Dated: April 27, 2015

## **INTRODUCTION**

These comments are submitted by Regional Housing Legal Services (RHLS) and the Philadelphia Weatherization and Conservation Collaborative (the “PWCC”) as interested stakeholders pursuant to the Pennsylvania Public Utility Commission’s (the “Commission”) invitation for interested parties to comment upon the Tentative Implementation Order for Phase III of the Act 129 Energy Efficiency and Conservation Program (the "Tentative Order").<sup>1</sup>

RHLS is a nonprofit law firm with unique expertise in affordable, sustainable housing and its related components — community and economic development, utility matters and preservation of home ownership. RHLS provides innovative project and policy solutions that help create sustainable communities offering decent, safe and affordable housing for lower-income Pennsylvanians.

For over 40 years, RHLS has worked closely with nonprofit, community-based organizations that provide shelter for low- and moderate-income households across Pennsylvania. Our work and the work of our partners and clients helps strengthen households and increased the stability of neighborhoods across the Commonwealth.

The PWCC is a collaborative of over 25 organizations, including owners, developers, and operators of subsidized multifamily housing as well as representatives from governmental agencies and several utilities. The PWCC meets several times a year to identify opportunities to increase energy efficiency in subsidized multifamily housing and in low-income communities. RHLS was a founding member of the PWCC and serves as its coordinator.

RHLS and the PWCC thank the Commission for this opportunity to provide these comments.

---

<sup>1</sup> See Energy Efficiency and Conservation Program [Tentative Implementation Order, Docket No. M-2014-2424864](#), dated March 11, 2015 ("Tentative Order").

## **COMMENTS**

RHLS and the PWCC applaud the Commission for its work to increase energy efficiency in Pennsylvania and for recent steps to encourage Electric Distribution Companies ("EDCs") to increase, under Act 129, the level of energy savings in the homes of low-income Pennsylvanians. The Tentative Order also includes a number of changes that RHLS and PWCC believe will make a significant improvement in the health, safety, and welfare of low-income Pennsylvanians, in addition to reducing energy consumption. In particular, we support the Commission's proposal to increase the low-income energy savings target to 5.5%, and to require that at least 2% of the low income energy target be derived from direct install measures.

RHLS and the PWCC strongly encourage the Commission to build upon the foundation it has laid by: 1) encouraging EDCs to address health and safety issues that might otherwise prevent the installation of critical energy-efficiency measures in the homes of low-income homeowners; and 2) facilitating the breakdown of silos that make multifamily housing "a difficult segment to reach"<sup>2</sup> by instructing the EDCs to use the Pennsylvania Housing Finance Agency's ("PHFA") online Inventory of Multifamily Housing and to refer to PHFA's Qualified Allocation Plan ("QAP") to identify measures that are in demand by developers of subsidized multifamily properties and to incorporate those measures into their programs.

## **INCREASED PROGRAM LENGTH; STAKEHOLDER GROUPS**

RHLS and the PWCC applaud the Commission for proposing a 5-year Phase III as well as the creation of a stakeholder group to address challenges in reaching the multifamily market. Both of these changes will make it easier to do more comprehensive energy-efficiency work that benefits low-income Pennsylvanians and helps preserve state investment in subsidized multifamily housing. We note that -without more explicit instruction from the Commission - it

---

<sup>2</sup> Tentative Order, p. 66.

may take some time before the stakeholder group begins meeting, so we urge the Commission to begin that process as soon as possible and, in the interim, direct the EDCs to access available resources as they begin designing their programs for Phase III. We highlight two key resources in more detail below.

**THE TENTATIVE ORDER RECOGNIZES NEEDS; SHOULD CLEARLY SUPPORT HEALTH AND SAFETY MEASURES NEEDED TO INSTALL ENERGY-EFFICIENCY MEASURES**

RHLS and the PWCC applaud the Commission for increasing the savings goal for the low-income sector from 4.5% to 5.5% and for introducing a requirement that at least 2% of the low-income savings should come from direct measures. We appreciate the Commission's movement toward "more of a whole house and/or weatherization (insulation, air sealing) type of program", but urge the Commission to build into Act 129 an awareness that some low-income homes contain health and safety issues that can impede efforts to install whole house and/or weatherization measures.

For example, Habitat for Humanity Philadelphia ("Habitat") frequently encounters homeowners who would greatly benefit from weatherization services such as air sealing and added insulation, yet there are roof leaks, plumbing issues, or sometimes electrical repair needs that prevent installation of these measures. Habitat also encounters many homes without working heat. Often these homeowners and families are attempting to generate heat in potentially hazardous ways, like using gas burners, unsafe space heaters, or running their oven. This makes it unsafe to do weatherization in these homes, even though this population is most in need of energy efficiency services.

