Today's split decision is also likely to be dissected by parties curious about how the Supreme Court will eventually rule on Hughes vs. Talen Energy Marketing and CPV Maryland vs. Talen Energy Marketing. These cases stemmed from a Maryland PSC order that compelled its utilities to enter into a "contract for differences" for certain in-state new generation that won a competitive RFP. CPV's St. Charles power plant won the RFP and was awarded a contract for differences. PPL Energy (now Talen) and other merchant generators sued, arguing that this contract represented an illegal state intervention in setting wholesale power prices, a right reserved for the FERC under the Federal Power Act. The 4th Circuit Court agreed and ruled that the contracts were illegal. The Supreme Court's eventual ruling could have implications for future state regulatory actions, particularly the pending AEP and FE PPA deals in Ohio. We believe the ultimate decision in Hughes vs. TLN and CPV vs. TLN remains uncertain. On the one hand, the Court argues today that the FERC has the authority and duty to ensure that rules or practices affecting wholesale rates are just and reasonable. However, the Court notes that there are limits to the FERC's jurisdiction to rules or practices that "directly" affect the wholesale rate. The Court also notes in another section that the FERC may not regulate "within-state wholesale sales."

We are updating estimates for AEP, ETR, EXC, FE, and PEG as we mark our integrated utility models to the 1/14/16 forward curves.

AEP. Our 2015/'16/'17/'18 EPS estimates for AEP are updated to $3.70/3.70/3.93/4.21 from $3.73/3.73/3.92/4.19.

ETR. Our 2015/'16/'17/'18 EPS estimates for ETR are updated to $5.79/4.98/5.08/5.14 from $5.80/5.01/5.12/5.16

EXC. Our 2015/'16/'17/'18 EPS estimates for EXC are updated to $2.56/2.49/2.61/2.85 from $2.56/2.53/2.63/2.85.

FE. Our 2015/'16/'17/'18 EPS estimates for FE are updated to $2.69/2.76/2.86/2.92 from $2.71/2.87/2.86/2.91.

PEG. Our 2015/'16/'17/'18 EPS estimates for PEG are updated to $2.94/2.95/2.92/3.00 from $2.93/2.97/2.93/3.00.

ANALYST CERTIFICATION

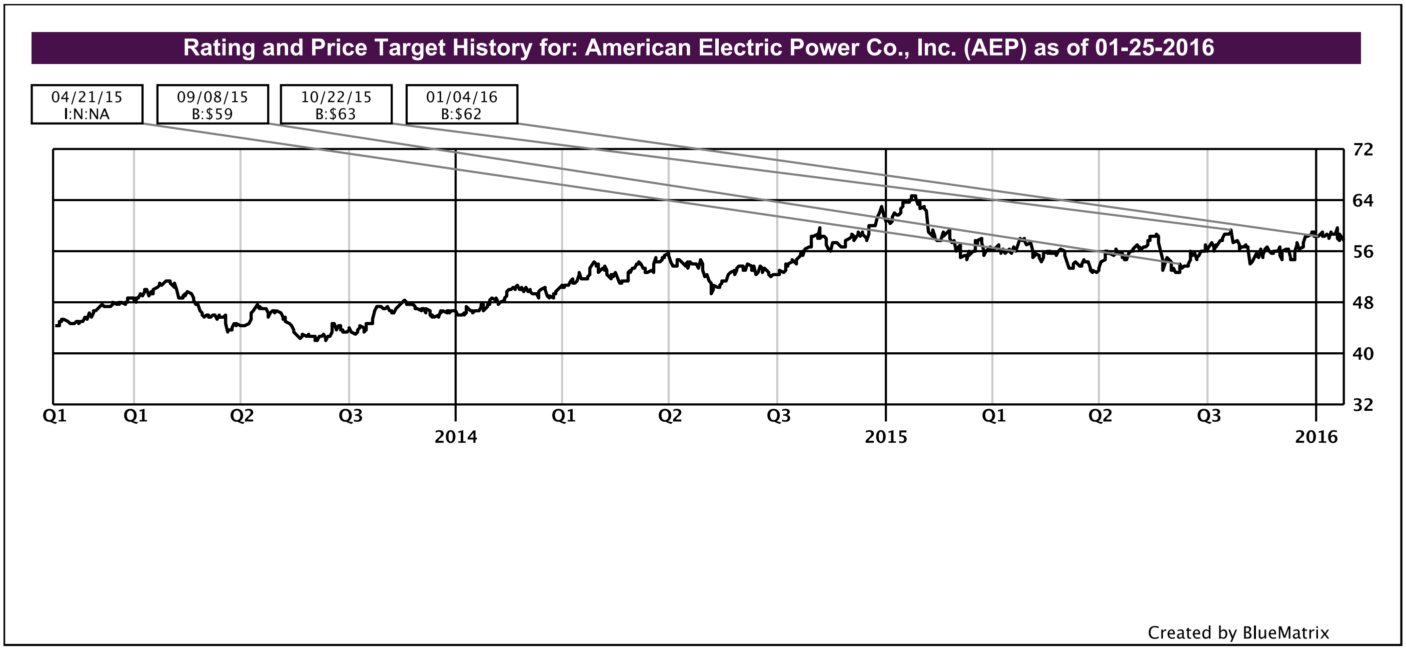
By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

