**EXPLANATION OF SYMBOLS**

---

**TARIFF FORMAT**

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4<sup>th</sup> revised Sheet 14 cancels the 3<sup>rd</sup> revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level;
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a).
  - 2.1.1.A.1.(a).1.
  - 2.1.1.A.1.(a).1.(i).
  - 2.1.1.A.1.(a).1.(i).(1).
- D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

## 2.1 Use of Facilities and Service (continued)

## 2.1.5 Directory Errors (continued)

- E. Definitions: As used in Paragraphs 1, 2, 3, and 4 above, the terms "error," "mistake" or "omission" shall refer to a discrepancy in the directory listing or directory assistance records which the Company has failed to correct and where the error affects the ability to locate a particular subscriber's correct telephone number. The terms shall refer to addresses only to the extent that an error, mistake or omission of an address places the subscriber on an incorrect street or in an incorrect community.
- F. Notice: Such allowances or credits as specified in Paragraphs 1, 2, and 3 above, shall be given upon notice to the Company by the subscriber that such error, mistake or omission has occurred; provided, however, that when it is administratively feasible for the Company to have knowledge of such error, mistake or omission, the Company shall give credit without the requirement of notification by the subscribers.

## 2.2 Minimum Period of Service

The Minimum Period of Service is one month except as otherwise provided in this Tariff. The customer must pay the regular tariffed rate for the service they subscribe to for the Minimum Period of Service. If a customer disconnects service before the end of the minimum service period, that customer is responsible for paying the regular rates for the remainder of the minimum service period. When the service is moved within the same building, to another building on the same premises, or to a different premise entirely, the period of service at each location is accumulated to calculate if the customer has met the Minimum Period of Service obligation.

If service is terminated before the end of the Minimum Period of Service as a result of condemnation of property, damage to property requiring the premises to be abandoned, or by the death of the customer, the customer is not obligated to pay for service for the remainder of the minimum period.

If service is switched over to a new customer at the same premises after the first month's service, the Minimum Period of Service requirements are assigned to the new customer if the new customer agrees in writing to accept them. For facilities not taken over by the new customer, the original customer is responsible for the remaining payment for the minimum service period in accordance with the terms under which the service was originally furnished.

The Company may offer services, which require a minimum use guarantee ("MUG") wherein the customer agrees, in writing, to pay the minimum amount per period agreed to upon commencement of service. Customers falling below their MUG will be billed for the minimum amount due per period pursuant to the MUG agreement.

**SECTION 2 - GENERAL RULES AND REGULATIONS****2.2 Minimum Period of Service (continued)**

Should the customer choose to terminate their contract prior to expiration of the term agreed to in the MUG agreement, the customer will be liable for the minimum usage requirements contained in the contract multiplied by the number of months remaining in the term, unless customer converts to another Company service with equal or greater term and minimum usage commitment. If no termination of customer's contract, customer will be liable for their monthly average usage (calculated over the last three full months immediately preceding the date of termination) multiplied by the number of months remaining in the term.

The initial contract period for service under this section is one month. Subsequent contract periods shall be for additional one-month periods unless otherwise specified.

**2.2.1 Termination Liability Charge**

If a Subscriber terminates business network switched or dedicated services, to include private branch exchange trunk service and PRI T-1 or comparable services, in whole or in part, before the expiration of the contract period, the Subscriber shall pay to the Company an early termination liability charge for each disconnected service(s) or feature(s) equal to the applicable monthly rate for the Company service(s) or feature(s) multiplied by the number of months remaining in the contract term.

**2.3 Payment for Service Rendered****2.3.1 Responsibility for All Charges**

Any applicant for facilities or service may be required to sign an application form requesting the Company to furnish the facilities or service in accordance with the rates, charges, rules and regulations from time to time in force and effect. **2.3.2 Deposits**

Any applicant or customer whose financial responsibility is not established to the satisfaction of the Company may be required to deposit a sum up to an amount equal to the total of the estimated local service and intraLATA toll charges for up to two (2) months for the facilities and service. If the minimum period of service for the requested facilities and service is more than one month, as specified in this Tariff, the customer may also be required to deposit a sum up to an amount equal to the total charges for service for the minimum service period less any connection charge paid by the customer. The fact that a deposit has been made shall in no way relieve the applicant or customer from complying with the Tariff regulations for the prompt payment of bills on presentation. Each applicant from whom a deposit is collected will be given a certificate of deposit and circular containing the terms and conditions applicable to deposits, in accordance with the Rules and Regulations of the Commission pertaining to customer deposits.

