### DIRECT TESTIMONY

#### OF

### **ROGER D. COLTON**

### ON BEHALF OF OFFICE OF CONSUMER ADVOCATE

### JULY 22, 2016

### **Table of Contents**

| Part 1.  | Customer Assistance Program ("CAP") Cost Recovery                       | 6  |
|----------|---|----|
| Part 2.  | The Proposed Fixed Monthly Customer Charges and<br>Low-Income Customers | 11 |
| Part 3.  | Universal Service Issues  | 22 |
|          | A. The Funding and Enrollment of CAP                                    | 23 |
|          | B. The Funding and Implementation of LIURP                              | 33 |
| Part 4.  | Customer Service: Confirming Low-Income Status                          | 39 |
| Colton S | Schedules   | 47 |

| 1  | Q. | PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.   |
|----|----|--|
| 2  | A. | My name is Roger Colton. My business address is 34 Warwick Road, Belmont, MA                 |
| 3  |    | 02478.   |
| 4  |    |  |
| 5  | Q. | BY WHOM ARE YOU EMPLOYED AND IN WHAT POSITION?   |
| 6  | A. | I am a principal in the firm of Fisher Sheehan & Colton, Public Finance and General          |
| 7  |    | Economics of Belmont, Massachusetts. In that capacity, I provide technical assistance to     |
| 8  |    | a variety of federal and state agencies, consumer organizations and public utilities on rate |
| 9  |    | and customer service issues involving telephone, water/sewer, natural gas and electric       |
| 10 |    | utilities.   |
| 11 |    |  |
| 12 | Q. | ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?                                       |
| 13 | A. | I am testifying on behalf of the Office of Consumer Advocate.                                |
| 14 |    |  |
| 15 | Q. | PLEASE DESCRIBE YOUR PROFESSIONAL BACKGROUND.  |
| 16 | A. | I work primarily on low-income utility issues. This involves regulatory work on rate and     |
| 17 |    | customer service issues, as well as research into low-income usage, payment patterns,        |
| 18 |    | and affordability programs. At present, I am working on various projects in the states of    |
| 19 |    | New York, Maryland, Pennsylvania, Michigan, Illinois and California, as well as in the       |
| 20 |    | provinces of Ontario, Manitoba and British Columbia. My clients include state agencies       |
| 21 |    | (e.g., Pennsylvania Office of Consumer Advocate, Maryland Office of People's Counsel,        |
| 22 |    | Iowa Department of Human Rights), federal agencies (e.g., the U.S. Department of             |
| 23 |    | Health and Human Services), community-based organizations (e.g., Energy Outreach             |

| 1  |    | Colorado, Natural Resources Defense Council, Advocacy Centre Tenants Ontario), and       |
|----|----|--|
| 2  |    | private utilities (e.g., Unitil Corporation d/b/a Fitchburg Gas and Electric Company,    |
| 3  |    | Entergy Services, Xcel Energy d/b/a Public Service of Colorado). In addition to state-   |
| 4  |    | and utility-specific work, I engage in national work throughout the United States. For   |
| 5  |    | example, in 2011, I worked with the U.S. Department of Health and Human Services (the    |
| 6  |    | federal LIHEAP office) to advance the review and utilization of the Home Energy          |
| 7  |    | Insecurity Scale as an outcomes measurement tool for LIHEAP. In 2007, I was part of a    |
| 8  |    | team that performed a multi-sponsor public/private national study of low-income energy   |
| 9  |    | assistance programs. At present, I have been retained by the National Coalition on       |
| 10 |    | Legislation for Affordable Water (NCLAWater) to write a comprehensive "water bill of     |
| 11 |    | rights" to be introduced in Congress. I am also currently working on a research project  |
| 12 |    | for the Water Research Foundation on how to reach "hard to reach" customers. A brief     |
| 13 |    | description of my professional background is provided in Appendix A.                     |
| 14 |    |  |
| 15 | Q. | PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND.   |
| 16 | A. | After receiving my undergraduate degree in 1975 (Iowa State University), I obtained      |
| 17 |    | further training in both law and economics. I received my law degree in 1981 (University |
| 18 |    | of Florida). I received my Master's Degree (regulatory economics) from the MacGregor     |
| 19 |    | School in 1993.  |

## 21 Q. HAVE YOU EVER PUBLISHED ON PUBLIC UTILITY REGULATORY 22 ISSUES?

| 1  | А. | Yes. I have published three books and more than 80 articles in scholarly and trade           |
|----|----|--|
| 2  |    | journals, primarily on low-income utility and housing issues. I have published an equal      |
| 3  |    | number of technical reports for various clients on energy, water, telecommunications and     |
| 4  |    | other associated low-income utility issues. A list of my publications is included in         |
| 5  |    | Appendix A.  |
| 6  |    |  |
| 7  | Q. | HAVE YOU EVER TESTIFIED BEFORE THIS OR OTHER UTILITY   |
| 8  |    | COMMISSIONS?   |
| 9  | А. | Yes. I have testified before the Pennsylvania Public Utility Commission ("PUC" or            |
| 10 |    | "Commission") on numerous occasions regarding utility issues affecting low-income            |
| 11 |    | customers and customer service. I have also testified in regulatory proceedings in more      |
| 12 |    | than 30 states and four Canadian provinces on a wide range of utility issues. A list of the  |
| 13 |    | proceedings in which I have testified is listed in Appendix A.                               |
| 14 |    |  |
| 15 | Q. | PLEASE EXPLAIN THE PURPOSE OF YOUR DIRECT TESTIMONY.   |
| 16 | А. | The purpose of my Direct Testimony is as follows.  |
| 17 |    | <ul> <li>First, I examine the proposed cost recovery for the FirstEnergy Customer</li> </ul> |
| 18 |    | Assistance Programs ("CAP");   |
| 19 |    | <ul><li>Second, I examine the impact that the fixed monthly customer charge</li></ul>        |
| 20 |    | proposed by FirstEnergy will have on low-income customers;                                   |
| 21 |    | > Third, I examine universal service issues applicable to a general rate                     |
| 22 |    | proceeding; and  |
| 23 |    | Finally, I examine certain customer service issues.  |

| 1  |    | My testimony applies generally to all four FirstEnergy Companies. I will explain and   |
|--|----|--|
| 2  |    | refer to data and analysis applicable to the specific Companies as I go along.   |
| 3  |    |  |
| 4  | Q. | PLEASE SUMMARIZE YOUR FINDINGS AND RECOMMENDATIONS.  |
| 5  | A. | Based on the data and analysis I present below, I conclude and recommend as follows:   |
| 6<br>7<br>8<br>9   |    | The base participation rate for applying the CAP cost offset in the Companies<br>universal service riders (Rider C) should be adjusted to reflect recent participation<br>numbers. The base participation rate should reflect recent CAP participation upon<br>which the Companies predicate their rates;  |
| 10<br>11<br>12<br>13<br>14<br>15   |    | The customer charges recommended by OCA witness Johnson should be adopted.<br>Adopting this recommendation is necessary to mitigate the adverse impact that<br>the increased rates as a whole, to which the customer charges disproportionately<br>contribute, will have on confirmed low-income customers;  |
| 16<br>17<br>18<br>19<br>20<br>21   |    | The maximum non-heating CAP credit ceilings should be increased by a dollar<br>amount equal to the dollar rate increase approved for the residential customer<br>class in these proceedings. Without such an increase, the rates approved in this<br>proceeding will substantially adversely affect CAP participants whose bills will<br>exceed the CAP credit ceiling as a result of the rate increases and, as a result, will<br>exceed the affordable burdens defined by the CAP programs;  |
| <ol> <li>22</li> <li>23</li> <li>24</li> <li>25</li> <li>26</li> <li>27</li> <li>28</li> <li>29</li> <li>30</li> <li>31</li> <li>32</li> </ol> |    | The process of requiring an annual recertification for CAP should be maintained<br>but, no later than with the filing of their next triennial Universal Service and<br>Energy Conservation Plan (USECP), the Companies shall except from this annual<br>recertification process customers whose income is not likely to change on a year-<br>to-year basis and provide, instead, for a biannual recertification. The two<br>populations for whom a biannual recertification has been approved for other<br>Pennsylvania CAP programs include the aged and the disabled. This is to<br>mitigate the low, and decreasing, CAP participation by FirstEnergy Companies,<br>which leaves an increasing number of low-income customers vulnerable to harms<br>from the rate increases proposed in these proceedings; |
| 33<br>34<br>35<br>36<br>37   |    | No later than with the filing of their next triennial USECPs, the Companies shall<br>modify their USECP to provide that the process of requiring an annual<br>recertification shall be deemed to be satisfied in those situations where a CAP<br>participant receives a LIHEAP Cash benefit. In these situations, the CAP  |

| 1<br>2<br>3<br>4<br>5<br>6 |                  | participant will be recertified at the same payment obligation as determined in<br>Year 1. This is to mitigate the low, and decreasing, CAP participation by<br>FirstEnergy Companies, which leaves an increasing number of low-income<br>customers vulnerable to harms from the rate increases proposed in these<br>proceedings; |
|----------------------------|------------------|---|
| 7                          | $\triangleright$ | FirstEnergy should target its LIURP spending toward a specified percentage of   |
| 8                          |                  | high use, high CAP credit customers. The percentage should be set at the  |
| 9                          |                  | percentage of CAP customers that have annual CAP credits exceeding \$950. This  |
| 10                         |                  | is to mitigate the adverse impacts of the increased rates proposed in these   |
| 11                         |                  | proceedings on CAP participants who would be required to bear the cost of the   |
| 12                         |                  | rate hikes even though the resulting bills exceed an affordable percentage of   |
| 13                         |                  | income;   |
| 14                         |                  |   |
| 15                         | $\triangleright$ | Each FirstEnergy Company should increase its annual LIURP budget by a   |
| 16                         |                  | percentage equal to the proportionate total bill increase to the residential class at   |
| 17                         |                  | median residential usage. <sup>1</sup> This is to mitigate the adverse impacts of increasing  |
| 18                         |                  | rates on confirmed low-income customers and to maintain the purchasing power  |
| 19                         |                  | of LIURP in light of the proposed rate increases;   |
| 20                         |                  |   |
| 21                         | $\triangleright$ |   |
| 22                         |                  | organizations currently providing energy efficiency services through the federal  |
| 23                         |                  | Weatherization Assistance Program (WAP) to deliver LIURP services. LIURP-   |
| 24                         |                  | funded non-space-heating electric efficiency services should be delivered in  |
| 25                         |                  | collaboration with the WAP-funded delivery of space heating services for other  |
| 26                         |                  | fuels. This is to respond to the ongoing underspending of the FirstEnergy LIURP   |
| 27                         |                  | budget and to allow LIURP to be a meaningful tool to use in mitigating the  |
| 28                         |                  | adverse impacts to confirmed low-income customers of the rate increases   |
| 29                         |                  | proposed in this proceeding;  |
| 30                         |                  |   |
| 31                         |                  | Each FirstEnergy Company should commit to providing a one-time increase in  |
| 32                         |                  | LIURP funding equal to the difference between the budgeted LIURP funding and  |
| 33                         |                  | the actual LIURP expenditures for the years 2010 through 2015. This is to   |
| 34                         |                  | respond to the failure of the FirstEnergy Companies to spend their respective   |
| 35                         |                  | LIURP budgets on an annual basis as a mechanism to mitigate the harms of  |
| 36                         |                  | increasingly unaffordable bills to confirmed low-income customers;  |
| 37                         |                  |   |

