Internal Audit was unable to evaluate the full requirements management lifecycle for both functional and non-functional CCM program delivery requirements. As part of the program's design phase closure, the CCM program team invoked an internal "Deliverable Exception/Waiver" and did not utilize the existing NiSource IT PMO requirements traceability matrix deliverable. Instead, the program team agreed to leverage Verizon's requirements traceability template to document project requirements and manage test case traceability. While CCM program leadership expects Verizon to provide requirements management deliverables as part of the agreed-to waiver, Verizon had not yet provided a deliverable to enable requirements traceability prior to build gate completion. As a result, and without clearly defined and managed requirements, the business' goals and objectives may not be met and the success of the project could be jeopardized.

We also noted that business owners are not required to directly approve the functional requirements traceability matrix. Although this approach is reasonable for projects with limited business functionality impact, business owners should approve key deliverables (or waivers of key deliverables) for projects having substantial business functional requirements and impacts to ensure clarity of functional requirements, which will facilitate accountability for delivering a solution that sufficiently addresses business requirements.

We recommend CCM program leadership (both IT and business) formally document, map/trace, review, and approve both functional (business) and non-functional (technical) requirements to validate that all requirements are appropriately addressed in the solution and ensure testing processes comprehensively address the requirements. Also, the requirements should be stored in the CCM project central repository to ensure that key stakeholders have sufficient visibility to key program requirements. In addition, we recommend the NiSource IT PMO consider clarifying business approval requirements in its deliverable methodology for functional requirements traceability on future business-impacting engagements.

We would like to thank all personnel involved with this assessment for their cooperation and support throughout our review. If Internal Audit can be of further assistance, please contact us.

## **Internal Audit Advisory Report**

---

### **Background**

Robotic Process Automation (RPA) is a productivity tool used to create scripts (often called “bots”) that capture, emulate and integrate human actions within Information Technology (IT) applications to execute business processes. This technology allows organizations to automate a variety of high-volume repetitive business process tasks.

The corporate IT function within NiSource Corporate Services Company, a fully-owned subsidiary of NiSource Inc. (NiSource or the Company) initiated an RPA pilot program in October 2018 and selected UiPath Inc. as its RPA technology platform. Over 70 bots have been deployed across the enterprise since the inception of the RPA program. During the RPA pilot program, Internal Audit performed a control design assessment to evaluate the initial integration of RPA technology into NiSource’s technology environment. We noted the existing NiSource enterprise technology solution delivery model was not designed for emerging technologies, which resulted in the RPA delivery team needing to develop its own governance model, risk management criteria and control structure. We recommended engaging a subject matter expert to assist in the development of an appropriate governance model and establishment of an applicable controls framework for emerging technologies, including RPA.

### **Audit Objective, Approach, and Coverage**

The objective of this advisory assessment was to evaluate the ongoing maturity of the RPA program and its scalability to address NiSource enterprise-level processes and control structures. Key review areas of this assessment included: RPA program maturity, processes to determine applicability of control structures related to the Sarbanes-Oxley (SOX) program and risk management framework(s) that support NiSource’s corporate strategy and business objectives.

During the advisory assessment, we specifically evaluated:

- The RPA program governance model and established roles and responsibilities
- Steady-state management of the RPA automation/bot universe
- RPA risk management practices and alignment to enterprise risk classification
- The establishment of appropriate control processes and structures

We did not evaluate either the design or operating effectiveness of business and/or IT controls for specific bot implementations as these controls will be considered during future risk-based, integrated audit engagements as applicable.

### **Summary of Key Internal Audit Recommendations**

Since our 2018 assessment, the Company has implemented a formalized Emerging Technologies Governance Framework (ETGF). This framework drives consistency and is intended to facilitate delivery of expected results. The RPA project team adapted the standards and has started managing robotic automations based on the decentralized operating model defined within the ETGF.

Over the course of our review, we observed some opportunities to further enhance the RPA program as noted below. In addition, we verbally conveyed less-significant recommendations to Management during the course of our review. A summary of key recommendations follows:

**1) Administrative Password Management:**

Passwords associated with UiPath accounts that have administrative access are not maintained in a password vault and only a single user has knowledge of the passwords. While limiting access to administrative accounts is an important access security control and maintains individual accountability for activities performed using the accounts, lack of business continuity plans that enable backup personnel to access administrative support accounts increases the risk of business disruption.

We recommend continuing with plans to assess storing UiPath administrative accounts within CyberArk's enterprise password management/vaulting platform.

**2) Bot Inventory Management:**

NiSource has acquired Automation Hub, which is an automation management and process repository within the UiPath ecosystem. Currently, the RPA project team is not fully utilizing Automation Hub to manage the automations inventory. The active inventory of bots being tracked by the RPA project team is maintained in a spreadsheet and is inconsistent with the inventory of bots in the UiPath platform. An inaccurate inventory of bots could impair monitoring, support and life-cycle management.

We recommend enhancing bot inventory management capabilities and leveraging the UiPath Automation Hub to manage automation inventory tracking (both active and retired), corresponding business bot ownership and supporting RPA documentation.

**3) Aggregate Bot Risk Management:**

While the RPA project team is managing bot development and request-intake governance based on the NiSource ETGF, the scoring mechanism within the framework only addresses risk ranking at a tactical level (per individual bot and at a department level), which does not address potential aggregate risk or context from an enterprise perspective. Lack of risk aggregation and enterprise alignment could result in insufficient control structures or duplicated efforts.

We recommend aligning with executive sponsors and business owners to perform an aggregate risk evaluation of NiSource bots currently in production. Additionally, risk assessment criteria should be defined and shared with RPA stakeholders. Once the criteria has been established and shared, bots currently in-production should be risk-ranked and the risk assessment process should be applied to new bots going forward.

**4) RPA Controls Alignment:**

Although the RPA program team manages the bot development request-intake process and steady-state environment by leveraging standardized NiSource enterprise IT tooling (i.e. ServiceNow for automations change management, SailPoint IdentityIQ for access security, etc.), a consistent controls framework is not applied across all bots in production. Inconsistency or informality related to applying control frameworks increases the risk of key processes not functioning as expected, as well as increased potential for data exploitation.

We recommend the NiSource IT Governance, Risk and Compliance (GRC) and SOX Compliance teams align to formalize a technology controls framework for the UiPath platform that enables consistent implementation of appropriate risk-based technology general computer controls for key bots.

We would like to thank all personnel involved with this assessment for their cooperation and support throughout our review. If Internal Audit can be of further assistance, please contact us.

## Executive Summary

---

### Background

The services of Schneider Downs & Co, Inc. (Schneider Downs) were retained by NiSource, Inc. (NiSource or the company) to perform an advisory review of key cybersecurity initiatives and provide a secondary opinion on the current-state design, and where applicable, operating effectiveness of NiSource's Information Technology (IT) Third Party Risk Management (TPRM) program. NiSource Internal Audit selected the IT TPRM program for analysis based on its criticality related to the organization's cybersecurity posture, coupled with the program's maturity status within the broader NiSource cybersecurity roadmap. Schneider Downs' assessment occurred during January and February 2021.

For the purpose of this review, *vendor risk management* or *third-party risk management (TPRM)* refers to:

- Identification and classification of vendor relationships
- Risk assessment and monitoring of vendors as related to the delivery of NiSource products and services
- Contract management processes as they relate to vendor relationships
- Metrics, alerting, and reporting used to communicate identified vendor risk to stakeholder groups within the organization
- Analysis, acceptance, and tracking of organizational risk exposure due to vendor relationships
- The automated tools and manual processes implemented to support these activities

In order to assess the maturity of the NiSource IT TPRM program against industry best practices, Schneider Downs utilized the Vendor Risk Management Maturity Model (VRMMM) developed by the Shared Assessments Group, a global membership organization dedicated to providing best practices, education and tools to drive third-party risk assurance. The VRMMM is comprised of eight high level program categories, each with six possible maturity levels. A total of 132 components were scored across 30 subsections of the eight categories, with an average of these scores representing the aggregate program maturity level. A complete description of the activities expected at each of the maturity levels is provided in Appendix A: Shared Assessments Vendor Risk Management Maturity Model.

### Current State

NiSource IT recently undertook the development of a formal IT TPRM program under its IT Governance, Risk, and Compliance (GRC) function. At the time of this assessment, the IT TPRM program had adopted initial procedures for assessing and monitoring vendor risk utilizing the Fortress platform.

The observations in this report were compiled based on inquiry with NiSource IT staff members who perform various roles within the IT TPRM program and members of supporting business functions, and through selected tests of the operating effectiveness of implemented processes.

During this assessment, Schneider Downs found the NiSource IT TPRM program to be operating at an aggregate maturity of Level 2: Approved Roadmap and Ad Hoc Activity using the VRMMM. IT TPRM leadership and staff have defined a strong vision for the program, performed initial assessments of all IT

vendors, and have begun to define additional vendor risk management activities. The following recommendations are based on assessed gaps between the current state of the NiSource IT TPRM program and an industry benchmark of VRMMM Level 3: Defined and Established.

## Key Recommendations

### 1. **Program Approval and Review**

With NiSource still being in the early stages of its IT TPRM program implementation, we recommend management establish an initial IT TPRM program baseline with approved policies and formally defined responsibilities for all stakeholders. This program baseline and responsibility structure should assist in defining accountability standards while also ensuring program maturity progression metrics are being captured and aligned with leadership expectations. In addition, NiSource should implement a regular IT TPRM program self-assessment and review process so future revisions to IT TPRM program structure are executed and communicated to stakeholders in a timely manner.

### 2. **Cross-Functional TPRM Process Integration**

Team integration/communications standards are not currently established between two key NiSource internal stakeholder groups (Supply Chain and IT) that oversee or support one or more activities defined in the VRMMM. We recommend management review the organization's internal vendor management processes, including key inputs and outputs exchanged between these business units, and establish clear expectations and guidelines for how this information should integrate into the IT vendor management lifecycle.

### 3. **Information Sharing and Reporting Procedures**

While reporting has been created to track progress of the IT TPRM program implementation, key performance and risk indicators (KPIs and KRIs) are not defined. Defining specific KPI and KRI metrics enables visibility to the success of the IT TPRM program and vendor risks that may exceed the organizational risk appetite. KPI and KRI metrics should be communicated to appropriate stakeholder groups on a consistent cadence.

### 4. **IT TPRM Training and Resources**

Although the current IT TPRM staffing level was sufficient for the initial launch of the program, staffing is below the average headcount for companies with an in-house IT TPRM program and NiSource has not performed formal capacity planning to ensure ongoing achievement of IT TPRM objectives. We recommend management assess future IT TPRM staffing needs to achieve stated TPRM program maturity objectives. In addition, management should develop an action plan to ensure appropriate skills coverage by training existing staff, as well as augmenting capacity by either hiring additional IT TPRM employees or via outsourcing. These actions would assist in having skilled resources identified and available to execute on IT TPRM roadmap activities as needed.

### 5. **Vendor Assessment and Monitoring**

IT vendor risk ratings are currently based only on inherent risk as designated by Fortress, with subsequent operational risk monitoring of third parties (such as performance of service level agreements) being limited to NiSource's major IT vendors. We recommend NiSource develop additional business-specific vendor risk classifications based on operational criticality and establish assessment/monitoring procedures that align with the underlying business risk at each

criticality level. This would provide management with enhanced insight into the IT third-party risk lifecycle and allow IT TPRM resources to focus on specific third-party IT vendors who may be experiencing an increasing level of steady-state operational risk.

### Management Response to Recommendations

NiSource IT GRC, and specifically the IT TPRM team, appreciates this advisory review as it acknowledges our foundational activities, our vision, and our roadmap. It also identifies opportunities which will assist us in focusing our roadmap and prioritizing activities. Specific areas of focus will include further developing policies and procedures, defining roles and responsibilities especially as it relates to integration with Supply Chain, defining standard reports and metrics for both management and vendor relationship owners, and assessing resource and training requirements to mature the IT TPRM program.

\*\*\* End of Executive Summary \*\*\*

# Detailed Report

## Shared Assessments' Vendor Risk Management Maturity Model Assessment

To perform this IT TPRM assessment, we utilized the Shared Assessment Vendor Risk Management Model (VRMMM). VRMMM is a tool used to help evaluate the maturity of a Vendor Management program by benchmarking against the 8 High Level Program Categories listed in the table below.

High Level Program Categories	
1.0 Program Governance	2.0 Policies, Standards, Procedures
3.0 Contract Development, Adherence, and Management	4.0 Vendor Risk Assessment Process
5.0 Skills and Expertise	6.0 Communication and Information Sharing
7.0 Tools, Measurement, and Analysis	8.0 Monitoring and Review

### Definitions of the VRMMM Maturity Levels

Maturity Level	Program Status	Description
LEVEL 0	START UP OR NO TPRM ACTIVITY	New organizations beginning operations or organizations with no existing vendor risk management activities
LEVEL 1	INITIAL VISIONING AND AD HOC ACTIVITY	Organizations which perform third party risk management activities on an ad hoc basis, but have a management approved plan to structure the activity as part of an effort to achieve full implementation
LEVEL 2	APPROVED ROAD MAP AND AD HOC ACTIVITY	Organizations which perform third party risk management activities on an ad hoc basis, but have a management approved plan to structure the activity as part of an effort to achieve full implementation
LEVEL 3	DEFINED AND ESTABLISHED	Organizations with fully defined, approved, and established vendor risk management activity, where activities are not yet fully operational and where metrics reporting and enforcement are lacking
LEVEL 4	FULLY IMPLEMENTED AND OPERATIONAL	Organizations in which vendor risk management activities are fully operational and all compliance measures (including metrics reporting and independent oversight) are in place
LEVEL 5	CONTINUOUS IMPROVEMENT	Organizations that strive toward operational excellence, understand best-in-class performance levels, and implement program changes

### Current State

We assessed the current state of the NiSource IT TPRM program by evaluating the percentage of activities being performed at each of the prescribed maturity levels. The heat map below displays areas of the program that are established, as well as those that are currently undefined or underperformed. The following sections provide a detailed description of the maturity assessment for each of the VRMMM subdomains and include specific recommendations and risk metrics.

High Level Program Categories	Aggregate Maturity Level	Sub-Sections	Current Maturity
<b><u>1.0 Program Governance</u></b>	Level 3	1.1	3
		1.2	2
		1.3	3
		1.4	3
		1.5	2
<b><u>2.0 Policies, Standards, Procedures</u></b>	Level 2	2.1	3
		2.2	2
		2.3	1
		2.4	1
		2.5	3
		2.6	1
		2.7	2
<b><u>3.0 Contract Development, Adherence and Management</u></b>	Level 3	3.1	3
		3.2	2
		3.3	4
		3.4	2
<b><u>4.0 Vendor Risk Assessment Process</u></b>	Level 2	4.1	1
		4.2	2
		4.3	2
		4.4	3
		4.5	0
		4.6	1
<b><u>5.0 Skills and Expertise</u></b>	Level 0	5.1	1
		5.2	1
		5.3	0
		5.4	1
		5.5	1
<b><u>6.0 Communication and Information Sharing</u></b>	Level 1	6.1	1
		6.2	1
		6.3	1
		6.4	2
		6.5	0
<b><u>7.0 Tools, Measurement and Analysis</u></b>	Level 3	7.1	2
		7.2	4
		7.3	2
		7.4	4
		7.5	5
<b><u>8.0 Monitoring and Review</u></b>	Level 1	8.1	3
		8.2	2
		8.3	2
		8.4	1
		8.5	1
		8.6	0
<b><u>Program Aggregate</u></b>	Level 2		

## 1.0 Program Governance

### Description

The Program Governance subdomain encompasses governance standards for vendor risk management. Key areas considered in this subdomain include establishing risk posture and governance, along with defining objectives and goals.

### Recommendations

We recommend NiSource continue its documentation of in-progress IT TPRM policies and procedures, while developing a process to articulate and incorporate board reporting and oversight of IT vendor management goals.

Subsection	Description	Maturity
1.1	Formalized Vendor Risk Governance Model / Structure	3
1.2	Defined Program Objectives and Goals	2
1.3	Established Risk Posture (Tone at the Top, Risk Tolerance, Risk Management Methodology, including Process for Exception Approval)	3
1.4	Board Reporting and Management Oversight	3
1.5	Standards of Conduct	2

### Observations

IT TPRM policies were still in progress during the time of our review. Therefore, we were unable to confirm that various aspects of this category were in place, including goals and objectives. While Board reporting and management oversight is partially in place for IT TPRM, the process could be strengthened through steps that include, but are not limited to:

- Establishing formalized schedules for reporting to the Board
- Defining processes for reporting material changes
- Maintaining processes for periodic updates on corrective actions
- Revising the IT vendor risk management policy as needed to achieve desired objectives

NiSource IT Governance, Risk and Compliance (GRC) currently presents IT TPRM program key performance indicators (KPIs) to the NiSource CIO, however the Board would only observe vendor risk through the standard IT risk escalation process. While the CISO (Chief Information Security Officer) does report to the Board and Cybersecurity Risk Committee on the status of the IT TPRM program, metrics have not been established for communicating IT vendor risk at these levels.

NiSource does require IT vendors to perform regular training on and acceptance of organizational standards of conduct with Schneider Downs observing evidence of IT vendor system access removal in the case of non-compliance.

## 2.0 Policies, Standards, Procedures

### Description

The Policies, Standards, Procedures domain describes key activities regarding documentation and general standards of vendor risk management.

### Recommendations

We recommend management formally adopt an IT TPRM policy and associated vendor risk categories. We additionally recommend developing procedures to improve internal communication channels between Supply Chain/Purchasing, Legal, IT, and business relationship owners throughout the due diligence, inventory management and classification, oversight, and termination subsections of the vendor management lifecycle.

Subsection	Description	Maturity
2.1	Vendor Risk Management Policy and Risk Categorization	3
2.2	Vendor Inventory Requirements	2
2.3	Vendor Due Diligence Standards	1
2.4	Vendor Classification Operational Procedures	1
2.5	Contract Management Governance	3
2.6	Vendor Management Oversight Procedures	1
2.7	Vendor Termination or Exit Procedures	2

### Observations

A number of policies addressing various aspects of this category fall outside the scope of the IT TPRM program, including:

- Vendor Inventory Requirements
- Vendor Due Diligence Standards
- Vendor Classification Operational Procedures
- Vendor Management Oversight Procedures
- Vendor Termination or Exit Procedures

We noted that some of these processes, such as contract management, were in place for nearly all vendors while other organization-level processes, such as vendor due diligence standards, classification procedures, and vendor management oversight, were only partially defined. Such processes would standardize the steps of the vendor management lifecycle. While NiSource IT has defined IT vendor risk management categories and assessment criteria within the Fortress platform, senior management and/or Board approval of those categories/criteria is still pending as of March 2021.

Finally, we established through inquiry that NiSource's IT GRC team performs its own internal reviews of NiSource's master vendor inventory in order to identify IT vendors for inclusion in the IT TPRM program. As NiSource IT GRC currently performs this review cadence in an ad hoc manner and independent from Supply Chain/Procurement, we recommend a formal and regular alignment process be implemented between the IT GRC and Supply Chain/Procurement teams to address potential inefficiencies and/or due diligence failures in both the identification and currency maintenance status of NiSource's IT vendor population.

### 3.0 Contract Development, Adherence, and Management

#### Description

The contract development domain outlines all of the activities performed to support the contracting process from standard contract provisions to management oversight.

#### Recommendations

We recommend NiSource develop key risk indicators (KRIs) for IT vendor contracts that bypass the established contract review process or exclude key contract terms. In addition, management should establish standard procedures for both remediation and acceptance of these risks.

Subsection	Description	Maturity
3.1	Vendor Contract Management Operational Procedures	3
3.2	Criteria / Guidelines / Processes for Standard Contract Provisions	2
3.3	Relationship Management	4
3.4	Management Oversight	2

#### Observations

NiSource Supply Chain oversees vendor onboarding and renewal with Legal providing standard contract language and terms of vendor agreement review upon request. While general provisions for IT contract drafting and negotiation were in place, there is currently no documented plan or procedure around aspects of enterprise-level vendor relationship management and management oversight of contracts. An overarching process of this type falls outside of the scope of the IT TPRM Program, but directly impacts future state success of the program.

## 4.0 Vendor Risk Assessment Process

### Description

This domain provides guidance on activities for assessing the potential risk associated with a vendor.

### Recommendations

We recommend management develop processes for the following:

- Classifying IT vendors based on their underlying delivery risk to NiSource products and services
- Monitoring IT vendor compliance with operational standards such as service level agreements (SLAs)
- Identifying changes in the inherent risk of individual IT vendor relationships

Subsection	Description	Maturity
4.1	Outsourcing Risk Assessment Process	1
4.2	Vendor Assessment and Classification	2
4.3	Vendor Assessment Operational Processes	2
4.4	Vendor Assessment Metrics Reporting	3
4.5	Ongoing Vendor Risk Assessments	0
4.6	Process Automation	1

### Observations

The NiSource IT GRC team has established initial visioning and processes around the outsourced IT risk assessment process utilizing Fortress, along with outlining an escalation process for vendor risk assessments beginning with a Data Driven Risk Rank (DDRR), progressing to a Data Driven Vendor Assessment (DDVA), and concluding with a Vendor Control Assessment (VCA) for the highest risk vendors. We observed this process to be operating effectively through either performing a VCA or acceptance of risk by appropriate NiSource management, including VCA risk items being appropriately tracked in the NiSource IT Risk Register. While at least 380 IT vendors have been identified for risk assessments, only 30 DDVAs had been completed at the time of this assessment. Because this process is still relatively new, we recommend a regular review to ensure vendors are appropriately escalated based on risk.

We noted that NiSource’s primary, high risk “Big 4” IT vendors (CGI, Wipro, TCS, and Verizon) are assessed for contractual SLA compliance on a regular cadence, however ongoing IT vendor assessments and SLA reporting compliance were lacking for IT vendors considered non-primary. In addition, process automation is not in place to automate the request process for having an IT vendor assessment performed.

## 5.0 Skills and Expertise

### Description

Activities that fall under the Skills & Expertise subdomain include those related to ensuring that appropriate personnel with the right skills are in place to execute the vendor risk management program.

### Recommendations

We recommend management formalize and communicate any IT TPRM process roles and responsibilities of NiSource business stakeholders who reside outside of Information Technology. Additionally, target skillsets and staffing levels should be identified for the IT TPRM program, including action plan development for training/certifying existing staff and hiring/augmenting staff to ensure appropriate coverage for all IT TPRM activities.

Level	Description	Maturity
5.1	Roles and Responsibilities	1
5.2	Staffing Levels and Competencies	1
5.3	Training and Awareness	0
5.4	Budget and Resources	1
5.5	Certifications	1

### Observations

NiSource roles and responsibilities for the IT TPRM program are informally established, with requisite staffing levels and execution competency requirements not yet in place. While there is no current training or communications on IT TPRM policies and procedures for staff outside of IT, a budget has been established for the Fortress platform and to expand training and staffing of the IT TPRM program.

## 6.0 Communication and Information Sharing

### Description

Processes supporting the reporting at various levels of vendor program status categorize this domain.

### Recommendations

We recommend the standardization of communication and reporting protocols for individual inputs and outputs of the IT TPRM program. For example, these protocols should include provisions for the initiation of an IT vendor relationship by the business relationship owner, formal contract review by Legal, and reporting of key IT vendor risk to NiSource management. Some of these activities are currently being performed by Supply Chain but there is not clear linkage throughout the vendor management lifecycle and to the IT TPRM program.

Level	Description	Maturity
6.1	Vendor Risk Program Integration	1
6.2	Dashboards / Scorecards	1
6.3	Operational Management Reporting	1
6.4	Board and Executive Reporting	2
6.5	Communication Protocols	0

### Observations

IT vendor management has not been formally integrated with NiSource enterprise functions such as Legal, Procurement, etc. Additionally, metrics on IT vendor management are reported to the Board, however do not include details such as vendor value, regulatory compliance, etc. There is also no established and documented process for communicating and resolving exceptions for ongoing issues with IT vendors outside of NiSource's primary IT Service Providers.

## 7.0 Tools, Measurement, and Analysis

### Description

This category pertains to all activities that aid in the analysis and scoring of vendor risks. This includes the use of scoring tools and financial analysis.

### Recommendations

We recommend management affirm consistent use of a vendor questionnaire in the risk assessment process between IT GRC and other groups performing vendor assessments. While the IT GRC and NIPSCO NERC CIP Compliance groups utilize a Fortress-based questionnaire, NiSource Enterprise Architecture leverages a separate questionnaire with partial overlap of content with the Fortress questionnaire. See Vendor Questionnaire Review on page 16 for further detail.

Level	Description	Maturity
7.1	Workflow Management	2
7.2	Vendor Risk Scoring Tools	4
7.3	Vendor Financial Analysis	2
7.4	Vendor Business Risk	4
7.5	Tool Automation	5

### Observations

We noted a strong use of assessment and analysis tools, primarily via leverage of the Fortress platform. Because use of Fortress is relatively new, we were unable to observe a sufficient number of IT vendor assessments to opine on the operational effectiveness of the assessment escalation workflow.

## 8.0 Monitoring and Review

### Description

The performance of all other vendor management activities must be continuously monitored. This includes monitoring contracts, service level agreements, and potential changes to the environment.

### Recommendations

We recommend management establish a regular review cadence for monitoring the maturity and effectiveness of its IT TPRM program. Additionally, IT vendor assessment procedures should include provisions for the continuous monitoring of service level agreements (SLAs), financial viability, and security posture of IT vendors outside of NiSource's primary IT Service Providers. While Supply Chain currently monitors vendor relationships from a renewal perspective, changes in a vendor's risk profile during the term of their contract may go undetected.

Level	Description	Maturity
8.1	Contract Provision Tracking and Maintenance	3
8.2	Monitoring Service Level Agreements and Performance	2
8.3	Potential Changes Due to Internal and External Environment	2
8.4	Self-Assessment / Audit Readiness and Assurance	1
8.5	Controls Validation and / or Testing	1
8.6	Continuous Monitoring Program	0

### Observations

We noted that while IT vendor master agreements are housed in a central repository (Ariba) and appropriate agreement updates are being included during the agreement renewal process, NiSource does not currently monitor SLAs for a majority of its IT vendors and does not actively monitor vendors for changes in their compliance risk, financial viability, etc. Additionally, NiSource has not defined a process for self-assessment of its IT TPRM program maturity.

## Vendor Questionnaire Review

Through inquiry with various members of NiSource IT, we noted two unique vendor risk assessment questionnaires are being used by internal IT tower units. IT vendor risk processes originated by the IT GRC and NIPSCO NERC CIP Compliance groups both utilize the same Fortress-based questionnaire, while NiSource Enterprise Architecture leverages a separate questionnaire to perform IT vendor assessments. We obtained copies of both questionnaires as follows:

1. Fortress Vendor Control Assessment Questionnaire
2. Enterprise Architecture Assessment Questionnaire

Through independent review of each questionnaire, we noted approximately 31% (129 of 415) of questions in the Fortress Vendor Control Assessment Questionnaire overlap with one or more questions in the Enterprise Architecture Assessment Questionnaire.

Based on these findings, we recommend management consider utilizing data collected in the Fortress-based processes as input into the Enterprise Architecture vendor assessment process.

## Appendix A: Shared Assessments Vendor Risk Management Maturity Model

Maturity Level	VRMMM High Level Program Categories							
	Program Governance (1)	Policies, Standards, Procedures (2)	Contract Development, Adherence and Management (3)	Vendor Risk Assessment Process (4)	Skills and Expertise (5)	Communication and Information Sharing (6)	Tools, Measurement and Analysis (7)	Monitoring and Review (8)
<b>0 – Start-up or no TPRM activity</b>	No formalized Third Party governance program	No formalized Third Party related policies, standards, and procedures	No formalized Third Party contract processes	No formalized vendor risk identification and analysis process	No formalized requirements for Third Party related skills and expertise	No formalized Third Party related communication and information sharing processes	No formal tools, measurement and analysis processes present	No formalized program monitoring and review processes
<b>1 – Initial visioning and ad hoc activity</b>	Need for Third Party program has been established; governance not yet fully defined	Policies, standards and procedures are not yet fully defined	Third Party contract policies / procedures are not yet fully defined	Vendor risk identification and analysis is ad hoc and processes are not yet fully defined	Some Third Party skills and expertise may be recognized but no formal placement program exists	Internal and external communications are ad hoc; program needs have been identified, but are not yet fully defined	Third Party related measurement and analysis is ad hoc and metrics are not yet fully defined	Monitoring and Review activities are ad hoc and processes are not yet fully defined
<b>2 – Approved road map and ad hoc activity</b>	Program governance is defined and approved, but is not fully in place	Policies, standards and procedures are defined and approved	Third Party related contract provisions are defined and approved	Third Party related risk identification and analytic criteria are established and approved	Current staff's Third Party skills and expertise are being identified and slotted to positions	Internal and external communications are still ad hoc, but formal communications and information sharing programs are identified and approved	Tools, measurement and analytic needs are identified and approved, but are not yet fully implemented	Internal and external Third Party monitoring and review needs are identified and approved
<b>3 – Defined and Established</b>	Approved governance program is established, but is not fully operational	Approved policies, programs and procedures are established, but not all fully operational	All contract provisions have been approved, but not all are fully operational	Approved Third Party analytic and risk identification processes are in place, but not all are fully operational	Skill sets and expertise are being appropriately deployed; any skill gaps have been identified	Formal internal and external communications and information sharing programs are established, but are not fully operational	Third Party related tools and analytics are established, but are not fully operational; not all applicable metrics are measured	Monitoring and review programs are defined and established, but are not yet fully operational; enforcement is lacking
<b>4 – Fully Implemented and operational</b>	Program governance is completely established and operational across the organization	Policies, standards and procedures are consistently applied across the enterprise and are externally benchmarked	Contract provisions are consistently deployed across the enterprise and are externally benchmarked	Risk identification and analysis is fully operational across the enterprise and is externally benchmarked	Required skill sets and expertise are optimally deployed	Communications and information sharing processes are fully functional, external outreach is present for benchmarking and other purposes	Third Party related tools and analytics are optimally deployed	All program related monitoring and compliance measures are in place and enforced
<b>5 – Continuous improvement</b>	Program governance represents best practice, and is regularly tested, measured and enhanced as needed	Policies, standards and procedures represent best practice, and are regularly measured, tested and enhanced as needed	Contract process is best practice, and is regularly evaluated and enhanced as needed	Vendor risk identification and analytics are best practice, and are regularly evaluated and enhanced as needed	Skills and expertise are best in class and enhanced as needed, new processes are routinely evaluated	Communications and information sharing processes are continuously evaluated and routinely enhanced; there is organizational visibility in industry associations; the organization actively promotes external outreach	Tools, measurement and analytics are automated and represent best practice. They are regularly evaluated and enhanced as needed	Monitoring and review processes are best practice, and are regularly evaluated at a real-time or near-real time interval, and enhanced as needed

## Appendix B: Recommendation to VRMMM Sub-Category Mappings

<b>Key Recommendation</b>	<b>VRMMM Sub-Categories Addressed</b>
<b>1. <u>Program Approval and Review</u></b>	1.2 Defined Program Objectives and Goals 1.5 Standards of Conduct 5.1 Roles and Responsibilities 8.4 Self-Assessment / Audit Readiness and Assurance
<b>2. <u>Cross-Functional TPRM Process Integration</u></b>	2.2 Vendor Inventory Requirements (pertains to the organization's vendor inventor) 2.3 Vendor Due Diligence Standards 2.4 Vendor Classification Operational Procedures 2.5 Contract Management Governance 2.6 Vendor Management Oversight Procedures 2.7 Vendor Termination or Exit Procedures 3.2 Criteria / Guidelines / Processes for Standard Contract Provisions 3.4 Management Oversight
<b>3. <u>Information Sharing and Reporting Procedures</u></b>	2.2 Vendor Inventory Requirements (pertains to the organization's vendor inventor) 2.3 Vendor Due Diligence Standards 2.4 Vendor Classification Operational Procedures 2.5 Contract Management Governance 2.6 Vendor Management Oversight Procedures 2.7 Vendor Termination or Exit Procedures 3.2 Criteria / Guidelines / Processes for Standard Contract Provisions 3.4 Management Oversight
<b>4. <u>Information Sharing and Reporting Procedures</u></b>	6.1 Vendor Risk Program Integration 6.2 Dashboards / Scorecards 6.3 Operational Management Reporting 6.4 Board and Executive Reporting. 6.5 Communication Protocols
<b>5. <u>IT TPRM Training and Resources</u></b>	4.1 Outsourcing Risk Assessment Process 4.2 Vendor Assessment and Classification 4.3 Vendor Assessment Operational Processes 4.5 Ongoing Vendor Risk Assessments 4.6 Process Automation 8.2 Monitoring Service Level Agreements and Performance 8.3 Potential Changes Due to Internal and External Environment 8.5 Controls Validation and / or Testing 8.6 Continuous Monitoring Program

## **Internal Audit Report**

---

### **Background**

The corporate Information Technology (IT) function within NiSource Corporate Services Company, a fully-owned subsidiary of NiSource Inc. (NiSource or the Company), is responsible for managing the lifecycle of technology assets, including asset identification, registration, steady-state operation, and decommissioning. Effective ongoing maintenance of the technology hardware asset repository is critical to managing cybersecurity risk. A broad array of hardware components comprise the inventory of technology assets that enable business services, operational activities and communications functions across the Company.

The NiSource IT team began standardizing technology operations using a service framework known as the Information Technology Infrastructure Library (ITIL) in late 2017. To facilitate alignment to ITIL, NiSource uses a market-leading cloud IT services platform, ServiceNow. The ServiceNow platform enables standardized hardware asset configuration management through its Configuration Management Database (CMDB). The NiSource IT organization relies on its primary third party IT service providers to manage technology hardware assets and associated information.

### **Audit Objective, Approach, and Coverage**

The objective of this risk-based audit was to provide an independent evaluation of the adequacy, effectiveness, and efficiency of processes and controls associated with maintaining complete and accurate hardware asset inventory records within ServiceNow. At the beginning of our audit, we completed a risk assessment and conducted detailed process assessments and transactional testing in high-risk areas. Because relevant contracts between NiSource and third party IT service providers were updated in November 2020, the review period for this assurance audit was December 2020 through February 2021.

During the audit, we specifically evaluated:

- Processes and critical performance indicators (CPIs) related to monitoring the completeness and accuracy of NiSource's end user computing and network device inventory
- Key processes, operations, and contractual documentation over hardware asset and configuration management
- IT hardware asset and configuration management lifecycle processes, including system integration aspects
- IT change management processes specific to IT hardware configuration/asset management

Data center support activities were being transitioned between services providers at the time of our audit. Therefore, we did not evaluate hardware asset management associated with NiSource data center operations. These activities will be evaluated during a future audit of data center operations. We also did not evaluate IT asset accounting processes as these processes will be evaluated during a future capital accounting audit.

### **Internal Audit Finding Ratings**

We assign ratings to audit findings based on the following scale (see the Internal Audit Finding Rating Scale in Appendix A):

"1" – Significant Improvement is Needed and Prompt Management Attention is Required

"2" – Improvement is Needed and Management Attention is Necessary

"3" – Some Improvement is Needed and Management Attention is Justified

"4" – Management Evaluation is Desirable

## **Internal Audit Conclusion and Summary of Observations**

We found that hardware asset inventory processes and controls related to the areas tested (as specified in the “Audit Objective, Approach, and Coverage” section of this report) were generally operating as intended. We did, however, identify one finding where management’s attention is necessary (Risk Rating 2) and one finding where management’s attention is justified (Risk Rating 3). In addition, we observed some less-significant items that were discussed with management during the course of the audit.

A summary of audit findings rated “1” through “3” follows (see details in the Internal Audit Findings Matrix in Appendix B):

- 1) **Network Device Inventory Accuracy and Completeness** (Rating 2)  
Accurate and complete hardware asset inventory records are imperative to managing cybersecurity risk. Per the contractual Service Level Agreement (SLA) between NiSource Inc. (NiSource or the Company) and Verizon Communications, Inc. (Verizon), technology asset additions, changes, or deletions should be transacted into the ServiceNow hardware asset register (CMDB) within two days. Verizon does not validate that network device additions, changes, or deletions are transacted into CMDB within two days. Therefore, NiSource does not have visibility to Verizon’s performance regarding this SLA component, which is relevant to monitoring the completeness and accuracy of network device asset inventory records.
- 2) **Data Governance Model Supporting Configuration Management Execution** (Rating 3)  
A formal CMDB data governance model has not been developed and operationalized, which could impair the effectiveness of managing the integrity of CMDB data and negatively impact hardware asset inventory monitoring activities.

## **Management’s Response**

IT recognizes the importance of having proper accounting of the deployed hardware assets and the detailed configuration items data that further identifies the attributes of the technology to both maintain and protect the systems that NiSource relies on to run the business. By adhering to ITIL processes and leveraging the ServiceNow platform, the team has an action plan to improve the accuracy and completeness of our Hardware Asset Management inventory. In parallel, the team will be re-establishing the governance model to enhance and improve the quality and completeness of the information attributes that accompany these assets. All action items will be completed by September 30, 2021.

The work to be done is an enhancement of the existing governance framework and data quality coupled with confirming the accountability and ownership of the information across the teams who manage and maintain these IT assets.

## **Internal Audit Follow Up**

Management has provided action plans for all findings with a rating of “1”, “2”, or “3”. We have reviewed management’s action plans and believe that the action plans will adequately address the findings identified in this audit. We will track the progress of resolution and will conduct follow-up testing for all rated “1” audit findings and a sample of rated “2” and rated “3” audit findings.

We would like to thank all personnel involved with this assessment for their cooperation and support throughout our review. If Internal Audit can be of further assistance, please contact us.

\*\*\*\*\* End of Internal Audit Report \*\*\*\*\*

**“1” Significant Improvement is Needed and Prompt Management Attention is Required**

- More than remote probability for damage to the Company’s reputation or brand and the impact to the enterprise could be substantial and rapidly realized
- More than remote probability for a non-compliance with laws/regulations and the impact to the enterprise could be substantial and rapidly realized
- Crucial foundational controls related to high-impact processes are inadequate or ineffective and the impact to the enterprise could be substantial and rapidly realized
- Repeat audit findings and the impact could be significant within the scope of the area being audited

**“2” Improvement is Needed and Management Attention is Necessary (target to reduce risk within 3 to 6 months)**

- More than remote probability for damage to the Company’s reputation or brand and the impact could be substantial within the scope of the audit
- More than remote probability for a non-compliance with laws/regulations and the impact could be substantial within the scope of the audit
- Foundational controls related are inadequate or ineffective and the impact could be substantial within the scope of the audit
- Controls are not adequate to prevent or detect fraud in a timely manner
- Transactional errors identified during audit testing are significant within the scope of the audit (based on value or number of erroneous transactions identified)
- Internal Policy is not adequate or is violated and the impact could be substantial within the scope of the audit

**“3” Some Improvement is Needed and Management Attention is Justified (target to reduce risk within 12 months)**

- Internal Policy is not adequate or is violated, but impact is limited and the overall system of controls is not significantly compromised
- Controls are not adequate to prevent erroneous transactions and errors could be more than immaterial within the scope of the audit
- Notable lost opportunity or inefficiency within the scope of the audit

**“4” – Management Evaluation is Desirable**

- Isolated exception with limited impact
- Lost opportunity or inefficiency, but impact is limited

**1) Network Device Inventory Accuracy and Completeness**

**Risk Rating: 2**

**Observation:**

Accurate and complete hardware asset inventory records are imperative to managing cybersecurity risk. Per the contractual Service Level Agreement (SLA) between NiSource Inc. (NiSource or the Company) and Verizon Communications, Inc. (Verizon), technology asset additions, changes, or deletions should be transacted into the ServiceNow hardware asset register (CMDB) within two days. Verizon does not validate that network device additions, changes, or deletions are transacted into CMDB within two days. Therefore, NiSource does not have visibility to Verizon's performance regarding this SLA component, which is relevant to monitoring the completeness and accuracy of network device asset inventory records.

Also, the contract between NiSource and Verizon requires that Verizon verify only a minimum of five percent of the total network device asset records on a monthly basis, which may not be sufficient in consideration of the cybersecurity risk that certain network asset types introduce to the network.

**Criteria:**

NiSource IT management: 1) establishes SLA agreements with vendors that require the vendors to execute formal processes to validate the accuracy and completeness of hardware (end-user computing and network devices) asset inventory records and 2) monitors that vendor processes are consistently managed per established SLA terms.

**Risk:**

Network component inventory is not updated in a timely manner, thereby leading to potential inaccurate device status reporting and/or device configuration errors that intensify cybersecurity risk to the organization.

**Management Action Plan:**

IT is in the process of transitioning its Network Managed Services from Verizon to Wipro effective July 14, 2021. SLAs agreed to by Wipro for network assets are consistent with the newly negotiated SLAs for data center and end-user devices, including removal of the 2 day processing period. This requires the Service Provider to add/remove the device within ServiceNow the day the device is provisioned or de-provisioned to keep the network asset inventory current.

IT will work with Wipro to expand the recorded hardware asset sample size to a more relevant and meaningful number of devices for network assets and CMDB records as part of monthly Infrastructure Critical Performance Indicators CPI-9 (Timeliness and Accuracy of CMDB Records) and CPI-10 (Timeliness and Accuracy of Asset Management Database Records).

**Responsible:**

Greg Skinner, VP-IT Infrastructure

**Resolution Date:**

9/30/21

**2) Data Governance Model Supporting Configuration Management Execution**

**Risk Rating: 3**

**Observation:**

Data in the Configuration Management Database (CMDB) is used to support IT hardware configuration management processes. Although the Company's ServiceNow Knowledge base indicates a CMDB data governance model and supporting change management alignment is required and should formally specify sanctioned configuration item types and classes (including configuration item attributes and the authoritative attribute sources being used for operating the CMDB), a formal CMDB data governance model has not been developed and operationalized. Also, current CMDB operational procedures do not formally define the configuration item attributes associated with sanctioned configuration item types nor the authoritative attribute sources being used for IT hardware asset management process execution.

**Criteria:**

A formal CMDB data governance model is defined and is operational. The CMDB data governance model should formally specify sanctioned configuration item types and classes, including definitive configuration item attributes and the authoritative attribute sources being used for operating the CMDB.

**Risk:**

Failure to adequately govern CMDB data could lead to CMDB data integrity issues (e.g., duplicate or missing entries) and negatively impact IT hardware asset monitoring activities.

**Management Action Plan:**

By leveraging the governance recommendations from the KPMG CMDB project NiSource completed in 2020, IT will engage CMDB configuration item owners to update and operationalize the governance model.

As part of this effort, the team will develop a full remediation plan to address the gaps in current configuration item attributes, classes and procedures. Subsequently the team will execute a remediation phase to clean up the configuration items and address the gaps identified.

The CMDB data governance model will include an ongoing and more frequent formal review of configuration item data. The opportunity to synergize this process with the broader NiSource Data Governance model will be explored as that model is developed.

**Responsible:**

Greg Skinner, VP-IT Infrastructure

**Resolution Date:**

9/30/21

## **Internal Audit Report**

---

### **Background**

NiSource, Inc. (NiSource or the Company) has six affiliated gas distribution companies that own and operate over 50,000 miles of transmission and distribution mainline pipelines distributed across six states. Over 31,000 valves within the Company's mainline pipelines have been designated as critical and are essential to ensuring the pressure in downstream pipeline systems can be controlled, or in case of an emergency, completely shut.

Various departments are responsible for ensuring critical valves are properly designed, installed, inspected, and maintained per Pipeline and Hazardous Materials Safety Administration (PHMSA) and company requirements. Field Engineering completes pipeline design, designates critical valves, assigns alternates for inoperable critical valves, and identifies when a critical valve will be retired and/or replaced as part of planned changes to the pipeline systems. Field Operations and System Operations perform inspections of critical valves. Field Operations, System Operations and Construction teams complete maintenance or replacement activities. Each of the various departments are also responsible for creating or updating records that capture key information about critical valves which is essential to ensuring valves are locatable and serviceable going forward.

### **Audit Objective, Approach, and Coverage**

The objective of this risk-based internal audit was to provide an independent evaluation of the adequacy, effectiveness, and efficiency of controls associated with critical valve inspection and remediation processes. At the beginning of our audit, we completed a risk assessment, and we conducted detailed process assessments, data analytics, and sample-based transactional testing in higher-risk areas. The review period for this audit was June 2020 through January 2021.

During the audit, we specifically evaluated:

- Critical value records management
- Critical valve inspection and remediation processes
- Applicable operator qualification processes

We did not evaluate pipeline design processes specific to critical valves as the Engineering Department is currently undergoing an initiative to standardize pipeline design processes associated with critical valve isolation zones.

### **Internal Audit Finding Ratings**

We assign ratings to audit findings based on the following scale (see the Internal Audit Finding Rating Scale in Appendix A):

"1" – Significant Improvement is Needed and Prompt Management Attention is Required

"2" – Improvement is Needed and Management Attention is Necessary

"3" – Some Improvement is Needed and Management Attention is Justified

"4" – Management Evaluation is Desirable

### **Internal Audit Conclusion and Summary of Observations**

A critical valve process improvement team was established during 2020. This cross-affiliate team is working to identify opportunities to enhance safety and save costs, with a particular focus on critical valves that are repeatedly identified as inoperable.

Critical valve data is manually entered or recorded by various people distributed across multiple functions and is maintained in multiple systems that have evolved over time leading to significant data inconsistencies. Also, processes for the Columbia Distribution Companies (CDC) and Northern Indiana Public Service Company (NIPSCO) are inconsistent. We recommend that the critical valve initiative team emphasize critical valve data improvement, and particularly consider oversight and monitoring controls that will support emergency response activities and facilitate policy adherence.

Overall, we noted that critical valve processes can be improved. We identified one finding associated with critical valve processes that may impact emergency response requiring management's prompt attention (Rating 1). We also identified four findings where management's attention is necessary (Rating 2). In addition, we observed some less-significant items that were discussed with management during the course of the audit.

A summary of audit findings rated "1" through "3" follows (see the Internal Audit Findings Matrix in Appendix B):

- 1) **Critical Valve – Emergency Response** (Rating 1)  
Critical valve remediation processes across CDC and NIPSCO Gas are inconsistent and are not sufficient to ensure that information used to make decisions during emergency response is accurate, specifically that valves designated as critical are operable. In addition, critical valve data elements essential for emergency response and compliance have not been formally defined, and data existence and accuracy has not been verified. We analyzed critical valve data and identified missing or inaccurate data elements.
- 2) **Critical Valve Records Management** (Rating 2)  
Critical valve records are maintained in several information systems and paper files. Critical valve records have not been reconciled. As a result, a complete and accurate population of critical valves with associated inspection records is not available.
- 3) **Work Management System Job Order System Programming – CDC ONLY** (Rating 2)  
The work management system used by the CDCs does not prevent critical valve remediation job orders from being manually voided and monitoring controls are not sufficient to identify job orders that have been incorrectly voided. As a result, inoperable critical valves may not be timely remediated.
- 4) **Non-Compliance with Inspection Requirements** (Rating 2)  
Processes to track newly-installed valves that have been placed in service but are not yet recorded in the work management system are not formalized, resulting in some valves not being inspected within the required timeframe.
- 5) **Operator Qualification Non-Compliance – CDC ONLY** (Rating 2)  
Procedures and controls associated with maintaining and monitoring required operator qualifications can be improved to ensure that work is performed by a technician who is appropriately qualified.

### **Management's Response**

Management agrees with the findings noted as a result of this audit, and we have provided actions plans to address the risk identified. Detailed action plans are included in Appendix B. Management is undertaking immediate actions to address the highest risk finding related to ensuring critical valve remediation processes and records support emergency response. The remaining key mitigation steps will be completed by the end of 2021.

**Internal Audit Follow Up**

Management has provided action plans for all findings with a rating of “1”, “2”, or “3”. We have reviewed management’s action plans and believe that the action plans will adequately address the findings identified in this audit. We will track the progress of resolution and will conduct follow-up testing for all rated “1” audit findings and a sample of rated “2” and rated “3” audit findings.

We would like to thank all personnel involved with this assessment for their cooperation and support throughout our review. If Internal Audit can be of further assistance, please contact us.

\*\*\*\*\* End of Internal Audit Report \*\*\*\*\*

**“1” Significant Improvement is Needed and Prompt Management Attention is Required**

- More than remote probability for damage to the Company’s reputation or brand and the impact to the enterprise could be substantial and rapidly realized
- More than remote probability for a non-compliance with laws/regulations and the impact to the enterprise could be substantial and rapidly realized
- Crucial foundational controls related to high-impact processes are inadequate or ineffective and the impact to the enterprise could be substantial and rapidly realized
- Repeat audit findings and the impact could be significant within the scope of the area being audited

**“2” Improvement is Needed and Management Attention is Necessary (target to reduce risk within 3 to 6 months)**

- More than remote probability for damage to the Company’s reputation or brand and the impact could be substantial within the scope of the audit
- More than remote probability for a non-compliance with laws/regulations and the impact could be substantial within the scope of the audit
- Foundational controls related are inadequate or ineffective and the impact could be substantial within the scope of the audit

**“3” Some Improvement is Needed and Management Attention is Justified (target to reduce risk within 12 months)**

- Internal Policy is not adequate or is violated, but impact is limited and the overall system of controls is not significantly compromised
- Controls are not adequate to prevent erroneous transactions and errors could be more than immaterial within the scope of the audit
- Notable lost opportunity or inefficiency within the scope of the audit

**“4” – Management Evaluation is Desirable**

- Isolated exception with limited impact
- Lost opportunity or inefficiency, but impact is limited

<p><b>1) <u>Critical Valve - Emergency Response</u></b></p>	<p><b>Rating: 1</b></p>
<p><b><u>Observation:</u></b>          Critical valve remediation processes across Columbia Distribution Companies (CDC) and Northern Indiana Public Service Company (NIPSCO) Gas are inconsistent and are not sufficient to ensure that information used to make decisions during emergency response is accurate, specifically that valves designated as critical are operable. In addition, critical valve data elements essential for emergency response and compliance have not been formally defined and data existence and accuracy has not been verified. We analyzed critical valve data and identified missing or inaccurate data elements.</p> <p>Due to the design of the CDC remediation procedures, valves designated as critical and found to be inoperable are not promptly remediated or declassified with an alternate critical valve identified. For 2020, the average number of days to remediate an inoperable critical valve totaled 36 days across the CDCs. At the time of our audit, the number of un-remediated inoperable critical valves totaled 185 across the CDCs.</p> <p>While NIPSCO Gas procedures require designation of an alternate valve within three working days of a critical valve being identified as inoperable, the procedures do not require inoperable critical valves to be declassified and remediation may not be prompt.</p> <p><b><u>Criteria:</u></b>          Controls are sufficient to ensure that critical valves are operable and that emergency response decisions are based on accurate and complete critical valve information; specifically 1) critical valve data elements essential for emergency response are formally defined and assessed for completeness and accuracy; 2) updates to critical valve data elements, including changes necessary to correct discrepancies between data elements and actual field conditions, are promptly completed; and 3) personnel responsible for emergency response have access to essential critical valve data elements to make informed decisions.</p>	<p><b><u>Management Action Plan:</u></b>          In response to the findings and observations of Internal Audit, NiSource Gas Distribution Operations will:</p> <ul style="list-style-type: none"> <li>• Immediately work to develop and implement a process to identify alternative critical valve assignments and associated records updates within three days of any critical valve being determined to be inoperable</li> <li>• Identify critical valve data elements essential for emergency response and compliance and assess existing data elements for gaps</li> <li>• Create a process to ensure essential data elements for emergency response and compliance are accurately and completely captured going forward</li> <li>• Develop quality assurance controls to ensure essential critical valve data is complete and accurate</li> <li>• Develop a process to update critical valve designation (e.g. operable or inoperable) in the Geographic Information System (GIS) when an inoperable valve is taken out of service for repair or replacement or when returned to operable status</li> </ul> <p><b><u>Responsible:</u></b>          Curtis Anstead, Vice President Gas Operations - Columbia Gas of Pennsylvania and Maryland</p> <p><b><u>Resolution Date:</u></b>          Expectations for the implementation of the actions above are as follows:</p> <ul style="list-style-type: none"> <li>• The development and implementation of a process which will identify alternative critical valve assignments and associated records updates within three days of any critical valve being determined to</li> </ul>

<p><b><u>Risk:</u></b>        Inoperable critical valves increase the probability of negative outcomes resulting from an emergency event.</p>	<p>be inoperable is expected to require 30 to 60 days for full implementation</p> <ul style="list-style-type: none"> <li>The remaining action items are expected to be complete by the end of 2021</li> </ul>
<p><b>2) <u>Critical Valves Records Management</u></b> <span style="float: right;"><b><u>Rating: 2</u></b></span></p>	
<p><b><u>Observation:</u></b>        Critical valve records are maintained in several information systems and paper files. Critical valve records have not been reconciled. As a result, a complete and accurate population of critical valves with associated inspection records is not available.</p> <p>We analyzed critical valve records and noted that records between GIS and the work management systems is not clearly correlated and that there are significant discrepancies in the population of the mapped valve records versus the valve inspection and maintenance records.</p> <p><b><u>Criteria:</u></b>        Controls are sufficient to ensure that critical valve records are complete and accurate; specifically 1) sources of critical valve data are identified and records are reconciled and validated across the multiple sources; 2) data change management processes are formalized and sufficient to ensure data elements in different sources are appropriately correlated and consistent; and 3) updates to records are prompt and accurate.</p> <p><b><u>Risk:</u></b>        Incomplete or inaccurate critical valve records may delay identifying and locating critical valves or negatively impact the execution and evidencing of required compliance activities.</p>	<p><b><u>Management Action Plan:</u></b>        In response to the findings and observations of Internal Audit, NiSource Gas Distribution Operations will:</p> <ul style="list-style-type: none"> <li>Complete an initial reconciliation of valves utilizing the valve number recorded in GIS and the applicable work management system</li> <li>Develop a quality assurance/quality control process with the Quality Management System team to reconcile and validate data fields within critical valve manual forms, the applicable work management system and GIS, and establish a plan to identify and capture any missing information</li> <li>Develop and implement controls to ensure critical valve records are accurate and complete going forward</li> </ul> <p><b><u>Responsible:</u></b>        Curtis Anstead, Vice President Gas Operations - Columbia Gas of Pennsylvania and Maryland</p> <p><b><u>Resolution Date:</u></b>        The action items above are expected to be completed by the end of 2021.</p>
<p><b>3) <u>Work Management System Job Order System Programming – Columbia Gas Distribution Companies</u></b> <span style="float: right;"><b><u>Rating: 2</u></b></span></p>	
<p><b><u>Observation:</u></b>        Critical valve remediation job orders are systematically created as valves are determined to be inoperable during a critical valve inspection. The work management system used by the CDCs does</p>	<p><b><u>Management Action Plan:</u></b>        In response to the findings and observations of Internal Audit, NiSource Gas Distribution Operations will:</p>

<p>not prevent critical valve remediation job orders from being manually voided. Also, the system does not prevent a job order from being voided without a reason for the void being captured and monitoring controls are not sufficient to identify critical valve remediation job orders that have been incorrectly voided.</p> <p>We analyzed manually voided critical valve remediation job orders and identified three job orders (~21% of the population) that were incorrectly voided, which resulted in inoperable critical valves not being timely remediated or identifying the appropriate alternate.</p> <p><b>Criteria:</b>        Management validates that system programming is functioning as intended and monitoring processes have been established to detect when users do not follow established processes when completing manual activities within the system.</p> <p><b>Risk:</b>        System controls established within the work management system can be manually overridden.</p>	<ul style="list-style-type: none"> <li>• Develop a COGNOS report to ensure all critical valve facilities have a Repetitive Task established</li> <li>• Develop a process to ensure valid Repetitive Tasks and Further Action Required job orders are not voided</li> <li>• Implement WMS system programming to require the following fields to be completed before a job order could be voided: name of the person voiding a job order, the date and reason for voiding</li> </ul> <p><b>Responsible:</b>        Curtis Anstead, Vice President Gas Operations - Columbia Gas of Pennsylvania and Maryland</p> <p><b>Resolution Date:</b>        All action items above are expected to be completed by the end of 2021.</p>
<p><b>4) <u>Non-Compliance with Inspection Requirements</u></b> <span style="float: right;"><b>Rating: 2</b></span></p>	
<p><b>Observation:</b>        Failure to inspect critical valves within the 15 month period as required per Pipeline and Hazardous Material Safety Administration's (PHMSA) guidelines could result in inoperable conditions of critical valves not being identified, which increases the probability of negative outcomes resulting from an emergency event.</p> <p>Processes, including definition of key roles and responsibilities, to track newly installed valves that have been placed in service but are not yet recorded in the work management system are not formalized. We reviewed the inspection records for all critical valves recorded in the applicable work management system and identified eight critical valves were not inspected per requirements due to the job order closeout process being delayed for at least 15 months after the critical valves were placed in service.</p>	<p><b>Management Action Plan:</b>        In response to the findings and observations of Internal Audit, NiSource Gas Distribution Operations will formalize a valve initiation process by:</p> <ul style="list-style-type: none"> <li>• Implementing additional system programming in the applicable work management system to allow the collection of additional valve metadata which will support reporting to identify valves placed in service</li> <li>• Developing a process to identify when critical valves are installed on non-design capital job orders (valves on less than 3' lines in business districts)</li> <li>• Developing reporting/monitoring processes to ensure compliance</li> </ul>

<p><b><u>Criteria:</u></b>  Controls to ensure compliance with PHMSA requirements are sufficient to ensure timely inspection and identification of inoperable valves; specifically 1) the inspection cycle is tracked from the date of installation or a change to a critical designation; 2) the date and results of inspection are documented and maintained to support compliance.</p> <p><b><u>Risk:</u></b>  Newly installed critical valves are not properly inspected resulting in the failure to identify that a valve is inoperable, which increases the probability of negative outcomes resulting from an emergency event. Also, potential noncompliance with regulatory requirements.</p>	<p><b><u>Responsible:</u></b>  Curtis Anstead, Vice President Gas Operations - Columbia Gas of Pennsylvania and Maryland</p> <p><b><u>Resolution Date:</u></b>  All action items above are expected to be completed by the end of 2021, with implementation of newly developed processes occurring after year end.</p>
<p><b>5) <u>Operator Qualification Non-Compliance – Columbia Gas Distribution Companies</u></b> <span style="float: right;"><b><u>Rating: 2</u></b></span></p>	
<p><b><u>Observation:</u></b>  Controls to ensure that work is performed by a technician who is properly qualified are distributed and primarily rely on each individual technician to stop work when they are not qualified. While certain operator qualification verification controls are available in some areas and related to specific activities, these controls can be bypassed and are not available in all areas and for all activities. In addition, monitoring controls are not sufficient to timely identify instances where work was performed by a technician that was not properly qualified.</p> <p>We evaluated the operator qualifications of personnel performing the annual critical valve inspection in 2020 as well as any subsequent remediation work and identified 159 instances (associated with nine employees performing work in Ohio, Virginia, and Kentucky) where this work was performed by a technician that was not properly qualified.</p> <p><b><u>Criteria:</u></b>  Controls are sufficient to ensure that work is only performed by a technician that is properly qualified; specifically: 1) work tasks performed are clearly correlated with the necessary operator qualifications; 2) technicians formally validate proper qualification</p>	<p><b><u>Management Action Plan:</u></b>  In response to the findings and observations of Internal Audit, NiSource Gas Distribution Operations will:</p> <ul style="list-style-type: none"> <li>• Assign a qualified employee to re-perform the inspections or job orders completed by non-qualified employees in 2020</li> <li>• Utilize the Quality Management System Gas Operations team to conduct in-field assessments during 2021 to ensure field personnel are adhering to the daily acknowledgement process, Quick Response (QR) OQ card process and operator qualification requirements</li> </ul> <p><b><u>Responsible:</u></b>  Curtis Anstead, Vice President Gas Operations - Columbia Gas of Pennsylvania and Maryland</p> <p><b><u>Resolution Date:</u></b>  All action items above are expected to be completed by the end of 2021.</p>

prior to performing tasks; 3) Operations supervisors monitor that operator qualifications are kept current and timely address delinquencies; and 4) a formal process is structured to monitor for tasks completed by technicians that were not properly qualified to perform the task.

**Risk:**

Inspections and remediation work performed by unqualified personnel can increase the probability of operational errors and safety incidents and re-performance of work is inefficient and costly.

## **Internal Audit Report**

---

### **Background**

NiSource Inc. (NiSource or the Company) has six affiliated gas distribution companies that operate and maintain over three million metered locations distributed across six states. The NiSource Gas Distribution Meter Shop is responsible for procuring, storing, quality control testing and refurbishing various sizes and kinds of meters (e.g. diaphragm, rotary, turbine) on behalf of the six gas distribution companies. During 2020, approximately 70,000 additional meters were placed into service, utilizing both new meters purchased and meters refurbished by the Meter Shop Department. The Meter Shop team is also responsible for sample testing in-service meters to proactively identify issues with meter populations and align with certain state regulatory requirements.

The Meter Shop team operates two locations: one in Columbus, Ohio, which serves all five of the Columbia Distribution Companies, and one in Gary, Indiana, which serves Northern Indiana Public Service Company (NIPSCO) Gas. In April 2020, the Meter Shop obtained International Standards Order 9001 certification, which is awarded based on the Company's ability to provide products and services that meet customer and regulatory requirements and demonstrate continuous improvement. The Meter Shop is subject to periodic surveillance audits and a full re-certification review every three years.

### **Audit Objective, Approach, and Coverage**

This internal audit was conducted to provide an independent evaluation of the adequacy, effectiveness and efficiency of the controls associated with Meter Shop operations. At the beginning of our audit, we completed a risk assessment, and we conducted detailed process assessments, data analytics and sample-based transactional testing in higher-risk areas. The review period for this audit was January 1, 2020 – June 30, 2021.

During the audit, we specifically evaluated:

- Adherence to Meter Shop policies and procedures, with a particular focus on meter procurement, quality control testing, and sampling
- Alignment of sampling program execution with state-specific regulatory requirements
- Execution of Meter Shop safety standards, with a particular focus on those impacting employee health and safety
- Alignment with International Standards Order (ISO) 9001 requirements
- Associated inventory tracking and accounting processes

We did not evaluate the testing processes for rotary and turbine meters as they are executed by the System Operations Departments of the individual gas distribution companies and not by the Meter Shop. These processes will be subject to testing within the general process controls audits specific to each gas distribution company.

### **Internal Audit Finding Ratings**

We assign ratings to audit findings based on the following scale (see the Internal Audit Finding Rating Scale in Appendix A):

“1” – Significant Improvement is Needed and Prompt Management Attention is Required

“2” – Improvement is Needed and Management Attention is Necessary

“3” – Some Improvement is Needed and Management Attention is Justified

“4” – Management Evaluation is Desirable

### **Internal Audit Conclusion and Summary of Observations**

During the course of our review, we found that processes and procedures are in place to ensure safe and organized working conditions for the Meter Shop employees. We further noted that the recent enhancements to policies and procedures outlining key Meter Shop processes enriches the safety culture, promotes consistency and facilitates alignment with ISO 9001 requirements. Finally, execution of procurement and quality control activities is sufficient to ensure an adequate supply of meters for the gas distribution companies and meter inventory appears to be properly recorded and tracked within the applicable systems of record.

We did, however, identify three findings related to sampling programs and Company Gas Standards where management's attention is justified (Rating 3). In addition, we observed some less-significant items that were discussed with management during the course of the audit.

A summary of audit findings rated "1" through "3" follows (see the Internal Audit Findings Matrix in Appendix B):

- 1) **Sampling Program Requirements – Columbia Gas of Pennsylvania** (Rating 3)  
Columbia Gas of Pennsylvania has not established adequate monitoring processes to ensure compliance with state mandated meter sampling requirements, specifically ensuring sample sizes are adequate and required follow up actions for identified failures in meter families are performed.
- 2) **Sampling Program Requirements – Columbia Gas of Maryland** (Rating 3)  
The total meter population submitted to the Maryland Public Service Commission (PSC) in the meter sampling program filings since the mid-2000s has included the meter population from Columbia Gas of Virginia in addition to the Columbia Gas of Maryland population. While Columbia Gas of Maryland Regulatory personnel believe this to be the preferred and approved practice, the Company did not maintain formal guidance from the Maryland PSC. As a result, we were unable to validate that the Columbia Gas of Maryland meter sampling methodology is in compliance with Maryland PSC requirements.
- 3) **Periodic Review of Gas Standards** (Rating 3)  
NiSource Gas Standards are not formally reviewed on a periodic basis. As a result, existing NiSource Gas Standards covering various processes related to meters (e.g. installation, operation, maintenance, records and accounting) have not been recently reviewed or updated and reference outdated or non-applicable operational processes, creating the potential for confusion and inconsistency in execution of procedures.

### **Management's Response**

Management agrees with the findings noted as a result of this audit, and we have provided actions plans to address the risk identified. Detailed action plans are included in Appendix B. The key mitigation steps will be completed by July of 2022.

### **Internal Audit Follow Up**

Management has provided action plans for all findings with a rating of "1", "2", or "3". We have reviewed management's action plans and believe that the action plans will adequately address the findings identified in this audit. We will track the progress of resolution and will conduct follow-up testing for all rated "1" audit findings and a sample of rated "2" and rated "3" audit findings.

We would like to thank all personnel involved with this assessment for their cooperation and support throughout our review. If Internal Audit can be of further assistance, please contact us.

\*\*\*\*\* End of Internal Audit Report \*\*\*\*\*

**“1” Significant Improvement is Needed and Prompt Management Attention is Required**

- More than remote probability for damage to the Company’s reputation or brand and the impact to the enterprise could be substantial and rapidly realized
- More than remote probability for a non-compliance with laws/regulations and the impact to the enterprise could be substantial and rapidly realized
- Crucial foundational controls related to high-impact processes are inadequate or ineffective and the impact to the enterprise could be substantial and rapidly realized
- Repeat audit findings and the impact could be significant within the scope of the area being audited

**“2” Improvement is Needed and Management Attention is Necessary (target to reduce risk within 3 to 6 months)**

- More than remote probability for damage to the Company’s reputation or brand and the impact could be substantial within the scope of the audit
- More than remote probability for a non-compliance with laws/regulations and the impact could be substantial within the scope of the audit
- Foundational controls related are inadequate or ineffective and the impact could be substantial within the scope of the audit
- Controls are not adequate to prevent or detect fraud in a timely manner
- Transactional errors identified during audit testing are significant within the scope of the audit (based on value or number of erroneous transactions identified)
- Internal Policy is not adequate or is violated and the impact could be substantial within the scope of the audit

**“3” Some Improvement is Needed and Management Attention is Justified (target to reduce risk within 12 months)**

- Internal Policy is not adequate or is violated, but impact is limited and the overall system of controls is not significantly compromised
- Controls are not adequate to prevent erroneous transactions and errors could be more than immaterial within the scope of the audit
- Notable lost opportunity or inefficiency within the scope of the audit

**“4” – Management Evaluation is Desirable**

- Isolated exception with limited impact
- Lost opportunity or inefficiency, but impact is limited

**1) Sampling Program Requirements – Columbia Gas of Pennsylvania**

**Rating: 3**

**Observation:**

Monitoring processes to ensure Columbia Gas of Pennsylvania complies with state mandated meter sampling requirements are not sufficient. We specifically noted:

- A subgroup (based on manufacturer) of Class A meters had an error rate in 2020 above the acceptable threshold established in Pennsylvania state code and a corrective action plan has not been established to ensure the meter subgroup will be pulled from the field within the timeframe required
- The number of meters sampled during 2020 for Class B and C meters was insufficient and did not align with the prescribed sampling methodology; while results of the sampling program were provided to the Pennsylvania Public Utility Commission, a formal waiver was not filed

**Criteria:**

Controls are sufficient to ensure that sampling program requirements are fulfilled; specifically 1) sample sizes are calculated in accordance with prescribed sampling methodologies; 2) sample testing is properly conducted and recorded; and 3) results of the sample testing are reviewed and corrective actions are taken when necessary.

**Risk:**

Improperly executed meter sampling programs may result in noncompliance with regulatory requirements and the inability to proactively address defective or faulty meters, which could impact the Company's ability to accurately bill customers.

**Management Action Plan:**

Meter Operations in collaboration with the Pennsylvania Compliance and Operations has established a formal process to address the reporting, communication and execution of the meter sampling program. The five step process is outlined as follows:

- The Meter Shop Operations Manager will provide a monthly report to the Pennsylvania Compliance Manager, Planners and the Vice President of Pennsylvania Operations outlining the meter sampling detail that shall be executed by field operations
- The Vice President of Pennsylvania Operations will provide direction to field leaders and planning leaders to ensure the work is assigned and executed in a timely fashion
- The Vice President of Pennsylvania Operations will ensure the meters are returned to the Columbus Meter shop in a timely manner to meet sampling requirements
- The Pennsylvania Compliance Manager is responsible for the oversight of the meter sampling program in which monthly check points and documentation will be kept to ensure compliance
- Any and all reporting required of the Commission shall be reviewed by the Pennsylvania Compliance Manager and the Vice President of Pennsylvania Operations prior to submission to ensure alignment of the process and all parties are informed

The aforementioned process steps will mitigate risk to execute the meter sampling program. The Vice President of Pennsylvania Operations has approved this process.

	<p><b><u>Responsible:</u></b>          Richard Burke, Columbia Gas of Pennsylvania and Columbia Gas of Maryland Operations Compliance Manager          Karima Hasan Bey, Fleet Warehouse &amp; Meter Shop Director</p> <p><b><u>Resolution Date:</u></b>          The process will be implemented in October of 2021.</p>
<p><b>2) <u>Sampling Program Requirements - Columbia Gas of Maryland</u></b> <span style="float: right;"><b><u>Rating: 3</u></b></span></p>	
<p><b><u>Observation:</u></b>          The total meter population submitted to the Maryland Public Service Commission (PSC) in the meter sampling program filings since the mid-2000s has included the meter population from Columbia Gas of Virginia in addition to the Columbia Gas of Maryland population. While Columbia Gas of Maryland Regulatory personnel believe this to be the preferred and approved practice, the Company did not maintain formal guidance from the Maryland PSC. As a result, we were unable to validate that the Columbia Gas of Maryland meter sampling methodology is in compliance with Maryland PSC requirements.</p> <p><b><u>Criteria:</u></b>          Compliance requirements are clearly defined and supported within applicable regulations or formal Commission guidance and waivers. The Company maintains support to demonstrate compliance with regulatory requirements.</p> <p><b><u>Risk:</u></b>          Inaccurate filings with regulatory agencies may result in noncompliance with regulatory requirements and a negative impact to the Company's reputation.</p>	<p><b><u>Management Action Plan:</u></b>          A letter will be sent to the Public Service Commission of Maryland asking for confirmation of the appropriate method to calculate meter populations for the State of Maryland's Meter Sampling Program.</p> <p><b><u>Responsible:</u></b>          Richard Burke, Columbia Gas of Pennsylvania and Columbia Gas of Maryland Operations Compliance Manager          Karima Hasan Bey, Fleet Warehouse &amp; Meter Shop Director</p> <p><b><u>Resolution Date:</u></b>          The letter will be sent by November 30, 2021 asking for a reply by December 31, 2021.</p>
<p><b>3) <u>Periodic Review of Gas Standards</u></b> <span style="float: right;"><b><u>Rating: 3</u></b></span></p>	
<p><b><u>Observation:</u></b>          All NiSource Gas Standards are not formally reviewed on a periodic basis. As a result, existing NiSource Gas Standards covering</p>	<p><b><u>Management Action Plan:</u></b>          The Gas Standards Department processes requests for changes to standards with a SharePoint application called the Standards Evaluation</p>

<p>various processes related to meters (e.g. installation, operation, maintenance, records and accounting) have not been recently reviewed or updated and reference outdated or non-applicable operational processes, creating the potential for confusion and inconsistency in execution of procedures.</p> <p><b><u>Criteria:</u></b>        Company Gas Standards accurately define roles and responsibilities, outline required and current processes and procedures and identify the necessary records to be created and retained.</p> <p><b><u>Risk:</u></b>        Meter Shop operational procedures may not be executed correctly and consistently if Gas Standards are outdated.</p>	<p>and Approval System (SEAS). In the revision process, Gas Standards are reviewed by the applicable Subject Matter Representatives (SMR) Team(s), including Subject Matter Experts if needed, and assigned Gas Standards Staff Members.</p> <p>A review of the gas standards related to the Meter Shop and meters have identified 30 standards that have dates greater than five years old.</p> <p>These standards will be added to SEAS, assigned to a Standards Team Member(s) and reviewed by SMRs to determine applicability for today's operating expectations with the goal of revising, reaffirming, or cancelling the standard.</p> <p>Additionally, prior to this audit, the periodic maintenance of standards was identified and discussed as part of the Lloyd's Registry process to seek certification of API 1173 <i>Pipeline Safety Management Systems</i>. Gas Standards Management is currently developing a formal procedure titled "Periodic Maintenance of Gas Standards" which will address Internal Audit's observations and support certification of API 1173 Pipeline Safety Management Systems.</p> <p><b><u>Responsible:</u></b>        Eric Belle, VP Engineering &amp; Gas Standards</p> <p><b><u>Resolution Date:</u></b>        As part of the "Periodic Maintenance of Gas Standards" procedure, the 30 standards related to the Meter Shop and meters are planned to be evaluated for revision, reaffirmation, or cancellation by July 31, 2022.</p>
<p><b>4) <u>Access Validation Reviews - Maximo Application</u></b> <span style="float: right;"><b><u>Rating: 4</u></b></span></p>	
<p><b><u>Observation:</u></b>        The NIPSCO Gas meter inventory information is maintained in the Maximo application. Prior to the time of the audit, Maximo user access was not periodically reviewed; and we identified three instances where access to the meter inventory information was not properly removed when employees left NiSource or transferred roles. The incorrect access identified was corrected during the course of the audit.</p>	<p><b><u>Management Action Plan:</u></b>        A management response is not requested. Subsequent to our testing, the Maximo application was on-boarded into the SailPoint IdentityIQ access management application, which will result in automatic removal of access when employees leave NiSource or will initiate an access review/confirmation process when an employee changes roles or organizational structure within the Company. However, Internal Audit recommends that Management ensure that access to higher-risk functions</p>

<p><b>Criteria:</b>          Periodic access reviews are conducted by employees' direct supervisors as well as by the business data owner to ensure users with access to perform changes in the application are valid and authorized.</p> <p><b>Risk:</b>          Potential for inappropriate access to applications and data to result in unauthorized changes to business data.</p>	<p>and data is periodically reviewed by business data owners to ensure access has been properly maintained and is appropriate.</p>
<p><b>5) <u>Enhancement of Gas Meter Shop Department Policy and Procedures</u></b></p>	
<p><b>Observation:</b>          Some documentation related to key Meter Shop processes or activities is not sufficient to ensure execution consistency and enable effective knowledge transfer in the event of change; specifically:</p> <ul style="list-style-type: none"> <li>• Documentation evidencing how the COGNOS system generated report utilized by the Meter Shop to determine the results of the NIPSCO Gas meter sampling program aligns with the Indiana Administrative Code is not formalized</li> <li>• A limited number of employees currently know how to generate custom reports from the Query Management Facility (QMF) application, which are utilized to support compliance with sampling program requirements for the Columbia Gas Companies, and detailed procedures are not formalized</li> <li>• Roles and responsibilities regarding inspection and testing of rotary and turbine meters, which differ from other meter types and are not executed by the Meter Shop, are not formally documented</li> <li>• The Meter Shop policies do not clarify the differences in the quality control testing sampling methodologies utilized by NIPSCO Gas and the Columbia companies</li> </ul>	<p style="text-align: right;"><b>Rating: 4</b></p> <p><b>Management Action Plan:</b>          A management response is not requested. However, Internal Audit recommends Meter Shop management expand upon documented policies and procedures to enhance consistency and clarity and better enable knowledge transfer in the event of change.</p>

**Criteria:**

Policies and procedures clearly define roles and responsibilities, provide appropriate guidance on objectives and expected outcomes, identify acceptable exceptions to requirements, and define the necessary records to be created and retained.

**Risk:**

Existing policies and procedures may not be sufficient to support adherence to key Meter Shop processes and controls.

Issue Date: November 9, 2021

**Internal Audit Report**

## **Background**

In October of 2020, NiSource Inc. (NiSource or the Company) initiated an internal, multi-year enterprise transformation effort referred to as NiSource Next. The program was initiated to examine and improve aspects of the way NiSource does business, with an intent to enhance the organization's commitment to safety and heighten focus on operational rigor and continuous improvement. As of November 2021, the NiSource Next program included eight focus areas, each with key initiatives emphasizing transformational changes in multiple segments of NiSource's operating and support functions.

To effectively govern the NiSource Next program effort, NiSource has established a dedicated management structure consisting of a Transformation Steering Committee, Safety and Risk Committee and a Transformation Management Office. The Transformation Management Office, which maintains responsibility for NiSource Next program risk management activities, includes a Safety and Risk team. The Safety and Risk team facilitates risk management practices and program controls, including the following: 1) risk identification and risk mitigation action plans by focus area, 2) on-going risk mitigation status monitoring and 3) program status reporting to the Transformation and Safety and Risk Committees.

## **Audit Objective, Approach, and Coverage**

The objective of this risk-based audit was to provide an independent evaluation of the adequacy, effectiveness, and efficiency of processes and controls associated with risk management activities related to supporting the NiSource Next program. We conducted detailed process assessments and transactional testing in the highest-risk areas. The audit review period was September 2020 through August 2021.

During the audit, we specifically evaluated:

- The NiSource Next program risk management governance structure and engagement of relevant stakeholders
- Processes and key deliverables related to NiSource Next program risk management activities, including risk and mitigation identification, assessment, approval, monitoring and closure

## **Internal Audit Finding Ratings**

We assign ratings to audit findings based on the following scale (see the Internal Audit Finding Rating Scale in Appendix A):

"1" – Significant Improvement is Needed and Prompt Management Attention is Required

"2" – Improvement is Needed and Management Attention is Necessary

"3" – Some Improvement is Needed and Management Attention is Justified

"4" – Management Evaluation is Desirable

### **Internal Audit Conclusion and Summary of Observations**

During the course of our review, we noted that NiSource Next Safety and Risk processes were well-defined, structured, and thoroughly documented. We also observed that the NiSource Next Safety and Risk team effectively coordinated and communicated with NiSource Next initiative owners, risk owners and the committee members to facilitate an effective risk oversight process both prior and during initiative execution.

Overall, we found that NiSource Next program risk management processes and controls related to the areas tested (as specified in the “Audit Objective, Approach, and Coverage” section of this report) were generally operating as intended. We did, however, identify one finding where management’s attention is justified (Rating 3). In addition, we observed some less-significant improvement items that were discussed with management during the course of the audit.

A summary of audit findings rated “1” through “3” follows (see details in the Internal Audit Findings Matrix in Appendix B):

- 1) **Revised Risk Mitigation Plan Review and Approval** (Rating 3)  
Some risk mitigations determined to be “not applicable” were classified as “complete” and the sufficiency of the revised overall risk mitigation plans were not subsequently reviewed and approved by the NiSource Next Safety and Risk Committee.

### **Management’s Response**

Management will enhance the control of changes to risk assessment and risk mitigation status and enhance processes around reviewing changes in risk assessment and mitigation status. Detailed action plans are included in Appendix B. The action plans will be complete by November 30<sup>th</sup>, 2021.

### **Internal Audit Follow Up**

Management has provided action plans for all findings with a rating of “1”, “2”, or “3”. We have reviewed management’s action plan and believe that the action plan will adequately address the findings identified in this audit. We will track the progress of resolution and will conduct follow-up testing for all rated “1” audit findings and a sample of rated “2” and rated “3” audit findings.

We would like to thank all personnel involved with this assessment for their cooperation and support throughout our review. If Internal Audit can be of further assistance, please contact us.

\*\*\*\*\* End of Internal Audit Report \*\*\*\*\*

**“1” Significant Improvement is Needed and Prompt Management Attention is Required**

- More than remote probability for damage to the Company’s reputation or brand and the impact to the enterprise could be substantial and rapidly realized
- More than remote probability for a non-compliance with laws/regulations and the impact to the enterprise could be substantial and rapidly realized
- Crucial foundational controls related to high-impact processes are inadequate or ineffective and the impact to the enterprise could be substantial and rapidly realized
- Repeat audit findings and the impact could be significant within the scope of the area being audited

**“2” Improvement is Needed and Management Attention is Necessary (target to reduce risk within 3 to 6 months)**

- More than remote probability for damage to the Company’s reputation or brand and the impact could be substantial within the scope of the audit
- More than remote probability for a non-compliance with laws/regulations and the impact could be substantial within the scope of the audit
- Foundational controls related are inadequate or ineffective and the impact could be substantial within the scope of the audit
- Controls are not adequate to prevent or detect fraud in a timely manner
- Transactional errors identified during audit testing are significant within the scope of the audit (based on value or number of erroneous transactions identified)
- Internal Policy is not adequate or is violated and the impact could be substantial within the scope of the audit

**“3” Some Improvement is Needed and Management Attention is Justified (target to reduce risk within 12 months)**

- Internal Policy is not adequate or is violated, but impact is limited and the overall system of controls is not significantly compromised
- Controls are not adequate to prevent erroneous transactions and errors could be more than immaterial within the scope of the audit
- Notable lost opportunity or inefficiency within the scope of the audit

**“4” – Management Evaluation is Desirable**

- Isolated exception with limited impact
- Lost opportunity or inefficiency, but impact is limited

<p><b>1) <u>Revised Risk Mitigation Plan Review and Approval</u></b></p>	<p><b><u>Risk Rating: 3</u></b></p>
<p><b><u>Observation:</u></b>          The NiSource Next Safety and Risk team monitors the status and completion of risk mitigations actions; however, some risk mitigation items determined to be “not applicable” (and, as a result, specified mitigation actions were not implemented) were classified as “complete” and the sufficiency of the revised overall risk mitigation plans were not subsequently reviewed and approved by the NiSource Next Safety and Risk Committee. Controls related to finalizing risk classification and risk mitigation status can be improved by segregating the duties of reporting, testing and validating risk mitigation relevance and status.</p> <p><b><u>Criteria:</u></b>          Controls are sufficient to ensure that risk mitigation actions are implemented and effective; specifically: 1) proposed risk mitigation plans are reviewed by a qualified committee of subject matter experts, 2) risk mitigation actions are monitored, 3) changes to risk mitigation plans are reviewed and approved, and 4) risk mitigation disposition is independently validated.</p> <p><b><u>Risk:</u></b>          Potential that NiSource Next program risks and mitigations are not identified, reviewed and approved by the appropriate personnel with the proper subject matter knowledge required for effective risk management oversight.</p>	<p><b><u>Management Action Plan:</u></b>          Management will enhance the control of changes to risk assessment and risk mitigation status by requiring risk mitigation owner and risk mitigation validator to be separate individuals within the same chain of command. We will also require program leadership to be notified of any changes to mitigation status in situations where the risk mitigation owner is not in their chain of command.</p> <p>Existing processes around changes in risk assessment and mitigation status to be reinforced are as follows:</p> <ul style="list-style-type: none"> <li>• If assessed as high-risk, all changes must be reviewed by the NiSource Next Safety and Risk Committee</li> <li>• If assessed as <b>not</b> high-risk, the Safety and Risk Team will determine path-forward with Chair of Safety and Risk Committee and Program/Initiative Leadership as appropriate</li> </ul> <p>The Safety and Risk Team will continue to require quarterly risk assessments by initiative and program leads and risk mitigation status updates by mitigation owners and validators.</p> <p><b><u>Responsible:</u></b>          Austin Mitchell, Director Enterprise Strategy and Risk</p> <p><b><u>Resolution Date:</u></b>          By November 30<sup>th</sup>, 2021</p>

**RATES AVAILABLE UNDER THIS TARIFF****RATES AVAILABLE FOR RESIDENTIAL ACCOUNTS****Rate RDS - Residential Distribution Service (pp. 78-80)**

Available for a Residential customer or a group of Residential customers that has an aggregate annual demand of at least 53,650 thm or a minimum of 50 customers being served pursuant to the aggregation provisions of the Rules Applicable to Distribution Service.

A Residential customer under this rate schedule may use gas supply for distributed generation equipment such as reciprocating engines, gas turbines, and fuel cells used for electrical power generation for the customer's own use provided, that the Company's facilities are adequate to provide the requested service.