The Tentative Order states that the target for the sector "will still allow the EDCs to address critical health and safety issues while implementing these programs." That statement

coupled with the Commission's reiteration that particular measures do not have to be cost effective could be read to authorize EDCs to make health and safety improvements to facilitate the installation of energy-efficiency measures if needed -- including if the particular measure is not cost-effective. We urge the Commission to make this implicit point explicit and to urge EDCs to make improvements needed to prevent de facto heating and to not to walk away from low-income homes that need modest health and safety improvements in order to allow energy-efficiency upgrades.

We continue to urge the PUC and EDCs to consider the potential to increase impact and stretch dollars by partnering with nonprofit organizations working in the home repair and weatherization space -- like Habitat. We also continue to urge the Commission to require EDCs to coordinate their multifamily programs internally as well as externally. Low-income advocates have found a number of challenges facing low-income residents of multifamily properties who are trying to access energy-efficiency services under Act 129. One recurring problem is that individuals may approach an EDC looking for assistance under the low-income program, but be told that they do not qualify for that program because they live in a building that is larger than four stories tall. These individuals may not be properly referred to the appropriate government, educational and non-profit or commercial program within the EDC or there may be actual gaps in coverage in some EDCs for some residents.

**SILOS MAKE MULTIFAMILY HOUSING "A DIFFICULT SEGMENT TO REACH",  
BUT STRAIGHTFORWARD STEPS CAN REDUCE THE CHALLENGES**

RHLS and the PWCC applaud the Commission for continuing to urge EDCs to focus on the multifamily market and for including affordable housing explicitly under the government/educational/nonprofit sector (the "GEN sector"). We recommend the continuation of a minimum 10% energy saving level for the GEN sector as outlined in Act 129.

We appreciate the openness to create a stakeholder working group "to explore possible cost-effective solutions and program designs that could be developed and presented to the EDCs as potential pilots", but urge the Commission to include the following additional direction to the EDCs: 1) the EDCs should refer to PHFA's online "Inventory of Multifamily Housing" as they seek to identify possible properties; and 2) the EDCs should refer to PHFA's QAP when creating their plans for multifamily properties.

*Finding Multifamily Properties*

In Pennsylvania there are more than 90,000 affordable multifamily apartments. These properties represent an investment of more than \$1B of state resources. The largest funding source for new construction and major rehabilitation of subsidized multifamily properties is the Low-Income Housing Tax Credit ("LIHTC"). It is believed that a significant portion of the older LIHTC properties may be underwater due to utility costs. These properties represent a pool of properties with a very clear financial interest in energy-efficiency improvements. Moreover, investing in preserving properties that have already been allocated state resource is smart state policy.

Recognizing that the PUC and EDCs are not generally experts in subsidized housing, the PWCC and RHLS want to point out a resource that can be used to help EDCs identify properties in their service territories. PHFA maintains an online Inventory of Multifamily Housing at:

[http://www.phfa.org/applications/multifamily\\_inventory.aspx](http://www.phfa.org/applications/multifamily_inventory.aspx), which allows visitors to create lists of properties by county. The lists include properties that have been funded by PHFA and properties for which PHFA is the Section 8 Contract Administrator. The listings include the name of the property, the address, the number of units, and owner contact information among other details. By way of example, we are attaching the 21-page report for Lancaster County ("**Exhibit A**").

*Creating Programs that Meet Subsidized Multifamily Property Needs*

RHLS and the PWCC recognize that the Commission and EDCs are unlikely to have an intimate knowledge of the conditions under which subsidized multifamily properties operate or the way in which they are developed. This lack of information will necessarily make it harder for EDCs to design programs that are appropriate or attractive to multifamily property owners/developers. We expect that the stakeholder process will help facilitate increased information sharing, but the EDCs do not need to wait until that process begins to start developing a deeper understanding of the needs of this market.

The 2015 QAP (which lays out the funding criteria for LIHTC) contains a number of energy-efficiency measures that are either required or strongly encouraged. Due to the extremely competitive nature of the LIHTC process, measures that are encouraged are considered by many to be effectively required. In the 2015 QAP, the energy-efficiency measures range from energy-star appliances and Enterprise Green Communities standards, to Passive House certification. The QAP provides EDCs with a roadmap for developing energy-efficiency programs that work for multifamily properties. We are attaching a document that includes relevant language excerpted from the 2015 QAP ("**Exhibit B**"). The full QAP is available at <http://www.phfa.org/developers/developer/lihtc.aspx>. In addition, developing those programs to

work with the strict timelines that apply to the LIHTC process will ensure that the programs can be effectively utilized by developers.