<sup>&</sup>lt;sup>1</sup> For example, if Met-Ed residential customers, at median residential usage, experience a 12% bill increase as a result of the Final Order in this proceeding, the total LIURP budget shall be increased by 12%.

| 1<br>2<br>3<br>4 |    | Each FirstEnergy Company should commit to a process under and through which,<br>in the event that future budgeted LIURP funds are not expended during the<br>program year for which they were budgeted, those unspent funds will be rolled-<br>over and carried-forward within the LIURP program to be used to deliver future |
|------------------|----|---|
| 5                |    | LIURP services. This is to ensure that LIURP is fully used as a meaningful  |
| 6                |    | program to mitigate the adverse impacts on confirmed low-income customers of  |
| 7<br>8           |    | the rate increases proposed in this proceeding;   |
| °<br>9           |    | Each FirstEnergy Company should enlist the use of community-based   |
| 10               |    | organizations ("CBOs") as part of its process to identify and confirm low-income  |
| 11               |    | customers. Two process changes should be made by each FirstEnergy Company.  |
| 12               |    | First, standard Company forms should be made widely available through non-  |
| 13               |    | utility access points allowing Community-Based Organizations ("CBOs") to  |
| 14               |    | confirm that a FirstEnergy customer is a "low-income" customer. Second, the   |
| 15               |    | FirstEnergy Companies should authorize and encourage CBOs to incorporate  |
| 16               |    | such confirmation into applications for other assistance (e.g., CAP, hardship   |
| 17               |    | grants). This is to ensure that PUC regulatory protections which extend to  |
| 18               |    | confirmed low-income customers are, in practice, extended to all customers  |
| 19<br>20         |    | whose income would qualify them to receive such protections.  |
| 20               |    |   |
| 21               |    | Part 1. Customer Assistance Program ("CAP") Cost Recovery.  |
| 22               | Q. | PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR  |
| 23               |    | TESTIMONY.  |
| 24               | A. | In this section of my testimony, I examine one aspect of the cost recovery pursued by the   |
| 25               |    | FirstEnergy Companies for their respective low-income CAP programs. The Companies   |
| 26               |    | each recover CAP costs through a "Universal Service Rider." Through the Rider, the  |
| 27               |    | Companies file data with the Commission showing the reconciliation of actual revenues   |
| 28               |    | received under this Rider with actual recoverable costs incurred for the preceding twelve   |
| 29               |    | months.   |
|                  |    |   |

| 1          |    | Recoverable costs are subject to an offset to be applied against the actual CAP shortfall <sup>2</sup> |
|------------|----|--|
| 2          |    | and actual pre-program arrearage forgiveness credits that have been granted to CAP                     |
| 3          |    | participants. The offset is applied as follows for Metropolitan Edison (with                           |
| 4          |    | corresponding language for the other FirstEnergy Companies):   |
| 5          |    | In the event that the average annual CAP participation in the preceding USC                            |
| 6          |    | Reconciliation Year exceeded 18,000 participants, actual costs recovered through                       |
| 7          |    | Met-Ed's USC Rider shall reflect CAP Credits and actual Pre-Program Arrearage                          |
| 8          |    | Forgiveness Credits for all customers up to the 18,000 participation level. The                        |
| 9          |    | Company shall offset the average annual CAP Credits and Pre-Program Arrearage                          |
| 10         |    | Forgiveness Credits by 15% per participant for the preceding USC Reconciliation                        |
| 11         |    | Year for any and all CAP customers exceeding the 18,000 participation level.                           |
| 12         |    | Tear for any and an erri customers exceeding the 10,000 participation level.                           |
| 12         |    | (ME Rider C, Universal Service Cost Rider, ME Tariff, Electric PA PUC No. 52 (Supp.                    |
| 14         |    | 15), Original Page No. 111).   |
| 15         |    |  |
| 16         | Q. | WHAT CHANGE DO YOU RECOMMEND?  |
| 17         | A. | I recommend that the base participation levels be reduced to reflect changes in CAP                    |
| 18         |    | participation since the base participation rate was last determined in the 2014 FirstEnergy            |
| 19         |    | base rate cases. The existing base participation rates reflected in the current Universal              |
| 20         |    | Service riders in the Companies' tariffs are:  |
| 21         |    | Metropolitan Edison: 18,000 CAP participants;  |
| 22         |    | Penelec: 25,000 CAP participants;  |
| 23         |    | Penn Power: 5,700 CAP participants;  |
| 24         |    | West Penn Power: 22,500 CAP participants.  |
| <b>Э</b> Е |    |  |
| 25         |    | The revised base participation rates established for purposes of applying the CAP cost                 |

 $<sup>^{2}</sup>$  The CAP shortfall is the difference between the bills actually charged CAP participants and the bills that would have been charged to CAP participants at standard residential rates.

| 1  |    | <ul> <li>Metropolitan Edison: 15,700 CAP participants;</li> </ul>                         |
|----|----|---|
| 2  |    | Penelec: 22,000 CAP participants;   |
| 3  |    | Penn Power: 4,700 CAP participants;   |
| 4  |    | West Penn Power: 23,300 CAP participants.   |
| 5  |    | (OCA-IV-1, ME, PN, PP, WP). As can be seen, the base participation rates reflect          |
| 6  |    | decreased CAP participation rates of 13% (ME), 12% (PN) and 18% (PP). In contrast,        |
| 7  |    | West Penn Power has experienced a slight increase (3.4%) in base participation.           |
| 8  |    |   |
| 9  | Q. | HAVE YOU BEEN ABLE TO COMPARE THE BASE PARTICIPATION                                      |
| 10 |    | FIGURES YOU PROPOSE TO THE CAP PARTICIATION THAT THE                                      |
| 11 |    | COMPANIES HAVE USED IN SETTING RATES IN THESE PROCEEDINGS?                                |
| 12 | A. | Yes. In response to OCA inquiries about the CAP participation used in these rates cases,  |
| 13 |    | the Company provided the total number of CAP bills by year. (OCA-V-2). When I             |
| 14 |    | divide those total numbers of bills by 12, I can derive the average CAP participation     |
| 15 |    | which the Companies have used for these rate cases. <sup>3</sup> As can be seen, the base |
| 16 |    | participation rates I propose above reasonably reflect the CAP participation numbers      |
| 17 |    | which the Companies use in these rates cases.   |
|    |    |   |

|  | ME     | PN     | PP    | WP     |
|--|--------|--------|-------|--------|
| Proposed base CAP participation  | 15,700 | 22,000 | 4,700 | 23,300 |
| Avg CAP bills used in rate case /a/  | NA /b/ | 21,352 | 4,589 | 23,296 |
| /a/ SOURCE: OCA-V-2.<br>/b/ While the CAP bills used by ME in this rate case were not provided in response to OCA-V-2, the act<br>CAP participation for ME in 2015 was 15,733. (OCA-IV-1). |        |        |       |        |

<sup>&</sup>lt;sup>3</sup> Metropolitan Edison figures are not available, since it appears that the Company's response to OCA discovery erroneously duplicated Penelec data for Met Ed. (Compare, OCA-V-2 (ME) to OCA-V-2 (PN)).

2

### Q. PLEASE EXPLAIN HOW THE ADJUSTMENT YOU PROPOSE TO THE BASE CAP PARTICIPATION COMPARES TO THE EXISTING TARIFF.

The base participation agreed to in the settlement of the 2014 rate case, while a 3 A. compromise, was nonetheless reasonably reflective of the prior year CAP participation 4 for each Company. The change I propose to the CAP offset in this proceeding is simply 5 to update those figures. (Had CAP participation increased, as occurred for WP, the base 6 participation numbers should have increased as well) (as I propose should occur for WP). 7 As I document above, however, CAP participation figures for each Company other than 8 WP have decreased.) A comparison of the actual 2013 CAP participation figures to the 9 base participation agreed-upon in the 2014 rate case is set forth below: 10

|   | ME     | PN     | PP    | WP     |
|---|--------|--------|-------|--------|
| 2013 actual CAP participation /a/           | 17,517 | 24,244 | 5,590 | 20,607 |
| 2014 base CAP participation used for offset | 18,000 | 25,000 | 5,700 | 22,500 |
| /a/ SOURCE: OCA-IV-1.                       |        |        |       |        |

11

### 12 Q. PLEASE EXPLAIN WHY THE CHANGE IN CAP PARTICIPATION RATES IS

### 13 IMPORTANT FOR PURPOSES OF THE CAP OFFSETS.

A. As CAP participation increases above the CAP base participation, a higher and higher
dollar amount is categorized as a CAP credit. As the dollar amount of the CAP credit
increases, the Companies are allowed to collect that increased amount of CAP credits
through their USC Rider. When the USC Rider is reconciled to reflect actual CAP costs,
the CAP credits passed through the USC Rider will increase as CAP participation
increases, even if CAP participation increases above the base number.

| 1  | Even though the recovery of CAP costs increases through the USC Rider as CAP   |
|--|--|
| 2  | participation increases, base rates remain the same. It is important to remember that the  |
| 3  | Companies have already set their base rates as though the unpaid bills from those  |
| 4  | customers above the CAP base number will be a part of uncollectibles. Through their  |
| 5  | base rates, the Companies continue to collect that uncollectible expense as though no net  |
| 6  | addition of CAP participants has occurred.   |
| 7  |  |
| 8  | This is significant because revenues must be one place or another. Customers (and their  |
| 9  | associated revenue) must be in either the group of CAP non-participants or in the group  |
| 10   | of CAP participants. They cannot be in both.   |
| 11<br>12<br>13<br>14<br>15<br>16<br>17<br>18<br>19<br>20<br>21<br>22<br>23 | <ul> <li>The Companies have agreed that for any given monthly billing, a customer is either a CAP participant or is <u>not</u> a CAP participant; they cannot be both places at once. A customer, in other words, cannot be both a participant and a non-participant in the same month for purposes of billing.</li> <li>The Companies further agreed that in any given month, the group of residential customers who receive a CAP bill and the group of customers who do not receive a CAP bill are mutually exclusive groups. No group of customers receives both a CAP bill and a non-CAP bill in the same month.</li> </ul> |
| 24   | USC Rider, in the absence of the offset, the FirstEnergy Companies will over-recover   |
| 25   | their bad debt expenses. Since the USC Rider is reconcilable, as CAP participation   |
| 26   | increases, the Companies collect the entire amount of increased CAP credits associated   |
| 27   | with any increased participation as though that additional shortfall is a "new" expense.   |
| 28   | Even though the Companies make an <u>upward</u> adjustment in the costs they collect through   |
| 29   | the USC Rider, they are not required to make a corresponding <i>downward</i> adjustment to   |

| 1  |    | base rates to remove those dollars that were already included in base rates, but are now  |
|----|----|---|
| 2  |    | instead being collected through the USC Rider as part of the CAP credits.                 |
| 3  |    |   |
| 4  |    | In fact, however, the participation by low-income customers in CAP does not create        |
| 5  |    | "new" costs. Instead, participation in CAP simply moves the unpaid bills out of the       |
| 6  |    | group of customers known as "residential" customers and into the group of customers       |
| 7  |    | known as "CAP participants." To allow the dollars of CAP credits to be added to the       |
| 8  |    | USC Rider without correspondingly adjusting for those dollars that already have been      |
| 9  |    | included in base rates allows the Companies to collect those dollars in both places, thus |
| 10 |    | creating the over-collection to which I refer.  |
| 11 |    |   |
| 12 | Q. | PLEASE SUMMARIZE YOUR RECOMMENDATION.   |
| 13 | A. | My recommendation is simply to update the base participation figures used to determine    |
| 14 |    | the CAP cost offset. Those updated base participation figure are grounded in the updated  |
| 15 |    | actual CAP participation figures.   |
| 16 |    |   |
| 17 | Pa | art 2. The Proposed Fixed Monthly Customer Charges and Low-Income Customers.              |
| 18 | Q. | PLEASE DESCRIBE THE PURPOSE OF THIS SECTION OF YOUR                                       |
| 19 |    | TESTIMONY.  |
| 20 | A. | In this section of my testimony, I assess the impact that the proposed increase to the    |
| 21 |    | residential fixed monthly customer charge will have on low-income customers for each of   |
| 22 |    | FirstEnergy's four companies. I demonstrate that a substantial portion of the rate        |
| 23 |    | increase is driven by the Companies' proposed fixed monthly customer charges. I then      |
|    |    |   |

