NDR - 1:1 Meetings & Group Meetings

Company Information

Market Cap: $29.8bn

WEC Energy Group (WEC) is a holding company that engages in the generation and distribution of electricity and natural gas. It operates through the following segments: Wisconsin, Illinois, Other States, Electric Transmission, Non-Utility Energy Infrastructure and Corporate & Other. The Wisconsin segment refers to the electric and gas utility operations. The Illinois segment deals with natural gas utility and non-utility activities. The Other States segment pertains to natural gas operations of the firm's subsidiaries. The Electric Transmission segment holds interests in state regulatory commissions. The Non-Utility Energy Infrastructure segment includes Wisconsin Electric Power, which owns and leases generating facilities. The Corporate and Other segment refers to the firm's administrative and holding activities. The company was founded in 1981 and is headquartered in Milwaukee, WI. (Source: FactSet)

Regulatory Speaker Series: Arizona's Path Forward with ACC Commissioners Kevin Thompson and Nick Myers

Please join us for a deep discussion and viewpoints on the outlook for Arizona utility regulation with ACC Commissioners Kevin Thompson and Nick Myers. Both bring extensive utility experience to their new roles on the ACC. The discussion will focus primarily on pathways forward for Arizona ratemaking, views on new capacity additions, as well as potential reforms including forward-looking test years and legislation clarifying the ACC's policy-making authority, in addition to other Arizona utility-focused topics of interest.

Topics

- Goals for improving ratemaking in AZ
- ACC vs AZ legislature's policy-making authority
- *And other items related to this topic to be discussed*

Date and Time

Monday, February 27, 2023
4:00PM – 5:00PM ET

Speakers

Commissioner Nick Myers, *Arizona Corporation Commission*
Commissioner Kevin Thompson, *Arizona Corporation Commission*

Dial-In

Please contact your Guggenheim Sales Representative for the Virtual Meeting Details

Participating Guggenheim Analyst

Shar Pourreza CFA, *Senior Managing Director, Equity Research Analyst – Power & Utilities*

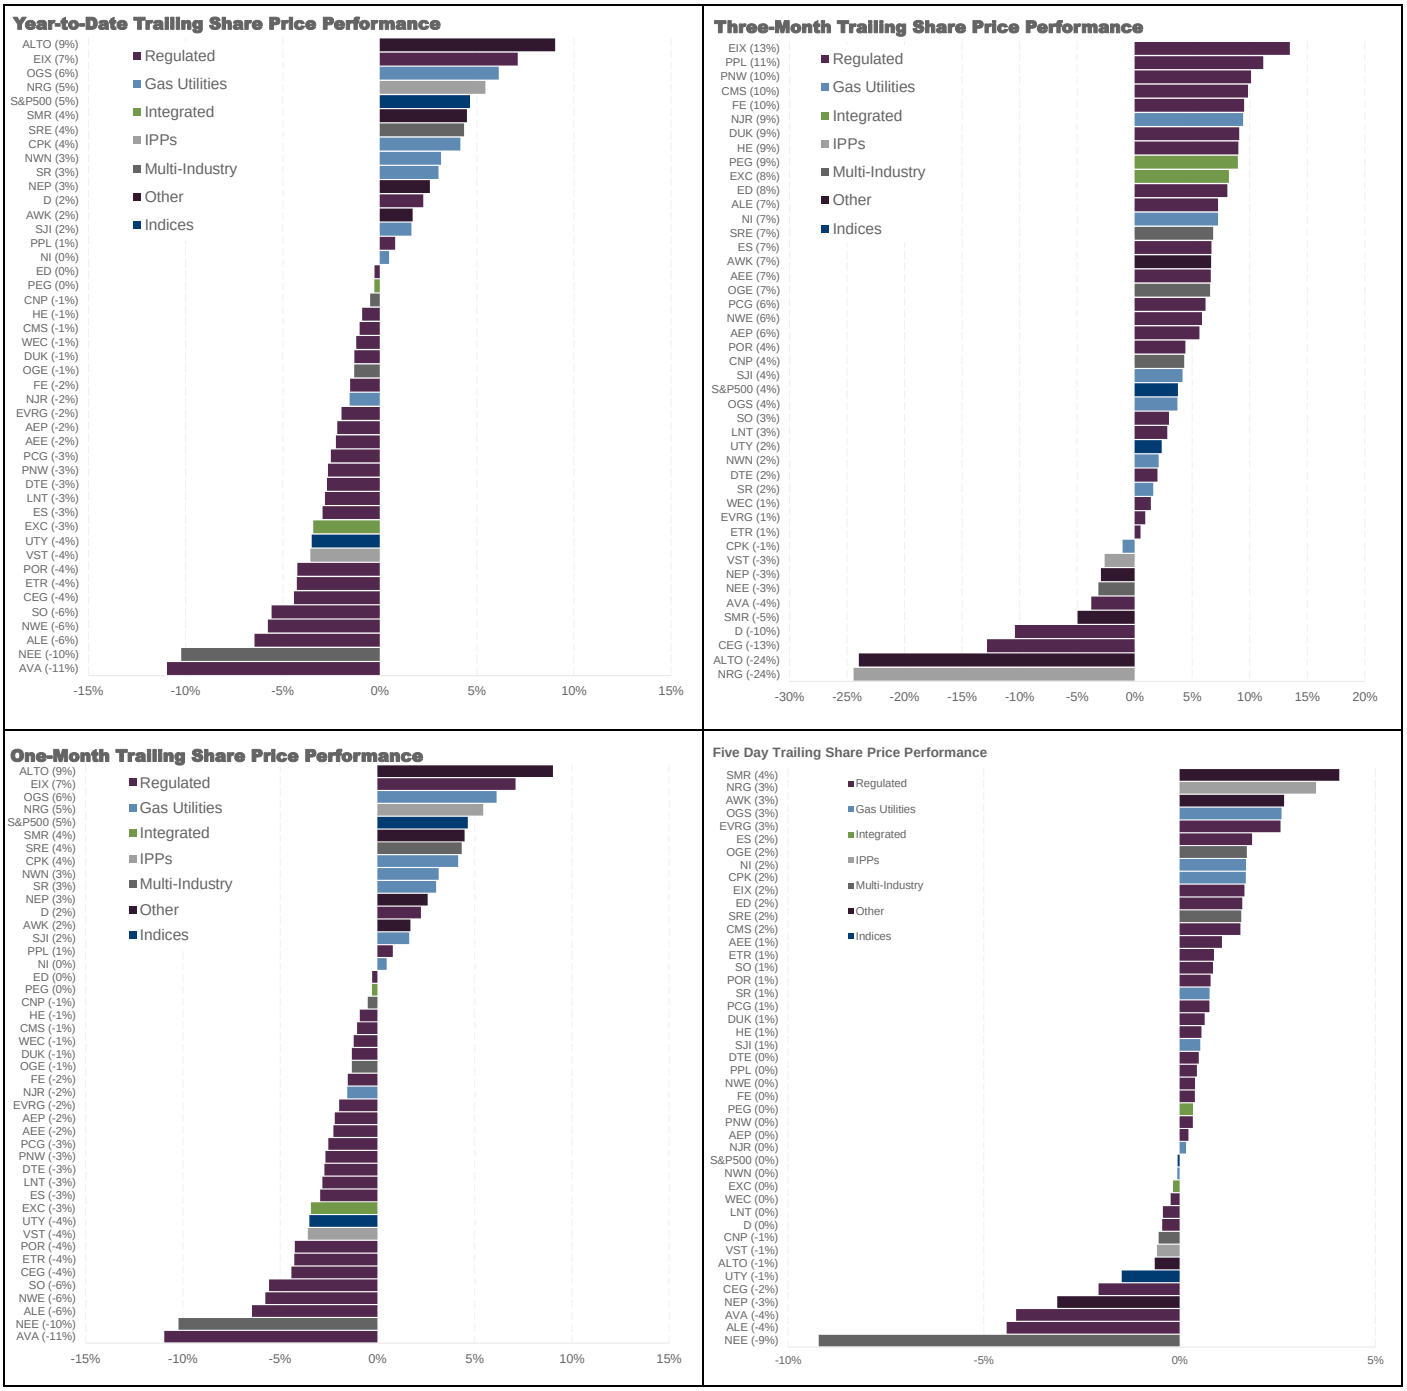
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

CREDIT SUISSE

Research Bulletin

US Utilities: Moody's Ratings Call Takeaways

Discussion with Moody's on Utility Credit; Improving Macro; Single Name Comments on AEE, AEP, CEG, D, ED, EIX, ES, ETR, LNT, NEE, PCG, PEG, PNW, SO, SRE, WEC

- We provide key takeaways from our conversation with the Moody's Utilities team discussing the credit outlook for the regulated utilities sector.

Research Analysts

Nicholas Campanella / 212 325 7505
nicholas.campanella@credit-suisse.com

Fei She, CFA / 212 325 7648

nathan.richardson@credit-suisse.com

Outlook for the Sector & Thematics

- Moody's currently has a negative outlook on the regulated utilities sector for only the second time in recent history. The prior time that Moody's was negative the sector, there were similar macro factors that created headwinds for the industry overall. These included high natural gas prices, rising inflation and rates, and ultimately pressure on regulators to keep customer bill pressure under control. The rating agency is seeing many of these same factors affecting the industry today. That said, Moody's sees some of these pressures beginning to alleviate, such as gas prices and inflation softening in the near term, which resonates with our view on inflation. Discussions with Moody's pointed to a strong focus on regulatory outcomes this year, with specific call outs on bumps in the road for MI (DTE/CMS), IA (LNT), and WI (WEC). Our chat with Moody's stressed the wider theme that regulators are sensitive to a range of pressures in an inflationary backdrop with regulatory response a major item to monitor through the year. We note from an equity perspective, rate review risk is going to drive higher volatility through stocks exposed in 2023. See our note: US Utilities: Assessing General Rate Case Risk: 85% of Sector in Rate Cases in FY23. We thought Moody's overall take was neutral to utilities on our coverage from an equity perspective, principally as we have been focused on very similar inflationary risks but are beginning to acknowledge some easing pressures from both the commodity side (gas) & O&M.

- **IRA Impact:** Similar to the investment community, Moody's is also waiting for more clarity from IRS/treasury interpretation/guidance regarding PTC. Cash flow for PTC transferability is subject to be included in CFO or CFI but regardless commentary noted Moody's believes they shouldn't penalize companies for taking advantage of the IRA provision and we believe cash benefits of IRA are likely to be included when assessing adjusted FFO/Debt one way or another.

- **Liquidity Needs:** Moody's sees the sector's currently liquidity management as prudent, and it's not a surprise to them for companies to tap credit facilities in large amounts given the current commodity price environment. Discussions highlighted PacNW companies (AVA, POR) given recent power considerations. On **refinancing risk,** Moody's acknowledged pressures with companies paying more for ST debt and refinancing at higher rates, but the overall environment is not worsening vs. 2H23. The Moody's BAA utility bond index is down 100bps off its October '22 highs for reference.

- **Cost of Capital & ROEs:** Discussions acknowledged that it would be supportive for ROEs to move up, but investors are not yet seeing this materially inflect in rate reviews. ROEs were sticky on the way down and utilities benefited and now utilities need to deal with lagging ROEs which are not in their favor (I.e., Allowed ROEs will not recoup the full change in CoC realized through '22). We agree with this view and while LT data does support a rising allowed ROE over time, we think 10%+ allowed ROEs will still be challenged in many jurisdictions. Moody's also noted dividends continue to be high, and in order to keep up with the credit profile, we eventually need to see higher ROEs and improved equity components. We found this to be slightly cautious to the sector from an equity perspective.

- **CA Utilities (Positive):** It appears Moody's is likely to address ratings for PCG & EIX this year, where we believe action during the current quarter (1Q23), before wildfire season. Discussions noted we've now made it through three wildfire seasons with operational performance being a key item Moody's has been watching. Recall Moody's is Baa3 positive outlook at EIX and Ba2 Stable (HY) at PCG.

Single name commentary

- **AEE:** Moody's indicated that AEE is currently well positioned for its Baa1 rating, and that not many utility holding companies have this rating, a sign of relative strength of the company from a credit perspective. AEE is generally less diversified than some other bellwethers in the industry, such as XEL, and Moody's sees MO as a jurisdiction to monitor, so upside potential for the credit rating is relatively limited at this time.

DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, LEGAL ENTITY DISCLOSURE AND THE STATUS OF NON-US ANALYSTS. US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

- **AEP:** Whether the KY sale crosses the finish line or not is unlikely to affect the credit rating, based on Moody's assessment. KY is not a considerable amount of business compared to the entire AEP portfolio. If the deal does not go through, Moody's believes mgmt. still has financial resources from the contracted renewable sales proceeds which is not currently baked into the financing plan. The only downside is if the deal goes sour there could be a negative impact on KY's regulatory environment when looking at similar deals in the future, based on discussions.

- **CEG:** The upcoming announcement on capital allocation seems to provide more flexibility for M&A, in Moody's view, and there appears to be ample room for leverage for management to execute on such deals. Any ratings change would depend on the incremental leverage the company takes.

- **D:** From Moody's perspective, the recently proposed VA utility regulation act doesn't seem credit negative, while the CCRO helps earnings quality considerations, Moody's sees the continuation of riders keeping a continued constructive environment. Recall current legislation contemplates wrapping in a portion of current riders to base rate treatment. In terms of a biannual or triannual rate review for VEPCO, Moody's believes either arrangement wouldn't affect the rating materially. D has a DG threshold of 14% FFO/Debt and Moody's believes they have been viewing D as a regulated utility holding company already with the minimum unlikely to change based on any actions contemplated in the current strategic review.

- **ED:** Although share buybacks is generally negative for credit considerations, the renewables business that ED recently agreed to sell was not a key credit driver, in Moody's view, and the reduction in debt, specifically HoldCo debt, is a net positive.

- **EIX:** The team indicated that the company currently has a positive outlook and sees the outlook remaining this way as long as there are no issues related to wildfires in the service territory. Moody's sees the significant wildfire mitigation tactics the company has completed/plans to complete as a positive for the credit, with the rating agency re-assessing the credit quality of the company in 1Q23, citing a strong focus on review of said mitigation techniques and relationship with regulator.

- **ES:** Moody's negative outlook is maintained since the review last June. The credit focus remains the offshore sales proceed, and the negative outlook is unlikely to be addressed before the sales outcome is provided. Other items, including the ongoing ATM program and NSTAR rate outcome, are less impactful as the offshore sale, which Moody's sees as the critical driver at this time. Debt paydown and OSW proceeds were seen as critical to ES from both a credit and equity perspective. We see ES on track for some type of OSW announcement *after* the 4Q22 call.

- **ETR:** Moody's currently has a negative outlook on ETR, however, indicated that the regulatory "noise" related to the Hurricane Ida storm recovery securitization is expected to decline, which could be a good thing for the credit. The team indicated that post-securitization resolution, the next big item they are watching for in order to potentially re-assess the current outlook, is increased clarity on SERI. Additionally, Moody's expressed that storm risk in the Gulf Coast region is rising, and levers like securitization are important to maintain a strong balance sheet. That said, Moody's thinks that given the outcome of the Ida securitization, more creativity may be needed for future cost recovery resolution. Lastly, Moody's indicated they expect the company to achieve a 14% FFO/debt metric this year (with our forecast of 13.5% for '23 (CSe)) and sees ETR as having plenty of time to achieve this.

- **LNT:** Moody's maintains a negative outlook in the Wisconsin segment of LNT indicating that the credit metrics have declined over the years. For the Illinois segment, Moody's sees the advanced ratemaking denial as a negative for the subsidiary, however, sees adequate performance and overall credit metrics as stable and believes the current rating can be held. Additionally, Moody's sees the IRA as beneficial for the company overall and sees it being able to achieve 14% FFO/Debt.

- **NEE:** Moody's sees the recent development regarding potential investigation and campaign violation as negative but there is a lack of information to further determine its rating impact. It does not sound overly material in terms of balance sheet impact, in our view. However, the company's reputation and branding might get hurt which could bring in more regulatory contention which is largely in-line with wider investor conversations we're having. It is also too early to tell if the FEC pursuit could materialize or not, though we note NEE is seeking dismissal. See additional views on NEE here.

- **PCG:** Moody's team indicated that they will re-assess the company's credit this quarter to look into wildfire mitigation techniques, relationships with CPUC/customers, etc, to see if the current positive outlook is appropriate.

- **PEG:** Considering the recent ownership sale of offshore wind business to Orsted, Moody's sees PEG as more of a regulated utility in NJ and the management team should continue operating under the current risk-averse path. In terms of nuclear assets, Moody's doesn't expect major development in the near term.

- **PNW:** The negative outlook on the name remains, although Moody's recognizes the latest

Prohibited Use: Unauthorized Redistribution of Credit Suisse Securities Research Corp on 14-Apr-2023 10:07 AM.

development at ACC. With new commissioners, it seems the regulatory environment is becoming more positive and stabilized. However, the agency is looking for readthroughs from in-state rate outcomes before APS's rate order drops later this year.

- **SO:** Vogtle U3's delay doesn't seem overly material from Moody's perspective. The prudency review before U4 comes online would be another time for Moody's to decide whether to re-assess credit quality or not. If the U3 delay extends for more than the current one-month timeframe, there might be the implication of a bigger issue, something that could be more material to the rating.

- **SRE:** As PA 1 just fully contracted and we expect PA's FID this quarter, Moody's is waiting for more clarity on the capital structure moving forward with the development and construction path. Financing and the duration of the business are key considerations and SRE is considering selling down ownership and we think end ownership for PA1 (we expect 25%) will be a critical component to whether Moody's raises the FFO/Debt threshold.

- **WEC:** Moody's has noted recently an overall weakening of credit metrics for WEC, however, recently affirmed current Baa1 rating. Moody's believes that WEC will be able to maintain its current credit rating but indicates that the company is close to the threshold on the outlook today.

Provided for the exclusive use of Crystal Valley Electric Cooperation Corp on 14-Apr-2023 10:07 AM.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for AEP Inc (AEP.OQ)

Method: We value AEP using an SOTP methodology and our target price is $100. We apply the electric group's 17.7x P/E multiple to all subsidiaries while applying a 15% multiple premium to AEP TransCo, reflecting formulaic/timely recovery in FERC jurisdictions. For the unregulated power generation business, we apply a 15% discount given there's less earnings visibility and AEP is transitioning to a more regulated growth strategy. We also apply 5% discount to all VIUs and revised TX multiple to neutral. We currently have zero EPS contribution from Kentucky Power under a base-case assumption. We rate AEP Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $100 target price include: (1) any non-constructive regulatory decision for renewable capital spending recovery; (2) untimely execution of the Kentucky sale or unfavorable valuation applied to contracted renewable sales; (3) aggressive coal retirement programs could increase stranded asset risk given AEP's vision to retire an additional 5GW of coal generation by 2028.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for AES Corp (AES.N)

Method: Our target price is $26 and is based on a SOTP analysis. We value the consolidated AES operation using a P/E method with a historical five-year average P/E multiple (11.2x) and projected 2023 EPS. For the Fluence stake, we derive AES's proportional equity value using Fluence's current market value and AES's 34% ownership. We value AES's DevCo business using an NPV approach by discounting to FCF to equity holders with a 11% discount rate. We rate AES Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our $26 target price and Neutral rating include: (1) unexpected negative regulatory outcome in the US; (2) negative impact to AES's valuation owing to exposure to Fluence ownership; and (3) currency and political risks associated with AES's international business segments. Upside risk includes a better than expected rate outcome.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Alliant Energy (LNT.N)

Method: We value Neutral-rated LNT using a SOTP to determine our $58 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view IA and WI as favorable jurisdictions, however, see slightly more cautious rhetoric in WI. We apply a 5% premium to the business, giving a 17.5x 2024E P/E multiple, given the historically constructive reg outcomes in both states.

Risk: Risks to achieve our $58 target price and Neutral rating include the company seeing greater-than-expected returns in the unregulated renewable business, being unable to keep pace with peers' 6-8% EPS growth CAGR, or seeing decreased growth in service territories.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Ameren (AEE.N)

Method: Our target price is $95: We value AEE using a P/E methodology, applying relative P/E premiums and discounts to the company as a whole. In general, we view the Midwest (Illinois and Missouri) as a premium jurisdiction given the pro-development regulators and robust transmission development plan likely to be passed soon. We take a premium view on AEE (19.3x vs. 16.8x for the peer average), which we view to be fair given the strong upside potential and relatively limited downside risk for the company. We rate AEE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our $95 target price and Outperform rating include: Common equity funding that is not contemplated in our base-case scenarios, MISO Future 1 and 3 seeing delays, natural disasters, and a political landscape in the coverage area that is less favorable than current times. Climate change is also a risk to the extent that federal or state legislatures implement more restrictions on GHG emissions expected, which would increase standard asset risk for AEE's fossil generation. Commodity prices are surging, so Ameren must be diligent in maintaining bill pressure as it scales capex across IL and MO.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Atmos Energy (ATO.N)

Method: We value ATO on a sum of the parts with a $121 target price. We apply relative P/E premiums/discounts to the regulated gas group multiple of 15.0x. At the distribution business, we apply a 15% premium. We think this is justified given ATO's best-in-class jurisdictions, continued constructive treatment in the regulatory arena, and management's conservative planning assumptions. At the Pipelines segment, we apply a 10% premium, lower than 15% to handicap for the unregulated nature of the RRC pipes. That said, we see the contracts offering utility-like returns with long-term contracts in place with all of ATO's LDCs. Our base-case scenario contemplates a 17.0x consolidated P/E, which is slightly lower the company's five-year historical average of 19.5x. We rate ATO Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $121 target price include: Common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios could adversely affect our estimates. Gas is a highly combustible molecule. Pipeline leaks and explosions are risks of operating a gas distribution system, and any explosion/leak events could have a material adverse effect on ATO's multiple. ATO is subject to federal and state regulations, principally through rate regulatory proceedings. Failure to execute in the regulatory arena would inhibit shares from reaching our target price.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for CMS Energy Corp (CMS.N)

Method: Our target price is $69: We value CMS using an SOTP, applying relative P/E premiums/discounts to the two operating subsidiaries. In general, we view Michigan as a premium jurisdiction, given the historically constructive decisions and heathy earned ROEs. Michigan is also offering a premium allowed ROEs for renewable projects and EE. We take a premium view on both the Consumers and Enterprise segments with an 18.8x implied multiple for the electric and gas groups versus 16.7x and 16.1x

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

implied multiples for the electric and gas peer groups, respectively. We place a premium on the two operating segments given the strength of the businesses and upside potential in both. We rate CMS Outperform as we expect the stock's total return to be above that of peers over the next 12 months.

Risk: Risks to achieving our $69 target price and Outperform rating include: Difficulty executing on settled IRP plans that could lead to reduced capex spending and ultimately rate base growth. Construction delays could push back timelines for renewable projects and could delay upside from increased ROEs currently offered in Michigan for such projects. Increased severe weather events, particularly as coal plants are being phased out, could cause service continuity issues that would be costly to address.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for CenterPoint Energy (CNP.N)

Method: We value CNP using an SOTP methodology on 2025E EPS and have a $33 target price. We apply a 15% premium to the electric utility group multiple to Houston Electric, given the high-growth nature of the subsidiary and constructive regulatory mechanisms that allow management to realize ROEs close to authorized. We apply an 15% premium to SIGECO, given the generation replacement opportunity and transactions for peers in the state, which have garnered north of 20x P/E. We are also applying a 15% premium to the gas distribution segment, given management has already been actively monetizing its LDC portfolio north of 2.0x rate base. We rate CNP Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $33 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the companies proposed IRP in IN, natural disasters, labor/inflationary pressures above management's current O&M trajectory. Climate change is also a risk to the extent federal or state legislatures implement restrictions on GHG emissions in a more expected manner than contemplated. Commodity volatility is also a risk as it can lead to higher bills for customers, and crowd out growth opportunities.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Consolidated Edison (ED.N)

Method: Our target price is $78: We value ED on an SOTP approach. The company historically has had a challenging time earning its allowed ROE in the state, and we see an 8.8% authorized ROE as one of the lowest in the country. We are including a post-transaction NI of $1,666Mn for CEB sale given there is now a clear valuation/proceeds amount. We rate ED Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our $78 target price and Neutral rating include: Common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to establish new rates at CECONY, which could lead investors to take a discounted view on ED's largest earnings contributor. Natural disaster risk, which could accelerate liabilities surrounding the NYC distribution system. EDs natural gas system is subject to greater operational risk given gas is a combustible molecule. NY is increasingly focused on electrification, which increases stranded assert risk associated with ED's LDC system. Upside risk includes a better than expected rate case outcome.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Constellation Energy (CEG.N)

Method: Our target price of $98 is based on an SOTP approach for Outperform-rated CEG. We use an EV/EBITDA approach based on forecasted 2023 EBITDA and current trading multiple of 10.5x. We apply a 25% multiple premium to contracted EBITDA, as it reflects more stable cash flow through timely hedging over market for customers. We do not assign any multiple adjustment to the merchant portion of EBITDA as it is a commodity business. Our valuation also reflects our favorable view on CEG's generation fleet, which consists of 65% nuclear generation that benefits from the passage of IRA. We subtract net debt from enterprise value to derive equity value. We use an NPV approach to value ZEC/CMC revenue with 5% discount, reflecting reduced risk given its quasi-regulated nature.

Risk: Our $98 target price and Outperform rating could be affected by (1) unexpected/unfavorable power market price movement and increased volatility; (2) increased competition among competitive energy suppliers, which puts CEG's competitive position at risk; (3) IRA implementation not as favorable as expected, including tax provisions; and (4) undisciplined execution on ratable hedging program which amplifies discretionary risk.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for DTE Energy (DTE.N)

Method: We value DTE using an SOTP, applying 15% P/E premiums to both the electric (15.4x) and gas (14.7x) subsidiary, which yields a $118 target price. We hold a discounted view on Trading (-30% discount), given these are non-core businesses and contain higher earnings volatility. We rate DTE Outperform as we expect the stock's total return to be above peers over the next 12 months.

Risk: Risks to our Outperform rating and $118 target price include: The uncertainties around timely recovery cost through base rate increase. The unregulated business earning is more susceptible to economic and industry cycles, with potential upside/downside.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Dominion Energy, Inc (D.N)

Method: We value D using an SOTP methodology on 2025E EPS with a $67 target price. We apply a -5% discount to the electric utility group multiple of 16.1x for VEPCO, given the high visibility on capital recovery and solid earned ROEs is more than offset by recent actions by mgmt to address customer rates, and the VA governor energy plan which has called out multiple rider's for D. For the gas distribution segment, we apply an inline multiple to the regulated gas LDC multiple of 16.7x, given the review. At the contracted generation segment, we apply a 9.0x EV/EBTIDA multiple, inline with peer comp CEG. Our SOTP implies a 15.7x consolidated P/E multiple on 2025E EPS, which is a -2% discount to the large-cap regulated multiple. We rate D Neutral, as we expect the strategic review to hold back the stocks re-rating

Risk: Risks to our $67 target price and Neutral rating include failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the company's proposed wind program in Virginia, natural disasters, and labor/inflationary pressures above management's current O&M trajectory. Climate change is a risk to the extent that federal or state legislatures implement more restrictions on GHG emissions than expected. Commodity volatility is also a risk, as it can lead to higher bills for customers and crowd out growth opportunities.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Duke Energy (DUK.N)

Method: We value DUK using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries, which yields a $94 target price. In general, we view Florida as a premium jurisdiction given numerous constrictive mechanisms for real-time capital recovery. We take a premium view on DEI (5% premium), which we flag as conservative given DUK has proven it can monetize this sub for 27.7x most recently with the announced minority sale to GIC. We take a discounted view on the commercial renewables segment given broad supply chain/inflation concerns and high proportion of HLBV income, which we believe are low-quality, non-cash earnings. We rate DUK Neutral as we see total return in-line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $94 target price include: common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to establish new rates at DEC/DEP, which could lead investors to take a discounted view on DUK's largest earnings contributor. Natural disaster risk, which could accelerate liabilities at DUK's numerous coal ash ponds or nuclear facilities. Climate change and increased regulation on GHG emissions could accelerate closure of certain fossil investments, which would increase stranded asset risks to shares. Lastly, Federal legislation, such as change in tax policy, could negatively impact CFO for DUK.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Edison International (EIX.N)

Method: We value Neutral-rated EIX using an SOTP to determine our $64target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view California as a discount jurisdiction, with wildfire risk persistent throughout the state. We apply a 20% discount to the Electric GRC earnings and a 10% discount to the Transmission earnings, largely because of the risk of wildfires and related capital recovery proceedings. We adjust our SOTP for current and ongoing liabilities, principally (1) a $1Bn wildfire liability, offset by $1Bn of aggregate insurance, ongoing wildfire fund contributions of $95Mn/year discounted at a 9.5% IRR, and (2) remaining legacy wildfire claims of $900Mn assuming EIX foregoes cost of debt recovery on the remaining claims.

Risk: Risks to achieve our $64 target and Neutral rating include the company seeing delays in both the covered conductor installation and capital recovery, seeing increased wildfire activity in the coming years, and seeing a faster-than-expected recovery of costs associated with the '17/'18 natural disasters.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Entergy Corporation (ETR.N)

Method: Our target price Is $117: We value ETR on a P/E approach using the 2024E multiple of 16.3x on our 2024E EPS. We think ETR offers in above-average jurisdictions for growth, but ongoing hurricane costs can stress ETR's balance sheet. We see the currently constructive regulatory environment in ETR's service territories partially offsetting this negative. We do not ascribe any value to the stock for potential upside capex, or potential value accretive events such as an NCI sale. Overall, we still see ETR as attractive on this base-case discount approach. We rate ETR Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our Outperform rating and $117 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the company's proposed securitizations, natural disasters, labor/inflationary pressures above management's current O&M trajectory. Climate change is a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected, or if there are increased hurricanes in the Gulf Coast this season. A worse-than-contemplated hurricane season could inhibit ETR from reaching our target price.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Evergy (EVRG.OQ)

Method: Our target price is $57: We value EVRG on a P/E approach using the 2025E group multiple of 16.3x, applying a 10% discount to the business on account of the average to below-average jurisdictions EVRG operates in, specifically Kansas. We see EVRG as a company with a strong management team, however, could see hurdles within the current regulatory environment. We rate EVRG Underperform as we expect the stock's total return to underperform peers over the next 12 months.

Risk: Risks to achieving our $57 target price and Underperform rating include: Better than expected regulatory outcomes, strong execution of the company's proposed IRP in MO/KS, natural disasters, labor/inflationary pressures above/below management's current O&M trajectory. Climate change is a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected. Commodity volatility can lead to higher bills for customers, and crowd-out growth opportunities, which would inhibit shares from reaching our target price.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Eversource Energy (ES.N)

Method: Our target price is $75: We value ES using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view CT, MA, and RI as relatively favorable jurisdictions, although there have been recent conflicts in CT related to performance and penalties. We apply a 5% premium to the natural gas business as ES has a strong track record for operations and earned ROEs. For the Transmission segment, we apply a 5% premium, which is lower than our transmission approach for peer utilities, as we attempt to reflect risk of further ROE cuts to NE transmission operators. We rate ES Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our Neutral rating and $75 target price include: The company seeing further rate pressure from inflation, particularly in CL&P's jurisdiction. Other risks include further downgrade of forecasted ROE for offshore projects or an unfavorable monetization outcome, natural disaster/other issue that could delay wind projects under construction. Given the nature of offshore projects, climate-related issues pose a large risk to the company and its growth plans. Upside risk includes a better than expected rate outcomes.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Exelon Corporation (EXC.OQ)

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

Method: We utilized an SOTP method to determine our target price of $46 per share and a blended P/E multiple of 16.8x for Outperform-rated EXC. We derived the blended P/E multiple by creating a proportion of each segment for the electric group, transmission group, and gas group. We based the proportion on each segment's contribution to rate base. We applied a 2.5% premium multiple to the current blended multiple of 16.4x. We believe that an improving regulatory environment in Illinois will be favorable for EXC investors by allowing ComEd to file a rate case that is in line with industry average. Changes in the allowed ROE structure could increase the allowed ROE by 2% in 2024. Another key driver is the execution of the $29Bn capital plan.

Risk: Risks to achieve our $46 target price and Outperform rating include: (1) management not meeting RAB projected growth; (2) not reaching stated growth metrics, including the 6-8% LT EPS CAGR; (3) increasing commodity cost for electric and gas service, natural disaster risk; (4) worse-than-expected regulatory outcomes; and (5) volatility to 30yr US Treasuries, as ComEd ROEs are linked to 30YR USTs.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for FirstEnergy (FE.N)

Method: We value FE using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries, which yields a $39 target price. We hold a discounted view on all utilities subsidiaries other than FET (-20% discount to Ohio utilities and 10% discount to the rest of the portfolio), given FE's reputational risk and the upcoming base rate case filings across all jurisdictions, while the transmission company benefits from more constructive FERC regulation with timely and formulaic recovery. We rate FE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to out Outperform rating and $39 target price include: although the HB6 investigation is behind FE through the DPA, FE carries the reputation risk of a historically challenging organization. Even though the new management team has introduced internal control programs and is re-building the company's compliance culture, we recognize it takes time for a large organization to gradually achieve it.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NextEra Energy Inc. (NEE.N)

Method: Our target price is $85 is based on a SOTP analysis. On the regulated front, we use P/E approach based on forecasted 2024 EPS and electric group multiple of 17.1x. We apply 5% multiple premium to FPL and Gulf, given Florida is one of the most regulatory supportive jurisdiction in the country for of timely recovery of utilities' spending. We also consider the scale and efficiency of its operation as one of the best in the utilities space. We use EV/EBITDA approach to value the enterprise value of NEER's various business lines based on 2023 EBITDA. Our multiple is in-line with recent transaction multiples for each earning's driver. We subtract NEER's debt from enterprise value to derive equity value. We use a NPV approach to value DevCo's forecasted monetization proceeds with an assumed discount rate of 9.2%. Lastly, we value NEE's NEP LP stake proportionally using the current NEP share price multiply by NEE's LP share, then add GP IDR value, which is also estimated through an NPV approach. We rate NEE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to your Outperform rating and $85 target price include: 1) NEE's valuation multiple is more susceptible to market volatility as a growth name compared the value names; 2) the recent probe on solar anti-circumvention could exacerbate supply chain pressures; 3) Although benefiting from a deep bench of senior executives, Robo's retirement cast some doubt to the LT growth if NEE is not able to secure an effective new leadership team; 4) NEE's capital structures is among the most complex names and is more dependent on market condition.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $27 target price. Our base-case multiple of 16.1x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2) new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price implied P/E multiple is in line to electrics and a premium to gas LDCs. We rate NI Outperform as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Outperform rating and $27 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for OGE Energy (OGE.N)

Method: We value OGE using an SOTP with a $36 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. In general, we view Oklahoma as an average jurisdiction given the strong focus on affordability for customers. We take apply a 5% premium to the business given limited rate case risk, IRA positioning, ST growth and CapEx growth not current included in our forecasts. We value OGE on the small-cap multiple given the relatively small operational area and that it is a largely single-state jurisdiction. In our view, the stock is fairly prices on an SOTP basis given the strong catalysts, but there are clear risks to the company. We rate OGE Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $36 target price include: common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to execute on IRP as planned, supply chain issues related to solar panels or a significant decline in population and load growth could cause the market to take a discounted view on the name. Potential upside from the current rate case filing.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PG&E Corporation (PCG.N)

Method: Our target price is $17. We value PCG on an SOTP. We apply a 25% discount to our 2024E electric earnings, a 15% discount to gas earnings, and 5% discount to transmission earnings relative to the 2025E electric and gas group P/E multiples. We impute ~$1.0Bn of net wildfire liabilities, which include an additional $1Bn wildfire liability for fires to handicap incremental wildfire event

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

risk. We see ~12% total return for PCG in our base case, which is the above average for our coverage universe. Our target price implies an 11.8x consolidated P/E, a -22% discount, which is still one of the widest across the sector. We rate PCG Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $17 target price include: PCG has a history of having utility assets involved with large wildfires in CA. Additional wildfires in 2022-24 could materially affect our valuation. PCG is subject to environmental factors such as severe weather conditions and climate change, which could increase wildfire events. PCG's higher-than-average debt/capital and lower-than-average FFO/debt, while we forecast improving lower cash flow from rate proceedings or materially adverse rate case outcomes, could drive incremental equity needs or reduce the likelihood of reinstating the dividend.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PPL Corporation (PPL.N)

Method: Our target price is $32. We value PPL using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries. We take a premium view on PA (10% premium, 18.7x multiple), which we flag as conservative given the recent settlement in PA and the favorable storm recovery mechanisms recently utilized. We take a discounted view on LU and KU (5% discount, 16.2x multiple) because of the current stay-out of Kentucky rates and the risk of inflation weighing on customer bills in the years until 2025 when another rate case can be filed. We rate PPL Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our $32 target price and Outperform rating include: the inability to sustain new dividend and increased growth rate, and the inability to execute fully on the AMI and renewables projects. Increased inflation amid a rate stay-out in Kentucky, as well as headwinds delaying solar development via supply chain issues also pose a threat to the company. Other risks include more natural disasters/storms in Kentucky and Pennsylvania that delay projects and are expensive to repair, as well as climate change and related concerns. Upside risk includes the company cutting O&M expenses more than expected.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Pinnacle West Capital Corporation (PNW.N)

Method: We value PNW using a P/E, applying relative premiums/discounts to the various operating subsidiaries, which yields a $77 target price. We hold a discounted view on APS (-5% discount), given Arizona's general regulatory climate and additional uncertainties surrounded by APS being at the nexus of managing both rate case filing and separate judicial review against Arizona's challenging regulatory backdrop. We rate PNW Neutral as we expect the stock's total return to be in-line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $77 target price include: The uncertainties around the timely recovery of investment and operating expense associated with pollution control costs and earning sufficient return on equity to compensate the shareholder.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Portland General Electric (POR.N)

Method: We value POR using a P/E relative valuation methodology, applying a relative P/E premium/discount to the business, which yields a $48 target price. In general, we view Oregon as a favorable jurisdiction, with the offsetting factor being that POR has been challenged in the past obtaining favorable agreements. We apply a 5% discount for this, and use a 15.9x base multiple for small caps in the space. Although there are some prospects for growth for the company, there are many potential hurdles and a history of falling short on key initiatives that make us hesitant to place a premium on the stock. We rate POR Neutral going the equity issuance and '23 building year guided by management.

Risk: Risks to our Neutral rating and $48 target price include: A continuation of the trend of severe weather events leading to large deferrals and increased customer bills. Continuation of poor outcomes in terms of execution of RFP projects, etc. that leads to larger discrepancies between earned and allowed ROEs. Unfavorable rate case outcome for filing expected in '23.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Public Service Enterprise Group (PEG.N)

Method: We value PEG (excl. nuclear) using an SOTP on 2024E EPS using 2024E multiples, which yields a $61 target price. We apply peer P/E premiums to New Jersey compared to peer jurisdictions given PEG's historical higher-than-peer ROE, constructive rider mechanisms, and heavy FERC-regulated rate base. We hold a discounted view on the earnings derived from the LIPA contract (-25% discount) given its extension risk. We value PEG's nuclear generation using an EV/EBITDA multiple on 2024E EBITDA and a 10x multiple to derive the nuclear generation enterprise value (excluding the portion from ZEC), then subtract associated debt and add back NPV from ZEC payments to calculate the equity value from contracted nuclear. We rate PEG Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our $61 target price and Neutral rating include the following: PEG has robust capital spending programs with large-scale offshore wind project contemplated and a regulatory solar build-out, which are both subjected to state and federal regulation and scrutiny. The construction of such projects may face supply chain restraints and labor shortages. The contracted generation business remains commercial exposure with market price risk. The pension position could lead to significant EPS drag as well.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Sempra Energy (SRE.N)

Method: Our $172 target price is based on an SOTP analysis. At the utilities, we use a P/E approach based on 2024 projected net income. We apply a 10% multiple discount to SDGE, a 10% premium to Sempra Texas, and 5% discount to SoCalGas vs. their respective electric/gas 2024E group multiples. We view CA as a discount jurisdiction, owing to wildfire risk/recovery frameworks, and we see TX as a premium jurisdiction given outside growth opportunities and constructive regulatory framework. At SRE Infra, we apply a 12.5x EV/EBITDA multiple, which is 0.5-1.0x turns below where SRE recently monetized a 10% NCI interest in SRE. At for incremental LNG, we NPV the 20-year cash flows associated with ECA1 and Cameron Train 4 expansion, discounting them at Sempra's current expected market return of 9.3% for US projects and add 100bps to Mexico projects to reflect a country risk premium. Our SOTP base-case valuation implies a consolidated P/E multiple of 18.1x, which is in-line with current electric comps. We rate SRE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

Risk: Risks to our Outperform rating and $172 target price include: (1) SRE operates several fossil fuel distribution systems, which subjects the company to event risk associated with transporting combustible molecules; (2) climate change and the increased frequency of wildfires across CA; (3) stranded asset risk associated with the gas distribution system; (4) regulatory outcomes, as our estimates assume constructive resolutions in both CA and TX on pending rate cases; and (5) performance of equity method investments, which SRE relies upon for cash flow.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Southern Co (SO.N)

Method: We value SO using an SOTP that leads to a $70 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. All P/Es are based on our 2024E EPS. We view Georgia and Alabama as premium jurisdictions given numerous constrictive mechanisms for real-time capital recovery. We have a discounted view on Southern Power (-25% discount, 13.3x), given its non-regulated earning with higher volatility. We also take a discounted view of 30% on the Vogtle-related earnings given the uncertainties in project delay, concerns on cost overrun, and potentially higher burden to Georgia Power among other co-owners given the co-ownership agreement. We rate SO Underperform as we expect the stock's total return to underperform peers over the next 12 months.

Risk: Risks to achieve our $70 target price and Underperform rating include: The marketability of mandatory convertible securities and corresponding equity issuance. Non constructive ruling on Georgia Power's rate review, which could lead investors to take a discounted view on SO's largest earnings contributor. Climate change, and increased regulation on GHG emissions could accelerate closure of certain fossil investments which would increase stranded asset risks to shares. Lastly, Federal legislation, such as change in tax policy could negatively impact CFO for SO given its tax equity exposure through Southern Power.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for WEC Energy Group (WEC.N)

Method: Our target price is $93: We value WEC using a P/E valuation methodology, applying relative P/E premiums/discounts to the company. In general, we view Wisconsin and much of the Midwest as premium jurisdictions given numerous constructive mechanisms for real-time capital recovery, constructive rate case outcomes, and solid load growth. We take a premium view on WEC (15%, 18.9x), as we believe the company has a relatively limited number of levers that can be pulled to sustain capex growth in near future. Rate case risks appear priced in, although we think quality peers offer more attractive risk/reward skews. We rate WEC Underperform as we expect the stock's total return to be less than peers over the next 12 months.

Risk: Risks to our $93 target price and Underperform include: Sustained population growth in service territory driving load demand; the current supply chain issues related to solar panels are resolved in timely manner and Badger Hollow 2 is able to reduce the time of delay; Investor sentiment shifts and companies pursuing renewable projects and other non-core, regulated utility projects are rewarded by investors.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Xcel Energy (XEL.N)

Method: Our target price is $74. We ascribe a 15% P/E premium to the wider regulated utility group average, which is in-line with XEL's historical 5yr average. XEL tends to trade with the 'premium' utilities given its strong track record for delivering on the high end of its 5-7% EPS CAGR. We see the premium further supported by XEL's history of generally constructive regulatory outcomes, the company's Steel for Fuel program, which has enabled an acceleration of energy transition-related capital expenditures, as well as the potentially positive benefits stemming from Build-Back-Better legislation. We rate XEL Neutral as we expect the stock's total return to perform in-line with peers over the next 12 months.

Risk: Risks to Neutral rating and $74 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the company's proposed IRP in CO, natural disasters, labor/inflationary pressures above management's current O&M trajectory. Climate change is also a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected. Wildfires are becoming more common in some of XEL's service territories, which can cause its multiple to fluctuate more than peers.

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.

Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.

Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	53%	(26% banking clients)
Neutral/Hold*	36%	(22% banking clients)
Underperform/Sell*	10%	(21% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

This research report is authored by:

Credit Suisse Securities (USA) LLC Nicholas Campanella ; Fei She, CFA ; Nathan Richardson

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.

Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/ manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.

An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures. For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change.

Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.

This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).
EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.
Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

CREDIT SUISSE

Exelon Corporation

4Q Preview: Regulated Refresh on Tap: Regulatory Execution in Focus for '23

EXC

Target price (12M, US$) 46.00

Outperform

Electric Utilities | Increase Target Price

We provide our 4Q earnings preview for EXC shares and re-affirm our Outperform rating. EXC is working through its first full year refresh as a fully regulated entity, and we see the conference call as an opportunity for new management to: 1) Extend the 6-8% LT EPS CAGR through '26; 2) Provide FY23 EPS guidance where we see the range likely to bracket CSe / Street at $2.37 / $2.36; 3) Extend CapEx & Rate Base growth to 2026 – CSe models ~flat CapEx '26 vs. '25 translating to a 7% CAGR, though an up-tick in capex is possible; and 4) Provide an update on regulatory initiatives this year where investors are focused most on Illinois. EXC was an early underperformer on the '23 non-linearity theme, but we think the market has moved past these concerns with EXC ear-marking EPS expectations through 2025 which still show management within the 6-8% LT EPS CAGR, albeit the lower end. EXC has several rate cases to execute on in '23E (~55% of projected RAB) where we think investors are already weary and constructive execution of these cases are catalysts for the stocks multiple.

- **Framing EPS Expectations & The Roll Forward:** As we expect EXC to extend its 6-8% EPS CAGR on the call, we flag CSe sees closer to a 6.5% EPS CAGR long term with the bear case on shares being a lower outlook of 5-7%. 6.5% growth is still near the current sector average, and we believe EXCs lower risk T&D footprint, fragmented CapEx plan, and IL hedges (CMC) offer premium attributes. Additionally, the current outlook largely incorporates higher CoC (inflation) & fuel prices where we note some moderation since the 3Q update, principally in gas prices. Lastly, we flag EXC is already assuming the $200Mn/yr CFO hit from the alternative minimum tax, where we expect guidance from treasury sometime in 2023. The inclusion of tax repairs in the AMT could provide relief to EXC which we see positively affecting future funding considerations of the plan. Recall EXC has $500Mn of remaining equity to issue ($1Bn over 5yr plan), and any increase to the $35Bn plan we think could be met with an uptick in growth equity needs.
- **Valuation, EPS Ests & Risks:** We shift our TP to $46 from $42 due to higher group multiples, and our inclusion of a 2.5% premium on NI for risk profile. Our EPS estimates are +1c in '24E due to share count considerations. Risks: Inflation, reg outcomes, climate.

Company Background

Exelon Corporation, a utility services holding company, engages in the energy generation, delivery, and marketing businesses in the United States and Canada.

Blue/Grey Sky Scenario

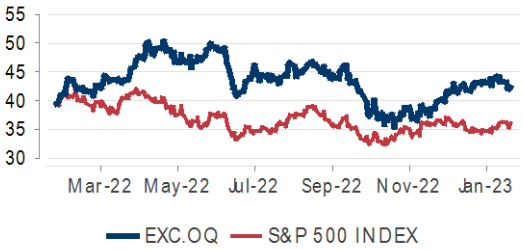
Our Blue Sky Scenario (US$) **(from 46.00) 50.00**

Our Blue Sky scenario assumes a P/E multiple of 18.5x and that (1) management executes on its capital plan and continues to manage O&M costs in the face of record inflation and rising energy service costs, (2) management continues its grid resilience project, and (3) ComEd operates in a more favorable regulatory environment.

Our Grey Sky Scenario (US$) **(from 37.00) 41.00**

Our Grey Sky scenario assumes EXC trades at a 15.2x. If inflationary head winds continue to persist and commodity prices continue to rise, this could impact customer bills and possibly impact consumption.

Share price performance



On 20-Jan-2023 the S&P 500 INDEX closed at 3972.61
Daily Jan21, 2022 - Jan20, 2023, 01/21/22 = US$40.480813590000004

Fundamental Dashboard

We include our latest EPS estimates below which are largely unchanged outside of 2024E (+1c/sh) for share count considerations. We note our 2026E EPS estimates assume a flat capex year vs. 2025 ($7.5Bn), with equity in the plan for conservatism (~$450Mn in 2026) and EXC still 150bps above its 12% FFO/Debt minimum. Our estimates are slightly below consensus (1%) in most years.

Valuation: $46 TP on Multiple Shift; Outperform

We maintain our OP rating on shares. Our latest TP shift to $46 is due to adjusted peer group multiples and a move to a 2.5% premium on consolidated net income for the low-risk nature of the plan.

Figure 2: Valuation: SOTP Approach on 2025E Tweaked to $46 TP

EXC Sum of the Parts Valuation				Grey Sky	Base Case	Blue Sky

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Exelon Corporation (EXC.OQ)

Method: We utilized an SOTP method to determine our target price of $46 per share and a blended P/E multiple of 16.8x for Outperform-rated EXC. We derived the blended P/E multiple by creating a proportion of each segment for the electric group, transmission group, and gas group. We based the proportion on each segment's contribution to rate base. We applied a 2.5% premium multiple to the current blended multiple of 16.4x. We believe that an improving regulatory environment in Illinois will be favorable for EXC investors by allowing ComEd to file a rate case that is in line with industry average. Changes in the allowed ROE structure could increase the allowed ROE by 2% in 2024. Another key driver is the execution of the $29Bn capital plan.

Risk: Risks to achieve our $46 target price and Outperform rating include: (1) management not meeting RAB projected growth; (2) not reaching stated growth metrics, including the 6-8% LT EPS CAGR; (3) increasing commodity cost for electric and gas service, natural disaster risk; (4) worse-than-expected regulatory outcomes; and (5) volatility to 30yr US Treasuries, as ComEd ROEs are linked to 30YR USTs.

02-Nov-20	29.21	33.51	
04-Nov-20	30.11	34.94	
23-Feb-21	29.09	33.51	
10-May-21	31.75	34.23	
13-Jul-21	31.94		NC
03-Oct-22	38.48	43.00	O *
18-Oct-22	37.56	39.00	
03-Nov-22	36.96	42.00	

** Asterisk signifies initiation or assumption of coverage.*

Effective July 3, 2016, NC denotes termination of coverage.

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.
**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*
Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.
Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.
Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.
Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.
**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	53%	(27% banking clients)
Neutral/Hold*	36%	(23% banking clients)
Underperform/Sell*	10%	(20% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A., with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.
Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit Suisse. Part of the author(s)´s compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.
This research report is authored by:
Credit Suisse Securities (USA) LLC..... Nicholas Campanella ; Fei She, CFA ; Nathan Richardson
There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.
Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.
An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures . For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject CS to any registration or licensing requirement within such jurisdiction.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor.This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).

EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.

Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

WATTS COOKING? Weekly

Topics: CEG; PEG; DUK; PJM interconnection; EXC

Our view: Weekly developments that we found to be of interest.

WATTS on Your Mind

This past week, we had many conversations regarding our downgrade of CEG to Sector Perform. Comments were mixed, and many focused on our modeling assumptions and CEG's capital allocation plans. Some inquired whether CEG may move away from an EBITDA valuation metric to a per-share metric and attract a larger long-term investor base. We believe consistency in delivering financial results and the increased use in PTCs may eventually lead to the change.

Shifting to other stocks, we found that AES attracted a lot of interest. Generally speaking, hedge funds focused on the upcoming 4Q call and the guidance that would come out of that event. Long-only funds were more focused on the long-term prospects of the company. Of particular interest was the ability to grow the solar projects in the current supply constraints and the likelihood of hitting the exit from coal by the end of 2025.

WATTS on Our Mind

On Tuesday, PEG announced its decision to sell its 25% equity stake in Ocean Wind 1 to Ørsted (covered by Alex Wheeler). PEG indicated in a press release that it was best to allow a better-positioned tax investor to be involved in the project. PEG expects Ørsted to purchase PEG's stake at cost with transaction close in 1H23. **Our view: Another factor that likely drove PEG's decision was inflation, which has impacted US projects in the Northeast cluster. We believe the decision on offshore wind will weigh on the company's option to purchase 50% of 846 MW Skipjack 2 project.**

On Thursday, Duke Energy Carolinas (DEC) filed a rate case with the North Carolina Utilities Commission (NCUC), including performance-based regulation (PBR) applications, and including a multi-year rate plan (MYPR) and decoupling in accordance with HB 951. The MYPR allows DEC to recover capital projects projected to go in service over the three-year period, such as solar and storage investments. DEC filed for a total increase of $823M over three years, with $501M ($361M base request, $140M MYRP) occurring in year 1, $172M MYRP in year 2, and $150M MYRP in year 3. DEC also requested a 10.4% ROE and 53% equity ratio. **Our view: This will be the first rate case filed by DEC since HB 951 was passed and the implementation of PRB applications, which is why there is a large step up in an overall revenue request compared to the previous rate case. We note that the previous authorized ROE and equity ratio was 9.6% and 52%, respectively.**

On page 2: PJM cost study; ComEd (EXC) files multi-year rate case.

WATTS on Our Mind (Cont'd)

This week, the Berkeley Labs released a study of interconnection costs in PJM. The cost sample covers 86% of projects evaluated in interconnection studies between 2000 and 2022. For completed projects, costs doubled from $42/kW ('00-'19) to $84/kW ('20-'22). For active projects still in the queue, costs increased 8x from $29/kW ('17-'19) to $240/kW ('20-22). Projects withdrawn from the interconnection queue saw costs increase 2-3x from $255/kW ('17-'19) and $599/kW ('20-'22). Network upgrade costs were the primary driver of cost increases. In addition, upgrade costs of renewables were often many times greater than those of natural gas. **Our view: we continue to expect interconnection costs to be a growing part of installation costs of renewables.**

This week, ComEd filed its inaugural multi-year plan in Illinois with a requested ROE range of 10.5% in 2024 (with a 5-bp annual step up through 2027) and equity layer of 51.19%. ComEd included a phase-in mechanism to defer 35% of 2024 base rate increase to 2026. Testimonies cited inflation and higher interest rates as a consideration of the requested ROE. The assumed cost of debt was 4.28%-4.60%, resulting in a WACC of 7.43%-7.7% during the plan period. ComEd expects distribution rate base of $1944M in 2024 growing to $2394M by 2027. **Our view: We believe there is a good likelihood that ComEd will be approved for rate base additions in order to meet the objectives of the Illinois CEJA. The approval of the deferral mechanism will likely be key to smoothing out earnings. The proposal results in a fairly even annual revenue requirement of ~$500M/year and a decrease of $100M in 2027.**

DUK US: Reports 3Q22 miss to consensus; guidance updated reflecting Commercial Renewables as discontinued – 2022.11.04

PNM US: 3Q22 beat, increased 2022 guidance and four-year capex plan – 2022.11.04

AES US: Results beat helped by LNG sales; guides to high end of EPS range; reaffirms 7-9% CAGR – 2022.11.04

ED US: 3Q22 beat to consensus and RBC; guidance narrowed to the top end of previous range – 2022.11.03

PNW US: Strong 3Q22 beat, increased 2022 guidance, new rate case underway – 2022.11.03

SRE US: Meaningful 3Q22 beat, increased 2022 guidance, LNG projects progress – 2022.11.03

EXC US: Reports solid 3Q22 results; reaffirms 6-8% EPS CAGR; CEO to step down by year end – 2022.11.03

CPK US: 3Q22 results below consensus and RBC driven by one-time timers; guidance reiterated – 2022.11.03

BKH US: Reports 3Q22 below consensus; reaffirms 2022 guidance and initiates weak 2023 guidance – 2022.11.02

ETR US: Significant 3Q22 beat to consensus and RBC; Narrowed 2022 EPS guidance – 2022.11.02

CWEN US: 3Q22 results and 2022 guidance slightly lower; 2023 guidance and dividend slightly better – 2022.11.02

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

Capital Markets

EIX US: 3Q22 in line, 2022 guidance narrowed, increased estimate of wildfire claims – 2022.11.01

UTL US: 3Q22 beats consensus and RBC; expects 2022 to be above 5-7% long-term EPS growth range – 2022.11.01

CNP US: 3Q22 EPS beat consensus; reaffirms 2022 and initiates 2023 EPS guidance; ups capital plan – 2022.11.01

AWK US: 3Q22 beat, 2023 guidance initiated, increased capex plan, higher equity need – 2022.10.31

D US: Dominion files proposed stipulation for Coastal Virginia Offshore Wind – 2022.10.31

PEG US: 3Q22 EPS results beat consensus; narrows 2022 guidance with midpoint unchanged – 2022.10.31

NEE US: Strong 3Q22 versus Street and RBC; 2022-2025 EPS guidance maintained – 2022.10.28

NEP US: 3Q22 misses Street and RBC expectations; DPU expectations unchanged – 2022.10.28

CMS US: CORRECTION - 3Q22 EPS beat; 2022 guidance expected at top end of previous range; 2023 guidance introduced – 2022.10.27

PCG US: 3Q22 beat, 2023 guidance in line, stronger rate base growth and mitigated equity need – 2022.10.27

AEP US: Reports favorable 3Q22 results; reaffirms 2022 EPS guidance and long-term CAGR – 2022.10.27

XEL US: Narrows 2022 guidance, 2023 guidance in line with consensus, increases capex plan – 2022.10.27

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:07 AM.

Required disclosures

Conflicts disclosures

This product constitutes a compendium report (covers six or more subject companies). As such, RBC Capital Markets chooses to provide specific disclosures for the subject companies by reference. To access conflict of interest and other disclosures for the subject companies, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1. These disclosures are also available by sending a written request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7 or an email to rbcinsight@rbccm.com.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.
With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.
As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.
Risk Rating
The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Dec-2022

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	839	56.05	225	26.82
HOLD [Sector Perform]	603	40.28	151	25.04
SELL [Underperform]	55	3.67	3	5.45

Capital Markets

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research

RBC Capital Markets endeavors to make all reasonable efforts to provide research content simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets provides eligible clients with access to Research Reports on the Firm's proprietary INSIGHT website, via email and via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.
For a list of all recommendations on the company that were disseminated during the prior 12-month period, please click on the following link: https://rbcnew.bluematrix.com/sellside/MAR.action
The 12 month history of SPARCs can be viewed at RBC Insight.

Analyst certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Third-party disclaimers

Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Europe) GmbH, Royal Bank of Canada, Hong Kong Branch, Royal Bank of Canada, Singapore Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets'' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. RBC Capital Markets may be restricted from publishing research reports, from time to time, due to regulatory restrictions and/ or internal compliance policies. If this is the case, the latest published research reports available to clients may not reflect recent material changes in the applicable industry and/or applicable subject companies. RBC Capital Markets research reports are current only as of the date set forth on the research reports. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct, indirect or consequential loss arising from, or in connection with, any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior written consent of RBC Capital Markets in each instance.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE, SIPC), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

Investment Thesis, Valuation and Risks

Exelon Corporation (EXC)

Investment Thesis

Our Equal Weight rating reflects our view that the current share price adequately reflects EXC's risk/reward proposition. Positive attributes including a healthy projected EPS CAGR (7%) and wires-centric asset mix are balanced by modest balance sheet concerns and our view that the company's regulatory jurisdictions are average to below average.

Target Price Valuation for EXC: $47.00 from NC

Our $47/sh price target is based on a P/E multiple analysis. We apply a P/E of ~18.5X to our 24E EPS of $2.53. Our multiple represents a 0-5% discount to the '23 Regulated Electric peer group median of 19.0-19.5X as we balance positive features (strong 7% EPS CAGR and predominantly electric wires strategy) with our perception that EXC's regulatory jurisdictions are average to below average. We apply the '23 median to our 24E EPS due to the forward-looking nature of our price target.

Risks to Our Price Target and Rating for EXC

Risks to our thesis include favorable/unfavorable regulatory developments (upside/downside) and greater-than-expected ESG appetite for a wires-centric company (upside).

Required Disclosures

I, Neil Kalton, certify that:
1) All views expressed in this research report accurately reflect my personal views about any and all of the subject securities or issuers discussed; and

Wells Fargo Securities, LLC has provided investment banking services for 27.7% of its Equity Research Underweight-rated companies.

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Important Disclosure for International Clients

United Kingdom – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the United Kingdom, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a UK incorporated investment firm authorised and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 (the "Act"), the content of this report has been approved by WFSIL, an authorised person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients. For the purposes of the U.K. Financial Conduct Authority's rules, this report constitutes impartial investment research.

EEA – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by WFSIL or Wells Fargo Securities Europe S.A. ("WFSE"). WFSE is a French incorporated investment firm authorized and regulated by the Autorité de contrôle prudentiel et de résolution and the Autorité des marchés financiers. WFSE does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). This report is not intended for, and should not be relied upon by, retail clients.

Australia – Wells Fargo Securities, LLC and Wells Fargo Securities International Limited are exempt from the requirements to hold an Australian financial services license in respect of the financial services they provide to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under the laws of the United States and Wells Fargo Securities International Limited is regulated under laws of the United Kingdom. All such laws differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC or Wells Fargo Securities International Limited in the course of providing the financial services will be prepared in accordance with the laws of the United States or United Kingdom and not Australian laws.

Canada – This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

China – Strictly Private and Confidential. For the sole use of the recipient only. Not to be copied or redistributed within the People's Republic of China.

Brazil - This report was not created for distribution to investors resident in Brazil or to the Brazilian public in general. Wells Fargo Securities, LLC is a broker-dealer registered in United States of America with and regulated by the U.S. Securities and Exchange Commission. Wells Fargo Securities, LLC is not registered in Brazil and its products, including this report and the securities mentioned in this report, have not been and will not be publicly issued, placed, distributed, offered or negotiated in the Brazilian capital markets, and, as a result, have not been and will not be registered with the Brazilian Securities Commission (Comissão de Valores Mobiliários, the CVM). The offer of Wells Fargo Securities, LLC's products, including this report and any securities mentioned in this report, is intended only for residents in the countries in which Wells Fargo Securities, LLC is authorized to operate.

About Wells Fargo Securities

Wells Fargo Securities is the trade name for the capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including but not limited to Wells Fargo Securities, LLC, a U.S. broker-dealer registered with the U.S. Securities and Exchange Commission and a member of NYSE, FINRA, NFA and SIPC, Wells Fargo Prime Services, LLC, a member of FINRA, NFA and SIPC, Wells Fargo Securities Canada, Ltd., a member of IIROC and CIPF, Wells Fargo Bank, N.A. and Wells Fargo Securities International Limited, authorized and regulated by the Financial Conduct Authority.

This report is for your information only and is not an offer to sell, or a solicitation of an offer to buy, the securities or instruments named or described in the report. KeyBanc Capital Markets

Alert

January 18, 2023

Energy: Electric Utilities

Midweek Thoughts — PEG, EXC, SRE, PNW, AEP, ED, DUK

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

This week, PEG announces the sale of its 25% interest in Ocean Wind I; ComEd files a multiyear rate plan in IL; the CPUC grants SDG&E approval for 200 MW of contracts for solar and storage capacity; the AZ Corporation Commission names a new chair; the WV PSC authorizes recovery mechanisms for three renewable generation facilities; ED requests an extension to the suspension date for new rates; and DESS acquires a 175 MW solar facility in CO.

ICYMI

NWE — NWE announced that it will acquire AVA's 222 MW ownership stake in Colstrip Units 3 and 4 in 2026, improving the long-term viability of the Coltrip facility. We wrote about it here.

