PART I: SCHEDULE OF RATES AND CHARGES (CONT'D)  
(Service Territory Formally Known as Utilities, Inc. - Westgate)

Section I - Purchased Water Adjustment Charge

The Company may apply a Purchased Water Adjustment Clause ("PWAC") to its water rates set forth under Schedule of Rates and Charges to reflect an increase or decrease in the rates charged by its wholesale water supplier, the City of Bethlehem ("City").

The PWAC will be calculated based on changes in the customer charges contained in Schedule G Meter Rates-Sales for Resale of the City's Tariff Water PA. P.U.C. No. 6. For purposes of calculating the PWAC, the amount collected or refunded will be the difference between the consumption charge rate per 1,000 gallons contained in the Company's Schedule of Rates and Charges and the customer charges contained in Schedule G of the City's tariff. The Company will revise the Tariff consumption charge in its base rate cases to mirror the customer charges in Schedule G of the City's tariff and set its PWAC to zero. Between rate cases, the Company will use the PWAC to reflect changes in the rates contained in Schedule G of the City's tariff. The Company will provide notice to its customers of changes in rates resulting from application of the PWAC.

The baseline items determined in the Company's most recent PWAC calculation:

$$(61,358,245 \text{ gallons} \times \$3.969/\text{gallon}) + (\$16,307.00 \text{ fixed charges}) = \$259,837.88$$

(C)  
|  
(C)

Determination of Purchased Water Adjustment Charge

A PWAC may be implemented on the effective date of a change in the City's wholesale rates charged to the Company for purchased water but not on less than 45 days notice to the customer. The Company may, at its option, implement a PWAC to recover an increase in purchased water costs. However, if the rate change is a decrease, the Company must implement a credit PWAC to reflect the decrease.

The items used to calculate the PWAC are:

- A. The projected cost of the volume of water purchased from the City in the prior 12 months at the City's revised rate per 1,000 gallons.