- discuss how the Companies' proposed overall rate increase will have an adverse impact
   on low-income customers in particular.
- 3

### 4 Q. ARE LOW-INCOME CUSTOMERS PROTECTED THROUGH THEIR

## 5 PARTICIPATION IN CAP FROM THE RATE INCREASES SOUGHT BY

### 6 **FIRSTENERGY IN THESE PROCEEDINGS**?

- A. No. Most FirstEnergy low-income customers are not protected against the proposed rate
  increase by virtue of their participation in CAP. Moreover, even to the extent that some
  CAP participants are protected by CAP, a substantial number of those CAP participants
  are threatened with harm from increased rates due to the CAP credit ceiling imposed by
  FirstEnergy.
- 12

### 13 Q. PLEASE EXPLAIN THE BASIS FOR YOUR CONCLUSION THAT A

### 14 SUBSTANTIAL PORTION OF THE PROPOSED RATE INCREASE OCCURS

### 15 FROM THE COMPANIES' PROPOSED CUSTOMER CHARGE INCREASE.

- 16 A. The disproportionate percentage increase in rates attributable to the increased customer
- 17 charge can be derived from FirstEnergy witness Siedt's Exhibit KMS-4. The data shows
- 18 that for someone with the median LIHEAP consumption:<sup>4</sup>

# For Metropolitan Edison, 41% of the total bill increase can be attributed to the customer charge. While customers would experience an overall bill increase of 12.6% under the Company's proposed rates, they would experience a

22 70.0% increase in their customer charge;

<sup>&</sup>lt;sup>4</sup> Median consumption for LIHEAP recipients would be higher than for low-income customers generally since LIHEAP recipients would be electric space heating customers.

| 1  |    | <ul><li>For Penelec</li></ul> | , 46% of their   | total bill increase ca | an be attributed to | o the customer     |

| 16 | A. | For LIHEAP recipients         | , the Compani    | es' proposed rate in   | crease nearly con   | mpletely offsets   |
| 17 |    | the entirety of the LIHI      | EAP grants rec   | eived in the most re   | ecently completed   | d LIHEAP           |
| 18 |    | program year. By Con          | pany, the LIH    | EAP grant compare      | ed to the propose   | d bill increase at |
| 19 |    | mean LIHEAP usage in          | 1 2015 is as fol | llows:                 |                     |                    |
|    |    |                               | ME               | PN                     | PP                  | WP                 |
|    |    | $2015 LIHEAP^5$               | \$211            | \$259                  | \$245               | \$246              |

<sup>20</sup> 

\$228

\$197

\$226

Proposed bill increase<sup>6</sup>

\$224

 <sup>&</sup>lt;sup>5</sup> Derived from data provided by the Companies in response to OCA-IV-1.
 <sup>6</sup> Mean usage for customers receiving LIHEAP, standing alone, provided in response to CAUSE-PA-1.3.

For ME and WP, the proposed bill increase, alone, equals or exceeds the entire 2015
 LIHEAP Cash grant. For PN and PP, the proposed bill increase nearly equals the
 LIHEAP Cash grant.

4

5 The adverse impact of the proposed rate increase can be seen for the confirmed low-6 income population as a whole as well. Using the mean usage of LIHEAP customers as a 7 surrogate for the usage of confirmed low-income customers –none of the FirstEnergy 8 companies could provide usage for confirmed low-income customers on a stand-alone 9 basis—it is possible to compute the revenue that will be taken out of the confirmed low-10 income community as a whole.

|   | ME           | PN           | РР          | WP           |
|---|--------------|--------------|-------------|--------------|
| Average # of conf'd LI <sup>7</sup>     | 65,422       | 81,895       | 18,848      | 58,606       |
| Per customer bill increase <sup>8</sup> | \$228        | \$197        | \$226       | \$224        |
| Cumulative bill increase                | \$14,917,403 | \$16,111,873 | \$4,256,001 | \$13,136,599 |
| CAP Credits (2015)                      | \$11,828,872 | \$14,439,900 | \$3,201,445 | \$11,131,969 |

| 12 | As can be seen, for all four of the FirstEnergy companies, the proposed bill increase      |
|----|--|
| 13 | alone takes more money out of the confirmed low-income community than the respective       |
| 14 | CAP programs deliver in benefits. This is not to say that these dollars are taken from     |
| 15 | CAP participants; they are taken from the total confirmed low-income community.            |
| 16 | Nonetheless, for comparative purposes, it is necessary to realize that, when the confirmed |
| 17 | low-income community is considered as a whole, this rate hike is imposing more harm on     |
| 18 | the low-income populations than CAP is distributing as a benefit.                          |

<sup>&</sup>lt;sup>7</sup> OCA-IV-1.

<sup>&</sup>lt;sup>8</sup> This assumes mean consumption for LIHEAP customers in 2015, standing alone. CAUSE-PA-1-3.

# Q. PLEASE EXPLAIN THE BASIS FOR YOUR CONCLUSION THAT CAP CUSTOMERS ARE NOT A PRIORI PROTECTED FROM THE RATE INCREASES PROPOSED IN THIS PROCEEDING.

While the FirstEnergy CAPs base participant bills on a percentage of income, each 5 A. FirstEnergy CAP also imposes a maximum CAP credit ceiling on program participants. 6 7 A "CAP Credit" is the difference between bills at standard residential rates and bills at the CAP percentage of income. To the extent that the difference exceeds the CAP credit 8 ceiling, the CAP participant is responsible for paying the excess. Under the percentage of 9 income plans, in other words, CAP participants are insulated from an increase in 10 unaffordability resulting from the Companies' proposed rate increases and rate design 11 changes only to the extent that the resulting CAP credit remains under the CAP credit 12 ceiling. 13

14

A substantial proportion of FirstEnergy CAP participants exceed, or at least approach, the CAP credit ceiling even without the rate increases which the Companies seek in this proceeding. As the data below shows, for three of the FirstEnergy Companies, between one-quarter (PN: 26%; PP: 25%) and one-third (ME: 33%) of all CAP participants who participated in CAP for the full twelve months of 2015 had CAP credits equal to or in excess of the Companies' CAP credit ceiling, with WP just somewhat lower (19%).

| 2015 <sup>9</sup> | ME    | PN     | РР    | WP     |
|-------------------|-------|--------|-------|--------|
| Total (12-months) | 8,176 | 12,795 | 2,872 | 11,031 |
| Sum > \$950       | 2,735 | 3,306  | 730   | 2,095  |

<sup>&</sup>lt;sup>9</sup> Data derived from OCA-IV-4.

|  |  | Pct >\$950 | 33% | 26% | 25% | 19% |
|--|--|------------|-----|-----|-----|-----|
|--|--|------------|-----|-----|-----|-----|

|   | 2  | When one adds the number of CAP participants who would have had CAP credits at or           |
|---|----|---|
|   | 3  | above the CAP credit ceiling in 2015, had the rate increases sought in these proceedings    |
|   | 4  | been in effect in 2015, given the median CAP consumption reported by FirstEnergy, the       |
|   | 5  | numbers would have been as set forth below. More than half of all Metropolitan Edison       |
|   | 6  | CAP participants would have exceeded the CAP credit ceiling, with 40% or more of            |
|   | 7  | Penelec and Penn Power CAP participants doing so. Nearly one-third of West Penn             |
|   | 8  | Power CAP participants would have been at or above the CAP credit ceiling. Remember,        |
|   | 9  | the participants being considered in the "total" for this analysis are limited to those     |
| 1 | .0 | participants who participated in CAP for the full twelve months of 2015. The fact that a    |
| 1 | .1 | CAP participant might not have reached the annual CAP credit ceiling because they had       |
| 1 | .2 | not participated in CAP for the full year provides no meaningful information. <sup>10</sup> |
|   |    |   |

13

14

### Q. DOES THE RATE AT WHICH CAP PARTICIPANTS REACH THE MAXIMUM

15

### CAP CREDIT CEILING HAVE AN INCOME-BASED ASPECT TO IT?

### 16 A. Yes. CAP participants with lower incomes are noticeably more likely to reach the CAP

17 credit ceiling than CAP participants with higher incomes. The reason for this is that

<sup>&</sup>lt;sup>10</sup> In calculating whether a CAP participant exceeds the CAP credit ceiling, I use the non-heating CAP credit ceiling. The Companies have stated that the number of electric space heating customers is minimal. "As an electric utility, Met-Ed, for the most part, only receives a LIHEAP grant for those low-income customers who have electric heat." (OCA-IV-47). FirstEnergy says that 26% of Met-Ed's CAP participants are electric heating; 14-15% of Penelec's are; 15-17% of Penn Power's are. No similar data was provided for West Penn Power. <sup>11</sup> Data derived from OCA-IV-4.