Industry News and News from Companies in Our Coverage

PEG — PEG announces the sale of 25% interest in Ocean Wind I: PEG announced that it is selling its 25% interest in offshore wind project Ocean Wind I to partner Orsted. The transaction is expected to close in 1H23 and the first power from Ocean Wind is expected in late 2024, and full commissioning in 2025. The transaction terms were not disclosed, but we would expect the sale to be primarily neutral for PEG finances. With this, Orsted will own 100% of Ocean Wind I. The announcement does not come as a surprise and is likely the first of several offshore wind strategic announcements likely in 2023 as project economics evolve (higher project costs including the impact of higher interest rates that are distorting previously determined project economics, is just one reason for the sentiment shift). PEG management had discussed the rationale for exiting offshore wind on the generation side at our EEI meeting and on previous calls. Following this transaction, PEG will still own acreage in Skipjack (~35K acres), which could be monetized at a future date and will be a cash-positive event for PEG given its marginal investments in the acreage.

EXC — ComEd files a Multiyear Rate Plan in IL: ComEd filed the first multiyear rate plan in IL (Docket: 23-0055), seeking a cumulative $1,780M rate increase over the period of 2024-2027. The request is premised on a 10.5% ROE and 50.5% equity layer in RY1, with a 5 bps annual step up in the ROE before reaching a 10.65% ROE in RY4. EXC's equity ratio also includes annual step ups to 50.74%, 50.96%, and 51.12% for RY 2, 3, and 4, respectively. EXC is requesting a phase-in of new rates by deferring 35% of the 2024 base rate increase, with that amount being recovered in 2026. The multiyear rate plan was filed in tandem with the Company's grid plan, which also extends through 2027. The ICC has 11 months from filing to issue a decision, so we would expect an outcome prior to YE. The step ups are intended in response to the elevated interest rate and cost inflationary environment. EXC will make a separate filing for reconciling 2022 costs in April 2023.

Figure 1 - ComED MYRP Request

($M)	2024	2025	2026	2027
Revenue Increase [1]	570.1	501.8	506.1	202.7
ROE	10.50%	10.55%	10.60%	10.65%
Equity Layer	50.50%	50.74%	50.96%	51.12%
Rate Base	15,472.3	16,534.4	17,606.3	18,797.8

[1] EXC propsed to defer 35% or $307M from 2024 to 2026
Source: Regulatory filings, company filings, KeyBanc Capital Markets Inc.

SRE — CPUC grants SDG&E approval for 200 MW of solar and storage capacity: The commission approved SDG&E for one solar-plus-storage contract and two lithium-ion battery storage contracts for a total capacity of ~200 MW. The projects are expected to be in service from June 2023 through June 2024. The approved contracts include Ormat's 80 MW Bottleneck storage project, Aypa's 100 MW Cald storage project, and Terra-Gen's 20 MW Edwards Sandborn hybrid solar and storage facility. The contracts range from 12-15 years. SDG&E submitted these projects in October 2022 in response to the CPUC's order for CA load-serving entities to procure

at least 11.5 GW of clean energy resources between 2023 and 2026. Per that order, SDG&E is required to procure 475 MW during the period, with 83 MW online by Aug 2023, 248 MW by June 2024, 62 MW by June 2025, and 83 MW of long-lead time resources by 2026.

PNW — AZ Corporation Commissioner Jim O'Connor named chair: Commissioner Jim O'Connor (R) was elected to serve a two-year term as the new chair of the ACC. Commissioner O'Connor replaces former Chair Peterson, whose term as Chair expired at the end of 2022. Both commissioners' terms on the ACC run through 2024. ACC commissioners are elected to four-year terms in statewide elections, the chair is selected for a two-year term by fellow commissioners. Jim O'Connor and Lea Marquez Peterson (R) are joined by Commissioner Ana Tovar (D) as the holdovers on the ACC. Kevin Thompson (R) and Nick Myers (R) are new to the ACC with four-year terms that run through 2026. The role of the chair is mostly administrative, but they are responsible for controlling the meeting agenda. We are watching PNW's 2022 electric GRC, following a disappointing order in the 2019 rate case. PNW is seeking a net $460M revenue increase premised on a 10.25% ROE. The rates are expected to go into effect in December 2023.

AEP — WV PSC authorizes recovery mechanisms for three renewable generation facilities: The WV PSC approved ApCo and Wheeling Power's joint application for cost recovery mechanisms associated with three renewable facilities. AEP will recover costs for the purchase and sale agreements of the 4.9 MW Amherst County Solar Project and the 204 MW Top Hat Wind Farm through the Renewable Power Plus tariff. The PSC also approved cost recovery for the PPA for the 20 MW Horsepen solar facility in future Expanded Net Energy Costs (ENEC) proceedings, which are filed annually. The need for the projects stemmed from Nucor's request to power its new $2.7B steel mill being built in WV that will increase ApCo's load by 10-12% and requires 20% of the power to come from renewables. The Amherst facility entered service in December 2022, and the Top Hat wind farm is expected to enter service in December 2024.

ED — ED files a request to extend the suspension date for new rates; settlement discussions are ongoing: ED requested an extension to the suspension of new rates through July 24, 2023. ED previously requested 30-day extensions in November and December to delay rates until May 25 and June 24, respectively. All three requests are pending before the PSC. The requests also include an amendment for rates to be made whole for the period from January 1, 2023, to when the Commission sets new rates. The effective date of new rates are currently suspended through April 25. ED and Staff began settlement discussions in July, but the parties have yet to reach an agreement. In a December status update, ED noted that parties, including Staff, are close to reaching a settlement with only a few issues outstanding. The Staff is proposing an 8.8% ROE, which is below ED's calculation (9.05%), and it appears that Staff's recommended ROE is unlikely to change, even after the recent increases in costs of capital.

DUK — DESS acquires 175 MW solar facility in CO: DUK's subsidiary DESS acquired the 175 MW Pike Solar plant in CO from solar developer JUWI Inc. JUWI will remain involved in the process of engineering, procuring, and constructing the project. DUK will own the project and procure the required solar panels. Both JUWI and DUK will have certain O&M responsibilities. The project has a 17-year PPA with Colorado Spring Utilities and expects to enter service in late 2023. DUK launched DESS in 2021, which unified Duke Energy Renewables, REC Solar, and Duke Energy One under one brand. The entity cumulatively owns and operates more than ~5.3 GW of renewable power projects. DUK is in the process of selling its Commercial renewables business and expects to announce a transaction in 1Q23 and close it by mid-2023.

2023 Utilities Outlook Client Conference Call w/ Shar Pourreza & Team including Director of Utility Trading John Ritter — Monday, January 23, 8:15am

For details on our Guggenheim-hosted client Utility events including our Guggenheim Hosted Commissioner Roundtable Event, WEC NDR, DUK NDR, CMS NDR, ES NDR, PNW NDR, and other events, scroll down…

ETR – LPSC business meeting with ETR Hurricane Ida cost securitization on the agenda starts today

PEG – PEG announces agreement to sell 25% equity stake in Ocean Wind I

D/VA – Campaign finance bill dead in committee

VA – Shared solar bills surface in VA Senate and House

EXC – ComEd files multiyear rate plan at ICC

AVA – FERC rejects AVA's proposal to curb negative pricing

Nuclear – Talen completes Phase 1 of Susquehanna data center

FERC – Multiple names for Democratic nominees emerge in DC media

NRG – Astoria site sale closes

Wind – BOEM NOPR seeks to overhaul offshore wind regulations and processes

CT – CT Republicans float ending public policy charges to lower customer bills

ETR – LPSC business meeting with ETR Hurricane Ida cost securitization on the agenda starts today

- LPSC has a business meeting scheduled for today, January 18, 2023, with the ETR hurricane cost securitization settlement on the agenda for potential discussion and or approval.
- The agenda item is a carryover from 2022 with new commissioners taking seat.
- The securitization is for $2.6B of restoration costs incurred during Hurricane Ida.
- Meetings typically broadcast over the commission stream here.
- Docket: U-36350

Guggenheim takeaway:*FYI. The prior meeting generated an adverse reaction as dissenting commissioners showed preference for using their statutory authority to potentially deny, at least in part, a cost securitization until a further proceeding. The meeting could set a new and deteriorating precedent in terms of regulatory environment, which will be a key datapoint for ETR as well as credit ramifications.*

PEG – PEG announces agreement to sell 25% equity stake in Ocean Wind I

- PEG announced an agreement to sell its 25% equity stake in the Ocean Wind I JV back to its JV partner Orsted (ORSTED).
- PEG announcement highlights better ability for Orsted to recognize tax attributes.
- More here.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Guggenheim takeaway: *FYI. PEG has been interested in exiting wind development, including on prior earnings calls. PEG had a pre-FID put option to sell its $200M equity stake back to Orsted dollar-for-dollar. While the announcement is sooner than we anticipated (i.e., ahead of the similar ES process in New England), the announcement is not a surprise (**as we noted in our research here**). The value of the equity stake is not in current mgmt. financial plans, and we anticipate strategic options will remain on the table for PSEG Nuclear in time as PEG has been conscious of business mix.*

D/VA ─ Campaign finance bill dead in committee

- SB804 from Senator Chap Petersen was passed by indefinitely by the Committee on Privileges and Elections by a vote of 12-3
- More HERE

Guggenheim takeaway: *Minor FYI and not a surprise given the same legislation has repeatedly failed. As we noted previously – **this is something we anticipated in our Dec NDR note (see HERE**) and a piece of legislation that has appeared perennially in various forms across the General Assembly. **See our note from last week (HERE) for more on the current legislative backdrop and pathways forward.***

VA ─ Shared solar bills surface in VA Senate and House

- Two bills concerning share solar programs and minimum customer bills have emerged, one in each chamber with Democratic sponsors
- SB1083 "requires the State Corporation Commission to establish by regulation a shared solar program that allows customers of a Phase I Utility, defined in the bill, to purchase electric power through a subscription in a shared solar facility, defined in the bill as a facility that, among other criteria, generates electricity by means of a solar photovoltaic device with a nameplate capacity that does not exceed 5,000 kilowatts. Under the program, a subscriber receives a bill credit for the proportional output of a shared solar facility attributable to that subscriber. Subscribers are required to pay a minimum bill, established by the Commission, when the bill credit reduces the subscriber's bill below the minimum bill threshold; low-income customers are exempt from the minimum bill."
- SB1083 HERE
- HB1853 HERE

Guggenheim takeaway: *Some interesting legislative data points for your awareness – while these are specific to shared solar, we continue to monitor for broader data points on lawmakers discussing competition and the potential for revisions around renewable energy shopping to emerge in the sausage making process for broader regulatory and utility reform.*

EXC ─ ComEd files multiyear rate plan at ICC

- The filing would cover the years 2024-2027 and features a deferral of a portion of the Y1 increase
- "ComEd's requested revenue requirements are based on requested returns on common equity of 10.50%, 10.55%, 10.60%, and 10.65% in 2024, 2025, 2026, and 2027, respectively, and on capital structures that reflect between 50.58% and 51.19% common equity. The approved revenue requirements will be reconciled to actual costs incurred during each such year, subject to certain limitations and to ICC review, in accordance with law. In the filing, ComEd will ask the ICC to phase-in the new rates by deferring 35% of the 2024 base rate increase, with that amount being recovered in 2026." – release HERE
- "For a typical residential customer, in 2024, taking into the account the phase-in, the total bill impact of the proposed delivery rate increase will be $6.72 per month over approved 2023 rates. In 2025, the total bill impact will be a $5.73 per month increase over the proposed 2024 rates. In 2026, taking into the amounts deferred from 2024 for the phase-in, the total bill impact will be a $6.20 per month increase over the proposed 2025 rates. In 2027, the total bill impact will be a $1.67 per month reduction from the proposed 2026 rates" - filing
- Docket 23-0055 HERE
- Financial schedules and revenue details HERE
- Overview of filing HERE

Guggenheim takeaway: *As expected - The filing sets in motion a process to put in place a 4-year rate plan beginning in 2024, alongside the associated transition away from*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

purely formulaic ROE-setting under the prior FRP. As with AEE, we have long inquired whether management sees gas utility ROEs (mid 9s) as an illustrative landing point for eventual electric returns, and while they and others have declined to speak specifically on expectations, we would not be surprised to see allowed ROEs improve to that range (from the most recent 7.85% under the FRP). The company also has the opportunity to earn a performance bonus of up to +32bps under the ICC's recently approved performance metrics. ***We model an ascent to earned ROEs in the mid 9% range at ComEd through our forecast window.***

AVA – FERC rejects AVA's proposal to curb negative pricing

- In a 4-0 vote, FERC denied AVA's request to set a floor of zero dollars for transmission across its system from Western EIM customers.
- Docket ER23-443

Guggenheim takeaway: FERC argued that negative pricing is a legitimate market signal of overgeneration which should not be artificially blocked.

Nuclear – Talen completes Phase 1 of Susquehanna data center

- The private company's data center subsidiary completed the first 48MW portion of a planned 475MW of data center power co-located with the Susquehanna plant
- More HERE

Guggenheim takeaway: Minor FYI. As a reminder, ownership of collocated non-hydrogen load (e.g., data center) is one item we continue to watch for clarity on from the IRS as it relates to the nuclear PTC under the IRA.

FERC – Multiple names for Democratic nominees emerge in DC media

- Matthew Christiansen, general counsel at FERC, and Rick Kessler, an adviser for the House Energy and Commerce Committee are reportedly both under consideration, alongside some candidates who have already withdrawn their names
- More HERE

Guggenheim takeaway: *For your awareness. We agree with the link above that it remains early in the process.*

NRG – Astoria site sale closes

- The $215mm transaction will see the associated gas generating units retired in early May
- More HERE

Guggenheim takeaway: *For your awareness.*

Wind – BOEM NOPR seeks to overhaul offshore wind regulations and processes

- "The proposed regulations would modernize regulations, streamline overly complex and burdensome processes, clarify ambiguous provisions and enhance compliance provisions in order to decrease costs and uncertainty associated with the deployment of offshore wind facilities. The proposed reforms are estimated to save developers approximately $1 billion over a 20 year period." - BOEM
- See HERE
- More HERE

Guggenheim takeaway: *Interesting OSW data point.*

CT – CT Republicans float ending public policy charges to lower customer bills

- The move would reportedly save $22 on a $150 bill by shifting the funding of several renewables programs to the state budget
- More HERE

Guggenheim takeaway: *Interesting data point, and while the specific funds here may be important to Democrat's priorities, the development speaks to the lengths at which lawmakers in the state are going to try to find bill relief.*

Company Information

Market Cap: $29.8bn

WEC Energy Group (WEC) is a holding company that engages in the generation and distribution of electricity and natural gas. It operates through the following segments: Wisconsin, Illinois, Other States, Electric Transmission, Non-Utility Energy Infrastructure and Corporate & Other. The Wisconsin segment refers to the electric and gas utility operations. The Illinois segment deals with natural gas utility and non-utility activities. The Other States segment pertains to natural gas operations of the firm's subsidiaries. The Electric Transmission segment holds interests in state regulatory commissions. The Non-Utility Energy Infrastructure segment includes Wisconsin Electric Power, which owns and leases generating facilities. The Corporate and Other segment refers to the firm's administrative and holding activities. The company was founded in 1981 and is headquartered in Milwaukee, WI. (Source: FactSet)

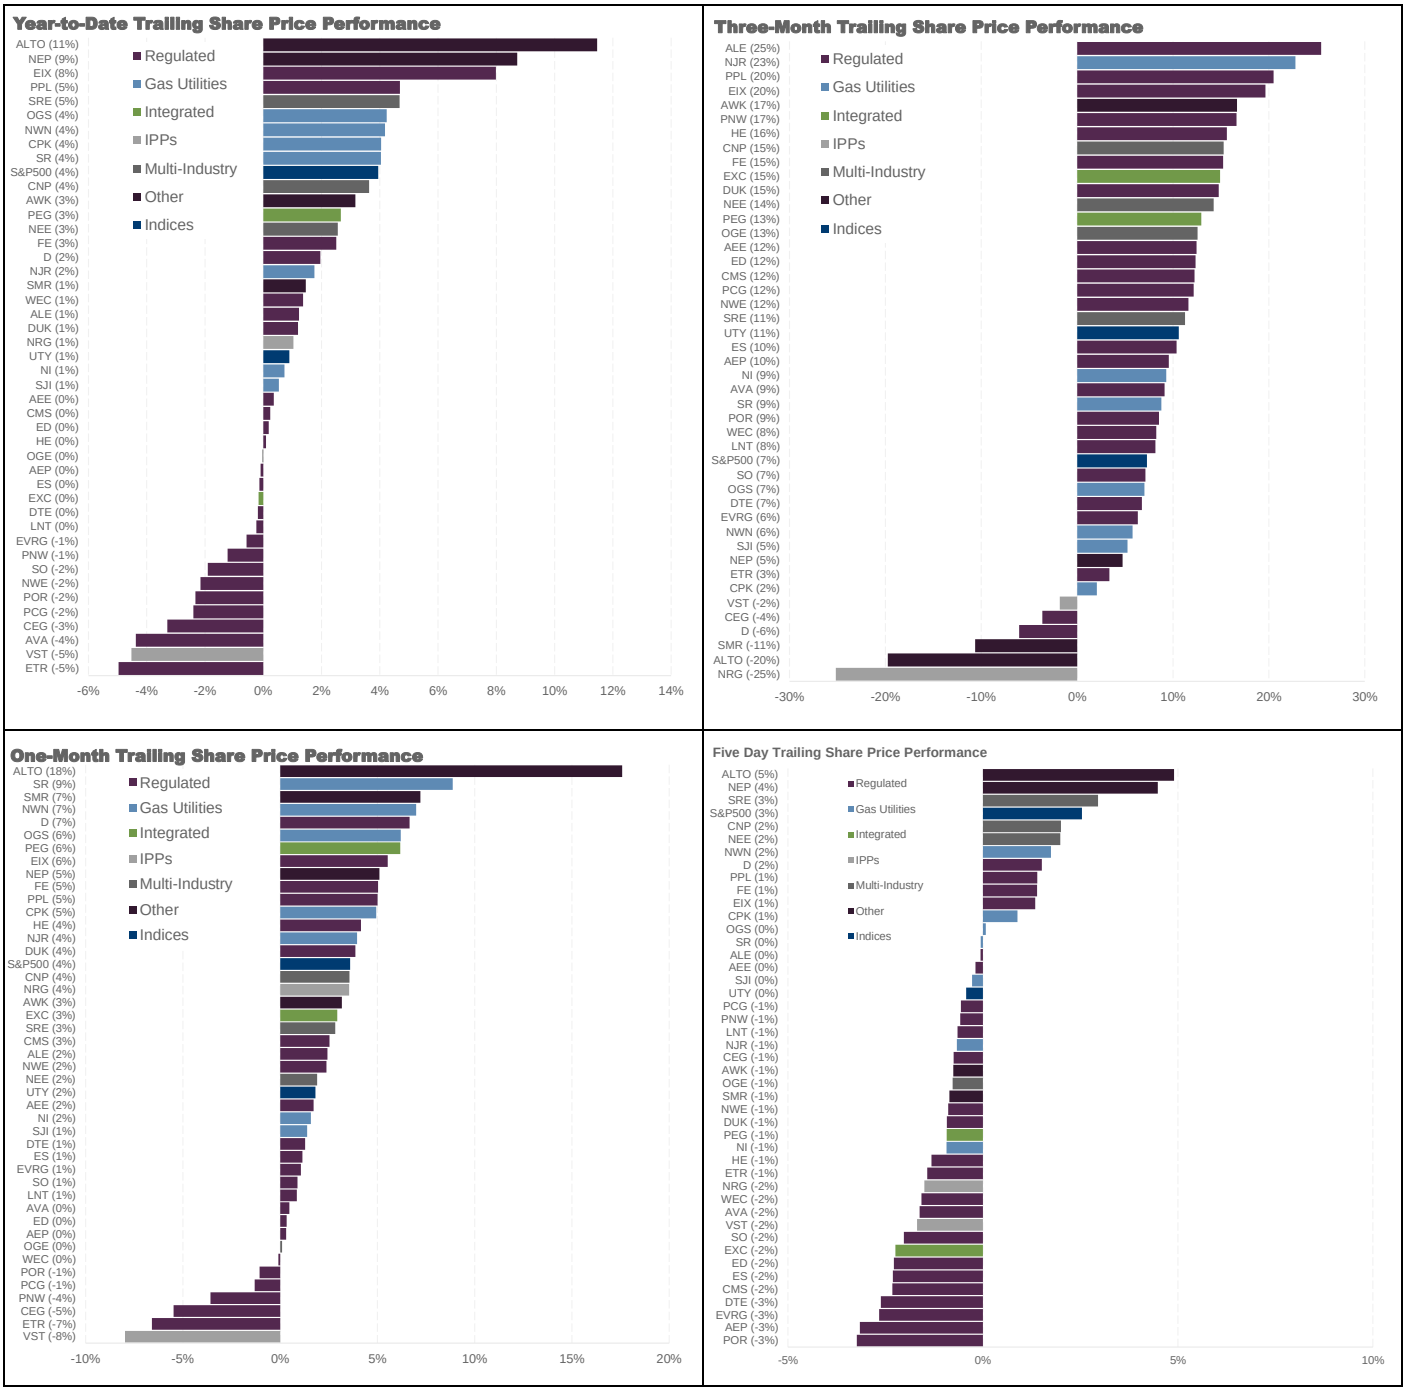
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

What Happened?

Earlier today, Commonwealth Edison filed its first Multi-Year Rate Plan covering 1/2024 through 12/2027 with the Illinois Commerce Commission. The filing was expected and is required under Climate and Equitable Jobs Act (CEJA) law, which transitions the regulatory construct in Illinois from an annual performance based formula rate to a multi-year rate case framework. We estimate the plan calls for mid-single-digit rate increases annually, on average, from '24 through '27, which includes deferring 35% of the 2024 rate increase until 2026. ComEd is seeking a return on equity of 10.50% in 2024 and escalating by 5bps per year through 2027. The equity ratio range requested is 50.58% to 51.19%. This compares to the current authorized levels for ComEd from the November '22 decision under the formula rate plan of 7.85% ROE and a 49.45% equity ratio. The ICC will have 11 months to review the filing and new rates are set to go into effect on 1/1/2024.

Performance Incentives Provide Modest Upside

ComEd will have the opportunity to earn up to 32bps of incentive adder to its authorized ROE (which would be worth ~1% to EPS) if it's able to achieve certain performance metrics across six categories: continued improvement in reliability of the overall grid; greater resilience in environmental justice communities; reduction of peak electric demand on the grid; reduction of residential customer disconnections; reduction of the time it takes to connect distributed energy resources; and enhancement of service through the resolution of customer issues. The plan includes forward looking projections on costs and allows for annual true-ups between projections and actuals.

Our Takeaway

The filing was expected and we believe the regulatory process should be fairly straightforward given most of the framework for the filing was ironed out ahead of today's announcement. The biggest variable we see is what the authorized ROE will be. The last ROE authorized by the ICC not under formula rates was for Northern Illinois Gas Co. at 9.75% in November of 2021. We think the visibility of a four-year plan is constructive and supportive of EXC achieving 6-8% EPS growth through 2025. EXC is scheduled to report Q4/FY '22 results on 2/14/23, where the company will also initiate 2023 guidance and roll rate base and capex forecasts out to at least 2026.

Valuation:

We maintain our Buy rating and $48 price target.

Forecast returns

Forecast price appreciation	+11.2%
Forecast dividend yield	3.5%
Forecast stock return	+14.7%
Market return assumption	9.2%
Forecast excess return	+5.5%

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 5 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 4) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 5) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk.

We maintain our price target of $48 premised on a 9% premium to the group multiple of 18.9x our $2.54/share earnings forecast for 2024. Our 9% net premium is derived from a 5% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond, a 5% discount for a 3rd quartile regulatory ranking overall, a 4% premium for 1st quartile earnings growth and a 5% premium for energy transition.

Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Quantitative Research Review

UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

Exelon Corp

Question	Response
1. Is the industry structure facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting worse, 3 = no change, 5 = getting better, N/A = no view)	3
2. Is the regulatory/government environment facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting tougher 3 = no change, 5 = getting better, N/A = no view)	3

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 17 January 2023 10:42 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	55%	24%
Neutral	FSR is between -6% and 6% of the MRA.	36%	21%
Sell	FSR is > 6% below the MRA.	9%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 December 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/research-methodology.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. January 17, 2023

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: SO, DTE, DUK, AEP, AEE, EXC, EIX, AGR, ES, XEL, CNP, SRE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Brendan Cutler / (917) 368-2345 / brendan.cutler@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

In the week ahead, we are tracking proceedings in SO's VCM hearings, DTE's MI electric rate case, and FERC's open meeting. In other news, DUK reaches a settlement in its DEP SC electric rate case; AEP files a settlement in its 2019 SWEPCO LA rate case; AEE files a gas rate case with ICC; AEP and Liberty announce their intent to refile for FERC 203 approval for the sale of Kentucky Power; DTE submits a notice of intent with the MI PSC for filing an electric rate case; ComEd releases a plan to meet IL's clean energy goals; the CPUC grants approval to SCE for four energy storage projects; a bill to require General Assembly approval of new rate cases was introduced in CT legislature; PJM generators could face penalties for failures to run during December's Winter Storm Elliott, PUCT pauses approval of a market design proposal pending input from the legislature, and intervenors protest XEL's CO interconnection reform proposal.

ICYMI

We published our 2023 Outlooks for Utilities and Alternative Energy. Access our reports here: Utilities 2023 Sector Outlook: Everything Is Expensive and Alternative Energy 2023 Sector Outlook: Cleared for Takeoff.

Regulatory Calendar

SO — Hearings in GP's VCM 27 are scheduled for January 17: Parties will discuss pre-filed testimony during the hearings, and the recent delay in Unit 3 due to vibrations in the piping will likely be a topic in discussions. The Staff provided testimony in VCM 27 related to the rate impacts of Vogtle Units 3 and 4 resulting from the ~$18B increase in ratepayer revenue requirements over the life of the units. Staff believes customer rates will increase by 11.5%, compared to SO's 8.7% estimate, over the next 18 months. GP's VCM 27 pertains to the January-June 2022 period. GP has presented a $522M capex for review only. The Commission will wait until Vogtle Units 3 and 4 are complete before determining the reasonableness and prudence of the cost overruns and their attribution to ratepayers. SO entered an agreement as part of the VCM 24 Order that it would not seek approval of costs exceeding the $7.3B previously deemed reasonable by the Commission until the prudence review is complete. In VCM 27, GP's cost forecast is relatively unchanged at ~$10B and the Company expects in-service dates for April 2023 and 4Q23 for Units 3 and 4, respectively. The remaining capex to complete the project is ~$1.0B, including GP's share of project contingency.

DTE — MI PSC meeting is scheduled for January 19: While a meeting agenda has not been released yet, we expect the agenda to include DTE's request for a rehearing in the MI electric rate case. DTE filed the petition with the MI PSC requesting that the PSC adopt the sales forecast in the PFD and the Company's proposal to continue its voluntary credit program to refund the incremental margin to customers for any difference between the forecast and actual usage post-COVID. DTE argues that the adopted sales forecast does not accurately reflect the changing trend in customer usage. As a reminder, the PSC ordered a $30.5M rate increase on a 9.9% ROE/50% equity, vs. DTE's revised ask of $368M, and a PD of $146M. See our note here where we tabulate the decision. The AG in its filing argued that DTE's residential sales forecasts are unreasonably low and that residential load continues to surge despite the end of pandemic-related disruptions. The Commission sided with the AG's argument that even though C&I volumes are increasing, electricity usage by the average residential customers remains elevated. By our initial math, but for the Commission's take on higher residential sales (and a related offset in fuel costs), the approved increase would have been ~$167M, or a modest increase from the staff's brief and the PD.

FERC — FERC's Open Meeting is scheduled for January 19: A copy of the Sunshine Notice is included here.

Recent Developments for Companies Under Our Coverage

From our midweek: VA Legislature introduces two competing bills to tackle utility regulation in the state; SO delays Vogtle Unit 3 in-service date; MO Staff files testimony in AEE's MO electric GRC; newly appointed NM PRC Commissioner resigns, Governor names

replacement; multiparty settlement in DEP's SC electric rate case expects to be filed tomorrow; MT Representative introduces an energy resource planning bill; DUK's Ledyard Windpower begins operations; ISO NE assesses $39M of fines to power generators; and EIA's January STEO is out.

DUK — Multiparty settlement filed in DEP's SC electric rate case: DUK filed a settlement for a net revenue increase of $36M, ($52M gross revenue offset by $16M from accelerating the return of deferred income tax benefits), premised on a 9.6% ROE/52.43% equity. All parties agreed to the settlement, where DUK agreed to a $50M one-time disallowance for coal ash pond closure costs and will forego seeking recovery of $3M of deferred costs associated with the Cape Fear site that was disallowed in the 2018 rate case. Going forward, DUK can defer future CCR costs at a debt return of ~3.8% and amortize remaining coal ash closure costs over 7 years at the full WACC. The settlement compares to DUK's initial request for a $68M net revenue increase ($90M gross and $21M offset for the return of ADIT), and was premised on 10.2% ROE/53% equity. A PSC decision is expected by March 1. Rates are expected to go into effect on April 1.

AEP — Settlement filed in 2019 SWEPCO LA rate case: AEP reached a settlement with LA Staff for a $27M net revenue increase, premised on a 9.5% ROE. AEP requests Commission approval at the LA PSC Business and Executive Session meeting on January 18. The settlement resolves all issues except the ADIT and net operating loss taxes, which the parties requested to be contested during a scheduled hearing on January 30. AEP initially filed the application in 2019 seeking a revenue increase of $134M premised on a 10.35% ROE and 50.8% equity, which the Company lowered to $114M to remove costs associated with Hurricanes Laura and Delta that will be recovered in a separate filing. Parties have been engaged in settlement discussions since January 2022.

AEE — AEE files a gas rate case with ICC: AEE IL filed a gas GRC with the IL Commerce Commission requesting a $160M revenue increase, premised on a 10.7% ROE, 54% equity, and a 2024 year-end test year. The rate increase request includes the recovery of $77M of annual revenues that would be recovered under AEE's QIP rider. AEE expects an ICC ruling within the 11-month statutory timeframe or by December 6, with rates going into effect on January 1, 2024. In its 2020 rate case, AEE received a $76M increase (vs. a $102M ask), premised on 9.67% ROE/52% equity.

AEP — AEP and Liberty will refile for FERC approval for the sale of Kentucky Power: AEP and AQN subsidiary Liberty announced that they intend to refile a Section 203 application with FERC for the sale of KY Power following a FERC order denying the Section 203 application due to what FERC notes was lack of information to evaluate the impact of the transaction on rates and potential changes to the cost of capital, including ROE, cost of debt, and capital structure. The sale was expected to close in January 2023, following an anticipated FERC approval. AEP and Liberty will need to provide adequate information to demonstrate the effects on rates and propose rate protection or mitigation measures to address any negative rate impacts or demonstrate benefits from the transaction to offset the rate impacts. See our prior notes here and here.

DTE — DTE submits notice of intent with MI PSC for filing an electric rate case: DTE intends to file an electric rate case (Docket: U-21297) with the MI PSC on or around February 10, 2023. DTE is awaiting a decision on its petition seeking a rehearing of the 2022 electric GRC order.

EXC — ComEd releases plan to meet IL's clean energy goals: ComEd released the ComEd 2030 plan that identifies five pillars that will guide EXC's work over the next five years, including preparing its grid to be able to deliver 100% carbon-free power by 2030, more resilient to climate change and security risks, and increasing efficiency to lower costs. EXC plans to install new infrastructure to support up to 1.8M EVs by 2030. The plan is consistent with a formal five-year grid plan that EXC expects to file with the ICC later this month. ComEd 2030 aligns with IL's targets set by the CEJA, including 50% renewable energy by 2040 and 100% clean energy by 2050.

EIX — CPUC grants approval for four energy storage projects: The commission approved SCE for four lithium-ion battery storage contracts with a total capacity of ~619 MW/2,476 MWh. The projects are expected to be in service from August 2023 through June 2024. The approved contracts include two phases with Calpine for Nova Power Bank Phase 1 and Phase 2 of 230 MW each, NEE's Proxima RA for 90 MW, and W Power's Stanton project for 69 MW. SCE submitted these projects in response to the CPUC's order for load-serving entities to procure at least 11.5 GW of clean energy resources between 2023 and 2026. The contracts range from 10-15 years.

AGR, ES — Bill introduced in CT legislature to require legislative approval for any rate increases approved by PURA: CT representative Christine Conley (D) introduced a bill (HB 5013) that would require the CT General Assembly to vote and approve any future electric and natural gas rate cases authorized by the CT PURA. The bill appears in very early stages with not much language around it published as yet.

CNP, SRE — PUCT delays vote on ERCOT market redesign proposal: The PUCT discussed the idea of a performance capacity mechanism (PCM) but delayed a planned Jan 12 vote on the market redesign given disagreement among state legislative members. The PCM would entail load-serving utilities and retailers to purchase performance credits from generators who would earn them based on their performance during times of increased stress on the grid. Governor Abbott and PUCT Chair Lake support the proposal but there is opposition from others in the legislature and the Lt. Governor who favor a policy toward incentivizing and facilitating market redesign

Sophie Karp (917) 368-2361 / sophie.karp@key.com

through a gas generation build-out program, rather than providing extra benefits to existing, dated generation facilities. The PCM as proposed by the PCM would be technology agnostic. According to a group of legislators who were instrumental in the enactment of SB 3 in 2021 that mandated reforms to the TX power market, including weatherization, the PCM proposal goes beyond the reform mandates in SB 3 and should not be adopted without consultation with the legislature. All these initiatives are a response to the performance of power generators during the 2021 winter storm Uri.

XEL — Intervenors oppose XEL's CO interconnection reform proposal:

- PSCo filed a proposal with FERC last December (ER23-629) requesting that FERC permit changes to the interconnection process as it relates to the PSCo CO transmission system to allow a readiness standard for processing interconnection requests (and move away from the first come, first served approach) and is requesting an effective date of March 29.
- The proposed changes would eliminate the security deposit option for early-stage projects, but impose tougher financial penalties for projects that withdraw from the queue. In place of the security deposit, XEL proposes a "generation deployment" option for interconnection customers without signed PPAs or evidence that projects have been selected as part of a resource solicitation with four options to meet the necessary requirements to participate in the interconnection studies. The alternative pathways involve providing a variety of information and data and include a $7.5M refundable security deposit with a $0.5M early withdrawal penalty.
- The proposals made by XEL are similar to the comments presented by several intervenors in the FERC's interconnection NOPR and the intervenor comments are also similar. SEIA argues that providing up to 60% of a project's design drawing before knowing the project's upgrade costs is needlessly expensive as is requiring purchasing orders prior to completion of a study. NEER is generally supportive of XEL's proposals but considers them more restrictive than the FERC's NOPR on interconnection reforms (RM22-14).
- Intervenors argue that the proposals are meant to give XEL an unfair advantage in the process as it has 5.7 GW of renewables and 1.2 GW of DER in the 2022 RFP to implement its 2021 resource plan that will need to be interconnected.

PJM generators could face penalties for failures to run during December's Winter Storm Elliott: Owners of power plants in the PJM Interconnection market could be fined $1B-$2B (based on preliminary estimates) for failing to provide electricity during Winter Storm Elliott in late December 2022. Nearly 46 GW or 23.2% of PJM's generating fleet was unexpectedly offline on December 24 primarily due to equipment that didn't operate and fuel supply challenges with gas-fired generation accounting for ~70% of unplanned outages. Over 92% of the outages were reported to PJM with less than an hour's notice or no notice. PJM anticipated a 29 GW reserve for December 23 based on power plant operator generator availability data (typically the reserve is 3 GW), but electric use by customers on that day was ~10% higher than forecasted. An additional 6 GW of generation failed to come online when called upon by PJM as it lacked the necessary electricity to refill pumped storage hydroelectric reservoirs overnight that would normally provide power the next day. PJM plans to release the results of its investigation into its operations during Winter Storm Elliot in mid-April and officials plan to meet with power plant operators to get more information.

ARGUS

NASDAQ: EXC

EXELON CORP

Exelon Corp. is a leading energy provider, with transmission and distribution operations in the U.S. and headquarters in Chicago. Exelon spun off its generation business, which was about 60% nuclear, as Constellation Energy at the end of 2021. Constellation is now a publicly traded company focused on generation and competitive distribution, while Exelon focuses on regulated transmission and distribution.

Analyst's Notes

Analysis by Marie Ferguson, January 13, 2023

ARGUS RATING: BUY

- New rate decisions to drive earnings
- Exelon recently reported 3Q22 split-adjusted operating EPS of $0.75, compared with $1.09 per share in 3Q21. This is the third set of quarterly results since the spinoff of the company's generation and competitive electric business.
- Earnings have been driven by rate growth and recent new gas rate decisions will increase revenue $63 million between PECO and DPL. EXC is also planning to file a multiyear electric rate case for ComED in 1Q23.
- We have a positive view of Exelon's transformation into a transmission and distribution utility through the spinoff of Constellation Energy and the accompanying reduction in expenses.
- EXC projects 6%-8% earnings growth through 2025. When combined with the current yield of 3.1%, investors can obtain stable, moderate total returns.

INVESTMENT THESIS

We are maintaining our BUY rating on Exelon Corp. (NYSE: EXC), which provides electricity and natural gas to about 10 million customers in Illinois, Maryland, Pennsylvania, New Jersey, Delaware, and the District of Columbia. We have a positive view of the company's transformation into a pure-play transmission utility through the recent spinoff of its competitive energy business, Constellation Energy (CEG). The move should also lower future earnings volatility. Management projects long-term earnings growth of 6%-8% from the company's utilities, which we believe is achievable. Exelon is also benefiting from favorable rate case decisions, as well as from its cleaner transmission mix and focus on hydro power.

In conjunction with the February 2022 Constellation spinoff, EXC shareholders received one share of CEG for every three shares of EXC. Exelon shares were repriced as a result of this separation. While the shares have benefited from recent strength in the Utility sector, we will monitor the company's balance sheet and growing debt for a possible rating change. Our target price is $50. The company has managed costs better than peers, but we believe that rising interest rates and high transmission and purchased fuel costs could

Analyst's Notes...Continued

pressure earnings.

RECENT DEVELOPMENTS

EXC's shares have outperformed the S&P 500 over the past three months, rising 18% compared to a 9% gain for the index and a 12% gain for S&P Utility Sector Index, XLU. The shares have outperformed over the past year, rising 11% compared to a 17% loss for the S&P 500.

Exelon recently reported 3Q22 operating EPS of $0.75, compared with $1.09 per share in 3Q21. This is the third set of quarterly results since the spinoff of the generation and competitive electric business and reflects the fact that approximately 40% of pre-spinoff revenue had come from this business. The 3Q22 results were driven by solid results for PECO and PHI due to rate increases and decreased storm costs.

Third-quarter operating revenues were $4.84 billion, compared with restated adjusted revenues of $4.86 billion in 3Q21. Net income attributable to shareholders was $676 million in 3Q22, compared with $1.2 billion in 3Q21. Third-quarter operating expenses decreased by 7% to $3.8 billion, compared with $4.1 billion in 3Q21. The spinoff of the company's generation fleet was intended to reduce cost volatility and mitigate risk from nuclear generation. For the third quarter, purchased power and fuel costs were reduced by 18% to $1.48 billion, however O&M expenses were reduced by just 3% to $1.15 billion.

On the regulatory front, the ComEd intends to file a multi-year electric rate request in 1Q23 and settlements were reached in October for DPL and PECO gas. Pennsylvania utility commission recently approved a $55 million increase in gas distribution revenues, effective 1Q23. Separately, DPL/Delmarva received an $8 million increase in gas distribution rates and an ROE of 9.6%, effective year-end 2022. The approved ROE is in line with peers.

Management is focused on capital investment to improve reliability and provide cleaner energy, with $29 billion expected to be allocated to new infrastructure by 2025. As a result, the company has significantly increased its debt and during 3Q22 with EXC issuing $650 million of long-term bonds.

Along with earnings, management lowered the top end of its 2022 adjusted EPS forecast to $2.21-$2.29 per share from $2.18-$2.32, while keeping the midpoint of $2.25. EXC also projected 6%-8% operating earnings growth and dividend growth through 2025.

EARNINGS & GROWTH ANALYSIS

Following the spinoff, Exelon has six utility subsidiaries: PECO (1.7 million electric and 0.5 million gas customers near Philadelphia); PEPCO (1 million electric customers in Maryland and DC); DPL (0.5 million electric and 0.1 million gas customers in Delaware); ACE (0.6 million electric customers in New Jersey); BGE (1.3 million electric and 0.7 million gas customers near Baltimore); and ComEd (4 million electric customers in Illinois).

The company generally breaks out results for four segments:

Analyst's Notes...Continued

ComEd, PECO, BGE, and PHI (which includes ACE, PEPCO, and DPL). Compared with 3Q21, results were strong for the four segments as follows: ComED revenues fell 23% while operating earnings increased to $293 million from $224; PECO revenues rose 24% while operating earnings increased to $174 million from $114; BGE revenues rose 13% while operating earnings increased to $70 million from $40 million; and PHI revenues rose 8.7% while operating earnings rose to $286 million from $272 million.

Driving earnings overall were higher rate bases for ComED, PHI, and PECO and lower storm costs for BGE. PCG had flat 3Q22 electric revenues across its utilities, with public transportation and railroad sales down almost 6%, offset by a 2% increase in industrial sales. The number of overall electric customers rose, however, across all customer segments.

Total natural gas revenues were down less than 1% with decreases from PECO and DPL and a slight increase in sales for BGE. Sales were down for residential customers an average 3% while there were large gains in commercial customers, significantly in PECO's service region.

Going forward, the company should continue to benefit from favorable rate case outcomes and streamlined costs. The company has a mixed service region with cold winters in its Illinois region and more moderate, year-round weather in the remainder of PCG's mid-Atlantic region, which can enable the company to manage costs. Argus remains positive on continued earnings drivers from economic growth in the Chicago and Philadelphia areas, offset by slower growth and higher unemployment in Baltimore. We expect the strongest segment results to be driven by rate growth from ComEd and BGE, with tighter earnings from PECO due to regulatory lag and higher debt costs.

Management had projected approximately 8% growth in its consolidated rate base through the end of 2025. In addition, management plans to address rising O&M expense through multiyear labor agreements and cost-focused technology, and projects capital spending of $29 billion in 2022-2025. The spinoff of the generation and wholesale energy business should also help to reduce earnings volatility.

We expect earnings to reflect the impact of the rate growth. The company has kept expenses in check despite higher transmission and fuel costs, but we continue to watch costs in these areas. We are maintaining our 2022 operating estimate of $2.25 per share. However, based on timing for new rate increases, we are lowering our 2023 operating earnings estimate to $2.38 from $2.40 per share.

FINANCIAL STRENGTH & DIVIDEND

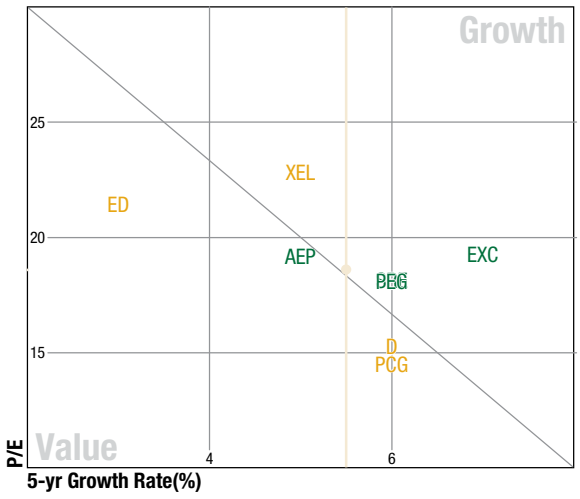
Our financial strength rating on Exelon is Medium. Moody's rates the company's debt at an investment-grade Baa2. S&P lowered its rating from BBB to BBB- and Fitch lowered its rating from BBB+ to BBB in 2021.

The company's 3Q22 balance sheet shows a significant increase in long-term debt with a reduction in current liabilities. Cash and

Peer & Industry Analysis

The graphics in this section are designed to allow investors to compare EXC versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.

- **The scatterplot shows how EXC stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how EXC might fit into or modify a diversified portfolio.**



Ticker	Company	Market Cap ($ in Millions)	5-yr Growth Rate (%)	Current FY P/E	Net Margin (%)	1-yr EPS Growth (%)	Argus Rating

©2023 Argus Research Company

Analyst's Notes...Continued

equivalents were $446 million, down from $672 million at the end of 2021. At the end of 3Q22, long-term debt was $35.3 billion, up from $30.7 billion.

The long-term debt/cap ratio at the end of 3Q22 was 59%, in line with the peer average but up from 47% at the end of 2021. We note that the increase in the debt/cap ratio reflected both an increase in debt and a reduction in stockholders' equity and retained earnings. EXC's weighted average long-term debt maturity is about 17 years.

In August 2022, the company announced the pricing of a public offering of approximately 13 million shares of common stock with proceeds of $563 million. The company plans to use proceeds to repay a portion of $575 million in debt.

Following the Constellation spinoff, Exelon lowered its quarterly dividend by 12% to $0.3375 per share, or $1.35 annually. The current yield of about 3.1% is slightly below our peer average of 3.2%. Our dividend estimates are $1.35 for 2022 and $1.45 for 2023.

MANAGEMENT & RISKS

The CEO of Exelon is Christopher Crane. Joseph Nigro is the CFO and Jeanne Jones is SVP of Corporate Finance. Mayo Shattuck II is the company's independent chairman. In January 2023, Calvin Butler was promoted to president and COO, taking over from Christopher Crane.

Risks for Exelon shareholders include cooler-than-normal conditions during the summer air-conditioning season or warmer-than-normal temperatures during the winter heating season. The transmission business may also be hurt by extreme weather events. Other risks include those related to ROE, including exposure to state regulatory commissions and the correlation between authorized ROE and Treasury yields.

Utility stocks in general are susceptible to commodity price fluctuations, regulatory issues (especially construction cost recovery), and potential environmental and safety liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk. Utility stock performance also tends to be sensitive to interest rates; when rates rise, utility yields often rise.

COMPANY DESCRIPTION

Exelon Corp. is a leading energy provider, with transmission and distribution operations in the U.S. and headquarters in Chicago. Exelon spun off its generation business, which was about 60% nuclear, as Constellation Energy at the end of 2021. Constellation is now a publicly traded company focused on generation and competitive distribution, while Exelon focuses on regulated transmission and distribution.

Through its regulated utility subsidiaries, Exelon delivers electricity and natural gas to about 10 million customers, primarily in central Maryland (Baltimore Gas & Electric Co.), northern Illinois (ComEd), and southeastern Pennsylvania (PECO). About 90% of EXC's current revenues are from the electricity segment. In late 2021, the company announced 'Path to Clean' goals, which include cutting 15% of operations-driven emissions by 2022 relative to 2015 levels. The company plans to cut emissions by 50% by 2030 and to achieve net-zero emissions by 2050. The shares are a component of the S&P 500.

VALUATION

EXC shares have followed sector trends and benefited from rotation into utility stocks. EXC has outperformed both the S&P 500 and the S&P Utility Sector Index, XLU, over the past 52 weeks. At current prices near $44, the shares are trading just above the midpoint of their 52-week range of $35-$50.71 and appear undervalued on several key metrics.

They are trading at 19-times our 2022 EPS estimate, below the average of 21 for Argus-covered utilities. The PEG multiple of 2.4 is below the peer average of 4.0, and the price/sales multiple of 2.2 is below the peer average of 2.8. The EV/EBITDA multiple of 10.5 is also below the peer average of 11.3.

We believe that EXC shares offer value based on the company's size and scale, and reduced earnings volatility following the Constellation spinoff. We like Exelon's regulatory environment and management's focus on renewable energy and cleaner transmissions. At the same time, the company plans to invest heavily to increase reliability and will need to manage its debt amid rising rates. Current prices could allow a buying opportunity for investors seeking a stable total return. We are maintaining our BUY rating with a target price of $50.

On January 13 at midday, BUY-rated EXC traded at $43.09, down $0.29.

About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

THE ARGUS RESEARCH RATING SYSTEM

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

The Guggenheim Daily Transmission: SO, PCG, AEE, D/CT, EXC/CEG/IL, PJM, ERCOT

2023 Utilities Outlook Client Conference Call w/ Shar Pourreza & Team including Director of Utility Trading John Ritter — Monday, January 23, 8:15am

For details on our Guggenheim-hosted client Utility events including our NARUC Commissioners Roundtable, WEC NDR, DUK NDR, CMS NDR, ES NDR, PNW NDR, and other events, scroll down…

SO – Cooling system repairs to delay Vogtle Unit 3 in-service by one month; Unit 4 schedule unaffected

PCG – Intervenors file opposition to Pacific Generation formation and sale proposal at FERC

AEE – Revenue requirement testimony of MoPSC Staff and intervenors docketed

D/CT – Governor Lamont in discussions with Dominion on Millstone contract extension

EXC/CEG/IL – Madigan trial generates additional noise on EXC and CEG executive involvements

PJM – RTO releases initial storm report; points to $1-2bn in performance charges

ERCOT – Governor Abbott throws his support behind the PCM proposal

ERCOT – ISO committee pursues report on December cold snap performance

SO – Cooling system repairs to delay Vogtle Unit 3 in-service by one month; Unit 4 schedule unaffected

- Yesterday, Georgia Power found vibrations associated with piping in Unit 3's cooling system. Repairs are already underway.
- Southern Nuclear expects to file a license amendment request with the NRC to help expedite the process.
- Georgia Power now expects that initial criticality will occur in February 2023 and that Unit 3 will be placed in service during **April 2023 (vs. March 2023, previously)**.
- 8-K linked HERE

Guggenheim takeaway:*We caught up with the company yesterday and inquired about potential knock-on effects for Unit 4. SO explained that a shared pool of engineers is effectively what links Unit 3 & Unit 4's respective schedules at this point, with those workers focused on start-up procedures at Unit 3 and conducting testing, which will lead up to and include Hot Functional Testing at Unit 4. After assessing the situation, SO believes that the testing at Unit 4 is still achievable on the current schedule with the resources and timetable currently in place. While they acknowledged the potential risk of a Unit 4 delay should something else unexpected occur, this event alone was* ***not deemed to be enough of an impact on Unit 4 to warrant change to the currently scheduled YE23 in-service expectation****. Also, the one-month delay to anticipated revenues plus the incremental carrying costs amount to ~$0.02, which will be excluded from adjusted EPS results.*

PCG – Intervenors file opposition to Pacific Generation formation and sale proposal at FERC

- Intervenors filed comments in opposition to PCG's plan to form and sell an equity stake in Pacific Generation.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

- The comments from consumer advocates and other organizations focused on consumer protection issues and oversight, as well as alleging a lack of information and commitments in the filing to ensure certain protections.
- FERC Docket: EC22-38 (through search)

Guggenheim takeaway:*FYI. The comments are not unexpected, in our view, given the somewhat unique proposal for the formation and sale. Some of the issues seem like misunderstandings conceptually (i.e., the subsidiary will still be majority owned by PCG and have the same regulatory oversight). The allegations of incomplete information in the filing are more administrative in nature, which could be resolved in the litigated process.*

AEE ─ Revenue requirement testimony of MoPSC Staff and intervenors docketed

- The parties filed direct testimony on the 1/10 deadline, including Staff's associated accounting schedules featuring a midpoint ~$146.8mm gross revenue requirement (9.34%-9.84% ROE range, 51.84% layer) supporting a $10.42bn rate base.
- "The results of Staff's audit of Ameren Missouri's rate case requests can be found in the Staff's filed Accounting Schedules and is summarized on Accounting Schedule 1, Revenue Requirement. This Accounting Schedule shows that Staff's recommended revenue requirement in this proceeding is $19,275,371. The recommended revenue requirements are based upon a mid-point recommended rate of return ("ROR") of 6.86%. Staff is recommending a mid- point ROE of 9.59% with a range of 9.34% to 9.84% as calculated by Staff witness Dr. Won. Staff's revenue requirement at the low and high ROR range of 6.73% to 6.99% is $1.4 million and $36.9 million." – Staff
- "Staff included a true-up allowance of $127.6 million. The allowance was determined by identifying costs that are likely to change during the true-up phase of the case. As discussed above, the true-up allowance will be replaced by actual costs incurred through December 31… Staff's recommended revenue requirement including the true-up allowance and based on Staff's recommended ROR is $146.8 million" - Staff
- More HERE.

Guggenheim takeaway: *Heads up on the voluminous filings, which we continue to parse. As a reminder, AEE requested a $316mm revenue increase, supported by a 10.2% ROE and 51.9% equity layer on $11.6bn of rate base. The filing will be answered in rebuttal testimony on February 15th. We continue to monitor the case closely given the impending departure of Chair Silvey, although AEE has a strong track record of executing and settling in the state.*

D/CT ─ Governor Lamont in discussions with Dominion on Millstone contract extension

- The Governor held preliminary discussions this week with D on keeping the plant open into the 2030s.
- More HERE.

Guggenheim takeaway: *Interesting data point for your awareness, and zero surprise to us given the supply backdrop in the state/region.*

EXC/CEG/IL ─ Madigan trial generates additional noise on EXC and CEG executive involvements

- Additional details of the federal case against the former speaker were released Tuesday, detailing contacts between the politician and former EXC executives.
- CEG comment HERE.
- More HERE.

Guggenheim takeaway: *Flagged for your awareness as we expect local media to continue generating noise during this process.*

PJM ─ RTO releases initial storm report; points to $1-2bn in performance charges

- The detailed presentation lays out the operational challenges the RTO faced over the 12/23-12/25 event, including issues with fuel availability and the associated performance penalties.
- More HERE.

Guggenheim takeaway: *The detailed report is worth a read, with PJM providing an excellent overview of the event background, timeline, and associated resource performance. As a reminder, the emergency declarations triggered performance auditing for several*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

periods (PAIs), a formal process for penalties and bonuses created out of the capacity performance(CP) reforms in 2016 following several instances of generator nonperformance (e.g., 2014 polar vortex).In PJM's own words: " Revenue collected from payment of Non-Performance Charges is distributed to resources (of any type, even if they are not Capacity Resources) that perform above expectations during each PAI." The penalized resources have not been disclosed at this point, however, gas STs were one particular issue area.

ERCOT ─ Governor Abbott throws his support behind the PCM proposal

- In a letter to the PUCT, the Governor voiced his support for the PCM.
- "After an extensive 18-month stakeholder engagement process and a review of the market designs analyzed in the reliability study commissioned by the PUC last year, the Performance Credit Mechanism (PCM) must be given strong consideration. As the Legislature has noted, a reliability standard must be the foundation of any reliability design. The PCM best meets this call because it is based on a reliability standard, incentivizes new dispatchable generation, and maintains Texas' energy-only market. The fact that generators have already publicly committed to build thousands of new megawatts of dispatchable generation resources if the PCM is adopted and implemented by the PUC further supports this point."
- More HERE.

Guggenheim takeaway: *PUCT Chair Lake indicated his support of the LSE-based variant, the PCM, in both PUC and legislative meetings last month, so not a surprise to us to see the Governor's support here. The mechanism is functionally different from the consultant-recommended FRM in how reliability credits are procured, however, it would also come with potential costs to load. These cost pushbacks prompted the entire Texas Senate Business and Commerce Committee to sign a letter in December calling for more consideration, with further discussion to come during the current session (1/10-5/29). As a reminder, there are now several different camps to consider as the process unfolds this year, each of which has separate considerations as it relates to reliability and cost. These include: 1) the PUCT and ERCOT (focused on reliability), 2) the House and Senate (in our view, focused on affordability), 3) the Lieutenant Governor (focused squarely on NT gas generation additions), and 4) the Governor (primarily acting through his PUCT appointees).* ***In our view, this process will remain noisy, with our most recent EEI conversations (see note HERE) pointing to a challenging pathway forward for overhauls that come at a major cost to consumers.***

ERCOT ─ ISO committee pursues report on December cold snap performance

- Members of the Wholesale Market Subcommittee are seeking a performance report following the December weather event, per Platts.
- More HERE.

Guggenheim takeaway: *Minor FYI.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Guggenheim Participants
Shahriar (Shar) Pourreza, *Senior Managing Director – Power & Utilities*
John Ritter, *Director – Equity Trading*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

Equity Research | Corporate Access

WEC Energy Group, Inc. (WEC)

Gale Klappa, *Executive Chairman*
Beth Straka, *SVP Corporate Communications & Investor Relations*

Dates & Locations

February 14 – 16, 2023
West Coast

Meeting Format

NDR - 1:1 Meetings & Group Meetings

Company Information

Market Cap: $29.8bn

WEC Energy Group (WEC) is a holding company that engages in the generation and distribution of electricity and natural gas. It operates through the following segments: Wisconsin, Illinois, Other States, Electric Transmission, Non-Utility Energy Infrastructure and Corporate & Other. The Wisconsin segment refers to the electric and gas utility operations. The Illinois segment deals with natural gas utility and non-utility activities. The Other States segment pertains to natural gas operations of the firm's subsidiaries. The Electric Transmission segment holds interests in state regulatory commissions. The Non-Utility Energy Infrastructure segment includes Wisconsin Electric Power, which owns and leases generating facilities. The Corporate and Other segment refers to the firm's administrative and holding activities. The company was founded in 1981 and is headquartered in Milwaukee, WI. (Source: FactSet)

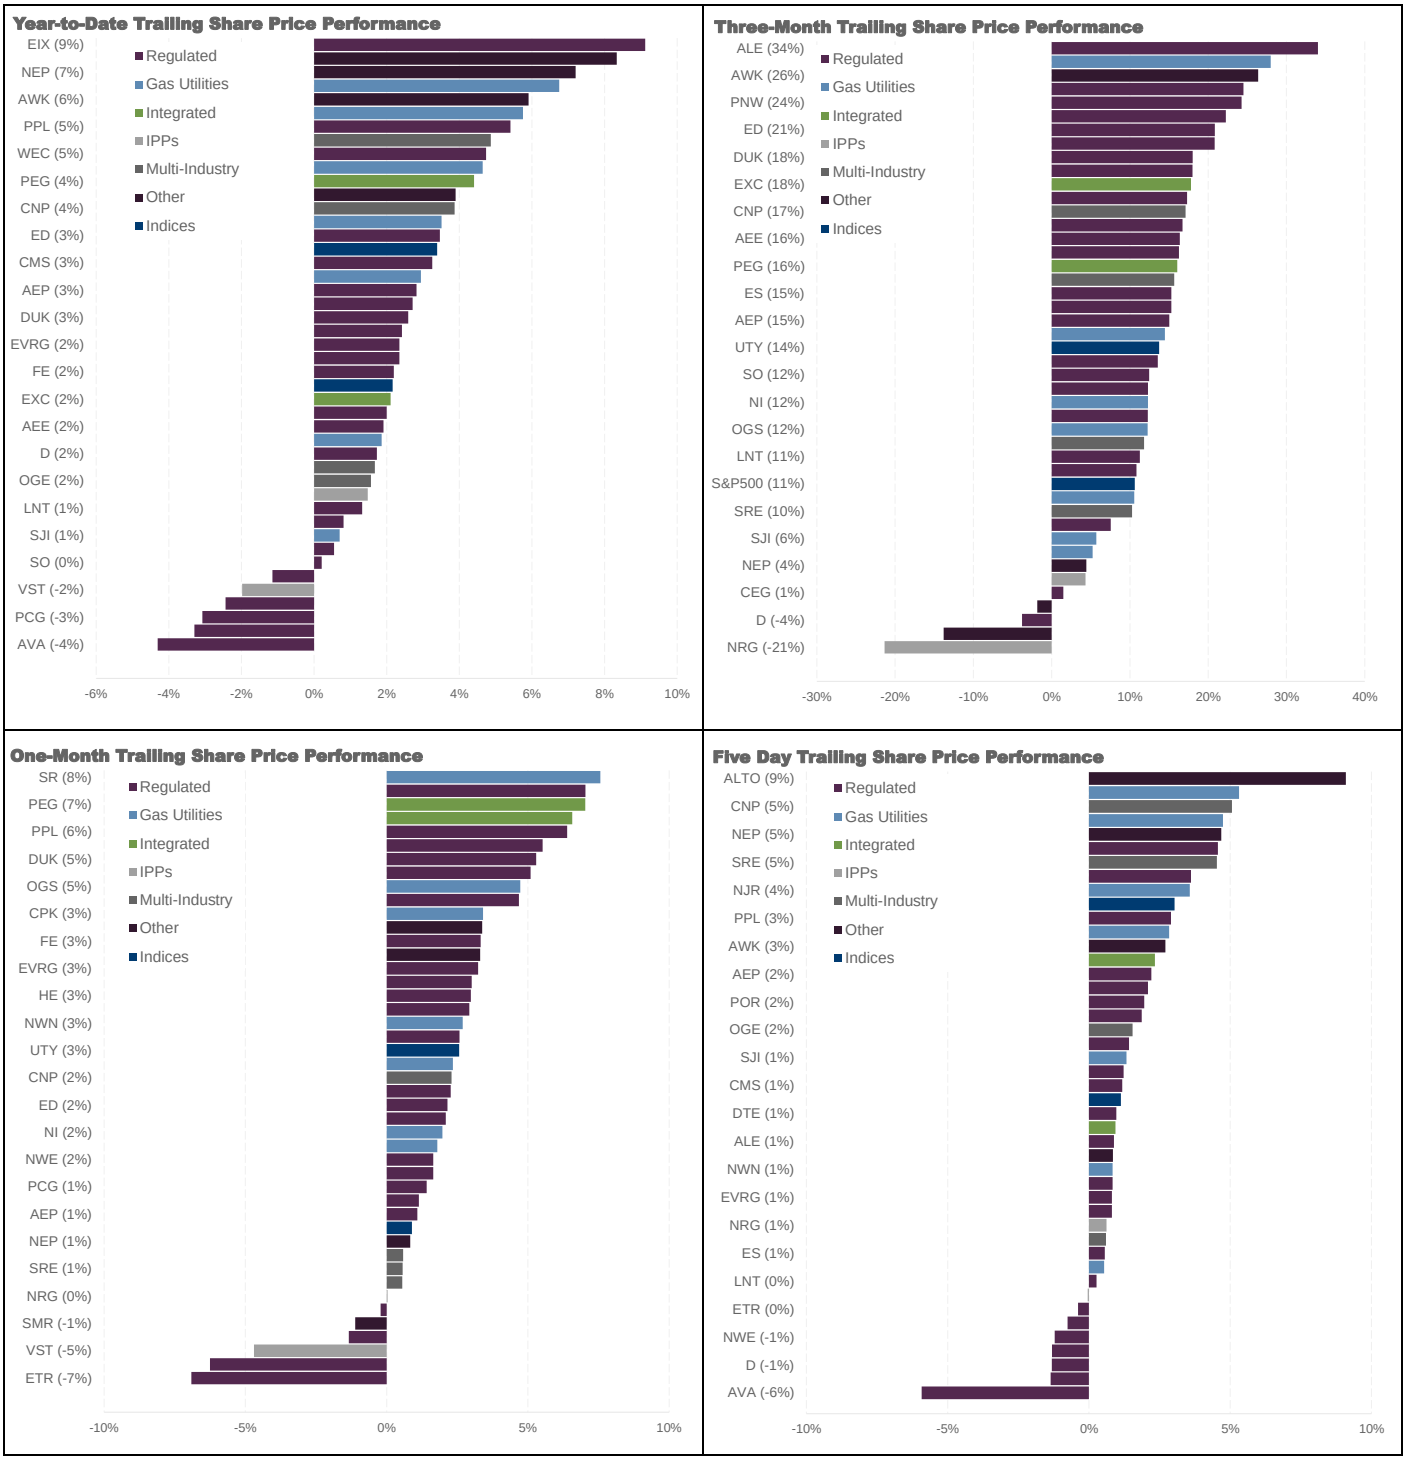
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.

