net $313M electric rate increase and a $289M gas rate increase over 2024-2026. Both requests are premised on a 10.4% ROE and 52% equity. EXC proposes smoothing the rates over three years by accelerating the amortization of ADIT benefits. The request includes a performance incentive mechanism with four performance metrics related to the state's policy goals. An MD PSC decision is expected by year-end, with new rates becoming effective in early 2024. In its first MYRPs in MD, BG&E received a cumulative $140M electric rate increase and $74M gas increase. The increases were premised on a 9.5% and 9.65% ROE, respectively. Both were approved for a 52% equity layer.

EXC — ACE files NJ GRC: ACE filed an electric rate case in NJ (Docket: ER23020091) seeking a net increase of $105M, premised on a 10.5% ROE and 50.2% equity. The main drivers of the request include recovery of investments to the distribution system and necessary investments for the utility to meet the targets set in NJ's Energy Master Plan. ACE also seeks recovery for higher interest rates, inflation, and storm costs. The NJ BPU is expected to issue an order by November 17. In its last rate case, ACE received a $41M revenue increase premised on a 9.6% ROE and 50.21% equity.

AEP — LA PSC approves settlement in AEP's LA rate case: The LA PSC issued an order approving the settlement between AEP, LA Staff, and other intervenors. AEP was authorized a $27M net revenue increase, premised on a 9.5% ROE. The settlement extends the formula rate plan for three years, from 2022-2024. The FRP provides for the authorized ROE of 9.5%, with the upper band set at 9.75% ROE and the lower band set at 9.25%. AEP initially filed the application in 2019 seeking a revenue increase of $134M premised on a 10.35% ROE and 50.8% equity, which the Company lowered to $114M to remove costs associated with Hurricanes Laura and Delta that will be recovered in a separate filing.

AGR — AGR submits brief in opposition to OPA's motion to dismiss MYRP and capital adjustment mechanism:

- AGR filed an opposition requesting the ME PUC to deny the OPA's motion to dismiss the Company's multiyear rate plan and capital adjustment mechanisms. AGR believes the plan and mechanisms are under the PUC's authority and should be thoroughly evaluated on record. If the MYRP and mechanisms were dismissed, it would represent a significant waste of time given the amount of time dedicated to the rate case at this point and likely result in CMP filing a new rate case sooner than expected.
- The OPA filed the motion to dismiss AGR's MYRP and capital adjustment mechanisms since it would result in unjust customer rates. Additionally, OPA notes that it would result in multiple rate increases and the utility overearning. OPA would like the rate case to be for a single-year revenue increase, similar to AGR's 2014 rate case when the Company also initially requested a multiyear plan. As a reminder, the OPA did not calculate the required revenue but recommended a $25.3M reduction to AGR's request in RY1 and an 8.79% ROE and 47% equity layer. The OPA also recommended that the Commission allow AGR only a single-year rate increase.
- In rebuttal testimony, AGR updated its revenue requests lowering the cumulative requested revenue increase to $94.9M ($43.5M in RY1, $27.7M in RY2, and $23.7M in RY3), compared to the original $101.8M ($51.2M in RY1, $27.6M in RY2, and $23.0M in RY3). AGR maintained a 10.2% ROE and 50% equity. Adjustments included higher forecasted sales in RY1 and other revenue items. In December, Staff recommended a 9.0% ROE and maintained CMP's 50% equity layer request while raising concerns regarding CMP's $590M forecasted capital plan for 2023-2025 and the capital adjustment mechanism. Evidentiary hearings are set to begin May 16, and AGR requests rates to become effective August 1, 2023. The last rate case in ME was authorized at an 8.25% ROE and 50% equity layer. The ROE included a 100 bps penalty that was recently removed.

D - VA legislators and governor reach a broad-based compromise with reference to the state's utility regulatory framework.

What happened? VA legislature and the governor's office have reached a near-unanimous compromise outcome that will define D's (and AEP's) regulatory framework in the state. The legislative solution will mark a "reset" for Dominion's VA utility and will help the Company formulate its overall corporate restructuring strategy. We provide key elements of the proposed legislation below. See bill text here: HB 1770; SB 1265.

- Both houses have agreed to set the ROE at 9.7% for two years. After that, the SCC will have the authority to set ROE. Currently, D has an authorized 9.35% ROE with a +/- 70 bps dead band; however, the most recent triennial review showed D in the material over-earnings position relative to the authorized level. The rationale for the higher ROE for the first two years is to provide D with enough earnings to be able to secure attractive debt financing to shore up its credit metrics as it seeks capital to build new generations and also to give it time to stabilize its earning profile before the SCC takes charge.
- The bill changes the thresholds for earnings sharing—with D allowed to retain 15% of excess earnings beyond the 70 bps in the upcoming rate case, vs. the prior allowance for keeping 30%. The bill also removes the current complex legislative framework where even though there was a provision for 70% of excess earnings to be returned to ratepayers, there was also a cap on customer refunds at $50M (via the Grid Transformation and Security Act) and it let the utility apply over-earnings toward renewable and grid transformation projects in lieu of refunds (CCRO or customer credit reinvestment offset). It appears that the new bill would leave the ROE band in place but put rate reductions at the discretion of the SCC.
- The bill will allow for biennial rate filings vs. the current triennial; the first filing is expected in the summer of 2023.
- ~$350M of rider-based rate recovery will be folded into base rates.
- D can issue $1.6B in fuel cost recovery-related securitization bonds with a 10-year period.
- The final bill removes the language that altered the plant closure schedule set by the VA Clean Energy Act but instead affords power to the SCC to monitor grid reliability when approving generation retirements.

What are the implications for D? As a result of the bill implementation, Dominion will likely see ~$350M in revenue reduction at VEPCO at the time of the implementation, creating the need for balance sheet repair. The Company is amid the strategic review, which we discussed at length in our Utilities 2023 Sector Outlook.

What comes next? The legislative session ended on Saturday (February 25), and the governor has until March 27 to sign the legislation. Strong support from multiple parties, including the governor (see statements here), indicates that the bill is likely to become law. On the SCC front, there appears to be little progress toward filling two vacant seats (the SCC currently has only one commissioner and is below the two-seat minimum needed to operate). Given its newly reacquired powers, the selection of the remaining commissioners bears a close watch.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

CNP — TX state senator supports CNP's TEEEF procurement; CNP files reply to exceptions:

- TX Senator Phil King filed a letter to the commission requesting it reject the ALJ's PDa and endorsing that CNP acted prudently to procure the required temporary emergency electricity energy facilities (TEEEF) to support the TX grid in the event of a widespread load shed event similar to Winter Storm Uri. Senator King was one of the authors of HB 2483 (a bill that allows transmission and distribution utilities to secure temporary emergency electricity to aid in power restoration during a widespread outage).
- CNP filed a reply to the TCPA's exception and requested the PUCT reject the exceptions as its process resulted in the lowest cost bid. TCPA filed its exceptions in response to the ALJ's PD, arguing that CNP's bidding process used faulty data to select the winning bidder, which resulted in unreasonable costs.
- As a reminder, the TX ALJ issued a PD recommending the PUCT deny CNP's request to recover $200M for TEEEF lease payments and operating costs, deeming it imprudent. The ALJ posits that CNP leased substantially more mobile generation capacity (~500 MW) than was reasonable or necessary and failed to establish the reasonableness of its decision. According to the agreement, CNP can terminate the leases based on an adverse outcome from the commission.

D — VA legislation related to the development of offshore wind capacity passes both houses: An amended version of SB 1477 was approved by the House and Senate and will head to the governor's desk. The bill allows D to establish an offshore wind affiliate to secure a non-controlling equity financing partner for offshore wind projects. The bill also states that any gain on the utility's cost basis for the project will revert to ratepayers through a RAC credit mechanism and includes language whereby the affiliate could construct, own, and operate the project and be entitled to cost recovery as a public utility. Dominion is constructing a $2.6 GW, $10B offshore wind project as a regulated investment in VA. The bill appears timely, given D's business review and potential asset restructuring. If D decides to divest a portion of the CVOW project, it could reduce or eliminate the need for other asset sales to offset potential balance sheet dilution from an anticipated restructuring of the VA rate-making framework (see our note here). Given the risks outlined for offshore wind development above, this approach would likely receive positive feedback. The VA legislative session, which commenced on January 11, adjourned on February 25.

AEP, D — VA bill for shared solar programs for ApCo customers fails in assembly: Proposed bill SB 1083 failed as the 2022 VA legislative session ended. The bill proposed adding Phase 1 utilities, including AEP's ApCo, customers to participate in a shared solar program similar to D customers. The 2020 legislative session established a Shared Solar Program for D customers. The program is limited to 150 MW (extendable to 200 MW under certain conditions). Under the legislation, third-party groups develop community solar facilities, sign up interested customers, and sell the power to the utility. Participating customers get a bill credit from D in proportion to the power generated by the facility.

AGR, ES — CT bill related to offshore wind compensation fund receives hearing: The CT Energy and Technology Committee held a hearing for proposed bill HB 5223 last week. The bill requires offshore wind energy developers to create a fund to compensate for adverse impacts on fisheries and the marine environment or does not deliver on creating as many jobs as agreed to in the contracts. The bill has bipartisan support and is similar to a 2020 proposed bill. The CT legislative session, which commenced on January 4, is scheduled to adjourn on June 7.

AEP — AEP signs PPA for the 188 MW solar project: AEP's subsidiary AEP Energy Partners and Lightsource BP signed a PPA for the 188 MW Honeysuckle Solar Farm. Lightsource BP will build, own, and operate the project. AEP Energy Partners will receive the output once it enters service. Construction began on the project and is expected to enter service in 2024.

ETR — ETR TX signs PPA for solar resources in TX: ETR TX and Longroad Energy signed a 20-year PPA for the 150 MW Umbriel solar project. The project is the first solar resource to come online for ETR TX and will allow C&I customers to participate in the Green Future Option tariff. The tariff is awaiting PUCT approval. Construction on the project recently commenced and is expected to enter service by the end of 2023.

CMS, DTE — Winter storm causes 600K power outages in MI: Winter weather across the Midwest and MI included an ice storm that damaged trees and utility lines. At the peak, more than 600K MI customers were without power. DTE and MI customers were working to restore power by Sunday.

Earnings Recap

EIX — EIX reported 2022 results ahead of expectations and reiterated the 5-7% EPS CAGR through 2025, with a 2025 EPS range of $5.50-$5.90. 2023 growth will, however, be muted as higher interest costs on the wildfire claims balance eats into normal rate base growth — and making the long-term CAGR leveraged to 2024/25. That said, there is progress in putting the wildfire claims issue to rest with the first cost recovery filing planned for 3Q23. Management has also made strides in reducing the risk from wildfires through its multi-year covered conductor deployment program, which has reduced the need for PSPS. See our note here.

AEP — AEP posted 4Q results ahead of guidance and consensus estimates, while maintaining 2023 guidance and its 6-7% long-term EPS growth rate. The earnings results were overshadowed by the Company's announcement last night that it reached an agreement

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

to sell 100% of its commercial renewable business. The announced sale in tandem with the refiling of its FERC 203 application for the KY Power sale have the ability to strengthen the balance sheet and reduce future equity needs. See our note here.

DTE — DTE reported results at the high end of the guidance range and above our and consensus estimates. Management reiterated the 2023 EPS outlook of $6.09-$6.40 with a bias toward the midpoint as it plans to implement a series of cost management initiatives to offset the recent sub-optimal electric GRC outcome while still meeting the previously provided EPS guidance. Proceedings in the IRP bear watching as staff and intervenor testimony is scheduled for March. The initial response to the filing appears constructive. Also, on tap for the coming months are proceedings in the electric GRC where DTE is seeking a $619M rate increase. Management expressed interest in reaching settlements in both proceedings, and we expect these to drive news flow in the near term. See our note here.

AGR — AGR reported an in-line quarter and provided a 2023 EPS outlook while reiterating a 6-7% EPS growth rate through 2025. What remains unclear is the contribution from the core business in the earnings cadence vs. one-off events, including historical and anticipated gains on sales. 2023 EPS guidance of $2.20-$2.35 includes a $0.30 contribution from PNM, which we are not factoring in as yet, thus implying a downside to our forecast of $2.29. On operations, there are several items to watch, including the NECEC trial in April, follow-through on the Commonwealth Wind PPA termination and AGR's plan to participate in the next MA wind solicitation, and negotiations with stakeholders regarding the Park City PPA, as well as the onshore capital recycling initiatives. See our note here.

AVA — AVA reported 4Q results above consensus and the high-end of its guidance range, as the Other segment benefited from a fair market value adjustment for one of AVA's investments. The Company maintained 2023 guidance, including $0.04-$0.06 for the Other segment. AVA will likely continue to experience a significant regulatory lag in 2023 until a new WA rate case filing goes into effect sometime in 2025. See our note here.

PEG — PEG reported an in-line quarter, maintained the midpoint of 2023 guidance (narrowing the range), and reiterated the 5-7% long-term growth rate. We expect a long-term strategy discussion at the March 10th analyst day, even though PEG has simplified its story materially over the last couple of years. The next data points relate to monetization of the offshore acreage and the expected proceeds (including the use of proceeds likely towards the regulated business), potential investment to lengthen and strengthen the life of the nuclear assets, and additional steps to mitigate pension volatility. We also expect some initial color on the upcoming NJ rate case. See our note here.

CNP — CNP continues to deliver on its EPS growth targets and reported EPS in line with the midpoint of guidance despite higher debt service costs and an O&M pull forward. Management reiterated the short-term and long-term EPS growth CAGR of 6-8% (8% in the short term), the capex plan through 2030, and the commitment to fund the growth without external equity issuance. See our note here.

NWE — NWE posted 4Q22 results below our and consensus estimates, as the Company continues to be pressured from higher power costs in the region, O&M, and inflation. NWE is working to reduce its exposure to power markets and the mechanisms in the MT GRC will be instrumental in adding new generation and allowing timely recovery of power costs. We expect an outcome in the near term, and the upcoming MT IRP filing is another near-term catalyst. Constructive outcomes in both filings will validate our thesis around the long-term investment opportunity to fuel rate base growth. See our note here.

ED — ED reported an in-line quarter with EPS of $0.81, compared to a consensus of $0.80. ED also introduced 2023 EPS guidance and maintained its long-term growth rate rebased on 2023. The biggest announcement was that ED reached a settlement in its 2022 CECONY electric and gas rate cases, although we believe ED will find it challenging to achieve its long-term growth rate. See our note here.

SO — SO reported an in-line quarter for 4Q22, while providing relatively flat guidance for 2023 and lowering its 2024 guidance range, which was consistent with our expectations. Additionally, SO further delayed Vogtle Unit 3 and extended the window for Vogtle Unit 4. The delays and associated rate impacts and carrying costs have contributed to lower guidance for 2023 and 2024 vs. previously communicated figures. Longer term, SO maintained its growth rate and refreshed its five-year capital plan, highlighting the significant capital opportunity ahead. See our note here.

CEG — CEG reported an above-forecast EBITDA for 2022 and provided constructive guidance for 2023. More importantly, the Company laid out a capital allocation strategy, which is a combination of organic growth opportunities (including a significant investment in clean hydrogen), share buybacks, and a doubling of the dividend, while still retaining dry powder should attractive M&A opportunities arise. We view this approach to capital allocation as prudent, especially as the investment opportunities from the IRA are still emerging. Higher for longer power prices provide CEG with the internal resources to pursue organic growth while being protected on the downside by the nuclear PTC enshrined in the IRA. See our note here.

ETR — ETR reported results in line with consensus estimates and reaffirmed its long-term outlook, including 2023 EPS guidance. SERI proceedings continue to be an overhang, even though the management is hopeful for a resumption of settlement talks with the regulators outside of MS, which were stalled by the December 2022 order by the FERC. Outside SERI issues, the Company continues

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

with an active regulatory schedule as it is seeking a settlement in the TX GRC and is proceeding with its LA and NO grid resiliency filings. See our note here.

POR — POR reported a slight 4Q miss and released 2023 guidance pointing at lower y/y earnings at the midpoint, which was not a surprise given the well-understood 2023 headwinds from equity dilution. More importantly, the Company reaffirmed its 5-7% long-term growth target, describing 2023 as a transition year, and provided a bullish illustrative RB growth scenario with the impact of potential future RFP wins. Our quick math suggests that a successful execution on the upside scenario could translate into a >7.5% EPS CAGR through 2027, arguably making POR one of the most attractive names in the SMID peer group. With that said, given POR's in-line valuation at present, and multiple assumptions embedded in the upside scenario, we are inclined to wait for a more attractive entry point and/or further clarity on the RFP wins and capital plan. See our note here.

AEE — AEE reported 2022 results at the high end of guidance and maintained the long-term EPS CAGR of 6-8%. 2023 guidance of $4.25-$4.45 is in line with the 6-8% growth projection. Management also provided a 2023-2027 capex plan of $19.7B, +2.4B from the previous 2022-2026 plan. We expect the capex trend to remain elevated for AEE as it invests in the MISO LRTP and MO's clean energy transition. Also higher are anticipated equity needs, with AEE now expecting $500M of annual equity issuances vs. $300M prior. Overall, we view AEE as a steady and predictable utility with meaningful capex upside to support the rate base growth targets and 6-8% EPS growth projections. 2023 is likely to be dominated by MO and IL rate proceedings. See our note here.

OTTR — OTTR reported EPS of $1.00 vs. our estimate of $0.83 and introduced 2023 guidance in line with the Street. The Plastic and Manufacturing segments are both expected to see step-downs as levels normalize and OTTR shifts toward its long-term earnings mix. OTTR is preparing to file its amended IRP to incorporate recent developments and will likely file an updated capital plan shortly after. OTTR maintained its long-term growth rate of 5-7%. See our note here.

FE — FE reported below-consensus 4Q results, which still put it in the upper half of its FY22 guidance. Strong 2022 allowed the Company to pull forward enough O&M to fully offset pension headwinds in 2023, and as a result, FE issued 2023 guidance ahead of consensus estimates and within its long-term earnings growth rate. Importantly, the Company continues to outline the path to improved earnings quality moving forward and has established a 60-70% dividend payout policy, which should return its dividend back to the growth trajectory (and consistent with our model). The new CEO announcement should be the next near-term catalyst to watch for, and FE's regulatory schedule will remain active in 2023-2024. See our note here.

EXC — EXC reported an in-line quarter as ComEd results benefited from higher ROE (linked to 30-year Treasuries). Management provided clarity on the multiyear 6-8% EPS growth rate with 2023 to be below that range as several multiyear rate plans are built into the EPS trajectory. Long term, EXC reiterated a target of a 6-8% EPS CAGR through 2026 with a bias to the midpoint or higher. We expect the inaugural IL MYRP to be the biggest item to watch in 2023 as the outcome will define the EPS outlook to a meaningful extent. Management also rolled capex by a year, with the new four-year total of $31.3B higher than the prior by $2.3B, mostly to incorporate higher spending at ComEd. See our note here.

ES — ES reported a mostly in-line quarter and provided guidance that is also mostly in line with expectations. There is no change to the EPS CAGR of 5-7% with the bias retained toward the high end. Management outlined a capex plan for $21.5B for the 2023-2027 period, which is $3.3B higher than the prior five-year plan for 2022-2026 and takes into consideration the sale of the offshore wind assets and the subsequent loss of any contribution from those assets. The sale of the offshore wind projects and acreage is taking longer than planned and management now expects a decision by 2Q with a closing likely in the 2H. While interest remains robust, the timeline for an outcome has certainly stretched, and it could be a function of the evolving offshore wind-related cost environment, a wait-and-see approach for final IRS rulings on the provisions of the IRA, and even the volatile rate environment. See our note here.

DUK — DUK reported a strong quarter with EPS of $1.11 vs. our consensus-matching estimate of $1.07, as the Company continues to benefit from strong volume growth and ongoing cost savings. DUK maintained its 2023 EPS guidance and long-term EPS growth rate, although the Company saw a slight shift in the commercial renewables sales timeline. We do not believe the delay will have a material impact on near-term earnings, and we continue to like the pro forma portfolio that includes a strong capital plan that will fuel long-term EPS and rate base growth. See our note here.

D — D reported a 4Q headline number that was in line with the midpoint, but the impairment of the solar assets made the results somewhat noisy as did other YE adjustments. More importantly, we are getting a glimpse of what a new regulatory regime may look like in VA as multiple bills move through the legislature. The de-emphasis of the contracted solar portfolio may be step one of the strategic review, but there is a lot more to come, in our opinion. We outlined various scenarios that the strategic review can take, but ultimately, we believe that investors will need to see a clear path to a "new" Dominion, even as the stock appears inexpensive on a pro forma basis. See our note here.

WEC — WEC reported another above consensus/above guidance quarter and maintained the 2023 outlook and the 6.5-7% long-term EPS growth rate. We continue to view WEC as a top-tier utility with an extended runway for growth as coal retirements in WI create opportunities for renewables capex deployment and the recent WI rate case outcomes de-risk the 2023 outlook. See our note here.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

CMS — CMS reported an in-line quarter and raised its 2023 EPS guidance by $0.01 at the midpoint. The guidance is in line with our forecast and consensus. As was expected, the Company rolled the five-year capex plan to 2023-2027, adding $1.2B vs. the prior plan (+$400M net of Covert). Also, management raised the anticipated equity issuance from up to $250M per year in the outer years of the capex plan to up to $350M—partly to fund the higher capex and to maintain financial flexibility. We expect management to be systematic in the equity raises via an ATM program. CMS's results and outlook show consistency in execution and the resulting stability in outcomes. See our note here.

XEL — XEL reported 4Q and 2022 EPS of $0.69 and $3.17, respectively, which was in line with our expectations. The Company was able to offset O&M headwinds with solid sales growth and derisk 2023. XEL maintained its 2023 EPS and long-term growth rate, which was rebased on 2022 EPS guidance. Furthermore, XEL maintained its five- and 10-year capital plans, which continue to offer incremental opportunities. Rate case activity will continue at an elevated level in 1H23, and we believe XEL will be able to continue its ability to achieve constructive regulatory outcomes, providing us confidence in the Company's long-term execution. See our note here.

NEE — NEE reported another quarter aligned with guidance and expectations and extended the 6-8% EPS cadence by another year to 2026. Management remains biased toward delivering on the high end of the guidance range. While 2022 saw a slew of regulatory headwinds, especially for solar, the long-term benefits of the IRA should provide an extended period of growth for NEER, especially as it expands its portfolio beyond solar, wind, and storage to include green hydrogen projects and previously announced initiatives in RNG. See our note here.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. The Wolfe Byte

EXC took its story abroad for meetings with Australian-based investors. EXC has a busy year but will then have 3-4 yrs of certainty to deliver on its 6-8% EPS growth. EXC stock trades at over a half-turn discount. We see it getting to at least a half-turn premium. Outperform

Meetings with mgmt; solid communication; busy 2023 shapes LT certainty. We recently hosted virtual meetings with EXC mgmt and Australian-based investors. Our main takeaways are that mgmt is effectively communicating its 6-8% EPS growth story; the IL and MD regulatory cases this year will set up 3-4 years of certainty in the majority of EXC's business; and there is another $2B of upside to EXC's 5yr plan. The stock is beating the UTY by 245bp YTD but still trades at a 0.7x discount to peers on 2025E. We think a 0.5x premium is reasonable this busy regulatory year, given EXC is a mostly decoupled T&D utility with above-avg RB/EPS growth. But if those cases go well, we think EXC could ultimately trade closer to the high-quality, low-risk utilities that are at 1-1.5x premiums.

ComEd and BG&E MYPs key regulatory cases; no major concerns. EXC has ComEd's first 4-yr rate case in IL and both BG&E reconciliations filings and its second MYP in MD. For ComEd distribution (~25-30% of RB), intervenor testimony is on 5/18 and a decision by 12/20. For BG&E (~15-20%), decisions are expected by YE23. We don't see major concerns early in the cases, with ROEs expected to be one contested item. In IL, regulators have authorized gas utilities 9.6-9.8% ROEs. ComEd can also earn up to 32bp ROE incentives.

Upside to capital plan. EXC identified about $2B of capex (roughly half transmission) that it left out of its $31B capital plan. We view that as potential upside within 2023-26. Longer term, IRA is expected to facilitate electrification, which should be a tailwind.

No new equity, asset or minority interest sales. EXC repeated that its FFO/Debt target of 13-14% in 2023-26 continues to assume a $200M cash hit from the AMT. If the IRS allows the repairs & maintenance deduction to be treated like accelerated D&A, then EXC's FFO/D is closer to 14% than 13%. EXC's equity needs are unchanged at $425M by 2025. EXC has no plans for asset or minority interest sales. M&A also is not on the table.

ESTIMATES

($)	2023E	2024E	2025E

WOLFE RESEARCH

February 26, 2023

Investment Conclusion

We believe EXC is a low-risk utility stock. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%, driven by ~8% rate base growth. We think the stock hit last year on IRA and nonlinear EPS growth was overdone. We think the messaging and conviction on its LT outlook will be well-received. And we see the stock over time trading in line with the low-risk, high-quality utilities. This year, focus will be on a first multiyear rate case in IL, as well as a second multiyear filing in MD and reconciliations of the first MD/BGE multiyear case. Those are expected to add more certainty to an otherwise low-risk utility story.

Valuation

Our $45PT is based on a half-turn premium to our utility group P/E of 16x 2025E.

Source: Wolfe Utilities & Power Research

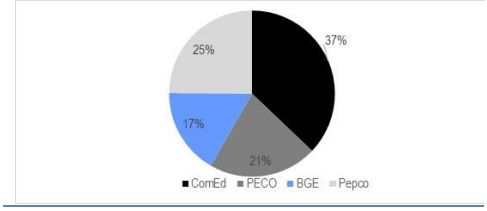
Exhibit 5: 2024 EPS by Subsidiary



Source: Wolfe Utilities & Power Research

Company Description

Chicago-based EXC is a large T&D (wires-only) regulated utility company, providing mostly electric service to roughly 10 million customers in the Mid-Atlantic and northern IL. It has no coal or other generation. ComEd serves northern IL and is EXC's largest utility sub, representing ~40% of rate base. Pepco serves DC, DE, MD and southern NJ and represents 25% of rate base. PECO, which serves southeastern PA, and BGE, which serves Baltimore, each represent nearly 20% of rate base. A little over 90% of EXC's total rate base is electric, with the rest gas LDC.

Investment Thesis

We believe EXC is a low-risk utility stock with above average EPS growth. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%.

Valuation

Our $45 PT is based on a half-turn premium to our utility group average P/E of 16x 2025E. Risks are less capex, lower returns, less cash or more equity needs, and unfavorable regulatory outcomes.

WOLFE RESEARCH

February 26, 2023

Outperform (OP):	The security is projected to outperform analyst's industry coverage universe over the next 12 months.
Peer Perform (PP):	The security is projected to perform approximately in line with analyst's industry coverage universe over the next 12 months.
Underperform (UP):	The security is projected to underperform analyst's industry coverage universe over the next 12 months.

Effective August 1, 2022, Wolfe Research, LLC will no longer publish target prices for Peer Perform rated companies.

Wolfe Research, LLC uses a relative rating system using terms such as Outperform, Peer Perform and Underperform (see definitions above). Please carefully read the definitions of all ratings used in Wolfe Research, LLC research. In addition, since Wolfe Research, LLC research contains more complete information concerning the analyst's views, please carefully read Wolfe Research, LLC research in its entirety and not infer the contents from the ratings alone. In all cases, ratings (or research) should not be used or relied upon as investment advice and any investment decisions should be based upon individual circumstances and other considerations.