FirstEnergy (ME, PN, PP, WP): Colton Direct Testimony

| 1 | matched with the lower incomes is a lower affordable percentage of income burden. <sup>12</sup> |
|---|---|
| 2 | The CAP credit, i.e., the difference between the CAP bill and the bill at standard              |
| 3 | residential rates, will thus be greater on a monthly basis, making it more likely that the      |
| 4 | annual CAP credit ceiling will be reached. The percentage of CAP participants reaching          |
| 5 | the non-heating CAP credit ceiling of \$960, by Federal Poverty Level, is set forth below.      |
| 6 | As can be seen, the proportion of CAP participants with income at 101% to 150% of               |
| 7 | Poverty reaching the CAP credit ceiling is a fraction of the proportion of CAP                  |
| 8 | participants with income at or below 50% of Poverty doing so.                                   |

| 2015 <sup>13</sup> | 0 – 50% FPL | 51-100% FPL | 101 – 150% FPL |
|--------------------|-------------|-------------|----------------|
| ME                 | 53%         | 34%         | 25%            |
| PN                 | 39%         | 26%         | 21%            |
| РР                 | 22%         | 16%         | 6%             |
| WP                 | 38%         | 19%         | 8%             |

10

It is evident that the increased burdens imposed on CAP participants by the increased
 likelihood that those participants will reach the CAP credit ceiling, and cease receiving
 additional CAP credits, falls most heavily on those least able to afford the higher bills.
 PLEASE EXPLAIN THE BASIS FOR YOUR STATEMENT THAT EVEN TO
 THE EXTENT THAT SOME CAP CUSTOMERS MAY BE PROTECTED, MOST

17 LOW-INCOME CUSTOMERS DO NOT PARTICIPATE IN CAP.

<sup>&</sup>lt;sup>12</sup> For example, instead of having a \$12,000 income multiplied by 12%, a lower income customer would have a \$6,000 income multiplied by 9%. The CAP credit for the lower income customer would be larger and, accordingly, the likelihood that the customer would reach the CAP credit ceiling would be greater. <sup>13</sup> Data derived from OCA-IV-5.

FirstEnergy (ME, PN, PP, WP): Colton Direct Testimony

| 1  | A. | According to the most recent annual report on Universal Service Programs and             |
|----|----|--|
| 2  |    | Collections Performance, provided by each FirstEnergy company to the Pennsylvania        |
| 3  |    | PUC's Bureau of Consumer Services ("BCS"), in 2014, three of the FirstEnergy             |
| 4  |    | companies (ME, PN, PP) had enrolled roughly one-quarter of their respective confirmed    |
| 5  |    | low-income customers in CAP. West Penn Power had enrolled a somewhat higher              |
| 6  |    | percentage.  |
| 7  |    |  |
| 8  |    | Moreover, the term "confirmed low-income" is a term-of-art defined in PUC regulations.   |
| 9  |    | It refers to those customers who a utility has a reasonable belief to be low-income. The |
| 10 |    | population of "confirmed low-income" customers is much smaller than the total            |
| 11 |    | population of low-income customers. In 2014, for example, the last year for which data   |
| 12 |    | has been published, Met-Ed and Penn Power had confirmed the largest proportion of their  |
| 13 |    | estimated low-income population (52% and 50% respectively), while Penelec (42%) and      |
| 14 |    | West Penn Power (31%) were substantially lower.  |
| 15 |    |  |
| 16 |    | For all four Companies, in other words, CAP participation is a small proportion of low-  |
| 17 |    | income customers. Half or less of the estimated low-income customers have been           |
| 18 |    | confirmed as low-income. And, then, only one-quarter of those confirmed low-income       |
| 19 |    | customers have been enrolled in CAP.   |
| 20 |    |  |
| 21 | Q. | ARE ALL LOW-INCOME CUSTOMERS ELIGIBLE TO PARTICIPATE IN                                  |
| 22 |    | CAP?   |

| 1  | A. | No. CAP eligibility extends to customers who have income at or below 150% of the           |
|----|----|--|
| 2  |    | Federal Poverty Level. A significant number of households in the counties served by        |
| 3  |    | FirstEnergy, however, live with income that just exceeds the CAP eligibility limit. Of the |
| 4  |    | total number of households living with income at or below 200% of Poverty, 70% live        |
| 5  |    | with income below 150% of Poverty Level, while 30% live with income between 150%           |
| 6  |    | and 200% of Poverty. This higher income level provides inadequate income to meet           |
| 7  |    | basic needs, but households with these incomes do not qualify for the CAP programs         |
| 8  |    | offered by the FirstEnergy Companies.  |
| 9  |    |  |
| 10 | Q. | DOES THE EXPOSURE TO INCREASED BILL UNAFFORDABILITY FOR                                    |
| 11 |    | LOW-INCOME CUSTOMERS HAVE A FINANCIAL IMPACT ON NON-LOW-                                   |
| 12 |    | INCOME CUSTOMERS?  |
| 13 | A. | Yes. The proposed increase in the overall rates, including the proposed increase in the    |
| 14 |    | Companies' fixed monthly customer charges, imposes disproportionately high rate            |
| 15 |    | increases on low-use customers, whether low-income or non-low-income. Low-income           |
| 16 |    | customers in the FirstEnergy service territory, however, tend also to be low-use           |
| 17 |    | customers. This result is documented by the U.S. Department of Energy's Residential        |
| 18 |    | Consumption Survey and by the federal LIHEAP office's annual Home Energy                   |
| 19 |    | Notebook. I have confirmed through Census data that the relationships between income       |
| 20 |    | and usage as reported by those two federal agencies hold true for each FirstEnergy utility |
| 21 |    | in Pennsylvania. As a result, through its increased customer charge, the Companies         |
| 22 |    | propose to increase rates the most for those who can least afford to pay those rate        |
| 23 |    | increases. Not only are proportionately more confirmed low-income customers in             |

| 1  |    | arrears, but those who are in arrears, are <u>deeper</u> in arrears. The four FirstEnergy          |
|----|----|--|
| 2  |    | Companies propose to respond to these circumstances by <i>raising</i> rates the most to these      |
| 3  |    | customers. The resulting increase in bad debt, working capital, and credit and collection          |
| 4  |    | costs will be borne by all ratepayers.   |
| 5  |    |  |
| 6  | Q. | PLEASE EXPLAIN THE BASIS FOR YOUR CONCLUSION THAT LOW-   |
| 7  |    | INCOME CUSTOMERS HAVE A DISPROPORTIONATE PAYMENT-  |
| 8  |    | TROUBLED STATUS.   |
| 9  | A. | The PUC's Bureau of Consumer Services ("BCS") publishes an annual report on                        |
| 10 |    | Universal Service Programs and Collections Performance. That annual BCS report                     |
| 11 |    | differentiates collections performance based on "confirmed low-income customers" and               |
| 12 |    | on all residential customers. <sup>14</sup> According to the most recent BCS report, FirstEnergy's |
| 13 |    | confirmed low-income customers exhibit greater payment difficulties than residential               |
| 14 |    | customers do generally. Confirmed low-income customers, among other things: (1) have               |
| 15 |    | a proportionately greater number of customers in arrears; (2) have a proportionately               |
| 16 |    | greater number of dollars in arrears; (3) have a higher dollar level of arrears; and (4) have      |
| 17 |    | a proportionately higher percentage of accounts terminated for nonpayment. The data is             |
| 18 |    | set forth below.   |

<sup>&</sup>lt;sup>14</sup> The BCS comparison is <u>not</u> between confirmed low-income customers and <u>non</u>-low-income customers. It is between confirmed low-income customers and <u>all</u> residential customers (a population that includes the confirmed low-income group as one of its component parts).

| Confirmed Low-Income vs. All Residential <sup>15</sup><br>(ME/PN/PP/WP) (2014) |          |              |          |              |          |              |         |              |
|--|----------|--------------|----------|--------------|----------|--------------|---------|--------------|
|  | М        | Е            | P        | N            | P        | Р            | WP      |              |
|  | All Res. | Conf'd<br>LI | All Res. | Conf'd<br>LI | All Res. | Conf'd<br>LI | All Res | Conf'd<br>LI |
| Percentage accts in debt   | 9.8%     | 36.7%        | 9.8%     | 33.4%        | 8.1%     | 32.5%        | 7.7%    | 35.5%        |
| Percentage dollars in debt   | 4.5%     | 17.8%        | 4.7%     | 16.5%        | 3.6%     | 15.7%        | 2.8%    | 13.3%        |
| Termination rate   | 5.1%     | 20.1%        | 4.1%     | 15.1%        | 3.5%     | 14.0%        | 2.2%    | 11.9%        |
| Average arrears  | \$494    | \$614        | \$432    | \$529        | \$431    | \$530        | \$302   | \$392        |

The data immediately above documents that FirstEnergy's confirmed low-income 2 customers are in arrears at three or more times the rate of residential customers as a 3 whole. Confirmed low-income customers have four times the rate of dollars in arrears. 4 5 They are disconnected more than four times more frequently. They have an arrearage balance that, on average, is 20% higher than the residential class as a whole. There can 6 be no question that the confirmed low-income customer populations of FirstEnergy's four 7 companies face disproportionate payment difficulties. It is to these disproportionately 8 payment-troubled customers to whom FirstEnergy now proposes to increase rates the 9 10 most.

- 11
- 12

### Q. WHAT DO YOU RECOMMEND?

13 A. I recommend two responses based on the data and discussion I present above:

- First, I recommend that the residential customer charges as proposed by OCA
  Witness Johnson be adopted.
- Second, I recommend that the maximum non-heating CAP credit ceiling for
  each FirstEnergy utility be increased by a dollar amount equal to the annual

<sup>&</sup>lt;sup>15</sup> This comparison is not confirmed low-income to non-low-income. The confirmed low-income is a subset of the all residential.

| 1  |    | dollar rate increase approved for the residential customer class in this                      |
|----|----|---|
| 2  |    | proceeding, using the median CAP consumption, rounded to the nearest \$10. <sup>16</sup>      |
| 3  |    | So, for example, should Metropolitan Edison be granted a rate increase                        |
| 4  |    | yielding a \$207 bill increase, the non-heating maximum CAP credit ceiling                    |
| 5  |    | should be increased by \$210; should a Penn Power rate increase yield a bill                  |
| 6  |    | increase of \$221, the non-heating maximum CAP credit should be increased                     |
| 7  |    | by \$220.   |
| 8  |    |   |
| 9  |    | Part 3. Universal Service Issues.   |
| 10 | Q. | PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR  |
| 11 |    | TESTIMONY.  |
| 12 | A. | In this section of my testimony, I consider certain aspects of the Companies' universal       |
| 13 |    | service in light of the proposed increases in residential rates. First, I examine two aspects |
| 14 |    | of the Companies' Customer Assistance Programs ("CAP"):                                       |
| 15 |    | Whether the FirstEnergy Companies are adequately targeting high-use, high                     |
| 16 |    | CAP Credit participants with energy efficiency; and   |
| 17 |    | Whether the FirstEnergy Companies are adequately enrolling low-income                         |
| 18 |    | customers in CAP. I recommend remedies to the Companies' CAP under-                           |
| 19 |    | enrollment.   |
| 20 |    | Second, I examine two aspects of the Companies' implementation of their Low-Income            |
| 21 |    | Usage Reduction Program (LIURP):  |

<sup>&</sup>lt;sup>16</sup> Calculating the bill increase using the median CAP consumption would have the effect of determining an "average" bill increase (using median rather than mean as the point of central tendency).