BUY	232	67.25%	43	18.53%
NEUTRAL	110	31.88%	8	7.27%
SELL	3	0.87%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 14-Apr-2023 10:08 AM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

- **Dividend:** DPS growth to track EPS at 6%-7%
- Conference call will be at **9:00 AM ET.** The dial-in is **(877) 336-4440** and the conference ID is **8641604.**

ES reports 1Q23 earnings

- ES reported 1Q23 EPS of $1.41 vs Gugg/Cons $1.32/1.34
- Reaffirmed 2023 EPS guidance of $4.25-4.34
- Results were impacted by the seasonal impact of a peak demand rate design change

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

at NSTAR

- Results included a $0.03 benefit at the parent from a clean energy fund disposition
- Offshore wind sale process update expected 'this quarter'
- $500mm of construction spend on Sunrise/Revolution has shifted from 2023 to 2024/2025
- Cost lock increased by 2bps to 92%
- Slides HERE, call at 10am (833) 470-1428 Code: 641905

CPK – CPK reports 1Q23 EPS miss on weather; 2023 capex guidance reiterated

- CPK reported 1Q23 Non-GAAP EPS of $2.04 vs. $2.11 consensus and $2.09 Guggenheim estimate
- Weather impact vs. normal was -$0.29
- CPK reiterated 2023 capex guidance of $200 million to $230 million
- Short-term Debt balance down to $94M from $202M at year end; with $50M of interest rate swaps
- CPK reiterated 2025 EPS guidance of $6.15 - $6.35, representing an 8.5-9.0% CAGR
- Organic residential customer growth for CPK Delmarva and Florida natural gas distribution businesses were 5.8%and 4.4%, respectively

OGE – OGE reports 1Q23 EPS beat; 2023 guidance reiterated

- OGE reported 1Q23 Non-GAAP EPS of $0.19 vs. consensus of $0.18 and our $0.19 estimate
- OGE reiterated 2023 EPS guidance of $1.93 to $2.07 vs. a $2.01 consensus and our $2.02 estimate
- OGE reported ~1% customer growth despite weather driven sales declining year over year
- HDDs for the quarter were 1,692 vs. a 1,887 normal level or ~10% lower
- Presentation available later today and call scheduled for 9:00AM ET

PCG – PEG reports 1Q23 EPS in-line; 2023 guidance reiterated

- PCG reported 1Q23 Non-GAAP EPS of $0.29 vs. $0.29 consensus and Guggenheim estimate
- PCG reiterated 2023 EPS guidance of $1.19-$1.23 vs. a $1.22 consensus and Guggenheim estimate
- PCG reiterated 2025-2026 EPS growth of at least 9%
- No equity needs reiterated though 2024
- No change to O&M savings trajectory of 2% annually
- No change to capex plan of ~$52B with $5B upsides, ~9.5% rate base CAGR from 2022-2027 at the midpoint.

SRE – SRE reports 1Q23 EPS beat; 2023 guidance reiterated; 2024 guidance initiated implying 6.2% growth

- SRE reported 1Q23 Non-GAAP EPS of $2.92 vs. $2.77 consensus and $2.69 Guggenheim estimate
- SRE reiterated 2023 EPS guidance of $8.60 to $9.20
- SRE initiated 2024 EPS guidance range of $9.10 to $9.80 (implying 6.2% growth at the midpoint) vs. $9.57 consensus and $9.50 Guggenheim estimate
- SRE reiterated LT growth rate of 6-8%
- SRE updated the 5-year capital plan from $36B to $40B driven largely by a $4B at Oncor ($3.3B or 80% share for SRE) (rolling to 2023-2027)
- Resulting rate base CAGR of 9% though 2027
- SRE CA capex up from $21.2B to $21.4B; SRE infrastructure moving from $2.3 to $3.6B
- ECA I still on track for mid-2025 COD
- Port Arthur $13B capex project will be financed with $6.8B of non-recourse project-level debt and $6.2B of project-level equity (SRE targets 25% ownership level)
- Cameron Phase 2 has received modified FERC permits earlier this quarter; no FID yet

CEG reports 1Q23 earnings

- Reported 1Q23 EBITDA of $658M vs. Gugg/Cons of $720M/792M

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

- Labor and materials was $111M drag YoY
- Reaffirmed guidance range of $2,900M - $3,300M with expectation to be in the top half
- Repurchased $250M of shares in 1Q23
- December PJM storm benefit +$39M following invoice updates
- 2023 gross margin +$100, 2024 Gross margin flat
- 2024 GM now reflects a $100mm PTC benefit in 2024
- Total hedging for 2023 flat, 2024 up 1-4%
- Slides HERE
- Call at 10am – register HERE

NRG reports 1Q23 earnings

- **NJNG (gas LDC) bill headroom:** Announces bill credit and rate decrease for residential and small commercial customers following period of lower gas prices.
- **NJNG growth:** +4,064 new customers additions at NJNG YTD vs +3,579 during same YTD period in fiscal 2022
- Earnings call will be held today at **10:00 AM ET**… Dial-in: **(888) 440-5655**…Access code: **7422446**

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

PJM – BRA schedule delay proposals draw opposing views from stakeholders

- Generators remain in favor of PJM's proposal to delay the forthcoming auction in June, while state representatives and COUs are against further delays.
- More HERE.

Guggenheim takeaway: This procedural back and forth has been unfolding in the docket for some time now – in our view, the Commission will likely strike a middle ground closer to the IMM's proposal, with a delay coupled to firmer timelines.

FE – FirstEnergy reevaluating use of West Penn's Greensburg office with focus on real estate optimization

- More than two-thirds of West Penn Power Co.'s employees at its Greensburg HQ likely will be reassigned to other offices in the utility's service area in the next few years as the company reevaluates its use of the building, according to a company spokeswoman yesterday.
- More HERE

Guggenheim takeaway: Minor FYI regarding real estate optimization.

ERCOT – Summer SARA report points to ongoing constraints

- The ISO's latest seasonal assessment points to potential shortages in generation under high peak load/extreme unplanned outages/low wind scenarios.
- " ERCOT and thermal generation owners are closely monitoring the potential impacts of the U.S. Environmental Protection Agency's March 15th approval of its "Good Neighbor Plan" for reducing cross-state emissions of ozone-forming nitrogen oxides (NOx). Several generation owners in the ERCOT region indicated the potential that certain generators may face operational constraints in complying with the Program's provisions as soon as July 2023." - ERCOT
- More HERE

Guggenheim takeaway: The SARA report is intended to serve as final scenario test before each season's peak, and while the exact variables depicted in the analysis may or may not come to pass, it still paints a challenging picture for resource adequacy in the state at a time when lawmakers are considering more draconian action. We also continue to closely monitor the NOX rules from the EPA, with could impact larger emitters like VST's Martin Lake and NRG's WA Parish.

AWK – MO PSC approves settlement

- "On May 3, 2023, the MoPSC issued an order (the "Order") approving the March 3, 2023 joint "black box" settlement of the general rate case filed by Missouri American Water, a wholly owned subsidiary of American Water Works Company, Inc. (the "Company"). The Order approves a $44.3 million annualized increase in water and wastewater revenues, excluding $50.7 million in previously approved infrastructure surcharges. The new water and wastewater rates are expected to be effective by May 31, 2023." - AWK
- More HERE

Guggenheim takeaway: Minor heads up on the settlement approval.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

SAVE THE DATE

2nd Annual Guggenheim Georgia Field Trip: Southern Company (SO)/Georgia Power C-Suites, Porsche Racing & GA Commissioner Meetings

What does Southern Company & Georgia Power C-Suite meetings, Georgia Commissioner meetings and racing Porsches on race tracks have in common? Almost nothing! But we are combining all of them for an action-packed 2 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2023 — Atlanta, Georgia

Schedule

Tuesday, July 11th

We advise flying in the morning of Tuesday, July 11. Recommended flights to follow.

~1:00 PM | Georgia PSC Meetings
Tricia Pridemore, PSC Chair, *Commissioner*
Tim Echols, Vice-Chairman, *Commissioner*
Fitz Johnson, *Commissioner*
Lauren "Bubba" McDonald, *Commissioner*
Jason Shaw, *Commissioner*

~6:00 PM | Client Dinner with Southern Company (SO) C-Suite
Chris Womack, *President & Chief Executive Officer (Incoming)*
Dan Tucker, *Chief Financial Officer*
Scott Gammill, *VP of Investor Relations & Treasurer*
Among others

Wednesday, July 12th

8:30 AM | Porsche Racing Experience
Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

1:00 PM | Lunch with Southern Company (SO) and Georgia Power C-Suite
Kim Greene, *Chair, President & Chief Executive Officer (Georgia Power)*
Dan Tucker, *Chief Financial Officer (SO)*
Aaron Abramovitz, *Chief Financial Officer (Georgia Power)*
Among others

Company Information

Market Cap: $73.3bn

Southern Co (SO) is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, and Tennessee. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA. (Source: FactSet)

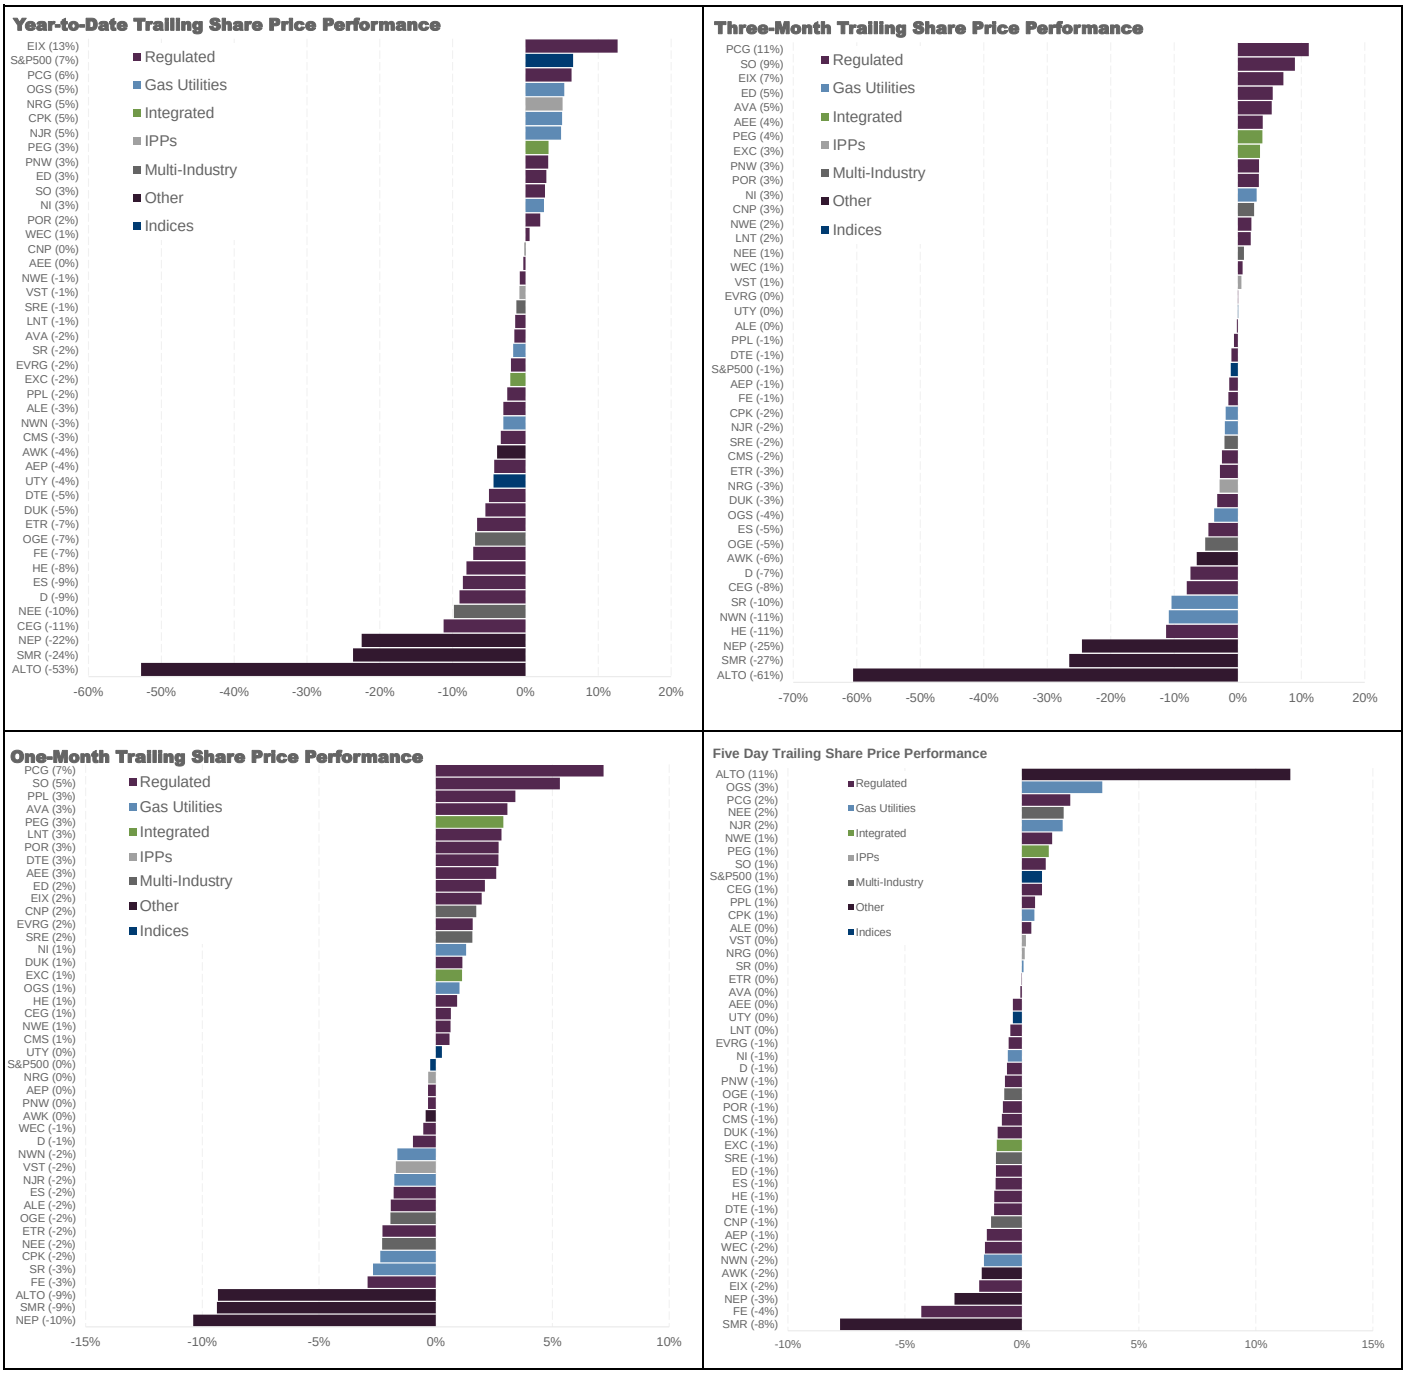
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

The Wolfe Byte

EXC reported a modest Q1 beat but affirmed FY23 guidance. EXC has a busy regulatory year, with key multiyear rate plans under review. But after these cases, EXC will have 3-4 yrs of certainty to deliver on its 6-8% EPS growth. We see EXC trading >1x higher than current P/E.

Q1 beat but guidance and EPS growth affirmed; raise PT to $47. EXC's Q1 of $0.70 beat by $0.04 but FY23 guidance of $2.30-2.42 was affirmed. The stock traded in line with the UTY but is beating it by 230bp YTD. EXC still trades at a 0.7x discount to peers on 2025E. We think a 0.5x premium is reasonable this busy regulatory year, given EXC is a mostly decoupled T&D utility with above-avg RB/EPS growth. If its key rate cases go well, we think EXC could trade closer to the high-quality, low-risk utilities that are at 1.5-2.0x premiums. We raise our PT by $2 on our higher group P/E of 16.5x 2025 vs 16.0x in previous EXC note.

Busy regulatory calendar; ComEd and BG&E cases key. EXC has rate cases in most of its jurisdictions. ComEd's first 4-yr rate case in IL and BG&E's second MYP/reconciliation case in MD are the largest, given ComEd distribution is ~25-30% of RB and BG&E is ~15-20%. In IL, intervenor testimony is on 5/22 and a decision by 12/20. ROE is expected to be one contested item, but the ICC has authorized gas utilities 9.6-9.8% ROEs in recent years, and the ICC Staff just this week recommended 9.9% for Nicor Gas. ComEd can also earn up to 32bp ROE incentives. In MD, intervenor testimony is on 6/20 and decision by 12/14.

MD law, transmission, electrification tailwind to LT plan. EXC has previously noted about $2B of capex (roughly half transmission) that was left out of its $31B capital plan. That was before the recently enacted POWER Act in MD, which could present opportunities post 2025. EXC still sees IRA facilitating electrification in its states.

Still sees 13-14% FFO/D irrespective of repairs deduction treatment. EXC repeated that its FFO/Debt target of 13-14% in 2023-26 assumes a $200M cash hit from the AMT. If the IRS allows the repairs & maintenance deduction to be treated like accelerated D&A, then EXC's FFO/D is closer to 14%. But if not, then closer to 13%. EXC's credit downgrade threshold is 12%. EXC's equity needs are unchanged at $425M by 2025.

ESTIMATES

($)	2023E	2024E	2025E

WOLFE RESEARCH

May 3, 2023

Investment Conclusion

We believe EXC is a low-risk utility stock. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%, driven by ~8% rate base growth. We think the stock hit last year on IRA and nonlinear EPS growth was overdone. We think the messaging and conviction on its LT outlook will be well-received. And we see the stock over time trading in line with the low-risk, high-quality utilities. This year, focus will be on a first multiyear rate case in IL, as well as a second multiyear filing in MD and reconciliations of the first MD/BGE multiyear case. Those are expected to add more certainty to an otherwise low-risk utility story.

Valuation

Our $47PT is based on a half-turn premium to our utility group P/E of 16.5x 2025E.

Relative stock performance and Comps

As shown in Exhibit 1, EXC has been in a trading range relative to peers, as investors await regulatory outcomes in most of EXC's jurisdictions. EXC trades at more than a half-turn discount to regulated peers on 2025E; see Exhibit 2.

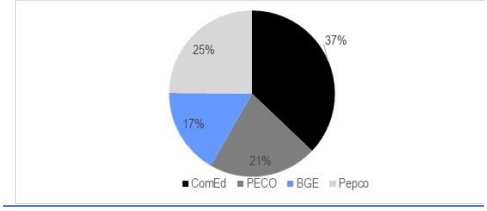
Exhibit 5: 2024 EPS by Subsidiary



Source: Wolfe Utilities & Power Research

Company Description

Chicago-based EXC is a large T&D (wires-only) regulated utility company, providing mostly electric service to roughly 10 million customers in the Mid-Atlantic and northern IL. It has no coal or other generation. ComEd serves northern IL and is EXC's largest utility sub, representing ~40% of rate base. Pepco serves DC, DE, MD and southern NJ and represents 25% of rate base. PECO, which serves southeastern PA, and BGE, which serves Baltimore, each represent nearly 20% of rate base. A little over 90% of EXC's total rate base is electric, with the rest gas LDC.

Investment Thesis

We believe EXC is a low-risk utility stock with above average EPS growth. It is a mostly electric T&D utility with no coal, constructive regulation in most of its jurisdictions, flexible B/S, and LT EPS growth of 6-8%.

Valuation

Our $47 PT is based on a half-turn premium to our utility group average P/E of 16.5x 2025E. Risks are less capex, lower returns, less cash or more equity needs, and unfavorable regulatory outcomes.

Wolfe Research, LLC Fundamental Stock Ratings Key:

Please help us protect your advantage...
DO NOT FORWARD

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

Outperform (OP):	The security is projected to outperform analyst's industry coverage universe over the next 12 months.
Peer Perform (PP):	The security is projected to perform approximately in line with analyst's industry coverage universe over the next 12 months.
Underperform (UP):	The security is projected to underperform analyst's industry coverage universe over the next 12 months.

Effective August 1, 2022, Wolfe Research, LLC will no longer publish target prices for Peer Perform rated companies.

Wolfe Research, LLC uses a relative rating system using terms such as Outperform, Peer Perform and Underperform (see definitions above). Please carefully read the definitions of all ratings used in Wolfe Research, LLC research. In addition, since Wolfe Research, LLC research contains more complete information concerning the analyst's views, please carefully read Wolfe Research, LLC research in its entirety and not infer the contents from the ratings alone. In all cases, ratings (or research) should not be used or relied upon as investment advice and any investment decisions should be based upon individual circumstances and other considerations.

Wolfe Research, LLC Industry Weighting System:

Market Overweight (MO):	Expect the industry to outperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.
Market Weight (MW):	Expect the industry to perform approximately in line with the primary market index for the region (S&P 500 in the U.S.) over the next 12 months.
Market Underweight (MU):	Expect the industry to underperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.

Wolfe Research, LLC Distribution of Fundamental Stock Ratings (As of May 3, 2023):

Outperform:	44%	5% Investment Banking Clients within the previous 12 months
Peer Perform:	46%	1% Investment Banking Clients within the previous 12 months
Underperform:	10%	0% Investment Banking Clients within the previous 12 months

Wolfe Research, LLC does not assign ratings of Buy, Hold or Sell to the stocks it covers. Outperform, Peer Perform and Underperform are not the respective equivalents of Buy, Hold and Sell but represent relative weightings as defined above. To satisfy regulatory requirements, Outperform has been designated to correspond with Buy, Peer Perform has been designated to correspond with Hold and Underperform has been designated to correspond with Sell.

Wolfe Research Securities and Wolfe Research, LLC have adopted the use of Wolfe Research and The Wolfe Daily Howl as brand names. Wolfe Research Securities, a member of FINRA (www.finra.org) and the National Futures Association, is the broker-dealer affiliate of Wolfe Research, LLC. Investment Thesis, Valuation and Risks

Exelon Corporation (EXC)

Investment Thesis

Our Equal Weight rating reflects our view that the current share price adequately reflects EXC's risk/reward proposition. Positive attributes including a healthy projected EPS CAGR (7%) and wires-centric asset mix are balanced by modest balance sheet concerns and our view that the company's regulatory jurisdictions are average to below average.

Target Price Valuation for EXC: $45.00 from NC

Our $45/sh price target is based on a P/E multiple analysis. We apply a P/E of 17.5-18.0X to our 24E EPS of $2.50. Our multiple represents a 0-5% discount to the '23 Regulated Electric peer group median of 18.0-18.5X as we balance positive features (strong 7% EPS CAGR and predominantly electric wires strategy) with our perception that EXC's regulatory jurisdictions are average to below average. We apply the '23 median to our 24E EPS due to the forward-looking nature of our price target.

Risks to Our Price Target and Rating for EXC

Risks to our thesis include favorable/unfavorable regulatory developments (upside/downside) and greater-than-expected ESG appetite for a wires-centric company (upside).

Required Disclosures

I, Neil Kalton, certify that:
1) All views expressed in this research report accurately reflect my personal views about any and all of the subject securities or issuers discussed; and

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Important Disclosure for International Clients

United Kingdom – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the United Kingdom, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a UK incorporated investment firm authorised and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 (the "Act"), the content of this report has been approved by WFSIL, an authorised person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients. For the purposes of the U.K. Financial Conduct Authority's rules, this report constitutes impartial investment research.

EEA – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by WFSIL or Wells Fargo Securities Europe S.A. ("WFSE"). WFSE is a French incorporated investment firm authorized and regulated by the Autorité de contrôle prudentiel et de résolution and the Autorité des marchés financiers. WFSE does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). This report is not intended for, and should not be relied upon by, retail clients.

Australia – Wells Fargo Securities, LLC and Wells Fargo Securities International Limited are exempt from the requirements to hold an Australian financial services license in respect of the financial services they provide to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under the laws of the United States and Wells Fargo Securities International Limited is regulated under laws of the United Kingdom. All such laws differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC or Wells Fargo Securities International Limited in the course of providing the financial services will be prepared in accordance with the laws of the United States or United Kingdom and not Australian laws.

Canada – This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

China – Strictly Private and Confidential. For the sole use of the recipient only. Not to be copied or redistributed within the People's Republic of China.

Brazil - This report was not created for distribution to investors resident in Brazil or to the Brazilian public in general. Wells Fargo Securities, LLC is a broker-dealer registered in United States of America with and regulated by the U.S. Securities and Exchange Commission. Wells Fargo Securities, LLC is not registered in Brazil and its products, including this report and the securities mentioned in this report, have not been and will not be publicly issued, placed, distributed, offered or negotiated in the Brazilian capital markets, and, as a result, have not been and will not be registered with the Brazilian Securities Commission (Comissão de Valores Mobiliários, the CVM). The offer of Wells Fargo Securities, LLC's products, including this report and any securities mentioned in this report, is intended only for residents in the countries in which Wells Fargo Securities, LLC is authorized to operate.

About Wells Fargo Securities

Wells Fargo Securities is the trade name for the capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including but not limited to Wells Fargo Securities, LLC, a U.S. broker-dealer registered with the U.S. Securities and Exchange Commission and a member of NYSE, FINRA, NFA and SIPC, Wells Fargo Prime Services, LLC, a member of FINRA, NFA and SIPC, Wells Fargo Securities Canada, Ltd., a member of IIROC and CIPF, Wells Fargo Bank, N.A. and Wells Fargo Securities International Limited, authorized and regulated by the Financial Conduct Authority.

Midweek Thoughts — D, SO, NWE, AEP, EXC, FE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

Earlier this week, WEC, OTTR, PEG, EIX, EXC, and AVA reported 1Q23 results. AEP, ES, CEG, PNW, SRE, ED, AEE, and D are scheduled to report later this week. In other news, VEPCO makes a filing with the SCC identifying the riders that it will cease to recover; D files an IRP with the VA SCC; ICC Staff files testimony in SO's Nicor Gas rate case; VA Staff files testimony in SO's Virginia natural gas rate case; SO completes hot functional testing at Vogtle Unit 4; the MT Legislature passes a bill with new environmental review rules; a consulting firm recommends a $203M disallowance in AEP's annual ENEC proceedings; and the PA governor appoints a new commissioner to the PUC.

KBCM Invites You to Join Us at the AGA Financial Forum on May 22-23 in Ft. Lauderdale, FL.
Scroll down for a full schedule of our meetings.

Upcoming Earnings Reports
AEP, ES, CEG, PNW, and **SRE** report BMO tomorrow (Thursday), followed by **ED** after-market. **AEE** and **D** report BMO Friday. Our recently published 1Q23 Preview includes our thesis, expectations, and estimates for our coverage. Earlier this week, **WEC**, **OTTR, PEG, EIX, EXC,** and **AVA** reported earnings. Please scroll down for our takeaway.

Industry News and News from Companies in Our Coverage
D - VEPCO makes a filing with the SCC identifying the riders that it will cease to recover: As mandated by the recently passed legislation, D made a selection of three riders that cover the costs of natural gas Bear Garden and Warren County power stations and the biomass- and coal-fueled Virginia City Hybrid Energy Center, as ones that it will retire. These include Rider R ($55M), Rider S ($191M), and Rider W ($105M). D will combine the recovery of these with base rates and offer a combined $351M in customer rate reduction. We expect that these changes will go into effect on July 1.

D - VEPCO makes an IRP filing, following an "all of the above" approach to generation sources: The 2023 IRP covers the 15-year period starting in 2024-2038 using 2023 as the base year. The 25-year planning period extends to 2048. The plan takes into account PJM-projected annual peak and energy load growth of 5% and 7%, respectively, over the next decade - driven primarily by data centers and less so by electrification trends. Overall, D is projecting the addition of ~20 GW of resources in the 15-year period and ~32 GW (net of retirements) in the 25-year period. D has taken into account the provisions of the IRA and the IIJA in its planning.

- Plan A is offered for information only, and while it meets the RPS requirements of the VCEA, it does not meet the renewables targets mandated in the VCEA.
- Plans B through E are largely similar in the 15-year scenario with the difference being in the case of Plans D and E where lower natural gas generation build is offset by higher nuclear SMR generation capacity to maintain grid reliability through dispatchable resources.
- In the 25-year study period, there is additional solar across all scenarios and accompanying energy storage to balance the intermittency of solar. The 25-year study period also includes meaningfully more nuclear SMRs, especially in Plans D and E where ~11.4 GW of fossil retirements are scheduled.
- All plans assume that D will retire Yorktown 3 (1 GW) and Chesterfield (800 MW) in mid-2023 and will exit the RGGI before YE. Certain biomass units that were scheduled to be retired will remain in service through the 15-year planning period (based on legislation that permits them to do so as long as they are not co-fired with coal).
- The resource additions quoted are net of the 2.6 GW of offshore wind already approved. Plans D and E are designed to get to zero CO_2 emissions by 2048. The plan also assumes that D will seek 20-year extensions for the North Anna nuclear plant (~2 GW).
- SMRs take a meaningful seat at the table, not a surprise given the governor's favorable views toward nuclear power. D outlines the key benefits of SMRs over traditional nuclear including passive safety systems, modular fabrication, scalability as well as dispatch-ability. D plans to watch as costs for SMRs potentially decline with acceleration in acceptance and will adjust cost assumptions over time. It is also conceivable that D further accelerates the deployment of SMRs vs. the plan.

- While not part of the scenarios laid out, D plans to investigate new and emerging technologies including hydrogen as a fuel and as energy storage, CCS, EV as a resource (vehicle to grid technology), RNG, LDES, carbon offsets, direct air capture technology, nuclear fusion, and others.
- The plan has won early praise from the governor who issued a statement endorsing D's "all of the above" approach and the cautious approach towards meeting grid reliability by delaying certain scheduled retirements.

Source: Regulatory Filings, KBCM

SO — Staff files testimony in SO's Nicor Gas rate case: IL ICC Staff proposed a $256M revenue increase, premised on a 9.89% ROE, 50% equity, and a 2024 year-end test year. This compares to SO's Nicor Gas request for a $321M revenue increase, premised on a 10.35% ROE and 54.5% equity. The main drivers of the difference are the lower ROE and equity layer and Staff's recommendation to remove incentive compensation based on financial metrics. Staff also recommended denial of Nicor's three proposed riders – Company-use gas cost recovery, vehicle fuel cost recovery, and customer payment fee rider. SO will file rebuttal testimony on May 31; an ICC decision is due by November 28. In its 2021 rate case, SO received a $240M revenue increase, using a 9.75% ROE and 54.46% equity.

SO — Staff files testimony in SO's Virginia natural gas rate case: VA SCC Staff proposed a $24M revenue increase, premised on a 9.5% ROE and 47.05% equity. This compares to the attorney general's office recommendation for a $31M revenue increase and SO's $69M revenue increase request. In addition to the lower ROE and equity layer, the main differences between the Staff and SO's recommendations are the period used for calculating rate base and jurisdictional allocation factors. SO's calculation was premised on a 10.35% ROE and 53.2% equity. Interim rates of $69M went into effect on January 1. Hearings are scheduled to begin June 12, likely followed by an SCC decision in 3Q23.

SO — Hot functional testing completed at Vogtle Unit 4: SO's GP completed hot functional testing on Vogtle Unit 4. HFT was the last series of major tests ahead of fuel load and is critical in verifying the successful operation of reactor components and systems together. SO will now focus on completing the ITAAC process and final preparations before the fuel load in July 2023. SO had 136 ITAAC outstanding as of the 1Q23 earnings call but expects the process to ramp up and be completed by October. As a reminder, SO can seek a prudence review for all costs exceeding $7.3B once fuel load begins at Unit 4. The prudence review will take roughly six months. SO expects Unit 4 to enter service in late 4Q23 or 1Q24, in line with the previous expectation.

NWE — MT Legislature passes bill with new environmental review rules: MT Legislature passed HB 971 and it now awaits the governor's signature. The bill prohibits MT environmental reviews from considering GHG or climate impacts unless the U.S. Congress amends the Clean Air Act. The bill is a likely response to an MT judge revoking the MT DEQ's air quality permit for the gas-powered 175 MW Yellowstone County Generating Station. The judge found that the environmental assessment lacked the required analysis regarding lighting from the plant and GHG emissions and ordered a halt to construction. NWE began construction in April 2022 and expects the plant to enter service YE24. It would appear that if the bill becomes law, it will get challenged in federal courts (similar to the bills related to extending the life of Colstrip that were signed into law in 2021 by the current governor but were later invalidated by a federal judge). NWE will need a new permit that completes the required analysis regarding lighting from the plant. NWE has filed a motion to stay the court's order and has filed an appeal with the MT Supreme Court.

AEP — Consulting firm issues report recommending $203M disallowance in AEP's annual ENEC proceedings: Critical Technologies Consulting issued a report recommending the WV PSC disallow AEP's Wheeling Power and Appalachian Power Co. the recovery of $203M associated with its Expanded Net Energy Cost filing for the 2020-2021 and 2021-2022 periods. The report finds that AEP plants achieved a 32.5% capacity factor, or ~47% of the target of 69%; accordingly, AEP should only be allowed to recover 47% of the $430M of under-recovery or ~$203M should be disallowed. The prudency review is specific to three WV coal plants, the 2,930 MW Amos plant, the 1,560 MW Mitchel plant, and the 1,330 MW Mountaineer plant. The PSC ordered the prudency review in May 2022 after AEP failed to meet the annual capacity factor during the 2020-2021 period. The PSC also deferred any rate increase until the Staff completes the prudence review. The ENEC is an annual rate adjustment mechanism allowing Wheeling and APCo to recover fuel, purchased power, and environmental compliance costs. AEP filed the 2023 ENEC, requesting recovery of ~$642M, including the accumulated under-recovered balance of ~$553M through February 2023, and $89M of increased projects cost for the forecast period from September 2023 through August 2024. AEP proposed two alternate mechanisms to recover the costs and reduce customer bill impacts. AEP also noted that it could not buy more coal during the 2020-2021 and 2021-2022 ENEC periods because supplies were scarce, resulting in a lower capacity factor.

EXC, FE — PA governor appoints new commissioner to the PUC: PA Governor Josh Shapiro appointed Kimberly Barrow to a five-year term at the PA PUC. Ms. Barrow replaces Commissioner Gladys Dutrieuille, who served as Chief of Staff for several years. The Senate must confirm the governor's appointees. Upon confirmation, Barrow will join Commissioners Stephen DeFrank, Katie Zerfuss, John Coleman, and Ralph Yanora. Since Commissioner Dutrieuille was the Chair of the PUC, the governor must also appoint one of the five commissioners as the Chairperson. In PA, we are currently tracking the FE's PA reorganization. We expect FE to file a rate case in 1Q24.

Earnings Recap

AVA — AVA reported 1Q results well below consensus, but in line with Company expectations, as the Company attributed the miss to a shift in timing in earnings cadence in 2023. As a result, the Company maintained its 2023 EPS guidance across its segments, including maintaining a $0.03 full-year benefit from the ERM after power costs drove an $0.08 negative impact in 1Q23. While AVA's near-term guidance remains intact, the Company will continue to experience regulatory lag over the next two years without significant relief until 2025. Read our full report here.

EXC — EXC delivered better than expected 1Q23 results and reiterated 2023 guidance and the long-term EPS CAGR of 6-8%. Management is methodically tackling rate filings in multiple jurisdictions - especially IL's first MYRP at ComEd. Overall, there appear to be significant investment opportunities across its service territories, lending support to the 6-8% targeted growth rate. While the weather was a drag at PECO during the 1Q, management expects to offset the negative impact through O&M management, and we do not see it as a risk to the full-year outlook. Read our full report here.

EIX — EIX reported better than expected 1Q results and reiterated guidance for 2023 and through 2025. Longer-dated guidance will come with 2Q earnings as the Company incorporates the impending GRC and associated capex into the long-term plan. Overall, we sense cautious optimism that the Company is turning the corner from the 2017/2018 wildfire and mudslide events as it prepares for a cost recovery filing and begins to think of long-term investments in grid enhancements to accommodate growing electrification demand and associated load growth (which could be 2% annually for more than a decade). Wildfire mitigation investments are yielding results, and we still expect them to be a prominent part of ongoing capex. Read our full report here.

OTTR — OTTR reported EPS of $1.49 vs. our estimate of $0.97 and consensus of $1.01. The momentum in the Plastics and Manufacturing segments continued into 1Q, resulting in the 1Q beat and an increase to 2023 guidance. OTTR expects to see a step-down in profitability in Plastics in 2H23, as sales prices recede. OTTR will remain levered toward the manufacturing segment in 2023, but maintained its long-term earnings mix, with expectations of reaching the desired levels in 2024. OTTR also raised its capital plan to incorporate the supplemental IRP filing and is considering a late-2023 ND GRC filing. OTTR maintained its long-term growth rate of 5-7%. Read our full report here.

PEG — PEG reported an above-consensus quarter and reiterated full-year guidance of $3.40-$3.50 (~flat vs. 2022 due to pension-related headwinds). PSE&G results were in line and with decoupling in place, results were not negatively impacted despite record warmth in 1Q. There is no change in the 2023 EPS guidance, which was reiterated at the March analyst day. Capex plans are intact with the potential for $3B-$7B in potential upside over the next decade as NJ clean energy transition plans come into focus, and possibly some upside from the offshore wind transmission build-out as well. With pension-related headwinds incorporated into the EPS outlook, we see the rate case filing toward the end of the year as the next data point to watch. Read our full report here.

WEC — WEC reported 1Q EPS above guidance, but in line with consensus, as anticipated headwinds (O&M, interest) were compounded with mild weather. WEC provided below-Street 2Q guidance but expects a material improvement in the back half of the year and, therefore, felt confident in maintaining the 2023 outlook and the 6.5-7% long-term EPS growth rate. WEC continues to invest heavily in renewables with $5.4B included in its five-year plan, but solar panel availability has yet to be remedied and has the Company exploring alternative options for future projects. Read our full report here.

Exelon

BMO Capital Markets

EXC-NSDQ	Rating	Price: May-3	Target	Total Rtn
	Outperform	$42.33	$46.00	12%

"EXC"-ecuting the Plan – 1Q23 Beat

Bottom Line:

EXC reported 1Q23 EPS of $0.70 versus our $0.67 estimate and $0.66 for consensus. Year-over-year results increased by +$0.06. **Management reaffirmed its 2023 guidance of $2.30-2.42 versus $2.36 BMO/consensus estimates as well as its expectation of reaching 9-10% earned returns by year-end**. Longer term, the company also reaffirmed its 2021-2025 and 2022-2026 EPS CAGRs of 6-8%, with an expectation of being at the midpoint or better. **We reiterate our Outperform rating and our recently updated target price of $46.**

Key Points

Management reaffirmed its 2023 guidance of $2.30-2.42 versus $2.36 BMO/ consensus estimates as well as its expectation of reaching 9-10% earned returns by year-end. Longer term, the company also reaffirmed its 2021-2025 and 2022-2026 EPS CAGRs of 6-8%, with an expectation of being at the midpoint or better. The company continues to see the payout ratio of ~60% allowing the dividend to grow in line with earnings. Management expects the remaining $425mm of equity issuance to be completed by 2025.

Furthermore, it continues to expect credit metrics in the 13-14% over the forecast period, providing 100-200bps of cushion to its 12% downgrade threshold. Looking at 2023, the company has managed incremental interest rate risk by already completing 80% of its planned issuances. Short-term debt balances totaled ~$1bn with $500mm at the Parent.

The regulatory calendar remains busy with several ongoing cases. **The ComEd case remains the focal point for most investors with intervenor testimony due on 5/18/23, evidentiary hearings in late August, and an order by the end of the year.** During the quarter, the company filed rate cases in MD and NJ.

EXC's headline beat to start the year included a mix of one-time benefits in favorable comps from CMC carrying costs that helped offset non-recurring headwinds in the form of mild weather. With the addition of cost control and some timing considerations, management's plan is on track, and it reaffirmed its 2023 guidance of $2.30-2.42. **Shares of EXC trade at a 3-4% discount to the group which we believe offers significant risk-adjusted value for its low-risk T&D investment strategy. Accordingly, EXC remains an anchor on the GARP side of our BMO Barbell, and we reiterate our Outperform rating.** In the near-term, additional multiple expansion is likely to be tied to successful navigation of the regulatory calendar.

For disclosure statements, including the Analyst Certification, please refer to page(s) 6 to 9.

Notes : Prior numbers reflect our pre-spin estimates

Our Thesis

We see EXC's multiple re-rating post spin as a gradual 12-18-month process driven by the company executing against its capital and regulatory plans. We believe the company's low-risk T&D business profile, strong and visible fundamental growth outlook, and supportive regulatory environment position the company well to drive multiple expansion.

Source: BMO Capital Markets, Company Reports

Scenarios

Valuation

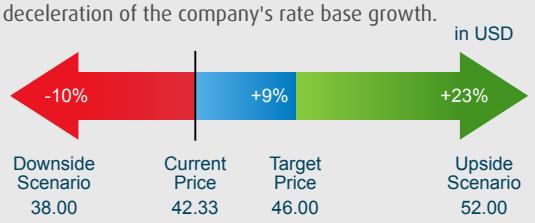
We value EXC on a sum-of-the-parts valuation. Our framework begins with the relevant sector average P/E multiple using 2025E EPS as a base, which we then adjust (premium, discount, or no change) to reflect the relative fundamentals for each segment.

Upside Scenario $52.00

Our upside scenario reflects continued multiple expansion associated with the execution of the company's current ComEd MYRP which should crystalize the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $38.00

Our downside scenario reflects a tightening monetary policy, suboptimal regulatory outcomes that lead to a deceleration of the company's rate base growth.



Key Catalysts

We see EXC management now in execution mode post its separation from Constellation Energy. With nearly 75% of the company's revenues decoupled from volumes and 100% of its capital covered through alternative recovery mechanisms, we see EXC achieving our target price over the next 12-18-months as management executes against its capital and regulatory plans.

Company Description

Exelon is the largest utility by customer count with over 10mm electric and natural gas customers spread across its six-state footprint. It is the fourth largest utility by rate base with one of the lowest business risk and ESG-friendly profiles given the company's pure T&D asset mix with electric distribution and transmission representing over 88% of rate base.

Executing the Plan – 1Q23 Beat

Bottom Line: EXC's headline beat to start the year included a mix of one-time benefits in favorable comps from CMC carrying costs that helped offset non-recurring headwinds in the form of mild weather. With the addition of cost control and some timing considerations, management's plan remains on track, and it reaffirmed its 2023 guidance of $2.30-2.42. **Shares of EXC trade at a 3-4% discount to the group, which we believe offers significant risk-adjusted value for its low-risk T&D investment strategy. Accordingly, EXC remains an anchor on the GARP side of our BMO Barbell, and we reiterate our Outperform rating.** In the near term, additional multiple expansion is likely to be tied to successful navigation of the regulatory calendar. Our recently updated target price remains $46.

EXC reported 1Q23 EPS of $0.70 versus our $0.67 estimate and $0.66 for consensus. Year-over-year results increased by +$0.06 with ComEd adding +$0.05 (+$0.04 distribution rates and +$0.01 CMC carrying costs), PHI adding +$0.03, and Corporate adding +$0.02 (includes +$0.02 tax benefit to reverse in year) that was partially offset by a ($0.04) headwind at PECO. The company faced ($0.05) of weather headwind year-over-year composed of ($0.04) at PECO and ($0.01) at PHI. Looking ahead to the rest of the year, management expects to offset the weather with cost control, favorable depreciation at PECO, and the full year benefit from the CMC carrying costs (+$0.03).

Accordingly, management reaffirmed its 2023 guidance of $2.30-2.42 versus $2.36 BMO/consensus estimates as well as its expectation of reaching 9-10% earned returns by year-end. Longer term, the company also reaffirmed their 2021-2025 and 2022-2026 EPS CAGRs of 6-8% with an expectation of being at the midpoint or better. The company continues to see the payout ratio of ~60% allowing the dividend to grow in-line with earnings. Management expects the remaining $425 million of equity issuance to be completed by 2025.

Furthermore, the company continues to expect credit metrics in the 13-14% over the forecast period, providing 100-200bps of cushion to its 12% downgrade threshold. Looking at 2023, the company has managed incremental interest rate risk by already completing 80% of its planned issuances. Short-term debt balances totaled ~$1 billion with $500 million at the parent.

The regulatory calendar remains busy with several on-going cases. **The ComEd case remains the focal point for most investors with intervenor testimony due on 5/18/23, evidentiary hearings in late August, and an order by the end of the year.** During the quarter, the company filed rate cases in MD and NJ. At ACE, the company requested a 10.5% ROE and expects an order in 1Q24, though it will be eligible to implement interim rates subject to refund on November 17. For BGE in MD, the company is undergoing its second multi-year plan that covers years 2024-2026. The company expects an order in December of 2023. In DC, the company's PEPCO subsidiary also recently filed a 2024-2026 multi-year plan to cover its climate-ready pathway multi-year plan.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in Exelon in United States.

Methodology and Risks to Target Price/Valuation for Exelon (EXC-NSDQ)

Methodology: We value EXC using our sum-of-the-parts valuation analysis to derive our target price. Our valuation takes into account the quality of EXC's assets relative to its peers and the company's regulated business rate base growth and funding sources.

Risks: Adverse outcomes in the company's inaugural MYRP filing in IL, DE electric rate case and 2025 PECO electric GRC. Despite having nearly a 1% cushion over its 12% downgrade threshold, the ability to meet its stated credit metrics given adverse impacts from severe storms, fuel deferrals and other unforeseen expenses.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any

errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited and Bank of Montreal are exempt from the requirement to hold an Australian financial services licence under the Corporations Act in respect of financial services they provide to wholesale investors (as defined in the Corporations Act). BMO Capital Markets Limited is regulated by the UK Financial Conduct Authority under UK laws, and Bank of Montreal in Hong Kong is regulated by the Hong Kong Monetary Authority and the Securities and Futures Commission, which differ from Australia laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001), Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II) and Professional Investors (as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce or Raj Ray:

This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Hong Kong Residents: In Hong Kong, this report is published and distributed by Bank of Montreal. Bank of Montreal (incorporated in Canada with limited liability) is an authorized institution under the Banking Ordinance and a registered institution with the Securities and Futures Commission (CE No. AAK809) to carry on Type 1 (dealing in securities) and Type 4 (advising in securities) regulated activities under the Securities and Futures Ordinance (Cap 571 of the Laws of Hong Kong). This report has not been reviewed or approved by any regulatory authority in Hong Kong. Accordingly this report must not be issued, circulated or distributed in Hong Kong other than (a) to professional investors as defined in the Securities and Futures Ordinance and the Securities and Futures (Professional Investor) Rules under the Securities and Futures Ordinance of Hong Kong, or (b) in circumstances which do not result in or constitute an offer to the public in Hong Kong.

To Korean Residents: This report has been provided to you without charge for your convenience only. All information contained in this report is factual information and does not reflect any opinion or judgement of BMO Capital Markets. The information contained in this report should not be construed as offer, marketing, solicitation or investment advice with respect to financial investment products in this report.

To Japan Residents: This report has not been reviewed by any regulatory authority in Japan. This report is provided for information purposes only and it should not be construed as an offer to sell, a solicitation to buy, or a recommendation for any security, or as an offer to provide investment management or advisory or other services in Japan. Securities may not be offered or sold in Japan by means of this report or any other document other than to Qualified Financial Institutions within the meaning of item (i) of Article 17-3 of the Government Ordinance to enforce the Financial Instruments and Exchange Act (Kinyu Shohin Torihiki Ho Sekou Rei). Unless specified otherwise, the securities that may be offered to you are not and will not be registered in Japan pursuant to the Financial Instruments and Exchange Acts.

To Taiwanese Residents: This report is not intended to constitute investment advice nor a public offer for any investment products to investors in Taiwan. This report should only be accessed by investors in Taiwan that are qualified to invest in investment products pursuant to relevant Taiwanese laws and regulations, and subject to sales restrictions as set forth in the relevant Taiwanese laws and regulations. BMO Capital Markets has not and will not secure the required licenses in Taiwan for the offer of securities and investment services. Any offer of securities has not been and will not be registered or filed with or approved by the Financial Commission of Taiwan and/or other regulatory authority pursuant to relevant securities laws and regulations of Taiwan, and may not be issued, offered or sold within Taiwan through a public offering or in circumstances which constitute an offer that requires a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority in Taiwan under relevant securities laws and regulations of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the securities in Taiwan.

To Singapore Residents: This report is intended for general circulation and does not and is not intended to constitute the provision of financial advisory services, whether directly or indirectly, to persons in Singapore. You should seek advice from a financial adviser regarding the suitability of the investment products, taking into account your specific investment objectives, financial situation or particular needs before you make a commitment to purchase the investment product. This report has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, it should not be circulated or distributed, nor may the securities described herein be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor or a relevant person as defined in and pursuant to and in accordance with the conditions of the relevant provisions of the Securities and Futures Act of Singapore or (b) otherwise pursuant to and in accordance with the conditions of, any other applicable provision of the SFA.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

Key Catalyst Upcoming

We belive today's update from EXC reinforced our Buy rated thesis that the company can deliver stable and consistent earnings growth in the 7-8% range through 2026 and the current valuation overly discounts the execution risks. The company has a key catalyst upcoming on 5/22 when the Illinois Commerce Commission Staff will file testimony in ComEd's first multi-year rate plan case. ComEd represents ~37% of the earnings power for EXC and securing a constructive regulatory outcome should provide evidence to investors that the company's target of the midpoint or better on the 6-8% EPS CAGR through 2026 is achievable. We belive many of the key debate points in the case were guided by the Climate and Equitable Jobs Act and we don't believe ComEd's equity ratio request of ~51% should be contentious. A key item will be the allowed ROE, where the company is seeking a year 1 ROE of 10.50% in 2024, rising to 10.65% in year 4 in 2027. See our note here for more details. Every 50bps is worth ~6c or 2% to EPS in '24. The last ROE authorized by the ICC (not under the FRP) was for SO's NICOR gas subsidiary in Nov. '21 and it was 9.75%. The ICC Staff will file testimony in WEC's People's gas case on 5/8, which could be a read-through for the ComEd case.

Remaining ComEd Litigation Appears Manageable

Following the guilty verdict in the trial of several former ComEd employees this week, EXC addressed the remaining litigation exposure from lobbying activities in Illinois. On the call and in the 10-Q, the company disclosed an expected $173mm exposure to a shareholder lawsuit, where the full amount would be covered by insurance. There remains three derivative lawsuits, one in which the company would receive a cash benefit if any settlement or verdict was reached. There were three consumer fraud cases brought, two of which have been dismissed. An SEC investigation remains ongoing. The company has not quantified any of the remaining litigation other than the case where insurance will cover damages. We don't belive the outstanding cases should represent a material overhang to the stock.

Quarter Results Inline, Tweaking '25/'26 Estimates

In the quarter, the company did benefit from 1c of carbon mitigation credits, which we expect to be nonrecurring and the company will have the ability to more timely true up this balance post early 2024. We have lowered our '25/'26 by 5c to account for revised rate case assumptions, but our '23-'26 EPS CAGR remains in the upper half of the 6-8% range at 7.8%.

Valuation:

We main our Buy rating and $48 target price.

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price to earnings based. The adjustments applied fall into 5 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 5) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-parts analysis applying business/region appropriate valuations to those diversified businesses; 6) One-off Adjustments: In special situations, we value risk on an issue specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk.

We maintain our Price Target of $48 premised on a 9% premium to the group multiple or 18.9x our $2.54/share earnings forecast for 2024. Our 9% net premium is derived from a 5% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond, a 5% discount for a 3rd quartile regulatory ranking overall, a 4% premium for 1st quartile earnings growth and a 5% premium for energy transition.

Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Quantitative Research Review

UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

Exelon Corp

Question	Response
1. Is the industry structure facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting worse, 3 = no change, 5 = getting better, N/A = no view)	4
2. Is the regulatory/government environment facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting tougher 3 = no change, 5 = getting better, N/A = no view)	4
3. Over the last 3-6 months in broad terms have things been improving/no change/getting worse for this stock? Rate on a scale of 1-5 (1 = getting a lot worse, 3 = not much change, 5 = getting a lot better, N/A = no view)	3
4. Relative to the current CONSENSUS EPS forecast, is the next company EPS update likely to lead to: (1 = negative surprise vs consensus, 3 = in-line with consensus, 5 = positive surprise vs consensus expectations, N/A = no view)	3
5. What's driving the difference?	
6. Relative to YOUR current earnings forecast, is there relatively greater risk at the next earnings result of:(1 = downside skew risk to earnings, 3 = equal upside or downside risk to earnings, 5 = upside skew risk to earnings, N/A = no view)	2
7. What's driving the difference?	
8. Is there an upcoming catalyst for the company over the next three months?	
9. Is there an actual or approximate date for the catalyst?	
10. Is the catalyst date an actual or approximate date?	
11. What is the catalyst?

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 03 May 2023 09:44 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	54%	22%
Neutral	FSR is between -6% and 6% of the MRA.	36%	21%
Sell	FSR is > 6% below the MRA.	10%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2023.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Ross Fowler, CFA, William Appicelli, CFA.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A. (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client's profile). UBS Brasil CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Chile, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Distributed by UBS AG, Tokyo Branch to Professional Investors (except as otherwise permitted) in relation to foreign exchange and other banking businesses when relevant. **Australia:** Clients of UBS AG: Distributed by UBS AG (ABN 47 088 129 613 and holder of Australian Financial Services License No. 231087). Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. This material is intended for professional/institutional clients only and not for distribution to any retail clients. **Malaysia:**

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/research-methodology.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render(s) services. **Monaco**: This document is not intended to constitute a public offering or a comparable solicitation under the Principality of Monaco laws, but might be made available for information purposes to clients of UBS (Monaco) S.A., a regulated bank having its registered office at 2 avenue de Grande Bretagne 98000 Monaco operating under a banking license granted by the "Autorité de Contrôle Prudentiel et de Résolution" (ACPR) and the Monegasque government which authorizes the provision of banking services in Monaco. UBS (Monaco) S.A. is also licensed by the "Commission de Contrôle des Activités Financières" (CCAF) to provide investment services in Monaco. The latter has not approved this publication. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the UAE by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed. **USA**: Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliários Ltda., UBS Asesores México, S.A. de C.V., UBS SuMi TRUST Wealth Management Co., Ltd., UBS Wealth Management Israel Ltd. and UBS Menkul Degerler AS are affiliates of UBS AG. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

EXC: Quiet Update Ahead of Key Regulatory Processes

Key Message: Exelon kicked off the new year with a slight beat despite the drag of unfavorable weather at PECO, with management using the quieter quarter to reaffirm the refreshed plan it laid out on the 4Q call and review its positioning ahead of several major rate cases this spring/summer. To that end, the most immediate data point remains the IL MYP, where intervenor testimony will land on the 22nd and set a clearer picture of the bid-ask. With almost all of the year's cases awaiting intervenor testimony and the financing plan 80% complete, the balance of management's update was decidedly straightforward – a welcome departure from prior quarters. Of note, we also received several investor queries this afternoon regarding the composition of the quarter's earnings (e.g., CMC benefit), which we touch on below. We caught up with management.

Execution, execution, execution. EXC's regulatory and financing plans remained on autopilot this quarter, with few incremental data points on the former setting up what we saw as a decidedly straightforward update. Management continues to await initial intervenor testimony this quarter in its two largest cases (ComEd and BGE&E), with the 5/22 deadline for Illinois a key data point for understanding the bid-ask in the company's first multi-year plan before a reconstituted ICC. As a reminder, the company has proposed to defer roughly 35% of the 2024 increase to 2026 (CEJA allowed up to 50%), which management framed in our conversation as a blend of both remaining EDIT flowbacks and a desire to moderate impacts on 2026 as well. We continue to model an ascent to high 9% allowed ROEs in 2024 and beyond, which we see as reasonable in light of gas LDC alloweds - yesterday ICC Staff recommended a 9.89% ROE for Nicor. We also asked about management's thoughts around the ability to earn performance incentives going forward, with the team emphasizing that the current plan is neutral on the potential ~32bps of upside. As with AEE, we remain on the lookout for data points on the potential ramp up of at least some initial realization of the incentives.

Looking ahead, management affirmed 2023 EPS guidance in the range of $2.30-$2.42, vs. our $2.36, which remains unchanged. In line with management's latest commentary, we have slightly lowered our 2Q estimate to reflect expectations for ~17% of EPS to fall in the quarter. We received some investor inbounds about the timing items that ultimately drove some of the divergence in earnings vs. prior quarters (~19% in 2Q22), with management emphasizing that it is unique to 1H23. A similar situation holds for the $0.01 of earnings tailwinds from the CMC carrying costs, which were driven by a step up in the deposit rate on the reg asset from 0% to 5%. While the CMCs are just a passthrough, the size of the amount to be recovered was uniquely large after commodity volatility in 2022 (credits are given to customers based on forwards, while CEG sells on spot).

EXC reported 1Q23 EPS of $0.70, just ahead of our estimate and consensus ($0.67/ $0.70). YoY adjusted earnings were $0.06 higher, reflecting higher distribution rates across the utilities, partially offset by weather and other items. Across the opcos, ComEd earnings were +$0.05 YoY thanks to another quarter of higher distribution rates (investment and treasuries) alongside $0.01 of benefit from CMC carrying costs (as noted above). Earnings were $0.04 lower at PECO, reflecting higher gas distribution rates (+$0.02), which were offset by a variety of higher expenses, including $0.01 of D&A and $0.01 of credit loss. Weather at PECO dragged $0.04, just ahead of our $0.03 expectation. BGE was flat, while PHI added $0.03, as higher distro rates, were partially offset by $0.01 of weather (DPL). The parent added $0.02, as BSC allocations (Exgen) and other ($0.04) were partially offset by higher interest expense. On the latter item, interest expense, we note that the company has largely completed its financing plan for the year, with rate locks on the ST debt providing some insulation from rate volatility.

Valuation

Our valuation is based on our 2025E EPS of $2.74. We use our 17x regulated utility multiple, which is based on our regression model using the correlation between electric utility valuations and forward interest rate expectations over the past 30+ years. To this 17x multiple, we continue to apply a 1-turn premium to each of EXC's subsidiaries for favorable recovery mechanisms (riders, MYPs) and underlying growth/ incremental investment opportunities, except for ComEd. This blended 17.7x multiple, applied to our 2025E EPS and discounted back 1 year equals our $45 PT.

Risks

EXC comprises regulated distribution and transmission assets, which face traditional risk factors and upside drivers inherent with all utilities, including: (1) positive/negative rate case outcomes above/below our expectations, (2) higher/lower capex outlooks, and (3) interest rate changes above/below what we account for in our regression model.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

WELLS FARGO

Earnings Revised — May 3, 2023

Regulated Electric Utilities

Exelon Corporation (EXC)

EXC: Q1 Straight Down the Middle - Busy Regulatory Calendar

Our Call

Q1'23 adj. EPS of $0.70 bested our estimate of $0.67 as rate relief more than offset the negative weather impacts (-$0.05). Reiterate Equal Weight as we view the in-line P/E multiple relative to peers as fair.

EPS Outlook. A few tweaks to our estimates following a model update and extension. Our 23-26E EPS go to/from $2.38/$2.36, $2.50/NC, $2.73/$2.72, $2.92/$2.93. In addition, we introduce a 27E EPS of $3.11. The cadence of outlook remains consistent with management's guidance trajectory taking into account PECO regulatory lag in '23/'24 and rate relief in '25. Our outlook results in a 6.5% CAGR off of the mid-point of the '22 EPS guidance range ($2.26), which compares with EXC's guidance of 6-8%.

Rate Cases in Focus. Busy year for EXC as the company's operating utilities have base rate cases pending in DE& NJ and multi-year rate plans (MYP) pending in MD (BGE) and DC. Pepco MD plans to file for a MYP in May '23. Last, in January, ComEd made its inaugural filing under IL's new 4-yr MYP format. EXC expects final orders for ComEd & BGE by YE'23 with the other cases wrapping up in 1H'24.

While we think the current economic environment poses an elevated risk for rate cases, the recent easing of energy prices is a positive development. In addition, we will be keenly interested in the allowed ROEs. EXC's requests are premised on ~10.5% ROEs (vs. authorized ROEs of ~9.5%) and the recent material rise in interest rates likely argues for some level of upward adjustment. Our EPS outlook assumes no meaningful changes to the currently authorized levels.

Investment Thesis, Valuation and Risks

Exelon Corporation (EXC)

Investment Thesis

Our Equal Weight rating reflects our view that the current share price adequately reflects EXC's risk/reward proposition. Positive attributes including a healthy projected EPS CAGR (7%) and wires-centric asset mix are balanced by modest balance sheet concerns and our view that the company's regulatory jurisdictions are average to below average.

Target Price Valuation for EXC: $45.00 from NC

Our $45/sh price target is based on a P/E multiple analysis. We apply a P/E of 17.5-18.0X to our 24E EPS of $2.50. Our multiple represents a 0-5% discount to the '23 Regulated Electric peer group median of 18.0-18.5X as we balance positive features (strong 7% EPS CAGR and predominantly electric wires strategy) with our perception that EXC's regulatory jurisdictions are average to below average. We apply the '23 median to our 24E EPS due to the forward-looking nature of our price target.

Risks to Our Price Target and Rating for EXC

Risks to our thesis include favorable/unfavorable regulatory developments (upside/downside) and greater-than-expected ESG appetite for a wires-centric company (upside).

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Energy: Electric Utilities

NYSE: EXC

Exelon Corporation

EXC: Steady Execution Across Multiple Jurisdictions; Sector Weight on Valuation

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

EXC delivered better than expected 1Q23 results, and reiterated 2023 guidance and the long-term EPS CAGR of 6-8%. Management is methodically tackling rate filings in multiple jurisdictions - especially IL's first MYRP at ComEd. Overall, there appear to be significant investment opportunities across its service territories, lending support to the 6-8% targeted growth rate. While weather was a drag at PECO during the 1Q, management expects to offset the negative impact through O&M management, and we do not see it as a risk to the full year outlook. We remain Sector Weight given valuation, which is in line with the large-cap regulated utilities.

1Q23 results beat estimates: EXC reported 1Q23 EPS of $0.70, ahead of our $0.67 forecast and consensus of $0.66. The positive drivers included higher ComEd distribution rates (ROE linked to Treasuries), new gas distribution rates at PECO, new T&D rates for PHI, offset by unfavorable weather impact at PECO, and higher debt service costs across the various subsidiaries.

Figure 1 - EXC Earnings Comparison

1Q23	EXC	KBCM
ComEd	0.25	0.20
PECO	0.17	0.20
BG&E	0.20	0.23
PHI	0.17	0.14
Parent	(0.09)	(0.09)
EXC	**0.70**	**0.67**
Consensus	**0.66**	

Source: Company Reports, KBCM Estimates

2023 guidance reiterated: EXC reiterated 2023 EPS guidance of $2.30-$2.42 vs. our estimate of $2.37 (also consensus). There is also no change to the 6-8% earnings CAGR from 2022-2026 with an expectation to deliver at the midpoint or better. Our 2026E EPS of $2.95 implies a 6.6% CAGR, with an expectation for a stronger cadence of growth over the second half of the reference period.

No change to capex, but we highlight some upside considerations: While EXC's $7.2B capex for the year is unchanged, there are some positive developments in its service territories that could drive long-term upside. These include MD raising the offshore wind target to 8.5 GW by 2031 (which could bring T&D opportunities), EXC filing a request for $700M in grid resiliency funding under the GRIP program (set up under IIJA), and the second solicitation for offshore wind infrastructure in NJ (EXC received $24M in awards under the first solicitation).

Regulatory activity to drive the news flow: Most prominently watched among all the rate filings will be the first MYRP in IL under the recently implemented CEJA parameters. The IL rate case aligns with the clean energy priorities set by the state. Intervenor testimony to be filed later this month will provide a window into the key aspects of support or opposition to the filing. Hearings are scheduled for August with a final outcome expected before YE. We expect the process to be fully litigated given that this is the first such filing under the new structure. Other rate cases on the calendar include:

- Atlantic City Electric distribution rate case in NJ was recently filed and EXC is seeking a $105M rate increase, on a 10.5% ROE and 50.2% equity. The main drivers of the request include recovery of investments to the distribution system, AMI infrastructure, and investments needed to meet the targets set in NJ Energy Master Plan. The NJ BPU is expected to issue an order by November 17.

