Quarterly Reliability Report

Second Quarter

2010

§ 57.195. (e)(1) A description of each major event that occurred during the preceding quarter, including the time and duration of the event, the number of customers affected, the cause of the event and any modified procedures adopted in order to avoid or minimize the impact of similar events in the future.

2nd Quarter 2010 Major Events

There were no Major Events, as currently defined by the Commission, for the Second Quarter. However, there were two major events exceeding 10% of customers affected that have occurred, and which have dramatically impacted the reliability statistics for PCL&P.

Date	Time	Circuit	Cause	Duration	Customers Affected	Cust Min of Interruption
5/1/2010	11:12	L7-6-34	Insulator Failure	Various	1,677	235,397
4/26/2010	15:11	104-1-13	Phase off pin	1:27	590	51,330

In addition, incidents from the 2/25/10 storm were denied exclusion by the Commission, which have also had a negative impact on PCL&P performance statistics. An appeal of this denial was rejected by the Commission. At this point, PCL&P will not be able to achieve the minimum performance levels as assigned by the Commission for Frequency of Interruption and System Duration.

2nd Quarter 2010 Pre-Arranged Outages

There were no pre-arranged outages in the Second Quarter.

§ 57.195. (e)(2) Rolling 12-month reliability index values (SAIFI, CAIDI, SAIDI, and if available, MAIFI) for the EDC's service territory for the preceding quarter. The report shall include the data used in calculating the indices, namely the average number of customers served, the number of sustained customer interruptions, the number of customers affected, and the customer minutes of interruption. If MAIFI values are provided, the report shall also include the number of customer momentary interruptions.