**Rate RSS - Residential Sales Service (pp. 76-77)**

This rate schedule is available, at one location, for the total requirements of any residential customer.

A Residential customer under this rate schedule may use gas supply for distributed generation equipment such as reciprocating engines, gas turbines, and fuel cells used for electrical power generation for the customer's own use provided, that the Company's facilities are adequate to provide the requested service.

(C) Indicates Change

**RATES AVAILABLE UNDER THIS TARIFF - continued**

**RATES AVAILABLE FOR NON-RESIDENTIAL ACCOUNTS**

**Rate CDS - Cogeneration Distribution Service (pp. 125-126)**

Available to any customer who qualifies as a cogenerator under Section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA). Customer must demonstrate to the Company's satisfaction that qualifying cogeneration gas burning equipment will be installed and only gas used for cogeneration will be billed at the rate negotiated under this rate schedule. Service is available when such customer acquires its own gas and executes a contract with the Company for distribution service in accordance with all terms and conditions of such contract. Separate metering and piping to qualifying end use equipment will be required.

Service under this rate schedule shall not be available to a customer who is a Priority 1 Customer, as defined in the Service Limitations section of this tariff and is using gas to generate electricity for Essential Human Needs Use, as defined in the Service Limitations section of this tariff, shall be required to purchase Standby Service if an alternate fuel is not available to generate electricity to cover the electricity peak day requirement.

**Rate DGDS - Distributed Generation Distribution Service (pp. 137-138)**

Available, at one location, for the distribution requirements of any commercial or industrial customer using distributed generation equipment such as reciprocating engines, gas turbines, microturbines, and fuel cells used for electrical power generation. Service is available when such customer executes a contract with the Company for a period mutually agreed to between the Company and the customer for distribution service in accordance with all terms and conditions of such contract. Provided that the Company's facilities are adequate to provide the requested service. Customer may not take service under any other rate schedule except Rate SS – Standby Service.

**Rate EGDS – Electric Generation Distribution Service (pp. 127-128)**

(C)

Available to any customer who uses gas to generate electricity for sale, either wholesale or retail; provided that such sale of electricity is subject to the regulatory jurisdiction of either the Pennsylvania Public Utility Commission or the Federal Energy Regulatory Commission. Service is available when such customer acquires its own gas and executes a contract with the Company for distribution service in accordance with all terms and conditions of such contract.

**Rate LDS - Large Distribution Service (pp. 103-106)**

Available to any commercial or industrial customer whose annual throughput requirement (determined under the Customer Charge provisions of Rate LDS) is in excess of 540,000 thm, and who does not take service under any other rate schedule except Rate SS-Standby Service.

**Rate LGSS - Large General Sales Service (pp. 100-102)**

This rate schedule is available, at one location, for the total requirements of any commercial or industrial customer whose purchase requirements are in excess of 64,400 thm, and who does not contract for distribution service.

(C) Indicates Change

**RATES AVAILABLE UNDER THIS TARIFF - continued**

**RATES AVAILABLE FOR NON-RESIDENTIAL ACCOUNTS - continued**

**Rate MLDS - Main Line Distribution Service (pp. 111-114)**

Available at one location, for the total requirements of a commercial or industrial customer when the Customer meets either one of the following qualifications:

- (a) the Customer has annual throughput requirements in excess of 274,000 thm and is connected directly through a dual-purpose meter to facilities of an Interstate pipeline supplier of the Company ("Class I MLS Customer"); or
- (b) the Customer has annual throughput requirements of not less than 2,146,000 thm and there are two (2) miles or less of pipeline facilities of the Company connecting the Customer to facilities of an interstate pipeline supplier of the Company ("Class II MLS Customer"), and meets all of the following conditions:
  - 1) Customer does not take service under any other rate schedule except Rate SS – Standby Service, and
  - 2) Customer acquires its own gas and executes an application and agreement with the Company as specified in the Rules Applicable to Distribution Service section of this Tariff, for a period of not less than one (1) year for distribution service in accordance with all terms and conditions of such contract.

**Rate MLSS - Main Line Sales Service (pp. 107-110)**

Available at one location, for the total requirements of a commercial or industrial customer when the Customer meets either one of the following qualifications:

- (a) the Customer has annual throughput requirements in excess of 274,000 thm and is connected directly through a dual-purpose meter to facilities of an Interstate pipeline supplier of the Company ("Class I MLSS Customer"); or
- (b) the Customer has annual throughput requirements of not less than 2,146,000 thm and there are two (2) miles or less of pipeline facilities of the Company connecting the Customer to facilities of an interstate pipeline supplier of the Company ("Class II MLSS Customer").

**Rate NCS - Negotiated Contract Service (pp. 115-116)**

Available to any commercial or industrial customer, at the Company's discretion, who meets the following qualifications:

- (a) The customer is not presently served by the Company and has projected throughput requirements of not less than 21,460 thm annually or is a current customer; and
- (b) The customer gives the Company satisfactory proof that, absent service under this rate schedule, the customer's facilities or operations would not be constructed in the Company's operating territory, or that, absent service under this rate schedule, customer would install long-term alternate fuel facilities.

Customer does not take service under any other rate schedule except Rate SS – Standby Service.

**RATES AVAILABLE UNDER THIS TARIFF - continued**

**RATES AVAILABLE FOR NON-RESIDENTIAL ACCOUNTS - continued**

**Rate NGV - Natural Gas Vehicle Service (pp. 129-131)**

This rate schedule is available for any customer for the use of natural gas directly in a natural gas vehicle (NGV). The customer to qualify must be the operator of a public fueling station or the owner/operator of a natural gas vehicle or fleet of vehicles who receives service at separately metered fueling facilities owned by the vehicle owner/operator for the exclusive use of the customer's vehicle(s).

**Rate NSS - Negotiated Sales Service (pp. 117-121)**

Available to any commercial or industrial customer who would not initiate service from the Company or would no longer take service from the Company but for the availability of service under Rate NSS, and whose annual throughput requirements exceed 21,460 thm. A customer with annual throughput requirements less than 64,400 thm that is eligible for service under this rate schedule shall be deemed to meet the usage eligibility provisions for transportation service under Rate SGSS.

**Rate SCD - Small Commercial Distribution (pp. 93-95)**

This rate is available to any commercial customer that: (1) is eligible for Choice Service; (2) has a historic throughput less than or equal to 64,400 thm annually; (3) is not served under any other schedule; (4) the customer or group of customers have an aggregate annual demand of at least 53,650 thm or a minimum of 50 customers and in compliance with the aggregation provisions in the Rules Applicable to Distribution Service elects an NGS of natural gas commodity service for a one year period. (C)

**Rate SDS-Small Distribution Service (pp. 96-99)**

Available to any commercial or industrial customer whose annual throughput requirements (including sales and distribution) exceed 64,400 thm, who does not receive service under any other rate schedule except Rate SS-Standby Service, and whose annual throughput (as determined under Customer Charge provisions of Rate SDS) is less than or equal to 540,000 thm. (C)

**Rate SDSS - Supplier Default Sales Service (pp. 122-123)**

Available to any commercial or industrial customer with annual throughput requirements in excess of 6,440 thm or greater, and whose natural gas supplier has defaulted according to the provisions of the NGS Default section of the Rules Applicable to Distribution Service of this tariff, and who at the time of the default was receiving General Distribution Service under Rate SGDS-Small General Distribution Service, Rate SDS – Small Distribution Service, Rate LDS – Large Distribution Service, Rate MLDS – Main Line Distribution Service, Rate CDS – Cogeneration Distribution Service or Rate GDS – Generation Distribution Service. (C)

(C) Indicates Change

## **RATES AVAILABLE UNDER THIS TARIFF (Continued)**

### **Rate SGDS - Small General Distribution Service (pp. 89-92)**

Available, at one location, for the total requirements of any commercial or industrial customer meeting all of the following conditions:

1. The Customer's total annual throughput requirements, as determined under the Customer Charge provisions are less than or equal to 64,400 thm annually.
2. The Customer does not take service under any other rate schedule except Rate SS – Standby Service.
3. Customer acquires its own gas and executes an application and agreement with the Company, as specified in the Rules Applicable to Distribution Service section of this Tariff, for a period of not less than one (1) year for distribution service in accordance with all terms and conditions of such contract.
4. The customer is a member of an aggregation group pursuant to the provisions of the Rules Applicable to Distribution Service.
5. Priority One customers, as defined in the Service Limitations section of this tariff, must buy distribution service at the Priority One distribution rate, which includes recovery of purchased gas demand costs pursuant to the Purchased Gas Cost Rider as set forth in this tariff. All other SGDS customers wishing to contract for standby service may execute a contract for service under Rate SS - Standby Service.

### **Rate SGSS - Small General Sales Service (pp. 86-88)**

This rate schedule is available, at one location, for the total requirements of any commercial or industrial customer whose total throughput requirements are less than or equal to 64,400 thm annually and who does not contract for distribution service.

### **Rate SS - Standby Service (pp. 134-136)**

Available to any qualified customer receiving General Distribution Service or Negotiated Sales Service who executes a contract with the Company for service under this rate schedule for a period of not less than one (1) year.

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS**

### **1. The Gas Tariff**

#### **1.1 Filing and Posting**

A copy of this Tariff, which is the rates, rules and regulations under which gas service will be supplied by Columbia Gas of Pennsylvania, Inc. to its customers in Pennsylvania, is on file with the Pennsylvania Public Utility Commission and is posted and open for inspection at the offices of the Company.

#### **1.2 Revisions**

This Tariff may be revised, amended, supplemented and otherwise changed from time to time in accordance with the Pennsylvania Public Utility Law and such changes, when effective, shall have the same force and effect as the present Tariff.

#### **1.3 Application of Tariff**

The Tariff provisions apply to any party or parties lawfully receiving gas service from the Company, under the rates set forth therein, and the receipt of gas shall constitute the receiver a customer of the Company as the term is used herein.

#### **1.4 Rules and Regulations**

The Rules and Regulations, filed as a part of this Tariff, are a part of every contract or agreement for service, whether written, oral or implied, made by the Company, and govern all classes of service where applicable.

#### **1.5 Statement of Agents**

No agent or employee of the Company has authority to make any promise, agreement or representation inconsistent with the provisions of this Tariff.

#### **1.6 Definitions**

The following definitions shall apply to this tariff, unless otherwise clearly indicated:

1. Act shall mean the Pennsylvania legislation known as the 'Natural Gas Customer Choice and Competition Act,' codified at 66 Pa.C.S. § 2201-2211, revising Public Utility Code, 66 Pa.C.S. §§ 101, et. seq.
2. Applicant shall mean any person at least 18 years of age, corporation or other entity that (i) desires to receive from the Company natural gas or any other service provided for in this Tariff at a specific location, (ii) complies completely with all Company requirements for obtaining natural gas or any other service provided for in this Tariff, (iii) has requested and is awaiting Company approval of its request for service, and (iv) is not yet actually receiving from the Company any service provided for in this Tariff. An Applicant shall become a Customer for purposes of this Tariff only after it actually starts receiving the applicable service(s) from the Company under this Tariff. The definition of "Applicant" does not include a person who within 30 days of termination or discontinuance seeks to have service restored or transferred to a new location.

(C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**1. The Gas Tariff - continued**

**1.6 Definitions – continued**

2. Applicant – continued  
For residential utility service, the term “Applicant” is further defined as a natural person not currently receiving service who applies for residential service or any adult occupant whose name appears on the mortgage, deed or lease of the property for which the residential utility service is requested.
3. “BCF” shall mean one billion (1,000,000,000) cubic feet of gas. This is a measure of gas usage.
4. “Billing Cycle” shall mean the regularly recurring period from one meter reading or estimated meter reading, to the subsequent meter reading or estimated meter reading, upon which a customer bill for gas and distribution service, or distribution service, is rendered. A billing cycle need not coincide with a calendar month. (C)
5. “BTU” or “British thermal unit” is the amount of heat energy needed to raise the temperature of one pound of water by one degree F.
6. “Burner Tip” shall mean the point at which natural gas is used such as a furnace, water heater or range.
7. “Capacity Assignment Factor” shall mean the amount equal to the projected annual cost of assigned Firm Capacity less estimated annual storage commodity costs (storage injection, withdrawal, shrinkage and commodity transportation cost) with the net divided by the estimated normalized annual usage of customers electing Choice Distribution Service.
8. “CCF” is a measure of gas usage and shall mean one hundred (100) cubic feet of gas.
9. “Chapter 56” shall mean the PUC regulations that govern metering, billing and collections for residential gas and electricity service found in 52 Pa. Code Chapter 56.
10. “Choice” and “Choice Service” shall mean Distribution service provided to Customers under rate schedules RDS and SCD.
11. Commercial Customer

A customer using gas in an establishment of a commercial or service nature including boarding homes and personal care homes. In this class are included, among others, warehousing, distributing or selling commodities, providing professional services or other economic and social endeavors, wholesale and retail stores, offices, office buildings, hotels, clubs, lodges, associations, restaurants, warehouses, railroad and bus stations, banks, laundries, dry cleaners, undertaking establishments, garages, gasoline stations, theaters, bowling alleys, billiard parlors, motor courts, camps, bars, grills, taverns, retail bakeries, private hospitals, public or private schools, churches, religious and charitable institutions, governmental agencies, or the like.

(C) Indicates Change

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **1. The Gas Tariff - continued**

#### **1.6 Definitions - continued**

11. "Commercial Customer" – continued

Included in this group are customers who receive the Company's gas service through one meter set to a combination of four or more dwelling units or through one meter set to a combination of up to three dwelling units and one or more business premises, where the business premises is the predominant usage factor. If the ratepayer's predominate usage is for natural gas powered vehicle service, then the ratepayer will be classified as a commercial ratepayer.

If gas is supplied through a single meter and is used for both commercial and residential or commercial and industrial usage, the service will be considered commercial if it is the predominant usage factor.

12. "Commission" shall mean the Pennsylvania Public Utility Commission. The state agency responsible for utility rates and services offered by the Company and for Natural Gas Suppliers as provided for in 66 Pa. C.S. §2208 of the Act.

13. "Commodity Charge" and "Natural Gas Supply Charge" shall mean basic service charges for natural gas supply services to retail customers, excluding charges for natural gas distribution services.

14. "Company" and "Natural Gas Distribution Company" and "NGDC" shall mean Columbia Gas of Pennsylvania, Inc., a public utility that provides Natural Gas Distribution services and which may provide Natural Gas Supply Services and other services.

15. "Connected Load" shall mean the sum of the maximum energy ratings of all natural gas consuming devices connected for use on the customer's property. (C)

16. "Customer" shall mean a person at least 18 years of age, or a partnership, association, corporation or other entity that purchases natural gas and in whose name a service account exists with the Company. For the limited purpose of changing an NGS, "Customer" may also include an agent who has been duly authorized to initiate a change of the Customer's NGS on behalf of that person, partnership, association, corporation, or other entity through a signed document which identifies by name the agent who has the authority to initiate a change of the Customer's NGS. PA. P.U.C. Docket No. M-00991249F006.

17. "Customer Proxy" generally means the entity that receives notices (e.g. OFOs, OMOs, SFO, etc), receives bills, and controls the gas bank account. Specifically, "Responsible Party" shall mean the Customer in circumstances described in paragraphs 1, 2 and 3 of the "Shipper" definition, and the Natural Gas Supplier in circumstances described by paragraph 4 of the "Shipper" definition.

18. "Distributed Generation" shall mean any generating resource other than central station generation that is placed close to the load being served, usually meaning the customer site. Distributed Generation technologies may include, but not limited to, reciprocating engines, gas turbines, microturbines, and fuel cells.

19. "Distribution", "Distribution Service" and "Natural Gas Distribution Service" shall mean Natural Gas Distribution Service as defined in the Commission's Docket No. M-00991249F0005.

(C) Indicates Change

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **1. The Gas Tariff - continued**

#### **1.6 Definitions - continued**

20. "Distribution Charge" shall mean the basic service charges for the delivery of natural gas to a retail customer from the point of receipt into the Company's system and shall appear as a line item on a customer's bill.
21. "Distribution Pipeline" shall mean any Company pipeline other than a Transmission Pipeline or Company service line.
22. "Dth" or "Dekatherm" shall mean ten (10) therms.
23. "Electronic Flow Corrector" or "EFC" shall mean a device that may be attached to a meter with an instrumentation drive and is used to correct measured usage to standard conditions based on actual pressure and temperature. (C)
24. "FERC" or "Federal Energy Regulatory Commission" shall mean the United States federal agency with jurisdiction over interstate electricity sales, wholesale electric rates, hydroelectric licensing, natural gas pricing, and oil pipeline rates. FERC also reviews and authorizes liquefied natural gas (LNG) terminals, interstate natural gas pipelines and non-federal hydropower projects.
25. "FTS" shall mean firm transportation service provided by an interstate pipeline in which gas is transported on a firm basis from designated receipt points to designated delivery points.
26. "Gas" or "Natural Gas" or "Natural Gas Supply" shall mean the hydrocarbon gas obtained from underground and undersea porous sedimentary rocks. As specified in this tariff, a customer may purchase their gas from an NGS or from the Company.
27. "Gas Cost Adjustment" shall mean the amount billed or credited each month to account for the differences between projected and actual gas supply costs of the Company and is also referred to as the Purchased Gas Commodity Cost (PGCC) "E" Factor. When applicable, the Gas Cost Adjustment appears as a line item on a customer bill.
28. "Gas Supply Charge" shall include the PGCC, the Rider GPC and the Rider MFC and will appear as a line item on the bill of a customer purchasing their natural gas supply service from the Company. If the customer has selected an NGS to serve them under Choice Distribution Service, and the Company is including the NGS gas supply price on the Company's bill to the customer, then the Gas Supply Charge will reflect the charge provided by the NGS to be billed to the customer by the Company.
29. "General Distribution Service" and "GDS" shall mean Distribution service provided under rate schedules DGDS, CDS, EGDS, LDS, MLDS, NCS, SGDS or SDS.
30. "Human Needs" or "Essential Human Needs" or "Essential Human Needs Use" shall mean gas usage by customers for service to any buildings where persons normally dwell including, but not limited to, residences, apartment houses, dormitories, hotels, motels, hospitals, correctional institutions, and nursing homes as well as the use of natural gas by sewage plants.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**1. The Gas Tariff - continued**

**1.6 Definitions - continued**

31. Industrial Customer

A customer using gas for creating or changing raw or unfinished material into another form or product through the application of heat or heat treating, steam agitation, evaporation, baking, drying, distilling, etc.

Typical industrial users are manufacturing plants, machine shops, steel and iron mills, foundries, lumber planing and saw mills, canneries, dairies, meat packers, breweries, distilleries, potteries, railroad repair shops, refineries, creameries, flour mills, pump stations, ice plants, quarries, milk plants, mines, shipbuilders, chemical plants, grain elevators, food processing facilities, petrochemical operations in which the gas is the raw material, etc. If gas service is supplied through a single meter and is used for both industrial and commercial purposes, the service shall be considered industrial if the industrial usage is the predominant usage factor.

32. "Instrumentation Drive" shall mean a mechanism that may be attached to some types of meters and that provides the ability to install a flow correcting device to the meter. (C)

33. "Local Market Area" shall mean a continuous physically interconnected system of Company owned distribution piping through which the Company provides natural gas service to customers in a discrete geographic area, utilizing one or more common Points of Delivery from interstate pipeline supplier(s) or local gas supplier(s).

34. "Maximum Daily Quantity" or "MDQ" shall mean a Customer's maximum usage during a 24-hour period based on recent historical Customer consumption data. (C)

The Company shall perform an MDQ calculation each year based on data ending March 31 and shall provide the new MDQ to customers and / or their agent of record in September. The newly calculated MDQ will be effective beginning with the November cycle billing. An adjustment to the MDQ may be made at any time upon agreement of the Customer and the Company. The MDQ will be calculated as follows unless otherwise specified in this tariff:

a. For Monthly Read Meters

A regression analysis comparing Monthly Degree Days to Monthly Usage based on a minimum of twelve (12) months and a maximum of thirty-six (36) months will be developed to calculate the MDQ.

i. When the regression analysis yields an R Squared value greater than 0.6, the MDQ will be based on the regression analysis and the following calculation will be used to determine the MDQ:

$$MDQ = Base Load + Heat Load * (Market Area Design Day Degree Days)$$

ii. When the regression analysis yields an R Squared value less than 0.6, the MDQ will be based on the highest monthly usage in the prior three years and the following calculation will be used to determine the MDQ:

$$MDQ = Highest Monthly Usage in Past Three Years / 25 days$$

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**1. The Gas Tariff - continued**

**1.6 Definitions - continued**

34. "Maximum Daily Quantity" or "MDQ" – continued (C)
- b. For daily read meters, the MDQ will be based on the highest daily usage in the past three years.
  - c. For new meters or new customer usage without sufficient monthly or daily data, the MDQ will be based on Connected Load until the next MDQ update.
35. "Mcf" shall mean one thousand (1,000) cubic feet of gas.
36. "Month" shall mean calendar month.
37. "Medical Certificate" shall mean a written document: 1) certifying that a customer or member of the customer's household is seriously ill or has been diagnosed with a medical condition which requires the continuation of service to treat the medical condition; and 2) signed by a licensed physician, nurse practitioner or physician's assistant.
38. "Pass-through Charge" shall mean the charge that appears as a line item on a residential, commercial and industrial bill for an account served pursuant to Rate Schedules CAP, RDS, RSS, SGSS, SCD, SGDS, LGSS, MLSS and PS. Pass-through Charges may include: 1) the Purchased Gas Demand Charge ("PGDC"); 2) the PGDC "E" Factor; 3) the Capacity Assignment Factor ("CAF"); 4) the Rider Customer Choice charge ("Rider CC"); and 5) the Rider Universal Service Plan charge ("Rider USP").
39. "Pipeline Scheduling Point" or "PSP" shall mean a single delivery point or set of delivery points grouped or designated by an upstream pipeline for purposes of scheduling gas supplies for delivery by such upstream pipeline and shall consist of the following: Interconnections with Dominion Transmission, Inc., Equitrans, L.P., National Fuel Gas Supply Corporation, Tennessee Gas Pipeline Company, Texas Eastern Transmission, LP and Columbia Gas Transmission, LLC. The interconnections with Columbia Gas Transmission, LLC include the Market Areas and Master List of Interconnections as defined in the General Terms and Conditions of the FERC Gas Tariff of Columbia Gas Transmission, LLC. As of May 1, 2010, the Columbia Gas Transmission, LLC Pipeline Scheduling Points included: 25E-25 (Lancaster); 25-26 (Bedford); 25E-29 (Downingtown); 25-35 (Pittsburgh); 25-36 (Olean); 25-38 (Rimersburg); 25-39 (New Castle) and 25-40 (PA/WV Misc).
40. "Price-to-Compare" or "PTC" shall mean the dollar amount charged by the Company for gas supply and used by consumers to compare prices with other NGSs. The Price-to-Compare includes the PGCC, the CAF, the GPC, the MFC and the Gas Cost Adjustment.

(C) Indicates Change

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **1. The Gas Tariff - continued**

#### **1.6 Definitions - continued**

##### **41. Residential Customer**

A customer, at least 18 years of age, using gas in a single family residential dwelling or unit for space heating, air conditioning, cooking, water heating, incineration, refrigeration, laundry drying, lighting, incidental heating, or other domestic purposes. For residential utility service, the term "Customer" is further defined as a natural person in whose name a residential service account is listed and who is primarily responsible for payment of bills rendered for the service or any adult occupant whose name appears on the mortgage, deed or lease of the property for which the residential utility service is requested. A Customer whose service has been terminated or discontinued in compliance with this Tariff and existing Pennsylvania statute will remain a Customer if, within 30 days of discontinuance or termination, the Customer requests to have service reconnected or transferred to a new location.

Included in this group are customers using gas through one meter set which provides service to two or three dwelling units in a multi-family residence or building where the owner of the building occupies one of the dwelling units, or through one meter set to a combination of one dwelling unit and one or more business premises, where the residential premises is occupied by the owner of the building and is the predominant gas usage factor. If gas is supplied through a single meter and is used for both residential and commercial purposes, the service shall be considered residential if the residential usage is the predominant usage factor.

42. "Sales Service" shall mean service provided by the Company in which the customer purchases its gas supplies from the Company and the Company distributes the gas supplies to the Customer.

43. "Shipper" generally means the entity nominating gas service for Distribution Service accounts. Specifically, "Shipper" is defined as:

- i.) a General Distribution Service Customer that nominates gas for Distribution; or
- ii.) a Natural Gas Supplier that nominates the General Distribution Service Customer's gas for distribution, but which has not been appointed in writing as the Customer's agent by the Customer; or
- iii.) a Natural Gas Supplier that nominates General Distribution Service Customer's gas for distribution, which NGS is acting as the General Distribution Services Customer's duly authorized agent for the purpose of purchasing gas; or
- iv.) a Natural Gas Supplier that nominates the General Distribution Service Customer's gas for distribution, which NGS is acting as the General Distribution Service Customer's duly authorized aggregation agent for the purpose of purchasing gas.

44. "Supplier of Last Resort" shall mean the Company or another entity as determined pursuant to §2207 of the Act that provides natural gas supply services to customers that do not elect another supplier or choose to be served by the supplier of last resort, customers that are refused service from another natural gas supplier, or customers whose natural gas supplier fails to deliver the required gas supplies. Currently, the Company is the supplier of last resort for all customers under the terms of this tariff. Each customer may only have one supplier of last resort.

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **1. The Gas Tariff - continued**

#### **1.6 Definitions - continued**

45. "Telemetry" shall mean an electronic communications process where the gas meter, equipped with an Electronic Flow Corrector and cellular modem or other telecommunications device utilized by the Company, electronically sends metering information to a host database of the Company. Customers using meters with Telemetry will have the option of electing OFOs or OMOs for those meters as described in Rule 3. Rules Applicable Only to General Distribution Service, Operational Matching Order paragraph of the Rules Applicable to Distribution Service of this tariff.
46. "Therm" or "thm" shall mean a unit of heat equivalent to 100,000 British thermal units. The Company uses thm as the unit of measure for billing its customers.
47. "Therm multiplier" shall mean a numeric multiplier that is applied to the volume of gas consumed (as measured in cubic feet, CCF, or MCF) to determine the amount of energy consumed (as measured in therms).
48. "Transmission Pipeline" shall mean pipelines and related facilities which are either: 1) owned by the Company in the form of a D-Line or a Company-owned pipeline that operates at a hoop stress of 20 percent or more of the specified minimum yield strength of the pipe as determined by 49 C.F.R §192.3; or 2) pipelines and related facilities owned by another company which obtains at least 90% of its gas operating revenues from the transportation of gas for others and classifies at least 90% of its mains (other than service pipe) as field and gathering lines, storage, or transmission lines. The Company's Customers are not typically served directly from a Transmission Pipeline, and according to the provisions set forth in the Termination of Service from Transmission Pipelines section of this Tariff, the Company reserves the right to remove, relocate or abandon its Transmission Pipelines.
49. "User Without Contract" shall mean any person who has not contacted the Company to establish service in their name but who is receiving the benefits of natural gas service. This situation includes, but is not limited to, situations wherein the Company arrives at the premises to disconnect the service as a result of a request from the previous customer and finds the premises occupied. User Without Contract does not include instances where the Company's meter or equipment has been tampered with; the service was obtained through fraud or material misrepresentation of the customer's identity; a tariff provision was violated so as to endanger the safety of a person or the integrity of the Company's system, or the gas service was otherwise established without the Company's authorization. (C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations**

**2.1 Availability**

The use of the Company's service shall not be for any purpose other than that covered by the availability provisions of the rate under which service is supplied.

**2.2 Transmission Lines**

Transmission pipelines or high pressure "D-Line" distribution facilities, from which gas may be supplied to customers along the route thereof, are not intended and cannot be maintained solely for service to such customers. The Company may refuse to render service from such pipelines in those instances where hazardous conditions of service might result from the pressures involved, where the service is subject to early termination, or partial or complete failure, arising from depletion or insufficiency of local gas supply, where the costs incident to rendering service would be of such nature as to result in discrimination against other customers, or where for other reasons, such as the temporary nature of certain pipelines, the service would be of short duration, hazardous or inadequate. (See the Termination of Service from Transmission Pipelines paragraph of this tariff.)

**2.3 Gas Emergency Rules**

2.3.1 Definitions

- A. "Alternate Fuel Capability" shall mean a situation in which an alternate fuel could have been utilized whether or not the facilities for such use have actually been installed. For purposes of this definition, alternate fuel means any fuel other than natural gas.
- B. "Emergency" shall mean whenever the aggregate customer demand on the Company's system or confined segment of the system exceeds or threatens to exceed the gas supply or capacity that is actually and lawfully available to the Company to meet the demands, and the actual or threatened excess in demand creates an immediate threat to the Company's system operating integrity with respect to Priority 1 customers, as defined in the Priority-based Curtailment definitions. (C)
- C. "Emergency Action Curtailments" shall mean curtailments of natural gas supply service and/or distribution service pursuant to these Gas Emergency Rules.
- D. "Essential Human Needs Use" shall mean gas usage by customers for service to any buildings where persons normally dwell including, but not limited to, apartment houses, dormitories, hotels, hospitals, and nursing homes as well as the use of natural gas by sewage plants.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations - continued**

**2.3 Gas Emergency Rules - continued**

2.3.1 Definitions - continued

- E. "Firm Service" shall mean service pursuant to schedules or contracts under which the utility is expressly or impliedly obligated to deliver specific quantities of gas within a given time period or which anticipate no interruptions, but which may permit unexpected interruptions in case service to higher priority customers is threatened. (C)
- F. "Interruptible Service" shall mean service pursuant to schedules or contracts under which the utility expressly or impliedly reserves the option to interrupt or curtail deliveries.
- G. "Plant Protection Use" shall mean minimum quantities of natural gas required to prevent physical harm to the plant facilities or danger to plant personnel when such protection cannot be afforded through the use of an alternate fuel. Plant protection requirements include quantities of gas necessary for the protection of such material in process as would otherwise be destroyed, but does not include deliveries required to maintain production.
- H. "Priority 1" shall mean gas supply and distribution services for Essential Human Needs Use.

2.3.2. Demonstration of Firm Pipeline Capacity (C)

In the event of an Emergency, as defined in the Service Limitations section of the Rules and Regulations of the Company's tariff, the Company may, but is not required to, requested Shippers to provide proof of utilization of firm pipeline capacity with primary firm entitlements to a city gate delivering into the company Local Market Area impacted by such Emergency. Absent such proof, the Shipper's deliveries on behalf of its customer(s) in the affected Local Market Area shall not be considered firm to the extent the deliveries exceed the affected customer(s)' contracted Standby Service with the Company.

Proof of firm pipeline capacity as described above shall require the Shipper to provide a copy to the Company of the applicable firm pipeline contracts reflecting the primary firm entitlements to the city gate delivering into the Company Local Market Area impacted by the Emergency and an appropriate nomination on the Company's electronic bulletin board reflecting such contract as the upstream contract in the nomination. The Shipper may redact pricing information in any contract supplied under this paragraph.

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations - continued**

**2.3 Gas Emergency Rules - continued**

2.3.3 Emergency Actions Curtailments

(C)

- A. In the event of an Emergency, if, in the sole judgment of the Company, there is sufficient time, the Company shall use reasonable business and operational efforts to: interrupt all interruptible services, issue Operational Flow and Matching Orders and Operational Alerts pursuant to the Rules Applicable to Distribution Service section of this tariff, and call for voluntary usage reductions by all customers prior to requiring reductions in gas consumption according to the provisions below.
- B. In the event of an Emergency, the Company may curtail, in part or in whole, natural gas supply and/or distribution service for each commercial and industrial customer that is not a Priority 1 customer. Such curtailments will be made without regard to priorities of use as necessary to minimize the potential threat to public health and safety. Emergency Action curtailments will not require reductions to a level below the amount necessary for Plant Protection Use as defined in the Priority-Based Curtailment Definitions section. When all other service has been curtailed except for Priority 1 service and the Company continues to be unable to meet Priority 1 requirements, the Company shall exercise its judgment as to any further curtailment that may be necessary and shall utilize measures designed to minimize harm to customers if curtailments to plant protection use are found to be necessary. The Company shall restore service as soon as practicable to any gas-fired electric generation facility that is deemed critical to electric system reliability by the electrical system's control area operator.
- C. In order to implement Emergency Action Curtailments, the Company shall provide an authorized usage factor using the means most likely to reach impacted customers (via telephone, fax, e-mail, electronic bulletin board or other reasonable means). For industrial and commercial customers taking General Distribution Service, the authorized usage factor will be based on each customer's then currently effective Maximum Daily Quantity. For sales service customers, the Company will base the authorized usage factor upon a recent billing cycle or other readily available consumption data that is available to both the customer and the Company.
- D. Emergency Action Curtailments shall be for a period specified by the Company until further notice, but shall last no more than five business days unless extended by Commission order. As an alternative to extending mandatory reductions for periods beyond five days, the Commission may order the Company to initiate Priority-Based Curtailments as defined below. The Company may change a customer's authorized usage factor, upon notice, at any time during an Emergency.

(C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations - continued**

**2.3 Gas Emergency Rules – continued**

2.3.4 Priority-Based Curtailments

- A. In the event the Commission orders a Priority-Based Curtailment, it will be administered in the following order, without incurring thereby any liability for any subsequent loss, injury, expense or damage which the customer may sustain by reason of such curtailment or discontinuance. If less than all of the requirements under a classification must be curtailed or discontinued, the Company will implement the curtailment or discontinuance on a pro-rata basis to the extent feasible, but may require curtailment in only portions of the Company's service territory. The following priority listing identifies the order of interruption for distribution services and sales services by incorporating the interruption requirements found in the Rules Applicable to Distribution Service.
- B. In the event the Commission orders a Priority-Based Curtailment, the Company shall provide all affected customers the maximum notice possible, by means of telephone, fax or other acceptable forms of electronic communications and will specify the curtailment percentage of the customer's firm gas service and resulting allowance as may be the case.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations - continued**

**2.3 Gas Emergency Rules - continued**

2.3.4 Priority-Based Curtailments - continued

Order of Curtailment	Priority	Rate Schedule	Type of Gas	
1	7	CDS, MLDS, LDS, NSS, NCS, EGDS, NGV, SDSS	Non-Flowing Distribution and Interruptible Service	(C)
2	6	SDS, SGDS	Non-Flowing Distribution and Interruptible Service	
3	5	CDS, MLDS, LDS, NCS, EGDS, NGV	Flowing Non-Contiguous Distribution Service	(C)
4	4	SDS, SGDS	Flowing Non-Contiguous Distribution Service	
5	3	CDS, MLDS, LDS, SDS, SGDS, MLSS, LGSS, SGSS, SS, NCS, EGDS, NGV, NSS	Industrial Flowing Contiguous Distribution and Firm and Interruptible Service	(C)
6	2	CDS, MLDS, LDS, SDS, SGDS, MLSS, LGSS, SGSS, SS, NCS, EGDS, NGV, SCD, NSS	Commercial Flowing Contiguous Distribution and Firm Non-Human Needs and Interruptible Service	(C)
7	1	RSS, SGSS, LGSS, MLSS, MLDS, LDS, SS, RDS, SDS, SGDS	Residential and Essential Human Needs Service	

Notes:

- 1) "Non-flowing Distribution" as used in Priorities (6) and (7) above is defined as the failure of customer-owned supplies to reach a Delivery Point of the Company as enumerated in the Rules Applicable to the Distribution Service.
- 2) "Flowing Non-Contiguous Distribution" as used in Priorities (4) and (5) above is defined as customer-owned supplies which have reached a Delivery Point of the Company, but at a Local Market Area other than the one in which the customers are located as defined in the Rules Applicable to Distribution Service.
- 3) "Flowing Contiguous Distribution" as used in Priority Categories (2) and (3) above is defined as customer-owned supplies which have reached a Delivery Point in the same Company Local Market Area in which the Customer's facilities are located as defined in the Rules Applicable to Distribution Service.
- 4) Customers in a higher priority, with Priority 1 being the highest, will not be curtailed until all customers falling into a lower priority have been restricted to plant protection use levels, unless operational circumstances or physical limitations warrant a different result.
- 5) Where only a partial restriction of a priority category is required, implementation shall be pro-rata to the extent practicable under the circumstances.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations - continued**

**2.3 Gas Emergency Rules - continued**

2.3.4 Penalty Provisions

A. Penalty for Unauthorized Use

When a customer consumes more gas than the authorized usage factor specified by the Company under the Gas Emergency Rules section of this tariff, the Customer shall pay a penalty of Four dollars and sixty-six cents (\$4.66) per thm for each thm taken in excess of the customer's authorized usage factor.

Any penalty charges incurred will be billed for the billing cycle in which the unauthorized consumption first occurs. Penalty charges will be due and Customer shall be subject to disconnection of service for nonpayment of such charges in accordance with the Rules and Regulations Governing the Distribution and Sale of Gas of this tariff. (C)

B. Continued Violation

The Company may discontinue service, for the duration of an emergency, to a customer that takes gas in violation of the provisions of the Gas Emergency Rules section of this tariff.

C. Disposition of Penalties

As of December 31 of each year, the Company shall total all penalties then collected from all Customers resulting from the Gas Emergency Rules applicable to the contract period of the same year. As of December 31 of each year, the Company shall also total the penalties paid to its supplier(s) for quantities taken in excess of the quantities authorized by supplier(s) for the contract period of the same year. The Company shall return to all Customers who did not incur penalties under the penalty provisions of the Gas Emergency Rules all penalties collected under the Gas Emergency Rules in excess of those penalties paid to the Company's supplier(s). The total amount of such penalties to be returned shall be divided by the total quantity of sales to all Customers who did not incur penalties during the contract period. The result of this computation shall represent the factor to be multiplied by each such Customer's total purchase quantities during the applicable contract period to determine the amount to be returned for each such Customer as a credit on the invoice to Customer for the January billing cycle. If the credit computed as above is less than one-thousandth of a cent per therm, the penalties to be returned shall be temporarily retained and added to the penalties to be returned in the subsequent period. All references to "contract period" in this Section shall mean a twelve-month period ended October 31. (C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations - continued**

**2.4 Emergency Curtailment for Tests or Repairs**

If an emergency situation arises such as the necessity to modify, test, replace or repair the Company's facilities, or the facilities of the Company's supplier of gas, and the gas available for distribution by the Company is insufficient to meet all of the Customer's authorized quantities, then the Company, upon providing as much notice as possible to customer, shall order additional curtailment to customer to the extent required. Such additional reduction required shall be determined by the Company without regard to priorities of use; however, the authorized quantity shall not be lower than the minimum quantity necessary for Plant Protection Use. In the event the initial notice of additional curtailment to Customer is oral, such notice must be confirmed in writing within forty-eight (48) hours. The Commission will be notified immediately of the declaration of an emergency situation.

If Customer exceeds its authorized usage factor during a period of Emergency Curtailment for Tests or Repairs, Customer shall pay a penalty of Four dollars and sixty-six cents (\$4.66) per thm for all quantities taken in excess of the Customer's emergency authorized quantity.

(C) Indicates Change

**Issued: December 19, 2014**

**M. R. Kempic  
President**

**Effective: December 20, 2014**

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations - Continued**

**2.5 Compliance with Minimum Insulation Standards**

The Company shall refuse service to all applicants for new gas service at facilities that do not meet the minimum insulation standards as prescribed herein. All applicants for new gas service must certify that the following minimum insulation standards have been met before service will be established.

**2.5.1 Minimum insulation Standards - Residential Structures**

A residential structure is a single-family residence, duplex, townhouse or multi-family apartment.

Any new or renovated residential structure to be served with gas for space heating purposes shall be thermally protected to the minimum standards set for new or renovated residential structures in the "Building Energy Conservation Act", as amended from time to time by the Commonwealth of Pennsylvania, and the rules and regulations lawfully promulgated thereunder by the Pennsylvania Public Utility Commission and the Pennsylvania Department of Community Affairs.

The following standards shall apply to existing residential dwellings where economically feasible:

- (a) The thermal resistance of building sections adjacent to heated space shall be:
- |  | <u>Minimum</u> |
|--|----------------|
| 1. Roof/ceiling  | R-19           |
| 2. Exterior Walls  | R-11           |
| 3. Floors over unheated crawl spaces and unheated basements                        | R-11           |
| 4. Floors over unheated garages and areas open to the outside                      | R-19           |
| 5. Foundation walls above frostline, including walls in living areas and basements | R-7            |
| 6. Edge insulation   | R-5            |
| 7. Heating ducts in unheated areas   | R-5            |
- (b) Storm doors or insulated doors and storm windows or windows glazed with insulating glass shall be installed.
- (c) Main entrance doors to multi-family apartment buildings shall be self-closing.
- (d) Automatic thermostats should be used.
- (e) Vapor barriers with adequate ventilation, weatherstripping, sill sealers, exterior caulking and attic fans shall be used wherever applicable.

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**2. Service Limitations - Continued**

**2.5 Compliance with Minimum Insulation Standards -Continued**

These standards shall apply to existing residential dwellings where economically and feasibly possible.

Mobile homes constructed after June 15, 1976 must meet the HUD "Mobile Home Construction and Safety Standards".

Mobile homes constructed before June 15, 1976 must satisfy this minimum thermal standard: "Storm doors or insulated doors and storm windows or windows glazed with insulating glass shall be installed."

**2.5.2 Minimum Insulation Standards--Commercial and Industrial Structures**

Any new commercial or industrial structure, where natural gas is to be utilized for space heating, must be thermally protected to the minimum thermal protection standards of ASHRAE 90-75.

Any existing commercial or industrial structure, where gas is to be utilized for space heating, must be thermally protected to the minimum thermal protection standards of ASHRAE 90-75 where economically and physically possible.

Where natural gas is to be used for product processing, the application for gas service will be reviewed by the Company to determine if the applicant has considered the economically efficient use of gas.

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **3. Application for Service**

#### **3.1 Application**

All Applicants desiring any type of service from the Company under this Tariff shall contact the Company and specifically request the type and nature of service. Applications for service may be made by telephoning the Company or its authorized agent, or through application via the Internet.

Upon being contacted by a customer requesting service, the Company will advise the customer that Choice service is available and that the Company can mail them a list of licensed NGSs offering retail service in the Company's service territory with appropriate contact information for those suppliers. The Company will also advise the customer that they can view this information on the Internet and refer the customer to the Commission for further information.

Prior to providing utility service, the Company may require the applicant to provide:

1. Information that positively identifies him/her self.
2. The name of any adult occupant whose name appears on the mortgage, deed or lease of the property for which the residential utility service is requested.
3. The names of each adult occupant residing at the location, and proof of their identity.
4. A cash deposit, when applicable, as described in the Credit section of this tariff.

(C)

The Company may ask for the combined gross income of all adult occupants; however, the applicant is not required to provide the information as a condition of receiving gas service, unless the applicant is seeking to enroll in the Company's Customer Assistance Program, or the applicant is applying for service at a location previously terminated for non-payment, in which cases the applicant must provide the combined gross income of all adult occupants.

#### **3.2 Right to Reject**

The Company may place limitations on the amount or character of service it will supply, or may reject applications for any of the following reasons:

- (a) Until the customer has complied with the state and municipal regulations governing gas service.
- (b) If the Company does not have adequate facilities to render the service desired.
- (c) If such service is of a character that it is likely to affect unfavorably service to other customers.
- (d) If, in the judgment of the Company, the applicant's installation of piping or gas equipment is hazardous, or of such a character that satisfactory service cannot be rendered.
- (e) If an extension of street main, except as set forth under Section 8--Extensions, is required to furnish such service.
- (f) Where the service proposed is from a transmission pipeline as specified in the Transmission Lines section of this tariff.
- (g) When it is necessary to conserve the supply of gas as specified in the Service Limitations section of this tariff.
- (h) Until the customer has complied with minimum insulation standards as specified in the Compliance with Minimum Insulation Standards section of this tariff.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**3. Application for Service – continued**

**3.2 Right to Reject – continued**

- (i) Failure to provide the names of each adult occupant residing at the location and proof of their identity.
- (j) When an applicant who is required to secure an account to obtain service, does not pay a security deposit and does not provide a third party guarantor
- (k) Non-payment of a cash deposit equal to one-sixth of the applicant's estimated annual bill, at the time the Company determines a deposit is required, from the following:

(1) An applicant who previously received utility distribution services and was a customer of the Company and whose service was terminated for any of the following reasons:

- I. Nonpayment of an undisputed delinquent account.
- II. Failure to complete payment of a deposit, provide a guarantee or establish credit.
- III. Failure to permit access to meters, service connections or other property of the public utility for the purpose of replacement, maintenance, repair or meter reading.
- IV. Unauthorized use of the utility service delivered on or about the affected dwelling.
- V. Failure to comply with the material terms of a settlement or payment arrangement. (C)
- VI. Fraud or material misrepresentation of identity for the purpose of obtaining utility service.
- VII. Tampering with meters, including, but not limited to, bypassing a meter or removal of an automatic meter reading device or other public utility equipment.
- VIII. Violating tariff provisions on file with the commission so as to endanger the safety of a person or the integrity of the delivery system of the public utility.

(2) Any Applicant or Customer who is unable to establish creditworthiness to the satisfaction of the public utility through the use of a generally accepted credit scoring methodology which employs standards for using the methodology that fall within the range of general industry practice.

(3) A Customer who fails to comply with a material term or condition of a settlement or payment arrangement. (C)

**3.3 Acceptance**

Acceptance of service by the customer shall constitute an agreement to accept service under these Rules and Regulations, as amended from time to time, the Orders or Rules of the Pennsylvania Public Utility Commission, and Laws of the Commonwealth of Pennsylvania, and the Laws of the United States of America.

**3.4 Unauthorized Use**

The use of service delivered on or about the affected dwelling obtained from the Company without authority may be immediately terminated by the Company without prior notice as specified in the Notice of Termination of Service section of this tariff. The use of service without notifying the Company and enabling it to read its meter will render the user liable for any amount due for service supplied to the premises from the time of the last reading of the meter, immediately preceding his occupancy, as shown by the books of the Company.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**3. Application for Service – Continued**

**3.5 Fraud or Material Misrepresentation**

The Company may immediately terminate service when fraud or material misrepresentation of the customer's identity is used for the purpose of obtaining service as specified in the Termination of Service section of this tariff.

**4. Customer's Installations**

**4.1 Information from Customer**

Anyone desiring to equip his premises for the use of gas shall communicate with the Company personally, or through his contractor or agent, giving the exact location of the premises and details of all gas consuming equipment to be installed.

**4.2 Point of Connection**

The Company will designate the point where the customer would be required to terminate his piping for connection to the lines of the Company. The furnishing of such information does not constitute an agreement, or obligation, on the part of the Company to render service.

**4.3 Excess Flow Valves**

(C)

A customer who qualifies pursuant to 49 CFR Section 192.383 may request installation of an Excess Flow Valve (EFV). The customer will be required to pay all EFV installation costs associated with such installation before the Company begins work, if:

- a. the Company has not scheduled the customer's premises for a service line replacement or a new service line, or
- b. the customer requests the installation prior to the Company's scheduled installation time.

**4.4 Meter Connections**

(C)

A domestic customer, at his expense, shall furnish and install the necessary piping, valves and fittings, exclusive of meter swivels, for the installation of the Company's meter or meters. All other customers may be required to furnish said piping, etc. depending upon the quantity of gas to be used and the conditions under which service is to be rendered.

**4.5 Meter Space**

(C)

The customer shall provide, free of expense to the Company, a space satisfactory to the Company for meters, regulators, pipes, meter protection equipment or other equipment of the Company which may be necessary for the rendering of adequate service, the Company reserving the right to establish standards as to the location, size, fire-proofing, ventilating, etc. of such space in accordance with pressure conditions, quantities and other pertinent factors. In certain buildings, the Company may require that an approved meter room be provided.

(C) Indicates Change

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**4. Customer's Installations – continued**

**4.6 Meter Location**

4.6.1 General

4.6.1.1 Unless otherwise specified in this tariff, meters shall be located outside.

4.6.1.2 The Company shall have the right to determine the location of its meters, which must be placed where they will be easily accessible for meter reading, inspection, repairs, testing, changing and operation of the gas shut-off valve, and not exposed to outside forces such as extreme heat (as near steam pipes, boilers or furnaces), sudden changes of temperature, or liable to damage by having earth or objects thrown on or placed against them. Meters will not be set in coal cellars under any circumstances, nor under the deck of show windows, or in small closets, or other locations of a like character.

4.6.1.3 When a premises has multiple meters in multiple locations at the premises each meter should be tagged or otherwise labeled to indicate there are multiple meter locations at the premises. (C)

4.6.1.4 When feasible and practical to do so, the meter location must accommodate the installation of the service line in a straight line perpendicular to the main.

4.6.1.5 Meters may not be installed in the following locations:

- (a) Beneath or in front of windows or other building openings that may directly obstruct emergency fire exits.
- (b) Under interior stairways.
- (c) Under exterior stairways, unless an alternate means of egress exists and the meter is in a well-vented location under stairs constructed of non-combustible material.
- (d) A crawl space.
- (e) Near building air intakes pursuant to local or state building codes.
- (f) In contact with soil or other potentially corrosive materials.

(C) Indicates Change

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**4. Customer's Installations – continued**

**4.6 Meter Location - continued**

(C)

4.6.2 Inside Meter Location

(C)

4.6.2.1 An inside meter location shall be considered only when:

(C)

- (a) The service line pressure is less than 10 PSIG; or,
- (b) A meter is located in a building that meets one of the following criteria:
  - (i) The building is listed in the National Register of Historic Places or the customer or building owner notifies the Company that the building is eligible to be listed in the National Register of Historic Places and the eligibility can be readily confirmed by the Company.
  - (ii) A building is located within a historic district that is listed in the National Register of Historic Places or the customer or building owner notifies the utility that the historic district is eligible to be listed in the National Register of Historic Places and the eligibility can be readily confirmed by the Company.
  - (iii) A building has been designated as historic under the Pennsylvania Historic District Act, Municipalities Planning Code, or Municipal Home Rule Charter.
  - (iv) A building is located within a locally designated historic district or is eligible for such listing or a building is individually designated pursuant to local ordinance as a historic landmark or is eligible for such listing.
- (c) Protection from ambient temperatures is necessary to avoid meter freeze-ups; or
- (d) The Company determines that a meter is subject to a high risk of vandalism based on the Company's prior experience; or
- (e) The Company determines that an outside meter location is neither feasible nor practical.

4.6.2.2 Installed inside meters must be attached to an operable outside shut off valve.

(C)

4.6.2.3 Meters installed within a building must be located in a ventilated place not less than three (3) feet from a source of ignition or source of heat which may damage the meter.

(C)

(C) Indicates Change

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**4. Customer's Installations – continued**

**4.6 Meter Location - continued**

(C)

4.6.3 Outside Meter Location

(C)

4.6.3.1 Outside meters shall be installed in one of the following locations:

(C)

- (a) When feasible and practical to do so, aboveground in a protected location adjacent to the building served, or as close as possible to the point where a production or transmission line is tapped.
- (b) In a buried vault or meter box when:
  - (i) the vault or meter box is located on the customer's or building owner's property, either adjacent to the building served or near the gas main; or
  - (ii) the vault is located in a public right-of-way, subject to the consent of local jurisdictions as may be required.

4.6.3.2 On an outside meter installation, a meter cover or housing may be required when, in the Company's judgment, conditions require such physical protection for the meter installation.

(C)

The Company will incur the expense for meter protection equipment and installation when it installs a meter or to comply with safety regulations, with the exception of the following circumstances:

- (a) In a new service situation, the Company will determine a meter location that does not require meter protection. If the applicant prefers a different meter location and the Company determines that the applicant's preferred location would require meter protection but otherwise meets State and Federal regulations, the Company may agree to the alternate meter location so long as the applicant bears the equipment and installation costs of meter protection necessary as determined by the Company.
- (b) After the original meter installation, any physical change to the premises that results in an unsafe condition because of the lack of meter protection as determined by the Company requires that the customer bear the expense of equipment and installation of meter protection.
- (c) When meter tampering is identified, the customer is required to bear the equipment and installation cost that the Company deems necessary.

(C) Indicates Change

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**4. Customer's Installations – continued**

**4.6 Meter Location - continued**

- 4.6.4 Vaults or Meter Boxes (C)
- 4.6.4.1 The Company may consider a specially constructed cabinet recessed in the building wall, sealed from inside the building and vented to and accessible from outside the building. (C)
- 4.6.4.2 The Company shall consider proper design and location criteria for a meter box including: (C)
- (a) ventilation;
  - (b) vehicular traffic;
  - (c) soil accumulation;
  - (d) surface water runoff;
  - (e) high water table;
  - (f) proximity to building air intakes or openings; and
  - (g) proximity to an excessive heat source as defined under 49 C.F.R. §192.353(C).
- 4.6.4.3 Piping installed through vault walls shall be properly coated to protect from corrosion. (C)
- 4.6.4.4 Vaults containing gas piping may not be connected by means of a drain connection to any other underground structure. (C)
- 4.6.4.5 When a meter box is located outside a paved surface, the Company shall consider fill, topsoil, or sod being placed over the vault and, when feasible and practical to do so, choose an alternate location. (C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**4. Customer's Installations – continued**

**4.7 Relocation of a Meter**

(C)

Whenever a meter is relocated it must meet the Meter Location criteria specified in the General, Inside Meters, and Outside Meters subsections of this Rule 4. Customer Installations.

4.7.1 Notice of Relocation

(C)

4.7.1.1 Except in the case of an emergency, the Company shall provide written notice to a customer by first class mail or by personal delivery at least 30 days prior to relocating and subsequently installing a meter outside the customer's building.

(C)

4.7.1.1.1 The notice must request that if the customer is not the owner of the building, the customer shall forward the written notices to the owner of the building.

(C)

4.7.1.1.2 If the Company knows the current address of the owner of the building, notice shall also be mailed or delivered to that address.

(C)

4.7.1.2 The written notice will inform the customer and building owner of the equipment that the Company proposes to relocate, the planned new location, and how to contact the Company to provide supplemental information that the Company may not have, such as the building's historic status. The written notice must include contact information for the Commission's Bureau of Consumer Services.

(C)

4.7.2 Responsibility of Cost

(C)

4.7.2.1 Unless caused by a customer's or building owner's violation of applicable gas safety or tariff rules, the Company shall pay the costs of relocating a meter when the relocation is performed to meet the Company or Commission safety requirements, including, but not limited to, 52 Pa. Code § 59.18.

(C)

4.7.2.2 Unless caused by a customer's or building owner's violation of applicable gas safety or tariff rules, the Company shall bear the cost of extending customer-owned facilities to the new meter location when the relocation is performed to meet the Company or Commission safety requirements, including, but not limited to, 52 Pa. Code § 59.18.

(C)

4.7.2.3 A customer or building owner requesting that a meter be moved shall pay the costs associated with relocation and any Company required meter protection installation when the meter is currently situated in a suitable location under State and Federal regulations.

(C)

(C) Indicates Change

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **4. Customer's Installations – Continued**

#### **4.8 Temporary Service**

The customer shall pay the cost for all material, labor and all other necessary expense incurred by the Company in supplying gas service to the customer for any temporary purpose or use, and shall pay the cost of removing material after service is discontinued, in addition to the regular payments for gas used. The Company will credit the customer with the reasonable salvage value of any material recovered.

#### **4.9 Service Lines**

4.9.1 The customer shall install at his expense the service line to the point of connection designated by the Company. (See Rule 8.1 Service Connections)

4.9.2 The service line to be installed by the customer shall be in accordance with the Company's requirements as to diameter. All material and construction must be of a quality accepted by the best gas fitting practices, and must conform with the Company's Rules and Regulations governing the installation of service lines.

4.9.3 In those cases where the service connection of the Company has been installed, the customer shall connect the service line installed by him to the service connection of the Company in a manner required by the Company. In those cases where the service connection of the Company has not been installed, the Company shall connect the service line installed by the customer to the service connection of the Company.

4.9.4 When feasible and practical to do so, a building may not have more than one service line. No additional tap or service lines shall be made or meter set for gas service to a garage, or other building on any lot where there already exists a service line to the residence or main building of the customer.

4.9.5 When feasible and practical to do so, a service line must terminate at the inlet valve of the meter set in the building in which the service line enters.

4.9.6 When feasible and practical to do so, the customer's service line must be installed in a straight line perpendicular to the main.

#### **4.10 Regulators**

Except as otherwise provided herein, the pressure of gas flowing into a customer's meter shall be controlled by a device owned by the Company and referred to as a regulator. The Company shall determine the type and size of the regulator as well as procure, install and maintain the regulator. The Company may from time to time change or alter the regulator to ensure adequate pressure to serve the customer.

In rural areas, where gas service is obtained from a high pressure line, the necessary regulator or regulators and safety devices required to reduce the pressure from the maximum pressure at the high pressure line to a suitable utilization pressure are to be installed at the customer's expense.

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**4. Customer's Installations – Continued**

- 4.11 Regulator Location** (C)
- 4.11.1 General (C)
- 4.11.1.1 Unless otherwise specified in this Rule 4 Customer Installations, regulators shall be located outside.
- 4.11.1.2 Except for low pressure systems with service line pressure less than 10 PSIG, regulators must be located outside when a meter is located inside. (C)
- 4.11.1.3 The Company will consider potential damage by outside forces when determining a regulator location. (C)
- 4.11.1.4 Regulators may not be installed in the following locations: (C)
- (a) Beneath or in front of windows or other building openings that may directly obstruct emergency fire exits.
  - (b) Under interior stairways.
  - (c) Under exterior stairways, unless an alternate means of egress exists and the regulator is in a well-vented location under stairs constructed of non-combustible material.
  - (d) A crawl space.
  - (e) Near building air intakes pursuant to local or state building codes.
  - (f) In contact with soil or other potentially corrosive materials.
- 4.11.1.5 The Company may consider a specially constructed cabinet recessed in the building wall, sealed from inside the building and vented to and accessible from outside the building. (C)
- 4.11.2 Outside Regulators (C)
- 4.11.2.1 Outside regulators shall be installed in one of the following locations: (C)
- (a) When feasible and practical to do so, aboveground in a protected location adjacent to the building served, or as close as possible to the point where a production or transmission line is tapped.
  - (b) In a buried vault or meter box when:
    - (i) the vault or meter box is located on the customer's or building owner's property, either adjacent to the building served or near the gas main; or
    - (ii) the vault is located in a public right-of-way, subject to the consent of local jurisdictions as may be required.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**4. Customer's Installations – Continued**

**4.12 Relocation of a Regulator**

(C)

Whenever a regulator is relocated it must meet the Regulator Location criteria specified in the General and Outside Regulators subparagraphs above.

4.12.1 Notice of Relocation

(C)

4.12.1.1 Except in the case of an emergency, the Company shall provide written notice to a customer by first class mail or by personal delivery at least 30 days prior to relocating and subsequently installing a regulator outside the customer's building.

(C)

4.12.1.1.1 The notice must request that if the customer is not the owner of the building, the customer shall forward the written notices to the owner of the building.

(C)

4.12.1.1.2 If the Company knows the current address of the owner of the building, notice shall also be mailed or delivered to that address.

(C)

4.12.1.2 The written notice must inform the customer and building owner of the equipment that the Company proposes to relocate, the planned new location, and how to contact the Company to provide supplemental information that the Company may not have, such as the building's historic status. The written notice must include contact information for the Commission's Bureau of Consumer Services.

(C)

4.12.2 Responsibility of Cost

(C)

4.12.2.1 Unless caused by a customer's or building owner's violation of applicable gas safety or tariff rules, the Company shall pay the costs of relocating a regulator when the relocation is performed to meet the Company or Commission safety requirements, including, but not limited to, 52 Pa. Code § 59.18.

(C)

4.12.2.2 Unless caused by a customer's or building owner's violation of applicable gas safety or tariff rules, the Company shall bear the cost of extending customer-owned facilities to the new regulator location when the relocation is performed to meet the Company or Commission safety requirements, including, but not limited to, 52 Pa. Code § 59.18.

(C)

4.12.2.3 A customer or building owner requesting that a regulator be moved shall pay the costs associated with relocation when the regulator is currently situated in a suitable location under State and Federal regulations.

(C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**4. Customer's Installations - Continued**

**4.13 House Piping**

(C)

Prior to the installation of house piping by the customer in new or altered premises, inquiry should be made of the Company to determine the requirements, sizes of pipe, quality and other specifications.

**4.14 Maintenance of Lines**

(C)

All house and service lines to the curb valve, or to the property or lot line if there is no curb valve, shall be kept and maintained in good condition by the owner of such facilities. When leaky or hazardous conditions of the service and house lines are found, repairs shall be made promptly by the owner of such facilities. (See the Ownership and Maintenance section of this tariff for further information.)

**4.15 Interference with Facilities**

(C)

Without prior written notice to the Company, the customer shall not open, tamper or interfere with, in any manner, his service line or with any regulator or regulators or safety appliances installed in connection with service to him, irrespective of ownership thereof, except to see that same are kept in proper working order. Neither shall the customer increase or decrease the pressure of same without the written approval of the Company. Any customer action taken that may endanger the safety of a person or the integrity of the Company's delivery system will be grounds for immediate termination without notice as specified in the Termination of Service section of this tariff.

**4.16 Customer's Responsibility**

(C)

Customer assumes all responsibility for property owned by the customer on customer's side of the point of connection, as well as for the installation and appliances used in connection therewith, and will save Company harmless from and against all claims for injury or damage to persons or property occasioned by or in any way resulting from such service or the use thereof on customer's side of the point of connection.

(C) Indicates Change

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**5. Testing and Inspecting of Customer's Installations**

**5.1 Requirement**

Prior to the introduction of gas service, the service line of the customer must be tested and inspected to ensure compliance with the Company's standards for gas piping on the customer's premises. Prior to the introduction of gas service, the house piping of the customer must be tested and inspected to ensure compliance with all applicable codes for house piping on the customer's premises.

**5.2 Company's Right to Inspect Customer Service Lines**

(C)

The Company shall have the right, but shall not be obliged, to inspect any new installation before service is introduced or at any later time, and reserves the right to reject any piping or appliances that is not in accordance with the Company's standard for gas piping on the customer's premises or any applicable codes. However, any such inspection, or failure to inspect, or to reject, shall not render the Company liable or responsible for any loss or damage, resulting from defects in the installation, piping, or appliances, or from violation of Company rules, or from accidents which may occur upon the premises of the customer.

**5.3 Testing of Service Lines and House Piping**

The customer's service line and house piping must be tested by the owner or his competent representative before service is rendered to a customer, or before service is resumed to a customer whose service line or house piping has been repaired, renewed, enlarged or changed in any manner. Such test is to be made in accordance with the Company's standards for gas piping on customer's premises and all applicable codes.

**5.4 Defective Installation**

The Company may refuse to connect if, in its judgment, the Customer's installation is defective, or unsatisfactory; it does not meet company standards; or if it fails to meet any applicable code.

(C) Indicates Change

---

**Issued: December 15, 2015**

**Mark Kempic  
President**

**Effective: December 18, 2015**

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**5. Testing and Inspecting of Customer's Installations - Continued**

**5.5 Unsatisfactory Test or Inspection**

In case of leak, or other unsatisfactory condition of the service line, or house piping, resulting in the disapproval thereof by the Company, correction shall be made of such condition at the owner's expense, in accordance with the Company's standards for gas piping on the customer's premises and all applicable codes.

**5.6 Inspection and Testing Fee**

The first inspection at any premises shall be without charge, but additional inspections requested by the customer or required because of unsatisfactory conditions disclosed by the first inspection shall be subject to a charge at the rate of Thirty-one Dollars (\$31.00) per hour.

**5.7 Responsibility for Material or Workmanship**

The Company will not be responsible for any imperfect material or defective or faulty workmanship or for any loss or damage arising from such imperfect material or defective or faulty workmanship, in any job of gas fitting solely by virtue of inspection by Company inspectors under the Testing and Inspecting of Customer's Installations section of this tariff. For protection, adequacy and safety of service to its customers, the Company has adopted these Rules and Regulations, and may refuse to turn gas on to any premises where the gas piping does not conform to the rules and regulations.

(C)

**6. Credit**

**6.1 Prior Debts**

**6.1.1 Residential Prior Debts**

Service will not be furnished to a former residential customer until amounts due for gas service within the last four (4) years at previous location(s) and in the customer's name have been satisfied. The four (4) year limitation does not apply if the balance includes amounts that were the result of fraud or theft on the part of the applicant.

The Company may, but is not required, to allow the outstanding residential account balance to be transferred to the new account and amortized over a reasonable period of time.

The Company will use all means of determining liability for a past due balance of any residential applicant or customer. This may include the following:

- (1) Use of Company records that contain confidential information previously provided to the Company.
- (2) The dates contained on a valid mortgage, lease or deed containing the applicant or customer's name coincide with the address and period for which the outstanding bill amount accrued and for which the utility is holding the applicant or customer responsible.

(C) Indicates Change

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**6. Credit - Continued**

**6.1 Prior Debts**

**6.1.1 Residential Prior Debts – continued**

- (3) Information contained in the Company's records that indicate that the applicant was an occupant living at the premises for which the applicant is requesting service during the time frame that the bill accrued. (C)
- (4) Use of a skip tracing software that contains records of names and addresses. This information is maintained by a third party vendor that contains multiple sources of public information.
- (5) Information provided by the applicant or customer and accepted by the Company that verifies that the applicant or customer resided at another address during the period of time in which the bill accrued.

If an outstanding balance exists at the property for which service is being requested, before providing service the Company may require the payment of any outstanding balance or portion of an outstanding balance if the applicant resided at the property for which service is requested during the time the outstanding balance accrued.

**6.1.2 Commercial or Industrial Prior Debts**

Service will not be furnished to a former commercial or industrial customer until amounts due for gas service at a previous location and in the customer's name have been satisfied.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**6. Credit - continued**

**6.2 Deposits**

Deposits may be required from customers taking service for a period of less than thirty (30) days, in an amount equal to the estimated gross bill for such temporary period. The estimated annual bill shall be calculated on the basis of the annual bill to the premises at which service is being requested for the prior 12 months, or, if unavailable, a similar premises in close proximity. Deposits required by the Company for Tariff regulated charges shall be based on only those regulated charges. Any customer having secured the return of a deposit shall not be required to make a new deposit unless the service has been discontinued or the customer's credit standing impaired through failure to comply with Tariff provisions. (C)

(1) Residential Deposits

The Company uses a generally accepted credit scoring methodology, in the range of general industry practice, based on an Applicant or Customer's utility payment history. The Company will access one of three major credit reporting agencies that use a commercially recognized credit scoring methodology. The payment history of the applicant or customer that is available to the credit reporting agency determines the credit score.

Deposits for residential service will equal one sixth of the estimated annual bill of the property for which the residential utility service is requested.

A Customer or Applicant who is confirmed to be eligible for the Customer Assistance Program shall not be asked to provide a cash deposit.

(A) When applicable, a deposit for residential service may be required from the following:

1. An Applicant who previously received utility distribution services and was a customer of the Company and whose service was terminated for any of the following reasons:

- (a) Nonpayment of an undisputed delinquent account.
- (b) Failure to complete payment of a deposit, provide a guarantee or establish credit.
- (c) Failure to permit access to meters, service connections or other property of the Company for the purpose of replacement, maintenance, repair or meter reading.
- (d) Unauthorized use of the utility service delivered on or about the affected dwelling.
- (e) Failure to comply with the material terms of a settlement or payment arrangement.
- (f) Fraud or material misrepresentation of identity for the purpose of obtaining utility service.
- (g) Tampering with meters, including, but not limited to, bypassing a meter or removal of an automatic meter reading device or other public utility equipment.
- (h) Violating tariff provisions on file with the commission so as to endanger the safety of a person or the integrity of the delivery system of the public utility.

2. Any residential Applicant or Customer who is unable to establish creditworthiness to the satisfaction of the Company through the use of a generally accepted credit scoring methodology which employs standards for using the methodology that fall within the range of general industry practice. The Company may use other means to determine credit worthiness for commercial and industrial customers.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**6. Credit - Continued**

**6.2 Deposits – Continued**

3. A customer who fails to comply with a material term or condition of a settlement or payment arrangement. (C)

(B) The Company may accept a third-party guarantor in lieu of a cash deposit for a residential account. The guaranty shall be in writing and shall state the terms of the guaranty. The Guarantor shall be responsible for all missed payments owed to the Company.

(2) Non-Residential Deposits or Other Form of Adequate Financial Assurance

(A) Letters of credit or other forms of financial assurance acceptable to the Company may be required from all other applicants or customers. The Company shall perform a creditworthiness evaluation of the Applicant or Customer, including an assessment of the credit risk exposure resulting from, but not limited to, distribution rates, customer charges, charges for natural gas supply, interstate pipeline capacity charges, imbalance charges, cash-out charges, pipeline penalty charges, and any other amounts that may become owed to the Company by the Applicant or Customer. If at any time before or during the provision of service to the Applicant or Customer the Company determines that the credit risk exposure is greater than any secured and/or unsecured credit that may be granted resulting from the creditworthiness evaluation, the Applicant or Customer must provide the Company with adequate financial assurance to cover the difference between the credit risk exposure and any secured and/or unsecured credit granted prior to, or to continue receiving any type of service from the Company.

**6.3 Return of Deposit or Other Form of Adequate Financial Assurance**

The Company may hold a deposit secured from a residential customer until a timely payment history is established. A timely payment history is established when a Residential Customer has paid in full and on time for twelve (12) consecutive months. If a Residential Customer becomes delinquent before the end of the deposit holding period the Company may deduct the outstanding balance from the deposit. At the end of the deposit-holding period, the Company shall deduct the outstanding balance from the deposit and return or credit any positive difference to the customer. If service is terminated before the end of the deposit-holding period, the Company shall deduct the outstanding balance from the deposit and return any positive difference to the customer within sixty (60) days of the termination. (C)

Deposits or other forms of adequate financial assurance secured from a non-residential customer shall be returned to the depositor when undisputed bills covering a period of twelve (12) months have been paid, provided, however, that the Customer's credit profile determined from an updated creditworthiness evaluation conducted by the Company in its reasonable judgment has not so deteriorated by the end of the twelve months as to warrant continued retention of the deposit or other adequate financial assurance. The payment of any undisputed bill, within the meaning of the Public Utility Law, shall be payment of the bill with or without discount or penalty, within thirty (30) days following the period for which the bill was rendered, or payment within thirty (30) days following presentation of the bill, or the payment of any contested bill, payment of which is withheld beyond the period herein mentioned, and the dispute is terminated substantially in favor of the customer, and payment made by the customer within ten (10) days thereafter.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**6. Credit - continued**

**6.4 Interest on Deposits**

6.4.1 Residential

The Company shall accrue interest on the deposit for a residential account, at the simple annual interest rate determined by the Secretary of Revenue for interest on the underpayment of tax under section 806 of the act of April 9, 1929 (P.L. 343, No. 176), known as The Fiscal Code until it is returned or applied.

The interest rate in effect when the deposit is required to be paid shall remain in effect until the later of: 1) the date the deposit is refunded or credited; or 2) December 31. On January 1 of each year, the new interest rate for that year will apply to the deposit.

6.4.2 Non-residential

The Company will pay interest on cash deposits from non-residential customers at the rate of six percent (6%) per annum, without deduction for any taxes thereon. Non-residential accounts with deposits held for more than a year will receive a credit toward their outstanding balance for any accrued interest. The credit will be applied to the account balance at the end of each calendar year.

**6.5 Time for Paying Deposits**

Upon reconnection of service at a premises previously terminated for non-payment, the Company may require the Applicant or Customer to pay a cash deposit and the Applicant shall have up to 90 days to pay the deposit in accordance with the provisions of Chapter 56. (C)

**6.6 Failure to Pay Full Amount of Cash Deposit**

The Company may deny service to an Applicant who requests service at a premises previously terminated for non-payment if the Applicant fails to pay the first installment of the cash deposit in accordance with the provisions of Chapter 56. The Company may terminate service to a customer who began taking service at a premises previously terminated for non-payment when the Customer fails to pay the full amount of the cash deposit in accordance with the provisions of Chapter 56. At all other premises, the Company shall not be required to provide service to an Applicant or Customer who fails to pay the full amount of the cash deposit within 90 days, and the Company may terminate service to a Customer who fails to pay the full amount of the cash deposit. (C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**7. Point of Delivery of Gas to Customer**

**7.1 Point of Delivery**

The point of delivery of gas to a customer shall be at the outlet side of the curb valve, or the property or lot line if there is no curb valve, at which point title of the gas shall pass to the customer; provided, however, in the territory formerly served under Tariff Gas - Pa. P.U.C. Nos. 6 and 7, the point of delivery shall be the outlet side of the meter at which point title of the gas shall pass to the customer. (See the Description of Territory section of this tariff to identify territory formerly served under Tariff Gas - Pa. P.U.C. No. 6 and Tariff Gas - Pa. P.U.C. No. 7.)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**8. Extensions**

**8.1 Service Connections**

The Company will install the service line from its main to point of delivery, as defined in the Point of Delivery section of this tariff; provided, however;

- (a) In the territories formerly served under Tariff Gas--Pa. P.U.C. No. 6 and Tariff Gas--Pa. P.U.C. No. 7, the Company will install at its expense the service line from its main to a convenient point approximately one-hundred fifty (150) feet inside the customer's property line, absent any abnormal underground conditions or excessive permitting requirements. (See the description of Territory section of this tariff to identify territory formerly served under Tariff Gas--Pa. P.U.C. No. 6 and Tariff Gas--Pa. P.U.C. No. 7.)
- (b) In rural areas, where service is not available directly from the Company, service may be provided from a transmission or production line. It is the sole discretion of the owner of the transmission or production line to allow service from their facilities to the customer. If connection is allowed, the Company's service connection will consist of a tap on the line and a service valve.

**8.2 Capital Expenditure Policy**

**8.2.1 Residential Distribution Service**

The Company, at its discretion, may extend its distribution mains up to a distance of one-hundred fifty (150) feet on any street or highway without cost to an applicant(s), absent any abnormal underground conditions or unusual permitting requirements. When abnormal underground conditions or unusual permitting requirements exist, as determined by the Company, the applicant(s) will be required to pay a refundable cash deposit in an amount determined by the Company. (C)

The applicant(s) will be required to pay a cash deposit to the Company when it is necessary to extend the main line more than one-hundred fifty (150) feet per applicant. The cash deposit will be equal to the difference between the minimum capital investment required to serve the applicant(s)'s gas requirements, excluding the one-hundred fifty (150) foot main allotment per applicant, and the amount of capital that the Company can justify investing in the project, based on the anticipated gas requirements of the applicant(s). The minimum capital investment is the capital expenditure required to serve only the gas requirements requested by the particular applicant(s).

The maximum allowable investment is the amount of capital expenditure which the estimated revenues generated from a proposed project would support and still provide the necessary return to the Company, taking into consideration the estimated additional annual quantities, rate schedule, cost of gas, operating and maintenance expense, interest and taxes.

If the net present value of the project is greater than \$1,000 per applicant, the Company may, at its sole discretion, provide a contribution up to \$1,000 per applicant, to offset installation costs of gas piping incurred by the applicant(s).

(C) Indicates Change

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **8. Extensions - Continued**

#### **8.2 Capital Expenditure Policy – Continued**

##### **8.2.2 Commercial and Industrial Distribution Service**

The applicants will be required to provide a refundable cash deposit to the Company equal to the difference between the minimum capital investment required to serve the applicant's gas requirements and the amount of capital that the Company can justify investing in the project, based on the anticipated gas requirements of the applicant(s). Minimum capital investment is the capital expenditure required to serve only the gas requirements requested by the particular applicant(s).

- (a) Projects Where the Net Present Value of the Cash Flows, Using the Minimum Capital Investment, is Equal to or Greater than Zero.

Such projects are economically feasible provided that there are assurances that the applicant will use the projected quantities of gas for the minimum time period stated in the agreement. Such assurances may be provided in the form of (1) a minimum use agreement, in which applicant contractually agrees to take delivery of certain minimum quantities of gas, and to pay the applicable distribution charges for such quantities, irrespective of applicant's actual consumption of gas or (2) a minimum revenue agreement, in which applicant contractually agrees to pay a minimum amount over the term of the agreement. At the Company's sole discretion, a deposit may be required if the Company is not certain that the applicant will use the quantity of gas, as projected, for the entire Minimum Time Period. The maximum required deposit shall be no more than the minimum capital investment. (C)

- (b) Projects Where the Net Present Value of the Cash Flows, Using the Minimum Capital Investment, is Less than Zero.

The Company shall require a refundable deposit in the amount equal to the net present value when the net present value is less than zero. For example, if the net present value of a project is -\$1,000, the Company shall require a \$1,000 refundable deposit. In addition, if there is uncertainty that the applicant will use the projected quantity of gas for the minimum time period stated in the agreement, the Company may, in its sole discretion, (1) require the Applicant to pay an additional refundable deposit, or (2) require the applicant to enter into a minimum use agreement, in which applicant contractually agrees to take delivery of certain minimum quantities of gas, and to pay the applicable distribution charges for such quantity, irrespective of applicant's actual consumption of gas, or (3) require applicant to enter into a minimum revenue agreement, in which applicant contractually agrees to pay a minimum amount over the term of the agreement. The additional refundable deposit, if required, shall be no more than the combined total of the Company's minimum capital investment and the net present value. For example, if the Company's minimum capital investment is \$10,000 and the net present value of the project is -\$1,000, the applicant shall be required to provide an additional \$9,000 deposit. (C)

For purposes of subsection (a) and (b), above, the maximum allowable investment is the amount of capital expenditure which the estimated revenues generated from a proposed project would support and still provide the necessary return to the Company, taking into consideration the estimated additional annual quantity, rate schedule, cost of gas, operating and maintenance expense, interest and taxes.

(C) Indicates Change

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**8. Extensions – Continued**

**8.2 Capital Expenditure Policy – Continued**

**8.2.3 Reduction or Elimination of Deposit**

In any case where a deposit is required, it may be reduced or eliminated, if in the Company's judgment, the institution of such service will benefit other customers within a reasonable period of time.

**8.2.4 Payment Period of Deposit**

When an applicant's projected annual usage is greater than 64,400 therms, the Company and the applicant may negotiate the period over which the deposit will be paid. If the applicant pays thirty percent (30%) of the deposit prior to commencement of the line extension construction, the remaining balance of the deposit may be paid over a period that is agreed upon between the Company and the applicant. Otherwise, the payment period will not exceed ten (10) years. The terms of any payment period will be memorialized in an agreement between the applicant and the Company. The installment amount will be added to and included in the Customer Charge line item on the customer's bill.

(C)

**8.2.5 Taxes on Deposits for Construction & Customer Advances**

Any deposit, advance or other like amounts received from the applicant which shall constitute taxable income as defined by the Internal Revenue Service will have the income taxes segregated in a deferred account for inclusion in rate base in a future rate case proceeding. Such income taxes associated with a deposit or advance will not be charged to the specific depositor of the capital.

(C) Indicates Change

---

**Issued: December 14, 2016**

**Mark Kempic  
President**

**Effective: December 19, 2016**

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**8. Extensions - continued**

**8.3 Deposits and Refunds**

When a deposit is required by the Company, the terms and conditions of the project and the refund will be specified in an agreement between the Company and the applicant.

Part or all of the deposit may be subject to refund to the applicant upon such basis or conditions as may be mutually agreeable to the Company and the applicant.

**8.4 Ownership and Maintenance**

The Company shall own, maintain and renew, when necessary, its main extension and/or service line from its main to the point of delivery, as defined in Rule 7.1.

**8.5 Interference with Facilities**

The Company's main, service line, curb valve shall not be opened, tampered or interfered with at any time. Any action taken, without the Company's prior knowledge, will be considered an action endangering the safety of a person or the integrity of the Company's delivery system and will be grounds for immediate termination of service.

**8.6 Special Facilities**

Any special services, facilities, instrumentalities or non-standard construction methodologies which may be rendered or furnished by the Company for an applicant or customer at his request or at the direction of a governmental authority, and not provided for in the Company's rate schedules, and not ordinarily, necessarily, or directly involved in the furnishing of natural gas distribution service, including but not limited to any distribution system improvements necessary to serve customers seeking to add gas fired generating units, natural gas vehicle filling stations or other customer equipment that places higher than typical demands on the distribution system, shall be paid for by the applicant or customer for whom such services, facilities, instrumentalities or non-standard construction methodologies are furnished, and such costs shall be in addition to the charges for natural gas distribution service provided for in the applicable rate schedule or in addition to any deposit required under this section.

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**9. Rights-of-Way**

**9.1 Company Facilities on Applicant or Customer's Property**

**(C)**

When, in order to serve an applicant or customer, it is necessary to extend the Company's facilities over or through the applicant or customer's property, the applicant or customer may be required to enter into a right of way agreement with the Company in which the applicant or customer shall grant to the Company all necessary easements or rights of way on property owned by the applicant or customer at no cost to the Company. Any such easement or right of way shall be recorded and shall run with the land. Applicant or customer will be required to save the Company harmless from claims to the easements or rights of way granted to the Company pursuant to this tariff provision.

**9.2 Procurement by Applicant or Customer**

**(C)**

When, in order to provide natural gas distribution service to an applicant or customer, it is necessary to extend the Company's facilities over or through the property of a third party, the applicant or customer shall, at a minimum, use its best efforts to assist the Company in acquiring any necessary easements or rights of way on property owned by third parties. The applicant or customer may be required to secure to, and for, the Company, all necessary and convenient easements or rights of way and to pay the costs incident thereto. The applicant or customer shall accept service subject to any limitations or restrictions contained in the easement or right of way agreement.

**9.3 Delays**

**(C)**

Applications for service from facilities to be constructed where a right of way is not owned by the Company, will only be accepted subject to delays incident to obtaining a satisfactory easement or right of way. The Company shall not be obligated to proceed with the capital expenditure and the Company's agreement to construct facilities to serve the applicant or customer may be terminated at the discretion of the Company if: (1) the applicant or customer fails to enter into a right of way agreement or easement with the Company as required by the provisions of this Tariff regarding Company Facilities on Applicant or Customer's Property; or (2) the Company is not able to obtain such third party easements or rights of way upon terms and conditions (including cost) mutually agreeable to the Company and such third party property owner(s). In the event of such termination, the applicant or the customer shall be responsible for all costs expended or obligated by the Company related to the proposed facilities at the time of termination.

(C) Indicates Change

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **10. Introduction of Service**

#### **10.1 Customer to be Present When Service is Commenced**

As a safety precaution, the customer, or an adult representative of the customer, shall specify the time when gas service is to be turned on, and the Company will not turn on such service unless said customer or adult representative so directs.

### **11. Company Equipment on Customer's Premises**

#### **11.1 Maintenance**

The Company shall keep in repair and maintain its own property installed on the premises of the customer.

#### **11.2 Customer's Responsibility**

The customer shall be responsible for safe keeping of the Company's property while located on the customer's premises. In the event of injury or destruction of any such property from the act of negligence of the customer or his agent, the customer shall pay the costs of repairs and replacement.

#### **11.3 Protection by Customer**

The customer shall protect the equipment of the Company on his premises, and shall not permit any person, except a Company employee having proper Company identification, to break any seals upon, or do any work on, any meter, service pipe or other equipment of the Company located on the customer's premises.

#### **11.4 Tampering**

In the event of the Company's meters or other property being tampered or interfered with, the customer being supplied through such equipment shall pay the amount which may be reasonably estimated to be due for service used but not registered on the Company's meter, and for any repairs, replacements or changes in facilities required, as well as for costs of inspections, investigations and protective installations.

#### **11.5 Access to Premises**

The Company, or its authorized agents, shall have access at all reasonable times to the property or premises in or on which gas is used, to determine if the gas is being carried, distributed and burned in a proper and safe manner and in accordance with these Rules and Regulations, or to read, inspect and test the meter or house lines and other appliances, equipment or facilities. Refusal on the part of the customer to allow access to his premises shall constitute sufficient cause for turning off the gas supply to such premises.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**11. Company Equipment on Customer's Premises - continued**

**11.5 Access to Premises - Continued**

In the event the customer does not provide access during a 12 consecutive billing cycle period to read the meter, upon notice from the Company, the customer must choose from one of the following three options: (C)

- (1) To schedule a service call to gain access to the premises for purposes of inspection or meter reading. The Company will provide one service call annually to customers for the purpose of gaining access. If a customer requests to schedule an additional service call during a 12 consecutive billing cycle period, the customer will be assessed a charge for a one hour service call. Additionally, if the customer fails to meet a scheduled appointment without good cause and without providing a 24 hour notice of cancellation, the Company may charge for one hour of service time. If the Company fails to meet a scheduled appointment without good cause and without providing 24 hour notice of cancellation, the Company may credit the customer's account with a credit equal to one hour of service time; or (C)
- (2) To install, at the Customer's expense, telemetering facilities for purposes of monitoring and/or billing customer usage. Customer shall provide and maintain phone and/or electric lines to the location of such facilities as specified by the Company; or
- (3) To install, an electronic meter-reading device for the purpose of monitoring and/or billing customer usage.