- BGE filed the second MYRP in 1Q23 for a three-year period based on 10.4% ROE. The proceeding will also true up the first two years of BGE's first MYRP and it is seeking recovery of an imbalance of $17.8M for 2021 and $58.7M for 2022. A final commission order is expected before YE.
- PEPCO DC also filed the second MYRP seeking base rate increases for a three-year period through 2026 to support the District's clean energy programs and its goal to become carbon-neutral by 2045. The rate case is premised on a 10.5% ROE and a final outcome is expected in 1Q24.
- The Delmarva DE electric distribution filing is underway. DPL DE recently filed supplemental testimony to reflect actual data through YE22 and projections through 1H23, and revised the revenue requirement to $48M (also 10.5% ROE). Here also a final outcome is expected in 1Q24.
- ComEd filed the usual FRP in IL seeking $247M in recovery starting in 2024 - with the primary driver being higher U.S. treasury yields. An order is expected by December 17.

Recent Research: EXC: In Line Quarter; Clarity on Multi-Year EPS Cadence; IL Rate Case Is the Main Item to Watch in 2023; EXC: 3Q Beats, Longer-Term Growth Rate Reiterated, but Cadence Will Be Uneven; EXC: No Surprises in the Quarter, but the IRA Could Bring a Bigger Tax Bill; EXC: Delivering on Track Results as a Regulated Utility

Valuation: Based on a stock price of $42.57 and our 2024E EPS of $2.51, shares of EXC are trading at a P/E ratio of ~17x, representing a 3% discount to Large-Cap Regulated Utilities trading at ~17x. We view the shares as fairly priced at current levels.

Risks: EXC's regulated utilities are exposed to a number of risks, including regulatory risk in its jurisdictions and on the federal level, weather variations affecting electricity demand and the reliability of its system, interest rate risk affecting its cost of capital, and macroeconomic risk as underlying economic activity affects demand for electric power and gas. Should the impacts of these risks be greater than we currently anticipate, the Company and the shares may underperform relative to our expectations. Conversely, should these risks' impact be less than anticipated, the Company and the shares may outperform relative to our current expectations.

Sophie Karp (917) 368-2361 / sophie.karp@key.com

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

EXC reports 1Q23 earnings

- EXC reported $0.70 vs. Gugg/Cons of $0.67/0.66
- Reaffirmed 2023 EPS guidance of $2.30-2.42 vs. Gugg/Cons $2.36/2.37
- Results for the quarter featured ($0.04) of weather at PECO, ($0.01) at PHI
- Key long term outlook messages unchanged from 4Q22 update (EPS and DPS growth/ payout ratio commentary)
- Key parameters of financing plan unchanged ($425m equity by '25), 80% of debt financing needs executed in 1Q
- Call at 10am – register HERE
- Slides HERE

NI reports 1Q23 in line net operating EPS of $0.77 vs Gugg/consensus at $0.76/$0.76; maintains 2023 guidance of $1.54-$1.60 ($1.57 midpoint) vs Gugg/consensus at $1.57/ $1.56

- **Asset sale update:** NI reports being "on track" with regard to strengthening its balance sheet via a successful minority interest sale of its NIPSCO utility
  - Company still expects a **close in 2023**
- **Credit:** continuing to target 14%-16% FFO/debt post-sale of NIPSCO minority interest
- **EPS CAGR:** reiterates 6%-8% expected annual NOEPS growth through 2027 (illustrated clearly on slide 5)
- **Cost management:** reiterates guidance of flat O&M
- **Capex:** $15bn 2023–2027 capex plan reiterated, along with 2023 capital investment guidance
- **Rate Base:** reiterated 8%-10% expected annual rate base growth; recall that FY22 projected rate base was estimated at ~$16.6bn
- **Credit:** ~$11.6bn of total debt as of March 31, 2023; ~$10.3bn of LT debt; ~13yr weighted average maturity; 3.83% weighted average interest rate
  - Committed to maintaining current investment-grade credit ratings: S&P (BBB+), Moody's (Baa2), and Fitch (BBB)
- **Financing:** maintains 2023–2027 financing plan; equity plans (excluding the remarketed equity units of $863m) are to restart the company's ATM equity in 2025+, to support current investment grade credit ratings; may also be used to redeem o/s preferred stock ($900m)
- **TSR:** continuing to target 9%-11% total shareholder return
- **Dividend:** reiterated 60%–70% payout target.
- Call is at **11:00am at 1-888-330-2391... Passcode: 28323**

ALE reports 1Q23 earnings

- ALE reported $1.02 vs. Gugg/Cons of $1.22/1.18
- Reaffirmed 2023 EPS guidance of $3.55 to $3.85 vs. Gugg/Cons of $3.70/3.71
- Weather was ($0.10) impact on the quarter
- "Sales to residential, commercial and municipal customers decreased from 2022 primarily due to warmer weather in 2023 compared to 2022. Sales to municipal customers also decreased as a result of a new contract entered into with Hibbing Public Utilities in April 2022 with sales under the new contract classified under other power suppliers." - Q
- ACE 'below expectations' on lower wind and availability of assets
- ACE O&M up 25% (+$2.9m)
- Higher O&M also dragged on MN Power (+$10.4m vs. 1Q22)
- 1Q23 contribution of $4.5mm from New Energy
- Still planning next MN Power case in 4Q23
- Call at 10am – register HERE
- Slides to be posted HERE

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

SR reports 2FQ23 beat of $3.70 in NEEPS vs Gugg/consensus at $3.44/$3.50; narrows FY23 NEEPS guidance to $4.20–$4.30 (from $4.15–$4.35), maintaining $4.25 midpoint, vs Gugg/consensus at $4.25/$4.25

- Reiterates confidence in 5-7% long-term EPS growth off of a base of the midpoint of the company's original fiscal 2023 earnings guidance of $**4.15**
- Following fiscal Q2 2023 results, SR has updated its segment guidance as below:
  - **Gas Utility:** $210m–$220m, **down** from $225m–$235m, previously
  - **Gas Marketing:** $43m–$48m, **up** vs $25m–$30m, previously
  - **Midstream**: $10m–$12m **a minor tweak upwards** vs $9m–$11m, previously
  - **Corporate & Other:** $-25m–$-30m vs $-20m–$-25m, previously
  - *Notable offsets to the strength at Marketing and Midstream were the impacts of lower margins during the winter of the Gas Utilities, as well as high interest expenses (impactful at both Gas Utilities and Corporate costs).*
- **Capex:** targeted 10-year capital investment plan remains $7bn, and expected capex for fiscal 2023 remain $700m, including the company's Midstream expansion for Spire Storage, which it reports "remains on plan".
- **Rate Base growth:** Capex is anticipated to drive 7%–8% utility rate base growth
- *Presentation and accompanying details not yet released*
- Earnings call will be held today at 9**:00 AM ET**… Dial-in: **844-824-3832**…(**no access code**)

AVA reports large miss for 1Q23 of $0.73 vs Gugg/consensus at $1.23/$1.16 and 1Q22 EPS of $0.99; maintains 2023 annual guidance of $2.27–$2.47 ($2.37 midpoint) vs Gugg/consensus at $2.28/2.34

- $–0.11 of EPS decline was driven primarily by inflationary pressures resulting in increased labor and benefits costs, among other operating expenses.
- $–0.09 came from timing-driven changes to AVA's effective tax rate; EFT was –13.7% in 1Q23 vs –17.8% in 1Q22.
- $–0.08 was a direct result of higher interest rates.
- $–0.02 at "other businesses", due to net investment losses recognized in 2023 compared to net investment gains recognized in 2022.
- **Margins:** compared to 1Q22, electric utility margin was flat, while natural gas utility margin increased EPS by $0.06 in 1Q23
- **"***We expect lower net power supply costs for the remainder of the year, resulting in a benefit under the ERM***" —** Dennis Vermillion, President and CEO
  - AVA booked a $7.6m pre-tax expense under the Energy Recovery Mechanism (ERM) in Washington, compared to a $1.9m pre-tax benefit in 1Q22
- **Capex:** 2023 capex guidance at Avista Utilities was reiterated at $475m; AEL&P capex is expected to be $19m vs $15m previously.
- **Debt Financing:** AVA issued $250m of long-term debt in 1Q23 (vs prior guidance of $200m for 2023) and does not expect to issue further LT debt this year.
  - The company ***does however*** expect to increase the capacity of its $400m credit facility to $500m in 2Q23.
- **Equity Financing:** $30m of equity was issued in 1Q23, and common stock issuance guidance was maintained at $120m for 2023.

EXC/IL – ComEd trial results in 4 guilty verdicts

- Michael McClain, former ComEd CEO Anne Pramaggiore, ex-ComEd lobbyist John Hooker and former City Club President Jay Doherty were convicted on all counts following 27 hours of deliberation
- More HERE

Guggenheim takeaway: *The case has been a constant point of media noise in IL in recent weeks, so good to see resolution in our view ahead of the second phase (former speaker Madigan). As a reminder, this matter was the driver of the July 2020 deferred prosecution agreement between the utility and the US Attorney's Office for the Northern District of Illinois. More recently, the case had tangential readthrough to the ICC given certain linkages (see HERE).*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

SMR – NuScale continues to pursue opportunities in SE Asia; news release correction clarifies SMR's role

- Alongside a state visit of the Philippine president to DC, the president's office initially indicated in a release that the company would invest ~$7bn in the country to build a 430MW plant
- The language around the meeting with NuScale executives was subsequently amended yesterday to clarify that the company is working on a study and potentially with a local developer
- More HERE

Guggenheim takeaway: *The headline of NuScale potentially investing several times its market cap in the country generated some noise yesterday, with the subsequent clarifications helping to underscore that this is a normal outreach process for the country – similar to what we have seen to date in eastern Europe. We continue to monitor for additional data points on leads like these.*

MA/Wind – MA DOER and other agencies issue RFP for up to 3.6GWs of offshore wind

- The blockbuster RFP will set in motion a ~8 month response period in which projects of varying sizes may be bid in
- "If approved, the draft RFP will invite submittals for offshore wind generation to procure up to 3,600 MW, which represents 25 percent of the state's annual electricity demand and a significant increase over the previous procurement, which sought approximately 1,600 MW of offshore wind." - release
- "The procurement team would have flexibility to evaluate bids ranging from 400 MW to 2,400 MW in size, and to select a project or projects that bring significant benefits to the Commonwealth." - release
- Bids are due 31 January 2024
- More HERE

Guggenheim takeaway: *Flagged for your awareness as MA joins NY in seeking additional procurements of wind. The latest request is the first to come after last summer's modifications to the process and is the first to be lead by the DOER. The solicitation includes a weighting towards economic development and other social considerations, which was a point of interest in the state during last year's session. While we would not be surprised to see ES' JV bid into this latest RFP, we continue to expect an exit in the coming quarters, with an announcement potentially by the 2Q call. The state is also grappling with the ongoing fallout around the technical default for the Commonwealth project.*

Policy – Senator Manchin advances efforts on permitting reform in Senate

- The Senator's office has re-released his prior legislation on permitting reform to serve as a starting point in Senate and Congressional negotiations
- "Today, U.S. Senator Joe Manchin (D-WV), Chairman of the Senate Energy and Natural Resources Committee, introduced the *Building American Energy Security Act of 2023*, the text of the National Defense Authorization Act (NDAA) amendment that was supported by 47 Senators (40 Democrats and 7 Republicans) in a tied floor vote in December 2022. This legislation will serve as a starting point for upcoming conversations in the Senate around reforming energy permitting to ensure American energy security and independence." – Manchin's office
- More HERE

Guggenheim takeaway: *Heads up as the process begins to heat up on both sides of the Hill – the successful passage of a budget package (with permitting items) by Republicans sets up further conversations on this specific topic, and we continue to see the area as ripe for bipartisanship in the coming weeks.*

SPP – Grain Belt developers update on phasing of HVDC work

- The developers continue to analyze potential impacts of the line and its second phase into IL for impacts on energy and capacity pricing in MISO and potentially PJM
- "Preliminary design has begun. Detailed design is required to start Q4 2023, in order to meet 2028 COD. Results of SPP TWG studies are needed to start detailed design in Q4 2023." - presentation
- More HERE

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

Guggenheim takeaway: *We continue to monitor Grain Belt as a both a resource adequacy option for adjacent utilities, and for its potential impact on energy and capacity pricing in MISO Zone 4 and beyond.*

PCG – PCG CEO makes constructive comments on company culture in media interview

- PCG CEO Patti Poppe made comments in a Press Democrat interview on transformation progress.
- Commentary directly addressed the ongoing culture change and PG&E.
- More here.

Guggenheim takeaway: *FYI. Transparent and open commentary on PG&E legacy issues.*

CAISO – CA transmission RTO bill is referred to Appropriations committee

- CA Legislature re-referred the bill addressing CAISO expansion into a western RTO to the appropriations committee.
- CA introduced an assembly bill (AB538) that would look for CAISO to become an expanded western RTO with increased governance and multistate jurisdiction.
- The CAISO would be able to submit a plan to the CEC for expanded governance and multistate inclusion of resources into the RTO structure.
- Lawmakers believe this would be a solution to the resource adequacy constraints that CAISO has felt in recent years and would open up more availability of clean energy resources aligned with CA policy goals.
- Bill text here: AB538.

Guggenheim takeaway: *FYI. Resource adequacy work continues in CA.*

WEC – S&P Revises WEC Energy Group Outlook to Negative

- S&P highlighted at the top of its report that WEC reaffirmed its expectation to fund its capital plan without any new equity issuance, a plan which incorporates $12.4bn of investments through 2025.
- S&P further states that WEC's negative operating cash flow has grown in recent years primarily from high capital spending and large nonutility acquisitions, and that S&P believes the company is disproportionately funding this cash deficit with incremental debt, weakening financial measures, in the rating agency's view.
- As a result, S&P believes its consolidated FFO- to-Debt could reside below S&P's downgrade threshold for the next three years.
- Bloomberg link to S&P release HERE

Guggenheim takeaway: *We caught up with the company following this release. WEC stated that from their perspective, S&P hasn't looked at the longer term, and highlighted that the outlook on WEC's utilities remains stable. The company does not expect this will materially impact its ability to access the capital markets, a view which we agree with, while also explicitly clarifying that WEC remains confident in its outlook.*

AEP/DUK/NI – Indiana legislation signed into law this week protects utilities' control over building power lines

- Governor Eric Holcomb, a Republican, signed legislation Monday that will give utilities the right to build and operate transmission projects that connect to their existing systems. Utilities owned by NiSource Inc. and AES Corp. also stand to benefit.
- Indiana Energy Association President Danielle McGrath hailed the new law as "sound policy," in response to an email sent to Duke for comment. AEP, AES and NiSource also referred to McGrath for comments.
- We note that transmission costs have apparently increased by an average of ~63% in Indiana over the preceding five years, as per the Electricity Transmission Competition Coalition, an advocacy group representing manufacturers and others who opposed the bill.
- Utilities will have to competitively bid to build projects and have the advantage of having crews on hand to make timely repairs after storms, according to McGrath.
- More HERE

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

Guggenheim takeaway: *From our coverage universe, we see AEP, DUK, and NI, as best positioned to benefit from this new law.*

DTE Energy Company (DTE)

Jerry Norcia, *Chairman, President & Chief Executive Officer*
Barbara Tuckfield, *Director Investor Relations*

Dates & Location
June 7 & 8, 2023
New York

Meeting Format
NDR - 1:1 Meetings, Group Meeting & Small Group Dinner

Company Information
Market Cap: $22.4bn
DTE Energy Co. (DTE) operates as a diversified energy company, which engages in the development and management of energy-related businesses and services. It operates through the following segments: Electric, Gas, DTE Vantage, Energy Trading, and Corporate and Other. The Electric segment consists of generation, purchase, distribution, and sale of electricity to residential, commercial, and industrial customers in southeastern Michigan. The Gas segment is involved in the purchase, storage, transportation, distribution, and sale of natural gas to residential, commercial, and industrial customers throughout Michigan, and the sale of storage and transportation capacity. The DTE Vantage segment focuses on projects that deliver energy and utility-type products and services to industrial, commercial, and institutional customers, produce reduced emissions fuel, and sell electricity and pipeline-quality gas from renewable energy projects. The Energy Trading segment covers energy marketing and trading operations. The Corporate and Other segment includes various holding company activities, holds certain non-utility debt, and holds certain investments, as well as funds supporting regional development and economic growth. The company was founded in January 1995 and is headquartered in Detroit, MI. (Source: FactSet)

SAVE THE DATE
2nd Annual Guggenheim Georgia Field Trip: Southern Company (SO)/Georgia Power C-Suites, Porsche Racing & GA Commissioner Meetings

What does Southern Company & Georgia Power C-Suite meetings, Georgia Commissioner meetings and racing Porsches on race tracks have in common? Almost nothing! But we are combining all of them for an action-packed 2 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2023 — Atlanta, Georgia

Schedule

Tuesday, July 11th

We advise flying in the morning of Tuesday, July 11. Recommended flights to follow.

~1:00 PM | Georgia PSC Meetings
Tricia Pridemore, PSC Chair, *Commissioner*
Tim Echols, Vice-Chairman, *Commissioner*
Fitz Johnson, *Commissioner*
Lauren "Bubba" McDonald, *Commissioner*
Jason Shaw, *Commissioner*

~6:00 PM | Client Dinner with Southern Company (SO) C-Suite
Chris Womack, *President & Chief Executive Officer (Incoming)*
Dan Tucker, *Chief Financial Officer*
Scott Gammill, *VP of Investor Relations & Treasurer*
Among others

Wednesday, July 12th

8:30 AM | Porsche Racing Experience
Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

1:00 PM | Lunch with Southern Company (SO) and Georgia Power C-Suite
Kim Greene, *Chair, President & Chief Executive Officer (Georgia Power)*
Dan Tucker, *Chief Financial Officer (SO)*
Aaron Abramovitz, *Chief Financial Officer (Georgia Power)*
Among others

Company Information

Market Cap: $73.3bn

Southern Co (SO) is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, and Tennessee. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA. (Source: FactSet)

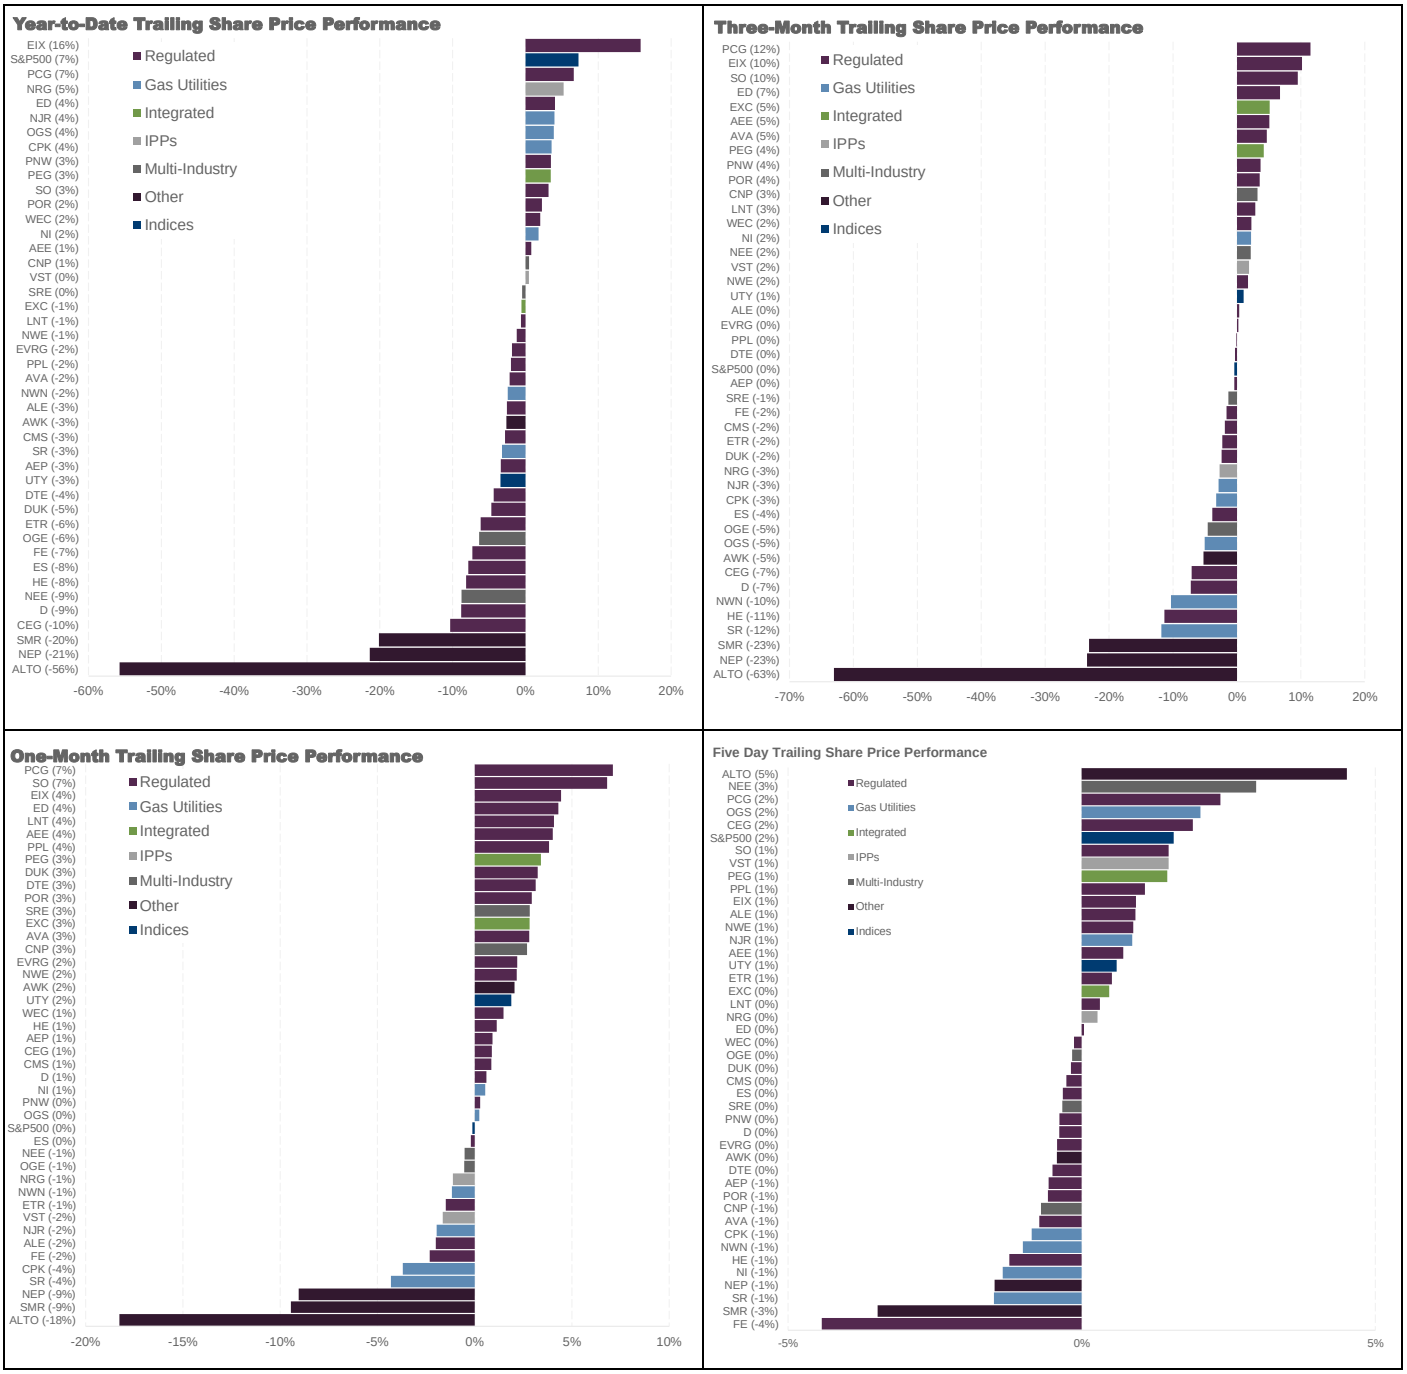
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

EQUITY RESEARCH QUICK TAKE

RBC Capital Markets, LLC
Shelby Tucker, CFA (Analyst)
(212) 428-6462, shelby.tucker@rbccm.com

May 3, 2023

Exelon Corporation

1Q23 beat with 2023 guidance reaffirmed

NYSE: EXC | USD 42.57 | Sector Perform | Price Target USD 47.00

Sentiment: Neutral

Our view: Adjusted earnings of $0.70 compared to our estimate of $0.68 and consensus of $0.66. 2023 guidance of $2.30-$2.42 is reaffirmed as is the long-term EPS growth CAGR of 6%-8%. On the call, we expect topics to cover the new rate case filings made since the last earnings call, the 2023 financing plan, and the regulatory calendar.

EXC reported 1Q23 earnings of $0.70 versus 1Q22 earnings of $0.64. The YoY drivers include higher distribution and transmission rates. Higher interest rates acted as partial offsets and unfavorable weather was a -$0.05 drag across all jurisdictions.

Regulatory updates. Since the fourth quarter call, ACE filed its rate case with a decision expected in 1Q24. BGE filed its multi-year rate case for updates rates for 2024-2026. Pepco filed a multi-year rate plan for revenues from 2024-2026 with a decision expected in 1Q24. ComEd filed its distribution formula rate reconciliation for 2022 service costs which will be absorbed in rates in 2024.

2023 financing outlook. The company completed 80% of this year's debt financing needs in the first quarter. EXC continues to target 13-14% FFO/debt metric with the downgrade threshold around 12%. The company still expects to issue $425 million of equity by 2025.

Conference call today at 10:00AM ET. Register for a unique pin here.

RBC Capital Markets appreciates your consideration in the 2023 Institutional Investor All-America and All-Canada Research Team survey.

Capital Markets

Required disclosures

Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1 or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Exelon Corporation in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Exelon Corporation in the past 12 months.

RBC Capital Markets, LLC makes a market in the securities of Exelon Corporation.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Exelon Corporation during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Exelon Corporation.

RBC Capital Markets is currently providing Exelon Corporation with non-investment banking securities-related services.

RBC Capital Markets has provided Exelon Corporation with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Exelon Corporation with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

Distribution of ratings

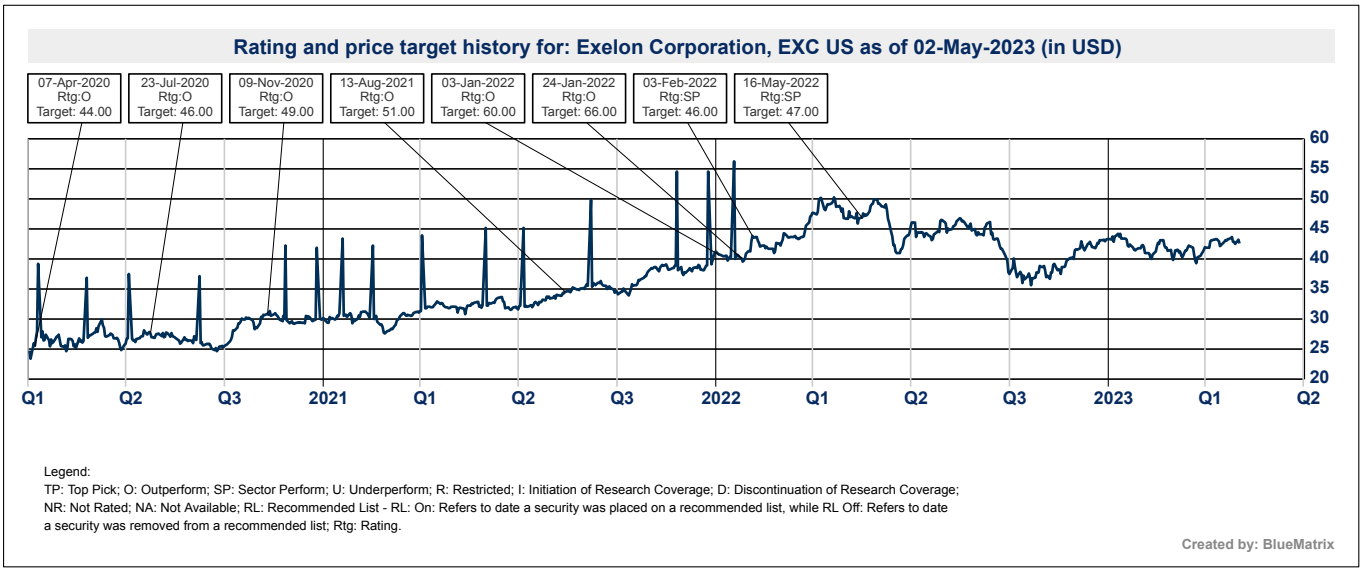
For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings

RBC Capital Markets, Equity Research

As of 31-Mar-2023

			Investment Banking Serv./Past 12 Mos.	
Rating	**Count**	**Percent**	**Count**	**Percent**
BUY [Outperform]	824	56.05	236	28.64
HOLD [Sector Perform]	591	40.20	132	22.34
SELL [Underperform]	55	3.74	4	7.27



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List. As of April 3, 2023, U.S. RBC Wealth Management's quarterly reports will serve as the primary communication for its models and will highlight any changes to the model made during the quarter.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Exelon Corporation

Valuation

Our $47 price target assumes a 18.6x P/E multiple on 2024E utilities EPS of $2.51. Our multiple reflects a slight 3% discount to our base case blended electric and gas multiple of 19.1x, resulting in equity value per share of $47. While we believe Exelon utilities have a similar profile to industry peers (6–8% EPS CAGR and 7–8% rate base CAGR), we give consideration for some regulatory

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

overhang and lower ROE at ComEd. Our price target supports a Sector Perform rating.

Risks to rating and price target

- Stagnant ROE performance at ComEd
- Credit metrics deteriorate due to significant borrowings
- Inflation drives up O&M costs
- Corporate minium taxes become a drag on cash
- Approval of upcoming multi-year plans at favorable levels

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research

RBC Capital Markets endeavors to make all reasonable efforts to provide research content simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets provides eligible clients with access to Research Reports on the Firm's proprietary INSIGHT website, via email and via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

J.P. Morgan Securities LLC

- **1Q23 tops Street estimates as execution continues.** EXC reported 1Q23 adj EPS of $0.70, landing above the $0.65/0.67 JPMe/Street median, and up +6c YoY compared with 1Q22 EPS of $0.64 despite the quarter's -5c weather headwind. ComEd and PHI surpassed our estimates by +3c and +2c, respectively, primarily driven by higher rates within each segment. PECO also edged a penny higher than JPMe, in light of a -4c weather impact and higher depreciation/credit loss expense, partially offset by higher gas rates.
- **2023 guidance + capital plan + equity needs reaffirmed.** EXC reiterated 2023 adj EPS guidance of $2.30-2.42 ($2.35/2.36 JPMe/Street), implying ~5% growth based on the original 2022 guidance midpoint disclosed at the Jan 2022 Analyst Day, and consistent with EXC's 3Q/EEI growth message as PECO's rate cycle/weather/MYP reconciliations impact growth into 2023. EXC also reaffirmed its 2021-2025 and 2022-2026 EPS CAGR of 6-8% with expectations of midpoint or better. Lastly, EXC's 5yr capex plan remained unchanged at $31.3bn (2023-2026 rate base CAGR of 7.9%) with $425mm of remaining equity issuance between 2023 and 2025. We look for any incremental updates on the timing of EXC's remaining $425 equity issuance given broad attention on sector balance sheets as of late.
- **MYP process underway.** Since the last earnings call, EXC filed ACE's electric distribution rate case, BGE's second MYP, and Pepco DC's second MYP, with expectations to file Pepco MD's second MYP this month. Current messaging indicates expected commission decisions on ACE, BGE, Pepco , and ComEd filings in 1Q24, 1Q23, 1Q23, and YE23, respectively. Here, we see 1Q23 as a stage for EXC to drill into the progress of this MYP transition, and anticipate continued messaging on the post-reconciliation accounting benefits that further tighten EXC's EPS trajectory with its underlying rate base growth.

Table 1: EXC 1Q23 Results

Income Statement:	Actual 1Q22	Actual 1Q23	JPM 1Q23E	% Chg Y/Y	% Chg vs JPMe	YoY Drivers
Adj Op EPS by Segment						
ComEd	$0.20	$0.25	$0.22	27%	15%	+4c distribution rates, +1c CMC carrying costs
PECO	$0.21	$0.17	$0.16	-20%	5%	-4c weather, +2c gas distribution rates, -1c depreciation, -1c credit loss expense
BGE	$0.20	$0.20	$0.21	-2%	-6%	+1c distribution rates, -1c interest expense
PHI	$0.14	$0.17	$0.15	22%	13%	+4c distribution and transmission rates, -1c weather
Corporate & Other	($0.11)	($0.09)	($0.09)	-16%	-4%	+2c BSC allocations adjustments fo discontinued operations, +2c other, -2c interest expense
Adjusted Operating EPS	**$0.64**	**$0.70**	**$0.65**	**9%**	**8%**

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Exelon Corp

Beat on the Qtr, LT Outlook Remains Intact

Q: How did the results compare vs expectations?

A: Beat. EXC reported Q1'23 earnings of $0.70 /shr vs. UBSe/consensus of $0.66/$0.60. The company reported $0.64/shr for the same period last year.

Q: What were the most noteworthy areas in the results?

A: Higher electric and gas distribution rates helped drive the quarter at +11c yoy, partially offset by unfavorable weather at PECO (-4c) and PHI (-1c). Higher interest costs were also a partial offset at -3c yoy.

Q: Has the company's outlook/guidance changed?

A: No. The company reaffirmed full year 2023 EPS guidance of $2.30-$2.42 and long term growth rate of 6-8% through 2026, with the expectation to be at the midpoint or better. The remaining equity needs are unchanged at $425mm through 2025. The company expects the annual operating ROEs at the utilities to be w/in 9-10% for 2023.

Q: How would we expect investors to react?

A: Neutral to Positive. Modest beat on the quarter and reaffirming target of midpoint or better on the growth rate should be well received. We expect questions to be around the rate case filings in IL and MD and ongoing cost reduction efforts.

Market return assumption	9.1%
Forecast excess return	+7.1%

Company Description

Exelon owns six regulated utility subsidiaries: Atlantic City Electric, BGE, ComEd, Delmarva Power, PECO and the Pepco Subsidiaries, which deliver electricity and natural gas to about 10m customers in Delaware, Washington DC, Illinois, Maryland, New Jersey, and Pennsylvania.

Valuation Method and Risk Statement

Our valuation methodology for the group is price to earnings based. The adjustments applied fall into 5 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 5) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-parts analysis applying business/region appropriate valuations to those diversified businesses; 6) One-off Adjustments: In special situations, we value risk on an issue specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk.

We maintain our Price Target of $48 premised on a 9% premium to the group multiple or 18.9x our $2.54/share earnings forecast for 2024. Our 9% net premium is derived from a 5% premium for the overall regulated utility group, premised upon the current undervaluation versus the Baa corporate bond, a 5% discount for a 3rd quartile regulatory ranking overall, a 4% premium for 1st quartile earnings growth and a 5% premium for energy transition.

Specific risks for Exelon include regulatory risks at the utilities, weather, and interest rates.

Quantitative Research Review

UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

Exelon Corp

Question	Response
1. Is the industry structure facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting worse, 3 = no change, 5 = getting better, N/A = no view)	4
2. Is the regulatory/government environment facing the firm likely to improve or deteriorate over the next year? Rate on a scale of 1-5 (1 = getting tougher 3 = no change, 5 = getting better, N/A = no view)	4
3. Over the last 3-6 months in broad terms have things been improving/no change/getting worse for this stock? Rate on a scale of 1-5 (1 = getting a lot worse, 3 = not much change, 5 = getting a lot better, N/A = no view)	3
4. Relative to the current CONSENSUS EPS forecast, is the next company EPS update likely to lead to: (1 = negative surprise vs consensus, 3 = in-line with consensus, 5 = positive surprise vs consensus expectations, N/A = no view)	3
5. What's driving the difference?	
6. Relative to YOUR current earnings forecast, is there relatively greater risk at the next earnings result of:(1 = downside skew risk to earnings, 3 = equal upside or downside risk to earnings, 5 = upside skew risk to earnings, N/A = no view)	2
7. What's driving the difference?	
8. Is there an upcoming catalyst for the company over the next three months?	
9. Is there an actual or approximate date for the catalyst?	
10. Is the catalyst date an actual or approximate date?	
11. What is the catalyst?

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 03 May 2023 12:18 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	54%	22%
Neutral	FSR is between -6% and 6% of the MRA.	36%	21%
Sell	FSR is > 6% below the MRA.	10%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2023.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render(s) services. **Monaco**: This document is not intended to constitute a public offering or a comparable solicitation under the Principality of Monaco laws, but might be made available for information purposes to clients of UBS (Monaco) S.A., a regulated bank having its registered office at 2 avenue de Grande Bretagne 98000 Monaco operating under a banking license granted by the "Autorité de Contrôle Prudentiel et de Résolution" (ACPR) and the Monegasque government which authorizes the provision of banking services in Monaco. UBS (Monaco) S.A. is also licensed by the "Commission de Contrôle des Activités Financières" (CCAF) to provide investment services in Monaco. The latter has not approved this publication. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the UAE by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed. **USA**: Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliários Ltda., UBS Asesores México, S.A. de C.V., UBS SuMi TRUST Wealth Management Co., Ltd., UBS Wealth Management Israel Ltd. and UBS Menkul Degerler AS are affiliates of UBS AG. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

1Q earnings continue with WEC, OTTR, PEG, EIX, EXC, AVA, ES, AEP, CEG, PNW, SRE, ED, D, and AEE scheduled to report this week. This week, we are tracking regulatory proceedings for SO's Nicor Gas IL rate case, XEL's CO electric rate case, and AEE's IL gas case. In other news, CT PURA adopts the implementation of a PBR framework; DUK reaches a partial settlement in the DEP NC electric rate case and a settlement in the OH natural gas rate case; NSP files an electric and gas rate case with the WI PSC; EXC seeks $700M of DOE funding for grid improvements; NEE announces a JV for a nationwide EV charging and hydrogen infrastructure program; and the NC Senate passes a bill redefining clean power to include nuclear energy.

KBCM Invites You to Join Us at the AGA Financial Forum on May 22-23 in Ft. Lauderdale, FL.
Scroll down for a full schedule and contact us or your sales representatives to join us at our meetings.

Upcoming Earnings Reports

1Q earnings continue: WEC, **OTTR**, **PEG**, **EIX**, **EXC**, **AVA**, **ES**, **AEP**, **CEG**, **PNW**, **SRE**, **ED**, **D**, and **AEE** are scheduled to report this week (see calendar below). Our recently published preview, It's Been a Rough Start to the Year, includes our thesis, expectations, and estimates for our coverage.

Figure 1 - Earnings Calendar

1Q23 Utilities Earnings Calls			
Company Name	**Ticker**	**Date**	**Time (ET)**
WEC Energy Group Inc	WEC	5/1/2023	2:00 PM
Otter Tail Corp	OTTR	5/2/2023	11:00 AM

Regulatory Calendar

SO — Staff and Intervenor testimony in SO's Nicor Gas rate case is due on May 2: SO's Nicor Gas filed a GRC with the IL Commerce Commission requesting a $321M revenue increase, premised on a 10.35% ROE, 54.5% equity, and a 2024 year-end test year. Drivers for the rate increase include the recovery of investments under the Investing in IL program and the inclusion of $32M under three proposed riders. SO expects an ICC ruling within the 11-month statutory timeframe or by December 3.

XEL — Intervenor testimony in XEL's CO electric rate case is due on May 3: XEL seeks a net revenue increase of $262M (net of $50M currently recovered through riders), premised on a 10.25% ROE, 55.7% equity layer, and a 2023 forecast test year. The main drivers of the rate increase are investments in its distribution infrastructure, including wildfire mitigation, investments in advanced grid intelligence and security, as well as other investments including those in transmission. The requested revenue increase also accounts for higher labor and capital costs. The filing is in line with previous indications by the Company. The Company is requesting rates to become effective September 7, 2023.

AEE — Staff and Intervenor testimony in AEE's IL gas rate case is due on May 5: AEE IL filed a gas GRC with the IL Commerce Commission requesting a $160M revenue increase, premised on a 10.7% ROE, 54% equity, and a 2024 year-end test year. The rate increase request includes the recovery of $77M of annual revenues that would be recovered under AEE's QIP rider. AEE expects an ICC ruling within the 11-month statutory timeframe or by December 6, with rates going into effect on January 1, 2024.

Recent Developments for Companies Under Our Coverage

From our midweek: Staff files testimony in SPS's NM electric rate case; ED prepares to commence settlement discussions in CECONY steam rate case; the WV PSC orders FE to continue negotiations for the purchase of the Pleasants coal plant; the WV PSC approves list of bidders for FE management audit; SoCalGas partners on hydrogen project seeking to decarbonize other sectors; a commissioner resigns from the AK RCA; MI PSC Commissioner announces plans to step down from role; and AGR achieves commercial operations at 162 MW solar project.

ES, AGR — CT PURA adopts performance-based rulemaking in a unanimous decision: PUR adopted a PBR framework for CT electric distribution companies that will be phased in in 2024. PURA commenced proceedings to develop a framework after being called upon by the state legislature to do so following 2020's storm Isaias. The framework will be implemented in two stages, with the first stage including regulatory goals to inform a PBR framework, evaluate the current framework, and determine specific areas of utility performance that should be targeted for improvement, and identifying specific performance metrics. Phase 2 of the program will determine how to achieve the specific policy outcomes.

EXC — EXC files an application with the DOE for $700M in grid resilience funding: EXC filed an application with the DOE seeking $700M funding for 10 projects through the Grid Resilience and Innovation Partnership (GRIP) program. The projects include a community innovation hub, battery-backed community microgrids, deployment of smart meters, and improved grid resilience in under-resourced communities. EXC submitted 14 concept papers in December and received letters of encouragement to submit applications for 11 of them. The $10.5B GRIP program is part of the Bipartisan Infrastructure Bill and offers grants for projects that enhance grid flexibility and improve grid resilience against climate change and extreme weather.

DUK — DUK reaches a partial settlement in the DEP NC electric rate case: DUK reached a partial settlement with NCUC Staff on several items, including the recovery of capital projects, plant in service, and depreciation rates, but left ROE, capital structure, and inflation adjustments out for a litigated proceeding. Staff had previously recommended a cumulative $260M revenue increase, premised on a 9.25% ROE and 52% equity, which compares to DEP's request for a cumulative $700M rate, premised on a 10.4% ROE and 53% equity layer. DUK requested RY1 rates to go into effect by October 2023. Hearings are expected to begin on Thursday, May 4.

DUK — DUK reaches settlement in OH natural gas rate case: DUK reached a multiparty settlement, including with Staff for a $32M revenue increase, premised on a 9.6% ROE, 52.32% equity, and a $1.9B rate base. The settlement will allow DUK to recover incremental natural gas capex through the existing Rider CEP through 2027. The OH Consumer Counsel was the only intervenor not to sign the settlement. DUK initially requested a ~$49M revenue increase based on a 10.3% ROE. Parties that support the settlement need to file testimony by May 4, with a later date for testimony from the OCC. Evidentiary hearings are set to begin on May 23.

XEL — NSP files rate cases in WI: XEL filed electric and gas rate cases (Docket: 4220-UR-126) with the WI PSC, requesting revenue increases of $40M and $9M, respectively, premised on a 10.25% ROE and 52.5% equity. The requests are driven by capital investments made since the last rate case and higher O&M expenses. XEL requests a PSC order by December 2023 and new rates to go into effect on January 1, 2024. In the last WI rate case, XEL agreed to a multiyear settlement for electric and gas revenue increases of $35M and $10M, respectively. The settlement included step-ups in year 2 of $18M and $3M, respectively.

NEE — NEER, Daimler, and Blackrock partner on nationwide EV charging and hydrogen infrastructure venture: NEER, Daimler, and Blackrock announced a JV, Greenlane, to design, develop, install, and operate a nationwide public charging and hydrogen fueling network for medium and heavy-duty EVs and fuel-cell vehicles. The ~$650M venture plans to construct the first site in Southern CA, followed by charging sites along critical freight routes along the coasts, and TX. The sites will initially focus on EV charging before

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

expanding to hydrogen fueling stations and finally access for light-duty vehicles. NEER will leverage its experience in energy, analytics, and infrastructure development to deliver end-to-end networking charging solutions through NextEra Mobility. NEE acquired NextEra Mobility in December 2020. Greenlane will be managed through a fund that is part of Blackrock's Climate Infrastructure Business.

DUK - NC Senate passes bill to include nuclear as a clean energy source: The NC Senate passed SB 678, the Promote Clean Energy bill, which will eliminate language that can potentially impede the issuance of CPCN for nuclear facilities and will replace "renewable energy" with "clean energy." The bill also aims to expand the options that the NCUC must consider when evaluating new generations to include EE, DSM, resource availability, and O&M costs. The bill makes room for nuclear fission as well as fusion in the definition of clean energy.

KBCM Schedule at the AGA 2023 (Tentative Agenda; All Times Eastern Daylight):

Monday, May 22

7:50 AM – Ameren Corporation (AEE)
8:40 AM – Sempra Energy (SRE) Group
9:30 AM – NorthWestern Corp (NWE)
10:20 AM – Dominion Energy, Inc. (D)
11:55 AM – Duke Energy Corporation (DUK)
12:50 PM – Avista Corporation (AVA)
1:50-2:35 PM – DTE Energy Company (DTE)
2:40 PM – CMS Energy Corporation (CMS)
3:30 PM – Xcel Energy Inc. (XEL)
4:20 PM – WEC Energy Group, Inc. (WEC)

Tuesday, May 23

8:30 AM – Consolidated Edison, Inc. (ED)
9:20 AM – Public Service Enterprise Group Incorporated (PEG)
11:00 AM – CenterPoint Energy, Inc. (CNP)

Earnings Recap

POR — POR reported an in-line 1Q and reaffirmed its 2023 guidance after strong load growth was offset by power prices in the region. More importantly, the Company announced the awards of two additional projects from its 2021 RFP, including the ownership of a 200 MW BESS project. POR remains in negotiations for the ownership of a 75 MW BESS project. POR reaffirmed its 5-7% LT growth target and provided an updated RB CAGR of 7.3% to reflect the recent awards and included a bullish illustrative RB growth scenario with the impact of potential future RFP wins. In tandem, POR announced a new ATM program to help finance the incremental capital. CFO Jim Ajello also announced his intentions to step down from his role at the end of June. See our note here.

FE — FE reported results aligned with consensus and maintained its FY23 guidance. The weather was a significant headwind for the quarter, and absent the impact, FE noted that it would have been trending ahead of plan. Signal Peak contributed $0.08 to 1Q, and FE expects to see less of a contribution from Signal Peak earnings in the remaining quarters as it seeks further cost-cutting measures to offset diminishing SP contribution. The new CEO is set to take over in just over a month and will walk into an active regulatory schedule. See our note here.

NWE — NWE posted 1Q23 results in line with our expectations but below consensus estimates as the Company faces O&M and inflation pressures, but we expect investors to look past the results and focus on the near-term catalysts, including the MT GRC and the outcome at Yellowstone. A final order on the GRC is likely to come before the 2Q earnings call and will be followed by full-year guidance. Regarding Yellowstone, it could be some time before the issue is resolved, and could further delay the project. NWE is trying to reduce its exposure to power markets, and the Yellowstone Plant and Colstrip are both vital to the plan. We will be able to hear more about NWE's plan to reduce its market exposure when it files its MT IRP. See our note here.

SO — SO reported EPS of $0.79 vs. consensus estimates of $0.71 and guidance of $0.70. The Company introduced 2Q guidance below consensus while maintaining 2023 estimates. SO also maintained its timelines for Vogtle Unit 3 and Unit 4, with the first unit expected to enter service in the next one to two months. SO is preparing to complete HFT on Unit 4. After HFT, SO will complete the ITAAC process and commence fuel load, signaling SO's ability to file its prudence review for project costs exceeding $7.3B. As we near the completion of Vogtle, SO is expected to see a strengthening of its cash flow and credit metrics and could use the opportunity to explore selling or acquiring assets to create additional value. See our note here.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

CNP — CNP reported an above-consensus quarter despite milder weather. Full-year guidance is unchanged at $1.48-$1.50. With a third of the full-year outlook achieved in 1Q and some material rate increases in TX on tap for 2H, we believe that the Company is in a comfortable position to meet the full-year outlook, even if the weather does not cooperate. The next data points will be the outcomes from the state legislature regarding the DCRF and the equity layer, which in turn will likely inform CNP's upcoming TX electric GRC. For now, the Company intends not to fund the near-term growth with equity issuances, but we will look for an update once the legislative process concludes and whether CNP taps on the $3B of identified investment opportunities not included in the plan. See our note here.

CMS — 1Q results were in line with reduced expectations as impacted by the weather and storm activity in the quarter. Despite the strong headwinds at the start of the year, management remains confident in its ability to meet full-year guidance with both ongoing savings initiatives and one-time efforts. We expect that CMS will pull on all available contingencies to meet guidance, although how the summer weather shapes up could also be a determinant. The Company expects to file an electric rate case in 2Q23 and proceedings are ongoing in the gas rate case with mostly constructive staff testimony that was recently released. See our note here.

XEL — XEL reported 1Q23 EPS ahead of estimates and maintained its full-year guidance. While facing near-term O&M pressures, the Company was able to maintain its guidance of a 2% decline for the full-year, with an improvement expected in the latter half of the year. XEL maintained its five-year capital plan, which supports its LT EPS growth rate, with incremental opportunities, including self-build generation in pending RFPs. See our note here.

DTE — DTE reported results that beat recently lowered expectations, reiterated guidance, and provided a constructive framework on how it plans to achieve the 2023 full-year outlook despite the weather and storm-impacted 1Q results, and the caveats to achieving guidance. The IRP and electric rate cases both appear to be leaning toward settlements with the outcomes likely learned over the summer. Strong economic activity in DTE's service territory (partly linked to the IRA), increasing electrification and a strong case for increased and accelerated resilience spending put the Company in a comfortable position to maintain the longer-term 6-8% growth rate. See our note here.

ETR — ETR reported results below consensus estimates as the utility faced milder weather, but the Company reaffirmed its full-year guidance and long-term outlook. SERI proceedings remain an overhang, and progress remains stalled while awaiting further clarity from FERC on its December 2022 order. SERI is expected to provide clarity sooner than later, at which point ETR could resume settlement talks with the regulators outside of MS. ETR settled on all the material issues in its TX GRC and expects to file a settlement shortly while remaining active with an MS FRP and its LA and NO grid resilience filings. See our note here.

AGR — AGR reported a below-consensus quarter, as network earnings fell below our forecast. While the Company maintained guidance of $2.20-$2.35 for 2023, we believe that the timing of the PNM merger and any related equity issuance will ultimately determine the 2023 outlook. Our estimates do not include PNM at present. A favorable NECEC outcome should lead toward a restart of construction, and we expect to hear more on the timing by the 2Q call. Management extended the deadline for the PNM merger agreement to July 20 and is still waiting for the NM Supreme Court to decide on remanding the case to the PRC. Vineyard Wind construction appears to be moving as planned, which is encouraging, but we have not heard of progress on renegotiating Commonwealth and Park City. Overall, we view the NECEC outcome as a distinct positive but remain cautious as we wait for an outcome on PNM and the NY, CT, and ME rate cases that are currently pending. See our note here.

NEE — NEE reported an above-consensus quarter, and as expected, reiterated its multiyear 6-8% EPS growth guidance. The NEER portfolio is growing beyond wind and solar as NEP adds RNG, clean hydrogen, and transmission to the mix. Solar import constraints are abating as NEE suppliers relocate supply chains and the UFLPA-related certification process becomes more streamlined. The bulk of the call, however, centered on questions around NEP, the valuation for the recent dropdown, and the upcoming dilution from CEPF conversions. Here management also reiterated the multiyear 12-15% DPU growth rate while highlighting the multiple growth levers available for NEP. See our note here.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. This communication is intended solely for use by KBCMI clients. The recipient agrees not to forward or copy the information to any other person without the express written consent of KBCMI.

Watt's on Tap & Catalyst of the Week

Catalyst to Watch This Week: U.S. EPA Proposal for CO2 Reductions at Gas Plants

The rule would require best available technology for gas fired plants to include carbon capture and sequestration technology. The compliance timeline could be 2040, and that compliance would be against an emissions cap and could be met through a technology such as H2 blending rather than CCS. Please see our report: Proposed EPA Power Plant Rule; ESG Thoughts.

The Analyst Conviction Index (ACI)

The ACI = (# of buy ratings - # of sell ratings)/Total # of ratings. We show the sorted ACIs for our regulated utility, power, and water coverage stocks in (Figure 14) below. The graph also shows absolute number of buy, hold, and sell ratings by company. We also track the change in the ACI over the last 12 weeks (Figure 15) to try to gauge where the sell-side consensus view is shifting.

Valuation Method and Risk Statement

North America Utilities: Our valuation methodology for the group is price to earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) Clean Energy Transition: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

Water Utilities: Our valuation methodology for the group is price-to-earnings based. Our methodology includes: 1) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; and 2) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%.

North American utilities: We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

IPPs: We identify the following risks for the sector: Power prices, fuel prices, capacity prices, supply and demand for electricity, extreme weather, economic conditions, and cost of financing and collateral hedging.

Water Utilities: We identify the following risks: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 28 April 2023 10:33 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	54%	22%
Neutral	FSR is between -6% and 6% of the MRA.	36%	21%
Sell	FSR is > 6% below the MRA.	10%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2023.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Gregg Orrill, Jon Windham, CFA, Ross Fowler, CFA, William Appicelli, CFA, William Grippin, CFA.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2.**Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. Where an analyst of UBS Europe SE, France Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, France Branch. **Spain:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Spain Branch. Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch.**South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client´s profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/research-methodology.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render(s) services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering material term sheet, research report, other product or service documentation or any other

Alert

April 24, 2023

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: D, SO, DUK, AGR, XEL, EXC, FE, ETR, NEE, FERC

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

1Q earnings begin with NEE, AGR, ETR, CNP, DTE, CMS, XEL, SO, FE, POR, and NWE scheduled to report this week. This week, we are tracking D's OSW rider proceedings, SO's VA natural gas rate case, and DUK's OH natural gas rate case. In other news, a jury in the NECEC case in ME gives AGR a favorable outcome; FERC Chair addresses interconnection queue reform and expects a ruling in the coming months; Energy Secretary asks Congress for more support to address transformer shortages; FERC issues a rule to incentivize utilities to invest in cybersecurity; the MN PUC issues an order approving XEL's natural gas rate case settlement; a DE Judge remands DPL's 2020 rate case back to the PSC for further findings; the NJ BPU releases results of JCP&L audit; ETR NO files the final resilience plan with the CCNO; AGR files its revised Storage Implementation Plan with NY PSC, and NEER announces plans to develop 1 GW of solar in CO.

Earnings Calendar

1Q earnings begin: NEE, AGR, ETR, CNP, DTE, CMS, XEL, SO, FE, POR, and NWE are scheduled to report this week (see calendar below). Our recently published preview, It's Been a Rough Start to the Year, includes our thesis, expectations, and estimates for our coverage.

Figure 1 - Earnings Calendar

1Q23 Utilities Earnings Calls			
Company Name	Ticker	Date	Time (ET)
NextEra Energy Inc	NEE	4/25/2023	9:00 AM
Avangrid Inc	AGR	4/26/2023	10:00 AM
Entergy Corp	ETR	4/26/2023	11:00 AM
CenterPoint Energy Inc	CNP	4/27/2023	8:00 AM
DTE Energy Co	DTE	4/27/2023	8:00 AM
CMS Energy Corp	CMS	4/27/2023	9:00 AM
Xcel Energy Inc	XEL	4/27/2023	10:00 AM
Southern Co	SO	4/27/2023	1:00 PM
FirstEnergy Corp	FE	4/28/2023	10:00 AM
Portland General Electric Co	POR	4/28/2023	11:00 AM
NorthWestern Corp	NWE	4/28/2023	3:30 PM

Regulatory Calendar

D — Rebuttal testimony for the OSW rider of the CVOW project is due on April 26: Staff recommended a $271M revenue increase, in line with D's request to recover $271M through a rate adjustment clause for the rate year beginning September 1, 2023. A slight difference between the two calculations was from the cost of debt calculation. We do not expect this rider filing to be contentious after a constructive settlement was approved to replace the performance guarantee in the CVOW approval with a cost-sharing approach for capital costs exceeding the budget, including an enhanced SCC review of operating performance. D is expected to file a true-up for the calendar year 2022 in its 2023 annual update filing.

SO — Rebuttal testimony in SO's Virginia natural gas rate case is due on April 28: The Attorney General's Office recommended a $31M revenue increase, premised on SO's current capital structure of 53.2% equity and a 9.5% ROE placeholder. This compares

to SO's $69M revenue increase request, premised on a 10.35% ROE and 53.2% equity. The request includes the recovery of $4M through the Steps to Advance VA Energy program rider, the recovery of $445M of infrastructure investments from 2020-2022, and an incremental $100M of investments expected in 2023. Interim rates of $69M went into effect on January 1. An SCC decision is likely in 3Q23.

DUK — Intervenor testimony in DUK's OH natural gas rate case is due on April 28: Staff recommended a revenue increase of $24M-$36M, premised on 9.54% ROE/52.32% equity. This compares to DUK's request for a ~$49M revenue increase based on a 10.3% ROE. Since the last rate case filing in OH in 2012, DUK has invested $1.4B that it is seeking to add to the rate base and roll the accelerated main replacement program rider into base rates. In the 2012 rate case, DUK entered a settlement to leave gas rates unchanged and used a 9.84% ROE and 53.5% equity layer.

Recent Developments for Companies Under Our Coverage

From our midweek: AEP and Liberty terminate the KY Power transaction; MT House proposes new environmental review rules; FE seeks early termination of its PPA for the 205 MW Warrior Run coal plant; FERC rejects SPP's plan for self-funding of grid upgrades; GP and PSC Staff file settlement in fuel cost recovery application; the Attorney General's Office files testimony in AVA's AK rate case; DTE commences operations at a 225 MW wind project, and Staff files testimony in CMS's MI gas rate case.

AGR — Jury in AGR's NECEC referendum trial votes 9-0 in favor of AGR: A jury in the ME Business and Consumer Court voted 9-0 vote in favor of AGR's constitutional right to resume the development of the $1.4B New England Clean Energy Connect transmission project, finding that AGR had completed enough construction at the time of the referendum-led suspension to have a vested right to continue work on the project. The outcome was in line with expectations, especially after the ME Supreme Court's unanimous decision that also found the referendum unconstitutional and remanded the case back to the lower court. A formal judgment from a ME judge based on the jury's decision should be imminent. The ruling can be appealed to the ME Supreme Judicial Court. The decision is a meaningful positive for AGR but given the delay and the changed cost environment, AGR may need to revisit the contract terms to maintain project economics and also evaluate the August 2025 COD. At the end of 2022, AGR capitalized $585M of costs associated with the project. Construction began in January 2021 but was halted after the referendum vote in November 2021. NECEC is a 1.2 GW transmission project connecting hydropower from Quebec to New England customers. See a history of the proceedings here and here.

FERC Chair expresses optimism that an interconnection queue reform ruling is imminent: At the most recent Open Meeting, FERC Chair Willie Phillips addressed interconnection queue reforms and expressed optimism that a final rule could come in the coming months.

- The proceedings under FERC Docket RM22-14 have been ongoing with a NOPR seeking input on clearing the backlogs in the interconnection queue and improving procedures. Among the items the FERC sought input are: 1) implement a first-ready, first-served cluster study process in which the transmission providers will conduct large studies that include multiple generating facilities rather than individual studies for each facility; 2) improve the processing speed by imposing firm deadlines and penalties if transmission owners fail to complete the interconnections on time; 3) use technological advancements into the process to allow more than one resource to co-locate on a shared site behind a single point of interconnection and share a single interconnection request; and 4) update modeling and performance requirements to improve system reliability for non-synchronous generating facilities.
- There appears to be consensus on approving projects on a cluster basis rather than a one-off basis and considering projects on a first-ready, first-served basis. But beyond that, disagreements emerge. Utilities and ISOs are asking for developers to provide contractual PPAs or put up commercial readiness deposits when asking for a project review. Developers feel this would be an undue financial burden on them and that readiness should be demonstrable in other ways. The utilities are also cautioning against FERC imposing too many additional constraints. We believe this goes back to them wanting to preserve their discretion in allowing projects and maintaining territorial control.
- According to a recent report, a surge in renewable generation and energy storage in 2022 has lengthened the generator interconnection queue backlogs. FERC quotes Berkley National Lab data that says the total capacity active in queues was ~2 GW. The time spent by projects in the interconnection queues has increased to 3.7 years from 2.1 years. The surge in interconnection requests has also led to a sharp increase in the average cost to interconnect, with the cost of broader network upgrades driving most of the rise.
- Another docket that must move forward for the interconnection issue to be truly resolved is the one that will address cost allocation to facilitate renewables integration (FERC Docket RM21-17). The proposal gives states reasonable power in that transmission providers will be asked to seek state approvals regarding cost allocation for the transmission facilities selected and establish a cost allocation method in agreement with the states. Here, too, there is significant disagreement between utilities and clean energy proponents.

U.S. Energy Secretary Granholm asks for Congressional support to address transformer shortages:

- Energy Secretary Granholm and lawmakers discussed options to address the transformer shortage during hearings held by the Senate Energy and Natural Resources Committee as Congress works on approving the FY24 budget. The lawmakers are

Sophie Karp (917) 368-2361 / sophie.karp@key.com

considering including $1B-$2B in funding for easing the shortage, an ITC or PTC for transformer manufacturing facilities, or a one-time investment in manufacturing facilities. In December, a group of House Democrats lobbied Congress to enact the DPA and seek $1.8B in emergency funding to develop a domestic supply chain to produce transformers, and power industry groups wrote a letter to Congress asking for $1B in DPA funding to help address the supply chain crisis for electric distribution transformers. The delays in securing transformers could potentially impact grid reliability, delay grid expansion to accommodate renewable sources, and create challenges for building out EV infrastructure. Lead times for transformers have increased by 443% from 2020 to 2022, leading to construction and electrification projects being deferred or canceled by utilities and the housing industry.

- Lawmakers also cautioned against implementing new efficiency standards for distribution transformers proposed by the DOE that are intended to come into effect in 2027. The group contends that the proposed rule would require manufacturers to transition to a different type of steel (amorphous steel cores that are considered more efficient than transformers made of grain-oriented electrical steel), which is untested, less flexible, and more expensive. Also of concern is the fact that there is only a single domestic supplier of amorphous steel cores today, and it is unlikely to meet the required demand. The DOE contends that since the majority of electricity generated at the utility scale goes through at least one transformer, small efficiency improvements can significantly reduce emissions and improve electricity generation.
- In the meantime, utilities are establishing new supply chains to ensure the supply of transformers and have set up programs to refurbish existing ones to extend their lives.

FERC issues rule to incentivize utilities to invest in cybersecurity: FERC issued a final rule in RM22-19 to make incentive-based rate treatment available for utilities that invest in Advanced Cybersecurity Technology and participate in cybersecurity threat information-sharing programs. The final rule tracks the NOPR issued in September but includes expanding the definition of eligible cybersecurity investments to be completed on a case-by-case basis and allowing utilities to seek incentives for early compliance with new cybersecurity reliability standards. The final rule also will enable utilities to defer expenses and include the amortized portion in its rate base. FERC decided to exclude the 200 bps equity adder. The new rule will take effect 60 days after it's published in the Federal Register.

