PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

Dear Secretary Chiavetta:

Enclosed are the original and one copy of the Proprietary semiannual Bona Fide Retail Request Program report of Verizon Pennsylvania LLC and Verizon North LLC, provided in compliance with Section 3014(c)(9) of Act 183. A redacted public version is also enclosed.

The Commission's Secretarial letter dated February 4, 2014 listed the filing dates for this semi-annual report as March 1 and September 1, but Verizon is not aware of any statute or regulation that specifies these filing dates. Verizon has routinely filed this report in April and late September/October and continues to file the semi-annual report on the dates consistent with its past practice.

Please contact Stephanie Ulrich at 717-777-3501 if you have any questions about this filing (email: stephanie.a.ulrich@verizon.com).

Sincerely,

A handwritten signature in black ink that reads "Philip J. Wood, Jr." followed by a stylized flourish.

Verizon Bona Fide Retail Request Program Report

In compliance with Section 3014(c)(9) of Act 183, Verizon Pennsylvania LLC and Verizon North LLC (“Verizon”) provide this semiannual report on the Bona Fide Retail Request (BFRR) Program for the period from August 18, 2014 through February 17, 2015, inclusive.

During this six month period, Verizon received a total of 30 BFRR requests from customers in 16 communities in 20 different wire centers. Verizon is tracking in total 14,013 BFRRs that have been submitted since August 18, 2005 (BFRR requests that have been withdrawn or were submitted in communities where FiOS data service is available are not tracked). Attachment A provides detail on the number of BFRR requests received, by Verizon exchange, during this period and in total.

During this same period, 6 communities reached their BFRR deployment threshold. Altogether, 519 communities have reached the BFRR deployment threshold. 512 of those communities have had broadband service deployed, with the remaining 7 communities in various stages of planning or deployment.

During this reporting period all BFRRs were fulfilled using DSL technology and not Verizon Wireless 4G LTE wireless broadband technology. Verizon will continue to evaluate its BFRR requests on a case-by-case basis and use the technology that makes the most sense for each particular BFRR.

On October 31, 2007, Verizon PA filed certification with the Commission that the statutory cap of 20 major BFRR builds had been reached and communities subsequently qualifying for broadband deployment that were major BFRR builds would be extended for up to 12 additional months. The status of those major builds as of February 17, 2015 is provided on Attachment B.

On February 5, 2008, Verizon North filed certification with the Commission that the statutory cap of 20 major BFRR builds had been reached and communities subsequently qualifying for broadband deployment that were major BFRR builds would be extended for up to 12 additional months. The status of those major builds as of February 17, 2015 is provided on Attachment C.

On May 21, 2008, Verizon North filed certification with the Commission that the statutory cap of 40 total BFRR builds had been reached and communities subsequently qualifying for BFRR deployments would be extended for up to 12 additional months. As of the date of the August 17, 2008 BFRR report, total active builds had fallen below 40 and communities reaching their deployment threshold that were identified as minor builds were added to the active build list. As of November 22, 2010, Verizon North active BFRR builds again exceeded the statutory cap total of 40. As a result, minor BFRR builds will be extended for up to 12 additional months until total active builds fall

below 40. The status of Verizon North builds as of February 17, 2015 is provided on Attachment C.

Verizon will continue to track BFRR submissions as additional communities achieve the deployment thresholds as set out in the Act.

<p>**Working lines without access to DSL. The count of working lines in Verizon North CSAs is a manually intensive process. In many cases, the manual counting counting stopped at 200 lines. CSAs with 200 or more lines have a deployment threshold of 50, the maximum number of BFRRs that trigger deployment.</p>
