1 Overview of Portfolio

Pennsylvania Act 129 of 2008 signed on October 15, 2008, mandated energy savings and demand reduction goals for the largest electric distribution companies (EDCs) in Pennsylvania for Phase I (2008 through 2013). In 2009, each EDC submitted energy efficiency and conservation (EE&C) plans—which were approved by the Pennsylvania Public Utility Commission (PUC)—pursuant to these goals. The PUC established energy savings and demand reduction goals for Phase II (June 2013 through May 2016) of the Act 129 programs. Each EDC filed new EE&C plans with the PA PUC in late 2012 for Phase II. These plans were subsequently approved by the PUC in early 2013.

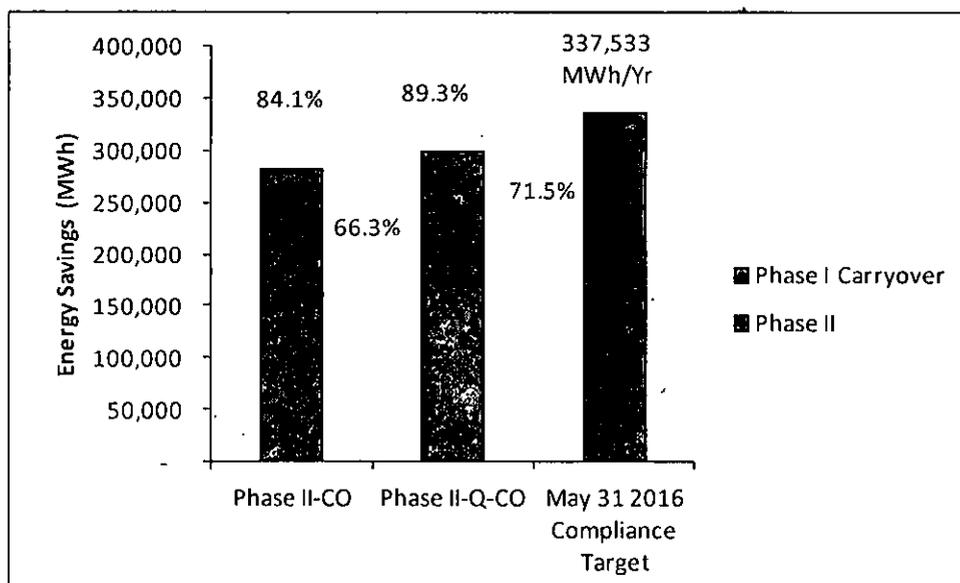

Implementation of Phase II of the Act 129 programs began on June 1, 2013. This report documents the progress and effectiveness of the Phase II EE&C accomplishments for West Penn Power Company (West Penn Power or Company) in the 3rd quarter of Program Year 6 (PY6), defined as December 1, 2014 through February 28, 2015, as well as the cumulative accomplishments of the programs since inception of Phase II. This report also includes the energy savings carried over from Phase I that will be applied towards the Company's savings compliance targets for Phase II. The Phase I carryover values as listed in this quarterly report are based on the Company's Final Phase I report to the Commission.

The Company's EM&V contractor, ADM Associates, is evaluating the programs, which includes measurement and verification of program savings.

1.1 Summary of Achievements

West Penn Power has achieved 71.5 percent of the May 31, 2016 energy savings compliance target, based on cumulative program inception to date (Phase II) reported gross energy savings¹, and 89.3 percent of the energy savings compliance target, based on Phase II-Q-CO² (or Phase II-CO until verified savings are available for PY5) gross energy savings achieved through PY6Q3, as shown in Figure 1-1. (Phase II-Q)³ is also shown in Figure 1-1.

Figure 1-1: Cumulative Portfolio Phase 2 Inception to Date (Phase II) Energy Impacts

