METROPOLITAN EDISON COMPANY/PENNSYLVANIA ELECTRIC COMPANY SUSTAINABLE ENERGY FUND

Introduction

In 2000, First Energy established the Metropolitan Edison Company Sustainable Energy Fund at Berks County Community Foundation and the Penelec Sustainable Energy Fund at the Community Foundation for the Alleghenies. Berks County Community Foundation and Community Foundation for the Alleghenies are 501(c)3 nonprofit organizations located in Reading and Johnstown, respectively.

The funds work together under the guidance of a joint volunteer advisory committee and in accordance with each organization's bylaws. The purpose of the funds is to promote:

- the development and use of renewable energy and clean energy technologies;
- energy conservation and efficiency;
- sustainable energy businesses; and
- projects that improve the environment in the companies' service territories, as defined by their relationship to the companies' transmission and distribution facilities.

The funds fulfill this purpose by seeking, vetting, and awarding grants, loans, and equity investments that benefit the ratepayers in the geographic territories within Pennsylvania served by Met Ed and Penelec.

From January 1, 2022, to December 31, 2022, the Metropolitan Edison Company/Pennsylvania Electric Company Sustainable Energy Fund (Met Ed/Penelec SEF) approved financing totaling \$847,042.

Representative Fund Outreach and Program Specific Activities 2022

Each year, in addition to awarding funds, the staff members who manage the Met Ed/Penelec SEF on behalf of the Community Foundations participate in activities designed to raise awareness of Met Ed/Penelec SEF activities. From January 1, 2022, to December 31, 2022, that outreach and grantmaking included the following activities:

- Staff represented the Met Ed/Penelec Sustainable Energy Fund and provided information about the Fund to potential grantees in-person and at virtual events (such as webinars, grant seminars, and workshops) related to relevant technology and trends in clean energy.
- Staff maintained the Met Ed/Penelec Sustainable Energy Fund website and Facebook pages, updating pages as appropriate and posting on Fund activities, grant opportunities, and topics related to energy efficiency and clean energy technologies.

- 2022 was the final year of strategic grantmaking for the following priority areas, which had been implemented in 2018:
 1. Providing up-front capital where needed in the form of grants or program-related investments to advance projects and support renewables (traditional work);
 2. Providing grants to support education, training, and workforce development in the renewable/sustainable energy field;
 3. Supporting energy efficiency efforts by providing grants for the creation of educational materials and grants or program-related investments to support buildings and retrofits; and
 4. Providing grants to support research and development efforts at colleges and universities, particularly for programs that will close the gap on the cost difference between traditional energy technologies and renewables.

- Throughout the year the community foundations provided all fund management operations, including monthly loan servicing, collection, due diligence on grant and loan applications, site visits, phone and email correspondence with prospective applicants, PUC correspondence, and investment management and reporting.

- Staff maintained the historical/geographical/technological mapping of SEF activity to ensure the map created in 2014 remained current and available on the website.