## **CONCLUSION**

In conclusion, RHLS and the PWCC thank the Commission for the opportunity to submit these comments. We applaud the Commission's proposal to increase the savings goal for the low-income sector from 4.5% to 5.5% and include a requirement that at least 2% of the low-income savings should come from direct measures. We urge the Commission to: 1) encourage EDCs to address health and safety issues that might otherwise prevent the installation of critical energy-efficiency measures in the homes of low-income homeowners; and 2) provide institutional support to help break down the silos that make multifamily housing "a difficult segment to reach," including directing EDCs to utilize PHFA's online multifamily inventory to identify properties and to refer to the QAP energy-efficiency provisions when designing their multifamily programs.

Respectfully submitted,

Mark Schwartz

5. Innovation in Design - The Agency will hold a juried competition encouraging demonstrated innovation in housing which could be illustrated through excellence in design, implementation of current and future energy efficient technologies and materials and leveraging community and capital resources and will reserve Tax Credits to the winning development(s). See Checklist in 2015 Guidelines for materials needed to participate in the competition. The selected Applicant will work with the Agency to establish, document and employ the best practices for future housing policies and standards.<sup>1</sup>

**MAXIMUM BASIS PER UNIT LIMITATIONS**

If the Maximum Basis per unit, as previously described, exceeds the established limits, Agency staff may waive the Maximum Basis per unit for some developments. An Agency waiver of the established limits will be based upon the demonstration of compelling circumstances and justification for the additional basis eligible costs. Compelling circumstances are limited costs predominately related to the preservation of a designated historic building or necessitated by building in or adjacent to a designated historical district; construction costs attendant to providing supportive services to the resident population that are over and above that typically associated with such housing, including reasonable costs related to the construction of community service facilities; costs due to structurally unsuitable subsoil conditions; costs associated with environmental remediation of an existing building that will remain in the development; ***up-front capital expenditures related to energy efficiency systems that exceed threshold requirement and will result in demonstrable savings in utility costs to the development, including solar, geothermal, or other innovative energy savings techniques;*** and costs resulting from local conditions or attempts to exclude affordable housing (this may include excessive impact fees, building code requirements, restrictive zoning, extraordinary litigation costs incurred because of neighborhood opposition and planning requirements). For those properties seeking to exceed limits based on costs due to historic considerations, unsuitable subsoil conditions, costs associated with environmental remediation, or up-front capital expenditures related to energy efficiency systems that will result in demonstrable savings in utility costs evidence must be provided that such costs are in excess of expenditures required for eligibility for Tax Credits. In addition, a detailed cost breakdown must be provided indicating the difference between the costs for these items and those of typically constructed developments. Applicants must provide full explanation of all alternative site considerations and provide adequate justification of the need for the development at the identified location or a full explanation and adequate evidence of cost savings. For Applications affected by local attempts to exclude affordable housing, Agency staff will not approve Tax Credits above 30 percent of the Maximum Basis limitation. For all other circumstances, Agency staff will not approve Tax Credits

above 15 percent of the Maximum Basis limitation. A waiver of the Maximum Basis limitation is solely determined by the Agency.<sup>2</sup>

**APPLICATION THRESHOLD CRITERIA**

Laundry Facilities. Common laundry facilities or the provision of individual washers and dryers in each unit are required. If a common laundry is provided in a development that will be converted to homeownership, hook-ups for a washer and dryer must be provided in each unit. If the development contains a common laundry facility, the following requirements must be met:

- For general occupancy developments: one washer and dryer per 12 units, with a minimum of two washers and two dryers required at each laundry facility.
- For elderly developments: one washer and dryer per 20 units, with a minimum of two washers and two dryers required at each laundry facility.
- A minimum of one front load washer and dryer is required for each laundry facility and will be required in accessible units containing a washer and dryer in the unit.
- ***All washing machines, whether development owned or vendor owned, must be Energy Star® labeled.***<sup>3</sup>

