SECRETARY'S BUREAU

RE: Docket # A-2012-2340872
Application of PPL Electric Utilities
Northeast-Pocono Reliability Project
West Pocono-North Pocono Segment

Dear Secretary Chiavetta:

We have reviewed the subject application and exhibits of PPL Utilities regarding the subject project and request the Commission to consider the following comments of Big Bass Lake Community Association (BBLCA) prior to any approval action of the Public Utility Commission:

1. Big Bass Lake Community Association requests PPL to revert to Alternative Route C transmission line from Blair Hill (approximately 2000 ft north where the proposed line crosses over Sassafrass Hill Road) and follow it as it approaches and crosses Route 435 and proceeds through the northern limits of the Covington Industrial Park as stated in our correspondence to PPL dated September 26, 2012 with a copy to PPUC. Instead PPL has selected Alternative Route D-1 as the preferred route for the West Pocono-North Pocono Segment.
2. It should be noted that PPL did not respond to our letter referenced in item #1 above dated September 26, 2012 with petitions signed by 362 members of Big Bass Lake Community Association and local effected citizens. Since the end of September we have obtained an additional 134 signatures. Attached you will find a copy of the September 26, 2012 letter that PPL ignored and copies of the signed petitions.

3. Table 4-11 and Table 4-12, Attachment 4 of the application, do not include any quantitative criteria for recreational areas that are impacted by the various transmission line routes. Specifically, our Environmental Conservation Park and Recreation/Education Area, AKA ELM Park, is visually impacted by Alternative Route D-1. This recreation area is utilized by many members and children of our 1100 home community who wish to retain the tranquility of our rural setting. PPL's application ignores this area despite our various communications to PPL regarding this sensitive Conservation, Recreation and Educational park area.
4. Table 4-11 and Table 4-12, Attachment 4 of the application state there are no industrial buildings within 300-feet of the transmission centerline. This is not accurate. Within the Covington Industrial Park there are three buildings within 300-feet and one building within 450-feet of the transmission centerline.
5. Table 4-11 and Table 4-12, Attachment 4 of the application, do not include any quantitative criteria for impacts to utilities. Alternative Route D-1 through Covington Industrial Park is located just behind the westerly curb line of First Avenue. The area behind the westerly curb line contains many underground utilities including water, sanitary sewer, electricity and communications. Construction of PPL transmission line supports with large foundations may conflict with these vital existing utilities. Additionally, employees of the industrial complex, delivery trucks and maintenance workers for utilities and grounds keeping will be subject to the electric and magnetic fields generated by the electric conductors parallel to First Avenue for over 1000 linear feet.
6. Table 4-11 and Table 4-12, Attachment 4 of the application, do not include any quantitative criteria for noise impacts. Attachment 3 – Environmental Setting does not discuss this topic either. Construction equipment and activities that generate significant noise levels should be limited to normal daylight working hours and comply with the local noise ordinances of Covington and Clifton Townships. Operation of the transmission line may create humming or vibration noises. PPL should select conductor mounting hardware that minimizes operational noise and provide for line maintenance and repair if required.
7. Alternative Route D-1 does not provide PPL's minimum required 150-ft right-of-way width through Covington Industrial Park. The transmission centerline is located just behind the westerly curb line of First Avenue. Distance between the existing dedicated street and the paved areas utilized by the AmeriCold facility is approximately 120-ft. Big Bass Lake

Community Association recommends the original routing, Alternate D, behind the buildings within Covington Industrial Park rather than in front of the buildings.

8. BBLCA objects to the use of several of the herbicides included in Attachment 12- Vegetation Management. Vegetation should be controlled without the use of herbicides and be focused on biological agents, hand pulling, controlled burning and cutting. Use of herbicides near paved areas such as Alternative Route D-1 through Covington Industrial Park is not appropriate because of potential runoff directly to the pavement and thence to Roaring Brook. PPL approved herbicides listed in Table 4 include glyphosate, imazapyr, 2, 4-D, triclopyr and picloram. These are not benign chemicals. The associated risks include the following:
 - a) Glyphosate-containing products are acutely toxic to animals, including humans. Laboratory studies of animals have found adverse effects to reproduction and increase frequency of carcinogenicity. In studies of people exposed to glyphosate herbicides, exposure is associated with an increase risk of miscarriages, premature birth, and the cancer non-Hodgkin's lymphoma.
 - b) Imazapyr is corrosive to eyes and can cause irreversible damage. Many adverse effects have been found in laboratory animals. Imazapyr moves readily in soil. It has contaminated surface and ground water following applications.
 - c) 2,4-D is unusual among herbicides in that it causes an array of adverse effects to the human nervous system including myotonia, disruption of nervous system chemicals and behavioral changes. 2, 4-D has also caused genetic damage to laboratory animals.
 - d) Triclopyr is corrosive to eyes, and can cause allergic skin reactions. In laboratory test of animals Triclopyr caused an increase in breast cancer, genetic damage and is damaging to kidneys. Triclopyr is mobile in soil and has contaminated wells, streams and rivers.
 - e) Picloram is contaminated with the carcinogen hexachlorobenzene causing cancer of the liver, thyroid and kidneys and also damages bones, blood, the immune system and the endocrine system. Picloram is persistent and highly mobile in soil. It is widely found as a contaminant of groundwater.