If the customer does not select one of the above three options within 60 days after notice from the Company, the Company reserves the right in its sole discretion to implement one of the above three options. If the customer refuses to allow the Company to implement one of the above three options, it will be grounds for termination. (C)

**Issued: December 19, 2014**

**M. R. Kempic  
President**

**Effective: December 20, 2014**

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**12. Selection of Rate Schedule**

**12.1 Choice of Rate and Company Assistance**

Where optional rate schedules are available for the same class of service, the customer shall designate the schedule he desires. Where selection of the most favorable schedule is difficult to predetermine, the Company will, at the request of the customer, assist the customer in the choice of the schedule most advantageous to the customer. The customer will be given reasonable opportunity to change to another schedule, but the Company shall not be required to make refunds for any previous billing under any schedule prior to the time of receipt of a written request from the customer for a change to another schedule.

While the Company will explain the contents of each of its rate schedules to customers, the Company shall not be required to assist customers in choosing between sales service and distribution service or in evaluating proposals of natural gas suppliers.

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**13. Service Continuity**

**13.1 Regularity of Supply**

The Company will use reasonable diligence to provide supply service that is reasonably continuous, and without interruption to those customers purchasing their gas supply from the Company, and the Company will use reasonable diligence to provide distribution service that is reasonably continuous, regular and without interruption to those Customers purchasing distribution service from the Company. The Company shall not be liable for failure to furnish a sufficient supply of gas or for failure to distribute the Customer's gas to the Customer arising from any cause whatsoever, beyond the Company's control. The liability of the Company for damages for failure to furnish a sufficient supply of gas, or for failure to distribute Customer's gas to it shall be limited to an amount equivalent to the Customer's proportional monthly customer service charge for the period of service during which a supply or distribution failure occurs, unless otherwise negotiated between the Company and the customer. In no event shall the Company be liable for extraordinary or consequential damages arising in any manner whatsoever as a result of supply or distribution failure.

**13.2 Interruption of Service**

The Company may temporarily interrupt service where necessary to effect repairs or maintenance, to eliminate an imminent threat to life, health, safety, or substantial property damage, or for reasons of local, State or national emergency; provided, however, that if such interruption exceeds seven (7) days in any one billing cycle, the applicable customer charge and the quantity of gas specified in each rate block shall be reduced prorata.

(C)

**13.3 Notice of Trouble**

The customer shall notify the Company immediately should the service be unsatisfactory for any reason, or should there be any defects, leaks, trouble, or accident affecting the supply of gas.

**13.4 Force Majeure**

Neither Company nor customer shall be liable in damages to the other for any act, omission circumstance occasioned by or in consequence of any acts of God, strikes, lockouts affecting the Company or its suppliers of gas, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lighting, earthquakes, fires, storms, floods, washouts, arrests and restrains of rulers and peoples, civil disturbances, explosions, breakage or accident to machinery or lines of pipe, the binding order of any court or governmental authority which has been resisted in good faith by all reasonable legal means, and any other cause, whether of the kind herein enumerated or otherwise, not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. Failure to prevent or settle any strike or strikes shall not be considered to be a matter within the control of the party claiming suspension.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**14. Customer's Use of Service**

**14.1 Precautions to be Taken by Customer**

A customer shall take due care to prevent any waste of gas. The responsibility of detection of defects and leaks on the customer's premises, and in the service line when owned by the customer (See the "Service Connections" paragraph under Rule 8. Extensions of this tariff), is upon the customer. Defects among other things shall mean failure or deficiency of gas, irregular supply, leakage and excessive pressure. In case of detection of any defect within his premises, the customer shall immediately vacate the premises and then, immediately thereafter, notify the Company so that the conditions existing may receive prompt and proper attention. When gas has been shut off because of a leak in house lines or fixtures or other hazardous conditions of service, it shall not be turned on again until such leak or other hazardous conditions have been repaired and made safe either by a competent plumber or gas-fitter.

(C)

**14.2 Sale of Gas by Customer**

The customer shall not sell gas purchased by him from the Company to other occupants of the premises or to other premises without the written permission of the Company.

**14.3 Fluctuations**

Gas service must not be used in such a manner as to cause unusual fluctuations or disturbances in the Company's supply system, and in the case of a violation of this rule, the Company may discontinue service or require the customer to modify his installation and/or equip it with approved controlling devices.

**14.4 Liability for Damages**

In the absence of proof of causal negligence, the Company shall not be liable for any injury to persons or damage to property arising or accruing in any manner whatsoever from the use of gas.

**14.5 Residential Appliance Efficiency Information**

The Company shall maintain a list of the names and telephone numbers of the major manufacturers of residential gas appliances. Upon request from a customer, which can come via e-mail (cpacustserv@nisource.com), letter, or phone call, the Company will provide the customer with a particular manufacturer's telephone number and address so that the customer may contact the manufacturer directly for energy efficiency information.

(C) Indicates Change

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

### **15. Measurement**

#### **15.1 Measurement of Gas**

Except as herein otherwise provided, the measurement of gas service shall be by meters purchased and installed by the Company. The meter will be of such size and type as the Company may determine to adequately serve the customer's service requirements, and the Company may from time to time, change or alter the equipment to provide for accurate measurement. To determine measured usage, factors such as those for pressure, temperature, specific gravity and deviation from the laws for ideal gases shall be applied.

#### **15.2 Meters Not Available**

In cases where meters are not available due to circumstances beyond the control of the company, and the necessity for rendering gas service to the customer is urgent, the Company may, by written agreement with the customer, commence service and render bills temporarily on the basis of estimated gas consumption.

#### **15.3 Measuring Equipment**

Unless otherwise agreed upon, the Company will own, install, maintain and operate measuring stations equipped with displacement or flow meters and other necessary measuring equipment to determine the quantity of gas delivered. The gas delivered shall be measured in accordance with the latest approved methods in use in the industry generally. Orifice meters shall be installed and operated, and gas quantities computed, in accordance with Report No. 3 of the Gas Measurement Committee of the American Gas Association, as amended, expanded or superseded from time to time, applied in a practical and appropriate manner. Displacement meter readings shall be adjusted for pressure and temperature conditions. Customer may install check measuring equipment, provided such equipment is installed so as not to interfere with the operations of the Company. The Company and Customer, in the presence of each other, shall have access to the other's measuring equipment at all reasonable times, but, unless otherwise agreed upon, the reading, calibrating and adjustment thereof and the changing of charts shall be done only by the owner thereof. Both the Company and Customer shall have the right to be present at the time of any installing, reading, cleaning, changing, repairing, inspecting testing, calibrating or adjusting done in connection with the other's measuring equipment. The records from such measuring equipment shall remain the property of their owner, but, upon request, each will submit to the other its records and charts, together with calculations therefrom, for inspection, subject to return within thirty (30) days after receipt thereof. Customer shall exercise reasonable care in the installation, maintenance and operation of its equipment so as to avoid any inaccuracy in the determination of the quantity of gas delivered.

Equipment necessary to provide Telemetry shall be an option available to customer accounts that are served under Rate Schedules SDS, LDS or MLDS when the existing meter at the customer's facility is equipped with an instrumentation drive. The meter and associated Telemetry equipment shall be the property of the Company and the Company will be responsible for installing and maintaining the equipment. (C)

(C) Indicates Change

**Issued: August 16, 2019**

**M. A. Huwar  
President**

**Effective: October 25, 2019**

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**15. Measurement - continued**

**15.3 Measuring Equipment - continued**

When customer-owned analog telephone lines are used by the Company to obtain the daily meter reading information, the installation, maintenance and repair of the analog telephone lines and the monthly costs associated with such analog telephone lines will be the sole responsibility of the customer.

**15.4 Meter Reading**

The Company may read any of its meters at least once each billing cycle. The meter reading is used to determine a customer's usage for billing.

The Company may determine a meter reading for billing purposes by: 1) sending a representative to the location of the meter at the customer's premises to obtain the reading; 2) using Telemetry to upload the meter reading; 3) dialing a customer provided analog telephone number established to provide the meter reading; 4) estimating a meter reading after unsuccessfully attempting to obtain an actual reading; or 5) obtaining a reading using an automated meter reading device. (C)

**15.4.1 Estimated Meter Reading**

The Company may estimate a meter reading if: 1) the Company's agent or representative is unable to gain access to the meter; 2) the meter or the meter reading dial has malfunctioned thus preventing the meter from reflecting an accurate reading, or 3) other circumstances exist that prevent the Company from reading the meter.

When the Company is unable to obtain an actual meter reading, an estimated meter reading shall be used to determine the usage. The estimated reading will be based on prior usage at the premises for a similar period of time and corrected for current conditions. (C)

In order to avoid a bill based on an estimated meter reading, a customer may record the meter reading and submit it to the Company. If such reading is received by the Company the bill for the current billing cycle may be calculated using the meter reading provided by the customer instead of the meter reading estimated by the Company.

**15.4.2 Automated Meter Reading**

All readings by an Automated Meter Reading (AMR) device shall be deemed actual readings. Upon a customer request, the Company shall secure an in-person meter reading to confirm the accuracy of an automatic meter reading device when a customer disconnects service or a new service request is received. The Company may charge a fee to obtain the in-person meter reading.

**15.4.3 Daily Meter Reading using Analog Telephone Lines**

A customer utilizing analog telephone service as the communication line that the Company uses to obtain daily measurement information on a daily basis, shall no longer hold the Company responsible for providing daily measurement information on a daily basis if and when the telecommunications company discontinues analog service to the customer.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**15. Measurement - continued**

**15.4 Meter Reading - continued**

15.4.4 Daily Meter Reading by Telemetry

(C)

Electronic access to a meter's daily measurement information using Telemetry shall be available to a customer or the customer's specified agent of record when:

1. the customer's account is served under Rate Schedule SDS, LDS or MLDS; and
2. an instrumentation drive exists on the meter that serves the customer's facility; and
3. all equipment necessary to capture, correct and transmit the daily meter reading to the Company has been installed.

The usage for the gas day ending at 10:00 AM Eastern Time shall be available electronically through a secure internet address by 1:00 PM Eastern Time that same calendar day for the customer, the customer's current agent of record, or any other customer-authorized party.

**15.5 Estimated Usage**

The Company may use an estimated meter reading to determine usage for billing. Usage is estimated when: (1) meter readings are on a bimonthly basis; or (2) when the Company's agent or representative is unable to gain access to the meter location; or (3) any meter or measuring device fails to register the actual gas usage for any period of time; or (4) the Company is unable to obtain a meter reading for causes beyond its control.

In those instances where, during normal working hours, the Company's agent or representative is unable to gain access to the meter to obtain a meter reading, the number of estimated readings shall be limited to six consecutive months, and the customer's service, thereafter, is subject to termination. (See the Grounds for Termination of Service paragraph in the Termination of Service section of this tariff.)

The estimated usage shall be determined by subtracting the previous meter reading, whether actual or estimated, from the current estimated meter reading. For billing purposes, the estimated usage is subject to a therm adjustment, and where applicable, a temperature and pressure adjustment. The estimated usage will be used to calculate the customer bill.

The customer shall be obligated to pay the bill based on the estimated consumption as though the bill was based on an actual meter reading. The customer's gas service will be subject to termination for failure to pay the bill as specified in the Grounds for Termination of Service paragraph of this tariff.

Bills for usage based on estimated meter readings shall be subject to adjustment for any unusual circumstances found to have affected the quantity of gas used, or for obvious errors in estimates. When an actual meter reading is obtained that indicates previous estimates are inaccurate, adjustments to the estimates shall be reflected in the next bill issued to the customer.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**15. Measurement - continued**

**15.6 Flowing Temperature**

The Company shall determine the temperature of the natural gas flowing through the meter or meters by recorder, from established tables for the location involved, or by use of temperature sending elements used in conjunction with electronic measuring devices.

**15.7 Therm Adjustment**

The Company shall apply a therm multiplier to metered cubic foot usage to adjust for heating value. This therm multiplier shall be calculated monthly based on the most recent reported heating value for the Pipeline Scheduling Point ("PSP") within the Company's service territory in which the customer's meter is located.

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**16. Meter Tests**

**16.1 Meter Tests**

The Company shall have the right to test any meter at any time at its expense and, if such test discloses the meter is registering on an average (a) more than two percent (2%) slow; (b) more than two percent (2%) fast, or if the meter is found not to register for any period, the Company shall render a bill or make a refund as the case may be, pursuant to Title 52 Pa. Code Section 59.22.

**16.2 Request Tests**

The customer shall have the right to request the testing of his meter and the Company will, upon written application, have the same removed, sealed and tested in accordance with Title 52 Pa. Code Section 59.21; subject, however, to the customer depositing with the Company the sum of money required by such rule to cover the expense of such test. If such meter, when tested, registers on an average between two percent (2%) fast and two percent (2%) slow, the meter shall be treated for all purposes hereof as registering correctly, and the said sum of money required to be deposited with the Company by the customer shall be forfeited to the Company to cover the cost of such test. If such test shall show such meter to be incorrect beyond the above referred to allowable variation, then the Company shall return such deposit and make the necessary adjustment in the billing for gas service as required by Title 52 Pa. Code Section 59.22.

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**17. Payment Terms**

**17.1 Billing Period**

Bills for service to all customers will be rendered monthly at the rates set forth from time to time in the Company's then effective Tariff on file with the Pennsylvania Public Utility Commission.

The Company will offer each customer participating in the Choice program, the option of a consolidated bill by the Company which contains the NGS charges in a format that complies with the Commission's Customer Information and Disclosure Guidelines. If the NGS provides billing services for its charges, the customer can choose to receive one bill containing only the Company's charges and a second bill from the NGS containing only the NGS's charges. The conditions under which the Company will exchange data with the NGS to effectuate either of these billing options is set forth in more detail in the Rules Applicable to Distribution Service.

**17.2 Payment Period**

Bills are due upon transmittal and payment may be made by the customer by mailing a check to the address for payment designated on the bills, or at a Columbia authorized collection agency, or any other method designated by the Company. The final date for payment will not fall on a Saturday, Sunday or holiday, and will be at least twenty (20) days after transmittal for residential customers and at least fifteen (15) days after transmittal for other than residential customers. Failure to receive the bill will not excuse customers from payment obligations and payments must be made without regard to any counter claims whatsoever.

**17.3 Payments by Mail**

Any remittance received by mail at the address for payment designated by the Company on the customer's bill, bearing U.S. Post Office stamp date corresponding with or previous to the last date of payment, will be accepted by the Company as compliance with the terms of payment.

**17.4 Payment of Cash Deposits**

Upon reconnection of service at a premises previously terminated for non-payment, the Applicant may be required to pay a deposit and shall have up to 90 days to pay the deposit in accordance with the provisions of Chapter 56.

(C)

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**17. Payment Terms – continued**

**17.5 Disputed Bills**

In the event of a dispute between the customer and the Company respecting any bill, the Company will forthwith make such investigation as may be required by the particular case and report the result thereof to the customer.

The first disputed bill investigation in a twelve consecutive billing cycle period will be provided at no charge, any subsequent request by the customer in the same twelve consecutive billing cycle period will be assessed the cost of the service call unless the investigation detects metering or some other Company error. The charge to the customer shall be limited to the Company's costs based upon the actual time spent on the service call, with a maximum charge equal to a 45 minute service call; or the maximum charge for a meter test pursuant to Commission regulations if applicable.

When the Company has made such a report to the customer, either (1) sustaining the bill as rendered or (2) submitting a corrected bill, the date of the bill for purposes of payment shall be considered to be as of the date of said report, and the customer shall pay the amount due within the time provided in these Rules and Regulations, and failure to so pay shall render the customer and his service liable to the penalties herein provided. Any amounts received by the Company in excess of the amount disclosed to be due by the Company's investigation of the dispute shall be forthwith returned to the customer if the error arose from any cause other than the incorrect estimating of a customer's consumption for the period in dispute. Errors arising through the incorrect estimating of a customer's consumption shall be adjusted in accordance with the provisions of Rule 15.5 of these Rules and Regulations.

**17.6 Interest on Overpayments**

The Company will pay interest on refunds of customer overpayments at the rate of six percent (6%) per annum without deduction for any taxes thereon, except where customer overpayments are refunded within ninety (90) days of overpayment. The term "customer overpayment" shall not include any balance that may arise under the Company's budget billing program.

**17.7 Budget Billing**

The Company shall offer a budget billing option that allows year-round enrollment that evenly spreads annual projected bill amounts over the term of the budget billing program period.

(C)

(C) Indicates Change

**Issued: December 11, 2018**

**M. A. Huwar  
President**

**Effective: December 16, 2018**

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**17. Payment Terms - continued**

**17.8 Dishonored Tender of Payment**

(C)

If the Company receives a negotiable instrument from a residential Applicant or a Residential Customer as payment of any bill, charge, or deposit due, and if such instrument is subsequently dishonored or is unable to be collected for any reason, the Company may charge the residential Applicant or Customer a service charge in the amount of twenty dollars (\$20.00). The service charge may be billed separately by the Company.

If the Company receives a negotiable instrument from a non-residential Applicant or Customer as payment of any bill, charge, or deposit due, and if such instrument is subsequently dishonored or is unable to be collected for any reason, the Company shall charge the applicant or customer a service charge in the full amount permitted by law for each dishonored negotiable instrument. The service charge may be added to the monthly bill of the non-residential customer, or it may be separately billed to the Applicant or Customer.

---

**Issued: December 11, 2018**

**M. A. Huwar  
President**

**Effective: December 16, 2018**

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**18. Termination of Service**

**18.1 Definition**

Termination of service, as it applies to this Section 18, shall mean the cessation of service, whether temporary or permanent, without the consent of the customer.

**18.2 Grounds for Termination of Service**

After notice as provided in the Notice of Termination of Service section of this tariff, the Company may terminate service provided to a customer for any of the following actions by the customer or his guarantor:

1. Nonpayment of an undisputed delinquent account.
2. Failure to comply with the material terms of a payment arrangement.
3. Failure to complete payment of a deposit, provide a guarantee of payment or establish credit.
4. Failure to permit access to meters, service connections or other property of the Company, including obstructed or hazardous access (this will eliminate current Termination for Cause section), for the purpose of replacement, maintenance, repair, or meter reading.
5. The Company may terminate service to a User Without Contract after limited notice as specified in the "Notice of Termination of Service section – Notice to User Without Contract".
6. After having received notice of termination, a Customer tenders payment to avoid termination or to obtain reconnection, and that payment is subsequently dishonored, revoked or cancelled, and has not been remedied or full payment has not been rendered within three business days after notice by the Company as specified in the Notice When Dishonored Payment After Receiving Notice of Termination subsection of this Tariff. (C)

The Company may also remove its equipment in case of nonpayment of bill.

**18.3 Notice of Termination of Service**

**18.3.1** Prior to terminating service as specified in the Grounds for Termination of Service section of this tariff, with the exception of User Without Contract, the Company:

1. Shall provide written notice of the termination to the customer at least ten (10) days prior to the date of the proposed termination. The termination notice shall remain effective for 60 days.
2. Shall attempt to contact the customer or occupant, to provide notice of the proposed termination at least three days prior to the scheduled termination using one or more of the following methods: (C)
  - a. in person; or
  - b. by telephone - phone contact shall be deemed complete upon attempted calls on two separate days to the residence between the hours of 8 a.m. and 9 p.m. if the calls were made at various times each day; or
  - c. by email, text message or other electronic messaging format consistent with the Commission's privacy guidelines and approved by Commission order. The Customer must affirmatively consent to be contacted using a specific electronic messaging format, for purpose of termination.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**18. Termination of Service - continued**

**18.3 Notice of Termination of Service – continued**

**18.3.1 - continued**

3. During the months of December through March, unless personal contact has been made with the customer or responsible adult by personally visiting the customer's residence, the Company shall, within 48 hours of the scheduled date of termination, post a notice of the proposed termination at the service location.
4. After complying with items 2 and 3 above, the Company shall attempt to make personal contact with the customer or responsible adult at the time service is terminated. Termination of service shall not be delayed for failure to make personal contact.

The Company shall not be required to take any additional actions prior to termination.

(C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**18. Termination of Service - continued**

**18.3 Notice of Termination of Service – continued**

**18.3.2 Notice to User Without Contract**

Three days prior to terminating service to a User Without Contract, the Company will post the premises with a notice directing the occupant to contact the Company to provide application for service. If an application is not received within 3 days, the Company may terminate service without further notice.

**18.3.3 Notice When Dishonored Payment after Receiving Notice of Termination**

(C)

When a customer tenders a payment to avoid termination or to obtain reconnection of terminated service, and that same payment is subsequently dishonored, revoked, or cancelled, the Company shall issue a termination notice three days prior to a new date of service termination.

**18.4 Grounds for Immediate Termination Without Prior Notice**

Gas service may be immediately terminated without prior notice specified in the Notice of Termination of Service section in any of the following situations:

1. Fraud or material misrepresentation of the customer's identity is used for the purpose of obtaining service.
2. Any customer action taken that may endanger the safety of a person or the integrity of the Company's delivery system.
3. Tampering with meters or other Company equipment.
4. Unauthorized use.
5. Hazardous or defective customer installations.
6. Customer's equipment or use thereof might injuriously affect the equipment of the Company or the Company's service to other customers.

**18.5 Post Termination Notice**

Upon termination, the Company shall make a good faith attempt to provide a post termination notice to the customer or a responsible person at the affected premises, and in the case of a single meter, multiunit dwelling, the Company shall conspicuously post the notice at the dwelling, including in common areas when possible.

**18.6 Timing of Termination**

The Company may terminate service for the reasons set forth in the Grounds for Termination of Service section of this tariff Monday through Thursday as long as the Company can accept payment to restore service on the following day and can restore service, consistent with the Reconnection of Service section of this tariff.

(C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**18. Termination of Service - Continued**

**18.7 Winter Termination**

Unless otherwise authorized by the Public Utility Commission, after November 30 and before April 1, the Company shall not terminate service to residential customers with household incomes at or below 250% of the federal poverty level except for: 1) customers whose actions are included in the Grounds for Immediate Termination Without Prior Notice section of this tariff; and 2) any person receiving gas service as a User Without Contract.

The Company will use financial information from the customer provided within the most recent twelve (12) month period to determine if a customer exceeds the 250% federal poverty level threshold.

**18.8 Medical Certificate**

The Company shall not terminate service to a premises when a licensed physician, nurse practitioner, or physician's assistant has certified that the customer or a member of the customer's household is seriously ill or afflicted with a medical condition that will be aggravated by cessation of service. The customer shall obtain a Medical Certificate from a licensed physician, nurse practitioner or physician's assistant verifying the condition and shall promptly forward it to the Company. The Medical Certificate procedure shall be implemented in accordance with Commission regulations.

(C)

**18.9 Termination of Service from Transmission Pipelines**

The Company may, in its discretion, remove, relocate or abandon transmission pipelines either temporarily or permanently, or change the use thereof and cease to furnish gas to such customers located along the route thereof, or the company may cease to furnish gas to its customers served directly from production or transmission pipelines of other companies, if for any reason said lines are not available to serve gas to said customers, without prejudice to the right of the Company to continue to supply gas to other customers of the Company. In case of termination of service from a transmission pipeline, thirty (30) days' notice shall be given by the Company to the customer.

**18.10 Reconnection of Service**

Whenever a customer's gas shall be turned off or his meter disconnected at his request or by reason of noncompliance with these Rules and Regulations or the Rules, Regulations or Orders of the Pennsylvania Public Utility Commission, except for repairs, want of supply or any leak of gas from customer or Company lines, the same customer, whether an applicant or ratepayer as defined at 52 Pa. Code § 56.2, shall pay a reconnection charge of twenty-four dollars (\$24) per visit for resumption of service at the same address within twelve months after discontinuance or termination, in addition to any other charges provided for in the rate schedule applicable to the customer.

**18.10.1 Timing of Reconnection**

When service to a residential dwelling has been terminated and, provided the customer or applicant has met all applicable conditions, the Company shall reconnect service as follows:

(C)

- a. Within 24 hours for erroneous terminations or upon receipt by the Company of a valid Medical Certificate.
- b. Within 24 hours for terminations occurring after November 30 and before April 1.
- c. Within three calendar days for erroneous termination requiring street or sidewalk digging.
- d. Within three calendar days from April 1 to November 30 for proper terminations.
- e. Within seven calendar days for proper terminations requiring street or sidewalk digging.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**18. Termination of Service - Continued**

**18.10 Reconnection of Service – continued**

**18.10.2 Payment to Restore Residential Service**

The Company shall provide for and inform the applicant or customer of a location where the customer can make payment to restore service.

The Company may require:

- a. Household Income Exceeding 300% of Federal Poverty Level and all Customers Who Have Defaulted on Two or More Payment Arrangements. The Company may require full payment of any outstanding balance incurred together with any reconnection fees by the customer or applicant prior to reconnection of service if the customer or applicant has an income exceeding 300% of the federal poverty level or has defaulted on two or more payment arrangements. If a customer or applicant with household income exceeding 300% of the federal poverty level experiences a life event the customer shall be permitted a period of not more than three months to pay the outstanding balance required for reconnect. For purposes of this paragraph, a life event is:
  - I. A job loss that extended beyond nine months.
  - II. A serious illness that extended beyond nine months.
  - III. Death of the primary wage earner.
- b. Household Income Exceeding 150% of Federal Poverty Level and Not Greater Than 300% of Federal Poverty Level. The Company may require full payment of any reconnection fees together with repayment over 12 months of any outstanding balance incurred by the customer or applicant if the customer or applicant has an income exceeding 150% of the federal poverty level but not greater than 300% of the federal poverty level.
- c. Household Income Not Exceeding 150% of Federal Poverty Level. The Company may require full payment of any reconnection fees together with payment over 24 months of any outstanding balance incurred by the customer or applicant if the customer or applicant has an income not exceeding 150% of the federal poverty level.
- d. The Company may also require the payment of any outstanding balance or portion of an outstanding balance if the applicant resided at the property for which service is requested during the time the outstanding balance accrued.
- e. The Company may establish that an applicant previously resided at a property for which residential service is requested through the use of mortgage, deed or lease information, a commercially available consumer credit reporting service or other methods approved as valid by the Public Utility Commission including those mentioned under the Prior Debts section of this Tariff.

When a customer payment is made to reconnect residential service, and that payment is subsequently dishonored, revoked, cancelled or not authorized, the Company may resume notice of termination by issuing a three day termination notice. If payment has not been cured or paid in full within three business days from the time the termination notice is issued, the Company may terminate service according to applicable Commission regulations. The Company may require a Residential Customer or Applicant to cure a dishonored payment as a condition of entering into a payment arrangement for a remaining account balance.

**Columbia Gas of Pennsylvania, Inc.**

---

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**18. Termination of Service - continued**

**18.11 Compliance with Pennsylvania Public Utility Commission Regulations**

Notwithstanding the provisions for termination of service set forth under this Section 18, the Company may not terminate gas service unless in compliance with the Rules, Regulations or Orders of the Pennsylvania Public Utility Commission pertaining thereto and in effect at the time of such termination.

(C) Indicates Change

---

**Issued: January 20, 2015**

**M. R. Kempic  
President**

**Effective: December 22, 2014**

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**19. Discontinuation of Service**

**19.1 Definition**

Discontinuation of Service, as it applies to this Section 19, shall mean the cessation of service with the consent of the customer.

**19.2 Discontinuation by Customer**

A customer who intends to vacate the premises, discontinue the use of gas or terminate his liability to pay for gas distributed to the premises, shall give at least seven (7) days' notice to the Company. If such notice is given, the customer shall not be liable for service taken after the effective date of such notice. If at least seven (7) days' notice is not given, the customer shall be liable for service taken from the time following the Company's receipt of customer's notice until such time as a final reading is taken, or the final bill is estimated, or service is placed in the name of a successor customer, or the customer provides the meter reading which is subject to review by the Company. If no notice is given by the customer, the customer is liable for service taken until such time as service is placed in the name of a successor customer or the Company determines the property to be vacant. The customer shall be liable for gas usage in accordance with the procedure stated in Section 19.3.

**19.3 Final Bill**

Except as otherwise provided in this section, final bills for customers on rate schedules RSS, RDS, SGS and SCD may be based on estimated consumption without an actual meter reading.

When disconnect and reconnect orders are executed on the same day, final bills may be estimated. When a final bill is estimated, consumption shall be based on average daily usage for non-heat usage, average usage per degree day for heating usage, and the number of days in the final billing period in accordance with Section 19.2. Final bills will not be estimated when usage factors cannot be calculated, when a customer specifically requests that the meter be read, or when either the disconnecting or reconnecting customer provides the meter reading which is subject to the Company's review. The Company reserves the right to estimate any customer's final meter reading in instances where access to the meter is not provided within a reasonable time.

When scheduling a discontinuance of service a Residential Customer may request and subsequently receive an in-person meter reading to confirm the accuracy of an automatic meter reading device. The Company may charge a fee to obtain the in-person meter reading. (C)

When disconnect and reconnect orders are executed on different days, an actual meter reading shall be obtained. (C)

**19.4 Compliance with Pennsylvania Public Utility Commission Regulations**

Notwithstanding the provisions for discontinuation of service set forth under this Section 19, the Company may not discontinue service unless in compliance with the Rules, Regulations or Orders of the Pennsylvania Public Utility Commission pertaining thereto and in effect at the time of such discontinuation.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**20. Flexible Rate Provisions**

**20.1 Applicability**

Customers receiving service under Rate Schedules SDS, LDS, RSS, RDS, DGDS, SGSS, LGSS, SGDS, SCD, SS, NSS, MLSS, and MLDS ("Primary Schedule") may be charged a flexible distribution charge with respect to competition from alternate fuels. Service under Rate RSS, and RDS, shall be firm and the Company will maintain firm capacity to serve such customers. Gas Costs to Rate Schedules RSS and RDS will not be flexed. (C)

**20.2 Election of Flexible Rate**

Components of a customer's rate may be lowered when the customer submits a sworn affidavit that a lower rate is required to meet competition from an alternate fuel. Rate components eligible for a downward adjustment include: 1) the Distribution Charge; 2) the Distribution System Improvement Charge Rider; 3) the Customer Choice Rider; 4) the Elective Balancing Service charge; and 5) the retainage percentage when otherwise applicable. (C)

Prior to flexing distribution charges for distribution service customers, the Company may reduce charges that are for recovery of balancing service charges under Rider EBS and/or the retainage percentage applied to the gas received on behalf of the distribution service customer. However, any discount to the retainage percentage undertaken to compete with another NGDC will not be recoverable by the Company in its annual 1307(f) filing.

The Company reserves the right to verify the accuracy of statements included in this affidavit and the right to make final determination as to the quantities of natural gas used in each billing period in place of alternate fuels. The Company will notify the customer of the applicable charge, if lower than the applicable Distribution Charge in the Primary Rate Schedule, that the Company determines is required to meet the delivered price of the alternate fuel four (4) days prior to the beginning of each billing cycle unless the rate is the same as charged by the Company in the prior billing cycle. (C)

The Company will only lower its Distribution Charge below the maximum rate under the Primary Rate Schedule as a last resort, and only to the extent it is necessary to meet the demonstrated competitive alternate fuel price. Any lowered Distribution Charge shall be offered regardless of whether the customer is receiving sales service or Distribution Service. For customers eligible for service under Rate RDS and SCD, the Company will advise NGSS upon request whether a particular customer is receiving or is eligible to receive a lowered Distribution Charge. (C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**20. Flexible Rate Provisions**

**20.2 Election of Flexible Rate – Cont'd**

In the sworn affidavit submitted by the customer, the following must be documented:

- (a) The customer has alternate fuel capability in place and operable or would otherwise construct facilities to obtain gas service from an alternate source;
- (b) The quantity of natural gas transported by the Company which would be displaced by operation of the alternate fuel capability; (C)
- (c) The burner tip cost in thm equivalent of the customer's alternate fuel; and (C)
- (d) If the customer has an agreement with a producer for purchase of gas, the customer must verify that it has exercised all contractual rights available to the customer, including price redetermination, marketability or market reopener provisions, to reduce the city gate price of natural gas delivered to the Company for redelivery to the customer, and that the customer has the right to cease purchases under the agreement. Upon request by the Company customer agrees to submit a true copy of the currently effective agreement or agreements between customer and producer(s) for purchase of natural gas quantities delivered to the Company's city gate for redelivery to the customer. If the customer does not have an outstanding contract with a producer, the customer must verify that the customer is unable to purchase gas at a price, including cost of delivery by Columbia,that is equal to the cost of alternative fuel. (C)

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

**21. Flexible Service Provisions**

(C)

**21.1 Applicability**

The Flexible Service Provisions are applicable when an Applicant, or an existing customer requesting an increase in usage, is located on a portion of the Company's system where capacity limitations exist, which would otherwise require the Company to reject the request for distribution service of total requirements on a year round basis, absent a significant financial contribution from the Applicant or Customer to increase the Company's main line capacity to serve the Applicant's or Customer's load.

**21.2 Availability**

Flexible Service Provisions will be available only to Applicants, or existing customers requesting an increase in usage whose usage will make them eligible for Rate Schedules DGDS, EGDS, EDS, LDS, LGSS, MLDS, MLSS, NCS, CDS, NGV, NSS, SDS, SDSS when:

- a. In its sole discretion, the Company determines that offering the Flexible Service Provisions will not be a detriment to its other Customers or the Company's system; and
- b. But for the Flexible Service Provisions the Applicant or eligible Customer would not take service from the Company; and
- c. The Customer enters into an agreement with the Company specifying the service limitations and any other terms necessary in defining the Flexible Service Provisions.

**21.3 Agreement**

The Company shall enter into an Agreement with an Applicant or an eligible Customer to provide limited natural gas distribution service to the Applicant's or Customer's facilities. The Agreement shall include the specific terms that will define those times and conditions when the Company shall not provide total requirements for distribution service to the Applicant or eligible Customer.

The Agreement may be terminated by the Company, at its sole discretion, if at any time during the term of the Agreement the Company upgrades its facilities and is able to accommodate the Customer's total requirements for distribution service. Should a Customer receiving service pursuant this provision subsequently request year round service, such a request will be treated as an application for new service under this Tariff.

**21.4 Rate**

The rates charged to Customers served under this provision shall be the rates specified or negotiated under the applicable rate schedule within this Tariff.

**21.5 Service Limitations**

In addition to the service limitations set forth in the Agreement, the Company retains all of its ability to issue Operational Orders and Emergency Curtailments as described in these Rules and Regulations Governing the Distribution and Sale of Gas and the Customer served under this Flexible Service Provision is subject to the associated penalties for non-compliance with said Operational Orders and Emergency Curtailments.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

(C)

**22. Quality of Gas Delivered to Company**

**22.1 Quality of Gas at Point(s) of Receipt with an Interstate Pipeline.**

Gas delivered by or on behalf of Customer to Company at point(s) of receipt with an interstate pipeline shall conform to the interstate pipeline's gas quality standards.

**22.2 Quality of Gas at Other Point(s) of Receipt.**

Gas delivered by or on behalf of Customer to Company at point(s) of receipt other than an interstate pipeline shall be commercially free from oil, water, air, salt, dust, gum, gum-forming constituents, harmful or noxious vapors, or other solid or liquid matter which might interfere with its merchantability or cause to or interference with proper operation of the lines, regulators, meters, and other equipment of Company or its customers

Customer will indemnify and hold Company harmless from any suits, actions, debts, accounts, damages, costs, losses and expenses, including but not limited to, attorneys' fees and expenses, arising from personal injury, death, or damage to Company's equipment or facilities or arising from personal injuries, death, or damage to the facilities, products, or equipment of Company's other customers or third parties, or arising from additional hours worked by Company or its other customers or third parties, caused as a result of Customer's gas failing to meet the quality specifications set forth herein.

To assure that the gas delivered by Customer to Company conforms to the quality specifications of this Section, Customer's gas shall be analyzed at the point(s) of receipt from time-to-time as Company deems necessary. The gas delivered shall conform to the following gas quality specifications:

**Gas Quality Specifications<sup>1</sup>**

<b>Gas Quality Parameter Specification</b>	<b>Low</b>	<b>High</b>
Heat Content (Btu/scf) <sup>2</sup>	967	1110
Wobbe Number (+/- 4% from historical average gas, which is 1341 – 1383)	1287	1400
Water Vapor Content (lbs./MM scf)		< 7
Product Gas Mercaptans (ppmv, does not include gas odorants)		< 1
Hydrocarbon Dew Point, (°F) CHDP		15
Hydrogen Sulfide (grain/100 scf)		0.25
Total Sulfur (grain/100 scf)		20
Total Diluent Gases including the following individual constituent limits: Carbon Dioxide (CO <sub>2</sub> ) 2% max Nitrogen (N) 4% max Oxygen (O <sub>2</sub> ) 1% max		5%
Hydrogen		0.3%
Total Bacteria <sup>3</sup> (If no filter installed, then limit is 6.4x10 <sup>7</sup> per 100 scf total bacteria)	Comm Free (≤ 0.2 microns)	
Mercury	Comm Free (< 0.06 µg/m <sup>3</sup> )	
Other Volatile Metals (Lead)	Comm Free (< 213 µg/m <sup>3</sup> )	
Siloxanes as Octamethylcyclotetrasiloxane <sup>4</sup>	Comm Free (< 0.5 mg Si/m <sup>3</sup> )	
Ammonia	Comm Free (< 10 ppmv)	

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

(C)

**22. Quality of Gas Delivered to Company**

**22.2 Quality of Gas at Other Point(s) of Receipt – Cont'd.**

**Gas Quality Specifications<sup>1</sup> – Cont'd**

<b>Gas Quality Parameter Specification</b>	<b>Low</b>	<b>High</b>
Non-Halogenated Semi-Volatile and Volatile Compounds	Comm Free (< 500 ppmv)	
Halocarbons (total measured halocarbons) <sup>5</sup>	< 3 ppmv	
Aldehyde/Ketones	Aldehydes/Ketones must be at a level that does not unreasonably interfere with odorization of Company's gas.	
PCBs/Pesticides	Comm Free (< 1 ppbv)	

1. For purposes of this Tariff, "Commercially Free" is defined as "Not Detectable" relative to typical pipeline gas flowing at the interconnect location that results in RNG, or "Renewable Natural Gas", being compositionally equivalent to flowing supplies. The analytical method, associated detection threshold, and testing facility shall be determined by the Company. Periodic testing will be required where potential Constituents of Concern are reasonably expected.
2. Higher Heating Value is dry, @ 14.73 psia 60°F.
3. An acceptable alternative to Total Bacteria testing would be to include installation of a 0.2 micron particulate filter, coupled with appropriate filter maintenance practices. Initial start-up testing may include filter effectiveness analysis. Customer shall be responsible for all costs associated with acceptable alternatives, including, but not limited to, initial start-up testing.
4. Historical testing and data presented in this document include a siloxane detection threshold of <0.5mg Si/m<sup>3</sup>. Analytical methods have recently been improved resulting in a reduced detection threshold of <0.1mg Si/m<sup>3</sup>. Due to specific limitations of certain identified applications within an affected zone of influence, Company and Customer may agree upon a reduced threshold.
5. Company may refuse to accept gas containing lower levels of halocarbons if Company reasonably determines that such gas is causing harm to its facilities or the gas-burning equipment of its customers, or is adversely affecting the operation of such facilities. In addition, Company and Customer may agree upon a different specification for halocarbons, provided that (1) Customer has delivered RNG to Company for a period of at least five years prior to the effective date of this tariff section, and (2) Customer has demonstrated, to the reasonable satisfaction of Company, that the RNG meeting the agreed-upon specification will not adversely affect (a) the quality of public utility service provided by Company; (b) the operation or Company's equipment; or (c) the operation of the gas-burning equipment of Company's customers.

(C) Indicates Change

## **RULES AND REGULATIONS GOVERNING THE DISTRIBUTION AND SALE OF GAS (Continued)**

(C)

### **22. Quality of Gas Delivered to Company**

#### **22.2 Quality of Gas at Other Point(s) of Receipt – Cont'd.**

As used in the foregoing table, “Btu” means British thermal unit; “scf” means standard cubic foot; “MM” means one million; “CHDP” means cricondenthem hydrocarbon dew point; “ppmv” means parts per million by volume; and “ppbv” means parts per billion by volume. As used in Section 22.2 RNG means gas, consistently primarily of methane, which (1) is derived from biogas produced by landfills, animal farms, wastewater treatment plants, or other sources, and (2) is subsequently processed by removing carbon dioxide, nitrogen, and other constituents in order to convert the biogas into pipeline-compatible gaseous fuel.

The Total Heating Value of the gas shall be determined by taking samples of the gas at the point(s) of receipt at such reasonable times as may be designated by Company. The Btu content per cubic foot shall be determined by an accepted type of calorimeter or other suitable instrument for a cubic foot of gas at a temperature of sixty (60) degrees Fahrenheit when saturated with water vapor and at a pressure of 14.73 psia. The Btu determination designated by Company shall be made by Company at its expense. Any additional Btu determinations requested by Customer shall be at Customer's expense.

Company may, on a not-unduly discriminatory basis, accept volumes of gas, including renewable natural gas, that fail to meet the quality specifications set forth in this tariff section, if Company determines that it can do so without adversely affecting (1) system operations; (2) the operation of the Company's equipment; (3) the operation of gas-burning equipment of Company's other customers; or (4) the quality of public utility service provided by Company. In deciding whether to accept such volumes of gas, the Company shall consider, without limitation, (1) which specifications are not being met; (2) the sensitivity of customer equipment and potential impact on such equipment; (3) Customer's plan to improve gas quality; (4) the effect on system supply; (5) interchangeability; (6) the anticipated duration of the quality deviation; and (7) the blending ratio between geological natural gas and RNG in the area of Company's distribution system where RNG is being injected.

Company shall not be obligated to accept gas which it reasonably believes may adversely affect the standard of public utility service offered by Company, or gas which it reasonably believes may adversely affect the operation of its equipment or the gas-burning equipment of its customers. If any gas delivered hereunder fails to meet the quality specifications set forth herein, Company may, at any time, elect to refuse to accept all or any portions of such gas until Customer brings the gas into conformity with such specifications.

#### **22.3 Gas Quality Testing.**

Gas delivered to Company must be continuously monitored, at Customer's expense, to ensure it meets the quality specifications set forth in Section 22.2. Constituents that are not continuously monitored using currently-available technology must be tested in a laboratory once per year at Company's expense. If the quality of the gas, based on a laboratory test, does not meet the standards in Section 22.2, the gas must be tested in a laboratory monthly, at the Customer's expense, until the gas meets the standards in Section 22.2 for three consecutive months or the Customer otherwise demonstrates to the Company, in the Company's reasonable discretion, that it has remediated the constituent deficiency.

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

(C)

**22. Quality of Gas Delivered to Company**

**22.3 Gas Quality Testing – Cont'd.**

Such tests shall include only the test method or methods that tests for the specific standard or standards that were not met, but Company may consider any results provided by such test method(s). Company will provide Customer with at least three (3) business days' notice of the tests described in this Section 22.3, and Customer will be given the opportunity to be present and observe such tests. Company may, at its option, require Customer to install automatic shutoff devices, at Customer's expense, to prevent gas that fails to meet the quality specifications set forth in Section 22.2 from entering Company's pipeline system.

The scope of all gas testing shall follow the parameters below based on the origin of the gas. The parameters for each origin of gas are based on the source of gas and likelihood of a constituent being present in the source gas. The Company has the discretion to test for additional constituents on the list below, notwithstanding the origin of the gas, if the Company reasonably believes those constituents may be present.

**Gas Quality Testing Parameters and Scope<sup>1</sup>**

Gas Quality Parameter	Testing Method <sup>2</sup>	Origin of Gas			
		Geological	Landfill	Agricultural and Clean Energy	Waste Water Treatment Plant
Heat Content	In-field	X	X	X	X
Wobbe Number	In-field	X	X	X	X
Water Vapor Content	In-field	X	X	X	X
Product Gas Mercaptans	In-field	X	X	X	X
Hydrocarbon Dew Point	In-field	X	X	X	X
Hydrogen Sulfide	In-field or Lab	X	X	X	X
Total Sulfur	In-field or Lab	X	X	X	X
Total Diluent Gases including: Carbon Dioxide (CO <sub>2</sub> ) Nitrogen (N) Oxygen (O <sub>2</sub> )	In-field	X	X	X	X
Hydrogen	Lab	X	X	X	X
Total Bacteria	Lab	X	X	X	X
Mercury	Lab		X		X
Other Volatile Metals (Lead)	Lab		X		
Siloxanes	Lab		X		X
Ammonia	Lab		X		X

(C) Indicates Change

**RULES AND REGULATIONS GOVERNING THE  
DISTRIBUTION AND SALE OF GAS (Continued)**

(C)

**22. Quality of Gas Delivered to Company**

**22.3 Gas Quality Testing – Cont'd.**

**Gas Quality Testing Parameters and Scope<sup>1</sup> – Cont'd**

Gas Quality Parameter	Testing Method <sup>2</sup>	Origin of Gas			
		Geological	Landfill	Agricultural and Clean Energy	Waste Water Treatment Plant
Non-Halogenated Semi-volatile and Volatile Compounds	Lab		X		X
Halocarbons (total measured halocarbons)	Lab		X		X
Aldehyde/Ketones	Lab		X		
PCBs/Pesticides	Lab		X		

<sup>1</sup> Constituents to be tested for each category of gas are indicated with an "X."

<sup>2</sup> Testing method is defined as "In-Field" or "Lab." "In-Field" testing requires the Customer's use of readily available, continuously testing, industry-standard equipment, which has been reviewed and approved by Company. "Lab" testing requires the Customer and the Company to coordinate the sampling of gas and sending it to a laboratory for testing and analysis.

## **RATE RSS - RESIDENTIAL SALES SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available, at one location, for the total requirements of any residential customer.

### **RATE**

The customers under this rate schedule shall be subject to a Customer Charge, a Gas Supply Charge, a Distribution Charge, a Weather Normalization Adjustment, a Pass-through Charge and a Gas Cost Adjustment.

The rate information is detailed in the Rate Summary pages of this tariff.

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff. For accounts with distributed generation served under this rate schedule, the term "alternate fuel" shall include electricity.

### **MINIMUM CHARGE**

The minimum charge shall be the Customer Charge.

### **STATE TAX ADJUSTMENT SURCHARGE**

The charges described in this rate schedule are subject to a State Tax Adjustment Surcharge as set forth in this tariff.

### **RIDER PGC**

The Pass-through Charge and the Gas Supply Charge include recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider of this tariff.

### **USP COSTS AND CUSTOMER CHOICE COSTS**

Rider Universal Services Plan and Rider Customer Choice as specified within Rider USP and Rider Customer Choice in this tariff will be reflected in the Pass-through Charge on the customer bill.

### **DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate RSS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

(C) Indicates Change

(C)

## **RATE RSS – RESIDENTIAL SALES SERVICE (Continued)**

### **TERMS OF PAYMENT**

Bills for sales service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall be not less than twenty (20) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle will accrue on the portion of the customer's bill that is unpaid on the due date. (C)

### **SPECIAL PROVISIONS**

1. If service under this rate schedule is discontinued at the request of the Customer, the Company shall be under no obligation to reconnect service to the same Customer on the same premises until the Customer pays the minimum charge for each billing cycle of the intervening period, but not to exceed twelve (12) months. (C)

2. Where a customer has installed a gas light(s) in lighting devices approved by the Company, and the gas used by such light(s) is unmetered, the gas consumed by such light(s) shall be assumed to be two thousand (2,000) cubic feet per month when the Btu/hr input rating for such light(s) is 2,700 or less. For each additional 1,350 Btu/hr or fraction thereof, the assumed consumption shall be increased by one thousand (1,000) cubic feet per month. Such assumed consumption shall be billed under the rates contained herein, or if in combination with metered usage under this rate schedule, shall be added to the customer's metered usage and the total billed under the rates contained herein.

### **RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

## **RATE RDS - RESIDENTIAL DISTRIBUTION SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any residential customer meeting the following conditions:

1. The customer does not take service under any other rate schedule.
2. The customer or group of customers having an aggregate annual demand of at least 53,650 thm or a minimum of 50 customers and in compliance with the aggregation provisions in the Rules Applicable to Distribution Service elect an NGS to provide natural gas commodity service. The gas supply for each aggregation must enter the Company's system at a city gate(s) used by the Company to serve the customers unless otherwise permitted by Columbia.

### **CHARACTER OF SERVICE**

Service furnished pursuant to this rate schedule shall be considered firm service.

### **RATE**

The customers under this rate schedule shall be subject to a Customer Charge, a Distribution Charge, a Weather Normalization Adjustment and a Pass-through Charge.

The rate information is detailed in the Rate Summary pages of this tariff.

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff. For accounts with distributed generation served under this rate schedule, the term "alternate fuel" shall include electricity.

### **MINIMUM CHARGE**

The minimum charge shall be the Customer Charge.

### **RIDER PGC**

The Pass-through Charge includes recovery of purchased gas demand costs pursuant to the Rider PGC as set forth in this Tariff.

### **STATE TAX ADJUSTMENT SURCHARGE**

The charges described in this rate schedule are subject to a State Tax Adjustment Surcharge as set forth in this tariff.

### **USP COSTS AND CUSTOMER CHOICE COSTS**

Rider Universal Service Plan and Rider Customer Choice as specified within Rider USP and Rider Customer Choice in this tariff will be reflected in the Pass-through Charge on the customer bill.

### **DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate RDS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

(C) Indicates Change

## **RATE RDS - RESIDENTIAL DISTRIBUTION SERVICE (Continued)**

### **TERMS OF PAYMENT**

Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than twenty (20) days after presentation (date of postmark).

If the Choice customer fails to pay the full amount of any bill a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle will accrue on the portion of the bill that is unpaid on the due date consistent with the Billing Option Selection section of the Rules Applicable to Distribution Service.

### **SPECIAL PROVISIONS**

1. If service under this rate schedule is discontinued at the request of the Customer, the Company shall be under no obligation to reconnect service to the same Customer on the same premises until the Customer pays the minimum charge for each billing cycle of the intervening period, but not to exceed twelve (12) months.

2. Where a Customer has installed a gas light(s) in lighting devices approved by the Company, and the gas used by such light(s) is unmetered, the gas consumed by such light(s) shall be assumed to be twenty-one (21) thm per billing cycle when the Btu/hr input rating for such light(s) is 2,700 or less. For each additional 1,350 Btu/hr or fraction thereof, the assumed consumption shall be increased eleven (11) thm per billing cycle. Such assumed consumption shall be billed under the rates contained herein, or if in combination with metered usage under this rate schedule, shall be added to the Customer's metered usage and the total billed under the rates contained herein.

3. The Customer may receive a separate bill from its NGS for services provided by the NGS. Otherwise, all charges for natural gas service to the Customer will be billed by the Company. When the Company bills for the NGS, the Company will have the right to terminate service for failure to pay the NGS's Natural Gas Supply Services charges portion of the bill in compliance with all applicable laws and regulations regarding termination of service, including the Termination of Service rule of this Tariff. The NGS shall not be permitted to accept the Company's bill for distribution on behalf of the Customers.

4. Before participating in the Choice Service distribution program, Customers with arrears, who are not already subject to a payment arrangement, shall be required to enter into a payment arrangement with the Company. (C)

5. The Company will purchase at a discount the accounts receivable from NGSs who elect to have the Company provide a single bill monthly to the customer for distribution service and the NGS's Natural Gas Supply Services charges.

### **RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern where applicable, the supply of distribution service under this rate schedule.

---

**RATE SGSS - SMALL GENERAL SALES SERVICE**

**APPLICABILITY**

Throughout the territory served under this Tariff.

**AVAILABILITY**

Available, at one location, for the total requirements of any commercial or industrial customer whose total throughput requirements are less than or equal to 64,400 thm annually, and who does not contract for distribution service.

**RATE**

(C)

The customers under this rate schedule shall be subject to a Customer Charge, a Gas Supply Charge, a Distribution Charge, a Pass-through Charge and a Gas Cost Adjustment.

The rate information is detailed in the Rate Summary pages of this Tariff.

**MINIMUM CHARGE**

The minimum charge shall be the Customer Charge.

**DETERMINATION OF CUSTOMER CHARGE**

The Customer Charge will be determined based upon the Customer's actual throughput quantities, including sales and distribution, measured in therms (thm), for the twelve most recent billing cycle periods ending with the October billing cycle. If a Customer does not have sufficient consumption history to determine its Customer Charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the Customer to submit estimated annual gas requirement, including sales and distribution, upon which to develop the Customer Charge. The Company in all cases retains the right to review and modify the Customer's estimate where necessary. A customer's Customer Charge will remain constant annually, subject to change as of the January billing cycle of each year.

In all cases, the Company reserves the right to review the Customer Charge and, upon receipt of satisfactory proof, to adjust the Customer Charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which results in a measurable permanent change in the customer's requirement or consumption.

(C) Indicates Change

**RATE SGSS - SMALL GENERAL SALES SERVICE (Continued)****STATE TAX ADJUSTMENT SURCHARGE**

The State Tax Adjustment Surcharge will be applied to the non-Purchased Gas Cost portion of the charges set forth in this rate schedule.

**RIDER PGC**

The Pass-through Charge and Gas Supply Charge for sales service include recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider as set forth in this Tariff.

**CUSTOMER CHOICE COSTS**

The Customer Choice charge pursuant to Rider CC will be reflected in the Pass-through Charge on the customer bill.

**DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate SGSS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

**TERMS OF PAYMENT**

Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall be not less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle will accrue on the portion of the bill that is unpaid on the due date. (C)

**CUSTOMER DEVELOPMENT/RETENTION PROVISIONS**

1. An existing Customer currently receiving service under this rate schedule or a potential Customer eligible to receive service under this rate schedule is eligible to receive special development/retention rates, if the customer meets the following conditions:
  - a. The Customer agrees to enter into a three-year contract for service under this rate schedule.
  - b. The Customer gives the Company a sworn affidavit stating that, absent service under these Customer Development/Retention Provisions, the customer would install an alternate source of energy; would construct facilities to obtain gas service from an alternative source; or would not construct facilities or operation in the company's operating territory.
  - c. If the Customer qualifies under these Customer Development/Retention Provisions, the monthly charges for service to the Customer shall be computed based upon a declining percentage reduction in the Distribution Charge under this rate schedule. The customer Charge, Gas Supply Charge, Pass-through Charge, penalties and charges of third party transporters, if any, to a Customer serviced under this rate schedule are not subject to reduction. The percentage reductions are as follows:

First Year	35% reduction
Second Year	25% reduction
Third Year	15% reduction

(C) Indicates Change

## RATE SGSS - SMALL GENERAL SALES SERVICE - continued

### CUSTOMER DEVELOPMENT/RETENTION PROVISIONS – continued

2. Except as modified by the terms of these Customer Development/Retention Provisions, all provisions of this rate schedule apply to service to the Customer.

### SPECIAL PROVISIONS

1. If service under this rate schedule is discontinued at the request of the Customer, the Company shall be under no obligation to reconnect service to the same customer on the same premises until the customer pays the monthly minimum charge for each billing cycle of the intervening period, but not to exceed twelve (12) months. (C)
2. Customers classified as "other" shall be billed under this rate schedule.
3. Where a customer has installed a gas light(s) in lighting devices approved by the Company, and the gas used by such light(s) is unmetered, the gas consumed by such light(s) shall be assumed to be twenty-one (21) thm per billing cycle when the Btu/hr input rating for such light(s) is 2,700 or less. For each additional 1,350 Btu/hr or fraction thereof, the assumed consumption shall be increased by eleven (11) thm per billing cycle. Such assumed consumption shall be billed under the rates contained herein, or if in combination with metered usage under this rate schedule, shall be added to the customer's metered usage and the total billed under the rates contained herein. (C)
4. Energy usage eligibility for this rate schedule will be determined annually. In the event the Customer's annual purchases are in excess of 64,400 thm, the customer shall be transferred to Rate LGSS.

### RULES AND REGULATIONS

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

## **RATE SGDS - SMALL GENERAL DISTRIBUTION SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available, at one location, for the total requirements of any commercial or industrial customer meeting all of the following conditions:

1. The Customer's total annual throughput requirements, as determined under the Customer Charge provisions below, are less than or equal to 64,400 thm annually.
2. The Customer does not take service under any other rate schedule except Rate SS – Standby Service.
3. Customer acquires its own gas and executes an application and agreement with the Company, as specified in the Rules Applicable to Distribution Service section of this Tariff, for a period of not less than one (1) year for distribution service in accordance with all terms and conditions of such contract.
4. The customer is a member of an aggregation group pursuant to the provisions of the Rules Applicable to Distribution Service.
5. Priority One customers, as defined in the Service Limitations section of this Tariff, must buy distribution service at the Priority One distribution rate, which includes recovery of purchased gas demand costs pursuant to the Purchased Gas Cost Rider as set forth in this Tariff. All other SGDS customers wishing to contract for Standby Service may execute a contract for service under Rate SS – Standby Service.

### **CHARACTER OF SERVICE**

Distribution Service furnished pursuant to this rate schedule shall be considered firm service on the Company's system; provided, however, that it is the customer's obligation to deliver sufficient gas supplies to the mutually agreed upon receipt point in the Company's facilities.

### **RATE**

The customers under this rate schedule shall be subject to a Customer Charge, a Distribution Charge a Pass-through Charge.

The rate information is detailed in the Rate Summary pages of this Tariff.

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff.

(C) Indicates Change

**Issued: December 11, 2018**

**M. A. Huwar  
President**

**Effective: December 16, 2018**

**RATE SGDS - SMALL GENERAL DISTRIBUTION SERVICE (Continued)****DETERMINATION OF CUSTOMER CHARGE**

The Customer Charge will be determined based upon the Customer's actual throughput quantities, including sales and distribution, measured in therms (thm), for the twelve most recent billing cycle periods ending with the October billing cycle. If a Customer does not have sufficient consumption history to determine its Customer Charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the Customer to submit estimated annual gas requirements, including sales and distribution, upon which to develop the Customer Charge. The Company in all cases retains the right to review and modify the Customer's estimate where necessary. A customer's Customer Charge will remain constant annually, subject to change as of the January billing cycle of each year. (C)

In all cases, the Company reserves the right to review the Customer Charge and, upon receipt of satisfactory proof, to adjust the Customer Charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which results in a measurable permanent change in the customer's requirement or consumption.

**MINIMUM CHARGE**

The minimum charge shall be the sum of (a) the Customer Charge; plus (b) purchase gas demand charges, if any, under Rate SS. In the event of curtailment in the delivery of gas by the Company below the Maximum Daily Firm Requirement of the Customer, if any, under Rate SS, or complete or partial suspension of operation by the customer due to strikes, fires, floods, explosions or other similar casualties, the Customer Charge shall be reduced in direct proportion to the ratio which the number of days of curtailed service or complete or partial suspension of operation bears to the number of days in the billing period.

**STATE TAX ADJUSTMENT SURCHARGE**

The charges are subject to a State Tax Adjustment Surcharge as set forth in this tariff.

**RIDER PGC**

The Pass-through Charge for Priority One Service includes recovery of Purchased Gas Demand Costs pursuant to the Purchased Gas Cost Rider as set forth in this Tariff.

**ELECTIVE BALANCING SERVICE RIDER**

Distribution service under this rate schedule shall be subject to the provisions of Rider EBS as set forth in this Tariff.

**CUSTOMER CHOICE RIDER**

If applicable, the Customer Choice charge pursuant to Rider CC will be reflected in the Pass-through Charge on the customer bill. (C)

**DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate SGDS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

**APPLICABLE SALES SERVICE RATE**

Priority One customers desiring to purchase gas shall be charged an amount for recovery of purchased gas costs as set forth in the Rules Applicable to Distribution Service, plus the Priority One Service rate.

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc.**

## **RATE SGDS - SMALL GENERAL DISTRIBUTION SERVICE (Continued)**

### **APPLICABLE SALES SERVICE RATE - continued**

Non-Priority One distribution customers under this Rate Schedule desiring to purchase gas shall be charged an amount for recovery of purchased gas costs as set forth in the Rules Applicable to Distribution Service, plus the non-gas portion of the distribution rate.

Sales service hereunder shall be considered imbalance gas as defined in the Rules Applicable to Distribution Service section of this tariff. The Company undertakes no responsibility to obtain sufficient gas supplies to avoid interruption of sales service on a daily basis, and sales service is totally interruptible on any day when the Company gives notice to the customer that gas supply is inadequate to supply the customer's requirements, except to the extent the customer nominates Maximum Daily Firm Requirement under Rate SS.

The Company shall give the customer 2 hours advance notice of interruption. Customer agrees that Company shall not be liable for any loss or damage that may be sustained by the customer by reason of any interruption of service.

A Non-Priority One customer is subject to a charge for unauthorized takes after notice to interrupt. On any day when a Non-Priority One customer has been given notice by the Company to interrupt, any quantity of gas taken in excess of the quantity specified to be made available that day shall constitute unauthorized takes and shall be subject to the charges set forth in the Rules Applicable to Distribution Service. Payments of such penalty charge shall be in addition to the charges specified in this rate schedule.

### **TERMS OF PAYMENT**

Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall be not less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle will accrue on the portion of the bill that is unpaid on the due date. (C)

### **CUSTOMER DEVELOPMENT/RETENTION PROVISIONS**

1. An existing Customer currently receiving service under this rate schedule or a potential Customer eligible to receive service under this rate schedule is eligible to receive special development/retention rates, if the customer meets the following conditions:
  - a. The Customer agrees to enter into a three-year contract for service under this rate schedule.
  - b. The Customer gives the Company a sworn affidavit stating that, absent service under these Customer Development/ Retention Provisions, the Customer would install an alternate source of energy; would construct facilities to obtain gas service from an alternative source; or would not construct facilities or operations in the Company's operating territory.

(C) Indicates Change

## **RATE SGDS - SMALL GENERAL DISTRIBUTION SERVICE (Continued)**

### **CUSTOMER DEVELOPMENT/RETENTION PROVISIONS (Continued)**

c. If the Customer qualifies under these Customer Development/Retention Provisions, the monthly charges for service to the Customer shall be computed based upon a declining, percentage reduction in the Distribution Charge under this rate schedule. The Customer Charge, Gas Supply Charge, Pass-through Charge, penalties and charges of third party transporters, if any, to a Customer served under this rate schedule are not subject to reduction. The percentage reductions are as follows:

First Year	35% reduction
Second Year	25% reduction
Third Year	15% reduction

2. Except as modified by the terms of these Customer Development/Retention Provisions, all provisions of this rate schedule apply to service to the Customer.

### **SPECIAL PROVISIONS**

1. If service is discontinued at the request of the customer, the Company shall be under no obligation to reconnect service to the same customer on the same premises until the customer pays the minimum charge for each billing cycle of the intervening period, but not to exceed twelve (12) months.

2. Where a customer has installed a gas light(s) in lighting devices approved by the Company, and the gas used by such light(s) is unmetered, the gas consumed by such light(s) shall be assumed to be twenty-one (21) thm per billing cycle when the Btu/hr input rating for such light(s) is 2,700 or less. For each additional 1,350 Btu/hr or fraction thereof, the assumed consumption shall be increased by eleven (11) thm per billing cycle. Such assumed consumption shall be billed under the rates contained herein, or if in combination with metered usage under this rate schedule, shall be added to the customer's metered usage and the total billed under the rates contained herein.

3. Energy usage eligibility for this rate schedule will be determined annually. In the event the Customer's total annual purchases of sales and distribution are in excess of 64,400 thm, the customer shall be transferred to Rate SDS, or Rate LDS, as applicable.

### **RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

## **RATE SCD - SMALL COMMERCIAL DISTRIBUTION**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any commercial customer meeting the following conditions:

1. The customer's historic throughput is less than or equal to 64,400 thm annually.
2. The customer does not take service under any other rate schedule.
3. The customer or group of customers having an aggregate annual demand of at least 53,650 thm or a minimum of 50 customers and in compliance with the aggregation provisions in the Rules Applicable to Distribution Service elect an NGS to provide natural gas commodity service. The gas supply for each aggregation must enter the Company's system at a city gate(s) used by the Company to serve the customers unless otherwise permitted by Columbia.

### **CHARACTER OF SERVICE**

Service furnished pursuant to this rate schedule shall be considered firm service.

### **RATE**

(C)

The customers under this rate schedule shall be subject to a Customer Charge, a Distribution Charge and a Pass-through Charge.

The rate information is detailed in the Rate Summary pages of this Tariff.

The Pass-through Charge includes the applicable Purchase Gas Demand Cost rate.

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff.

### **MINIMUM CHARGE**

The minimum charge shall be the Customer Charge.

### **STATE TAX ADJUSTMENT SURCHARGE**

The charges described in this rate schedule are subject to a State Tax Adjustment Surcharge as set forth in the tariff.

(C) Indicates Change

**RATE SCD - SMALL COMMERCIAL DISTRIBUTION (Continued)**

**RIDER CUSTOMER CHOICE**

The Pass-through Charge reflects the Rider Customer Choice rate pursuant to Rider CC.

**DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate SCD is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

**RIDER PGC**

The Pass-through Charge includes recovery of purchased gas demand costs pursuant to the Purchased Gas Cost Rider as set forth in this Tariff.

**TERMS OF PAYMENT**

Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle will accrue on the portion of the bill that is unpaid on the due date.

**SPECIAL PROVISIONS**

1. If service under this rate schedule is discontinued at the request of the customer, the Company shall be under no obligation to reconnect service to the same customer on the same premises until the customer pays the monthly minimum charge for each billing cycle of the intervening period, but not to exceed twelve (12) months.
2. Where a customer has installed a gas light(s) in lighting devices approved by the Company, and the gas used by such light(s) is unmetered, the gas consumed by such light(s) shall be assumed to be twenty-one (21) thm per billing cycle when the Btu/hr input rating for such light(s) is 2,700 or less. For each additional 1,350 Btu/hr or fraction thereof, the assumed consumption shall be increased by eleven (11) thm per billing cycle. Such assumed consumption shall be billed under the rates contained herein, or if in combination with metered usage under this rate schedule, shall be added to the customer's metered usage and the total billed under the rates contained herein.
3. The customer, at its option, may receive a separate bill from its NGS for services provided by the NGS. Otherwise, all charges for natural gas supply service to the customer will be billed by the Company. When the Company bills for the NGS, the Company will have the right to terminate service for failure to pay the NGS's Natural Gas Supply Service charges in compliance with all applicable laws and regulations regarding termination of service.
4. Before participating in Choice Service, customers with arrears, who are not already subject to a payment arrangement, shall be required to enter into a payment arrangement with the Company. (C)
5. The Company will purchase at a discount the accounts receivable from NGSs who elect to have the Company bill the NGS's Natural Gas Supply Service charges.
6. An NGS may choose the Company's consolidated billing option or issue its own bills for Gas Supply Service charges (Billing Option 1 or Billing Option 2 as described in the Rules Applicable Only to Choice Service) for all or a portion of its customers eligible for Rate SCD.

(C) Indicates Change

**RATE SCD - SMALL COMMERCIAL DISTRIBUTION (Continued)**

**RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern where applicable, the supply of delivery service under this rate schedule.

(C) Indicates Change

## **RATE SDS - SMALL DISTRIBUTION SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any commercial or industrial customer meeting all of the following conditions:

1. The Customer's annual throughput requirements, including sales and distribution service, are in excess of 64,400 thm.
2. The Customer does not take service under any other rate schedule except Rate SS - Standby Service.
3. The Customer's annual throughput, as determined under the Customer Charge provisions below, is less than or equal to 540,000 thm.

Service is available when such customer(s) acquires its own gas and executes a contract with the Company for a period of not less than one (1) year for distribution service in accordance with all terms and conditions of such contract.

Service under this rate schedule shall not be available to a single customer who is a Priority One Customer, as defined in the Service Limitations section of this Tariff, unless such customer also contracts for firm service under Rate SS-Standby Service at a level necessary to meet the portion of daily and seasonal requirements of the facility not covered by installed operable alternative fuel capability.

### **CHARACTER OF SERVICE**

Service furnished pursuant to this rate schedule shall be considered firm service on the Company's system; provided, however, that it is the customer's obligation to deliver sufficient gas supplies to the mutually agreed upon receipt point in the Company's facilities.

A Small Distribution Service account may be returned to the applicable Sales Service rate if for a period of at least five (5) consecutive days in one billing cycle the Company:

(C)

- (1) has not received gas supply for the account;
- (2) the account's bank balance is insufficient to cover the consumption or the customer did not have access to its bank balance due to the issuance of an OFO and/or OMO; and
- (3) the customer consumed gas on one or more days during such five (5) day period.

For a non-daily read account, the account may be returned to the applicable Sales Service rate at the end of a billing cycle if the above three conditions are met unless the customer furnishes proof that they did not consume gas on one or more days during such five (5) day period.

(C) Indicates Change

**RATE SDS - SMALL DISTRIBUTION SERVICE (Continued)****RATE**

The customers under this rate schedule shall be subject to a Customer Charge and a Distribution Charge.

The rate information is detailed in the Rate Summary pages of this Tariff.

The Customer Charge will be determined based upon the customer's actual throughput quantities, including sales and distribution, measured in therms (thm), for the twelve most recent billing cycle periods ending with the October billing cycle. If a customer does not have sufficient consumption history to determine its Customer Charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the customer to submit estimated annual gas requirements, including sales and distribution, upon which to develop the Customer Charge. The Company in all cases retains the right to review and modify the customer's estimate where necessary. A customer's Customer Charge will remain constant annually, subject to change as of the January billing cycle of each year.

In all cases, the Company reserves the right to review the Customer Charge and, upon receipt of satisfactory proof, to adjust the Customer Charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which results in a measurable permanent change in the customer's requirement or consumption.

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff.

**MAIN LINE EXTENSION DEPOSIT INSTALLMENT PLAN**

(C)

Applicants eligible for Rate Schedule SDS who have entered into an agreement with the Company to make payments for a main line extension pursuant to the Payment Period of Deposit paragraph in the Capital Expenditure Policy section of Rule 8. Extensions of these Rules and Regulations Governing the Distribution and Sale of Gas, will have the installment amount included in the cyclical bill for service issued by the Company. The installment amount will be added to the Customer Charge for the duration of the installment payment plan.

**MINIMUM CHARGE**

The minimum charge shall be the sum of (a) the Customer Charge; plus (b) purchased gas demand charges, if any, under Rate SS. In the event of curtailment in the delivery of gas by the Company below the Maximum Daily Firm Requirement of the customer, if any, under Rate SS, or complete or partial suspension of operation by the customer due to strikes, fires, floods, explosions or other similar casualties, the Customer Charge shall be reduced in direct proportion to the ratio which the number of days of curtailed service or complete or partial suspension of operation bears to the number of days in the billing period.

**STATE TAX ADJUSTMENT SURCHARGE**

The above charges are subject to a State Tax Adjustment Surcharge as set forth in the tariff.

**ELECTIVE BALANCING SERVICES RIDER**

Distribution service under this rate schedule shall be subject to the provisions of Rider EBS as set forth within this Tariff.

**DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate SDS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

(C) Indicates Change

**RATE SDS - SMALL DISTRIBUTION SERVICE (Continued)****APPLICABLE SALES SERVICE RATE**

Customers under this Rate Schedule desiring to purchase gas shall be charged an amount for recovery of purchased gas costs as set forth in the Rules Applicable to Distribution Service plus the Distribution Charge contained in Rate SGSS - Small General Sales Service.

Provided, however, that sales service hereunder shall be considered imbalance gas as defined in the Consumption in Excess of Deliveries section in Paragraph 3 of the Rules Applicable to Distribution Service section of this Tariff. The Company undertakes no responsibility to obtain sufficient gas supplies to avoid interruption of sales service on a daily basis, and sales service is totally interruptible on any day when the Company gives notice to the customer that gas supply is inadequate to supply the customer's requirements, except to the extent the customer nominates Maximum Daily Firm Requirement under Rate SS.

The Company shall give the customer 2 hours advance notice of interruption. Customer agrees that Company shall not be liable for any loss or damage that may be sustained by the customer by reason of any interruption of service.

On any day when the Customer has been given notice by the Company to interrupt, any quantity of gas taken in excess of the quantity specified to be made available that day shall constitute unauthorized takes and shall be subject to the charges set forth in the Rules Applicable to Distribution Service. Payment of such penalty charge shall be in addition to the charges specified herein.

**TERMS OF PAYMENT**

Gas distributed hereunder shall be billed in accordance with the terms and conditions set forth in the customer's executed contract governing distribution service. Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill a delayed payment charge of one and one-quarter percent (1 1/4%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date.

(C)

(C) Indicates Change

## **RATE SDS - SMALL DISTRIBUTION SERVICE (Continued)**

### **SPECIAL PROVISIONS APPLICABLE TO ALL SDS CUSTOMERS**

(C)

1. Customers desiring to transfer to or from this rate schedule will be allowed only if: (1) the Company can obtain any increase or decrease in its gas supplies, transportation capacity and storage capacity or any combination thereof that is required to accommodate such transfer; or (2) the Company, in its sole judgment concludes that no increase or decrease is required. The Company shall establish the date any transfer is to be effective.
2. In the event customer's throughput requirements, as determined annually under the Customer Charge provisions above, are in excess of 540,000 thm, the customer shall be transferred to Rate LDS - Large Distribution Service, effective the immediately succeeding January billing cycle.
3. Customers that request to be transferred to this rate schedule prior to the end of the Customer's existing contract under another rate schedule shall be required to contract for Maximum Daily Firm Requirement under Rate SS at the level of the Customer's Maximum Daily Firm Requirement, if any, under such existing contract.

### **RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

**Issued: January 25, 2017**

**Mark Kempic  
President**

**Effective: March 27, 2017**

## **RATE LGSS - LARGE GENERAL SALES SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available at one location, for the total requirements of any commercial or industrial customer whose purchase requirements are in excess of 64,400 thm, and who does not contract for distribution service.

Customers who take service under this rate schedule are entitled to firm retail gas service from the Company.

### **RATE**

The customers under this rate schedule shall be subject to a Customer Charge, a Gas Supply Charge, a Distribution Charge, a Gas Cost Adjustment and a Pass-through Charge.

The rate information is detailed in the Rate Summary pages of this Tariff.

### **DETERMINATION OF CUSTOMER CHARGE**

The Customer Charge will be determined based upon the customer's actual throughput quantities, including sales and distribution if the customer previously contracted for distribution service, measured in therms (thm), for the twelve most recent billing cycles ending with the October billing cycle. If a customer does not have sufficient consumption history to determine its Customer Charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the customer to submit estimated annual gas requirements upon which to develop the Customer Charge. The Company, in all cases, retains the right to review and modify the customer's estimate where necessary. A customer's Customer Charge will remain constant annually, subject to change as of the January billing of each year.

In all cases, the Company reserves the right to review the customer's Customer Charge, and upon receipt of satisfactory proof, to adjust the Customer Charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which result in a measurable permanent change in the customer's requirements or consumption.

### **MAIN LINE EXTENSION DEPOSIT INSTALLMENT PLAN**

(C)

Applicants eligible for Rate Schedule LGSS who have entered into an agreement with the Company to make payments for a main line extension pursuant to the Payment Period of Deposit paragraph in the Capital Expenditure Policy section of Rule 8. Extensions of these Rules and Regulations Governing the Distribution and Sale of Gas, will have the installment amount included in the cyclical bill for service issued by the Company. The installment amount will be added to the Customer Charge for the duration of the installment payment plan.

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc.**

---

**RATE LGSS - LARGE GENERAL SALES SERVICE (Continued)**

**MINIMUM CHARGE**

The minimum charge shall be the Customer Charge, except that in the event of curtailment in the delivery of gas by the Company or complete or partial suspension of operation by the customer due to strikes, fires, floods, explosions or other similar casualties, the Customer Charge shall be reduced in direct proportion to the ratio which the number of days of curtailed service or complete or partial suspension of operation bears to the number of days in the billing period.

**STATE TAX ADJUSTMENT SURCHARGE**

The charges described in this rate schedule are subject to a State Tax Adjustment Surcharge as set forth in this Tariff.

**RIDER PGC**

The Pass-through Charge and Gas Supply Charge include recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider as set forth in this Tariff.

**DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate LGSS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

**TERMS OF PAYMENT**

Bills for sales service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall be not less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill, a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle will accrue on the portion of the bill that is unpaid on the due date.

**Issued: December 19, 2014**

**M. R. Kempic  
President**

**Effective: December 20, 2014**

---

**RATE LGSS - LARGE GENERAL SALES SERVICE (Continued)**

**SPECIAL PROVISIONS**

1. The term of service shall be for a one (1) year period beginning November 1 of each year. Service hereunder shall be automatically renewed each year unless notice to discontinue service is given by the customer not less than sixty (60) days prior to November 1. Service commencing hereunder subsequent to the November billing cycle of any year shall be for the remainder of the twelve-month period ending with the October billing cycle and then placed on an annual basis.

2. New customers or existing customers requesting a transfer to this rate schedule shall be permitted to take service under this Rate Schedule only if: (1) the Company can obtain an increase in its firm pipeline capacity with an interstate pipeline having delivery points on the Company's system into the Local Market Area where the customer's facility is located, that is required to accommodate such transfer; or (2) the Company, in its sole judgment, concludes that no increase in the Company's pipeline capacity under an interstate pipeline firm rate schedule or any successor rate schedule is required. The Company shall establish the date any transfer is to be effective. (C)

3. Energy usage eligibility for this rate schedule shall be determined annually. In the event Customer's annual purchases are less than or equal to 64,400 thm, the customer shall be transferred to Rate SGSS.

**RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

**Issued: May 2, 2018**

**M. A. Huwar  
President**

**Effective: July 1, 2018**

## **RATE LDS - LARGE DISTRIBUTION SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any commercial or industrial customer meeting all of the following conditions:

1. The Customer's annual throughput requirements, as determined under the Customer Charge provisions below, are in excess of 540,000 thm.
2. The Customer does not take service under any other rate schedule except Rate SS - Standby Service.

Service is available when such customer(s) acquires its own gas and executes a contract with the Company for a period of not less than one (1) year for Distribution Service in accordance with all terms and conditions of such contract.

Service under this rate schedule shall not be available to a single customer who is a Priority One Customer, as defined in the Service Limitations section of this tariff, unless such customer also contracts for firm service under Rate SS-Standby Service at a level necessary to meet the portion of daily and seasonal requirements of the facility not covered by installed operable alternative fuel capability.

### **CHARACTER OF SERVICE**

Service furnished pursuant to this rate schedule shall be considered firm service on the Company's system; provided, however, that it is the customer's obligation to deliver sufficient gas supplies to the mutually agreed upon receipt point in the Company's facilities.

A Large Distribution Service account may be returned to the applicable Sales Service rate if for a period of at least five (5) consecutive days in one billing cycle the Company:

- (1) has not received gas supply for the account;
- (2) the account's bank balance is insufficient to cover the consumption or the customer did not have access to its bank balance due to the issuance of an OFO and/or OMO; and
- (3) the customer consumed gas on one or more days during such five (5) day period.

For a non-daily read account, the account may be returned to the applicable Sales Service rate at the end of a billing cycle if the above three conditions are met unless the customer furnishes proof that they did not consume gas on one or more days during such five (5) day period.

(C) Indicates Change

## **RATE LDS - LARGE DISTRIBUTION SERVICE (Continued)**

### **RATE**

The customers under this rate schedule shall be subject to a Customer Charge, and a Distribution Charge.

The rate information is detailed in the Rate Summary pages of this Tariff.

The Customer Charge will be determined based upon the Customer's actual throughput quantities, including sales and distribution, measured in therms (thm), for the twelve most recent billing cycles ending with the October billing cycle. If a Customer does not have sufficient consumption history to determine its Customer Charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the Customer to submit estimated annual gas requirements, including sales and distribution, upon which to develop the Customer Charge. The Company in all cases retains the right to review and modify the Customer's estimate where necessary. A customer's Customer Charge will remain constant annually, subject to change with the January billing cycle of each year.

In all cases, the Company reserves the right to review the Customer Charge and, upon receipt of satisfactory proof, to adjust the Customer Charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which results in a measurable permanent change in the customer's requirement or consumption.

The applicable Distribution Charge for all distribution quantities shall be determined based upon the Customer Charge group in which the Customer is placed, as established annually above.

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff.

### **MAIN LINE EXTENSION DEPOSIT INSTALLMENT PLAN**

(C)

Applicants eligible for Rate Schedule LDS who have entered into an agreement with the Company to make payments for a main line extension pursuant to the Payment Period of Deposit paragraph in the Capital Expenditure Policy section of Rule 8. Extensions of these Rules and Regulations Governing the Distribution and Sale of Gas, will have the installment amount included in the cyclical bill for service issued by the Company. The installment amount will be added to the Customer Charge for the duration of the installment payment plan.

(C) Indicates Change

**Issued: December 14, 2016**

**Mark Kempic  
President**

**Effective: December 19, 2016**

## **RATE LDS - LARGE DISTRIBUTION SERVICE (Continued)**

### **MINIMUM CHARGE**

(C)

The minimum charge shall be the sum of (a) the Customer Charge; plus (b) purchased gas demand charges, if any, under Rate SS. In the event of curtailment in the delivery of gas by the Company below the Maximum Daily Firm Requirement of the Customer, if any, under Rate SS, or complete or partial suspension of operation by the customer due to strikes, fires, floods, explosions or other similar casualties, the Customer Charge shall be reduced in direct proportion to the ratio which the number of days of curtailed service or complete or partial suspension of operation bears to the number of days in the billing period.

### **STATE TAX ADJUSTMENT SURCHARGE**

The charges described in this rate schedule are subject to a State Tax Adjustment Surcharge as set forth in the Tariff.

### **ELECTIVE BALANCING SERVICES RIDER**

Distribution service under this rate schedule shall be subject to the provisions of Rider EBS as set forth in this Tariff.

### **DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate LDS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

### **APPLICABLE SALES SERVICE RATE**

Customers under this Rate Schedule desiring to purchase gas shall be charged an amount for recovery of purchased gas costs as set forth in the Rules Applicable to Distribution Service plus the non-gas portion of distribution rates contained in the first block of Rate SGS - Small General Service.

Provided, however, that sales service hereunder shall be considered imbalance gas as defined in the Consumption in Excess of Deliveries section in Paragraph 3 of the Rules Applicable to Distribution Service of this tariff. The Company undertakes no responsibility to obtain sufficient gas supplies to avoid interruption of sales service on a daily basis, and sales service is totally interruptible on any day when the Company gives notice to the customer that gas supply is inadequate to supply the customer's requirements, except to the extent the customer nominates Maximum Daily Firm Requirement under Rate SS.

The Company shall give the customer 2 hours advance notice of interruption. Customer agrees that Company shall not be liable for any loss or damage that may be sustained by the customer by reason of any interruption of service.

On any day when the Customer has been given notice by the Company to interrupt, any quantity of gas taken in excess of the quantity specified to be made available that day shall constitute unauthorized takes and shall be subject to the charges set forth in the Rules Applicable to Distribution Service. Payment of such penalty charge shall be in addition to the charges specified herein.

(C) Indicates Change

**RATE LDS - LARGE DISTRIBUTION SERVICE (Continued)**

**TERMS OF PAYMENT**

Gas distributed hereunder shall be billed in accordance with the terms and conditions set forth in the customer's executed contract governing distribution service. Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill a delayed payment charge of one and one-quarter percent (1 1/4%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date.

**SPECIAL PROVISIONS APPLICABLE TO ALL LDS CUSTOMERS**

(C)

1. Customers desiring to transfer to or from this rate schedule will be allowed only if: (1) the Company can obtain any increase or decrease in its gas supplies, transportation capacity and storage capacity or any combination thereof that is required to accommodate such transfer; or (2) the Company, in its sole judgment concludes that no increase or decrease is required. The Company shall establish the date any transfer is to be effective.
2. In the event customer's throughput requirements, as determined annually under the Customer Charge provisions above, are less than or equal to 540,000 thm, the customer shall be transferred to Rate SDS - Small Distribution Service, effective the immediately succeeding January billing cycle.
3. Customers that request to be transferred to this rate schedule prior to the end of the Customer's existing contract under another rate schedule shall be required to contract for Maximum Daily Firm Requirement under Rate SS at the level of the Customer's Maximum Daily Firm Requirement, if any, under such existing contract.

**RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern where applicable, the supply of distribution service under this rate schedule.

(C) Indicates Change

**Issued: January 25, 2017**

**Mark Kempic  
President**

**Effective: March 27, 2017**

## **RATE MLSS – MAIN LINE SALES SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available at one location, for the total requirements of a commercial or industrial customer when: (i) the customer does not take service under any other rate schedule; and (ii) the Customer meets either one of the following qualifications:

- (a) the Customer has annual throughput requirements greater than 274,000 thm and is connected directly through a dual-purpose meter to facilities of an Interstate pipeline supplier of the Company ("Class I MLSS Customer"); or (C)
- (b) the Customer has annual throughput requirements of not less than 2,146,000 thm and there are two (2) miles or less of pipeline facilities of the Company connecting the Customer to facilities of an interstate pipeline supplier of the Company ("Class II MLSS Customer").

Customers who take service under this rate schedule are entitled to firm retail gas service from the Company.

### **RATE**

Customers being served with this rate schedule shall be subject to a Customer Charge, a Gas Supply Charge, a Distribution Charge, a Gas Cost Adjustment and a Pass-through Charge. (C)

The rate information is detailed in the Rate Summary pages of this Tariff.

The applicable Distribution Charge for all distribution quantities for MLSS Class II customers shall be determined based upon the Customer Charge group in which the Customer is placed, as established annually. (C)

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff.

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc.**

---

## **RATE MLSS – MAIN LINE SALES SERVICE (Continued)**

### **DETERMINATION OF CUSTOMER CHARGE**

The Customer Charge will be determined based upon the customer's actual throughput quantities, including sales and distribution if the customer previously contracted for distribution service, measured in therms (thm), for the twelve most recent billing cycles ending with the October billing cycle. If a customer does not have sufficient consumption history to determine its Customer Charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the customer to submit estimated annual gas requirements, upon which to develop the Customer Charge. The Company in all cases retains the right to review and modify the customer's estimate where necessary. A customer's Customer Charge will remain constant annually, subject to change as of the January billing cycle of each year.

In all cases, the Company reserves the right to review the Customer Charge and, upon receipt of satisfactory proof, to adjust the Customer Charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which results in a measurable permanent change in the customer's requirement or consumption.

### **MAIN LINE EXTENSION DEPOSIT INSTALLMENT PLAN**

(C)

Applicants eligible for Rate Schedule MLSS who have entered into an agreement with the Company to make payments for a main line extension pursuant to the Payment Period of Deposit paragraph in the Capital Expenditure Policy section of Rule 8. Extensions of these Rules and Regulations Governing the Distribution and Sale of Gas, will have the installment amount included in the cyclical bill for service issued by the Company. The installment amount will be added to the Customer Charge for the duration of the installment payment plan.

### **MINIMUM CHARGE**

The minimum charge shall be the Customer Charge. In the event of curtailment in the delivery of gas by the Company or complete or partial suspension of operation by the customer due to strikes, fires, floods, explosions or other similar casualties, the Customer Charge shall be reduced in direct proportion to the ratio which the number of days of curtailed service or complete or partial suspension of operation bears to the number of days in the billing period.

### **STATE TAX ADJUSTMENT SURCHARGE**

The charges described in this rate schedule are subject to a State Tax Adjustment Surcharge as set forth in the tariff.

### **DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate MLSS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

(C) Indicates Change

**Issued: December 14, 2016**

**Mark Kempic  
President**

**Effective: December 19, 2016**

## **RATE MLSS – MAIN LINE SALES SERVICE (Continued)**

### **RIDER PGC**

The Pass-through Charge and Gas Supply Charge in this rate schedule include recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider as set forth in this Tariff.

### **TERMS OF PAYMENT**

Bills for sales service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill, a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date.

### **SPECIAL PROVISIONS APPLICABLE TO ALL MLSS CUSTOMERS**

1. Customers desiring to transfer to or from this rate schedule must notify the Company in writing. Transfers to or from this rate schedule will be allowed only if: (1) the Company can obtain any increase or decrease in its gas supplies, pipeline capacity and storage capacity, or any combination thereof that is required to accommodate such change; or (2) the Company, in its sole judgment, concludes that no increase or decrease is required. The Company shall establish the date any transfer is to be effective.
2. Energy usage eligibility for this rate schedule shall be determined annually. In the event Customer's annual purchases are less than or equal to 274,000 thm, the customer shall be transferred to either Rate LGSS or Rate SGSS effective the immediately succeeding January billing cycle.
3. New customers or existing customers requesting a transfer to this Rate Schedule shall be permitted to take service under this Rate Schedule only if: (1) the Company can obtain an increase in its firm pipeline capacity with an interstate pipeline having delivery points on the Company's system into the Local Market Area where the customer's facility is located, that is required to accommodate such transfer; or (2) the Company, in its sole judgment, concludes that no increase in the Company's pipeline capacity under an interstate pipeline firm rate schedule or any successor rate schedule is required. The Company shall establish the date any transfer is to be effective.

**Effective: July 1, 2018**

## **RATE MLSS - MAIN LINE SALES SERVICE (Continued)**

### **SPECIAL PROVISION APPLICABLE TO CLASS I MLSS CUSTOMERS**

In the event a Class I MLSS customer desires to obtain firm transportation capacity on the interstate pipeline system of Columbia Gas Transmission, LLC, as to which supplier the Company may exercise an option to convert daily firm wholesale entitlement to daily firm transportation capacity entitlement under Federal Energy Regulatory Commission (FERC) approved rate schedules pursuant to Order 500 and successor orders of that Agency, the Company may assign daily firm transportation capacity entitlement to a Class I MLSS customer under the following conditions:

(C)

(a) If, in the exercise of its informed business judgment, the Company determines that it can exercise its conversion option under FERC Order 500 and/or assign such increased transportation capacity without impairing its ability to meet its public service obligation to all customers and its ability to pursue a least cost acquisition policy to obtain system supplies. The Company reserves the right to limit any such conversion and/or assignment as necessary to maintain its ability in this regard;

(b) The Class I MLSS customer agrees to maintain the customer's existing contractual Maximum Daily Firm Requirement under Rate SS - Standby Service (if any) during the term of the assignment;

(c) The Class I MLSS customer signs an agreement committing to pay for the firm transportation demand charges constituting the Company as its agent to purchase gas to be redelivered to the Class I MLSS customer after firm transportation service has been provided using the assigned capacity;

(d) The term of this assignment shall be coextensive with the term of the agency agreement, subject to renewal with express approval of the Public Utility Commission;

(e) This provision shall be operative only so long as the Company continues to have the option to convert daily firm wholesale entitlement to daily firm transportation capacity requirements under FERC Order 500 or any successor thereto.

(C)

### **RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of distribution service under this rate schedule.

**Issued: December 14, 2016**

**Mark Kempic  
President**

**Effective: December 19, 2016**

## **RATE MLDS – MAIN LINE DISTRIBUTION SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available at one location, for the total requirements of a commercial or industrial customer when the Customer meets either one of the following qualifications:

- (a) the Customer has annual throughput requirements greater than 274,000 thm and is connected directly through a dual-purpose meter to facilities of an Interstate pipeline supplier of the Company ("Class I MLDS Customer"); or
- (b) the Customer has annual throughput requirements of not less than 2,146,000 thm and there are two (2) miles or less of pipeline facilities of the Company connecting the Customer to facilities of an interstate pipeline supplier of the Company ("Class II MLDS Customer");

and meets all of the following conditions:

- (a) Customer does not take service under any other rate schedule except Rate SS – Standby Service.
- (b) Customer acquires its own gas and executes an application and agreement with the Company, as specified in the Rules Applicable to Distribution Service section of this Tariff, for a period of not less than one (1) year for distribution service in accordance with all terms and conditions of such contract.

Service under this rate schedule shall not be available to a single customer who is a Priority One Customer, as defined in the Service Limitations section of this Tariff, unless such customer also contracts for firm service under Rate SS – Standby Service at a level necessary to meet the portion of daily and seasonal requirements of the facility not covered by installed operable alternative fuel capability.

### **CHARACTER OF SERVICE**

Service furnished pursuant to this rate schedule shall be considered firm service on the Company's system; provided, however, that it is the customer's obligation to deliver sufficient gas supplies to the mutually agreed upon receipt point in the Company's facilities.

A Main Line Distribution Service account may be returned to the applicable Sales Service rate, if for a period of at least five (5) consecutive days in one billing cycle, the Company:

(C)

- (1) has not received gas supply for the account;
- (2) the account's bank balance is insufficient to cover the consumption or the customer did not have access to its bank balance due to the issuance of an OFO and/or OMO; and
- (3) the customer consumed gas on one or more days during such five (5) day period.

For a non-daily read account, the account may be returned to the applicable Sales Service rate at the end of a billing cycle if the above three conditions are met unless the customer furnishes proof that they did not consume gas on one or more days during such five (5) day period.

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc.**

**RATE MLDS – MAIN LINE DISTRIBUTION SERVICE (Continued)**

**RATE**

The customers under this rate schedule shall be subject to a Customer Charge, and a Distribution Charge.

The rate information is detailed in the Rate Summary pages of this Tariff.

The applicable Distribution Charge for all distribution quantities for MLDS Class II customers shall be determined based upon the Customer Charge group in which the Customer is placed, as established annually.

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff.

**STATE TAX ADJUSTMENT SURCHARGE**

The charges described in this rate schedule are subject to a State Tax Adjustment Surcharge as set forth in the Tariff.

**ELECTIVE BALANCING SERVICES RIDER**

Distribution service under this rate schedule shall be subject to the provisions of Rider EBS as set forth in this Tariff.

**DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

Rate MLDS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

**DETERMINATION OF CUSTOMER CHARGE**

The Customer Charge will be determined based upon the customer's actual throughput quantities, including sales and distribution, measured in therms (thm), for the twelve most recent billing cycle periods ending with the October billing cycle. If a customer does not have sufficient consumption history to determine its Customer Charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the customer to submit estimated annual gas requirements, including sales and distribution, upon which to develop the Customer Charge. The Company in all cases retains the right to review and modify the customer's estimate where necessary. A customer's Customer Charge will remain constant annually, subject to change with the January billing cycle each year.

In all cases, the Company reserves the right to review the Customer Charge and, upon receipt of satisfactory proof, to adjust the Customer Charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which results in a measurable permanent change in the customer's requirement or consumption.

**MAIN LINE EXTENSION DEPOSIT INSTALLMENT PLAN**

(C)

Applicants eligible for Rate Schedule MLDS who have entered into an agreement with the Company to make payments for a main line extension pursuant to the Payment Period of Deposit paragraph in the Capital Expenditure Policy section of Rule 8. **RATE MLDS – MAIN LINE DISTRIBUTION SERVICE (Continued)**

**MINIMUM CHARGE**

The minimum charge shall be the sum of (a) the Customer Charge; plus (b) purchased gas demand charges, if any, under Rate SS. In the event of curtailment in the delivery of gas by the Company below the Maximum Daily Firm Requirement of the Customer, if any, under Rate SS, or complete or partial suspension of operation by the customer due to strikes, fires, floods, explosions or other similar casualties, the Customer Charge shall be reduced in direct proportion to the ratio which the number of days of curtailed service or complete or partial suspension of operation bears to the number of days in the billing period.

**APPLICABLE SALES SERVICE RATE**

Customers under this Rate Schedule desiring to purchase gas shall be charged an amount for recovery of purchased gas costs as set forth in the Rules Applicable to Distribution Service, plus the non-gas portion of distribution charges contained in the first block of Rate SGDS – Small General Distribution Service.

Provided, however, that sales service hereunder shall be considered imbalance gas as defined in the Consumption in Excess of Deliveries section in Paragraph 3 of the Rules Applicable to Distribution Service. The Company undertakes no responsibility to obtain sufficient gas supplies to avoid interruption of sales service on a daily basis, and service is totally interruptible on any day when the Company gives notice to the customer that gas supply is inadequate to supply the customer's requirements, except to the extent the customer nominates Maximum Daily Firm Requirement under Rate SS.

The Company shall give the customer 2 hours advance notice of interruption. Customer agrees that Company shall not be liable for any loss or damage that may be sustained by the customer by reason of any interruption of service.

On any day when the Customer has been given notice by the Company to interrupt, any quantity of gas taken in excess of the quantity specified to be made available that day shall constitute unauthorized takes and shall be subject to the charges set forth in the Rules Applicable to Distribution Service. Payment of such penalty charge shall be in addition to the charges specified above.

**TERMS OF PAYMENT**

Gas distributed hereunder shall be billed in accordance with the terms and conditions set forth in the customer's executed contract governing distribution service. Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill, a delayed payment charge of one and one-quarter percent (1 1/4%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date.

**SPECIAL PROVISIONS APPLICABLE TO ALL MLDS CUSTOMERS**

1. Within sixty (60) days of receipt of all necessary information requested by the Company, to evaluate a customer's application, the Company will respond to the application and agree either to supply service or to deny service on the grounds of insufficient capacity. If the Company refuses to provide distribution service under this rate schedule, the Company shall provide detailed support for its decision.
2. Customers desiring to transfer to or from this rate schedule must notify the Company in writing. Transfers to or from this rate schedule will be allowed only if: (1) the Company can obtain any increase or decrease in its gas supplies, transportation capacity and storage capacity, or any combination thereof that is required to accommodate such change; or (2) the Company, in its sole judgment, concludes that no increase or decrease is required. The Company shall establish the date any transfer is to be effective.

(C) Indicates Change

## **RATE MLDS - MAIN LINE DISTRIBUTION SERVICE (Continued)**

### **SPECIAL PROVISIONS APPLICABLE TO ALL MLDS CUSTOMERS – Continued**

(C)

3. Customers that request to be transferred to this rate schedule prior to the end of the Customer's existing contract under another rate schedule shall be required to contract for Maximum Daily Firm Requirement under Rate SS at the level of the Customer's Maximum Daily Firm Requirement, if any, under such existing contract.
4. Energy usage eligibility for this rate schedule shall be determined annually. In the event Customer's annual throughput is less than or equal to 274,000 thm, the customer shall be transferred to either Rate LDS, Rate SDS or Rate SGDS effective the immediately succeeding January billing cycle.

### **SPECIAL PROVISION APPLICABLE TO CLASS I MLDS CUSTOMERS**

In the event a Class I MLS customer desires to obtain firm transportation capacity on the interstate pipeline system of Columbia Gas Transmission, LLC as to which supplier the Company may exercise an option to convert daily firm wholesale entitlement to daily firm transportation capacity entitlement under Federal Energy Regulatory Commission (FERC) approved rate schedules pursuant to Order 500 and successor orders of that Agency, the Company may assign daily firm transportation capacity entitlement to a Class I MLS customer under the following conditions:

- (a) If, in the exercise of its informed business judgment, the Company determines that it can exercise its conversion option under FERC Order 500 and/or assign such increased transportation capacity without impairing its ability to meet its public service obligation to all customers and its ability to pursue a least cost acquisition policy to obtain system supplies. The Company reserves the right to limit any such conversion and/or assignment as necessary to maintain its ability in this regard;
- (b) The Class I MLS customer agrees to maintain the customer's existing contractual Maximum Daily Firm Requirement under Rate SS - Standby Service (if any) during the term of the assignment;
- (c) The Class I MLS customer signs an agreement committing to pay for the firm transportation demand charges constituting the Company as its agent to purchase gas to be redelivered to the Class I MLS customer after firm transportation service has been provided using the assigned capacity;
- (d) The term of this assignment shall be coextensive with the term of the agency agreement, subject to renewal with express approval of the Public Utility Commission;
- (e) This provision shall be operative only so long as Columbia continues to have the option to convert daily firm wholesale entitlement to daily firm transportation capacity requirements under FERC Order 500 or any successor thereto.

### **RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of distribution service under this rate schedule.

(C) Indicates Change

## **RATE NCS--NEGOTIATED CONTRACT SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any commercial or industrial customer, at the Company's discretion, who meets the following qualifications:

- (a) The customer is not presently served by the Company and has projected throughput requirements of not less than 21,460 thms annually, or is a current customer; and
- (b) The customer gives the Company satisfactory proof that, absent service under this rate schedule, the customer's facilities or operations would not be constructed in the Company's operating territory, or that, absent service under this rate schedule, customer would install long-term alternate fuel facilities.

Service under this rate schedule shall not be available to a single customer who is a Priority 1 Customer, as defined in the Service Limitations section of this tariff, unless such customer also contracts for firm service under Rate SS-Standby Service at a level necessary to meet the portion of daily and seasonal requirements of the facility not covered by installed operable alternative fuel capability.

### **CHARACTER OF SERVICE**

Any qualified customer taking service under this rate schedule shall do so by agreement. This rate schedule shall provide a long-term negotiated contract with the customer, to the extent qualified by the Special Provisions of this tariff.

A Negotiated Contract Service account may be returned to the applicable Sales Service rate if for a period of at least five (5) consecutive days in one billing cycle the Company:

(C)

- (1) has not received gas supply for the account;
- (2) the account's bank balance is insufficient to cover the consumption or the customer did not have access to its bank balance due to the issuance of an OFO and/or OMO; and
- (3) the customer consumed gas on one or more days during such five (5) day period.

For a non-daily read account, the account may be returned to the applicable Sales Service rate at the end of a billing cycle if the above three conditions are met unless the customer furnishes proof that they did not consume gas on one or more days during such five (5) day period.

(C) Indicates Change

## **RATE NCS--NEGOTIATED CONTRACT SERVICE (Continued)**

### **DISTRIBUTION CHARGE**

The Distribution Charge per thm shall be:

- (a) The amount for recovery of non-gas costs, which shall be determined by negotiation between the Company and the customer.
- (b) Distribution service under this rate schedule shall be subject to the provisions of Rider EBS as set forth in this Tariff.

The non-gas portion of these distribution rates is subject to an escalation clause, as set forth in the customer's contract.

### **MINIMUM CHARGE**

Customers served hereunder shall be subject to a minimum charge. Such charge will be determined individually for each customer served under this rate schedule and the amount shall be included in the customer's service agreement. The payment of such minimum charge does not relieve the customer from any minimum charge obligation applicable to service received by the customer under any of the Company's other rate schedules.

### **TERMS OF PAYMENT**

The above rate is net. Gas distributed hereunder shall be billed in accordance with the terms and conditions set forth in the customer's executed contract. Bills for gas sales service and distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall be not less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill, a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle will accrue on the unpaid portion of such bill from the due date to the date of payment. (C)

### **SPECIAL PROVISIONS**

1. Customers shall not be permitted to combine usage with other customers in order to meet the eligibility provisions of this Tariff.
2. The customer shall be responsible to reimburse the Company as billed for any penalty or deficiency charge, however denominated by the Company's interstate pipeline suppliers, incurred by the Company as a result of excessive daily, seasonal or annual takes by the customer.
3. The Company may require that an existing customer agree to separate piping or sub-metering, or verification that additional load is the result of plant expansion.

### **RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

## **RATE NSS - NEGOTIATED SALES SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any commercial or industrial customer, who meets the following requirements:

1. The Customer would not initiate service from the Company or would no longer take service from the Company, but for the availability of service under Rate NSS.
2. The Customer's annual throughput requirements exceed 21,460 thms. (c)
3. The Customer does not take service under any other rate schedule other than Rate SS - Standby Service, with the exception that the customer may receive distribution service under an applicable rate schedule if the customer elects the energy usage nomination option under the RATES section below. (c)
4. The Customer executes a contract for a minimum of one year for service under this Rate Schedule. The contract shall contain the rate or methodology for determining the rate, as well as any other terms and conditions of service.
5. The Customer has installed alternate fuel capability or nominates standby service sufficient to serve all essential Human Needs.

Service hereunder is available only:

- (a) In instances where the Company's facilities and gas supply are adequate or can be made adequate economically to supply Customers' requirements; and
- (b) In months where the Company posts capacity, or obtains additional capacity, as more fully described herein.

### **CHARACTER OF SERVICE**

Service hereunder may be either firm service or interruptible service.

1. Interruptible Service. Under Interruptible service, the Company under this rate schedule takes no responsibility to obtain sufficient gas supplies or capacity to avoid interruption on a daily basis, and service is interruptible on any day when the Company gives notice to the customer. The Company shall give the customer two hours advance notice of interruption. Customer agrees that Company shall not be liable for any loss or damage that may be sustained by the customer by reason of any interruption of service.

(C) Indicates Change

## **RATE NSS - NEGOTIATED SALES SERVICE (Continued)**

### **CHARACTER OF SERVICE - Continued**

2. Firm Service. Where the Company either has or can obtain firm capacity sufficient to meet the customer's firm requirements, the customer may elect firm service. The customer may elect the degree of firm service desired, both with respect to quantities and number of days of interruption. The Company will provide firm NSS service only if: (a) the Company acquires additional capacity specifically to serve the NSS customer on days when service otherwise would be interrupted, or (b) the customer elects Standby Service under Rate SS. Firm Service, other than under Rate SS, shall not be available if the Customer was served by the company under another firm sales service rate schedule during the immediately preceding 12 months, unless the customer demonstrates, to the Company's satisfaction, that the customer otherwise would no longer take firm sales service from the Company (C)

### **RATES**

#### **A. CUSTOMER CHARGE**

Customers hereunder shall pay a customer charge. The charge will be negotiated for each customer served under this rate schedule, and will be no less than the equivalent customer charge under the otherwise applicable Transportation rate schedule and the amount shall be included in the customer's service contract.

#### **B. DISTRIBUTION AND COMMODITY CHARGES**

The Customer shall elect one of the following rate options at the time it executes a contract for service under this rate schedule.

1. Energy Usage Nomination Option - Customers electing the energy usage nomination option shall pay a negotiated rate per thm, which shall be no less than the sum of the following: (C)

- a. the applicable cost of gas, as determined below; plus
- b. an E-Factor charge or credit, if applicable, plus
- c. a negotiated margin, inclusive of amounts necessary to provide for capacity credits as provided for in this rate.

The applicable cost of gas under the energy usage nomination option shall be determined on a monthly basis and shall equal the cost of spot purchases delivered to the city gate and scheduled to commence on the first day of each month, including transportation and retainage; provided, however, that if such scheduled spot purchases are made for both firm sales customers and NSS sales customers, the lowest cost spot purchases shall be charged to firm sales customers. If NSS purchases under the energy usage nomination option are made in excess of the quantity nominated, then the applicable cost of gas for such excess shall be the gas cost computed in accordance with the provision of the Rules Applicable to Distribution Service. If NSS nominations exceed scheduled quantities of spot purchases, the applicable cost of gas for such excess shall be determined in accordance with the No Nomination Option Provision. The applicable cost of gas shall be excluded from the Purchased Gas Cost Rider. (C)

(C) Indicates Change

## **RATE NSS - NEGOTIATED SALES SERVICE (Continued)**

### **RATES - Continued**

Customers receiving service under the energy usage nomination option shall be required to nominate quantities to be received under NSS service not less than 5 business days before each calendar month; provided, however, that, by mutual agreement between the Company and the customer, the nomination date may be set at an earlier date. The customer will be permitted to increase the nomination during the month on 24 hours notice; the customer must agree to pay the commodity cost of additional purchased gas made to accommodate the increased nominations.

2. No Nomination Option - Customers electing the no nomination option shall pay a negotiated rate per thm, which shall be no less than the sum of the following:

- a. the applicable cost of gas, as determined below, plus
- b. an E-Factor charge or credit, if applicable, plus
- c. a negotiated margin, inclusive of amounts necessary to provide for Purchased Gas Cost credits as provided for in this rate.

The applicable cost of gas under the No Nomination Option shall be determined on a monthly basis and shall equal the average city gate commodity cost of gas purchases (excluding gas withdrawn from storage) scheduled to commence on the first day of each month, including transportation and retainage. The applicable cost of gas shall be excluded from the Purchased Gas Cost Rider.

3. Fixed Price Option - Customers electing the fixed price option shall, at the time of execution of their contract, nominate quantities to be taken during each billing cycle of the contract. The rate per thm per month shall be negotiated, but shall be no less than the sum of the following:

(C)

- a. the settled fixed price for natural gas, under a fixed price contract entered into by the Company with a gas supplier, as determined below, including transportation and retainage; plus
- b. an E-Factor charge or credit, if applicable, plus
- c. a negotiated margin, inclusive of amounts necessary to provide for applicable Purchased Gas Cost credits as provided for in this rate.

Contemporaneous with the Customer's execution of a contract under the fixed price option, the Company will enter into a fixed price contract for natural gas with a gas supplier. The contract will provide for quantities equal to the quantities nominated for each month of the Customer's contract. In the event the Company executes, in the same month, multiple contracts having the same term as the contract term of the NSS sale, the higher cost gas supply will be assigned to the NSS customer. The settled fixed price for gas hereunder shall be excluded from the Purchased Gas Cost Rider.

Effective July 7, 1998, if a customer transfers to this rate from another sales rate schedule of the Company, to which the Purchased Gas Cost rider applies, then for a period of twelve months, the commodity rate shall be adjusted to include the amount per thm equal to the "E-Factor" included in the then-applicable Purchased Gas Commodity Cost rate.

(C) Indicates Change

## **RATE NSS - NEGOTIATED SALES SERVICE (Continued)**

### **CREDITS TO THE PURCHASED GAS COST RIDER**

The Company shall credit as revenues for recovery of purchased gas costs, an amount equal to (1) the Rider EBS-Option 2 rates and (2) interstate pipeline capacity costs. The amount of the credit for interstate pipeline capacity costs shall be separately computed for each NSS contract and shall be equal to the greater of the following:

- a. Actual sales multiplied by the average rate per thm of all final accepted bids for thirty day recallable capacity received by Columbia five days prior to the commencement of each month of the contract; or
- b. Actual sales multiplied by \$.00465/thm in December, January and February; and \$.00093/thm in all other months.

For firm service not provided by Rate SS-Standby Service, the Company shall credit an additional amount for recovery of interstate pipeline capacity costs. The amount of the credit shall be separately computed for each firm NSS contract and shall be equal to the actual capacity costs incurred to acquire additional capacity, which was obtained, on either a short-term or long-term basis, in order to provide firm service to the customer on days when service otherwise would be interrupted.

For firm service provided by Rate SS-Standby Service, the credit for recovery of interstate pipeline capacity costs shall be computed in accordance with Rate SS.

### **SPECIAL PROVISIONS**

1. The distribution non-gas margin component of sales under this rate schedule shall be no less than the otherwise-applicable distribution rate offered by Columbia to the customer.
2. Subject to the minimum pricing provisions set forth herein, the price and length of term for service under this rate schedule shall be established through negotiations between the Company and the customer. Provided, however, that no contract shall be entered into hereunder without the Company first posting, on Columbia Gas Transmission, LLC's Electronic Bulletin Board, thirty day recallable capacity. (C)
3. If in any billing cycle the actual usage by the NSS customer is less than nominated quantities, the nominated quantities must be paid for by the customer and the quantity not taken will be subject to the provisions of Rider EBS.
4. The Company shall schedule gas purchases sufficient to meet quantities nominated under this rate schedule each month.
5. On any day when a Customer electing interruptible service under this rate schedule has been given notice by the Company to interrupt, any quantity of gas taken in excess of the quantity specified to be made available that day shall constitute consumption in excess of deliveries and shall be subject to provisions of the Consumption in Excess of Deliveries section in Rule 3 of the RADS. Payment of the charges specified in the above mentioned paragraph shall be in addition to the charges specified in this rate schedule. (C)

(C) Indicates Change

**Issued: December 14, 2016**

**Mark Kempic  
President**

**Effective: December 19, 2016**

## **RATE NSS - NEGOTIATED SALES SERVICE (Continued)**

### **SPECIAL PROVISIONS - Continued**

(C)

6. The Company agrees to retain the actual posted Electronic Bulletin Board notices utilized to determine the aforementioned capacity credit and agrees to provide a summary of the terms of release and prices paid for such release in its annual Section 1307(f) filing.
7. The Company shall include, with its annual Section 1307(f) filing, an identification of the cost of gas acquired to provide service to customers under this rate schedule.
8. The Company agrees to provide a report with its annual Section 1307(f) filing detailing the bases for any service provided under this rate schedule to customers with annual throughput requirements less than or equal to 64,400 thm.

### **STATE TAX ADJUSTMENT SURCHARGE**

The above charges are subject to a State Tax Adjustment Surcharge as set forth in this Tariff.

### **TERMS OF PAYMENT**

The above rates are net. Bills for gas service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall be not less than fifteen (15) days after presentation (date of postmark).

If the Customer fails to pay the full amount of any bill, a delayed payment charge of one and one-quarter percent (1 1/4%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date.

### **RULES AND REGULATIONS**

Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

## **RATE SDSS - SUPPLIER DEFAULT SALES SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any commercial or industrial customer with annual throughput requirements greater than 6,440 thm, and whose natural gas supplier has defaulted according to the NGS Default provisions of the Rules Applicable to Distribution Service section of this Tariff, and who at the time of the default was receiving General Distribution Service under Rate SGDS – Small General Distribution Service, Rate SDS – Small Distribution Service, Rate LDS – Large Distribution Service, Rate MLDS – Main Line Distribution Service, Rate CDS – Cogeneration Distribution Service or Rate EGDS – Electric Generation Distribution Service. (C)

The Company may place Customers meeting the availability requirements on Rate SDSS automatically upon the first billing cycle following the default of the customer's natural gas supplier, unless the Customer notifies the Company that it does not desire to be served under Rate SDSS.

### **CHARACTER OF SERVICE**

The Company shall provide interruptible Natural Gas Supply Service to customers taking Rate SDSS on a best efforts basis and customers served under Rate SDSS shall be considered Sales Service customers for purposes of administering provisions of the Company's Tariff. Nevertheless, the Company undertakes no responsibility to obtain sufficient gas supplies to avoid interruption on a daily basis, and service hereunder is totally interruptible on any day when the Company gives notice to the customer that gas supply is inadequate to supply the customer's requirements, except to the extent the customer nominates Maximum Daily Firm Requirement under Rate SS.

### **RATE**

Customers served under Rate SDSS shall pay the applicable Customer Charge, Distribution Charge, Pass-through Charge, State Tax Adjustment Surcharge and any minimum charge under their former General Distribution Service rate schedule. Each customer served under Rate SDSS shall remain subject to the charges under the Service Option previously chosen under Rider EBS. Customers served under Rate SDSS shall not pay any charges under the Rules Applicable to Distribution Service section of the Tariff ("RADS"), nor shall they pay the Applicable Sales Service Rate contained in their former General Distribution Service rate schedule. Instead, Customers served under Rate SDSS shall pay a commodity charge which shall be the product of multiplying the rate per thm, determined as provided below, by the quantity of gas sold to the customer by the Company during the applicable billing month.

### **DETERMINATION OF COMMODITY RATE**

A charge for commodity gas costs shall be determined by selecting the greater of: (1) the average of the highest "City Gate" price for deliveries for ten (10) consecutive days during the calendar month as published in Platts Gas Daily "Daily price survey" under the heading "Texas Eastern, M-3", or (2) the highest commodity cost of purchases by the Company during the calendar month, including the delivered cost of purchases at the city gate, if any, excluding any purchases under fixed price commodity contracts for which the price was determined more than thirty days before the beginning of the calendar month. The commodity gas cost shall be increased by a premium of 5% in order to determine the final applicable Gas Supply Charge.

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc.**

---

## **RATE SDSS - SUPPLIER DEFAULT SALES SERVICE**

### **CHARGE FOR UNAUTHORIZED TAKES AFTER NOTICE TO INTERRUPT**

On any day when the Customer has been given notice by the Company to interrupt, any quantity of gas taken in excess of the quantity specified to be made available on that day shall constitute unauthorized takes and shall be subject to a penalty charge of \$2.79590 per thm. Payment of such penalty charge shall be in addition to the charges specified in this rate schedule.

### **TERMS OF PAYMENT**

The above rates are net. Bills for gas service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall be not less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill a delayed payment penalty charge of one and one-quarter percent (1¼%) per billing cycle will accrue on the portion of the bill that is unpaid on the due date.

### **SPECIAL PROVISIONS APPLICABLE TO ALL SDSS CUSTOMERS**

(C)

In the event customer's throughput requirements, as determined annually under the Customer Charge provisions of this rate, fall below 6,440 thm, the customer shall be transferred to Rate SGSS – Small General Service Sales Service, effective the immediately succeeding January billing cycle.

### **RULES AND REGULATIONS**

Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

**Mark Kempic  
President**

**Effective: March 27, 2017**

**PAGE 124 INTENTIONALLY LEFT BLANK**

**FOR FUTURE USE**

## **RATE CDS - COGENERATION DISTRIBUTION SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any customer who qualifies as a co-generator under Section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA). Customer must demonstrate to the Company's satisfaction that qualifying cogeneration gas burning equipment will be installed and only gas used for cogeneration will be billed at the rate negotiated under this rate schedule. Service is available when such customer acquires its own gas and executes a contract with the Company for distribution service in accordance with all terms and conditions of such contract. Separate metering and piping to qualifying end use equipment will be required.

Service under this rate schedule shall not be available to a customer who is a Priority 1 Customer, and is using gas to generate electricity for Essential Human Needs Use, (as defined in the Service Limitations of this tariff), unless the customer either purchases Standby Service or has an alternate fuel available to generate electricity to cover the electricity peak day requirement.

### **CHARACTER OF SERVICE**

Service furnished pursuant to this rate schedule shall be subject to termination at the Company's discretion based on its inability to deliver such natural gas. The Company may require 24-hour notice from customer of their desire to operate on any day and the Company may decline to serve a qualified distribution customer if, in the Company's sole discretion, continuation or initiation of distribution service will jeopardize the supply of gas to the Company's firm customers. If service is terminated under this schedule, the Company will attempt to provide service to a customer under an otherwise applicable rate schedule. In the event of termination, the Company will notify the customer as soon as possible.

A Cogeneration Distribution Service account may be returned to the applicable Sales Service rate, if for a period of at least five (5) consecutive days in one billing cycle, the Company:

(C)

- (1) has not received gas supply for the account;
- (2) the account's bank balance is insufficient to cover the consumption or the customer did not have access to its bank balance due to the issuance of an OFO and/or OMO; and
- (3) the customer consumed gas on one or more days during such five (5) day period.

For a non-daily read account, the account may be returned to the applicable Sales Service rate at the end of a billing cycle if the above three conditions are met unless the customer furnishes proof that they did not consume gas on one or more days during such five (5) day period.

### **RATE**

The rate charged qualifying customers in each billing cycle shall be the Distribution Charge and the Rider EBS rate, which shall be determined by negotiation between the customer and the Company. Such rates, which may be subject to an escalation clause, will be included in the customer's service agreement.

(C)

(C) Indicates Change

**RATE CDS - COGENERATION DISTRIBUTION SERVICE (Continued)**

**MINIMUM CHARGE**

Customers served hereunder shall be subject to a minimum charge. Such charge will be determined individually for each customer served under this rate schedule and the amount shall be included in the customer's service agreement. The minimum charge will include the actual additional costs to the Company, if applicable, to connect a cogeneration customer. The payment of such minimum charge does not relieve the customer from any minimum charge obligation applicable to service received by the customer under any of the Company's other rate schedules.

**TERMS OF PAYMENT**

The above rate is net. Gas distributed hereunder shall be billed in accordance with the terms and conditions set forth in the customer's executed contract governing distribution service. Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill, a delayed payment charge of one and one-quarter percent (1 1/4%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date.

(C)

**SPECIAL PROVISIONS**

If a potential customer and the Company cannot agree to terms under this rate schedule, the customer may apply to be classified as a customer under any other rate schedule for which the customer would be eligible.

The Company may retain a reasonable allowance of the total quantity of gas distributed into its system for the customer's account for gas which is lost or unaccounted for in its operations. This allowance will be determined on the basis of an estimate of the lost and unaccounted to be experienced on the specific lines used to serve the customer.

**RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of distribution service under this rate schedule.

(C) Indicates Change

## **RATE EGDS – ELECTRIC GENERATION DISTRIBUTION SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any customer who uses gas to generate electricity for sale, either wholesale or retail; provided that such sale of electricity is subject to the regulatory jurisdiction of either the Pennsylvania Public Utility Commission or the Federal Energy Regulatory Commission. Service under this rate schedule is only available for gas distributed to serve generation requirements. Service is available when such customer acquires its own gas and executes a contract with the Company for distribution service in accordance with all terms and conditions of such contract.

### **CHARACTER OF SERVICE**

Service furnished pursuant to this rate schedule shall be subject to termination at the Company's discretion based on its inability to distribute such natural gas. The Company may decline to serve a qualified distribution customer if, in the Company's sole discretion, continuation or initiation of distribution service will jeopardize the supply of gas to the Company's firm customers. If service is terminated under this schedule, the Company will attempt to provide service to a customer under an otherwise applicable rate schedule. In the event of termination, the Company will notify the customer as soon as possible.

An Electric Generation Distribution Service account may be returned to the applicable Sales Service rate, if for a period of at least five (5) consecutive days in one billing cycle, the Company: (C)

- (1) has not received gas supply for the account;
- (2) the account's bank balance is insufficient to cover the consumption or the customer did not have access to its bank balance due to the issuance of an OFO and/or OMO; and
- (3) the customer consumed gas on one or more days during such five (5) day period.

For a non-daily read account, the account may be returned to the applicable Sales Service rate at the end of a billing cycle if the above three conditions are met unless the customer furnishes proof that they did not consume gas on one or more days during such five (5) day period.

### **RATE**

The rate charged qualifying customers in each billing cycle shall be the Distribution Charge and the Rider EBS rate, which shall be determined by negotiation between the customer and the Company. Such rates, which may be subject to an escalation clause, will be included in the customer's service agreement. (C)

### **MINIMUM CHARGE**

Customers served hereunder shall be subject to a minimum charge. Such charge will be determined individually for each customer served under this rate schedule and the amount shall be included in the customer's service agreement. The minimum charge will include the actual additional costs to the Company, if applicable, to connect an electric generation customer. The payment of such minimum charge does not relieve the customer from any minimum charge obligation applicable to service received by the customer under any of the Company's other rate schedules. (C)

(C) Indicates Change

---

**RATE EGDS – ELECTRIC GENERATION DISTRIBUTION  
SERVICE (Continued)****TERMS OF PAYMENT**

The above rate is net. Gas distributed hereunder shall be billed in accordance with the terms and conditions set forth in the customer's executed contract governing distribution service. Bills for distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill, a delayed payment charge of one and one-quarter percent (1 1/4%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date.

(C)

**SPECIAL PROVISIONS**

If a potential customer and the Company cannot agree to terms under this rate schedule, the customer may apply to be classified as a customer under any other rate schedule for which the customer would be eligible.

The Company may retain a reasonable allowance of the total quantity of gas distributed into its system for the customer's account for gas which is lost or unaccounted for in its operations. This allowance will be determined on the basis of an estimate of the lost and unaccounted for to be experienced on the specific lines used to serve the customer.

**RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of distribution service under this rate schedule.

(C) Indicates Change

## **RATE NGV - NATURAL GAS VEHICLE SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

(C)

Available to any Customer for use of natural gas directly in a natural gas vehicle ("NGV"). The following shall qualify as a customer for purposes of this rate schedule:

1. The operator of a public fueling station.
2. The owner/operator of a natural gas vehicle or fleet of vehicles, who receives service at separately metered fueling facilities owned by the vehicle owner/operator for the exclusive use of the customer's vehicle(s).

### **CHARACTER OF SERVICE**

Except as provided herein, a customer under this Rate Schedule may elect either Firm Sales Service, Interruptible Sales Service or Distribution Service.

Where the customer is the owner/operator of a dedicated natural gas vehicle or dedicated fleet of vehicles used to provide public transportation or otherwise used to provide essential public services, the customer must either:

1. Elect firm sales service; or
2. Provide adequate proof of firm pipeline capacity and firm gas supply obtained by the customer, or contract for Standby Service, to be eligible for distribution service during the term of service under this rate schedule.

Under Interruptible Sales Service, the Company takes no responsibility to obtain sufficient gas supplies to avoid interruption on a daily basis, and service is interruptible on any day when the Company has insufficient supply or capacity to provide service. Where feasible, the Company shall give the Customer two hours advance notice of interruption. The Customer agrees that Company shall not be liable for any loss or damage that may be sustained by the Customer by reason of any interruption of service.

Distribution Service hereunder shall be subject to the Rules Applicable to Distribution Service of this tariff.

### **MAIN LINE EXTENSION DEPOSIT INSTALLMENT PLAN**

Applicants eligible for Rate Schedule NGV with projected annual usage greater than 64,440 therms, who have entered into an agreement with the Company to make payments for a main line extension pursuant to the Payment Period of Deposit paragraph in the Capital Expenditure Policy section of Rule 8. Extensions of these Rules and Regulations Governing the Distribution and Sale of Gas, will have the installment amount included in the cyclical bill for service issued by the Company. The installment amount will be added to the Customer Charge for the duration of the installment payment plan.

(C) Indicates Change

## **RATE NGV - NATURAL GAS VEHICLE SERVICE (Continued)**

### **RATES**

Sales or Distribution service to an operator of a public fueling station, or to an owner/operator of a natural gas vehicle taking service at separately metered fueling facilities owned by the customer, shall be made pursuant to a contract for service under this rate schedule. The contract shall be for no less than a one-year period. The contract may provide for a negotiated customer charge and either a fixed commodity charge or a methodology for determining the commodity charge. The commodity charge shall take into account whether service is a firm sale, interruptible sale or distribution.

### **CREDITS FOR RECOVERY OF PURCHASED GAS COSTS**

Where service hereunder is provided as a sale, the Company shall credit to the Purchased Gas Cost Rider amounts for recovery of purchased gas costs, dependent upon whether sales are firm or interruptible. The amount of the credit shall be as set forth in the Purchased Gas Cost Rider.

### **STATE TAX ADJUSTMENT SURCHARGE**

The above charges are subject to a State Tax Adjustment Surcharge as set forth in this tariff.

### **TERMS OF PAYMENT**

The above rates are net. Where service is pursuant to contract, bills for gas service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than fifteen (15) days after presentation (date of postmark).

If the Customer fails to pay the full amount of any bill, a delayed payment charge of one and one-quarter percent (1 ¼%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date. (C)

Bills for gas sold at a filling station operated by the Company shall be paid at the time of delivery.

### **RIDER EBS**

Distribution service under this rate schedule shall be subject to the provisions of Rider EBS as set forth in this tariff.

### **APPLICABLE SALES SERVICE RATE**

Distribution Customers under this Rate Schedule desiring to purchase gas shall be charged an amount for recovery of purchased gas costs set forth in the Rules Applicable to Distribution Service, plus the non-gas portion of distribution rates contained in the first block of Rate SGS - Small General Service.

Provided, however, that sales service hereunder shall be considered imbalance gas as defined in the Consumption in Excess of Deliveries section in Paragraph 3 of the Rules Applicable to Distribution Service. The Company undertakes no responsibility to obtain sufficient gas supplies to avoid interruption of sales service on a daily basis, and sales service is totally interruptible on any day when the Company gives notice to the customer that gas supply is inadequate to supply the customer's requirements, except to the extent the customer nominates Maximum Daily Firm Requirement under Rate SS.

(C) Indicates Change

## **RATE NGV - NATURAL GAS VEHICLE SERVICE (Continued)**

### **PENALTY FOR FAILURE TO INTERRUPT**

On any day when the Customer has been given notice by the Company to interrupt either interruptible sales service or distribution service, any quantity of gas taken in excess of the quantity specified to be made available that day shall constitute unauthorized takes and shall be subject to a charges set forth in the Rules Applicable to Distribution Service. Payment of such penalty charge shall be in addition to the charges specified herein.

### **SPECIAL PROVISIONS**

1. Where the customer is the operator of a public fueling station, the customer shall obtain all permits, licenses and other governmental approvals necessary to operate a public fueling station, and shall agree to be liable for all taxes levied as a result of sales to the public.

### **RULES AND REGULATIONS**

Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this Rate Schedule, shall govern, where applicable, the supply of sales service under this Rate Schedule.

(C) Indicates Change

**PAGE NO. 132 INTENTIONALLY LEFT BLANK**

**FOR FUTURE USE**

**PAGE NO. 133 INTENTIONALLY LEFT BLANK**

**FOR FUTURE USE**

## **RATE SS – STANDBY SERVICE**

### **AVAILABILITY**

Available to any qualified customer receiving General Distribution Service or Negotiated Sales Service who executes a contract with the Company for service under this rate schedule for a period of not less than one (1) year for Standby Service.

### **PURPOSE**

This rate schedule is designed to provide the maximum unbundling of supply options to customers for which this rate schedule is available. The customer will elect Maximum Daily Firm Requirement which best meets the degree of system supply risk which the customer is willing to assume.

### **NOMINATION OF MAXIMUM DAILY FIRM REQUIREMENT**

The Maximum Daily Firm Requirement shall be the maximum daily quantity of gas that the customer proposes to reserve for purchase from the Company. The Maximum Daily Firm Requirement shall be the quantity of gas nominated by the customer in the customer's contract. The Company retains the right to refuse the requested nomination if the Company determines, in its sole discretion, that it does not have adequate gas supplies or distribution capacity to provide the service over the life of the contract. (C)

In the event the customer desires to increase or decrease the then effective Maximum Daily Firm Requirement, during or at the end of the contract term, it shall, on or before April 1 of any year, notify the Company by letter as to the total amount of such increase or decrease. The Company shall notify the customer by letter as to whether the Company will grant the requested increase or decrease within thirty days of notification that it has received any required change in its daily demand from its supplier. Requests not granted in writing by November 1 shall be deemed denied. No increase or decrease will be granted unless: (1) the Company can obtain a corresponding increase or decrease in its gas supplies, transportation capacity and storage capacity, or any combination thereof; or (2) the Company concludes, in its sole judgment, that the Company can accommodate the requested change without changes in the Company's gas supplies, transportation capacity or storage capacity. Any decrease or increase in the Customer's Maximum Daily Firm Requirement authorized by the Company shall become effective November 1 following April 1 of the year in which notification of the request for change is timely received.

### **RATES**

Maximum Daily Firm Requirement - The rate per thm of Maximum Daily Firm Requirement shall be computed as follows: (C)

The total estimated demand charges to be paid by the Company for the projected period that is the basis for the computation of the projected cost of purchased gas included in base rates under the Purchased Gas Cost Rider of this Tariff, shall be divided by, the total firm entitlement of the Company, expressed in thm, for the projected period that is the basis for the computation of the projected cost of purchased gas included in base rates under the Purchased Gas Cost Rider of this Tariff. (C)

Each time there is a change in the provision for recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider of this Tariff, a re-computation shall be made of the rate per thm of Maximum Daily Firm Requirement. (C)

(C) Indicates Change

## **RATE SS - STANDBY SERVICE (Continued)**

### **GAS SUPPLY RATE FOR PURCHASES**

Quantities of gas purchased from the Company shall be charged an amount for recovery of purchased gas costs set forth in the Rules Applicable to Distribution Service plus the Distribution Charge set forth in Rate SGSS.

### **CHARGE FOR UNAUTHORIZED TAKES**

On any day when the Customer has been given notice by the Company to interrupt, pursuant to provisions contained in the Customer's Primary Rate Schedule, any quantity of gas taken in excess of the Customer's Maximum Daily Firm Requirement for that day shall constitute unauthorized takes and shall be subject to the charges set forth under the Rules Applicable to Distribution Service.

### **STATE TAX ADJUSTMENT SURCHARGE**

The Customer Charge and the Distribution Charge are subject to a State Tax Adjustment Surcharge as set forth in this Tariff.

### **TERM OF CONTRACT**

Contracts for service hereunder shall be for not less than a one (1) year period. Contracts shall be automatically renewed at the end of the initial term for a one year period unless written notice to terminate is given by the Company or the customer not later than sixty days prior to expiration of the contract.

### **SPECIAL PROVISIONS**

The Maximum Daily Firm Requirement of the customer will be contracted for by the Company from its supplier and no curtailments or interruptions of this gas are planned. However, in the event of emergencies, shortages of gas or force majeure causes, the Company reserves the right to curtail the Maximum Daily Firm Requirement of customer, without incurring any liability for any loss or damage that may be sustained by the customer by reason of any such interruptions. The Company will, however, adjust the applicable monthly Maximum Daily Firm Requirement charge, on a pro rata basis, for any curtailment in such Maximum Daily Firm Requirement except for instances where such curtailment is the result of failure by supplier to deliver its contractual commitment to the Company because of a gas supply shortage. Such adjustment shall be made by crediting the customer's applicable monthly bill with an amount equal to the appropriate unit monthly Daily Purchased Gas Demand charge per thm divided by the number of days in the billing cycle times the quantity of gas represented by the difference between the Maximum Daily Firm Requirement and the quantity of gas actually delivered on those days during the billing cycle when deliveries were curtailed below the Customer's Maximum Daily Firm Requirement.

## **RATE DGDS - DISTRIBUTED GENERATION DISTRIBUTION SERVICE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available, at one location, for the distribution requirements of any commercial or industrial customer using distributed generation equipment such as reciprocating engines, gas turbines, microturbines, and fuel cells used for electrical power generation. Service is available when such customer executes a contract with the Company for a period mutually agreed to between the Company and the customer for distribution service in accordance with all terms and conditions of such contract, provided that the Company's facilities are adequate to provide the requested service. (C)

Service under this rate schedule shall not be available to a single customer who is a Priority 1 Customer, as defined in the Service Limitations section of this Tariff, unless such customer also contracts for firm service under Rate SS-Standby Service at a level necessary to meet the portion of daily and seasonal requirements of the facility not covered by installed operable alternative fuel capability.

### **CHARACTER OF SERVICE**

Service furnished pursuant to this rate schedule shall be subject to termination at the Company's discretion based on its inability to distribute such natural gas. The Company may decline to serve a qualified distribution customer if, in the Company's sole discretion, continuation or initiation of distribution service will jeopardize the supply of gas to the Company's firm customers. If service is terminated under this schedule, the Company will attempt to provide service to a customer under an otherwise applicable rate schedule. In the event of termination, the Company will notify the customer as soon as possible.

A Distributed Generation Distribution Service account may be returned to the applicable Sales Service rate if, for a period of at least five (5) consecutive days in one billing cycle, the Company:

- (1) has not received gas supply for the account;
- (2) the account's bank balance is insufficient to cover the consumption or the customer did not have access to its bank balance due to the issuance of an OFO and/or OMO; and
- (3) the customer consumed gas on one or more days during such five (5) day period.

For a non-daily read account, the account may be returned to the applicable Sales Service rate at the end of a billing cycle if the above three conditions are met unless the customer furnishes proof that they did not consume gas on one or more days during such five (5) day period.

### **RATE**

The customers under this rate schedule shall be subject to a Customer Charge a Distribution Charge. The Distribution Charge may be subject to an escalation clause.

If a potential customer and the Company cannot agree to terms under this rate schedule, the customer may apply to be classified as a customer under any other rate schedule for which the customer would be eligible.

### **ELECTIVE BALANCING SERVICES RIDER**

Distribution Service under this rate schedule may be subject to the provisions of Rider EBS as set forth in this Tariff.

(C) Indicates Change

**Issued: December 11, 2018**

**M. A. Huwar  
President**

**Effective: December 16, 2018**

## **RATE DGDS - DISTRIBUTED GENERATION DISTRIBUTION SERVICE (Continued)**

### **MINIMUM CHARGE**

Customers served hereunder may be subject to a minimum charge. Such charge will be negotiated individually for each customer served under this rate schedule and the amount shall be included in the customer's contract. The payment of such minimum charge does not relieve the customer from any minimum charge obligation applicable to service received by the customer under any of the Company's other rate schedules.

### **TERMS OF PAYMENT**

Gas distributed hereunder shall be billed in accordance with the terms and conditions set forth in the customer's executed contract. Bills for gas distribution service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall be not less than fifteen (15) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill, a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per billing cycle will accrue on the unpaid portion of such bill from the due date to the date of payment. (C)

### **SPECIAL PROVISIONS**

1. Service under this rate schedule shall be subject to the Rules Applicable to Distribution Service of this tariff.
2. The Company may require that an existing customer agree to separate piping or sub-metering.
3. The Company may retain a reasonable allowance of the total quantity of gas distributed into its system for the customer's account for gas which is lost or unaccounted for in its operations. This allowance will be determined on the basis of an estimate of the lost and unaccounted for to be experienced on the specific lines used to serve the customer.
4. The Company shall not be obligated to incur additional costs for additional or upgraded facilities necessary to provide distribution service under this rate schedule unless the customer requesting service thereof agrees to pay the costs of additional or upgraded facilities prior to the installation of service.
5. The Customer agrees to permit access to their facilities by employees or agents of the Company at all reasonable times for the purpose of determining that the operation of installed generation equipment and facilities is in compliance with all terms and conditions for service required under this rate schedule.

### **RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas and Rules Applicable to Distribution Service of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of gas service under this rate schedule.

(C) Indicates Change

## **RATE CAP – CUSTOMER ASSISTANCE PLAN**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

Available to any residential customer at one location using natural gas as their main heating source and meeting the following requirements:

1. This rate will serve 100% of the total requirements.
2. The total household income is equal to or less than 150% of the Federal Poverty Level.
3. The customer does not take service under any other rate schedule.
4. The customer is either over sixty years old or is payment-troubled (i.e., has at least one failed payment arrangement with the Company within the past 12 months, has received a termination notice from the Company within the past 12 months, has been verified as a current participant in another utility's CAP, or is unable to establish creditworthiness through the use of generally accepted credit scoring methodology).
5. The meter at the premises must serve only the customer's dwelling space. (C)
6. The customer must agree with the terms specified in the Company's CAP Customer Agreement Form.

### **CAP CUSTOMER APPLICATION AND RESPONSIBILITIES**

In order to gain acceptance in CAP and to maintain participation in CAP after acceptance into the Program, a customer must agree to, and comply with, the following:

1. Verify gross monthly income for all adult household members at time of application.
2. Reverify gross monthly household income annually. This requirement shall be waived in any year that the customer applies for, and receives, an Energy Assistance Grant that is posted to the Company.
3. Notify the Company's Universal Services representative of any changes in income, household size, or residence.
4. Make timely monthly CAP payments, including a \$5.00 co-payment on arrears.
5. Apply for federal Low Income Home Energy Assistance Program (LIHEAP) benefits, and direct the payment of LIHEAP to the Company.
6. Apply for any free weatherization service, including the Company's Warm Wise Program, as well as local county weatherization programs if the customer meets eligibility requirements.
7. Release the Company from any liability associated with the customer's participation in CAP.

(C) Indicates Change

**Rate CAP – CUSTOMER ASSISTANCE PLAN (Continued)**

8. Agree not to use any non-essential gas appliance, such as a pool heater.
9. Allow the Company to purchase gas on the customer's behalf.
10. In the case of a CAP applicant who is currently without service, and who has a balance from a prior account, make an upfront payment in satisfaction of the prior balance up to, but no more than, \$150.

**MONTHLY PAYMENT OPTIONS**

The most affordable payment option for the eligible CAP customer shall be selected from the Options below. The monthly payment will not be less than the average payment received from the customer in the previous twelve (12) months. A minimum payment amount of twenty-five dollars (\$25.00) is required.

- Option #1: Percentage of Income.  
0 – 110% of Poverty = 7%  
110 – 150% of Poverty = 9%
- Option #2: Average of last 12 months of customer payments prior to joining CAP. (Available for customers with at least six months of uninterrupted service.)
- Option #3: Flat rate of 50% of budget billing (adjusted annually)
- Senior CAP Option: Flat rate of 75% of budget billing for all customers over 60 years of age with no arrears or payment arrangement default.

In addition to the monthly payment established under either Option #1, #2, #3, or Senior CAP Option, the CAP customer is required to pay a five-dollar (\$5.00) co-payment towards pre-program arrears, as well as an additional amount calculated each year based on the previous year's LIHEAP grants applied to CAP accounts ("plus amount"). The "plus amount" is determined by dividing the total LIHEAP cash dollars received on CAP accounts in the prior heating season by the number of current CAP customers. The monthly plus amount will be one-twelfth (1/12) of the final total. This amount will be calculated yearly and effective with the October billing cycle.

A CAP customer's monthly payment shall not exceed the non-CAP budget payment applicable to the customer's account, exclusive of the \$5.00 co-payment towards pre-program arrears. In the event that a CAP customer's monthly payment is determined to exceed the non-CAP budget payment applicable to the customer's account, the applicable information is reviewed to determine if the CAP payment should be lowered or if the customer should be removed from CAP.

**SECURITY DEPOSITS**

Confirmed low-income customers and applicants will not be charged security deposits. (C)

Any paid security deposits on accounts with an approved CAP application, and applicable interest specified in the Credit chapter, Interest on Deposits section of this tariff will be credited to the arrears prior to CAP enrollment.

Unpaid security deposits for customers entering into the CAP will be waived after income verification is complete.

(C) Indicates Change

**RATE CAP – CUSTOMER ASSISTANCE PLAN (Continued)**

(C)

**REVERIFICATION**

CAP Customers are required to reverify their income annually.

CAP customers 60 years and older who are also on Social Security or Disability Assistance are exempt from annual re-verification.

A customer who has been removed from CAP for failure to reverify will be re-entered into CAP immediately, once eligible proof of income is received.

**DEFAULT PROVISIONS**

**Nonpayment of CAP During the Period April 1 through November 30**

A CAP customer shall be considered to be in default after two-missed CAP payments, whether consecutive or not, and will be eligible for termination of service in compliance with the Termination of Service provisions of this tariff and all laws and regulations regarding termination of service. The termination notice will reflect all missed CAP payments.

In order to avoid termination of service, a CAP customer who has received a termination notice shall furnish a make-up payment as set forth in the termination notice prior to the scheduled termination date. The Company may, in its sole discretion, delay termination, but such delay shall not be deemed a waiver of the right to terminate service.

**Nonpayment of CAP During the Period November 1 through March 31**

During the period November 1 through March 31, a CAP customer will neither be removed from CAP nor receive a termination notice for failing to make monthly CAP payments.

Starting with the April 1<sup>st</sup> termination date, Columbia will issue termination notices to CAP customers who failed to pay CAP budget payments during the November to March period. The amount on the termination notice shall be for all missed CAP payments.

In order to avoid termination of service, a CAP customer who has received a termination notice shall furnish a make-up payment as set forth in the termination notice prior to the scheduled termination date. The Company may, in its sole discretion, delay termination, but such delay shall not be deemed a waiver of the right to terminate service.

**Customers Requesting Removal**

A customer requesting removal from CAP in writing shall be removed from CAP immediately upon the Company's receipt of such request. The customer may not reenter the CAP for one year after the time of requested removal.

(C) Indicates Change

**RATE CAP – CUSTOMER ASSISTANCE PLAN – (Continued)****Noncompliance with Weatherization Measures**

The Company may, at its discretion, remove from CAP, or increase the monthly CAP payment for, a customer:

1. Refusing a referral for weatherization services.
2. Who has received weatherization services, but who has not reduced monthly consumption.

**Failure to Reverify Income**

The Company will issue a letter to the customer 30 days prior to the customer's CAP participation anniversary date, notifying the customer of the requirement to reverify household income in order to remain in CAP. The Company shall remove from CAP any customer failing to reverify household income within 30 days after the anniversary date and 60 days after the initial notification that reverification of income is required.

**RE-INSTATEMENT PRODECURES**

The Company will re-instate to CAP customers who have been removed from CAP as follows:

1. The customer must pay the entire balance of missed CAP payments including the five-dollar co-pay to the pre-program arrears.
2. Any payments made by the customer after removal are deducted from the amount needed for program re-entry.
3. The pre-program arrearage will be the same at the time of reinstatement as at the time of default.
4. Any charges incurred after default, which are not paid by the customer, are treated as current bill shortfall.
5. This process also applies to CAP customers who move to a new service address with no interruption of service due to termination.

**ARREARAGE RETIREMENT**

A CAP customer will have their entire pre-program arrears forgiven in equal monthly installments over a three year period. Each installment will be forgiven upon receipt of a full monthly CAP payment.

(C)

(C) Indicates Change

**Issued: August 7, 2015****M. R. Kempic  
President****Effective: July 8, 2015**

**RATE CAP – CUSTOMER ASSISTANCE PLAN – (Continued)**

(C)

**CAP AGGREGATION**

A CAP customer is required to agree in writing to allow Columbia to act as an agent, on their behalf to contract for the purchase of gas supplies from a licensed natural gas supplier (NGS).

At least quarterly, the Company will solicit Commission licensed NGSs to provide the CAP gas supply service at a discount in relation to the Company's applicable Purchased Gas Cost rates.

**RIDER PGC**

(C)

The Pass-through Charge includes recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider of this Tariff.

In the event that no licensed NGS responds to a quarterly solicitation to provide CAP gas supply service, the Company will provide natural gas supply to the CAP program participants, and the Gas Supply Charge to be used to determine current bill shortfall will include recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider of this Tariff.

**TERMS OF PAYMENT**

The CAP monthly payment must be paid by the due date.

Any customer found stealing gas will be charged separately from their CAP payment or billed separately for CAP prior to reconnection for the amount of the theft.

**RULES AND REGULATIONS**

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of gas service under this rate schedule.

## **RIDER USP – UNIVERSAL SERVICE PLAN**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

This Rider shall be applicable to all residential customers except customers in the Company's Customer Assistance Plan ("CAP").

### **CHARACTER OF RATE**

This Rider has been established to recover costs related to the Company's Universal Service and Conservation Programs.

### **RATE**

The Rider USP rate shall be included in the Pass-through Charges on the customer's bill for Rate Schedules RSS, and RDS. The Rider USP shall not be billed to customers being served on Rate CAP.

The rate information is detailed in the Rate Summary pages of this Tariff.

### **CALCULATION OF RATE**

The Rider USP rate shall be calculated to recover costs for the following programs: Low Income Usage Reduction Program (LIURP); Customer Assistance Program (CAP); and the WarmWise® Audits and Rebates program; and the Emergency Repair Program (ERP). (C)

LIURP costs will be calculated based on the projected number of Level 1 income homes to be weatherized. WarmWise® Audits and Rebates program costs will be calculated on the projected number of Level 2 income homes provided with an energy audit, programmable thermostat and/or rebates.

CAP costs will be calculated to include the projected CAP Shortfall (the difference between the total calculated RSS bill excluding Rider CC and Rider USP and the CAP bill) based upon the current discounts at normalized annual quantities of the then-current CAP participants, the projected CAP Shortfall for projected customer additions to CAP during the period that the USP Rider rate will be in effect at the average discount of current CAP participants at normalized annual quantities, the projected CAP customer application and administration costs, the projected CAP pre-program arrearages to be forgiven and written off during the next 12 months. (C)

If the Company is successful in obtaining a CAP gas supply aggregator as provided in Rate CAP-Customer Assistance Plan, then the shortfall will be adjusted to reflect the RDS rate plus the gas costs resulting from the aggregation service.

The costs shall be divided by the total annual projected throughput quantities of all residential non-CAP customers as established in the Company's most recent Purchased Gas Cost proceeding to determine the rate per thm for this Rider.

(C) Indicates Change

---

**Issued: December 15, 2015**

**Mark Kempic  
President**

**Effective: December 18, 2015**

---

**RIDER USP – UNIVERSAL SERVICE PLAN – Continued**

**QUARTERLY ADJUSTMENT**

Each quarter, and at any time that the Company makes a change in base rates or Purchased Gas Cost rates affecting residential customers, the Company shall recalculate the Rider USP rate pursuant to the calculation described above to reflect the Company's current data for the components used in the USP rate calculation. The Company shall file the updated rate with the Commission to be effective one (1) day after filing.

**ANNUAL RECONCILIATION**

On or before April 1 each year, the Company shall file with the Commission data showing the reconciliation of actual revenues received under this Rider and actual recoverable costs incurred for the preceding twelve months ended December. The resulting over/undercollection (plus interest calculated at 6% annually) will be reflected in the CAP quarterly rate adjustment to be effective April 1. Actual recoverable costs shall reflect actual application costs, actual LIURP costs, and actual WarmWise® Audits and Rebates program costs. Actual recoverable costs shall also reflect actual shortfall costs and actual pre-program arrearages, provided that CAP participation on an average annual basis for the preceding year did not exceed 23,000 participants. In the event that CAP participation in the preceding year exceeded 23,000 on an average annual basis, actual recoverable costs shall reflect actual shortfall cost and actual pre-program arrearages for all customers up to the 23,000 participation level. For any and all CAP customers exceeding the 23,000 participation level on an average annual basis, Columbia shall offset the actual shortfall and actual pre-program arrearages by 7.5%. Except for the offset that is applied when CAP participation exceeds 23,000 on an average annual basis, actual CAP shortfall costs shall be based upon actual numbers of CAP customers, actual CAP throughput quantities, actual CAP payments received.

(C)

(C) Indicates Change

## **RIDER CC - CUSTOMER CHOICE**

### **APPLICABILITY**

This Rider has been established to recover costs related to providing Customer Choice to customers in Pennsylvania.

In addition to the charges provided in this Tariff, an amount shall be added to the otherwise applicable charge for each thm of sales quantities or distribution quantities distributed by the Company to Customers receiving service under Rate Schedules RSS, RDS, and SCD, SGSS, SGDS, and DGDS using less than or equal to 64,400 thm annually. (C)

### **RATE**

The Rider CC rate will be included in the Pass-through Charge on the customer bill.

The rate information is detailed in the Rate Summary pages of this Tariff.

Customers enrolled in the Company's Customer Assistance Plan ("CAP") shall not be billed the Rider CC.

Further, the Company may reduce or eliminate the otherwise applicable charge to any Customer if it is reasonably necessary to do so to meet competition from an alternative fuel, including gas from another supplier of gas that has constructed, or could construct, facilities to deliver gas to the Customer without use of the Company's facilities. The Company will notify Customer of the applicable rate if lower than the applicable rate set forth above, four (4) days prior to the beginning of each billing cycle, unless the rate is the same as charged by the Company in the prior cycle. Such reduction or elimination of the charge shall be eliminated or reduced before any reduction is made to the other charges under this Tariff. (C)

(C) Indicates Change

**RIDER EDS - ECONOMIC DEVELOPMENT SERVICE RIDER****APPLICABILITY**

Throughout the territory served under this Tariff.

**AVAILABILITY**

This Rider is available to a commercial or industrial customer which receives service under Rate LGSS, Rate SDS, or Rate LDS ("Applicable Schedule") and which meets the following additional qualifications:

(a) The customer is a new customer or has not been a customer of the Company for a period of two (2) years prior to requesting service in accordance with this Rider and can document to the Company's satisfaction that additional consumption will result at customer facility;

(b) The throughput requirements of the customer are projected to be greater than 64,400 thm annually; and (C)

(c) The customer gives the Company satisfactory proof that, absent service under this Rider, the customer's facilities or operations would not be constructed in the Company's operating territory, or that, absent service under this Rider, customer would install long-term alternate fuel facilities.

**CHARACTER OF SERVICE**

This Rider provides for reduced charges for new gas loads related to economic development projects within the Company's service area. Service pursuant to this Rider will commence upon approval by the Company and will continue for a period not to exceed three (3) years.

**RATE**

The monthly charges for service to customers for which this Rider is applicable shall be computed based upon a declining, three-year percentage reduction in the Distribution Charge under the Applicable Schedule. The Customer Charge, Pass-through Charge, Gas Supply Charge, Gas Cost Adjustment, penalties and charges of third party transporters, if any, under the Applicable Schedule are not subject to reduction. The percentage reductions are as follows: (C)

First Year -	35% reduction
Second Year -	25% reduction
Third Year -	15% reduction

**FLEXIBLE RATES**

To the extent that the Applicable Schedule contains provisions permitting the Company to lower ("flex") applicable Distribution Charges to meet competition from an alternative fuel, nothing in this Rider shall be interpreted to prohibit the operation of such flex provisions to obtain or maintain a customer. The otherwise applicable percentage reduction set forth in this Rider shall not be applicable to that portion of a customer's rate that is flexed downward. (C)

(C) Indicates Change

**RIDER EDS - ECONOMIC DEVELOPMENT  
SERVICE RIDER (Continued)**

**NO BUYERS GROUPS PERMITTED**

Customers shall not be permitted to combine usage with other customers in order to meet the eligibility provisions of this Rider.

**OTHER PROVISIONS**

Except as modified by the terms of this Rider, all provisions of the Applicable Schedule apply to service to the customer.

## RIDER PGC - PURCHASED GAS COST

### PROVISIONS FOR RECOVERY OF PURCHASED GAS COSTS

#### RIDER PGC APPLICABLE TO SALES SERVICE CUSTOMERS

Rates for each thm of gas supplied to sales customers subject to this Rider under the Rate RSS, Rate SGSS, Rate LGSS, and Rate MLSS rate schedules shall include \$0.54943 per thm for recovery of purchased gas costs. This rate includes the commodity cost component (CC) of \$0.32815 per thm, the commodity "E" Factor component (CE) of \$0.01277 per thm, the demand cost component (DC) of \$0.19200 per thm, and the demand "E" Factor component of \$0.01651 per thm. (I)(D)

#### RIDER PGC APPLICABLE TO SGDS PRIORITY ONE CUSTOMERS

Rates for each thm of gas distributed under the Rate SGDS rate schedules for Priority-One Service customers shall include \$0.20851 per thm for recovery of Purchased Gas Demand Costs (PGDC). This rate includes the DC of \$0.19200 per thm and the demand "E" Factor component of \$0.01651 per thm. (D)

#### RIDER PGC CHARGED TO CHOICE DISTRIBUTION SERVICE CUSTOMERS

Rates for each thm of gas distributed under Rate RDS and Rate SCD shall include \$0.18023 per thm for recovery of Purchased Gas Demand Costs. This rate includes the DC of \$0.19200 per thm, the Capacity Assignment Factor (CAF) of (\$0.02828) per thm and the DC "E" Factor component of \$0.01651 per thm. The CAF represents costs not assignable to Choice Distribution Service customers. (I)(D)

Such rates shall be increased or decreased, from time to time, as provided by Section 1307(f) of the Public Utility Code and the Commission's Regulations, to reflect changes in the level of purchased gas costs, as calculated in the manner set forth below.

### PRESENTATION ON CUSTOMER BILLS

For sales service customers served under Rate RSS, Rate SGSS, Rate LGSS and Rate MLSS, the Pass-through Charge includes the PGDC of \$0.19200 per thm plus the demand "E" Factor of \$0.01651 per thm. The two factors total \$0.20851 per thm. The Gas Supply Charge includes the PGCC of \$0.32815 per thm. The Gas Cost Adjustment is the commodity "E" Factor of \$0.01277 per thm. (I)(D)

For General Distribution Service customers served under Priority-One Rate SGDS, the Pass-through Charge includes the PGDC of \$0.19200 per thm and the demand "E" Factor component of \$0.01651 per thm, totaling \$0.20851 per thm. (D)

For Choice Distribution Service customers served under Rate RDS or Rate SCD, the Pass-through Charge includes the PGDC of \$0.19200 per thm, the CAF of (\$0.02828) per thm and the demand "E" Factor component of \$0.01651 per thm, all of which total \$0.18023 per thm. (I)(D)

### QUARTERLY UPDATES

The Company's rates for recovery of purchased gas costs are also subject to quarterly adjustments under procedures set forth in the Commission's regulations at 52.Pa. Code § 53.64 (i) (5). Such updates shall reflect, in addition to the provisions of the regulation, adjustments to the projected commodity cost of purchased gas based upon more current versions of the same sources of data and using the same methods to project the commodity cost of purchased gas approved by the Commission in the Company's most recent annual proceeding for recovery of purchased gas costs under section 1307(f) of the Public Utility Code.

(D) Indicates Decrease (I) Indicates Increase

## **RIDER PGC - PURCHASED GAS COST (Continued)**

### **COMPUTATION OF PURCHASED GAS COMMODITY COSTS PER THM**

Purchased gas commodity costs, per thm, shall be computed to the nearest one-thousandth cent (0.001¢) in accordance with the formula set forth below:

$$PGCC = [(CC - CE) \div S]$$

Purchased gas commodity costs, so computed, shall be included in rates charged to customers for gas service under the Rate RSS, Rate SGSS, Rate LGSS, and Rate MLSS rate schedules for twelve consecutive billing cycles beginning October 1 of each year unless such period is revised by the Commission. The amount of purchased gas commodity costs, per thm, will vary, if appropriate, based upon annual filings, by the Company, pursuant to Section 1307(f) of the Public Utility Code and such supplemental filings as may be required or be appropriate under Section 1307(f) of the Commission's Regulations adopted pursuant thereto.

In computing purchased gas commodity costs per thm, pursuant to the formula above, the following definitions shall apply:

"PGCC" - purchased gas commodity costs determined to the nearest one-thousandth cent (0.001¢) to be included in rates for each thm of gas supplied under this Rider for the Rate RSS, Rate SGSS, Rate LGSS, and Rate MLSS rate schedules.

"CC" - the estimated current commodity cost of gas, which shall be determined as follows:

1. for all types of purchased gas, the projected commodity cost for each purchase (adjusted for net current gas stored), for the projected period when rates will be in effect; plus
2. the arithmetic difference of (a) the projected book value of noncurrent gas at the beginning of the computation year minus (b) the projected book value of noncurrent gas at the end of the computation year; plus
3. any other purchased gas costs not defined as demand costs.

"CE" - experienced net overcollection or undercollection of purchased gas commodity costs.

Such experienced net overcollection or undercollection shall be determined for the most recent period permitted under law which shall begin with the month following the last month which was included in the previous over-under collection calculation reflected in rates.

Supplier refunds received that are specifically identifiable as refunds of commodity costs will be in the calculation of "CE" with interest added at the annual rate of six percent (6%) calculated from the month received to the effective month such refund is refunded. The period over which such refunds will be made shall be established by the Commission.

The portion of commodity cost Supplier Refunds that would otherwise be credited to residential customers shall be credited to the Hardship Fund (mentioned in the USP Rider section of this tariff) when the balance of the Hardship Fund falls below \$750,000. The non-residential portion of commodity cost Supplier Refunds will be credited to applicable non-residential customers through the PGC. When the Hardship Fund balance is \$750,000 or more, any Supplier Refunds received by the Company will be included in the calculation of the PGCC as specified above. (C)

"S" - projected thm of gas to be billed to customers subject only to Rider PGC under the commodity charges of the Rate RSS, Rate SGSS, Rate LGSS, and Rate MLSS rate schedules of this tariff during the period when rates will be in effect.

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc.**

## **RIDER PGC - PURCHASED GAS COST (Continued)**

### **COMPUTATION OF PURCHASED GAS DEMAND COSTS PER THM**

For customers subject to this Rider, purchased gas demand costs, per thm, shall be computed to the nearest one-thousandth cent (0.001¢), in accordance with the formula set forth below:

$$\text{PGDC} = (\text{DC} - \text{DE}) \div \text{S}$$

Purchased gas demand costs, so computed, shall be included in rates charged to customers for gas service, pursuant to the Rate RSS, Rate RDS, Rate SGSS, Rate SCD, Rate LGSS, and Rate MLSS rate schedules, and Priority One SGDS Customers receiving distribution service, for the twelve consecutive billing cycles beginning October 1 of each year unless such period is revised by the Commission. The amount of purchased gas demand costs, per thm, will vary, if appropriate, based upon annual filings, by the Company, pursuant to Section 1307(f) of the Public Utility Code and such supplemental filings as may be required or be appropriate under Section 1307(f) of the Commission's regulations adopted pursuant thereto. (C)

In computing purchased gas demand costs, per thm, pursuant to the formula, above, the following definitions shall apply:

"PGDC" - purchased gas demand costs determined to the nearest one-thousandth cent (0.001¢) to be included in rates for each thm of gas supplied under the Rate RSS, Rate SGSS, Rate LGSS, and Rate MLSS rate schedules of the tariff.

"DC" - the estimated current demand cost of gas, which shall be determined as follows:

1. for all types of purchased gas, the projected total demand charges from any interstate pipeline company or any source of gas supply purchased by the Company for the projected period when rates will be in effect; plus
2. the projected firm transportation reservation or standby service charges of any interstate or intrastate pipeline or supplier, excluding charges for transportation acquired for the purpose of providing the Full Balancing Service under Rider EBS – Option 1; plus
3. the projected charges for storage capacity of any interstate or intrastate pipeline supplier, excluding charges for storage capacity acquired for the purpose of providing the Full Balancing Service under Rider EBS – Option 1.

From the sum of items 1, 2 and 3 the following amount shall be deducted:

- a. the projected Maximum Daily Firm Requirement to be billed to all customers under Rate SS during the projected period times the rate per thm under the Maximum Daily Firm Requirement charge of Rate SS;
- b. the projected intra-cycle balancing service costs to be billed to customers electing Rider EBS - Option 2. (C)

"DE" - experienced net overcollection or undercollection of purchased gas demand costs.

Such experienced net overcollection or undercollection shall be determined for the most recent period permitted under law which shall begin with the month following the last month which was included in the previous over-undercollection calculation reflected in rates. "DE" shall be \$0 prior to October 1, 1996.

(C) Indicates Change

## **RIDER PGC - PURCHASED GAS COST (Continued)**

### **COMPUTATION OF PURCHASED GAS DEMAND COSTS PER THM – Continued**

Supplier Refunds and Pipeline Penalty Credits that are not included in "CE" will be included in the calculation of "DE". Supplier Refunds and Pipeline Penalty Credits will include interest added at the annual rate of six percent (6%) calculated from the month received to the effective month such refund is refunded. The period over which such refunds will be made shall be established by the Commission.

"S" - projected thms of gas to be billed to customers under the distribution charges of the Rate RSS, Rate SGSS, Rate LGSS, and Rate MLSS rate schedules plus the projected thm of gas to be distributed to customers under Rate RDS, Rate SCD and SGDS Priority One Distribution rate schedules of this Tariff during the period when rates will be in effect.

The portion of Supplier Refunds and Penalty Credits that would otherwise be credited to residential customers shall be credited to the Hardship Fund (mentioned in the USP Rider section of this tariff) when the balance of the Hardship Fund falls below \$750,000. The non-residential portion of Supplier Refunds and Penalty Credits will be credited to applicable non-residential customers through the PGC. When the Hardship Fund balance is \$750,000 or more, and Pipeline Supplier Refunds and Pipeline Penalty Credits received by the Company will be included in the calculation of the PGDC as specified above.

### **PROVISION OF PURCHASED GAS DEMAND COST CREDIT DUE TO CUSTOMERS ELECTING CHOICE DISTRIBUTION SERVICE – CAPACITY ASSIGNMENT FACTOR (CAF)**

The Purchased Gas Demand Cost (PGDC) rate included in the Pass-through Charge billed to Choice Distribution Service customers served under Rate RDS or Rate SCD shall be \$0.18023 per thm. Such rate shall be equal to the PGDC component of \$0.20851 per thm as calculated above, less the CAF of \$0.02828 per thm. The CAF shall be equal to the projected annual cost of assigned Firm Capacity less estimated annual storage commodity costs (storage injection, withdrawal, shrinkage and commodity transportation cost) with the net divided by the estimated, normalized annual usage of customers electing Choice Distribution Service. The CAF of \$0.02828 per thm representing costs not assignable to CHOICE customers shall be included in the Price-to-Compare. (D)

### **DETERMINATION OF OVER/UNDERCOLLECTION OF GAS COSTS**

#### **Commodity E-factor**

In computing the experienced over/under collection of purchased gas commodity costs for a period defined by the Commission, the following procedure shall be used:

- (a) All experienced purchased gas commodity costs actually incurred by the Company to service customers pursuant to all rate schedules of this Tariff.

Experienced purchased gas commodity costs shall include, but not be limited to, the following:

- (1) payments to suppliers to accept assignment of capacity on interstate pipelines other than Columbia Gas Transmission, LLC to the extent permitted under the Rules Applicable to Distribution Service;
- (2) costs paid for employing futures, options and other risk management tools, including but not limited to, supplier related costs associated with the fixed price contracts or financial contracts utilized by the Company to lessen the impact of price volatility for PGC customers; and
- (3) the index price of gas purchased from distribution customers under the provisions of the Deliveries in Excess of Consumption section of Paragraph 3 of the Rules Applicable to Distribution Service.

(D) Indicates Decrease (I) Indicates Increase

**RIDER PGC - PURCHASED GAS COST (Continued)**

**DETERMINATION OF OVER/UNDERCOLLECTION OF GAS COSTS - Continued**

- (b) The following amount shall be included as revenues recovered for gas commodity costs:
- (1) an amount determined by multiplying commodity sales quantities subject only to Rider PGC billed under the Rate RSS, Rate SGSS, Rate LGSS, and Rate MLSS rate schedules, for the applicable over/undercollection period, times the PGCC component excluding the commodity E Factor; plus
  - (2) an amount determined by multiplying commodity sales quantities billed under Rate SGDS, Rate SDS, Rate LDS, Rate MLDS, and Rate SDSS rate schedules, times the index price of gas defined in the Consumption in Excess of Deliveries section of the Rules Applicable to Distribution Service.

**Demand “E” Factor**

In computing the experienced over/undercollection of purchased gas demand costs for a period defined by the Commission, the following procedure shall be used:

- (a) All experienced purchased gas demand costs actually incurred by the Company to service customers pursuant to all rate schedules of this tariff, excluding the cost of capacity acquired for the purpose of providing Full Balancing Service under Option 1 of the Elective Balancing Services Rider. Capacity acquired to provide Full Balancing Service under EBS Option 1 will include sufficient storage capacity for the aggregate of the maximum banks provided under this option, and sufficient storage withdrawal and transportation capacity to provide the firm balancing entitlements.
- (b) The following amount shall be included as revenues recovered for gas demand costs:
  - (1) an amount determined by multiplying Distribution quantities billed under this Rider for the Rate RSS, Rate CAP, Rate RDS, Rate SCD, Rate SGSS, Priority One Rate SGDS, Rate LGSS and MLSS rate schedules, for the applicable over/undercollection period, times the PGDC component excluding the demand E Factor; plus
  - (2) the amounts billed under Rate SS; plus
  - (3) the amounts billed distribution service customers under Rider EBS - Option 2; plus
  - (4) credits received for capacity assigned pursuant to the Rules Applicable to Distribution Service.

Interest on over/under collection of commodity and demand costs shall be computed in accordance with Section 1307(f)(5) of the Public Utility Code from the month that the over or undercollection occurs to the effective month such over or undercollection is refunded. (C)

(C) Indicates Change

**RIDER PGC - PURCHASED GAS COST (Continued)****DETERMINATION OF OVER/UNDERCOLLECTION OF GAS COSTS - Continued****ADJUSTMENT OF "E" FACTOR AMOUNTS**

Each 1307(f) rate shall also provide for refund or recovery of amounts necessary to adjust for over or underrecoveries of "E" Factor amounts included in prior 1307(f) rates. In computing the amount to be included for over or undercollection of "E" Factor amounts, the amount recovered for "E" Factor amounts under the prior 1307(f) rate shall be determined by multiplying the applicable Distribution quantities billed under the Rate CAP, Rate RSS, Rate SGSS, Rate LGSS, Rate MLSS, Rate RDS, Priority One Rate SGDS, and Rate SCD rate schedules during the applicable 1307(f) period times the portion of the PGCC and the PGDC component that provides for recovery of "E" Factor amounts.

**SUPPLIER REFUNDS APPLICABLE TO RATE SS CUSTOMERS**

Any supplier refunds received from Columbia Gas Transmission, LLC, which are specifically identified as refunds of Contract Demand charges made after March 31, 1992, shall be refunded pro rata to customers taking service during the applicable prior period(s) under Rate SS. All refunds shall include interest added at the annual rate of six percent (6%) calculated from the month received to the month the refund is made. Refunds shall be paid once each year, as soon as practicable following October 30 of each year, and shall include all applicable supplier refunds received by the Company during the preceding twelve-month period ended October 30. (C)

(C) Indicates Change

---

**Issued: December 14, 2016**

**Mark Kempic  
President**

**Effective: December 19, 2016**

**PURCHASED GAS COST RIDER (Continued)**

**GAS PROCUREMENT INCENTIVE PROGRAM**

The gas procurement incentive program will be limited to spot gas purchased for the months of April through October. Each month the Company's actual cost will be compared to an adjusted NYMEX index for such month.

