Dear Madame Secretary

A-2017-2640200

As I am writing you to protest the Transource Energy Project (docket number ²⁰¹⁷ ~~A-2019-2640200~~). I am not a property owner, however I have enjoyed living in my area of the Cumberland Valley for the last 20 years. It is one of the most beautiful areas of the coutry, and I can't let the opportunity pass without objecting to the great scar this project would place upon our land.

I have studied the objections to the project in general and find them worthy of your attention. To me, the beauty spoiled, but as important is the unjustified need for the energy and the fact that energy consumption is declining because we change our technology and use our resourses more intelligently. Also, I think Transource has taken the path of least resistance when they choose a rural route with fewer property owners and the hope that rural folk will not have the tools to protest. I hope I am among many who let their views be known.

Utilities seem to have a preferred status when new projects are put forth, or at least that's how it feels to someone in my position. I appreciate the opportunity to share my opposing opinions with you and hope you find them worthy of consideration.

I am sincerely, *Suzanne Randell*