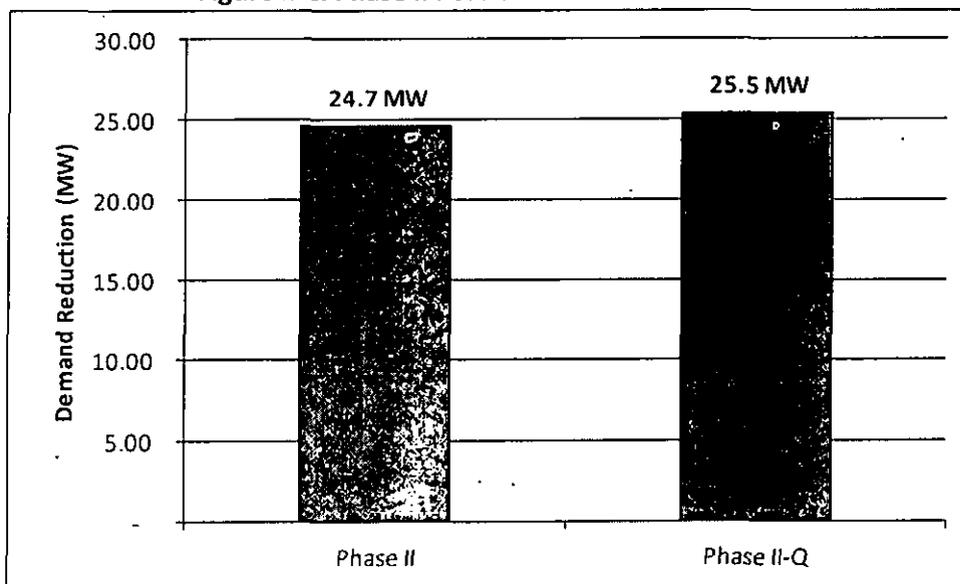

¹ Phase II Reported Gross Savings = Phase II Reported Gross Savings from the beginning of Phase II through the end of the current quarter. All savings reported as Phase II reported gross savings are computed this way.

² Phase II-Q-CO Gross Savings = Phase II verified gross savings from the beginning of Phase II including verified Carry Over Savings from Phase I + PYTD reported gross savings. The carryover portion of the Phase II-Q-CO Gross Savings listed herein is based on verified impacts reported in the Company's Final Phase I report to the Commission.

³ Phase II-Q Gross Savings = CPITD Verified Gross Savings from the beginning of Phase II + PYTD Reported Gross Savings. This excludes Phase I carry over savings. All savings reported as Phase II-Q gross savings are computed this way. Phase II Verified Gross Savings will be reported in the annual report. For the first quarter of each program year, the Company reports Phase II-Q Gross Savings as Phase II Savings as verified savings will not be reported until November 15.

West Penn Power has achieved 25.5 MW of demand reduction through PY6Q3⁴.

Figure 1-2: Phase II Portfolio Demand Reduction

There are six broad groups of measures available to the low-income sector at no cost to the customer, compared to a total of 40 broad measure categories included in the Company's EE&C Plan. These groups of measures offered to the low-income sector therefore comprise 15.0% of the total measures offered. As required by the Phase II goal, this exceeds the fraction of the electric consumption of the utility's low-income households divided by the total electricity consumption in the West Penn Power territory which is 8.8%.⁵ The Phase II reported gross energy savings achieved in the low-income sector is 20,369 MWh/yr⁶; this is 9.1% percent of the Phase II total portfolio reported gross energy savings. This exceeds the goal of 4.5% of the Phase II savings.

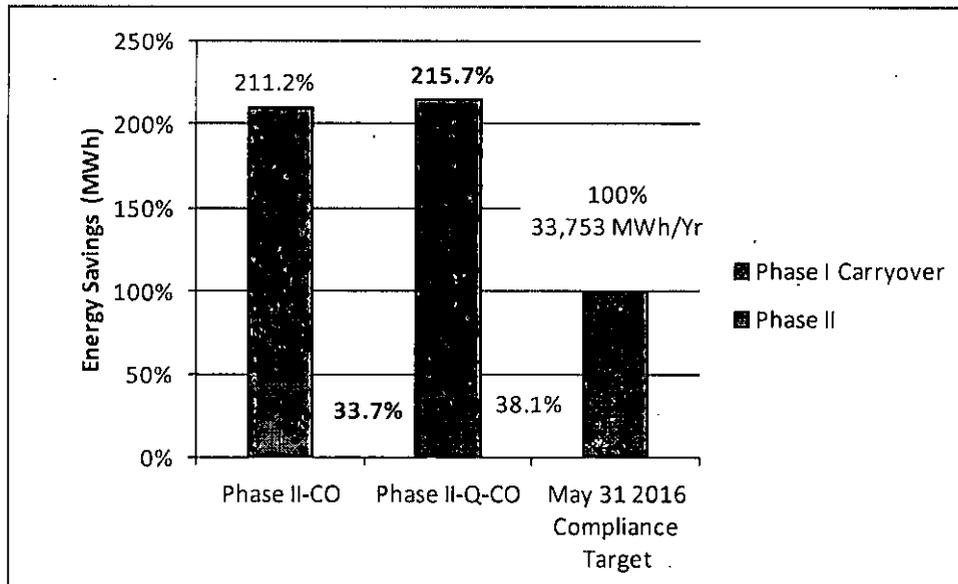

⁴ There is no compliance target for demand reduction in Phase II.