| 1  |    | > Whether the FirstEnergy Companies are adequately funding LIURP in light of             |
|----|----|--|
| 2  |    | their proposed rate increases; and   |
| 3  |    | Whether the FirstEnergy Companies are appropriately spending the LIURP                   |
| 4  |    | dollars that have previously been budgeted.  |
| 5  |    |  |
| 6  |    | A. The Funding and Enrollment of CAP.  |
| 7  | Q. | PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR                                       |
| 8  |    | TESTIMONY.   |
| 9  | A. | In this section of my testimony, I consider whether the FirstEnergy Companies are taking |
| 10 |    | those steps necessary to make CAP reasonably accessible to the low-income customers of   |
| 11 |    | Metropolitan Edison, Penelec, Penn Power and West Penn Power. I consider further         |
| 12 |    | whether the Companies are taking those reasonable steps to control the universal service |
| 13 |    | costs to be paid by non-participating ratepayers. I conclude that more should be done in |
| 14 |    | both areas.  |
| 15 |    |  |
| 16 |    | 1. CAP Enrollment.   |
| 17 | Q. | PLEASE DESCRIBE THE RECENT ENROLLMENT NUMBERS IN THE CAPS                                |
| 18 |    | OF THE FIRSTENERGY COMPANIES.  |
| 19 | A. | As I explain above, the FirstEnergy CAP enrollments have been declining over the past    |
| 20 |    | several years. The data below from the annual BCS report on collections performance      |
| 21 |    | and universal service programs shows that decline. For each Company other than WPP,      |
| 22 |    | the CAP participation rate by 2014 was at roughly 50% of what the participation rate had |
| 23 |    | been just four years previously.   |

| Company         | 2011   | 2012   | 2013   | 2014   | 2014 as pct<br>of 2011 |
|-----------------|--------|--------|--------|--------|------------------------|
| Met Ed          | 29,496 | 28,773 | 17,517 | 16,290 | 55%                    |
| Penelec         | 39,161 | 36,848 | 24,244 | 22,378 | 57%                    |
| Penn Power      | 10,104 | 9,246  | 5,590  | 4,872  | 48%                    |
| West Penn Power | 21,617 | 21,120 | 20,607 | 22,090 | 102%                   |

| 2 | The decline is not because there are fewer and fewer low-income customers in the FirstEnergy             |   |                      |                    |              |  |  |  |
|---|--|---|----------------------|--------------------|--------------|--|--|--|
| 3 | service territories. Based or  | service territories. Based on the annual BCS universal service reports, I find that not only is the |                      |                    |              |  |  |  |
| 4 | absolute number of CAP par   | rticipants declin   | ing, but the number  | of CAP participant | s as a       |  |  |  |
| 5 | percentage both of confirme  | ed low-income c   | ustomers and of esti | mated low-income   | customers is |  |  |  |
| 6 | declining as well. <sup>17</sup> The CAP participation as a percentage of confirmed low-income customers |   |                      |                    |              |  |  |  |
| 7 | is presented below. The decline for WPP has not been as substantial as for the other three               |   |                      |                    |              |  |  |  |
| 8 | FirstEnergy Companies.   |   |                      |                    |              |  |  |  |
|   | CAP as % of Confirmed LI   | 2011  | 2012                 | 2013               | 2014         |  |  |  |
|   | Metropolitan Edison  | 52%   | 48%                  | 28%                | 26%          |  |  |  |
|   | Penelec  | 53%   | 48%                  | 31%                | 28%          |  |  |  |
|   | Penn Power   | 56%   | 50%                  | 30%                | 26%          |  |  |  |

| q |
|---|
| 2 |

West Penn Power

| 10 | My concern, however, is not simply that CAP participation is substantially declining. My |
|----|--|
| 11 | concern, too, is that CAP has a substantial mismatch between the CAP program's           |
| 12 | participation rate and the participation of low-income customers in other programs       |
| 13 | offered by the FirstEnergy Companies. For example, for three of the four FirstEnergy     |
| 14 | Companies (PN, PP, WP), the number of confirmed low-income customers in arrears and      |
| 15 | on a payment plan (OCA-IV-1) increased from 2013 through 2015, while CAP                 |
| 16 | participation decreased. For all four FirstEnergy Companies, the number of confirmed     |

47%

46%

48%

42%

<sup>&</sup>lt;sup>17</sup> The number of confirmed low-income customers, along with the number of estimated low-income customers, by year, is reported in the annual BCS report on collections performance and universal service.

low-income customers receiving a LIHEAP Cash grant (OCA-IV-1) increased from 2013
 through 2015. The Companies cannot explain why their CAP participation rates are
 decreasing while their participation rates in other programs requiring an affirmative
 customer decision to enroll and an active customer engagement are increasing.

|                     | Confirmed LI in Arre | ars on Payment Plans | Received LIHEAP Cash Grant |        |  |
|---------------------|----------------------|----------------------|----------------------------|--------|--|
|                     | 2013                 | 2015                 | 2013                       | 2015   |  |
| Metropolitan Edison | 15,331               | 14,722               | 7,511                      | 8,525  |  |
| Penelec             | 16,250               | 17,529               | 9,378                      | 9,859  |  |

| West Penn Power     | 10,269               | 12,381               | 11,657                     | 11,859 |  |

5

An additional concern is that CAP participation levels are substantially decreasing at a
time when CAP "exits" for program default have substantially decreased. At each of the
three Poverty levels (with only one exception: WPP at 101-150% FPL), the number of
program defaults resulting in a CAP participant being removed from the program has
declined from 2013 through 2015. Nonetheless, overall program participation rates are
also substantially declining.

12

### 13 Q. DO YOU HAVE A FINAL CONCERN WITH RESPECT TO CAP

### 14 ENROLLMENT AMONGST THE FIRSTENERGY COMPANIES?

- 15 A. Yes. The Companies explain their decreasing CAP participation rates by referencing
- 16 their change in CAP procedures to require annual recertification. According to the

| 1  | Companies, the phase-in of this annual recertification began in June 2012 and was             |
|----|---|
| 2  | completed in December 2013. The Companies report that "when contacted to recertify,           |
| 3  | customers that did not successfully complete the recertification process were dismissed       |
| 4  | from the program. Therefore, the Companies' CAP participant rate declined. Since the          |
| 5  | initial recertification process, annual re-certifications are completed, and dismissal occurs |
| 6  | if not completed or customer is no longer eligible." (OCA-IV-46; see also, OCA-IV-45).        |
| 7  |   |
| 8  | The number of CAP participants who are falling off the program due to a failure to            |
| 9  | recertify, however, remains high, even after this June 2012 to December 2013 initial          |
| 10 | period. On an annual (calendar year) basis, the number of exits due to a failure to           |
| 11 | recertify is as set forth below for 2014 and 2015:  |

|      |       | Annual Total Exits Due t | o a Failure to Recertify <sup>1</sup> | 18    |
|------|-------|--------------------------|---------------------------------------|-------|
|      | ME    | PN                       | PP                                    | WP    |
| 2014 | 8,061 | 10,255                   | 2,267                                 | 9,058 |
| 2015 | 6,571 | 8,293                    | 1,693                                 | 8,121 |

13 14 In contrast, the number of exits due to the fact that the customer was found to have

income too high to qualify the customer for CAP remains relatively low.

|      |     | Annual Total Exits Due | e to Income Too High <sup>19</sup> |     |
|------|-----|------------------------|------------------------------------|-----|
|      | ME  | PN                     | PP                                 | WP  |
| 2014 | 962 | 1,135                  | 257                                | 760 |
| 2015 | 893 | 903                    | 205                                | 906 |

15

The change in FirstEnergy's CAP procedures, as can be seen, has resulted in far more 16 people being dismissed from the Companies CAP programs due to a failure to reapply 17

<sup>&</sup>lt;sup>18</sup> OCA-IV-12. <sup>19</sup> OCA-IV-12.

2

than due to the fact that the customer is found to have income that disqualifies them to receive CAP assistance.

- 3
- 4

### Q. WHAT DO YOU RECOMMEND?

5 Given the adverse impacts I have identified for confirmed low-income customers flowing A. from the rate increases proposed in this proceeding, and the critical role of CAP in 6 7 mitigating these adverse impacts, I recommend two modifications to the FirstEnergy CAP recertification process. First, I recommend that the process of requiring an annual 8 recertification be maintained with the exception of customers whose income is not likely 9 to change on a year-to-year basis. The two primary populations to which this exception 10 would apply include the aged and disabled. For these two identified populations, CAP 11 12 recertification would be required on a biannual basis. Second, I recommend that the process of requiring an annual recertification should be deemed to be satisfied in those 13 situations where a CAP participant receives a LIHEAP Cash benefit. In these 14 circumstances, the CAP participant will be recertified, and they will be continued at the 15 same payment obligations as determined to be appropriate at the time of the Year 1 16 certification. Application for, and receipt of, LIHEAP, in other words, would be deemed 17 to be sufficient verification that the CAP participant has maintained the same annual 18 income. These two process modifications, designed to address the declining CAP 19 participation rates, should be incorporated into the Companies triennial Universal Service 20 and Energy Conservation Plans (USECPs) no later than at the time the Companies file 21 their next triennial plan. 22

| 1  |    | 2. Targeting High CAP Credit Participants with Energy Efficiency.  |
|----|----|--|
| 2  | Q. | PLEASE EXPLAIN YOUR SECOND CONCERN WITH RESPECT TO THE   |
| 3  |    | OPERATION OF CAP IN LIGHT OF THE COMPANIES' PROPOSED RATE  |
| 4  |    | INCREASES.   |
| 5  | A. | In this section of my testimony, I explain why the FirstEnergy Companies should take                     |
| 6  |    | greater steps toward targeting energy efficiency investments toward CAP participants                     |
| 7  |    | with high usage and correspondingly higher CAP credits. As I explain above, "CAP                         |
| 8  |    | Credits" represent the difference between a CAP participant's bill under the Companies'                  |
| 9  |    | CAP programs and the bill that a customer would have received at standard residential                    |
| 10 |    | rates. CAP credits are paid by residential CAP non-participants. Between 2013 and                        |
| 11 |    | 2015:  |
| 12 |    | Metropolitan Edison incurred between \$17.9 and \$11.8 million in CAP credits;                           |
| 13 |    | Penelec incurred between \$20.0 and \$14.4 million in CAP credits;                                       |
| 14 |    | Penn Power incurred between \$4.8 and \$3.2 million in CAP credits; and                                  |
| 15 |    | $\blacktriangleright$ West Penn Power incurred by \$6.9 and \$11.1 million in CAP credits. <sup>20</sup> |
|    |    | ME PN PP WP  |
|    |    | 2013 \$17,891,067 \$20,024,230 \$4,753,838 \$6,937,756   |

2014

2015

I do not cite these CAP credit expenditures to demonstrate that they are excessive or
unreasonable. Rather, I cite the figures to demonstrate that there is substantial room for
savings through the proper targeting of energy efficiency investments. Such investments

\$16,167,036

\$14,439,900

\$3,408,431

\$3,201,445

\$13,697,338

\$11,828,872

\$8,391,267

\$11,131,369

<sup>&</sup>lt;sup>20</sup> The decline in CAP credits is consistent with the sharp decline in the number of CAP participants that I discuss elsewhere in my Direct Testimony.