Wolfe Research, LLC Industry Weighting System:

Market Overweight (MO):	Expect the industry to outperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.
Market Weight (MW):	Expect the industry to perform approximately in line with the primary market index for the region (S&P 500 in the U.S.) over the next 12 months.
Market Underweight (MU):	Expect the industry to underperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.

Wolfe Research, LLC Distribution of Fundamental Stock Ratings (As of February 26, 2023):

Outperform:	45%	6% Investment Banking Clients within the previous 12 months
Peer Perform:	45%	2% Investment Banking Clients within the previous 12 months
Underperform:	10%	0% Investment Banking Clients within the previous 12 months

Wolfe Research, LLC does not assign ratings of Buy, Hold or Sell to the stocks it covers. Outperform, Peer Perform and Underperform are not the respective equivalents of Buy, Hold and Sell but represent relative weightings as defined above. To satisfy regulatory requirements, Outperform has been designated to correspond with Buy, Peer Perform has been designated to correspond with Hold and Underperform has been designated to correspond with Sell.

Wolfe Research Securities and Wolfe Research, LLC have adopted the use of Wolfe Research and The Wolfe Daily Howl as brand names. Energy: Electric Utilities

Midweek Thoughts — AY, AGR, EXC, DUK, ETR, D

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

PEG, AVA, and AGR reported results earlier this week. AEP, DTE, and EIX are scheduled to report later this week. In other news, AY announces that it is embarking on a strategic review; the NY PSC postpones evidentiary hearings while NYSEG and RGE continue settlement discussions; the MD governor nominates two to the MD PSC; DUK partners with Daimler and Electrada to develop a micro-grid integrated EV charging center; the EPA restores 2012 Mercury and Air Toxic Standard rule for generators; FERC approves PJM's proposed rule change for the pending capacity auction; ETR requests a waiver for certain MISO seasonal capacity requirements, and VA legislature moving ahead on bills related to utility rate-making.

Upcoming Earnings Reports

AEP and **DTE** report BMO tomorrow (Thursday), followed by **EIX** AMC tomorrow. Our recently published 2023 Outlook includes our thesis, expectations, and estimates for our coverage. Earlier this week, **PEG**, **AGR**, and **AVA** reported earnings. Please scroll down for our takeaways.

Industry News and News from Companies in Our Coverage

AY — Atlantica announces that it is embarking on a strategic review:

- In a 6-K filing released this week, AY said that its board of directors has commenced a process to explore strategic alternatives that may be available to the Company to maximize shareholder value. AY expects to maintain regular business operations during the pendency of this review. The Company is scheduled to report 4Q and 2022 results next week (March 1). We do not expect management to say much while the review is happening. From our perspective, the ongoing corporate restructuring at Algonquin (AQN; Not Covered) and its 40%+ ownership in AY could have something to do with the timing of the announcement. AQN has two directors on the nine-member AY board. AY initiated a restructuring in 2020 but concluded by reaffirming the current strategy and said that the then-market volatility did not allow for an opportunity to maximize shareholder value.
- **What could a review mean this time?** The review could take several paths including an outright sale of the Company, a managed sale of AQN's interest to another strategic renewables developer that could potentially offer a pipeline of drop-down opportunities, or a select divestment of assets to streamline the portfolio and potentially make it more leveraged to the markets that are offering clean energy incentives including North America and the EU. There are not many proxies for similar transactions in recent years, and the implementation of the IRA and similar initiatives in Europe have changed the market dynamics materially. We believe that given the geographical breadth of AY's assets (North America and EMEA), and some legacy contracts, any transaction would bring its own set of challenges.

D — VA legislature moving ahead on bills related to utility rate-making: Two bills related to utility rate-making passed out of both chambers and will be sent to the governor to be signed into law. Among these bills are SB 1321 and HB 1604 (Affordable Energy Act), which will allow the SCC to issue refunds to ratepayers if the utility is deemed to be earning “unreasonable revenues” in excess of its authorized rate of return. The bills would leave the concept of the ROE band unchanged but would make rate reductions a discretion of the SCC rather than be hamstrung by conflicting state laws that prevent it from happening. The VA legislative session, which commenced on January 11, is scheduled to adjourn on February 25. The new authority would be effective during rate reviews for Appalachian Power this year and for Dominion in 2024.

AGR — NY PSC postpones evidentiary hearings while NYSEG and RGE continue settlement discussions: The NY PSC agreed to postpone evidentiary hearings to allow parties to continue settlement discussions. The evidentiary hearings are now expected to commence on April 17. AGR asked for the postponement and extension of the suspension period by 30 days with a make-whole provision. Settlement discussions commenced in early November and, if successful, are likely to yield a multiyear rate outcome, as was the case in AGR’s last NY rate filing and ED’s recent settlement. AGR filed one-year electric and gas rate cases for NYSEG and RGE. AGR seeks a cumulative $430M rate increase based on a 10.2% ROE and 50% equity layer vs. its last rate filing, which settled

at an 8.8% ROE and 48% equity. The recent ED settlement was constructive on ROE (9.25% vs. the Commission's longstanding 8.8% ROE stance), even though the equity layer remained at 48%, the same as the last rate case settlement.

EXC — MD governor nominates two to the MD PSC: Newly elected Governor Wes Moore named Frederick Hoover and Juan Alvarado to serve five-year terms on the MD PSC. Upon Senate confirmation, Mr. Hoover will replace Chairman Jason Stanek in June at the end of his term. Mr. Alvarado was selected to replace Commissioner Linton, effective immediately, after Senate confirmation. A state senator has announced his intent to place a hold on Alvarado's nomination to seek answers regarding Alvarado's role in the investigation of a 2016 gas explosion that coincided with his time at the PSC. The governor has not made any announcements regarding Patrice Bubar, who is awaiting Senate confirmation after being nominated by the former MD governor. The moves were expected after Governor Moore rescinded two nominations to the PSC that were made by the prior governor but had not yet been confirmed by the Senate. The MD PSC is a five-member commission with the governor nominating the members and the Senate confirming them. EXC's BGE and PEPCO are expected to file multiyear rate cases in MD later this year, as is FE's Potomac Edison.

DUK — DUK partners with Daimler and Electrada to develop a micro-grid integrated EV charging center: DUK announced that it will build a fleet electrification center that integrates a microgrid. The Mount Holly Microgrid Center will provide a commercial-grade charging experience for DUK's fleet customers' evaluation or launching of an electrification strategy. The center will connect to the grid or be 100% powered by carbon-free resources through the microgrid, including incorporating solar, storage, and microgrid control software applications. DUK will be able to study charger use, performance, management, and energy integration. DUK is collaborating with Electrada, an electric fuel solutions company, and Daimler, North America's largest heavy-duty truck manufacturer. The Center is expected to be online by the end of 2023.

ETR — ETR requests a waiver for certain MISO seasonal capacity requirements: ETR filed with the FERC requesting a waiver in MS of the requirement that MISO assigns a zero value in Resource Adequacy hours when a resource startup time is longer than 24 hours. According to ETR, the new seasonal capacity accreditation requirements decrease the capacity for some of ETR's fossil plants, enough for it to have a capacity shortfall in MS, including a 25% reduction to the 738 MW Gerald Andrus plant. Other impacted plants include Independence Units 1 and 2 and White Bluff Units 1 and 2. ETR is seeking an expedited Commission action on this request by March 7 to allow the waiver to be implemented before MISO's upcoming Planning Resource Auction (PRA). At issue are new rules approved by FERC regarding MISO's PRA where MISO changed the rules for accreditation of conventional resources to be based on capacity available in times of the highest needs vs. the prior approach based on installed capacity (adjusted for forced outages).

EPA restores 2012 Mercury and Air Toxic Standard rule for generators: The EPA reaffirmed the 2012 Mercury and Air Toxic Standard (MATS) rule for power plants and consequently revoked a 2020 decision that regulating fossil fuel-fired generators for mercury emissions was not appropriate and necessary. The final ruling leaves the current emissions standards unchanged and continues to regulate air toxics emissions from coal and oil-fired power plants under the Clean Air Act. The rule requires generating units to install pollution controls to reduce emissions of hazardous air pollutants, including mercury. Analysis during the review also concluded that costs to comply with the rule are likely significantly less than the annual $9.6B estimate provided in 2011. The EPA is considering if more stringent limits for hazardous air pollution from power plants are feasible and warranted. A stricter MATS risk and technology review could be released next month. From a practical standpoint, a reinstatement of the rule should not mean much since utilities are for the most part in compliance with the dormant MATS rule.

FERC approves PJM's proposed rule change for the pending capacity auction: As a background, PJM delayed the release of the results of the 2024/2025 capacity auction because it did not receive offers from all the planned generation that it had factored into its model, thus creating an artificial shortage, especially in the local deliverability area (LDA) covered by EXC's DPL and thus yielding a much higher clearing price than was anticipated. So, PJM asked the FERC to intervene and approve a rule change that would allow it to reduce the LDA's reliability requirement during the auction process. FERC approved the proposed rule change, saying that capacity prices should reflect actual reliability needs in a manner consistent with supply and demand fundamentals. Merchant generators including CEG, NRG, and others opposed the rule change part way through the auction process saying that the FERC by intervening would prevent the market from sending a signal when additional capacity was needed. According to the PJM, additions of large and/or intermittent units in smaller LDAs like DPL-S can result in an increase in the reliability requirement since capacity transfers would be required to account for times when those intermittent resources are not available. FERC also decided that it will hold a forum to examine the PJM capacity market given the frequent complaints from stakeholders regarding its operation. Results of the 2024/2025 auction are now expected next week.

Earnings Recap

AGR — AGR reported an in-line quarter and provided a 2023 EPS outlook while reiterating a 6-7% EPS growth rate through 2025. What remains unclear is the contribution from the core business in the earnings cadence vs. one-off events, including historical and anticipated gains on sales. 2023 EPS guidance of $2.20-$2.35 includes a $0.30 contribution from PNM, which we are not factoring in as yet, thus implying a downside to our forecast of $2.29. On operations, there are several items to watch, including the NECEC trial in April, follow-through on the Commonwealth Wind PPA termination and AGR's plan to participate in the next MA wind solicitation, and negotiations with stakeholders regarding the Park City PPA, as well as the onshore capital recycling initiatives. See our note here.

Sophie Karp (917) 368-2361 / sophie.karp@key.com

AVA — AVA reported 4Q results above consensus and the high-end of its guidance range, as the Other segment benefited from a fair market value adjustment for one of AVA's investments. The Company maintained 2023 guidance, including $0.04-$0.06 for the Other segment. AVA will likely continue to experience a significant regulatory lag in 2023 until a new WA rate case filing goes into effect sometime in 2025. See our note here.

PEG — PEG reported an in-line quarter, maintained the midpoint of 2023 guidance (narrowing the range), and reiterated the 5-7% long-term growth rate. We expect a long-term strategy discussion at the March 10th analyst day, even though PEG has simplified its story materially over the last couple of years. The next data points relate to monetization of the offshore acreage and the expected proceeds (including the use of proceeds likely towards the regulated business), potential investment to lengthen and strengthen the life of the nuclear assets, and additional steps to mitigate pension volatility. We also expect some initial color on the upcoming NJ rate case. See our note here.

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: ES, AGR, CNP, XEL, PEG, EXC, OTTR

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

4Q earnings continue, with PEG, AGR, AVA, DTE, AEP, and EIX all scheduled to report this week. In other news, the CT Authority issues a PFD in ES's Aquarion water rate case; AGR files a request to extend the suspension date for NYSEG and RGE rates; CNP files exceptions to ALJ PD; the MN PUC issues an order to mitigate a repeat of extraordinary gas cost; FERC approves new winterization standards in response to Texas grid freeze; the NY PSC approves $4.4B of transmission upgrades; and the S&P SmallCap 600 adds OTTR shares.

Earnings Calendar

4Q22 earnings continue: PEG, AGR, AVA, DTE, AEP, and **EIX** are scheduled to report this week. Our recently published 2023 Outlook includes our thesis, expectations, and estimates for our coverage.

Figure 1 - 4Q22 Earnings Calendar

4Q22 Utilities Earnings Calls			
Company Name	**Ticker**	**Date**	**Time (ET)**
Public Service Enterprise Group Inc	PEG	2/21/2023	11:00 AM
Avangrid Inc	AGR	2/22/2023	10:00 AM
Avista Corp	AVA	2/22/2023	10:30 AM
DTE Energy Co	DTE	2/23/2023	9:00 AM
American Electric Power Co	AEP	2/23/2023	9:00 AM
Edison International	EIX	2/23/2023	4:30 PM

Source: Company filings, KeyBanc Capital Markets Inc.

Regulatory Calendar

We are not monitoring any regulatory items this week, but we highlight several events in the upcoming weeks. On March 6, rebuttal testimony is due in **NWE**'s MT GRC. We are also awaiting Staff and intervenor testimony in **DUK**'s DEP MYRP in NC, which is due on March 27.

We also highlight recent developments including the **POR** rate case filing in OR (read more here), and the settlement filed in **ED**'s 2022 electric and gas rate case (read more here).

Recent Developments for Companies Under Our Coverage

From our midweek: AEP and Liberty refile for FERC approval for the sale of Kentucky Power; DOE begins finalizing details on funding for the Building a Better Grid Initiative; CA ALJ issues PD to dismiss NOVA's "micro-utility" microgrid proposal; utilities request FERC to reject the SPP's decision to increase the planning reserve margin; FERC approves MISO proposal for early notification to retire generation units; judge denies Signal Peak mining expansion; ED files updated testimony in its NY steam rate case; SRE and CFE sign an MOU to expand its infrastructure partnership; EIX faces lawsuit from CA city for the Fairview Fire; and FERC approves a tariff for western resource sharing program.

ES — CT Authority issues PFD in ES's Aquarion water rate case:

- The CT Authority issued a PFD recommending a $0.4M revenue rate decrease, premised on an 8.7% ROE and 50.35% equity layer. The PFD suggests a 2021 test year and a $989M RB. The PFD compares to ES's three-year rate case filing, requesting a ~$27.5M rate increase in RY1 (effective March 15, 2023), ~$13.6M in RY2, and ~$8.8M in RY3. The request was based on a 10.35% ROE, 53.06% equity, $1.05B RB, and a 2021 test year.

- The PD rejects ES's rationale for a multiyear plan first saying that there is a Water Infrastructure and Conservation Adjustment provision that allows for recovery of capital investments between rate cases and allows for contemporaneous revenue increases. With this rate case, the WICA will be reset to zero allowing Aquarion to increase annual revenues by 5% per year and up to 10% between rate cases. Second, while ES requested a multiyear rate plan to ensure rate stability by extending the period between rate cases, the PD notes that Aquarion was not under an MYRP previously and has not been in a rate case in nearly a decade.
- Among the factors yielding the difference between ES's ask and the PD are a lower ROE, lower equity ratio, a lower inflation factor (6.8% vs. ES's ask for 12.15%), and some disallowances in several cost line items.
- The Company has invested ~$740M on infrastructure investments since the last rate case in 2013, with only 25-30% of water capex covered under trackers, creating a regulatory lag (ES earning ROE at the 7% level vs. the authorized 9.63%). In its last rate case, Aquarion received a ~$14M revenue increase based on a 9.6% ROE and 51.5% equity. The PURA is expected to issue a final decision on March 15.

AGR — Staff supports AGR's request to postpone evidentiary hearings and extend the suspension period while NYSEG and RGE continue settlement discussions: The Staff supports a 30-day postponement for evidentiary hearings, which were scheduled to begin on March 6. AGR also asked for an extension of the suspension period by 30 days with a make-whole provision. Settlement discussions commenced in early November and if successful, are likely to yield a multiyear rate outcome as was the case in AGR's last NY rate filing and ED's recent settlement. AGR filed one-year electric and gas rate cases for NYSEG and RGE. AGR seeks a cumulative $430M rate increase based on a 10.2% ROE and 50% equity layer vs. its last rate filing, which settled at an 8.8% ROE and 48% equity. The recent ED settlement was constructive on ROE (9.25% vs. the Commission's longstanding 8.8% ROE stance), even though the equity layer remained at 48%, the same as the last rate case settlement.

CNP — CNP files exceptions to ALJ PD:

- CNP filed exceptions to the ALJ's PD regarding the prudency of the short-term RFP process and the decision to procure 500 MW of temporary emergency electricity energy facilities (TEEEF). CNP argues that it used its experience from its long-term RFP, which the PD determined prudent, to select a vendor for the short-term RFP. CNP also claims that the lease for the 500 MW of TEEEF was prudent and necessary in the event of widespread outages. CNP agreed to lower its revenue request by ~$18M to reflect an extended amortization period on the short-term lease.
- As a reminder, the TX ALJ issued a PD recommending the PUCT deny CNP's request to recover $200M for TEEEF lease payments and operating costs, deeming it imprudent. The ALJ posits that CNP leased substantially more mobile generation capacity (~500 MW) than was reasonable or necessary and failed to establish the reasonableness of its decision. According to the agreement, CNP can terminate the leases based on an adverse outcome from the Commission.
- The TEEEF was a separate filing from CNP's DCRF and includes cost recovery for deploying emergency mobile generation facilities as required by law following the outages during Uri. The ALJ did not address the DCRF since CNP reached a settlement in the pending filing for a $78M revenue increase vs. CNP's ask for $85.8M. Interim rates were implemented on September 21. CNP's DCRF filing was to recover $1.3B in distribution capex over the three-year period from 2019-2021.

CNP, XEL — MN PUC issues order to mitigate a repeat of extraordinary gas costs: The MN PUC issued an order directing CNP, XEL, and other MN gas utilities to take steps to prevent a repeat of the extraordinary costs experienced during winter storm Uri. The order includes directing the gas utilities to explore the availability and costs of options to reduce exposure to price spikes, including further contracting, hedging, and increased supply. The Commission alsorejected the utilities' proposal to implement a two-part test that would trigger special actions on the part of the utilities. The order was in response to the Commission's decision last year that included directing the utilities to make proposals to prevent a repeat. As a reminder, the MN PUC ruled to disallow $35.7M and $19M for CNP and XEL, respectively. CNP and XEL were seeking a prudence review of the full amounts of $409M and $179M, respectively.

FERC approves new winterization standards in response to Texas grid freeze: FERC issued an order approving two new reliability standards for U.S. generators during extreme cold weather. The standards address more than 24 recommendations that were outlined in a Staff report analyzing the outages during winter storm Uri. The recommendations specifically focus on emergency operations and extreme cold weather preparedness and operations. The recommendations were proposed by NERC and approved, but the order directs NERC to revise the standards within the next 12 months to address concerns about implementation timelines and ensure the measures apply to all power generators. NERC is also required to monitor and assess power plant owners' implementation of the new requirements. NERC is preparing to propose a second set of cold weather standards late this year to address the remaining recommendations.

AGR — NY PSC approves $4.4B of transmission upgrades: The NY PSC authorized utilities to develop 62 local transmission upgrades in upstate NY. The upgrades include improvements to existing transmission lines, existing substations, and the construction of three new substations. The upgrades will reduce congestion and create capacity to integrate an incremental 3,500 MW of clean energy. The ruling will support the investments needed to implement the provisions in the CLCPA (Climate Leadership and Community Protection Act) that involves spending to bring renewable power from upstate NY (AGR service territory) to downstate population load centers. The projects are expected to be completed by 2030.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

OTTR — OTTR added to the S&P SmallCap 600: Last week, it was announced that OTTR shares will be added to the S&P 600 index. The Company will trade in the utilities GICS sector. The move is expected to go into effect before the market opens on February 23. Shares of OTTR are up 21% YTD vs. the UTY -4%.

Earnings Recap

CNP — CNP continues to deliver on its EPS growth targets and reported EPS in line with the midpoint of guidance despite higher debt service costs and an O&M pull forward. Management reiterated the short-term and long-term EPS growth CAGR of 6-8% (8% in the short term), the capex plan through 2030, and the commitment to fund the growth without external equity issuance. See our note here.

NWE — NWE posted 4Q22 results below our and consensus estimates, as the Company continues to be pressured from higher power costs in the region, O&M, and inflation. NWE is working to reduce its exposure to power markets and the mechanisms in the MT GRC will be instrumental in adding new generation and allowing timely recovery of power costs. We expect an outcome in the near term, and the upcoming MT IRP filing is another near-term catalyst. Constructive outcomes in both filings will validate our thesis around the long-term investment opportunity to fuel rate base growth. See our note here.

ED — ED reported an in-line quarter with EPS of $0.81, compared to consensus of $0.80. ED also introduced 2023 EPS guidance, and maintained its long-term growth rate rebased on 2023. The biggest announcement was that ED reached a settlement in its 2022 CECONY electric and gas rate cases, although we believe ED will find it challenging to achieve its long-term growth rate. See our note here.

SO — SO reported an in-line quarter for 4Q22, while providing relatively flat guidance for 2023 and lowering its 2024 guidance range, which was consistent with our expectations. Additionally, SO further delayed Vogtle Unit 3 and extended the window for Vogtle Unit 4. The delays and associated rate impacts and carrying costs have contributed to lower guidance for 2023 and 2024 vs. previously communicated figures. Longer term, SO maintained its growth rate and refreshed its five-year capital plan, highlighting the significant capital opportunity ahead. See our note here.

CEG — CEG reported an above-forecast EBITDA for 2022 and provided constructive guidance for 2023. More importantly, the Company laid out a capital allocation strategy, which is a combination of organic growth opportunities (including a significant investment in clean hydrogen), share buybacks, and a doubling of the dividend, while still retaining dry powder should attractive M&A opportunities arise. We view this approach to capital allocation as prudent, especially as the investment opportunities from the IRA are still emerging. Higher for longer power prices provide CEG with the internal resources to pursue organic growth while being protected on the downside by the nuclear PTC enshrined in the IRA. See our note here.

ETR — ETR reported results in line with consensus estimates and reaffirmed its long-term outlook, including 2023 EPS guidance. SERI proceedings continue to be an overhang, even though the management is hopeful for a resumption of settlement talks with the regulators outside of MS, which were stalled by the December 2022 order by the FERC. Outside SERI issues, the Company continues with an active regulatory schedule as it is seeking a settlement in the TX GRC and is proceeding with its LA and NO grid resiliency filings. See our note here.

POR — POR reported a slight 4Q miss and released 2023 guidance pointing at lower y/y earnings at midpoint, which was not a surprise given well understood 2023 headwinds from equity dilution. More importantly, the Company reaffirmed its 5-7% long-term growth target, describing 2023 as a transition year, and provided a bullish illustrative RB growth scenario with the impact of potential future RFP wins. Our quick math suggests that a successful execution on the upside scenario could translate into a >7.5% EPS CAGR through 2027, arguably making POR one of the most attractive names in the SMID peer group. With that said, given POR's in-line valuation at present, and multiple assumptions embedded in the upside scenario, we are inclined to wait for a more attractive entry point and/or further clarity on the RFP wins and capital plan. See our note here.

AEE — AEE reported 2022 results at the high end of guidance and maintained the long-term EPS CAGR of 6-8%. 2023 guidance of $4.25-$4.45 is in line with the 6-8% growth projection. Management also provided a 2023-2027 capex plan of $19.7B, +2.4B from the previous 2022-2026 plan. We expect the capex trend to remain elevated for AEE as it invests in the MISO LRTP and MO's clean energy transition. Also higher are anticipated equity needs, with AEE now expecting $500M of annual equity issuances vs. $300M prior. Overall, we view AEE as a steady and predictable utility with meaningful capex upside to support the rate base growth targets and 6-8% EPS growth projections. 2023 is likely to be dominated by MO and IL rate proceedings. See our note here.

OTTR — OTTR reported EPS of $1.00 vs. our estimate of $0.83 and introduced 2023 guidance in line with the Street. The Plastic and Manufacturing segments are both expected to see step-downs as levels normalize and OTTR shifts toward its long-term earnings mix. OTTR is preparing to file its amended IRP to incorporate recent developments and will likely file an updated capital plan shortly after. OTTR maintained its long-term growth rate of 5-7%. See our note here.

FE — FE reported below-consensus 4Q results, which still put it to the upper half of its FY22 guidance. Strong 2022 allowed the Company to pull forward enough O&M to fully offset pension headwinds in 2023, and as a result FE issued 2023 guidance ahead of

Sophie Karp (917) 368-2361 / sophie.karp@key.com

consensus estimates and within its long-term earnings growth rate. Importantly, the Company continues to outline the path to improved earnings quality moving forward and has established a 60-70% dividend payout policy, which should return its dividend back to the growth trajectory (and consistent with our model). The new CEO announcement should be the next near-term catalyst to watch for, and FE's regulatory schedule will remain active in 2023-2024. See our note here.

EXC — EXC reported an in-line quarter as ComEd results benefited from higher ROE (linked to 30-year Treasuries). Management provided clarity on the multiyear 6-8% EPS growth rate with 2023 to be below that range as several multiyear rate plans are built into the EPS trajectory. Long term, EXC reiterated a target of a 6-8% EPS CAGR through 2026 with a bias to the midpoint or higher. We expect the inaugural IL MYRP to be the biggest item to watch in 2023 as the outcome will define the EPS outlook to a meaningful extent. Management also rolled capex by a year, with the new four-year total of $31.3B higher than the prior by $2.3B, mostly to incorporate higher spending at ComEd. See our note here.

ES — ES reported a mostly in-line quarter and provided guidance that is also mostly in line with expectations. There is no change to the EPS CAGR of 5-7% with the bias retained toward the high end. Management outlined a capex plan for $21.5B for the 2023-2027 period, which is $3.3B higher than the prior five-year plan for 2022-2026 and takes into consideration the sale of the offshore wind assets and the subsequent loss of any contribution from those assets. The sale of the offshore wind projects and acreage is taking longer than planned and management now expects a decision by 2Q with a closing likely in the 2H. While interest remains robust, the timeline for an outcome has certainly stretched, and it could be a function of the evolving offshore wind-related cost environment, a wait-and-see approach for final IRS rulings on the provisions of the IRA, and even the volatile rate environment. See our note here.

DUK — DUK reported a strong quarter with EPS of $1.11 vs. our consensus-matching estimate of $1.07, as the Company continues to benefit from strong volume growth and ongoing cost savings. DUK maintained its 2023 EPS guidance and long-term EPS growth rate, although the Company saw a slight shift in the commercial renewables sales timeline. We do not believe the delay will have a material impact on near-term earnings, and we continue to like the pro forma portfolio that includes a strong capital plan that will fuel long-term EPS and rate base growth. See our note here.

D — D reported a 4Q headline number that was in line with the midpoint, but the impairment of the solar assets made the results somewhat noisy as did other YE adjustments. More importantly, we are getting a glimpse of what a new regulatory regime may look like in VA as multiple bills move through the legislature. The de-emphasis of the contracted solar portfolio may be step one of the strategic review, but there is a lot more to come, in our opinion. We outlined various scenarios that the strategic review can take, but ultimately, we believe that investors will need to see a clear path to a "new" Dominion, even as the stock appears inexpensive on a pro forma basis. See our note here.

WEC — WEC reported another above consensus/above guidance quarter and maintained the 2023 outlook and the 6.5-7% long-term EPS growth rate. We continue to view WEC as a top-tier utility with an extended runway for growth as coal retirements in WI create opportunities for renewables capex deployment and the recent WI rate case outcomes de-risk the 2023 outlook. See our note here.