⁵ Act 129 includes a provision requiring electric distribution companies to offer a number of energy efficiency measures to low-income households that are "proportionate to those households' share of the total energy usage in the service territory." 66 Pa.C.S. §2806.1(b)(i)(G). The Company's Act 129 EE&C Plan includes hundreds of distinct measures that are consolidated into 128 archetypal measures and 40 broad measure categories. For low-income reporting purposes, six of these 40 broad measure categories are offered at no cost to the Company's low-income residential customers.

⁶ These estimates are extrapolated from official PYS verified results, which were calculated through participant surveys.

West Penn Power has also achieved 33.7% of the May 31, 2016, energy reduction compliance target for government, nonprofit and institutional sector, based on Phase II reported gross energy savings, and 215.7% of the target based on Phase II-Q-CO gross energy savings achieved through PY6Q3, as shown in Figure 1-3.

1.2 Program Updates and Findings

- Appliance Turn-in:**
 Residential participation is tracking to PY6 forecasts. Over 870 appliances were picked up and recycled during PY6Q3. New marketing materials launched in January 2015 focus on the convenience of appliance recycling and the financial benefits (rebates and electric savings). During this period, the Company continued to market the program through bill inserts, radio newspaper, and internet advertisements.
- Energy Efficient Products:**
 Program continues to track ahead of goal in West Penn Power primarily due to POS lighting sales and the consumer electronics program.
- Home Performance:**
 New Construction: During the quarter, 77 ENERGY STAR rated homes were completed under the program. In response to feedback from program participants, the Pennsylvania Energy Efficient New Homes Program launched a new incentive tier for homes built at or above 30% of code (February).

Online Audit: West Penn Power continues to send Energy Conservation Kits to customers as a result of completing an Online Audit. During PY6Q23 615 kits were delivered to West Penn Power customers.

Comprehensive Audit: West Penn Power continues to recruit new contractors into program and market program to customers. West Penn Power also continues to host bi-monthly program webinars with contractors to go over best practices and program updates.

Behavior Modification: Over 240,000 residential customers continue to receive Home Energy Reports with energy savings tips. Customers in West Penn Power received a “Winter of 68” module in reports focusing on energy saving by adjusting thermostats to 68 degrees in the winter months.

Opt-in Kits: During PY6Q3, 180 Opt-In Kits were delivered to customers in West Penn Power upon enrollment into the program. An e-mail was sent to customers in February promoting the program.

Schools Education and Kits: Final performances of the “Energized Guyz” for Phase II were completed in November 2014 and requested kits were shipped through January. Over 15,000 students participated in the School Education program from inception to date.

- **Low Income / WARM:**

The Program continued its marketing efforts to identify and reach income-qualified customers throughout the West Penn Power service territory during PY6Q3.

WARM Extra Measures/WARM Plus: Procedures for coordination with Peoples, Equitable and TW Phillips Gas Companies and WARM Program are being finalized and preliminary coordination efforts have begun.

Multi Family: West Penn Power continues to identify and serve Multi-Family units/customers for WARM Plus.

During December, information regarding Energy Conservation was added to Twitter and Facebook for all PA Operating Companies with a link to the company specific websites. West Penn Power customers can now access a direct link to the West Penn Power WARM Program website.

FirstEnergy was a sponsor of the Dollar Energy Fund (DEF) WARMathon, which raises money for the Energy Fuel Funds. DEF had the opportunity to provide information about West Penn Power's low income programs thru on-air interviews and radio spots throughout this event which was held January and February 2015.

Low Income Low Use: West Penn Power distributed energy savings CFLs at five low income events which were held throughout the West Penn Power service areas.

- **C/I Small Energy Efficient Equipment:**

West Penn Power continues to receive and process applications under Phase II for this program. The On-line Application Portal that was launched in June 2014 has been accepted in the market place by customers and program allies. Through the end of September 2014, 99% of all applications received are through this Portal. The ICSP continues to provide direct assistance to customers that are unable to submit an online application. The ICSP has revised its 60-Day outlook marketing plan and, based on the year-to-date results in this sector, the ICSP is planning to do targeting mailing and outreach to program allies and customer in this sector.

