Re: Petition of West Penn Power Company d/b/a Allegheny Power for Approval of its Energy Efficiency and Conservation Plan, Approval of Recovery of Costs through a Reconcilable Adjustment Clause and Approval of Matters Relating to the Energy Efficiency and Conservation Plan; Docket No. M-2009-2093218

Dear Secretary McNulty:

West Penn Power Company d/b/a Allegheny Power ("Allegheny Power" or "Company") files its Amended Energy Efficiency and Conservation ("EE&C") Plan pursuant to the Order of the Pennsylvania Public Utility Commission entered March 1, 2010, at the above-captioned docket. A separate, redline version of the Amended Plan is also included with the filing. The redline copy shows changes made to the EE&C Plan compared to the version filed December 21, 2009.

The Company pursued extensive input from the Company's demand response stakeholders and has included this input in providing additional information and program revisions included as part of this Amended EE&C Plan. More specifically:

The Plan contains revised program descriptions for the Customer Load Response and Customer Resources Demand Response Programs and provides additional information about the administration, marketing and incentive structures for these programs.

The Plan adds the Distributed Generation Program as a separate program to provide the parties with the additional information and budgets for this program independent of the other demand response programs. The Distributed Generation Program was a separate program in the Company's EE&C Plan filed June 30, 2009, and was consolidated with the Customer Resources Demand Response Program in the Company's Amended EE&C Plan filed December 21, 2009.

In addition to the revised program descriptions and additional information concerning the administration, marketing and incentive structures, the Plan revises the MW targets and incorporates access to energy data for the three demand response programs based on stakeholder feedback. The Company has added Appendices F.4. to F.8. to provide the parties with additional supporting information for these demand response programs.

James J. McNulty, Secretary
April 29, 2010
Page 2

In addition to the demand response programs discussed above, the Company has added Appendix F.3. to provide the Commission with a chart showing projections of the energy and demand reductions for each of the Company's EE&C programs based on existing metering verses smart metering infrastructure. These projections are based on the load ratio share of the customers the Company can leverage existing interval metering in providing the programs prior to deployment of smart metering infrastructure. The Company has also made additional minor edits throughout the filing to update implementation activities that have occurred since the original filing as well as to provide additional information on the Company's plans and status of contracts with conservation service providers.

As mentioned above, the redline copy shows changes made to the EE&C Plan compared to the version filed December 21, 2009. All deletions are shown in blue strikethrough and all insertions are shown in red underline formats. This includes any tables that were updated as a result of the changes incorporated as part of this Amended EE&C Plan.

A CD containing the Amended EE&C Plan is also enclosed. This filing is made by express delivery and is deemed filed today pursuant to 52 Pa. Code §1.11.

Respectfully submitted,

John L. Munsch
Attorney
