

Corsica Gas Company Inc.

Winter readiness

answers to questions

1.Safety

During the summer months we divided the gas distribution lines into five sections.
We do high pressure tests and Leak detection tests on all pipestands and valves.

We watch each section while that section is under high pressure.
We do frost patrols as the weather mandates.
We check all regulators, valves and road crossings.

2. We have no employees ,

3..We have GPS locations of the natural gas suppliers wells and shut off valves .This information has been sent to the local fire departments and county emergency management agencies.

We communicate to the customers by phone and/or e mails.

4.We have more than ample supply for the customers we have.

Quantity of gas is unknown

5 The number of customers is forty

The customers are served by production lines.

6. We have had none since Jan 1- Jan 31 we had no problems.

No occurrences .We added an additional two inch line for an additional source of natural gas.