- **C/I Small Energy Efficient Buildings:**

To date, West Penn Power has shipped out 12,844 kits to customers in this program. The On-line Application Portal that was launched in June 2014 has been well accepted in the market place by customers and program allies. To increase participation in this program, the ICSP has developed a Building Program Guidelines plus number of marketing pieces that are targeted at professionals and decision makers in this market segment. Based on the year-to-date results, the ICSP has revised its 60-Day outlook marketing plan to build a momentum in this program. An uptick in new project applications coming through this program are also a result of outreach to upstream program allies.

- **C/I Large Energy Efficient Equipment:**

West Penn Power continues to receive and process applications under Phase II. The On-line Application Portal that was launched in June 2014 has been well accepted in the market place by customers and program allies. Through the end of September 2014, 99% of all applications received are through this Portal. The ICSP continues to provide direct assistance to customers that are unable to submit an online application. Based on the year-to-date results, the ICSP has revised its 60-Day marketing plan to maintain the current momentum in this program.

- **C/I Large Energy Efficient Buildings:**

West Penn Power has shipped out 222 kits to customers in this program. The On-line Application Portal that was launched in June 2014, has been well accepted in the market place by customers and program allies. To increase participation in this program, the ICSP has developed a Building Program Guidelines plus number of marketing pieces that are targeted at professionals and decision makers in this market segment. Based on the year-to-date results, the ICSP has revised its 60-Day outlook marketing plan to build a momentum in this program. An uptick in new project applications coming through this program are also a result of outreach to upstream program allies.

Government & Institutional:

West Penn Power continues to receive and process applications under Phase II. The bonus program that was launched ended at the end of September, 2014. To continue to build momentum from the first bonus program, Company launched a second bonus program that runs from November 1, 2014 through April 30, 2015. Through this new bonus program,

Company is offering an additional \$0.02/kWh saved for lighting and non-lighting projects.

The On-line Application Portal that was launched in June 2014 has been well received in the market place by customers and program allies. Based on the year-to-date results, the ICSP has revised its 60-Day outlook marketing plan to build on the momentum achieved during the bonus period.

ADM has communicated to the Company's implementation staff the data collection requirements and calculation procedures outlined in the 2014 PA TRM for measures offered under each program. Nonresidential lighting projects with ex ante savings above 800 MWh and other nonresidential projects with ex ante savings above 400 MWh are sampled with certainty and evaluated on an ongoing basis by ADM. Nonresidential lighting projects with ex ante savings above 500 MWh and other nonresidential projects with ex ante savings above 250 MWh are reviewed for evaluability on an ongoing basis by ADM, and data acquisition requirements for these projects are communicated to the ICSP. ADM has launched PY6 verification surveys for residential programs and will begin on-site verification work on smaller non-residential projects in April 2015.

Reporting Update Regarding the Home Energy Reports Program Component

Starting with the PY6 Q3 reports, the number of CPITD participants in the Home Performance Program includes the average number of participants in Home Energy Reports program component. The IQ and PYTD participant numbers also reflect the change in the number of participants since last quarter or last program year. Due to the large number of participants in the Home Energy reports program component, the IQ and to a lesser extent PYTD participant counts for the overall Home Performance program are essentially determined by net changes in the Home Energy Report participant counts. Due to data acquisition and processing lead times, the energy saving and demand reduction impacts for the last month in the quarter are generally not available for the Home Energy Reports program component. As a result, the PYTD MWh impacts in this report will be approximately equal to the sum of the PYTD MWh impacts for last quarter, the IQ MWh impacts from this quarter, and the MWh impacts from the last month of last quarter from the Home Energy Reports program.

NOTES

Per PUC direction, TRC inputs and calculations are required in the Annual Report only and should comply with the 2013 Total Resource Cost Test Order approved August 30, 2012.

Costs shown above include startup expenses prior to June 1, 2013.

¹ Includes the administrative ICSP (rebate processing), tracking system, general administration and clerical costs, EDC program management, ICSP program management, general management oversight major accounts and technical assistance

² Per the 2013 Total Resource Cost Test Order – Total EDC Costs, here, refer to EDC incurred expenses only. Total EDC Costs = Subtotal EDC Incentive Costs + Subtotal EDC Implementation Costs + EDC Evaluation Costs + SWE Audit Costs.

³ Per the 2013 Total Resource Cost Test Order –Net participant costs; in PA, the costs of the end-use customer.

⁴ Total TRC Costs = Total EDC Costs + Participant Costs