- would reduce overall CAP bills, and, as a result, could reduce the CAP credits to be paid
   by non-participating ratepayers.
- 3

### 4 Q. HAVE YOU EXAMINED THE PREVALENCE OF HIGH CAP CREDITS ON

5

### THE FIRSTENERGY SYSTEMS?

- 6 A. Yes. The data below presents a distribution of CAP credits that exceed \$950 in 2014 and
- 7 2015, disaggregated by the four FirstEnergy Companies. The data shows that in 2014,
- 8 3,015 ME CAP participants generated CAP credits exceeding \$950, while 2,735 did so in
- 9 2015. In 2014, 3,306 PN CAP participant generated CAP credits greater than \$950,
- 10 while in 2015, 3,426 CAP participants did so. Similarly, in 2015, 559 ME CAP
- 11 participants generated CAP credits exceeding \$1,500, while 285 PN CAP participants
- 12

did.

|                 | ME    |       | PN     |        | РР    |       | WP    |        |
|-----------------|-------|-------|--------|--------|-------|-------|-------|--------|
|                 | 2014  | 2015  | 2015   | 2014   | 2014  | 2015  | 2014  | 2015   |
| Total w/ 12-mos | 8,280 | 8,176 | 12,795 | 12,863 | 3,748 | 2,872 | 8,775 | 11,031 |
| Sum >\$950      | 3,015 | 2,735 | 3,306  | 3,426  | 581   | 730   | 644   | 2,095  |
| Sum > \$1,500   | 636   | 559   | 353    | 285    | 113   | 134   | NA    | 360    |

13

### 14 Q. HAVE YOU EXAMINED THE EXTENT TO WHICH THE FIRSTENERGY

15 COMPANIES HAVE TREATED CAP PARTICIPANTS WITH HIGH CAP

### 16 **CREDITS WITH ENERGY EFFICIENCY MEASURES?**

17 A. Yes. In 2015:

# ME treated 216 of its 2,735 CAP participants with CAP credits exceeding \$950 with energy efficiency (8%);

| 1  |    | PN treated 132 of its 3,306 CAP participants with CAP credits exceeding \$950                |
|----|----|--|
| 2  |    | with energy efficiency (4%);   |
| 3  |    | ➢ PP treated 65 of its 730 CAP participants with CAP credits exceeding \$950 with            |
| 4  |    | energy efficiency (9%); and  |
| 5  |    | ➢ WP treated 894 of its 2,095 CAP participants with CAP credits exceeding \$950              |
| 6  |    | with energy efficiency (43%).  |
| 7  |    | As can be seen, three of the four FirstEnergy utilities treated fewer than 10% of their high |
| 8  |    | CAP credit program participants with energy efficiency measures in 2015.                     |
| 9  |    |  |
| 10 | Q. | DOES ENERGY EFFICIENCY REDUCE USAGE FOR HIGH CAP CREDIT                                      |
| 11 |    | PARTICIPANTS?  |
| 12 | A. | Yes. The energy efficiency measures have an impact on the consumption of these high          |
| 13 |    | CAP Credit program participants. While the Companies report that adequate post-              |
| 14 |    | weatherization data is not available to conduct a thorough savings analysis for homes        |
| 15 |    | treated in 2015, for homes treated in 2014 (having CAP credits exceeding \$1,000):           |
| 16 |    | ➢ ME achieved a 5.5% a year usage reduction (1,322 kWh);                                     |
| 17 |    | ➢ PN achieved an 8.1% a year usage reduction (1,737 kWh);                                    |
| 18 |    | ▶ PP achieved an 8.5% a year usage reduction (2,485 kWh); and                                |
| 19 |    | ➢ WP achieved a10% a year usage reduction (2,356 kWh).                                       |
| 20 |    | (OCA-IV-8). As can be seen from the combined percentage and kWh usage reductions             |
| 21 |    | reported by each Company, high CAP credit customers are also high usage customers            |
| 22 |    | (ME: 1,322 / 0.055 = 24,036 kWh; PN: 1,737 / 0.081 = 21,420 kWh; PP: 2,485 / 0.085 =         |
| 23 |    | 29,235 kWh; WP: 2,356 / 0.10 = 23,560 kWh).  |

| 1  |    |   |
|----|----|---|
| 2  | Q. | HAVE YOU EXAMINED THE IMPACT OF TARGETING THESE HIGH CAP                                |
| 3  |    | CREDIT CUSTOMERS WITH ENERGY EFFICIENCY?  |
| 4  | A. | Yes. If, in targeting high CAP credit customers, the same consumption and percentage    |
| 5  |    | savings results would appertain as have been reported by the FirstEnergy Companies and  |
| 6  |    | used immediately above, such targeting would result in:                                 |
| 7  |    | ➢ An annual bill reduction for ME high CAP credit customers of \$171 at current         |
| 8  |    | rates, or \$185 at the proposed rates;  |
| 9  |    | An annual bill reduction for PN high CAP credit customers of \$225 at current           |
| 10 |    | rates, or \$243 at the proposed rates;  |
| 11 |    | An annual bill reduction for PP high CAP credit customers of \$322 at current           |
| 12 |    | rates, or \$348 at the proposed rates; and  |
| 13 |    | > An annual bill reduction for WP high CAP credit customers of \$305 at current         |
| 14 |    | rates, or \$330 at the proposed rates.  |
| 15 |    | As can be seen, whether at existing rates or at the rates proposed by the FirstEnergy   |
| 16 |    | Companies in these proceedings, the targeting of high CAP credit customers with energy  |
| 17 |    | efficiency would generate substantial positive benefits, in improved CAP affordability. |
| 18 |    |   |
| 19 | Q. | WHAT DO YOU RECOMMEND?  |
| 20 | A. | I recommend that FirstEnergy target its LIURP spending toward a specific percentage of  |
| 21 |    | high use, high CAP Credit customers for LIURP treatment on an annual basis. The         |
| 22 |    | percentage should be set at the percentage of CAP participants that have annual CAP     |
| 23 |    | credits exceeding \$950. In 2015, the targeting percentage would have ranged from 19%   |
|    |    |   |

1 (WP) to 33% (ME). In 2015, only WP would have already met this targeting decision-

2 rule.

|   | ME    | DN     | חת    | W/D    |
|---|-------|--------|-------|--------|
|   | ME    | PN     | PP    | WP     |
| Number of CAP participants (12 full months) | 8,176 | 12,795 | 2,872 | 11,031 |
| CAP Credits > \$950                         | 2,735 | 3,306  | 730   | 2,095  |
| Percent CAP Credits > \$950                 | 33%   | 26%    | 25%   | 19%    |

3

### 4 Q. DO YOU PROPOSE TO ACCOMPANY THIS TARGETING WITH AN

5

### **INCREASE IN THE LIURP BUDGET?**

6 A. Yes. I propose that this improved targeting be accompanied by an increase in the LIURP

7 budget equal to the same proportion bill increase to the residential class at median usage.

8 This increase in LIURP funding should be used to help fund the targeting of high CAP

9 credit customers, but not necessarily limited to this use. The 2016 LIURP budget by

10 Company against which the bill increase percentage would be applied is:

| 2016 LIURP budget | Admin     | Program     | Total       |
|-------------------|-----------|-------------|-------------|
| ME                | \$252,845 | \$4,352,155 | \$4,605,000 |
| PN                | \$323,400 | \$5,212,600 | \$5,536,000 |
| РР                | \$190,460 | \$2,180,755 | \$2,371,215 |
| WP                | \$546,800 | \$4,026,112 | \$4,572,912 |

11

If, for example, Metropolitan Edison overall residential bills increase by 12% in this
proceeding, Met Ed's LIURP budget should be increased by 12% (from \$4.605 million).
If Penelec's overall residential bills increase by 10%, Penelec's LIURP budget should be
increased by 10% (from \$5.536 million). Overall bill increases should be determined
using total rates at the median residential consumption.

| 1  |    | <b>B. The Funding and Implementation of LIURP.</b>                                       |
|----|----|--|
| 2  | Q. | PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR                                       |
| 3  |    | TESTIMONY.   |
| 4  | A. | In this section of my testimony, I examine the under-spending by FirstEnergy on its Low- |
| 5  |    | Income Usage Reduction Programs (LIURP). Since 2012, three of the four FirstEnergy       |
| 6  |    | Companies (ME, PN, PP) have substantially under-spent their LIURP budgets. The data      |
| 7  |    | is set forth in Schedule RDC-1. As can be seen, only West Penn Power has, over the       |
| 8  |    | course of the four year period $(2012 - 2015)$ , reported actual LIURP expenditures that |
| 9  |    | equal or exceed its LIURP budget. In contrast, from 2012 through 2015:                   |
| 10 |    | Metropolitan Edison under-spent its LIURP budget by \$751,018;                           |
| 11 |    | Penelec under-spent its LIURP budget by \$1,831,746;                                     |
| 12 |    | Penn Power under-spent its LIURP budget by \$1,961,584.                                  |
| 13 |    | The primary source of under-spending is in the program component (rather than in the     |
| 14 |    | administrative component) of the budget. References to the "program" component are a     |
| 15 |    | term-of-art. The "program" component is that part of LIURP which actually delivers       |
| 16 |    | usage reduction investments to low-income customers. For Metropolitan Edison,            |
| 17 |    | \$600,165 of its under-spending (80%) occurred in the program component; for Penelec,    |
| 18 |    | \$1,731,244 of its under-spending (95%) occurred in the program component; for Penn      |
| 19 |    | Power, \$1,915,506 of its under-spending (98%) occurred in the program component.        |
| 20 |    |  |
| 21 | Q. | HAVE YOU REVIEWED THE LIURP NEEDS ANALYSIS FOR EACH                                      |
| 22 |    | FIRSTENERGY COMPANY TO DETERMINE WHETHER THE NEED FOR                                    |
| 23 |    | ENERGY EFFICIENCY SPENDING HAS DECLINED IN EACH YEAR?                                    |

| 1  | A. | Yes. I have reviewed the LIURP needs analysis for each FirstEnergy Company.                                |
|----|----|--|
| 2  |    | (CAUSE-PA-1-15; CAUSE-PA-III-7). These needs assessments do not present a                                  |
| 3  |    | rationale for reducing the Companies' LIURP spending. Moreover, there is certainly no                      |
| 4  |    | reason presented in these needs assessments for the three FirstEnergy companies that                       |
| 5  |    | have under-spent their LIURP budgets to fail to carry-forward their LIURP budget to be                     |
| 6  |    | used in a future program year.   |
| 7  |    |  |
| 8  | Q. | IS THIS UNDER-SPENDING OCCURRING IN A PERIOD OF INCREASING OR  |
| 9  |    | DECREASING LIURP COSTS ON AN AVERAGE PER-JOB BASIS?  |
| 10 | A. | Heating jobs have exhibited a consistent increase in the cost per job from 2013 through                    |
| 11 |    | 2015. For West Penn Power, average heating job costs increased the least, from \$2,784                     |
| 12 |    | in 2013 to \$3,211 in 2015 (15%). The other three FirstEnergy Companies experienced                        |
| 13 |    | greater heating job cost increased. Average heating job costs increased:                                   |
| 14 |    | ➢ From \$2,042 in 2013 to \$2,476 in 2015 for Metropolitan Edison (21%);                                   |
| 15 |    | ➢ From \$1,680 in 2013 to \$2,062 in 2015 for Penelec (23%); and   |
| 16 |    | ➢ From \$1,984 in 2013 to \$2,593 in 2015 (31%) for Penn Power.  |
| 17 |    | (OCA-IV-1). For each FirstEnergy Company, heating job costs were the most expensive                        |
| 18 |    | of the three types of electric efficiency jobs (i.e., heating, hot water, baseload). <sup>21</sup> Despite |
| 19 |    | these sharp per-job cost increases for space heating efficiency jobs, the FirstEnergy                      |
| 20 |    | companies continued to under-spend their budget.   |
| 21 |    |  |

<sup>&</sup>lt;sup>21</sup> "There are four types of LIURP jobs: electric heating, electric water heating, electric baseload, and gas heating. Baseload jobs are defined as services performed by electric utility companies where the electricity is not used for heating." Customer Services Information Systems Project, Penn State University (2008). "Long-Term Study of Pennsylvania's Low-Income Usage Reduction Program: Results of Analyses and Discussion," at 13, prepared for Pennsylvania PUC.