We respectfully request PPL to consider our comments and re-evaluate the project's visual, noise, utility, wildlife, groundwater and surface water impacts. PPL should minimize the use of herbicides that can endanger human and animal health, pollute surface and ground water resources along the transmission line route.

In closing, based on the above comments, we recommend the Alternative Route C transmission line be considered as the preferred alternative.

Sincerely,

A handwritten signature in cursive script that reads "Mary D. Ameen".

RE: PPL Northeast/Pocono Reliability Project
West Pocono to North Pocono Segment

Dear Mr. Haupt:

Please find the enclosed petition signed by 362 members of Big Bass Lake Community Association and citizens of Clifton, Thornhurst, and Covington Townships addressed to PPL in regards to the proposed route of the Northeast/Pocono Reliability Project. With this petition Big Bass Lake Community Association is again asking PPL to revert to your Alternative Route C transmission line from Blair Hill and follow it as it approaches and crosses Route 435 and then proceeds through the northern limits of the Covington Industrial Park. We strongly support the over-all scope of your project. This is a very minor modification and makes a reasonable accommodation to the concerns of the Big Bass Lake Community Association.

We appreciate your letter dated August 20, 2012 in response to the proposed "Citizens Route". Based on your response we are asking that only a minor modification be made to your current proposed route for this project. Specifically we are asking that you revert to your Alternative Route C transmission line as outlined above for the following reasons:

- The proposed portion of the Alternative Route C transmission line nearest Big Bass Lake Community has already been proposed by PPL as a feasible alternative route.

Page 1 of 2

COPY

- The proposed portion of the Alternative Route C transmission line would apparently not require any significant change in transmission line lengths so this would not result in any additional cost to PPL customers and may in fact be a less expensive option thereby keeping with PPL's goal to keep costs under control.
- The proposed portion of the Alternative Route C transmission line would not create any more impact to state game lands or state forest.
- The proposed portion of the Alternative Route C transmission line would not require any relocation of any Substations.
- The proposed portion of the Alternative Route C transmission line would have less visual impact to the more densely populated area of Big Bass Lake Community and our Environmental Conservation Park and Recreation area.
- The proposed portion of the Alternative Route C transmission line is preferred by Big Bass Lake Community Association and many citizens and businesses surrounding this area, further helping PPL to minimize the impact to communities.

For the above reasons and as demonstrated by the signed petition we respectfully request PPL to consider reverting to the proposed portion of the Alternative Route C transmission line.

In closing, based on the above reasons and the visual Impacts to the Big Bass Lake Community Association and our Environmental Conservation Park and Recreation area, we recommend the alternative Route C transmission line be considered as the preferred alternative.

Sincerely,

Mary D. Ameen
Chair, Big Bass Lake Community Association

c: Sen. John Blake

Enclosures: Original Signed Petitions

Dear PPL;

We, the undersigned Citizens of Clifton, Covington or Thornhurst Townships, are concerned about the impact of the proposed route of the Northeast/Pocono Reliability Project on our residents, our communities, our exceptional value quality waterways and our forested lands.

Therefore we support the "Citizens' Route" that has been proposed to you. We urge PPL to revert to your Alternative Route C line from Blair Hill and follow it as it approaches and crosses Route 435 and then proceeds through the northern part of the Covington Industrial Park.

Dear PPL;

We, the undersigned Members of Big Bass Lake Community Association, are concerned about the impact of the proposed route of the Northeast/Pocono Reliability Project on our residents, our community, our Environmental Lake Management Park & Education Area, our exceptional value quality waterways and our forested lands.

Therefore we support the "Citizens' Route" that has been proposed to you. We urge PPL to revert to your Alternative Route C line from Blair Hill and follow it as it approaches and crosses Route 435 and then proceeds through the northern part of the Covington Industrial Park.

Dear PPL;

We, the undersigned Citizens of Clifton, Covington or Thornhurst Townships, are concerned about the impact of the proposed route of the Northeast/Pocono Reliability Project on our residents, our communities, our exceptional value quality waterways and our forested lands.

Therefore we support the "Citizens' Route" that has been proposed to you. We urge PPL to revert to your Alternative Route C line from Blair Hill and follow it as it approaches and crosses Route 435 and then proceeds through the northern part of the Covington Industrial Park.