CMS — CMS reported an in-line quarter and raised its 2023 EPS guidance by $0.01 at the midpoint. The guidance is in line with our forecast and consensus. As was expected, the Company rolled the five-year capex plan to 2023-2027, adding $1.2B vs. the prior plan (+$400M net of Covert). Also, management raised the anticipated equity issuance from up to $250M per year in the outer years of the capex plan to up to $350M—partly to fund the higher capex and to maintain financial flexibility. We expect management to be systematic in the equity raises via an ATM program. CMS's results and outlook show consistency in execution and the resulting stability in outcomes. See our note here.

XEL — XEL reported 4Q and 2022 EPS of $0.69 and $3.17, respectively, which was in line with our expectations. The Company was able to offset O&M headwinds with solid sales growth and derisk 2023. XEL maintained its 2023 EPS and long-term growth rate, which was rebased on 2022 EPS guidance. Furthermore, XEL maintained its five- and 10-year capital plans, which continue to offer incremental opportunities. Rate case activity will continue at an elevated level in 1H23, and we believe XEL will be able to continue its ability to achieve constructive regulatory outcomes, providing us confidence in the Company's long-term execution. See our note here.

NEE — NEE reported another quarter aligned with guidance and expectations and extended the 6-8% EPS cadence by another year to 2026. Management remains biased toward delivering on the high end of the guidance range. While 2022 saw a slew of regulatory headwinds, especially for solar, the long-term benefits of the IRA should provide an extended period of growth for NEER, especially as it expands its portfolio beyond solar, wind, and storage to include green hydrogen projects and previously announced initiatives in RNG. See our note here.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

WATTS COOKING? Weekly

Topics: Utes macro; FE; EXC; D; Nuclear fuel; PNM

Our view: Weekly developments that we found to be of interest.

WATTS on Your Mind

This past week, we received some inquiries as to why utilities were underperforming the market. Indeed, since the beginning of 2023, the XLU is down 2.9% versus the SPX up 6.2% and the COMP up 12.6%. The recovery trade seems to taking place sooner than some had predicted. It is notable that while consensus earnings for the 2023 S&P 500 continued to decline (from $240.05 end Sept. to $222.25 on Friday), 2024 growth over 2023 expanded (from 8.5% to 11.6% late Sept. versus Friday). In our mind, the recovery trade is already taking place, as a few voices are calling for a very accommodating soft landing. We have written before that utilities are not likely to do well if this scenario holds. An unexpected tailwind in the form of weak U.S. gas prices could reduce the pressure from regulators regarding higher bills, and thus reduce the stock underperformance.

Switching to stocks, FE, EXC, D, and CEG were of most interest this past week. Some are concerned that the first three depend too much on positive outcomes from regulatory (FE and EXC) or legislative (D) initiatives. CEG has been regaining some of the positive IRA chatter that it had originally experienced when the IRA was first passed.

WATTS on Our Mind

On Wednesday, Senator Manchin (D-WV), Barrasso (R-WY) and Risch (R-ID) introduced the Nuclear Fuel Security Act of 2023. The bill will push Congress to develop the onshoring of uranium enrichment activities for advanced nuclear and the procurement of enriched uranium inventory from U.S. allies. The bill will also carry out the Nuclear Fuel Security Program to acquire minimum inventory of enriched uranium by 2026 and 2027. The Senate will now review the bill. **Our view: This bill should be impactful to nuclear operators like CEG and also emerging developers of small modular reactors (SMR). Depending on how the Russia/Ukraine conflict unfolds, the long-term supply of nuclear fuel could move away from Russia to Western allies permanently.**

On Friday, the New Mexico Commissioners held another closed meeting to discuss the PNM and AGR merger. The Commissioners have also planned another closed meeting for Tuesday 2/21. **Our view: The Commission has been quiet on the merger issue since the first closed meeting on February 2nd and Commissioner O'Connell's recusal earlier that week. The NMPRC will also be discussing PNM's cases at the Supreme Court on Tuesday. We currently don't expect the Commissioners to discuss takeaways from today's meeting at the upcoming Wednesday Open meeting, but we could see an update following Tuesday's meeting. We still believe the NMPRC will approve the deal.**

Required disclosures

Conflicts disclosures

This product constitutes a compendium report (covers six or more subject companies). As such, RBC Capital Markets chooses to provide specific disclosures for the subject companies by reference. To access conflict of interest and other disclosures for the subject companies, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1. These disclosures are also available by sending a written request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7 or an email to rbcinsight@rbccm.com.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.
With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.
As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.
Risk Rating
The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Dec-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	839	56.05	225	26.82

Capital Markets

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research

RBC Capital Markets endeavors to make all reasonable efforts to provide research content simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets provides eligible clients with access to Research Reports on the Firm's proprietary INSIGHT website, via email and via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.
For a list of all recommendations on the company that were disseminated during the prior 12-month period, please click on the following link: https://rbcnew.bluematrix.com/sellside/MAR.action
The 12 month history of SPARCs can be viewed at RBC Insight.

Analyst certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Third-party disclaimers

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's Financial Services LLC ("S&P") and is licensed for use by RBC. Neither MSCI, S&P, nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

RBC Capital Markets disclaims all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any statements made to the media or via social media that are in turn quoted in this report, or otherwise reproduced graphically for informational purposes.

Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Europe) GmbH, Royal Bank of Canada, Hong Kong Branch, Royal Bank of Canada, Singapore Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets'' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. RBC Capital Markets may be restricted from publishing research reports, from time to time, due to regulatory restrictions and/ or internal compliance policies. If this is the case, the latest published research reports available to clients may not reflect recent material changes in the applicable industry and/or applicable subject companies. RBC Capital Markets research reports are current only as of the date set forth on the research reports. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct, indirect or consequential loss arising from, or in connection with, any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior written consent of RBC Capital Markets in each instance.

J.P. Morgan Securities LLC

- **2023 initiated in line with company messaging; 6-8% CAGR extended through 2026 in a positive growth update.** EXC initiated 2023 adj EPS guidance of $2.30-2.42 ($2.36 JPMe/Street), implying ~5% growth based on the original 2022 guidance midpoint disclosed at the Jan 2022 Analyst Day, and consistent with EXC's 3Q/EEI growth message as PECO's rate cycle/weather/MYP reconciliations impact growth into 2023. In a positive update, EXC both reiterated its original 6-8% 2021-2025 EPS CAGR and rolled forward this 6-8% growth for 2022-2026. EXC expects the midpoint or better for both periods, plus outlined annual growth for 2024+ to be within or above this range. Subject to some debate into the update in consideration of how PECO's rate cycle lands across the period, we see this update as definitively settling the question on PECO's impact to growth.
- **4yr capital plan roll-forward sees $2.3bn raise, with equity unchanged.** EXC rolled forward its 4yr capital plan, increasing 2023-2026 capex to $31.3bn (previously $29.0bn for 2022-2025) for an attractive 7.9% rate base CAGR over the period. The company maintained its $1bn equity need, leaving $425mm remaining equity after EXC's 2022 issuance, in a positive driver relative to the higher capex targets. We highlight favorable balance sheet language pointing to a 100-200bp FFO/debt cushion relative to EXC's 12% downgrade threshold, with pending Treasury clarification on repairs treatment against AMT as the primary high/low range driver (EXC assumes no benefit, implying the low end of this 100-200bp range).
- **Chicago franchise agreement brings progress towards final resolution.** We highlight EXC's 15-year agreement with the city of Chicago as another positive, although steps remain to complete the agreement's ratification. EXC's plan includes the minor impact of its $100mm shareholder payment (the company will amortize over 15 years).
- **4Q22 matches Street**. EXC reported 4Q22 adj EPS of $0.43, in-line with the Street median and a penny ahead of JPMe. PECO landed -3c lower than our estimates, primarily driven be increases in depreciation, interest expense, and credit losses, partially offset by distribution rate increases. Aside from PECO, no segment meaningfully deviated from our expectations, and all landed within 2c of our estimates. Overall, EXC delivered a strong quarter, backed by higher YoY electric distribution rates at ComEd, and higher YoY rate increases at BGE, PECO, and PHI. EXC finished the year +2c ahead of the company's 2022 guidance midpoint, representing 8% growth from the 2021 guidance midpoint.

See page 3 for analyst certification and important disclosures.
J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

jeremy.b.tonet@jpmorgan.com

****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material. **Thailand**: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission, and its registered address is 3rd Floor, 20 North Sathorn Road, Silom, Bangrak, Bangkok 10500. **UK:** Unless specified to the contrary, research is distributed in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. JPMS plc is registered in England & Wales No. 2711006, Registered Office 25 Bank Street, London, E14 5JP. This material is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. Research issued by JPMS plc has been prepared in accordance with JPMS plc's policy for prevention and avoidance of conflicts of interest related to the production of Research which can be found at the following link: J.P. Morgan EMEA - Research Independence Policy. **U.S.**: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of

Exelon Corporation

Shout Out to My EXC

Our view: We believe the 4Q22 financial update helped restore investors' confidence in EXC's ability to achieve earnings guidance, being fully aware of a weak 2023. Regulatory risk is relevant, in our view, as rapid growth in 2024 and 2025 would depend on favorable rate case outcomes. We tweak EPS expectations through 2027 in this update. We keep our price target at $47 a share and reiterate Sector Perform rating.

Key points:

EPS growth trajectory. EXC provided color to earnings drivers during the 2023-2026 planning period. We view 2025 to be critical as EXC makes up for expected slower earnings growth in 2023-2024. We expect new rates from multi-year plans (MYP) from ComEd and PECO (together ~60% of utility earnings ex. corporate) to be in ful swing in 2025. On a consolidated basis, we model 2023-2027 annual EPS growth rates of 4%, 6.3%, 9.1%, 7.2%, and 6.5% respectively, reflecting the uneven timing of rate cases.

Rate base growth should stay close to guidance 7.9% CAGR. We believe there are two driving factors. First, we view ComEd to be well-positioned to drive the majority of this growth, given the recent win of franchise agreements with the city of Chicago and strong political will to meet the goals of the Clean Energy Jobs Act (CEJA) in Illinois. Recall ComEd alone maked up 37% of consolidated rate base in 2022. Second, MYPs available in all utility jurisdictions should provide good visibility to capital deployment, as long as they are approved by their utility commissions.

However, balance sheet position could be better. Particularly if the U.S. Treasury does not provide relief on tax repair deductions for the utilities industry, we view a ~100-bp FFO/debt cushion above credit downgrade threshold (12%) to be a bit lacking. In contrast, many of EXC's large-cap peers are guiding toward 14-15% FFO/debt target. If EXC's metric falls further, we think it would be reasonable for EXC to turn to issuing moderate amounts of equity to shore up its balance sheet. We model to 13% FFO/debt through 2027 and anticipate more clarity on credit metrics once the U.S. Treasury issues additional tax guidance in spring 2023.

An alternative may be to turn to asset monetization of T&D assets. In particular, valuation of transmission assets appear to remain favorable in the private market, as we have seen with the minority stake sale of FirstEnergy Transmission (FE, Outperform) announced last month. EXC's total transmission rate base is ~$11B today. Hypothetically, a 10% ownership sale at a similar valuation (37x 2023 P/E on $550M earnings) could generate $1.6B net proceeds to go towards debt paydown and $25M net FFO accretion, resulting in a 58-bp increase in FFO/debt in proforma 2023.

Updating EPS estimates. We adjust 2024-2027 EPS to $2.51, $2.74, $2.93, and $3.12 from $2.54, $2.76, $2.97, and $3.20, respectively.

Key ESG questions

This section is intended to highlight key ESG discussion points relevant to this company, as well as our views on the outlook. Both the questions we highlight and our responses will evolve over time as the dialogue between management, analysts and investors continues to advance. We welcome any feedback on the topics.

	Our view
How do EXC's utilities rank across peers operationally?	EXC utilities rank in the top quartile of transmission and distribution operators in terms of operating metrics and customer satisfaction scores, according to EXC presentation materials. EXC utility customer bills average modestly below the US average, which we believe has a positive social impact.
What are EXC utilities' key environmental goals?	EXC has committed to a net-zero by 2050 operations goal, with an interim target of 50% by 2030. Post-separation from Constellation, EXC owns no generation supply and enables ~2GW of distributed energy resources. EXC also expects 50% vehicle fleet electrification by 2030. EXC is promoting electrification by advancing EV infrastructure in its operating territories.
What are EXC's key governance matters?	In July 2020, ComEd entered into a two-year deferred prosecution agreement (DPA) with Federal authorities in relation to certain past political lobbying activities. We expect this to produce an overhang for some investors during the course of the DPA.
What is diversity like at the management/ board level?	As of 2022, 92% of board members (including Board Chair) are independent. 33% of Board of Directors are women while 22% are ethnically diverse.
What environmental disclosures does EXC provide?	EXC provides disclosures on GRI standards, SASB standards, EEI/AGA ESG templates, and scope 1-3 emissions information.

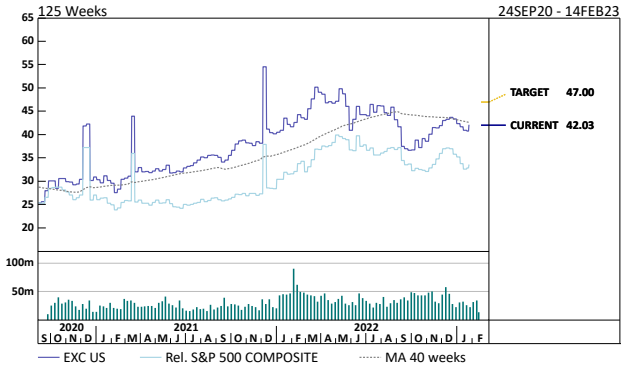
Capital Markets

Target/Upside/Downside Scenarios

Exelon Corporation



Source: Bloomberg and RBC Capital Markets estimates for Target

Valuation

Our $47 price target assumes a 18.6x P/E multiple on 2024E utilities EPS of $2.51. Our multiple reflects a slight 3% discount to our base case blended electric and gas multiple of 19.1x, resulting in equity value per share of $47. While we believe Exelon utilities have a similar profile to industry peers (6–8% EPS CAGR and 7–8% rate base CAGR), we give consideration for some regulatory overhang and lower ROE at ComEd. Our price target supports a Sector Perform rating.

Upside scenario

Upside scenario of $57. We assume that 30-bps improvement in overall ROE leads to $92M higher net income and 2024 EPS of $2.64. We then apply a 9% discount to our upside blended electric and gas multiple of 23.7x, resulting in an equity per share value of $57.

Downside scenario

Downside scenario of $39. We assume that higher O&M and lower ROE reduce 2024 EPS to $2.45. We apply a 10% premium on our downside blended electric and gas multiple of 14.5x. We give consideration to rate recovery benefits from a large contribution of multiyear rate plans and formula rates.

Investment summary

Exelon returns to a fully regulated T&D utility after a successful spinoff of its generation unit Constellation. One-third of Exelon's earnings comes from its primary utility, ComEd, which benefits from low-cost nuclear power generation. While the majority of rate base investments can be recovered via alternative recovery mechanisms, the timing of multi-year formula rate adjustments could result in annual EPS growth rates falling outside of long-term guidance for individual years. Over the 5-year period ending 2027, we project EPS CAGR of 7.2% and recognize headwinds in 2023 and 2024. In the near-term, we await a catalyst that could drive a better entry point.

Potential catalysts

- Approval of further multiyear rate plans
- Favorable rate case decision on ComEd leading to material increase in allowed ROE
- Equity issuances at favorable prices leading to less-than-expected dilution
- Management announces accretive utility transactions and further improves balance sheet

Risks to rating and price target

- Stagnant ROE performance at ComEd
- Credit metrics deteriorate due to significant borrowings
- Inflation drives up O&M costs
- Corporate minium taxes become a drag on cash
- Approval of upcoming multi-year plans at favorable levels

RBC Capital Markets

Company description

Exelon is one of the largest power companies in the U.S. Its six T&D utilities (ComEd, PECO, BG&E, PEPCO, DPL, ACE) serve more than 10 million electric and gas customers in DE, DC, IL, NJ, PA, and MD. Exelon operates 11,160 miles of regulated electric transmission lines and expects to have a total rate base of $52 billion by 2022. EXC separated from its generation business, Constellation, in February 2022.

RBC Capital Markets

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.

Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.

As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

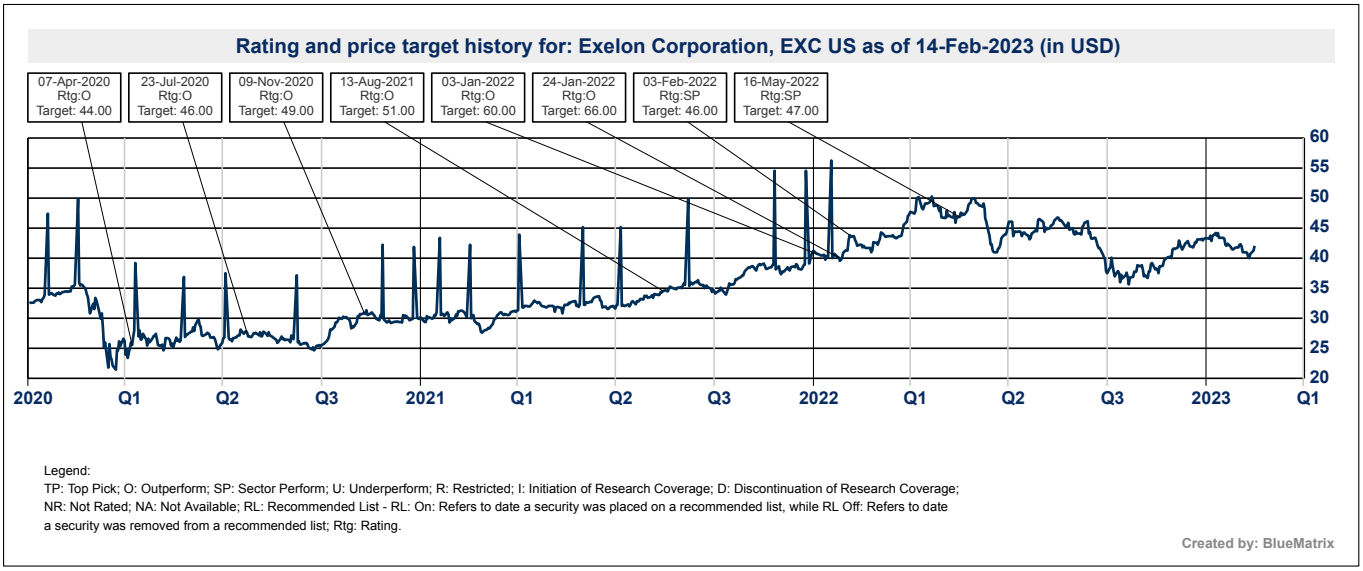
Distribution of ratings

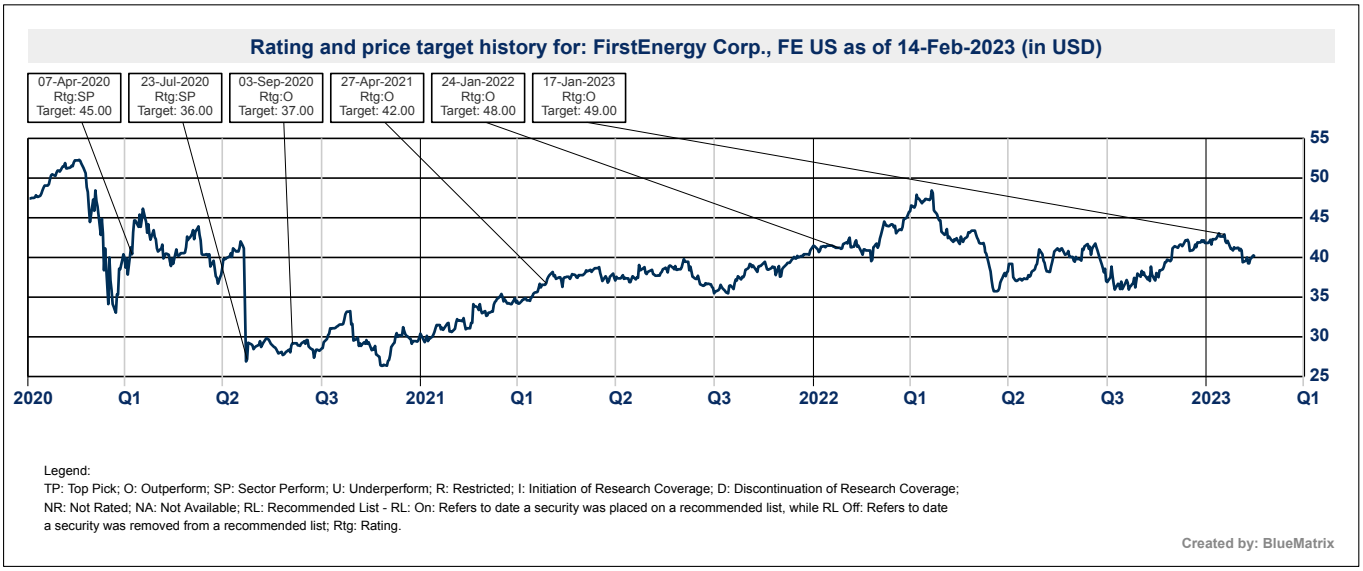
For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Dec-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	839	56.05	225	26.82
HOLD [Sector Perform]	603	40.28	151	25.04
SELL [Underperform]	55	3.67	3	5.45

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.





References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Exelon Corporation

Valuation

Our $47 price target assumes a 18.6x P/E multiple on 2024E utilities EPS of $2.51. Our multiple reflects a slight 3% discount to our base case blended electric and gas multiple of 19.1x, resulting in equity value per share of $47. While we believe Exelon utilities have a similar profile to industry peers (6–8% EPS CAGR and 7–8% rate base CAGR), we give consideration for some regulatory

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

overhang and lower ROE at ComEd. Our price target supports a Sector Perform rating.

Risks to rating and price target

- Stagnant ROE performance at ComEd
- Credit metrics deteriorate due to significant borrowings
- Inflation drives up O&M costs
- Corporate minium taxes become a drag on cash
- Approval of upcoming multi-year plans at favorable levels

FirstEnergy Corp.

Valuation

Our base case of $49 places a 7% discount on our electric utility industry P/E multiple of 19.4x applied to 2024 EPS of $2.73. Our discount reflects ongoing regulatory uncertainty and below average credit metrics relative to peers, despite our view that a return to mid-teens FFO/Debt in 2024 is achievable. Recent transaction multiple on transmission evidences strong valuation on transmission, but we also consider a slower distribution segment hampered by a rate freeze in Ohio through 2024. Our valuation supports an Outperform rating.

Risks to rating and price target

- Financial and regulatory risks from ongoing Ohio investigations
- Weakened balance sheet and longer pathway to achieve IG ratings
- Further financial impact from pension expense in 2023/2024
- Potential equity dilution if future asset sales achieved at lower multiples
- Regulatory risks from 2023/2024 regulatory proceedings

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

Investment Thesis, Valuation and Risks

Exelon Corporation (EXC)

Investment Thesis

Our Equal Weight rating reflects our view that the current share price adequately reflects EXC's risk/reward proposition. Positive attributes including a healthy projected EPS CAGR (7%) and wires-centric asset mix are balanced by modest balance sheet concerns and our view that the company's regulatory jurisdictions are average to below average.

Target Price Valuation for EXC: $45.00 from NC

Our $45/sh price target is based on a P/E multiple analysis. We apply a P/E of 17.5-18.0X to our 24E EPS of $2.50. Our multiple represents a 0-5% discount to the '23 Regulated Electric peer group median of 18.0-18.5X as we balance positive features (strong 7% EPS CAGR and predominantly electric wires strategy) with our perception that EXC's regulatory jurisdictions are average to below average. We apply the '23 median to our 24E EPS due to the forward-looking nature of our price target.

Risks to Our Price Target and Rating for EXC

Risks to our thesis include favorable/unfavorable regulatory developments (upside/downside) and greater-than-expected ESG appetite for a wires-centric company (upside).

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

For details on our Guggenheim-hosted client Utility events including our WEC NDR THIS WEEK, DUK NDR, NEE NDR, AEE NDR, EXC NDR, AGA Conference meetings, ETR NDR, DTE NDR, PCG NDR, ES NDR, PNW NDR, POR NDR, and other events, scroll down…

FE: 6%–8% Annual Earnings Growth Continues Post-2025, Supported by Accelerating Capital Investment Program (see our note HERE)

EXC: Relief Rally as New C-Suite Rolls Forward on 6-8% (see our note HERE)

ES – Management Stops Short of 6-8% Growth as Wind Sale Details Remain Elusive (see our note HERE)

HE – 4Q EPS Beat on Utility, Miss on Bank; Plan Set at Conservative Level While NT Headwinds Manageable (see our note HERE)

PCG – CPUC issues ruling to support record on latest PG&E GRC update

NEE – NextEra Transmission fighting at FERC to keep competitive TX transmission project in MISO from cancellation

SRE – Sempra Infrastructure, Grupo Carso and CFE sign MOU on natural gas pipeline development in Mexico

D/CT – Millstone site to potentially host data center

EVRG/KS – Senate Committee on Utilities recommends passage of ROFR Bill

Nuclear – Japan exploring extending nuclear plant operating life to 60 years

FE – $100m potential personal gain was at stake in bribery case, according to testimony

PCG – CPUC issues ruling to support record on latest PG&E GRC update

- CPUC issued a ruling admitting workpapers related to the track 2 settlement and certain PG&E exhibits on undergrounding.
- PG&E previously filed updated testimony in the 2023 General Rate Case that incorporates updated cost escalation on O&M and capital, as well as tax law changes which impact revenue requirements.
- The updated testimony results in a 2023 base year revenue requirement increase of $835M (the bulk of the contribution from expense escalation, $641M).
- Escalation for 2024-2026 results in revenue requirement increases of $31M, $105M and $119M in the respective attrition years.
- Capital cost escalation also results in increases to rate base, with a 2023 base year step up to $50.9B (+$1.7B vs. prior request) and up to $68B by 2026 (+$5.4B vs. prior request)
- Docket: A2106021

Guggenheim takeaway:*FYI. Intervenors have previously been focused on specific revenue reductions, including alternative insurance proposals, reduction in operating costs, reduction in capital programs including undergrounding, etc. Between the broader stakeholder support*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

for undergoing, and legislative outcomes (noted HERE), there is a clear push to do more in CA, but we acknowledge the regulatory process bid-ask and intervenor scrutiny. Ultimately, we still see an upside to the base capex for PCG even among the bid-ask as system needs are not going away. More on our thesis here.

NEE – NextEra Transmission fighting at FERC to keep competitive TX transmission project in MISO from cancellation

- NextEra Transmission, among other stakeholders, requested FERC deny MISO's request to cancel a competitively awarded MISO project in TX.
- The project is a $115M Hartburg-Sabine transmission line that MISO has delayed due to disputes on utility ROFRs and has found that the project has no benefits as previously calculated.
- ETR supports the project cancellation.
- FERC Docket: ER23-865, latest ETR filing here.