5. Development Sustainability and Energy Conservation Measures –

- For 2015, all new construction and rehabilitation developments must meet the mandatory measures outlined in the 2011 Enterprise Green Communities Criteria, or any subsequent updates (see [www.enterprisecommunity.com/criteria](http://www.enterprisecommunity.com/criteria)) which set forth minimum standards for design, location, site improvements, water conservation, energy efficiency, materials beneficial to the environment, healthy living, and operations and maintenance of the development.
- Additionally, for new construction and rehabilitation developments, the overall U-value of the exterior building envelope must exceed the requirements of the 2009 International Energy Conservation Code Chapter 4 for buildings three stories or less in height, or Chapter 5 for buildings four stories or more in height, by at least 10 percent, as verified by a REScheck certificate for buildings three stories or less in height, or a COMcheck certificate for buildings four stories or more in height. Air sealing of the exterior building envelope and attic plane shall be included. Trade-offs available in the REScheck or COMcheck software for mechanical equipment will not be allowed. (Not applicable to preservation developments.)
- In new construction and rehabilitation developments, all appliances, HVAC equipment with a capacity less than 60,000 btuh, gas fired water heaters, windows, ceiling fans, exhaust fans, range hoods and exit signs shall be Energy Star® labeled when such equipment and appliances exist. (Exceptions: programmable thermostats do not need to be provided, and windows in

RELATING TO ENERGY-EFFICIENCY**

buildings over three stories in height may comply instead with ASHRAE Standard 189.1-2009.) (Packaged terminal air conditioners (PTACs) and packaged terminal heat pumps (PTHPs) may only be used if it can be proven that they comply with the prescriptive requirements of Energy Star® Version 3.0 for air-source equipment.) In addition, 100% of the permanent room light fixtures in the dwelling units shall be equipped with compact fluorescent, LED bulbs, or high efficiency fluorescent with electronic ballasts; and 100% of the community room and common area corridor and stair lighting shall be fluorescent with electronic ballasts or shall utilize compact fluorescent or LED bulbs.

- In preservation developments, existing refrigerators more than 10 years old shall be replaced with Energy Star® labeled type. Existing heat pumps, air conditioning condensing units, and throughwall air conditioners more than 10 years old shall be replaced with Energy Star® labeled type, when such equipment exists. Existing furnaces and boilers more than 15 years old shall be replaced with Energy Star® labeled type, when such equipment exists. (Programmable thermostats do not need to be provided.) In addition, existing community room, common area corridor and stair lighting more than 15 years old shall be replaced with fluorescent fixtures with electronic ballasts or fixtures that utilize compact fluorescent or LED bulbs. Where windows are scheduled for replacement, replacement should be made with Energy Star® qualified products, except in buildings over three stories in height, where window replacement may comply instead with ASHRAE Standard 189.1-2009.
- All developers must certify that when existing equipment, appliances and products are replaced, they will be replaced with Energy Star® labeled equipment, when such equipment exists.
- All developments must meet the Additional Threshold Green Building Criteria set forth in the 2015 Guidelines.

Please review the Multifamily Housing Application and Guidelines for specific sustainability and energy conservation requirements.<sup>4</sup>

**SELECTION CRITERIA**

**B. Development Characteristics**

*25 points*

The Agency may award up to 25 points maximum for the provision the following development amenities.

- Smart Site Selection – up to 10 points may be awarded to the following types of properties:
  - up to 5 points may be awarded to those developments located on a brownfield;
  - up to 7 points may be awarded to those developments considered residential infill; and

---

<sup>4</sup> *Id.* At 13.

**EXCERPTS FROM PHFA'S 2015 QAP  
RELATING TO ENERGY-EFFICIENCY**

- up to 10 points may be awarded to those developments consisting of an adaptive reuse of an existing building.
  
- Achievement of Enterprise Green Communities optional points criteria. 10 points may be given to those developments achieving the following optional Enterprise Green Communities Criteria points: 25 points for new construction and 20 points for substantial or moderate rehabilitation properties (which would include Preservation projects).
  
- Energy Efficiency Goals – 10 points may be awarded to those developments which meet Passive House Certification (nationally or internationally) for energy efficiency. (See Multifamily Housing Application and Guidelines and [www.passivehouse.us](http://www.passivehouse.us) or <http://passiv.de/en/> for additional guidance.)

Please review the 2015 Guidelines for specific requirements for the above criteria. The Agency will review the architectural documents submitted with the proposal to confirm the existence of the proposed amenities. A certification from the design architect verifying the inclusion of the amenities in the development must be submitted with the Application. Confirmation from the construction contract administration architect is required with the submission of the cost certification documents. Amenities should be appropriate for the proposed resident population. The appropriateness and adequacy of the proposed amenities for ranking purposes will be determined at the sole discretion of the Agency. Verification of the availability of all amenities may be required by the Agency at any time and throughout the development's compliance period.<sup>5</sup>
