PA PUBLIC UTILITY COMMISSION  
SECRETARY'S BUREAU

Dear Ms. Chiavetta:

As specifically directed by the Pennsylvania Public Utility Commission (Docket M-2009-2092655, Order entered September 3<sup>rd</sup> 2015), the Electronic Data Exchange Working Group (EDEWG) reconvened the Web Portal Working Group (WPWG) to develop a proposed uniform standard for the System-to-System functionality of the web portals. The Order requires that related standards are to be completed, not implemented, by March 3, 2016.

EDEWG Leadership respectfully requests Commission consent to extend the WPWG deliverable to April 8<sup>th</sup>, 2016. The extension is requested due to the following circumstances:

- The scope of the Web Portal's System-to-System solution was expanded to include both the 'Rolling 10-Day' and 'Historical Usage WSDL' methods. Furthermore recent WPWG decisions increased the scope of both solutions by adding meter level information which was not part of the original Solution Framework design. These changes significantly modified the design and content of the standards documentation.
- The WPWG agreed the best approach for Web Portal standards is to split the Solution Framework into individual standards for each the Single User – Multiple Request (SU-MR), System-to-System Historical Usage (StS Historical Usage WSDL) and System-to-System Rolling-10 Day methods. The development of three separate standards directly impacted the WPWG's ability to meet the deliverable timeline.
- The WPWG chairperson experienced a sudden unforeseen personal conflict. During the same period, the remaining EDEWG Leadership members were unavailable due to company travel and client commitments. This resulted in a 3 week delay between WPWG meetings directly impacting the deliverable timeline.

The EDEWG regrets to ask for this extension but believes it to be necessary in order to provide clear, accurate and concise Web Portal standards for Commission consideration. EDEWG remains committed to the development and maintenance of data exchange standards for the Commonwealth's retail energy markets benefiting Pennsylvania's customers.

EDEWG would appreciate the Commission's timely consideration of and response to this request.

Sincerely,

*Christine Hughey*