Guggenheim takeaway: *FYI. The dispute around TX transmission in non-ERCOT territories continues.*

SRE – Sempra Infrastructure, Grupo Carso and CFE sign MOU on natural gas pipeline development in Mexico

- Sempra Infrastructure, Mexico's Federal Electricity Commission (CFE), and Carso Energy (GPOVF, majority owned by Carlos Slim), announced a Memorandum of Understanding (MOU) to advance joint development of natural gas transportation infrastructure between the states of Sonora and Baja California, Mexico.
- The agreement is intended to increase CFE's electricity generation capacity and availability of natural gas in the northwest region of Mexico.
- The length of the proposed natural gas pipeline would be approximately 281 miles and would be interconnected with the already existing "Samalayuca – Sásabe" and "Sásabe - Guaymas" transportation systems in Mexico, owned by affiliates of Carso Energy and Sempra Infrastructure.
- More here.

Guggenheim takeaway: *FYI. Constructive datapoint on the SIP platform expansion opportunities as well as supportive of MX LNG ambitions.*

D/CT ─ Millstone site to potentially host data center

- A developer has reportedly reached out to the town of Waterford to build roughly 1 million SF of data center space across up to two buildings on the Millstone site.
- "Dominion Energy is exploring this opportunity with NE Edge to help respond to a critical data infrastructure need in our state… The data center's need to find a suitable site and the availability of space on Millstone Power Station property make this a potentially beneficial partnership for Dominion Energy." - Millstone Site Vice President Michael O'Connor.
- More HERE/HERE.

Guggenheim takeaway: *Interesting item for your awareness, with data center co-location not unusual at this point following similar efforts at eastern plants like Susquehanna. The scale of the computing power (and electric load) is not yet available.*

EVRG/KS ─ Senate Committee on Utilities recommends passage of ROFR Bill

- The Committee on Utilities has recommended the passage of ROFR legislation, with amendments that appear to include a 10-year sunset.
- More HERE.

Guggenheim takeaway: *Heads up as we continue to monitor.*

Nuclear ─ Japan exploring extending nuclear plant operating life to 60 years

- The Nuclear Regulation Authority has promulgated a new draft order to allow for operations beyond the current 40-year window.
- More HERE.

Guggenheim takeaway: *Minor FYI.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

FE — $100m potential personal gain was at stake in bribery case, according to testimony

- A company lobbyist for FirstEnergy Solutions testified that executive John Kiani stood to personally gain $100m from the sale of two nuclear power plants.
- "Cespedes said in court that Kiani was in the know on the company's aggressive, $35 million lobbying campaign to support 2019 legislation that provided a $1.3 billion ratepayer-funded bailout to the plants. Specifically, Cespedes said Kiani was aware of what they called a "black ops" operation to bribe a signature collector, ad buys funded in secret with company cash, hiring private investigators to follow around signature gatherers seeking to repeal the bailout, and others." – Cleveland.com article
- More HERE.

Guggenheim takeaway: *Local media coverage of the ongoing HB6 trial of Larry Householder and Matt Borges. We continue to monitor.*

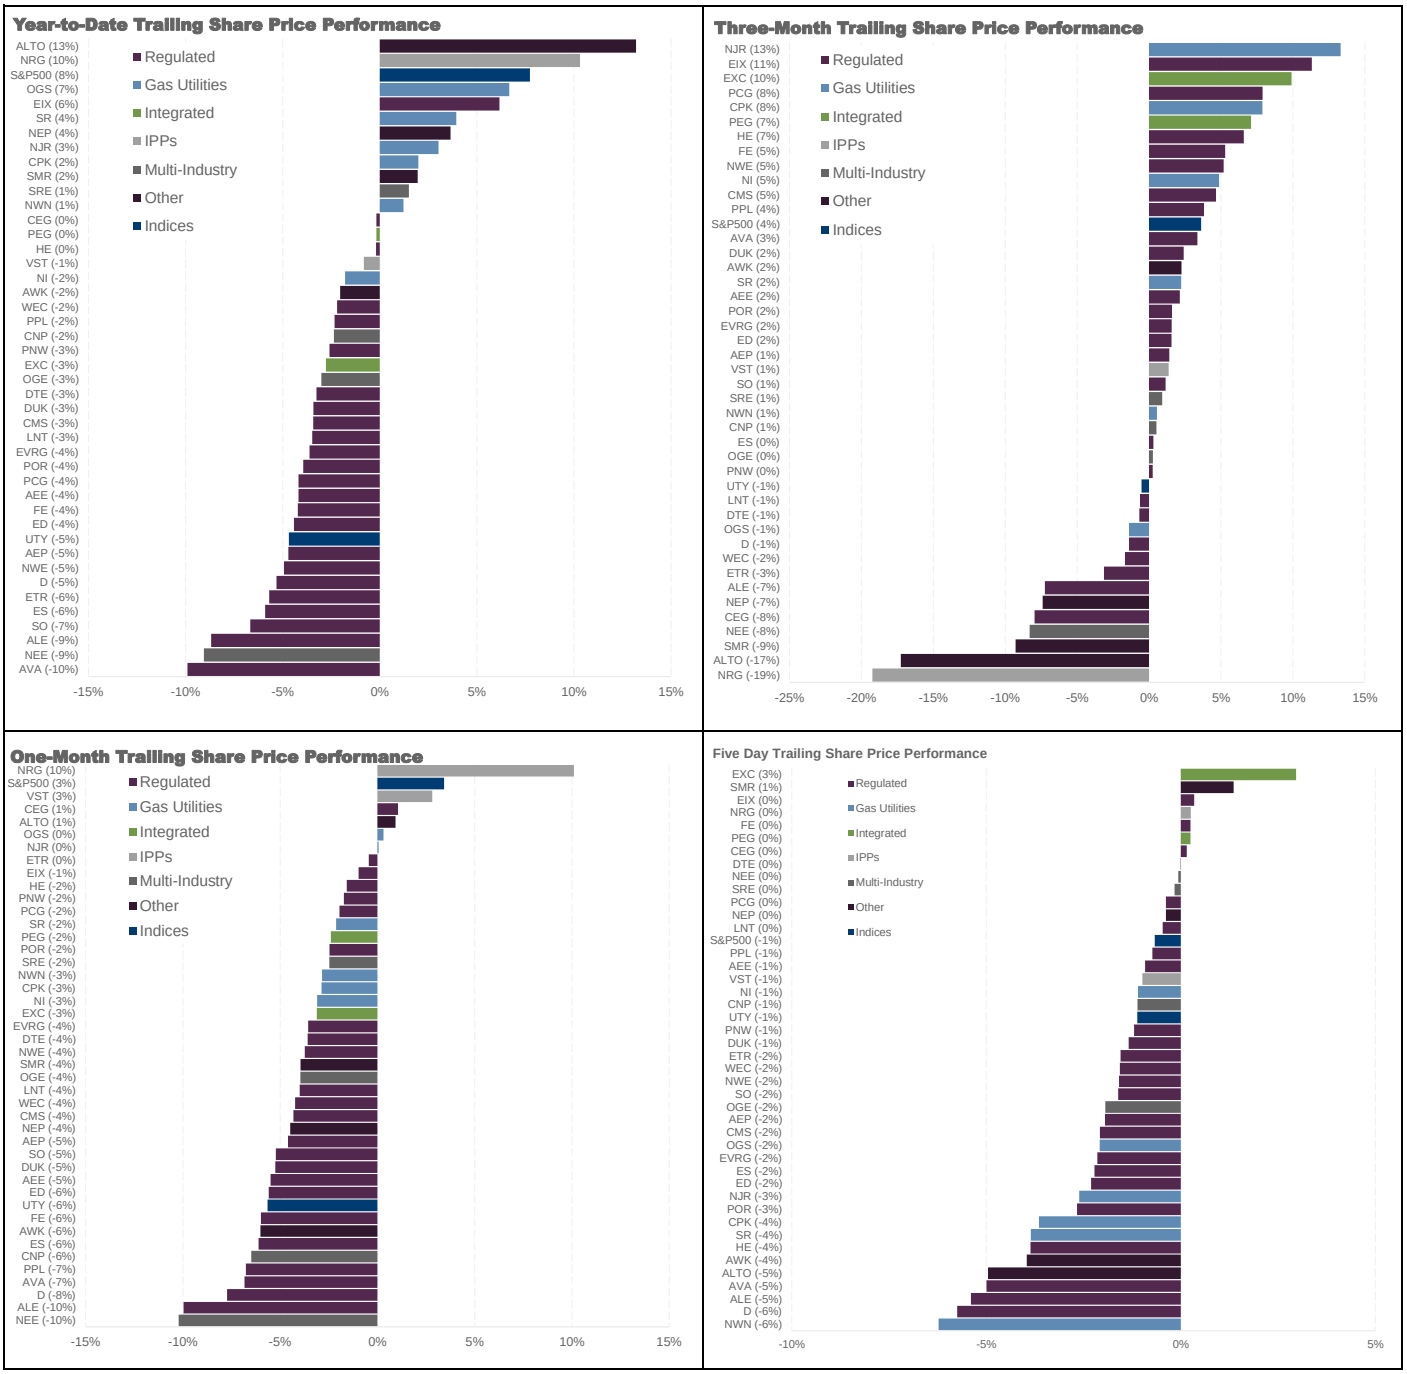
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

BUY	232	65.17%	44	18.97%
NEUTRAL	114	32.02%	7	6.14%
SELL	10	2.81%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Delivering Despite Headwinds

OUR TAKE: Positive. We're impressed with the overall update, most notably a reiteration of the NT and LT outlooks and management's confidence in the balance sheet cushion. While 2023 EPS growth will be below trend, it'll still be very solid at ~5% y/y despite well-known macro headwinds. We credit management for tight O&M controls and balance sheet management. Beyond 2023, growth should accelerate to 6%-8% or even faster in some years, with dividends growing at around the same pace. Operationally, things seem to be running smoothly, including around the busy but effective regulatory strategy. Still, we see a high degree of uncertainty related to the ComEd rate case (we aren't expecting a tough outcome, but there's a wide range of possibilities given the new format), and see a strong, but perhaps delicate balance sheet. We believe that the peer-average P/E is reasonable. EXC reported 4Q22 EPS of $0.43, matching consensus and beating our estimate by a penny.

KEY POINTS

Solid financial update. As was alluded to on the 3Q22 earnings call, y/y growth in 2023E will be below the LT 6%-8% trend, but still solid at 5% y/y relative to the original 2022 midpoint (after 8% y/y growth in 2022 relative to the 2021 guidance midpoint). Specifically, 2023 guidance calls for EPS of $2.30-$2.42, in line with expectations (Scotia $2.37/Street $2.36). Relative to the LT guidance, 2023 will see challenges related to ubiquitous cost inflation, higher corporate debt expenses, and PECO being in the second year of its rate cycle/assuming a return to normal weather in 2023. Thereafter, EXC expects each year through at least 2026 to see y/y growth of 6%-8%, with management expecting to meet or exceed the midpoint every year (we expect some years may even exceed the high end, which would be a first for EXC since 2010). Concurrently, EXC increased the four-year capex plan along with the roll forward by an impressive 8% or $2.3B, to $31.3B for 2023-2026. This should drive 7.9% average annual rate base growth. Impressively, there are truly no big projects in the capex plan: the largest is a $300m transmission project at BGE, representing 1% of the total plan. On O&M, management targets only a 1% y/y increase in 2023 ($50m), significantly below the rate of inflation; we credit EXC for continuously identifying cost savings to the benefit of customers and investors. Lastly, we're impressed with the strong dividend increase of 6.7%, slightly faster than peers and essentially in line with LT guidance.

Busy rate case calendar (as usual), driving consistent improvement in earned ROEs. On a TTM basis, EXC earned a 9.4% ROE, the second consecutive year of sequential improvement, highest since 2019, and squarely within the targeted 9%-10% range. In terms of rate cases and regulatory filings, the company is always busy, but tends to deliver strong outcomes. In 4Q22, EXC completed rate cases at DPL DE Gas, PECO Gas, DPL MD, and ComEd (formula rates). The biggest upcoming case in our view is the ComEd multi-year plan, filed in January. This is the first rate case under the new setup, moving away from the prior structure and more toward a traditional MYP. We like the change, and expect a notably higher allowed ROE

Qtly Adj EPS (FD)	Q1	Q2	Q3	Q4	Year	Price/Adj. EPS
2022A	$0.64	$0.44	$0.75	$0.43	$2.27	19.1x
2023E	$0.59	$0.59	$0.59	$0.59	$2.37	17.7x
2024E	$0.63	$0.63	$0.62	$0.62	$2.50	16.8x
2025E	$0.69	$0.62	$0.72	$0.66	$2.70	15.6x

(FY-Dec.)	2021A	2022A	2023E	2024E	2025E

than the 7.85% in the latest formulaic filing (national averages are ~9.25%-9.5%). We also appreciate that EXC voluntarily proposed to defer 35% of the 2024 revenue increase for two years, until 2026, to help with customer affordability; we expect this will build goodwill with regulators, customers, and politicians alike. An order is due by year-end, and given the new setup, neither management nor we expect a settlement. Beyond the MYP, ComEd also filed an updated four-year grid plan to ensure alignment. DPL DE also filed in December, while other 1H23 filings include BGE, Pepco DC, and Pepco MD.

EXC seems confident in the size of balance sheet cushion. Management targets a 13%-14% FFO/debt ratio, comfortably ahead of the 12% downgrade thresholds at S&P and Moody's, regardless of Treasury decisions on IRA/AMT treatment. Specifically, EXC expects that, without the repairs deduction, the company could still deliver on 13%. Impressively, despite the increased capex outlook, EXC believes that no incremental equity will be needed beyond the previously-discussed $1B plan ($575m completed in 2022, with the balance of $425m to be spread over 2023-2025 under the ATM authorization). Still, there will be some NT balance sheet stress related to regulatory lag, particularly around the timing of cash reconciliations in some jurisdictions and ComEd deferring 35% of the requested rate increase until 2026.

Company Description

Exelon Corporation (EXC) has the largest number of utility customers in the United States. Exelon's six utilities deliver electricity and natural gas to approximately 10 million customers in Delaware, the District of Columbia, Illinois, Maryland, New Jersey, and Pennsylvania through its Atlantic City Electric (ACE), Baltimore Gas and Electric Company (BGE), ComEd, Delmarva Power, PECO Energy Company, and Pepco Holdings Inc. (PHI) subsidiaries.

Investment Thesis

We're drawn to the materially de-risked portfolio that EXC retains after the CEG spinoff. RemainCo will have much better visibility into above-average EPS/DPS growth of 6%-8% as it will no longer be at the mercy of commodity markets. We like the favorable regulatory recovery mechanisms and revenue decoupling for most EXC utility subs, which have helped the company to achieve strong earned ROEs of ~9.5%. The quiet near-term rate case calendar also limits regulatory risks. However, we see the valuation as fair. We believe that the appeal of above-average EPS/DPS growth and a quiet rate case outlook is offset by uncertainty about the regulatory construct in IL, challenging regulatory environments in several jurisdictions, and the ESG "ding" from the ComEd bribery scandal.

Key Risks

Uncertainties around the future of ExGen (including a potential divestiture, IL legislation, and PJM rule changes), headline and financial risks related to the bribery scandal in IL, rate cases in challenging jurisdictions, and rising interest rates

Definition of Scotiabank, Global Banking and Markets Equity Research Ratings

Scotiabank has a three-tiered rating system, with ratings of Sector Outperform, Sector Perform, and Sector Underperform. Each Research Analyst assigns a rating that is relative to his or her coverage universe or an index identified by the Research Analyst that includes, but is not limited to, stocks covered by the Research Analyst.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets Research Analyst's 12-month view on the security. Research Analysts may sometimes express in research reports shorter-term views on these securities that may impact the price of the equity security in a manner directly counter to the Research Analyst's 12-month view. These shorter-term views are based upon catalysts or events that may have a shorter-term impact on the market price of the equity securities discussed in research reports, including but not limited to the inherent volatility of the marketplace. Any such shorter-term views expressed in research report are distinct from and do not affect the Research Analyst's 12-month view and are clearly noted as such.

Ratings

Sector Outperform (SO)
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Sector Perform (SP)
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Sector Underperform (SU)
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Focus Stock (FS)
As of April 29, 2019, Scotiabank GBM discontinued the Focus Stock rating. A stock assigned this rating represented an analyst's best idea(s); stocks in this category were expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that included, but was not limited to, stocks covered by the analyst.

Other Ratings

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Tender – As of January 25, 2021, Scotiabank GBM discontinued the Tender rating.

Risk Ranking
The Speculative risk ranking reflects exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, and exceptionally high stock volatility. The Director of Research and the Supervisory Analyst jointly make the final determination of the Speculative risk ranking.

Ratings Distribution

As of January 31, 2023

	Companies Rated in Each Category		Investment Banking Service Provided in the Last 12 Months	
Rating	**Count**	**Percentage**	**Count**	**Percentage**
Sector Outperform	271	50%	67	25%
Sector Perform	255	47%	51	20%
Sector Underperform	20	4%	0	0%

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

CREDIT SUISSE

Exelon Corporation

Hitting the Right Stride & Further Extending the Premium Outlook: Outperform

EXC

Target price (12M, US$) 46.00
Outperform

Electric Utilities | Forecast Increase

We are reaffirming our Outperform rating on EXC following FY22 results and the LT guidance update, which we view as better than expectations. Mgmt guided FY23 EPS to $2.36 at the midpoint, largely in-line with BBG / CSe of $2.37/sh and importantly extended the 6-8% EPS CAGR out to '26, off '22 base. The market quickly moved past concerns regarding lower growth outlook with the stock +247bps vs. XLU day of print. We see further room for upside in EXCs multiple as the stock compares favorably to most large cap peers in the current inflationary environment, especially when we consider 1) risk profile due to its fragmented CapEx plan; 2) multi-state T&D exposure; 3) equity financing needs of only $425Mn over 5yrs; 4) competitive dividend growth of 6% which compares favorably to D, DUK, & SO and 5) definitive markers for '22-'26 EPS within the 6-8% range, which gives investors more comfort in the forward outlook. EXC trades at a -3% discount following yesterday's outperformance and our $46 TP implies a mid-single digit premium which we see as achievable through the year.

- **Balance Sheet Considerations**: EXC has a low FFO/Debt minimum vs. peers (12%) and currently sees 13-14% as an achievable glide path. EXC is at the low end of the range due to CAMT drag though if treasury / IRS allows for the inclusion of repairs this could be a ~$200Mn cash tailwind. We're not assuming this as a base case (CSe 13% FFO) but are encouraged that the plan has already been high-graded for the cash-flow hit.
- **Catalyst Path is About Reg Execution Now:** We are watching the ComEd MYRP filing and BGE filing later this month. Testimony from intervenors in the ComEd case will be in May '23 with a final determination by Dec '23. Regarding ComEd, the jurisdictional returns are still tied to 30YR USTs through '23 with ComEd moving to a more traditional structure in '24. CSe assumes a 9.5% authorized ROE in '24E+ which we view as reasonable vs. prior GRC comps. We're also watching the ICC construct given the current vacancy to be appointed by the Governor, with the current 3-1 D-R make up. IL cannot have more than 3 members from one party on the 5-member council, and a republican could be appointed.
- **Valuation, EPS Ests, Risks.** We raise '23/'25 EPS +1c/2c to $2.38/$2.72 on financing considerations. Our TP is unchanged at $46. **Risks:** Inflation, interest rates.

Company Background

Exelon Corporation, a utility services holding company, engages in the energy generation, delivery, and marketing businesses in the United States and Canada.

Blue/Grey Sky Scenario

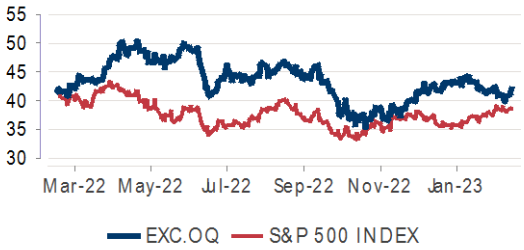
Our Blue Sky Scenario (US$) **50.00**

Our $50 Blue Sky scenario assumes a P/E multiple of 18.4x and that (1) management executes on its capital plan and continues to manage O&M costs in the face of record inflation and rising energy service costs, (2) management continues its grid resilience project, and (3) ComEd operates in a more favorable regulatory environment.

Our Grey Sky Scenario (US$) **41.00**

Our $41 Grey Sky scenario assumes EXC trades at a 15.1x. If inflationary head winds continue to persist and commodity prices continue to rise, this could impact customer bills and possibly impact consumption.

Share price performance



On 14-Feb-2023 the S&P 500 INDEX closed at 4136.13
Daily Feb14, 2022 - Feb14, 2023, 02/14/22 = US$42.2

Valuation: $46 TP unchanged; 13% Total Return Upside

We include our latest SOTP below, which is largely unchanged. We apply a 3% premium to a blended 2025E group multiple based on EXCs make up of electric, transmission and gas rate base. Overall, our valuation implies a 6% P/E premium vs. the electric group which we see as achievable on a 12-month view.

Figure 2: Sum of the Parts Valuation

EXC Sum of the Parts Valuation				Grey Sky	Base Case	Blue Sky
Electric Group Multiple				14.3x	**15.9x**	17.5x
Transmission Group Multiple - Gross up 1.0x for formulaic recovery				15.3x	**16.9x**	18.5x
Gas Group Multiple				15.0x	**16.7x**	18.4x
		Proportion				
EXC Electric Rate Base		57%		8.2x	**9.1x**	10.0x

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Exelon Corporation (EXC.OQ)

Method: We utilized an SOTP method to determine our target price of $46 per share and a blended P/E multiple of 16.8x for Outperform-rated EXC. We derived the blended P/E multiple by creating a proportion of each segment for the electric group, transmission group, and gas group. We based the proportion on each segment's contribution to rate base. We apply a 3% premium multiple to the current blended multiple of 16.3x. We believe that an improving regulatory environment in Illinois will be favorable for EXC investors by allowing ComEd to file a rate case that is in line with industry average. Changes in the allowed ROE structure could increase the allowed ROE by 2% in 2024. Another key driver is the execution of the $29Bn capital plan.

Risk: Risks to achieve our $46 target price and Outperform rating include: (1) management not meeting RAB projected growth; (2) not reaching stated growth metrics, including the 6-8% LT EPS CAGR; (3) increasing commodity cost for electric and gas service, natural disaster risk; (4) worse-than-expected regulatory outcomes; and (5) volatility to 30yr US Treasuries, as ComEd ROEs are linked to 30YR USTs.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

23-Jan-23	41.82	46.00	

** Asterisk signifies initiation or assumption of coverage.*

Effective July 3, 2016, NC denotes termination of coverage.

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.
**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*
Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.
Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.
Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.
**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	52%	(26% banking clients)
Neutral/Hold*	36%	(22% banking clients)
Underperform/Sell*	10%	(21% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.
**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment.
To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A., with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.
Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit Suisse. Part of the author(s)'s compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.
This research report is authored by:
Credit Suisse Securities (USA) LLC..... Nicholas Campanella ; Fei She, CFA ; Nathan Richardson
There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.
Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.
An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures . For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).

EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.

Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

The Wolfe Byte

EXC's 2023 guidance was in line and its 6-8% EPS growth was extended a year to 2026 and rebased off 2022. EXC also pointed to the midpoint of its targets or better, reassuring investors of its LT outlook. EXC outperformed yet still trades at discount. Outperform.

Strong and clear update on LT outlook; raise PT to $45. EXC reported in line 2022 EPS of $2.27 and 2023 guidance of $2.30-2.42 (cons. $2.37). EXC extended its 6-8% EPS growth rate a year to 2026 and rebased it off 2022 ($2.25), saying it targets the midpoint or better. EXC also provided annual growth expectations, noting it will be within 6-8% annually after this year. The stock beat the UTY by 245bp, as we believe the market feared a reduction in its target. EXC still trades at a half-turn discount. An in-line multiple seemed fair on unclear messaging last year. But now we think a premium is reasonable, given a mostly decoupled T&D utility with above-avg RB/EPS growth. We ascribe a 0.5x premium for now, given the first ComEd cases under a new framework and MYP/reconciliation filings in MD. But if those go well, we think EXC could ultimately trade closer to the high-quality, low-risk utilities. We raise our PT by $1 to $45, adding a 0.5x premium to our 2025 group P/E.

Annual growth disclosures helpful; raise 2023E. EXC indicated 5% yoy growth in 2023, low end of 6-8% in 2024, above 8% in 2025 and midpoint in 2026. We raise our 2023E by $0.04 to $2.37; our 2024-25E are in line with those implied by EXC.

AMT hit of $200M/yr in FFO/D target, could improve. EXC's FFO/Debt target averages 13-14% in 2023-26. EXC continues to assume a $200M cash hit from the AMT. If the IRS allows the repairs & maintenance deduction to be treated like accelerated D&A, then EXC's FFO/D is closer to 14% than 13%. The IRS could issue guidelines this year. EXC's equity needs are unchanged at $425M by 2025.

ComEd case, MD reconciliation/MYPs main regulatory items. EXC has ComEd's first 4-yr rate case, MD reconciliations on the first MYP, and a new MYP filing. For ComEd distribution,(~30% of rate base), intervenor testimony is on 5/18, hearings in Aug and a decision by 12/20. We have seen reasonable outcomes in IL's gas cases, with ROEs of 9.6-9.8%. ComEd can also earn up to 32bp ROE incentives.

ESTIMATES

($)	2023E	2024E	2025E
EPS FY	2.37 E	2.51 E	2.76 E
Prior	2.33 E	-	-
Cons.	2.37 E	2.52 E	2.73 E
P/E	17.7x	16.8x	15.3x

WOLFE RESEARCH

February 14, 2023

Investment Conclusion

We believe EXC is a low-risk utility stock. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%, driven by ~8% rate base growth. We think the stock hit last year on IRA and nonlinear EPS growth was overdone. We think the messaging and conviction on its LT outlook will be well-received. And we see the stock over time trading in line with the low-risk, high-quality utilities. This year, focus will be on a first multiyear rate case in IL, as well as a second multiyear filing in MD and reconciliations of the first MD/BGE multiyear case. Those are expected to more certainty to an otherwise low-risk utility story.

Valuation

Our $45PT is based on a half-turn premium to our utility group P/E of 16x 2025E.

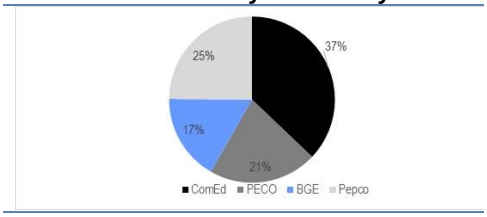
Exhibit 5: 2024 EPS by Subsidiary



Source: Wolfe Utilities & Power Research

Company Description

Chicago-based EXC is a large T&D (wires-only) regulated utility company, providing mostly electric service to roughly 10 million customers in the Mid-Atlantic and northern IL. It has no coal or other generation. ComEd serves northern IL and is EXC's largest utility sub, representing ~40% of rate base. Pepco serves DC, DE, MD and southern NJ and represents 25% of rate base. PECO, which serves southeastern PA, and BGE, which serves Baltimore, each represent nearly 20% of rate base. A little over 90% of EXC's total rate base is electric, with the rest gas LDC.

Investment Thesis

We believe EXC is a low-risk utility stock with above average EPS growth. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%.

Valuation

Our $45 PT is based on a half-turn premium to our utility group average P/E of 16x 2025E. Risks are less capex, lower returns, less cash or more equity needs, and unfavorable regulatory outcomes.