**SECTION 2 - GENERAL RULES AND REGULATIONS****2.3 Payment for Service Rendered (continued)****2.3.3 Payment of Charges**

Charges for facilities and service, other than usage charges, are due monthly, in advance. All other charges are payable upon request of the Company. Bills are due on the due date shown on the bill and are payable at any business office of the Company, by U.S Mail, or at any location designated by the Company. All bills are presumed accurate and shall be binding on the Customer unless written notice of the disputed charge(s) is received by the Company within thirty (30) days after the invoice date. If the Company does not receive objection within three months after the bill is rendered, the items and charges appearing thereon shall be determined to be correct and binding upon the Customer. A bill will not be deemed correct and binding upon the Customer if the Company has records on the basis of which an object may be considered or if the customer has in his or her possession such Company records. If objection results in a refund to the Customer, such refund will be with interest at the greater of the unadjusted customer deposit rate or the applicable late payment rate, if any, for the service classification under which the customer was billed. Interest will be paid from the date when the customer overpayment was made, adjusted for any changes in the deposit rate or late payment rate, compounded monthly, until the overpayment is refunded. Notwithstanding the foregoing, no interest will be paid by the Company on customer overpayments that are refunded within 30 days after the Company receives the overpayment.

Where an objection to the bill involves a superseded service order, the items and charges appearing on the bill shall be deemed to be correct and binding upon the customer if the Company does not receive objection within two months after the bill is rendered.

**SECTION 2 - GENERAL RULES AND REGULATIONS**

## 2.9 Additional Provisions Applicable to Residential Customers (continued)

## 2.9.3 Deposits

## A. General

With the exception of customers who have established credit as defined by 2.9.B. of this Tariff, the Company may require a deposit, as described in Section 2.3.2 of this Tariff, from a residential customer who is applying for service if the customer: 1) has had service terminated for nonpayment once within the preceding six-month period, or 2) is delinquent in payment. A customer is delinquent in payment if that customer has received two consecutive telephone bills without making payment of at least one-half the total arrears due on the due date of the second bill. A customer is not considered delinquent, however, if an amount in dispute is not paid before the dispute is resolved.

An existing customer is an applicant for service who was a customer of the Company within twelve months of making the request, provided that prior service was not terminated for nonpayment, unless service is requested within 10 days of such termination for nonpayment. Applicants for residential service and existing residential customers are permitted to pay deposits in installments over a period not to exceed 6 months.

A new customer is an applicant for service who has not been a customer of the Company within twelve months of making the request for service. A new customer shall not be required to post a security deposit as a condition of receiving telephone service.

A seasonal customer is an individual who applies for and receives telephone service periodically each year, intermittently during the year or at other regular intervals scheduled at the time of application. A seasonal customer may be required to post a deposit.

## B. Established Credit

A customer has established credit if:

- (1) The customer has a recent payment history (within the preceding twelve months) with the Company unless his or her records indicate that they are delinquent in payment or have had service terminated for nonpayment. A customer who still owes money to the Company for residential service on a prior account shall be offered a deferred payment plan provided that the customer had service for three months and was not terminated for nonpayment during that period. **C. Deposit Refund**

New deposits from a residential customer are reviewed after the first three (3) monthly bills have been rendered; if too much has been taken, the excess plus accrued interest is returned. The entire deposit plus accrued interest is returned to a residential customer either when the customer has established proper credit or after one (1) year, unless the customer is delinquent in payment, in which case the Company may continue to retain the deposit until the delinquency is satisfied.

- C. A customer may not pay a portion of the charges and then request installment billing for the remaining charges;
- D. More than one installment plan may be in effect for the same customer at the same time;

In addition, service may not be disconnected during the periods of December 23 through the 26 and December 30 through January 2.
- D. Telephone service may be suspended or terminated for nonpayment of the undisputed portion of a disputed bill or deposit if the customer does not pay the undisputed portion after being asked to do so. Suspended or terminated residential service shall be reconnected within 24 hours following payment or within 24 hours of the end of circumstances beyond the Company's control, which delay the reconnection. The Commission may direct that service be reconnected in less than 24 hours.
- E. Nonpayment of toll charges may result in the disconnection of toll service, but will not result in the disconnection of local service.
- F. Nonpayment of nonbasic or nonregulated service charges cannot result in the disconnection of local service or regulated toll service.

## 2.9.7 Deferred Payment Agreements

Service will not be suspended or terminated unless the customer has been advised that a deferred payment plan can be arranged. An existing residential customer with three or more month's service and for who service has not been terminated for nonpayment is eligible for Deferred Payment Arrangements (DPA). Final notice of suspension/termination will advise the customer of deferred payment arrangements and will include, in bold print, a notice that assistance in reaching an agreement may be obtained from the Commission. The DPA notice will be mailed no less than six days before termination of total service.