The adjusted NYMEX index will be determined by averaging the month end closing prices reported for the last three days of trading on NYMEX after adjusting these prices for the differential between the average of indices representing cash prices paid on such days at the Henry Hub, for gas to be delivered on the first day of the month, and the average of indices prices representing the specific delivery points where Columbia takes title to its gas supply. In any instances where indices are not published in any one of the three chosen publications for a receipt point where the Company purchases spot gas, then the index used will be (1) Columbia Gas Transmission, LLC's Appalachian Index average used at points of delivery into Columbia Gas Transmission, LLC; (2) Columbia Gas Transmission, LLC's Appalachian Index average plus Columbia Gas Transmission, LLC's Storage Service Transportation commodity costs used at points of delivery out of Columbia Gas Transmission, LLC; or (3) if the first two are not appropriate, the price paid will be adjusted by deducting a 100% load factor firm transportation rate to the most applicable receipt point where an index is available. The index and Henry Hub prices utilized will be an average of first of the month prices reported in *Inside F.E.R.C.'s Gas Market Report*, *Natural Gas Week* and *Natural Gas Intelligence*.

A band of ninety-nine (99%) to one-hundred one percent (101%) will be applied monthly to the average indexed prices, as described above, to be compared to the Company's actual prices paid for spot gas purchased to flow during the month to determine the appropriate monthly retention of savings or absorption of losses. The Company will share savings 50%/50% between customers and the Company for increments of actual gas purchases below ninety-nine percent (99%) of the adjusted NYMEX index. The Company will absorb losses 50%/50% between customers and the Company for increments of actual gas purchases above one-hundred one percent (101%) of the adjusted NYMEX index. If the actual gas purchases fall within the band, there will be no sharing.

This program will be in effect from October 1, 2002 through September 30, 2004, unless extended by the Company with approval of the Commission.

**RATE NGV GAS COST CREDIT**

The following purchased gas cost credits shall be provided for all gas sold under the NGV rate schedule:

1. Demand Costs

For firm sales under Rate NGV, an amount per thm for recovery of demand costs determined as follows:

$$\frac{\text{Annual Demand Costs}}{(\text{Maximum Daily Quantity} \times 365) \times \text{Average NGV Load Factor}}$$

Where:

- a. Annual Demand Costs equal the total annual demand charges for supply and capacity included in the Company's purchased gas cost rates under the Purchased Gas Cost Rider, and
- b. Maximum Daily Quantity equals the highest usage in a single billing cycle during the prior November through October period divided by 20 days.

(C)

(C) Indicates Change

**Issued: December 11, 2018**

**M. A. Huwar  
President**

**Effective: December 16, 2018**

**PURCHASED GAS COST RIDER (Continued)**

**RATE NGV GAS COST CREDIT - Continued**

1. Demand Costs - continued

For interruptible sales under Rate NGV, an amount for recovery of upstream capacity costs, which is the greater of the following:

- a. The average rate per thm of all final accepted bids for thirty day recallable capacity received by the Company five days prior to the commencement of each month of the contract; or
- b. \$.00465/thm in December, January and February, and \$.00093/thm in all other months.

2. Commodity Costs

The amount to be credited for recovery of commodity costs shall be determined on a monthly basis and shall equal the highest cost of spot purchases scheduled to commence on the first day of each month, including transportation and retainage. If no spot purchases are scheduled, the amount to be credited shall be the average commodity cost of gas purchased during the months, including transportation and retainage.

**SHARING OF CAPACITY RELEASE REVENUE**

Capacity release credits derived from "administrative releases" shall be excluded from the foregoing sharing calculation, and all such credits actually derived shall be included in the demand "E" Factor in their entirety. "Administrative releases" are defined as follows:

(C)

- (i) Revenues for release of capacity to a producer or marketer where Columbia purchased the gas transported by the producer or marketer for its system supply;
- (ii) Revenues from releases of capacity at full margin to certain end-use customers where such releases were the result of the conversion of pre-Federal Energy Regulatory Commission Order No. 636 buy-sell arrangements; and
- (iii) Revenues from releases of capacity used in serving end users in a Commission-approved unbundling of service, provided that the benchmark would be adjusted to reflect the assignment of such capacity.

**SHARING OF OFF-SYSTEM SALES REVENUE**

Following is the definition of gas cost for off-system sales program:

- (i) For sales in which a specific purchase is not made, the cost of gas will be defined as the daily average city gate commodity cost of the gas supplies purchased by the Company and flowing on the first of the month (WACCOG). For sales made upstream of the Company's city gate, the cost of transportation, including retainage, from the point of sale to the city gate will be subtracted from the WACCOG. This amount will be further adjusted to include applicable taxes, other than income taxes, and other costs.
- (ii) For incremental sales in which a specific purchase is made, the cost of gas will be defined as the purchase price plus transportation costs, including retainage, taxes and other costs that have or will be incurred.

(C) Indicates Change

## **PURCHASED GAS COST RIDER (Continued)**

### **SHARING MECHANISM FOR OFF-SYSTEM SALES AND CAPACITY RELEASE REVENUES**

The sharing mechanism for the off-system sales and capacity release revenues shall be as follows. Customers shall receive 75% of all net proceeds through credits in the PGC rates. The Company will calculate the projected credit for each PGC application period (October through the following September) based upon an average of the three most recently completed PGC application periods for which data are available at the time of the PGC pre-filing made by March 1. Each September, the credits actually received by customers in the PGC application period then ending will be reconciled to the customers' share of the net proceeds actually realized during that period, and any difference will be included in the E-factors for the following PGC application period.

The projected off-system sales and capacity release margins credited to the PGC will be reflected in the Purchased Gas Demand Cost (PGDC). The reconciliation of prior year projections and actual off-system sales and capacity release margins will be reflected in the Demand "E" Factor. (C)

(C) Indicates Change

## **RIDER GPC – GAS PROCUREMENT CHARGE**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

This Rider shall be applicable to residential customers taking service under Rate Schedules RSS, and commercial or industrial customers taking service under Rate Schedules SGSS, LGSS and MLSS. The Rider will also be applicable to customers taking service on Rate Schedule CAP if an NGS is not currently providing natural gas to the CAP aggregation.

### **CHARACTER OF RATE**

The Rider GPC was established in compliance with the Pennsylvania Public Utility Commission's Revised Final Rulemaking in Docket No. L-2008-2069114 and is addressed in the PA Code Title 52, Chapter 62, §62.223.

The Gas Procurement Charge is a volumetric charge included in the Gas Supply Charge that reflects the Company's natural gas procurement costs.

The Rider identifies and removes the natural gas procurement costs from base rates and recovers the costs through the Gas Supply Charge on a revenue neutral basis.

### **RATE**

The Rider GPC is a component of the Price-to-Compare and appears in the Gas Supply Charge Summary and the Price to Compare Summary pages of this Tariff.

The Rider GPC is not subject to reconciliation and will only be recalculated in a base rate case.

The Rider GPC rate is \$0.00113 per therm.

(I)

(C) Indicates Change (D) Indicates Decrease (I) Indicates Increase

**RIDER MFC – MERCHANT FUNCTION CHARGE****APPLICABILITY**

This Rider shall be applicable to residential customers taking service under Rate Schedules RSS, or CAP (unless an NGS is serving the CAP aggregation) and commercial or industrial customers taking service under Rate Schedule SGSS.

**CHARACTER OF RATE**

This Rider was established in compliance with the Pennsylvania Public Utility Commission's Revised Final Rulemaking Order dated June 23, 2011 in Docket No. L-2008-2069114 and is addressed in the PA Code Title 52, § 62.223.

The Merchant Function Charge reflects the cost of uncollectibles associated with natural gas costs billed to applicable customers by the Company.

**RATE**

The MFC is a component of the Price-to-Compare calculation as described in the Definitions section of this tariff.

The uncollectible expense ratios as specified below and determined in the most recent base rate case are used in the calculation of the MFC rate:

Residential uncollectible expense ratio	1.52077%	(I)
Non-residential uncollectible expense ratio	0.30875%	(I)

The current MFC rates may be found in the Rate Summary pages of this Tariff.

**CALCULATION OF RATE**

The Rider MFC rate is calculated as follows:

$$\text{MFC} = \text{PGCC} \times \text{the uncollectible expense ratio}$$

where:

PGCC is the current Purchased Gas Commodity Cost as detailed in the Purchased Gas Cost Rider of this tariff.

(C) Indicates Change (D) Indicates Decrease (I) Indicates Increase

## **RIDER WNA – WEATHER NORMALIZATION ADJUSTMENT**

A Weather Normalization Adjustment (WNA) shall be applied to bills of Residential customers under Rate Schedules RSS, RDS, and CAP, for the heating season November through May. The WNA shall continue until a final Order is entered in the Company's first rate case filed after May 31, 2026. The WNA will be applied to November through May billing cycles and shall be calculated as follows:

(C)

$$\text{WNBT} = \text{BLMT} + [(\text{NHDD} / \text{AHDD}) \times (\text{AMT} - \text{BLMT})]$$

$$\text{WNAT} = \text{WNBT} - \text{AMT}$$

$$\text{WNA} = \text{WNAT} \times \text{Distribution Usage Charge}$$

- (a) Weather Normalized Billing Therms (WNBT) will be calculated as the Base Load Monthly Therms (BLMT) added to the product of the Normal Heating Degree Days (NHDD) divided by the Actual Heating Degree Days (AHDD) and the Actual Monthly Therms (AMT) less the Base Load Monthly Therms (BLMT).
- (b) Base Load Monthly Therms (BLMT) are established for each customer using the customer's actual average daily consumption from the billing system, measured in therms, for the two months with the lowest consumption per billing day for the three billing months of July, August and September. The average baseload per day information will be updated annually. If actual BLMT information is not available for the year, the Company will use the most recently available base load information for the premise. If no history is available, the Company shall use the overall base load average for the residential class reflected in the most recent rate case.
- (c) Normal Heating Degree Days (NHDD) shall be updated annually by September 1<sup>st</sup> using the same methodology established in the Company's most recent Rate Case. NHDD for any given day are based upon the 20 year average for the given day.
- (d) Actual Heating Degree Days (AHDD) are the actual experienced heating degree days for the billing cycle. The degree day data is provided by the National Oceanic and Atmospheric Administration (NOAA). Customers will be assigned to weather stations based on their geographic locations.
- (e) Actual Monthly Therms (AMT) are measured for each customer and billing cycle.
- (f) Actual Monthly Therms (AMT) will be subtracted from the Weather Normalized Billing Therms (WNBT) to compute the Weather Normalized Adjustment Therms (WNAT).
- (g) The WNAT is then multiplied by the residential Distribution Usage Charge to compute the WNA amount that will be charged or credited to each residential customer.
- (h) A 5% deadband shall be effective through the January 2019 cycle billing. The WNA for a billing cycle will apply only if the AHDD for the billing cycle are lower than 95% or higher than 105% of the NHDD for the billing cycle. A billing adjustment will only occur if the variation of AHDD is lower than 95% or higher than 105% of the NHDD for an individual billing cycle. Beginning with the February 2019 cycle billing, the deadband will be 3%. At that time, the WNA for a billing cycle will apply only if the AHDD for the billing cycle are lower than 97% or higher than 103% of the NHDD for the billing cycle. A billing adjustment will only occur if the variation of AHDD is lower than 97% or higher than 103% of the NHDD for an individual billing cycle.

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc.**

---

**RIDER WNA –WEATHER NORMALIZATION ADJUSTMENT (Continued)**

- (i) Effective through the January 2019 cycle billing, the WNA factor will be calculated by first adjusting the NHDD for the billing cycle by the deadband percentage of 5%. The deadband percentage is multiplied by the NHDD and then added to NHDD for the billing period when the weather is colder than normal (i.e., AHDD>NHDD) or subtracted from NHDD for the billing period when the weather is warmer than normal (i.e., AHDD<NHDD). Beginning with the February 2019 cycle billing, the WNA factor will be calculated by first adjusting the NHDD for the billing cycle by the deadband percentage of 3%. The deadband percentage is multiplied by the NHDD and then added to NHDD for the billing period when the weather is colder than normal (i.e., AHDD>NHDD) or subtracted from NHDD for the billing period when the weather is warmer than normal (i.e., AHDD<NHDD). (C)
- (j) The Company will file weather normalization information with the Commission annually by October 1<sup>st</sup>.

The Purchased Gas Cost shall be applied to actual (or non-adjusted) sales therms.

## **STATE TAX ADJUSTMENT SURCHARGE**

There shall be added to the non-Purchased Gas Cost portion of charges for gas service under all of the Company's rate schedules contained in this Tariff unless otherwise specified below, a surcharge of 0.000%. (C)

The above surcharge will be recomputed, using the elements prescribed by the Commission:

- (a) Whenever any of the tax rates used in calculation of the surcharge are changed;
- (b) Whenever the utility makes effective an increase or decrease in base rates, exclusive of Purchased Gas Cost rates and applicable Rider rates;
- (c) And by March 31, 1971 and every year thereafter.

The above new recomputation will be submitted to the Commission within ten (10) days after the occurrence of the event or date which occasioned such recomputation. If the recomputed surcharge is less than the one in effect the utility will, and if the recomputed surcharge is more than the one then in effect, the utility may, submit with such recomputation a tariff or supplement to reflect such recomputed surcharge, the effective date of which shall be ten (10) days after filing.

Any charges billed under Rate Schedules CDS, DGDS, EGDS or NCS or charges flexed in accordance with the Flexible Rate Provisions contained in Tariff Rule 20 shall not be subject to the State Tax Adjustment Surcharge.

President**

**Effective: December 19, 2016**

## **RIDER EBS – ELECTIVE BALANCING SERVICES**

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

This Rider has been established to provide balancing service options for General Distribution Service (GDS) customers in Pennsylvania.

In addition to the charges provided in the customer's rate schedule, an amount may be added to the otherwise applicable charge for each thm of distribution quantities distributed by the Company to a customer receiving service under Rate Schedules SGDS, SDS, LDS, and MLDS, or successor rate schedules, for EBS service as provided below. Rider EBS contains two options for balancing service as described below.

### **SERVICE OPTIONS:**

#### **Option 1: FULL BALANCING SERVICE**

Full Balancing Service provides the Customer Proxy with the opportunity to: (1) maintain a bank from month to month on the Company's system; (2) access banked gas on a firm basis pursuant to the Seasonal Flow Order, Operational Flow Order, and Matching Flow Order sections in Paragraph 3 of the Rules Applicable to Distribution Service ("RADS") on any day, including days in which an SFO, OFO, or OMO restricts GDS under-deliveries, up to five percent (5%) of the customer's currently effective Maximum Daily Quantity ("MDQ"), and, to the extent made available by the Company on a best efforts basis, additional interruptible access to the Customer Proxy's bank and (3) to add to the bank on any day, including days in which an SFO, OFO, or OMO restricts GDS over-deliveries. Deliveries to the Company on days in which an SFO, OFO or OMO restricts over-deliveries shall not exceed one hundred two and one-half percent (102.5%) of the maximum prescribed SFO, OFO, or OMO Level unless authorized by the Company.

(C)

#### **Option 1: BANK TOLERANCE**

The cumulative balance of excess deliveries ("positive bank"), at the end of any billing month, shall not exceed the following specified Bank Tolerance Percentages:

1. For any customer with annual consumption greater than 540,000 thm - 5% of the customer's then current annual quantities.
2. For any customer with annual consumption less than or equal to 540,000 thm --- 10% of the customer's then current annual quantities as specified for the billing months of November through September, and 5% of the customer's then current annual quantity for the October billing month.

(C) Indicates Change

**RIDER EBS – ELECTIVE BALANCING SERVICES (Continued)****Option 1: RATES**

The rates for EBS-Option 1 will be calculated on an annual basis by the Company. The Company shall calculate the rates after Customer Proxies have elected their service options and after the Company has secured the assets that are required to provide the service. The Company shall file the rates with the Commission to take effect on April 1 of each year upon one day's notice. The rates for service commencing April 1, 2005 are specified in the Rate Summary Section of this tariff.

The Company may reduce or eliminate the otherwise applicable charge for Rider EBS-Option 1 to any customer if it is reasonably necessary to do so to meet competition from an alternative fuel, including gas from another supplier of gas that has constructed, or could construct, facilities to deliver gas to the customer without use of the Company's facilities. The Company will notify the Customer Proxy of the applicable rate if lower than the applicable rate set forth above, at least four (4) days prior to the beginning of each billing month, unless the rate is the same as charged by the Company in the prior month. Such reduction or elimination of the charge shall be reduced before any reduction is made to the other charges under this tariff.

The rates identified in this section billed and collected pursuant to Option 1 shall not be credited toward recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider.

**Option 1: ELECTING SERVICE**

Option 1 is the default service option under Rider EBS. Any customer whose Customer Proxy has not elected to take service under one of the other options shall automatically take service under Option 1. A Customer Proxy for an existing GDS customer may elect to change its service option no more than one time per year. An estimate of the rates shall be posted on the Company's EBB on August 1 of each year. All requests to change the service option must be submitted to the Company in writing (e.g. fax, e-mail, electronic bulletin board) no later than the fifteenth of August prior to the April in which the elected option becomes effective. The EBS-Option 1 final rate will be posted on the Company's EBB on September 1. If the September 1 final rate exceeds the August 1 estimated rate by more than 20%, Customer Proxies who have elected EBS-Option 1 may change their election by submitting a change to the Company in writing (e.g. fax, e-mail, EBB) no later than the fifteenth of September. The elected option shall remain in effect for the one-year period commencing April 1 of the following calendar year. A Customer Proxy for a new GDS customer shall elect its service option at the time it executes its General Distribution Service Application and Agreement; however, if the new GDS customer executes its General Distribution Service Application and Agreement after August 15, the Company is under no obligation to provide service to the customer under Option 1 until April of the next following year if the Company does not have adequate storage and capacity assets to provide the service. If the Company cannot serve the new GDS customer under Option 1 until April of the next following year, the Company will either: (a) serve the customer under Option 2 during the interim; or (b) elect to limit/reduce the Elective Balancing Services under Option 1 for the new GDS customer. (C)

Columbia's obligation to provide service under Option 1 is conditioned upon its ability to secure the assets necessary to provide the service. If sufficient assets are not available to provide Option 1 service, customers will default to Option 2.

(C) Indicates Change

## RIDER EBS – ELECTIVE BALANCING SERVICES (Continued)

### Option 1: FULL BALANCING SERVICE (Continued)

#### Option 1: CHARACTER OF SERVICE

##### Normal Operations

In any billing month under Normal Operations (defined as operations during times when neither an SFO, OFO nor an OMO is in effect), if the customer's consumption plus retainage on the distribution system is greater than the sum of: (a) the quantity of gas delivered to the Company's City Gate by the Shipper for the Customer Proxy's account during the billing month, plus (b) the Customer Proxy's positive bank at the beginning of the month, such use shall be considered imbalance gas sold by the Company to the Customer Proxy under the provisions of the Consumption in Excess of Deliveries section in the Rules Applicable Only to General Distribution Service section of the RADS .

If in any billing month under Normal Operations, the customer's consumption plus retainage on the distribution system is less than the quantity of gas delivered into the Company's system on its behalf, the Customer Proxy may use such excess delivered gas to meet requirements in any succeeding billing month, subject to the Company's rights to limit service as provided in the RADS. Provided, however, that the cumulative balance of excess deliveries ("positive bank"), at the end of any billing month, shall not exceed the Bank Tolerance Percentage. Any positive bank in excess of this tolerance level shall be considered imbalance gas purchased by the Company from the Customer Proxy under the provisions of the Deliveries in Excess of Consumption section in the Rules Applicable Only to General Distribution Service section of the RADS.

##### During SFOs/OFOs/OMOs

During periods when there is an SFO, OFO or OMO that restricts GDS under-deliveries, EBS Option 1 Customer Proxies will have firm daily access to banks equal to five percent (5%) of the customer's currently effective Maximum Daily Quantity ("MDQ"). Additional interruptible access to bank capacity will be available on a best-efforts basis. Should a Shipper on any SFO, OFO, or OMO day under-deliver gas supplies to the Company by a quantity greater than 5% of the customer's currently effective MDQ and any interruptible access to the bank permitted through the SFO, OFO or OMO notice, such quantities shall be charged to the Customer Proxy in accordance with the Consumption in Excess of Deliveries, Seasonal Flow Orders, Operational Flow Orders or Operational Matching Orders sections of the Rules Applicable Only to General Distribution Service section of the RADS as is appropriate to the circumstance. If on any day, the Customer Proxy's bank is not adequate to support any part or all of the bank access made available by the Company and the resulting bank availability combined with other confirmed deliveries by the Shipper is less than the daily delivery requirement under the SFO, OFO, or OMO, the Customer Proxy will be charged for any delivery deficiency in accordance with the Seasonal Flow Order, Operational Matching Order, Operational Flow Order and Consumption in Excess of Deliveries sections in the RADS. At the end of any month in which there has been an SFO, OFO, or OMO that restricts GDS under-deliveries, authorized bank withdrawals used to help meet the daily delivery requirements of an OFO or OMO will be deemed to be the first gas withdrawn from the bank, followed by authorized bank withdrawals used to help meet the daily delivery requirements of an SFO during the month. Any remaining available bank quantities will be applied to days of Normal Operations. Authorized bank withdrawals herein are considered to be the firm access provided under EBS Option 1 plus any interruptible access provided by the Company subject to the Customer Proxy(s) having sufficient quantities in its (their) bank to support the access permitted by the Company.

(C) Indicates Change

**RIDER EBS – ELECTIVE BALANCING SERVICES (Continued)****Option 1: FULL BALANCING SERVICE - CHARACTER OF SERVICE (Continued)****During SFOs/OFOs/OMOs - Continued**

During periods when there is an SFO, OFO or OMO restriction of GDS over-deliveries, Shippers will be entitled to deliver to the Company up to one hundred two and one-half percent (102.5%) of the Company's maximum prescribed daily SFO, OFO or OMO quantity. However, should daily deliveries exceed one hundred two and one-half percent (102.5%) of the customer's maximum daily prescribed SFO, OFO, or OMO quantity, or if the cumulative excess deliveries exceed the bank tolerances described above, those excess daily deliveries shall be considered imbalance gas purchased by the Company pursuant to the Deliveries in Excess of Consumption or the Seasonal Flow Order paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS and the Customer Proxy shall be charged in accordance with the Seasonal Flow Order, Operational Flow Order or Operational Matching Order paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS.

**Option 1: IMBALANCE TRADING SERVICES****A) Bank Balance Transfers**

During Normal Operations, subject to the Limitations of Distribution Service in the Rules Applicable to All Distribution Service section of the RADS, Customer Proxies who subscribe to Rider EBS-Option 1 may transfer a bank balance that existed at the beginning of the month to another Customer Proxy that has also subscribed to Rider EBS-Option 1 and that also schedules deliveries to the Company's city-gates within the same Pipeline Scheduling Point. No pre-arranged contract is required. The Customer Proxy must submit all requests for Bank Balance Transfers to the Company in writing (e.g. fax, e-mail, electronic bulletin board) no later than the third business day following the last business day of the calendar month in which the trade is to apply. A \$10.00 fee per transfer shall be charged to the Customer Proxy transferring the bank balance. EBS-Option 1 Customer Proxies who successfully transfer bank balances to eliminate an imbalance will not be subject to the Consumption in Excess of Deliveries or Deliveries in Excess of Consumption paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS. (C)

During any month in which an SFO, OFO, or OMO was in effect, Customer Proxies who subscribe to Rider EBS-Option 1 may transfer a bank balance that existed at the beginning of the month to another Customer Proxy whose customer is located in the same Pipeline Scheduling Point that has also subscribed to Rider EBS-Option 1 and that schedules deliveries to the Company's city-gates on the same transmission company. Provided, however, that bank balance transfers will apply to the SFO, OFO, or OMO period only up to the level of daily access to banked quantities authorized by the OFO, OMO, or SFO. No pre-arranged contract is required. The Customer Proxy must submit all requests for Bank Balance Transfers to the Company in writing (e.g. fax, e-mail, electronic bulletin board) no later than the first business day following the last business day of the calendar month in which the trade is to apply. A \$10.00 fee per transfer, for transfers within a Pipeline Scheduling Point shall be charged to the Customer Proxy transferring the bank balance. EBS –Option 1 Customer Proxies who successfully transfer bank balances to eliminate an imbalance will not be subject to the Seasonal Flow Orders, Operational Flow Orders, Operational Matching Orders, Consumption in Excess of Deliveries and Deliveries in Excess of Consumption paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS. (C)

(C) Indicates Change

**RIDER EBS – ELECTIVE BALANCING SERVICES (Continued)**

**Option 1: FULL BALANCING SERVICE - IMBALANCE TRADING SERVICES (Continued)**

The imbalance trading services set forth in this Rider do not relieve Shippers of their obligation to deliver gas to Columbia in the Pipeline Scheduling Point in which they or their customers reside.

**B) Gas Transfer Service**

**Availability**

During Normal Operations or periods during which an SFO, OFO or OMO is in effect, subject to The Limitations on Distribution Service paragraphs of the RADS, this optional service is available to Customer Proxies who subscribe to Rider EBS-Option 1. This service provides for the transfer of gas quantities from one Customer Proxy (“Transferor”) to another Customer Proxy (“Transferee”).

**Character of Service**

- a. Each transfer must occur such that gas is transferred from the Transferor to the Transferee on the same Gas Day. Transferor must request the transfer at the end of the current month, as described in subparagraph (e) below.
- b. Transfers may only occur between a Transferor and a Transferee located within the same Local Market Area with confirmed deliveries on the same transmission pipeline.
- c. Quantities eligible for transfer shall not exceed the Transferor’s confirmed deliveries for the day of transfer. A transfer request may not be accepted by the Company if such transfer would cause the Transferor to incur imbalance charges.
- d. Customer Proxies must rely on customer usage posted daily on the Company’s website. The Company shall post customer usage on its Internet-based website as soon as practicable after the end of each Gas Day throughout the billing cycle. All customer usage will be posted on a best efforts basis by 5:00 P.M. Eastern time on the second business day following the end of the previous calendar month.
- e. All gas transfer requests must be accurately completed and executed by both the Transferor and the Transferee and submitted to the Company on the Company’s standard Gas Transfer Request Form by 5:00 P.M. Eastern time on the third business day following the end of the previous calendar month.
- f. The Company is not involved in any arrangement or agreement for compensation for the value of the gas being transferred, or for any other fees between the Transferor and Transferee. The Company’s role in administering this rate schedule is limited to transferring the approved gas quantities from the Transferor’s to the Transferee’s account with the Company.

**Rate**

The Company will charge the Transferor \$15.00 per transaction.

**M. A. Huwar  
President**

**Effective: December 16, 2018**

**RIDER EBS – ELECTIVE BALANCING SERVICES (Continued)**

**Option 1: FULL BALANCING SERVICE (Continued)**

**Option 1: TERMINATION OF SERVICE**

Customer Proxies may terminate service under Option 1 only by electing another option in accordance with the provisions set forth in this Rider or by terminating GDS service. A Customer Proxy whose Customer is terminating GDS service may be charged a termination fee if the Customer Proxy fails to provide termination notice prior to the fifteenth of September prior to the April in which the service is to be terminated. Such termination fee shall be based upon the cost of the assets secured by the Company to provide service to the Customer. Upon termination of service under Option 1, the Company will make every effort to deliver to the Customer Proxy the Customer Proxy's banked gas during the next month's billing cycle following the date of termination. However, should Customer Proxy fail to take delivery of its entire bank of gas within the next month, Company may, at its option, retain and purchase the undelivered bank of gas at a rate determined pursuant to the Deliveries in Excess of Consumption paragraph in the Rules Applicable Only to General Distribution Service section of the RADS. In addition, if the Customer Proxy owes the Company any outstanding charges, the Company may retain as an offset to such outstanding charges, banked gas that would otherwise be delivered to Customer Proxy upon termination of GDS service. The value assigned to such retained bank of gas which is purchased or retained will be a rate determined pursuant to the Deliveries in Excess of Consumption paragraph in the Rules Applicable Only to General Distribution Service section of the RADS for the month in which the Customer Proxy failed to take delivery of the gas.

(C)

(C) Indicates Change

**Issued: December 14, 2016**

**Mark Kempic  
President**

**Effective: December 19, 2016**

**Columbia Gas of Pennsylvania, Inc.**

## **RIDER EBS – ELECTIVE BALANCING SERVICES (Continued)**

### **Option 2: MONTHLY CASH OUT (INTRA-MONTH BALANCING SERVICE)**

Intra-Month Balancing Service provides Shippers with: (1) the opportunity to maintain a bank from day to day within a month on the Company's system; (2) limited or no use of the bank during issuance of an SFO, OFO or OMO pursuant to the SFO, OFO and OMO paragraphs of the RADS; and (3) a monthly cash-out of any bank of gas existing at the end of the month. (C)

#### **Option 2: RATES**

Rates for Intra-Month Balancing Service are specified in the Rate Summary Section of this tariff.

Any amounts billed and collected pursuant to Option 2 shall be credited toward recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider. The Company may reduce or eliminate the otherwise applicable charge to any customer if it is reasonably necessary to do so to meet competition from an alternative fuel, including gas from another supplier of gas that has constructed, or could construct, facilities to deliver gas to the customer without use of the Company's facilities. The Company will notify the Customer Proxy of the applicable rate if lower than the applicable rate set forth above, four (4) days prior to the beginning of each billing month, unless the rate is the same as charged by the Company in the prior month. Such reduction or elimination of the charge shall be reduced before any reduction is made to the other charges under this tariff.

#### **Option 2: ELECTING SERVICE**

Option 2 must be elected by the Customer Proxy in writing (e.g. fax, e-mail, electronic bulletin board). A Customer Proxy may elect to change its service option no more than one time per year. All requests to change the service option must be submitted to the Company in writing (e.g. fax, e-mail, electronic bulletin board) no later than the fifteenth of August prior to the April in which the elected option becomes effective. The elected option shall remain in effect from April 1 through March 31 of the following calendar year.

#### **Option 2: CHARACTER OF SERVICE**

##### **Normal Operations**

In any billing month under Normal Operations, if the customer uses more gas than the quantity of gas, after adjustments for retainage, delivered to the Company's City Gate by the Shipper for the Customer Proxy's account during the billing month, such use shall be considered imbalance gas sold by the Company to the Customer Proxy under the provisions of the Consumption in Excess of Deliveries paragraph in the Rules Applicable Only to General Distribution Service section of the RADS. (C)

If in any billing month, under normal operations, the customer consumes less gas than the quantity of gas delivered to the Company's City Gate by the Shipper, such use shall be considered imbalance gas purchased by the Company from the Customer Proxy under the provisions of the Deliveries in Excess of Consumption paragraph in the Rules Applicable Only to General Distribution Service section of the RADS. (C)

(C) Indicates Change

## **RIDER EBS – ELECTIVE BALANCING SERVICES (Continued)**

### **Option 2: MONTHLY CASH OUT – CHARACTER OF SERVICE (Continued)**

#### **During SFO**

If the Shipper under-delivers during an SFO that restricts under-deliveries, the Customer Proxy will be charged for under-deliveries in accordance with the Seasonal Flow Order paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS. If the Shipper over-delivers during an SFO that restricts over-deliveries, the over-deliveries shall be considered imbalance gas purchased by the Company from the Customer Proxy pursuant to the Seasonal Flow Order paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS. The Customer Proxy shall have access to any positive intra-month bank only to the extent specified by the Company in an SFO.

#### **During OFO/OMO**

If the Shipper under-delivers during an OFO or OMO that restricts under-deliveries, the Customer Proxy will be charged for under-deliveries in accordance with the Consumption in Excess of Deliveries paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS, and either the Operational Flow Orders or Operational Matching Orders paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS. If the Shipper over-delivers during an OFO or OMO that restricts over-deliveries, the over-deliveries shall be considered imbalance gas purchased by the Company from the Customer Proxy pursuant to the Deliveries in Excess of Consumption paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS and the Customer Proxy shall be charged in accordance with either the OFO or OMO paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS. On a best efforts basis, the Company may offer the Customer Proxy daily access to any positive intra-month bank only to the extent specified by the Company in an OFO or OMO. Such best-efforts access shall not be subject to charges under either the OFO or OMO paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS nor shall it alter the Customer Proxy's obligation to be in balance at the end of the month in accordance with the provisions of EBS Option-2.

### **Option 2: TERMINATION OF SERVICE**

Customer Proxies may terminate service under Option 2 only by electing another option as described in this Rider or by the Customer terminating GDS service. Upon termination of service under Option 2, the Company will calculate imbalance gas sold or purchased by the Company from the Customer Proxy as described in the "Normal Operations" paragraph above. However, if the Customer Proxy owes the Company any outstanding charges, the Company may retain as an offset to such outstanding charges, banked gas or over-deliveries that would otherwise be delivered to the Customer Proxy upon termination of service. The value assigned to such retained bank of gas or over-deliveries which are purchased will be ninety percent (90%) of the index rate determined pursuant to the Deliveries in Excess of Consumption paragraphs in the Rules Applicable Only to General Distribution Service section of the RADS.

(C)

(C) Indicates Change

## PILOT RIDER NAS - NEW AREA SERVICE

(C)

### APPLICABILITY

Throughout the Company's service territory for any residential applicant seeking natural gas distribution service or commercial and industrial applicants so long as the intent of the service is residential customer service.

### AVAILABILITY

Available to any residential applicant or bona fide developer (as defined below) who would be required to provide a deposit under Rule No. 8 – Extensions of the Company's tariff for an extension of the Company's distribution facilities.

Pilot Rider NAS will close for new participation on November 7, 2018 unless an extension is approved by the Commission.

### INFORMATION PROVIDED TO INTERESTED NAS APPLICANT

The Company will provide the following information in writing to any applicant considering the Pilot Rider NAS:

- a. Up front amount due;
- b. Interest rate (cost of credit);
- c. Finance charge (estimated total amount of interest payments over twenty years);
- d. Total payments (estimated total amount of principal and interest paid over twenty years);
- e. Total number of payments;
- f. Monthly payment amount;
- g. Comparison of total Pilot Rider NAS payments to total cost of upfront deposit absent Pilot Rider NAS; and
- h. The Pilot Rider NAS balance may be paid off at any time without penalty.

### CHARACTER OF RATE

This Pilot Rider NAS has been established to provide applicants with an alternative way of paying the deposit required by Rule No. 8 - Extensions of the Company's tariff when an extension of the Company's distribution facilities is not economically feasible based on the anticipated gas requirements. Pilot Rider NAS may be used on a stand-alone basis, or in conjunction with a deposit, in order to eliminate or reduce the amount of the deposit required under Rule No. 8 - Extensions of the Company's tariff. The Pilot Rider NAS will be a flat charge per bill. The Pilot Rider NAS charge shall be calculated separately for each distribution extension project and the charge shall be based on the cost of that particular distribution extension project. The Pilot Rider NAS charge shall be calculated as described below for each customer served from that particular distribution extension project. In any year the Company will not place an amount greater than \$1,000,000 into this rate rider.

### RATE

This rate rider shall be calculated based on the applicant(s)'s Deposit Amount and spread over a period of 20 years.

(C) Indicates Change

Issued: November 7, 2014

M. R. Kempic  
President

Effective: November 8, 2014

**PILOT RIDER NAS - NEW AREA SERVICE - continued**

(C)

**CALCULATION OF RATE**

Pilot Rider NAS will use the Company's Capital Expenditure Policy to determine the economically unjustified portion of a distribution facility extension project as described in Rule No. 8 - Extensions of the Company's tariff. The Deposit Amount shall be assessed to the applicant using the following calculations:

**Residential Distribution Service**

When, pursuant to Rule No. 8 - Extensions of the Company's tariff, an applicant is required to provide a refundable cash deposit to the Company equal to the difference between the minimum capital investment required to serve the applicant(s)'s gas requirements and the amount of capital that the Company can justify investing in the project based on the anticipated gas requirements of the applicant(s) and potential future load, the Company shall have the option of allowing the applicant(s) to pay the Deposit Amount over a period of 20 years ("New Area Service Charge"). The 20 year period shall start with the first bill after the first meter is set. The New Area Service Charge shall appear as a monthly charge on the customer's bill and shall be equal to 1/240 of the difference between the minimum capital investment required to serve the applicant(s)'s gas requirements and the amount of capital that the Company can justify investing in the project, plus interest equal to the weighted average cost of capital as approved in the Company's most recent rate case at the time the meter is set. The minimum capital investment shall include: 1) the cost to extend the distribution service main; 2) the cost of the meter(s); 3) the cost of regulating equipment; and 4) the cost of service lines where applicable.

The New Area Service Charge shall be assessed to all customers taking residential natural gas distribution service from the distribution facility extension at any time during the 20 year period.

The maximum New Area Service Charge per month per each residential customer shall be no more than \$35 per month.

In the event that multiple residential service applicants shall be served through the extension of the Company's distribution facilities, each applicant will be assessed an equal portion of the New Area Service Charge.

The customer shall retain the right to pay the remaining balance of the New Area Service Charge at any point in time during the 20 year payback period.

**BONA FIDE DEVELOPER**

A bona fide developer is a developer of residential dwellings, developing an area where Columbia does not currently provide service and requests to obtain gas service. The bona fide developer must enter into an agreement with Columbia that requires the developer to notify the purchaser about the Pilot Rider NAS charge before the sale of the residential property occurs.

Prior to the sale of the residential property, the bona fide developer will obtain the signature of the person purchasing the residential lot on a standardized form developed by the Company. The form will contain the:

- a. Interest rate (cost of credit);
- b. Finance charge (estimated total amount of interest payments over twenty years)
- c. Total payments (estimated total amount of principal and interest paid over twenty years);
- d. Total number of payments;
- e. Monthly payment amount; and
- f. Pilot Rider NAS balance may be paid off at any time without penalty.

(C) Indicates Change

Issued: November 7, 2014

M. R. Kempic  
President

Effective: November 8, 2014

**Columbia Gas of Pennsylvania, Inc.**

---

**PILOT RIDER NAS - NEW AREA SERVICE - continued**

(C)

**PERIODIC ADJUSTMENTS**

The Company shall retain the right to adjust customers' deposit in the event that additional meters are added to the distribution facility extension. These adjustments shall only cause decreases in the 20 year payback period.

**ADDITIONAL CREDITS**

The Company shall retain the right to apply credits, at its sole discretion, to the New Area Service Charge thereby reducing the total amount owed by the Customer during the 20 year period.

**TERMS OF PAYMENT**

If the customer fails to pay the full amount of any bill a delayed payment penalty charge of one and one-quarter percent (1 1/4%) per month will accrue on the portion of the bill that is unpaid on the due date. The delayed payment penalty charge will not count as money paid towards the Deposit Amount due for any reconciliation period.

(C) Indicates Change

**Issued: November 7, 2014****M. R. Kempic  
President****Effective: November 8, 2014**

**RIDER DSIC - DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

In addition to the net charges provided for in this Tariff, a charge of 0.00% will apply consistent with the Commission Order dated March 14, 2013 at Docket No. P-2012-2338282, approving the DSIC.

**GENERAL DESCRIPTION****Purpose**

To recover the reasonable and prudent costs incurred to repair, improve, or replace eligible property which is completed and placed in service and recorded in the individual accounts, as noted below, between base rate cases and to provide the Utility with the resources to accelerate the replacement of aging infrastructure, to comply with evolving regulatory requirements and to develop and implement solutions to regional supply problems.

The costs of extending facilities to serve new customers are not recoverable through the DSIC.

**Eligible Property**

The DSIC-eligible property will consist of the following:

- Piping (account 376);
- Couplings (account 376);
- Gas services lines (account 380) and insulated and non-insulated fittings (account 378);
- Valves (account 376);
- Excess flow valves (account 376);
- Risers (account 376);
- Meter bars (account 382);
- Meters (account 381);
- Unreimbursed costs related to highway relocation projects where a natural gas distribution company or city natural gas distribution operation must relocate its facilities; and
- Other related capitalized costs.

**Effective Date**

The DSIC will become effective for bills rendered on and after October 1, 2021.

(D) Indicates Decrease (C) Indicates Change

---

**Issued: December 17, 2021****Mark Kempic  
President****Effective: December 29, 2021**

**Columbia Gas of Pennsylvania, Inc.**

**RIDER DSIC - DISTRIBUTION SYSTEM IMPROVEMENT CHARGE (Continued)**

(C)

**COMPUTATION OF THE DSIC**

**Calculation**

The initial DSIC, effective April 1, 2013, shall be calculated to recover the fixed costs of eligible plant additions that have not previously been reflected in the rates or rate base and will have been placed in service between December 1, 2012 and February 28, 2013. Thereafter, the DSIC will be updated on a quarterly basis to reflect eligible plant additions placed in service during the three-month periods ending one month prior to the effective date of each DSIC update. Thus, changes in the DSIC rate will occur as follows:

<b>Effective Date of Change</b>	<b>Date to which DSIC-Eligible Plant Additions Reflected</b>
April 1	December 1 through February 28*
July 1	March 1 through May 31
October 1	June 1 through August 31
January 1	September 1 through November 30

\*or February 29 in years when there are 29 days in February.

**Determination of Fixed Costs**

The fixed costs of eligible distribution system improvements projects will consist of depreciation and pre-tax return, calculated as follows:

1. Depreciation: The depreciation expense shall be calculated by applying the annual accrual rates employed in the Utility's most recent base rate case for the plant accounts in which each retirement unit of DSIC-eligible property is recorded to the original cost of DSIC-eligible property.
2. Pre-tax return: The pre-tax return shall be calculated using the statutory state and federal income tax rates, the Utility's actual capital structure and actual cost rates for long-term debt and preferred stock as of the last day for the three-month period ending one month prior to the effective date of the DSIC and subsequent updates. The cost of equity will be the equity return rate approved in the last fully litigated base rate proceeding for which a final order was entered not more than two years prior to the effective date of the DSIC. If more than two years shall have elapsed between the entry of such a final order and the effective date of the DSIC, then the equity return rate used in the calculation will be the equity return rate calculated by the Commission in the most recent Quarterly Report on the Earnings of Jurisdictional Utilities released by the Commission.

(C) Indicates Change

**RIDER DSIC - DISTRIBUTION SYSTEM IMPROVEMENT CHARGE (Continued)**

**COMPUTATION OF THE DSIC - continued**

**Application of DSIC**

The DSIC will be expressed as a percentage carried to two decimal places and will be applied to the total amount billed to each customer for distribution service under the otherwise applicable rates and charges, excluding amounts billed for the State Tax Adjustment Surcharge (STAS). To calculate the DSIC, one-fourth of the annual fixed costs associated with all property eligible for cost recovery under the DSIC will be divided by the projected revenue for distribution service (including all applicable clauses and riders) for the quarterly period during which the charge will be collected, exclusive of the STAS.

**Formula:**

The formula for calculation of the DSIC is as follows:

$$\text{DSIC} = \frac{(\text{DSI} * \text{PTRR}) + \text{Dep}}{\text{PQR}} + \frac{e}{\text{PQR}} \quad (\text{C})$$

Where:

- DSI = Original cost of eligible distribution system improvement projects net of accrued depreciation.
- PTRR = Pre-tax return rate applicable to DSIC-eligible property.
- Dep = Depreciation expense related to DSIC-eligible property.
- e = Amount calculated (+/-) under the annual reconciliation feature or Commission audit, as described below. (C)
- PQR = Projected quarterly revenues for distribution service (including all applicable clauses and riders) from existing customers plus netted revenue from any customers which will be gained or lost by the beginning of the applicable service period.

Revenues will be determined as one-fourth (1/4) of projected annual revenues.

**QUARTERLY UPDATES**

Supporting data for each quarterly update will be filed with the Commission and served upon the Commission's Bureau of Audits, Bureau of Investigation and Enforcement, the Office of Consumer Advocate, and the Office of Small Business Advocate at least ten (10) days prior to the effective date of the update.

(C) Indicates Change

**RIDER DSIC - DISTRIBUTION SYSTEM IMPROVEMENT CHARGE (Continued)**

**CUSTOMER SAFEGUARDS**

**1. Cap:** The DSIC is capped at 5.0% of the amount billed to customers for distribution service (including all applicable clauses and riders) as determined on an annualized basis.

**2. Audit/Reconciliation:** The DSIC is subject to audit at intervals determined by the Commission. (C)  
Any cost determined by the Commission not to comply with any provision of 66 Pa C.S. §§ 1350, *et seq.*, shall be credited to customer accounts. The DSIC is subject to annual reconciliation based on a reconciliation period consisting of the twelve months ending December 31 of each year or the Company may elect to subject the DSIC to quarterly reconciliation but only upon request and approval by the Commission. The revenue received under the DSIC for the reconciliation period will be compared to the Company's eligible costs for that period. The difference between revenue and costs will be recouped or refunded, as appropriate, in accordance with Section 1307(e), over a one-year period commencing on April 1 of each year, or in the next quarter if permitted by the Commission. If DSIC revenues exceed DSIC-eligible costs, such over-collections will be refunded with interest. Interest on over-collections and credits will be calculated at the residential mortgage lending specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41 P.S. §§ 101, *et seq.*) and will be refunded in the same manner as an over-collection. The Company is not permitted to accrue interest on under collections.

**3. New Base Rates:** The DSIC will be reset at zero upon application of new base rates to customer billings that provide for prospective recovery of the annual costs that had previously been recovered under the DSIC. Thereafter, only the fixed costs of new eligible plant additions that have not previously been reflected in the Company's rates or rate base will be reflected in the quarterly updates of the DSIC.

**4. Customer Notice:** Customers shall be notified of changes in the DSIC by including appropriate information on the first bill they receive following any change. An explanatory bill insert shall also be included with the first billing.

**5. All customer classes:** The DSIC shall be applied equally to all customer classes, except that the Company may reduce or eliminate the Rider DSIC to any customer with competitive alternatives who are paying flexed or discounted rates and customers having negotiated contracts with the Company, if it is reasonably necessary to do so.

**6. Earning Reports:** The DSIC will also be reset at zero if, in any quarter, data filed with the Commission in the Utility's then most recent Annual or Quarterly Earnings reports show that the Utility would earn a rate of return that would exceed the allowable rate of return used to calculate its fixed costs under the DSIC as described in the pre-tax return section. The Company shall file a tariff supplement implementing the reset to zero due to overearning on one-day's notice and such supplement shall be filed simultaneously with the filing of the most recent Annual or Quarterly Earnings reports indicating that the Company has earned a rate of return that would exceed the allowable rate of return used to calculate its fixed costs. (C)

(C) Indicates Change

**Issued: November 10, 2016**

**Mark Kempic  
President**

**Effective: November 11, 2016**

**Columbia Gas of Pennsylvania, Inc.**

---

**RIDER DSIC – DISTRIBUTION SYSTEM IMPROVEMENT CHARGE (Continued)****CUSTOMER SAFEGUARDS - continued**

**7. Residual E-Factor Recovery Upon Reset to Zero:** The Company shall file with the Commission interim rate revisions to resolve the residual over/under collection or E-factor amount after the DSIC rate has been reset to zero. The Company can collect or credit the residual over/under collection balance when the DSIC rate is reset to zero. The Company shall refund any overcollection to customers and is entitled to recover any undercollections as set forth in Section 4.B. Once the Company determines the specific amount of the residual over or under collection amount after the DSIC rate is reset to zero, the Company shall file a tariff supplement with supporting data to address that residual amount. The tariff supplement shall be served upon the Commission's Bureau of Investigation and Enforcement, the Bureau of Audits, the Office of Consumer Advocate, and the Office of Small Business Advocate at least ten (10) days prior to the effective date of the supplement.

## **Rules Applicable to Distribution Service**

### **1. DEFINITIONS**

The following terms shall have the meanings indicated below:

- 1.1 "Account" shall mean all gas consumption which (1) is consumed by the same individual, governmental, or corporate entity, including subsidiaries and affiliates, and (2) occurs on property which is either contiguous or is separated by no more than the width of a public or private right of way. A single Account shall not include gas consumed by different tenants or other entities if the gas is distributed through separate Company meters, even if the charges for such distribution service are paid by a single landlord, property owner, or other entity.
- 1.2 "Adequacy" shall mean the delivery to an NGDC of sufficient quantities of natural gas so as to supply the requirements of retail gas customers, taking into account design peak and seasonal demands, as well as isolated market areas and system operation requirements and contingencies.
- 1.3 "Affiliated NGS" shall mean:
  - (i) An NGS engaging in marketing activities related to natural gas supply services by the marketing division or marketing operation of an NGDC.
  - (ii) The term does not include a utility's marketing department or division to the extent that it informs existing or prospective customers of the availability and price of the regulated sales service that utility furnishes in its role as supplier of last resort.
- 1.4 "Aggregation Agent" shall mean an NGS which serves as an agent for General Distribution Service Customers in Aggregation Nomination Groups or for Choice Service Customers in Choice Aggregation Nomination Groups.
- 1.5 "Aggregation Service Agreement" shall mean a contract between the NGS and the Company that specifies the terms and conditions for participation in Aggregation Service.
- 1.6 "Aggregation Nomination Group" shall mean a group of General Distribution Service Customers organized pursuant to the requirements of the General Distribution Aggregation Service paragraph of these Rules Applicable to Distribution Service.
- 1.7 "Aggregation" shall mean the process of combining customers for the purpose of administering, scheduling and nominating gas supplies as defined by the Limitation Where a Shipper has a Positive Bank or the Choice Aggregation Service paragraphs of these Rules Applicable to Distribution Service.
- 1.8 "Basic Services" shall mean services necessary for the physical delivery of natural gas to a retail customer, consisting of natural gas distribution services and Natural Gas Supply Services.
- 1.9 "Billing Cycle" shall mean the regularly recurring period from one meter reading or estimated meter reading, to the subsequent meter reading or estimated meter reading, upon which a customer bill for gas and distribution service, or distribution service, is rendered. A Billing Cycle need not coincide with calendar month. (C)

(C) Indicates Change

**1. DEFINITIONS (Continued)**

- 1.10 “Choice Aggregation Nomination Group” shall mean a Customer or group of Customers electing Rate RDS or SCD organized pursuant to the requirements of the Choice Aggregation Service as specified in the Rules Applicable to Distribution Service section of this tariff.
- 1.11 “Choice Daily Delivery Requirement” shall mean the normalized daily delivery requirement for a Choice Aggregation Nomination Group, calculated by the Company pursuant to the requirements of Paragraph 4.9.2 of these Rules Applicable to Distribution Service.
- 1.12 “Choice EBB” shall mean the Company’s electronic bulletin board (“EBB”) which is used to submit Customers in the Choice service, obtaining Choice reports etc.
- 1.13 “Choice Primary FTS Daily Capacity Requirement” shall mean the Primary FTS capacity required to be held by an NGS for a Choice Aggregation Nomination Group in a quantity equal to the Choice Aggregation Nomination Group’s estimated normalized annual usage divided by 365, converted to a Dth basis using the Company’s annual average Btu content, and adjusted for Company use and Retainage.
- 1.14 “Choice Tariff” shall mean either Rate SCD or Rate RDS, Rider CC, these Rules Applicable to Distribution Service, as applicable for the particular Customer being served, as well as the Company’s Rules and Regulations.
- 1.15 “City Gate” shall mean the point where interstate pipelines deliver gas into the Company’s facilities.
- 1.16 “Commission” shall mean the Pennsylvania Public Utility Commission.
- 1.17 “Connected Load” shall mean the sum of the maximum energy ratings of all natural gas consuming devices connected for use on the customer’s property. (C)
- 1.18 “Customer Proxy” generally means the entity that receives notices (e.g. OFOs, OMOs, SFOs etc), receives bills, and controls the gas bank account. Specifically, “Responsible Party” shall mean the Customer in circumstances described in paragraphs 1, 2 and 3 of the “Shipper” definition, and the Natural Gas Supplier in circumstances described by paragraph 4 of the “Shipper” definition.
- 1.19 “Delivery Point” shall mean the location at which the Company shall first receive the gas supply from an NGS.
- 1.20 “EBB” shall mean an Electronic Bulletin Board system.
- 1.21 “Electronic Flow Corrector” or “EFC” shall mean a device that may be attached to a meter with an instrumentation drive and is used to correct measured volumes to standard conditions based on actual pressure and temperature. (C)
- 1.22 “Favored Customer” shall mean any customer of an NGDC or its affiliated NGS which receives a benefit of economic value to retain that customer on the distribution system.
- 1.23 “FERC” shall mean the Federal Energy Regulatory Commission.

(C) Indicates Change

## **1. DEFINITIONS (Continued)**

- 1.24 “Firm Service” with regard to Natural Gas Supply services shall mean the quality of Natural Gas Supply Service provided to the Customer in which gas shall be available at all times, even under adverse conditions. “Firm Service” with regard to Natural Gas Distribution Company services shall mean that the Company will distribute gas to the Customer on a firm basis during any day in which the Customer’s gas is delivered by the Shipper to the Company at a Delivery Point in the same Company Local Market Area in which the Customer’s facilities are located, as further defined in Paragraph 2.6 of these Rules Applicable to Distribution Service.
- 1.25 “FTS” shall mean firm transportation service provided by an interstate pipeline in which gas is transported on a firm basis from designated receipt points to designated delivery points.
- 1.26 “Gas” or “Natural Gas” or “Natural Gas Supply” or “Gas Supply” shall mean the hydrocarbon gas obtained from underground and undersea porous sedimentary rocks. In these Rules Applicable to Distribution Service these terms will refer to the commodity an NGS nominates and schedules for delivery to the Company for distribution.
- 1.27 “General Distribution Aggregation Service” shall mean the aggregation of General Distribution Service Customers in a group for the purpose of administering gas purchase and supply.
- 1.28 “General Distribution Application and Agreement” shall mean the Application completed by a Customer who desires to begin taking General Distribution Service.
- 1.29 “General Distribution Service” and “GDS” shall mean Distribution service provided under rate schedules DGDS, CDS, EGDS, LDS, MLDS, NCS, SGDS, or SDS.
- 1.30 “Historical Billing Data” shall mean the minimum of twelve (12) months of data as recorded by the Company, which contains usage data and dollar amount billed, unless 12 months of such data is not available.
- 1.31 “Initial NGS Application” shall mean the initial application that must be made to the Company by the NGS prior to providing either General Distribution Service or Choice Service.
- 1.32 “Instrumentation Drive” shall mean a mechanism that may be attached to some types of meters and that provides the ability to install a flow correcting device to the meter. (C)
- 1.33 “ITS” shall mean interruptible transportation service provided by an interstate pipeline, in which natural gas is transported on an interruptible basis.
- 1.34 “Local Market Area” shall mean a continuous, physically-interconnected system of Company-owned distribution piping through which the Company provides natural gas service to Customers in a discrete geographic area, utilizing one or more common Delivery Points from interstate pipeline supplier(s) or local gas supplier(s).
- 1.35 “Material Obligation” shall mean any obligation of the NGS under these Rules Applicable to Distribution Service, which if not fulfilled by the NGS, would impair the Customer’s Natural Gas Supply Services or would impair the Company’s ability to provide natural gas distribution services to its Customers.

(C) Indicates Change

**1. DEFINITIONS (Continued)**

1.36 “Maximum Daily Quantity” or “MDQ” shall mean a General Distribution Service Customer’s maximum usage during a 24-hour period based on recent historical Customer consumption data. The Company shall perform an MDQ calculation each year based on data ending March 31 and shall provide the new MDQ to customers and / or their agent of record in September. The newly calculated MDQ will be effective beginning with the November cycle billing. An adjustment to the MDQ may be made at any time upon agreement of the Customer and the Company. The MDQ will be calculated as follows unless otherwise specified in this tariff: (C)

a. For Monthly Read Meters

A regression analysis comparing Monthly Degree Days to Monthly Usage based on a minimum of twelve (12) months and a maximum of thirty-six (36) months will be developed to calculate the MDQ.

i. When the regression analysis yields an R Squared value greater than 0.6, the MDQ will be based on the regression analysis and the following calculation will be used to determine the MDQ:

$$MDQ = Base Load + Heat Load * (Market Area Design Day Degree Days)$$

ii. When the regression analysis yields an R Squared value less than 0.6, the MDQ will be based on the highest monthly usage in the prior three years and the following calculation will be used to determine the MDQ.

$$MDQ = Highest Monthly Usage in Past Three Years / 25 days$$

b. For daily read meters, the MDQ will be based on the highest daily usage in the past three years.

c. For new meters or new customer usage without sufficient monthly or daily data, the MDQ will be based on Connected Load until the next MDQ update.

1.37 “month” shall mean calendar month.

1.38 “Natural Gas Distribution Company” or “NGDC” shall mean a public utility or city natural gas distribution operation that provides natural gas distribution services and which may provide natural gas supply services and other services. For purposes of this standard of conduct, the term does not include:

(i) A public utility subject to the jurisdiction of the Commission which has annual gas operating revenues of less than \$6 million per year, except:

(A) When the public utility voluntarily petitions the Commission to be included within the definition of an NGDC.

(B) When the public utility seeks to provide natural gas supply services to retail gas customers outside its service territory.

(ii) A natural gas public utility subject to the jurisdiction of the Commission that is not interconnected to an interstate gas pipeline by means of a direct or indirect connection through the distribution system of another natural gas public utility or through a natural gas gathering system.

(C) Indicates Change

## **1. DEFINITIONS (Continued)**

- 1.39 “Natural Gas Provider” or “NGP” shall mean the NGDC, NGS, marketer, aggregator and/or broker, as well as any third party acting on behalf of these entities.
- 1.40 “Natural Gas Supplier” or “NGS” shall mean an entity other than a natural gas distribution company, but including natural gas distribution company marketing affiliates without regard to structural relationship, which provides natural gas supply services to retail gas customers utilizing the jurisdictional facilities of a natural gas distribution company. The term includes:
- (i) A natural gas distribution company that provides natural gas supply services outside its certificated service territories.
  - (ii) A municipal corporation, its affiliates or any joint venture, to the extent that it chooses to provide natural gas supply services to retail customers located outside of its corporate or municipal limits, as applicable, other than:
    - (a) As provided prior to July 1, 1999, the effective date of 66 Pa.C.S. Chapter 22 (relating to natural gas competition), under a certificate of public convenience if required under this title.
    - (b) Total natural gas supply services in de minimis amounts.
    - (c) Natural gas supply services requested by, or provided with the consent of, the public utility in whose certificated territory the services are provided.
    - (d) Natural gas supply services provided to the municipal corporation itself or its tenants on land it owns or leases, or subject to an agreement of sale or pending condemnation, as of September 1, 1999, to the extent permitted by applicable law independent of 66 Pa.C.S. Chapter 22.
  - (iii) The term excludes an entity to the extent that it provides free gas to end-users under the terms of an oil or gas lease. Notwithstanding any other provision of 66 Pa.C.S. (relating to the Public Utility Code), an NGS that is not an NGDC is not a public utility as defined in 66 Pa.C.S. §102 (relating to definitions) to the extent that the NGS is utilizing the jurisdictional distribution facilities of an NGDC or is providing other services authorized by the Commission.
- 1.41 “Natural Gas Supply Services” shall mean the sale or arrangement of the sale of natural gas to retail customers and services that may be unbundled by the Commission under section 2203(3) of the Act. The term does not include distribution service.
- 1.42 “NGS Choice Distribution Aggregation Agreement” shall mean the contract between the NGS and the Company that specifies the terms and conditions for participation in the Choice Service.
- 1.43 “Nomination EBB” shall mean the electronic bulletin board and nomination system, which is used for scheduling deliveries of gas on the Company’s system.
- 1.44 “Paragraph” shall mean a numbered paragraph of these Rules Applicable to Distribution Service as well as all sub-paragraphs falling under that numbered paragraph.

(C) Indicates Change

## **1. DEFINITIONS (Continued)**

- 1.45 “Primary FTS” with regard to Columbia Gas Transmission, LLC capacity, shall mean FTS which has a designated primary delivery point located in the same Pipeline Scheduling Point in which the Customer is located and has a designated primary receipt point at a location considered to be a point of generally available supply. “Primary FTS” with regard to any other transmission pipeline shall mean firm transportation service which has a designated primary delivery point located in the same Company Local Market Area in which the customer is located and has a designated primary receipt point at a location considered to be a point of generally available supply.
- 1.46 “Reliability” comprises adequacy and security.
- 1.47 “Retainage” shall mean gas lost and unaccounted for in the Company’s operations as more specifically defined in the Retainage paragraph of these Rules Applicable to Distribution Service.
- 1.48 “Rules and Regulations” shall mean the “Rules and Regulations Governing the Distribution and Sale of Gas” section of the Company’s tariff.
- 1.49 “Security” means designing, maintaining and operating a system so that it can safely handle extreme conditions, as well as emergencies.
- 1.50 “Shipper” generally means the entity nominating gas service for distribution. Specifically, “Shipper” is defined as:
1. a General Distribution Service Customer that nominates gas for Distribution; or
  2. a Natural Gas Supplier that nominates the General Distribution Service Customer’s gas for distribution, but which has not been appointed in writing as the Customer’s agent by the Customer; or
  3. a Natural Gas Supplier that nominates the General Distribution Service Customer’s gas for distribution, which NGS is acting as the General Distribution Service Customer’s duly authorized agent for the purpose of purchasing gas; or
  4. a Natural Gas Supplier that nominates the General Distribution Service Customer’s gas for Distribution, which NGS is acting as the General Distribution Service Customer’s duly authorized aggregation agent for the purpose of purchasing gas.
- 1.51 “Storage” shall mean placing natural gas into an underground facility for removal and use at a later date.
- 1.52 “Telemetry” shall mean an electronic communications process where the gas meter, equipped with an Electronic Flow Corrector and cellular modem or other telecommunications device utilized by the Company, electronically sends metering information to a host database of the Company. Customers using meters with Telemetry will have the option of electing OFOs or OMOs for those meters as described in Rule 3. Rules Applicable Only to General Distribution Service, Operational Matching Order paragraph of these Rules Applicable to Distribution Service. (C)
- 1.53 “Transmission” shall mean the moving of natural gas through the interstate pipeline system for delivery to the NGDC.

(C) Indicates Change

## **2. RULES APPLICABLE TO ALL DISTRIBUTION SERVICE**

**2.1** This Paragraph applies to all distribution service on the Company's system, regardless of whether the Customer is acting as its own Shipper or whether the Customer has contracted with an NGS to provide this service.

### **2.2 ELECTRONIC COMMUNICATIONS.**

2.2.1 All nominations must be performed through the Company's Nomination EBB.

### **2.3 INITIAL NGS APPLICATION**

2.3.1 All NGSs must complete an Initial NGS Application in the form prescribed by the Company, and have it approved by the Company prior to being able to supply gas for either General Distribution Service or Choice Service on the Company's system. NGSs may be required by the Company to resubmit the Initial NGS Application in instances where changed circumstances cause the Initial NGS Application to no longer be applicable. Such changed circumstances include, but are not limited to circumstances such as: a change in the financial status of the NGS, a substantial change in the number of Customers being served by the NGS, or a substantial change in the amount of natural gas being provided by the NGS.

2.3.2 All NGSs must be licensed by the Commission prior to the Company's approval of the Initial NGS Application to provide Natural Gas Supply Services on the Company's system. Pursuant to Section 2208 of the Public Utility Code, 66 Pa. C.S. §2208, no entity shall engage in the business of an NGS unless it holds a license issued by the PUC. NGS license application packages can be found on the PUC web site at <http://puc.paonline.com>. PA. P.U.C. Docket No. M-00991248F0002.

2.3.3 Absent a Commission waiver, all parties must adhere to the applicable Chapter 56 standards when they engage in an activity covered by those standards. 52 Pa. Code Ch. 56. NGSs should also refer to the Commission's guidelines on Maintaining Customer Services at the Same Level of Quality Pursuant to 66 Pa. C.S. § 2206(a), Docket No. M-00991249F0003.

2.3.4 As part of the Initial NGS Application process, an NGS must meet the standards and fulfill the obligations of creditworthiness as required under the NGS Creditworthiness paragraph of these Rules Applicable to Distribution Service before being permitted to provide Natural Gas Supply Services on the Company's system.

(C) Indicates Change

## **2. RULES APPLICABLE TO ALL DISTRIBUTION SERVICE – continued**

### **2.4 NGS CREDITWORTHINESS**

2.4.1 The Company will require the NGS to provide financial information in order for the Company to establish the NGS's creditworthiness. The NGS shall provide the Company with the financial information that it provided to the Commission, as well as the NGS's most current financial information. In addition, the Company may request the NGS to furnish the following financial information:

- Credit reports,
- Bank References,
- Audited Financial Statements, Annual Report, 10K or 10Q prepared in the past 12 months,
- Confirmation that the NGS is not operating under any bankruptcy or insolvency law,
- Confirmation that no significant lawsuits or judgements are outstanding,
- Confirmation that the NGS is not aware of any adverse condition which could cause a material change in financial condition,
- A list of parent company and other affiliates,
- Names, addresses and telephone numbers of three trade references, and/or
- Additional financial related information as determined by the Company.

2.4.2 The creditworthiness evaluation will be based on standard credit factors such as previous operating history including operating history on other NGDC's when applicable, financial and credit ratings from investment rating companies, trade references, unused line of credit, financial information and number and class of customers to be served. The Company shall determine creditworthiness based on the above criteria but will not deny creditworthiness without reasonable cause.

(C) Indicates Change

## **2. RULES APPLICABLE TO ALL DISTRIBUTION SERVICE – continued**

### **2.4 NGS CREDITWORTHINESS - continued**

#### 2.4.3 Amount and Form of Security

(C)

The criteria for determining the amount and form of security will be based on criteria specified in Title 52 §62.111 (c) of the Pennsylvania Code.

2.4.3.1 The following legal and financial instruments and property shall be acceptable as security:

- (i) Bond;
- (ii) Irrevocable letter of credit;
- (iii) Corporate, parental or other third-party guaranty;
- (iv) Escrow account;
- (v) Accounts receivable pledged or assigned to the Company by a licensee participating in the Company's purchase of receivables program that has been approved by the Commission as being consistent with Commission orders, guidelines and regulations governing the programs;
- (vi) Calls on capacity, netting the Company's gas supply purchases from the NGS against NGS security requirements, or other operational offsets as may be mutually agreed upon by the Company and the NGS; and
- (vii) Cash.

2.4.3.2 In addition to the requirements specified above, small suppliers with annual operating revenues of less than \$1 million may utilize real or personal property as security with the following supporting documentation:

1. A verified statement from the licensee that it has clear title to the property and that the property has not been pledged as collateral, or otherwise encumbered in regard to any other legal or financial transaction; and
2. A current appraisal report of the market value of the property.

The security amount may be modified. An adjustment to the amount of security may be requested by the Company or the NGS as specified in Title 52 §62.111 (c) (6) and (7) of the Pennsylvania Code.

(C) Indicates Change

## **2. RULES APPLICABLE TO ALL DISTRIBUTION SERVICE – continued**

### **2.4 NGS CREDITWORTHINESS – continued**

#### **2.4.4 Calculation of the Security Requirement**

The following is a calculation of the Natural Gas Supplier's (NGS) Security Requirement. The NGS Financial Exposure is the sum of one month's commodity exposure, plus one month's capacity exposure. The Security Requirement ("SR") is the NGS Financial Exposure ("FE") less any Unsecured Credit Level ("UCL"), Accounts Receivable Credit ("ARC") or Current Collateral ("CC").

$$\begin{aligned} \text{SR} &= \text{FE} - (\text{UCL} + \text{ARC} + \text{CUC}), \text{ where} \\ \text{FE} &= \text{COE} + \text{CAE}, \text{ and} \\ \text{COE} &= \{(\text{ARCC} \times \text{RC} \times \text{CR}) + (\text{ACCC} \times \text{CC} \times \text{CR}), \text{ and} \\ \text{CAE} &= \text{FT} \times \text{FTR}, \text{ and} \\ \text{ARC} &= \{(\text{NGSAR} \times \text{ARCC} \times \text{RC}) + (\text{NGSAR} \times \text{ACCC} \times \text{CC})\} \end{aligned}$$

An Accounts Receivable Credit is applied only when Columbia has been provided first secured interest. The NGS shall provide Columbia with any additional documents and take any additional steps that Columbia may request to perfect Columbia's interest.

Columbia will perform the above calculations monthly. The Security Requirement may be adjusted as circumstances warrant and in accordance with Chapter 62 – Natural Gas Supply Customer Choice, Subchapter D, Licensing Requirements for Natural Gas Suppliers.

In computing the amount of security required of the NGS pursuant to the formula above, the following definitions shall apply:

**ARC** equals Accounts Receivable Credit (if applicable).

**ARCC** equals Average Residential Customer Consumption.

**ACCC** equals Average Commercial Customer Consumption.

**CAE** equals capacity exposure (in \$).

**CC** equals number of Commercial Customers.

**COE** equals commodity exposure (in \$).

**CR** equals the Commodity rate calculated using the Inside FERC's Gas Market Report "Columbia Gas, App" index rate for prices of spot gas purchased at the Columbia Gas Transmission pool for the first of the month plus the current Columbia Gas Transmission shrinkage and commodity charges.

(C)

**CUC** equals Current Collateral (in \$) (if applicable).

## **2. RULES APPLICABLE TO ALL DISTRIBUTION SERVICE – continued**

### **2.4 NGS CREDITWORTHINESS – continued**

#### 2.4.4 Calculation of the Security Requirement - continued

(C)

**FE** equals Financial Exposure (in \$).

**FT** equals the amount of firm transportation capacity assigned to the NGS. **FTR** equals the firm transportation monthly rate (in \$/dth).

**FTR** equals the firm transportation monthly rate (in \$/dth).

**NGSAR** equals Natural Gas Suppliers' Average Rate.

**RC** equals number of Residential Customers.

**SR** equals Security Requirement (in \$).

**UCL** equals Unsecured Credit Level (if applicable).

2.4.5 A non-refundable fee of \$100.00 will be charged for each credit evaluation to offset the cost of determining the NGS's creditworthiness or adjust the amount of security. The Company reserves the right to conduct evaluations on an as-needed basis. The Company will bill the NGS the \$100.00 non-refundable fee for such evaluations but will limit the number of charges to two per year.

2.4.6 In those instances where an NGS is providing Natural Gas Supply Services pursuant to the Rules Applicable Only to General Distribution Service of these Rules Applicable to Distribution Service, the Customer is ultimately responsible to the Company for the payment of any invoices, fees, imbalance purchases, banking and balancing charges, OFO or OMO charges, penalties or other charges arising out of the NGS's provision of Natural Gas Supply Services to that Customer. NGSs providing Natural Gas Supply Service to Customers pursuant to the Rules Applicable Only to General Distribution Service of these Rules Applicable to Distribution Service shall not be required to provide a legal and/or financial instrument as specified in Chapter 62 §111(c)(2), or property under Chapter 62 §111(c)(3), if applicable, unless such legal and/or financial instrument as specified in Chapter 62 §111(c)(2), or property under Chapter 62 §111(c)(3), if applicable, is necessary based upon the Company's creditworthiness requirement..

(C)

(C) Indicates Change

**2. RULES APPLICABLE TO ALL DISTRIBUTION SERVICE – continued****2.4 NGS CREDITWORTHINESS – continued**

- 2.4.7 In those instances where an NGS is providing Choice Natural Gas Supply Services pursuant to the Rules Applicable Only to Choice Service rule of these Rules Applicable to Distribution Service, the NGS, rather than the Customer, is ultimately responsible to the Company for payment of all fees and charges set forth in the Rules Applicable to All Distribution Service rule and the Rules Applicable Only to Choice Service rule of these Rules Applicable to Distribution Service. The NGS shall be required to provide a legal and/or financial instrument as specified in Chapter 62 §111(c)(2), or property under Chapter 62 §111(c)(3), if applicable, in an amount that the Company will determine based upon the financial information provided and in a consistent manner pursuant to the NGS Creditworthiness paragraph. All fees and charges under the Rules Applicable Only to Choice Service of these Rules Applicable to Distribution Service may be recoverable against the legal and/or financial instrument as specified in Chapter 62 §111(c)(2), or property under Chapter 62 §111(c)(3) if applicable, required of the NGS. The legal and/or financial instrument as specified in Chapter 62 §111(c)(2), or property under Chapter 62 §111(c)(3), if applicable, shall be due and payable upon default and shall cover the NGS's obligations under the Act, including without limitation Section 2207(k) of the Act, and must also provide for payment of Company-imposed fees. Additionally, if the Commission so finds and orders, an additional legal and/or financial instrument as specified in Chapter 62 §111(c)(2), or property under Chapter 62 §111(c)(3) ,if applicable, may also provide for restitution for customers and Commission-imposed financial penalties, in an amount determined by the Commission. (C)
- 2.4.8 Annual Report. The Company will file an annual report with the Commission by April 30 of each year containing the information specified in Title 52 of the Pennsylvania Code, §62.111(c)(5). (C)

**2.5 CHARACTER OF DISTRIBUTION SERVICE**

- 2.5.1 Title to Gas. The Customer or its NGS warrants that it has good title to all natural gas delivered to the Company for Distribution to the Customer, and that such gas will be free and clear of all liens, encumbrances, and claims whatsoever, and that it will indemnify the Company, and save it harmless from all suits, actions, debts, accounts, damages, costs, losses and expenses arising from or out of a breach of such warranty.
- 2.5.2 Planning Issues. In view of Customer obtaining its own supply of natural gas, by direct or indirect means, the Customer and Shipper understand that the Company will no longer consider Customer's gas requirements in arranging for the system gas supply the Company purchases for its Sales Service Customers.

(C) Indicates Change

- 2.5.3. Quality of Gas. It is the Customer Proxy's obligation to provide gas of suitable quality to the Company at the agreed upon delivery points. The quantity, pressure and time of delivery shall be agreed to by the Company and the Customer's Proxy in advance, prior to delivery of the natural gas supplies.
- 2.5.4 Additional Facilities. If additional facilities are required for the Company to provide the service, and such facilities are not required for the provision of Sales service, the Customer must pay, in full, for any additional facilities required to be constructed, and such payments shall not be subject to refund under any circumstances.
- 2.5.5 The Company is responsible for Customer service functions, including meter reading, installation, testing and maintenance, emergency response for all Customers, and complaint resolution and collections related to services provided by the Company. The Company shall be responsible for the physical connection and disconnection of distribution service, whether temporary or permanent, with or without the consent of the customer. PA. P.U.C. Docket No. M-00991249F003.

## **2.6 LIMITATIONS ON DISTRIBUTION SERVICE**

- 2.6.1 Firm Service. Distribution service is a Firm Service on the Company distribution system. That is, the Company will distribute gas to the Customer on a firm basis during any day in which the Customer's gas is delivered by the Shipper to the Company at a Delivery Point in the same Company Local Market Area in which Customer's facilities are located, subject to the limitations set forth in the rate schedule(s) for Distribution service applicable to the Customer, the order of interruption priority set forth in the Priority-Based Curtailments section in Rule 2 of the Rules and Regulations of the Company's tariff and the System Integrity Measures and Procedures, and Seasonal Flow Orders sections in Paragraph 3, and Operational Flow Orders in Paragraph 4 of these Rules Applicable to Distribution Service and subject to the limitations set forth below. Contracted Standby Service quantities represent firm distribution service. (C)
- 2.6.2 Limitation for Failure of Shipper to Provide Gas to the Company in Customer's Local Market Area. (C)
- 2.6.2.1 Consistent with the authority provided under the System Integrity Measures and Procedures, Operational Flow Orders, and Operational Matching Orders sections of Paragraph 3 and the Operational Flow Order section in Paragraph 4 of the Rules Applicable to Distribution Service (RADS), if on any day, one or more Shipper(s) fails to deliver sufficient gas supplies to meet its/their Customer's(s)' estimated requirements on that day to a receipt point in the Local Market Area in which the Customer's(s)' facilities are located, or the total gas supplies delivered into that Local Market Area on that day are insufficient to meet the estimated total requirements of all the Company's Customers in that Local Market Area on that day, the Company may issue Operational Flow Orders (OFOs) or Operational Matching Orders (OMOs) pursuant to the Operational Flow Orders and Operational Matching Orders sections in Paragraph 3 and the Operational Flow Orders section in Paragraph 4 of these RADS, and if further limitations should become necessary, the Company shall order the curtailment of consumption pursuant to the priorities established in the Priority Based Curtailments section of the Gas Emergency Rules in Rule 2 of the Rules and Regulations Governing the Distribution and Sale of Gas.

2.6.2 Limitation for Failure of Shipper to Provide Gas to the Company in Customer's Local Market Area - Continued

2.6.2.2 The Company will not limit distribution service when the Shipper fails to provide gas to the Company in the Customer's local market area as specified in Paragraph 2 of the RADS to the extent that (a) the Shipper's customer(s) has (have) a daily firm contractual requirement under Rate Schedule SS or (b) the Shipper has sufficient gas supplies to meet its delivery requirement on that day, delivered that day into the same Local Market Area in which the Customer's (s') facilities are located; or (c) upon approval of the Company, the Shipper delivers its gas supplies to a receipt point which is located in a Local Market Area other than the Local Market Area in which the Customer's facilities are located (non-contiguous deliveries) and the Customer's consumption is not anticipated to cause pressure or delivery problems on the Company's facilities in the Local Market Area in which the Customer's (s') facilities are located or on the facilities of the Company's interstate pipeline suppliers. The Company has the right to restrict non-contiguous deliveries and such Distribution service may be limited whenever such non-contiguous deliveries are anticipated to cause pressure or delivery problems on the Company's facilities in the Local Market Area in which the Customer's facilities are located or on the facilities of the Company's interstate pipeline suppliers; or the Company is directed by the interstate pipeline supplier to limit its receipts of gas in order to comply with the interstate pipeline supplier's FERC approved tariff. If the Shipper does not meet the aforementioned criteria and limitation is necessary, the Customer Proxy shall be subject to the provisions of the System Integrity Measures and Procedures, Operational Flow Orders and Operational Matching Orders sections in Paragraph 3 and the Operational Flow Orders section in Paragraph 4 of these Rules Applicable to Distribution Service, and if further limitations should become necessary, the Customer shall be subject to limitation in accordance with the order of priority set forth in the Priority Based Curtailment section of the Gas Emergency Rules included in Rule 2 of the Rules and Regulations Governing the Distribution and Sale of Gas.

2.6.3 Limitation in the Event that Service to the Company's Priority One Customers is Threatened.

2.6.3.1 Distribution service may be limited or curtailed during periods when retail service to priority one Customers (as defined in the Rules and Regulations of the Company's tariff) is threatened by the Company's inability to maintain adequate delivery pressure or Shippers fail to deliver adequate gas supplies to the Delivery Points. Distribution service also may be limited or curtailed whenever, in the event of a sudden and unforeseen supply deficiency, the Company invokes an Emergency Curtailment for Tests or Repairs pursuant to the Gas Emergency Rules section in Rule 2 of the Rules and Regulations of the Company's tariff.

(C) Indicates Change

2.6.3 Limitation in the Event that Service to the Company's Priority One Customers is Threatened  
- Continued

2.6.3.2 In the event of limitation or curtailment of Distribution service, pursuant to this Paragraph and during such period of limitation or curtailment, the Customer Proxy must, if requested by the Company, sell to the Company all or a portion of the gas which was not delivered to the Delivery Point at the higher of: (1) the cost of gas at the Delivery Point to the Company, or (2) the Company's average weighted cost of purchased gas per thm, as determined based upon the Company's Purchase Gas Cost Rider. The cost at which the Shipper acquired the gas will be determined from the Customer's contract with the NGS. The Customer will be required to furnish a copy of the contract to the Company upon request.

2.6.4 Sale of Gas in the Event of Limitation

2.6.4.1 In the event of limitation or curtailment as a result of the Shipper failing to provide gas to the Company in the Customer's Local Market Area pursuant to the Limitation for Failure of Shipper to Provide Gas to the Company in Customer's Local Market Area section in Paragraph 2 of these Rules Applicable to Distribution Service and during such period of limitation or curtailment, the Customer Proxy may elect to sell to the Company, and the Company may agree to purchase from the Customer Proxy, all or a portion of the Shipper's gas actually produced from local Pennsylvania production sources into the Company's facilities at the lower of: 1) The Shipper's cost of gas at the Delivery Point to the Company; or 2) The Company's monthly weighted average commodity gas cost as determined based on the currently effective Purchase Gas Cost Rider rate for the month the limitation occurs.

(C) Indicates Change

## 2.7 DISTRIBUTION NOMINATIONS

2.7.1 For purposes of nomination and scheduling of Distribution deliveries, all Shippers must utilize the Nomination EBB. The Nomination EBB requires that the Shipper has a personal computer meeting the specifications of the Nomination EBB. All Shippers must have access to the Internet and must acquire a password and nomination identification number from the Company to access the Nomination EBB.

2.7.2 Pursuant to Section 3.5 of the Rules Applicable to Distribution Service, and in order to satisfy and/or maintain compliance with upstream pipeline orders and/or restrictions, including, but not limited to: nomination restrictions, operational orders, etc., the Company may require General Distribution Service Proxy to limit nominations to the Company at one or more PSPs. Additional volumes above the nomination limitation identified by the Company may be scheduled by General Distribution Service Proxy, at its option, to an alternate point of delivery to the Company, as identified by the Company, from the upstream pipeline issuing or notifying the Company of a restriction in delivery or nominations to one or more of the Company's PSPs. The Company shall limit such nomination restrictions to those instances when the upstream pipeline communicates that an order or restriction may be imposed or issues an order or restriction. Such restrictions shall only apply to volumes in excess of customer usage or deliveries in excess of usage as permitted under Rider EBS – Elective Balancing Services (Eleventh Revised Page No. 166). (C)

In the event of a pipeline Force Majeure or other constraint limiting the Company from serving its entire market demand behind a specific POD(s) or PSP(s), the Company will seek to notify the General Distribution Service Proxy(ies) of any alternate points of delivery to the Company, not on the upstream pipeline issuing the condition of Force Majeure, if such alternate point of delivery is available and, capable of enabling the Company to maintain service to the affected General Distribution Service customers. Such notification will be consistent with the Company's curtailment policy. (C)

This provision shall not limit the ability of the Company to issue OFOs/OMOs in accordance with this tariff. (C)

## 2.8 OPERATIONAL ALERTS (OAs)

2.8.1 An operational alert ("OA") may be called during periods of projected increased or decreased consumer demand for, or supply of, natural gas which may cause system stress or threaten applicable storage or other pipeline contract limitations. An OA is a request for specific action on the part of an individual Customer Proxy, or all Customer Proxies. The Customer Proxies are expected to respond to OAs within 4 hours after the Company provided notice, informing the Company of their intended action(s). Where possible, an OA may be used to avoid an OFO or OMO but shall not be required as a condition to the issuance of an OFO or OMO.

(C) Indicates Change

## **2.9 EMERGENCY ALERTS (EAs)**

2.9.1 If an unforeseen emergency situation arises which could threaten the continuous adequate delivery of natural gas to a Customer, the Company will provide the Customer Proxy with as much notice as is reasonably possible under the emergency situation. Such notice shall be made by the medium most reasonably expected to reach the Customer Proxy in a timely manner, including but not limited to: telephonic, e-mail, facsimile, Nomination EBB, or personal contact. In such notice, the Company will advise the Customer Proxy of the unforeseen emergency situation, and the Customer Proxy is expected to comply with the Company's requests.

## **2.10 LATE PAYMENT CHARGE**

2.10.1 The Company shall bill the Customer Proxy on a monthly basis and all bills shall be due and payable within fifteen (15) days of the date the bill is postmarked. Any bill not paid by the due date shall be increased by one and one-quarter percent (1-1/4%) of the amount not timely paid each billing cycle.

(C)

## **2.11 CHARGES BY OTHER PIPELINES OR DISTRIBUTORS**

2.11.1 If furnishing service, pursuant to the Customer's applicable Distribution rate schedule, required the Company to use a service provided other than by the Company, any cost incurred by, or billed to the Company, with regard thereto, shall be billed to the Customer Proxy.

2.11.2 The Customer Proxy shall also reimburse the Company for penalties assessed to the Company under the applicable rate schedule of a third party pipeline or Distributor as a result of daily excess consumption, daily excess tenders, excess monthly imbalances, banking imbalances or other factors set forth in such rate schedules.

## **2.12 RETAINAGE**

2.12.1 The Company may retain a reasonable allowance of the total quantity of gas delivered into its system for the Customer's account, for gas which is lost or unaccounted for in the Company's operations.