WOLFE RESEARCH

February 14, 2023

Outperform (OP):	The security is projected to outperform analyst's industry coverage universe over the next 12 months.
Peer Perform (PP):	The security is projected to perform approximately in line with analyst's industry coverage universe over the next 12 months.
Underperform (UP):	The security is projected to underperform analyst's industry coverage universe over the next 12 months.

Effective August 1, 2022, Wolfe Research, LLC will no longer publish target prices for Peer Perform rated companies.

Wolfe Research, LLC uses a relative rating system using terms such as Outperform, Peer Perform and Underperform (see definitions above). Please carefully read the definitions of all ratings used in Wolfe Research, LLC research. In addition, since Wolfe Research, LLC research contains more complete information concerning the analyst's views, please carefully read Wolfe Research, LLC research in its entirety and not infer the contents from the ratings alone. In all cases, ratings (or research) should not be used or relied upon as investment advice and any investment decisions should be based upon individual circumstances and other considerations.

Wolfe Research, LLC Industry Weighting System:

Market Overweight (MO):	Expect the industry to outperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.
Market Weight (MW):	Expect the industry to perform approximately in line with the primary market index for the region (S&P 500 in the U.S.) over the next 12 months.
Market Underweight (MU):	Expect the industry to underperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.

Wolfe Research, LLC Distribution of Fundamental Stock Ratings (As of February 14, 2023):

Outperform:	45%	6% Investment Banking Clients within the previous 12 months
Peer Perform:	44%	2% Investment Banking Clients within the previous 12 months
Underperform:	11%	0% Investment Banking Clients within the previous 12 months

Wolfe Research, LLC does not assign ratings of Buy, Hold or Sell to the stocks it covers. Outperform, Peer Perform and Underperform are not the respective equivalents of Buy, Hold and Sell but represent relative weightings as defined above. To satisfy regulatory requirements, Outperform has been designated to correspond with Buy, Peer Perform has been designated to correspond with Hold and Underperform has been designated to correspond with Sell.

Key Message: Exelon's first roll-forward as a fully regulated wires utility came with a straightforward reaffirmation of the 6-8% LT EPS growth plan, putting to rest some investor concerns that the new C-Suite would use the opportunity to step down growth. Alongside the normal capex and guidance roll, management also debuted a more detailed set of drivers and assumptions for each year of the new plan, something that we had flagged as a potential heading into the print. The balance of the update was refreshingly simple, in our view, with a renewed focus on the dense regulatory calendar that underpins the latest plans. This calendar, alongside a lack of IRA uplift as compared to peers, has been a core a part of why we remain on the sidelines, although we continue to see value in EXC's underlying T&D growth proposition and the simplicity of its FERC/MYP regulatory recovery mechanisms. We continue to seek a reentry point. We caught up with the full C-Suite.

Management rolls forward and reaffirms 6-8% growth for 2022-2026 alongside a suite of details on YoY drivers. Management rolled out a new 6-8% EPS growth plan built on 7.9% rate base growth, itself driven by a $2.1bn increase over the prior capital plan. The announcement puts to rest what we perceived to be a modest concern among some investors that the new management team would use the call as a podium to lower the overall growth rate to 5-7%, with the company affirming both its prior 2021-2025 CAGR and its new 2022-2026 CAGR, alongside YoY growth in the "middle" of the 6-8% range from 2025-2026. The targets are underpinned by a financing plan with ~$13bn of debt and no changes to the prior equity plan of ~$425mm. We and others asked management about the potential avenues for the latter, with management noting that they could simply use the existing ATM as-needed. In our view, management also put to rest the lingering questions around the impact of the CAMT, with the team providing useful details on the impacts of tax repair treatment on where they sit within their overall credit metric targets (13-14% FFO/debt). Finally, management also provided a useful walkthrough of key YoY drivers across the business, expanding on the disclosures it first provided with 3Q22 results last November. As we noted in our recent outlook, we remain attuned to how the regulatory calendar unfolds alongside the assumptions embedded in that plan – e.g., what management is assuming for reasonable regulatory outcomes.

Stable C-Suite and renewed plan shift the focus back to execution, with Illinois and the eastern MYPs the next key arenas. In our view, investor focus is understandably sharpening around Illinois, with last month's filing (see our note HERE) setting in motion a process through next fall to determine the ultimate earnings power of ComEd. We asked on the call about the backdrop at the ICC in particular given the prospects for the loss of a quorum this spring (1 seat is already vacant), with management noting that it broadly plans around its filings in conjunction with stakeholders, with the IL filing in particular an example of this given its initial deferrals of a portion of the increase's impact. In management's view, the state, and in particular the governor, are attuned to the role of the utilities as vehicles for execution on 2021's CEJA legislation, and as such the stability of the ICC remains a priority in the state. As noted above, the initial MYP in IL and the reconciliations/second filings in the east are important data points to us for the street to build additional confidence on the shape and profile of the latest growth drivers.

EXC reported 4Q22 EPS of $0.43, largely in line with our estimate and consensus ($0.44/$0.43). YoY earnings were $0.04 higher, with higher distribution rates at the utilities partially offset by interest drag at the parent (-$0.03). Across the opcos, ComEd earnings were +$0.07 YoY thanks to another quarter of higher distribution rates (investment and treasuries) alongside FRP timing. Earnings were $0.03 lower at PECO, reflecting the full offset of higher distribution rates (+$0.03) with a variety of higher expenses, including $0.02 of higher contracting costs and system upgrades. BGE was flat, while PHI added $0.03, as higher distro rates, income tax timing, and lower contracting costs were partially offset

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

by D&A and a credit loss expense. **Looking ahead, management initiated 2023 EPS guidance in the range of $2.30-$2.42, vs. our $2.36, which remains unchanged.**

Valuation

Our valuation is based on our 2025E EPS of $2.74. We use our 17x regulated utility multiple, which is based on our regression model using the correlation between electric utility valuations and forward interest rate expectations over the past 30+ years. To this 17x multiple, we continue to apply a 1-turn premium to each of EXC's subsidiaries for favorable recovery mechanisms (riders, MYPs) and underlying growth/ incremental investment opportunities, except for ComEd. This blended 17.7x multiple, applied to our 2025E EPS and discounted back 1 year, equals our $45 PT.

Risks

EXC comprises regulated distribution and transmission assets, which face traditional risk factors and upside drivers inherent with all utilities, including: (1) positive/negative rate case outcomes above/below our expectations, (2) higher/lower capex outlooks, and (3) interest rate changes above/below what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

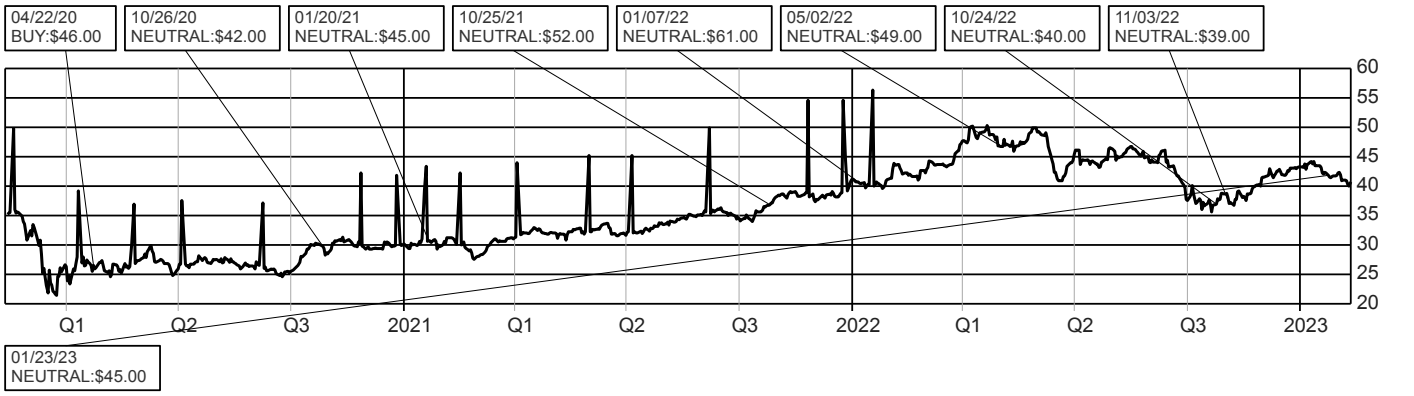
IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 02-10-2023



Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Regulated Electric Utilities

Exelon Corporation (EXC)

EXC: Q4 Updates Hit the Mark—We View Shares as Fairly Valued

Our Call

EXC's '23 EPS guidance met our expectations and other updates support a 6-8% EPS CAGR. We view the relative valuation as fair (0-2% P/E discounts to peers on 23-25E EPS). Reiterate Equal Weight and lower PT to $45 from $47 on lower peer multiples.

Key Updates. EXC initiated a '23 EPS guidance range of $2.30-$2.42, or 4% higher than the 22A EPS of $2.27 at the midpoint. In addition, mgmt. extended the 6-8% EPS CAGR goal through '26 (off of the midpoint of the '22 EPS guidance range of $2.25). The strong EPS growth is driven by higher capex across most of EXC's utilities. The 4-yr refresh of $31.3B ('23-26) is ~$2B, or 8% higher than '22-25.

EPS Outlook. We tweak our 23-25E EPS to/from $2.36/$2.38, $2.50/$2.53 and $2.72/$2.75 as the positive impact of higher assumed capex is offset by higher assumed financing costs. We increase our 26E EPS to $2.93 from $2.90. Our outlook results in a ~7% CAGR off the '22 guidance midpoint of $2.25. Our financing assumptions are consistent with EXC's guidance and result in FFO/Debt ratios within the company's target range of 13-14% (vs. the downgrade threshold of 12%).

Off to a Good Start. In our view, CEO Calvin Butler and team are off to a good start (Mr. Butler assumed the role on 1/3/23). We think mgmt. has effectively cleared up the confusion around the balance sheet outlook, interest rate exposure, and EPS trajectory. EXC has an intriguing wires-centric strategy and operates in several states that allow for constructive PBR plans. While the comparatively weak balance sheet is a consideration, we think there is a case for P/E multiple expansion.

Investment Thesis, Valuation and Risks

Exelon Corporation (EXC)

Investment Thesis

Our Equal Weight rating reflects our view that the current share price adequately reflects EXC's risk/reward proposition. Positive attributes including a healthy projected EPS CAGR (7%) and wires-centric asset mix are balanced by modest balance sheet concerns and our view that the company's regulatory jurisdictions are average to below average.

Target Price Valuation for EXC: $45.00 from $47.00

Our $45/sh price target is based on a P/E multiple analysis. We apply a P/E of 17.5-18.0X to our 24E EPS of $2.50. Our multiple represents a 0-5% discount to the '23 Regulated Electric peer group median of 18.0-18.5X as we balance positive features (strong 7% EPS CAGR and predominantly electric wires strategy) with our perception that EXC's regulatory jurisdictions are average to below average. We apply the '23 median to our 24E EPS due to the forward-looking nature of our price target.

Risks to Our Price Target and Rating for EXC

Risks to our thesis include favorable/unfavorable regulatory developments (upside/downside) and greater-than-expected ESG appetite for a wires-centric company (upside).

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

BMO Capital Markets

EXC-NSDQ	Rating	Price: Feb-14	Target ↓	Total Rtn
	Outperform	$42.03	$45.00	10%

Bringing Valentine's Day Love - A Derisked Story to Add to Investor's Inventory

Bottom Line:

We believe the company's reiteration of its 6-8% growth rate (with the emphasis "at the midpoint or better") and the incremental detail on YOY EPS growth through 2026 should help derisk the story, and we would continue to be buyers of the name even after its ~2.5% relative outperformance today. We reiterate our Outperform rating as we see EXC's geographically diversified and low-risk T&D profile supporting a premium multiple over the next 12 months as the company executes on its regulatory strategy. Our MTM target price moves to $45/share.

Key Points

Given the multi-month debate around EXC's long-term growth rate as it rolled to 2026, we see management's incremental commentary on the YOY growth and drivers for both 2024-2025 as a positive as it supports our own and the Street's current EPS forecast. More importantly we see implied 2026 EPS which is expected to grow YOY at the midpoint (~7%) as a significant positive given fears of a below-trend year given the dynamics of the company's PECO rate cycle. Although we still expect PECO's earnings profile to be more flattish in years 2 and 3 of its normal rate case cycle, the better-than-feared earnings growth 2026 over 2025 reflects the continued regulated investment at the company as well as the nearly 8% increase in its capital plan with no incremental equity.

The company's updated capex forecast (2022-2026) supports ~8% rate base growth which given minimal equity dilution supports an EPS CAGR approaching the midpoint of the company's 6-8% growth objective. Management sees no need for any incremental common equity beyond the $425mm remaining in its previous program. This is supported by the ~$3bn increase in higher operating cashflow the company sees in 2023-2026 (relative to 2022-2025) which we estimate is driven by three primary items discussed inside. Management continues to target a strong balance sheet with FFO/Debt metrics of 13-14% across the forecast period which is ~1% above its downgrade threshold and should strengthen modestly as management executes on its rate case cycle.

EXC's interest rate exposure/parent debt is stable through our forecast. In Exhibit 3 we illustrate a potential $0.02 cumulative EPS impact to the refinancing of the company's HoldCo maturities at current interest rates. Additionally, we see parent debt/total debt as stable in the 26-27% range given EXC's forecast of $5bn of Holdco financing, net of ~$2.9bn of maturities.

Notes : Prior numbers reflect our pre-spin estimates

Our Thesis

We see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans. We believe the company's low-risk T&D business profile, strong and visible fundamental growth outlook, and supportive regulatory environment position the company well to drive multiple expansion.

Scenarios

Valuation

We value EXC on a sum-of-the-parts valuation. Our framework begins with the relevant sector average P/E multiple using 2024E EPS as a base, which we then adjust (premium, discount, or no change) to reflect the relative fundamentals for each segment.

Upside Scenario $50.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $37.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.

Key Catalysts

We see EXC management now in execution mode post its separation from Constellation Energy. With nearly 75% of the company's revenues decoupled from volumes and 100% of its capital covered through alternative recovery mechanisms, we see EXC achieving our target price over the next 12-18-month as management executes against its capital and regulatory plans.

Company Description

Exelon is the largest utility by customer count with over 10mm electric and natural gas customers spread across its six-state footprint. It is the fourth largest utility by rate base with one of the lowest business risk and ESG-friendly profiles given the company's pure T&D asset mix with electric distribution and transmission representing over 85% of rate base.

Company Models

Bringing The Love on Valentine's Day - Another Derisked Story to Add to Utility Investor's Inventory

Bottom Line: We believe the company's reiteration of its 6-8% growth rate (with the emphasis "at the midpoint or better") and the incremental detail on YOY EPS growth through 2026 should help derisk the story and we would continue to be buyers of the name even after its ~2.5% relative outperformance today. Given what had been a multi-month debate around EXC's long-term growth rate as it rolled to 2026, we see management's incremental commentary on the YOY growth and drivers for both 2024-2025 as a positive as it supports our own and the Street's current EPS forecast. However, and more importantly, we see the implied 2026 EPS which is expected to grow YOY at the midpoint (~7%) as a significant positive given the fear of a below-trend year given the dynamics of the company's PECO rate cycle. Although we still expect PECO's earnings profile to be more flattish in years 2 and 3 of its normal rate case cycle, the better-than-feared earnings growth 2026 over 2025 reflects the continued regulated investment at the company's other jurisdictions as well as the nearly 8% increase in its capital plan with no incremental equity.

The company's updated capex forecast (now 2022-2026) supports ~8% rate base growth, which given minimal equity dilution, supports an EPS CAGR approaching the midpoint of the company's 6-8% growth objective. Management sees no need for any incremental common equity in its updated plan beyond the $425mm remaining in its program through 2026. This is supported by the ~$3bn increase in higher operating cash flow the company forecasts in its 2023-2026 forecast (relative to 2022-2025) that we estimate is driven by three main items discussed in further detail below. Management continues to target a strong balance sheet with FFO/Debt metrics of 13-14% across the forecast period, which is at least 1% above its downgrade threshold and should continue to strengthen modestly as management executes on its rate case cycle.

We reiterate our Outperform rating as we see the combination of the company's large-cap, geographically diversified and low-risk T&D profile coupled with its above-average growth rate, minimal equity needs and growing credit metric cushion supporting a premium multiple over the next 12 months as the company executes on its regulatory strategy. Our 2023-2025 estimates remain unchanged at $2.36, $2.50, and $2,72, respectively. Our target price moves to $45/share as we mark-to-market our peer group multiples used in our SOTP valuation framework.

Management Delivered Much Needed Clarity on Growth, Financing & Credit

With today's call, EXC provided several updates to its financial guidance including a formal 2023 EPS range, illustrative 2024-2026 year-over-year growth guidance, and a reiteration of its financing plan and commitment to credit quality.

- Management initiated a 2023 guidance range of $2.30-2.42 with a $2.36 midpoint, which was in line with BMO's own estimate at $2.36 and just shy of the Street's $2.37 estimate.
- Importantly, the company maintained its 6-8% "fully regulated operating EPS compound annual growth of 6-8% from 2022 through 2026" which now anchors growth off of the 2022 guidance range ($2.18-2.32) midpoint of $2.25. **Importantly, management reiterated its expectation that it would expect to be "at the midpoint or better" through the 2023-2026 forecast period.**

  In Slide 16 of its 4Q22 deck and illustrated in Exhibit 1, management added incremental YOY growth detail to its infamous 3Q22 "tildes" slide that significantly helped demystify the growth outlook for the company. Specifically, the company qualitatively outlined the following multi-year outlook (Exhibit 2):

- 2023 growth "**below the low end** of 6-8%"
- 2024 growth "**in the low end** of 6-8% range" – Would suggest $2.51 vs. Street at $2.52
- 2025 growth "**above the 6-8% range**" - Would suggest $2.72 vs. Street at $2.73
- 2026 growth "**in the middle of 6-8% range**" - Would suggest $2.91 vs. Street at $2.90

- **We would note that while the company is growing below its 6-8% range in 2023, it is largely driven by the unfavorable impact of weather normalization at PECO.** This impact should not affect the YoY growth in the 2024-2026 period as investment and anticipated rate relief in 2024 and 2025 for both its electric and gas distribution operations, respectively, should drive year-over-year growth inside of its 6-8% LT growth outlook and more importantly ~7% YoY growth in 2026.
- **An increase in the four-year capex from $29bn (2022-2025) to $31.3bn (2023-2026) supports continued rate base growth of nearly 8% (2022-2026) vs. 8.1% (2021-2025).** Importantly, management sees no change in its equity needs in the current plan above the $425mm remaining in the existing program. We view the lack of equity issuance in the current plan as a positive given the higher capital spend and the ~$200mm in cash impact from the IRA's CMAT provision. We would note with the FFO (Pre-WC)/Debt forecast of 13-14% in 2023-2026, the company also has ample cushion relative to its 12% downgrade threshold at both S&P and Moody's.
- **The Board of Directors recently raised its dividend by 6.7% and given the implied 61% P/O for 2023 management expects DPS to grow in line with its EPS growth trajectory.**

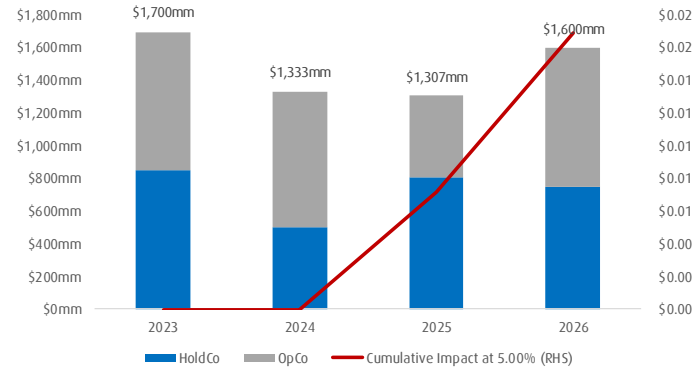
Credit Profile Remains Solid With At Least 100 b/p Cushion Forecast Despite CMAT Impact

Exelon reiterated that a top financial priority was maintaining a strong balance sheet. As such management continues to target consolidated credit metrics of 13-14% on both an S&P and Moody's adjusted basis based on "average internal estimates 2023-2026." Although not disclosed, the company noted it finished 2022 above its 12% downgrade threshold and similar to the rating agencies targets its metrics over its planning horizon as they often reflect periodic changes in regulatory recovery similar to this year's higher earned ComEd ROE (where related cashflow comes in 2024). The company's current financial forecast (EPS and credit) assumes it will not be able to utilize repairs deductions to offset any CMAT-related payments which would keep consolidated credit metrics on the lower end of its 13-14% target but still ~100 b/p above its downgrade threshold. However, as part of its mitigation efforts, EXC

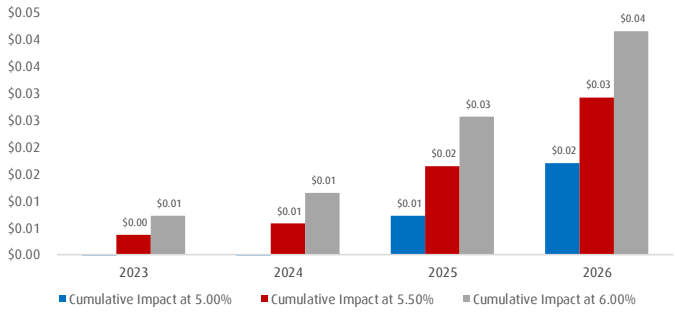
has pushed down the impact to the regulated operating companies (where income is earned) through higher deferred tax assets which modestly increases the rate base and can partially offset the impact over time. We assume on a consolidated basis EXC's FFO/Debt metrics will be in the 12% range in 2023 and continue to strengthen into the 13%+ range in 2024, 2025, and 2026 as they secure regulatory recovery through the IL MYRP and their other MYPs. Should the Treasury ultimately allow for repairs treatment the company, all things held equal, could see it's FFO/debt metrics improve to the upper end of its 13-14% range.

Exhibit 3: OPCO & HoldCo Maturities and HoldCo-Only IR Sensitivity



Source: BMO Capital Markets, Company Filings, FactSet

Exhibit 4: HoldCo Maturity Interest Rate Sensitivity



Source: BMO Capital Markets, Company Filings, FactSet

Despite the nearly $200mm/year tax-related drag in consolidated FFO, there is no incremental common equity contemplated in the plan beyond the $425mm remaining in its program through 2026. This is supported by the ~$3bn increase in operating cashflow the company forecasts in its 2023-2026 forecast (relative to 2022-2025) that we estimate is driven by three main items: 1) a net $800mm benefit from the absence of separation payments to CEG ($1.8bn) partially offset by $1bn in higher CMAT tax payments; 2) rate base-related operating cashflow growth ($1.4-1.6bn); and 3) higher ComEd ROE with cash collection beginning in 2024 (~$600-800mm).

Additionally, we see EXC's interest rate exposure and parent debt as stable through our current forecast. At year-end, EXC had $1,850mm of SOFR-based term loans that were rate locked at ~4.75%. Of these balances, the company is expecting to term out its $500mm 365-day facility in March, and its 18-month facilities of $850mm and $500mm in July 2023 and April 2024, respectively. Of the $13bn in debt issuances forecast through 2026, roughly $5bn of this will be done at the corporate level, and after ~$2.9bn of maturities, we see EXC's parent debt as a percentage of total debt as stable in the 26-27% range. Using the current forward yield curve for BBB utility bonds (which is flat across the curve at ~5.1%) in Exhibit 3 we illustrate a potential $0.02 (0.7%) cumulative EPS impact on the refinancing of the company's HoldCo maturities at current interest rates. In Exhibit 4 we illustrate the incremental impact of a 5.0%, 5.5%, and 6.0% coupon to all known HoldCo maturities. In the worst case, we see a $0.04 drag by 2026 or 1.3%.

4Q22 Earnings & Details on Other Updates

EXC reported EPS of $0.43 was in line with the $0.43 consensus estimate and our $0.42 estimate. Full-year results came in at $2.27 which was just above our/Street's estimate at $2.25/$2.26. YoY results increased by +$0.44 compared to a revised $1.83 in 2021 reflecting only EXC continuing operations. ComEd added +$0.17 with $0.15 attributed to distribution, transmission, and energy efficiency rates and +$0.02 of Other. PECO increased +$0.10 as the growth of +$0.12 from distribution rates and +$0.03 of lower storm costs were partially offset by ($0.02) of D&A, ($0.01) of credit loss expenses, ($0.01) of higher interest expenses and ($0.01) of other. BGE was flat YoY as +$0.06 of distribution and transmission rates and favorable storm costs contributing +$0.01 was offset by ($0.03) of D&A, ($0.01)

of credit loss expenses, ($0.01) of higher interest expenses and ($0.02) of other. PHI was also flat YoY as +$0.09 of distribution rates were offset by ($0.04) of D&A, ($0.02) of credit loss expenses, ($0.02) of higher interest expenses, and ($0.01) of unfavorable storm costs. Corporate declined ($0.07) with ($0.06) of interest expense and ($0.01) of other. The BSC allocations adjustment for discontinued operations added +$0.24. The results yielded a trailing twelve-month earned ROE of 9.4%, which is the highest since 2019.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in Exelon in United States.

Methodology and Risks to Target Price/Valuation for Exelon (EXC-NSDQ)

Methodology: We value EXC using our sum-of-the-parts valuation analysis to derive our target price. Our valuation takes into account the quality of EXC's assets relative to its peers and the company's regulated business rate base growth and funding sources.

Risks: Failure to pass a version of the "Clean Energy Jobs Act" in the upcoming legislative session that sufficiently expands financial support for EXC Gen's nuclear plants would cause us to re-evaluate our rating, all else equal. The Governor's opposition to the existing Formulaic Based Rate Plan in IL may result in a new set of regulations that could be adverse to the company's ComEd Utility. Nuclear operations are subject to additional safety and regulatory oversight.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Other Important Disclosures

For Important Disclosures on the stocks discussed in this report, please go to https://researchglobal0.bmocapitalmarkets.com/public-disclosure/ or write to Editorial Department, BMO Capital Markets, 3 Times Square, New York, NY 10036 or Editorial Department, BMO Capital Markets, 1 First Canadian Place, Toronto, Ontario, M5X 1H3.

Dissemination of Research

Dissemination of fundamental BMO Capital Markets Equity Research is available via our website https://researchglobal0.bmocapitalmarkets.com/. Institutional clients may also simultaneously receive our fundamental research via email and/or via services such as Refinitiv, Bloomberg, FactSet, Visible Alpha, and S&P Capital IQ.

BMO Capital Markets issues a variety of research products in addition to fundamental research. Institutional clients may request notification when additional research content is made available on our website. BMO Capital Markets may use proprietary models in the preparation of reports. Material information about such models may be obtained by contacting the research analyst directly. There is no planned frequency of model updates.

The analyst(s) named in this report may discuss trading strategies that reference a catalyst or event that may have a near or long term impact on the market price of the equity securities discussed. In some cases, the impact may directionally counter the analyst's published 12 month target price and rating. Any such trading or alternative strategies can be based on differing time horizons, methodologies, or otherwise and are distinct from and do not affect the analysts' fundamental equity rating in the report.