XEL — MN PUC issues order approving XEL's natural gas rate case settlement: The MN PUC issued an order approving XEL's settlement for a $20.5M revenue increase, premised on a 9.57% ROE and 52.5% equity. The settlement is net of $28.5M, which is currently being recovered through riders. XEL is also allowed to implement a revenue decoupling mechanism. The MN PUC approved the settlement at its March 23 meeting. NSP-MN filed a gas rate case in November 2021 requesting a $36M rate increase based on a 10.5% ROE and an equity ratio of 52.5%. Interim rates of $25M went into effect on January 1, 2022.

EXC — DE judge remands Delmarva's 2020 rate case back to the PSC for further findings: A DE Superior Court judge issued an opinion reversing and remanding Order 9953, which authorized a $16.7M revenue increase in Delmarva's 2020 electric GRC (Docket: 9953). The judge remanded the order back to the PSC and requested an explanation in its decision to oppose the hearing examiner's proposed findings to exclude prepaid pension assets and the other post-retirement employee benefits liability into the rate base. Rates went into effect on September 1, 2021, but were appealed by the DE Division of the Public Advocate. Delmarva is currently in another rate case seeking a $59M electric revenue increase (Docket: 22-0897) in DE, with new rates expected to go into effect on July 15, 2023.

FE — NJ BPU releases results of JCP&L audit: The NJ BPU released an audit report of FE's JCP&L conducted after the HB 6 allegations against FE. An independent consulting company conducted the audit and recommended that the BPU require FE to implement ring-fencing and corporate governance measures that would allow JCP&L to be considered an "insulated entity" by credit rating agencies and rated on its own credit characteristics. Other recommendations include JCP&L restructuring the board, creating a new management structure within JCP&L, and decentralizing control of external fair responsibilities. The report also recommended several actions to mitigate the impact of aging infrastructure on reliability. The audit was completed in two phases. Phase 1 addressed operational issues, and Phase 2 addressed affiliate transaction-related issues. Comments on the report are due by May 23.

ETR — ETR NO files the final resilience plan with the CCNO: ETR filed its ~$1B final resilience plan with the CCNO and is seeking initial approval for the first phase. The first phase is expected to cost $559M and will replace 100 transmission structures, upgrade more than 12,000 distribution poles, and underground two miles of transmission lines. ETR initially filed the 10-year investment plan (Docket: 21-03) with the CCNO proposing grid resilience, hardening projects, and microgrids. The Company will seek cost recovery through a forward-looking rider. ETR is targeting a CCNO decision in 4Q23.

AGR — AGR files revised Storage Implementation Plan with NY PSC: AGR's NYSEG and RGE filed a revised bidding plan for the Storage Implementation Plan (18-E-0130) with the NY PSC. AGR expects to issue an RFP by July 10, 2023, and notify winning bidders by February 16, 2024. AGR seeks projects connected to the NYISO interconnection and operational before December 31, 2028, to comply with the NY PSC's in-service dates for energy storage projects. As a reminder, the NY PSC recently extended the in-service date by three years from December 31, 2025, in which state investor-owned utilities must contract and bring 350 MW of storage online. The PSC also extended maximum dispatch rights contracts to 15 years vs. the prior 10-year duration. AGR's NYSEG and RGE are required to procure 10 MW. NYS has an energy storage goal of adding 6 GW by 2030.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

NEE — NEER announces plans to develop 1 GW of solar in CO: NEE's NEER entered into an agreement with Crossroads Agriculture to develop 1 GW of solar generation in CO. NEER plans to build the two projects on ~7,500 acres of Crossroads farmland in the Eastern Plains. At the end of 2022, NEER had ~27 GW of electric generation.

Other Disclosures

KeyBanc Capital Markets is a trade name under which corporate and investment banking products and services of KeyCorp and its subsidiaries, KeyBanc Capital Markets Inc., Member FINRA/SIPC ("KBCMI"), and KeyBank National Association ("KeyBank N.A."), are marketed.

KeyBanc Capital Markets Inc. ("KBCMI") does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report has been prepared by KBCMI. The material contained herein is based on data from sources considered to be reliable; however, KBCMI does not guarantee or warrant the accuracy or completeness of the information. It is published for informational purposes only and should not be used as the primary basis of investment decisions. Neither the information nor any opinion expressed constitutes an offer, or the solicitation of an offer, to buy or sell any security. The opinions and estimates expressed reflect the current judgment of KBCMI and are subject to change without notice. This report may contain forward-looking statements, which involve risk and uncertainty. Actual results may differ significantly from the forward-looking statements. This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the specific needs of any person or entity.

No portion of an analyst's compensation is based on a specific banking transaction; however, part of his/her compensation may be based upon overall firm revenue and profitability, of which investment banking is a component. Individuals associated with KBCMI (other than the research analyst(s) listed on page 1 of this research report) may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(A), financial interest, if any, by any research analysts listed on page 1 of this report will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosure Appendix. KBCMI itself may have a position (long or short) in the securities covered in this research report and may make purchases and/or sales of those securities in the open market or otherwise without notice. As required by FINRA Rule 2241(C)(4)(F), if KBCMI, or its affiliates, beneficially own 1% or more of any class of common equity securities in the subject company(ies) in this research report, it will be disclosed in Important Disclosures, Company-specific regulatory disclosures located above in the Disclosures Appendix. AEP: No Surprise, KY Deal Breaks – Clearing Event (see our note HERE)

CMS – Intervenors file testimony in CMS Gas 2022 rate case

CA – Appeals court rejects Berkeley gas ban

DTE – Intervenors filed further discovery requests in DTE IRP proceeding

SRE – Moody's affirms SRE and SIP credit ratings

D/VA – DER procurements remain a challenge under VCEA as CE filing approved

EXC – ComEd Four trial continues to generate media headlines

ERCOT – SB6 and SB7 referred to House State Affairs Committee

CMS – Intervenors file testimony in CMS Gas 2022 rate case

- Intervenors started filing first testimony in the CMS Gas rate case.
- The AG recommends a capital structure with 50% equity capital and a return on common equity of 9.80% (vs. 9.9% currently authorized); reducing the revenue deficiency by $38.9 million.
- AG recommends a reduction in capital expenditures of $459 million and a reduction of $556.4 million to rate base for the test year, including a $213.7 million adjustment to working capital. This reduces the company's revenue deficiency by $43.3 million.
- The AG also recommends a higher residential and commercial sales forecast, which increases distribution margin revenue by $25.6 million.
- The net result is a revised revenue deficiency of $52.3 million, which is a reduction of $159.6 million from the company's requested level of $211.9 million.
- Staff recommended a 9.70% ROE and a range of 9.20% - 10.20% as reasonable.
- Staff projects a revenue deficiency of $91M, a revenue requirement decrease of $121M from the company's originally filed revenue deficiency of $212M.
- CMS originally filed for a $212M revenue increase, based on 10.25% ROE and 42.41% equity ratio net of adjustments, on a $10.3B rate base.
- Docket: U-21308.

Guggenheim takeaway: *FYI. Initial datapoints from the regulatory bid ask from major parties like Staff and AG. The revenue deficiency recommendations show a wider bid-ask that the prior case which had a recommendation set at 74% of ask vs. 43% in the current iteration. The capital structure parameters are in line with our expectations.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

CA – Appeals court rejects Berkeley gas ban

- A federal appeals court overturned a Berkeley, CA city gas ban because it was found to overstep federal jurisdiction.
- The restaurant owners association challenged the gas ban in appellate court.
- The 2020 ordinance was the first in kind on banning natural gas construction.
- The court of appeals reversed a lower court decision that previously upheld the ordinance.
- More in media here.

Guggenheim takeaway:*FYI. The appeals court decision sets a precedent for many other cases where local ordinance set bans on gas use or construction. Interesting datapoint as local government tries to regulate energy choice (in particular, appliance choice).*

DTE – Intervenors filed further discovery requests in DTE IRP proceeding

- Intervenors requested further discovery in the DTE IRP.
- Intervenors in DTE's integrated resource plan, including MPSC staff and DTE, previously filed rebuttal testimony on a variety of issues.
- As a reminder, the DTE IRP plans to invest $9B over the next 10 years, nearly double the pace of cleaner generation spending in the current plan ~$3B for 5 years.
- The plan focuses on developing more than 15,000 MW of renewables over 20 years (6,500 MW of solar; 8,900 MW of wind) and 1,810 MW of battery storage.
- The proposal ceases coal-fired generation at Belle River and converts it to a 1,270 MW natural gas peaking resource in 2025 (Unit 1) and 2026 (Unit 2), with the converted Belle River peaking resource retiring by 2040; retires Monroe Power Plant Units 3 and 4, a total of 1,535 MW of coal-fired generation in 2028 (12 years earlier than previously announced) and retires Units 1 and 2, 1,531 MW of coal-fired generation, in 2035 (5 years early).
- More thoughts on the IRP in our note here.
- Docket: U-21193

Guggenheim takeaway:*FYI. Discussions continue in the IRP proceeding as the process moves past discovery phase. Intervenor points of support and contention have been varied in disclosures.*

SRE – Moody's affirms SRE and SIP credit ratings

- Moody's affirmed its Baa3 rating for SIP (SRE unregulated subsidiary).
- Moody's affirmed its Baa2 rating for SRE parent and maintained a stable outlook.

Guggenheim takeaway:*FYI. As we anticipated, the credit rating agency did not see any deterioration in SRE or SIP credit quality.*

D/VA ─ DER procurements remain a challenge under VCEA as CE filing approved

- Local media reporting around the latest annual clean energy filing by DEV under the VCEA has highlighted ongoing challenges with procuring sufficient DER resources.
- "The low success rate for these small systems is in part an indication that project developers are having a difficult time navigating the RFP process and successfully signing contracts with Dominion… This is a concern as the VCEA clearly embodies the recognition of the importance of distributed generation." – SEIA comments HERE
- The most recent DER FRP sought 175MWs but received only 22MWs.
- More HERE.
- The 800MW of total solar and storage projects in D's filing were approved on Friday, alongside 300MWs of PPAs across 12 projects.
- More HERE.

Guggenheim takeaway: *Some interesting data points on the rather straightforward annual CE filing process, with the utility facing a ~1.1GW target under the VCEA for distributed projects alone, resulting in some of the challenges/frictions highlighted in media above as the SCC Staff monitor the process and stakeholders advocate for their own positions (e.g., developers for more PPAs). We continue to watch the DER procurement process in*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

particular for its tangential readthrough to neighboring states like DC and MD, where space constraints make meeting even more aggressive decarbonization targets challenging.

EXC – ComEd Four trial continues to generate media headlines

- The ongoing trial of former EXC executive Anne Pramaggiore and three others continues to generate significant headlines as the executive took the stand for the 2nd day.
- The case continues to paint a clearer picture of prior lobbying efforts as details are presented by both sides to the jury.
- More HERE.

Guggenheim takeaway: *We continue to monitor the case for any potential material details on current EXC or CEG executives or ComEd readthrough as testimony remains ongoing. As a reminder, this matter was the driver of the July 2020 deferred prosecution agreement between the utility and the US Attorney's Office for the Northern District of Illinois.*

ERCOT – SB6 and SB7 referred to House State Affairs Committee

- The two bills were read for the first time and referred to the committee after having been transmitted from the Senate.
- More HERE.

Guggenheim takeaway: *Procedural FYI - we continue to see room for more pushback in the House and potentially from the Governor's office as the packages advance – some stakeholders are already aligning against specific parts of both bills. For both bills, we have heard firsthand and in media that they could have chilling effects on new investment –* ***most recently with our expert conversation (note HERE****). We continue to monitor closely for indications on the Governor's willingness to part from the PCM and potentially support the direct expenditures needed under SB6.*

Wednesday, July 12th

8:30 AM | Porsche Racing Experience
Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

1:00 PM | Lunch with Southern Company (SO) and Georgia Power C-Suite
Kim Greene, *Chair, President & Chief Executive Officer (Georgia Power)*
Dan Tucker, *Chief Financial Officer (SO)*
Aaron Abramovitz, *Chief Financial Officer (Georgia Power)*
Among others

Company Information

Market Cap: $73.3bn

Southern Co (SO) is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, and Tennessee. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA. (Source: FactSet)

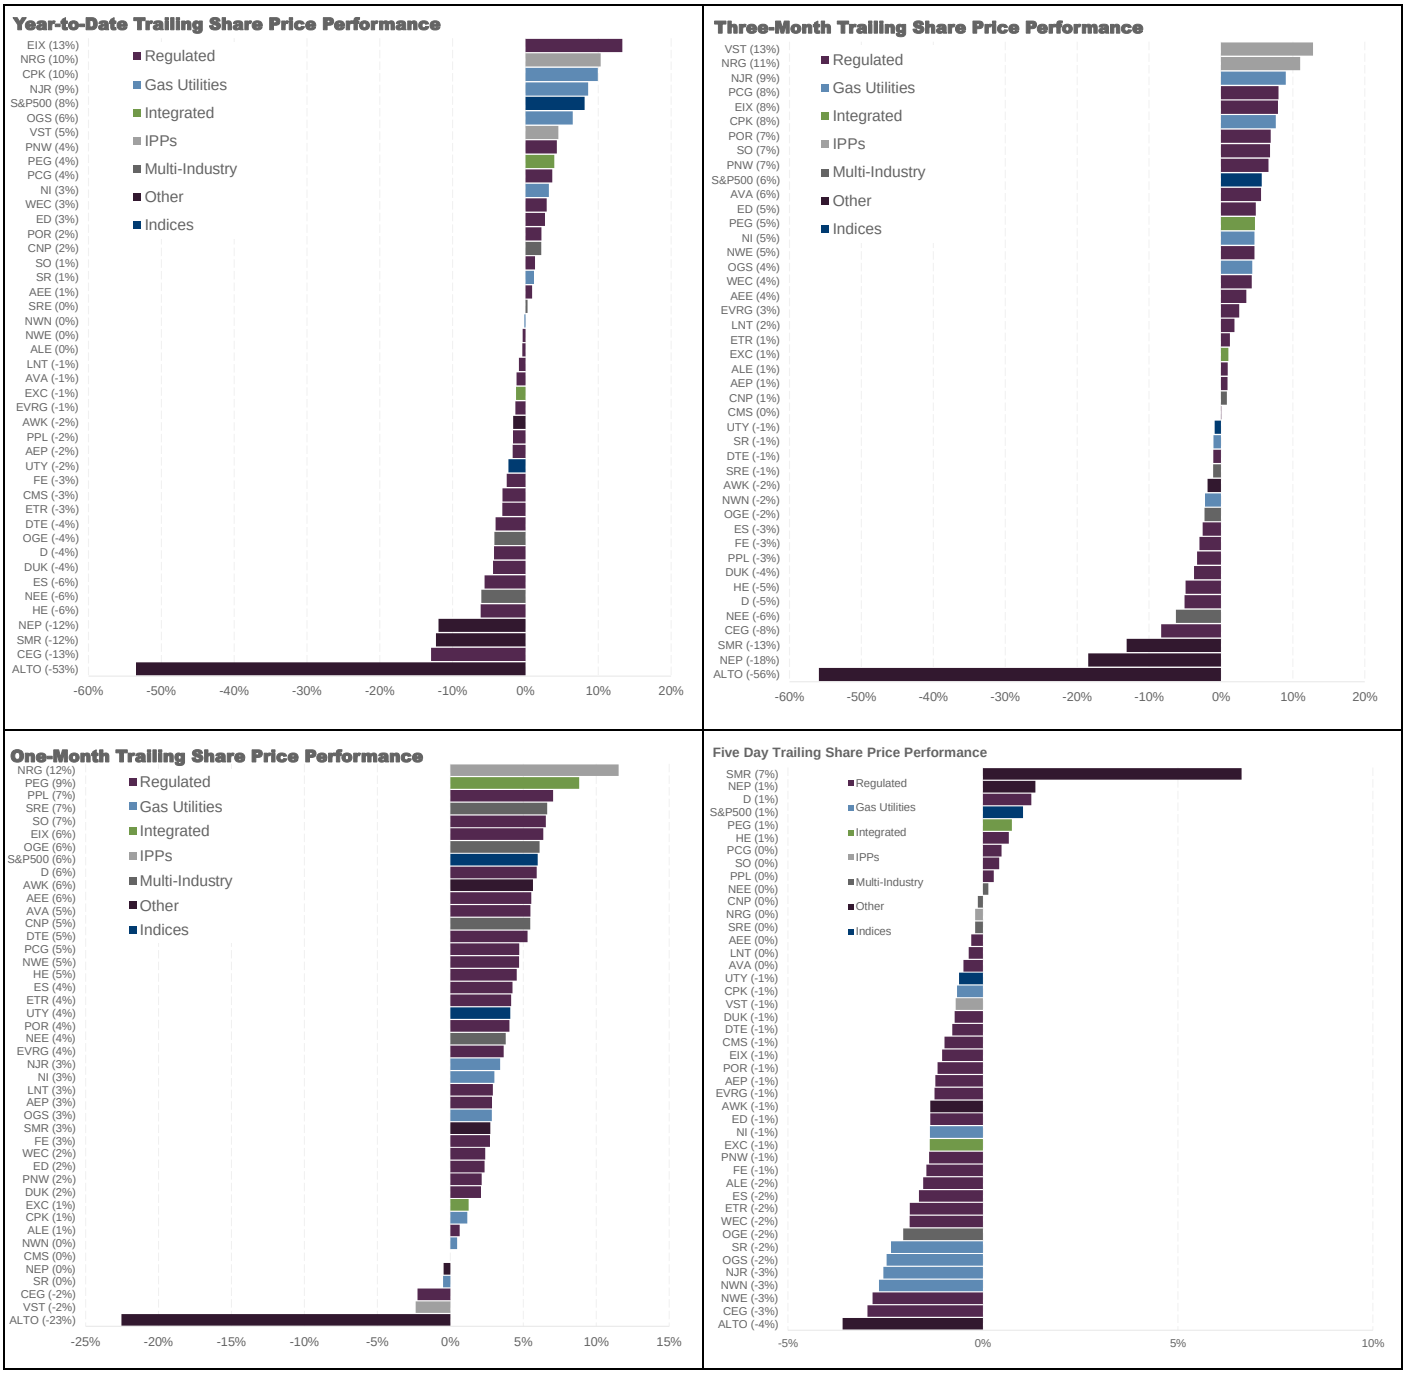
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Alert

April 17, 2023

Energy: Electric Utilities

Heads Up — The Week Ahead in Utilities: CMS, DUK, ED, ETR, D, AEP, EXC, AEE, AGR

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

This week, we are tracking proceedings in CMS's MI gas rate case, DUK's OH natural gas rate case, ED's NY steam rate case, and FERC's open meeting. In other news, ETR continues constructive settlement discussions in TX rate case; Staff files testimony for the OSW rider of the CVOW project; the VA SCC approves D to recover 800 MW of renewable power; VA Senate and House approve amended regulatory framework bills, reject offshore wind bill; Senate confirms MD governor appointee to the PSC; several bills supporting renewables/energy storage head to MD governor's desk; the MO PSC approves AEE's acquisition of 150 MW solar project and an REC program; and the ME Supreme Court orders rewording of utility municipalization question before November ballot.

Regulatory Calendar

CMS — Staff and intervenor testimony in CMS's MI gas rate case is due on April 17: In December, CMS filed a rate case with the MI PSC seeking a $212M revenue increase, premised on a 10.25% ROE and 51.5% equity. The rate increase request stems from planned and ongoing infrastructure investments to maintain grid reliability. Similar to its electric rate case, CMS is seeking pension and OPEB deferral mechanisms that should help to reduce volatility in annual earnings. Hearings are set to begin on May 22, and CMS is seeking new rates to become effective on October 1.

FERC — FERC's Open Meeting is scheduled for April 20: A copy of the Sunshine Notice is included here. Notably, FERC is expected to take up AEP's OH ROE adder docket (EL22-34-001).

DUK — Intervenor testimony in DUK's OH natural gas rate case is due on April 21: The OH PUC approved DUK's request to extend the intervenor testimony and DUK's supplemental testimony from April 11. Staff recommended a revenue increase in the range of $24M-$36M, premised on 9.54% ROE/52.32% equity. This compares to DUK's request for a ~$49M revenue increase based on a 10.3% ROE. Since the last rate case filing in OH in 2012, DUK has made capital investments of $1.4B that it is seeking to add to the rate base, as well as rolling the accelerated main replacement program rider into base rates. In the 2012 rate case, DUK entered a settlement to leave gas rates unchanged and used a 9.84% ROE and 53.5% equity layer.

ED — Rebuttal testimony in ED's NY steam rate case is due on April 21: Staff recommended a $94M revenue increase, premised on a 9% ROE and 48% equity. This compares to ED's $141M revenue request, 10% ROE, and 50% equity layer. In addition to the lower ROE and equity, Staff's forecast for lower O&M and higher sales revenue are the main drivers of the variance. Staff also recommends denying ED's request for a revenue decoupling mechanism. A PSC decision is expected in October 2023, with new rates going into effect on November 1, 2023.

Recent Developments for Companies Under Our Coverage

From our midweek: AGR and PNM agree to extend the merger agreement until July 20; NEE signs a 15-year PPA with CA CCA for a long-duration energy storage project; D agrees to acquire a 108 MW solar project in VA; AVA signs agreements for wind and natural gas resources; AVA signs an agreement for RNG resources; the MD governor plans to announce a new appointee to the PSC; DTE and Toyota announce renewables partnership through DTE's MI Green Power; and the EIA releases the April Short-Term Energy Outlook.

ETR —Settlement discussions continue in the TX rate case: ETR TX filed a status report with the TX PUC and noted that settlement discussions are ongoing. ETR did not believe an extension to the May 23 deadline was necessary at this time, an encouraging sign that a settlement could be reached in the NT. The next status report is due on May 12. As a reminder, Staff recommended a $76.8M revenue rate increase based on a 9.45% ROE and maintained ETR's requested equity layer of 51.21%. This compares to ETR's request for a $131M revenue increase based on a 10.8% ROE (10.5% ROE + a 30 bps performance added) and a 51.21% equity layer. Any approved rate change will be effective retroactively to December 3, 2022.

D — Staff files testimony for the OSW rider related to the CVOW project: Staff recommended a $271M revenue increase, in line with D's request to recover $271M through a rate adjustment clause for the rate year beginning September 1, 2023. A slight difference between the two calculations was from the cost of debt calculation. We do not expect this rider filing to be contentious after a constructive settlement was approved to replace the performance guarantee in the CVOW approval with a cost-sharing approach for capital costs exceeding the budget, including an enhanced SCC review of operating performance. D is expected to file a true-up for the calendar year 2022 in its 2023 annual update filing.

D — VA SCC approves 800 MW of renewable power: The VA SCC issued an order approving D's 2022 renewable energy portfolio standard (RPS) program filing to add 800 MW of renewable power. The order approves D to construct and operate seven utility-scale solar projects and one standalone storage project, recover costs for two distributed solar projects, and enter into 13 PPAs for solar and energy storage resources. D can recover the associated costs through the Rider CE rate adjustment clause. D is required to file its RPS plans and petitions for new solar and onshore wind capacity annually. The RPS program was established as part of the VA Clean Economy Act, which targets 100% carbon-free generation by 2045.

D, AEP — VA Senate and House approve amended regulatory framework bills, reject changes to offshore wind bill: The governor has until May 15 to act on the bills, which will likely be signed as the governor's amendments were accepted. The new laws will go into effect on July 1.

- **SB 1265:** The Senate and House passed SB 1265 and HB 1770 (see our review of the bills here.) Both chambers previously approved the bills, but the governor proposed modest modifications. One of the modifications eliminated a reason the SCC could allow D to earn a slightly higher ROE, and another modification broadened the authority to spread out the impact of rising fuel costs. The legislative solution will mark a "reset" for Dominion's VA utility and help the Company formulate its corporate restructuring strategy. The bills set D's ROE at 9.7% for two years, allowing for biennial rate filings and fuel cost recovery-related securitization bonds.
- **HB 1777:** Similarly, the chambers approved HB 1777 and SB 1075 to include some APCo-related measures. APCo will begin biennial reviews after its last triennial review filing in March 2024 to cover earnings for 2023. APCo's ROE deadband will now range from 100 bps below to 100 bps above, up from 75 bps in each direction.
- **SB 1441:** The Senate and House declined to accept the amended version of SB 1441. The governor amended the bill to require a competitive procurement process for any second wave of offshore wind development in VA. SB 1441 was written to require the VA SCC to consider the economic development benefits of offshore wind projects when considering the cost recovery of the projects. The bill also proposed accelerating the deadline for offshore wind development to 2032 from 2034.

EXC — MD governor appointee confirmed by Senate: The confirmed Governor Wes Moore nominee, Frederick Hoover, is to replace current PSC Chair Jason Stanek at the end of his term in June. The MD PSC is a five-member commission with the governor nominating the members and the Senate confirming them. MD Governor Wes Moore announced that he intends to name Kumar Barve (D) to the MD PSC. Governor Moore will still need to appoint one more commissioner to replace either of Commissioners Odogwu Obi Linton or Patrice Bubar. Mr. Bubar is awaiting Senate confirmation after being nominated by the former MD governor. He may continue to serve until or unless the Senate confirms a nominee during this session or the governor names a replacement following adjournment. We are currently tracking FE's Potomac Edison rate case, and EXC's BGE and PEPCO are expected to file multiyear rate cases later this year.

EXC — Several bills supporting renewables/energy storage head to MD governor's desk: The MD legislative session adjourned on April 10, but bills may be presented to the governor until April 30, or an extended session until May 10 could be called. Governor Moore has until May 30 to veto any bills that reach his desk or allow them to become law by taking no action.

- **HB 910:** The Senate and House passed HB 910, requiring IOUs to install or contract 750 MW of renewables by 2027, 1,500 MW by 2030, and 3,000 MW by 2033. The program includes a system of energy storage credits and market-based incentives.
- **SB 143:** SB 143 passed both chambers and awaits the governor's action. The bill proposes implementing net metering and allowing eligible customers to accrue net excess generation monthly. It directs the PSC to establish a framework for valuing accrued net excess generation.
- **SB 781:** SB 781 also passed both chambers and proposes directing the PSC to analyze transmission system expansion options for accommodating offshore wind and requires the PSC to issue competitive solicitations for proposals for offshore wind transmission facilities and transmission upgrades/expansions. The bill requires the PSC to issue a procurement for offshore wind before August 1, 2024.

AEE — MO PSC approves AEE acquisition of 150 MW solar project, REC program: The MO PSC approved AEE to acquire the planned 150 MW Boomtown Solar Project. Invenergy Renewables is building the project and will transfer ownership to AEE once construction is complete. The project is expected to enter service in 2024 and will be part of AEE's Renewable Solutions program, also approved by the MO PSC. The subscription-based program allows customers to subscribe to a voluntary renewable energy purchasing program. The participants will contribute a portion of the cost for Boomtown in exchange for RECs.

Sophie Karp
(917) 368-2361 / sophie.karp@key.com

AGR — ME Supreme Court orders rewording of utility municipalization ballot question before November: The ME Supreme Court found the proposed wording in the ballot initiative for utility municipalization confusing and ordered the ME Secretary of State, Shenna Bellows, to revise the ballot question language. Once reworded, the initiative will be on the November ballot and asks for voter approval for utility municipalization and creating a public utility called Pine Tree Power through a public buyout of the IOUs' assets. The ME Affordable Energy Coalition filed a competing referendum requiring voter approval before a state can take over $1B in debt to municipalize IOUs, which is supported by the state IOUs, including AGR.

WATTS COOKING? Weekly

Topics: EXC; Michigan legislation; PNM

Our view: Weekly developments that we found to be of interest.

WATTS on Your Mind

This past week, our conversations with generalists continued to revolve around the defensiveness of utilities. Stocks that investors focused on included NEE, CMS, XEL, and EXC. The interest in EXC seems to stem from the company's low-risk profile (exclusively transmission and distribution assets) and lower valuation, at a half-turn discount to other defensive utilities. Specifically, investors look at ED as a reasonable comparable stock though it trades at a meaningful premium to EXC (over 2-turn premium). While we recognize EXC's attractive T&D profile, we note that its near-term EPS growth is less attractive; we expect EPS to grow 5% annually from 2022 to 2024. And its balance sheet is more levered. However, we believe the comparison may be flawed, as ED is trading at a surprising premium. After all, it is the top stock on our Least Favorite Plays list (see table to the right). Ultimately we believe that EXC may be more of a second half 2023 story, as the ComEd rate case progresses. An Illinois commission final order is scheduled for December 2023.

WATTS on Our Mind

This Thursday, the Michigan legislative body introduced a package setting out climate plans to align with Governor Gretchen Whitmer's Climate Plan, which was introduced in 2022. The package of 7 bills includes language that the state's utilities would need to phase out all coal generation by 2030, require utilities to deliver 100% carbon-free energy by 2035, and includes other energy efficiency measures. **Our view. While CMS expects to retire all of its coal facilities by 2025, its current plan does not include carbon-free energy by 2035. While the bill seems aggressive, the Michigan legislative body has typically worked well with the utilities and regulators in the state. We expect the bill to be heavily debated, mainly focusing on customer rate pressures and generation reliability of implementing more renewables. We would expect battery deployment to play a significant role in reaching carbon-free energy goals.**

On Wednesday, PNM and AGR announced the extension of the merger agreement through July 20 from the prior expiration date of April 20. **Our view: The extension was expected since a somewhat slower-than-expected procedural timeline would not have allowed for the transaction to close in April. We also think the market anticipated the extension and expects the Supreme Court to remand the case back to the NMPRC. Questions from investors have been on the lighter side recently, which we expect is due to the better performance from the larger utility group versus earlier in the year when PNM's multiple was rich compared to peers.**

WATTS on the ShUFL

Our ShUFL is unchanged this week.

Shelby's Utility Focus List (ShUFL)

Best Plays

Capital Markets

Required disclosures

Conflicts disclosures

This product constitutes a compendium report (covers six or more subject companies). As such, RBC Capital Markets chooses to provide specific disclosures for the subject companies by reference. To access conflict of interest and other disclosures for the subject companies, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1. These disclosures are also available by sending a written request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7 or an email to rbcinsight@rbccm.com.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

With regard to the MAR investment recommendation requirements in relation to relevant securities, a member company of Royal Bank of Canada, together with its affiliates, may have a net long or short financial interest in excess of 0.5% of the total issued share capital of the entities mentioned in the investment recommendation. Information relating to this is available upon request from your RBC investment advisor or institutional salesperson.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Mar-2023

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	824	56.05	236	28.64
HOLD [Sector Perform]	591	40.20	132	22.34
SELL [Underperform]	55	3.74	4	7.27

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

The 12 month history of Quick Takes can be viewed at RBC Insight.

Analyst certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Third-party disclaimers

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's Financial Services LLC ("S&P") and is licensed for use by RBC. Neither MSCI, S&P, nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

RBC Capital Markets disclaims all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any statements made to the media or via social media that are in turn quoted in this report, or otherwise reproduced graphically for informational purposes.

Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Europe) GmbH, Royal Bank of Canada, Hong Kong Branch, Royal Bank of Canada, Singapore Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets'' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. RBC Capital Markets may be restricted from publishing research reports, from time to time, due to regulatory restrictions and/ or internal compliance policies. If this is the case, the latest published research reports available to clients may not reflect recent material changes in the applicable industry and/or applicable subject companies. RBC Capital Markets research reports are current only as of the date set forth on the research reports. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct, indirect or consequential loss arising from, or in connection with, any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior written consent of RBC Capital Markets in each instance.

ERCOT – Generators and stakeholder continue to examine tweaks to Firm Fuel Supply Service

EXC – Study in BGE MYP docket details extensive economic impacts of 2024-2026 investments

SO – Proposed stipulation filed in Georgia Power Company's Fuel Cost Recovery case

DTE – DTE files discovery responses for 2023 rate case request

PCG/EIX/SRE – OEIS files data requests on CA Utilities updated wildfire mitigation plans for 2023-2025

ERCOT – Generators and stakeholder continue to examine tweaks to Firm Fuel Supply Service

- The program's first iteration this winter was intended to renumerate generators with onsite fuel for the winter months.
- The latest stakeholder process seeks to build on and improve the inaugural ~$50m program.
- More HERE.

Guggenheim takeaway: *Minor FYI as the ISO continues to work on some less-visible resource adequacy measures — the focus here, in our view, remains on the legislative process and the political viability of the PCM.*

EXC – Study in BGE MYP docket details extensive economic impacts of 2024-2026 investments

- "The results of the analysis indicated that these investments are expected to have a cumulative impact of 72,077 jobs supported, and generate approximately $8.2 billion in labor income, $35.7 billion in economic output, and $1.7 billion in state tax revenue. Impacts are expected to be the largest in the years where the largest investments were made. For non-labor investments, impacts are expected to be the largest in 2026." - report
- More HERE

Guggenheim takeaway: *Interesting filing as the case remains in its early innings – as a reminder, intervenor direct testimony isn't due until 6/20/2023.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

SO – Proposed stipulation filed in Georgia Power Company's Fuel Cost Recovery case

- "As part of this agreement, the stipulating parties offer modifications to Georgia Power's original request that represent a fair compromise and balance the interests of the parties in this case…. In this stipulated agreement, the Company agrees to file by **April 24, 2023**, revised FCR-26 fuel rates updated for the actual under-recovered fuel cost balance through **March 31, 2023**, and projected fuel costs utilizing a more recent natural gas price forecast, while retaining all other assumptions. Based on current trends in fuel costs, Staff anticipates that this will result in lower projected costs, and therefore lower FCR rates for customers, than contained in the Company's original filing." – **Docket 44902**, linked below
- Docket 44902

Guggenheim takeaway: *As fuel is a passthrough cost, this isn't expected to be an earnings driver for the company, but both the settlement with Staff and the tone of the commissioners could shed some light on whether the regulatory environment has changed in recent months, as we head into important prudency hearings for Vogtle. As a reminder (and also ahead of the Vogtle prudency review), please join us for our* ***2nd Annual Guggenheim Georgia Field Trip: Southern Company (SO), Racing Porsches & GA Commissioner Meetings, which will take place July 11 & 12 in Atlanta.***

DTE – DTE files discovery responses for 2023 rate case request

- DTE Electric filed a set of discovery responses for the 2023 rate case with a $622M revenue increase request.
- The rate request represents a Total Residential rate increase of 13.9%, and all customer rate increase of 11.8%.
- As a reminder, DTE is requesting a 10.25% ROE and a 50% equity ratio, including uses inflation factors of 3.6% for 2022, 3.2% for 2023, and 2.66% for 11 months of 2024. The Company is utilizing a historical test year of 2021.
- Key drivers breakdown for the request are largely focused on new investments in rate base.
  - a. Rate Base - $292M
  - b. Return on Equity – $42M
  - c. Cost of Debt and Capital Structure – $29M
  - d. Operating Expenses – $124M
  - e. Sales Margin – $102M
  - f. Other – $30M
- Docket: U-21297

Guggenheim takeaway: *FYI. The process is in the early stages of discovery that started after prehearings in March. The request is well documented with nearly 1,800 pages of direct testimony.*

PCG/EIX/SRE – OEIS files data requests on CA Utilities updated wildfire mitigation plans for 2023-2025

- OEIS started data requests related to the updated 2023-2025 wildfire mitigation plans (WMP) for CA utilities.
- The WMPs provide frameworks around the activities and accountability measures for wildfire risk reduction, including both system hardening and operation solutions (EPSS, PSPS, etc.).
- PCG in particular included the long term 10,000mi commitment to undergrounding, with total expenditures of $5.5-6.5B per year vs. $3.2-5.9B per year in the prior cycle.
- EIX/SCE includes a proportionally similar projected expenditure of $1.9-2.0B per year (a step up from $1.3-1.6B in the prior cycle).
- SDG&E filed the smallest WMP update, with recommendations for $2.24B in spending for the 2023-2025 period.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

- Stakeholders like rate advocates found concerns with the costs and bill impacts.
- PCG PR here.

Guggenheim takeaway: *FYI. The WMP filings provide a first look at the 2023-2025 wildfire risk mitigation framework and proposed expenditures. The plan filings and testimony filed with the OEIS include 1000+ pages of descriptions and exhibits that span the gamut of wildfire issues.*

SAVE THE DATE
2nd Annual Guggenheim Georgia Field Trip: Southern Company (SO)/Georgia Power C-Suites, Porsche Racing & GA Commissioner Meetings

What does Southern Company & Georgia Power C-Suite meetings, Georgia Commissioner meetings and racing Porsches on race tracks have in common? Almost nothing! But we are combining all of them for an action-packed 2 days in GA. Please join the Guggenheim Utilities Research Team in Atlanta, GA on July 11 and 12.

Dates and Location

July 11 & 12, 2023 — Atlanta, Georgia

Schedule

Tuesday, July 11th

We advise flying in the morning of Tuesday, July 11. Recommended flights to follow.

~1:00 PM | Georgia PSC Meetings
Tricia Pridemore, PSC Chair, *Commissioner*
Tim Echols, Vice-Chairman, *Commissioner*
Fitz Johnson, *Commissioner*
Lauren "Bubba" McDonald, *Commissioner*
Jason Shaw, *Commissioner*

~6:00 PM | Client Dinner with Southern Company (SO) C-Suite
Chris Womack, *President & Chief Executive Officer (Incoming)*
Dan Tucker, *Chief Financial Officer*
Scott Gammill, *VP of Investor Relations & Treasurer*
Among others

Wednesday, July 12th

8:30 AM | Porsche Racing Experience
Experience the thrill of the drive at the Porsche Experience Center. Attendees will drive vehicles from the full Porsche model range with driving coaches by their side in a race-controlled atmosphere. See: https://www.porschedriving.com/atlanta

1:00 PM | Lunch with Southern Company (SO) and Georgia Power C-Suite
Kim Greene, *Chair, President & Chief Executive Officer (Georgia Power)*
Dan Tucker, *Chief Financial Officer (SO)*
Aaron Abramovitz, *Chief Financial Officer (Georgia Power)*
Among others

Company Information

Market Cap: $73.3bn

Southern Co (SO) is a holding company, which engages in the generation and sale of electricity. It operates through the following segments: Traditional Electric Operating Companies, Southern Power and Southern Company Gas. The Traditional Electric Operating Companies segment refers to vertically integrated utilities that own generation, transmission and distribution facilities, and supplies electric services in the states of Alabama, Georgia, and Mississippi. The Southern Power segment constructs, acquires, owns, and manages generation assets such as renewable energy projects and sells electricity in the wholesale market. The Southern Company Gas segment distributes natural gas through natural gas distribution facilities in the states of Illinois, Georgia, Virginia, and Tennessee. The company was founded on November 9, 1945, and is headquartered in Atlanta, GA. (Source: FactSet)

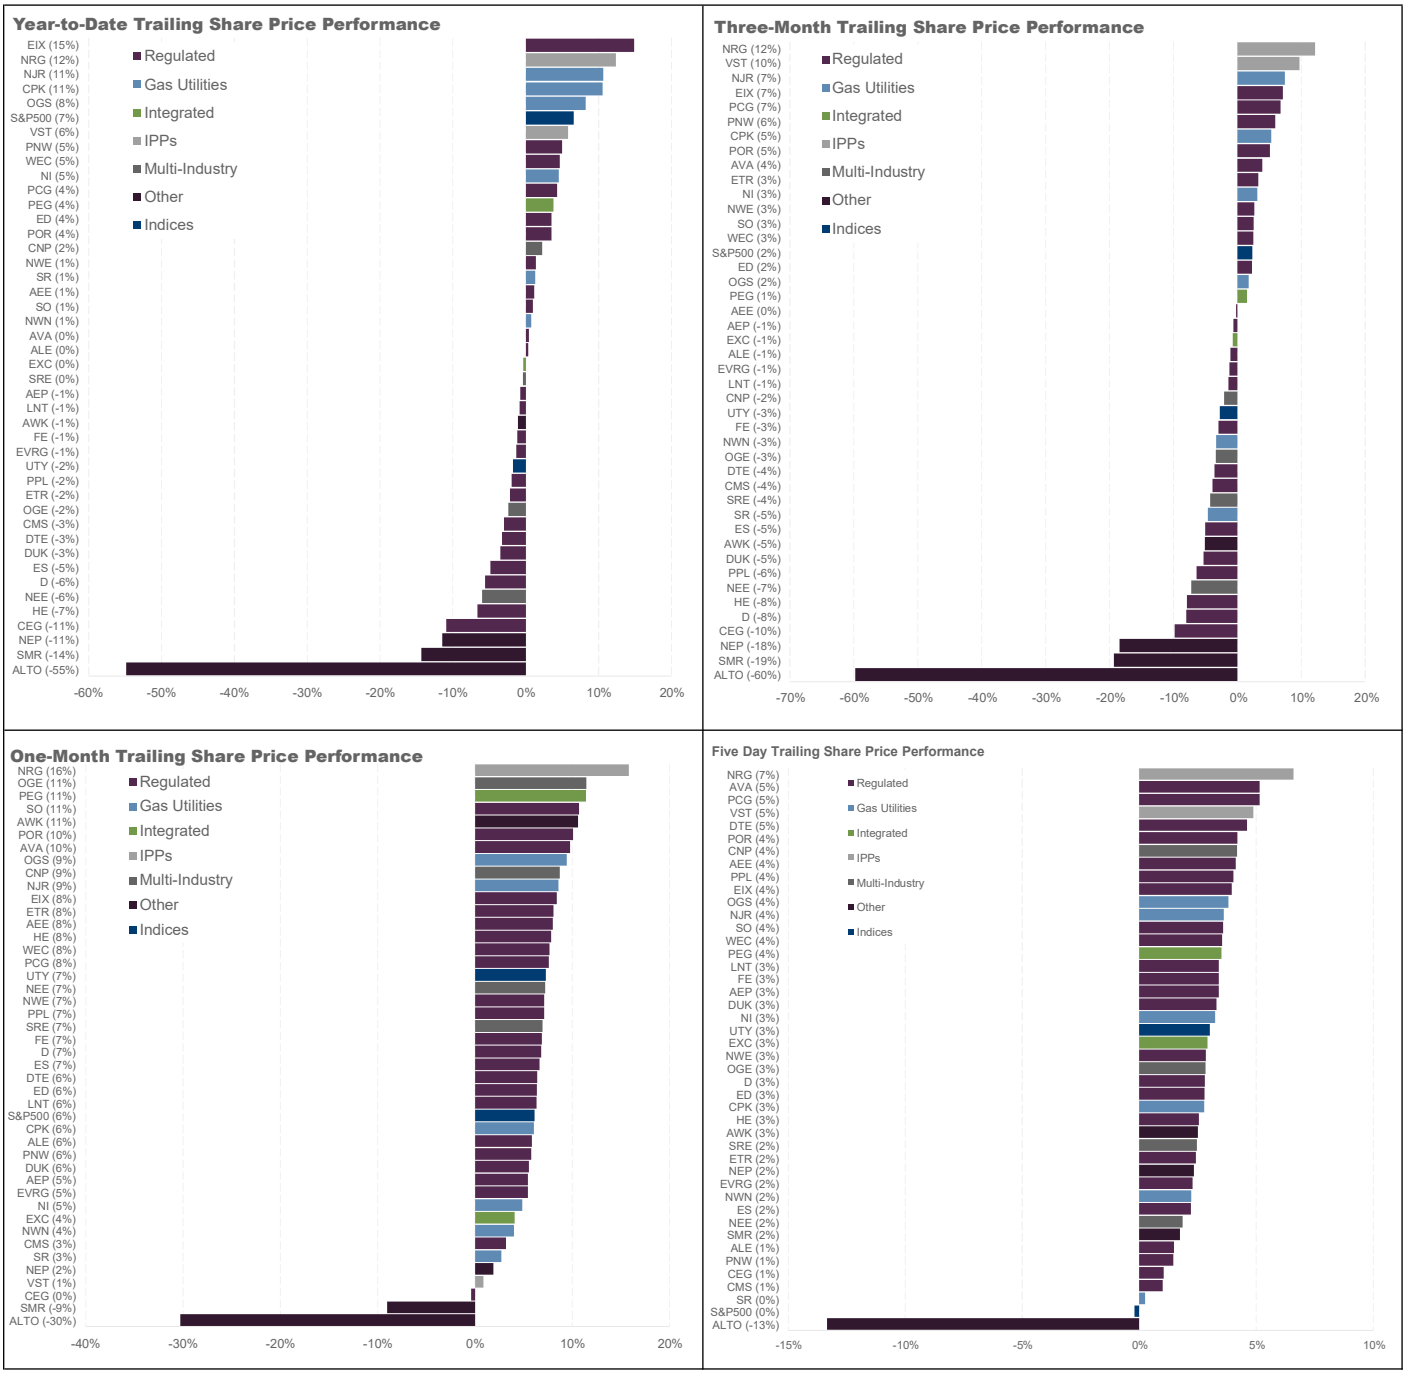
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

Catalyst to Watch This Week: CMS - Staff and Intervenor Testimony Due in Gas Case - April 17

This represents another milestone to watch for Michigan regulation. On 12/15/22 CMS filed for a $212 million rate increase for a test year of the 12 months ended September 30, 2024. The request includes $80 million for investment, $63 million for cost of capital and $47 million for O&M expense. CMS requested and ROE of 10.25% versus 9.9% currently allowed and an increase in rate base to $10.34 billion versus $9.17 billion in the last case.or +13%. In the last CMS gas case the Michigan Public Service Commission approved a rate settlement that authorized a $170 million increase versus $278 million request (61%).

The Analyst Conviction Index (ACI)

The ACI = (# of buy ratings - # of sell ratings)/Total # of ratings. We show the sorted ACIs for our regulated utility, power, and water coverage stocks in (Figure 12) below. The graph also shows absolute number of buy, hold, and sell ratings by company. We also track the change in the ACI over the last 12 weeks (Figure 13) to try to gauge where the sell-side consensus view is shifting.

Valuation Method and Risk Statement

Our valuation methodology for the group is price to earnings based.

North American utilities: We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

IPPs: We identify the following risks for the sector: Demand for new renewable installations has historically been volatile around changes in state and federal policy, and we expect this volatility to continue. In addition, margins for product manufacturers can be impacted by swings in raw materials pricing and the overall level of energy prices.

Environmental Services: We identify the following risks for the sector: Housing remains a key driver of incremental municipal solid waste volume growth, and a slowdown in new housing starts could put downward pressure on sales growth. In addition, pricing tends to follow GDP growth, and a slowdown in economic growth could lower ability to raise pricing driving potential contraction in margins. For more industrial-exposed names, swings in commodity prices can impact the overall level of waste-generating activity, contributing to earnings volatility.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 14 April 2023 10:24 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	54%	22%
Neutral	FSR is between -6% and 6% of the MRA.	36%	21%
Sell	FSR is > 6% below the MRA.	10%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2023.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany, Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/research-methodology.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Bahrain: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report and any offering material such as term sheet, research report, other product or service documentation or any other information (the "Material") sent with this report was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly delete it and inform UBS immediately. This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: https://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:18 PM.

enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is an Investment Marketing licensee which engages in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its equivalent terms shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales. **Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank, the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin"), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by BaFin. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS Luxembourg"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin") and subject to the joint prudential supervision of BaFin, the European Central Bank and the central bank of Germany (Deutsche Bundesbank). UBS Luxembourg is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render(s) services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). Energy: Electric Utilities

Midweek Thoughts — AGR, NEE, D, EXC, AVA, DTE

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

This week, AGR and PNM agree to extend the merger agreement until July 20; NEE signs a 15-year PPA with CA CCA for long-duration energy storage project; D agrees to acquire a 108 MW solar project in VA; AVA signs agreements for wind and natural gas resources; AVA signs an agreement for RNG resources; the MD governor plans to announce a new appointee to the PSC; DTE and Toyota announce renewables partnership through DTE's MI Green Power; and the EIA releases the April Short-Term Energy Outlook.

Industry News and News from Companies in Our Coverage

AGR — AGR and PNM extend the merger agreement until July 20: AGR and PNM entered into a second amendment to the merger agreement to extend the end date until July 20, 2023. The agreement was set to expire on April 20. The proposed merger between AGR and PNM, after being rejected by the NM PRC, is pending a resolution from the NM Supreme Court. AGR and PNM have filed a joint motion with the PRC to dismiss the appeal and remand the case to the PRC for rehearing and reconsideration. The motion is subject to the Court's determination, which should be known through a formal order. Through the appeal, the utilities are seeking an annulment of the PRC order denying the merger approval and remanding to the commission for a rehearing. Based on recent commentary, it appears that the newly appointed PRC is open to the idea of rehearing the case.

NEE — NEE signs 15-year PPA with CA CCA for long-duration energy storage project: NEER signed a 15-year PPA with CA community choice aggregator Clean Power Alliance for the output at NEER's 75 MW Desert Sands Energy Storage facility. The facility is expected to commence operations in 2026 and will be able to store energy for up to eight hours. The CPUC ordered load-serving entities to procure at least 15.5 GW of clean energy resources between 2023 and 2027, including procuring 1 GW of long-duration storage in 2026.

D — D agrees to acquire a 108 MW solar project in VA: D agreed to acquire the 108 MW Foxhound Solar Project from renewable energy developer Longroad Energy. The project has reached full notice to proceed, and construction recently began. The project will consist of FSLR Series 6+ solar modules and NXT trackers. The sale is expected to close in January 2024 upon the mechanical completion of the project. Longroad has already reached long-term PPAs for the output of Foxhound. The project will be located in VA and will assist in reaching VA's Clean Energy Act target of 100% carbon-free generation by 2045. D must procure 16.1 GW of onshore wind and solar and 2.7 GW of storage by 2035 to meet its long-term clean energy targets in VA.

AVA — AVA signs agreements for wind and natural gas resources: AVA signed a 30-year agreement for a 100 MW wind project and a 15-year extension to its contract for the 282 MW Lancaster natural gas generation facility. The wind project is expected to come online by January 1, 2026. AVA is currently under a 17-year PPA that runs through October 2026 for the Lancaster facility. The agreements were part of the 2022 all-source RFP filed by AVA to meet capacity deficits in WA and ID that begin in 2026 and peak in 2030. AVA identified the deficits in its 2021 IRP, including plans to add 211 MW of gas generation by the end of 2026 to meet reliability needs, 200 MW of MT wind by 2024, and another 100 MW of MT wind by 2028. The projects submitted in the RFP were able to be a combination of PPAs, self-built generation, and demand response contracts.

AVA — AVA signs agreement for RNG resources: AVA signed an agreement with Pine Creek RNG to purchase renewable natural gas. The gas will be produced from projects in WA and IA that are expected to come online between 2023 and 2024. AVA issued an RFP for renewable natural gas in October 2022 to acquire new RNG resources to meet the OR Climate Protection Plan and WA Climate Commitment Act carbon reduction requirements. OR's Climate Protection Program set a 30% RNG target share of all gas delivered to AVA customers. Additionally, OR SB 98 and WA HB 1257 laid the groundwork for utilities to enter the RNG market as developers, long-term buyers, and partners of the RNG market. In its latest IRP, AVA highlighted RNG as a resource to meet its forecasted demand in OR.

EXC — MD governor plans to announce new appointee to the PSC: MD Governor Wes Moore announced that he intends to name Kumar Barve (D) to the MD PSC. Since Mr. Buvar will be appointed after the legislative session adjourned, he will be able to serve on the PSC without Senate confirmation. The Senate will be able to take up the nomination during the 2024 session. Kumar Barve

is currently a MD State Delegate. The MD PSC is a five-member commission with the governor nominating the members and the Senate confirming them. We are presently tracking FE's Potomac Edison rate case, and EXC's BGE and PEPCO are expected to file multiyear rate cases later this year.

DTE — DTE and Toyota announce renewables partnership through DTE's MI Green Power: Toyota Motor NA and DTE announced a 20-year clean energy agreement whereby Toyota has enrolled in DTE's MIGreenPower program, resulting in Toyota's six facilities and the Company's R&D headquarters beginning to run on 100% carbon-free energy by 2026. Through the program, DTE has previously announced partnerships with Stellantis, Ford, and 7-Eleven, totaling more than 1,100 MW.

EIA's April Short-Term Energy Outlook: EIA's April STEO forecasts electricity generation will be down 1% in 2Q23 y/y and 1.7% for the full year. The EIA expects a +1.3% rebound in 2024. This compares to previous forecasts of -1.8% and +1.6% in 2023 and 2024, respectively. Mild weather in 1Q23 caused lower-than-average withdrawals. As a result, storage levels ended the typical withdrawal season 19% higher than the five-year, and the HH natural gas spot price dropped to $2.31/MMBtu in March. The EIA maintained its forecasts from March for natural gas prices to average $2.65/MMBtu in 2Q23. Longer term, the EIA expects prices to average ~$3.06/MMBtu in 2023 before increasing to ~$3.85/MMBtu in 2024. This compares to prior estimates for ~$3.14/MMBtu in 2023 and $4.04/MMBtu in 2024. The lower demand forecast and lower natural gas prices are expected to result in lower power prices in 2023 for many of the regions, with prices expected to drop up to 50%, including the MISO IL hub, where 2023 prices are expected to be $36.85/MWh, down from $74.19/MWh in 2022. Prices in the West will remain elevated due to the limited excess capacity. The Mid-C is expected to average $95.32/MWh in 2023 compared to $97.11/MWh in 2022, before decreasing to $59.25/MWh in 2024.

Figure 1 - EIA April STEO

EIA STEO Outlook	2023	2024
HH Forecast ($/MMBtu)	3.02	3.89

Energy: Electric Utilities

Midweek Thoughts — NWE, XEL, AEP, CNP, FE, D, WEC, DUK, EXC

Sophie Karp / (917) 368-2361 / sophie.karp@key.com
Sangita Jain, CFA / (917) 368-2354 / sangita.jain@key.com
Michael Pelletier / (917) 368-2306 / michael.pelletier@key.com

ICYMI, NWE reached a constructive settlement with several intervenors in its 2022 general rate cases. This week, the MN ALJ files a PD in XEL's electric rate case; APCo files 2020-2022 triennial review in VA; AEP seeks recovery of solar and wind projects; AEP's I&M issues an all-source RFP for up to 2.5 GW of resources; PUCT issues an order approving recovery of CNP's TEEEF procurement, DCRF; FE seeks more time to consider the purchase of Pleasants coal plant; D commences a hydrogen blending pilot in UT; WEC closes on an acquisition of a 92 MW wind farm; DUK announces a $1.5B convertible notes offering; and the MD governor appointee receives Committee approval, awaiting full Senate confirmation.

ICYMI

NWE - NWE reached a constructive settlement with several intervenors that agrees to revenue increases of $82M and $18M for electric and gas, respectively. You can read more about it here.

Industry News and News from Companies in Our Coverage

XEL — ALJ files PD in XEL's MN electric rate case: According to XEL's calculation, the ALJ report results in a cumulative $384M revenue increase, based on a $149M increase in RY1 and increases of $108M and $127M in RY2 and RY3, respectively. The ALJ did not include the revenue requirement but made several recommendations, including a 9.87% ROE and 52.5% equity layer. This compares to XEL's request for a cumulative $498M rate increase over three years – a $234M increase in RY1 and increases of $94M and $170M in RY2 and RY3, respectively. XEL requested a 10.2% ROE and 52.5% equity ratio. The main differences are due to the lower ROE, differences in O&M expenses, and the depreciation of the Sherco 3 and AS King plants. Specifically, the ALJ recommends maintaining the accounting life and depreciation schedule for Sherco and King and removing the plants from the rate base when they are no longer used and useful. Exceptions are expected to be filed by April 17, and a final PUC decision is expected on June 30.

AEP — APCo files triennial review in VA: APCO filed its triennial earnings review for the 2020-2022 period in VA. According to APCo's calculations, the Company earned a 5.39% ROE during the timeframe and below the dead band of 8.5-9.9%. The Company seeks a $213M rate increase, premised on a 10.6% ROE. The main drivers of the increase include increased O&M expenses for vegetation management, an increase in the ROE from 9.2% to 10.6%, an increase in depreciation rates, and the deferred recovery of storm cost expenses. At the end of 4Q22, APCo deferred $38M related to previously incurred costs assuming it would earn below the 9.2% authorized ROE. An SCC decision is due by November 30. In its 2017-2019 triennial review, the Commission initially concluded that no rate change was required as APCo had earned 9.48% for the period, within the 8.72-10.12% ROE band prescribed by VA state law. AEP appealed the decision to the Supreme Court in March 2021 and eventually received approval for a $28M rate increase.

AEP — AEP seeks recovery of solar and wind projects: APCo and Wheeling Power (Docket: 23-0328-E-PC) filed an application with the WV PSC seeking to recover costs for a wind project and seven solar facilities. Specifically, the projects include the purchase and sale of the 143 MW Grover Hill Wind Farm and PPAs for seven solar farms, including the 5 MW Green Acres, 19 MW Shifting Sands, 20 MW Sunny Rock, 100 MW Pleasant Prairie, 20 MW River Trail, 20 MW Horsepen, and 20 MW Mountain Brook. Grover Hill is expected to enter service in 3Q25, while the solar projects will begin operations throughout 2024 and 2026. AEP estimates that the gross revenue requirement would be $28.7M, offset by $25M in cost of service reductions, resulting in a net revenue requirement of ~$3.7M. The PSC is expected to issue a decision by August 28.

AEP — AEP's I&M issues all-source RFP for up to 2.5 GW of resources: AEP's Indiana Michigan Power issued an all-source RFP for up to 800 MW of wind, 850 MW of solar, 315 MW of energy storage, and 540 MW of gas generation resources. I&M is also considering proposals that involve emerging technologies, thermal energy, or other resources. The projects must enter service by December 2027 to meet I&M's capacity obligations for the 2028/2029 PJM capacity planning year. All solar, gas, ESS, and supplemental capacity projects must be in IN or MI. Wind projects can also be located in IL or OH. The projects need to interconnect to PJM or interconnect to MISO with firm deliverability rights into PJM or interconnect to I&M's distribution system. Proposals are due by May 26. I&M agreed to procure ~2.2 GW of new carbon-free resources for its 2021 IRP.

CNP — PUCT issues order approving recovery of CNP's TEEEF procurement, DCRF: The PUCT issued its order approving CNP to recover $200M for temporary emergency electricity energy facilities (TEEEF) lease payments and operating costs. The Commission previously voted to reject the ALJ's PD and approve the costs at the March 9 PUCT open meeting. CNP accrued the costs when it conducted an RFP to procure ~500 MW of generation to support the TX grid in the event of a widespread load shed event similar to Winter Storm Uri. CNP's revenue increase associated with the lease agreements is ~ $57M. The order also amends the black-box settlement reducing CNP's DCFR revenue requirement by $7.8M.

FE — FE seeks more time to consider the purchase of Pleasants coal plant: FE's Mon Power and Potomac Edison are requesting more time from the WV PSC to consider purchasing the 1,300 MW Pleasants Power Station and the closure of the Ft. Martin plant. FE proposed an interim solution that involves FE signing an LOI to enter into an agreement with Energy Transition & Environmental Management to keep Pleasants open for up to 12 months while FE considers and negotiates the purchase of the facility. FE would also need to establish a temporary surcharge to recover the costs of keeping the plant open. As a reminder, FE previously owned the Pleasants Power Station but was placed with Energy Harbor when the split happened in 2019. The WV PSC ordered the FE subs Monongahela Power and Potomac Edison to submit a report on the feasibility of buying the plant by March 31. The plant is currently scheduled to retire at the end of June. FE's clean energy goals, as stated by the Company, include net zero by 2050. FE requests a PSC decision on its interim solution and surcharge by April 25.

D — D commences hydrogen blending pilot in UT: D announced that it began blending hydrogen into Delta, UT's natural gas pipeline network. D will test up to 5% hydrogen blends into the natural gas distribution system. The pilot follows a year-long, in-house test conducted at D's training facility to test the safety of blending hydrogen and its compatibility with household appliances. Initially, D will use gray hydrogen but will transition to green hydrogen. The pilot is set to run through the end of 2024 and will help D UT meet its goal to prepare its entire network for hydrogen blending by 2030. The pilot is among several proposed by gas utilities that are the first attempts to blend low-carbon hydrogen at high concentrations (up to 20% of the pipeline volumes) in the domestic distribution systems serving customers.

WEC — WEC closes acquisition of 92 MW wind farm: WEC and Madison Gas Electric completed the purchase of the 92 MW Red Barn Wind Farm from Allete Clean Energy. WEC owns 82 MW of the output, with Madison receiving the remaining ~10 MW. The wind facility began commercial operation on April 3. WEC's expected project costs were ~$160M. WEC expects to invest $5.4B in regulated renewables during the 2023-2027 timeframe and will look to add 667 MW of wind capacity.

DUK — DUK announces $1.5B convertible notes offering: DUK announced a $1.5B offering of 4.125% convertible senior unsecured notes due 2026 in a 144A private placement transaction that also granted the initial buyers the option to purchase up to $225M of additional notes within a 13-day period. DUK plans to use the proceeds to repay a portion of its commercial paper and general corporate purposes. DUK expects to issue $6B-$7.5B of debt in 2023.

EXC — MD governor appointee approved by Committee, awaiting full Senate confirmation: The Senate's Executive Nominations Committee approved Governor Wes Moore's nominee, Frederick Hoover, to replace current PSC Chair Jason Stanek at the end of his term in June. The full senate will vote on Mr. Hoover in the next few days. The MD PSC is a five-member commission with the governor nominating the members and the Senate confirming them. Governor Moore still needs to appoint two more commissioners to replace Commissioners Odogwu Obi Linton and Patrice Bubar. Mr. Bubar is awaiting Senate confirmation after being nominated by the former MD governor. He may continue to serve until or unless the senate confirms a nominee during this session or the governor names a replacement following adjournment. We are currently tracking FE's Potomac Edison rate case, and EXC's BGE and PEPCO are expected to file multiyear rate cases later this year.

IL/Nuclear – IL Senate passes bill to lift ban on new nuclear construction

PCG – CPUC modifies schedule for Pacific Generation formation and sale proposal

ED – CECONY files updated energy affordability report

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

D/VA – Governor amends wind turbine procurement legislation to include language around competitive procurement for phase 2

- The governor amended HB2444 last week to include language around a competitive procurement process for phase 2 of any CVOW/OSW expansion, including PPAs.
- The language specifically does not include the current CVOW project or the ability to sell a passive stake in that project.
- "Any purchase or development of offshore wind capacity pursuant to subsection B beyond the amount produced by the 2,587 megawatt project approved in December 2022 by the Commission for a Phase II Utility shall include a competitive solicitation process subject to Commission oversight and approval. When overseeing the solicitation, the Commission shall consider the benefits arising from project construction and operation and the manufacture of wind turbine generator components and subcomponents in the Commonwealth, benefits to ports in the Commonwealth, and other economic development benefits." – legislation
- The governor's amendments go back to the Assembly on April 12th and require a majority vote to pass, otherwise they are sent back to the governor in original form for another 30-day pass/veto period.
- Bill HERE.
- More HERE.