2.12.2 The percentage retainage is as follows:

MLS Class I Customers - 0%

Customers served by excess pressure measuring stations - 1%

All other Customers - The system average lost and unaccounted for quantities, as determined annually and effective with the January cycle bills. The percentage will be calculated as the simple average of three annual retainage rates ending August 31 sixteen months prior to the effective date, including company use gas and excluding quantities and retainage for MLSS and MLDS Class I accounts and accounts served by an excess pressure measuring station.

(C)

(C) Indicates Change

**2.13 RETROACTIVE PERIOD ADJUSTMENTS**

When the Company becomes aware of an overstatement or understatement of consumption or nominations on a customer's account for a previous period, the Company will adjust the customer's and/or the Aggregation Agent's account using the rates that were in effect for the billing cycle being adjusted. (C)

**2.14 NGS DEFAULT**

If the NGS breaches any Material Obligation it owes to the Company under its tariff, other than in instances of slamming, and fails to cure said breach within five business days after written notice from the Company, the Company shall have the right to prohibit the NGS from adding additional customers or to disqualify the NGS from operating on the Company's system entirely. Bankruptcy of the NGS is deemed to be an incident of default. In the event of an uncured breach, the Company may offset any and all amounts owed to it by the NGS against any and all amounts owed by the Company to the NGS, including without limitation, charges for imbalance gas sold by the Company, out of period adjustments to the NGS's account, amounts owed to the NGS for bank balances, and amounts owed to the Company for SFO, OFO, or OMO charges, etc. In the event a Choice NGS defaults and the Company is required to provide service to the NGS' customers at the rate which was contracted between the NGS and its customers (Section 2207 (K) of the Natural Gas Choice and Competition Act), the Company may also use any bank balance owed to the NGS to offset any incremental costs incurred by the Company in serving that NGS's customers. The Company reserves its rights to draw upon any bond or financial security instrument that may be required under the NGS Creditworthiness section in Paragraph 2 of the RADS and to pursue any and all damages it may incur as a result of a breach by the NGS.

**2.15 NONLIABILITY OF COMPANY**

The Company shall not be liable, under any circumstance or in any respect, to a Customer, to a producer of gas or to any other person or entity for damages arising either directly or indirectly from interruption, curtailment or termination of distribution service.

**2.16 SPECIAL SERVICES**

Any special services, facilities, instrumentalities or non-standard methodologies which may be rendered or furnished by the Company for an NGS at its request or at the direction of a governmental authority, and not provided for in the Company's Rules Applicable to Distribution Service shall be paid for by the NGS for whom such services, facilities, instrumentalities or non-standard methodologies are furnished, and such costs shall be in addition to the charges provided for in the Rules Applicable to Distribution Service or in addition to any deposit required in the Creditworthiness section of the Rules Applicable to Distribution Service of this tariff.

(C) Indicates Change

**2.17 DUTIES UNDER FORCE MAJEURE CONDITIONS**

(C)

Other than the Responsible Party's obligation to make payments of amounts due hereunder and the Shipper's duty to provide adequate supplies of gas, in the event that either party hereto is rendered unable, wholly or in part, by force majeure, to carry out its obligations under this Schedule, it is agreed that upon notice of such force majeure in writing or by telephone to the other party as soon as reasonably possible after the occurrence of the cause relied on, the obligation of the party giving such notice, insofar as they are affected by such force majeure, shall be suspended during the continuation of any inability so caused, but for no longer period, and such cause shall be remedied by such party with all reasonable dispatch. Telephone notices given under the provisions of this Paragraph shall be confirmed in writing as soon as reasonably possible, and all notices hereunder shall specifically state the time and date when the force majeure became effective. The obligations under this Schedule shall not be terminated by reason of any such force majeure, but shall remain in full force and effect for the entire term specified herein. The term "force majeure" as used herein shall mean any natural catastrophe, fire, explosion, accident or other casualty, change in circumstances, law or governmental regulation or order (including, without limitation, any such law, regulation or order which curtails or interrupts, directly or indirectly, Customer's right to receive the gas supplied hereunder), strike or other labor dispute and any consequences thereof and other causes beyond the reasonable control of either of the parties hereto, and shall also include any change in any order of the Commission which alters or affects the Customer's right to take or retain the gas supplied hereunder.

**2.18 SOLE AND EXCLUSIVE REMEDIES**

(C)

The termination rights, cancellation rights, and interest payments and other remedies outlined in the Company's tariffs for non-performance herein shall be the Company's and the Customer Proxy's respective sole and exclusive remedies for such non-performance. In no event shall either party be liable for special, incidental, exemplary, punitive, indirect or consequential damages, including, but not limited to, loss of profit or revenue, cost of capital, cost of substitute products, downtime costs, or claims for damages by third parties upon Company or the Customer Proxy. This applies whether claims are based upon contract, warranty, tort, (including negligence and strict liability), or other theories of liability.

**2.19 NO WAIVER**

(C)

No waiver by either party of one or more defaults by the other in the performance of any provisions of these Rules Applicable to Distribution Service shall operate or be construed as a waiver of any other or further default or defaults, whether of a like or of a different character.

(C) Indicates Change

- 2.20 STANDARDS OF CONDUCT** (C)
- 2.20.1 General Requirements.** NGDCs and NGSs shall comply with the following requirements: (C)
- 2.20.1.1 An NGDC shall apply its tariffs in a nondiscriminatory manner to its affiliated NGS and any nonaffiliated NGS. (C)
- 2.20.1.2 An NGDC may not apply a tariff provision in a manner that would give its affiliated NGS preference over other NGSs with regard to matters such as scheduling, balancing, transportation, storage, curtailment, capacity release and assignment, non-delivery, and other services provided to its affiliated NGS. (C)
- 2.20.1.3 Mandatory tariff provisions may not be waived by an NGDC for an NGS absent prior approval of the Commission. (C)
- 2.20.1.4 When a tariff provision is not mandatory or provides for waivers, an NGDC shall grant the waivers without preference to its affiliated NGS or non-affiliated NGS. (C)
- 2.20.1.5 An NGDC shall maintain a chronological log of tariff provisions for which it has granted waivers. Entries must include the name of the party receiving the waiver, the date and time of the request, the specific tariff provision waived and the reason for the waiver. The chronological log must be open for public inspection during normal business hours. When the NGDC maintains a website, it shall post the terms set forth in this paragraph on its website for at least 3 months. (C)

(C) Indicates Change

**2.20 STANDARD OF CONDUCT - continued**

- 2.20.1.6 An NGDC shall process requests for distribution services promptly and in a nondiscriminatory fashion with respect to other requests received in the same or a similar period. An NGDC shall maintain a chronological log showing the processing of requests for transportation services. The chronological log must be open for public inspection during normal business hours. (C)
- 2.20.1.7 If an NGDC provides a distribution service discount, fee waiver or rebate to its favored customers, or to the favored customers of its affiliated NGS, the NGDC shall offer the same distribution service discount, fee waiver or rebate to other similarly situated customers. Offers may not be tied to an unrelated service, incentive or offer on behalf of either the NGDC or its affiliated NGS. A chronological log shall be maintained showing the date, party, time and rationale for the action. The chronological log must be open for public inspection during normal business hours. (C)
- 2.20.1.8 Subject to customer privacy or confidentiality constraints, an NGDC may not disclose, directly or indirectly, any customer proprietary information to its affiliated NGS unless authorized by the customer. To the extent that an NGDC does disclose customer information without customer authorization, it shall first seek the permission of the customer consistent with its tariffs, any contractual obligations it may have to the customer or § 62.78 (relating to privacy of customer information) and, if that customer grants permission, contemporaneously provide this same information to other similarly situated NGSs in a similar fashion so as not to selectively disclose, delay disclosure or give itself or its affiliated NGS an advantage related to the disclosure. A chronological log shall be maintained showing the date, party, time and rationale for the disclosure. The chronological log must be open for public inspection during normal business hours. This paragraph does not apply to the disclosure of customer information made under a customer assistance program mandated by State law or regulation. (C)
- 2.20.1.9 An NGDC shall reasonably allocate to its affiliated NGS the costs or expenses for general administration or support services provided to its affiliated NGS. (C)
- 2.20.1.10 NGDCs may not condition or tie the provision of a product, service or price agreement by the NGDC, including release of interstate pipeline capacity to the provision of a product or service by its affiliate (C)

(C) Indicates Change

**2.20 STANDARDS OF CONDUCT - continued**

- 2.20.1.11 An NGDC may not give its affiliated NGS preference over a non-affiliated NGS in the provision of goods and services including processing requests for information, complaints and responses to service interruptions. An NGDC shall provide comparable treatment in its provision of goods and services without regard to a customer's chosen NGS. (C)
- 2.20.1.12 An NGDC and its affiliated NGS shall maintain separate books and records. Transactions between the NGDC and its affiliated NGS may not involve cross-subsidies. Shared facilities must be fully and transparently allocated between the NGDC function and the affiliated NGS function. The NGDC accounts and records must be maintained so that the costs incurred on behalf of an affiliated NGS are clearly identified. (C)
- 2.20.1.13 NGDC employees who have responsibility for operating the distribution system, including natural gas delivery or billing and metering, as well as those responsible for marketing and customer service, may not be shared with an affiliated NGS, and their offices shall be physically separated from the office(s) used by those working for the affiliated NGS. NGDC employees may transfer to an affiliated NGS provided the transfer is not used as a means to circumvent these standards of conduct. (C)
- 2.20.1.14 Neither the NGDC nor its affiliated NGS may directly, or by implication, falsely and unfairly represent to a customer, NGS or third party that an advantage may accrue to a party through use of the NGDC's affiliates or subsidiary, such as: (C)
- (i) The Commission-regulated services provided by the NGDC are of a superior quality when services are purchased from its affiliated NGS.
  - (ii) The merchant services for natural gas are being provided by the NGDC when they are in fact being provided by an affiliated NGS.
  - (iii) The natural gas purchased from a nonaffiliated NGS may not be reliably delivered.
  - (iv) Natural gas shall be purchased from an affiliated NGS to receive Commission-regulated services.

(C) Indicates Change

**2.20 STANDARDS OF CONDUCT – continued**

- 2.20.1.15 When an affiliated NGS markets or communicates to the public using the NGDC name or logo, it shall include a legible disclaimer that states that: (C)
- (i) The affiliated NGS is not the same company as the NGDC.
  - (ii) The prices of the affiliated NGS are not regulated by the Commission.
  - (iii) A customer does not have to buy natural gas or other products from the affiliated NGS to receive the same quality of service from the NGDC.
- 2.20.1.16 When an affiliated NGS advertises or communicates verbally through radio or television to the public using the NGDC name or logo, the affiliated NGS shall include at the conclusion of the communication a legible disclaimer that includes all of the disclaimers in paragraph 2.20.15 (i) – (iii). (C)
- 2.20.1.17 An NGDC may not: (C)
- (i) Jointly market or jointly package its Commission-regulated services with the services of an affiliated NGS.
  - (ii) Offer or provide to its affiliated NGS products or services, including bill inserts in its NGDC bills promoting an affiliated NGS's services or a link from the NGDC's web-site, unless the NGDC offers or provides these products or services to nonaffiliated NGSs on the same terms and conditions.
  - (iii) The restrictions in subparagraphs (i) and (ii) do not apply to competitive bid situations.
- 2.20.1.18 An NGDC may not offer or sell natural gas commodity or capacity to its affiliated NGS without simultaneously posting the offering electronically on a source generally available to the market or by otherwise making a sufficient offer to the market. The NGDC shall maintain a chronological log of these public disseminations. The chronological log must be open for public inspection during normal business hours. (C)

(C) Indicates Change

**2.20 STANDARDS OF CONDUCT - continued**

- 2.20.1.19 An NGDC shall establish and file with the Commission complaint procedures for dealing with alleged violations of the standards of conduct, with the exception of paragraph 2.20.1.9, which is exclusively under the purview of the Commission. These procedures shall be developed in consultation with interested parties during consideration of tariffs guided by 52 Pa. Code § 62.142 and § 69.191 (relating to general). The Commission may grant an exception to these requirements if warranted by the facts or circumstances. (C)
- 2.20.1.20 An NGDC shall keep a chronological log of any complaints filed, excepting those filed to paragraph 2.18.1.9, regarding discriminatory treatment of NGSs. This chronological log must include the date and nature of the complaint and the resolution of the complaint. The chronological log must be open for inspection during normal business hours. (C)
- 2.20.2 Dispute Resolution Procedures.** In addition to the procedures in paragraph 2.18.1.19: (C)
- 2.20.2.1 When a dispute between an NGDC, an affiliated NGS, or a nonaffiliated NGS, alleging a violation of the standards of conduct provisions occurs, the NGS shall provide the NGDC or affiliated NGS, as applicable, a written notice of dispute that includes the names of the parties and customers, if any, involved and a brief description of the matters in dispute. (C)
- 2.20.2.2 Within five (5) days of an NGDC's or affiliated NGS's receipt of a notice of dispute, a designated senior representative of each party shall attempt to resolve the dispute on an informal basis. (C)
- 2.20.2.3 If the representatives are unable to resolve the dispute by mutual agreement within thirty (30) days of receipt, they shall refer the complaint to the Commission's Office of Administrative Law Judge for mediation § 69.392 (relating to availability of mediation process). A party may request mediation prior to that time if informal resolution is not productive. (C)

(C) Indicates Change

**2.20 STANDARDS OF CONDUCT - continued**

2.20.2.4 A party may file a complaint concerning the dispute with the Commission under relevant provisions of 66 Pa. C.S. § § 701-703 (relating to procedure on complaints) and § § 5.21-5.31 (relating to formal complaints). (C)

2.20.2.5 A complainant bears the burden of proof consistent with 66 Pa.C.S. § 332 (relating to procedures in general) in regard to the allegations and may request penalties for violations under to 66 Pa. C.S.§ 3301 (relating to civil penalties for violations). (C)

**2.20.3 Adoption as Company Policy.** An NGDC and its affiliated NGS shall formally adopt and implement these provisions as company policy and take appropriate steps to train and instruct its employees in their content and application. (C)

**2.21 COMPLAINT PROCEDURE**

If the Customer Proxy believes that the Company acted inconsistently with the terms of these Rules Applicable to Distribution Service, it may file a complaint with the Commission. (C)

**2.22 COMPLAINT PROCEDURE – VIOLATIONS OF STANDARDS OF CONDUCT**

Alleged violations of the Standards of Conduct shall be communicated by the NGS to the Company by written Notice of Dispute that includes the names of the Parties and Customer(s), if any, involved and a brief description of the matters in dispute. Within five (5) days of receipt of a Notice of Dispute, the Company's General Counsel shall attempt to resolve the dispute on an informal basis. If the dispute is not resolved within thirty (30) days of the date of receipt of the Notice of Dispute, the dispute shall be referred for mediation through the Commission's Office of Administrative Law Judge. If mediation is not successful, the matter will be converted to a formal proceeding before a Commission Administrative Law Judge. Parties alleging violations of the Standards of Conduct may pursue their allegations through the Commission's established complaint procedures. A complainant bears the burden of proof consistent with 66 Pa. C.S. §322 in regard to the allegations and the Commission may impose penalties for such violations pursuant to 66 Pa. C.S. §3301. PA P.U.C. Docket No. M-00991249F004. (C)

(C) Indicates Change

**2. RULES APPLICABLE TO ALL DISTRIBUTION SERVICE - continued**

2.23 Platts “Gas Daily”, Daily Price Survey - Designation by Pipeline Scheduling Point (C)

The table below will be used to identify the specific price indices for each pipeline scheduling point, the higher of which will be used as the starting point for calculating charges for non-compliance with Operational Flow Orders, Operational Matching Orders and/or failure to deliver the Choice Daily Delivery Requirement. The physical location of the customer’s service address will determine the pipeline scheduling point used in calculating the non-compliance charge(s).

<b>Platts “Gas Daily”, Daily Price Survey</b>

## **2. RULES APPLICABLE TO ALL DISTRIBUTION SERVICE - continued**

### 2.24 Historical Usage Portal

(C)

In accordance with the Commission approved settlement in Docket No. R-2017-2591326, beginning on September 21, 2018, a Natural Gas Supplier (“NGS”) that has received authorization from a prospective commercial or industrial customer, may access up to the most recent twenty-four (24) months of historical usage data for the prospective commercial or industrial customer’s premises.

2.24.1 Customer Authorizations will be valid for 30 days after the customer has agreed that the NGS may access the historical usage data.

2.24.2 To access the customer’s historical usage data, the NGS will obtain from the customer and shall use the following data points in order to specifically identify the customer’s premises:

1. The customer’s eight-digit account number or “PCID” and three-digit customer sequence number that follows the PCID; and
2. The last four digits of the nine-digit PSID or Service Number for the premises where the customer is located, or the last four digits of the customer’s meter number.

2.24.3 Access to the customer’s historical usage will be provided to NGSs using the password-protected secure area of the Company-maintained website, “ColumbiaSuppliers.com”.

2.24.4 If 24 months of historical usage does not exist for a premises, all available historical usage shall be provided.

(C) Indicates Change

### **3. RULES APPLICABLE ONLY TO GENERAL DISTRIBUTION SERVICE**

**3.1** This Paragraph applies to all General Distribution Service on the Company's system, regardless of whether the Customer is acting as its own Shipper or whether the Customer has contracted with an NGS to provide this service.

#### **3.2 APPLICATION PROCESS**

**3.2.1** All Customers must complete an application in the form prescribed by the Company prior to taking service under these Rules Applicable to Distribution Service ("General Distribution Application and Agreement"). The General Distribution Application and Agreement shall set forth: (1) the point(s) of receipt at which the gas will be delivered to the Company; (2) the point(s) to which the Company will distribute the gas to the Customer's facilities; and (3) the Customer's currently effective Maximum Daily Quantity and annual quantity. The General Distribution Application and Agreement shall also include: the name, address and telephone number to which all notices are to be delivered, an e-mail address, banking and balancing information if applicable, alternate fuel information, the service and levels of said services to be rendered.

The currently effective Maximum Daily Quantity and annual quantity are subject to adjustment by the Company no more than one time each year, to reflect the Customer's currently effective Maximum Daily Quantity based on data ending March 31 and annual quantities experienced in the most recent November to October period, except an adjustment may be made at any time upon agreement of the Customer and the Company. (C)

**3.2.2** In the General Distribution Application and Agreement, the Customer has the option of appointing an NGS to act on its behalf, for the purpose of establishing and administering the Customer's General Distribution Service. This appointment shall authorize the NGS to administer the Customer's purchase of natural gas supplies, including (by way of illustration and not limitation) the following: obtain the Customer's historic and current usage data from the Company; place a Customer in an Aggregation Nomination Group; receive notices on behalf of the Customer; nominate gas on behalf of the Customers; and obtain from the Company any and all pertinent information pertaining to prior or current month gas deliveries to the Customer, including disbursed quantities, tariff quantities, banked quantities and bank tolerances. The Customer has the right to change his appointment of an NGS to act on his behalf by submitting a new General Distribution Application and Agreement containing the new appointment.

**3.2.3** The benefits and obligations of service under these Rules Applicable to Distribution Service shall begin when the Company first receives gas on the Customer's behalf.

**3.2.4** Within sixty (60) days of receipt of all necessary information requested by the Company to evaluate a Customer's application, the Company will respond to the General Distribution Application and Agreement and agree either to supply service or deny service. If the Company refuses to provide service under the requested rate schedule, the Company shall provide detailed support for its decision.

(C) Indicates Change

- 3.2.5 The NGS is not required to complete an application to provide General Distribution Service; provided that the Customer's NGS submitted an Initial NGS Application which was approved by the Company.

### **3.3 CHARACTER OF SERVICE TO BE RENDERED**

- 3.3.1 The Company shall receive the quantities of gas supplied by the Shipper and shall redeliver said gas to Customer's facilities. For Customers who purchase 100% Standby Service, the Company will provide Firm Service up to the Customer's currently effective Maximum Daily Quantity. For Priority One Customers, the Company will provide Firm Service. (C)

- 3.3.2 Special Conditions for Customers with less than 100% Standby Service:

- 3.3.2.1 Customers may request to take General Distribution Service with less than 100% Standby Service provided that the Customer agrees to the following conditions:

3.3.2.1.1 Interruption of gas distribution may occur if the Shipper fails to deliver sufficient quantities of gas to the Company, including sufficient quantities to cover peak day usage, whether or not such failure is due to the fault of Shipper. Interruptions or limitations may be necessary during peak day conditions even if all of the Customer's gas has been delivered to the Company.

3.3.2.1.2 An interruption of gas deliveries may require or result in (1) the temporary closing of the Customer's facilities, (2) lost production, sales, or business, and (3) damage to Customer's physical facilities. The Customer assumes the risk of any such losses or damage. A failure of the Customer to interrupt after notification to the Customer Proxy by the Company may also subject the Customer Proxy to liability for fines or penalties incurred by the Company as a result of such failure.

**Supplement No. 296 to  
Tariff Gas – Pa. P.U.C. No. 9  
Ninth Revised Page No. 203**

**Columbia Gas of Pennsylvania, Inc. Canceling Seventh and Eighth Revised Page No. 203**

3.3.2.1.3 The Company has the right of access to the Customer's premises in order to read the meter(s), and, to the extent permitted by the Company's approved tariffs, the Company may require the installation of daily metering equipment. (C)

3.3.2.1.4 In the General Distribution Application and Agreement, the Customer shall provide the Company with the names of two persons, along with their 24/7 contact numbers and e-mail addresses (if available), who are to be contacted in the event that interruption of gas service is required under this Paragraph.

3.3.3 A General Distribution Service account may be returned to the applicable Sales Service rate if for a period of at least five (5) consecutive days in one billing cycle the Company:

- (1) has not received gas supply for the account;
- (2) the account's bank balance is insufficient to cover the consumption or the customer did not have access to its bank balance due to the issuance of an OFO and/or OMO; and
- (3) the customer consumed gas on one or more days during such five (5) day period.

For a non-daily read account, the account may be returned to the applicable Sales Service rate at the end of a billing cycle if the above three conditions are met unless the customer furnishes proof that they did not consume gas on one or more days during such five (5) day period.

**3.4 ORDER OF GAS THROUGH THE METER.**

3.4.1 Gas through the Customer's meter during each billing cycle shall be considered to have come from the following sources, in order of priority:

1. Gas supplies which have reached the facilities of the Company on behalf of a Customer, including Customer-owned supplies.
2. The cumulative balance, if any, of excess deliveries in prior months.
3. Firm sales, if any, contracted by the Customer from the Company.
4. Imbalance gas provided by the Company as defined in Paragraph 3.11.1 of these Rules Applicable to Distribution Service.

(C) Indicates Change

### **3.5 SYSTEM INTEGRITY MEASURES AND PROCEDURES**

- 3.5.1 Operational Alert (OA). An operational alert (“OA”) may be called during periods of projected increased or decreased consumer demand for, or supply of, natural gas which may cause system stress or threaten applicable storage or other pipeline contract limitations. An OA is a request for specific action on the part of an individual Customer Proxy, or all Customer Proxies. The Customer Proxies are expected to respond to OAs within 4 hours after the Company provided notice, informing the Company of their intended action(s). Where possible, an OA may be used to avoid an OFO or OMO but shall not be required as a condition to the issuance of an OFO or OMO.
- 3.5.2 Emergency Alerts (EAs). If an unforeseen emergency situation arises which could threaten the continuous adequate delivery of natural gas to a Customer, the Company will provide the Customer Proxy with as much notice as is reasonably possible under the emergency situation. Such notice shall be made by the medium most reasonably expected to reach the Customer Proxy in a timely manner, including but not limited to: telephonic, e-mail, facsimile, Nomination EBB, or personal contact. In such notice, the Company will advise the Customer Proxy of the unforeseen emergency situation, and the Customer Proxy is expected to comply with the Company’s requests.
- 3.5.3 Seasonal Flow Orders (SFOs). As detailed below in the Seasonal Flow Order section of this Paragraph, the Company shall have the authority to issue SFOs whenever the Company believes that the seasonal supplies of Sales Service or Choice customers may be jeopardized. The Company may issue an SFO to Customer Proxies in instances including but not limited to the following: in order to prevent an excess of gas supply on the Company’s system, to respond to an operational issue, or to direct Customer Proxies to direct their Shippers to adjust gas quantities being delivered to the Company to match GDS customers’ estimated requirements to prevent shortages of seasonal supplies on the Company’s system.
- 3.5.4 Operational Flow Orders (OFOs) and Operational Matching Orders (OMOs). The Company has the authority to issue OFOs and OMOs whenever the Company believes that the daily safe and/or reliable operation of its distribution system may be jeopardized including, without limitation, the need to protect the daily supply of Sales and Choice customers. The Company will endeavor to take all actions reasonably practicable to avoid issuing an OFO or OMO. In determining whether to issue an OFO or OMO the Company shall not be required to consider the availability of assets paid for by PGC and/or Choice Customers, or to acquire additional capacity or gas supply to serve GDS Customers (with the exception of quantities elected under Rate SS, and existing capacity for Rider EBS-Option 1). If the Company has the necessary information and conditions do not require a system-wide OFO or OMO, the Company may issue an OFO or OMO to an individual Customer Proxy or Customer Proxies, but this action shall not be a precondition for the Company to issue an OFO or OMO applicable to all GDS Customers or Customer Proxies. Where operationally feasible, the Company will endeavor to issue OFOs/OMOs by Pipeline Scheduling Point.
- 3.5.5 Eligible Customer Proxies may meet the requirements of SFOs, OFOs and OMOs by subscribing to the Company’s Flow Order Management Service as described in Paragraph 3 of these RADS.
- 3.5.6 If there is any change to the OFO or OMO status of a customer’s meter, the company will, within thirty (30) days of the status change requested by the customer or the customer’s duly authorized agent, notify the customer and the Customer’s agent of record of such change. (C)

(C) Indicates Change

### **3.6 SEASONAL FLOW ORDERS (SFOs)**

3.6.1 An SFO is a demand for specific actions on the part of Shippers that are serving GDS customers.

3.6.2 An SFO will be issued, to the extent possible, with a minimum of two business days notice to the affected parties.

3.6.3 The Company will have the authority to direct Customer Proxies to direct their Shippers to adjust daily scheduled quantities to a specified level (the SFO Level). The SFO Level may be necessary to restrict under-deliveries or over-deliveries as the Company deems appropriate.

3.6.3.1 For customers without daily measurement equipped meters, customers with daily measurement equipped meters who did not elect Telemetry and for Customers that have elected to be governed as an OFO customer pursuant to the provisions of the Operational Matching Orders section of this Paragraph, the SFO Level will be determined by the Company based upon the Company's projection of usage by GDS customers during the period. Issuance of an SFO shall not prohibit issuance of an OFO/OMO if conditions warrant. To meet the daily SFO level, the Shipper may use gas quantities which are: 1) scheduled and delivered on that day to the Company in the same Pipeline Scheduling Point in which the Shipper's customer(s)'s facilities are located; 2) contracted for under Rate SS – Standby Service; 3) available on that day pursuant to the Rider EBS-Option 1; or 4) additional quantities that may be made available by the Company at its sole discretion including quantities delivered to a Local Market Area other than the Local Market Area where the Customer is located in accordance with Paragraph 2 of the RADS. (C)

3.6.3.2 For Customers with daily measurement equipped meters that have elected Telemetry, the Company shall have the authority to direct Customer Proxies to direct their Shippers to adjust Customer's daily consumption quantities or daily scheduled deliveries in order that daily scheduled deliveries (the SFO Level) match Customer's consumption. In order to determine the SFO Level the Company will include quantities: 1) scheduled and delivered on that day to the Company in the same Pipeline Scheduling Point in which the Shipper's customer(s)'s facilities are located; 2) contracted for under Rate SS – Standby Service; 3) available on that day pursuant to the Rider EBS-Option 1; or 4) additional quantities that may be made available to the Shipper by the Company at its sole discretion including quantities delivered to a Local Market Area other than the Local Market Area where the Customer is located in accordance with Paragraph 2 of the RADS. (C)

3.6.4 At the end of the normal billing cycle, the Company shall calculate the deliveries that the Shipper was required to deliver each day during the SFO as provided in the Seasonal Flow Order section in Paragraph 3 of the RADS. When a difference between the daily SFO Level and actual daily quantities available to meet the SFO Level exists, the following charges will be assessed on the difference:

(1) If a Shipper under-delivers during an SFO that restricts under-deliveries, the charge for under-deliveries shall be calculated using the gas supply index identified in the Consumption in Excess of Deliveries section in Paragraph 3 of the RADS. The "Adjustment to Index Price" shall be the adjustment shown in the following table:

<b>Ratio of Under-Deliveries to Consumption</b>	<b>Adjustment to Index Price</b>
0% - 10.00%	120%
10.01% and over	130%

- (2) If a Shipper over-delivers during an SFO that restricts over-deliveries, the charge for over-deliveries shall be calculated using the gas supply index identified in the Deliveries in Excess of Consumption section in this Paragraph 3 of the RADS; The "Adjustment to Index Price" shall be the adjustment shown in the following table:

<b>Ratio of Over-Deliveries to Consumption</b>	<b>Adjustment to Index Price</b>
0% - 10.00%	80%
10.01% and over	70%

- (3) The Customer Proxy shall also be required to pay all other charges incurred by the Company on the dates of the SFO that result from the Shipper's failure to comply with the SFO, including a proportionate share of any pipeline penalties that are incurred by the Company.

### 3.7 OPERATIONAL FLOW ORDERS (OFOs)

- 3.7.1 An OFO is a demand for specific actions on the part of Shippers. Customers subject to OFOs are those customers: (C)
- a. Who have meters without daily measurement equipment;
  - b. With daily measurement equipped meters who have not elected Telemetry;
  - c. Who have elected Telemetry and are awaiting installation of the new cellular modem device and whose existing meters are read daily using analog telephone lines when the analog line is not providing timely data;
  - d. With meters whose usage is billed under Rate Schedule SGDS.

- 3.7.2 An OFO will be issued, to the extent possible, with a minimum of eight (8) hours notice to the affected parties. Notice shall be made by the medium most reasonably expected to reach the Customer Proxy with as much notice as reasonably expected to reach the Customer Proxy in a timely manner, including but not limited to: e-mail, facsimile, or Nomination EBB. The notice will include the circumstance that warrants the issuance of the OFO or OMO, and it will explain why the actions are necessary. The notice will be provided via e-mail to the Pennsylvania P.U.C.

(C) Indicates Change

**3.7 OPERATIONAL FLOW ORDERS (OFOs) - continued**

3.7.3 The Company will have the authority to direct Customer Proxies to direct their Shippers to adjust daily quantities to a specified level (the Daily OFO Level). Generally, during peak design day conditions, the Daily OFO Level will be equal to the currently effective Maximum Daily Quantity. Should expected conditions be different than peak design day conditions, the Daily OFO Level may be greater or less than the currently effective Maximum Daily Quantity specified in the Customer's General Distribution Application and Agreement. In order to determine compliance with the OFO the Shipper may use gas quantities which are: 1) scheduled and delivered on that day to the Company in the same Pipeline Scheduling Point in which the Shipper's customer(s)'s facilities are located; 2) contracted for under Rate SS – Standby Service if the order is pertaining to an under-delivery situation; 3) available pursuant to the Rider EBS-Option 1; or 4) additional quantities that may be made available to the Shipper by the Company at its sole discretion including quantities delivered in accordance with the Limitation for Failure of Shipper to Provide Gas to the Company in Customer's Local Market Area section in Paragraph 2 of the RADS.

### **3.7 OPERATIONAL FLOW ORDERS (OFOs) - continued**

3.7.4 When a difference between the Daily OFO Level and actual daily OFO compliance quantities delivered to the Company exists, the following charges will be assessed to the Customer Proxy:

- (1) A rate equal to one and one-half (1 ½) times the highest of the midpoint prices reflected in Platts Gas Daily for the day of the OFO non-compliance and based on pipeline scheduling point applicable indices as specified in the Platts “Gas Daily”, Daily Price Survey – Designation by Pipeline Scheduling Point paragraph of Rule 2. Rules Applicable to All Distribution Service in the Rules Applicable to Distribution Service of this tariff.

The charge will be multiplied by the therm difference, except however, the charge will not be assessed if the difference results from the Shipper delivering more than the Daily OFO Level during an OFO that restricts under-deliveries, or from the Shipper delivering less than the Daily OFO Level during an OFO that restricts over-deliveries; and,

- (2) The payment of all other charges incurred by the Company on the date of the OFO that results from the Shipper's failure to comply with the OFO, including a proportionate share of any pipeline penalties that are incurred by the Company.
- (3) In the event midpoint prices referenced in subparagraph (1) above, are not published in Platts Gas Daily for the day of the OFO non-compliance, the highest price paid by the Company on that day shall be used as the index price.
- (4) The Company shall update the applicable indices on 60 days' notice to Customer Proxies in the event of a change in applicable indices. Applicable indices are subject to change based upon changes in market circumstances.

### **3.8 OPERATIONAL MATCHING ORDERS (OMOs)**

3.8.1 An OMO is a demand for specific actions on the part of Shippers. All Rate Schedule SDS, LDS and MLDS customers with daily measurement equipped meters who have elected Telemetry, except as specified in the Operational Matching Order section in Paragraph 3 of the RADs, are subject to the Company's issuance of OMOs. This includes customers who currently have daily read analog telephone lines that are providing timely usage information and who have elected Telemetry and are waiting installation of the new cellular modem device. (C)

3.8.2 Customers with daily measurement using an EFC who have elected Telemetry shall have a semi-annual option of choosing to be governed by OFOs or OMOs. Such option election shall be in writing and received by the Company no later than February 1<sup>st</sup> to be effective for the period of April 1<sup>st</sup> through October 31<sup>st</sup>, and no later than September 1<sup>st</sup> to be effective for the period of November 1<sup>st</sup> through March 31<sup>st</sup>. Once an eligible customer elects to be subject to an OFO, that election will remain in effect until the customer notifies the Company in writing. If no election is made, the default option shall be the OMO option. This includes customers who currently have daily read analog telephone lines that are providing timely usage information and who have elected Telemetry and are waiting for installation of the new cellular modem device. (C)

3.8.3 An OMO will be issued, to the extent possible, with a minimum of eight (8) hours notice to the affected parties. Notice shall be made by the medium most reasonably expected to reach the Customer Proxy with as much notice as reasonably expected to reach the Customer Proxy in a timely manner, including but not limited to: e-mail, facsimile, or Nomination EBB. The notice will include the circumstance that warrant the issuance of the OMO and explain why the actions required are necessary. The notice will be provided via e-mail to the PA PUC.

(C) Indicates Change (D) Indicates Decrease

### **3.8 OPERATIONAL MATCHING ORDERS (OMOs) - continued**

3.8.4 The Company shall have the authority to direct Customer Proxies to adjust Customer's daily consumption or daily scheduled deliveries (Daily OMO Level) in order that daily scheduled deliveries match Customer's consumption. In order to comply with the OMO, the Shipper may use gas quantities which are: 1) scheduled and delivered on that day to the Company in the same Pipeline Scheduling Point in which the Shipper's customer(s)'s facilities are located; 2) contracted for under Rate SS – Standby Service if the order is pertaining to an under delivery situation; 3) available pursuant to the Rider EBS-Option 1; or 4) additional quantities that may be made available to the Shipper by the Company at its sole discretion including quantities delivered in accordance with the Limitation for Failure of Shipper to Provide Gas to the Company in Customer's Local Market Area section in Paragraph 2 of the RADS.

3.8.5 No later than April 1st of each year a customer with a meter subject to an OMO or the Customer Proxy shall select one of two options that the Company shall use to calculate the OMO customer's daily delivery requirement in the event of an equipment failure or network outage when such failure or outage prevents a customer or Customer Proxy from electronically retrieving the daily usage data by 1:00 PM Eastern Time for the gas day that ends at 10:00 AM Eastern Time on the same day. Such option selection shall be in writing and shall be effective for the following November 1<sup>st</sup> through October 31<sup>st</sup> period. The chosen option may only be changed for the subsequent November 1<sup>st</sup> through October 31<sup>st</sup> period by written notification received by the Company no later than the prior April 1st. (C)

#### 3.8.5.1 Maximum Daily Quantity Option (C)

The customer or Customer Proxy shall use the previously issued OFO/OMO NOTICE to identify the daily OFO percentage for the PSP in which the customer's meter is located, and multiply the currently effective MDQ for the customer's meter by the OFO percentage to determine the confirmed delivery quantity required to comply with the OFO; or

#### 3.8.5.2 Usage Option (C)

The customer or Customer Proxy shall estimate actual usage for the following gas day and multiply such estimated usage by the OMO percentage specified in the previously issued OFO/OMO NOTICE for the PSP in which the customer's meter is located to determine the confirmed delivery quantity required to comply with the OMO. The Company will multiply the actual usage by the applicable OMO percentage for that day to determine if the Customer or Customer Proxy complied with the OMO.

If confirmed gas deliveries are out of compliance with the calculations specified in the Maximum Daily Quantity Option or the Usage Option specified above, OMO penalties will be assessed based on the difference between the required confirmed delivery quantity and the actual confirmed delivery quantity for that day. (C)

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc. Canceling Fourteenth and Fifteenth Revised Page No. 208**

---

- 3.8.6 When a difference exists between the Daily OMO Level and actual daily OMO compliance quantities delivered, charges will be assessed for non-compliance.
- 3.8.6.1 The non-compliance charges will be equal to one and one-half (1 ½) times the highest of the midpoint prices reflected in Platts Gas Daily for the day of the OMO non-compliance and based on pipeline scheduling point applicable indices as specified in the Platts “Gas Daily”, Daily Price Survey – Designation by Pipeline Scheduling Point paragraph of Rule 2. Rules Applicable to All Distribution Service in the Rules Applicable to Distribution Service of this tariff.
- 3.8.6.2 The charge will be multiplied on the term difference, except however, the charge will not be assessed if the difference results from the Shipper delivering more than the Daily OMO Level during an OMO that restricts under-deliveries, or from the Shipper delivering less than the Daily OMO Level during an OMO that restricts over-deliveries; and
- 3.8.6.3 Payment of all other charges incurred by the Company on the date of the OMO that result from the Shipper's failure to comply with the OMO, including a proportionate share of any pipeline penalties that are incurred by the Company.
- 3.8.6.4 In the event midpoint prices referenced in subparagraph (1) above, are not published in Platt Gas Daily for the day of the OMO non-compliance, the highest price paid by the Company on that day shall be used as the index price.
- 3.8.6.5 The Company shall update the applicable indices on 60 days' notice to Customer Proxies in the event of a change in applicable indices. Applicable indices are subject to change based upon changes in market circumstances.

(C) Indicates Change (D) Indicates Decrease

---

**Issued: August 16, 2019**

**M. A. Huwar  
President**

**Effective: October 25, 2019**

**Columbia Gas of Pennsylvania, Inc.**

---

**3.9 LIMITATIONS ON NOMINATIONS**

- 3.9.1 A Shipper shall not submit a daily gas supply nomination in excess of one hundred percent (100%) of the Customer's currently effective Maximum Daily Quantity except with the Company's prior permission. The Company may reject a nomination to the extent it exceeds one hundred percent (100%) of a Customer's currently effective Maximum Daily Quantity and confirm it at a level equal to the limit if the Shipper did not receive the Company's prior permission.

**3.10 LIMITATIONS UPON EXCESS DELIVERIES**

- 3.10.1 The Company reserves the right to limit its receipt of deliveries which are in excess of a Customer's consumption of gas for redelivery to a Customer on any given day ("Excess Deliveries") when such Excess Deliveries may cause the Company to incur penalties for exceeding its allowed daily or total Storage injection capacity of its supplying pipeline or other costs incurred to avoid or mitigate pipeline penalties. The level of the limitation shall be specified electronically by the Company to the Customer Proxy. The Company shall bill a proportionate share of the penalties and other costs that were incurred to avoid or mitigate pipeline penalties to all Customer Proxies whose Shipper fails to comply with the Company's limitation under this Paragraph.

**3.11 CONSUMPTION IN EXCESS OF DELIVERIES (UNDER-DELIVERIES)**

- 3.11.1 If, in any billing cycle, the Customer's consumption, plus retainage on the distribution system is greater than the sum of: (a) the quantity of gas delivered to the Company's City Gate by the Shipper for the Customer's account during the billing cycle; plus (b) if the Customer Proxy subscribes to EBS-Option 1, access to banked gas quantities as permitted under EBS-Option 1; plus (c) bank transfers performed for that cycle, then such use shall be considered imbalance gas sold by the Company to the Customer Proxy.
- 3.11.2 For Customer Proxies electing Rider EBS-Option 1 or Rider EBS-Option 2, the price for such imbalance gas shall be sold by the Company at the higher of:
- i. a price equal to 120% of the average of the Daily Index prices for each day of the applicable month as reported in the Platts Gas Daily publication, in the Daily price survey section under the heading "Appalachia" for "Columbia Gas, App." Midpoint, plus the 100% load factor TCO FTS costs (including demand, commodity and retainage); or
  - ii. the highest commodity cost of purchases by the Company during the calendar month, including the delivered cost of purchases at the city gate, if any, excluding any purchases under fixed price commodity contracts for which the price was determined more than thirty days before the beginning of the calendar month.

In addition, applicable taxes and Company transportation shall apply. Furthermore, if, in any month, Company incurs other charges, including gas costs, penalty charges or cash-outs caused by excess monthly under deliveries, the customer or NGS shall be charged its pro rata share of such charges.

During an SFO, the foregoing calculation shall be replaced by the table in the Seasonal Flow Order section in Paragraph 3 of the RADS.

- 3.11.3 The Customer Proxy also shall be subject to any applicable penalty under the Operational Flow Order or Operational Matching Order sections of Paragraph 3 of these RADS in the event that such purchases occur during the existence of an OFO or OMO condition.
- 3.11.4 The Customer Proxy has no right to make purchases pursuant to this provision, and all such sales are considered interruptible sales except to the extent that the Customer has contracted for Standby Service.
- 3.11.5 The purchase of imbalance gas pursuant to this Paragraph shall not relieve the Customer Proxy of any applicable penalty resulting from the use of those quantities.

(C) Indicates Change

- 3.12 DELIVERIES IN EXCESS OF CONSUMPTION (OVER-DELIVERIES) (C)**
- 3.12.1 If, in any billing cycle, the Customer's consumption, plus retainage on the distribution system is less than the sum of: (a) the quantity of gas delivered to the Company's City Gate by the Shipper for the Customer's account during the billing cycle, minus (b) if the Customer Proxy subscribes to Rider EBS-Option 1, increases in the Customer Proxy's positive bank as permitted under EBS-Option 1, plus (c) bank transfers performed for the billing cycle, then such deliveries shall be considered imbalance gas purchased by the Company from the Customer Proxy.
- 3.12.2 For Customer Proxies electing Rider EBS-Option 1 or Rider EBS-Option 2, the price of such imbalance gas shall be purchased by the Company at the lower of: (C)
- i. a price equal to 80% of the average of the Daily Index prices for each day of the applicable month as reported in the Platts Gas Daily publication, in the Daily price survey section under the heading "Appalachia" for "Columbia Gas, App." Midpoint; or
  - ii. the lowest commodity cost of purchases by the Company during the calendar month, including the delivered cost of purchases at the City Gate, if any, excluding any purchases under fixed price commodity contracts for which the prices was determined more than thirty (30) days before the beginning of the calendar month. (C)
- In addition, if, in any month the Company incurs other charges, including gas costs, penalty charges or cash-outs caused by excess monthly over deliveries, the Customer or NGS shall be charged its pro rata share of such charges. (C)
- During an SFO, the foregoing calculation shall be replaced by the table in the Seasonal Flow Order section in this Paragraph 3 of the RADS. (C)
- 3.12.3 The Customer Proxy also shall be subject to any applicable penalty under the Operational Flow Order and Operational Matching Order sections in this Paragraph 3 of the RADS in the event that such sale occurs during the existence of an OFO or OMO condition. (C)
- 3.12.4 The purchase of imbalance gas pursuant to this Paragraph shall not relieve the Customer Proxy of any applicable penalty resulting from the delivery of those quantities. (C)

(C) Indicates Change

**3.13 LIMITATION WHERE A CUSTOMER PROXY HAS A POSITIVE BANK**

3.13.1 The drawdown of a positive bank is not a firm Distribution service, except as provided in Rider EBS-Option 1. Customer Proxies electing Rider EBS-Option 1 shall have firm access to positive banks as specified in Rider EBS-Option 1. For Customer Proxies electing Rider EBS-Option 2, the existence of a positive intra-cycle bank shall not prevent limitation of service to a Customer Proxy pursuant to the Limitations on Distribution Service section in Paragraph 2 of these Rules Applicable to Distribution Service, and drawdowns of positive banks may be prohibited whenever, in the Company's sole judgment, such prohibition is necessary to ensure that sufficient gas supplies are available to meet the daily or seasonal requirements of firm sales service Customers, or the balancing requirements of Choice Service Customers. (C)

**3.14 FLOW ORDER MANAGEMENT SERVICE**

3.14.1 The Flow Order Management Service shall be available to Customers using more than 540,000 thm per year served under Rate LDS – Large Distribution Service and Rate MLDS – Main Line Distribution Service that are not otherwise in an aggregation group. The service will allow the GDS Customers using more than 540,000 thm per year located in the same Pipeline Scheduling Point either to group together themselves, or to nominate an NGS agent which shall group the customers together. Upon formation of such group, each member's compliance with a flow order shall be determined based upon the sum of the scheduled deliveries and the daily requirements of the group. (C)

3.14.2 During an SFO, OFO or OMO, if the group, as a whole, has scheduled adequate deliveries to comply with the SFO, OFO or OMO, then no penalties shall be assessed to any member of the group, regardless of whether that particular member complied with the SFO, OFO or OMO.

3.14.3 During an SFO, OFO or OMO, if the group, as a whole, has not scheduled adequate deliveries to comply with the SFO, OFO or OMO, then a penalty shall be calculated based upon the group's overall non-compliance with the SFO, OFO or OMO. The total penalty shall be divided by the number of members in the group, and that amount shall be billed to each member.

3.14.4 The Flow Order Management Service shall be made available for a fee of \$.00093 per thm. A signed agreement must be completed prior to August 15th of the year in which the Flow Order Management Service is to commence. Customers must subscribe to the Flow Order Management Service for an entire year, beginning in November.

**3.15 GENERAL DISTRIBUTION AGGREGATION SERVICE**

This service is for any NGS that has been elected to serve as an Aggregation Agent by a General Distribution Customer, to be primarily responsible for delivering natural gas to the Company's City Gate on behalf of the Customer. The Aggregation Agent will be responsible, on an aggregate basis, for scheduling and nominating gas, for banking and balancing, receiving notices on behalf of the Customer, and for all other activities associated with the provision of the Natural Gas Supply Services.

(C) Indicates Change

3.15.1 Conditions:

3.15.1.1 Any NGS electing Aggregation service must sign an Aggregation service agreement.

3.15.1.2 Aggregation Agents will be allowed to establish one or more Aggregation Nomination Groups. Customers in an Aggregation Nomination Group must be located within the same Company Local Market Area and the same Pipeline Scheduling Point. Aggregation Agents must provide written notice to the Company that a Customer has elected to be in an Aggregation Nomination Group. The written notice must include the name of the Customer and the Customer's account number. Aggregation Nomination Groups must be comprised solely of General Distribution Service Customers.

3.15.1.3 The Aggregation Agent shall use its best efforts to achieve a balance between its deliveries and its Aggregation Nomination Group's total usage both on a daily and monthly basis, for each Aggregation Nomination Group. The Company reserves the right: (1) to require an Aggregation Agent to balance deliveries and takes of gas; or (2) to require a reasonably uniform daily delivery rate of gas which, at month's end, will equal the Aggregation Nomination Group's requirements for each Aggregation Nomination Group.

3.15.1.4 Aggregation Nomination Groups may include Customers taking service under any GDS rate schedule. Each Aggregation Nomination Group must contain only Customers that have elected the same option under Rider EBS.

3.15.1.5 An Aggregation Agent shall supply its Aggregation Nomination Group's full service requirements for natural gas. The Aggregation Agent accepts supply co-management responsibility as defined hereinafter.

3.15.1.6 Supply Co-Management Defined. The Aggregation Agent agrees to deliver gas supplies into the Company's designated City Gate receipt points on a daily basis, in accordance with the aggregate usage requirements of all those Customers that comprise the Aggregation Agent's Aggregation Nomination Group.

3.15.1.7 For those General Distribution Service Customers which are members of an Aggregation Agent's Aggregation Nomination Group without daily measurement, the Aggregation Agent agrees to the Company's estimate of takes. (C)

3.15.1.8 The Aggregation Agent agrees to pay all charges assessed to the Aggregation Agent by the Company as provided in the OFO and OMO sections of the Rules Applicable to Distribution Service. (C)

3.15.1.9 The Aggregation Agent shall also be required to balance its gas deliveries into the Company's system with the estimated overall usage levels of each individual Aggregation Nomination Group, in accordance with the provisions of Rider EBS.

(C) Indicates Change

3.15.1.10 The Company will provide the actual usage data for each Customer in that Aggregation Agent's Aggregation Nomination Group. The actual usage data provided will be for the Customer's most recent billing period as Customers are billed by the Company for Rates SGS-DS, SDS, LDS and MLS.

3.15.1.11 The Aggregation Agent's distribution quantities shall be determined from the Company's "Monthly Summary Billing Report." The "Monthly Summary Billing Report" reflects Customer's actual billed distribution quantities as reported to the Aggregation Agent, as generated within the Company's revenue reporting system.

3.15.2 Aggregation Service Under Rider EBS

3.15.2.1 The Aggregation Agent will be allowed to aggregate all participating individual Customer's quantities and any applicable bank tolerances for the purposes of administering Rider EBS.

3.15.2.2 Should a Customer, either by itself or through its Aggregation Agent terminate its General Distribution Aggregation Service, or its General Distribution Service, no portion of the aggregate bank will be assigned to the Customer. Should all the Customers in an Aggregation Nomination Group, either by themselves or through their Aggregation Agent, terminate their General Distribution Aggregation Service or their General Distribution Service, and the Aggregation Agent has no other Aggregation Nomination Group to transfer the bank of gas, then the bank may be purchased by the Company at a price determined in accordance with the Deliveries in Excess of Consumption paragraph of these Rules Applicable to Distribution Service.

3.15.2.3 At the close of each business month, an accounting will be made comparing the total quantities delivered into the Aggregation Nomination Group versus the consumption of the Customers within the Aggregation Nomination Group. For Nomination Aggregation Groups comprised of customers electing Rider EBS-Option 1 or Rider EBS-Option 2, the accounting shall compare the Nomination Aggregation Group's total monthly deliveries to its total monthly consumption.

3.15.2.4 Should the total consumption of the Nomination Aggregation Group exceed its total deliveries, adjusted for unaccounted-for gas and appropriate Customer's Btu adjustments, plus for Nomination Aggregation Groups comprised of customers electing Rider EBS-Option 1, any bank of gas from the previous month, the Aggregation Agent shall be charged an amount for recovery of purchased gas costs as set forth in the Consumption in Excess of Deliveries paragraph of these Rules Applicable to Distribution Service plus the non-gas portion of commodity rates contained in the first block of Rate SGS - Small General Service.

(C) Indicates Change

3.15.2.5 Should the total deliveries for the Nomination Aggregation Group exceed its total consumption, the excess deliveries shall be considered imbalance gas purchased by the Company from the Aggregation Agent as specified in Paragraph 3.12 of these Rules Applicable to Distribution Service.

3.15.3 Customer Accountability

3.15.3.1 Customers in the Aggregation Nomination Group remain ultimately responsible for all imbalance purchases, banking/balancing charges and SFO, OFO or OMO charges, if the Aggregation Agent fails to pay such charges. Failure of an Aggregation Agent to pay charges will be grounds for immediately ending the Aggregation Agent's authority.

3.15.4 Assignment. The Aggregation Agent shall only assign its Aggregation Nomination Groups to another Aggregation Agent with the prior written consent of the Company. The Company shall not unreasonably withhold its consent; however, the Company may condition the assignment upon the fulfillment of reasonable requirements including but not limited to: requiring the assignee to take assignment of any gas bank balance existing at the time of the assignment; requiring the assignee to take assignment of any financial obligation existing at the time of the assignment, or requiring the Aggregation Agent to represent that the Customers in its Aggregation Nomination Group consent to the assignment. (C)

**3.16 NGS's DISCONTINUATION OF ITS PROVISION OF NATURAL GAS SUPPLY SERVICES TO ANY ONE CUSTOMER ON THE COMPANY'S SYSTEM**

3.16.1 In the event the NGS desires to discontinue providing Natural Gas Supply Services to any Customer on the Company's system, the NGS shall provide 30 days written notice to the Company. The written notice must include the NGS's name, the Customer's name and the Customer's account number.

**3.17 NGS's DISCONTINUATION OF ITS PROVISION OF NATURAL GAS SUPPLY SERVICES ON THE COMPANY'S SYSTEM**

3.17.1 In the event the NGS elects, or is forced, to discontinue its provision of Natural Gas Supply Services on the Company's system, it shall provide written notice to the Company at the earliest practical time that it intends to discontinue providing Natural Gas Supply Services. The NGS shall continue any obligation to maintain its financial security instrument until it has satisfied all of its outstanding claims of the Company. Upon the NGS's discontinuation of Natural Gas Supply Services, the Company may offset any and all amounts owed to it by the NGS against any and all amounts owed by the Company to the NGS, including without limitation, charges for imbalance gas sold by the Company, out of period adjustments to the NGS's account, amounts owed to the NGS for bank balances, amounts owed to the NGS for accounts receivable collected by the Company, and amounts owed to the Company for SFO, OFO, or OMO charges, etc.

#### **4. RULES APPLICABLE ONLY TO CHOICE SERVICE**

4.1 This Paragraph applies to all Choice Service on the Company's system.

##### **4.2 AVAILABILITY**

Choice Service is available to any Customer or group of Customers served under Rate RDS - Residential Distribution Service and Rate SCD - Small Commercial Distribution when: (C)

4.2.1 An NGS has one or more Choice Aggregation Nomination Group(s) with an aggregate annual demand of at least 53,650 thms or a minimum of 50 Customers, and which is in compliance with the Choice Aggregation Provisions of this Paragraph 4;

4.2.2 The Customer's NGS agrees to take capacity as set forth in the "Capacity Requirements" Paragraph of these Rules Applicable to Distribution Service;

4.2.3 The Company has sufficient Storage to provide daily banking and balancing activity, and if capacity is to be assigned, the Company has sufficient upstream capacity, with appropriate upstream interconnections to the Company's City Gate to provide the NGS's primary firm transportation contract quantities;

4.2.4 The existing capacity of the Company's facilities and other physical conditions are sufficient to deliver the quantities required by all of the NGS's Choice Aggregation Nomination Groups; and

4.2.5 The NGS has acquired, or has agreed to acquire, an adequate supply of natural gas, which must be firm supply for the months of November through March, and which must be of a quality acceptable to the Company, including allowances for any retention required by the applicable upstream transporters and for delivery service lost and unaccounted-for gas to be retained by the Company and other transporters, and has made, or has caused to be made, arrangements by which such gas supply can be transported directly to the Company's system in the Local Market Area in which the Customer is located, unless otherwise permitted by the Company in writing. The NGS is required to acquire the necessary firm supply to serve the Choice Daily Delivery Requirement for each of its Choice Aggregation Nomination Groups for the months of November through March.

4.2.6 An NGSs agrees to refer to the Commission's guidelines on Customer Information Disclosure, Docket No. M-00991249F0005, for requirements related to NGS disclosure of the terms of service, marketing, advertising and sales practices, and privacy of customer information.

(C) Indicates Change

#### **4.3 APPLICATION PROCESS**

- 4.3.1 In addition to the Initial NGS Application, all NGSs must enter into an agreement in the form prescribed by the Company prior to providing Natural Gas Supply Service to Choice Customers under these Rules Applicable to Distribution Service (“NGS Choice Distribution Aggregation Agreement”). The NGS Choice Distribution Aggregation Agreement shall specify: the name, address and telephone number of the NGS, the name, address, telephone and fax numbers to which all notices are to be delivered, an e-mail address (if available), the NGS’s Capacity Assignment election, the source of the gas, the delivery point to the Company, the NGS’s billing option selection, and the NGS’s Rate Statement Information. If any of the information on the NGS Choice Distribution Aggregation Agreement changes, the NGS shall submit an updated NGS Choice Distribution Aggregation Agreement specifying the changes. (C)
- 4.3.2 Within sixty (60) days of receipt of all necessary information requested by the Company to evaluate a NGS Choice Distribution Aggregation Agreement, the Company will respond to the NGS Choice Distribution Aggregation Agreement and either agree to supply service or to deny service. If the Company refuses to provide service under the Rules Applicable Only to Choice Distribution Service section of this these Rules Applicable to Distribution Service, the Company shall provide detailed support for its decision.
- 4.3.3 A Choice NGS may change their Annual Capacity Assignment election by submitting a new NGS Choice Distribution Aggregation Agreement by January 1. If the Company approves the revised Annual Capacity Assignment election, it will become effective April 1 of the year in which the revision was submitted. (C)

#### **4.4 CHARACTER OF SERVICE TO BE RENDERED**

- 4.4.1 The NGS shall be responsible for obtaining the entire gas supply for each of its Choice Aggregation Nomination Groups. The NGS shall obtain interstate pipeline firm capacity either from the Company or if permitted under these Rules Applicable to Distribution Service, from another source to ensure that the Customer receives Firm Service in accordance with the provisions of the tariff, and the NGS shall obtain adequate gas supplies to ensure that the Customer receives Firm Service in accordance with the provisions of the tariff. The Company shall remain responsible for distributing the gas pursuant to the Company’s obligations under its tariffs.
- 4.4.2 Service Obligations of the Supplier of Last Resort. The Supplier of Last Resort (“SOLR”) is the Company. The following services will be provided by the SOLR: Natural Gas Supply Service to those Customers who have not chosen an alternative NGS or who choose to be serviced by their SOLR; Natural Gas Supply Services to those Customers who are refused supply service from an NGS; or Natural Gas Supply Services to those Customers whose NGS has failed to deliver its requirements. PA. P.U.C. Docket No. L-00990144.

(C) Indicates Change

**4.5 CUSTOMER INFORMATION**

- 4.5.1 The NGS List. The Company will maintain a list of the licensed NGSs including appropriate contact information as provided by the NGS, which have also met the Company's requirements. This list will be made available to Customers upon request.
- 4.5.2 Requests for Information. The Company will respond to reasonable requests for efficiency information by providing materials or directing inquiries to the PUC. Customers served under Rate Schedules RSS, RDS, SCD or SGSS, upon request from the Customer, are entitled to receive free of charge once per year, Historical Billing Data and charges which are readily available in the billing system, provided the Company reads the Customer's meter for billing purposes. The Historical Billing Data will be provided in terms of thms. The Company shall notify consumers via bill message that information on energy efficiency and Historical Billing Data is available upon request. PA. P.U.C. Docket No. M-00991249F0005. (C)
- 4.5.3 Choice-Eligible Customer List (ECL). In accordance with the Commission's Final Order Issuing Interim Guidelines for Natural Gas Distribution Company ECLs at Docket No. M-2012-2324075, the Company will make available an electronic ECL of Choice-eligible customers to NGSs that have been licensed by the Commission and approved by the Company to provide Choice service on Columbia's system. The ECL will contain only the information of Choice-eligible customers who have not restricted the release of their private information as detailed in the Privacy of Customer Information paragraph. (C)
- 4.5.3.1 The ECL will include the following data elements:
- a. Customer Account Number
  - b. Customer Name
  - c. Service Address
  - d. Billing Address
  - e. Tariff Rate Class and Schedule
  - f. Rate Subclass/Rate Subcode
  - g. Meter Read Cycle
  - h. SOLR/Shopping Status (Y or N)
  - i. Monthly Consumption (each of 12 months)

(C) Indicates Change

**4.5 CUSTOMER INFORMATION - continued**

- 4.5.3.2 The ECL will be available at the following website: columbiasuppliers.com, and updated monthly. (C)
- 4.5.3.3 Every three years the Company will re-solicit all Choice-eligible customers regarding their option to restrict some or all of their information for the purpose of creating a new and refreshed ECL. Customers who previously restricted their information are required to reaffirm their election at this time.
- 4.5.4 Privacy of Customer Information. The Company may release private Customer information to third parties, such as NGSs participating in the Company's Choice program, only after informing each Customer via bill insert of its intent to release such information. The Company will notify customers of the option to limit or restrict their private information by: (C)
- 4.5.4.1 Bill Insert. At least once each year, the Company will include an insert in every customer bill. In addition, each new customer will receive the bill insert in their initial bill. (C)
- The bill insert notifies customers: 1) how the customer account and usage information will be used; 2) how to opt-out of the ECL; 3) what their opt-out choice means; and 4) that they may change preferences either by first class mail or via electronic or telephonic means. (C)
- 4.5.4.2 Triennial Letter. Every three years the Company will mail a letter to the mailing address of every Choice-eligible customer that provides customers with the information contained in the bill insert above, and notifies customers who have previously limited or restricted their information that they must renew that request in order to retain a restricted status of their account information. (C)
- 4.5.4.3 Customer Request to Restrict Information. Customers may restrict information according to one of the following two restriction options: 1) restrict the release of only the customer's historical usage data; or 2) restrict the release of all private customer information including name, billing address, service address, rate class, rate schedule, account number, meter reading cycle, shopping status, and historical usage. (C)
- Each customer may notify the Company of their desire to restrict the release of private information by one of the following options: 1) fill in the necessary information on the form included on the back of the bill insert or included with the triennial letter, and return the form with the regular monthly payment or separately mail to the Company; 2) send a letter to the Company; 3) call the Customer Satisfaction Center at 1-888-460-4332; 4) use the Company's webpage that explains the ECL and options; or 5) e-mail the request to cpacustserv@nisource.com. (C)
- Customers may request to restrict the release of information at any time and the Company shall then honor that request until the next triennial refresh, when the customer must reaffirm their election.

(C) Indicates Change

- 4.5.5 For Choice Customers enrolled with an NGS, the Company will provide NGSs with each Customer's actual usage data for each Customer's most recent billing period as Customers are billed by the Company.

#### **4.6 ENROLLMENT PROCEDURES**

- 4.6.1 Rolling Enrollment. NGSs shall be able to submit new Customers to Choice Service by 5:00 PM Eastern Standard Time each processing day throughout the year using the Choice EBB. When accurate customer information is submitted to the Choice EBB the customer account will reflect the change in gas supplier effective the day after the customer's next meter reading date or day the waiting period expires, whichever is later. Customers may cancel their request to change gas suppliers within five (5) calendar days after their account is submitted to the Choice EBB. (C)
- 4.6.2 Customer Contacting the Company. If a Customer orally contacts the Company to request a change of NGSs, the Company will notify the Customer that the selected NGS must be contacted directly in order to initiate the change. PA. P.U.C. Docket No. M-00991249F006. The Customer may contact the Company directly at any time and request to be placed on SOLR service. If the Customer contacts the Company requesting to be placed on SOLR service, the Company shall place the Customer on SOLR service by submitting that Customer through the Choice EBB, in the same manner that an NGS would submit a Customer.
- 4.6.3 Enrollment Procedure. The Customer must contact their NGS to initiate the request to initiate, terminate or change their NGS. Enrollment may be performed either telephonically, in writing or through the Internet. Customers may be enrolled in accordance with the following requirements:
- 4.6.3.1 Telephonic Enrollment. A Customer may enroll in the Choice Service using Telephonic Enrollment. The NGS agrees to tape record the "Enrollment Confirmation" (as defined in this sub-paragraph) of each Customer. The Enrollment Confirmation is defined as a recording that includes, at a minimum, the Customer stating: his/her name, his/her twelve (12) digit Company account number, his/her service address, his/her mailing address, his/her intent to be a customer of the NGS, and the date that the enrollment is being performed. The selected NGS will notify the Company that it was selected to serve the customer by the end of the next business day following the enrollment. After the Company is notified that the Customer desires to select a new NGS, the Company shall send written

(C) Indicates Change

notification to the Customer seeking verification of the Customer's intent to select a new NGS. The written notice shall be mailed by the end of the next business day following the receipt of the notification of a selection of an NGS. The written notification will explain the five day waiting period in which the selection of the NGS may be canceled before the change takes place and the date service with the new NGS will begin (unless canceled within the five-day waiting period). The five-day waiting period shall commence on the day the written notice is sent. The Customer shall have five (5) days from the date that the written notification is sent to inform the Company that the Customer does not desire to select a new NGS. Upon such notification, the Company shall ensure that the Customer remains with its current Natural Gas Provider. The NGS agrees to keep a copy of the tape recording of the Enrollment Confirmation for so long as that Customer remains a customer of the NGS. The NGS agrees to provide a copy of all tape recordings of all Enrollment Confirmation(s) with that Customer to the Company upon the request of the Company. Failure to supply a copy of the tape recordings of all Enrollment Confirmation(s), within five (5) days of the Company's request, shall cause the Customer to be returned to its previous Natural Gas Provider, and a \$50.00 fee shall be paid by the NGS to partially offset the Company's cost of the investigation. (C)

4.6.3.2 Written Enrollment. A Customer may enroll in the Choice Service using Written Enrollment. The NGS agrees to maintain written confirmation of the Enrollment Confirmation (as defined in this Paragraph) of each Customer for so long as that person remains a Customer of the NGS. Valid Written Enrollment requires a document signed by the Customer which document's sole purpose is to obtain the Customer's consent to change NGSs. Documents not considered as valid include, but are not limited to, canceled checks, signed entries for contests and documents used to claim prizes won in contests. The written confirmation of the Enrollment Confirmation shall be defined to include, at a minimum, the Customer's name, his/her twelve (12) digit account number, his/her service address, his/her mailing address, his/her signature, an indication of the Customer's intent to enroll in the Choice Service, and the date that the enrollment is being performed. The selected NGS will notify the Company that it was selected to serve the customer by the end of the next business day following the enrollment. After the Company is notified that the Customer desires to select a new NGS, the Company shall send written notification to the Customer seeking verification of the (C)

(C) Indicates Change

Customer's intent to select a new NGS. The written notice shall be mailed by the end of the next business day following the receipt of the notification of a selection of an NGS. The written notification will explain the five day waiting period in which the selection of the NGS may be canceled before the change takes place and the date service with the new NGS will begin (unless canceled within the five-day waiting period). The five-day waiting period shall commence on the day the written notice is sent. The Customer shall have five (5) days from the date that the written notification is sent to inform the Company that the Customer does not desire to select a new NGS. Upon such notification, the Company shall ensure that the Customer remains with its current Natural Gas Provider. PA. P.U.C. Docket No. M-00991249F006The NGS agrees to provide a copy of all written confirmations of all Enrollment Confirmation(s) with that Customer to the Company upon request of the Company. Failure to supply a copy of the written Enrollment Confirmation(s) within five (5) days of the Company's request shall cause the Customer to return to its previous Natural Gas Provider, and a \$50.00 fee shall be paid by the NGS to partially offset the Company's cost of the investigation.

(C)  
(C)  
(C)

4.6.3.3 Internet Enrollment. A Customer may enroll in the Choice Service using Internet Enrollment. If an NGS desires to provide for Internet Enrollment, the NGS agrees to maintain a webpage to provide for Internet Enrollment, which webpage clearly identifies the legal name of the NGS, its address, and telephone number. The NGS agrees to maintain a printed or electronic copy of information appearing on the webpage and received through the webpage at the time when the Customer requested to take service from the NGS ("Enrollment Confirmation"). The Enrollment Confirmation is defined to include, at a minimum, the NGS's legal name, a copy of the agreement between the NGS and the Customer as it appeared at the time the Customer requested service from NGS, the Customer's name, his/her twelve (12) digit Company account number, his/her service address, his/her mailing address, an indication of the Customer's intent to be a customer of that particular NGS, and the date that the enrollment is being performed. The selected NGS will notify the Company that it was selected to serve the customer by the end of the next business day following the enrollment. After the Company is notified that the Customer desires to select a new NGS, the Company shall send written notification to the Customer seeking

(C) Indicates Change

verification of the Customer's intent to select a new NGS. The written notice shall be mailed by the end of the next business day following the receipt of the notification of a selection of an NGS. The written notification will explain the five day waiting period in which the selection of the NGS may be canceled before the change takes place and the date service with the new NGS will begin (unless canceled within the five-day waiting period). The five-day waiting period shall commence on the day the written notice is sent. The Customer shall have five (5) days from the date that the notice is sent to inform the Company that the Customer does not desire to select a new NGS. Upon such notification, the Company shall ensure that the Customer remains with its current Natural Gas provider. The NGS agrees to keep a printed or electronic copy of the Enrollment Confirmation for so long as that person remains a customer of the NGS. The NGS agrees to provide a copy of all Enrollment Confirmation(s) to the Company upon request of the Company. Failure to supply a copy of all Enrollment Confirmation(s) within five (5) days of the Company's request shall cause the Customer to be returned to its previous Natural Gas Provider, and a \$50.00 fee shall be paid by the NGS to partially offset the Company's cost of the investigation.

- 4.6.4 Waiting Period Restrictions. If, within the five (5) day waiting period, any Customer informs the Company that the Customer does not desire to select a new NGS, the NGS shall not resubmit that Customer through the Choice EBB unless the NGS obtains a new Enrollment Confirmation from that Customer.
- 4.6.5 NGS Customer Submission Procedure. After the Customer selects an NGS, the NGS shall submit the Customer's account number, Choice Aggregation Nomination Group and NGS rate code to the Company through the Choice EBB. Customer submissions will be processed each processing day throughout the month. As of the fifteenth day of each month, or the prior business day if the fifteenth falls on a non-business day, the Company will determine the Daily Delivery Requirement and capacity assignment levels for the upcoming calendar month based on Choice enrollment data submitted by that date. (C)
- 4.6.6 The Company shall process the request to initiate, terminate or change a Customer's NGS one time per billing cycle in accordance with this Rule and the Commission's Order on Establishing Standards for Changing Natural Gas Suppliers at Docket M-00991249F0006. (C)

(C) Indicates Change

- 4.6.7 Customer Requests to Discontinue Distribution Service. If the Customer orally contacts the Company to request a disconnection of service, the Company will verify whether the Customer wants to discontinue Distribution Service at the present service address, or whether the Customer wants to discontinue receiving Natural Gas Supply services from their current NGS. If the Customer wants to discontinue Distribution Service, the Company shall proceed pursuant to Rule 19 of its tariff, and the Company will notify the Customer's NGS that the Customer has ceased taking Distribution Service, and the Company will inform the Customer that the Company is notifying the NGS. If the Customer informs the Company that the Customer wants only to discontinue taking Natural Gas Supply Services from that NGS, the Company will inform the Customer that it is to contact its NGS.

#### **4.7 CHOICE AGGREGATION SERVICE**

- 4.7.1 Aggregation Service is a service provided by the Company that allows Aggregation Agents to deliver to the Company on an aggregated basis those natural gas supplies that are needed to satisfy the requirements of the customers on Distribution Service and in accordance to the rules that the Company has established regarding Choice Service.

- 4.7.2 All Choice Customers must belong to a Choice Aggregation Nomination Group. The Customer's NGS shall serve as the Aggregation Agent. The Aggregation Agent will be responsible, on an aggregate basis, for scheduling and nominating gas quantities specified by the Company. (C)

- 4.7.3 Conditions:

4.7.3.1 Aggregation Agents will be allowed to establish one or more Choice Aggregation Nomination Groups. Customers in a Choice Aggregation Nomination Group must be located within the Company's system and the same Pipeline Scheduling Point. Aggregation Agents must provide written notice to the Company that they want a Customer to be in a Choice Aggregation Nomination Group, which shall be performed through a submission on the Choice EBB. Choice Aggregation Nomination Groups must be comprised solely of Choice Customers.

4.7.3.2 NGS shall supply its Choice Aggregation Nomination Groups' Choice Daily Delivery Requirement for natural gas on both a daily and monthly basis. NGS accepts supply co-management responsibility as defined hereinafter.

4.7.3.3 Supply Co-Management Defined. NGS agrees to deliver gas supplies into the Company's designated City Gate receipt points on a daily basis, in an amount equal to the Choice Daily Delivery Requirement of each of the NGS's Choice Aggregation Nomination Group. NGS agrees to the Company's estimate of takes and NGS agrees to pay all charges assessed by the Company as provided in Paragraph 4.11.

(C) Indicates Change

4.7.4 Aggregation Imbalances

4.7.4.1 There shall be an annual reconciliation and cash-out of the difference between the actual consumption of each Choice Aggregation Nomination Group and the NGS's deliveries on behalf of each Choice Aggregation Nomination Group. The reconciliation and cash-out amount shall be calculated annually following each July billing cycle.

4.7.4.2 If the actual consumption of the Choice Aggregation Nomination Group is more than the NGS's deliveries on behalf of that group, the NGS must purchase the deficient quantity from the Company at the average price during the reconciliation period as reported in Platt's Inside FERC's Gas Market Report as published for the first of each month under the column heading "Index" for "Columbia Gas, App", adjusted for Columbia Gas Transmission, LLC's FTS retainage and commodity charge.

4.7.4.3 Likewise, if the actual consumption of the Choice Aggregation Nomination Group is less than the NGS's deliveries on behalf of that group, the Company shall purchase the excess quantity from the NGS at the average price during the reconciliation period as reported in Platt's Inside FERC's Gas Market Report as published for the first of each month under the column heading "Index" for "Columbia Gas, App", adjusted for Columbia Gas Transmission, LLC's FTS retainage and commodity charge.

4.7.4.4 In the event that an NGS's Choice Aggregation Nomination Group decreases by 10% or 1,000 Customers, the Company may elect to Cash Out that NGS at such time. If the actual consumption of the Choice Aggregation Nomination Group is more than the NGS's deliveries on behalf of the Company as specified in paragraph 4.7.4.2 above. If the actual consumption of the Choice Aggregation Nomination Group is less than the NGS's deliveries on behalf of that group, the Company shall purchase the excess quantity from the NGs as specified in paragraph 4.7.4.3 above.

(C)

4.7.5 Assignment. The NGS shall only assign the Choice Customer Group to another NGS with the prior written consent of the Company. The Company shall not unreasonably withhold its consent; however, the Company may condition the assignment upon the fulfillment of reasonable requirements including but not limited to: a demonstration that the agreement between the NGS and the Customer allows an assignment or that the customer had otherwise consented to the assignment; requiring the assignee to take assignment of any gas bank balance existing at the time of the assignment; or requiring the assignee to take assignment of any financial obligation existing at the time of the assignment.

(C) Indicates Change

**4.8 CAPACITY REQUIREMENTS**

- 4.8.1 Firm Capacity Requirement. The NGS shall utilize Primary FTS in its provision of services to the Customers. Each NGS shall hold capacity in an amount equal to or greater than the Choice Primary FTS Daily Capacity Requirement for each Choice Aggregation Nomination Group.
- 4.8.2 Primary FTS Capacity Assignment. The NGS must accept the assignment or release of Primary FTS capacity from the Company except as provided in the capacity assignment section below.
- 4.8.3 Capacity Assignment. The NGS must accept the assignment or release on a recallable basis at maximum rates of the Company's Primary FTS capacity in a quantity equal to the Choice Primary FTS Daily Capacity Requirement for each Choice Aggregation Nomination Group unless the Company has Additional Capacity Resource Requirements (ACRR) as described below.

The Company reserves the right to adjust capacity assignments on an as-needed basis as Customers are removed from the Choice Service; however, all capacity shall be assigned or released for one year periods. The Company shall provide written notification to the NGS in advance of such capacity adjustment.

For PSP 25, 26, 35, 38, 39 and 40, the NGS agrees, if required by the Company, to make daily deliveries through the assigned capacity without regard to the loss of Customers. The NGS must accept the assignment or release of either: Columbia Gas Transmission, LLC capacity and Columbia Gulf Transmission, LLC capacity or Columbia Gas Transmission, LLC capacity only. (C)

For PSP 36, the NGS agrees, if required by the Company, to make daily deliveries through the assigned capacity without regard to the loss of customers. The NGS must accept the assignment or release of either: 1) Dominion Energy Transmission, Inc. capacity, Columbia Gas Transmission, LLC capacity and Columbia Gulf Transmission, LLC capacity; or 2) Dominion Energy Transmission, Inc. capacity and Columbia Gas Transmission, LLC capacity. The amount of capacity assigned on each interstate pipeline will be based on the total Choice customer participation percentage in PSP 36 and is subject to change annually. (C)

The assignment or release of Columbia Gas Transmission, LLC FTS capacity and Dominion Energy Transmission, Inc. FT capacity shall be equal to the Choice Primary FTS Daily Capacity Requirement. (C)

The Columbia Gulf Transmission, LLC Rate Schedule FTS-1 capacity to be assigned or released shall be based upon the assigned Rate FTS capacity increased for applicable pipeline fuel. The Company shall release this capacity, on a recallable basis, utilizing the appropriate pipeline company electronic bulletin boards and the NGS shall execute the service agreements so generated by the pipelines prior to the end of the month to enable the NGS to nominate gas supplies under the service agreements for the following month.

Should the Choice Aggregation Nomination Group's quantity increase in subsequent months resulting in the need for additional capacity to be assigned to the NGS, the Company shall utilize the process described above to assign the additional quantities to the NGS with each assignment being for a one-year period.

(C) Indicates Change

4.8.3.1 Other Primary FTS Option. The NGS may have the option to provide some or all Primary FTS capacity from some other source for a period of one year. This capacity option shall be made available to an NGS to the extent that the cumulative Other Primary FTS Daily Capacity Requirements (Other Primary FTS) of all NGSs requesting this option does not exceed the Additional Capacity Resource Requirement (ACRR).

An NGS providing Other Primary FTS is required to obtain and maintain capacity resources sufficient to deliver natural gas equal to its Choice Primary FTS Daily Capacity Requirements each day during the effective period of its capacity option election.

The cumulative Other Primary FTS of NGSs may not exceed the ACRR the Company may require in any year.

The ACRR for any year shall be the additional capacity, if any, which is required to meet design day requirements in excess of the Company's available design day capacity, as set forth in its annual 1307(f) filing, for the immediately following November through October period.

Effective November 2004, the NGSs currently providing Other Primary FTS capacity will be permitted to continue to provide the capacity for the November 2004 through October 2005 contract year, to the extent the Company concludes it needs additional capacity. To establish eligibility under this capacity option beginning in October 2005 and each year thereafter, an NGS must make a timely annual service election. No later than April 1 of each year, the Company will notify all NGSs of the ACRR. Thereafter, an NGS interested in providing firm capacity must notify the Company by June 1, in writing, of its desire to provide capacity, but not to exceed the Choice Primary FTS Daily Capacity Requirement for the NGS Choice Aggregation Nomination Group. Within 45 business days of receiving the timely submitted annual election, the Company will inform the NGS of its eligibility status and the amount of Other Primary FTS to be provided by the NGS. Elections will be accepted on a first come first serve basis, up to the ACRR. Eligibility will be based on the status of the NGS' aggregation agreement and its compliance thereto. An annual election of providing Other Primary FTS shall remain effective for the following one-year period November 1 through October 31.

This capacity option constitutes a limited exception to the otherwise applicable rules under this tariff. An NGS providing capacity under this option shall not be required to take assignment or release of the Company's Primary FTS as otherwise required.

**PAGE 164 INTENTIONALLY LEFT BLANK**

**FOR FUTURE USE**

- 4.8.4 Should the Company decide to terminate its capacity on Dominion Energy Transmission, Inc. or Columbia Gas Transmission, LLC or Columbia Gulf Transmission, LLC, any capacity assignment will terminate no later than the end of the term of the Company's service agreement with the pipeline. It shall be the responsibility of the NGS to acquire primary firm transportation capacity subsequent to such termination. (C)
- 4.8.5 The NGS will at all times be responsible for operating the assigned capacity consistent with the terms and conditions set forth in the tariffs of the Company and the applicable pipeline companies.
- 4.8.6 **Insufficient Capacity.** The Company may require that the NGS verify that the Other Primary FTS contract rights exist. The NGS shall comply with the Company's request for verification. The failure or inability of the Company to verify the existence of such contract rights shall not relieve the NGS from any liability for failing to deliver gas, or subject the Company to any liability resulting from the NGS's failure to deliver. The Company may require the NGS to demonstrate in writing, and the NGS shall have the obligation to demonstrate in writing that: (a) The NGS has under contract sufficient firm capacity; AND (b) the NGS utilized such capacity to schedule sufficient supplies at the delivery points specified in the NGS Choice Distribution Aggregation Agreement to meet the needs of Customers served under these Rules Applicable to Distribution Service, and the pipeline confirmed such schedule to said delivery points. Failure to demonstrate that sufficient Other Primary FTS capacity was held shall subject the NGS to bear its respective share of any and all costs incurred by the Company as a result of the NGS's failure. Should an NGS fail to demonstrate that it held adequate capacity on a day when an OFO was in effect, the NGS shall be subject to the penalty provision described in Paragraph 4.11 of these Rules Applicable to Distribution Service, and the fees set forth in Paragraph 4.12. On any and all days in which the NGS's delivery of gas does not match the total requirements of all of the NGS's Choice Aggregation Nomination Groups, the NGS shall pay the Company the fees set forth in Paragraph 4.12 of these Rules Applicable to Distribution Service.

(C) Indicates Change

- 4.8.7 In recognition that the capacity provided by an NGS pursuant to the Other Primary FTS option may be needed by the Company to serve Customers in the event that the NGS discontinues providing Natural Gas Supply Services on the Company's system, and subject to the Company's obligations concerning its Acquisition Process for New and Renewed Capacity under the Joint Petition for Settlement of Restructuring Filing in Docket No. R-00994781, any Other Primary FTS capacity must be assignable to the Company or another NGS and available for the Company's use or assignment to another NGS. The capacity must also have terms and conditions that permit the contract term to be extended under the interstate pipeline's tariff and under FERC rules and regulations. At the request of the party assigning new, replacement and/or alternate capacity to the Company hereunder, the Company shall use its best efforts to obtain operationally and economically equivalent capacity to that assigned to it. Upon the Company's obtaining such equivalent capacity and the Commission's approval, the Company shall reassign the capacity back to the requesting party. Any capacity so returned or assigned to the Company and/or any replacement capacity provided by the Company shall qualify for assignment and/or full cost recovery by the Company under the Act. Licensed NGSs taking assignment or providing new or replacement capacity will be able to use supplies delivered through this capacity to satisfy the needs of all their Customers, subject to the operational requirements and limitations of the Company's system.

#### **4.9 GAS SUPPLY REQUIREMENTS**

- 4.9.1 Delivery Obligations. Every day the NGS shall deliver the Choice Daily Delivery Requirement for each of the NGS's Choice Aggregation Nomination Groups, unless directed otherwise by the Company through an Operational Flow Order.
- 4.9.2 Firm Contracts. The NGS agrees that it shall enter into firm supply contracts for the months of November through March for a daily gas supply quantity equal to the sum of the Choice Daily Delivery Requirement of all of its Choice Aggregation Nomination Groups plus any applicable pipeline fuel retention requirements.
- 4.9.3 Calculation of Choice Daily Delivery Requirement. The Company shall calculate the Choice Daily Delivery Requirement for each Choice Aggregation Nomination Group between the 15<sup>th</sup> and the 20<sup>th</sup> of each month and provide the NGS with its Choice Daily Delivery Requirements for each Choice Aggregation Nomination Group. The Choice Daily Delivery Requirement shall be calculated by the Company as follows: the Company shall add the estimated normalized annual consumptions of all Customers presently in the NGS's Choice Aggregation Nomination Group to arrive at an aggregate sum for the Choice Aggregation Nomination Group; the Company shall divide that aggregate sum by 365; and adjust it for Company use and Retainage. The resultant quantity shall be the Choice Daily Delivery Requirement for that Choice Aggregation Nomination Group. (C)

Canceling Sixth Revised Page No. 239**

**Columbia Gas of Pennsylvania, Inc.**

---

- 4.9.4 Commencement of Natural Gas Supply Service. For Customers which were submitted to the Choice EBB by the 15<sup>th</sup> of the current month, the NGS is obligated to begin flowing gas in the amount of its Choice Daily Delivery Requirement on the first day of the following month. For Customers which were submitted to the Choice EBB after the 15<sup>th</sup> of the current month, the NGS is obligation to begin flowing gas on the first day of the second following month. During the interim period, the Customer shall be served by his existing Natural Gas Provider.
- 4.9.5 Delivery Requirements. NGSs must make firm deliveries to the Company on any and all days which shall meet the Choice Daily Delivery Requirements of each of the NGS's Choice Aggregation Nomination Groups. In PSP 36, the firm daily deliveries to the Company shall be made on both Columbia Gas Transmission, LLC and Dominion Energy Transmission, Inc. as specified in the Choice Daily Delivery Requirement. The NGS must deliver the Choice Daily Delivery Requirement, which must be firm supply for the months of November through March, and which must be of a quality acceptable to the Company, and the NGS must have made, or cause to be made, arrangements by which such gas supply can be transported directly to the Company's system in the Local Market Area in which the Customer is located on a firm basis, unless otherwise permitted by the Company in writing. (C)

In order to facilitate compliance with upstream pipeline restrictions, and to maintain operational integrity, it may be necessary from time to time for the Company to require Choice Natural Gas Suppliers to schedule natural gas supplies to the Company from multiple transmission pipeline delivery points or to such other delivery points as designated by the Company.