Research coverage of licensed cannabis producers and other cannabis-related companies is made available only to eligible approved North American, Australian, and EU-based BMO Nesbitt Burns Inc., BMO Capital Markets Limited, Bank of Montreal Europe Plc and BMO Capital Markets Corp. clients via email, our website and select third party platforms.

~ Research distribution and approval times are provided on the cover of each report. Times are approximations as system and distribution processes are not exact and can vary based on the sender and recipients' services. Unless otherwise noted, times are Eastern Standard and when two times are provided, the approval time precedes the distribution time.

For recommendations disseminated during the preceding 12-month period, please visit: https://researchglobal0.bmocapitalmarkets.com/public-disclosure/.

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents

have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

Alert

February 14, 2023

Energy: Electric Utilities

NYSE: EXC

Exelon Corporation

EXC: In Line Quarter; Clarity on Multi-Year EPS Cadence; IL Rate Case Is the Main Item to Watch in 2023

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

EXC reported an in line quarter as ComEd results benefited from higher ROE (linked to 30-year Treasuries). Management provided clarity on the multi-year 6-8% EPS growth rate with 2023 to be below that range as several multi-year rate plans are built into the EPS trajectory. Longer term, EXC reiterated a target of 6-8% EPS CAGR through 2026 with a bias to the mid-point or higher. We expect the inaugural IL MYRP to be the biggest item to watch in 2023 as the outcome will define the EPS outlook to a meaningful extent. Management also rolled capex by a year, with the new four-year total of $31.3B higher than the prior by $2.3B, mostly to incorporate higher spending at ComEd. We believe that EXC remains a top tier T&D utility with a fair valuation (in line with the large cap utility average) and remain Sector Weight at present.

4Q results are mostly in line with expectations: EXC reported $0.43 adjusted EPS for the 4Q — largely in line with our expectations and consensus. For the full year, EXC reported EPS of $2.27, vs. our $2.28 estimate, the consensus of $2.26, and guidance of $2.21-$2.29. Full-year results at ComEd benefited from higher a ROE (which is linked to the 30-year Treasury yield), offset partially by higher borrowing costs.

Figure 1 - 4Q Earnings versus Expectations

4Q22	EXC	KBCM
ComEd	0.21	0.17
PECO	0.10	0.14
BG&E	0.12	0.15
PHI	0.09	0.07
Parent	(0.09)	(0.11)
EXC	**0.43**	**0.44**

Source: Company Reports, KBCM Estimates

2023 guidance is in line with expectations: EXC provided 2023 EPS guidance of $2.30-$2.42, which, at the midpoint, would imply 4% EPS growth. Our current forecast and consensus are at the guided midpoint of $2.36. On its last call, management had provided qualitative guidance pointing to a slower growth year in 2023; thus, the formal guidance does not come as a surprise. EXC is assuming headwinds from higher debt service costs and the ongoing reconciliation process for the BGE and PHI multi-year rate plans. However, once the cadence of the multi-year rate plans across multiple jurisdictions is well underway, the EPS trajectory is expected to smooth out to the long-term trend of 6-8%. Management formally laid out a target of 6-8% EPS CAGR from 2022-2026, with an expectation to be at the midpoint or better. The EPS growth trajectory is in line with the projected 8% rate base growth CAGR through 2026.

Figure 2 - EPS Cadence

EPS Cadence	2023	2024	2025	2026	CAGR
KBCM estimates	2.36	2.50	2.69	2.91	
Growth Rate	3.5%	5.9%	7.6%	8.0%	5.3%
Consensus estimates	2.36	2.51	2.72	2.91	
Growth Rate	4.3%	6.4%	8.5%	7.0%	5.4%
Management Commentary	Growth below Low end of 6-8%	Growth at Low End of 6-8%	Growth above 6-8%	Growth in Middle of 6-8%	

Source: Company Reports, KBCM Estimates, Thomson Reuters

2023 to be marked by multiple rate cases: The largest of all the proceedings is the inaugural ComEd MYRP (see our write-up here), which management expects will be a fully litigated proceeding. Staff and intervenor testimony is scheduled for May, with an ALJ PD expected in October. A DPL DE Electric rate case was filed in December and BGE plans to file an MYRP in February. Also expected are PEPCO DC and MD MYRPs.

Capex plan: EXC outlined a new four-year capex plan of $31.3B (2023-2026E) vs. the prior five-year plan (2022-2025) of $29B. A major part of the incremental capex is likely to go toward IL where a multi-year rate case proceeding is currently underway.

Recent Research: EXC: 3Q Beats, Longer-Term Growth Rate Reiterated, but Cadence Will Be Uneven; EXC: No Surprises in the Quarter, but the IRA Could Bring a Bigger Tax Bill; EXC: Delivering on Track Results as a Regulated Utility

Valuation: Based on a stock price of $41.19 and our 2024E EPS of $2.50, shares of EXC are trading at a P/E ratio of ~16x, representing a 2% discount to Large-Cap Regulated Utilities trading at ~17x. We view the shares as fairly priced at current levels.

Risks: EXC's regulated utilities are exposed to a number of risks, including regulatory risk in its jurisdictions and on the federal level, weather variations affecting electricity demand and the reliability of its system, interest rate risk affecting its cost of capital, and macroeconomic risk as underlying economic activity affects demand for electric power and gas. Should the impacts of these risks be greater than we currently anticipate, the Company and the shares may underperform relative to our expectations. Conversely, should these risks' impact be less than anticipated, the Company and the shares may outperform relative to our current expectations.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

Disclosure Appendix

Important Disclosures

Exelon Corporation - EXC

We expect to receive or intend to seek compensation for investment banking services from Exelon Corporation within the next three months.

During the past 12 months, Exelon Corporation has been a client of the firm or its affiliates for non-securities related services.

As of the date of this report, we make a market in Exelon Corporation.

Reg A/C Certification

The research analyst(s) responsible for the preparation of this research report certifies that:(1) all the views expressed in this research report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers; and (2) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst(s) in this research report.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

Power & Utilities

February 14, 2023

The Guggenheim Daily Transmission: FE, EXC, HE, AEP, ED, NEE

2023 Utility Outlook: Magic Mirror on the Wall, Who Is the Fairest One of All? (see our note HERE)

For details on our Wisconsin call with Commissioner Huebner, AZ Commissioners call, and other events, scroll down…

For details on our Guggenheim-hosted client Utility events including our WEC NDR THIS WEEK, DUK NDR, NEE NDR, AEE NDR, EXC NDR, AGA Conference meetings, ETR NDR, PCG NDR, ES NDR, PNW NDR, and other events, scroll down…

FE – reports FY22 results; initiates 2023 guidance above consensus; reiterates 6%–8% annual growth, including post-2025

EXC – reports 4Q22 results; initiates 2023 guidance; reiterates 6-8% growth

HE – reports earnings largely in line with consensus; strong utility results

AEP – AEP and AQN file new FERC application for Kentucky sale approval

ED – CECONY Steam files an updated rate case request, slight step up in revenue requirement

NEE/ED – SO gas services filed comments on MVP process at FERC, supporting US Forest Service analysis work

FE reported FY22 operating EPS of $2.41, above midpoint of $2.30–$2.50 guidance range, and vs Gugg/cons at $2.44/$2.44; initiated 2023 operating EPS guidance of $2.44-$2.64 (midpoint $2.54) vs Gugg/cons at $2.49/$2.48; reaffirmed long-term annual operating EPS growth rate of 6%-8%.

- "CEO search continues making progress and intend for new CEO **to continue executing our strategy**" (*emphasis ours*) - FE presentation
- **Long-term annual growth rate for operating EPS of 6%–8% off midpoint of prior year guidance, including annually post-2025**
- **Capex & Rate Base:** ~$18B (vs $17bn prior) in investments (2021-2025); targeting 75% + formula rate recovery and **rate base growth accelerating to ~7% in 2024 and 2025 (vs 6% annual growth target previously)**
  - 2022 rate base of $26bn in Annual Fact Book
  - **$3.4bn 2023 capex**, vs $3.2bn in 2022
- **Credit:** reaffirmed FFO/Debt target of 14%–15%, supporting BBB credit rating at FE Corp.
  - Continuing to target investment grade credit ratings at Moody's (**11% CFO pre-WC/ Debt upgrade threshold**) and S&P (**12% FFO/Debt upgrade threshold**); already achieved at Fitch
  - Recall that last week, S&P changed FE's outlook to positive (from stable)
  - No equity needs; SIP/DRIP programs up to ~$100m per year
- **FET transaction update:**
  - Mgmt. expecting to use NOLs and tax credits to offset majority of taxable gain (~$7B), resulting in expected total cash taxes of ~$50M on transaction.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

  - **Use of proceeds:** Company plans to remain flexible in order to optimize deployment of proceeds with priority on balance sheet
  - Recognized $1.23/sh in strategic transaction charges in 4Q22 GAAP earnings, primarily due to ~$750M non-cash tax charge from triggering a deferred tax gain on the 19.9% sale completed in 2022
- **Taxes:** Company expects to be future federal cash taxpayer at ~$200M annually
- Rate case filings expected:
  - **2023 rate cases:** MD (1Q), NJ (1Q), WV (2Q)
  - **2024 rate cases:** OH (May), PA (potential)
- Other 2023 filings:
  - **OH:** Plan to file ESP V in 1st Half of 2023 (ESP IV expires 5/31/2024)
  - **PA:** Plan to file application to consolidate PA operating companies in 1st Half of 2023
  - **NJ:** Plan to file IIP in 2Q 2023
  - **MD:** Plan to file second phase of EDIS with base rate case filing in 1Q 2023
- **Dividend:** increased targeted dividend payout ratio to 60-70% of Operating EPS and **plan to resume growth in late 2023**
- +0.6% total weather-adjusted sales for 2022
- Set **1Q23 guidance** at a range of **$0.56–$0.66 (midpoint $0.61)** per share
- **FE will be hosting a call today at 11:00 AM ET. The dial-in is 877-269-7756 and the conference ID is 8811**

EXC reports 4Q22 results; initiates 2023 guidance; reiterates 6-8% growth

- Reported 4Q22 EPS of $0.43, vs Gugg/Cons of $0.44/$0.43
- Introduced 2023 guidance of $2.30-$2.42 per share (vs. Gugg/Street $2.36)
- Reaffirmed 6-8% EPS growth CAGR and new 2022 base (original guidance range); including a reaffirmation of the prior ’21-25 target and expectations to be at ‘midpoint or better’ on both ’21-25 and ’22-26
- No incremental equity in plan beyond existing $425M
- 5-year capital plan increase of $2.1bn, rate base growth now 7.9% off 2022 base (vs. 8.1% off ’21, previously)
- 2023 adjusted O&M of $4.2bn (+$50mm YoY)
- Slides provide YoY growth drivers of plan, with ’24 expected in ‘low end of 6-8% range’
- Slides HERE
- Call at 10AM – register HERE

HE – HE reports earnings largely in line with consensus; strong utility results

- HE reported full year 2022 consolidated net income of $241.1M and EPS of $2.20 vs. $2.21 consensus and our $2.23 estimate.
- The miss vs. our estimate is driven by lower ASB earnings (previously reported), while Utility and other earnings beat our expectations.
- Major drivers for 2022 included:
  - $28M higher net revenues from regulatory mechanisms. This included $25 million from the annual revenue adjustment (ARA) mechanism, and $3 million from recovery under the major project interim recovery (MPIR) mechanism.
  - $4M higher other fee revenue and $2M in AFUDC and lower penalties.
  - $13M higher O&M, $4M from higher depreciation expense, $3M higher interest expense, and $2M in net tax adjustments.
- ASB previously reported 4Q22 and FY 2022 earnings of $80M vs. our $86M estimate.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

- The variance vs. our expectations was contributed to by a credit loss provision of $2M and a higher cost of funds for 4Q (0.38%, up 25bp vs. prior linked quarter), among other non-interest costs.
- Net interest margin in 4Q22 was 2.91% compared to 2.96% in the linked quarter (a net decrease).
- Total loans were $6.0 billion as of December 31, 2022, up 15% from December 31, 2021 (up from $5.7B in the prior linked quarter).

AEP – AEP and AQN file new FERC application for Kentucky sale approval

- AEP and Liberty, a subsidiary of Algonquin Power & Utilities Corp. (TSX:AQN), filed a new application with the FERC under section 203 of the Federal Power Act seeking approval of the sale of AEP's Kentucky operations to Liberty.
- The companies are asking for an expedited review of the application as they work to close the transaction by **April 26, 2023**.
- Recall that in December 2022, FERC denied approval of the sale without prejudice and outlined the additional information about customer protections needed to obtain approval.
- Company press release: HERE

Guggenheim takeaway: *As expected but flagging for your awareness. We remind investors that AEP's equity needs are not determined by the KY sale, and that any proceeds from the contracted renewables sale have not been included in the company's cash flow forecasts.*

ED – CECONY Steam files an updated rate case request, slight step up in revenue requirement

- CECONY Steam filed an updated rate case testimony reflecting a $140.5M revenue increase (up from $136.7M originally).
- The update includes new data and requests on capex and O&M related to infrastructure, as well as sales forecasting updates.
- The original request was based on a 10.0% ROE (vs. 9.3% currently authorized, with earned returns well below the allowed levels), 50% equity ratio vs 48% currently allowed and $1.8B in rate base.
- CECONY also noted that nearly half of the request is related to property taxes.
- Docket: 22-S-0659

Guggenheim takeaway: *FYI. Early innings for the CECONY steam rate case but given the pattern of under-earning and lack of revenue decoupling, an earned ROE reset to existing levels could represent up to a $0.10 EPS step up.*

NEE/ED – SO gas services filed comments on MVP process at FERC, supporting US Forest Service analysis work

- SO Gas Services filed a comment in support of the US Forest Service analysis for the Jefferson National forest crossing.
- US Forest Service filed comments on the environmental assessment process and extended the comment period on the draft supplemental environmental impact statement (DSEIS) to February 23, 2023.
- FERC staff and the US Wildlife Service have previously reviewed the Updated SBA and requested clarification on endangered species impacts and protective actions.
- Mountain Valley Pipeline also submitted an Implementation Plan for the Amendment Project for Mountain Valley Pipeline Project.
- The plan supports the amended application including changing the crossing method for 183 waterbodies and wetlands at 120 locations from open cut to trenchless.
- FERC Docket: CP16-10. / CP21-57

Guggenheim takeaway: *The continued efforts on resuming construction activities are potentially constructive for the MVP project. The MVP project was largely built (~90+% by prior developer estimates) but the recent fourth circuit rejection of water permits puts any potential progress on hold. The tug of war continues on MVP legal challenges. The final authorizations to resume construction are still outstanding and FERC commissioners have previously dissented on "continuation of work" approvals. Both ED and NEE have taken major write downs on the MVP project (i.e., not in financial guidance).*

Equity Research | Corporate Access

WEC Energy Group, Inc. (WEC)

Gale Klappa, *Executive Chairman*
Beth Straka, *SVP Corporate Communications & Investor Relations*

Dates & Locations

February 14 – 16, 2023
West Coast

Meeting Format

NDR - 1:1 Meetings & Group Meetings

Company Information

Market Cap: $29.8bn

WEC Energy Group (WEC) is a holding company that engages in the generation and distribution of electricity and natural gas. It operates through the following segments: Wisconsin, Illinois, Other States, Electric Transmission, Non-Utility Energy Infrastructure and Corporate & Other. The Wisconsin segment refers to the electric and gas utility operations. The Illinois segment deals with natural gas utility and non-utility activities. The Other States segment pertains to natural gas operations of the firm's subsidiaries. The Electric Transmission segment holds interests in state regulatory commissions. The Non-Utility Energy Infrastructure segment includes Wisconsin Electric Power, which owns and leases generating facilities. The Corporate and Other segment refers to the firm's administrative and holding activities. The company was founded in 1981 and is headquartered in Milwaukee, WI. (Source: FactSet)

Regulatory Speaker Series: Getting the Lay of the Land in Wisconsin with Commissioner Huebner

Please join us for a deep discussion and viewpoints on the outlook for Wisconsin utility regulation with PSC Commissioner Huebner. Commissioner Huebner brings extensive utility experience to his role on the PSC, with the discussion to focus primarily on pathways forward for Wisconsin ratemaking and views on resource adequacy, in addition to other Wisconsin utility-focused topics of interest.

Topics

- Goals for improving ratemaking in WI
- Thoughts on general regulatory principles (capital flows, allowed returns)
- Interplay between the PSCW and the WI legislature
- *And other items related to this topic to be discussed*

Date and Time

Friday, February 17, 2023
2:00-3:00 PM EST

Speakers

Commissioner Tyler Huebner, *Public Service Commission of Wisconsin*

Dial-In

Please contact your Guggenheim Sales Representative for the Virtual Meeting Details

Participating Guggenheim Analyst

Shar Pourreza CFA, *Senior Managing Director, Equity Research Analyst – Power & Utilities*

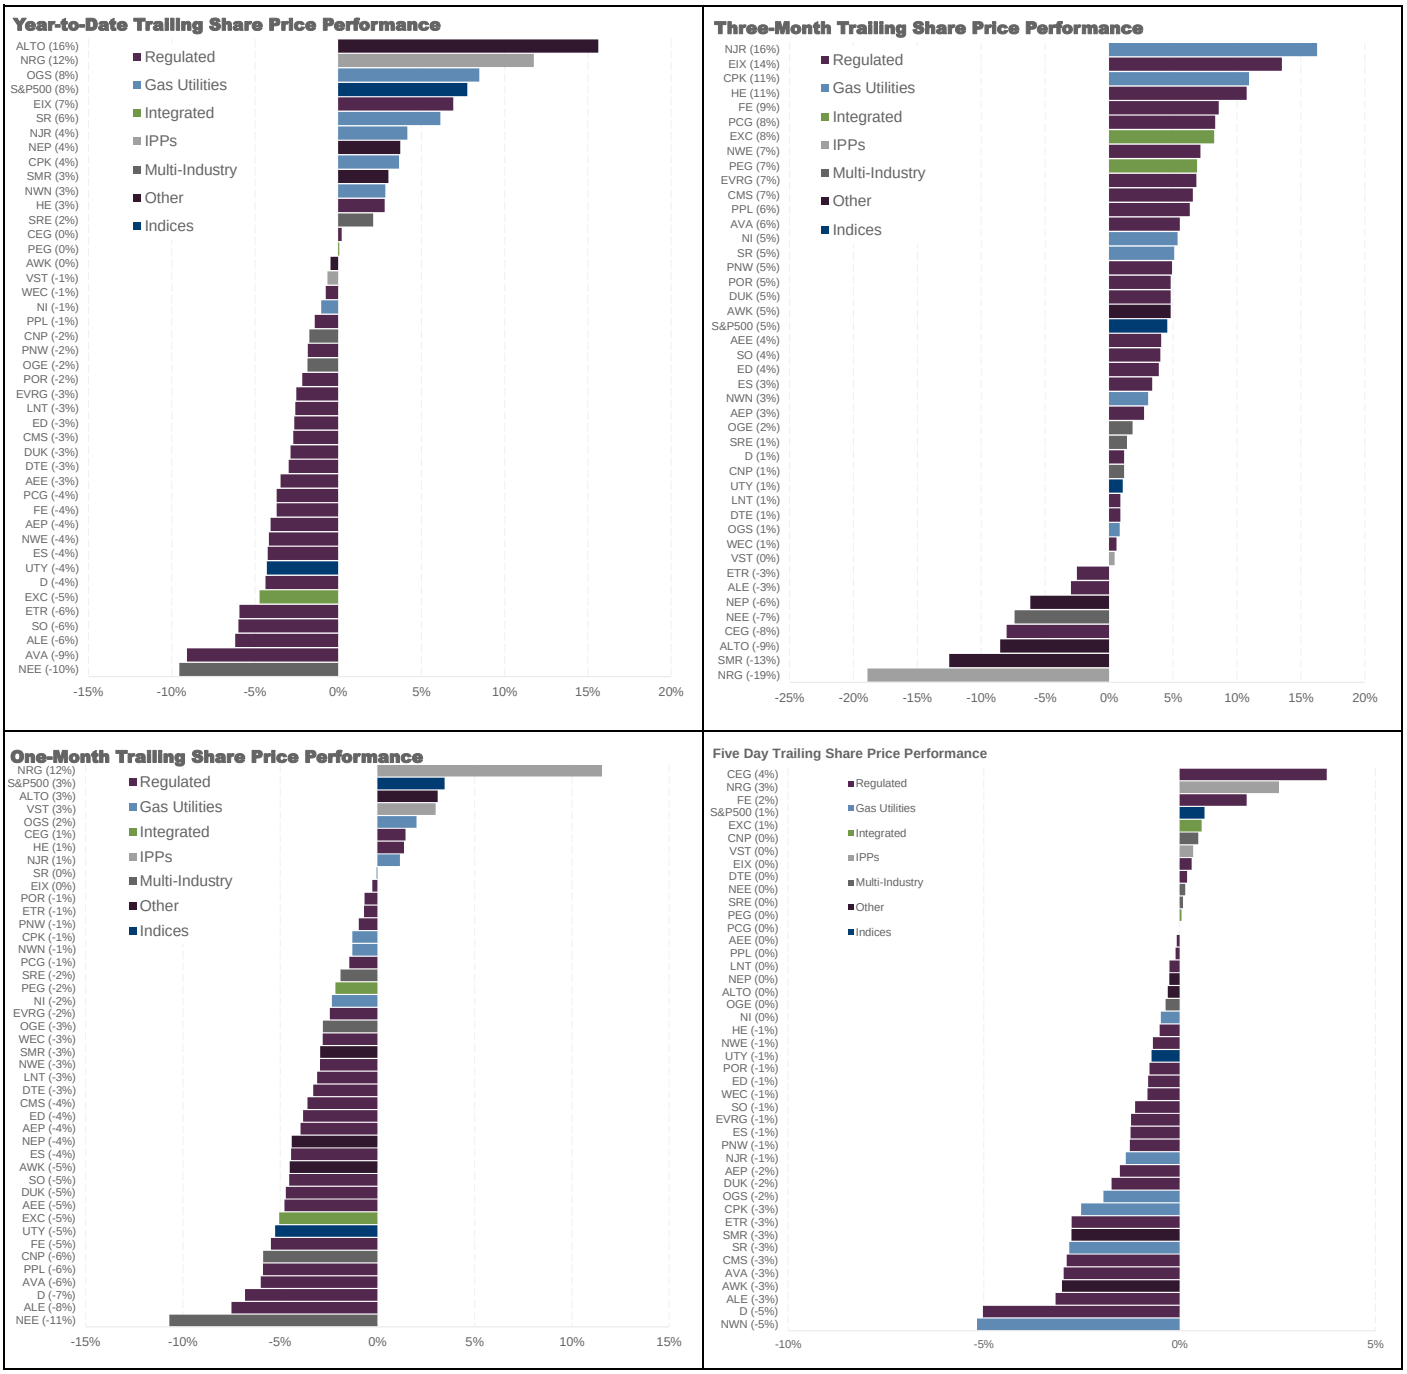
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

EQUITY RESEARCH QUICK TAKE

RBC Capital Markets

RBC Capital Markets, LLC
Shelby Tucker, CFA (Analyst)
(212) 428-6462, shelby.tucker@rbccm.com

February 14, 2023

Exelon Corporation

4Q22 results in line with consensus; initiated 2023 EPS guidance

NYSE: EXC | USD 41.19 | Sector Perform | Price Target USD 47.00

Sentiment: Neutral

Our view: Nothing in this morning's release should be a surprise. The 5% EPS growth in 2023 is fully expected, so is the expected >6-8% growth in 2025 due to rate case timing. Perhaps a more positive note is that EXC expects to be able to maintain cost discipline in 2023 despite broader inflationary pressure. On the call, we believe topics will cover long-term rate base opportunities, expectations on ComEd multi-year plan (MYP) filing and recent franchise agreement, other regulatory updates and interest expense management.

Exelon reported 2022 full year adjusted EPS of $2.27, a penny above consensus and our estimate. EXC initiated 2023 adjusted EPS guidance range of $2.30-$2.42, the midpoint of which is in line with consensus and our estimate ($2.36). EXC rolled forward 5-yr EPS CAGR of 6-8% through 2026, and expects annual growth in 2024 and beyond to be within 6-8%, if not above it.

Dividend growth of 6.7% in line with our expectations. EXC declared quarterly dividend of $0.36 for 1Q23, which matched our expectations. EXC expects to maintain ~60% dividend payout ratio. EXC's dividend payout ratio for 2023 to be 61% at guidance midpoint.

Rate base guidance. EXC expects rate base growth of 7.9% through 2026 and total rate base of $69.6B by the end of the period (gas $10.6B, electric transmission $14.2B, electric distribution $44.8B). This is supported by 4-year capital spending of $31.3B (gas $3.9B, electric transmission $6.7B, electric distribution $20.8B).

Cost guidance. EXC expects 2023 adjusted O&M at $4.2B, ~1.2% above prior year, well below recent rate of inflation.

Financing expectations. EXC continues to target 13-14% FFO/Debt and reaffirmed no incremental equity through 2026 other than remaining $425M commitment to be issued 2023-2025.

Operating ROE at 9.4%. 2022 full year ROE improves to 9.4% from 9.2% prior year.

Regulatory updates. EXC expects a commission decision for ComEd's first MYP filing sometime in 4Q23, and for DPL DE's electric rate filing sometime in 2Q24.

4Q22 results. EXC reported 4Q22 adjusted EPS of $0.43, compared to $0.31 in 4Q21. Positive variance primarily reflects ComEd's higher distribution ROE, and rate increases at PECO, BGE and PHI, partially offset by higher interest expense at PECO and higher depreciation expense and bad debt expense at PECO and PHI.

EXC will hold a conference call at 10AM ET today. Please register for a dial-in / pin here.

Required disclosures

Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1 or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Exelon Corporation in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Exelon Corporation in the past 12 months.

RBC Capital Markets, LLC makes a market in the securities of Exelon Corporation.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Exelon Corporation during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Exelon Corporation.

RBC Capital Markets is currently providing Exelon Corporation with non-investment banking securities-related services.