Guggenheim takeaway: *The Governor's amendment specifically focuses on procurement's after CVOW and does not impact the current credit repair process/strategic review, nor the associated optionality around a passive stake sale in CVOW (the current project). We caught up with the company, who emphasized that the potential timeline for any phase 2 project would fall outside of the current 5-year planning window, and as such it is too early to discuss impacts to LT investment opportunities. In our view, utilities post-IRA are on some of the most competitive footing ever, however, the last-minute move by the governor came as a surprise in our view and underscores the heightened activism by the executive branch this session (Governor Youngkin was reportedly active in the final days of the regulatory deal). As a reminder, Dominion had previously identified ~$48bn of investment opportunities from 2027-2035 alone. The move sets up a potential back and forth with the General Assembly in the coming weeks, with the company previously committing to a business review update in 2Q.*

AEP – Joint Kentucky protest filed by PSC, AG, and Industrial group

- "Applicants have again failed to compare the AEP East zonal transmission revenue requirements with AEP ownership of the Kentucky Companies versus Liberty ownership. Under Liberty ownership of the Kentucky Companies, the seven-state AEP zonal revenue requirements will increase because the incremental fixed and variable costs of Liberty building a new transmission organization from the ground up will be added to the zonal revenue requirement." – PSC
- FERC Docket EC23-56

Guggenheim takeaway: *We caught up with AEP after this filing was made. The company believes that its current application satisfies anything lacking in its original FERC 203 application, and that the arguments being made by the PSC, AG, and Industrial group are essentially unchanged from that prior application. In the event that the KY sale to Liberty does not go through, the company reminded that there would be no incremental equity need in its 5-year plan.*

DUK – Duke announces $1.5bn convertible note offering

- Proceeds will be used to repay commercial paper.
- The $1.5bn of convertible senior notes will be due in 2026.
- "The convertible notes will be direct, unsecured and unsubordinated obligations of Duke Energy, and will be convertible at the option of the holders of such convertible notes upon satisfaction of certain conditions and during certain periods. Interest will be payable semiannually in arrears. Duke Energy will settle conversions of the convertible notes by paying cash up to the aggregate principal amount of the convertible notes to be converted and paying or delivering, as the case may be, cash, shares of its common stock, $0.001 par value per share, or a combination of cash and shares of its common stock, at its election, in respect of the remainder, if any, of its conversion obligation in excess of the aggregate principal amount of the convertible notes being converted."

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

- More HERE.

Guggenheim takeaway: *We caught up with the company and affirmed that* ***this should not be perceived as future equity****, and that there is no change to the company's equity messaging (i.e., no plans to issue equity through 2027). Many companies have been issuing convertible notes as a means of reducing commercial paper balances while avoiding issuing expensive long-term debt at current high coupon rates. With the sale of Commercial Renewables expected to close by year-end vs. mid-2023 originally, we are not surprised that DUK would look to a nearer-term financing solution like this.* ***As we highlighted recently in our NDR note (link HERE), issuing convertible notes was an option that has been available to DUK.***

AEE – PSC grants request to modify schedule in light of settlement discussions

- "Ameren Missouri asks the Commission to cancel the first week of the evidentiary hearing in this case, which is set to commence on April 3, 2023, and part of the second week. The evidentiary hearing on the remaining issues would begin on April 12, 2023. The Commission will modify the procedural schedule accordingly." - PSC
- More HERE.

Guggenheim takeaway: *Minor heads up following the initial motion we flagged last week. As we noted then (see HERE), management remained optimistic that it and other intervenors could find middle ground in the ongoing GRC, with the team pointing to both a track record of settlement and cost reductions in the most recent updated filing as tailwinds to the overall process. The major drivers of $120mm in variance between Staff and the company were threefold:* ***1)*** *ROE of 9.59% vs. requested 10.2% (~$50mm of the difference),* ***2)*** *High Prairie curtailments (~$30m), and* ***3)*** *Rush Island availability (~$40-50m). Based on those conversations, the pathway forward could have been a partial settlement, which has been further reinforced by this latest filing – stay tuned for more details, although we note the settlement could ultimately land as a black box. We see AEE's ongoing ability to reach settlements in MO as further underscoring what we see as the name's premium attributes (management, growth, execution, etc.)*

CT – Exceptions to PBR framework phase 1 draft decision filed

- DEEP, ES, the OCC, and multiple other stakeholders have filed exceptions to the draft decision posted last month on the first phase of PURA's ongoing PBR work.
- More HERE.

Guggenheim takeaway: *Part of the broader ongoing process at PURA to consider with stakeholders advanced regulatory mechanisms like MRPs, sharing (ESMs) and other key performance metrics.* ***As a reminder, this process will continue through most of the year in Phase 2,*** *with the preliminary timelines (draft decision PDF page 39-40) pointing to potential PFDs on Revenue Adjustment Mechanisms and PIMs in 2Q24. In our view, PBRs would be beneficial to the overall construct given the opportunity for ROE improvements. As a reminder, CT already has a fairly favorable regulatory framework in place (e.g., forward/ forecasted test period)*

POR – Portland General files first Clean Energy Plan

- Management filed the combined IRP/CEP plan last week.
- POR "filed its combined Integrated Resource Plan and inaugural Clean Energy Plan, a comprehensive roadmap detailing how the company will meet customers' energy needs and Oregon's ambitious greenhouse gas emissions targets while maintaining reliability, safety and affordability. PGE's path to reach these targets is possible with resources available today and the company's strategy involves utilizing commercially available tools between now and 2030." - filing
- More HERE.

Guggenheim takeaway: *This was an expected step as POR moves along its IRP cadence and looks to add additional clean resources under its state-mandated emissions targets. The filing sets up additional potential RFPs for the later part of this year, largely mirroring the earlier procurement process that yielded the Clearwater project. As a reminder, a portion of that RFP process (grounded in the 2021 IRP) remains ongoing.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

LNT – IUB lifts stay on solar advanced ratemaking reconsideration

- The move comes after an associated District Court ruling.
- "The stay of this proceeding ordered by the Utilities Board on February 21, 2023, is lifted, and this order is issued to establish procedures for the reconsideration granted in the December 29, 2022 order as directed by the Polk County District Court ruling issued March 23, 2023. Filed with the Iowa Utilities Board on March 31, 2023, RPU-2021-0003."
- More HERE.

Guggenheim takeaway: *Procedural heads up, with the IUB setting a 20-day timeline for responses.*

SO – Vogtle moves closer to operations

- Georgia Power announced Vogtle Unit 3 has made grid connection.
- "Connecting to the electric grid is part of ongoing startup testing for Vogtle Unit 3, and operators will continue to raise reactor power for electricity generation while performing tests at various power levels. This Unit 3 milestone follows initial criticality, reached on March 6, when operators safely started the nuclear reaction inside the reactor, generating nuclear heat to produce steam. Once all startup testing is successfully completed and the unit is available for reliable dispatch, the unit will enter commercial operation."
- More HERE.

Guggenheim takeaway: *For your awareness as Vogtle continues to advance towards Unit 3 in-service, which is scheduled for May/June 2023.*

AWK – Indiana American Water files rate case

- The utility filed a 3-step rate increase on Friday for ~$87mm.
- "The petition seeks aggregate annualized incremental revenue of $86.7 million, which would include three step increases, with $43.2 million of the increase to be included in rates in January 2024, $18.1 million in May 2024, and $25.4 million in May 2025. The requested adjustment is based on a proposed return on equity of 10.6% and a capital structure with an equity component of 56.2%. For purposes of determining proposed rates, the requested adjustment is based on an equity component of 48.2% due to the regulatory practice in Indiana of including certain zero cost items or tax credit balances in the capital structure calculation. The petition is subject to approval by the IURC, and the general rate case is expected to be completed by the end of January 2024." - AWK
- More HERE.

Guggenheim takeaway: *Part of the process as AWK continues to churn through cases across its regulated footprint and seeks to minimize lag. As a reminder, Indiana is ~10% of AWK's total regulated customer count.*

EXC/DE – DPL electric case procedural schedule posted

- Direct testimony will be due 8/18, while evidentiary hearings will follow in December.
- More HERE.

Guggenheim takeaway: *For your calendars.*

ERCOT – ISO considering scarcity pricing tweaks as 'bridge' to PCM implementation

- The latest proposed tweaks to the ISO's scarcity mechanisms could be worth up to ~ $491m according to a Staff discussion presentation from last week's TAC meeting.
- More HERE.

Guggenheim takeaway: *Another day another potential market tweak in Texas, albeit one intended to help serve as a bridge to a full PCM implementation. As we highlighted in the note linked above, the resource adequacy reform process remains political – we expect there could be more significant changes in the coming weeks as the legislative session matures.*

MISO – RTO updates annual value proposition; finds $4bn in benefits in 2022

- "MISO provided more than $4 billion in benefits to its operating region in 2022, continuing to build upon its vision to be the most reliable, value-creating regional transmission organization… MISO's Value Proposition analysis identifies and quantifies several value

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

drivers for the region, including more efficient use of existing resources, improved reliability and compliance, and a reduced need for additional assets. The annual Value Proposition studies reveal that MISO's regional approach has delivered cumulative benefits of $40 billion since this calculation was first developed in 2007. Those benefits amount to more than twelve times MISO's operating costs." - MISO
- More HERE.

Guggenheim takeaway: *Value calculations like these are a normal part of the cost-benefit analyses RTOs do across the country (e.g., CAISO and the EIM in WECC), although MISO remains a focus RTO in the near term given its shrinking reserve margins and ongoing capacity construct reforms (seasonal).*

MISO/FERC — Show-cause order from FERC over capacity accreditation draws industry pushback

- Vistra (VST) and trade group EPSA have filed protests in the ongoing MISO capacity auction show cause docket at FERC.
- "If accepted, MISO's proposal will create uncertainty by undermining bilateral agreements for the sale of capacity that have been entered into in advance of the PRA and upset the settled expectations of market participants that justifiably relied upon the Ratio and Seasonal Accredited Capacity ("SAC") values calculated by MISO." - filing
- More HERE.
- EL23-46 HERE.

Guggenheim takeaway: *The arguments put forward are not a surprise, in our view, after the Commission took issue with the capacity conversion ratios, however, we continue to see this as a somewhat discrete issue in the context of the current auction.*

RI/Solar — Committee holds bill on new construction solar requirement for further study

- The Rhode Island House Committee on Corporations held HB5851 for further study following a hearing late last week.
- The bill would require extensive solar resources on new construction and parking lots.
- More HERE.

Guggenheim takeaway: *Minor FYI.*

IL/Nuclear — IL Senate passes bill to lift ban on new nuclear construction

- The legislation now moves over to the House.
- More HERE.

Guggenheim takeaway: *Minor FYI. Absent state support, we do not see Zone 4 or ComEd as supportive of merchant nuclear entry…*

PCG – CPUC modifies schedule for Pacific Generation formation and sale proposal

- CPUC ALJ modified the schedule for briefing in the PacGen formation and sale application, moving dates back by about 1 month.
- Intervenors previously applied for a longer extension to review key testimony and the application impacts, but the CPUC extended dates by around 1 month.
- The final date for reply briefs was moved from August 28, 2023 to October 5, 2023 (PFD 90 days after briefs).
- CPUC Docket: A2209018
- Intervenors previously filed comments in opposition to PCG's plan to form and sell an equity stake in Pacific Generation.
- The comments from consumer advocates and other organizations focused on consumer protection issues and oversight, as well as alleging a lack of information and commitments in the filing to ensure certain protections.
- FERC Docket: EC22-38 (through search)

Guggenheim takeaway:*FYI. The delay is minor but shows the complex nature of the proceeding. The prior comments at FERC and request for extension are not unexpected given the somewhat unique proposal for the formation and sale. Some of the issues seem like a misunderstanding conceptually (i.e., the subsidiary will still be majority owned by PCG*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

and have the same regulatory oversight). The allegations of incomplete information in the filing are more administrative in nature, which could be resolved in the litigated process.

ED – CECONY files updated energy affordability report

- CECONY filed an energy affordability report for CECONY, including breakdowns of low tier customer counts and customers entering and exiting the assistance programs.
- There are no major changes included in the report.
- Docket: 19-G-0066

Guggenheim takeaway:*FYI.*

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

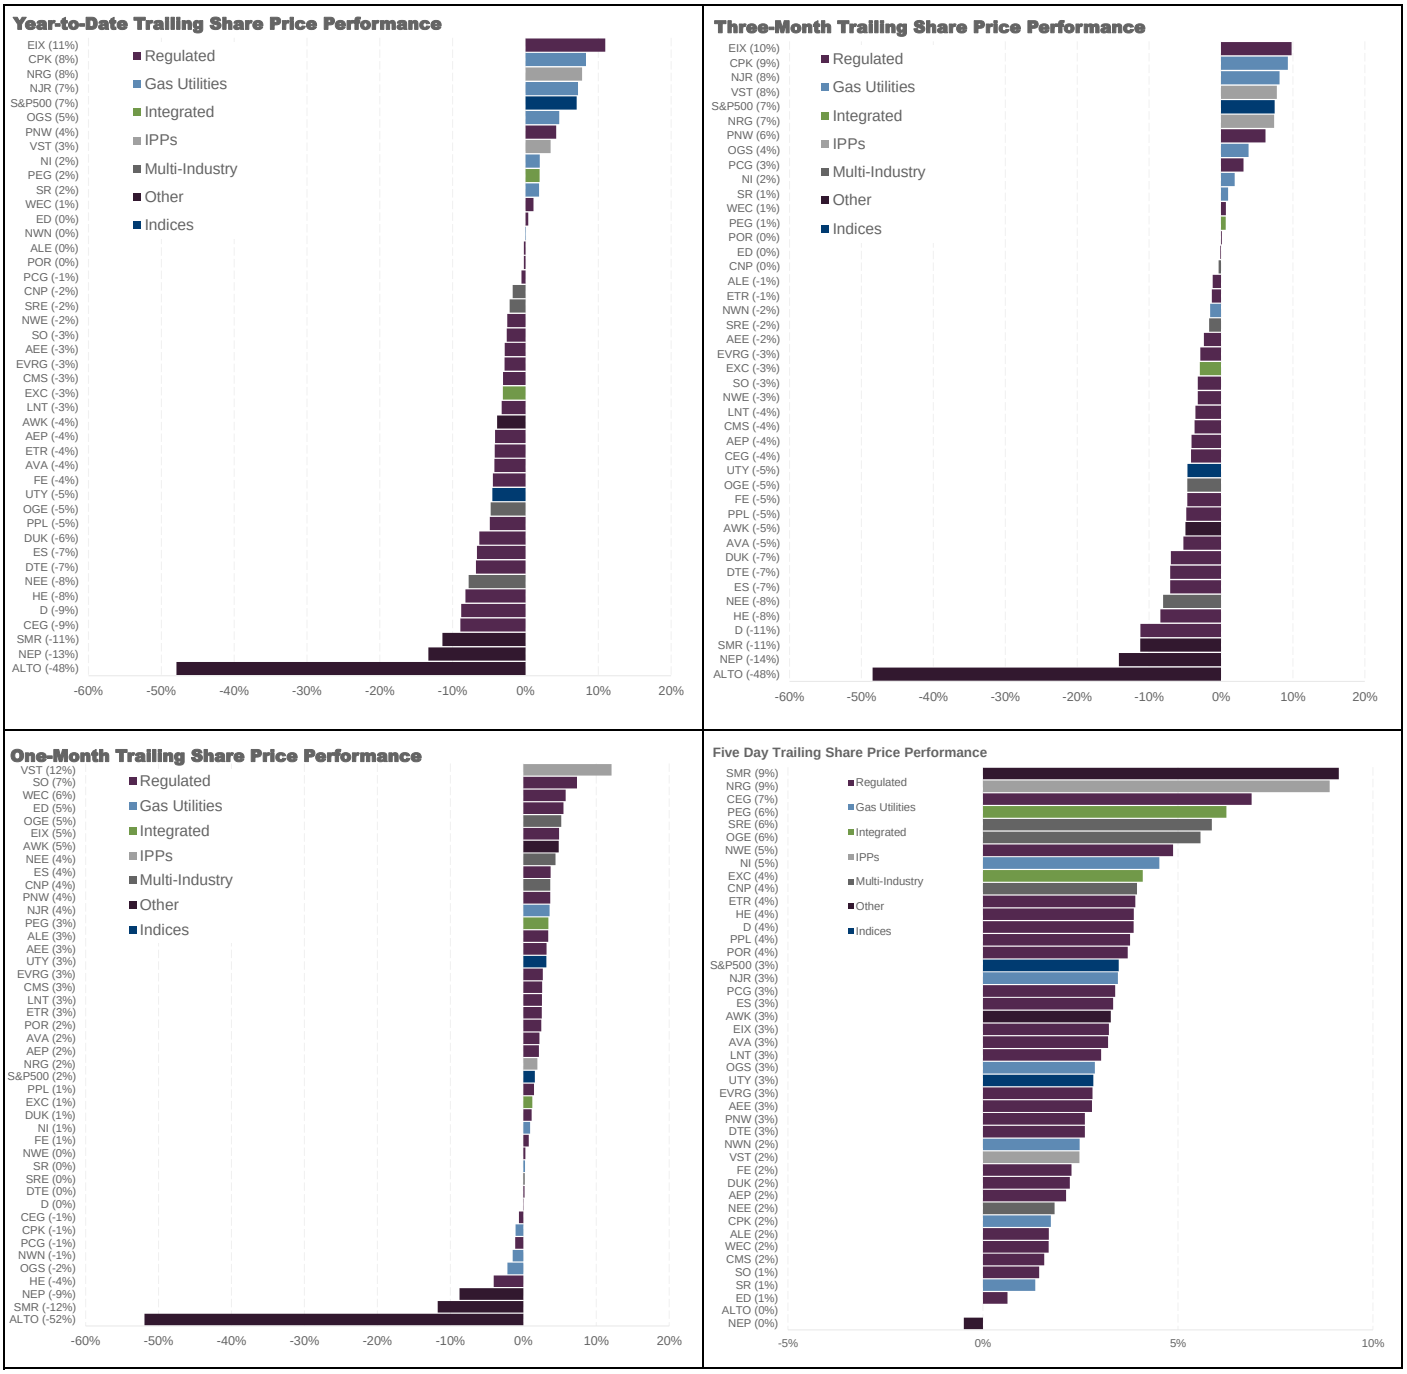
Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)



(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

NEUTRAL	113	31.30%	10	8.85%
SELL	9	2.49%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 04-May-2023 04:19 PM.

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

J.P. Morgan Securities LLC

Exelon stands out as a pure-play regulated utility with an advantaged T&D portfolio carrying leverage to infrastructure renewable efforts across an aging urban network and long-term electrification tailwinds. Years of regulatory engagement have yielded multi-year plan frameworks in MD and DC, now moving onto their second phases, leaving favorable PA regulation as the primary traditional ratemaking exposure among EXC's larger utilities. While IL's regulatory transition under CEJA has contributed to some ROE and capex uncertainty, we see EXC as well positioned to realize durable, multi-decade grid hardening, reliability, and transformation investment needs that extend well beyond rate cycles and the company's current five-year plan. Given these themes, the low volatility of EXC's T&D utilities, sufficient 100-200bp of balance sheet cushion, and the company's attractive 6-8% EPS growth underpinned by a top-tier 8% rate base CAGR, we see clear upside to a sustainable premium versus EXC's current -5% P/E discount in 2025. Here, we expect further de-risking IL will contribute to an overall re-rating. As such, EXC represents our preferred GARP utility.

- **Finish line in sight for IL regulatory transition.** With Staff testimony filed for ComEd's multi-year plan application, we see IL debates across ROE, cap structure, and capex at their peak. Across these, 1) cap structure does not carry a significant delta at 50.0% versus EXC's 50.6-51.2%, 2) ROE screens as a narrower issue than implied under Staff's proposed formula given recent stakeholder comments critical of ROE formulas, and 3) we expect EXC to make a strong case for its capital and ultimately reallocate across its footprint for any shortfalls. As such, we anticipate the filing will yield a constructive outcome supportive of EXC's 6-8% EPS growth, with case completion later this year also boosting regulatory confidence in the company's outlook that is positive for an overall re-rating.
- **No shortage of capital opportunities across this wires story.** While the energy transition carries discrete generation capex needs for vertically integrated utilities, EXC's wires-only profile benefits from grid investment in support of this broader transition, magnified by infrastructure renewal needs across its aging urban core. Management has focused on balancing the overall transition pace to manage bills, which also showcases inherent upside as electrification tailwinds take hold into the next decade. EXC's IL, MD, and DC operations all carry exposure to pro-transition policies, which appear now to be accelerating in MD after last year's election. We see this creating a clear runway for EXC's top-tier 8% rate base CAGR and firmly supportive of 6-8% EPS growth after modest offsets for parent debt and equity financing needs.
- **Attractive valuation amid these premium elements.** At the company's current -5% 2025 P/E discount, we highlight upside to high-quality peers AEE, CMS, WEC, and XEL, which carry a 9-13% premium currently. We expect de-risking IL with a rate order will support outer-year estimates and boost EXC's relative multiple.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Goldman Sachs & Co. LLC

Over the past twenty years, the US electric grid has experienced dramatic change. In the early 2000s, there was a rapid shift from coal to natural gas and a move away from highly deregulated business models. In the past decade, there has been rapid adoption of renewables, which have moved to 30% of generation capacity. Looking forward, we see an attractive investment opportunity set, derisked by the Inflation Reduction Act (which has created incentives for utilities to transition away from fossil fuels to renewables), with potential to transform the earnings growth and shareholder base across Utilities, driving potential for stronger multiple premiums over time. We see a 27% increase in capital investment over the next five years versus the prior five, which contributes to a 5-year EPS CAGR of 6%, versus the 10-year average of 4%.

In this report, we explore the next phase for US Utilities, as many companies become **Decarbonization Enablers**, not only for the power sector, but for other companies, industries, and states with decarbonization targets. We believe these models will drive value from several clear mega-themes: (1) **Clean Technology**, via renewables and other energy transition technologies; (2) **Nuclear**, which provides a source of zero carbon, firm power; (3) **Grid Reliability**, which will require investments in transmission to support renewables; and (4) **LNG**, which could help drive global coal displacement, all while balancing **Affordability,** which we believe will be key to constructive regulatory outcomes enabling continued investment.

With these themes in mind, we recommend investors:

- **Buy Southern Co. (SO)** for Nuclear earnings growth
- **Buy NextEra Energy (NEE)** for Renewables growth
- **Buy Xcel Energy (XEL) and American Electric Power (AEP)** for Grid Reliability investments (e.g., transmission)
- **Buy Sempra Energy (SRE)** for LNG upside

We initiate with a **Neutral** rating on **Duke Energy Corp (DUK)**, **Dominion Energy (D)**, and **Public Service Enterprise Group (PEG)** and a **Sell** rating on **ConEdison (ED)** and **Exelon (EXC)** as they screen less attractive on valuation and exposure to

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

the themes identified above.

Portfolio Manager's Summary

The transformation of the US power grid is under way. By 2032, we expect more than 45% of the power generation capacity in the US to be from renewable sources and 6% from coal, relative to 30%/16% today and 17%/27% in 2012. As the power generation mix changes and the Energy transition progresses, particularly following the passing of the Inflation Reduction Act, we believe utilities are uniquely positioned to facilitate this shift and address associated challenges in a way that creates a cleaner power grid while maintaining reliability and customer affordability. This shift will require a significant amount of capital investment, which we believe will contribute to attractive earnings and rate base growth in the coming years.

As we look across the landscape, we see several clear themes that represent investment opportunities for utilities through clean technology (wind/solar, energy storage, hydrogen, RNG), nuclear power (PTC/additions/life extensions/SMRs), LNG project additions (contributing to global coal displacement/cash flow to fund utility growth), and transmission build out (to replace aging infrastructure and support renewable power additions). In order to execute on these investment themes, we believe alignment with regulators will be key in order to maintain customer affordability and deliver on state level decarbonization goals. We expect these opportunities to drive a robust capital investment program at utilities, with our 2023-2027 capex estimates across our coverage about $93 bn, or ~27%, higher than the capital spent during the prior 5-year period. We expect this robust capital investment opportunity, largely driving rate base growth, will contribute to a 5-year EPS CAGR of 6% on average across our coverage, versus the 10-year average of 4%.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Source: Goldman Sachs Global Investment Research, FactSet

With this robust opportunity set, we believe US Utilities are entering into a new phase as Decarbonization Enablers, not only for the power sector, but for other companies, industries, and states seeking to reach decarbonization targets. Over the past 20 years, we believe utilities have experienced other periods of transformation that drove value creation for the sector, including the meaningful shift towards natural gas and away from coal from 2002-2012 along with some movement away from highly deregulated business models that created elevated volatility and financial stress, followed by the rapid adoption of renewable energy sources that we have seen over the past decade, which have reached about 30% of the electric capacity mix as of 2022. We view the investment, rate base, and earnings growth opportunities presented in the current environment as even stronger than what we have seen in recent history, and thus see an opportunity for attractive value creation.

With this backdrop in mind, we are initiating coverage on 10 US Power & Utilities companies: NextEra Energy (NEE), Duke Energy (DUK), Consolidated Edison (ED), Southern Company (SO), Sempra Energy (SRE), Public Service Enterprise Group (PEG), Dominion Energy (D), American Electric Power (AEP), Exelon Corp (EXC) and Xcel Energy (XEL). We initiate with a Buy rating on NEE, SRE, SO, AEP, and XEL; a Neutral rating on DUK, D, and PEG; and a Sell rating on ED and EXC.

We prefer stocks with idiosyncratic drivers and leverage to key themes we believe will contribute to broader decarbonization trends that are driving robust capex growth, thus contributing to rate base and earnings growth in the next 1-3 years, and providing an attractive catalyst path. With that said, we recognize utilities have historically been a macro levered space, and we do believe that from an earnings perspective, elevated costs due to inflation, higher interest rates, mild weather to start the year, and increased regulatory uncertainty in the face of customer affordability concerns could drive utilities to have a more challenging 2023. However, we believe this is broadly reflected in numbers, where we are in line with FactSet consensus. As we move through 2023 and investors look to 2024/2025 earnings, we see 6%/7% EPS growth on average across our coverage. We note we are 1%/3% above consensus EPS in 2025 for our

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

coverage/Buy rated stocks, respectively.

What's new?

Within, we introduce our stock selection framework for our Utilities coverage based on thematic exposure, valuation/catalyst path, execution, and balance sheet strength. We also:

- Roll out our models to 2027 to capture key growth projects, particularly those focused on renewables and LNG
- Update our valuation methodologies to capture longer term growth and IRA driven investments
- Explore the opportunity set for transmission investment across the utilities space as renewables are built out and aging infrastructure is replaced, as well as the potential incremental earnings uplift for our coverage

We highlight four key investment themes in our report

1. **Clean Technology:** We see more than 575 GW of renewables capacity added through 2040, comprising more than 50% of total generation capacity in the US. On the other side, we expect more than 140 GW of coal capacity to be retired, representing 65% of current capacity by 2040. We expect this shift to drive significant capital investment, rate base growth, and ultimately earnings growth. Among stocks exposed, we highlight **NEE**, **AEP**, **XEL**, **D**, and **DUK**.

2. **Nuclear:** With the Nuclear production tax credit (PTC) coming into play following implementation of the IRA, we see greater likelihood of nuclear plant life extensions in addition to previously planned capacity adds coming into service. We view nuclear generation as key for utilities to reach stated net zero goals and provide firm zero carbon generation amid an increasing share of renewables in the generation mix. Among stocks exposed, we highlight **SO**, **PEG**, and **DUK**.

3.**Grid Reliability:** With increasing generation coming from renewables and demand growth expected from broader electrification trends, we believe maintaining grid reliability is paramount. As such, we are constructive on companies allocating meaningful shares of capital to transmission spend to facilitate renewables, replace aging infrastructure, and ultimately support grid reliability. Among stocks exposed, we highlight **AEP**, **SRE**, **XEL**, **EXC**, and **ED**.

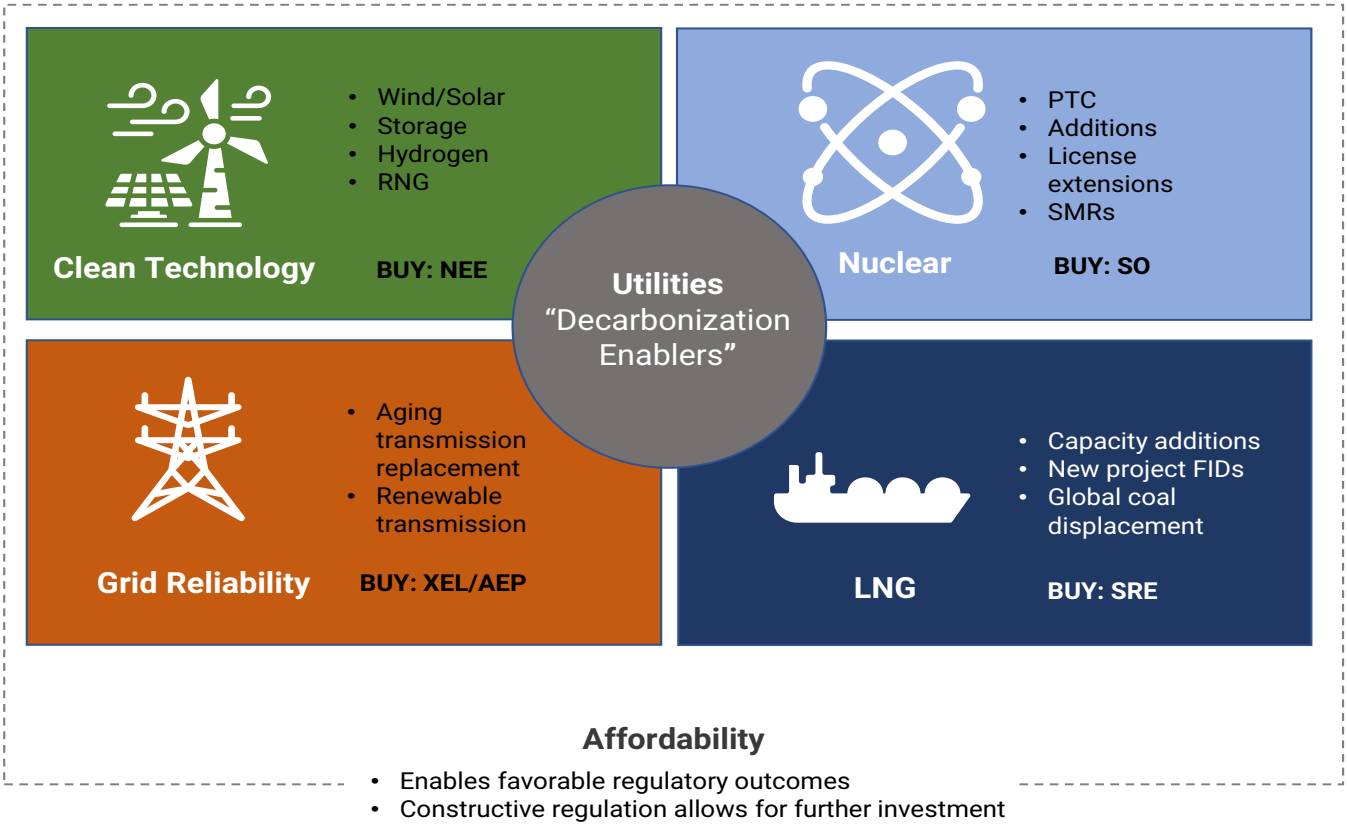
4. **LNG:** We expect natural gas to remain a key part of the energy mix for the foreseeable future, and believe that LNG can help enable global coal displacement, contributing to global decarbonization. Thus, we have a positive view on key LNG projects for select diversified utilities and believe they can help fund regulated utility investment. Among stocks exposed, we highlight **SRE** and **D**.

In order to enable investment in these themes, we believe Affordability/Regulatory considerations remain top of mind. We believe customer affordability remains a key focus for utilities and regulators as investments in decarbonization ramp, particularly during this period of inflation and elevated rates. We

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

believe maintaining affordability, a focus on cost control, and balance sheet health will be key to realizing constructive regulatory outcomes and allowing for continued robust capital investment in the grid transformation going forward.

Exhibit 5: We see several key mega themes driving Utilities as Decarbonization Enablers, including Clean Technology, Nuclear, LNG, and Grid Reliability, all while balancing Affordability



Source: Goldman Sachs Global Investment Research

Stock selection framework

Our framework for stock selection across the US Power/Utilities space is based on four key pillars **(1) Thematic exposure:** We look for exposure to the four energy transition themes that we expect to drive higher investment and earnings growth noted above, along with affordability/regulatory considerations, **(2) Valuation/catalysts:** We prefer stocks trading at a relative P/E discount with a robust, idiosyncratic catalyst path over the next 12 months, **(3) Execution:** We screen for companies with a strong track record of delivery on guidance/strategy, **(4) Balance sheet:** We seek stocks with ample headroom on FFO/Debt downgrade threshold levels or positive rate of change around leverage.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 6: Our framework informs our ratings

Buy	NextEra Energy (NEE)
	Sempra Energy (SRE)
	American Electric Power (AEP)
	Southern Company (SO)
	Xcel Energy (XEL)
Sell	Consolidated Edison (ED)
	Exelon (EXC)
Neutral	Dominion Energy (D)
	Duke Energy (DUK)
	Public Service Enterprise Group (PEG)

Ratings Summaries

Southern Company (SO, Buy). Line of sight to the in-service of the Vogtle Units 3 and 4 nuclear project, attractive regulated utility exposure, and potential upside around energy transition investments drive our constructive view. We expect Vogtle coming online to remove the valuation overhang on the stock, which has historically traded at a 2x premium to peers on P/E. We are 2% above FactSet consensus on average for EPS in 2023-2027 and we see 19% total return to our 12-month price target.

NextEra Energy (NEE, Buy). A robust renewables growth profile, a constructive regulatory and execution outlook at FPL, and attractive relative valuation following underperformance drive our positive view on NEE. We see a 9% 5-year EPS growth CAGR, are 4% above consensus in 2023-2027 on average for EPS, and see 25% total return to our 12-month price target.

American Electric Power (AEP, Buy). With about 60% of AEP's 5-year capital plan being allocated towards transmission and regulated renewables, we see attractive rate base and earnings growth, in addition to actions taken to optimize the business and improve regulatory lag driving our positive view on the stock. We see an above average 5-year EPS CAGR at 7%, we are 3% above consensus in 2023-2027 on average for EPS, and we see 21% total return to our 12-month price target.

Xcel Energy (XEL, Buy). Attractive leverage to the shift from coal to renewables and the transmission build out, with upside opportunity to both themes not baked into our base case, as well as opportunities to improve earned ROEs via rate case activity contribute to our positive view on the stock. We are 2% above FactSet consensus in 2023-2027 on average for EPS and see 21% total return to our 12-month price target.

Sempra Energy (SRE, Buy). An attractive LNG growth opportunity set that we believe

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

is underappreciated and will fund regulated utility investment, leverage to a growing Texas market via its ownership in the Oncor utility, and attractive relative valuation contribute to our constructive view on SRE. We are 2% above consensus on average in 2023-2027 for EPS and see 26% total return to our 12-month price target.

Consolidated Edison (ED, Sell). Outside of attractive investments in grid reliability, we see less thematic exposure, driving less upside opportunity around spend, in our view, in addition to challenged customer affordability, and medium-long term policy risk in New York keep us more cautious on ED. We are 1% below FactSet consensus on average in 2023-2027 for EPS and see -2% total return downside to our 12-month price target.

Exelon (EXC, Sell). Despite a robust balance sheet position, we see less thematic leverage for EXC outside of grid reliability investments driving less upside opportunity around rate base and earnings growth, potential challenges around rate case activity given high requested ROEs, and less attractive valuation driving our more cautious view on EXC. We see 3% downside to consensus on average in 2023-2027 for EPS and see 1% total return to our 12-month price target.

Dominion Energy (D, Neutral). While we see valuation screening more attractive at current levels after underperformance, we believe more clarity is needed around the outcome of the business review in order to take a strong view on D. We view the 3Q analyst day as a key catalyst for the stock from here, where we should get a full update on the long-term outlook for the business. We see 14% total return to our 12-month price target.

Duke Energy (DUK, Neutral). While we see attractive thematic exposure at DUK with renewables, nuclear, grid reliability investments, and strong customer affordability, we are less differentiated versus consensus, see a more limited near-term catalyst path ahead given coal retirements and renewables add are back of decade weighted, and current balance sheet stretch due to deferred fuel balances. We see 14% total return to our 12-month price target.

Public Service Enterprise Group (PEG, Neutral). We believe the improved business mix at PEG, upside opportunities around nuclear earnings, and capital spending on grid investments are positive, though we see near-term headwinds around interest and pension expenses as well as less differentiation on consensus estimates and less compelling valuation following recent outperformance as keeping us Neutral. We see 8% total return to our 12-month price target.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 7: We initiate coverage of 10 US utilities, with a Buy rating on NEE, SRE, SO, XEL and AEP, a Sell rating on ED and EXC, and a Neutral rating on D, DUK, and PEG

Source: FactSet, Goldman Sachs Global Investment Research

Thematic Exposure: We look for exposure to themes that we expect to drive higher investment and earnings growth going forward.

Following the passage of the IRA and the increasing focus on the energy transition, we believe four key investment themes will be top of mind for utilities going forward including (1) clean technology, (2) grid reliability, (3) nuclear, and (4) LNG, all while balancing affordability/regulatory considerations. Given the structural nature of the energy transition and decarbonization, we view this piece of the framework as key as we expect investments across these themes to drive earnings growth through the extent of our models and beyond. With that said, we believe constructive regulatory outcomes will be necessary in order to drive these investments, and customer affordability/reliability is a key component of a constructive relationship with regulators.

Across our coverage, we see strong thematic leverage for **NEE** (positively exposed to renewables, affordability/regulatory, and nuclear), **XEL** (attractive exposure to renewables, affordability/regulatory, nuclear, and grid reliability), and **AEP** (positively exposed to renewables, nuclear, and grid reliability). Conversely, we believe **ED** and **EXC** screen less attractively on thematic exposure, with no renewables/nuclear/LNG exposure and mixed affordability/regulatory outlooks, despite strong investments across

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

T&D to support grid reliability. We discuss each of these themes in more detail in the sections below.

Exhibit 9: We view renewables generation investment as a key driver of decarbonization across the utilities space, with NEE, D, AEP, DUK, and XEL most exposed
Renewables generation share of capex, %

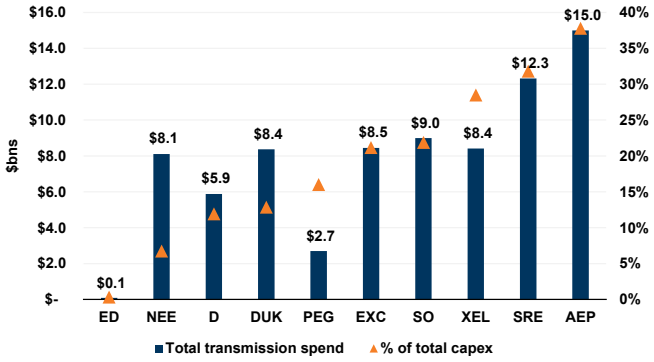
Exhibit 11: With an aging system and new renewables requiring transmission, we view spend allocated towards transmission positively and highlight AEP, SRE, and XEL as allocating large shares of spend towards it
Transmission spend, 2023-2027



Source: Company data, Goldman Sachs Global Investment Research, SNL

Valuation/Catalysts: We prefer stocks trading at a relative P/E discount with a robust, idiosyncratic catalyst path over the next 12 months.

As discussed above, while utilities outperformed the market in 2022, the sector has underperformed YTD in 2023, with the XLU -7% vs. the S&P500 +11%. Despite this underperformance, given where 10-year yields have moved, we view valuation on a sector wide basis as more balanced, and as such we prefer stocks trading at a relative P/E discount versus historical levels. In addition, we consider the idiosyncratic catalyst path over the next 12 months for each stock.

Across our coverage, we see attractive valuation/catalyst exposure for **SO** (stock trades at a 1.3x discount to its historical pre-Vogtle premium to peers, and has an attractive

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

catalyst path with Vogtle Units 3 and 4 expected to come online in the coming quarters), **NEE** (stock trades at a 2x discount to its historical premium to peers on FY2 P/E, and has potential catalysts in a NEER development guidance raise), and **SRE** (stock trades at a 1.4x discount to peers, and has a robust catalyst outlook with potential for Cameron LNG Phase II FID, updates on Port Arthur Phase 2, Oncor capex raise, and other LNG updates).

Exhibit 12: On average, our coverage is trading at about 1x below the 10-year average FY2 P/E levels at current
FY2 P/E, historical data is 10 year

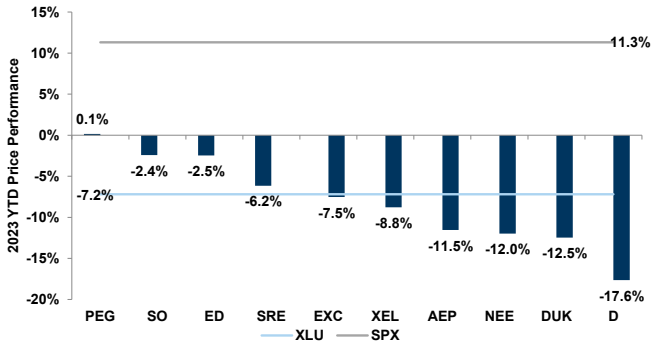
YTD performance, %



Source: FactSet, Goldman Sachs Global Investment Research

Execution: We screen for companies with a strong track record of delivery on guidance/strategy.

Given the uncertainty in the macro environment and increasing investor appetite for certainty around earnings trajectories, we expect a focus on quality and execution going forward. In addition, with certain large scale projects in flight (LNG, offshore wind, nuclear), significant capital spending to build out new renewable generation capacity and transmission infrastructure across the sector, and potential investment in still nascent technologies that could become more meaningful including hydrogen and energy storage going forward, we believe project and strategy execution will remain top of mind.

Historically, utilities have delivered relatively strong earnings execution relative to consensus as well as initial company guidance. On average over the past 20 quarters, our coverage has met or exceeded consensus EPS estimates about 75% of the time, and we highlight **NEE**, **SO**, and **SRE** as standouts. Delivery on company guidance has also been relatively strong, with our coverage hitting at least the midpoint of guidance about 90% of the time on average over the past 4 years.

Balance Sheet: We seek stocks with ample headroom on FFO/Debt downgrade threshold levels or positive rate of change around leverage.

As interest rates have moved higher, we believe balance sheet health has come more to the forefront given the size of utilities' investment programs over the next five years that will require incremental debt financing. We believe balancing priorities across investment, dividend sustainability/growth, and balance sheet strength are key for capital allocation strategies. As such, we look for stocks with headroom around

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

FFO/debt rating agency downgrade thresholds and/or those with idiosyncratic positive rate of change around leverage levels.

Across our coverage, we highlight SRE, ED and EXC as companies that are well above downgrade thresholds at current levels. While D also screens positive at YE2022, we note this would not capture the Virginia rate decrease, and we believe uncertainty exists currently given the ongoing business review that could negatively impact FFO levels going forward. We do note that some metrics are being impacted by (1) elevated deferred fuel balances and (2) higher collateral due to hedging and commodity price volatility, including SO, DUK, and PEG.

Exhibit 14: Across our coverage, most companies are around or above downgrade thresholds, and we highlight SRE, ED, and EXC as screening with the most headroom
2022 FFO/Debt levels vs. downgrade thresholds, %

A word on the macro and sector valuation

In 2022, the utilities sector outperformed the broader market by about 18% amid deteriorating financial conditions, slower growth, rising recessionary risks, and heightened volatility, which drove valuation relative to the market to elevated levels versus history. That said, utilities have underperformed the S&P by ~18% YTD. We attribute this move to a pro-cyclical market rally and rising risk appetites following peak inflation and disinflationary pressures coupled with resilient economic data and the reallocation of funds towards last year's laggards following heavy tax loss selling in the 3Q/4Q 2022.

Currently, utilities are trading slightly below the five-year average FY2/FY3 P/E multiple, as well as a 24%/25% discount to peak FY2/FY3 P/E multiples (utilities currently trade at 16x/15x FY2/FY3 P/E). The stocks are trading at a modest premium to the market and our analysis shows that current valuations are broadly balanced given level of yields based on the historical relationship between yields and valuation. While we appreciate the strong relationship between yields and utilities performance (valuation has broadly held historically), we highlight idiosyncratic single stock opportunities, such as those for NextEra and Xcel Energy, which have been early movers around renewables, that have compounded value through various rate regimes.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Clean Technology

As we think about the power generation capacity in the US, we expect the share of renewables to grow to more than 50% in 2035 and coal to decline to 5% of the mix over the same time frame. We believe this (1) represents a significant investment opportunity for utilities with generation exposure to add renewable generation capacity in the coming years, (2) will contribute to material carbon emissions reductions across the power sector as coal is phased out in favor of cleaner generation, and (3) will create incremental opportunities on transmission and distribution investment to support grid reliability, as we will discuss further below. While renewables makes up the majority of investment dollars within clean technology at this point, we note many companies are exploring investments in other clean areas like energy storage, hydrogen, and RNG, that we believe could gain share in the coming years.

(1) Renewables represent a significant investment opportunity for utilities with generation exposure, driving rate base and earnings growth

The share of renewables in capital spending plans across the utilities sector continues to grow. Federal support for infrastructure investment and the IRA, ambitious clean energy goals at the state level, incrementally favorable economics for green energy, technological advancements/improvements in renewables capacity factors, and higher costs for operating non-renewable energy generation facilities all support the transformation of the generation fleet towards cleaner energy sources.

We expect the US generation fleet to shift significantly through 2035, with renewables moving from 24% of US generation capacity in 2021 to more than 50% in 2035 while coal moves from 19% to 4%. Those investment needs are reflected in the capital spending outlook across utilities, which we expect to contribute to strong rate base growth and thus earnings growth for exposed utilities. Across our coverage, we highlight **NEE**, **D**, **AEP**, and **DUK**, as more levered to the shift towards renewables,

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

where renewables spend represents 59%, 35%, 22%, and 16%, respectively of capital spending plans.

We also note that while **XEL**'s renewables spend is currently only 3% of its stated capital plan, it does not include a potential $1.5-$3 bn of additional investment associated with IRPs, and further upside from an ongoing SPS RFP. In addition, XEL already has 40% of its generation capacity coming from renewables, which is among the highest across our coverage. On the other hand, ED, EXC, SO, PEG, and SRE are less exposed to the renewables generation build out. That said, we note that the generation fleet transformation towards zero-carbon will support investment opportunities in transmission and distribution projects, including for utilities that are not building renewables generation capacity, which we discuss in greater detail below.

Across our coverage, renewables spend is forecasted to total about $101bn from 2023 through 2027.

Based on company spending guidance and our assumptions where guidance is not provided, renewables spend is forecasted to total about $101bn from 2023 through 2027 across our coverage. NEE makes up the bulk of the spend, followed by D, AEP, and DUK. We see upside risk to utilities' capital plans in the out years, as incremental generation opportunities are approved through the regulatory process, and policy at both the state and federal level around decarbonization remains supportive. Moreover, we note that some utilities noted that they are exploring alternative sources of capital such as portfolio optimization to support investment needs — for example, AEP expects to use the proceeds from the proposed sale of its unregulated renewables portfolio to refocus investments towards regulated renewables growth opportunities.

We highlight NEE, D, AEP, and DUK as the most levered utilities in our coverage to the shift towards renewables, which drives investment opportunities and growth, and note upside risk exists to **XEL**'s spend, though the company has already made significant progress in building out renewables:

1. We forecast $108bn of capital spending over 2023-2027 at **NEE**, including $64bn worth of investments in renewables, representing almost 60% of total capex. NextEra's utility subsidiary Florida Power & Light Co (FPL) plans to completely decarbonize its fleet by 2045 by investing heavily in solar, battery storage, and green hydrogen, which are expected by the company to make up 83% of the energy mix in 2045. We expect NextEra Energy Resources (NEER) to invest roughly $62bn through 2027, largely on renewables.
2. **Dominion** is accelerating the pace of regulated renewables development as well as coal retirements. In 2035, the company aims to generate 70% of its electricity from zero-carbon fuel sources, while coal is forecasted by the company to be just 1% of the generation mix. We estimate that Dominion will spend more than $17bn on renewables over 2023-2027, which is 35% of total spend. At its Dominion Energy Virginia subsidiary, the company received approval to develop its Coastal Virginia offshore wind project and proposed 6 GW+ of solar and battery storage development. At its gas distribution segment, the company is advancing negative carbon renewable natural gas (RNG) projects, with 6 in operation and 15 under

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

construction.

3. **AEP** has allocated $9bn out of $40bn in its capex forecast through 2027 to regulated renewables, representing more than 20% of total capex. We also note that 50% of generation capex is allocated to renewables. We believe that AEP has a long runway to grow its regulated renewables segment as it phases out coal as a fuel source from its generation fleet and ramps renewable development to meet the net-zero target by 2045.
4. **DUK**'s $65 bn 5-year capital plan includes $11 bn of regulated renewables generation spend, which represents 21% of total spend. Through the fleet transition process, the company expects that renewables will account for roughly 35% of the generation mix by 2040. Across our coverage, we note that DUK has the most coal capacity that the company expects to retire in the coming years. DUK expects coal to decline to roughly 5% of the generation mix by 2030.

Coal Retirement Outlook

As detailed above, we expect retirements of coal capacity and the uptake of renewables

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

to materially shift the power generation mix in the US in the coming years. Through 2041, we see the pace of coal retirements accelerating based on SNL data, with more than 90 GW retiring. We see about 54 GW retiring in the next five years and a total of 66 GW YE2030. We see upside risk to these levels as well, noting that an additional 113 GW of plants appear "at risk" of retirement. Within our coverage, we view **DUK**, **AEP**, and **XEL** as most exposed based on the amount of planned coal retirements. Coal continues to make up a large portion of US power generation and generation capacity — roughly ~22% of US generation capacity, though we expect this share to move to 6% by 2032.

We also note upside to these retirement levels may exist, and we assign "at risk" — which represent 50% of YE2022 capacity — to plants that (1) run at low capacity factors (below 50%), (2) remain small in terms of capacity installed (under 500 MW) - so likely maintain high fixed O&M levels per MWh of output as they lack economies of scale, or (3) operate in regions with an abundance of shale gas, which drives coal versus gas power plant "competition", in addition to renewables. We also note a significant percentage of at risk plants in the MISO (43GW) and PJM (42GW) regions. We believe a number of factors could impact the rate at which coal plants retire, including incremental policy changes (taxes on emissions, rules requiring further capital spend), improvements in renewables capacity factors, declining construction cost for renewable projects, lower power prices, higher operating costs for coal plants, and a move lower in natural gas prices.

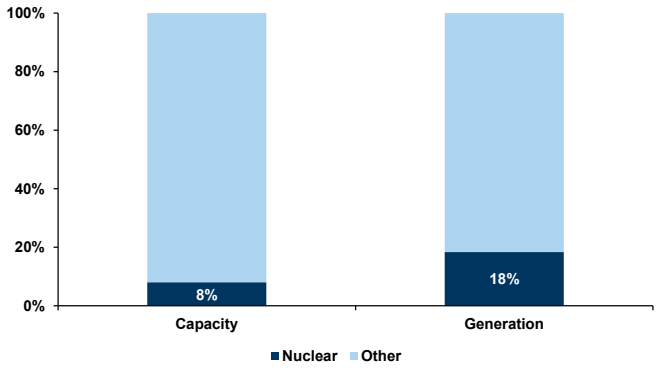
Nuclear

The outlook for nuclear power has become less uncertain and could offer more potential benefits to customers with the passage of the Inflation Reduction Act (IRA), which included a nuclear production tax credit (PTC). Starting in 2024 when the PTC goes into effect, nuclear power plants will essentially have a price floor of $15, and a boost from the nuclear PTC anytime that all-in power prices go below $43.75, derisking the asset class as a whole, making extensions of the lifetime of many plants more attractive, and creating more opportunities for customer benefits. Many of these power plants had been surviving on state sponsored subsidies such as the Zero Emission Credit (ZEC), and struggled to remain economic in the absence of these credits, particularly given volatility in power prices. We've seen several companies, such as PEG, emphasize their commitment to the assets following the PTC passage. Due to its extremely high capacity factor, nuclear power makes up a significant portion of US power generation at 18% of total, despite there being only 99 GWs of nuclear in the US, or 8% of capacity.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

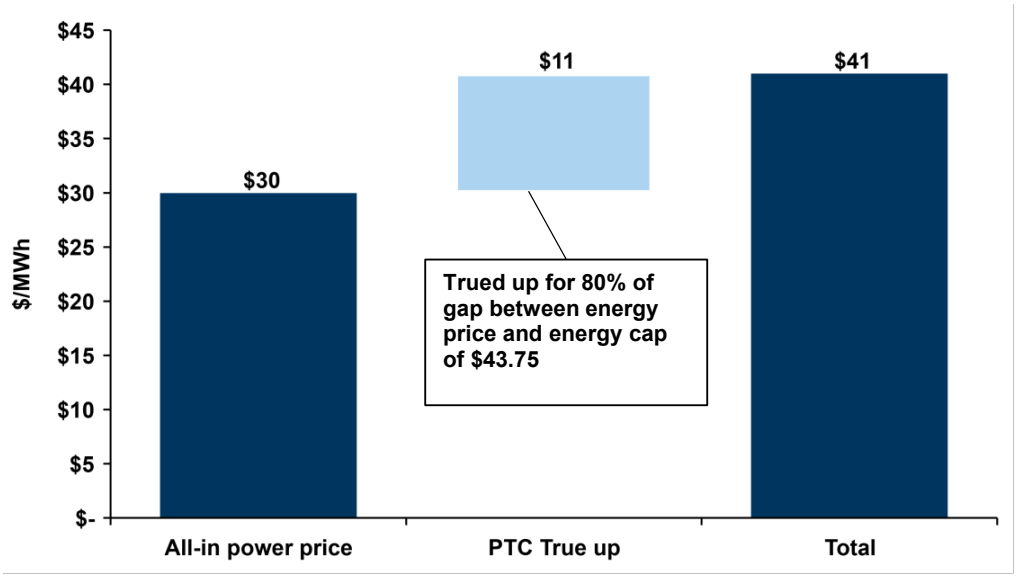
Exhibit 26: Due to its high capacity factor, nuclear makes up a much larger portion of total generation in the US than capacity.
Nuclear capacity vs generation, 2022



Source: EIA, Company data, Goldman Sachs Global Investment Research

The nuclear PTC kicks in when all-in power prices are below $43.75 with a floor of $15. All-in power prices will include the wholesale price at which power is sold to the market plus any capacity revenue and/or state sponsored subsidies. The company is trued up for 80% of the delta between this all-in power price and the $43.75 price. Power price futures across the US are mixed relative to the $43.75 mark for the next several years, creating potential differences around the direct impact for unregulated plants depending on unit economics, but the derisking of the entire asset class is a meaningful change, providing longer term certainty around economics. Regulated nuclear power plants will pass any benefits from the tax credit to customers, potentially reducing the customer bill. The US Treasury has not yet released guidance on how the PTC will be calculated and what will be included, so we await that guidance to size the full monetary impact of the PTC.

Exhibit 27: The nuclear PTC will true up companies for 80% of the difference between the all-in power price they receive and the PTC price cap of $43.75.
Nuclear PTC example



Source: Goldman Sachs Global Investment Research

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Nuclear power plants have historically been a challenge to build on-time and on-budget in the US, and the ongoing Unit 3 and 4 expansion to the Alvin W. Vogtle power plant by Southern Company has been no exception. Despite these challenges, we appear to be approaching the finish line for these units, with Unit 3 expected by the company to go in-service in 2Q2023 and Unit 4 in-service sometime within 4Q2023-1Q2024. We've updated our SO model to reflect Unit 3 in-service in 2Q2023 and Unit 4 in 1Q2024, as we believe that Unit 3 is through the worst of the issues and that the Unit 4 completion should be a smoother process as SO learns from mistakes during Unit 3 construction. We expect the prudency review to result in SO retaining the ability to put $7.3 bn of capital into rate base from Vogtle expenses, but believe upside risk could exist to our numbers to the extent more recovery is approved.

We expect several nuclear power plants to file for extension in the coming years, as there is little reason to retire the plants with the IRA providing an economic floor, and potential for the PTC to be extended directly or via failure to meet certain decarbonization goals by 2032. The pressure on states from self-mandated and federal decarbonization goals also make it difficult to justify shuttering nuclear power plants given they are a zero carbon, firm source of power, which we believe will be increasingly important as more renewables are added to the generation mix. Companies can also increase spending on these plants as they install upgrades that increase capacity or lengthen the amount of time between refueling outages.

Due to the challenges around building large scale advanced nuclear power plants, we believe there is likely little investor appetite for utilities to invest in incremental large scale capacity. Thus, the next generation of nuclear power will likely come from Small Modular Reactors (SMRs). As the name implies, these are smaller versions of the reactors we have now, up to ~300 MWs of generation, and ideally will be easier to manufacture and construct. This technology is still nascent in the utility space, but has the potential to be a major part of our generation mix in the future. Both public and private companies are working on their own design of SMRs, but we await greater clarity around the feasibility and economics of the technology before assuming any material spend on generation from SMRs.

We highlight SO, DUK, D, and PEG as the most levered to nuclear power. We also note **NEE** has a large nuclear fleet, though it is smaller in the context of the broader company.

SO currently owns ~3.7 GWs of nuclear power, and will own ~4.7 GWs when Vogtle Unit 3 and Unit 4 are completed. Nuclear power will make up 11% of SO's generation fleet once this is completed, and customers could see significant benefit from the PTC credits potentially reducing their bill.

DUK owns the most MWs of nuclear power out of our coverage at ~10.8 GWs. DUK has stated that they expect the tax credits from the PTC that will be passed down to customers will be in the magnitude of hundreds of millions, but the company awaits guidance from treasury on specifics.

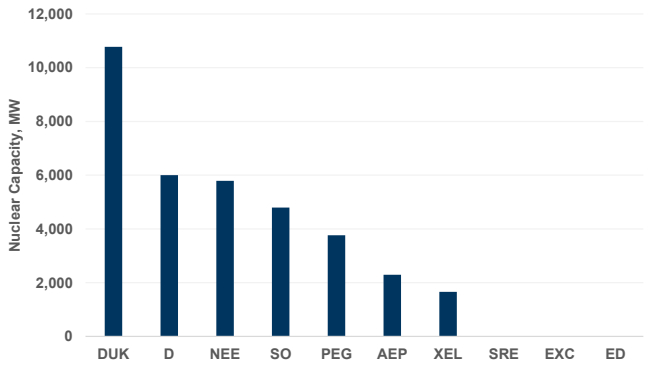
D owns a combination of regulated and contracted nuclear assets, with capacity of

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

about 6 GWs, representing about 20% of generation capacity. The company has applied for license extensions at its Virginia regulated nuclear plants, which has been approved at Surry and is in process at North Anna.

PEG is the only company in our coverage that owns multiple merchant nuclear assets with the Power segment owning ~3.8 GWs of generation. These assets generate a material amount of cash for PEG and now have been significantly derisked given the provision of nuclear PTCs in the IRA. Extensions have been filed at both Peach Bottom plants and PEG has announced potential upgrades to several plants following the passage of the PTC including a capacity upgrade at Salem and transitions to longer refueling cycles.

Exhibit 28: More than half of our coverage has some form of nuclear generation, with DUK owning the largest fleet.
Nuclear capacity by company



*SO includes Vogtle 3 & 4

Grid Reliability

As the US power grid continues to transition towards renewables, connecting that new capacity to the grid via transmission presents both a significant opportunity and challenge for utilities. While power plants that run on natural gas and coal can be built largely wherever a company chooses, wind and solar generation must be built where those resources are prominent, which is often far from major cities and power demand centers. We believe that significant investment in the transmission grid is needed to support our forecast renewables generation build out and grid reliability.

Based on our current renewables forecast, we believe the investment opportunity for transmission build out could be >$500bn through 2040, representing a material tailwind to the regulated utility space. This estimate is based on (1) our expectations that transmission will be needed to support renewable generation capacity adds of more than 570 GW from 2023-2040, (2) a carrying capacity of 545 MWs at a 345 kV nominal voltage over a line length of 200 miles, which is based on the weighted average of current planned transmission projects' line voltage/mileage, and (3) our assumptions of an average cost to build transmission of $2.5mn per mile, based on historical averages.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Current capital spending plans across the industry allocate ~$108 bn to transmission projects through 2027 per SNL. However, we estimate the total cost to build out transmission to support projected renewables additions through 2027 at $201 bn, implying a $93 bn shortfall. Moreover, we note that the annual average spend levels over 2023-2027 of ~$22 bn would need to be revised higher to ~$32 bn from 2027 and onwards to support our renewables build out forecasts through 2040, given the projected shortfall of nearly $140 bn. We see about 20% of capex through 2027 across our coverage allocated to transmission, with **AEP**, **XEL**, **SRE**, and **SO** most levered towards transmission spend. AEP is the leader in transmission with >40,000 line miles currently, and we expect the company to remain in this position as the grid expands.

Exhibit 29: Total transmission spend in the industry is currently about $108 bn through 2027, though we expect it to grow going forward as capital plans are updated
Regulated utilities transmission spend, $ bn

Planned Industry Spend 2023-2027 ($ bn)	$108
Spend Shortfall (through 2027, $ bn)	**$93**

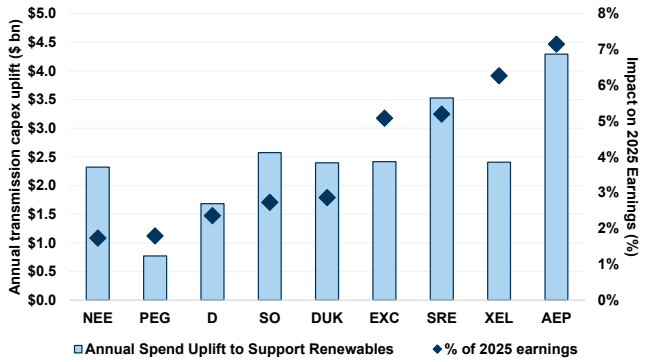
Source: Company data, Goldman Sachs Global Investment Research, SNL, FactSet, DOE

Our estimates imply that current 5-year planned transmission investments contribute $160/$95/$115 mn annually for the largest players — AEP/XEL/SRE, or about 5%/4%/4% of our 2025 total earnings. We believe the incremental transmission spend

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

to support our forecast renewables build out could raise this earnings contribution by 7%/6%/5% for AEP/XEL/SRE on our 2025 earnings estimates, assuming a consistent share of industry spend through 2040 and our company specific assumptions around D&A, transmission ROE, equity layer, and cost of debt. We note that transmission typically has a higher RoE than that for a regulated utility, with most transmission RoEs at or above 10.5%, with the average for distribution only 9.6% over the past 12 months.

Exhibit 33: If our coverage increases capex to accomodate our renewables capacity forecasts, we could see a 4% impact on average to our 2025 EPS, with AEP most exposed at a 7% impact
Earnings impact from potential incremental transmission capex to support renewables adds

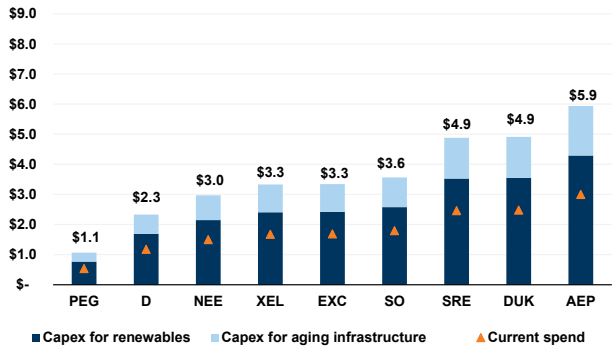


Source: Company data, Goldman Sachs Global Investment Research

Along with the expansion to accommodate new renewables capacity, older transmission infrastructure will need to be replaced as it ages beyond its useful life. Publications from the DOE and Reuters imply that through 2040 it could cost ~$200bn to replace aging transmission infrastructure in the US. Estimates can vary depending on what the assumed useful life of transmission infrastructure is. To fund both the renewable expansion and to replace aging infrastructure, we estimate that regulated utilities would have to increase annual spend to nearly $43bn through 2040 on average. This would mean that if this group of regulated utilities wanted to maintain the same market share of transmission spend that they currently have while supporting the renewable build out and addressing aging, each of them would have to nearly double the current annual spend on transmission.