Effective: July 1, 2018

**PAGE 240 INTENTIONALLY LEFT BLANK  
FOR FUTURE USE**

(C) Indicates Change

- 4.9.6 Insufficient Supplies. In the event that the NGS fails to deliver its Choice Daily Delivery Requirement to the Company, the Company shall have the right to require the NGS to demonstrate, and the NGS shall have the obligation to demonstrate that the NGS scheduled sufficient supplies at the delivery points specified in the NGS Choice Distribution Aggregation Agreement to meet its Choice Daily Delivery Requirements for each of its Choice Aggregation Nomination Groups, and that the pipeline confirmed such schedule to said delivery points. Failure to demonstrate that the Choice Daily Delivery Requirement was made to any market or interstate pipeline interconnection shall subject the NGS to bear its respective share of any and all costs incurred by the Company as a result of the NGS's failure. Should an NGS fail to demonstrate that it delivered its Choice Daily Delivery Requirement for each of its Choice Aggregation Nomination Groups on a day when an OFO was in effect, the NGS shall be subject to the penalty provision described in these Rules Applicable to Distribution Service Paragraph 4.11, and the fees set forth in Paragraph 4.12. On any and all days in which the NGS's delivery of gas does not match the Choice Daily Delivery Requirement of each of the NGS's Choice Aggregation Nomination Group, the NGS shall pay the Company the fees set forth in Paragraph 4.12 herein.
- 4.9.7 Adjustment to Choice Daily Delivery Requirements. The Company, at its discretion, may compare actual and weather normalized consumption immediately following the winter period. The Company may require any NGS to adjust the NGS's Choice Daily Delivery Requirements during the months of May, and June for the difference between the Choice Aggregation Nomination Group's actual consumption and weather normalized consumption.

#### **4.10 OPERATIONAL REQUIREMENTS**

- 4.10.1 In order to provide those customers who are located in Local Market Areas served by an interstate pipeline other than Columbia Gas Transmission, LLC a fair opportunity to obtain choice of an NGS, the Company may implement one of the following procedures: (C)
- 4.10.1.1 The Company may require all NGSs under this Schedule to accept assignment of capacity on interstate pipelines other than Columbia Gas Transmission, LLC in an amount which is proportional to the number of customers served by the NGS divided by all customers eligible for Choice Service. (C)

(C) Indicates Change

- 4.10.1.2 The Company may retain, renew or replace the interstate pipeline capacity on the interstate pipeline other than Columbia Gas Transmission, LLC and require NGSs under this Schedule, if authorized by FERC rules or orders, to deliver a portion of supplies required by this Schedule into such capacity with such proportion determined as in Paragraph 4.10.1.1, or (C)
- 4.10.1.3 The Company may make a payment to one or more NGSs to accept assignment of such capacity and use such capacity to meet the requirements of customers. Such payment shall be recoverable by the Company from customers. To the extent that such payment does not increase sales rates over levels which would be charged if the Company retained such capacity, it shall be recovered under the Purchased Gas Cost Rider from sales customers and customers subject to this Schedule. Any excess over such amount shall be recoverable under Rider CC. (C)
- 4.10.2 The “Calculation of Demand Cost for Customers Electing Choice Service” provisions of the Purchased Gas Cost Rider shall be deemed modified to the extent necessary consistent with the Company’s implementation of one of the foregoing procedures.
- 4.10.3 In the event an OFO limits deliveries to the Company via FTS capacity below the level of any capacity assigned, the unused FTS capacity may be reassigned by the assignee for the duration of the OFO event. The NGS shall be required, prior to the end of the year for which the capacity was assigned, to deliver additional quantities via ITS equal to the quantities not delivered via FTS capacity during the OFO event.

#### **4.11 OPERATIONAL FLOW ORDERS (OFOs)**

- 4.11.1 All Choice NGSs are subject to the Company's issuance of OFOs. The Company will have the authority to direct NGSs to adjust daily scheduled quantities to a specified level. Generally, during peak design day conditions, this specified level will be equal to the Choice Daily Delivery Requirement. Should conditions be greater or less than peak design day conditions, the specified level of the OFO may be greater or less than the Choice Daily Delivery Requirement.
- 4.11.2 When a difference between the daily OFO quantity and actual daily scheduled deliveries to the Company exist, the following charges will be assessed:
- (1) The therm difference will be multiplied by a rate equal to three times the highest of the midpoint prices reflected in Platts Gas Daily for the day of the OFO non-compliance and based on pipeline scheduling point applicable indices as specified in the Platts “Gas Daily”, Daily Price Survey – Designation by Pipeline Scheduling Point paragraph of Rule 2. Rules Applicable to All Distribution Service in the Rules Applicable to Distribution Service of this tariff; and, (C)
  - (2) The payment of all other charges incurred by the Company on the date of the OFO that results from the NGS's failure to comply with the OFO including a proportionate share of any pipeline penalties that are incurred by the Company.
  - (3) In the event midpoint prices referenced in subparagraph (1) above, are not published in Platts Gas Daily for the day of the OFO non-compliance, the highest price paid by the Company on that day shall be used as the index price. (C)

(C) Indicates Change

**4.12 RATES**

4.12.1 Customers served under Rate Schedules RDS and SCD will be billed all applicable charges under the rate schedule. The Customer, or Customer's NGS, shall pay directly to the interstate pipelines the charges for any assigned pipeline capacity.

4.12.2 For NGSs providing service under these Rules Applicable to Distribution Service, the following fees shall be assessed to the NGS:

NGS One-time Application Fee: \$390.00

4.12.3 In addition the following billing fees will apply:

Billed Account Adjustments: \$ 1,000.00 processing fee per adjustment plus;  
\$ 1.00 per adjusted account

4.12.4 Delivered Quantities. All quantities billed to Customers under these Rules Applicable to Distribution Service shall be considered actual quantities delivered, whether the meter reading is an actual or a calculated reading.

4.12.5 Failure to deliver the Choice Daily Delivery Requirement for any Choice Aggregation Nomination Group shall subject the NGS to a charge on the difference between the Choice Daily Delivery Requirement and the actual daily deliveries. The charge will be equal to the therm difference multiplied by a rate per therm that is three times the highest of the midpoint prices reflected in Platts Gas Daily for each day the NGS did not meet its Choice Daily Delivery Requirement and based on pipeline scheduling point applicable indices as specified in the Platts "Gas Daily", Daily Price Survey – Designation by Pipeline Scheduling Point paragraph of Rule 2. Rules Applicable to All Distribution Service in the Rules Applicable to Distribution Service of this tariff. (C)

In the event midpoint prices referenced in the above paragraph are not published in Platts Gas Daily for the day when the Choice Daily Delivery Requirement has not been met, the highest price paid by the Company on that day shall be used as the index price. (C)

In addition the NGS will be responsible for the payment of all other charges or costs incurred by the Company that result from the NGS's failure to deliver as required, including a proportionate share of any pipeline penalties incurred by the Company.

The NGS will also be required to deliver the remaining portion of its Choice Aggregation Nomination Group's estimated normalized usage via ITS in the summer months defined as April through October, unless the Company authorizes a lower or higher level of deliveries via ITS. (C)

(C) Indicates Change

- 4.13 COMPANY BILLING OF NGS NATURAL GAS SUPPLY SERVICES (C)**
- 4.13.1 Commodity Billing Services. The NGS may choose to bill the Customer directly for the Natural Gas Supply Services (Billing Option 1 below), or the NGS may choose to have the Company bill the Customer for Natural Gas Supply Services in which case the NGS shall sell its receivables to the Company (Billing Option 2 below). (C)
- 4.13.2 Adjustment of Accounts. If the NGS discontinues participation under this Schedule for any reason, the Company reserves the right to adjust the NGS's accounts to correct any prior errors for a period of twelve (12) months after the NGS discontinues participation. If the Customer discontinues participation under this Schedule for any reason, or if the Customer discontinues the NGS's service, the Company reserves the right to adjust the NGS's accounts to correct any prior errors for a period of twelve (12) months after the Customer has discontinued service.
- 4.13.3 Billing Option Selection. The NGS shall specify its initial Billing Option Selection as part of the NGS Choice Distribution Aggregation Agreement process. Effective eighteen (18) months after the Public Utility Commission issues a final order in Docket No P-2009-2099333, an NGS may choose Billing Option 1 or Billing Option 2 for all or a portion of its customers eligible for Rate SCD. Thereafter, if the NGS desires to change its Billing Option Selection, it may do so one time each calendar year by resubmitting a copy of the NGS Choice Distribution Aggregation Agreement with the desired Billing Option Selection specified. In the NGS Choice Distribution Aggregation Agreement, the NGS must select one of the following options: (C)
- 4.13.3.1 Billing Option 1: NGS Billing Service. The NGS shall bill the Customers for the Natural Gas Supply Services. The Company will not purchase the NGS receivables of any customer for which the NGS has chosen Billing Option 1. The NGS assumes full responsibility for nonpayment of the NGS's Natural Gas Supply Services charges under Billing Option 1. The NGS shall not bill the Customer for any services provided by the Company under its tariffs and the NGS agrees not to request its Customers to list the NGS's address as the address for Distribution billings. The Company shall provide the NGS with meter reading information and other reports in the Company's standard printed or electronic format on a monthly basis corresponding to the Company's Billing Cycle. The Company shall provide the NGS with said meter reading information no later than ten (10) days after the last day of each Billing Cycle. NGSs who are providing billing services shall comply with the billing and payment provisions set forth in 52 Pa. Code §§ 56.11-56.12, except § 56.15(12) and (13), and § 56.16(b)-(d). This obligation includes the obligation to offer residential customers equal monthly payment arrangements or "budget billing," as set forth in 52 Pa. Code § 56.12(7). NGSs shall abide by the credit determination and cash deposit standards set forth in 52 Pa. Code §§ 56.31-56.38, not including the obligation to serve as supplier of last resort. (C)

(C) Indicates Change

**4.13 COMPANY BILLING OF NGS NATURAL GAS SUPPLY SERVICES – continued**

4.13.3.2 Billing Option 2: Company Billing Service. The NGS elects to have the Company bill the Customers for the NGS's Natural Gas Supply Services charges. The NGS understands that the Company shall provide billing services pursuant to the requirements of its tariffs. The Company shall purchase the accounts receivable of any NGS that elects this billing option pursuant to the Voluntary Purchase of Receivables Program paragraph in these Rules Applicable to Distribution Service.

4.13.3.2.1 The Company shall provide the NGS with meter reading information and other reports in the Company's standard printed or electronic format on a monthly basis corresponding to the Company's Billing Cycle. The NGS shall provide the Company with all required billing determinants as indicated on the Company's "NGS Rate Statement" and other information that may be necessary for Customer billing as determined by the Company. The NGS shall provide said billing determinants in the standard printed or electronic format specified by the Company. The NGS shall provide the Company with said billing determinants no later than the 20<sup>th</sup> of the month prior to the effective Billing Cycle, by supplying a new NGS Rate Statement. If the 20<sup>th</sup> of the month falls on a weekend or holiday, the billing determinates shall be due on the last business day prior to the 20<sup>th</sup> of the month.

(C)

(C) Indicates Change

**4.13 COMPANY BILLING OF NGS NATURAL GAS SUPPLY SERVICES - continued**

- 4.13.3.2.2 The Customer will receive a consolidated bill from the Company which contains the NGS Natural Gas Supply Services charges in a format that complies with the Commission's Customer Information and Disclosure Guidelines. (C)
- 4.13.3.2.3 Late payment charges shall be applied to all charges when the Customer has selected an NGS who has chosen Billing Option 2. The late payment charges for the NGS's Natural Gas Supply Services charges are part of the Terms of Service between the NGS and the Customer. (C)
- 4.13.3.2.4 In the event the NGS or the Company declares bankruptcy, the non-bankrupt party may elect to terminate its agreement for Billing Option 2. Such election shall be in writing and shall become effective with the billing cycle beginning ninety (90) days after written notification is received by the Company or the NGS. If the NGS elects to terminate its agreement specifying Billing Option 2, the NGS may not return to Billing Option 2 for one (1) year following the effective date of such election. If the Company elects to terminate its agreement to provide Billing Option 2 for a bankrupt NGS, the NGS may not return to Billing Option 2 until it emerges from bankruptcy. (C)

**4.13 COMPANY BILLING OF NGS NATURAL GAS SUPPLY SERVICES - continued**

4.13.4 Voluntary Purchase of Receivables Program

- 4.13.4.1 An NGS that elects Billing Option 2 for its customer accounts shall be required to sell all its accounts receivable to the Company as specified in this Purchase of Receivables (POR) program paragraph. The NGS shall be required to execute an Accounts Receivable Purchase Agreement with the Company to implement the POR program.
- 4.13.4.2 An NGS must elect Billing Option 2 for their residential customer accounts and shall sell all of its residential customer accounts receivable to the Company.
- 4.13.4.3 An NGS participating in the POR program by electing Billing Option 2 is required to accept a new customer for enrollment without regard to the credit-related issues or payment history.
- 4.13.4.4 An NGS participating in the POR program by electing Billing Option 2 shall not request a security deposit from a customer.
- 4.13.4.5 The Company will purchase the NGS receivables at a fixed reduced base discount rate which is based on the Company's experienced uncollectible accounts expense ratio established in the Company's then most recent base rate proceeding.
- 4.13.4.6 The Company will purchase only receivables associated with the NGS's Natural Gas Supply Services charges and no other products or services that may be provided by NGSs. The Natural Gas Supply Services charges eligible under the POR program shall not include any charges associated with the following: termination fees, energy efficiency service or equipment, a non-recurring charge billed by an NGS for calling the NGS call center or negotiating a payment arrangement, security deposits charged by an NGS, other equipment or services provided by an NGS such as heating equipment repairs or maintenance policies or any charges associated with carbon based attributes, including value added green products like carbon attributes. (C)
- 4.13.4.7 The Company will have the right to terminate a customer's service for failure to pay the NGS's Natural Gas Supply Services charges portion of the bill. Such termination of service will comply with all applicable laws and regulations regarding termination of service.
- 4.13.4.8 The Company may require full payment of any balance outstanding for the NGS's Natural Gas Supply Services charges before reconnecting service that has been terminated for nonpayment. When requiring full payment, the Company will comply with all applicable laws and regulations regarding reconnection of service.
- 4.13.4.9 The Company, at its discretion, may decide to terminate the Purchase of Receivables program. The Company will provide at least three (3) months advance notice to any NGS participating in the POR program and all parties to Docket No. P-2009-2099333.

(C) Indicates Change

#### **4.13 COMPANY BILLING OF NGS NATURAL GAS SUPPLY SERVICES – continued**

##### 4.13.5 Distribution Billing Services.

4.13.5.1 The Company shall bill all Customers for its Distribution service regardless of whether the NGS or the Company provides Commodity Billing Services. The Company shall provide NGSs with individual Customer's usage data for the Customer's most recent billing cycle as Customers are billed by the Company.

4.13.5.2 The NGS's Natural Gas Supply Service quantities shall be determined from the Company's "Monthly Summary Billing Report." The "Monthly Summary Billing Report" reflects Customer's billed transport quantities as reported to the NGS, as generated within the Company's revenue reporting system. (C)

#### **4.14 COMPLAINT HANDLING PROCESS**

4.14.1 General Complaints. Choice Customers shall directly contact the party (NGS or the Company) responsible for the service in question as an initial step for complaint and problem resolution. If the Customer mistakenly contacted the wrong entity, the Customer shall be promptly referred to the appropriate contact. In the event of an unexpected loss of firm Natural Gas Distribution Service, the Customer shall be directed to the NGDC. If the Complaint involves the service of both the NGS and the Company, the Company will coordinate with the NGS so that a proper investigation to a customer dispute is conducted and completed within the time period prescribed by 52 Pa. Code §56.151(5). In such a complaint, the NGS shall provide all information needed by the Company relating to the Customer's dispute and must provide that information within five (5) business days after the Company requests the information. Complaints that pertain to 52 PA Code Chapter 56 (relating to standards and billing practices for residential utility service) matters shall be handled and resolved in accordance with the applicable standards in Chapter 56. The Company will give the PUC access to disclosure statements, billing and other Customer information resources for compliance reviews as deemed necessary by the PUC. PA. P.U.C. Docket No. M-00991249F0005. If a Customer informs the Company that the problem has not been resolved, the Company will inform the Customer of their right to file an informal appeal with the Bureau of Consumer Services at the Commission and provide the Customer with the toll-free telephone number and mailing address of the Commission.

(C) Indicates Change

4.14.2 Slamming Complaints. When a Customer contacts the Company after the 10 day waiting period and alleges that their NGS has been changed without their consent, the Company shall consider the matter a Customer-registered dispute and investigate and respond to the dispute consistent with the requirements found in §§56.151 and 56.152. A Customer who has had an NGS changed without having consented to the change shall be switched back to the previous Natural Gas Provider. Any charges involved in the switch back to the previous Natural Gas Provider shall be the responsibility of the NGS that initiated the change without the Customer's consent. PA. P.U.C. Docket No. M-00991249F006.

#### **4.15 INDEMNIFICATION**

4.15.1 The NGS shall indemnify, save harmless and at Company's option, defend Company from and against any and all losses, claims, demands, damages, costs (including, without limitation, reasonable attorney's fees), expenses, liabilities, proceedings, suits, actions, restrictions, injunctions, fines, judgments, penalties and assessments which Company may suffer for, on account of, by reason of or in connection with service provided under these Rules Applicable to Distribution Service, and in connection with any bodily injury, including death to any person or persons (including, without limitation, the NGS's employees) or any damage to or destruction of any property, including without limitation, loss of use thereof, arising out of, in any manner connected with or resulting from the gas or services furnished by the NGS under these Rules Applicable to Distribution Service.

#### **4.16 TERMINATION OF AN NGS's PARTICIPATION UNDER THIS SCHEDULE**

4.16.1 Should any NGS elect or be required to discontinue serving Customers on the Company's distribution system under Customer Choice, the NGS shall: a) provide all notices required under 66 Pa. C.S. Section 2207(i); b) reassign any capacity originally assigned to it by the Company back to the Company or assign to the Company any new, replacement and/or alternate capacity it acquired; or c) assign the capacity identified in "b)" to another NGS that has accepted assignment of the first "NGS's" Customers; and d) the NGS shall continue its obligation to maintain its financial security instrument until it has satisfied all of its outstanding claims of the Company. Upon an NGS's discontinuation of Natural Gas Supply Services, the Company may offset any and all amounts owed to it by the NGS against any and all amounts owed by the Company to the NGS, including without limitation, charges for imbalance gas sold by the Company, out of period adjustments to the NGS's account, amounts owed to the NGS for bank balances, amounts owed to the NGS for accounts receivable collected by the Company, and amounts owed to the Company for OFO charges, etc.

## **RIDER RNA – REVENUE NORMALIZATION ADJUSTMENT**

(C)

### **APPLICABILITY**

Throughout the territory served under this tariff.

### **AVAILABILITY**

The RNA shall apply to non-CAP residential customers under Rate Schedules RSS and RDS.

### **DEFINITIONS**

**Peak Period (“p”)** is October through March.

**Off-Peak Period (“o”)** is April through September.

**RNA** is the Revenue Normalization Adjustment for non-CAP residential customers for the applicable period.

**BDRB** is the Benchmark Distribution Revenue per Bill for non-CAP residential customers for the applicable period.

**ADRB** is the Actual Distribution Revenue per Bill for non-CAP residential customers for the applicable period. ADRB includes Rider WNA adjustments in the applicable months.

**ANB** is the Actual Number of non-CAP residential Bills for the applicable period. ANB will be computed using a six month average.

**FT** is the Forecast Therms for residential non-CAP customers for the six-month period that the RNA will be applied.

### **REVENUE NORMALIZATION ADJUSTMENT CALCULATION**

The RNA is computed for two separate periods. At the conclusion of the Peak Period, the RNA to be applied to customers’ bills beginning with the next Peak Period will be calculated. At the end of the Off-Peak Period, the RNA to be applied to customers’ bills beginning with the next Off-Peak Period will be calculated.

$$\text{Peak Period: } \text{RNA}_p = \frac{[\text{ANB}_p \times (\text{BDRB}_p - \text{ADRB}_p)]}{\text{FT}_p}$$

$$\text{Off-Peak Period: } \text{RNA}_o = \frac{[\text{ANB}_o \times (\text{BDRB}_o - \text{ADRB}_o)]}{\text{FT}_o}$$

The initial Peak Period RNA to be billed to customers will begin with the October 2023 cycle billing and will be calculated based upon the three-month period beginning with the January 2023 cycle billing. The initial Peak RNA will only include three months due to the timing of implementing new rates. The first Off-Peak RNA to be billed to customers will begin with the April 2024 cycle billing and will be calculated based upon the six-month period beginning with the April 2023 cycle billing.

### **BENCHMARK DISTRIBUTION REVENUE PER BILL FOR NON-CAP RESIDENTIAL CUSTOMERS**

Benchmark Distribution Revenue per Non-CAP Residential Bill shall be computed as the Fully Projected Future Test Year Base Revenue divided by the number of residential bills for the applicable six-month period. New BDRB levels for the Peak and Off-Peak Periods will be established with each rate case filing.

(C) Indicates Change

**Issued: March 18, 2022**

**Mark Kempic  
President**

**Effective: May 17, 2022**

**Columbia Gas of Pennsylvania, Inc.**

**RIDER RNA – REVENUE NORMALIZATION ADJUSTMENT (Continued)**

(C)

**CURRENTLY EFFECTIVE BENCHMARK DISTRIBUTION REVENUE PER BILL**

The currently effective BDRBp and BDRBo are below:

<u>Customer Class Group</u>	<u>BDRB Peak Period</u>	<u>BDRB Off-Peak Period</u>
Non-CAP Residential	\$715.62	\$314.92

**INTEREST ON OVER/UNDER COLLECTIONS**

Refunds to customers shall be made with and recoveries from customers shall include interest at the prime rate for commercial borrowing in effect 60 days prior to the tariff filing and as reported in a publicly available source identified by the Commission or at an interest rate which may be established by the Commission by regulation.

**FILING REQUIREMENTS**

The Company will provide the calculation of the RNA along with the revised RNA Rate one (1) day prior to the effective date of the RNA.

**CURRENTLY EFFECTIVE RIDER RNA**

The Rider RNA rate information is detailed in the Rider Summary page of this Tariff.

(C) Indicates Change

**Issued: March 18, 2022**

**Mark Kempic  
President**

**Effective: May 17, 2022**

**RIDER MFC – MERCHANT FUNCTION CHARGE**

**APPLICABILITY**

This Rider shall be applicable to residential customers taking service under Rate Schedules RSS, or CAP (unless an NGS is serving the CAP aggregation) and commercial or industrial customers taking service under Rate Schedule SGSS.

**CHARACTER OF RATE**

This Rider was established in compliance with the Pennsylvania Public Utility Commission’s Revised Final Rulemaking Order dated June 23, 2011 in Docket No. L-2008-2069114 and is addressed in the PA Code Title 52, § 62.223.

The Merchant Function Charge reflects the cost of uncollectibles associated with natural gas costs billed to applicable customers by the Company.

**RATE**

The MFC is a component of the Price-to-Compare calculation as described in the Definitions section of this tariff.

The uncollectible expense ratios as specified below and determined in the most recent base rate case are used in the calculation of the MFC rate:

Residential uncollectible expense ratio	1.44397%	(D)
Non-residential uncollectible expense ratio	0.42117%	(I)

The current MFC rates may be found in the Rate Summary pages of this Tariff.

**CALCULATION OF RATE**

The Rider MFC rate is calculated as follows:

$$\text{MFC} = \text{PGCC} \times \text{the uncollectible expense ratio}$$

where:

PGCC is the current Purchased Gas Commodity Cost as detailed in the Purchased Gas Cost Rider of this tariff.

(C) Indicates Change (D) Indicates Decrease (I) Indicates Increase

## **RIDER EE - ENERGY EFFICIENCY RIDER**

(C)

### **APPLICABILITY**

Throughout the territory served under this Tariff.

### **AVAILABILITY**

The Energy Efficiency Rider ("EE Rider") shall recover costs related to the Company's Energy Efficiency Plan ("EE Plan"). The EE Rider shall be applicable to all residential customers except customers in the Company's Customer Assistance Plan ("CAP").

### **CHARACTER OF RATE**

The EE Rider has been established to recover costs related to the Company's EE Plan.

### **RATE**

The monthly charges for service to customers for which this Rider is applicable shall be a separate line item on the bill calculated by multiplying the customer's usage by the rate set forth below.

The rate information is detailed on Pages 21 and 21b of this Tariff.

### **CALCULATION OF RATE**

The EE Rider is calculated as follows:

Costs to be recovered shall include Company incurred costs to implement its Commission approved EE Plan during each plan year, January-December ("Plan Year"), including all costs incurred to develop and administer the Company's EE Plan.

The EE Rider shall be calculated in accordance with the formula below and shall be rounded to the fourth decimal:

$$\text{EE Rider} = (\text{Cr} / \text{Sr}) - (\text{Er} - \text{Sr}) \text{ where}$$

Cr = Projected Residential EE Plan Costs

Sr = Projected Residential Class Sales

Er = Net over or under collection of the residential EE Rider resulting from the difference between the EEC Rider revenues received and the EE Plan costs incurred.

(C) Indicates Change

**RIDER EE - ENERGY EFFICIENCY RIDER (Continued)**

(C)

**ANNUAL RECONCILIATION**

Any over or under collection at the end of the plan period shall be recovered or refunded either through a subsequent EE Plan approved by the Commission or through continuation of the EE Rider until full recovery or refunding has occurred.

On or before April 1 each year, the Company shall file with the Commission data showing the reconciliation of actual revenues received under this Rider and actual recoverable costs incurred for the preceding twelve months ended December. The resulting over/undercollection (plus interest calculated at 6% annually) will be reflected in the annual rate adjustment to be effective April 1.

**ANNUAL UPDATES**

The EE Rider will be updated annually and will be filed with the Commission on one day's notice to be effective January 1 of each year. The Company reserves the right to make an interim reconciliation filing to adjust the EE Rider.

(C) Indicates Change

---

## **RIDER DSIC - DISTRIBUTION SYSTEM IMPROVEMENT CHARGE**

In addition to the net charges provided for in this Tariff, a charge of 0.00% will apply consistent with the Commission Order dated March 14, 2013 at Docket No. P-2012-2338282, approving the DSIC.

### **GENERAL DESCRIPTION**

#### **Purpose**

To recover the reasonable and prudent costs incurred to repair, improve, or replace eligible property which is completed and placed in service and recorded in the individual accounts, as noted below, between base rate cases and to provide the Utility with the resources to accelerate the replacement of aging infrastructure, to comply with evolving regulatory requirements and to develop and implement solutions to regional supply problems.

The costs of extending facilities to serve new customers are not recoverable through the DSIC.

#### **Eligible Property**

The DSIC-eligible property will consist of the following:

- Piping (account 376);
- Couplings (account 376);
- Gas services lines (account 380) and insulated and non-insulated fittings (account 378);
- Valves (account 376);
- Excess flow valves (account 376);
- Risers (account 376);
- Meter bars (account 382);
- Meters (account 381);
- Unreimbursed costs related to highway relocation projects where a natural gas distribution company or city natural gas distribution operation must relocate its facilities; and
- Other related capitalized costs.

(D) Indicates Decrease (C) Indicates Change

## RIDER RNA – REVENUE NORMALIZATION ADJUSTMENT

(C)

### APPLICABILITY

Throughout the territory served under this tariff.

### AVAILABILITY

The RNA shall apply to non-CAP residential customers under Rate Schedules RSS and RDS.

### DEFINITIONS

Peak Period (“p”) is October through March.

Off-Peak Period (“o”) is April through September.

RNA is the Revenue Normalization Adjustment for non-CAP residential customers for the applicable period.

BDRB is the Benchmark Distribution Revenue per Bill for non-CAP residential customers for the applicable period.

ADRB is the Actual Distribution Revenue per Bill for non-CAP residential customers for the applicable period. ADRB includes Rider WNA adjustments in the applicable months.

ANB is the Actual Number of non-CAP residential Bills for the applicable period. ANB will be computed using a six month average.

FT is the Forecast Therms for residential non-CAP customers for the six-month period that the RNA will be applied.

### REVENUE NORMALIZATION ADJUSTMENT CALCULATION

The RNA is computed for two separate periods. At the conclusion of the Peak Period, the RNA to be applied to customers’ bills beginning with the next Peak Period will be calculated. At the end of the Off-Peak Period, the RNA to be applied to customers’ bills beginning with the next Off-Peak Period will be calculated.

$$\text{Peak Period: } \frac{\text{RNA}_p = [\text{ANB}_p \times (\text{BDRB}_p - \text{ADRB}_p)]}{\text{FT}_p}$$

$$\text{Off-Peak Period: } \frac{\text{RNA}_o = [\text{ANB}_o \times (\text{BDRB}_o - \text{ADRB}_o)]}{\text{FT}_o}$$

The initial Peak Period RNA to be billed to customers will begin with the October 2023 cycle billing and will be calculated based upon the three-month period beginning with the January 2023 cycle billing. The initial Peak RNA will only include three months due to the timing of implementing new rates. The first Off-Peak RNA to be billed to customers will begin with the April 2024 cycle billing and will be calculated based upon the six-month period beginning with the April 2023 cycle billing.

### BENCHMARK DISTRIBUTION REVENUE PER BILL FOR NON-CAP RESIDENTIAL CUSTOMERS

Benchmark Distribution Revenue per Non-CAP Residential Bill shall be computed as the Fully Projected Future Test Year Base Revenue divided by the number of residential bills for the applicable six-month period. New BDRB levels for the Peak and Off-Peak Periods will be established with each rate case filing.

**RIDER RNA – REVENUE NORMALIZATION ADJUSTMENT (Continued)**

(C)

**CURRENTLY EFFECTIVE BENCHMARK DISTRIBUTION REVENUE PER BILL**

The currently effective BDRBp and BDRBo are below:

<u>Customer Class Group</u>	<u>BDRB Peak Period</u>	<u>BDRB Off-Peak Period</u>
Non-CAP Residential	\$715.62	\$314.92

**INTEREST ON OVER/UNDER COLLECTIONS**

Refunds to customers shall be made with and recoveries from customers shall include interest at the prime rate for commercial borrowing in effect 60 days prior to the tariff filing and as reported in a publicly available source identified by the Commission or at an interest rate which may be established by the Commission by regulation.

**FILING REQUIREMENTS**

The Company will provide the calculation of the RNA along with the revised RNA Rate one (1) day prior to the effective date of the RNA.

**CURRENTLY EFFECTIVE RIDER RNA**

The Rider RNA rate information is detailed in the Rider Summary page of this Tariff.

## RIDER MFC – MERCHANT FUNCTION CHARGE

### APPLICABILITY

This Rider shall be applicable to residential customers taking service under Rate Schedules RSS, or CAP (unless an NGS is serving the CAP aggregation) and commercial or industrial customers taking service under Rate Schedule SGSS.

### CHARACTER OF RATE

This Rider was established in compliance with the Pennsylvania Public Utility Commission's Revised Final Rulemaking Order dated June 23, 2011 in Docket No. L-2008-2069114 and is addressed in the PA Code Title 52, § 62.223.

The Merchant Function Charge reflects the cost of uncollectibles associated with natural gas costs billed to applicable customers by the Company.

### RATE

The MFC is a component of the Price-to-Compare calculation as described in the Definitions section of this tariff.

The uncollectible expense ratios as specified below and determined in the most recent base rate case are used in the calculation of the MFC rate:

Residential uncollectible expense ratio	<del>1.520771</del> <u>1.44397</u> %	(D)
Non-residential uncollectible expense ratio	<del>0.308750</del> <u>0.42117</u> %	(I)

The current MFC rates may be found in the Rate Summary pages of this Tariff.

### CALCULATION OF RATE

The Rider MFC rate is calculated as follows:

MFC = PGCC x the uncollectible expense ratio

where:

PGCC is the current Purchased Gas Commodity Cost as detailed in the Purchased Gas Cost Rider of this tariff.

## RIDER EE - ENERGY EFFICIENCY RIDER

(C)

### APPLICABILITY

Throughout the territory served under this Tariff.

### AVAILABILITY

The Energy Efficiency Rider (“EE Rider”) shall recover costs related to the Company’s Energy Efficiency Plan (“EE Plan”). The EE Rider shall be applicable to all residential customers except customers in the Company’s Customer Assistance Plan (“CAP”).

### CHARACTER OF RATE

The EE Rider has been established to recover costs related to the Company’s EE Plan.

### RATE

The monthly charges for service to customers for which this Rider is applicable shall be a separate line item on the bill calculated by multiplying the customer’s usage by the rate set forth below.

The rate information is detailed on Pages 21 and 21b of this Tariff.

### CALCULATION OF RATE

The EE Rider is calculated as follows:

Costs to be recovered shall include Company incurred costs to implement its Commission approved EE Plan during each plan year, January-December (“Plan Year”), including all costs incurred to develop and administer the Company’s EE Plan.

The EE Rider shall be calculated in accordance with the formula below and shall be rounded to the fourth decimal:

$$\underline{\hspace{2cm}} \text{ EE Rider} = (Cr / Sr) - (Er - Sr) \text{ where}$$

Cr = Projected Residential EE Plan Costs

Sr = Projected Residential Class Sales

Er = Net over or under collection of the residential EE Rider resulting from the difference between the EEC Rider revenues received and the EE Plan costs incurred.

**PAGE 164 INTENTIONALLY LEFT BLANK**

**FOR FUTURE USE**

(C) Indicates Change

**Columbia Gas of Pennsylvania, Inc.**

**RIDER EE - ENERGY EFFICIENCY RIDER (Continued)**

(C)

**ANNUAL RECONCILIATION**

Any over or under collection at the end of the plan period shall be recovered or refunded either through a subsequent EE Plan approved by the Commission or through continuation of the EE Rider until full recovery or refunding has occurred.

On or before April 1 each year, the Company shall file with the Commission data showing the reconciliation of actual revenues received under this Rider and actual recoverable costs incurred for the preceding twelve months ended December. The resulting over/undercollection (plus interest calculated at 6% annually) will be reflected in the annual rate adjustment to be effective April 1.

**ANNUAL UPDATES**

The EE Rider will be updated annually and will be filed with the Commission on one day's notice to be effective January 1 of each year. The Company reserves the right to make an interim reconciliation filing to adjust the EE Rider.

(C) Indicates Change

---

## RIDER DSIC - DISTRIBUTION SYSTEM IMPROVEMENT CHARGE

In addition to the net charges provided for in this Tariff, a charge of 0.00% will apply consistent with the Commission Order dated March 14, 2013 at Docket No. P-2012-2338282, approving the DSIC.

### GENERAL DESCRIPTION

#### Purpose

To recover the reasonable and prudent costs incurred to repair, improve, or replace eligible property which is completed and placed in service and recorded in the individual accounts, as noted below, between base rate cases and to provide the Utility with the resources to accelerate the replacement of aging infrastructure, to comply with evolving regulatory requirements and to develop and implement solutions to regional supply problems.

The costs of extending facilities to serve new customers are not recoverable through the DSIC.

#### Eligible Property

The DSIC-eligible property will consist of the following:

- Piping (account 376);
- Couplings (account 376);
- Gas services lines (account 380) and insulated and non-insulated fittings (account 378);
- Valves (account 376);
- Excess flow valves (account 376);
- Risers (account 376);
- Meter bars (account 382);
- Meters (account 381);
- Unreimbursed costs related to highway relocation projects where a natural gas distribution company or city natural gas distribution operation must relocate its facilities; and
- Other related capitalized costs.

#### ~~Effective Date~~

~~The DSIC will become effective for bills rendered on and after October 1, 2021.~~

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.53 I. VALUATION

A. ALL UTILITIES

1. Provide a corporate history (include the dates of original incorporation, subsequent mergers and/or acquisitions). Indicate all counties and cities and other governmental subdivisions to which service is provided (including service areas outside the state), and the total population in the area served.

Response:

Columbia Gas of Pennsylvania, Inc. is a wholly-owned subsidiary of NiSource Gas Distribution Group, Inc., which is a subsidiary of NiSource Inc. Until the merger with NiSource in 2000, Columbia Gas of Pennsylvania, Inc. was a wholly-owned subsidiary of Columbia Gas System, Inc., a Public Utility Holding Company, organized under the laws of the state of Delaware on September 30, 1926. In 1998, the Columbia Gas System became the Columbia Energy Group, with Columbia Gas of Pennsylvania remaining as a wholly-owned subsidiary.

NiSource, organized as an Indiana holding company in 1987 under the name of NIPSCO Industries, Inc., changed its name to NiSource Inc. on April 14, 1999. On November 1, 2000, NiSource acquired the Columbia Energy Group and its subsidiaries. In connection with the acquisition, NiSource became a Delaware corporation registered under the Public Utility Holding Company Act of 1935. Effective February 8, 2006, the Public Utility Holding Company Act of 1935 was repealed. NiSource is now a holding company under the Public Utility Holding Company Act of 2005.

Columbia Gas of Pennsylvania, Inc. was incorporated under the laws of Pennsylvania on June 23, 1960 and presently serves approximately 440,000 customers in the Commonwealth of Pennsylvania.

On May 31, 1967, as a result of Commission approval at Docket No. A-92870, Columbia acquired all the property and rights of Central Pennsylvania Gas Company which provided service in the Boroughs of Bellefonte and State College, and Townships of Spring, Potter, Benner, College, Burnside, Snow Shoe, Boggs, Ferguson, Patton, Harris and Union all in Centre County.

On August 29, 1967, as a result of Commission approval at Docket No. A-95038, Columbia acquired all the property and rights of York County

Gas Company, which provided service in the Borough of McSherrystown and in the township of Conewago, both situated in Adams County, and in the boroughs, cities and townships situated in York County.

For all counties, cities and other governmental subdivisions to which service is provided see Exhibit No. 15, Schedule No. 1, pages 3 through 6, which are the current Description of Territory tariff pages 7 through 10. Columbia does not provide service outside the Commonwealth of Pennsylvania.

Please refer to Exhibit No. 15, Schedule No. 1, pages 7 through 21 for the total population by county subdivision for the area served based on U.S. Census Bureau estimates for 2020. The following municipalities that appear in the Description of Territory tariff pages but were not available in the census.gov website are:

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

7. Provide details of respondent's attempts to recover uncollectible and delinquent accounts

ACTIVE DELINQUENT RESIDENTIAL COLLECTIONS

Residential collection activity in Pennsylvania is governed by Title 52 Pennsylvania Code Chapter 56, Chapter 14, and other guidelines and/or directives issued by the Bureau of Consumer Services.

Since gas service is supplied in advance of payment, rules and regulations (filed with or issued by the PA Public Utility Commission) specify that failure to pay is sufficient cause to discontinue service.

1. The net amount billed becomes due for all residential accounts no less than twenty (20) days after the mailing of the monthly bill. Industrial, commercial and public authority accounts are due no less than fifteen (15) days after the mailing of the monthly bill.
2. Approximately thirty-four (34) days following the mailing of the monthly bill, residential accounts considered "past due" are mailed a 10 day termination notice.

Columbia Gas of Pennsylvania follows a process to analyze customer payment tendencies and divides customers into groups or "Segments" according to their risk of non-payment.

Criteria for Issuing Residential Notices:

Ultra High – Arrears greater than \$100

High – Arrears greater than \$100

Medium – Arrears greater than \$150

Low – Friendly Notice (or) Reminder Notice  $\geq$ \$150 (expected to self-cure)

3. The termination notice is a paper form with a cash re-entry document attached to the top. The termination notice states that service will be

terminated in not less than (10) days from the date of mailing unless one of the following occurs:

- (a) A payment is received;
  - (b) Customer calls in a receipt number as paid to company's call center which is also accepted through company's automated IVRU system;
  - (c) A satisfactory payment arrangement is made;
  - (d) A billing dispute is filed with Columbia Gas of Pennsylvania, Inc. or informal complaint is filed with the Pennsylvania Public Utility Commission;
  - (e) A medical emergency exists.
4. The Company must review with the customer certain items prior to discussing payment agreements.

When a customer contacts the Company before termination, the Company first explains:

- 56.97(a)(1) The reasons for the proposed termination.
- 56.97(a)(2) All available methods for avoiding a termination, including:
  - (i) Tendering payment in full or otherwise eliminating the grounds for termination.
  - (ii) Entering a payment arrangement.
  - (iii) Paying what is past-due on the most recent previous company negotiated or Commission payment arrangement.
- 56.97(a)(3) Information about the public utility's universal service programs, including the customer assistance program. Refer the customer or applicant to the universal service program of the public utility to determine eligibility for a program and to apply for enrollment in a program.
- 56.97(a)(4) The medical emergency procedures

After explaining the above, the Company may negotiate a payment arrangement. If the Company and the customer are successful in negotiating an agreement, then 56.97(b)(1)(2) and (3) would be provided when appropriate.

NOTE: If the customer experiences a change in income as defined by Chapter 14, the company will negotiate a new payment plan.

- 56.97(b)(1) The right of the customer to file a dispute with the public utility and, thereafter, an informal complaint with the Commission.
- 56.97(b)(2) The procedures for resolving disputes and informal complaints, including the address and telephone number of the Commission: Public Utility Commission, Box 3265, Harrisburg, Pennsylvania 17105-3265, (800) 692-7380.
- 56.97(b)(3) The duty of the customer to pay a portion of a bill which the customer does not dispute.

If we are unable to negotiate a payment agreement, it is necessary to comply with the provisions of 56.152, the utility company report (dispute report).

- 5. For those customers who have not taken steps to avoid termination, the Company, approximately seven (7) days after mailing of the 10 day termination notice “shall attempt to contact the customer or responsible occupant, either in person, by telephone, or electronically with the customer’s consent, consistent with the Commission’s privacy guidelines, and approved by the Commission. This notice shall be provided at least three days prior to the scheduled termination. Phone contact shall be deemed complete upon attempted calls on two separate days to the residence between the hours of 8 a.m. and 9 p.m. if the calls were made at various times each day, those times being daytime before 5 p.m. and evening after 5 p.m. and at least 2 hours apart. If contact is attempted in person by home visit only one attempt is required, as prescribed by Title 52 Chapter 56.93.
- 6. On the proposed termination date the service technician will either: (1) accept payment of arrears or payment of the catch-up amount of the defaulted payment plan by having the customer make electronic payment, thereby leaving the gas service on; or (2) determine that a medical emergency exists, thereby leaving the gas service on; or (3) obtain a valid receipt from the customer, thereby leaving the gas service on; or (4) terminate service and post a post-termination notice detailing the reason for the termination and the steps required to have service restored. “During the months of December through March, unless personal contact has been made with the customer or responsible adult by personally visiting the customer’s residence, the public utility shall, within 48 hours of the scheduled date of termination, post a notice of the proposed termination at

the service location,” as prescribed by Title 52 Chapters 56.94, 56.95, and 56.96. NOTE: In cases related to victims under Protection From Abuse Orders Columbia will follow Title 52 Chapter 56 Subchapters L-V.

7. For Winter Termination, Title 52 Chapter 56.100 (b) restricts service terminations for customers with household incomes at or below 250% of the Federal Poverty Level. Eligible accounts fitting this income level are reviewed daily by Columbia’s Compliance Department to ensure full conformity with Title 52 56.100.
8. On August 2, 2020, the Bureau of Consumer Services (BCS) sent a letter to Utility Company Executives requesting a survey of those premises where heat related service gas has not been restored. A copy of the letter is provided in Attachment A. Columbia responded to the BCS on December 15, 2020, as prescribed by Title 52 Chapter 56 (h) and (i) and. The letter also included a request for a follow-up survey to collect the status of the relevant accounts and also a survey of accounts terminated in December. In addition, the letter requested the company to provide a detailed list of its properties found vacant during the 2020 survey, and updated data on how many accounts have never restored gas service from the 2019 Cold Weather Survey. Columbia submitted an updated response on January 26, 2021, prior to filing date of February 1. Both responses are included in Attachment B and C. Columbia submitted an updated response on January 26, 2021, prior to filing date of February 1. Both responses are included in Attachment B and C.

#### FINAL BILL/INACTIVE COLLECTIONS

1. The inactive collections process begins with the issuing of a final bill. The final bill is due approximately twenty-three (23) days from issuance. One day after the due date, a past due notice is sent. If there is no payment or the customer does not enter into a final bill payment plan, the account will be moved to the Early Out process approximately forty-two (42) days from final bill issue. The Early Out vendor will send a letter and make up to eight phone calls over the next thirty (30) days, attempting to get payment. If the Early Out vendor is unsuccessful, the account will be sent to a primary collection agency at approximately day 76.
2. The primary collection agency will complete skip-tracing steps, issue collection letters and notices, make phone contact attempts, and may file suit against debtors. At the Collection Agency’s discretion, they may credit report and update account information to the three National Credit Reporting Networks. At the end of nine months, the Primary accounts are returned, and referred to secondary collection agencies.

3. The secondary collection agency will complete skip-tracing steps, issue collection letters and notices, make phone contact attempts, and may file suit against debtors. At the Collection Agency's discretion, they may credit report and update account information to the three National Credit Reporting Networks. At the end of 12 months, the Secondary Agency will move the accounts into their Warehouse program for collections.
4. The Warehouse Program will store accounts while looking for an active location of the Customer's contact location either by a credit inquiry on their credit report or other methods at which time they will resume active collections by collection letters and notices, phone contact attempts, and may file suit against debtors.
5. In addition to collection agency activity, Columbia Gas of Pennsylvania utilizes two processes to identify accounts that have unpaid final bills. During the connect process, CPA's customer information system will highlight outstanding final bills that may exist in the new applicant's name. Reports are also worked that display bad debt finals that have matching active accounts. When these final bills are identified, they may be transferred to the matching active account.

#### UNCOLLECTIBLE ACCOUNTS

Unpaid finals are written off to bad debt expense approximately 80-105 days following final bill. Final bill collection activity could continue for years following write-off as described above.

**COMMONWEALTH OF PENNSYLVANIA**  
PENNSYLVANIA PUBLIC UTILITY COMMISSION  
COMMONWEALTH KEYSTONE BUILDING  
400 NORTH STREET  
HARRISBURG, PENNSYLVANIA 17120

August 16, 2021

Dear Utility Company Executive:

In accordance with 52 PA Code § 56.100(h) and § 56.100(i), all utilities subject to this Chapter are required to survey those premises where heat-related services, including any landlord-ratepayer accounts, have been terminated during the year. Utilities are reminded that all accounts terminated in accordance with the regulations at § 56.81 (relating to authorized termination of service) or § 56.98 (relating to termination for unauthorized use, fraud, tampering, or tariff violations) must be included in the survey results – including those terminated for failure to permit access to meters.

The regulations require utilities to, within 90 days prior to December 1, survey and attempt to make post-termination personal contact with the occupant or a responsible adult at the premises and in good faith attempt to reach an agreement regarding payment of any arrearages and restoration of service. In order to ensure that personal contact is made prior to December 1, the Bureau of Consumer Services (Bureau or BCS) recommends that your company begin to survey your off accounts no later than September 15, 2021, but you may begin your survey as early as September 1, 2021.

Of particular concern to the Bureau are those residential service accounts where service has not been restored. Accordingly, I am requesting that you report to the Bureau the status of utility service at residential properties where company records indicate that service was terminated on or after January 1, 2021 and has not been reconnected.

When you report the results of your surveys, please use the attached Form A (spreadsheet) to report the status of accounts terminated in 2021. The report should reflect the status of relevant accounts terminated through November 30, 2021 and be returned to BCS no later than the close of business on December 15, 2021. Along with these results, BCS requests that utilities provide a follow-up count of premises where services were terminated in 2020, not re-established, and remained off through 2021. BCS asks that you include these premises in your 2021-2022 contact attempts. Please submit your 2020 follow-up data on the separate spreadsheet attached (2020 CWS Follow-up Survey).

A follow-up survey to collect the status of relevant accounts is due in February for which you will receive a subsequent request and instructions. All accounts terminated through December 31, 2021, are to be included in the follow-up survey.

The primary goal of this survey is to afford occupants at the affected premises the opportunity to avoid going through the winter months without heat-related services.

Last year, the Chairman's Emergency Order in response to the pandemic significantly impacted utility terminations. A mandatory termination moratorium for public utilities was enacted and public utilities redirected their efforts to reconnecting occupied premises without service from March 2020 to March 2021. The monthly § 56.231 reports showed that utility efforts were successful and there were few accounts to survey last year. This year, the moratorium restrictions were lifted and terminations resumed for most public utilities on or after April 1, 2021.

This year, providing accurate cold weather survey data to BCS will be critical to analyzing the number of Pennsylvania households without utility service.

For any accounts terminated in 2021, utilities should make at least four attempts to contact a responsible adult occupant at properties where services were terminated and remain off. These four contact attempts should include a combination of telephone calls, letters, emails, texts, and personal visits to the premises. Utility representatives should make attempts to establish contact on different days of the week and at different times of the day (including evening hours). If these attempts to contact the customer are unsuccessful, BCS requests a personal visit to the premises for a final attempt to communicate with the occupants of the premises or to determine that the premises is vacant.

Due to continuing concerns surrounding the pandemic, BCS recommends social distancing protocols for the final visit. For the purpose of safety, the utility may place their notice on the door, knock, and establish a safe distance from the door while giving sufficient time for a response.

The Bureau is always concerned about the categorization of accounts as vacant. Please carefully document the specific reasons you determine premises are vacant. Natural gas utilities should check for usage on electric meters to help determine if a premises is vacant. Physical, in-person contact, such as surveying neighbors etc. is not required.

- This year, BCS is requesting detailed information for all properties identified as vacant in Form A; including the address, zip code, date verified, and means of determination for each property. Please provide this information by completing

and returning the attached Vacancy Property Listing spreadsheet with your report.

The Bureau strongly encourages referring consumers to available low-income assistance programs and 211 resources (e.g., Customer Assistance Program, the Low-Income Home Energy Assistance Program, and Hardship Fund Program, 211 website, and county assistance offices) and leaving special information packets at premises where service is off. The packets should contain information about contacting the utility company, applications for energy assistance, and information about any other special assistance programs.

Thank you for your continued cooperation with this important health and safety matter. Please direct your responses or any questions to Kathy Solence at [ksolence@pa.gov](mailto:ksolence@pa.gov) and Adam Krichmar at [akrichmar@pa.gov](mailto:akrichmar@pa.gov).

Sincerely,

*Alexis Bechtel*

<b>1</b>	9,653	Number of heat-related residential properties terminated between 1/1/2021 and 11/30/2021.
<b>2</b>	4,385	Number of heat-related residential properties to be surveyed (those that your records show as not reconnected).
	<b>4,385</b>	<b>Total of A through E below: #2 above <u>must match</u> this total</b>

### Survey Results

Place each of the properties from Item #2 above into one of the following categories:

<b>A</b>	769	Number of vacant premises (reasonably sure).
<b>B</b>	2,624	Number of accounts where contact was made and service was reconnected with a payment arrangement/settlement agreement, or where service was connected in a new name, or where service was reconnected for other reasons.
<b>C</b>	0	Number of accounts where unauthorized use was discovered. No payment agreement established, service will remain on (with or without contact).
<b>D</b>	485	Number of accounts where no contact was made and premises appear to be occupied:
	228	(i.) Number of these accounts identified as non-low-income customers or income is unknown.
	193	(ii.) Number of these accounts identified as low-income customers (Do not include CAP customers, report CAP customers in (iii) below).
	64	(iii.) Number of these accounts identified as CAP customers who defaulted on their agreement.
	<b>485</b>	<b>Total of D(i) through D(iii) above: D <u>must match</u> this total</b>
<b>E</b>	507	Number of heat-related premises that are occupied and the regulated utility service has not been reconnected:
	228	(i.) Number of these accounts identified as non low income customers or income is unknown.
	221	(ii.) Number of these accounts identified as low income customers (Do not include CAP customers, report CAP customers in (iii) below).
	58	(iii.) Number of these accounts identified as CAP customers who defaulted on their agreement.
	<b>507</b>	<b>Total of E(i) through E(iii) above: E <u>must match</u> this total</b>
	209	(iv.) Number of these accounts who are using an alternative heating source. Identify the heating source below:
		<b>Heating With:</b>
	6	1. Kerosene Heater
	172	2. Electric Space Heater
	6	3. Wood/Coal Stove or Furnace
	2	4. Fireplace
	3	5. Kitchen Stove/Oven
	0	6. Oil-Filled Space Heater
	20	7. Other (Specify):
		(5) Electric Baseboard      (3) Heat Pump
		(3) Pellet Stove      3) Propane
		(4) Conversion to Electric   (1) Refused   (1) Fuel Oil
	<b>209</b>	<b>Total of 1 through 7 (heat source) above: E(iv) <u>must match</u> this total</b>

Adam Krichmar  
Bureau of Consumer Services  
PA Public Utility Commission  
P O Box 3265  
Harrisburg, PA 17120

Dear Mr. Krichmar,

Enclosed are the results from Columbia Gas of Pennsylvania's (Columbia) 2021 Cold Weather Survey (CWS), as requested in the Pennsylvania Public Utility Commission's letter dated August 16, 2021.

Columbia is happy to report that sixty percent of the accounts that were terminated in 2021 and needed surveyed have been restored.

As in the past, Columbia will continue to make additional contact attempts (by phone) to reach out to individuals whose service remains off. This year, due to Covid-19, Columbia will refrain from making any additional field visits. Additionally, Columbia's Universal Services Team will continue to work with those low income customers in providing them with the necessary information on funding and the availability of the Customer Assistance Program (CAP). As communicated in prior years, Columbia will accept available energy assistance grants in order to restore the gas service for any low income customer whose gas service is still off.

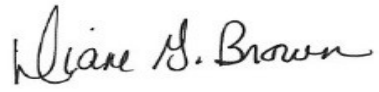

Columbia will waive the security deposit and connection fee for any protected customer to assist in having gas service restored.

In addition, as requested, Columbia was able to perform some additional attempts on accounts from 2020 where the gas service was terminated, not re-established, and remained off at the start of the 2020 Cold Weather Survey. Due to the Covid-19 pandemic and Emergency Order in 2020, the terminated accounts were minimal.

The attached CWS Follow-Up Survey for 2020 reveals as of 2/1/21, there were **31** accounts that were not re-established in 2020. Of those 31 accounts, 24 were in category A (vacant) and 7 were in category D&E (account still off and appeared occupied). At the start of the 2021 CWS survey, those numbers in category A (vacant) remained the same at 24 accounts and decreased to four (4) in category D & E for a total of **28** that remained off.

If you have any questions or need additional information, please do not hesitate to give me a call at (717) 356-1319 or email me at [dgbrown@nisource.com](mailto:dgbrown@nisource.com).

Sincerely,

A handwritten signature in cursive script that reads "Diane G. Brown". The signature is written in black ink and is positioned below the word "Sincerely,".

Diane G. Brown  
Manager Regulatory Compliance  
Columbia Gas of PA, Inc.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
C. GAS UTILITIES

1. Provide, with respect to the scope of operations of the utility, a description of all property, including an explanation of the system's operation, and all plans for any significant future expansion, modification or other alteration of facilities.

This description should include, but not be limited to the following:

- a. If respondent has various gas services areas, indicate if they are integrated, such that the gas supply is available to all customers.

Response: Columbia Gas of Pennsylvania, Inc. (CPA or the Company) is a natural gas distribution company serving approximately 440,000 customers in four separate geographic areas within the Commonwealth of Pennsylvania. CPA serves these four geographic areas with natural gas supplies received from six separate interstate pipeline systems through over 300 individual points of receipt. While the majority of the individual distribution systems behind each point of receipt are not physically interconnected, all system supply purchases are integrated for billing purposes and available to all sales customers on an "as needed basis" absent any pipeline facility limitations.

- b. Provide all pertinent data regarding company policy related to the addition of new consumers in the company's service area.

Response: All pertinent data regarding the company policy related to the addition of new customers may be found in the company's approved tariff currently on file with the Pennsylvania Public Utility Commission. CPA, through a very deliberate process, is attaching those new loads to its system for which the economics prove favorable. CPA does not anticipate any difficulty in acquisition of new supplies to serve new customers. However, contingent upon the geographic location of desired service, the need for upgrading present facilities or service lines must be carefully evaluated and considered. Specifically, the policy for evaluating such loads are described in Section 8, Extension, for Rules and Regulations Governing the Distribution and Sale of Gas. Please refer to Exhibit No. 14, Schedule No.2, for a copy of Columbia's current tariff.

- c. Explain how respondent obtains its gas supply, as follows:
  - (i) Explain how respondent stores or manufactures gas; if applicable.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
C. GAS UTILITIES

Response: The Company does not manufacture gas. The Company stores natural gas through contracted storage services provided by three interstate pipeline companies. Generally, gas is purchased, delivered and injected in storage during the summer and withdrawn during the following winter to meet weather affected increases in customer demand.

(ii) State whether the company has peak shaving facilities.

Response: The Company has no peak shaving facilities. The Company utilizes daily purchases to meet a small percentage of and contracted storage services to meet the majority of weather related increases in customer demand.

(iii) Provide details of coal-gasification programs, if any.

Response: The Company has no coal-gasification programs.

(iv) Describe the potential for emergency purchases of gas.

Response: CPA has under contract sufficient peak day and seasonal supplies to meet the needs of its firm customers under those design peak day and design winter season conditions having a limited probability of occurrence. As a result, absent conditions beyond design or a disruption in firm supply, CPA does not foresee any need to purchase emergency gas. Nonetheless, if CPA should require emergency gas supplies, CPA will request excess deliveries from Columbia Gas Transmission, LLC (TCO) and the other interstate pipelines CPA is connected with, as needed, under the respective FERC approved Firm Storage (FSS) and/or Transportation Service (FTS) Rate Schedules of these pipelines. CPA will also actively search for available supplies to purchase in the marketplace and, if needed, seek additional supplies from those distribution companies participating in the Mid-Atlantic Contingency Planning Group. In the extreme case where excess FSS or FTS deliveries or additional gas supplies are not available, the demand of CPA's firm customers may be satisfied by reducing the consumption of lower priority customers as described in Section 2.3 of CPA's tariff.

(v) Provide the amount of gas in MCF supplied by various suppliers in the test year (include a copy of all contracts).

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
C. GAS UTILITIES

Response: Please see Exhibit No. 10, Schedule 7 for the Mcf of gas supplied by various suppliers in the test year.

Attachment A to this response provides a list of the Base Contracts that were utilized by Columbia for the purchase of natural gas supplies during the Historical test year. A sample of a Base Contract is included in this response as Attachment B to this response.

Natural gas purchases made during this time period include those for system supply on a spot basis (one month or less), term basis (longer than one month) as well as purchases made to be sold as incremental supply pursuant to Columbia's off-system sales program. The types of purchases that were made under each Base Contract during the Historical test year are indicated in Attachment A.

The Base Contract provides the general terms and conditions for the purchase and sale of natural gas. Whenever a transaction is agreed to, the parties enter into a specific transaction confirmation setting forth the agreed upon terms of the deal (volume, price, term, location, etc.). The transaction confirmation is in a format like that which is attached as Exhibit A in the Base Contract. There are numerous confidential transactions confirmations, samples of which can be made available, subject to the execution of a confidentiality agreement.

Local gas purchase contracts have been excluded from this response due to the large number of contracts and their relatively small purchase volumes. Please see Attachment C to this response for a sample contract.

(vi) Provide the amount of gas in MCF supplied from company-owned wells during the test year.

Response: The Company has no company-owned gas wells.

d. Provide plans for future gas supply, as follows:

(i) Supply details of anticipated gas supply from respondent's near-term development of gas wells, if any.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
C. GAS UTILITIES

Response: The Company has no plans to develop company-owned gas wells.

- (ii) Provide gas supply agreements and well development ventures and identify the parties thereto.

Response: The Company has entered into certain transaction confirmations for near term gas supply needs. Please see the response to Question c. (v) above related to the review of transaction confirmations. The Company has no well development ventures.

- e. Indicate any anticipated curtailments and explain the reasons for the curtailments.

Response: The Company does not anticipate any curtailments. While not curtailment, should the Company have inadequate supplies to meet total customer demand, it may reduce the interruptible portion of its banking and balancing service to General Distribution Service (GDS) customers resulting in the need for GDS customers to either increase supplies delivered to the Company or to reduce their consumption in line with their delivered supplies. These banking and balancing services may also be reduced should the Company receive more supplies than it is able to accept through a combination of customer demand and storage injection. Under this scenario the Company would ask GDS customers to reduce their deliveries to the Company.

- f. Provide current data on any Federal Power Commission action or programs that may affect, or tend to affect, the natural gas supply to the gas utility.

Response: **FERC Proceedings**

Given the location of Columbia Gas of Pennsylvania's ("the Company") service area, in a major natural gas production region, it does not appear that any FERC actions or programs would negatively affect, or tend to negatively affect, the supply of natural gas to the Company.

However, since the Company's last rate case, numerous proceedings have been addressed by the FERC that are of interest and or concern to the Company, its rate payers, and the pipelines that serve the Company.

The Company intervenes in all dockets when certificate and rate filings have the potential to impact reliability and/or cost to its customers. In compliance with Section 53.64(c)(4) of the Commission's regulations,

Columbia participates in proceedings before the FERC as reflected in Exhibit No. 3 as part of its annual 1307(f) proceeding.

Below are some of the major activities at the FERC which Columbia, along with its State affiliates and the American Gas Association, continues to follow and or participate in.

#### **Columbia Gas Transmission (TCO) Section 4 Rate Case**

In July, 2020, TCO filed a Section 4 Rate Case (RP20-1060) proposing a system-wide general increase in its transportation and storage tariff effective February 1, 2021. The filing was to have a significant impact on Columbia.

In this filing, TCO proposed changes to (1) its tariff related to penalties, (2) broaden the application of existing (substantive) Critical Day penalties, and (3) broaden its confiscation rights when shippers exceed stated volume limitations in these rate schedules.

Columbia opposed these proposals vigorously and participated at the FERC and in Customer Group deliberations to safeguard the interests of its rate payers and its (Columbia's) operating flexibilities.

At the end of the long negotiations and deliberations, there were two outcomes that are vital to Columbia and its rate payers:

On August 4, 2021, The FERC issued an uncontested partial settlement. TCO withdrew the most debated (and opposed by customers) parts of its proposed tariff records:

- (i) establishing a new nominal Daily Scheduling Penalty;
- (ii) expanded application of substantive Critical Day penalties to violations of interruption orders, operational flow orders and unauthorized storage withdrawals;
- (iii) broadened TCO's rights to confiscate gas when exceed stated storage limits; and
- (iv) revised the treatment of hourly takes exceeding 1/24<sup>th</sup> of Maximum Daily Delivery Obligations or Daily Delivery Quantity.

In November, TCO reached a settlement with the shippers that was accepted by the Settlement Judge. On February 25, 2022, the FERC issued an Order stating, "We find that the uncontested Settlement appears to be fair and reasonable and in the public interest."

## **Grid Resiliency & Green House Gases**

One issue that the FERC has been reviewing for several years is the potential impact on gas supply and gas flow during supply crisis to power plants. These Grid Resiliency (AD18-7, RM18-1) impact both the gas and the power industry.

Since more and more power generating plants are using natural gas, assuring Grid Resiliency in a rare time of crisis could mean diverting gas supplies away from traditional users to gas fired power plants. For the time being, the FERC has directed only the power generators and RTOs to develop and implement resiliency measures to suit their regions and members. Although these dockets are active at the FERC, no significant developments have taken place since Columbia's last rate case.

## **Certification of New Interstate Natural Gas Facilities Interim GHG Policy Statement (PL21-3)**

In 2018, the FERC undertook a review of its policy on certification of new natural gas facilities (PL18-1). Given that much has changed since the prior review nearly twenty years ago, this undertaking is timely, comprehensive, and of interest to most stakeholders. According to the FERC, the drivers behind this initiative are:

1. A revolution in natural gas production technology,
2. New geographical areas of major natural gas production,
3. Changes in the flow of natural gas with pipeline becoming bidirectional or reversing,
4. Customers entering into long-term precedent agreements, and
5. An increased focus on environmental concerns, including greenhouse gas (GHG) emissions.

On February 17, 2022, FERC issued two policy statements providing guidance for future consideration of natural gas projects by the Commission. These statements provide an analytical framework for environmental and public interest issues that arise when companies seek to build new natural gas facilities. The certificate policy statement and interim greenhouse gas (GHG) policy statement are intended to improve the legal durability of the Commission's natural gas certificate decisions following a series of court decisions raising concerns about the Commission's prior approach.

The updates to the certificate policy statement include the first revision in more than 20 years to the Commission's policy for the certification of new interstate natural gas projects under section 7 of the Natural Gas Act (NGA). With the interim GHG Policy statement, the Commission is taking a critical step in clarifying how it will address GHG emissions under the NGA and National Environmental Policy Act (NEPA) for proposed pipeline projects.

The updates policy reaffirms the goals and objectives of the FERC's 1999 policy statement, and also clarifies how it will execute its public interest obligations under the NGA. In the future, the FERC will consider all impacts of a proposed project, including economic and environmental impacts. It updated policy also calls for a robust consideration of impacts to landowners and environmental justice communities.

The Interim GHG Policy sets a threshold of 100,000 metric tons per year of GHG emissions. Proposed projects under consideration with emissions above that level will require the preparation of Environmental Impact Statements (EIS). The FERC will consider proposals by project sponsors to mitigate all or part of their projects' climate change impacts. In quantifying GHG emissions, FERC will also consider emissions resulting from the upstream production and downstream combustion of transported gas.

28. Provide a statement explaining the details of firm gas purchase (long-term) contracts with affiliated and non-affiliated utilities, including determination of costs, terms of contract, and other pertinent information.

Response: Columbia Gas of Pennsylvania, Inc. does not have any firm gas purchase (long-term) contracts with affiliated or non-affiliated utilities.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.52(c)

2. A detailed balance sheet of the utility as of the close of the period referred to in subsection (b)(2) of this section.

Response:

Refer to Exhibit No. 1, Schedule 1, for a balance sheet for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.52(c)

6. A brief description of a major change in the operating or financial condition of the utility occurring between the date of the balance sheet required by paragraph (2) of this subsection and the date of transmittal of the tariff, revision or supplement. As used in this paragraph, a major change is one which materially alters the operating or financial condition of the utility from that reflected in paragraphs (1)-(5) of this subsection.

Response:

Refer to Exhibit No.1, Schedule No.2, for a brief description of any major change in the operating or financial condition of Columbia Gas of Pennsylvania, Inc.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 II. RATE OF RETURN  
A. ALL UTILITIES

18. Set forth amount of total cash (all cash accounts) on hand from balance sheets for last 24-calendar months preceding test year-end.

Response:

Refer to Exhibit No. 1, Schedule 3, for monthly cash balances of Columbia Gas of Pennsylvania, Inc. from December 2019 through November 2021.

23. List details and sources of "Other Property and Investment," "Temporary Cash Investments" and "Working Funds" on test year-end balance sheet.

Response:

For Columbia Gas of Pennsylvania, Inc. at November 30, 2021 the details are provided as follows:

Other Property and Investments - See Exhibit No. 1, Schedule 6

Temporary Cash Investments - See Exhibit No. 1, Schedule 7

Working Funds - See Exhibit No. 1, Schedule 7

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 II. RATE OF RETURN  
C. GAS UTILITIES ONLY

1. Provide test year monthly balances for "Current Gas Storage" and notes financing such storage.

Response:

Refer to Exhibit No. 1, Schedule 5, for monthly balances of Current Gas Storage of Columbia Gas of Pennsylvania, Inc. for the twelve months ended November 30, 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

1. Provide a comparative balance sheet for the test year and the preceding year which corresponds with the test year date.

Response:

Refer to Exhibit No. 1, Schedule 1, for a comparative balance sheet for Columbia Gas of Pennsylvania, Inc. at November 30, 2020 and 2021.

2. Set forth the major items of Other Physical Property, Investments in Affiliated Companies and Other Investments.

Response:

Refer to Exhibit No. 1, Schedule 6, for details of other physical property, investments in affiliated companies and other investments for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

3. Supply the amounts and purpose of Special Cash Accounts of all types, such as:
- a. Interest and Dividend Special Deposits.
  - b. Working Funds other than general operating cash accounts.
  - c. Other special cash accounts and amounts (Temporary cash investments).

Response:

Refer to Exhibit No. 1, Schedule 7, for Special Cash Accounts of all types for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

4. Describe the nature and/or origin and amounts of notes receivable, accounts receivable from associated companies, and any other significant receivables, other than customer accounts, which appear on the balance sheet.

Response:

Refer to Exhibit No. 1, Schedule 8, for Notes Receivable, Accounts Receivable from Associated Companies and other significant receivables for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

5. Provide the amount of accumulated reserve for uncollectible accounts, method and rate of accrual, amounts accrued, and amounts written-off in each of the last three years.

Response:

Refer to Exhibit No. 1, Schedule 9, for details of the reserve for Uncollectible Accounts for Columbia Gas of Pennsylvania, Inc. for the twelve months ended December 31, 2019, 2020 and 2021.

6. Provide a list of prepayments and give an explanation of special prepayments.

Response:

Refer to Exhibit No. 1, Schedule 10, for details of prepayments for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

7. Explain in detail any other significant (in amount) current assets listed on balance sheet.

Response:

Refer to Exhibit No. 1, Schedule 11, for details of other significant current assets listed on the balance sheet of Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

8. Explain in detail, including the amount and purpose, the deferred asset accounts that currently operate to effect or will at a later date effect the operating account supplying:
- a. Origin of these accounts
  - b. Probable changes to this account in the near future
  - c. Amortization of these accounts currently charged to operations or to be charged in the near future.
  - d. Method of determining yearly amortization for the following accounts:
    - Temporary Facilities
    - Miscellaneous Deferred Debits
    - Research and Development
    - Property Losses
    - Any other deferred accounts that affect operating results

Response:

Refer to Exhibit No. 1, Schedule 12, for details of deferred asset accounts on the balance sheet of Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

9. Explain the nature of accounts payable to associated companies, and note amounts of significant items.

Response:

Refer to Exhibit No. 1, Schedule 13, for details of Accounts Payable to Associated Companies for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

10. Provide details of other deferred credits as to their origin and disposition policy (e.g.—amortization).

Response:

Refer to Exhibit No. 1, Schedule 14, for details of other deferred credits for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

11. Supply basis for Injury and Damages reserve and amortization thereof.

Response:

Refer to Exhibit No. 1, Schedule 15, for analysis of the Injury and damages reserve and amortization for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

12. Provide details of any significant reserves, other than depreciation, bad debt, injury and damages, appearing on balance sheet.

Response:

Refer to Exhibit 1, Schedule 16, for analysis of other reserve balances for Columbia Gas of Pennsylvania, Inc. at November 30, 2021.

13. Provide an analysis of unappropriated retained earnings for the test year and three preceding calendar years.

Response:

Refer to Exhibit No. 1, Schedule 17, for the Unappropriated retained earnings for Columbia Gas of Pennsylvania, Inc. for calendar years 2018, 2019, 2020, and the eleven months ended November 30, 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

1. If Unrecovered Fuel Cost policy is implemented, provide the following:
  - a. State manner in which amount of Unrecovered Fuel Cost on balance sheet at the end of the test year was determined, and the month in test year in which such fuel expense was actually incurred. Provide amount of adjustment made on the rate case operating account for test year end unrecovered fuel cost. (If different than balance sheet amount, explain.)
  - b. Provide amount of Unrecovered Fuel Cost that appeared on the balance sheet at the opening date of the test year, and the manner in which it was determined. State whether this amount is in the test year operating account.

Response:

Refer to Exhibit No. 1, Schedule 18, Pages 3 and 4, for details of Unrecovered Fuel Cost for Columbia Gas of Pennsylvania, Inc. at November 30, 2021 and December 1, 2020.

2. Provide details of items and amounts comprising the accounting entries for Deferred Fuel Cost at the beginning and end of the test year.

Response:

Refer to Exhibit No. 1, Schedule 18, Page 5, for details of entries for Deferred Fuel Cost for Columbia Gas of Pennsylvania, Inc. for the twelve months ended November 30, 2021.

32. Provide a schedule showing the calculation of any deferred fuel costs shown in Account 191. Also, explain the Accounting, with supporting detail, for any associated income taxes.

Response:

Effective with the 2017 federal return the Company follows the book method of accounting resulting in \$0 Deferred Income Taxes on deferred purchase gas costs as of December 31, 2017 and forward.

COLUMBIA GAS OF PENNSYLVANIA, INC

53.52 (b)

2. The operating income statement of the utility for a 12-month period, the end of which may not be more than 120 days prior to the filing.

Response:

Exhibit No. 102 Schedule No. 3 outlines the operating income statement for the twelve months ending November 30, 2022 (future test year) and twelve months ending December 31, 2023 (fully projected future test year).

53.52 (c)

5. A statement of operating income, setting forth the operating revenues and expenses by detailed accounts for the 12-month period ending on the date of the balance sheet required by paragraph (2).

Response:

Exhibit 103 sets forth the operating revenues for the twelve months ending November 30, 2022 (future test year) and twelve months ending December 31, 2023 (fully projected future test year).

Exhibit 104 sets forth the operating expenses for the twelve months ending November 30, 2022 (future test year) and twelve months ending December 31, 2023 (fully projected future test year).

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

18. Provide comparative operating statements for the test year and the immediately preceding 12 months showing increases and decreases between the two periods. These statements should supply detailed explanation of the causes of the major variances between the test year and preceding year by detailed account number.

Response:

See Exhibit No. 2, Schedule No. 5.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

42. If a company has separate operating divisions, an income statement must be shown for each division, plus an income statement for company as a whole.

Response:

Columbia Gas of Pennsylvania has no separate operating divisions.

43. If a company's business extends into different states or jurisdictions, then statements must be shown listing Pennsylvania jurisdictional data, other state data and federal data separately and jointly (Balance sheets and operating accounts).

Response:

Pennsylvania jurisdictional data does not include other state data.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

16. If revenue accruing entries are made on the books at end of each fiscal period, give entries made accordingly at the end of the test year and at the beginning of the year. State whether they are reversed for ratemaking purposes.

Response:

See Exhibit No. 2, Schedule No. 7.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

21. If a gas company is affiliated with another utility segment, such as a water or electric segment, explain the effects, if any, upon allocation factors used in the gas rate filing of current or recent rate increases allowed to the other utility segment (or segments) of the company.

Response:

Columbia Gas of Pennsylvania, Inc. does not have another segment, such as water or electric.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.52(a)

Whenever a public utility, other than a canal, turnpike, tunnel, bridge or wharf company files a tariff, revision or supplement effecting changes in the terms and conditions of service rendered or to be rendered, it shall submit to the Commission, with the tariff, revision or supplement, statements showing all of the following:

2. The total number of customers served by the utility.

Response:

See Exhibit No. 3.

3. A calculation of the number of customers, by tariff subdivision, whose bills will be affected by the change.

Response:

See Exhibit No. 103, Pages 8 through 9.

4. The effect of the change on the utility's customers.

Response:

See Exhibit No. 103, Schedule 7, Pages 6-10.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.52(b)

Whenever a public utility, other than a canal, turnpike, tunnel, bridge or wharf company files a tariff, revision or supplement which will increase or decrease the bills to its customers, it shall submit in addition to the requirements of subsection (a), to the Commission, with the tariff, revision or supplement, statements showing the following:

2. The operating income statement of the utility for a 12-month period, the end of which shall not be more than 120 days prior to such filing.

Response: Columbia Gas of Pennsylvania, Inc. has used a historic test year in this rate filing of November 30, 2021. The "Per Books" operating revenues are shown on page 9, Exhibit 3 for the historic test year.

3. A calculation of the number of customers, by tariff subdivision, whose bills will be increased.

Response: See Exhibit No. 103, pages 8 through 9.

4. A calculation of the total increases, in dollars, by tariff subdivision, projected to an annual basis.

Response: For the calculation of the total changes, in dollars by tariff subdivision, for the fully projected future test year, the twelve months ending December 31, 2023, see Exhibit No. 103, pages 8 through 9.

5. A calculation of the number of customers, by tariff subdivision, whose bills will be decreased.

Response: See Exhibit No. 103, pages 8 through 9.

6. A calculation of the total decreases, in dollars, by tariff subdivision, projected to an annual basis.

Response: For the calculation of the total changes, in dollars by tariff subdivision, for the fully projected future test year, the twelve months ending December 31, 2023, see Exhibit No. 103, pages 8 through 9.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. E

4. Provide detailed calculations substantiating the adjustments to revenues for annualization of changes in number of customers and annualization of changes in volume sold for all customers for the test year.
  - a. Breakdown changes in number of customers by rate schedules.
  - b. If an annualization adjustment for changes in customers and changes in volume sold is not submitted, please explain.

Response: See Exhibit No. 103, Schedule Nos. 2 and 3.

6. Supply, by classification, Operating Revenues - Miscellaneous for test year.

Response: See Exhibit No. 103, page 14.

8. Describe how the net billing and gross billing is determined. For example, if the net billing is based on the rate blocks plus FCA and STA, and the gross billing is determined by a percentage increase (1, 3 or 5 percent), then state whether the percentage increase is being applied to all three items of revenue - rate blocks plus FCA and STA.

Response: Columbia Gas of Pennsylvania, Inc. does not have a provision for gross and net billing in its tariff.

9. Describe the procedures involved in determining whether forfeited discounts or penalties are applied to customer billing.

Response: If the customer fails to pay the full amount of any bill a delayed payment penalty charge of one and one-quarter percent (1 ¼ %) per month will accrue on the portion of the bill that is unpaid on the due date.

10. Provide annualization of revenues as a result of rate changes occurring during the year, at the level of operations as of the end of the test year.

Response: See Exhibit No. 103, page 15.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. E

11. Provide a detailed billing analysis supporting present and proposed rates by customer classification and/or tariff rate schedule.

Response: See Exhibit No. 103, Schedules 1 through 8.

13. Provide a schedule of present and proposed tariff rates showing dollar change and percent change by block. Also, provide an explanation of any change in block structure and the reasons therefore.

Response: See Exhibit No. 103, Schedules 1 through 8.

14. Provide the following statements and schedules. The schedules and statements for the test year portion should be reconciled with the summary operating statement.

- a. An operating revenues summary for the test year and the year preceding the test year showing the following (Gas Mcf):
- (i) For each major classification of customers
    - (a) MCF sales
    - (b) Dollar Revenues
    - (c) Forfeited discounts (Total if not available by classification)
    - (d) Other and miscellaneous revenues that are to be taken into the utility operating account along with their related costs and expenses.
  - (ii) A detailed explanation of all annualizing and normalizing adjustments showing method utilized and amounts and rates used in calculation to arrive at adjustment.
  - (iii) Segregate, from recorded revenues from the test year, the amount of revenues that are contained therein, by appropriate revenue categories, from:
    - (a) Fuel Adjustment Surcharge.
    - (b) State Tax Surcharge.
    - (c) Any other surcharge being used to collect revenue.
    - (d) Provide explanations if any of the surcharges are not applicable to respondent's operations.

Response: See Exhibit No. 103, Schedules 1 through 8.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. E

15. State manner in which revenues are being presented for ratemaking purposes:
- a. Accrued Revenues
  - b. Billed Revenues
  - c. Cash Revenues
- Provide details of the method followed.

Response: Revenues are reported for ratemaking purposes on an "as billed" basis. Adjustments for ratemaking purposes appear in Exhibit No. 103.

20. Provide for test year only, a schedule by tariff rates and by service classifications showing proposed increase and percent of increase.

Response: Please refer to Exhibit No. 103, Schedule 8, Page 1.

37. In determining pro forma expense, exclude cost of gas adjustments applicable to fuel adjustment clause and exclude fuel adjustment clause revenues, so that the operating statement is on the basis of base rates only.

Response: See Exhibit No. 103, Schedule 1 summaries.

10	Annual Normalization (based on 12 mos.)	<u><b>1,254,200</b></u>

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

21. Submit detailed computation of adjustments to operating expenses for salary, wage and fringe benefit increases (union and non-union merit, progression, promotion and general) granted during the test year and six months subsequent to the test year. Supply data showing for the test year:
- a. Actual payroll expenses (regular and overtime separately) by categories of operating expenses, i.e. maintenance, operating transmission, distribution, other.
  - b. Date, percentage increase, and annual amount of each general payroll increase during the test year.
  - c. Dates and annual amounts of merit increases or management salary adjustments.
  - d. Total annual payroll increases in the test year.
  - e. Proof that the actual payroll plus the increases equal the payroll expense claimed in the supporting data (by categories of expenses).
  - f. Detailed list of employee benefits and costs thereof for union and nonunion personnel. Any specific benefits for executives and officers should also be included, and cost thereof.
  - g. Support the annualized pension cost figures.
    - (i) State whether these figures include any unfunded pension costs.  
Explain
    - (ii) Provide latest actuarial study used for determining pension accrual rates.
  - h. Submit a schedule showing any deferred income and consultant fee to corporate officers or employees.

Response: Refer to Exhibit No. 4, Schedule Nos. 2, 5, 6 and 7.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

25. Submit details of expenditures for advertising (National and Institutional and Local Media). Provide a schedule of advertising expense by major media categories for the test year and the prior two comparable years with respect to:
- a. Public health and safety.
  - b. Conservation of energy.
  - c. Explanation of Billing Practices, Rates, etc.
  - d. Provision of factual and objective data programs in educational institutions.
  - e. Other advertising programs.
  - f. Total advertising expense.

Response:

For a schedule of advertising expense by major media categories for the twelve months ended November 30, 2021, 2020 and 2019, refer to Exhibit 4, Schedule 8.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

29. Submit details of information covering research and development expenditures, including major projects within the company and forecasted company programs.

Response:

Please see Exhibit No. 4, Schedule 9, Page 1 for amounts included in the budget related to research and development.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

33. Provide a labor productivity schedule.

Response:

Please see Exhibit No. 4, Schedule No. 10.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

22. Supply an exhibit showing an analysis, by functional accounts of the charges by affiliates (Service Corporation, etc.) for services rendered included in the operating expenses of the filing company for the test year and for the 12-month period ended prior to the test year:
- a. Supply a copy of contracts, if applicable.
  - b. Explain the nature of the services provided.
  - c. Explain basis on which charges are made.
  - d. If charges allocated, identify allocation factors used.
  - e. Supply the components and amounts comprising the expense in this account.
  - f. Provide details of initial source of charge and reason thereof.

Response:

Refer to Exhibit No. 4, Schedule No. 11.

23. Describe costs relative to leasing equipment, computer rental, and office space, including terms and conditions of the lease. State the method of calculating monthly or annual payments.

Response:

Refer to Exhibit No. 4, Schedule No. 12.

24. Submit detailed calculations (or best estimates) of the cost resulting from major storm damages.

Response:

Refer to Exhibit No. 4, Schedule No. 13.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

27. Prepare a detailed schedule for the test year showing types of social and service organization memberships paid for by the Company and the cost thereof.

Response:

Refer to Exhibit No. 4, Schedule No. 14, page 2.

28. Submit a schedule showing, by major components, the expenditures associated with Outside Services Employed, Regulatory Commission Expenses and Miscellaneous General Expense, for the test year and prior two comparable years.

Response:

See Exhibit No. 4, Schedule No. 14, Pages 3 through 5, for an analysis of Account 923-Outside Services Employed, Account 928-Regulatory Commission Expense and Account 930-Miscellaneous General Expenses for the twelve months ended November 30, 2021, 2020, and 2019.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

29. Provide intrastate operations percentages by expense categories for two years prior to the test year.

Response:

Refer to Exhibit No. 4, Schedule No. 17, for intrastate operations percentages for the twelve months ended November 30, 2019, 2020 and 2021.