RBC Capital Markets has provided Exelon Corporation with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Exelon Corporation with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.
As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

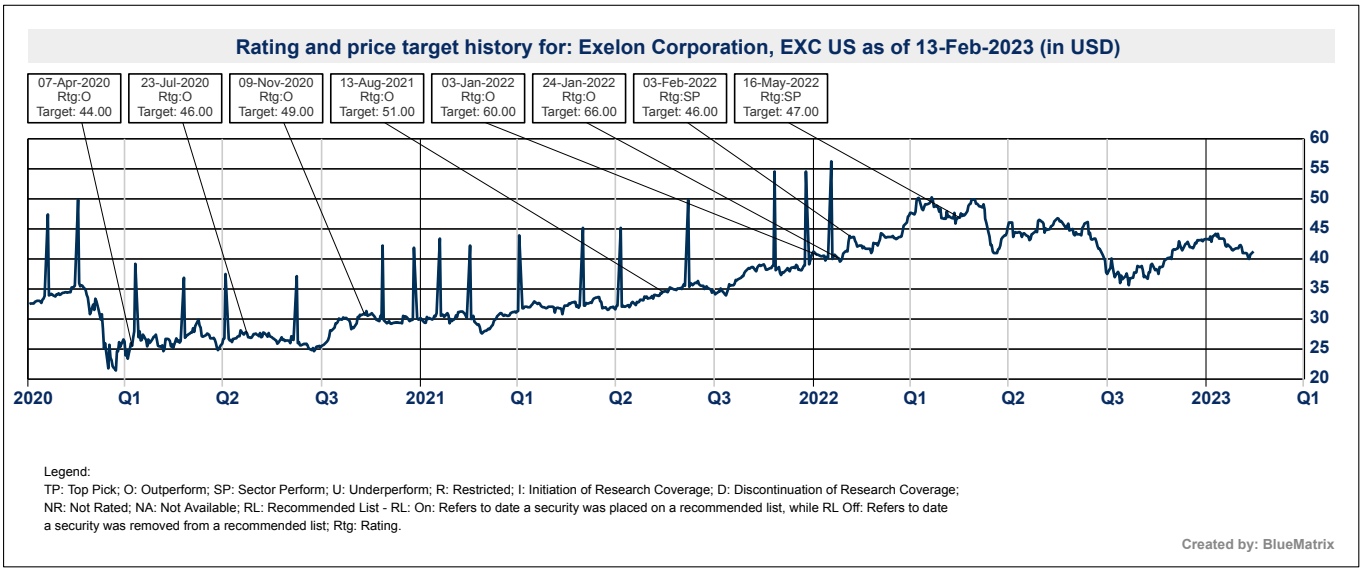
For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings

RBC Capital Markets, Equity Research

As of 31-Dec-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	**Count**	**Percent**	**Count**	**Percent**
BUY [Outperform]	839	56.05	225	26.82
HOLD [Sector Perform]	603	40.28	151	25.04
SELL [Underperform]	55	3.67	3	5.45



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Exelon Corporation

Valuation

Our $47 price target assumes a 18.6x P/E multiple on 2024E utilities EPS of $2.54. Our multiple reflects a slight 3% discount to our

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

RBC Capital Markets

base case blended electric and gas multiple of 19.1x, resulting in equity value per share of $47. While we believe Exelon utilities have a similar profile to industry peers (6–8% EPS CAGR and 7–8% rate base CAGR), we give consideration for some regulatory overhang and lower ROE at ComEd. Our price target supports a Sector Perform rating.

Risks to rating and price target

- Stagnant ROE performance at ComEd
- Credit metrics deteriorates due to significant borrowings
- Inflation drives up O&M costs
- Corporate minium taxes become a drag on cash
- Approval of upcoming multi-year plans at favorable levels

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf

nathan.richardson@credit-suisse.com

- We provide quick take on ES, EXC & FE's earning's release, and AEP's latest announcement to file new FERC 203 application.

- **ES: FY22 Earnings Release – Pos on CapEx Increase; Mixed on Guidance:** ES reported FY22 results including FY23 guidance of $4.25 to $4.43/sh implying ~6% growth rate from FY22 results ($4.09), which compares to CSe $4.31 / BBG $4.37 which we're viewing as mixed (midpt slightly below street). Management reaffirmed EPS CAGR guidance of 5-7% with a bias toward the top-end of range through '27 as expected. Per FY22 adjusted results of $4.09, and growing at 6.5% CAGR, implied '24 / '25 EPS is $4.64/ $4.94 vs. CSe of $4.68 / $4.92 and Consensus (FS) of $4.70 / $5.06, respectively. This slightly underwhelms street expectations. ES sees itself 'Solidly in Upper Half of 5-7%", which is similar to prior LT growth rate communications. Management refreshed and rolled forward its capital plan to $21.5Bn for '23 to '27 from $18.1Bn from '22 to '26 (+$3.3Bn) which came in slightly above our expectations. This does not include OSW wet transmission opportunities for Commonwealth or CT AMI which combined could be $700Mn of incremental capex opportunity in the future. Equity needs are unchanged despite higher CapEx which we view as in-line with mgmt's. current plan to recycle OSW capital. Mgmt recommitted to the ATM with $1Bn (of $1.2Bn) remaining to be executed. No incremental equity vs. prior commitments we think addresses one of the bear theses in the stock with the focus now being OSW execution where the timeline for an update is expected in 2Q23. We look for additional details on the call pertaining to OSW timeline, confidence in proceeds and the path forward to maintain the Baa1 Moody's outlook. Rate base guidance included a 7.5% CAGR through '27 (to $37.7Bn from $24.4Bn in '21). OSW and other strategic updates: Guidance on OSW review included an update on status of review expected in 2Q23, and a slight uptick in total costs for the three OSW projects ($5.45-5.95Bn CapEx) . As expected, we do not see any impairment to OSW assets vs. peer Orsted. We see results ultimately as mixed to neutral with the positives being a core increase of $3.3Bn of CapEx with no increase base equity needs contrasting against a more muted reflection in out-year expectations for EPS.

- **EXC: 6-8% EPS CAGR through '26; FY23 EPS Guide In-Line - Positive:** EXC reported FY22 results and gave formal FY23 EPS guidance of $2.30-2.42 (midpt $2.36) vs. CSE / BBG $2.37. EXC is rebasing its 6-8% long term EPS CAGR off its 2022 midpoint ($2.25) through 2026. EXC expects to be at the low end of the range in 2024, at the high end of the range in 2025 and the middle of the range in 2026, which we see largely affirming our current EPS expectations with slight bias to the upside. Slides note annual growth in 2024 and beyond is projected to be within the 6-8% range, if not above it, which we think should lead the street to move past concerns on the executability of the 6-8% CAGR. On equity, we're specifically encouraged that EXC is raising the capital plan to $31Bn (from $29B at the AD) with no incremental equity beyond the remaining $425Mn commitment detailed in the prior 5yr plan. On the dividend, EXC is targeting a 60% payout ratio aiming to grow the dividend in-line with EPS growth - as expected from last year's AD. On rate base, EXC sees a rate base CAGR of 8% through 2026 which also points to an achievable 6-8% assuming normal ROEs and limited equity needs. 2023 EPS guidance assumes a 30yr treasury yield as of 1/31/2023 (3.63%). We look for more details on the call regarding regulatory execution strategy for FY23, equity needs execution (guided '23-'25), CAMTs impact to the financing plan & eventual regulatory recovery strategies which we expect to be detailed on the call.

- **FE: FY22 Earnings Release - Slight Pos on '23 Guidance:** FE reported $2.41 FY22 EPS, above midpoint of $2.30-2.50 guided '22 range, vs CSe $2.41 and Consensus $2.44. As expected, '23 guidance is introduced and we are positively surprised by the range of $2.44-2.64 with a midpoint of $2.54, as company previously introduced '23 midpoint (excluding any pension headwind) of $2.57 ($2.55-2.60 range). The $2.54 midpoint is well north of BBG / CSe $2.47 / $2.42. We note company budgeted for 38c of pension headwind for '23 at RD and corporate level, and only revised down '23 guidance by 3c from $2.57 to $2.54, assuming all mitigants in place (O&M reduction, benefits from ~$3bn debt retirement and Signal Peak earnings - we note $128mm post-tax earning is received from Signal Peak in '22 per the K). We also note that FE does not expect any minimum required contribution to the pension plan through '24 (currently expect required contribution of $250mm in '25). Regarding rate base growth, FE is showing an acceleration in rate base growth in 2024 / 2025 of 7%, though we note 2021-2025 CAGR is still 5.1%, slightly below our modeled 5.4% with the difference being the FET sale. The existing 6-8% LT annual EPS CAGR is also re-affirmed as expected. Additionally, new dividend policy is announced that raises the targeted dividend payout ratio to 60% to 70% from

DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, LEGAL ENTITY DISCLOSURE AND THE STATUS OF NON-US ANALYSTS. US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

the previous range of 55% to 65%. We see '22 actual payout ratio at 65%. Mgmt. also re-affirmed $3.4bn of capital plan for '23, '21-'25 investment plan of $18bn (announced $1bn increase along with FET second round sale earlier this year), FFO/debt target of 14-15%, and no equity needs (other than $100mm per year for SIP/DRIP) for '23. We look for mgmt. commentary on drivers for '23 guidance, new CEO process, revised dividend policy and implication to EPS, the sustainability of the 6-8% growth guidance past '25 and regulatory execution for '23. Overall, we believe FE should outperform given mgmt. posted a better-than-expected FY23 guidance range, albeit with transitory items such as Signal Peak Earnings.

- **AEP KY Update:** On Feb. 13th, AEP and AQN together filed a new application with FERC seeking approval of the sale of AEP's Kentucky operations to Liberty, under section 203 of the Federal Power Act. AEP is also asking FERC for expedited the review of the application as they work to close the transaction by Apr. 26th, 2023. Recall FERC denied approval of the sale without prejudice last Dec. and outlined the additional information that's needed regarding customer protections. We note that the new 203 application is intended to demonstrate that there will be no adverse impact on customer rates as a result of the transaction. The new application also outlines several financial measures Liberty will take for the next five years, including: 1) maintaining current ROE; 2) maintaining the current cost cap on equity; 3) financing future investment at the current credit rating; 4) capping certain O&M costs. The expedited FERC review (if achieved) could positively address the KY overhang, and while we still see AEP/AQN committed to the transaction we acknowledge a tight timeline.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Eversource Energy (ES.N)

Method: Our target price is $84: We value ES using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view CT, MA, and RI as relatively favorable jurisdictions, although there have been recent conflicts in CT related to performance and penalties. We apply a 5% premium to the natural gas business as ES has a strong track record for operations and earned ROEs. For the Transmission segment, we apply a 5% premium, which is lower than our transmission approach for peer utilities, as we attempt to reflect risk of further ROE cuts to NE transmission operators. We rate ES Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our Neutral rating and $84 target price include: The company seeing further rate pressure from inflation, particularly in CL&P's jurisdiction. Other risks include further downgrade of forecasted ROE for offshore projects or an unfavorable monetization outcome, natural disaster/other issue that could delay wind projects under construction. Given the nature of offshore projects, climate-related issues pose a large risk to the company and its growth plans. Upside risk includes a better than expected rate outcomes.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Exelon Corporation (EXC.OQ)

Method: We utilized an SOTP method to determine our target price of $46 per share and a blended P/E multiple of 16.8x for Outperform-rated EXC. We derived the blended P/E multiple by creating a proportion of each segment for the electric group, transmission group, and gas group. We based the proportion on each segment's contribution to rate base. We applied a 2.5% premium multiple to the current blended multiple of 16.4x. We believe that an improving regulatory environment in Illinois will be favorable for EXC investors by allowing ComEd to file a rate case that is in line with industry average. Changes in the allowed ROE structure could increase the allowed ROE by 2% in 2024. Another key driver is the execution of the $29Bn capital plan.

Risk: Risks to achieve our $46 target price and Outperform rating include: (1) management not meeting RAB projected growth; (2) not reaching stated growth metrics, including the 6-8% LT EPS CAGR; (3) increasing commodity cost for electric and gas service, natural disaster risk; (4) worse-than-expected regulatory outcomes; and (5) volatility to 30yr US Treasuries, as ComEd ROEs are linked to 30YR USTs.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for FirstEnergy (FE.N)

Method: We value FE using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries, which yields a $43 target price. We hold a discounted view on all utilities subsidiaries other than FET (-20% discount to Ohio utilities and 10% discount to the rest of the portfolio), given FE's reputational risk and the upcoming base rate case filings across all jurisdictions, while the transmission company benefits from more constructive FERC regulation with timely and formulaic recovery. We rate FE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to out Outperform rating and $43 target price include: although the HB6 investigation is behind FE through the DPA, FE carries the reputation risk of a historically challenging organization. Even though the new management team has introduced internal control programs and is re-building the company's compliance culture, we recognize it takes time for a large organization to gradually achieve it.

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.

Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.

Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	52%	(26% banking clients)
Neutral/Hold*	36%	(22% banking clients)
Underperform/Sell*	10%	(21% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment.

To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A., with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.

Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit Suisse. Part of the author(s)´s compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.

This research report is authored by:

Credit Suisse Securities (USA) LLC	Nicholas Campanella ; Fei She, CFA ; Nathan Richardson

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.

Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.

An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures. For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change.

Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).
EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.
Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

Exelon Corp

LT Guidance Reaffirmed and Extended

Q: How did the results compare vs expectations?

A: Results were in-line with consensus expectations. EXC reported Q4 ongoing adjusted EPS of 43c vs. consensus of 43c and UBS of 44c. EXC reported 39c for Q4'21. For the full year, EXC reported ongoing adjusted EPS $2.27 vs. cons of $2.26, UBS of $2.28 and $1.83 for FY'21.

Q: What were the most noteworthy areas in the results?

A: Q4 results were driven by 7c higher earnings at ComEd due to higher ROE and investments. PHI was +3c, PECO was -3c, while Corp was -3c on higher interest expense. For the full year, Exelon's operating ROE was 9.4%, the highest since 2019.

Q: Has the company's outlook/guidance changed?

A: Yes. The company introduced 2023 guidance of $2.30-2.42/shr, in-line with consensus and UBS of $2.36. Most importantly, EXC reaffirmed its 6-8% EPS CAGR off the midpoint of its '22 guidance of $2.25 through 2026, which is now one year further out than previous guidance. Additionally, EXC is now stating it expects to be at the midpoint or better for the 6-8% for both '21-'25 and '22-'26 ranges. The company is not anticipating any incremental equity over the plan above the remaining $425mm it has already committed to issuing. For 2023, the company is below the 6-8% range, which was communicated on the Q3 call and should not be surprising. O&M for '23 is expected to increase 1.2%, with higher earnings at BGE, ComEd and PHI, offset by lower PECO earnings and higher corp drag. The four year capex outlook for '23-'26 increased to $31.3bn from $29.6bn for '22-'25 and rate base growth remains ~8%.

Q: How would we expect investors to react?

A: Positively. Affirming the 6-8% and pointing to midpoint or better for '25/'26 is above investor expectations, we believe. There was some concern among investors that the EPS CAGR might have been reduced, but the new EXC management team is projecting confidence in the plan, which we believe will be well received.

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price to earnings based. The adjustments applied fall into 5 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 5) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-parts analysis applying business/region appropriate valuations to those diversified businesses; 6) One-off Adjustments: In special situations, we value risk on an issue specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk.

We maintain our Price Target of $47 premised on a 9% premium to the group multiple or 18.5x our $2.54/share earnings forecast for 2024. Our 9% net premium is derived from a 5% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond, a 5% discount for a 3rd quartile regulatory ranking overall, a 4% premium for 1st quartile earnings growth and a 5% premium for energy transition.

Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Quantitative Research Review

UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

Exelon Corp

Question	Response
1. Is the industry structure facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting worse, 3 = no change, 5 = getting better, N/A = no view)	3
2. Is the regulatory/government environment facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting tougher 3 = no change, 5 = getting better, N/A = no view)	3
3. Over the last 3-6 months in broad terms have things been improving/no change/getting worse for this stock? Rate on a scale of 1-5 (1 = getting a lot worse, 3 = not much change, 5 = getting a lot better, N/A = no view)	3
4. Relative to the current CONSENSUS EPS forecast, is the next company EPS update likely to lead to: (1 = negative surprise vs consensus, 3 = in-line with consensus, 5 = positive surprise vs consensus expectations, N/A = no view)	3
5. What's driving the difference?

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 14 February 2023 01:00 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	55%	24%
Neutral	FSR is between -6% and 6% of the MRA.	36%	21%
Sell	FSR is > 6% below the MRA.	9%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 December 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Gregg Orrill, Ross Fowler, CFA, William Appicelli, CFA.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2.**Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client´s profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Distributed by UBS AG, Tokyo Branch to Professional Investors (except as otherwise permitted) in relation to foreign exchange and other banking businesses when relevant. **Australia:** Clients of UBS AG: Distributed by UBS AG (ABN 47 088 129 613 and holder of Australian Financial Services License No. 231087). Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/research-methodology.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: https://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render(s) services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: FE, SO, ED, EXC, DTE, DUK, AGR, NEE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Join us for an expert call to discuss the renewable PPA market, challenges posed by the UFLPA, AD/CVD investigations, and the opportunities from the IRA as it relates to solar and wind developments. 4Q earnings continue with D and DUK reporting this week. On our regulatory calendar, we are tracking proceedings in AGR's CMP rate case in ME, SO's VCM proceedings in GA, and ED's steam rate case proceedings in NY. In other news, FE announces the sale of an additional 30% stake in FET to Brookfield, ComEd enters into a new franchise agreement with the City of Chicago, MI PSC denies DTE's petition for a rehearing in the recent electric rate case decision; AEP's Indiana Michigan receives MI PSC approval in the IRP proceedings, FERC rules in favor of AGR in the dispute between AGR and NEE related to upgrades needed for the NECEC project, and DUK installs a 2 MW microgrid with black start capabilities.

Upcoming Event

An Expert Call to discuss Renewables Developments and PPA Markets — Please join us for a discussion with LevelTen Energy's Sr. Director Gia Clark on ***Monday, February 13, at 4:05 PM EST.*** We will discuss the implications of the IRA, regulatory headwinds (AD/CVD, UFLPA), interconnection reforms, power price trends, and more. Contact your sales representative or us for details and to sign up.

ICYMI

FE — As anticipated, FE announced the sale of an additional 30% stake in FET to Brookfield for $3.5B in cash.

- The deal creates a strong valuation marker, highlighting the undemanding valuation for FE ex. FET (we calculate it as 8.8x 2025 EPS). The sale clears another hurdle for FE as it restores its balance sheet and waits for a new CEO to outline its LT growth plans. As we outlined in our 2023 Outlook, FE has taken a series of steps to shake off the post-HB-6-related discount, and the sale of an additional stake in FET clears the decks for the incoming management to focus on the 2024 OH rate case proceedings and provide clarity on the LT EPS growth and capex plans. See our note here.
- Management provided additional details on a follow-up call including that the transaction brings it comfortably within the targeted FFO/Debt range of 14-15%. The vendor-take-back loan, which will make up to 50% of the proceeds, will earn a 5.75% coupon until settled, further improving the EPS outlook post-closing. Debt reduction is likely to be the first use of cash, but management remains flexible and will assess based on the rate environment at the time and the need for capex dollars.

Earnings Calendar

4Q22 earnings continue: D and **DUK** are scheduled to report this week. Our recently published 2023 Outlook includes our thesis, expectations, and estimates for our coverage.

Regulatory Calendar

AGR — Rebuttal testimony in CMP's ME electric rate case is due on February 7: Staff recommended a 9.0% ROE and maintained CMP's 50% equity layer request while raising concerns regarding CMP's $590M forecasted capital plan for 2023-2025 and the capital adjustment mechanism. Staff is requesting that AGR provide new metrics and quantifiable means to verify that the capex is spent on projects intended to improve service and reliability. In the intervenor testimony, the OPA did not calculate the required revenue for AGR but recommended a $25.3M reduction to AGR's request in RY1 and an 8.79% ROE and 47% equity layer. The OPA also recommended that the Commission allow AGR only a single-year rate increase. As a reminder, AGR filed testimony seeking an increase to revenue requirements of $51.2M in RY1, $27.6M in RY2, and $23.0M in RY3, based on a 10.2% ROE and 50% equity. The drivers for the increase include a higher ROE, recovery of investments, O&M associated with CMP's vegetation management program, and an increase in actual storm expenses. AGR is requesting for rates to become effective August 1, 2023. The last rate case in ME was authorized at an 8.25% ROE and 50% equity layer. The ROE included a 100 bps penalty that was recently removed.

SO — Rebuttal testimony in GP's VCM 27 is due on February 7: The Staff provided testimony related to the $18B increase in ratepayer revenue requirements over the life of Vogtle Units 3 and 4. Staff believes customer rates will increase by 11.5%, compared to SO's 8.7% estimate, over the next 18 months. GP's VCM 27 pertains to the January-June 2022 period. GP has presented a $522M capex for review only. The Commission will wait until Vogtle Units 3 and 4 are complete before determining the reasonableness and prudence of the cost overruns and their attribution to ratepayers. SO entered an agreement as part of the VCM 24 Order that it would not seek approval of costs exceeding the $7.3B previously deemed reasonable by the Commission until the prudence review is complete. In VCM 27, GP's cost forecast is relatively unchanged at ~$10B, and the Company expects in-service dates of April 2023 and 4Q23 for Units 3 and 4, respectively. The remaining capex to complete the project is ~$1.0B, including GP's share of project contingency.

ED — Company updated testimony in ED's NY steam rate case is due on February 10: ED will file testimony with any corrections and updates to its initial request. Presently, ED is requesting a ~$137M rate increase based on a 10% ROE and 50% equity layer. The ROE and equity layer are the same as those requested in the ongoing electric and gas rate cases. The rate request is driven by higher property taxes and an updated sales forecast. ED is also requesting a revenue decoupling mechanism. CECONY intends to explore an MYRP during settlement and has proposed a $54M rate increase in RY2 and a $49M increase in RY3. This is ED's first steam rate case since 2013, when it settled for a $22.4M revenue decrease over three years, premised on a 9.3% ROE and 48% equity layer. Staff and intervenor testimony is due on March 14. A PSC decision is expected in October 2023, with new rates going into effect on November 1, 2023.

Recent Developments for Companies Under Our Coverage

From our midweek: VA Senate committees pass bills related to utility rate-making with the next step being a vote by the full Senate; an AGR-supported ballot initiative against municipalization of IOUs collects sufficient valid signatures in ME; a newly appointed NM PSC member will recuse himself from PNM-related decisions as it relates to the merger with AGR; LA and AR PSCs are seeking clarification from FERC on the topic of SERI-related tax refunds; AVA filed a multi-year rate plan in ID; Allete and Grid United are planning on an HVDC transmission line between the eastern and western interconnections; WEC will buy a stake in a TX solar farm; and newly elected MD governor rescinds two nominations to the PSC with a plan to nominate his own choices.

EXC — ComEd enters into a new franchise agreement with the City of Chicago: ComEd has entered into a 15-year franchise agreement with the City of Chicago with the option of a five-year extension. The deal came with another one to support workforce development initiatives, expand clean transportation options, encourage EE, and ensure equitable access to clean energy. The franchise agreement was last renewed 30 years ago, and expired at the end of 2020. The agreement comes after an extended period during which the city debated the option to municipalize the utility but was then advised by an independent study that it was not a financially viable option. According to the terms of the new agreement, the city may terminate it by municipalizing the utility after the first five years of the renewal term. The city will also collect an annual $90M-$100M in a franchise fee. The City Council must vote on the agreement for it to be memorialized.

DTE — MI PSC denies DTE's petition for a rehearing of the recent electric case decision: In line with our expectations, the MI PSC denied DTE's petition for a rehearing given that it did not meet the threshold that would qualify a rehearing of a decision (i.e., there were no claims of error, newly discovered evidence arising after the hearing that would validate a rehearing). The Commission did, however, commend DTE for offering a proposal to voluntarily credit customers via mechanics, similar to the pandemic-related credits approved by the MPSC in 2020 and 2021. DTE issued an 8-K following the MPSC order and reiterated its 2023E EPS guidance of $6.09-$6.40 with plans to support the midpoint of the range. The Company intends to make one-time O&M efforts to address the issue posed by the restrictive rate case outcome. We expect to hear additional color from management on the upcoming earnings call on Thursday, February 23. For more background on the rate case outcome, see our write-up here.

DUK — DUK installs a 2 MW renewable microgrid: The Company installed a 2 MW solar facility and a 4.4 MW lithium-based battery storage facility in Madison County, NC that can pick up the town's (population: 500) entire load from a black start without help from the grid.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

AEP — Indiana Michigan received MPSC approval for IRP: The Commission approved the contested IRP settlement, which includes allowing I&M to procure 2.16 GW of carbon-free resources through an RFP with I&M permitted to own up to 70% of the resources and secure PPAs for the remainder. The IRP was originally filed in 2019 but then refiled to take into account the planned retirement of the 2.6 GW Rockport coal plant in IN in 2028. As part of the settlement, AEP will offset the Rockport retirement with at least 2.16 GW of renewables and 255 MW of storage. I&M's MI-jurisdictional share of Rockport Unit 2 will be fully recoverable in rates through the end of its lease in 2028. As part of the long-term plan (2029-41), I&M's preferred portfolio includes 800 MW of wind, 900 MW of solar, ~1 GW of CCGT, and 750 MW of gas peakers, assuming that both units of the 2.3 GW Donald C. Cook nuclear plant in MI continue to operate until their license expirations in 2034 and 2037.

AGR, NEE — FERC rules in AGR's favor in a dispute related to AGR's NECEC project and NEE's Seabrook nuclear plant:

- FERC issued a decision last week ordering NEE to install the circuit breakers at its Seabrook nuclear plant in NH. The upgrade is necessary for AGR's NECEC transmission project. The dispute has been ongoing since 2020 with NEE contending that Seabrook should not incur a financial loss to upgrade the circuit breaker and AGR alleging that Seabrook was attempting to delay and unreasonably increase the cost of the breaker replacement. FERC ruled that Seabrook must replace the breaker under the Seabrook generator interconnection agreement and good utility practice. No party disputes that AGR will pay for the direct cost of the breaker replacement (~$12.6M), but NEE will not be able to recoup the $5.6M in opportunity costs from AGR during the 10-day planned outage at the 1.25 GW facility. The issue arose in 2020 when ISO-NE conducted an impact study and concluded that the 1.2 GW NECEC project would overload the circuit breaker at Seabrook.
- The ruling is another positive development for the NECEC project. The project previously received a favorable ruling when the ME Supreme Court overturned a lower court ruling invalidating a public land lease for the project. The next and potentially last hurdle for the project before it can start construction is a trial in April before the ME Business and Consumer Court, which will decide if the voter referendum violates the principle of vested rights of property rights. The ME Supreme Judicial Court, in a unanimous decision, ruled that the referendum retroactively banning the NECEC project was unconstitutional and remanded the case back to the ME Business and Consumer Court.

Earnings Recap

WEC — WEC reported another above consensus/above guidance quarter and maintained the 2023 outlook and the 6.5-7% long-term EPS growth rate. We continue to view WEC as a top-tier utility with an extended runway for growth as coal retirements in WI create opportunities for renewables capex deployment and the recent WI rate case outcomes de-risk the 2023 outlook. See our note here.

CMS — CMS reported an in-line quarter and raised its 2023 EPS guidance by $0.01 at the midpoint. The guidance is in line with our forecast and consensus. As was expected, the Company rolled the five-year capex plan to 2023-2027, adding $1.2B vs. the prior plan (+$400M net of Covert). Also, management raised the anticipated equity issuance from up to $250M per year in the outer years of the capex plan to up to $350M — partly to fund the higher capex and to maintain financial flexibility. We expect management to be systematic in the equity raises via an ATM program. CMS's results and outlook show consistency in execution and the resulting stability in outcomes. See our note here.

XEL — XEL reported 4Q and 2022 EPS of $0.69 and $3.17, respectively, which was in line with our expectations. The Company was able to offset O&M headwinds with solid sales growth and derisk 2023. XEL maintained its 2023 EPS and long-term growth rate, which was rebased on 2022 EPS guidance. Furthermore, XEL maintained its five- and 10-year capital plans, which continue to offer incremental opportunities. Rate case activity will continue at an elevated level in 1H23, and we believe XEL will be able to continue its ability to achieve constructive regulatory outcomes, providing us confidence in the Company's long-term execution. See our note here.