# Q. IS THIS UNDER-SPENDING OF THE LIURP BUDGET OCCURRING IN A PERIOD WHERE THE COMPANIES ARE EXPERIENCING INCREASED PAYMENT TROUBLES IN THEIR CONFIRMED LOW-INCOME POPULATIONS?

Yes. The increased payment problems of FirstEnergy's confirmed low-income 5 A. customers are evident on several levels. First, according to the annual BCS report on 6 7 collections performance and universal service programs, the termination rate for confirmed low-income customers is substantially increasing for the FirstEnergy utilities. 8 Since 2010, termination rates for confirmed low-income customers have increased by 9 205% for ME (from 9.8% to 20.10%), by 287% for PN (from 5.26% to 15.10%), and by 10 260% for PP (from 5.39% to 14.00%). Since 2011, termination rates for confirmed low-11 12 income customers have increased by 254% for WP (from 4.68% to 11.90%).

| Confirmed LI termination rate | 2010  | 2011   | 2012   | 2013   | 2014   |
|-------------------------------|-------|--------|--------|--------|--------|
| ME                            | 9.80% | 15.10% | 14.80% | 19.50% | 20.10% |
| PN                            | 5.26% | 12.85% | 9.90%  | 14.90% | 15.10% |
| РР                            | 5.39% | 10.05% | 9.90%  | 14.40% | 14.00% |
| WP                            | XXX   | 4.68%  | 11.70% | 15.40% | 11.90% |

<sup>13</sup> 

Moreover, according to the annual BCS CARES report, a decreasing percentage of confirmed low-income customers who have their service disconnected subsequently have their service reconnected. The percentage of disconnected confirmed low-income accounts that were ultimately reconnected decreased from 2012 through 2014 (the last year for which data has yet been published) for three of the four FirstEnergy utilities. For PN, the proportion of reconnections decreased from 90% to 77%; for PP, the proportion decreased from 91% to 88%; for WP, the proportion of reconnections decreased from

2

81%

| (  | 5170.  |        |           |             |              |         |        |        |     |

3

Finally, according to the PUC's annual Cold Weather Survey, an increasing number of
FirstEnergy residential homes that have had service disconnected are entering the next
winter heating season either without heating service or without central heating service.
According to the PUC:

| 8  | > The number of disconnected ME homes that entered the next heating season  |
|----|---|
| 9  | without any heating more than tripled, from 192 in 2010 to 626 in 2015; the |
| 10 | number of disconnected ME homes with central heating experienced a similar  |
| 11 | increase (from 202 in 2010 to 638 in 2015);                                 |

- The number of disconnected PN homes that entered the next heating season
  without any heating, as well as those without central heating, tripled as well, from
  235 in 2010 to 797 in 2015 (no heating), and from 240 to 802 (no central heating);
- The number of disconnected PP homes that entered the next heating season
  without any heating increased by 500% (from 36 in 2010 to 176 in 2015), while
  the number without central heating increased by more than 400% (from 41 in
  2010 to 178 in 2015); and

| 1  |    | > The number of WP homes that entered the next heating season without any                   |
|----|----|---|
| 2  |    | central heating nearly doubled (from 251 in 2010 to 468 in 2015), while the                 |
| 3  |    | number without central heating increased by more than 60% (from 289 in 2010 to              |
| 4  |    | 469 in 2015).   |
| 5  |    | (OCA-4-39 and OCA-4-40). The FirstEnergy Companies could not identify any internal          |
| 6  |    | process or policy changes that would have yielded the results that I have identified above. |
| 7  |    | (OCA-4-39). Nor have the FirstEnergy Companies done any analysis of, made any study         |
| 8  |    | of, or undertaken any inquiry into what happens to a customer who has service               |
| 9  |    | disconnected for nonpayment but never reconnected. (OCA-IV-37).                             |
| 10 |    |   |
| 11 |    | As I discuss above, these adverse outcomes are occurring during a time when CAP             |
| 12 |    | participation has sharply decreased for the FirstEnergy utilities, as well as during a time |
| 13 |    | when the FirstEnergy Companies are routinely under-spending those dollars which the         |
| 14 |    | Companies have budgeted for LIURP service.  |
| 15 |    |   |
| 16 | Q. | ARE THESE NONPAYMENT AND COLLECTION CONSEQUENCES  |
| 17 |    | OCCURRING IN A TIME OF INCREASING OR DECREASING FEDERAL                                     |
| 18 |    | ASSISTANCE?   |
| 19 | A. | Federal fuel assistance is provided through the Low-Income Home Energy Assistance           |
| 20 |    | Program (LIHEAP). In turn, LIHEAP has two components: (1) the CASH program,                 |
| 21 |    | designed to address current bills; and (2) the CRISIS program, designed to respond to the   |
| 22 |    | threat of shutoffs. LIHEAP does not provide substantial assistance to FirstEnergy's low-    |
| 23 |    | income customers. LIHEAP is generally applied to home heating accounts rather than to       |

- home electric accounts. Few FirstEnergy residential accounts have electric space
- 2 heating.
- 3

| 3  |    |  |
|----|----|--|
| 4  |    | In any event, during the time that FirstEnergy's CAP participation has declined, overall |
| 5  |    | federal LIHEAP funding has declined as well. Pennsylvania's allocation of LIHEAP         |
| 6  |    | funds in 2010 was \$282,279,000. By 2014, the state's LIHEAP allocation had declined     |
| 7  |    | to \$175,603,000. Even with a slight 2015 uptick to \$204.1 million, the 2015 allocation |
| 8  |    | was only 72% of what it was five years earlier. Pennsylvania's initial release of 2016   |
| 9  |    | LIHEAP funds was only \$182.2 million, less than 70% of the 2010 allocation.             |
| 10 |    |  |
| 11 | Q. | WHAT DO YOU RECOMMEND?   |
| 12 | A. | I make the following three recommendations (in addition to those recommendations I       |
| 13 |    | have previously set forth in this Direct Testimony).                                     |
| 14 |    | Each FirstEnergy Company should solicit existing community-based                         |
| 15 |    | organizations currently providing energy efficiency services through the                 |
| 16 |    | federal Weatherization Assistance Program (WAP) to deliver LIURP services.               |
| 17 |    | LIURP-funded non-space-heating electric efficiency services (those services              |
| 18 |    | defined by the LIURP program as "baseload" services) should be delivered in              |
| 19 |    | collaboration with the WAP-funded delivery of space heating services for                 |
| 20 |    | other fuels.   |
| 21 |    | Each FirstEnergy Company should commit to providing a one-time influx of                 |
|    |    |  |

LIURP funding equal to the difference between the budgeted LIURP funding
and the actual LIURP expenditures for the years 2010 through 2015. The

| 1  |    | purpose of this one-time influx of money is to return those dollars to LIURP                 |
|----|----|--|
| 2  |    | that were budgeted but not expended.   |
| 3  |    | Each FirstEnergy Company should commit to a process under and through                        |
| 4  |    | which, in the event that future budgeted LIURP funds are not expended during                 |
| 5  |    | the program year for which they were budgeted, those unspent funds will be                   |
| 6  |    | rolled-over and carried-forward within the LIURP program to be used to                       |
| 7  |    | deliver future LIURP services.   |
| 8  |    |  |
| 9  |    | Part 4. Customer Service: Confirming Low-Income Status.                                      |
| 10 | Q. | PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR   |
| 11 |    | TESTIMONY.   |
| 12 | A. | In this section of my testimony, I consider customer service issues involving actions        |
| 13 |    | and/or policies that either appear to be contrary to PUC regulations or that fail to achieve |
| 14 |    | the outcomes sought by PUC regulations. I will examine each of these issues separately       |
| 15 |    | below.   |
| 16 |    |  |
| 17 | Q. | PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR   |
| 18 |    | TESTIMONY.   |
| 19 | A. | In this section of my testimony, I examine whether the FirstEnergy Companies can             |
| 20 |    | improve the extent to which they are identifying low-income customers as "confirmed          |
| 21 |    | low-income" for purposes not only of CAP and LIURP enrollment, but for purposes of           |
| 22 |    | providing other regulatory protections that are limited to the "confirmed low-income"        |
| 23 |    | population.  |

2

3

Q.

# 4 A. While no PUC regulation imposes an explicit obligation on a Pennsylvania utility to proactively seek to identify and "confirm" low-income customers, the PUC's regulations, 5 52 Pa. Code Section 54.72, define a "confirmed low-income residential account" as 6 7 "accounts where the EDC has obtained information that would reasonably place the customer in a low-income designation." A "low-income" customer is defined by the 8 9 PUC to be any customer whose household income would place it at or below 150% of the Federal Poverty Level. 10 11 12 The PUC regulation does not limit the "information" establishing low-income status to information obtained through a limited number of processes identified by the utility. The 13 FirstEnergy Companies acknowledge that they have not set forth a process for 14 determining how to solicit, identify or obtain "information that would reasonably place 15 [a] customer in a low-income designation" in any tariff. (OCA-IV-19(e)). 16 17 Other than a tariff, the Companies identify the following policies, procedures or practices 18 as establishing how and whether to identify a residential customer as a "confirmed low-19 income customer." 20

WHAT IS THE RELEVANT PUC REGULATION GOVERNING "CONFIRMED

A Financial Summary must be obtained for any situation requiring credit determinations. It establishes the customer's ability to pay (income level) and helps to negotiate the payment agreement terms. The income level obtained during this process is used to set the confirmed low income indicator. Additionally, the Department of Human Services sends grant files which also is used to set the confirmed low income indicator.

LOW-INCOME" CUSTOMERS?

| 1<br>2                                       |    | (OCA-IV-20(e)). The FirstEnergy Companies have not changed their practices for   |
|--|----|--|
| 3  |    | confirming low-income customers for many years. Between 2010 and 2015, for   |
| 4  |    | example, the Companies state that "over this time period, [FirstEnergy's] practice of  |
| 5  |    | confirming accounts as low-income has remained consistent and is a result of income  |
| 6  |    | information the customer provides when calling regarding inability to pay or the need for  |
| 7  |    | assistance." (OCA-IV-41). I note that in both descriptions of its policies, practices and  |
| 8  |    | procedures, the FirstEnergy Companies are not proactive in seeking to confirm low-   |
| 9  |    | income status, but rather are simply the passive acceptor of information offered by a  |
| 10   |    | customer.  |
| 11   |    |  |

Q. WHAT GIVES YOU CAUSE FOR CONCERN WITH THE MANNER AND
 EXTENT TO WHICH THE FIRSTENERGY COMPANIES CONFIRM
 CUSTOMERS AS LOW-INCOME?