33. Submit a schedule showing maintenance expenses, gross plant and the relation of maintenance expenses thereto as follows:
- (i) Gas Production Maintenance Expenses per Mcf production, per \$1,000 Mcf production, and per \$1,000 of Gross Production Plant;
  - (ii) Transmission Maintenance Expenses per MMCF mile and per \$1,000 of Gross Transmission Plant;
  - (iii) Distribution Maintenance Expenses per customer and per \$1,000 of Gross Distribution Plant;
  - (iv) Storage Maintenance Expenses per MMCF of Storage Capacity and per \$1,000 of Gross Storage Plant. This schedule shall include three years prior to the test year, the test year and one year's projection beyond the test year.

Response:

Refer to Exhibit No. 4. Schedule No. 18.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

30. Provide a detailed schedule of all charitable and civic contributions by recipient and amount for the test year.

Response:

See Exhibit No.4, Schedule No. 15, for a detailed schedule of Charitable and Civic Contributions for the company for the Twelve Months Ended November 30, 2021.

31. Provide a detailed analysis of Special Services - Account 795.

Response:

The system of Accounts does not include Account 795 as special services; See Exhibit No. 4, Schedule No. 14, for Analysis of Outside Services Employed - Account 923.

32. Provide a detailed analysis of Miscellaneous General Expenses - Account No. 801.

Response:

The system of accounts does not include Account 801 as Miscellaneous General Expense; See Exhibit No. 4, Schedule No. 14, for an Analysis of Account 930 - Miscellaneous General Expense.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

34. List and explain all non-recurring, abnormal or extraordinary expenses incurred in the test year which will not be present in future years.

Response:

See Exhibit No.4, Schedule No. 16.

35. List and explain all expenses included in the test year which do not occur yearly but are of a nature that they do occur over an extended period of years. (e.g. Non-yearly maintenance programs, etc.)

Response:

See Exhibit No.4, Schedule No. 16.

36. Using the adjusted year's expenses under present rates as a base, give detail necessary for clarification of all expense adjustments. Give clarifying detail for any such adjustments that occur due to changes in accounting procedure such as charging a particular expense to a different account than was used previously. Explain any extraordinary declines in expense due to such change of account use.

Response:

Refer to Exhibit 4, Schedule No. 16.

37. Indicate the expenses that are recorded in the test year, which are due to the placement in operating service of major plant additions or the removal of major plant from operating service, and estimate the expense that will be incurred on a full-year's operation.

Response:

Columbia is not projecting any change in expenses due to the placement of major plant additions into service, or the removal of major plant from service.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

38. Submit a statement of past and anticipated changes, since the previous rate case, in major accounting procedures.

Response:

See Exhibit No. 4, Schedule No. 16.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 Ill. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

35. Submit a schedule showing Gross Receipts Tax Base used in computing Pennsylvania Gross Receipts Tax Adjustment.

Response:

Effective January 1, 2000, the Utility Gross Receipts Tax is not imposed on sales of natural gas. Consequently, there were no amounts computed or included for utility gross receipts taxes.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

50. Provide a schedule of federal and Pennsylvania taxes, other than income taxes, calculated on the basis of test year per books, pro forma at present rates, and pro forma at proposed rates, to include the following categories:
- a. social security
  - b. unemployment.
  - c. capital stock.
  - d. public utility realty.
  - e. P.U.C. assessment.
  - f. other property.
  - g. any other appropriate categories.

Response:

Refer to Exhibit No. 106, Schedule No. 2, Pages No. 2 through No. 4. Pennsylvania has eliminated the capital stock tax for all taxpayers effective for years beginning on or after January 1, 2016. Consequently, there were no amounts included for capital stock taxes. The P.U.C. assessment is referenced on Exhibit No. 104, Schedule No. 1, Page No. 2, Line No. 19.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

48. Provide a copy of the latest capital stock tax report and the latest capital stock tax settlement.

Response: Pennsylvania has eliminated the capital stock tax for all taxpayers effective for years beginning on or after January 1, 2016. Consequently, there were no amounts included for capital stock tax.

49. Submit details of calculations for Taxes, Other than Income where a company is assessed taxes for doing business in another state, or on its property located in another state.

Response:

Columbia Gas of Pennsylvania, Inc. maintains several contracts for the storage of gas in states outside Pennsylvania. The current amounts presented on Exhibit No. 106, Schedule No. 2, Page No. 4, Lines No. 5 include property tax for gas storage maintained in West Virginia as follows:

<u>Type of Tax</u>	<u>“FTY Schedule” For the 12 Months Ended 11/30/2022</u>	<u>“FPFTY schedule” For the 12 Months Ended 12/31/2023</u>
Property – Storage	188,540	158,098

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 II. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

8. State amount of debt interest utilized for income tax calculations, and details of debt interest computations, under each of the following rate case bases:
- a. Actual test year
  - b. Future test year
  - c. Fully Projected Future Test Year

Response: See Exhibit No. 2, Schedule No. 3, Page No. 4 for detail of the debt interest computation for the actual test year (HTY) and Exhibit No. 102, Schedule No. 3, Page No. 4 for detail of the debt interest computation for the annualized test year (FPFTY) and proposed test year at proposed rates.

a.	Actual test year	\$45,932,535
b.	Annualized test year-end	\$51,937,957
c.	Proposed test year-end	\$58,870,071

9. State amount of debt interest utilized for income tax calculations which has been allocated from the debt interest of an affiliate, and details of the allocation, under each of the following rate case bases:
- a. Actual test year
  - b. Annualized test year-end
  - c. Proposed test year-end

Response: The Company is reflecting a Columbia Gas of Pennsylvania, Inc. capital structure in its claim. No interest has been allocated from an affiliate.

26. Provide the following income tax data:

- a. Consolidated income tax adjustment, if applicable.
- b. Interest for tax purposes (basis.)

Response: The income tax data for the future test year and fully projected future test year presented on the following schedules:

- a. The Company does not have a consolidated income tax adjustment.
- b. The Interest included in the tax computation is presented on Exhibit No. 107, Page No. 16, Line No. 9.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

51. Submit a schedule showing for the last five years the income tax refunds, plus interest (net of taxes), received from the federal government due to prior years' claims.

Response: See Exhibit No.7, Page 6.

52. Provide detailed computations showing the deferred income taxes derived by using accelerated tax depreciation applicable to post-1969 utility property increases productive capacity and ADR rates on property. (Separate between state and federal; also, rate used).
- a. State whether tax depreciation is based on all rate base items claimed as of the end of the test year, and whether it is the annual tax depreciation at the end of the test year.
  - b. Reconcile any difference between the deferred tax balance, as shown as a reduction to measures of value (rate base), and the deferred tax balance as shown on the balance sheet.

Response: See Exhibit No. 107, Page 3 and Page 3a, showing the computation of deferred income taxes. Detailed reports are too voluminous to attach.

- a. Tax depreciation is based on all rate base items claimed at the end of the test year. Federal tax depreciation (including Bonus for years prior to 2018) of \$132,077,487 is the annual tax depreciation at the end of the fully projected future test year.
- b. See Exhibit No. 107, Page 3 and Page 3a.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

54. Submit a schedule showing a breakdown of accumulated investment tax credits (3 percent, 4 percent, 7 percent, 10 percent and 11 percent), together with details of methods used to write-off the unamortized balances.

Response:

See Exhibit No. 107, Pages 7 and 7a.

55. Submit a schedule showing the adjustments for taxable net income per books (including below-the-line items) and pro forma under existing rates together with an explanation of any difference between the adjustments. Indicate charitable donations and contributions in the tax calculation for rate making purpose.

Response:

See Exhibit No. 107, Pages 8 and 9.

56. Submit detailed calculations supporting taxable income before state and federal income taxes where the income tax is subject to allocation due to operations in another state, or due to operation of other taxable utility or non-utility business, or by operating divisions or areas.

Response:

Columbia Gas of Pennsylvania has a proprietary interest in underground gas stored in other states. The company also makes off-system gas sales that are allocated for tax purposes to states other than Pennsylvania.

The ownership of the stored gas and the off-system gas sales noted above have created certain tax liabilities in the state jurisdiction where the gas is located or the sale allocated. This, in turn, has created a decrease in taxable income apportioned to the Commonwealth of Pennsylvania for state income tax calculations. The overall impact on the company's state income tax effective rate is not material compared to the 9.99% Pennsylvania rate that is included in base rates.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

57. Submit detailed calculations showing the derivation of deferred income taxes for amortization of repair allowance if such policy is followed.

Response:

Not applicable. The company has not elected the ADR repair allowance for federal income tax purposes.

58. Furnish a breakdown of major items comprising prepaid and deferred Income tax charges and other deferred income tax credits and reserves by accounting areas.

Response:

Please refer to Exhibit No.107, Pages 8, 9, 16 and 17, for a complete breakdown of the income tax calculation including deferred tax charges and credits.

59. Provide details of the Federal Surtax Credit allocated to the Pennsylvania jurisdictional area, if applicable.

Response:

Not applicable.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

60. Explain the reason for the use of cost of removal of any retired plant figures in the income tax calculations.

Response: For retired plant which was originally installed prior to 1971, the cost of removal has been used to make a reducing adjustment to the reserve for depreciation for tax reporting purposes under the mass asset accounting provisions of the Internal Revenue Code. For plant installed after vintage year 1970, cost of removal may be deducted as a current expense as allowed under the Asset Depreciation Range and the Accelerated Cost Recovery System (ACRS) regulations, including the modified ACRS prescribed by the Tax Reform Act of 1986. The income tax effect of the deductible removal costs has been flowed through for book purposes in accordance with the final opinion and order in Case R-832493.

61. Submit the corresponding data applicable to Pennsylvania Corporate Income Tax deferment.

a. Show the amounts of straight line tax depreciation and accelerated tax depreciation, the difference between which gave rise to the normalizing tax charged back to the test year operating statement.

b. Show normalization for both Federal and State Income Taxes.

c. Show tax rates used to calculate tax deferment amount.

Response: See Exhibit No. 107, Page 3. This response to Regulation 53.53 III A.52 details the deferred federal income tax and tax rate used to calculate the normalization of accelerated depreciation. State accelerated depreciation is not normalized.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

62. Provide the accelerated tax depreciation and the book depreciation used to calculate test year deferrals in amounts segregated as follows: For:
- a. Property installed prior to 1970.
  - b. Property installed subsequent to 1969 (indicate increasing capacity additions and nonincreasing capacity additions).

Response:

- a. No tax deferrals have been booked, or included in the filing, for property installed prior to 1970.
  - b. See Exhibit No. 107, Page 3. This response to Regulation 53.53 III A.52 details the tax and book depreciation on property installed subsequent to 1969.
63. State whether all tax savings due to accelerated depreciation on property installed prior to 1970 have been passed through to income. (If not, explain).

Response: All tax savings due to accelerated depreciation on property installed prior to 1970 have been passed through to income.

64. Show any income tax loss/gain carryovers from previous year that may affect test year income taxes or future year income taxes. Show loss/gain carryovers by years of origin and amounts remaining by years at the end of the test year.

Response: Columbia Gas of Pennsylvania, Inc. incurred a tax loss in tax year 2008, 2010, 2011, 2012, 2013 and 2017. The loss for federal purposes offset income from prior years as well as income from other subsidiaries. For state income purposes, see Exhibit No. 7, Page 23.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

65. State whether the company eliminates any tax savings by the payment of actual interest on construction work in progress not in rate base claim.  
If response is affirmative:

- a. Set forth amount of construction claimed in the tax savings reduction. Explain the basis for this amount.
- b. Explain the manner in which the debt portion of this construction is determined for purposes of the deferral calculation.
- c. State the interest rate used to calculate interest on this construction debt portion, and the manner in which it is derived.
- d. Provide details of calculation to determine tax savings reduction. State whether state taxes are increased to reflect the construction interest elimination.

Response: The company does not. The company capitalizes interest under section 263A of the Internal Revenue Code for tax purposes. This may result in more or less interest capitalized compared to the books. Deferred income taxes are required on ACRS basis differences and are accordingly booked.

66. Provide a detailed analysis of Taxes Accrued per books as of the test year date. Also supply the basis for the accrual and the amount of taxes accrued monthly.

Response: The actual taxes accrued per books are shown on Exhibit No.7, Pages 26-28.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

67. For the test year as recorded on test year operating statement:
- a. Supply the amount of federal income taxes actually paid.
  - b. Supply the amount of the federal income tax normalizing charge to tax expense due to excess of accelerated tax depreciation over book depreciation.
  - c. Supply the normalizing tax charge to federal income taxes for the 10% Job Development Credit during test year.
  - d. Provide the amount of the credit of federal income taxes due to the amortization or normalizing yearly debit to the reserve for the 10% Job Development Credit.
  - e. Provide the amount of the credit to federal income taxes for the normalizing of any 3% Investment Tax Credit Reserve that may remain on the utility books.

Response: The actual taxes as recorded on the books are shown in Exhibit No.7,  
Page 29.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

68. Provide the debit and credit in the test year to the Deferred Taxes due to Accelerated Depreciation for federal income tax, and provide the debit and credit for the Job Development Credits (whatever account) for test year.

Response:

DATA FOR 12-MONTH PERIOD ENDING DECEMBER 31, 2023

Projected accounting entries for:

- a. Accelerated Depreciation Deferred

Dr. 41011000	Accumulated Deferred Income Taxes	\$6,732,106
Cr. 28205000	Deferred Federal Income Tax	\$6,732,106

- b. Amortization of Job Development Credits

Dr. 25500000	Deferred Investment Tax Credit	\$221,354
Cr. 41141000	Deferred Federal Income Tax	\$221,354

69. Reconcile all data given in answers to questions on income taxes charged on the test year operating statement with regard to income taxes paid, income taxes charged because of normalization and credits due to yearly write-offs of past years' income tax deferrals, and from normalization of investment tax and development credits. (Both state and federal income taxes.)

Response: Refer to the following schedules which detail the requirements of these items.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

70. With respect to determination of income taxes, federal and state:
- a. Show income tax results of the annualizing and normalizing adjustments to the test year record before any rate increase.
  - b. Show income taxes for the annualized and normalized test year.
  - c. Show income tax effect of the rate increase requested.
  - d. Show income taxes for the normalized and annualized test year after application of the full rate increase.  
[It is imperative that continuity exists between the income tax calculations as recorded for the test year and the final income tax calculation under proposed rates. If the company has more than one accounting area, the additional separate worksheets must be provided in addition to those for total company.]

Response: See Exhibit No.102 and Exhibit No.107, Pages 16 and 17, for the income tax results of the various annualization and adjustments made to the future test year.

71. In adjusting the test year to an annualized year under present rates, explain any changes that may be due to book or tax depreciation change and to debits and credits to income tax expense due to accelerated depreciation, deferred taxes, job development credits, tax refunds or other items. (The above refers only to the adjustments going from recorded test year to annualized test year).

Response: Refer to Exhibit No. 107, Pages 7, 8, 9, 16 and 17.

COLUMBIA GAS OF PENNSYLVANIA, INC

53.53 II. RATE OF RETURN

A. ALL UTILITIES

10. Under Section 1552 of the Internal Revenue Code and Regulations 1.1552-1 thereunder, if applicable, Parent Company, in filing a consolidated income tax return for the group, must choose one of four options by which it must allocate total income tax liability of the group to the participating members to determine each member's tax liability to the federal government. (If this interrogatory is not applicable, so state.)
- a. State what option has been chosen by the group.
  - b. Provide, in summary form, the amount of tax liability that has been allocated to each of the participating members in the consolidated income tax return.
  - c. Provide a schedule, in summary form, of contributions, which were determined on the basis of separate tax return calculations, made by each of the participating members to the tax liability indicated in the consolidated group tax return. Provide total amounts of actual payments to the tax depository for the tax year, as computed on the basis of separate returns of members.
  - d. Provide annual income tax return for group, and if income tax return shows net operating loss; provide details of amount of net operating loss allocated to the income tax returns of each of the members of the consolidated group.

Response: See Exhibit No.7, Page 33.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.52 C

If a public utility files a tariff, revision, or supplement which it is calculated will increase the bills of a customer or a group of customers by an amount, when projected to an annual basis, exceeding 3% of the operating revenues of the utility - subsection (b)(4) divided by the operating revenues of the utility for a 12-month period as defined in subsection (b)(2) - or which it is calculated will increase the bills of 5% or more of the number of customers served by the utility – subsection (b)(3) divided by subsection (a)(2) - it shall submit to the Commission with the tariff, revision, or supplement, in addition to the statements required by subsections (a) and (b), all of the following information:

1. A statement showing the utility's calculation of the rate of return earned in the 12-month period referred to in subsection (b)(2), and the anticipated rate of return to be earned when the tariff, revision, or supplement becomes effective. The rate base used in this calculation shall be supported by summaries of original cost for the rate of return calculation.

Response:

See Exhibit No. 108, Page 2 – response to 53.53 I.A2

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
A. ALL UTILITIES

2. Provide a schedule showing the measures of value and rates of return at the original cost and trended original cost measures of value at the spot, three-year and five-year average price levels. All claims made on this exhibit should be cross-referenced to appropriate exhibits. Provide a schedule similar to the ones listed above, reflecting respondent's final claim in its previous rate case.

Response:

A schedule showing rates of return for Columbia Gas of Pennsylvania, Inc. at November 30, 2022, the end of the future test year, at present rates and at December 31, 2023, the end of the fully projected future test year, at present rates and at proposed rates is found at Exhibit 102.

See the attached Exhibit No. 108, Page 3, for Columbia's adjusted rate base at November 30, 2022 and December 31, 2023. See Exhibit No. 8, Page 4, for Columbia's rate base per books from the last base rate case R-2021-3024296, which was a fully litigated case.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.52 C

If a public utility files a tariff, revision, or supplement which it is calculated will increase the bills of a customer or a group of customers by an amount, when projected to an annual basis, exceeding 3% of the operating revenues of the utility - subsection (b)(4) divided by the operating revenues of the utility for a 12-month period as defined in subsection (b)(2) - or which it is calculated will increase the bills of 5% or more of the number of customers served by the utility – subsection (b)(3) divided by subsection (a)(2) - it shall submit to the Commission with the tariff, revision, or supplement, in addition to the statements required by subsections (a) and (b), all of the following information:

4. A statement showing the amount of depreciation reserve, at the date of the balance sheet required by paragraph (2), applicable to the property, summarized as required by paragraph (3).

Response:

Please see Exhibit No. 108, Schedule No.3.

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.53 I. VALUATION

A. ALL UTILITIES

8. Provide a description of the trending methodology which was utilized. Identify all indexes which were used (include all back up workpapers) and the reasons particular indexes were chosen. If indexes were spliced, indicate which years were utilized in any splices. If indexes were composited, show all supporting calculations. Include any analysis made to "test" the applicability of any indexes.
- a. Supply a comprehensive statement of any changes made in the selection of trend factors or in the methodology used in the current filing compared to the most recent previous rate filing

Response:

See Pa. B. Doc. No, 81-1842 filed November 27, 1981, changing the Commission's Regulations with respect to the filing of trended original cost measures of value. (Refer to Pennsylvania Bulletin Vol. 11, No. 48, Saturday November 28, 1981, pp. 41 57 - 41 58).

9. Provide and exhibit indicating spot trended original cost at test year end by vintage by account and include all applicable depreciation reserves. Include totals by account for all other trended measures of value.

Response:

See Pa. B. Doc, No. 81-1842 filed November 27, 1981, changing the Commission's Regulations with respect to the filing of trended original cost measures of value. (Refer to Pennsylvania Bulletin Vol. 11, No. 48, Saturday November 28, 1981, pp. 4157 - 4158).

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
A. ALL UTILITIES

10. Supply an exhibit indicating the percentages of Undepreciated original cost which were trended with the following indexes:
- a. Boeckh
  - b. Handy-Whitman
  - c. Indexes developed from supplier's prices
  - d. Indexes developed from company records and company price histories
  - e. Construction equipment
  - f. Government statistical releases.

Response:

See Pa. B. Doc. No. 81-1842 filed November 27, 1981, changing the Commission's Regulations with respect to the filing of trended original cost measures of value. (Refer to Pennsylvania Bulletin Vol. 11, No. 48, Saturday November 28, 1981, pp. 41 57 - 41 58).

11. Provide a table, showing the cumulative trended depreciated original cost (at the spot price level) by year of installation for utility plant in service at the end of the test year (depreciable plant only) as claimed in the measures of value, in the following form:
- a. Year Installed
  - b. Trended original cost (at the spot price level) - the total surviving cost associated with each installation year from all plant accounts.
  - c. Trended calculated depreciation reserve - the calculated depreciation reserve associated with each installation year from all plant accounts.
  - d. Depreciated trended original cost - (Column B minus Column C)
  - e. Total - cumulative year by year of the figures from Column D
  - f. Column E divided by the total of the figures in Column D.

Response:

See Pa. B. Doc. No. 81-1842 filed November 27, 1981, changing the Commission's Regulations with respect to the filing of trended original cost measures of value. (Refer to Pennsylvania Bulletin Vol. 11, No. 48, Saturday November 28, 1981, pp. 41 57 - 41 58).

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
A. ALL UTILITIES

12. If a claim is made for construction work in progress, include, in the form of an exhibit, the summary page for all work orders, amount expended at the end of the test year and anticipated in-service dates. Indicate if any of the construction work in progress will result in insurance recoveries, reimbursements, or retirements of existing facilities. Describe in exact detail the necessity of each project claimed if not detailed on the summary page from the work order. Include final completion dates and estimated total amounts to be spent on each project.

Response:

Columbia is not making a claim for construction work in progress for the Fully Projected Future Test Year.

13. If a claim is made for non-revenue producing construction work in progress, include in the form of an exhibit, the summary page from all work orders, amount expended at the end of the Test Year and anticipated in-service dates. Indicate if any of the construction work in progress will result in insurance recoveries, reimbursements, or retirements of existing facilities. Describe in exact detail the necessity of each project claimed if not detailed on the summary page from the work order. Include final completion date and estimated total amounts to be spent on each project.

Response:

Columbia is not making a claim for non-revenue producing construction work in progress for the Forecasted Fully Projected Future Test Year.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
A. ALL UTILITIES

14. If a claim is made for plant held for future use, supply the following:
- a. A description of the plant or land site and its costs.
  - b. Expected date of use for each item claimed.
  - c. Explanation as to why it is necessary to acquire each item in advance of its date of use.
  - d. Date when each item was acquired.
  - e. Date when each item was placed in plant held for future use.

Response:

Columbia is not making a claim for plant held for future use for the Fully Projected Future Test Year.

15. If materials and supplies comprise part of cash working capital claim, provide and exhibit showing the actual book balances for materials and supplies by month for thirteen months prior to the end of the test year. Explain any abrupt changes in monthly balances. (Explain method of determining claim if other than that described above)

Response:

There are no expected abrupt changes in monthly balances for the Fully Projected Future Test Year.

16. If fuel stocks comprise part of the cash working capital claim, provide an exhibit showing the actual book balances (quantity and price) for the fuel inventories by type of fuel for the thirteen months prior to the end of the test year by location, station, etc. (Explain the method of determining claim if other than that described above.)

Response:

Columbia is not making a claim for fuel stock for the Fully Projected Future Test Year.

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.53 I. VALUATION

A. ALL UTILITIES

18. Explain in detail by statement or exhibit the appropriateness of claiming any additional items, not previously mentioned, in the measure of value.

Response:

See Exhibit No. 108, Schedule No.8, for deferred taxes, Exhibit No. 108, Schedule No. 9, for customer deposits, and Exhibit No. 108, Schedule No. 10, for customer advances for construction.

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.53 II. RATE OF RETURN

A. ALL UTILITIES

21. Provide Original Cost, Trended Original Cost and Fair Value rate base claim.

Response:

The rate base claim at original cost as of December 31, 2023, is found above under Regulation 53.53 I.A.2 at Exhibit No. 108, Page 2.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

14. Provide schedules and data in support of the following working capital items:
- a. Prepayments - List and identify all items
  - b. Federal Excise Tax accrued and prepaid.
  - c. Federal Income Tax accrued or prepaid.
  - d. Pa. State Income Tax accrued or prepaid.
  - e. Pa. Gross Receipts Tax accrued or prepaid
  - f. Pa. Capital Stock Tax accrued or prepaid.
  - g. Pa. Pub Utility realty Tax accrued or prepaid.
  - h. State sales tax accrued or prepaid
  - i. Payroll Taxes accrued or prepaid.
  - j. Any adjustment related to the above items for ratemaking purposes.

Response: See Exhibit No. 108, Schedule No.4, for cash working capital (lead/lag), Exhibit No. 108, Schedule No.6, for prepayments working capital, Exhibit No. 108, Schedule No.7, for gas stored underground working capital.

53.53 III BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

15. Supply an Exhibit supporting the claim for working capital requirement based on a lead-lag method.
- a. Pro forma expenses and revenues are to be used in lieu of book data for computing lead-lag days.
  - b. Respondent must either include sales for resale and related expenses in revenues and in expenses or exclude from revenues and expenses.

Response:

Columbia Gas of Pennsylvania, Inc. ("Columbia") is not making a claim for cash working capital. Columbia does not offer wholesale service.

16. Provide detailed calculations showing the derivation of the tax liability offset to gross cash working capital requirements.

Response:

Columbia is not making a claim for cash working capital.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
A. ALL UTILITIES

3. Provide a description of the depreciation methods utilized in calculating annual depreciation amounts and depreciation reserves, together with a discussion of factors which were considered in arriving at estimates of service life and dispersion by account. Provide dates of all field inspections and facilities visited.

Response:

The depreciation methods utilized in calculating annual and accrued depreciation are discussed in Exhibit No. 109 in the section titled "Calculation of Annual and Accrued Depreciation", beginning on page IV-2. The factors considered in arriving at estimates of service life and dispersion by account, begin in the section on page III-2 and the section on page III-8.

Field trips and facilities visited over the years for Columbia Gas of Pennsylvania are presented in Exhibit No.109, in the section "Field Trips", beginning on page III-2.

4. Set forth, in exhibit form, charts depicting the original and estimated survivor curves and a tabular presentation of the original life table plotted on the chart for each account, where the retirement rate method of analysis is utilized.
  - a. If any utility plant was excluded from the measures of value because it was deemed not to be "used and useful" in the public service; supply a detailed description of each item of property.
  - b. Provide the surviving original cost at test year end by vintage by account and include applicable depreciation reserves and annuities.
    - (i) These calculations should be provided for plant in service as well as other categories of plant, including, but not limited to, contributions in aid of construction, customers' advances for construction, and anticipated retirements associated with any construction work in progress claims (if applicable).

Response:

The charts depicting the original and estimated survivor curves, and a tabular presentation of the original life table plotted on the chart for each account where the retirement rate method of analysis is utilized, is presented in Exhibit No. 109 Attachment A in the section beginning on page VI-2.

- a. There were no assets deemed not to be "used or useful" in the depreciation study.
- b. The detailed calculations which set forth the surviving original cost as of November 30, 2022, by vintage by account and including applicable depreciation reserves and accruals begin on page VII-8 of Exhibit No. 109 Attachment A.

The detailed calculations which set forth the surviving original cost as of December 31, 2023, by vintage by account and including applicable depreciation reserves and accruals begins on page II-8 of Exhibit No. 109 Attachment B.

Canonsburg, PA 15317

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant in service. The results of our study as of November 30, 2022 are presented in the attached report. The results of our study as of November 30, 2021 are presented in our report titled "2021 Depreciation Study- Calculated Annual Depreciation Accruals Related to Gas Plant as of November 30, 2021". The same methods, procedures and estimates are used in both studies.

The attached report sets forth a description of the methods and procedures upon which the studies were based, the estimates of survivor curves and the calculated annual depreciation rates as of November 30, 2022.

Respectfully submitted,

GANNETT FLEMING VALUATION  
AND RATE CONSULTANTS, LLC

## **PART I. INTRODUCTION**

**COLUMBIA GAS OF PENNSYLVANIA, INC.  
DEPRECIATION STUDY**

**PART I. INTRODUCTION**

**SCOPE**

This report sets forth the results of the depreciation study conducted for Columbia Gas of Pennsylvania, Inc. to determine the annual depreciation accrual rates and amounts for ratemaking purposes applicable to the original cost of gas plant as of November 30, 2022.

The depreciation accrual rates and amounts presented herein are based on estimated survivor curves and on methods and procedures set forth in previous orders approved by the Pennsylvania Public Utility Commission. The estimated survivor curves presented herein were based on the results of a service life study incorporating statistical analyses of data through 2016.

**BASIS OF STUDY**

**Depreciation and Amortization**

Depreciation, as defined in the Uniform System of Accounts, is the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of gas plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and requirements of public authorities.

Depreciation, as used in accounting, is a method of distributing fixed capital costs over a period of time by allocating annual amounts to expense. Each annual amount of

such depreciation expense is part of that year's total cost of providing utility service. Normally, the period of time over which the fixed capital cost is allocated to the cost of service is equal to the period of time over which an item renders service, that is, the item's service life. The most prevalent method of allocation is to distribute an equal amount of cost to each year of service life. This method is known as the straight line method of depreciation.

The calculation of annual and accrued depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. These subjects are discussed in the sections which follow. For most plant accounts, depreciation accruals and accrued depreciation were calculated using the straight line method, the remaining life basis, the average service life (ASL) procedure for plant installed prior to 1976 and the equal life group (ELG) procedure for 1976 and subsequent vintages. The calculations were based on the attained ages and estimated service life characteristics for each depreciable group of gas property. For certain general plant accounts, the amortization amounts, annual and accrued, were based on the age of the vintage and the selected amortization period.

Survivor curves were used to reflect the expected dispersion of retirements, thus providing a consistent method of estimating service lives and depreciation for mass property. Iowa type curves were used to depict the estimated survivor curves. For life span groups, the estimate of life characteristics is consistent because the calculated lives of the units within a group are obtained by employing a single probable retirement date for the entire group.

## **Service Life Estimates**

The method of estimating service life consisted of compiling the service life history of the plant accounts, subaccounts or depreciable groups, reducing this history to trends through the use of acceptable actuarial techniques, and forecasting the trend of survivors for each depreciable group on the basis of interpretations of past trends and consideration of Company plans for the future. The combination of the historical trend and the estimated future trend yielded a complete pattern of life characteristics from which the average service life was derived.

The Company's service life estimates used in the depreciation calculation incorporated historical data compiled through 2016 from the property records of the Company. Such data included plant additions, retirements, transfers and other activity. Generally, retirement data for the years 1939 through 2016 were used in the actuarial life table computations which were the primary statistical support of the service life estimates.

A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirement was obtained through field trips conducted during the course of the service life study. Discussions with operating and management personnel also provided information regarding plans for the future which was incorporated in the interpretation and extrapolation of the statistical analyses.

## **AMORTIZATION OF NET SALVAGE**

Inasmuch as this report relates primarily to Pennsylvania rate regulation practices, under which experienced costs of negative net salvage are amortized after their occurrence, no adjustments for expected salvage were made to either the annual

depreciation accrual or the calculated accrued depreciation for the individual accounts. The annual provision for recovering negative net salvage is based on the amortization of net salvage over a five-year period, as established in the Opinion and Order of the Commission at Docket Nos. R-891468 and R-801873.

---

## **PART II. ESTIMATION OF SURVIVOR CURVES**

## PART II. ESTIMATION OF SURVIVOR CURVES

The calculation of annual depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. The estimation of survivor curves is discussed below and the development of net salvage is discussed in later sections of this report.

### SURVIVOR CURVES

The use of an average service life for a property group implies that the various units in the group have different lives. Thus, the average life may be obtained by determining the separate lives of each of the units or by constructing a survivor curve by plotting the number of units which survive at successive ages.

The survivor curve graphically depicts the amount of property existing at each age throughout the life of an original group. From the survivor curve, the average life of the group, the remaining life expectancy, the probable life, and the frequency curve can be calculated. In Figure 1, a typical smooth survivor curve and the derived curves are illustrated. The average life is obtained by calculating the area under the survivor curve, from age zero to the maximum age, and dividing this area by the ordinate at age zero. The remaining life expectancy at any age can be calculated by obtaining the area under the curve, from the observation age to the maximum age, and dividing this area by the percent surviving at the observation age. For example, in Figure 1, the remaining life at age 30 is equal to the crosshatched area under the survivor curve divided by 29.5 percent surviving at age 30. The probable life at any age is developed by adding the age and remaining life. If the probable life of the property is calculated for each year of age, the probable life curve shown in the chart can be developed. The frequency curve presents the number of units retired in each age interval. It is derived by obtaining the differences between the amount of property surviving at the beginning and at the end of each interval.

This study has incorporated the use of Iowa curves developed from a retirement rate analysis of historical retirement history. A discussion of the concepts of survivor curves and of the development of survivor curves using the retirement rate method is presented below.

### **Iowa Type Curves**

The range of survivor characteristics usually experienced by utility and industrial properties is encompassed by a system of generalized survivor curves known as the Iowa type curves. There are four families in the Iowa system, labeled in accordance with the location of the modes of the retirements (or the portion of the frequency curve with the highest level of retirements) in relationship to the average life and the relative height of the modes. The left moded curves, presented in Figure 2, are those in which the greatest frequency of retirement occurs to the left of, or prior to, average service life. The symmetrical moded curves, presented in Figure 3, are those in which the greatest frequency of retirement occurs at average service life. The right moded curves, presented in Figure 4, are those in which the greatest frequency occurs to the right of, or after, average service life. The origin moded curves, presented in Figure 5, are those in which the greatest frequency of retirement occurs at the origin, or immediately after age zero. The letter designation of each family of curves (L, S, R or O) represents the location of the mode of the associated frequency curve with respect to the average service life. The numbers represent the relative heights of the modes of the frequency curves within each family. A higher number designates a higher mode curve.

The Iowa curves were developed at the Iowa State College Engineering Experiment Station through an extensive process of observation and classification of the ages at which industrial property had been retired. A report of the study which resulted in the classification of property survivor characteristics into 18 type curves, which constitute three of the four families, was published in 1935 in the form of the Experiment Station's Bulletin 125.

**FIGURE 1. TYPICAL SURVIVOR CURVE AND DERIVED CURVES**

**FIGURE 2. LEFT MODAL OR "L" IOWA TYPE SURVIVOR CURVES**

**FIGURE 3. SYMMETRICAL OR "S" IOWA TYPE SURVIVOR CURVES**

**FIGURE 4. RIGHT MODAL OR "R" IOWA TYPE SURVIVOR CURVES**

FIGURE 5. ORIGIN MODAL OR "O" IOWA TYPE SURVIVOR CURVES

These curve types have also been presented in subsequent Experiment Station bulletins and in the text, "Engineering Valuation and Depreciation."<sup>1</sup> In 1957, Frank V. B. Couch, Jr., an Iowa State College graduate student, submitted a thesis presenting his development of the fourth family consisting of the four O type survivor curves.

### **Retirement Rate Method of Analysis**

The retirement rate method is an actuarial method of deriving survivor curves using the average rates at which property of each age group is retired. The method relates to property groups for which aged accounting experience is available and is the method used to develop the original stub survivor curves in this study. The method (also known as the annual rate method) is illustrated through the use of an example in the following text and is also explained in several publications including "Statistical Analyses of Industrial Property Retirements,"<sup>2</sup> "Engineering Valuation and Depreciation,"<sup>3</sup> and "Depreciation Systems."<sup>4</sup>

The average rate of retirement used in the calculation of the percent surviving for the survivor curve (life table) requires two sets of data: first, the property retired during a period of observation, identified by the property's age at retirement; and second, the property exposed to retirement at the beginning of the age intervals during the same period. The period of observation is referred to as the experience band. The band of years which represent the installation dates of the property exposed to retirement during the experience band is referred to as the placement band. An example of the calculations used in the development of a life table follows. The example includes schedules of annual aged property transactions, a schedule of plant exposed to retirement, a life table and illustrations of smoothing the stub survivor curve.

## **Schedules of Annual Transactions in Plant Records**

The property group used to illustrate the retirement rate method is observed for the experience band 2012-2021 for which there were placements during the years 2007-2021. In order to illustrate the summation of the aged data by age interval, the data were compiled in the manner presented in Schedules 1 and 2 on pages II-11 and II-12. In Schedule 1, the year of installation (year placed) and the year of retirement are shown. The age interval during which a retirement occurred is determined from this information. In the example which follows, \$10,000 of the dollars invested in 2007 were retired in 2012. The \$10,000 retirement occurred during the age interval between 4½ and 5½ years on the basis that approximately one-half of the amount of property was installed prior to and subsequent to July 1 of each year. That is, on the average, property installed during a year is placed in service at the midpoint of the year for the purpose of the analysis. All retirements also are stated as occurring at the midpoint of a one-year age interval of time, except the first age interval which encompasses only one-half year.

The total retirements occurring in each age interval in a band are determined by summing the amounts for each transaction year-installation year combination for that age interval. For example, the total of \$143,000 retired for age interval 4½-5½ is the sum of the retirements entered on Schedule 1 immediately above the stair step line drawn on the table beginning with the 2012 retirements of 2007 installations and ending with the 2021 retirements of the 2016 installations. Thus, the total amount of 143 for age interval 4½-5½ equals the sum of:

$$10 + 12 + 13 + 11 + 13 + 13 + 15 + 17 + 19 + 20.$$

<sup>a</sup> Transfer Affecting Exposures at Beginning of Year

<sup>b</sup> Transfer Affecting Exposures at End of Year

<sup>c</sup> Sale with Continued Use

Parentheses Denote Credit Amount.

In Schedule 2, other transactions which affect the group are recorded in a similar manner. The entries illustrated include transfers and sales. The entries which are credits to the plant account are shown in parentheses. The items recorded on this schedule are not totaled with the retirements, but are used in developing the exposures at the beginning of each age interval.

### **Schedule of Plant Exposed to Retirement**

The development of the amount of plant exposed to retirement at the beginning of each age interval is illustrated in Schedule 3 on page II-14. The surviving plant at the beginning of each year from 2012 through 2021 is recorded by year in the portion of the table headed "Annual Survivors at the Beginning of the Year." The last amount entered in each column is the amount of new plant added to the group during the year. The amounts entered in Schedule 3 for each successive year following the beginning balance or addition are obtained by adding or subtracting the net entries shown on Schedules 1 and 2. For the purpose of determining the plant exposed to retirement, transfers-in are considered as being exposed to retirement in this group at the beginning of the year in which they occurred, and the sales and transfers-out are considered to be removed from the plant exposed to retirement at the beginning of the following year. Thus, the amounts of plant shown at the beginning of each year are the amounts of plant from each placement year considered to be exposed to retirement at the beginning of each successive transaction year. For example, the exposures for the installation year 2017 are calculated in the following manner:

Exposures at age 0	= amount of addition	= \$750,000
Exposures at age ½	= \$750,000 - \$ 8,000	= \$742,000
Exposures at age 1½	= \$742,000 - \$18,000	= \$724,000
Exposures at age 2½	= \$724,000 - \$20,000 - \$19,000	= \$685,000
Exposures at age 3½	= \$685,000 - \$22,000	= \$663,000

**SCHEDULE 3. PLANT EXPOSED TO RETIREMENT**  
**JANUARY 1 OF EACH YEAR 2012-2021**  
**SUMMARIZED BY AGE INTERVAL**

Year Placed	Exposures, Thousands of Dollars											Total at Beginning of Age Interval	Age Interval

<sup>a</sup>Additions during the year

For the entire experience band 2012-2021, the total exposures at the beginning of an age interval are obtained by summing diagonally in a manner similar to the summing of the retirements during an age interval (Schedule 1). For example, the figure of 3,789, shown as the total exposures at the beginning of age interval 4½-5½, is obtained by summing:

$$255 + 268 + 284 + 311 + 334 + 374 + 405 + 448 + 501 + 609.$$

### **Original Life Table**

The original life table, illustrated in Schedule 4 on page II-16, is developed from the totals shown on the schedules of retirements and exposures, Schedules 1 and 3, respectively. The exposures at the beginning of the age interval are obtained from the corresponding age interval of the exposure schedule, and the retirements during the age interval are obtained from the corresponding age interval of the retirement schedule. The retirement ratio is the result of dividing the retirements during the age interval by the exposures at the beginning of the age interval. The percent surviving at the beginning of each age interval is derived from survivor ratios, each of which equals one minus the retirement ratio. The percent surviving is developed by starting with 100% at age zero and successively multiplying the percent surviving at the beginning of each interval by the survivor ratio, i.e., one minus the retirement ratio for that age interval. The calculations necessary to determine the percent surviving at age 5½ are as follows:

Percent surviving at age 4½	=	88.15	
Exposures at age 4½	=	3,789,000	
Retirements from age 4½ to 5½	=	143,000	
Retirement Ratio	=	143,000 ÷ 3,789,000	= 0.0377
Survivor Ratio	=	1.000 - 0.0377	= 0.9623
Percent surviving at age 5½	=	(88.15) x (0.9623)	= 84.83

The totals of the exposures and retirements (columns 2 and 3) are shown for the purpose of checking with the respective totals in Schedules 1 and 3. The ratio of the total retirements to the total exposures, other than for each age interval, is meaningless.

SCHEDULE 4. ORIGINAL LIFE TABLE  
CALCULATED BY THE RETIREMENT RATE METHOD

Experience Band 2012-2021

Placement Band 2007-2021

(Exposure and Retirement Amounts are in Thousands of Dollars)

Age at Beginning of Interval	Exposures at Beginning of Age Interval	Retirements During Age Interval	Retirement Ratio	Survivor Ratio	Percent Surviving at Beginning of Age Interval
(1)	(2)	(3)	(4)	(5)	(6)
0.0	7,490	80	0.0107	0.9893	100.00

13.5	<u>167</u>	<u>26</u>	0.1557	0.8443	42.24
					35.66
Total	<u>44,780</u>	<u>1,606</u>			

Column 2 from Schedule 3, Column 12, Plant Exposed to Retirement.

Column 3 from Schedule 1, Column 12, Retirements for Each Year.

Column 4 = Column 3 Divided by Column 2.

Column 5 = 1.0000 Minus Column 4.

Column 6 = Column 5 Multiplied by Column 6 as of the Preceding Age Interval.

The original survivor curve is plotted from the original life table (column 6, Schedule 4). When the curve terminates at a percent surviving greater than zero, it is called a stub survivor curve. Survivor curves developed from retirement rate studies generally are stub curves.

### **Smoothing the Original Survivor Curve**

The smoothing of the original survivor curve eliminates any irregularities and serves as the basis for the preliminary extrapolation to zero percent surviving of the original stub curve. Even if the original survivor curve is complete from 100% to zero percent, it is desirable to eliminate any irregularities, as there is still an extrapolation for the vintages which have not yet lived to the age at which the curve reaches zero percent. In this study, the smoothing of the original curve with established type curves was used to eliminate irregularities in the original curve.

The Iowa type curves are used in this study to smooth those original stub curves which are expressed as percents surviving at ages in years. Each original survivor curve was compared to the Iowa curves using visual and mathematical matching in order to determine the better fitting smooth curves. In Figures 6, 7, and 8, the original curve developed in Schedule 4 is compared with the L, S, and R Iowa type curves which most nearly fit the original survivor curve. In Figure 6, the L1 curve with an average life between 12 and 13 years appears to be the best fit. In Figure 7, the S0 type curve with a 12-year average life appears to be the best fit and appears to be better than the L1 fitting. In Figure 8, the R1 type curve with a 12-year average life appears to be the best fit and appears to be better than either the L1 or the S0.

In Figure 9, the three fittings, 12-L1, 12-S0 and 12-R1 are drawn for comparison purposes. It is probable that the 12-R1 Iowa curve would be selected as the most representative of the plotted survivor characteristics of the group.

## PART III. SERVICE LIFE CONSIDERATIONS

### **PART III. SERVICE LIFE CONSIDERATIONS**

#### **Field Trips**

In order to be familiar with the operation of the Company and observe representative portions of the plant, field trips have been conducted periodically. A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirements are obtained during these field trips. This knowledge and information were incorporated in the interpretation and extrapolation of the statistical analyses.

During the extensive period of years our firm has been conducting depreciation studies for the Company, the field trips have resulted in numerous reviews of the Company's operating areas. The following is a list of the locations visited during the most recent trips.

#### **June 27, 2017**

- Monaca Operations Center
- Center Grange POD
- Anchor Hocking (Oneida)
- Apple Alley District Regulator Station
- Dravo District Regulator Station
- New York Avenue District Regulator Station
- Southpointe District Regulator Station
- Peoples Exchange Meter Set
- Tannehill Regulator Station

#### **July 16, 2012**

- Washington Service Center
- E. Wheeling Regulating Station #2916
- Meadow Avenue Regulating Station #391
- Cortez Drive Regulating Station #4082
- Patton School Regulating Station #4289
- Camalloy, Inc. Meter Set
- Uniontown Service Center
- Uniontown Service Center Regulating Station #2522
- Grand Street Regulating Station #2728
- Gerome Manufacturing Meter Set
- Industrial Park Regulating Station #4005

**Judgment**

The survivor curve estimates were based on judgment which considered a number of factors. The primary factors were the statistical analyses of data; current Company policies and outlook as determined during the field trips and other conversations with management; and the survivor curve estimates from previous studies of this company and other gas companies.

The statistical analyses resulted in good to excellent indications of the survivor patterns experienced for most of the major accounts. Generally, the estimates of the survivor patterns prior to the period of known retirement data were based on experience bands encompassing the earlier years of the known experience. The estimates of future survivor curves generally were based on experience bands of more recent historical data.

The plant accounts or subaccounts for which the statistical analyses were significant factors in the judgments of the survivor curves are as follows:

- 374.4 Land Rights
- 375 Structures and Improvements
  - Measuring and Regulating Station
  - Industrial Measuring and Regulating Station
  - Other Distribution System
  - Life Span Group
  - Continuous Group
- 376 Mains
- 378 Measuring and Regulating Station Equipment
- 379.1 Measuring and Regulating Equipment – City Gate
- 380 Services
- 381 Meters
- 382 Meter Installations
- 383 House Regulators
- 384 House Regulator Installations
- 385 Industrial Measuring and Regulating
  - Equipment - Other Than Meters
- 387 Other Equipment
  - General
  - Customer Information Services
- 390 Structures and Improvements - Communication
- 396 Power Operated Equipment
- 397 Communication Equipment - Telemetry

The combined analyses for Account 376.1, Mains – Cast iron, Account 376.3, Mains – Bare Steel and Account 376.45, Mains – Other, is the largest plant account and is used to illustrate the manner in which the study was conducted for the groups in the preceding list. Aged retirement and other plant accounting data were compiled for the years 1939 through 2016. These data were coded in the course of the Company's normal recordkeeping according to plant account or property group, type of transaction, year in which the transaction took place, and year in which the gas plant was placed in service. The data were analyzed by the retirement rate method of life analysis. The survivor curve chart for the account is presented in page VI-50 and the life tables for the two experience bands plotted on the chart follow it.

The survivor curve estimate for the experience bands 1939-2016 and 1977-2016, were the basis for the statistical indications. The Iowa 71-R1 survivor curve reasonably

represents the first 110 years of the stub survivor curve. In recent years, the rates of retirements of mains have been redistributed, with lesser retirement ratios during earlier age intervals and greater ratios during older age intervals, after age 60.

Discussions with operating and management personnel indicated that corrosion control programs, including the use of plastic for smaller size mains, is the most probable cause of fewer early retirements. In addition, highway and urban renewal projects have caused relatively few retirements in the Company's service area in recent years, as well as the more frequent decision to repair instead of replace mains. Increased rates of retirement at older ages are anticipated in conjunction with leak detection programs and street improvements. That is, older mains with a history of leaks will be replaced as municipalities perform street improvements in order to avoid the high cost of repair or replacement when repaving is required.

Typical service lives for the mains of other Pennsylvania gas companies range from 55 to 75 years. The Iowa 71-R1 survivor curve, at the upper end of the range, is estimated to represent the future, inasmuch as it is a reasonable interpretation of the significant portion of the stub survivor curve and reflects the outlook of management.

The second largest account is Account 380, Services. The survivor curve estimate for this account is based on three experience bands, the overall band, 1939-2016, and two shorter experience bands, 1970-2016 and 1997-2016. As the survivor curve chart illustrates, the 50-R0.5 survivor curve is supported by the statistical analyses. During the 1970's, the rates of service line retirements increased causing the experienced service life to significantly decrease. More recent retirement history indicates the downward trend has ended and there has been a reversal toward a somewhat longer service life parameter. Discussions with operating and management personnel disclosed several reasons for the historical changes. Prior to 1970, the

retirement of inactive services often was delayed due to operating practices in effect at that time. Statistical experience prior to the late 1960's would not be as good an indicator for estimating future survivor characteristics in this respect. The effect of urban renewal in the Company's service area during the 1970's caused substantially greater retirements at earlier ages, but this cause of retirement has not been as important in the more recent past. The principal cause of retirement continues to be deterioration. Therefore, the 50-R0.5 survivor curve is a good indicator of life characteristics for services through age 70.

Similar studies were performed for the remaining significant mass plant accounts. The results of the statistical analyses are presented in account sequence in the report, beginning on page VI-1.

The major structures included in Account 375.7, Structures and Improvements, were separated from the smaller structures for purposes of the study. The major structures group consists of 6 structures or complexes of significant size and of a nature that the life span procedure is appropriate. The life spans assigned to the major structures were typically 50 to 60 years from the date of major installation and varied within this range based on individual circumstances, such as size, condition, type of construction, location, and management's plans. Long-term continued use is planned for most of the major structures.

The Iowa 90-R1.5 interim survivor curve was judged appropriate for the major structures based on the 1975-2016 interim retirement experience, our observations of the buildings, consideration of the typical presence of facilities which will be retired during the estimated life spans, and a review of the interim survivor curves derived for similar structures of other gas companies.

All of the underground storage plant is located at the Blackhawk storage field. The compressor and auxiliary buildings are small structures constructed of prefabricated steel. The gas is compressed by a 900-horsepower Ingersoll-Rand compressor. Based on the nature of the storage operation and the plant and equipment at the location, a life span of 55 years, from 1970, was assigned to the installation. The interim survivor curves estimated for the several plant accounts represented at the storage location are based on typical survivor experience for comparable gas plant and retirement experience during the band 1970-2016. Statistical analyses of such experience are included in the report for the storage plant accounts that have had significant retirements.

Generally, the survivor curve estimates for the remainder of the accounts, which comprise a minor portion of the total depreciable original cost, were based on judgments which considered the nature of the plant and equipment, reviews of available historical retirement data, and a general knowledge of the service lives for similar equipment in other gas companies.

---

## **PART IV. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION**

## PART IV. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

### Group Depreciation Procedures

A group procedure for depreciation is appropriate when considering more than a single item of property. Normally, the items within a group do not have identical service lives, but have lives that are dispersed over a range of time. There are two primary group procedures, namely, average service life and equal life group.

In the average service life procedure, the rate of annual depreciation is based on the average life or average remaining life of the group, and this rate is applied to the surviving balances of the group's cost. A characteristic of this procedure is that the cost of plant retired prior to average life is not fully recouped at the time of retirement, whereas the cost of plant retired subsequent to average life is more than fully recouped. Over the entire life cycle, the portion of cost not recouped prior to average life is balanced by the cost recouped subsequent to average life.

In the equal life group procedure, the property group is subdivided according to service life. That is, each equal life group includes that portion of the property which experiences the life of that specific group. The relative size of each equal life group is determined from the property's life dispersion curve. This procedure eliminates the need to base depreciation on average lives, inasmuch as each group is equivalent to a unit having a single life. The full costs of short-lived units are accrued during their lives, leaving no deferral of accruals required to be added to the annual costs associated with long-lived units. The calculated depreciation for the property group is the summation of the calculated depreciation based on the service life of each equal life group.

### **Remaining Life Annual Accruals**

For the purpose of calculating remaining life accrual rates as of November 30, 2022, the estimated book depreciation reserve for each plant account is allocated among vintages in proportion to the calculated accrued depreciation for the account. Explanations of remaining life accruals and calculated accrued depreciation for the vintages calculated by the average service life procedure and for the vintages calculated by the equal life group procedure follow. The detailed calculations are set forth in the Results of Study section of the report.

### **Average Service Life Procedure**

In the average service life procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the average remaining life of the vintage. The average remaining life is a directly weighted average derived from the estimated future survivor curve in accordance with the average service life procedure.

The calculated accrued depreciation for each depreciable property group represents that portion of the depreciable cost of the group which would not be allocated to expense through future whole life depreciation accruals if current forecasts of life characteristics are used as the basis for such accruals. The accrued depreciation calculation consists of applying an appropriate ratio to the surviving original cost of each vintage of each account, based upon the attained age and service life. The straight line accrued depreciation ratios are calculated as follows for the average service life procedure:

$$\text{Ratio} = 1 - \frac{\text{Average Remaining Life Expectancy}}{\text{Average Service Life}}$$

### Equal Life Group Procedure

In the equal life group procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the composite remaining life for the surviving original cost of that vintage. The composite remaining life is derived by compositing the individual equal life group remaining lives in accordance with the following equation:

$$\text{Composite Remaining Life} = \frac{\left( \frac{\text{Book Cost}}{\text{Life}} \times \text{Remaining Life} \right)}{\frac{\text{Book Cost}}{\text{Life}}}$$

The book costs and lives of the several equal life groups which are summed in the foregoing equation are defined by the estimated future survivor curve.

Inasmuch as book cost divided by life equals the whole life annual accrual, the foregoing equation reduces to the following form:

$$\text{Composite Remaining Life} = \frac{\sum \text{Whole Life Future Accruals}}{\sum \text{Whole Life Annual Accruals}}$$

or

$$\text{Composite Remaining Life} = \frac{\sum \text{Book Cost} - \text{Calc. Reserve}}{\sum \text{Whole Life Annual Accrual}}$$

The annual accrual rate for each account is equal to the sum of the remaining life annual accruals for all vintages divided by the account's total original cost. The account's "composite remaining life" is calculated by dividing the sum of the future book accruals for all vintages by the sum of the remaining life annual accruals for all vintages.

The calculated accrued depreciation in the equal life group procedure also represents that portion of depreciable cost which will not be allocated to expense through future accruals. However, the calculation is based at the equal life group level rather than the vintage group level, and does not require the use of averages. The equal life group accrued depreciation ratio is calculated as follows:

$$\text{Ratio} = \frac{\text{Remaining Life}}{\text{Average Service Life}}$$

Inasmuch as service life minus remaining life equals age, when averages are not employed, the foregoing equation reduces to:

$$\text{Ratio} = \frac{\text{Age}}{\text{Service Life}}$$

The table on the following page illustrates the procedure for calculating straight line equal life group accrued depreciation, using an Iowa 15-S2.5 Survivor curve and a November 30, 2022 calculation date.

In the table, each equal life group is defined by the age interval shown in columns 1 and 2, which identify the ages at which the first and last retirement of each group occur. The group's designated life, shown in column 3, is the midpoint of the interval. In the calculation, the equal life groups of each vintage are arranged such that the midpoint of each one-year age interval coincides with the calculation date, e.g., November 30 in this case. This enables the calculation of annual accruals which are centered on, or as of, the same date as the calculation of accrued depreciation.

The retirement during each age interval, shown in column 4, is the size of each equal life group. It is derived from the Iowa 15-S2.5 survivor curve and is the difference between the percents surviving (not shown) at the beginning and end of the age interval.

TOTAL			100.00000						

Each equal life group's whole life annual accrual, shown in column 5, equals the group's size (column 4) divided by its life (column 3), except that for the first age interval, the annual accrual is set equal to the group's size.

Columns 6 through 10 show the derivation of the whole life annual factor and accrued factor for each vintage based on the data developed in the first five columns. The year installed is shown in column 6. For all vintages other than the first year (2022), the summation of annual accruals for each year installed, shown in column 7, is calculated by adding one-half of the group annual accrual (column 5) for that vintage's current age interval plus the group annual accruals for all succeeding age intervals. For

example, the figure 7.36089427952 for 2021 equals one-half of 0.00589978829 plus all of the succeeding figures in column 5. Only eleven-twelfths of the annual accrual for the vintage's current age interval group is included in the summation because the equal life group for that interval expires at the midpoint of the current year.

The summation of annual accruals (column 7) for installations during 2022 is calculated on the basis of an in-service date at the midpoint of twelve months, i.e., six months prior to November 30. Inasmuch as the overall calculation is centered on November 30, 2022, the accrual for 2022 installations (during the twelve months) represents only one-half of one year, one-twelfths of the year prior to November 30 plus eleven-twelfths year following November 30. For this reason, the first figure in column 7, for vintage 2022, equals the group annual accrual for 2022 plus one-half of the group annual accruals for each of the subsequent years.

The average percent surviving, derived from the Iowa 15-S2.5 survivor curve, is shown in column 8 for each age interval. The annual factor, shown in column 9, is the result of dividing the summation of annual accruals (column 7) by the average percent surviving (column 8).

The accrued depreciation factor, shown in column 10, equals the annual factor multiplied by the age of the group as of November 30, 2022.

## **CALCULATION OF ANNUAL AND ACCRUED AMORTIZATION**

Amortization, as defined in the Uniform System of Accounts, is the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during

which it is anticipated the benefit will be realized. Normally, the distribution of the amount is in equal amounts to each year of the amortization period.

The calculation of annual and accrued amortization requires the selection of an amortization period. The amortization periods used in this report were based on judgment which incorporated a consideration of the period during which the assets will render most of their service, the amortization periods and service lives used by other utilities, and the service life estimates previously used for the asset under depreciation accounting.

Amortization accounting is appropriate for certain General Plant accounts that represent numerous units of property, but a very small portion of depreciable gas plant in service. The accounts and their amortization periods are as follows:

	<u>Account</u>	<u>Amortization Period, Years</u>
391,	Office Furniture and Equipment	
	Furniture	20
	Equipment	15
	Information Systems	5
392,	Transportation Equipment - Trailers	15
394,	Tools, Shop and Garage Equipment	25
395,	Laboratory Equipment	20
398,	Miscellaneous Equipment	15

For the purpose of calculating annual amortization amounts as of November 30, 2022, the book depreciation reserve for each plant account or subaccount is assigned or allocated to vintages. The book reserve assigned to vintages with an age greater than the amortization period is equal to the vintage's original cost. The remaining book reserve is allocated among vintages with an age less than the amortization period in proportion to the calculated accrued amortization. The calculated accrued amortization

is equal to the original cost multiplied by the ratio of the vintage's age to its amortization period. The annual amortization amount is determined by dividing the future amortizations (original cost less allocated book reserve) by the remaining period of amortization for the vintage.

## **AMORTIZATION OF NET SALVAGE**

Experienced salvage is incorporated in the results of the study, as it was reported on the Company's books and records for the period January 1, 2017 through November 30, 2021. The data for the last month of 2021 is based on estimated experience. Results of the calculations are shown in Table 4.

Net salvage experienced during the five-year period is presented in this manner to determine the amount of negative net salvage to be amortized for book purposes. In developing the amount to be amortized, the data for the accounts which experienced positive net salvage have been netted with those for accounts which experienced negative net salvage.

In order to be consistent with this manner of recognizing salvage, no adjustments for salvage were made to the annual accruals and accrued depreciation calculated for each individual account. There were no exclusions from the 2016 through 2021 net salvage accrual.

---

## PART V. RESULTS OF STUDY

## **PART V. RESULTS OF STUDY**

### **DESCRIPTION OF SUMMARY TABULATIONS**

Tables 1 through 4 presented on pages V-4 through V-10 summarize the results of the depreciation study as of November 30, 2022. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve as of November 30, 2022, future book accruals, calculated annual accrual amount and rate, and composite remaining life for plant in service. Table 2 presents the bringforward of the book reserve to November 30, 2022. Table 3 sets forth the calculation of the depreciation accruals for the twelve months ended November 30, 2022. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2017 through 2021.

### **DESCRIPTION OF DETAILED TABULATIONS**

Supporting statistical data for the estimates of average service lives and survivor curves, the annual depreciation calculations, and salvage and cost of removal for the years 2017-2021 are presented in three sections.

The section beginning on page VI-2 sets forth, for each depreciable group analyzed by the retirement rate method, a chart depicting the original and estimated survivor curves followed by a tabular presentation of the original life table(s) plotted on the chart. A cumulative summary, by year installed, for gas plant and the supporting data for the original cost depreciation calculations are presented in the section beginning on page VII-2. The tabulations of experienced and estimated net salvage by year by account for the five-year period, 2017-2021, are presented in the section beginning on page VIII-2.

In the first section, the survivor curves estimated for the depreciable groups are shown as dark smooth curves on the charts. Each smooth survivor curve is denoted by a numeral followed by the type curve designation. The numeral used is the average life derived from the entire curve from 100 percent to zero percent surviving. In cases where only a segment of the estimated curve is used in the depreciation calculation, the numeral used for identification purposes is not a designation of the average life of the group. The titles of the charts indicate the group, the symbol used to plot the points of the original life table, and the experience and placement bands of the life tables which were plotted. The experience band indicates the range of years for which the retirements were used to develop the stub survivor curve. The placements indicate, for the related experience band, the range of years of installations which appear in the experience.

The tables of the calculated annual depreciation related to original cost are presented in the second section and indicate the estimated average survivor curves used in the calculations. The tables set forth, for each installation year, the original cost, calculated accrued depreciation, allocated book reserve, future book accruals, remaining life expectancy and the calculated annual accrual.

Detailed tabulations setting forth the cost of removal and salvage amounts, by plant account for each year, are presented beginning on page VIII-2. The total salvage and removal costs, by year, were used to calculate the five-year net salvage amortization presented in Table 4 on page V-10.

Columbia Gas of Pennsylvania, Inc.  
121 Champion Way, Suite 100  
Canonsburg, PA 15317

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant as of December 31, 2023. The results of our study as of November 30, 2022 are presented in our report titled "2022 Depreciation Study - Calculated Annual Depreciation Accruals Related to Gas Plant as of November 30, 2022". The same methods, procedures and estimates are used in both studies.

Summaries of the original cost, annual accruals, book depreciation reserve and amortization of net salvage are presented in Tables 1 through 4, beginning on page I-3 of the attached report.

Respectfully submitted,

GANNETT FLEMING VALUATION  
AND RATE CONSULTANTS, LLC

## PART I. RESULTS OF STUDY

**COLUMBIA GAS OF PENNSYLVANIA, INC.**  
**DEPRECIATION STUDY**

**PART I. RESULTS OF STUDY**

**DESCRIPTION OF SUMMARY TABULATIONS**

Tables 1 through 4 presented on pages I-3 through I-9 summarize the results of the depreciation study as of December 31, 2023. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve as of December 31, 2023, future book accruals, calculated annual accrual amount and rate, and composite remaining life for plant in service. Table 2 presents the bringforward of the book reserve to December 31, 2023. Table 3 sets forth the calculations of the depreciation accruals for the thirteen months ended December 31, 2023. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2018 through 2022.

**DESCRIPTION OF DETAILED TABULATIONS**

The supporting data for the depreciation calculations are presented in account sequence in the section beginning on page II-7. The original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual are shown for each vintage of each account or subaccount. The amounts of regular retirements, gross salvage and cost of removal are set forth by account for the years 2018 through 2022, beginning on pages III-2 through III-5.

53.53 I. VALUATION

A. ALL UTILITIES

5. Provide a comparison of respondent's calculated depreciation reserve vs. book reserve by account at the end of the test year.

Response:

See Pages 2 through 7 for the comparison of the calculated depreciation reserve vs. book reserve as of November 30, 2022 and as of December 31, 2023.

53.53 I. VALUATION

A. ALL UTILITIES

6. Supply a schedule by account and depreciation group showing the survivor curve and annual accrual rate estimated to be appropriate:
- a. For the purposes of this filing.
  - b. For the purposes of the most recent rate increase filing prior to the current proceedings.
    - (i) Supply a comprehensive statement of any changes made in method of depreciation and in the selection of average services lives and dispersion.

Response:

- a. Please refer to pages V-4 through V-6 of Columbia's Future Test Year depreciation study included in Exhibit No. 109, Schedule No.1.  
  
Please refer to pages I-3 through I-5 of Columbia's Fully Projected Future Test Year depreciation study included in Exhibit No. 109, Schedule No. 1, Attachment B.
- b. Please refer to Pages 2 through 7 of this response.
  - (i) The depreciation methods and procedures used in this filing are the same as those used in previous filings. Explanations of the depreciation methods and procedures are presented in Exhibit No. 109, Schedule No. 1, Attachment A.

The estimated survivor curves used in this filing are equivalent to those used in the most recent Service Life Study, filed as of November 30, 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
A. ALL UTILITIES

7. Provide a table, showing the cumulative depreciated original cost by year of installation for utility plant in service at the end of the test year (depreciable plant only) as claimed in the measures of value, in the following form:
- a. Year installed.
  - b. Original cost – the total surviving cost associated with each installation year from all plant accounts.
  - c. Calculated depreciation reserve – the calculated depreciation reserve associated with each installation year from all plant accounts.
  - d. Depreciated original cost – (Column B minus Column C).
  - e. Total – cumulation year by year of the figures from Column D.
  - f. Column E divided by the total of the figure in Column D.

Response:

Please refer to pages VII-3 through VII-6 of Columbia's Future Test Year depreciation study included in Exhibit No.109, Schedule No.1, Attachment A.

Please refer to pages II-3 through II-6 of Columbia's Fully Forecasted Rate Year depreciation study included in Exhibit No. 109, Schedule No. 1, Attachment B.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
A. ALL UTILITIES

17. Regardless of whether a claim for net negative or positive salvage is made, attach an exhibit showing gross salvage, cost of removal, and net salvage for the test year and four previous years by account.

Response:

Please refer to pages VIII-2 through VIII-6 of Columbia's Future Test Year depreciation study included in Exhibit No. 109, Schedule No. 1, Attachment A.

Please refer to pages III-2 through III-5 of Columbia's Fully Forecasted Rate Year depreciation study included in Exhibit No. 109, Schedule No. 1, Attachment B.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

12. Provide a schedule showing residential and commercial heating sales by unit (MCF) per month and degree days for the test year and three preceding twelve month periods.

Response:

Please see Exhibit No. 010 Schedule No. 1, pages 2-3 for residential and commercial heating sales by unit Dth and degree days.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

19. Provide growth patterns of usage and customer numbers per rate class, using historical and projected data.

Response:

See Exhibit No. 010, Schedule No. 2.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

22. Provide supporting data detailing curtailment adjustments, procedures and policies.

Response:

See Exhibit No. 10, Schedule No. 3.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

38. Identify company's policy with respect to replacing customers lost through attrition.

Response:

See Exhibit No. 10, Schedule No. 4 (38).

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

39. Identify procedures developed to govern relationships between the respondent and potential customers; i.e., basically expansion, alternate energy requirements, availability of supply, availability of distribution facilities, ownership of metering and related facilities.

Response:

See Exhibit No. 10, Schedule No. 4 (39).

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 IV. RATE STRUCTURE  
B. GAS UTILITIES

4. Provide an exhibit for each customer classification showing the following data for the test year and the four previous years.
  - a. The maximum coincident peak day demand.
  - b. The maximum coincident three-day peak day demand.
  - c. The average monthly consumption in Mcf during the primary heating season (November - March).
  - d. The average monthly consumption in Mcf during the non-heating season (April - October).
  - e. The average daily consumption in Mcf for each twelve-month period.

Response:

See Exhibit No. 10, Schedule No. 5 and Exhibit No. 10, Schedule No. 2.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 IV. RATE STRUCTURE  
B. GAS UTILITIES

13. Submit the projected demands for all customer classes for both purchased and produced gas for the three years following the test year filing.

Response:

See Exhibit No. 010, Schedule No. 6, pages 2-4.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

3. Submit a schedule showing a reconciliation of test year MCF sales and line losses. List all amounts of gas purchased manufactured and transported.

Response:

See Exhibit No. 10, Schedule No. 7 (3).

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 IV. RATE STRUCTURE  
B. GAS UTILITIES

14. Supply an exhibit showing the gas deliveries to each customer class for the most recent 24-month period. The exhibit should identify the source of the gas, such as "purchased" (pipeline), "production" (includes purchases from local producers), "storage withdrawal", "propane/air", and "unaccounted for".

Response:

See Exhibit No. 10, Schedule No. 7 (14).

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.62

Weather Normalization Adjustment

Response:

The forecasted volumes are normalized; therefore, no normalization was applied.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
ESTIMATED NUMBER OF BILLS AND NORMALIZED SALES VOLUMES  
TWELVE MONTHS ENDING November 30, 2021  
53.62

Response:

Please see Exhibit No.103, Schedule No. 3

COLUMBIA GAS OF PENNSYLVANIA, INC.  
FUTURE TEST YEAR SALES FORECAST  
TWELVE MONTHS ENDING NOVEMBER 30, 2022  
53.62

Response:

Please see Exhibit No. 10, Schedule No. 2

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.53 IV. RATE STRUCTURE

B. GAS UTILITIES

1. Provide a Cost of Service Study showing the rate of return under the present and proposed tariffs for all customer classifications. The study should include a summary of the allocated measures of value, operating revenues, operating expenses and net return for each of the customer classifications at original cost and at the 5-year trended original cost.

Response: See Exhibit No. 111, Schedule Nos. 1 through 3.

2. Provide a statement of testimony describing the complete methodology of the cost of service study.

Response: See Statement No. 6.

3. Provide a complete description and back-up calculations for all allocation factors.

Response: See Statement No. 6, Exhibit KLJ-1, Exhibit KLJ-2, and Exhibit KLJ-3.

9. Supply a cost analysis supporting minimum charges for all rate schedules.

Response: See Exhibit No. 111, Schedule No. 2, Pages 14 through 30.

10. Supply a cost analysis supporting demand charges for all tariffs, which contain demand charges.

Response: None of Columbia's tariff rate schedules contain a distribution cost demand charge.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 IV. RATE STRUCTURE  
B. GAS UTILITIES

5. Submit a Bill Frequency Analysis for each rate. The analysis should include the rate schedule and block interval, the number of bills at each interval, the cumulative number of bills at each interval, the Mcf or therms at each interval, the cumulative Mcf or therms at each interval, the accumulation of Mcf or therms passing through each interval, and the revenue at each interval for both the present and the proposed rates. The Analysis should show only those revenues collected from the basic tariff.

Response: Refer to Exhibit No. 103, Schedule No. 1, (Revenue @ Current Rates Based on Forecast Adjusted Bills and Volumes) and Exhibit No. 103, Schedule No. 7, (Revenue @ Proposed Rates Based on Forecast Adjusted Bills and Volumes).

7. Supply a graph of present and proposed base rates on hyperbolic cross section paper.

Response: Refer to Exhibit No. 111, Schedule No. 5.

12. Supply a tabulation of base rate bills for each rate schedule comparing the existing rates to proposed rates. The tabulation should show the dollar difference and the per cent increase or decrease.

Response: Refer to Exhibit No. 103, Schedule No.8 and Exhibit No. 111, Schedule 6.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

47. Submit a schedule showing rate of return on facilities allocated to serve wholesale customers.

Response:

Columbia Gas of Pennsylvania, Inc. does not offer service to wholesale customers. Therefore, no facilities were allocated within the class cost of service studies presented in Exhibit No. 111.

COLUMBIA GAS OF PENNSYLVANIA, INC.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

5. Submit a schedule showing the sources of gas supply associated with Annualized Mcf sales.

Response: The following two schedules show the sources of supply expected to be used to meet Columbia's sales requirements for two twelve-month periods. Schedule 1 is for the Future Test Year and is for the twelve-month period ending November 30, 2022. Schedule 2 is for the Fully Projected Future Test Year which is for the twelve-month period ending December 31, 2023. Consistent with the fact that Columbia now bills in therms rather than cubic feet, the information is provided in MDth rather than Mcf.

Schedule 1: Twelve Months Ending November 30, 2022

	<u>(MDth)</u>
Annualized Sales	39,704
<u>Sources of Gas</u>	
Interstate Pipeline Purchases	37,106
City Gate Purchases	0
Local Production	256
Storage	(1,255)
Total	36,107

Schedule 2: Twelve Months Ending December 31, 2023

	<u>(MDth)</u>
Annualized Sales	40,188
<u>Sources of Gas</u>	
Interstate Pipeline Purchases	36,809
City Gate Purchases	0
Local Production	255
Storage	(658)
Total	36,406

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

18. If the utility has a Fuel Adjustment Clause:
- a. State the base fuel cost per MCF chargeable against basic customers' rates during the test year. If there was any change in this basic fuel charge during the test year, give details and explanation thereof.
  - b. State the amount in which the fuel adjustment clause cost per MCF exceeds the fuel cost per MCF charged in base rates at the end of the test year.
  - c. If fuel cost deferment is used at the end of the test year, give:
    - (i) The amount of deferred fuel cost contained in the operating statement that was deferred from the 12-month operating period immediately preceding the test year.
    - (ii) The amount of deferred fuel cost that was removed from the test period and deferred to the period immediately following the test year.
  - d. State the amount of Fuel Adjustment Clause revenues credited to the test year operating account.
  - e. State the amount of fuel cost charged to the operating expense account in the test year which is the basis of Fuel Adjustment Clause billings to customers in that year. Provide summary details of this charge.
  - f. From the recorded test year operating account, remove the Fuel Adjustment Clause Revenues. Also remove from the test year recorded operating account the excess of fuel cost over base rate fuel charges, which is the basis for the Fuel Adjustment charges. Explain any differences between FAC Revenues and excess fuel costs. (The above is intended to limit the operating account to existing customers' base rate revenues and expense deductions relative thereto).

Response:

Please see Exhibit No. 12, Schedule No.2.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

23. Submit a schedule showing fuel cost in excess of base compared to fuel cost recovery for the period two months prior to test year and the test year.

Response:

Refer to Exhibit No. 12, Schedule No. 3.

24. Supply a detailed analysis of Purchased Gas for the test year and the twelve month period prior to the test year.

Response:

See Exhibit No. 12, Schedule No. 4, Page 2 and 3, for details of Purchased Gas for the twelve months ended November 2020 and November 2021.

25. Submit calculations supporting energy cost per MCF and operating ratio used to determine increase in costs other than production to serve additional load.

Response:

See Exhibit No. 12, Schedule No. 2 for calculations of the initial base cost of gas (energy cost). See Exhibit No. 3 for cost adjustments.

26. Submit detailed calculations for bulk gas transmission service costs under supply and / or interconnection agreements.

Response:

Columbia has no bulk gas transmission agreements.

30. Provide a schedule showing suppliers, MCF purchased, cost (small purchases From independent suppliers may be grouped); emergency purchases, listing same information; curtailments during the year; gas put into and taken out of storage; line loss, and any other gas input or output in the ordinary course of business.

Response:

See response to Exhibit No. 112, Schedule No.2, Question 24, for details of gas purchases for the twelve months ended November 2020 and November 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

31. Provide a schedule showing the determination of the fuel costs included in the base cost of fuel.

Response:

Refer to Exhibit No. 12, Schedule No. 5.

36. State the amount of gas, in MCF, obtained through various suppliers in past years.

Response:

See response to Exhibit No, 112, Schedule No.2, Question 24, for details of gas purchases for the twelve months ended November 2020 and November 2021.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 IV. RATE SCHEDULE  
B. GAS UTILITIES

11. Supply the net Fuel Clause Adjustment by month for the test year.

Response:

Refer to Exhibit No. 12, Schedule No.6.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
OPERATIONS AND MAINTENANCE EXPENSE ADJUSTMENTS  
TO THE TWELVE MONTHS ENDED DECEMBER 31, 2019  
ADJUSTMENTS TO PURCHASED GAS EXPENSE

53.62

To adjust the Cost of Purchased Gas Expense to the level being recovered through base tariff rates.

Response:

The adjustment to the Cost of Purchased Gas Expense for the twelve months ending November 30, 2022 is (\$7,127,546) and for twelve months ending December 31, 2023 is (\$1,847,849). Please see Page 2 and 3 of this schedule for detail of the adjustment by rate.

COLUMBIA GAS OF PENNSYLVANIA, INC  
SECTION 53.62 RECOVERIES OF FUEL COSTS BY GAS UTILITIES

In addition to information otherwise required to be filed by a jurisdictional natural gas distributor with gross intrastate annual operating revenues in excess of \$40 million seeking a change in its base rates, each gas utility must also file updates to the information required by § 53.64(c) (relating to filing requirements for natural gas distributors with gross intrastate annual operating revenues in excess of \$40 million). In the case of a gas utility purchasing gas as defined at § 53.61 (a) (relating to purpose) from an affiliated interest, it shall also file updates to the information required at § 53.65 (relating to special provisions relating to natural gas distributors with gross intrastate annual operating revenues in excess of \$40 million with affiliated interests). These updates shall to be made at the time the base rate case under 66 Pa. C.S. § 1308 (relating to voluntary changes in rates) is originally filed. Deficiencies in filing will be treated as set forth at § 53.51(c) (relating to general).

Response:

Please see Exhibit No. 12, Schedule No. 8.

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.52

Applicability; public utilities other than canal, turnpike, tunnel bridge and wharf companies.

- (a) Whenever a public utility, other than a canal, turnpike, tunnel, bridge or wharf company files a tariff, revision or supplement effecting changes in the terms and conditions of service rendered or to be rendered, it shall submit to the Commission, with the tariff, revision or supplement, statements showing all of the following:
- (1) The specific reasons for each change.
  - (2) The total number of customers served by the utility.
  - (3) A calculation of the number of customers, by tariff subdivisions, whose bills will be affected by the change.
  - (4) The effect of the change on the utility's customers.
  - (5) The direct or indirect effect of the proposed change on the utility's revenues and expenses.
  - (6) The effect of the change on the service rendered by the utility.
  - (7) A list of factors considered by the utility in its determination to make the change. The list shall include a comprehensive statement about these factors were chosen and the relative importance of each. This subsection does not apply to a portion of a tariff change seeking a general rate increase as defined in 66 Pa. C.S. §1308 (relating to voluntary changes in rates).
  - (8) Studies undertaken by the utility in order to draft its proposed change. This paragraph does not apply to a portion of a tariff change seeking a general rate increase as defined in 66 Pa. C.S. §1308.
  - (9) Customer polls taken and other documents which indicate customer acceptance and desire for the proposed change. If the poll or other documents reveal discernible public opposition, an explanation of why the change is in the public interest shall be provided
  - (10) Plans the utility has for introducing or implementing the changes with respect to its ratepayers.
  - (11) F.C.C., F.E.R.C. or Commission orders or rulings applicable to the filing.

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.52

- (b) Whenever a public utility, other than a canal, turnpike, tunnel, bridge or wharf company files a tariff, revision, or supplement which will increase or decrease the bills to its customers, it shall submit in addition to the requirements of subsection (a), to the Commission, with the tariff, revision or supplement, statements showing all of the following:
- (1) The specific reason for each increase or decrease.
  - (2) The operating income statement of the utility for a 12-month period, the end of which may not be more than 120 days prior to the filing.
  - (3) A calculation of the number of customers, by tariff subdivision, whose bills will be increased.
  - (4) A calculation of the total increase, in dollars, by tariff subdivision, projected to an annual basis.
  - (5) A calculation of the number of customers, by tariff subdivision, whose bills will be decreased.
  - (6) A calculation of the total decreases, in dollars, by tariff subdivision, projected to an annual basis.

Response:

(a) & (b)

Refer to Exhibit No. 13, Schedule No. 1.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 II.RATE OF RETURN  
A. ALL UTILITIES

13. Attach copies of the summaries of the projected two years' Company's budgets (revenues, expense, and capital).

Response:

Please see the Company's response to Standard Data Request GAS-ROR-13 for projected revenues and expenses.

Please see the Company's response to Standard Data Request GAS-ROR-14 for the projected construction budget.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

19. List extraordinary property losses as a separate item, not included in operating expenses or depreciation and amortization. Sufficient supporting data must be provided.

Response:

See Exhibit No. 13 Schedule No. 5

39. Identify the specific witness for all statements and schedules of revenues, expenses, taxes, property, valuation, etc.

Response:

Refer to Exhibit No. 13 Schedule No. 3.

40. Adjustments which are estimated shall be fully supported by basic information reasonably necessary.

Response:

Refer to Exhibit No. 13 Schedule No. 4.

41. Submit a statement explaining the derivation of the amounts used for projecting future test year level of operations and submit appropriate schedules supporting the projected test year level of operation.

Response:

Refer to Exhibit 13 No. Schedule No. 4.

44. Ratios, percentages, allocations and averages used in adjustments must be fully supported and identified as to source.

Response:

Refer to Exhibit 13 No. Schedule No. 4.

45. Provide an explanation of any differences between the basis or procedure used in allocations of revenues, expenses, depreciation and taxes in the current rate case and that used in the prior rate case.

Response:

Refer to Exhibit 13 No. Schedule No. 4.

46. Supply a copy of internal and independent audit reports of the test year and prior calendar year, noting any exceptions and recommendations and disposition thereof.

Response:

Refer to Exhibit No. 13 Schedule No. 4, Att. A.

COLUMBIA GAS OF PENNSYLVANIA, INC  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

27. Submit a schedule for gas producing units retired or scheduled for retirements subsequent to the test year showing station, units, Mcf capacity, hours of operation during test year, net output produced and cents/Mcf of maintenance and fuel expenses.

Response:

See Exhibit No. 13, Schedule No. 6.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
A. ALL UTILITIES

26. Provide a list of reports, data, or statements requested by and submitted to the Commission during and subsequent to the test year.

Response:

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 IV. RATE SCHEDULE  
B. GAS UTILITIES

6. Supply copies of all present and proposed Gas Tariffs.

Response:

Refer to Exhibit No. 14, Schedule No 2.

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.53 I. VALUATION

A. ALL UTILITIES

1. Provide a corporate history (include the dates of original incorporation, subsequent mergers and/or acquisitions). Indicate all counties and cities and other governmental subdivisions to which service is provided (including service areas outside the state), and the total population in the area served.

Response:

See Exhibit No. 15 Schedule No. 1.

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.53 I. VALUATION

C. GAS UTILITIES

2. Provide an overall system map, including and labeling all measuring and regulating stations, storage facilities, production facilities, transmission and distribution mains, by size, and all interconnections with other utilities and pipelines.

Response:

See Exhibit No. 15 Schedule No. 2.

COLUMBIA GAS OF PENNSYLVANIA, INC.

53.53 II. RATE OF RETURN

A. ALL UTILITIES

24. Attach chart explaining Company's relationship to its affiliates (System Structure).

Response:

See Exhibit No.15 Schedule No. 3.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III. BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

7. Provide details of respondent's attempts to recover uncollectible and delinquent accounts.

Response: Refer to Exhibit No. 16.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
C. GAS UTILITIES

1. Provide, with respect to the scope of operations of the utility, a description of all property, including an explanation of the system's operation, and all plans for any significant future expansion, modification or other alteration of facilities.

This description should include, but not be limited to the following:

- a. If respondent has various gas services areas, indicate if they are integrated, such that the gas supply is available to all customers.
- b. Provide all pertinent data regarding company policy related to the addition of new consumers in the company's service area.
- c. Explain how respondent obtains its gas supply, as follows:
  - (i) Explain how respondent stores or manufactures gas; if applicable.
  - (ii) State whether the company has peak shaving facilities.
  - (iii) Provide details of coal-gasification programs, if any.
  - (iv) Describe the potential for emergency purchases of gas.
  - (iv) Provide the amount of gas in MCF supplied by various suppliers in the test year (include a copy of all contracts).
  - (vi) Provide the amount of gas in MCF supplied from company-owned wells during the test year.
- d. Provide plans for future supply, as follows:
  - (i) Supply details of anticipated gas supply from respondent's near-term development of gas wells, if any.
  - (ii) Provide gas supply agreements and well development ventures and identify the parties thereto.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 I. VALUATION  
C. GAS UTILITIES

- e. Indicate any anticipated curtailments and explain the reasons for the curtailments.
- f. Provide current data on any Federal Power Commission action or programs that may affect, or tend to affect, the natural gas supply to the gas utility.

Response:

See Exhibit No. 17.

COLUMBIA GAS OF PENNSYLVANIA, INC.  
53.53 III BALANCE SHEET AND OPERATING STATEMENT  
E. GAS UTILITIES

- 28. Provide a statement explaining the details of firm gas purchase (long-term) contracts with affiliated and non-affiliated utilities, including determination of costs, terms of contract, and other pertinent information.

Response:

See Exhibit No. 17.