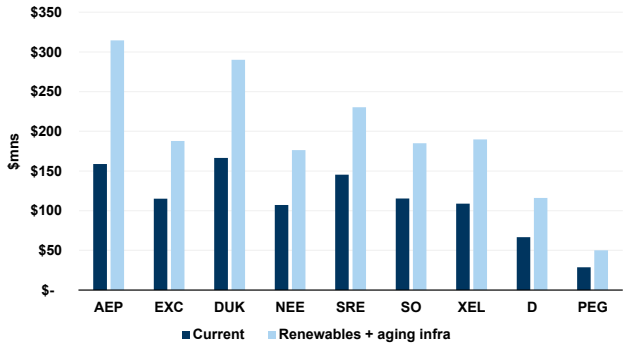
Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 34: Our estimates imply that companies will have to nearly double their current annual run rate transmission spend to keep up with the renewable buildout and maintaining system age
Current annual transmission spend vs. estimated spend needed to support renewables and aging infrastructure, $ bn



Source: Company data, Goldman Sachs Global Investment Research

Exhibit 35: While earnings contribution from current transmission spend is meaningful, we could see further uplift from renewables build out and addressing aging infrastructure
Current transmission earnings impact vs potential around renewables/aging infrastructure spend



Source: Company data, Goldman Sachs Global Investment Research

We highlight **AEP**, **SRE**, and **XEL** as the largest beneficiaries from this trend:

AEP funds about 14% of total industry transmission capex per our estimates, and we assume the company maintains a proportional amount going forward. AEP's current capital plan includes about $15 bn of transmission spend over its five year plan, and the company estimates that it will take $3 bn of annual spend to replace aging transmission assets going forward. Management commentary has made it clear that transmission is a priority, and we expect AEP to be at the forefront of the grid expansion. AEP has highlighted $35bn of transmission spending in its pipeline through 2030, fairly close to our estimates of just over $40bn required through 2030 to support renewables.

SRE has opportunities to invest in transmission across California and Texas, where we expect about $12 bn across the 5-year capital plan to be spent on transmission. We do not view necessarily view SRE as a broader industry leader in transmission, but note its Texas utility in particular has opportunity to grow its grid infrastructure going forward. The Electric Reliability Council of Texas (ERCOT) is highly focused on grid reliability going forward following winter storm Uri in 2021, and we believe will encourage industry leaders such as Oncor to lead the way. In addition to reliability, Texas is an ideal region for wind generation given land availability and wind resources are prominent, which would require transmission lines to connect to the major cities and population hubs.

XEL expects to spend $8.4 bn on electric transmission through 2027, representing ~30% of total spend. The company has currently identified transmission build out opportunities to enable more renewables across its NSP and PSCo subsidiaries that total about ~$3 bn via MISO Tranche 1 and the Colorado Pathway project. Both also represent potential additional investment opportunities with subsequent phases of MISO expansion, future Pathway projects, and potential projects to alleviate congestion and enable load growth/new renewables in SPP at its SPS subsidiary.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

LNG

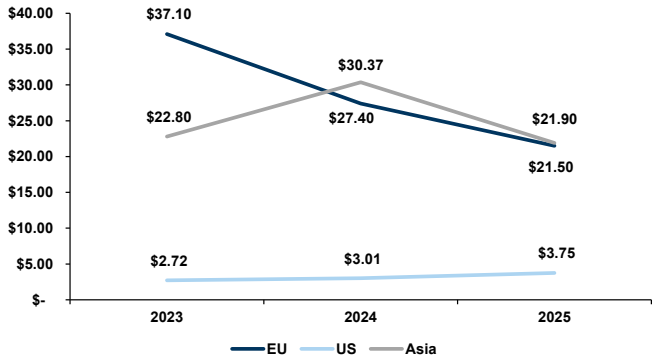
The geopolitical challenges of the past year have put a heightened focus on energy security around the globe. With that backdrop in mind, as well as the use of natural gas as a transition fuel and volatility in global gas prices, interest in LNG has increased significantly. As we think about the path for global decarbonization, we believe that natural gas will be an important part of the energy mix for the foreseeable future and act as a transition fuel, allowing global coal consumption to decline. Given the abundance of natural gas in the US, we believe there is opportunity for incremental LNG exports to contribute to global decarbonization and highlight **Sempra** as a company under coverage taking advantage of these dynamics.

Macro context

Our commodities colleagues expect the European energy crisis to remain an issue until 2025 when the next wave of global LNG supply begins to come online. They expect that by the end of 2026, there will be more than 180 Bcm of new LNG export capacity online, which will make up for the 100+ Bcm of Russian exports that were lost. The team also notes that global gas markets remain vulnerable to LNG supply outages because of how tight the market currently is, and an outage in late-summer/winter could drive prices upwards, particularly in Europe.

While global gas prices have abated from highs, they remain elevated in both Europe and Asia relative to the US, and GS forecasts this dynamic to persist through 2025 at least. This provides a meaningful incentive for both US gas suppliers to sell LNG at elevated prices abroad and global purchasers who can buy US LNG at lower prices. We believe companies with existing capacity, like Sempra, that can pursue brownfield expansions, will be better positioned to continue to gain commercial interest in projects given the number of LNG supply additions set to come to market towards the end of the 2020s.

Exhibit 36: We expect natural gas prices in Europe and Asia to come down by 2025 but remain significantly above US levels
Natural gas by region



Source: Goldman Sachs Global Investment Research

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Micro implications

While there is not a significant number of utility companies exploring growth in LNG investment opportunities, Sempra and Dominion have leverage to the LNG theme. In particular, Sempra is seeing a direct and immediate impact from these trends in LNG demand via its Sempra Infrastructure Partners (SIP) segment. Phase 1 of SRE's Port Arthur LNG project went from being a future project in the queue in 1Q2022 to being oversubscribed and reaching FID in 1Q2023, with an increasing likelihood that the company will pursue a second phase at Port Arthur given significant commercial interest.

SRE has the most exposure to LNG within our coverage space, with SRE's SIP segment already owning 12 mtpa of LNG capacity in the form of the Cameron LNG project on the Gulf Coast. SIP currently has a pipeline of a potential of about 50 mtpas, although many of these projects are longer dated. Port Arthur Phase 1 has 10.5 mtpa of contracted capacity, with the potential to produce up to 13 mtpa, and Port Arthur Phase 2 is expected to be of similar size. SRE reported it had 1.65 mtpas of excess volumes from Phase 1 HOAs that could be allocated to Phase 2, with Phase 2 likely needing 10.5 mtpa of offtake agreements to reach FID, assuming similar requirements to Phase 1.

Outside of Port Arthur Phase 2, SRE has Vista Pacifico, Energia Costa Azul Phase 1 and 2, a fourth train for its Cameron Project, and an expansion for the existing Cameron trains. We estimate that these projects would add an incremental ~37 mtpas of capacity if they all come online, bringing the total online capacity to 62 mtpas, with SRE only owning a portion of this capacity. For illustrative purposes, our scenario analysis implies that applying a 100% probability for all of SRE's non-operational LNG projects could add $10 of implied value to our current target price of $178 for SRE, all else equal. We view the LNG business as a unique upside opportunity for SRE, as the contracted cash flow from the LNG projects can be used to fund rate base growth at the utilities. SRE partnered with ConocoPhillips (COP, Buy, Covered by Neil Mehta) to build Port Arthur Phase 1, with COP taking a 30% stake in the project, with potential for a similar ownership structure for SRE to persist for Phase 2. Strategic partnerships like this one allow SRE to build these large scale projects without undertaking all the risk historically associated with megaprojects.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 37: SRE has the opportunity to reach 62 mtpas of LNG capacity, assuming that future projects come online at the projected maximum capacity
SRE LNG projects

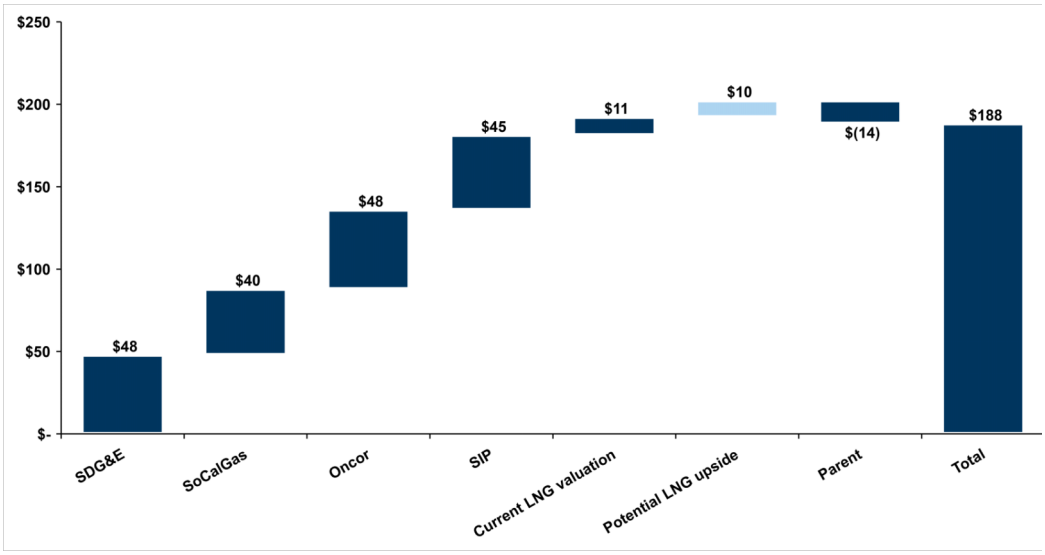
Exhibit 38: Our scenario analysis suggests that the LNG projects could add $10 of implied value to our current target price if they come online
Implied value from pipeline LNG projects, excluding Port Arthur Phase 1



Source: Company data, Goldman Sachs Global Investment Research

Dominion also owns 50% of a single LNG project named Cove Point in Maryland. Cove Point currently has a capacity of ~5.25 mtpas. Dominion has not given any indication that it intends to expand the LNG business going forward, as it is already managing one megaproject in its DVOA offshore wind project. We note that Dominion is undergoing a full business review and any asset could be put up for sale at the end.

Affordability/Regulatory

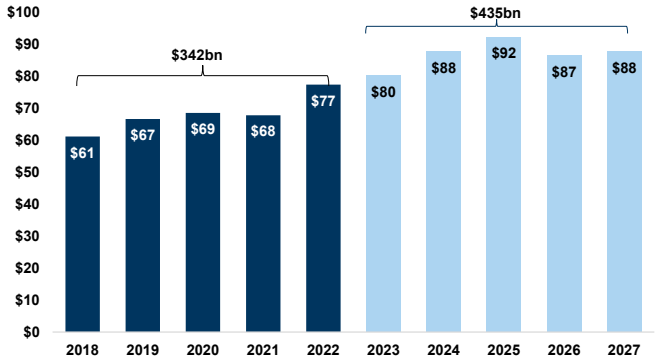
Managing customer affordability has been top of mind for utilities as inflation, commodity price volatility, supply chain constraints, and other factors have put pressure on the US consumer. We believe managing costs in this challenging operating environment will be key for utilities to maintain customer affordability while still allowing for robust investments in decarbonization and grid reliability via constructive regulatory outcomes across jurisdictions. Below we discuss factors contributing to higher utility costs and pressure on customer bills including inflation, interest rates, and fuel costs, as well as where utilities stand in terms of managing these cost pressures and balance sheets.

Inflation continues to impact household incomes with 2022 inflation rising by 8% and our economists expect CPI to rise 4.3% in 2023. Decarbonization also remains top of mind as the Inflation Reduction Act (IRA) has created incentives for utilities to transition away from fossil fuels to renewables. The transition requires incremental capital spending by utilities both to add new renewable generation capacity and ensuring the grid's ability to deliver power to demand centers. As a consequence, we expect that, in aggregate, our coverage will be spending $93 billion in capital investment more during 2023-2027 than they did during 2018-2022 (Exhibit 39). We believe utilities will need to remain focused on offsets to customer bills in order to minimize the impact on affordability to fund the transition.

Volatility in commodity prices, particularly natural gas, has had an impact on customers bills over the past year. Most utilities pass through fuel costs to their customers and over the past year fuel costs have been elevated with gas prices being the most volatile. As an example, Henry Hub prices, went from under $4/mmbtu at the beginning of 2022 to a peak of close to $10/mmbtu in late August 2022 and finally have fallen to ~$2.25/mmbtu in early June. In order to minimize the immediate impact on customers, regulators allow utilities to defer fuel costs and recover them over a specified time period to avoid sudden spikes in customer bills. That said, as commodity prices have moderated, many utilities have already lowered fuel components of bills, reducing the net effect of fuel recovery for 2023.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 39: We expect an increase in capex, by $93bn, of our coverage in the next 5 years vs the past 5 years
Capex by year ($bn)



Source: Company data, Goldman Sachs Global Investment Research

O&M trends

O&M levels grew across the board in 2022, with most of our coverage reporting double digit growth in O&M as a result of the inflationary environment, as well as several companies opting to pull forward future O&M given favorable impacts from weather during the year. With that said, despite the still challenging and inflationary environment, we expect YoY growth in O&M in 2023 to decline by about 3% on average as (1) supply chain constraints and inflationary impacts start to abate, (2) companies remain focused on cost management initiatives including around technology, (3) absence of O&M spend initially allocated towards 2023 that was pulled into 2022, and (4) companies look to offset mild weather to start the year. Longer term, we expect O&M expense growth to trend in the 1-2% range.

Balance Sheet, Interest Rate Risk, and Dividends

In the current elevated interest rate environment, we believe investor focus on balance sheet health will remain high. We recognize that deferred fuel costs that will be recovered in the coming quarters skew current leverage levels for certain companies, but believe that it creates even more importance around managing balance sheets in the face of continued uncertainty and financing needs with robust capital spending plans. That said, broadly we see healthy leverage metrics across our coverage at current, with most utilities trending near or above their credit downgrade thresholds.

When comparing FFO/Debt versus downgrade thresholds across our coverage (Exhibit 41), we find that most stocks stand above downgrade thresholds, with PEG and SO currently trending below. However, we believe there are some company specific attributes that could drive derisking in the coming quarters, for SO around deferred fuel recovery and in-service of Vogtle, and reduced hedging collateral for PEG. In the case of SO, the delta between current FFO/Debt and threshold is largely due to the under recovered fuel balances which is causing around 400bps of lag as per management's commentary on their 4Q22 earnings call. In addition, with Vogtle coming online, management expects to hit their FFO/Debt target of 17% by 2024.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Given the rising interest rate environment with 2 and 10 year US treasury rates climbing to 4.5% and 3.7% respectively at the beginning of June 2023 (Exhibit 42), we look at how increasing interest rates could impact EPS across our coverage. At utilities, debt at the holding company level is more vulnerable to interest rate risk as there is no mechanism to pass interest costs onto customers as exists at the regulated utility operating companies via the rate making process. Across our coverage, we see about a 1% impact to average 2024/2025 EPS from a 100 bps change in interest rates.

Dividend yields have historically been a key driver of the level of attractiveness of utility investments, particularly relative to the 10-year treasury yield. Across our coverage, the current dividend yield sits at 3.8% (vs. XLU at 3.2% and 10-year at 3.7%). We believe the relative gap between dividend yields and treasury yields has been a driver of utility underperformance more recently. Looking forward, we expect the sustainability and growth of dividend payments across utilities are key focus points for investors, in addition to relative yield.

Southern Company (SO, Buy): Positive as Vogtle comes into service, removing valuation overhang and driving EPS growth

We initiate coverage on Southern Company (SO) with a Buy rating and a 12-month price target of $80. While the stock has faced challenges in recent years due to execution missteps at the Vogtle project, we now see a path to SO re-rating to its historical valuation premium following the in-service of Vogtle Units 3 and 4, which we expect in 2Q23/1Q24, respectively. In addition, we have a constructive view on the company's regulated utility exposure, and see incremental upside opportunities not in our base case around energy transition investments, given that SO has expressed interest in renewables but has allocated limited capital to them thus far.

Vogtle Units 3 and 4 start up finally in sight, removing valuation overhang

Following multi-year challenges around the building of Vogtle Units 3 and 4, we now see line of sight to the incremental nuclear capacity coming into service. In our view, execution, timing, and budget issues around Vogtle have been a key overhang on the stock in recent years, and we see potential for that overhang to abate as the units come into service. We currently forecast Unit 3 to come online in 2Q2023 (vs. company guidance of May-June 2023) and Unit 4 to come online in 1Q2024 (vs. company guidance of late 4Q23/early 1Q24). When Vogtle Unit 4 comes into service fully in 2024, we expect the project to make up 11% of GA Power EPS.

We note the project has recently reached a number of key milestones, with Unit 3 having successfully reached 100% power and Unit 4 completing hot functional testing in May, which marks the last series of tests ahead of nuclear fuel load. We ultimately believe that the lessons learned from challenges on construction and execution around Unit 3 will be applied to processes around Unit 4, increasing the likelihood of a smoother path to completion and start up, in our view. Construction for Vogtle Units 3 and 4 was initially approved by the Georgia PSC in 2009 and the NRC approved the reactor design in 2011. The project was initially expected to be placed into service in

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

2016/2017 for Units 3/4. Currently $4.4bn of Vogtle spend is in rate base earning a penalty ROE, which is around 4% at this point, and $2.1bn of this piece will receive the full 10.5% Georgia ROE when Unit 3 goes into service. The remaining $5.2bn of the $7.3bn total will receive the full ROE as soon as Unit 4 goes in-service.

From 2000-2012, SO traded at an average FY2 P/E premium of about 2x relative to our coverage. As the Vogtle missteps began, from 2014 to current, the stock has traded at about a 0.8x discount to our coverage average. We now see the stock trading at about a 0.7x premium to our coverage on FY2 P/E, and with Vogtle progressing towards start up, we see a path towards SO regaining its historical premium with project risk largely resolved. In our valuation for SO, we apply a 2x premium to our coverage baseline average multiple given attractive regulatory exposure, resolved project risk, and potential upside around renewables.

Exhibit 44: We expect Vogtle to make up 11% of 2024E GA Power EPS when fully online in 2024

Chevron Case Study

One of Chevron Corporation's (CVX, Neutral, covered by Neil Mehta) core assets, Gorgon (LNG facility with production capacity of 15.6 mn metric tons per year), experienced various delays and budget cost increases over the years from the project's initial FID in late 2009 to first gas in early 2016. Upon FID, the total project was initially estimated to cost ~$37 bn, with an expected first phase startup in 2014. The total project ultimately cost closer to ~$54 bn, with first gas achieved in March 2016 vs the initial 2014 timeline. The over budget project contributed to CVX's negative FCF yield from 2013-2016, and as depicted below, once Gorgon Train 1 reached run-rate production and Train 2 experienced a start-up, the stock largely closed its market cap discount to XOM in subsequent years. We believe once the Gorgon project came online, which in 2022 accounted for ~8% of CVX's worldwide Upstream production volumes and implies ~14% of 2024 FCF (GS model), the market was able to better reflect present and future cash flows from the project, as well as de-risking multiples used in the stock's valuation. We also note CVX's Gorgon completion allowed the market to assume greater confidence in the Australia adjacent Wheatstone LNG project (online in ~2018), which in 2022 accounted for ~6% of CVX's worldwide Upstream production volumes and implies ~13% of 2024 FCF (GS model).

Attractive regulated utility exposure

We have a constructive view on the company's regulated utilities exposure in Georgia, Alabama, and Mississippi. While Georgia Power makes up the majority of SO's EPS and is generally a focus area given the Vogtle project, we believe there are attractive, underappreciated elements across the other utilities as well from a regulatory and returns perspective.

- **Georgia Power.** Across GA, AL, and MS power, GA Power represents the highest share of EPS at about 55% in 2022. The utility has an above average ROE, at 10.5%, which was recently set through the annual rate process and there was minimal delta between the company's initial request and what was granted both around rate increases and ROE. We believe this is a function of the company's constructive relationship with regulators, driven by strong reliability and focus on customer affordability, despite challenges around Vogtle.
- **Alabama Power.** While much of the focus on the SO story recently has been on Georgia and Vogtle, we believe Alabama Power, which comprises about 40% of the regulated utilities' earnings, could be underappreciated. We believe there is a favorable regulatory construct with the RSE, which drives an ROE well above the prevailing national average. At the 6.15% bottom end of the weighted common equity return range and roughly 53% equity layer, the allowed ROE is about 11.6% versus the LTM average across US at about ~9.6%. We expect the utility to earn at or above its authorized return through the extent of our model.
- **Mississippi Power.** While there is still outstanding litigation around the Kemper project, the returns and affordability at Mississippi Power screen attractive relative to national averages. The authorized ROE of ~10% is above the US LTM average of ~9.6% and Mississippi Power's customer rates across all classes are below the average across our coverage according to data from the EIA. We note that base rates at Mississippi Power are generally set under the Performance Evaluation Plan (PEP), where customer prices relative to other regional utilities in addition to reliability and residential customer satisfaction are inputs.

Exhibit 48: Across the regulated electric utilities, GA Power makes up the largest share of earnings, but AL Power is also meaningful

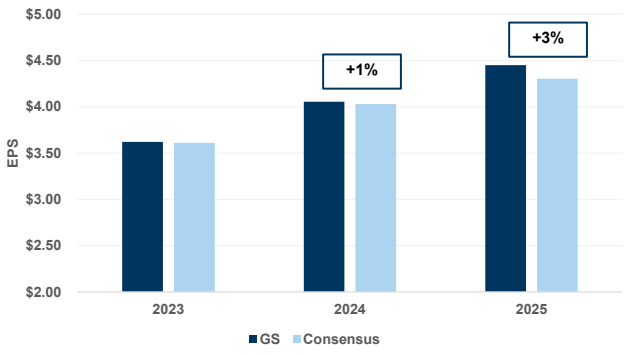
See upside to consensus and capex, with further opportunities around Energy Transition not baked in

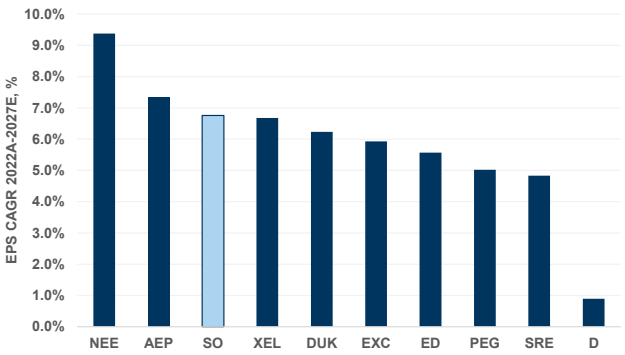
We are currently 1%/3% above FactSet consensus earnings for 2024/2025 and 3% above company guidance around capex through 2027. We believe this contributes to an attractive EPS CAGR through 2027 of 7% and see potential positive revisions to consensus and guidance as catalysts for the stock. In addition, we note that the company's base capital spending plan is conservative, in our view, given only projects that have received regulatory approvals are included. Our current capex estimates are $44.1 bn through 2027 versus SO's base plan of $43 bn. That said, we see further upside potential around capex, earnings, and customer benefits.

Exhibit 52: We are 1%/3% above FactSet consensus earnings in 2024/2025
GS vs. FactSet consensus EPS



Source: FactSet, Goldman Sachs Global Investment Research

Exhibit 53: Through 2027, we see a ~7% CAGR for SO EPS, which screens well relative to peers and we see upside risk to the extent further capital spend opportunities materialize
2022A-2027E EPS CAGR, %



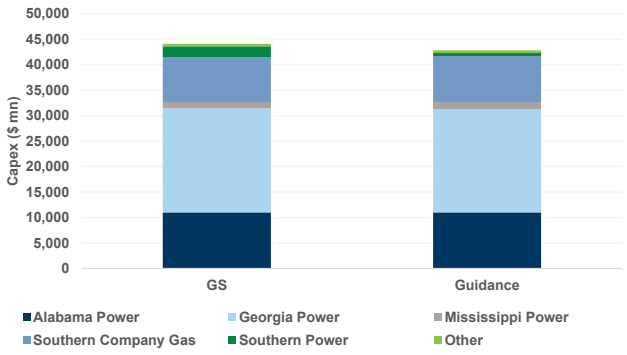
Source: Goldman Sachs Global Investment Research

We see potential for more capital spend to be allocated to the Energy Transition relative to the company's base capital plan, both at Southern Power and at the regulated utilities. SO's current base capital plan is $43 bn across 2023-2027 and management has identified $3+ bn in potential incremental spend across that period.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Opportunities include investments at Southern Power as well as the regulated utilities around renewables, other decarbonization investments, transmission, and resiliency. While there are a number of places capex could be allocated, we illustrate an example below that represents potential earnings uplift were the capex to be allocated towards transmission given our view as discussed above that there is an industry wide transmission shortfall. Assuming the earnings impacts are ratable across the five-year period, our scenario analysis implies $3 bn of incremental spend on transmission could impact our earnings estimates by 1% annually, all else equal.

Exhibit 54: We currently embed $44.1 bn in capex through 2027 relative to SO's base plan of $43 bn, and see further potential upside from here
Capex, 2023-2027, $ mn



Source: Company data, Goldman Sachs Global Investment Research

Exhibit 55: To the extent SO's $3 bn of incremental capex opportunities were allocated towards transmission, our scenario analysis implies we could see 1% upside to our annual earnings through 2027, all else equal
Earnings impact from incremental capex spent on transmission (scenario analysis)

Source: Company data, Goldman Sachs Global Investment Research

We also look at potential for tax credit generation at Georgia Power via PTCs from renewable energy sources approved in its recent IRP. At Georgia Power, the approved 2022 IRP included approvals for 2,300 MW of renewable energy sources over the next three years, putting the company on its way to reaching its targeted 6,000 MW of new renewable resources by 2035. To the extent these are owned 100% by GA Power and brought online ratably over the next 3 years and through 2035, we believe more than $215 mn of tax credits could be generated via the PTC annually by 2027, with a potential peak near $350 mn by 2031. These credits could provide savings to customers, further

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

improving customer affordability and creating headroom for incremental investments without significant bill impacts.

Exhibit 56: To the extent GA Power brings on solar to reach its renewables target of 6,000 MW by 2035, we could see over $200 mn of tax credit benefit by 2027
PTC potential from GA power renewables, $ mn

Valuation & Key Risks

We are Buy rated on SO. Our 12-month, P/E-based price target is $80. In our valuation, we apply an 18.0x multiple on 2025 earnings, which is a 2x premium our baseline coverage multiple of 16x, in line with the premium at which the stock historically traded pre-Vogtle.

Key risks to our positive view include

1. **Execution risk around Vogtle.** While we believe there is a clear path to start up for Units 3/4, there could still be missteps in final testing/start up activities that could push timeline or increase costs. In addition, there could be risk around the prudency hearing, which will determine how much will go into rate base once the Units are online. This risk could impact the multiple re-rate and represent downside risk to our estimates.
2. **Balance sheet.** The company is currently below its FFO/debt downgrade thresholds, largely due to deferred fuel balances at Georgia Power. We expect these balances to be recovered over the next 36 months. However, if the company is unable to recover these balances or other factors drive metrics to remain sustainably below downgrade threshold levels, there could be risks. That said, we also see potential for credit rating agencies to revise downgrade thresholds once Vogtle Units 3/4 come into service as project execution risk is removed.
3. **Slower than anticipated rate base/earnings growth.** We are above consensus on earnings for SO in 2024/2025 and expect an EPS CAGR through 2027 of ~7%. We also embed capital spending above current company base guidance given our expectations SO will continue to invest to drive rate base growth. To the extent capex, rate base growth, or earnings growth does not materialize to the extent we forecast, we could see downside risk to estimates.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

A quick overview of SO

Southern Company is a $76 bn market cap regulated utility operating the Southeastern US. It has over 8.7 million electric and gas customers. The company has 3 traditional utilities (Alabama Power, Georgia Power and Mississippi Power), which benefit from operating in a historically favorable regulatory environment.

The company operates multiple subsidiaries including:

- **Alabama Power** – Serves Alabama and is a vertically integrated utility owning generation, transmission and distribution facilities, which has solid industrial growth. Rate making in Alabama is underappreciated providing for high authorized ROE, limited regulatory lag, ability to grow earnings from the transition from coal to renewables.
- **Georgia Power** – Serves Georgia and is a vertically integrated utility owning generation, transmission and distribution facilities which reside in a state that has seen strong growth, with an attractive operating environment. It has a constructive regulatory environment with a forward-looking rate case every 3rd year. GA power is the partial owner (45.7%) of the Vogtle nuclear power plant, which has been an overhang for the stock. Its Units 1 & 2 were built in 1976 and construction began on Units 3 & 4 in 2009. The original budget of $14bn and an expected in-service date of 2016 were missed as costs have crossed $30bn and the in-service date for Unit 3 is expected to be 2Q2023. Unit 4 is expected to go in-service in late 4Q2023/early 1Q24.
- **Mississippi Power** – Serves half the state of Mississippi, with the other half being served by Entergy Corporation (ETR). It is considered to be a historically attractive utility regulatory environment. The company has annual increases to help offset under earning based on blended forward and historical test years.
- **Southern Power** – It is a non-regulated subsidiary, which means that its business activities are not subjected to regulation like a traditional utility would be. Instead, Southern Power enters into PPAs (purchased power agreements) with investor owned utilities and sells electricity to them at predetermined prices. It owns natural gas plants as well as renewable generation facilities.
- **Southern Company Gas** – Deals with the distribution of natural gas as well as gas pipeline investments and gas marketing services.

NextEra Energy (NEE, Buy): Renewables build out, above average EPS growth, and attractive regulated utility exposure drive positive view

We initiate coverage of NextEra Energy (NEE) with a Buy rating and a 12-month SOTP based price target of $90. Three key factors underpin our Buy rating: leverage to renewables growth, positive regulatory environment and a long track record of execution at FPL, and above average EPS growth with discounted valuation relative to history. We view NEE's regulated utility Florida Power & Light (FPL) as a premium regulated utility with a long runway for growth in a positive regulatory backdrop. Its

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

renewable development segment, NextEra Energy Resources (NEER), owns the largest portfolio of renewables in the US and plans to double its size by the end of 2026. NEE shares have underperformed the XLU by ~5% YTD, which we believe provides an attractive entry point for investors.

Highest leverage to renewables build out via NEER

Across our coverage, NEE has the highest leverage to the build out of renewable power, with 59% of our 2023-2027 capital spending estimates allocated to renewables. We expect NEER to bring ~42 GWs of new renewable energy into service over the 2023-2026 timeframe, versus company guidance of 33-42 GWs. NEER is already the largest owner of renewable generation, and this aggressive growth plan will further solidify its lead vs competitors. NEER's current renewable portfolio is made up of 23 GWs of wind, 5 GWs of solar, 1 GW of storage, including assets that NextEra Energy Partners (NEP, Coverage Suspended) owns and NEER operates. This means that the current development plan should more than double the size of the existing portfolio. We estimate that the LCOE of wind is $25/MWh and solar is $33/MWh, compared to natural gas at $60/MWh and coal at $73/MWh. Both solar and wind benefit from lower O&M costs relative to natural gas and coal, as neither require variable O&M once they are brought online. In addition to traditional renewable power, we also believe NEE could be a first mover in the green hydrogen space, although we await clarity from treasury around the hydrogen tax credits to quantify potential economic benefits.

NEE has highlighted wind repowering as a meaningful opportunity going forward. The current development plan includes up to 1.4GWs of wind repowering through 2026. Solar and storage can also be repowered, and should provide an additional tailwind if NEE allocates resources to repowering those assets. The primary purpose of repowering wind is to extend the life of the production tax credit (PTC) it benefits from for another 10 years, and typically the investment into the wind turbine also increases the generation output by 15-20% annually. We have highlighted the potential for the wind repowering opportunity below, with 2GWs of wind repowerings adding nearly $74mn of revenue due to increased production, on top of the $200mn+ of tax credits

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

that NEE should continue to get following the repowering, per our calculations. NEE already has $5bn of tax credits on its balance sheet, and uses 95% of new credits for tax equity financing, which allows NEER to aggressively grow its renewable portfolio without large financing needs. Once tax credit monetization is implemented and a market develops, NEE can use its new and existing tax credits to bolster its cash flow when needed. NEER itself owns 14.8 GW of wind, all of which will all eventually need to be repowered when each asset's PTC approaches expiration at 10 years.

NEER's renewable development program is one of the key items to monitor for NEE's growth going forward. The ambitious goal of doubling the size of the renewable portfolio through 2026 should set NEER even further apart from its renewable developer competitors, and our numbers assume that NEER will achieve this goal and hit the high end of the development plan range. However, we acknowledge the execution risks that come with such a large undertaking, and highlight the EPS impacts if NEER misses our expectations on renewables development going forward. In the scenario analysis below, the bear case has NEER achieving the bottom end of the guidance range, and the bull case has NEER achieving 25% above the top end of the range. Given NEER's track record of success and reputation for hitting the top end of guidance, we believe having the top end of the guidance as a base case scenario is justified, and hitting the bottom end of the range, our bear case, would be disappointing for management. In our view, given NEE's scale, experience, and track record of execution in renewables development, the company is well positioned as a supplier of choice and can attain more constructive economics relative to peers to continue to drive development.

Constructive regulatory outlook and execution at FPL

We view the regulatory environment in Florida as constructive and see FPL as a premium regulated utility. FPL secured a multiyear settlement in 2021 that lasts through 2025, meaning there is minimal near term rate case risk. FPL also benefits from a high authorized RoE relative to other utilities, with the RoE band going up to 11.8%. Moreover, FPL has access to a unique regulatory mechanism in its surplus amortization reserve, which allows it to adjust D&A expense in quarters where weather is a headwind to ensure it hits the upper end of its authorized RoE band. Florida's commissioners have shown that if a utility is able to manage costs, keep customer bills low and reliability high, they are willing to grant positive outcomes in rate cases as well as utility friendly regulatory riders and trackers. Florida as a state gets hit by the most hurricanes each year on average in the US, requiring utilities to spend a significant amount on grid reliability to withstand such storms. The commission fully supports this as it is a net benefit to customers, and it provides the utility with a consistent avenue to invest and grow rate base going forward. FPL recently filed its 10-year plan for solar, including 20 GWs of solar and 2 GWs of storage through those 10 years. This will be a large expansion of FPL's solar portfolio, as it only owns 4.5 GWs of solar now.

Florida has benefited from above average population growth relative to the rest of the US in recent years. Over the past 5 years Florida's population CAGR is more than double that of the US at 1.2%, only dipping below the US growth rate in 2020. This population growth not only provides NEE with organic load growth, but having more customers to spread costs across allows FPL to increase capital spending without raising customer bills significantly, contributing further to constructive relationships with regulators. FPL's bills remain materially below average at roughly $0.135/KWh, with the average of our coverage closer to $0.18/KWh.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

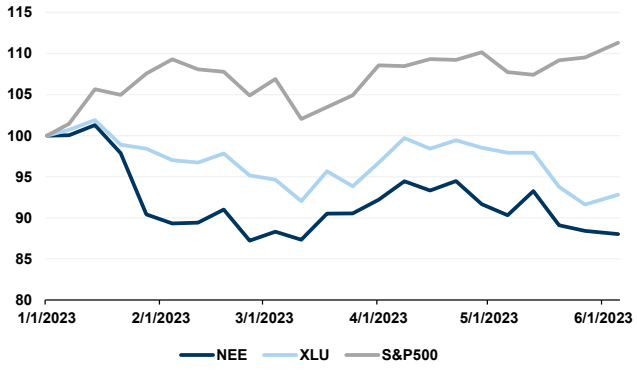
Attractive valuation following recent underperformance

Year to date, NEE shares have underperformed the XLU by 4.8% and the S&P500 by 23%. We attribute this underperformance to a number of factors including recent company management change and investor concerns pertaining to allegations around campaign finance violations at FPL reported by NPR. On the 4Q2022 earnings call, investors queried if the management change at FPL was related to the allegations of campaign finance violations, to which management disagreed. We also believe that some investors expected NEE to grow its renewable development plan at NEER following the passage of the IRA in 2022. NEE's outperformance in the mid 2010s was largely under the guidance of former CEO Jim Robo, who has since stepped down. While the new management team has experience at the company, we believe investors remain focused on continued execution at a high level to continue to build confidence with the investment community. In our view, the recent underperformance has created a buying opportunity as those concerns move in the rear view mirror and investors digest a solid 1Q23 results and look ahead to the existing development plan that will

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

double the size of NEE's renewable portfolio.

Exhibit 66: NEE has materially underperformed both the XLU and the S&P 500 YTD
NEE vs XLU vs S&P 500



Source: FactSet, Goldman Sachs Global Investment Research

At current levels, we see the stock trading at a discount to its historical 5-year premium to peers, despite above average earnings growth. Over the past 5 years NEE has traded at a 6-7x premium to our coverage, which we view as warranted due to its premium regulated utility, best-in-class renewables segment, NEER, and above average earnings growth. At current, the stock is trading at a 4-5x premium to peers, which we do not believe gives the company adequate credit for the growth profile, leverage to decarbonization themes, and strong track record of execution.

Taking into account our NEER development assumptions, which are at the high end of company guidance with risk skewed to the upside, and our constructive outlook at FPL, we see attractive earnings growth at NEE, with a 5-year EPS CAGR of 9% versus peers at 6% on average. In addition, we are 4% above FactSet consensus on average over 2025-2027, as the pace of renewables additions picks up in 2025 driving NEER earnings higher.

In our model we have given NEER a 15x EV/EBITDA multiple to reflect the significant scale advantages relative to peers and track record of strong execution. In our valuation for NEE, we apply a 5x turn premium to peers on our P/E multiple for FPL to reflect the attractive regulatory environment and strong execution/cost management at the utility. NEE's stock price has been mostly range bound at $70-$80 for the past few years, as the challenging macro environment of rising interest rates and inflation puts pressure on all utilities. In our view NEE has successfully navigated many of these headwinds, and we expect continued strong execution will shift the focus on NEE away from the near term challenges it faces to its long term idiosyncratic growth opportunities.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

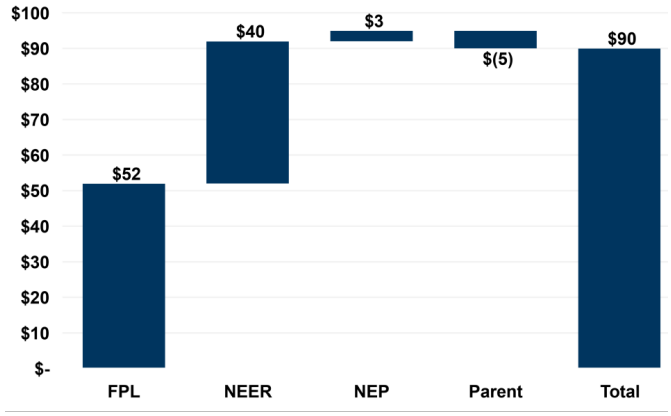
Valuation & Key Risks

We are Buy rated on NEE. Our SOTP based price target of $90 implies a total return of 25% vs the average of 15% for our coverage group. In our valuation, we apply a 21x P/E multiple (5x premium to our 16x baseline multiple) on our 2025 FPL earnings to capture the attractive regulatory environment and track record of cost management/execution. For NEER, we apply a 15x EV/EBITDA multiple on our 2025 estimates to capture NEER's significant scale relative to peers and strong track record of execution.

Exhibit 69: Our SOTP implies a target price of $90
SOTP waterfall



Source: Company data, Goldman Sachs Global Investment Research

Key risks for NEE include the 1) regulatory landscape turning more negative, as Florida's friendly regulatory jurisdiction is key to FPL's ambitious growth plans, but we see this as unlikely; 2) investor concerns surrounding the FPL campaign finance allegations reported by NPR which may lead to penalties, as we do not know what the potential ramifications from these allegations could be (if any; we take no view on the likelihood of any outcome) or when this may be expected to be resolved; 3) not achieving the goals laid out in NEER's renewable development plan, or slowing the growth at NEER, which is a key driver of our above average NEE earnings growth outlook; 4) Florida population growth slowing leading to slower than expected load growth and customer

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

growth at FPL; and 5) cost management, which remains a challenge in the current macro environment.

A quick overview of NEE

NextEra Energy (NEE) is the world's largest utility company with a market cap of $148bn, consisting of a regulated utility and a clean energy segment. The company was founded in 1925 as Florida Power & Light Company and is headquartered in Juno Beach, Florida. NextEra was an early investor in renewable energy, achieving the title of the largest producer of solar and wind energy in the US as early as 2009. NEE is the sponsor of NextEra Energy Partners (NEP, Coverage Suspended), a renewable Yieldco that went public in 2014 when NEE spun off a portion of its solar/wind assets into a separate entity.

The company operates the following segments:

Florida Power & Light Company (FPL): FPL is the largest utility in the US, selling electricity to more than 12 million people across Florida. FPL owns a portfolio of natural gas fired generation, solar, nuclear, and battery storage. Florida is considered one of the best regulatory jurisdictions for utilities in the US, and FPL benefits from multi-year rate plans with an authorized RoE band that goes up to a best-in-class 11.8% authorized RoE. FPL additionally has a unique regulatory item in its surplus depreciation reserve, which allows it to amortize the reserve over time without affecting customer bills.

NextEra Energy Resources (NEER): NEER is a competitive clean energy business that has the largest portfolio of renewable generation assets in the world. NEER has around 23 GWs of wind generation, 5 GWs of solar, and 1 GW of storage, including assets owned by NextEra Energy Partners (NEP, Coverage Suspended) that NEER operates. It plans to deploy a total of 33-42 GWs of renewable generation in 2023-2026, and already has 20 GWs of renewable projects in its backlog. NEER has several other businesses beyond the clean energy piece, including electric transmission assets, a retail marketing business, a commodity trading business, a gas E&P business, and others.

Sempra Energy (SRE, Buy): Underappreciated LNG upside, leverage to Texas growth, and attractive valuation drive Buy rating

We initiate coverage of Sempra Energy (SRE) at Buy with a target price of $178, as we are positive on its Texas utility, exposure to LNG, and valuation at current levels where we see the most total return potential across our coverage. SRE has a significant project pipeline for LNG at its Sempra Infrastructure Business (SIP), with the

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

potential for 62 mtpas of total capacity online if all proposed projects come to fruition, with SRE owning a portion of the capacity. While the projects will likely not come online until the late 2020s at the earliest, we expect progress towards reaching FID and beginning construction will serve as positive catalysts for SRE along the way. SRE's Texas utility Oncor continues to benefit from the strong customer growth in the region, and recently raised its 5-year capital plan significantly to boost rate base growth. We view SRE's business mix favorably and see SIP as a unique opportunity to gain exposure to LNG in the utility sector.

Robust LNG project queue drives diverse cash flow growth

We believe LNG has a long demand runway and will be key to enabling global decarbonization via coal displacement. Across our utilities coverage, Sempra has the most leverage to LNG with a robust queue of projects on both the Gulf Coast and the Pacific Coast of Mexico via its 70% ownership stake in Sempra Infrastructure Partners (SIP). The company recently reached Final Investment Decision (FID) on Phase 1 of its Port Arthur LNG project, which we believe increases the likelihood of Phase 2 of the project, where we currently ascribe a 50% probability. SIP makes up ~25% of total SRE earnings on our numbers on average in 2023-2037 and grows at a 6% CAGR.

In our valuation, SIP contributes $56/share, with $11/share from LNG projects expected to come into service in 2025 and beyond. We believe the significant cash flows for these LNG projects can fund capex for rate base growth at the regulated utilities, as well as support the return of capital to shareholders through share buybacks in the near term, similar to the share buybacks SRE executed following the sale of a minority stake in SIP in late 2021. We view this LNG exposure as a unique growth opportunity for SRE as we believe announcements on the LNG queue will provide consistent catalysts for SRE and the projects themselves provide steady cash flows when online given the long term contracted nature of the LNG business. As we touched upon earlier in the LNG section, we expect natural gas, including LNG, will be an important fuel type on the global stage for the foreseeable future.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Following the FID of Port Arthur Phase 1, SRE expects the first train to come online in 2027, and the second in 2028, meaning 2029 will be the first year with full production. ECA Phase 1 is still expected to be completed in 2025, and the Cameron expansion FID is likely sometime this year. Port Arthur Phase 2 now has its first HOA, and has received significant interest according to SRE's management.

Exhibit 72: SRE could own up to 62 mtpas of LNG capacity if all of its projects come online

Exposure to attractive Texas growth market via Oncor

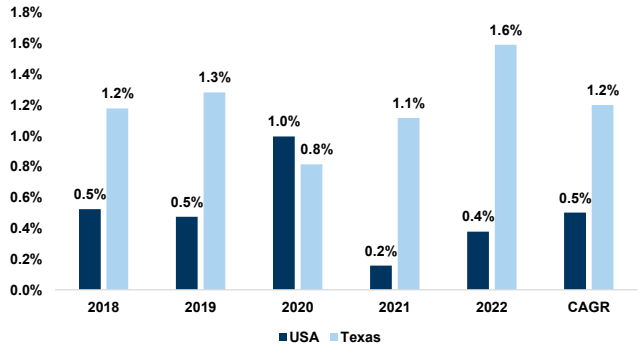
While we believe there are certain concerns on the regulatory side in Texas, we

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

have a constructive view on Oncor and its leverage to the growing Texas market. Oncor expects an average of 1-2% customer growth each year, with most regions of the US seeing 1% or less in most years. This customer growth has a two fold benefit, as it not only provides organic load growth for the utility, but the growth spreads capex costs across more customers, allowing Oncor to spend more on rate base growth without raising the customer bill. Texas population growth has nearly doubled the US growth rate over the past 5 years, minus 2020 which was impacted by the beginning of the pandemic, and we expect this strong growth to continue for the foreseeable future. Oncor's rate case outcome in 1Q2023 was relatively constructive in our view, with the 9.7% RoE only a 10 bp reduction from the previous result, and slightly above the national LTM average. The constructive result removes a regulatory overhang from Oncor for several years, and opens the door for incremental capital plan increases in the near future.

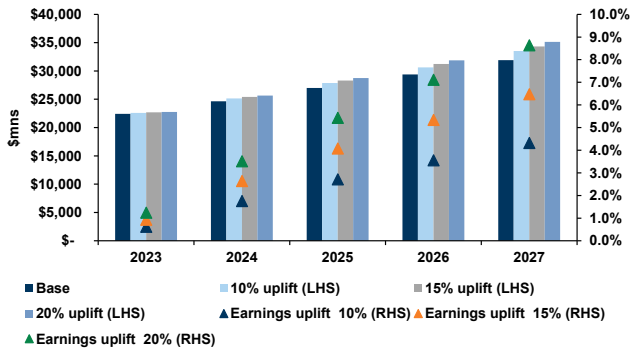
Across our coverage, we expect SRE to have an above average share of capital spending allocated towards transmission, where we include potential around FERC spend at SDG&E as well as transmission spend at Oncor. As detailed above, we view the transmission build out as key to enabling the increased penetration of renewables, and believe more investment than currently identified will be needed to accommodate renewable build out estimates. The plains of Texas are considered an ideal location for wind generation, and as these wind projects continue to scale up utilities such as Oncor will need to expand the transmission grid to support them. Oncor currently has a capital spending budget of $19bn and has highlighted at the potential to raise the capex again in October of this year. This higher spend could drive up to 9% of earnings uplift for Oncor via stronger rate base growth, per our estimates. We note Oncor represents 27% of total SRE earnings on average from 2023-2027.

Exhibit 74: Texas has significantly outpaced the US in population growth
Texas vs US population growth rate



Source: Census Bureau, Goldman Sachs Global Investment Research

Exhibit 75: An additional increase to capital spending this year could have a meaningful impact on earnings going forward
Impact of a capex raise; rate base and earnings



Source: Company data, Goldman Sachs Global Investment Research

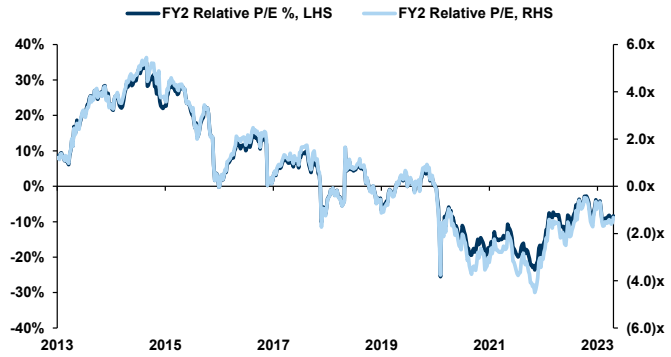
Attractive relative valuation

SRE has traded at a slight discount relative to regulated utilities following the market selloff in 2020 due to the pandemic. Given that we believe SRE has potential for idiosyncratic earnings and FCF growth from its LNG exposure, along with benefits from exposure to the growing Texas market through Oncor, we view this as

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

unwarranted. We see this as an attractive entry point, with SRE trading at ~15x on FY2 P/E, which is a discount to the 16.5x average for our coverage. As highlighted above, SRE has several potential catalysts coming up in the next year which we believe could close this valuation gap.

Exhibit 76: SRE has traded at a modest discount in recent years
SRE P/E vs regulated peers



Source: Company data, Goldman Sachs Global Investment Research

Valuation & Key Risks

We are Buy rated on SRE and our 12-month price target is $178. We use a SOTP to value SRE, applying a probability of completion for the LNG projects and discounting them back from our estimated completion date. For the utilities, we apply a 1x premium to our baseline multiple of 16x to the Texas utility Oncor, to reflect the strong customer growth seen in Texas and strong execution. We apply a 1x discount to the California utilities as we see the regulatory environment as challenging, with SoCalGas recently having its credit outlook downgraded to negative following the ban on new natural gas connections, and expect only moderate growth at these utilities going forward.

We view the key risks for SRE as (1) delays with the LNG projects, which we believe is a key driver of catalysts in the coming quarters for SRE and provides stable cash flow invest in the utilities, (2) Texas customer growth slowing or the regulatory environment becoming less favorable in Texas, and (3) unfavorable rate case outcomes at the California utilities or challenging regulatory constructs, particularly as it relates to the outlook for natural gas and the company's ability to explore decarbonization technologies at the business.

A quick overview of SRE

Sempra Energy (SRE) is an energy infrastructure company with a market cap of $46 bn. SRE was formed in 1998 from a merger of Pacific Enterprises and Enova Corporation, and is headquartered in San Diego, California. SRE owns 3 regulated utilities in California/Texas as well as an infrastructure segment that consists of an energy infrastructure business in Mexico, LNG export centers, and other various projects. The company owns a stake in the Cameron LNG facility in Louisiana and has several potential LNG facilities in its pipeline, including Port Arthur Phase 1 in Texas which reached Final Investment Decision (FID) in 1Q2023.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

SRE operates the following segments:

San Diego Gas & Electric (SDG&E): Regulated gas and electric utility that serves 3.7mn customers in California. SDG&E has filed a general rate case with a proposed decision currently scheduled for mid-year 2024.

Southern California Gas (SoCalGas): The largest gas utility in the nation, serving 21.8mn customers in Southern California. SoCalGas has filed for a general rate case as well, also expecting a decision around mid-year 2024.

Oncor: SRE owns an 80.25% stake in Oncor, a Texas based electric utility serving 13mn customers. Oncor recently resolved a general rates case in Texas, receiving a 9.7% RoE and a 42.5% equity layer, a relatively constructive outcome in our view.

Sempra Infrastructure Partners (SIP): SIP consists of IEnova, a Mexico based energy infrastructure company, Cameron LNG, as well as several potential LNG export centers, and various other projects. SRE owns 70% of SIP following a sale of a 20% stake to KKR and a 10% stake to ADIA. The global focus on energy security has heightened interest in LNG to new levels, pushing several of SIP's projects forward, with Port Arthur Phase 1 recently reaching FID, and an increasing likelihood of Phase 2 moving forward.

American Electric Power (AEP, Buy): Leverage to transmission/regulated renewables build out and above average growth at a discount

We initiate coverage on American Electric Power (AEP) with a Buy rating and a 12-month price target of $98. As the largest transmission owner currently, we expect AEP to be one of the primary beneficiaries as the grid transitions to clean energy and demands significant transmission expansion to support the grid. AEP is also in the process of transitioning its generation fleet as it plans to retire 4.8GW of coal by 2028, and has allocated $8.6bn of its 5-year capital plan to renewables. The new management team is actively working to address the regulatory lag that has hindered AEP historically, and we believe any progress on this front would be material to growth. AEP has underperformed the XLU by 6% over the past year.

Leverage to transmission build out drives attractive rate base and earnings growth

AEP currently has the largest transmission business in the US. The company is also allocating the most capital investment towards transmission, both expansions and replacements, over the next five years relative to our coverage. We expect AEP to spend $15 bn on transmission through 2027, in-line with guidance, which we expect to drive ~24% rate base growth relative to 2022 levels and make up ~5% of earnings in each year, with a large portion of current spend going towards replacing aging infrastructure. We've sized the total industry transmission opportunity through 2040 as ~$725 bn, which would require AEP to nearly double the run rate of its annual transmission capex, assuming it continues to make up about 14% of total transmission spend.

Management has clearly signaled that AEP believes the transmission piece of the business does not receive proper credit, and we believe the renewables transition will put a spotlight on companies that have experience efficiently navigating the transmission regulatory space. At the recent 2023 Platts Global Power Markets conference in Las Vegas, many noted that the permitting required to support the full renewable build out in the US could prove to be one of the largest bottlenecks to implementing IRA driven investments. Transmission is one of the more difficult asset classes to get permitting for given that it often crosses state borders, and AEP is one of the best in navigating the regulatory and permitting obstacles for transmission projects, largely due to its wealth of experience in the area. In our valuation, the Transco segment contributes over 30% of value, and we note further transmission is embedded in the VIU and T&D segments.

Exhibit 80: AEP has allocated a significant portion of its capex towards transmission to remain the largest owner of transmission in the US

Attractive leverage to regulated renewables growth

The company also plans to spend nearly $9 bn on regulated renewables investments through 2027, in addition to allocating significant capital towards transmission investments. This renewable build out will equate to about 17 GWs of solar/wind over the next 10 years and will replace the 4.8 GW of coal that AEP is planning to retire by 2028. Our model currently assumes 45% ownership level for the RFPs that AEP has issued, and upside exists if AEP receives a higher ownership level than expected. When looking at different ownership level, we estimate that the renewable RFPs could boost revenue by ~$500mn annually if AEP achieves a 50% ownership level for all of them.

This transition to renewables will coincide with AEP's plans to retire many of its coal power plants by 2028. We note that even if including the cost of capital required to install the wind/solar generation, both remain cheaper on a $/MWh basis than coal due to the higher O&M costs to maintain and run a coal plant and the costs to transport and acquire coal for fuel. These renewable RFPs will also qualify AEP for a material amount of tax credits, which it has had in limited amounts in the past with its fossil fuel dominant fleet. The tax credits will not only reduce AEP's tax burden, but when the tax credit monetization market emerges, it could bolster cash flow and improve AEP's financing needs.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 83: AEP has reduced its coal capacity significantly over the past few decades, and expects renewables to make up the majority of generation capacity by the 2030s

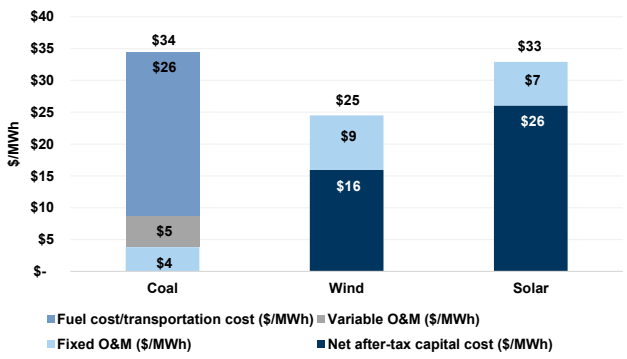
Wind vs solar vs coal $/MWh



Source: Company data, Goldman Sachs Global Investment Research

We believe the attractive opportunity sets around transmission and renewables investments to replace coal generation will drive above average earnings growth for AEP, with a 5-year EPS CAGR of about 7% versus peers at 6%. We are on average 3% above FactSet consensus in 2023-2027. Despite an attractive earnings growth profile, and potential for upside to earnings and investment from strategic/regulatory efforts as discussed below, AEP shares currently trade at a 1.6x discount to peers on FY2 P/E versus historically trading broadly in line with the group. We do not view this discount as warranted given the attractive investment and earnings growth opportunities and the strong leverage to key decarbonization themes in transmission and renewables replacing coal generation.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Taking action to high grade the business

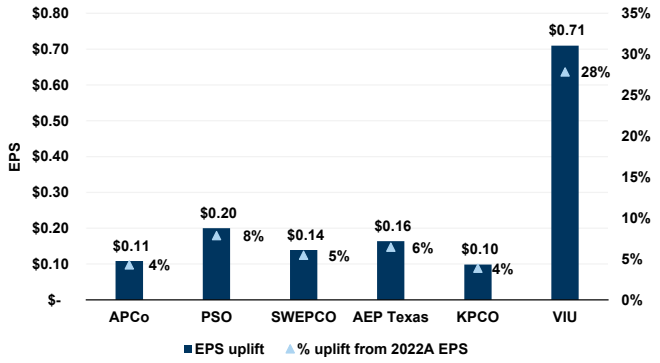
In recent quarters, the company has taken a number of strategic actions in order to optimize the business mix at AEP. First, AEP has signed an agreement to sell its commercial renewables business for an expected $1.2 bn of cash proceeds, expected to close in 2Q2023. Second, AEP has decided to sell both its Retail business and its Distributed Resources business, with a combined book value of $550mn. Third, AEP has noted that it is undergoing a strategic review of non-core transmission JVs to help fund growth at the regulated utilities. AEP was planning to sell its KY business for $1.2bn of cash proceeds, as it had been an underperformer relative to its authorized RoE, earning an average of 2.9% ROE in 2022 vs authorized of 9.3%. The sale has been terminated, and AEP stated it now plans to refocus on improving KY, and plans to file a rate case in June 2023.

The termination of the KY sale should not lead to incremental equity needs, given the proceeds from the sale of its commercial renewables business will effectively replace the KY sale proceeds in its financing plan. Current equity needs laid out by the company are $2.8 bn through 2027, which could be further mitigated by the sale of its retail business or a sale of non core transmission JVs.

AEP has requested several regulatory mechanisms at its VIU segment in an effort to close the ROE gap, listing 4-5 items at APCo, PSO, SWEPCO, and AEP Texas; respectively. All of these segments have under-earned relative to authorized earnings due to regulatory lag, and closing the gap could lead to $0.71 of EPS at VIU in our view, which would be a 28% lift from 2022A. We note that the TTM earned RoE used in our analysis of 2.9% at KPCo is unusually low for that segment. We based this analysis on TTM earned ROEs, per AEP's disclosures, and our 2024 rate base and share count estimates for the VIU OPcos.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 89: Per our estimates, closing the gap between earned and authorized ROE could result in $0.71 of incremental EPS
Earnings uplift from earnings authorized - based on TTM earned RoE, 2024 share count and rate base estimates



Source: Company data, Goldman Sachs Global Investment Research

Valuation and Key Risks

We are Buy rated on AEP and our 12-month price target is $98. We value AEP with a SOTP to account for its transmission holdco segment along with its regulated utilities. We apply a 16x multiple to its VIU and T&D segments, accounting for the potential renewable growth at VIU as well as the regulatory lag that both segments face. For the transco segment we apply a 19x multiple to account for the strong RoEs and material investment into the segment.

Key risks include 1) Lower than expected ownership of renewable RFPs, as this would slow growth at VIU and the contribution of renewables to earnings; 2) Financing needs if any potential announced asset sales fall through, AEP could require incremental equity issuance relative to base case financing plans; 3) Failure to make progress on closing the ROE gap at the VIU utilities, especially at Kentucky following the termination of the asset sale, and 4) cost management given the inflationary environment.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 90: We now value AEP with a SOTP, with a target price of $98

A quick overview of AEP

American Electric Power (AEP) is a $43 bn regulated utility founded in 1906 and headquartered in Columbus, Ohio. AEP serves 5.5mn customers across 11 different states. AEP is the largest owner of transmission in the US and owns distribution and generation assets across its numerous regulated utilities. It is made up of four segments 1) Vertically Integrated Utilities, 2) Transmission and Distribution, 3) Transmission HoldCos, 4) Generation and Marketing. AEP is in the process of selling its unregulated contracted renewable assets within the Generation and Marketing segment as well as the Retail/Distributed Resources business. In addition, AEP has launched a strategic review of certain non-core transmission JVs.

AEP by segment:

Vertically Integrated Utilities: AEP's vertically integrated utilities are in Virginia, West Virginia, Tennessee, Kentucky, Indiana, Michigan, Oklahoma, Louisiana, Arkansas, and Texas. These utilities own generation, transmission, and distribution assets, with coal and gas being the primary forms of generation.

Transmission & Distribution Utilities: Regulated utilities that only own wires with no generation.

Transmission Holdco: Participates in the development, construction and operation of transmission facilities, and invests in transmission joint-ventures with select partners. All of these assets have a FERC-approved RoE.

Generation and Marketing: Made up of contracted renewable assets, competitive generation in PJM, as well as marketing and retail businesses.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Xcel Energy (XEL, Buy): Attractive exposure to renewables and grid reliability investments, upside to risk to capex and earnings

We initiate coverage on Xcel Energy (XEL) with a Buy rating and a 12-month price target of $75 based on a 19x multiple on our 2025E EPS reflecting XEL's premium growth and ongoing generation fleet transition story. The primary drivers of our positive view are the accelerated coal replacement with regulated renewables, rate case activity that could drive improved earned vs. authorized ROEs, and leverage to the transmission build out opportunity. We view XEL's wind and solar resource rich service territory as a key competitive advantage which should enable it to execute on its goals.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

XEL shares have performed broadly in line with the XLU YTD, and we see shares trading at only a ~1x premium to peers versus the 5-year average of over 2x despite above average EPS growth, with a ~7% 5-year CAGR, versus peers at 6%.

Accelerated coal replacement is a key catalyst for generation transition towards renewables

Xcel Energy benefits from considerable wind and solar resources in its service territory and is executing on its plans to exit coal by the end of 2030. XEL was one of the first utilities to commit to being carbon free by 2050 and also has an interim goal to reduce carbon emissions by 80% by 2030 (from 2005 levels). Using 2005 as a base, the company has already reduced coal exposure to 23% of the total generation portfolio as of the end of 2022 (Exhibit 94) and expects it to come down to 1% by 2030 with accelerated coal plant retirements. By 2030, 70% of the generation portfolio will be composed of renewables (vs. 40% currently), with nuclear (12%) and natural gas (17%) making up the minority portion. While coal retirement may aid carbon reduction and climate goals, service reliability and cost inflation are top of mind for stakeholders with XEL noting more than $3bn in cost savings since 2017 from wind energy which includes avoided fuel costs and PTCs.

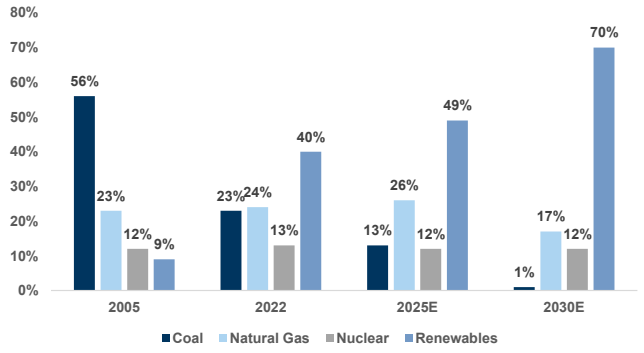
Upside exists to current capital expenditure plans. According to the company's latest capital expenditure estimates, XEL expects to spend just over $1 bn on renewables from 2023 to 2027, which may be conservative, in our view, given it does not include potential renewable generation assets approved in the Minnesota and Colorado resource plans, which could add an incremental $2 bn-$4 bn of renewable capital expenditures. If executed, the Minnesota and Colorado Resource Plans could add 5,750 MWs and 5,100 MWs of renewable generation capacity, respectively, which we note is above the current coal generation portfolio of 6,200 MWs as measured at the end of 2022. That said, we note that XEL may only own 50% of the total capacity outright given management commentary. Additionally, the 2022 Southwestern Public Service (SPS) RFP, which seeks to add around 947 MWs is also not counted in current estimates given we seek further clarity on approvals expected later this year, which may provide upside.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Assuming weighted average authorized ROE of 9.4% which is consistent with our base case and adding ~$6 bn of debt from 2024-2027 to maintain positive cash balances, our analysis implies the potential incremental renewable capital expenditure in Colorado and Minnesota of $4 bn, could increase EPS in 2024E/2025E/2026E/2027E by roughly 2%/3%/2%/2% respectively per our estimates, all else equal (Exhibit 95).