NEP — NEP reported in-line results for 2022 and reiterated the YE22 and YE23 run rates while extending the horizon for the 12-15% DPU growth target by a year to 2026. We expect that the momentum offered by the IRA, NEP's financial strength, and the pipeline of drop-down opportunities from NEER position NEP strongly to benefit from the clean energy transition, which is still in the early stages. Organic options are also available to NEP through wind repowering of the existing portfolio and storage attachments to existing solar capacity as both of these will now have access to ITC provisions via the IRA. See our note here.

NEE — NEE reported another quarter aligned with guidance and expectations and extended the 6-8% EPS cadence by another year to 2026. Management remains biased toward delivering on the high end of the guidance range. While 2022 saw a slew of regulatory headwinds, especially for solar, the long-term benefits of the IRA should provide an extended period of growth for NEER, especially as it expands its portfolio beyond solar, wind, and storage to include green hydrogen projects and previously announced initiatives in RNG. See our note here.

DTE – MPSC rejects DTE rehearing request in DTE Electric 2022 rate case

EXC – Chicago City Council punts on franchise agreement vote

PJM – RTO exploring extension of PAI billing timeline

VA/RGGI – Comment period opens on RGGI membership

DTE – MPSC rejects DTE rehearing request in DTE Electric 2022 rate case

- MPSC has denied a rehearing request for the DTE Electric rate case, not finding the company's arguments compelling enough for a rehearing.
- DTE issued an 8K, reiterating 2023 guidance, noting that plans currently support the midpoint of guidance.
- DTE previously appealed the MPSC electric rate case order, which saw a significant revenue reduction based on lower sales forecast implementation.
- MPSC previously approved an order setting a $30.5M revenue deficiency for DTE electric.
- The order agrees with the PFD recommendations for net equity ratio (39.6%) and a 9.9% return of equity.
- The order also largely agrees with the PFD on rate base fundamentals approving $20.4B.
- Docket: U-20836

Guggenheim takeaway: *The DTE 8K supports our view that while the rate case order was a headwind for DTE, mgmt. is ultimately able to adjust plans and implement a level of flex to support the prior guidance (while investor expectations have ranged to the bottom end of guidance). The rehearing was a long shot, in our view, as the MPSC has a solid track record of fully litigated cases. Overall, we find that majority of issues are approached in a balanced manner, including cost of capital where the commission follows precedent from previous rate case final orders, noting the rate of return "should not be so high as to*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

place an unnecessary burden on ratepayers, yet should be high enough to ensure investor confidence in the financial soundness of the enterprise."

EXC ─ Chicago City Council punts on franchise agreement vote

- The next opportunity to approve the proposal could come next month.
- More HERE.

Guggenheim takeaway: *True to form, the franchise issue remains noisy despite a sensible proposal – we continue to monitor.*

PJM ─ RTO exploring extension of PAI billing timeline

- A proposal would extend the billing period to 9 months as the RTO raises concerns over participants' ability to pay charges.
- More HERE.

Guggenheim takeaway: *That the RTO would propose the extension points to the severity of the charges, in our view ($1-2bn), with some single-asset entities (peakers) potentially strained by nonperformance, in our view.*

VA/RGGI ─ Comment period opens on RGGI membership

- A 60-day window has opened for public comment on the state's potential involvement in RGGI.
- More HERE.
- More HERE.

Guggenheim takeaway: *A part of the process for Governor Youngkin's ongoing efforts to withdraw via the regulatory route.*

Policy Speaker Series: Taking the Pulse of the '23 Virginia Legislative Session as We Come to a Close

Please join us for a discussion on the backdrop for energy legislation in the Virginia General Assembly as the 2023 session enters a key stretch with direct lateral reads into BUY rated Dominion. Several pieces of utility legislation have passed out of committee, setting up further readings and potential amendments in the days and weeks ahead, with our VA policy contact able to shed light on the process as we reach the finish line.

Topics

- Thoughts on individual bills (e.g., SB1265, SB1477)
- Republican viewpoints and considerations in the House
- Procedural nuances and guidance on key gating events
- Key differences between the individual chambers (House/Senate)
- *And other items related to this topic to be discussed*

Date and Time

Tuesday, February 7, 2023
11:00AM – 11:40AM ET

Speaker Bio

Jimmy Keady is a Partner in point1 and the founder and President of JLK Strategies, a general consulting and political advocacy firm. Keady has worked for federal agencies, state house campaign caucuses, as a Chief of Staff on Capitol Hill, and as Senior Advisor for Members of Congress. He has consulted and managed competitive Republican campaigns in more than 50 races at the state and federal level. In Virginia specifically, he has served on former Speaker of the House Bill Howell's campaigns, in addition to the transition to Speaker Kirk Cox in 2018, and numerous House campaigns across the state.

Participating Analyst

Shar Pourreza, *Senior Managing Director, Equity Research Analyst – Power & Utilities*

Jimmy Keady is the Founder and President of JLK Strategies and Partner at Point1. Keady has worked on and advised campaigns at every level for more than a decade. Keady previously served as Chief of Staff for a US Congressman from Virginia and as Senior Advisor for a second US Congressman from Virginia. Keady is a national consultant with a specialization in Virginia politics, and has managed and consulted on more than 50 competitive races in Virginia, including a Republican Virginia US Senate Nominee. Keady also previously served as Political Director for Virginia's Speaker of the House and as Deputy Executive Director for the Virginia's House Campaign Committee. In 2015 and 2017, Keady worked for Virginia's Speaker of the House of Delegates.

Heading into the 2023 election cycle, Keady represents multiple candidates and incumbent members of the Virginia House of Delegates and Virginia Senate. In addition to Keady's large roster of Virginia legislature clients, his client list includes national political candidates at all levels, large Virginia corporations in the energy and healthcare sectors, Virginia trade organizations, and Virginia non-profit organizations.

Company Information
Market Cap: $22.3bn
Ameren Corp. is a public utility holding company that engages in the provision of electric and natural gas services. It operates through the following segments: Ameren Missouri, Ameren Illinois Electric Distribution, Ameren Illinois Natural Gas, Ameren Transmission, and Other. The Ameren Transmission segment consists of the aggregated electric transmission businesses of Ameren Illinois and Ameren Transmission Company of Illinois (ATXI). The company was founded in 1902 and is headquartered in St. Louis, MO. (Source: FactSet)

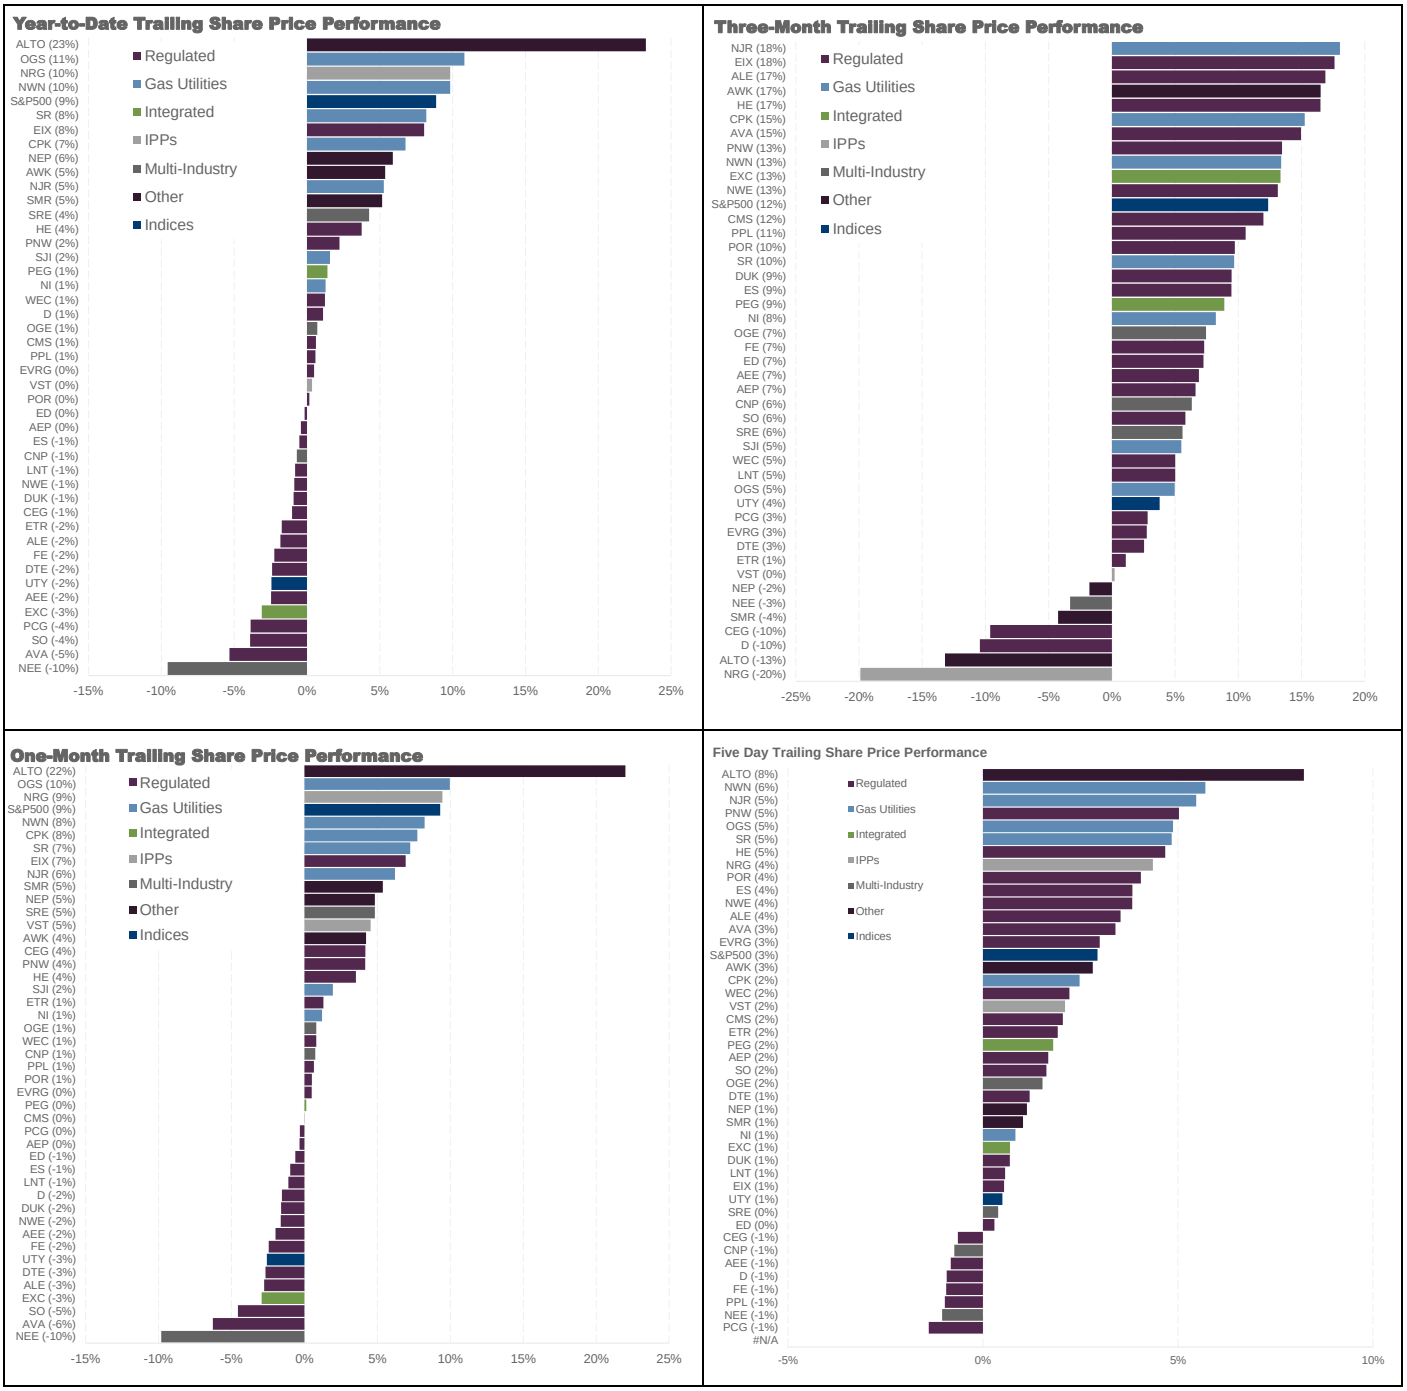
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.

NEUTRAL	114	32.02%	7	6.14%
SELL	10	2.81%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Energy: Electric Utilities

Midweek Thoughts — D, AGR, ETR, NWE, AVA, POR, WEC, EXC, CMS

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Join us for an expert call to discuss the renewable PPA market, challenges posed by the UFLPA, and AD/CVD investigations, and the opportunities from the IRA as it relates to solar and wind developments. 4Q earnings continue with CMS and WEC scheduled to report tomorrow (Thursday). In other news, VA Senate committees pass bills related to utility rate-making with the next step being a vote by the full Senate; an AGR-supported ballot initiative against municipalization of IOUs collects sufficient valid signatures in ME; a newly appointed NM PSC member will recuse himself from PNM-related decisions as it relates to the merger with AGR; LA and AR PSCs are seeking clarification from FERC on the topic of SERI-related tax refunds; AVA filed a multi-year rate plan in ID; Allete and Grid United are planning on an HVDC transmission line between the eastern and western interconnections; WEC will buy a stake in a TX solar farm; and newly elected MD governor rescinds two nominations to the PSC with a plan to nominate his own choices.

Upcoming Event

An Expert Call with LevelTen Energy: Taking the Temperature on Renewables Developments and PPA Markets — Please join us for a discussion with Sr. Director Gia Clark on ***Monday, February 13, at 4:05 PM ET.*** We will discuss the implications of the IRA, regulatory headwinds (AD/CVD, UFLPA), interconnection reforms, power price trends, and more. Contact your sales representative or us for details and to sign up.

Upcoming Earnings Reports

CMS and WEC report BMO tomorrow (Thursday). Our recently published 2023 Outlook includes our thesis, expectations, and estimates for our coverage.

Industry News and News from Companies in Our Coverage

D — VA legislature moving ahead on bills related to utility rate-making: Two bills related to utility rate-making and one related to allowing D to divest a share in the CVOW project all passed the Commerce and Labor Committee in the VA Senate and will be sent to the Senate floor for a vote. Among these bills is SB 1321 (Affordable Energy Act) passed unanimously in Committee and is the sister legislation to HB 1604, which will allow the SCC to issue refunds to ratepayers if the utility is deemed to be earning "unreasonable revenues" in excess of its authorized rate of return. SB 1265, which was also passed, is the sister legislation to HB 1770, which aims to change the rate review timeline from a triennial process to a biennial one, among other changes, which we detailed here. SB 1477, which allows D to establish an offshore wind affiliate to secure a non-controlling equity partner, also passed the Committee (read more about it here). The VA legislative session, which commenced on January 11, is scheduled to adjourn on February 25.

AGR — Another year, another ballot initiative in ME: A ME ballot initiative requiring voter approval before a state can take over $1B in debt to municipalize IOUs has collected sufficient valid signatures to be on the ballot in November, according to the Secretary of State. The ME Affordable Energy Coalition circulated the petition as part of its No Blank Checks campaign and is supported by the state IOUs including AGR. The movement to put this initiative on the ballot is in response to another petition asking for voter approval for utility municipalization and creating a public utility called Pine Tree Power through a public buyout of the IOUs' assets. As of now, it appears that both these competing referendums will be on the November ballot.

AGR — A newly appointed NM PSC member will recuse himself with respect to decisions related to the proposed PNM merger: One of the three newly nominated members to the NM PSC has recused himself from any decisions related to the pending merger between AGR and PNM. Commissioner O'Connell said his voluntary recusal was because he previously provided testimony on behalf of a proposed settlement related to the merger while he worked at an environmental group. The merger is presently before the state Supreme Court, but AGR plans to refile with the PSC and seek a settlement. When it does come to the PSC, there will be just two Commissioners reviewing the docket.

ETR — LA and AR PSCs file a request for confirmation with FERC regarding refunds: With reference to the ongoing Grand Gulf-related proceedings, the LA PSC and the AR PSC have filed with the FERC requesting confirmation that SERI should make additional refunds for failing to include the ADIT for decommissioning deductions in the formula rate base. SERI contends otherwise that it owes no additional refunds for the tax normalization violation other than what it has already provided. ETR has previously issued a one-time $25M refund associated with the 2015 IRS ruling and has been providing ongoing rate-base credit for ADIT related to the successful portion of the uncertain tax position. Therefore, ETR contends that it already satisfies the remedy required by FERC in this order. The clarification request is in response to FERC's Opinion 581.

AVA — Avista filed a multi-year rate plan in ID: The Company filed a two-year rate plan with the ID PUC with a proposal for new rates to take effect in September 2023 and 2024. The Company is requesting a $37.5M and a $13.2M electric rate increase in RY1 and RY2, respectively, and a corresponding gas rate increase of $2.8M and $0.1M. Both requests are based on a 10.25% ROE and 50% equity ratio. The rate increase requests stem from planned and ongoing investments in grid reliability, including a wood pole management program, wildfire resiliency spending, natural gas distribution pipeline replacements, and technology upgrades. The rate filing was anticipated.

NWE, AVA, POR — Allete and Grid United plan to build an HVDC transmission line between Western and Eastern interconnections: The companies plan to build a 385-mile, 600-kV HVDC transmission line from central ND to Colstrip, MT that could more than double the transfer capacity between the western and eastern interconnections. Permitting for the North Plains Connector project is expected to commence in 2023 with 3 GW of bidirectional capacity becoming available in 2029 when the project is expected to be complete. The western and eastern interconnections, and ERCOT, make up the U.S. grid, but limited capacity to share power. According to the NREL, currently, only 1.3 GW is able to move between the eastern and western interconnections via seven HV links. A link to Colstrip, MT would then provide the project access to utilities in the Pacific NW. Allete plans to own 35% of the project, and other regional utilities are likely to participate as well as the plan progresses.

WEC — WEC to buy a stake in a TX solar farm: WEC's infrastructure segment has agreed to buy an 80% stake in a 250 MW solar project in TX from Invenergy for $250M. The facility is part of the five-phase 1.3 GW Samson solar portfolio that Invenergy is building across NE TX. The project commenced operations in May 2022 and has a long-term PPA with AT&T and will be eligible for PTCs under the IRA.

EXC — MD Governor rescinds two nominations to the MD PSC: With a change of control in MD from a Republican governor to a Democrat, the newly appointed governor rescinded two nominations to the PSC that were made by the prior governor but had not yet been confirmed by the Senate. Both the nominees in question are Democrats and are current Commissioners who were reappointed by the previous governor. They will continue to serve until the governor names new nominees sometime in February. The MD PSC is a five-member Commission with the governor nominating the members and the Senate confirming them. The Commission currently has three Republican and two Democratic members (including a Republican chair). EXC's BGE and PEPCO are expected to file multi-year rate cases in MD later this year as is FE's Potomac Edison.

DUK – Carbon Plan non-DSM/EE stakeholder engagement update

ALE – ALE announces minority investment in multi-RTO HVDC line

IL/Power – Governor Pritzker signs renewables siting legislation

SMR – NuScale inks contract for hydrogen plant model simulator

D/VA – Wind stake sale and utility rate reform bills advance out of committee

- The two bills were reported out of the Commerce and Labor Committee by wide margins - (SB1477 was 15-0), (SB1265 was 12-3)
- SB1265, the senate version of the Saslaw/Kilgore package of utility and regulatory reforms, was amended to increase the $300mm in rider adjustments to $350mm and also add fuel securitization
- Wind, SB1477, HERE
- Rate regulation, SB1265, HERE
- A competing piece of legislation, SB1321 (HERE), also passed

***Guggenheim takeaway*:** *More details to come – stay tuned.*

HE – ASB reports earnings with NIM expansion

- ASB reported 4Q22 and FY 2022 earnings of $80M vs. our $86M estimate.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

- The variance vs. our expectations was contributed to by a credit loss provision of $2M and a higher cost of funds for 4Q (0.38%, up 25bp vs. prior linked quarter), among other non-interest costs.
- Net interest margin in 4Q22 was 2.91% compared to 2.96% in the linked quarter (a net decrease).
- Total loans were $6.0 billion as of December 31, 2022, up 15% from December 31, 2021 (up from $5.7B in the prior linked quarter).

Guggenheim takeaway: *American Savings Bank earnings were slightly below our expectations on higher credit loss provision (non-cash) and higher costs of funds. We anticipate further interest earning assets repricing on variable interest loans that should support NIMs in 2023. Overall, the bank metrics remain solid in terms of charge offs and returns.*

WEC ─ WEC to purchase 80% ownership stake in the Samson I Solar Energy Center

- WEC has announced it will buy an 80% stake for ~$250m in the Samson I Solar Energy Center. Commercial operations began May 2022.
- The Invenergy-developed, 250 MW Samson I project is located about 140 miles northeast of Dallas, Texas and is under a long-term power purchase agreement with AT&T [NYSE:T].
- Samson I is part of a five-phase, 1.3 GW Samson solar portfolio, which is being built on 18k acres in northeast Texas and is the largest solar project under construction in the United States.
- Company press release HERE

Guggenheim takeaway: *This $250m investment leaves ~$876m for WEC's Infrastructure segment to identify and deploy as part of its $1,928m five-year budget in the company's $20.1bn 2023–2027 capital plan. To date (including in prior five-year capital plans), WEC's Infrastructure segment has invested nearly $3bn, and now owns stakes in a portfolio of nearly 2 GW of renewable capacity.*

NEE/Transmission – NEE Transmission urges court to reject review of findings of Texas transmission incumbent law

- NEE transmission urged the court to reject the review of a Texas fifth circuit court ruling that found the Texas incumbent transmission law unconstitutional.
- This related to non ERCOT transmission development.
- More here.

Guggenheim takeaway: *FYI. Parties previously requested a review of the court's findings that opposed incumbent transmission development.*

CA – Scientists link potential threat of wildfires to CA snowcaps and water reserves

- Scientists find risks of CA wildfires impacting the CA snowcaps and water reserves after recent rains.
- The reports indicate wildfires could be a threat to restoring water levels.
- More here.

Guggenheim takeaway: *FYI. Highlights a potential cyclical dependency of wildfires and drought.*

DUK ─ U.S. Department of Defense and all other Federal Executive Agencies petition to intervene in DEP's NC GRC

- The U.S. Department of Defense (DoD) and all other Federal Executive Agencies (FEA) have petitioned to intervene in Duke Energy Progress' North Carolina multiyear general rate case.
- DoD/FEA maintains military installations and civilian agency activities within North Carolina which receive their electric power from DEP.
- Docket E-2 Sub 1300

Guggenheim takeaway:*We continue to monitor new entrants into the proceeding. Recall from our **2023 Outlook report (HERE)**, that we continue to model 9.6% authorized ROEs in North Carolina (the last authorized level from the utilities' 1H21 rate orders), however we reduce and then eliminate ~50bps of ongoing regulatory lag which has been a persistent*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

drag under the prior historical test year framework and which we believe will become much more manageable with forward-looking test years and multiyear rates.

MS – Mississippi introduces bill to give incumbent utilities transmission development right of first refusal

- MS introduced SB2341, a bill to give rights of first refusal for transmission development to incumbent utilities.
- The bill focuses on having the MPSC give certificates of need to utilities that it can directly set rates for (i.e., in-state utilities).
- Bill sext here: Senate Bill 2341

Guggenheim takeaway: *FYI. Another legislative push to limit interstate transmission development and have states retain control over ratesetting.*

EXC – ComEd reaches proposed deal on a 15-year franchise agreement with Chicago

- The agreement, which includes an energy and equity agreement outlining a series of commitments to the city, comes with a right to municipalize after 5 years
- More HERE

Guggenheim takeaway: *Flagged for your awareness as this was a repeated point of noise when the prior agreement expired.*

DUK – Carbon Plan non-DSM/EE stakeholder engagement update

- As per the NCUC's December 30, 2022 Order Adopting Initial Carbon Plan and Providing Direction for Future Planning, DEC & DEP are initiating engagement with stakeholders to develop guidelines for expedited regulatory approval of customer programs and pilots for **non-demand-side management/energy efficiency programs that enable load reduction or load management**.
- Specifically: in the Carbon Plan Order, the NCUC stated that it was persuaded that "*adoption of new flexibility and rapid prototyping guidelines to ensure regulatory approval of new customers programs, pilots, and rate designs in a timely manner would be appropriate at this time*" to allow the companies "*to innovate, shrink the challenge, and timely implement the Carbon Plan.*".
- The NCUC directed DEC/DEP to engage with stakeholders to develop appropriate guidelines and to file a formal proposal for approval of those guidelines with the NCUC at a future date.
- Docket E-100 Sub 179

Guggenheim takeaway: *The NCUC directed DEC/DEP to engage with stakeholders to develop appropriate guidelines and to file a formal proposal for approval of non-DSM/EE guidelines with the commission at a future date. The first stakeholder meeting will take place February 24th.*

ALE – ALE announces minority investment in multi-RTO HVDC line

- The company would take 'at least' a 35% ownership in the North Plains Connector, which would run 385 miles from WECC to MISO in the Eastern Interconnect
- "The North Plains Connector HVDC line will be the nation's first transmission connection between three regional U.S. electric energy markets—the Midcontinent Independent System Operator, the Western Interconnection and the Southwest Power Pool. This new link, open to all sources of electric generation, would create 3,000 megawatts of transfer capacity between the middle of the country and all three energy markets, easing congestion on the transmission system, increasing resiliency and reliability, and enabling fast sharing of energy resources across a vast area with diverse weather patterns." – release
- "ALLETE and Grid United have signed a memorandum of understanding to explore transmission opportunities, with plans to execute a North Plains Connector development agreement in the first half of the year. The project represents an approximately $2.5 billion investment in Montana and North Dakota and will be a long-term asset for those states. Connecting the North Dakota and Montana grids will help mitigate the impact of extreme weather events and accommodate the growing demand for electricity. ALLETE expects to pursue at least 35% ownership and would oversee the line's operation." - release
- More HERE

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Guggenheim takeaway: *This latest investment opportunity for ALE is in line with the company's existing regional work on HVDC lines and proximate to its other assets in the Dakotas, with the project still in its development phase ahead of a potential 2029 in-service date (spend would fall at the end of the current plan, 2027, and beyond). The opportunity would likely help extend ALE's 5-7% growth beyond the current 2022-2027 planning window and augment its current >8% regulated rate base growth.*

IL/Power – Governor Pritzker signs renewables siting legislation

- The legislation allows the state to supersede local zoning in the interest of deploying wind and solar energy – setting minimum setbacks for wind turbine siting and potentially streamlining the development process
- More HERE

Guggenheim takeaway: *Interesting data point for your awareness.*

SMR – NuScale inks contract for hydrogen plant model simulator

- "GSE Solutions ("GSE Systems, Inc." or "GSE" or the "Company") (Nasdaq: GVP), a leader in advanced engineering and workforce solutions that supports the future of clean-energy production and decarbonization initiatives of the power industry, announced today a contract to work with NuScale Power (NYSE: SMR) ("NuScale") to develop a Hydrogen Plant Model for NuScale's VOYGRTM small modular reactor (SMR) power plant simulator. GSE will provide the models, integration, and testing support to NuScale using its JProTM Dynamic Simulation Software." - release
- More HERE

Guggenheim takeaway: *Minor FYI. The option to potentially stack credits, including hydrogen, remains a potent potential attractant for both new and existing nuclear.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.