A Deferred Payment Agreement will be for a period agreed to by both the customer and the Company.

If the Company believes that the customer has the resources to pay the bill, it shall notify both the customer and the Commission in writing of the reasons for its belief. The Commission shall make the final determination as to whether a DPA should be provided. A customer with medical emergencies and a customer who is elderly, blind or disabled shall be exempt from such eligibility criteria.

When a check received from a residential customer is dishonored, the company shall make two attempts, one outside of normal business hours, to contact the customer within 24 hours. The additional notice will be given provided that the customer has not submitted a dishonored check within the past 12 months.

**2.9.9 Suspension or Termination - Abandonment**

Suspension/termination of residential service for abandonment or unauthorized use may occur only after the Company makes a reasonable attempt to determine occupancy or authorized use, or the customer takes reasonable steps to prevent unauthorized use. A notice must be sent to the customer seven days before such suspension or termination. The notification requirement is waived when previous mailings are returned by the Post Office or the company is advised that a new customer has moved into the location.

**2.9.10 Backbilling for Residential Customers**

The Company shall not charge a residential customer for previously unbilled service or adjust upward a bill previously rendered when the period for the unbilled service or billing adjustment is more than twenty-four months prior to the mailing of the bill or the upward adjustment unless the conduct of the customer caused or contributed to the failure of the Company to render timely accurate billing. Unless the customer causes the late billing, the Company shall explain the reason for the late billing and shall advise the customer that suspension/termination of service is not permitted for charges billed in excess of six months after the service was provided. The customer will be given the opportunity to pay the charges under an installment plan on a schedule equal in time to the length of the backbilling period.

**2.10 Allowances for Interruptions in Service**

**SECTION 2 - GENERAL RULES AND REGULATIONS**

## 2.10 Allowances for Interruptions in Service (continued)

## 2.10.1 Credit for Interruptions

- A. An interruption period begins when the Customer reports a service, facility, or circuit to be interrupted and releases it for testing and repair. An interruption period ends when the service, facility, or circuit is operative. If the Customer reports a service, facility, or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.
- B. For calculating credit allowances, every month is considered to have 30 days. A credit allowance is applied on a pro rata basis against the rates specified hereunder and is dependent upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit.
- C. A credit allowance will be given, upon request of the customer to the business office, for interruptions of 30 minutes or more. Credit allowances will be calculated as follows:
- (1) if interruption continues for less than 24 hours:
    - (a) 1/30th of the monthly rate if it is the first interruption in the same billing period.
    - (b) 2/30ths of the monthly rate if there was a previous interruption of at least 24 hours in the same billing period.
  - (2) if interruption continues for more than 24 hours:
    - (a) if caused by storm, fire, flood or other condition out of Company's control, 1/30th of the monthly rate for each 24 hours of interruption.
    - (b) for other interruption, 1/30 of the monthly rate for the first 24 hours and 2/30ths of such rate for each additional 24 hours (or fraction thereof); however, if service is interrupted for over 24 hours, more than once in the same billing period, the 2/30ths allowance applies to the first 24 hours of the second and subsequent interruptions.

Two or more interruptions of 30 minutes or more during any one 24-hour period shall be considered as one interruption.

Calling Number Delivery – All calling numbers presented to the services working on ISDN PRI can be delivered to the Customer's CPE, including calls made to Direct Inward Dialing Service telephone numbers. This feature is optioned on a per ISDN PRI Port basis only and is offered in appropriately equipped central offices.

Clear Channel Capability – The "B" channels on the ISDN PRI are clear, since all signaling and control functions are handled by the "D" channel. This allows all 64 kbps on each "B" channel to be used for Customer information over the ISDN PRI connection. Calls over the network may either by 56 kbps or 64 kbps depending on the public network in place between the ISDN PRI and the distant end of the call.

Digital Voice Transmission – All voice calls are transmitted using digital signaling.

Channel Configuration – Allows some or all B Channels to be dedicated to exchange and MTS, DID, or 800 Services. Multiple dedicated trunk groups can be established on the same primary port or group of primary ports.

Direct Inward Dialing Signal – Permits incoming dialed calls from the exchange network to reach a specific number serviced by Customer-premises equipment (CPE) without the assistance of an attendant. It also provides for the unique identification of the call based on digits sent to the CPE by the central office. The central office will output digits to the CPE which can further process the calls as desired. Charges associated with blocks of DID numbers are located within this tariff.

Equal Access – Allows the Customer to preselect an Intra and Interexchange Carrier for each circuit switched voice or circuit switched data trunk group. The carrier designation can be changed for applicable charges as shown within this tariff.