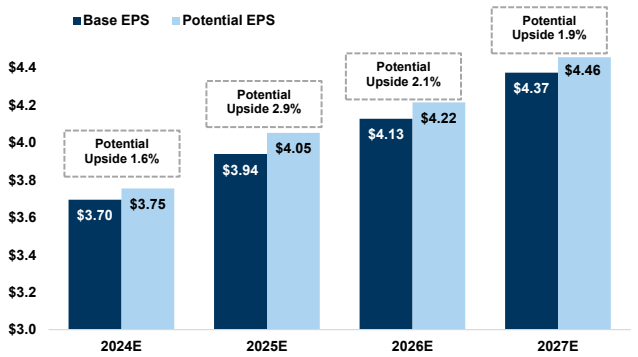
We view XEL's earnings and rate base growth as attractive even without considering the incremental renewable generation not in capital expenditures, we expect XEL's earnings excluding dividends to grow at a ~7% 5-year EPS CAGR (above the coverage average of 6%), with rate base expected to grow by 40% per our estimates from roughly $38bn in 2022 to ~$54bn by 2027. We also note we are 2% above FactSet consensus earnings in 2024/2025.

Exhibit 94: XEL expects to be largely out of coal by 2030
Generation distribution by year (%)



Source: Company data, Goldman Sachs Global Investment Research

Exhibit 95: Our analysis implies upside if potential incremental renewable generation gets built, all else equal
Base EPS vs Potential EPS ($)



Source: Goldman Sachs Global Investment Research

Transmission build out could provide upside to earnings

New renewable generation needs new transmission. Transmission lines are responsible for transporting electricity at high voltages and through vast distances from generation sources to transmission substations closer to end users. Given the expected rise in renewable generation at XEL including roughly 10,850 MW of renewable generation in Colorado and Minnesota Resource Plans alone, transmission build out is anticipated to accelerate as new renewable generation assets will require new transmission lines to connect to the grid.

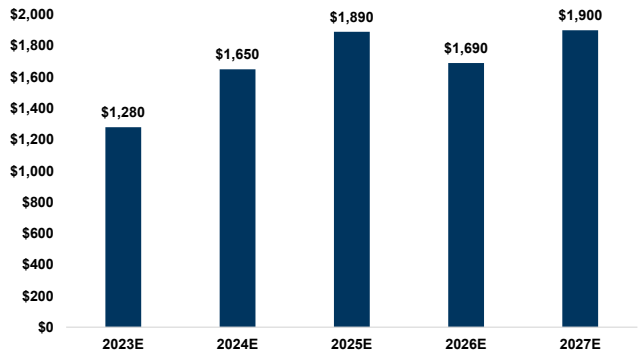
Upside exists from current transmission build out plans. The Pathway Project at PSCo in Colorado is expected to cost ~$1.7bn and will enable 5,500 MW of renewables to connect to the grid through 560 miles of transmission wires with the company expecting up to ~$1 bn in additional potential future projects in Colorado. Additional transmission projects connecting renewables to the grid are expected to drive a $1.2 billion investment in Minnesota as part of MISO's Tranche 1 project estimated to be completed in 2028 per management's commentary. Potential upside may exist to these estimates as phase 2 of the MISO expansion project is expected to include capital expenditures to cater to future growth in generation capacity. Management has noted that they expect to spend between $4 bn - $5 bn on both the tranches in total which

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

indicates that further capital expenditure upside between $2.8 bn-$3.8 bn exists, currently not in our estimates. We also do not include the $0.5 bn - $1 bn in potential transmission projects at SPS that have not been finalized yet in our base case. Assuming weighted average authorized ROE of 9.4% which is consistent with our base case and adding ~$4 bn of debt from 2024-2027 to maintain positive cash balances, our analysis implies the potential incremental transmission capital expenditure of ~$5 bn over five years, could increase EPS in 2024E/2025E/2026E/2027E by roughly 0.3%/1%/3%/4.5%, respectively, all else equal.

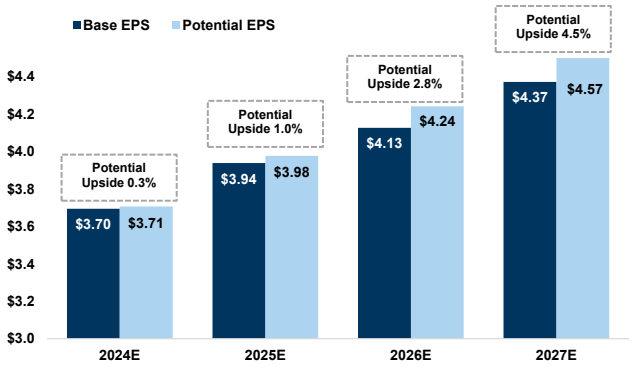
Current transmission capital expenditure plans highlight the importance of transmission build out. We note the capital expenditure plan from 2023 to 2027 is estimated to be ~$8.4bn which is more than double the previous 5 years at roughly $3.8bn from 2018 to 2022, highlighting the change of pace in transmission build out at XEL both to accommodate new renewables generation and replace/enhance existing infrastructure. Transmission currently makes up ~30% of the company's five-year capital plan.

Exhibit 96: Base estimates for transmission capital expenditures through 2027, which are about 30% of total spend
Transmission Capex by year ($ mn)



Source: Company data, Goldman Sachs Global Investment Research

Exhibit 97: Upside exists to our current estimates if identified potential transmission projects get realized
Base EPS vs Potential EPS ($)



Source: Goldman Sachs Global Investment Research

Rate case activity

We see recent rate case activity as largely constructive for XEL with a host of rate cases underway across the service territory and on an aggregate basis, view recent rate case developments as largely supporting the company's ability to meet its 2023 guidance and its 6%-7% EPS CAGR projections. We expect the EPS CAGR growth to be ~7% through 2027 using 2022 as a base. While the authorized ROEs on a weighted average basis screen at 9.4% which is below the US TTM average of ~9.6%, we note, if we assume a 50 bps ROE increase across all pending rate cases, except NSPW where they only seek a 25 bps increase, potential ROE could go to ~9.6%. An increase in earned ROE of 50bps across subsidiaries, could drive earnings improvement of by 1%/2%/2%/2% in 2024E/2025E/2026E/2027E respectively, all else equal. Our base case estimates reflect 8.9%-9.1% earned ROEs through 2027, with the management focused on closing this gap as rate cases conclude.

- **Northern States Power Company Minnesota (NSPM)**

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

- **Electric:** NSPM has received updates on its 2022 Minnesota Electric Rate case, with the Minnesota Public Utilities Commission (MPUC) authorizing a rate increase from the current 9.06% to 9.25%, an increase of 21 bps, a revenue increase of $311mn and an equity ratio of 52.5%. In addition, the first case since 2014 was filed in South Dakota in June 2022, with final rates expected to be effective in 2Q.

- **Northern States Power Company Wisconsin (NSPW)**
  - **Electric and Gas:** NSPW filed a new rate case on April 28, 2023, requesting a $40mn and $9mn for electric and gas with a requested ROE of 10.25% which is an improvement of 25 bps over the current authorized ROE at 10%. The company expects a decision by 4Q23.

- **Public Service Company of Colorado (PSCo)**
  - **Electric:** In Colorado, PSCo has filed a new case in November 2022 with a requested ROE of 10.25%, an increase of 95 bps from the current ROE of 9.30% and requested net revenue increase of $262mn. A decision on the case is expected by 3Q23.

- **Southwestern Public Service (SPS)**
  - **Electric:** SPS filed a new rate case in November 2022 requesting a revenue increase of $75mn and ROE increase of 130 bps. We view staff recommendations to use a forward test year as constructive, and note the ROE of 9.5% came in above our base case.

Valuation & Key Risks

We are Buy rated on XEL. Our 12-month, P/E based price target is $75. In our valuation, we apply a 19x multiple on 2025 earnings, representing a 3x premium to our baseline multiple to account for attractive leverage to renewables and transmission, as well as above average growth versus peer and a strong track record of execution.

Key risks to our positive view include 1) Negative rate case outcomes, which could represent downside risk around allowed ROEs and the pace of capital investment growth, 2) Slower than expected renewable transition, which could impact the cost structure of the business, growth opportunities, and the premium multiple we apply to shares, 3) failure to close gap between earned vs authorized ROE, which could impact earnings estimates and also the multiple investors are willing to underwrite for the stock if underearning is a theme, and 4) cost management, given the inflationary environment and continued pockets of supply chain constraints.

A quick overview of XEL

Xcel Energy (XEL) is a $35 bn market cap pure play regulated utility spanning across 8 states, with Minnesota and Colorado contributing ~70% of total rate base. The company was founded in 1909 and has historically had consistent management and over time has been successful in delivering EPS growth in line with guidance. Growth is aided by its exposure to markets like Colorado and Minnesota, which have a lot of wind, and this dynamic is also helping its generation fleet transition from coal to renewables.

XEL operates out of 4 major segments:

- **Northern States Power Company Minnesota (NSPM):** This vertically integrated electric and gas utility serves 1.5 million electric and 0.5 million gas customers in Minnesota, North Dakota and South Dakota having ~$13.7B in rate base as of 2022, and we note the state of Minnesota comprises more than 80% of the segment's rate base.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

- **Northern States Power Company Wisconsin (NSPW):** This electric and gas utility serves 0.3 million electric and 0.1 million gas customers in Wisconsin and Michigan. Having ~$2B in rate base with Wisconsin comprising 90% of rate base.
- **Public Service Company of Colorado (PSCo):** This electric and gas utility serves 1.5 million electric and 1.5 million gas customers in Colorado with $14B in rate base.
- **Southwestern Public Service (SPS):** This electric only utility serves 0.4 million customers in Texas and New Mexico with $6.4B in rate base.

Duke Energy (DUK, Neutral): Positive thematic leverage, but limited

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

near-term catalysts and less upside to consensus

We initiate coverage of Duke Energy (DUK) with a Neutral rating and 12-month price target of $99. We view DUK as a solid large cap regulated utility, but see a lack of material catalysts in the near term and limited upside to consensus. DUK has several rate cases pending, including the multi-year rate plan in NC, but we believe the impact of this is largely priced in at current levels. DUK's transition to renewables will largely occur in the later 2020s as it retires its coal fleet, and we believe the company will benefit from having some of the lowest bill costs in our coverage, which gives it leeway in customer bills to increase spending. DUK is currently managing a large deferred fuel balance, which will likely be recovered in 2023/2024, but for the time being is causing it to run at an FFO/debt level of ~13%, at its downgrade threshold. Credit agencies are familiar with the impact of deferred fuel and are unlikely to downgrade a utility based on this, in our view, but we view this as an overhang that limits DUK's ability to raise material incremental capital in the near term.

Attractive thematic leverage to renewables, nuclear, T&D, affordability

DUK has begun the process of transitioning its generation fleet for its regulated utilities to cleaner, lower cost options such as solar with battery storage. DUK still relies heavily on coal for its generation, but expects to bring the share to 5% by 2030, and fully exit coal by 2035. DUK's plan is to operate 30GWs of renewables by 2035, which will be a 5x increase from its current portfolio. Due to it being one of the largest utilities, DUK is also investing meaningfully in transmission, another key industry theme in our mind. DUK expects to spend over $8bn on transmission through 2027, or about 8% of planned industry spend, with risk skewed to the upside. We expect that as renewables continue to grow and the power grid requires more transmission, which we view as a >$500 bn opportunity for the industry, DUK will have opportunities to continue to grow investment in transmission and maintain its share of industry spend.

DUK benefits from having low rates for customer bills, coming in just above $0.1/KWh,

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

which is 33% lower than the average for our current coverage. This is a positive for both DUK and its relationship with regulators, given it has been able to maintain low rates with such a large coal fleet, and this rate will likely remain low as it transitions to renewables. As discussed above, we believe maintaining affordability is key to constructive regulatory outcomes, allowing for further investment in the grid transformation.

Finally, DUK is the owner of the largest nuclear fleet by capacity in the US. As discussed above, we believe nuclear will play an important role in the power mix going forward as a source of firm, zero carbon power, particularly as more renewables are added to the grid that are more intermittent. While DUK's customer rates are already below average, the nuclear PTC should provide further benefits to customers, which the company has noted could be in the hundreds of millions range, further supporting affordability.

Limited catalysts ahead

We view DUK's catalyst path as more limited in the near-term, as we believe the

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

ongoing rate cases are already priced largely into the current valuation and estimates, where we are in line with FactSet consensus on average through 2027. As stated in the previous section, DUK's transition to renewables will take several years before it will impact earnings materially in our view, with an inflection around contribution to overall generation in the 2030 timeframe, and thus we see less near term impact. DUK laid out a plan to reduce O&M by $300mn in 2023, and expects that 75% of this reduction will be permanent. It is additionally deferring even more O&M expense due to unfavorable weather in 1Q2023 to maintain its EPS guidance range for the full year. Our estimates expect a portion of the $300mn O&M expense reduction returns in 2024.

DUK's ongoing sale of the commercial renewable business segment, could be a catalyst, which is expected to close in 2H2023. The sale is expected by the company to alleviate the need for equity issuance through 2027. Even post sale, we expect some balance sheet constraints will remain, and note that downside risk remains until the sale closes. DUK has an FFO/debt downgrade threshold of 13%, and is expecting to operate at around 14% going forward. Currently, DUK's FFO/debt metric is being weighed down by its deferred fuel balance, which was around $3.5 bn as of 1Q2023, and had an 80 bp impact on FFO/debt. Operating at 14% as a run rate leaves DUK limited room to raise the growth rate at its regulated utilities without issuing some level of equity.

Exhibit 107: We looked at different levels of O&M savings in 2024, assuming DUK is able to reduce O&M by $300mn in 2023, and found that every $75mn of incremental O&M is just under $0.10 of a headwind

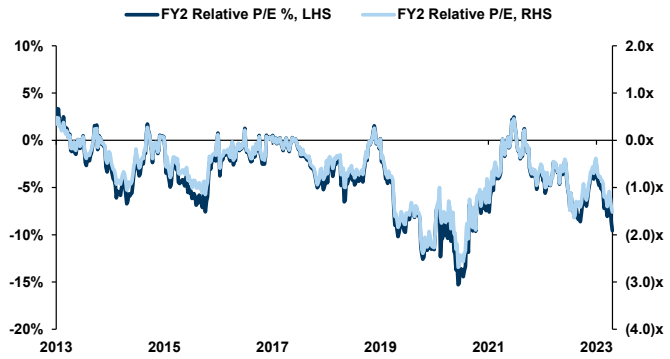
Less relative upside at current valuation

DUK is currently trading at 15.2x on our FY2 P/E estimates, which is a discount to the 16.5x average for regulated utilities at current. Over the last five years, the stock has traded at about a 1x discount to peers, and we do not see a clear path for DUK to trade at a premium in the near term. Given the less differentiated earnings growth, lack of upside to consensus estimates, lighter near term catalyst path, near-term balance sheet constraints, and longer dated nature of the shift to renewables, we view a slight discount as warranted. We see potential for upside when DUK is able to alleviate its near term balance sheet constraints, and as it progresses in its transition from coal to renewables. There is also potential that DUK pulls forward coal retirement dates and in turn accelerates its renewable developments. For the time being, while DUK faces a constrained balance sheet and faces uncertainty in its rate cases, we see better value and potential for upside to estimates and valuation elsewhere in our coverage.

Exhibit 110: DUK has historically traded at a slight discount to its peer group
DUK P/E vs regulated utlities over time



Source: Company data, Goldman Sachs Global Investment Research

Valuation & Key Risks

We are Neutral rated on DUK. We value DUK with a 15.5x P/E, which is a slight discount to the baseline average of 16x, for the reasons discussed above including around near-term catalyst path, less differentiated earnings growth/upside, and balance sheet. While DUK has a positive trajectory with its coal retirements, renewables, and potential for improved ratemaking at the Carolinas, we believe these tailwinds will

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

become more material over the medium term, and we see near term upside potential as limited. Our current target price of $99 implies a total return of 14%, which is in-line with the total return for our coverage group.

Key risks for DUK include 1) rate case outcomes, as DUK is in several important rate cases, notably the NC rate case for DEC and DEP that includes a multi year component; 2) cost management, as DUK expects to reduce costs significantly in a challenging macro environment, with the company anticipating a significant portion to be structural; 3) poor load growth or weather, as DUK has already faced a challenging start to the year with the mild winter weather.

A quick overview of DUK

Duke Energy (DUK) is a $69 bn market cap electric and gas utility serving the Carolinas, Florida, Indiana, Ohio, Kentucky, and Tennessee. DUK is headquartered in Charlotte, North Carolina and serves 8.2mn electric customers and 1.6mn gas customers.

The company operates the following segments:

Duke Energy Carolinas (DEC): Regulated electric utility serving 2.5mn customers across North and South Carolina that owns transmission, distribution, and generation. DEC North Carolina will be moving to a multi-year rate plan structure.

Duke Energy Progress (DEP): Regulated electric utility serving 1.5mn customers across North and South Carolina that owns transmission, distribution, and generation. DEP recently reached partial settlement and has started hearings in its first NC multi-year rate case and expects interim rates to go into effect midyear, with the commission approved permanent rate change going into effect late this year.

Duke Energy Florida (DEF): Regulated electric utility serving 1.7mn customers in Florida that owns transmission, distribution, and generation.

Duke Energy Indiana (DEI) : Regulated electric utility serving 810k customers in Indiana that owns transmission, distribution, and generation.

Duke Energy Ohio Kentucky: Duke Energy Ohio Kentucky consists of both a regulated electric and a gas utility that serve portions of Ohio and Kentucky. These two utilities combined serve a total of nearly 1.4mn customers in the region.

Piedmont Natural Gas (PNY): Regulated gas utility that transports and sells natural gas to customers in the Carolinas and Tennessee.

Dominion Energy (D, Neutral): Valuation screening attractive after underperformance, but need clarity on business review to get more positive

We initiate coverage of Dominion Energy (D) with a Neutral rating and a 12-month price target of $55. While we see valuation as attractive following underperformance over the last 12 months, we continue to see uncertainty around the ongoing business review and credit outlook. Thus, we see less near-term catalysts to own the stock ahead of the Analyst Day in 3Q when the company expects to provide a full update around the review and the long term outlook for the business.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Valuation screening more attractive, but need clarity on strategic review to get more positive

D shares have underperformed the XLU by 27% over the last 12 months. In our view, this underperformance has been driven by increased uncertainty around (1) the company's decision to undergo a strategic review of the business and potential impacts on the earnings growth trajectory, and (2) lack of clarity around the Virginia regulatory outlook given the legislative process and implications for the rate making process for DEV, though we note this uncertainty has since been resolved following the conclusion of the legislative session in VA, and (3) concerns around the company's balance sheet and credit outlook, particularly following the rate reduction in Virginia, and as S&P recently updated company's the outlook to negative from stable.

Following this underperformance, we see valuation as becoming more attractive at current levels. On consensus FY2/FY3 earnings, the stock is currently trading at 13.7x/13.0x versus our coverage at 16.6x/15.5x, which represents about a two turn discount to the 5-year average discount of about 0.8x/0.7x to our coverage. That said, we believe the market needs clarity on the implications of the strategic review in order to get comfortable underwriting the stock, and we see little room for error in the long term plan following the conclusion of the review. Per company commentary on the 1Q call, D expects to provide the market a more fulsome business update at the company's investor day in 3Q.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 114: D shares have underperformed our coverage and the XLU over the last 12 months, in large part due to uncertainty around the business review and Virginia regulatory environment, in our view

Attractive thematic leverage around renewables, nuclear, grid reliability

We believe D has attractive leverage to key themes including renewables, nuclear, and grid reliability. On the renewables side, we expect the company to invest $17 bn of capex across solar and its regulated offshore wind project from 2023-2027, representing about 35% of total spend. While we see a certain degree of project risk around offshore wind given recent projects have experienced budget issues, we believe D's project is better positioned from a relative standpoint due to it being regulated and the progress that has been made to lock in costs, with about 90% of costs fixed as of the 1Q23 call. On solar and storage, we see potential for continued investment on the regulated side at DEV. Outside of traditional wind/solar, D is also investing in hydrogen and RNG, which while still nascent, will continue to grow and contribute to the company's net zero goals.

D also has about 6 GW of nuclear capacity, and has pursued license renewals at its Virginia units, with Surry gaining approval and North Anna still in process. Given D's nuclear fleet has both regulated and unregulated plants, we see potential benefits from the PTC both as providing a price floor for Millstone outside of PPA volumes and creating opportunities for customer benefits on the regulated side. On grid reliability, we expect D to invest $8.5 bn in transmission/distribution build out from 2023-2027, representing about 20% of total capex. Given D's market exposure, we see meaningful near/medium-term potential for growth in load growth and investment in transmission infrastructure to supply power to new data centers in Virginia. Over the last twelve months, D's commercial electric sales have increased 11.4% YoY, which has been driven by data centers. The company also plans to invest in a number of projects to upgrade transmission infrastructure this year and bring on new capacity by the end of 2025 via a 500kv transmission line for $700 mn in capex. While our base case estimates assume 1.5% load growth on average in 2023-2027, if we assume 4% to continue recent data center trends more aggressively, we could see 12% upside to our estimates.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Exhibit 116: We expect D to allocate a large share of capital spending towards renewables and grid investments through 2027, largely through DEV
D capex, $ mn

Valuation & Key Risks

We are Neutral rated on Dominon Energy and our 12-month price target of $55 is based on a SOTP. We apply 15.0x P/E to DEV, 15.0x to DESC, 16.0x to gas LDCs, and 9.0x EV/EBITDA to contracted assets. We broadly apply a 1x discount to our baseline multiple of 16x to account for the uncertainty around the ongoing business review.

Key risks relate to:

1. **Outcome of the business review.** With D currently undergoing a top to bottom business review, the completion could be a catalyst for the stock. Investors have been most concerned with the credit outlook, dividend sustainability, and predictability of earnings going forward. We see risk from the review outcome given the length of time of the review, and note it could impact our earnings outlook to the extent the company divests pieces of the business or reallocates investments.
2. **Regulatory outlook.** While much of the regulatory uncertainty around Virginia has been resolved following the end of the legislative session and revisions to the rate making process, the commission is still operating with vacancies with lack of clarity on the path to filling them. We believe this creates uncertainty in terms of upcoming rate case activity and potentially the long term pace of the energy transition.
3. **Project execution.** As noted above, we believe Dominion's offshore wind project is advantaged given the regulated nature and progress thus far on locking in costs. That said, we still see execution risk around permitting and ultimately construction of the project given cost pressures that others in the space have faced and the lack of historical track record for offshore wind projects.

A quick overview of D

Dominion Energy (D) is a $42 bn market cap company headquartered in Richmond, Virginia, which serves 7 mn customers in 13 states. The company was founded in 1909 and has a portfolio of assets including 30.2 GW of generation capacity, 10,700 miles of

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

transmission, 78,000 miles of distribution, and 95,700 miles of gas distribution mains supported by 6,000 miles of gas transmission, gathering, and storage pipelines. D is the largest utility serving the state of Virginia, which hosts the federal government along with a number of tech companies aiding growth.

D operates multiple subsidiaries including:

- **Dominion Energy Virginia (DEV)** – Vertically integrated electric utility in Virginia and North Carolina providing utility services to 2.7 million customers. While there is some uncertainty around the VA regulatory environment at present, the state has aggressive clean energy targets and DEV expects to build meaningful wind and solar capacity.
- **Gas Distribution** – This regulated subsidiary sells, transports, stores and distributes gas in Ohio, West Virginia, North Carolina, Utah, southwestern Wyoming and southeastern Idaho and serves roughly 3.1 million customers.
- **Dominion Energy South Carolina (DESC)** – A vertically integrated subsidiary serving gas and electricity to just over a million customers in South Carolina.
- **Contracted Assets** – D also operates a contracted assets segment, which historically comprised of a large portfolio of non-regulated power plants including Millstone nuclear plant in Connecticut and gas plants in the East Coast. It has sold off its gas plants over the last 10 years and now only has Millstone left with 2GW of capacity. D also owns 50% stake in the Cove Point LNG terminal and a merchant solar portfolio.

Public Service Enterprise Group (PEG, Neutral): Improved business mix and thematic leverage, but near-term outperformance limits upside

We initiate coverage on Public Service Enterprise Group (PEG) with a Neutral rating and 12-month price target of $64. In our view, PEG's business mix of 90% regulated utility and 10% merchant generation assets will be favorable over the long run; but we see less differentiation versus consensus, less upside after its outperformance over the last 6 months, and believe near term headwinds limit PEG's opportunity for differentiated returns for now. We note the potential for upside in the near term if power prices rise and PEG's cash flows increase from the merchant side of the business, which can go towards paying down debt. We currently see better value elsewhere in our coverage, with our target price for PEG implying a total return of 8% versus 15% to our coverage on average.

Improved business mix limits downside risk and still presents upside opportunity

PEG benefits from a unique business model, with 90% of its business coming from its steady regulated utility, and remaining 10% from its Power & Other segment. The company sold its fossil assets in February 2022, and the Power segment is now primarily made up of 3,766 GWs of merchant nuclear generation. In the past, these nuclear assets were generally only economic because of state subsidies such as ZECs, which did not provide long term certainty of economics.

With the rise of power prices in 2022 and the passage of the nuclear PTC in the IRA, the economics of the assets have improved and more certainty has been provided over the medium to long term. PEG is in a unique position of being able to fund its capex at the regulated utility with the cash flow from the merchant nuclear business, and has potential for upside to these cash flows if power prices rise above the PTC floor. Our model bases regional power prices on our commodities teams' gas price forecast going forward. We analyze below the possibility of power prices coming in above our base estimate of $45.30/$54.36/$48.75/$48.75/MWh for PJM East in 2024-2027, and $38.74/$53.55/$42.68/$42.68/MWh for PJM West in the same time frame.

Due to the significant spike in power prices in 2022, PEG has had to post a large amount of collateral related to its hedging program, with net cash collateral at $1.5bn in YE2022. The collateral level was down to $0.7bn by 1Q2023, which helped PEG's liquidity and cash flow significantly. As hedges continue to roll off in 2023 and 2024, we expect collateral to continue to wind down and improve the balance sheet position, though note this remains a near term concern as interest rates rise and the company refinances and adds incremental debt.

PEG has also highlighted the potential for upside from offshore wind transmission. While it still will exit its stakes in developing offshore wind generation, PEG still plans to solicit a bid for the transmission piece. This is not included in PEG's current capex plan, and could significantly increase the amount that PEG allocates towards transmission, which is currently just below $3bn in the 5 years plan and $6bn in its 10 year plan, or 16**%** of total planned utility spend.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

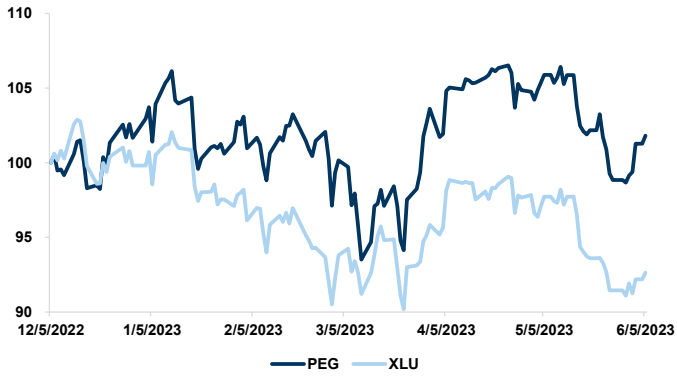
Less upside to consensus, recent outperformance, and near-term headwinds keep us on the sidelines

We have less upside to our price target versus our coverage following outperformance over the last six months, with 8% total return vs. the 15% average for our coverage. PEG shares have outperformed the XLU by 9% in the last six months, which we attribute to: (1) evidence of a derisking of the earnings profile of the business following the company's sale of the unregulated fossil-fuel generation assets and focus on regulated growth, (2) the elimination of project risks associated with the offshore wind business following the company's decision to exit offshore wind and sell its stakes in projects/acreage, and (3) clarity on nuclear ownership, with the company deciding to retain ownership of the nuclear fleet following the passage of the IRA, which provides more economic certainty with the nuclear PTC.

Exhibit 123: PEG has outperformed the XLU over the past 6 months
PEG v/s XLU total return performance



Source: Goldman Sachs Global Investment Research, FactSet

PEG shares are trading broadly in line with peers on FY2 P/E, versus a 5-year historical discount of 1.5x. On consensus estimates, PEG is currently trading at 16.6x/15.2x FY2/FY3 PE, which is above the respective 10-yr averages of 15.8x/15.3x.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Additionally, PEG's current FY2 PE of 17.1x, on our EPS estimates, is slightly above coverage average, versus the 1.5x average discount seen over the past 5 years. With that said, we do not view the multiple expansion versus history as unwarranted given the improvement in the earnings profile of the business and reduced volatility post the fossil sale.

Since the company sold the fossil assets in early 2022, PEG has traded at an average FY2/3 P/E of 17.3x/15.8x, or a 1.3x/1.6x discount to peers, and a 1.5x/0.5x premium to its 10-year history. On our estimates, PEG trades at a slight discount to our coverage average at 15.1x on our 2025 earnings versus a 15.3x multiple for our coverage on 2025 earnings. With shares trading at a smaller discount to peers vs. its historical average and post-fossil spin average, we see valuation as less compelling at current levels.

Exhibit 124: PEG has been trading above its historical average post the sale of fossil assets, and trades broadly in-line with our coverage...

Source: Goldman Sachs Global Investment Research, FactSet

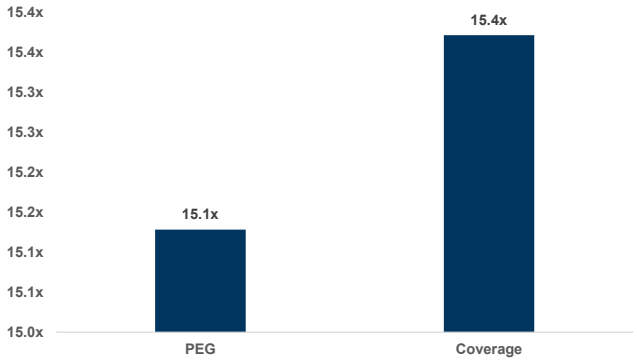
Exhibit 126: PEG trades at a 0.3x discount vs our coverage on our 2025 EPS estimates
PEG v/s coverage PE on GSe 2025 EPS



Source: Goldman Sachs Global Investment Research, FactSet

Our estimates are also not as differentiated versus consensus estimates, where we are on average 1% below the Street in 2023-2027. We believe we are taking a more conservative approach from rate increases following the company's distribution rate case that it expects to file by the end of this year, with rates going into effect likely in 2024, where we see the largest delta versus consensus. Thus, we see less opportunity for positive consensus revisions for PEG from here, and also see slightly below average 5-year EPS CAGR at 5% versus our coverage average at 6%. That said, we recognize upside risk could exist from a more favorable rate case outcome than we underwrite as well as potential for the Power business to surprise to the upside.

Exhibit 127: Our earnings estimates are roughly in-line with consensus
GSe/Consensus EPS 2023-2027

EPS	2023E	2024E	2025E	2026E	2027E

% Difference	(0%)	(3%)	0%	0%	(1%)

Source: Goldman Sachs Global Investment Research, FactSet

PEG faces a number of headwinds in 2023 and while some are no different from those facing other utilities such as interest rates and inflation, some such as the high pension expense and balance sheet stretch due to collateral postings, are more idiosyncratic challenges. PEG does not smooth the impact of the pension over several years like many utilities do, meaning that the markets poor performance in 2022 created an expected headwind of ($0.25)-($0.30) in 2023. PEG has managed to partially mitigate the pension expense with a new accounting order from the BPU, and is exploring potential plans to further mitigate it with a pension lift out. While the combination of these two methods could address a sizeable part of the pension impact going forward, 2023 EPS may likely see a negative impact from this. As the company adds debt and refinances at higher interest rates, higher interest expense is expected to be a ($0.15)-($0.20) impact to EPS in 2023.

Both the pension expense and the higher interest rates will likely be recovered in the

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

distribution rate case PEG will file by YE 2023, but the increased rates will not kick in until mid to late 2024 at the earliest. In the near term, we believe PEG is facing more headwinds than tailwinds, but most of these headwinds will subside going forward. To the extent PEG receives a more favorable outcome in its upcoming rate case or power prices surprise to the upside, we could see upside risk to our estimates but in our base case, we are not differentiated versus Street estimates, where we are 1% below FactSet consensus on average in 2023-2027.

Catalysts/Key Risks

As discussed above, we see headwinds to the stock in the near term given (1) higher interest costs due to refinancing needs and exposure to floating rate debt, (2) non-linear EPS growth due to pension costs, and (3) current less favorable leverage metrics, with collateral postings expected to improve as hedges roll off this and next year. These risks along with recent outperformance and less upside to our price target and consensus earnings keep us Neutral on PEG. That said, we highlight key factors we are watching that could impact our estimates/views.

1. **Option value in nuclear exposure** and limited downside risks/more stable and predictable cash flows, driven by the nuclear PTCs. To the extent power prices surprise our estimates to the upside after the PTC goes into effect, we could see potential upward pressure on PSEG Power/Other estimates. We also await full guidance from treasury around implementation of the Nuclear PTC.
2. **Rate case outcomes**, including on rider mechanisms that help with timely cost recovery. As discussed above, we expect PEG to file a distribution rate case by the end of 2023, which could include a pension mechanism, and the company has also recently filed for GSMP III as well as a Clean Energy Future energy efficiency extension. Outcomes around these proceedings could impact our estimates around capex and earnings to the upside/downside.
3. **Potential upside to capital spending plans,** to the extent there are opportunities for PEG to participate in transmission related to offshore wind at PSE&G or PSEG Power, or explore incremental electrification opportunities including around heat pumps and EVs.

Valuation & Key Risks

We are Neutral rated on PEG and our 12-month price target is $64. We value PEG with a SOTP, applying a 16x P/E multiple on PSE&G 2025 earnings, which is in-line with our baseline multiple for the sector. We apply a 9x EV/EBITDA multiple on the Power & Other segment as the nuclear PTC will help derisk the cash flow at the segment going forward. We see 8% total return versus an average of 15% for our coverage.

Key risks for PEG include 1) uncertainty around pension expense lift out and implementation around a long term solution, which could lead to increased pension volatility going forward; 2) uncertainty around the outcome in its upcoming 2023 distribution rate case, which is the first rate case in 6 years, and if PEG cannot recover elevated expenses in 2022/2023 would significantly impact growth; 3) power price volatility in the near term that could impact collateral postings around 2023/2024

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

hedges; 4) option value in nuclear exposure, which limits downside risks and provides stability; 5) approval of a pension mechanism, which would help to smooth earnings; and 6) upside to capital spending plans, including transmission and electrification opportunities.

A quick overview of PEG

Public Service Enterprise Group (PEG) is a $31 bn market cap diversified utility, consisting of a New Jersey based regulated utility and a merchant generation segment. The merchant generation segment, PSEG Power, is primarily made up of nuclear power plants and offshore wind investments, but PEG has publicly announced its intention to exit the offshore wind generation space. PEG was founded in 1903 and is currently headquartered in Newark, New Jersey.

PSE&G: Regulated electric and gas utility that serves 2.3 million electric and 1.9 million gas customers. The electric utility is focused on transmission and distribution, which make up 98% of rate base, with the remaining 2% being solar and other. PSE&G expects to file for its next electric rate case in 2023, and has highlighted $3.3bn of distribution capital that it expects to be eligible for recovery.

PSEG Power: Merchant generation segment consisting of 5 nuclear power plants with 3.8 GWs of capacity. PSEG Power also owns a 50% stake in Garden State Offshore Energy (GSOE). It has sold its 25% stake in Ocean Wind 1 back to the JV partner Orsted and also announced it will look to sell its GSOE stake as well.

Exelon Corporation (EXC, Sell): Less thematic leverage, downside to consensus, rate case risk drive more cautious view

We initiate coverage on Exelon Corp (EXC) with a Sell rating and a 12-month price target of $39 which represents 1% total return vs. 15% average total return for our coverage. We are 1%/4% below FactSet consensus on our 2024/2025 EPS earnings estimates. While we believe EXC has a robust balance sheet position and an attractive opportunity set around certain grid investments, we see downside risk to consensus earnings estimates along with a less idiosyncratic catalyst path, see less thematic leverage outside of grid reliability representing less upside opportunity around capex and growth, and are concerned around rate case risk, in particular at ComEd given the move away from the current formulaic approach and recent Staff recommendations around the proceedings. The stock has also outperformed the XLU over the past six months, though we note near-term performance has been more challenged on a relative basis.

Attractive grid investment opportunities, but lower exposure to key themes overall

Less upside to planned capital expenditures. According to its capital investment plan, EXC intends to deploy $31bn of capital over the 2023-2026 period, which drives 8% rate base and 6-8% operating earnings CAGR over 2022-2026. EXC's capital plan is focused on traditional utilities investments associated with maintaining and upgrading distribution and transmission operations, including expanding capacity and improving system performance. The company benefits from strong investment needs in T&D and is therefore levered to our grid reliability theme; EXC has allocated 21% of its total capex plan to transmission build out. We note that EXC can benefit from incremental transmission opportunities that are not included in the current capex plan given Maryland's recent offshore legislation, though these are likely longer dated given typically lengthy permitting processes and project risks. However, we believe that the EXC has less upside opportunities to its capex plan given lack of exposure to our other themes including renewables, LNG, and nuclear. EXC's beneficial electrification plan related to EV infrastructure spending includes just $300 mn of spending over the 2023-2025 period. In addition, the company does not screen as attractive on affordability, with higher than average customer bills per EIA data, which we believe creates risk around regulatory outcomes given current rate cases request an increase in residential customer bills of over 6% on average (including DPL DE Electric, ComEd, ACE, BGE, and PEPCO DC). Also, in current pending rate cases, all requested ROEs screen at or above 10.4%, which is above the prevailing national average of about 9.7% for electric rate cases YTD.

See near-term negative rate of change around balance sheet. EXC has a 100-200 bps cushion on its FFO/Debt downgrade threshold of 12% per S&P and Moody's as it targets a 13-14% FFO/Debt over the 2023-2026 time period. While we expect the FFO/Debt metric to remain above the downgrade threshold of 12% going forward, we expect some softening in the FFO/Debt metric in the medium term as we anticipate growth in debt levels to finance operations measured from 2022-2025 until earnings catch up to minimize the impact of the increased debt. We expect debt to grow by

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

~23% meanwhile FFO will lag with growth of just ~14% in the same time frame. In addition, downside to balance sheet strength may appear from the impact of the IRA AMT which would raise annual cash taxes. EXC expects $200mn/yr cash drag, currently not in our estimates as we await further clarity on final tax treatment which the company expects by the end of year. Per the management's commentary, if EXC cannot mitigate the impact by deducting repairs tax from AMT, the FFO/Debt ratio would stand closer to 13%. Management also noted during 3Q22 earnings call that higher taxes could impact investment levels and by extension earnings growth. Given EXC has less exposure to renewables, there are less tax credit opportunities that could be used to offset the impacts of the AMT as many other companies are able to utilize, in our view.

Exhibit 131: We believe limited concrete incremental capex opportunities from current estimates exist given less exposure to key themes like renewables, nuclear, and LNG and given the company screens less attractively on affordability
Capex by Year by Subsidiary ($mn)

Less idiosyncratic catalyst path outside of rate cases, concerns around ComEd regulatory changes

While Exelon has a number of outstanding rate cases, we see less idiosyncratic catalysts outside of outcomes on the regulatory side in the near to medium term, notwithstanding the potential for offshore transmission opportunities in Maryland and New Jersey that are likely longer term in nature given typically lengthy permitting processes and project risks. EXC has several outstanding rate cases, including 1) DPL electric distribution rate case, 2) ComEd electric distribution 4-year MYP and 2022 formula rate reconciliation, 3) ACE electric distribution rate case, 4) BGE 3-year multi-year plan (MYP), and 5) Pepco DC 3-year MYP. Given the high requested ROEs and certain elevated customer bills versus our coverage average, we believe that EXC could face challenges in achieving constructive rate case outcomes. In current pending rate cases, all requested ROEs screen at or above 10.4%, which is above the prevailing national average of about 9.7% for electric rate cases YTD.

ComEd rate case overhang. In Jan 2023, ComEd filed a four-year multi-year plan (MYP) request seeking an increase in electric distribution rates with revenue increase of ~$1.5bn over the next four years and an increase in ROE to 10.5% with a 5bps increase

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

YoY from 2024 to 2027. The company will move away from the current formulaic approach to ROE where ComEd has a 5.8% base ROE plus the yield of the 30-year treasury which stands at 4% in 2023 per our estimates. This implies that the authorized ROE for 2023E is expected to be 9.8% (5.8% base ROE + 4% 30 year treasury). In our view, given the current distribution ROE is already higher than the YTD national average of ~9.7%, going forward, we expect a minimal increase to current levels rather than the requested ROE increase which is at 10.5%, and could even see potential for 2024 ROE to be lower than 2023 levels given recent rate cases in Illinois have seen ROEs granted in the 9.67%-9.75% range. We forecast the 2024 ROE to be at 9.7% and a 5bps increase from then until 2027. We note the staff recently recommended an 8.91% ROE based on the formulaic approach and implied a ~10% ROE based on a more traditional rate making mechanism. ComEd stated it expects to conclude this case by the end of this year.

With a host of rate cases underway across subsidiaries we analyze the historical trends of asked versus authorized ROE and give an overview below:

BGE: At BGE, the last rate case was concluded in December 2020, where they had sought an ROE of 10.10% for both gas and electric distribution but ended up receiving 9.5% for electric and 9.65% for gas. A difference of 60 bps and 45 bps respectively. BGE is in a rate case currently requesting 10.4% for both gas and electric. We see risk around the requested ROE given historical trends. We model ROEs to be constant from current levels pending unexpected rate case outcomes. And we note that authorized ROEs from recent rate cases have been not been too different from the current authorized at BGE. With Columbia Gas of Maryland, a subsidiary of Nisource Inc. (NI) getting 9.65% authorized ROE.

PHI:

- **DPL:** At DPL, the company is currently authorized to earn a 9.6% ROE on both gas and electric distribution but has requested an increase to 10.5% for the electric portion in a rate case filed at the end of 2022. We see risk around the requested ROE given past trends. DPL had attempted to get the gas ROE increased to 10.4% in a rate case in 2020 but only got 9.6%, which is a difference of 70bps.
- **ACE:** Historically, ACE's authorized versus requested has lagged with the most recent case concluded in 2020 having a lag of 70 bps. ACE is currently in a rate case requesting an increase of 10.5% as compared to 9.6% authorized and the last rate case in New Jersey was in 2021 by Rockland Electric Company, a subsidiary of Consolidated Edison (ED) where they got a 9.6% ROE.
- **PEPCO:** The company is in an electric rate case requesting an ROE of 10.5%, which is an increase of 122 bps from current authorized of 9.28%. We see risk around this requested ROE level. The previous rate case saw the authorized ROE decrease from 9.53% in 2017 to 9.28% in 2019.

In our view, considering the past trends at the various subsidiaries, and recent trends outside of EXC cases in the company's jurisdictions, we do not expect EXC to see material increases in its ROE from current authorized levels which could limit growth

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

potential in the near to medium term and present risk around earnings execution. Our more cautious view on regulatory outcomes is also driven by concerns surrounding affordability especially for residential households with inflation at the forefront of regulators' minds as Exelon goes into pivotal rate cases.

We see downside risk to consensus, and shares have outperformed over the past 6 months

Downside risk and volatility to earnings estimates exists. We believe EXC faces earnings revision risks and less differentiated EPS growth opportunities versus peers. Management has guided to a 6-8% EPS CAGR through 2026 off a $2.25 midpoint in 2022 and expects to deliver a growth rate at the midpoint of the range or better. Using the same midpoint, consensus numbers imply a 6.7% growth rate while we see a 5.7% growth over 2022-2026. On average across our 2023-2027 earnings estimates, we are 3% below FactSet consensus. We note that EXC expects to grow its 2025 EPS above the LT guided growth range of 6-8%, owing to favorable outcomes in its rate cases. However, we embed lower ROEs than currently requested as we believe that the company is unlikely to get full approval given the magnitude of requested ROEs versus prevailing averages and historical precedent, and elevated customer bills — we provide more details below on this point.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Moreover, EXC expects to generate non-linear EPS growth, which could be a headwind for a pure-play utility. We note that regulatory lags at PECO drive negative rate of change in 2023 as it enters year 2 of its existing electric distribution rate case. In 2023, the company stated it is expecting to grow earnings by 4.9% off a $2.25 EPS midpoint in 2022, which is below the 2022-2026 growth rate range of 6-8%. Therefore, EXC would depend on higher growth rates in 2024 and onward, which would be impacted by favorable regulatory outcomes.

Valuation less compelling at current levels. Over the past six months, EXC has outperformed the XLU by 3%. In our view, improved ROEs at ComEd with higher 30-year yields, strong earnings execution in recent quarters, and the company's balance sheet strength in the uncertain macro environment have provided defensive qualities. At current levels, we see shares trading at a premium on P/E relative to its history. On FY2/FY3 consensus estimates, shares are now trading at 15.9x/14.6x, which is above the 10-year average of 14.2x/13.9x. We do believe the stock warrants a higher multiple versus its 10-year history following the spin off of its generation assets, creating a lower volatility earnings model, but we believe the stock should trade at a slight discount to peers given the consensus risk, less thematic leverage, and rate case risk.

The stock continues to trade at a discount to peers on FY2/FY3 P/E, at discounts of 0.7x/0.9x, respectively vs. 3.2x/2.6x seen over the past 10 years. We note that EXC has traded at an average discount of 0.9x/1.0x to our coverage on FY2/FY3 P/E since the sale of its generation assets in February 2022. We believe a discount to peers is still warranted given the lower exposure to themes like renewables generation, nuclear, and LNG, as well as concerns on regulatory outcomes as discussed further below. On GS 2025 earnings estimates, EXC trades broadly in line with our coverage at 15.3x versus the average of 15.4x, versus the ~1x the discount the stock has traded at post the ExGen spin.

Source: Goldman Sachs Global Investment Research

What could make us more positive?

EXC could be seen as a defensive stock in the event of a recession given its strong balance sheet. A robust balance sheet should help the management team to execute on their current 4-year plan and create more flexibility to withstand a downside economic scenario, supporting rate base and earnings growth and create less downside risks to the guided earnings CAGR.

More constructive rate case outcomes than we underwrite. We believe that EXC is unlikely to receive full approval of their requested ROEs given the magnitude of the ask and elevated customer bills. We observed that requested ROEs that screen in the high 9% and above typically see lower authorized ROEs in the jurisdictions that EXC operates in. A favorable regulatory outcome across rate cases would create upside risks to our below consensus/guidance earnings growth over the company's 4-year capital plan.

Further upside around capital spending, driving earnings growth above our expectations. As the energy transition plays out, EXC could benefit from further capital spending opportunities, especially related to transmission build-out. A higher rate base CAGR would translate to higher earnings growth.

The spinoff of CEG removes the volatility of a commodity business and supports multiple. The shift in the business mix away from unregulated non-utlity generation operations implies lower volatility in EXC's earnings profile. This could help EXC to smooth earnings and restore year-over-year EPS growth on a more linear trajectory, thereby attracting pure play investors.

Valuation & Key Risks

We are Sell rated on EXC. We apply a 15x P/E multiple (vs our baseline multiple of 16x) to our 2025 EPS estimate to derive a 12-month $39 PT, reflecting a 1% total return versus +15% for our coverage. We apply a 1x discount to our baseline multiple to reflect the lack of exposure to our key themes, regulatory risks related to ongoing rate cases, and fewer idiosyncratic catalysts, and in line with the discount EXC has traded to peers

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

following the ExGen spin.

Key risks for EXC include: 1) favorable rate case outcomes, 2) cost control and ability to smooth earnings 3) a robust balance sheet that appeals to investors seeking safety in the event of a recession, 4) the shift in the business mix towards regulated growth which drives multiple rerating, and 5) incremental capex opportunities.

A quick overview of EXC

Exelon Corporation (EXC) was founded in 2000 and is headquartered in Chicago. The company has a market cap of $40 bn and is a fully regulated utility holding company consisting of six Transmission and Distribution utilities. The company operates across seven regulatory jurisdictions and serves key urban markets like Chicago, Philadelphia, DC and Baltimore, among others. The company supplies electricity and gas to a total of 10.5 million customers, making it the largest utility by customer count.

The company operates through the following segments:

Commonwealth Edison Company (ComEd): Transmits and distributes electricity to the Northern Illinois region, including the Chicago area. We note that authorized ROE tied to the US 30-year treasury - this feature is expected to go away in 2024.

PECO Energy Company (PECO): Transmits and distributes electricity and distributes natural gas in Pennsylvania, including the Philadelphia area.

Baltimore Gas and Electric Company (BGE): Transmits and distributes electricity and distributes natural gas in Central Maryland, including the Baltimore area.

Pepco Holdings LLC (PHI), a holding company consisting of the following utilities:

- Potomac Electric Power Company (Pepco Electric): Transmits and distributes electricity in the District of Columbia and Maryland, including Montgomery and Prince George's Counties.
- Delmarva Power & Light Company (DPL): Transmits and distributes electricity in Delaware and Maryland and distributes natural gas in Delaware, including New Castle County
- Atlantic City Electric Company (ACE): Transmits and distributes electricity in Southern New Jersey, including Atlantic City

In early 2021, Exelon Corp proposed spinning off its large non-regulated nuclear focused merchant power and retail business which was known at the time as Exelon Generation (ExGen). Exelon completed the spin-off of ExGen in February 2022. ExGen was renamed as Constellation Energy (CEG, Not Covered). As a result, Exelon was left with its legacy transmission/distribution utility businesses.

Consolidated Edison (ED, Sell): Strong grid investment opportunities, but expect affordability to limit capex upside and see less upside after outperformance

We initiate coverage of Consolidated Edison (ED) with a Sell rating and a 12-month $88 price target which represents 2% downside on a total return basis vs. 15% average total return for our coverage. Shares have outperformed the XLU by 7% over the past twelve months, and we now see valuation as less compelling in addition to being 1% below consensus on average in our 2023-2027 EPS estimates with a lighter catalyst path in the near term. From a thematic perspective, while we view ED as having attractive exposure to grid reliability given investments in the distribution system, we see less constructive exposure to other themes including affordability, renewables, nuclear, and LNG, which we believe could limit upside around investment.

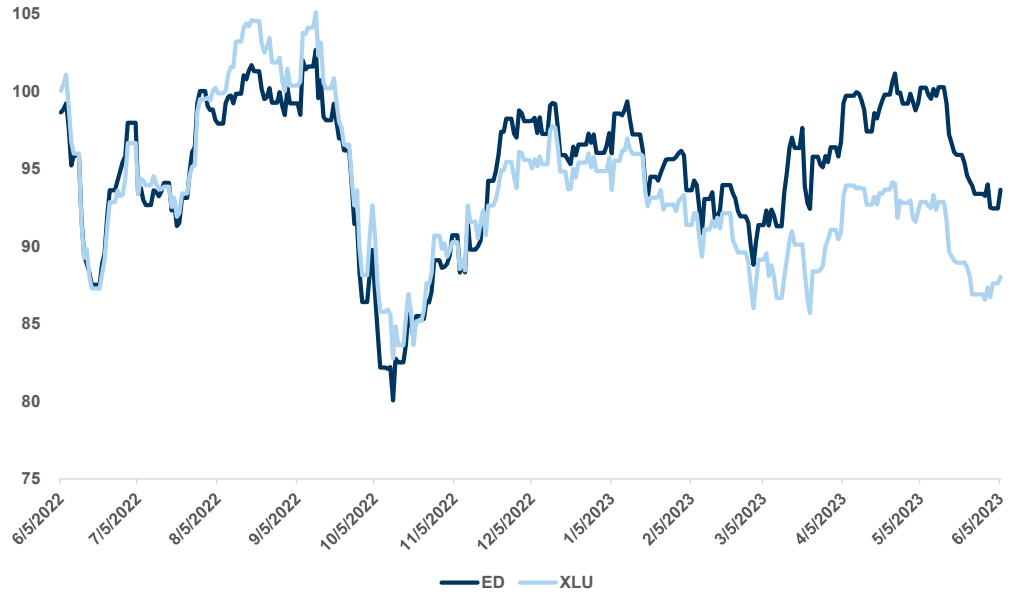
Outperformance creates less attractive valuation

ED shares have outperformed the XLU by 7% over the past 12 months, with the stock being the best performer in our coverage. We attribute this outperformance to (1) the defensive nature of the stock amid an uncertain macro environment, (2) positive reactions to the closing of the company's Clean Energy Business sale (CEB), as it used proceeds from the $6.8 bn deal to strengthen the balance sheet via paying down $1.25 bn of holdco debt by YE2023, execute an accelerated share repurchase program in March for $1 bn, and forego 2023/2024 equity issuance, while providing additional cash on hand for financing flexibility, and (3) less uncertainty around the CECONY electric/gas rate case outcome with a joint proposal filed in February, subject to commission approval.

Exhibit 147: ED has outperformed the XLU over the past 12 months
ED v/s XLU indexed price performance, LTM



Source: FactSet, Goldman Sachs Global Investment Research

Following this outperformance, ED shares are trading at a premium on P/E relative to its history and to peers. On consensus estimates, ED is currently trading at 17.9x FY2 P/E, above its 10-yr average of 17.3x and at a 1.3x premium to our coverage, which is trading at 16.6x on average. This compares to a 5-year average discount of 0.4x. On FY3 earnings, the stock trades at a 1.4x premium to peers versus a 5-year historical 0.2x discount. On GS estimates, ED trades at a 1.4x/1.6x premium to our coverage average on 2024/2025 earnings where we see the stock trading at 17.9x/17.0x versus our coverage at 16.5x/15.3x on average.

From a catalyst perspective, we see a less active path over the next 12 months given (1) the CECONY electric/gas rate case has seen a joint proposal filed, though note it remains subject to approval by the New York Public Service Commission, but the company has a history of settlements in New York, (2) the CEB sale and use of proceeds actions around debt paydown and share buybacks are already largely

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

completed/appreciated, and (3) while the steam rate case remains outstanding, it is a smaller piece of the business relative to CECONY electric/gas. We are also 1% below consensus on our average in 2023-2027, creating less opportunity around positive revisions, in our view.

With recent outperformance, stretched valuation, and a less robust catalyst path in mind, while we do have a positive view on the company's improved balance sheet strength, we do not believe it warrants a significant premium valuation, particularly given less attractive thematic exposure relative to peers as we will discuss more below.

Lower thematic exposure and higher bills relative to peers creates less upside opportunity around capital spend and earnings growth

Across our coverage, ED screens relatively less attractively on thematic exposure outside of grid investment. Based on its capital allocation plans, ED maintains attractive exposure to our grid reliability theme as it invests in maintaining and strengthening its electric, gas and steam delivery systems, but has no exposure to renewables generation, nuclear power, or LNG related investment opportunities. In our view, the current regulatory environment and elevated customer bills could impact upside to investment opportunities and earnings growth. That said, we are monitoring potential for New York state to allow utilities to own regulated renewable generation that could represent upside as well as laws around natural gas bans, which we believe could present risk around ED's investment in replacing aging gas infrastructure, which represents $3.6 bn of capex in the current plan, or 25%.

Among our themes, distribution investment related to building and enhancing grid reliability drives rate base growth. New York state's aggressive clean energy goals - which includes reaching net zero on electricity emissions - and policy initiatives such as the Accelerated Renewable Energy Growth Act provides ED with investment opportunities around safety and resiliency, along with investments related to clean energy, such as emission-reducing electrification programs, transmission infrastructure projects, or the electrification of transportation.

While ED is well aligned with the state's clean energy transition goals, we believe that upside to the current capital spending outlook is limited given the progress on the CECONY rate case and the associated authorized CapEx at CECONY - which we discuss in-depth in the next section. Moreover, following the sale of its CEB segment, ED is no longer levered to the investment opportunity set offered by renewables generation as the share of renewables grows as percentage of the U.S. power generation mix, and we note NY state is targeting a 70% renewable share in its power mix by 2030. Given that NY regulators are generally opposed to utilities competing for generation ownership (NY is a de-regulated power market) or other non-core assets, we believe that there is less relative upside to the capital spending outlook in the current environment related to renewables.

As an example, ED sought approval of utility-owned regulated renewable generation – the CECONY rate case included a proposal for 200 MWs of solar generation ownership (as part of a broader 1,000-MW target) – but the NYSDPS Staff recommended a denial of the request and has indicated that a broader statewide discussion is needed. We also note that the tough regulatory environment, including the relatively low authorized ROE when compared to the national average, makes for a challenging backdrop for the utility to increase capital spending.

Challenged affordability drives potential for less constructive regulatory outcomes

ED faces affordability concerns and regulatory risk around politicization of energy in New York, which we believe could pose risk to attractive regulatory outcomes (driving below average ROEs) as well as creating risk to capital spending plans over the long term related to categories like replacement of natural gas infrastructure. The company is currently in the rate case process for CECONY electric and gas as well as steam.

The latest development around CECONY Electric and Gas joint rate case proposal resulted in lower rate base increases than initially filed, with electric/gas rate increase at $442mn/$217mn based on the latest Joint Proposal released in February 2023 vs. $1,199mn/$503mn in the initial January 2022 filling. In our view, the magnitude of the requested rate increase, which was noticeably higher than previous rate cases requests, proved to be challenging in the context of elevated customer bills. We note that the initial proposal would have increased monthly electric/gas bills by 11.2/18.2%.

Based on a full approval of its ongoing rate cases, the company laid out a capital expenditure plan of $14.5bn over the 2023-2025 period, driving a 6% rate base CAGR and 5%-7% operating earnings growth. Our ROE/equity ratio assumptions are 9.2%/48% vs. 8.8/48% currently authorized and 9.25%/48% currently proposed vs. 10%/50% originally proposed. We note that ROE is determined using a formulaic approach that is based on a DCF (2/3 weighting) and CAPM (1/3 weighting) analysis and is positively correlated with US treasury rates; elevated rates lend some support to the authorized ROE outcome.

In connection with its electric/gas rate case, ED also included a request for an inflation adjuster mechanism to alleviate inflationary pressures, reduce regulatory lags, and help to control O&M – the company commented on the impact of a volatile inflation backdrop coupled with wage pressures that make it harder to manage O&M. However, Staff recommended a denial, which would challenge ED's ability to manage costs and earn around authorized returns.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Moreover, Staff testimony on the steam rate case reflect a rate increase/ROE/equity ratio of $94mn/9%/48% vs. an initial request of $137mn/10%/50% and does not support the requested demand decoupling mechanism. A recommendation is expected in August and a final order expected in October. While uncertainty remains around the steam rate case, we note that it represents a small piece of ED's business (4.6% of rate base).

What could make us more positive?

New York state's ambitious clean energy vision and aggressive policy initiatives could provide upside to the capital spending outlook over the long-term. Over the immediate term, while we see limited upside to capital spending plan, we highlight the $780 million Reliable Clean City transmission infrastructure project investment and possible incremental transmission build-out opportunities that would provide a relatively richer catalyst path.

A constructive NYS decision on utility-owned renewable generation could provide further opportunities for investment and earnings growth. A constructive outcome would lever ED to our renewables theme and enable the company to actively participate in achieving NY's goal of a 70% renewable share of the state's generation mix by 2030, boosting rate base growth and earnings growth. However, we note the upside over the near-term is limited as new rate fillings are unlikely given ongoing 3-year rate cases at all CECONY segments.

We believe ED could trade defensive in a recession scenario given balance sheet strength, low beta, and dividend commitment. Finally, we believe that ED could continue to trade at a premium should a recession materialize in the near-term owing to a cleaner story: 1) the exit of the unregulated CEB segment and shift towards stable regulated core earnings growth, solidifying ED as a pure play utility, 2) improved and simplified balance sheet with strong credit metrics (FFO/Debt in the high teens) owing to the elimination of long-term debt at parent, no equity needs in 2023/2024, and cash on hand that offers financing flexibility. We note that the elimination of parent company

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

debt implies that ED's EPS is not impacted by interest rate risks, providing further stability to earnings versus exposed peers.

Valuation & Key Risks

We are Sell rated on ED. We derive our $88 12-month price target using a 16x P/E multiple (in line with our baseline multiple of 16x) on our 2025 EPS estimates, reflecting a -2% total return versus +15% for our coverage.

Key risks for ED include: 1) favorable rate case outcomes, beyond what we underwrite in our models, 2) premium valuation persisting, particularly in a recessionary environment or uncertain macro, owing to a cleaner story, including the exit of an unregulated business, shift towards regulated core earnings growth, and improved balance sheet, 3) superior execution - cost control and ability to earn close to authorized ROE across its regulated utilities.

A quick overview of ED

Consolidated Edison, Inc. (ED) was founded in 1823 and is incorporated in New York. The company has a market cap of $32 bn and focuses on regulated Transmission and Distribution (T&D). The company delivers electricity, gas, and steam to 10 million people, supplying approximately 44% of New York State's electricity needs.

The company operates through the following segments:

Consolidated Edison Company of New York, Inc. (CECONY) consists of regulated electric, gas and steam businesses and makes up 86% of total earnings. We note that CECONY Electric and CECONY Gas drive rate base growth:

- CECONY Electric delivers electricity across a 660 square mile service area to roughly 3.5 million customers across New York City and Westchester County.
- CECONY Gas delivers gas across Manhattan, the Bronx, Queens and Westchester County to approximately 1.1 million customers.
- CECONY Steam is the biggest steam distribution system in the US and services Manhattan.

Provided for the exclusive use of Daniel Whitehead at Exelon Corp on 12-Jun-2023 12:24 PM.

Orange and Rockland Utilities, Inc. (O&R) consists of a regulated electric and gas business:

- O&R Electric which also houses the Rockland Electric Company (RECO) subsidiary, provides electric service across the southeastern New York and northern New Jersey regions to roughly 0.3 million customers.
- O&R Gas provides gas in the southeastern New York area to more than 0.1 million customers.

Con Edison Transmission, Inc.: consists of CET Electric and CET Gas and engages in the investment and development of electric transmission projects and also in the management of electric and gas assets:

- CET Electric maintains a 46% interest in New York Transco LLC, which owns and develops electric transmission assets in NY.
- CET Gas maintains a 71% interest in Honeoye Storage Corporation (Honeoye) - CECONY owns the rest - and a 9.7% interest (projected to be reduced to 8%) in Mountain Valley Pipeline LLC (MVP). Honeoye manages a gas storage facility in NY while MVP is developing a 300-mile gas transmission project in WV and VA.

In March 2023, the company sold its non-utility, contracted renewable business - Clean Energy Business (CEB) - to RWE for $6.8bn, to focus on the core utility businesses. The company used proceeds from the Clean Energy Business (CEB) sale to forgo 2023/2024 equity issuance, pay down HoldCo debt, invest in the utilities, and implement an accelerated share repurchase program.