A. None of the FirstEnergy Companies have confirmed a substantial proportion of the
estimated low-income customers in their respective service territories. Indeed, three of

- 6 the four FirstEnergy Companies have confirmed fewer than half of their estimated
  - number of low-income customers. West Penn Power has confirmed fewer than one-third.

| Confirmed LI as % of Estimated LI | 2010  | 2011  | 2012  | 2013  | 2014  | 2015 |
|-----------------------------------|-------|-------|-------|-------|-------|------|
| ME                                | 53.2% | 64.0% | 53.1% | 51.9% | 52.0% | NA   |
| PN                                | 45.9% | 46.3% | 46.9% | 46.5% | 42.3% | NA   |
| РР                                | 49.6% | 52.4% | 46.8% | 49.0% | 49.7% | NA   |
| WP                                | NA    | 28.1% | 26.4% | 26.2% | 31.0% | NA   |

8

7

9 The low rate at which the FirstEnergy Companies confirm their low-income customers occurs at a time when, as discussed in detail above, CAP participation is declining but the 10 payment problems of confirmed low-income customers are increasing. The regulatory 11 protections available to confirmed low-income customers are thus of particular 12 importance. 13 14 0. WHY IS IT APPROPRIATE TO ADDRESS THIS FAILURE TO CONFIRM 15 LOW-INCOME CUSTOMER STATUS IN THIS RATE CASE? 16 17 A. Extending low-income regulatory protections to all customers who are entitled to receive

- 18 such protections is an important element of customer service. It is thus reasonable to
- 19 examine whether these regulatory protections are being reasonably pursued.
- 20

20

# Q. WHAT DO YOU RECOMMEND?

A. I recommend that each FirstEnergy Company enlist the use of community-based
organizations ("CBOs") as part of its process to identify and confirm low-income
customers. Several reasons support this conclusion.

| 5  | 1) First, CBOs are more likely to have staff specifically trained in, and skilled |
|----|---|
| 6  | with, Company processes and procedures than customers acting on their own.        |
| 7  | It is far more likely that customers working with a CBO will be able to           |
| 8  | recognize the advantages from accessing the full suite of services and benefits   |
| 9  | available to a confirmed low-income customer than would customers working         |
| 10 | alone.  |

| 11 | 2) | Second, research by the National Regulatory Research Institute ("NRRI"),                |
|----|----|---|
| 12 |    | when NRRI was the research arm of the National Association of Regulatory                |
| 13 |    | Utility Commissioners ("NARUC"), found that entire sub-populations of                   |
| 14 |    | residential customers in payment trouble rely more on trusted community                 |
| 15 |    | organizations for advice and assistance in responding to nonpayment than on             |
| 16 |    | either friends/family or on the utility itself. <sup>22</sup> The FirstEnergy Companies |
| 17 |    | should take advantage of these community-based partnerships.                            |
| 18 | 3) | Third, in research that I am currently doing for the Water Research                     |
| 19 |    | Foundation, the research arm of the American Water Works Association                    |

21 enlisting community-based partners is one of the most critical steps in

("AWWA"), on "hard to reach" customers, I have repeatedly heard that

<sup>&</sup>lt;sup>22</sup> NRRI (April 2003). Where Customers go for Help Paying Utility Bills.

| 1  | reaching these persons. <sup>23</sup> The FirstEnergy Companies should take advantage       |
|----|---|
| 2  | of this information. While the FirstEnergy Companies concede that they do                   |
| 3  | not know, and have not inquired, into why low-income households do not                      |
| 4  | respond to written notices (OCA-IV-29), or into why households do not                       |
| 5  | complete deferred payment arrangement (OCA-IV-30), CBOs are more likely                     |
| 6  | to know this information from their institutional experience.                               |
| 7  | More specifically, to address the lack of performance of the FirstEnergy Companies in       |
| 8  | confirming their low-income customers, I recommend two process changes by each              |
| 9  | FirstEnergy Company. First, I recommend that standard forms be made widely available        |
| 10 | through non-utility access points, which forms can be used by CBOs to confirm low-          |
| 11 | income status for each respective Company. For example, the same CBOs that serve as         |
| 12 | access points for enrolling in CAP, or to apply for LIHEAP or hardship grants, should not   |
| 13 | only be allowed, but should be aggressively encouraged, to maintain their own inventory     |
| 14 | of "low-income confirmation" forms.   |
| 15 |   |
| 16 | This process of confirming low-income customers is the same process commonly                |
| 17 | referred to as "adjunctive eligibility" or "express lane eligibility" for public assistance |
| 18 | programs. The federal General Accounting Office ("GAO") notes with respect to the           |
| 19 | Children's Health Insurance program that "Express Lane Eligibility accelerates              |
| 20 | enrollment for the hundreds of thousands of uninsured children already enrolled in other    |
| 21 | income-comparable publicly funded programs such as Head Start or school lunch. The          |
| 22 | simple notion is that children who have met the income test for these income-comparable     |

<sup>&</sup>lt;sup>23</sup> Perhaps the best study I have read in the past 25 years on how to reach hard-to-reach customers was the following: Natasha Cortas, et al. (2009). *Engaging Hard to Reach Families and Children*, Australia Department of Families, Housing, Community Services and Indigenous Affairs: New South Wales.

FirstEnergy (ME, PN, PP, WP): Colton Direct Testimony

| 1  | programs should have their eligibility expedited and do not need to provide duplicative           |
|----|---|
| 2  | income information to qualify for health care coverage. <sup>24</sup> According to The Children's |
| 3  | Partnership "the greatest potential for reaching large numbers of children most simply is         |
| 4  | to allow eligibility for one program to be used to fulfill some or all of the eligibility         |
| 5  | requirements for health care." <sup>25</sup>  |
| 6  |   |
| 7  | Extending this reasoning, the FirstEnergy Companies should authorize and encourage                |
| 8  | CBOs to incorporate low-income confirmation forms into applications for other                     |
| 9  | assistance, whether that assistance involves energy (hardship grants) or non-energy               |
| 10 | programs (e.g., employment training, Food Stamps). A customer would not be <i>required</i>        |
| 11 | to provide such authorization at that time, but should be <u>allowed</u> (indeed, encouraged) to  |
| 12 | do so at the same time the customer is otherwise working with the CBO to provide                  |
| 13 | income verification for some other public assistance purpose. <sup>26</sup>                       |
| 14 |   |
| 15 | The PUC regulation regarding low-income confirmation does not address the use of a                |
| 16 | standard form to confirm customers as being "low-income customers." Nonetheless, the              |
| 17 | use of standard forms have been provided in other circumstances (e.g., third party receipt        |
| 18 | of "reminder notices, past due notices, delinquent account notices or termination notices         |
| 19 | of whatever kind", 52 Pa. Code § 56.131). For the FirstEnergy Companies to promulgate             |
| 20 | such a standard form for use by CBOs, and making such standard forms "available"                  |

<sup>&</sup>lt;sup>24</sup> GAO (April 2000). Medicaid and SCHIP: Comparisons of Outreach, Enrollment Practices, and Benefits, Report No. GAO/HEHS-00-86, at n. 10, General Accounting Office: Washington D.C.

<sup>&</sup>lt;sup>25</sup> The Children's Partnership, Express Lane Eligibility: How to Enroll Large Groups of Uninsured Children in Medicaid and CHIP, Children's Partnership: Washington D.C.

<sup>&</sup>lt;sup>26</sup> I provided a detailed analysis of this type of dual use of income certification when I described "express lane eligibility" in my review of LIHEAP outreach for the Iowa Department of Human Rights, the Iowa LIHEAP agency. Colton (2000). Outreach Strategies for Iowa's LIHEAP Program: Innovations in Targeting," prepared for Iowa Department of Human Rights.

| 1  | through their distribution to, and use by, CBOs who otherwise work with low-income     |
|----|--|
| 2  | customers, is entirely consistent with the language of the PUC Regulation defining a   |
| 3  | "confirmed low-income customer" as one for whom the Companies have "information        |
| 4  | that would reasonably place [a] customer in a low-income designation." The use of such |
| 5  | standard forms would allow the FirstEnergy Companies to address the declining rate at  |
| 6  | which they are identifying their low-income customers and the declining rate of CAP    |
| 7  | participation. It would allow the FirstEnergy Companies to extend the regulatory       |
| 8  | protections available to "confirmed low-income customers" to all customers for whom    |
| 9  | the protections are intended.  |
| 10 |  |

# 11 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

12 A. Yes it does.

# APPENDIX A ACCOMPANYING THE

#### DIRECT TESTIMONY

#### OF

# **ROGER D. COLTON**

# ON BEHALF OF OFFICE OF CONSUMER ADVOCATE

# JULY 22, 2016

# **ROGER D. COLTON**

# BUSINESS ADDRESS:Fisher Sheehan & Colton<br/>Public Finance and General Economics<br/>34 Warwick Road, Belmont, MA 02478<br/>617-484-0597 (voice) \*\*\* 617-484-0594 (fax)<br/>roger@fsconline.com (e-mail)<br/>http://www.fsconline.com (www address)

# **EDUCATION:**

J.D. (Order of the Coif), University of Florida (1981)

M.A. (Economics), McGregor School, Antioch University (1993)

B.A. Iowa State University (1975) (journalism, political science, speech)

# **PROFESSIONAL EXPERIENCE:**

#### Fisher, Sheehan and Colton, Public Finance and General Economics: 1985 - present.

As a co-founder of this economics consulting partnership, Colton provides services in a variety of areas, including: regulatory economics, poverty law and economics, public benefits, fair housing, community development, energy efficiency, utility law and economics (energy, telecommunications, water/sewer), government budgeting, and planning and zoning.

Colton has testified in state and federal courts in the United States and Canada, as well as before regulatory and legislative bodies in more than three dozen states. He is particularly noted for creative program design and implementation within tight budget constraints.

#### National Consumer Law Center (NCLC): 1986 - 1994

As a staff attorney with NCLC, Colton worked on low-income energy and utility issues. He pioneered cost-justifications for low-income affordable energy rates, as well as developing models to quantify the non-energy benefits (*e.g.*, reduced credit and collection costs, reduced working capital) of low-income energy efficiency. He designed and implemented low-income affordable rate and fuel assistance programs across the country. Colton was charged with developing new practical and theoretical underpinnings for solutions to low-income energy problems.

# Community Action Research Group (CARG): 1981 - 1985

As staff attorney for this non-profit research and consulting organization, Colton worked primarily on energy and utility issues. He provided legal representation to low-income persons on public utility issues; provided legal and technical assistance to consumer and labor organizations; and provided legal and technical assistance to a variety of state and local governments nationwide on natural gas, electric, and telecommunications issues. He routinely appeared as an expert witness before regulatory agencies and legislative committees regarding energy and telecommunications issues.

## VERIFICATION

I, Roger D. Colton, hereby state that the facts above set forth in my Direct Testimony, OCA Statement No. 4, are true and correct and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. § 4904 (relating to unsworn falsification to authorities).