6.1 CENTRAL OFFICE, LINE AND TRUNK FEATURES

6.1.1 General

The features in this Section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability; features may not be available with all classes of service. Transmission levels may not be sufficient in all cases.

Central Office Calling Features are optional features of central office services furnished to individual line end users. The Company may furnish Central Office Calling Features where there is available central office equipment with the proper program updates as determined by the Company. Central Office Calling Features are only provided for basic access line services. The Customer will be billed a charge for each change made to features or a group of features included in the Customer's service.

6.1.2 Description of Line and/ or Trunk Features

The following features are for end user lines:

Call Forwarding Busy Line – This feature automatically reroutes an incoming call to a Customer predesignated number when the called number is busy.

Call Forwarding Busy Line/Don't Answer – This feature automatically reroutes an incoming call to a Customer predesignated number when the called number is busy or when the called number does not answer within the number of rings programmed by the Company.

Call Forwarding Don't Answer -This feature automatically reroutes an incoming call to a Customer predesignated number when the called number does not answer within the number of rings programmed by the Company.

Call Forwarding Variable -Call Forwarding, when activated, redirects attempted terminating calls to another Customer-specific line. The Customer may have to activate and deactivate the forwarding function and specify the desired terminating telephone number during each activation procedure. ## 6.1 CENTRAL OFFICE, LINE AND TRUNK FEATURES (continued)

## 6.1.2 Description of Line and/ or Trunk Features (continued)

Call Trace -Allows a Customer to trace the most recent incoming call by dialing a code to automatically request that the Company record a caller's originating telephone number and the date and time of the call as well as the date and time the Customer initiated trace. The information is disclosed only to a law enforcement agency for investigation and case preparation purposes.

Call Waiting/Cancel Call Waiting -Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the Customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) Customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the Customer disconnects from the call.

Caller ID -Allows the subscriber to view the listed telephone number from which the incoming call is dialed before the call is answered. The calling number is displayed on a Customer provided compatible device attached to the Customer's telephone line.

Caller ID Deluxe -Allows subscriber to view listed name associated with the telephone number before the phone is answered. The calling number and name are displayed on a Customer provided compatible display device attached to the Customer's telephone line.

Remote Access to Call Forwarding - This feature combines call forwarding with remote access capability. In addition to the current call forwarding feature-access method, the Remote Access Call Forwarding feature provides Customers access from any tone-type address signaling capable telephone. The Customer dials a remote access directory number and then is guided by voice messages to enter their home or office telephone number equipped with the Remote Access Call Forwarding feature, a Personal Identification Number (PIN) and a feature code.

Repeat Call -This Automatic Redial feature allows a Customer to automatically redial the last number dialed. This is accomplished by the Customer activating a code. The network periodically tests the busy/ free status of the called line for up to 30 minutes until both lines are found free and then redials the call for the Customer.

Repeat Call feature also allows Customers, having reached a busy number, to dial a code before hanging up. Repeat Dialing feature then continues to try the busy number for up to 30 minutes until it becomes free. Once the busy line is free the call is automatically redialed and the Customer is notified of the connected call via a distinctive ring.

## 6.1 CENTRAL OFFICE, LINE AND TRUNK FEATURES (continued)

## 6.1.2 Description of Line and/ or Trunk Features (continued)

The following types of calls cannot be accessed with Repeat Call:

- Calls to 911 -Calls to Directory Assistance
- Calls to toll free 8XX Service numbers

Return Call -Allows the subscriber to automatically redial the number of the last incoming call whether answered or not.

Caller ID Per-Call Blocking (PCB) -This blocking option will allow callers to block the passage of their telephone numbers and/ or names on outgoing calls by dialing a special code, prior to making each call.

Caller ID Per-Line Blocking (PLB) -Caller ID Per-Line Blocking will allow callers to automatically prevent the display of their telephone numbers and/ or names on a permanent basis unless the service is deactivated, on a per call basis, by dialing a special code.

Special Ring – This feature allows a Customer to have up to three (3) separate telephone numbers assigned to one local exchange line. Each telephone number will provide a distinctive ring on incoming calls to allow for identification of the incoming call. A distinctive call waiting tone for each telephone number will be provided, where facilities permit, to Customers also subscribing to call waiting.

Speed Dial 8 -Allows placing calls to eight (8) other phone numbers by dialing a one or two digit code rather than the complete phone number.

Three Way Calling/Call Hold -The Three Way Calling feature allows a Customer to add a third party to an existing two-way call and form a 3-way call. The call must have been originated from outside the station group and terminate to a station within the station group. The Call Hold feature allows a Customer to put any in-progress call on hold by flashing the switchhook and dialing a code.