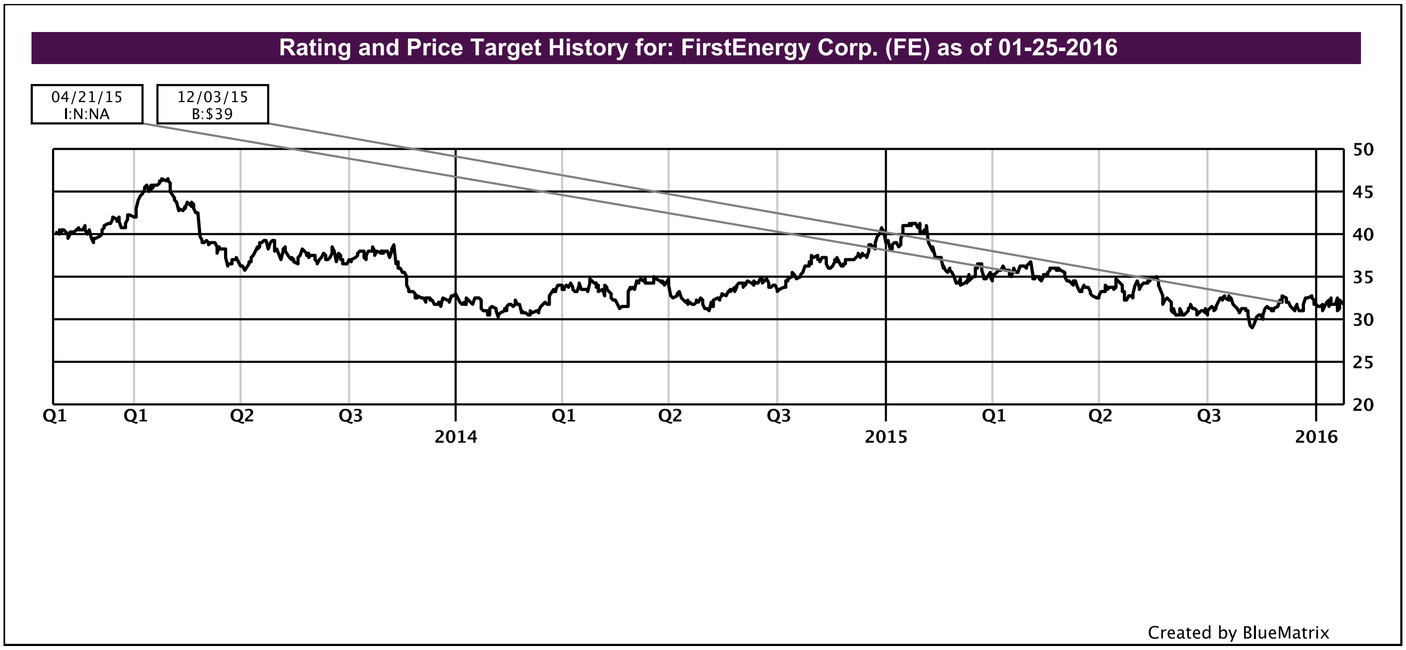
The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from American Electric Power Co., Inc., FirstEnergy Corp., Entergy Corporation, Exelon Corporation and Public Service Enterprise Group Inc. in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

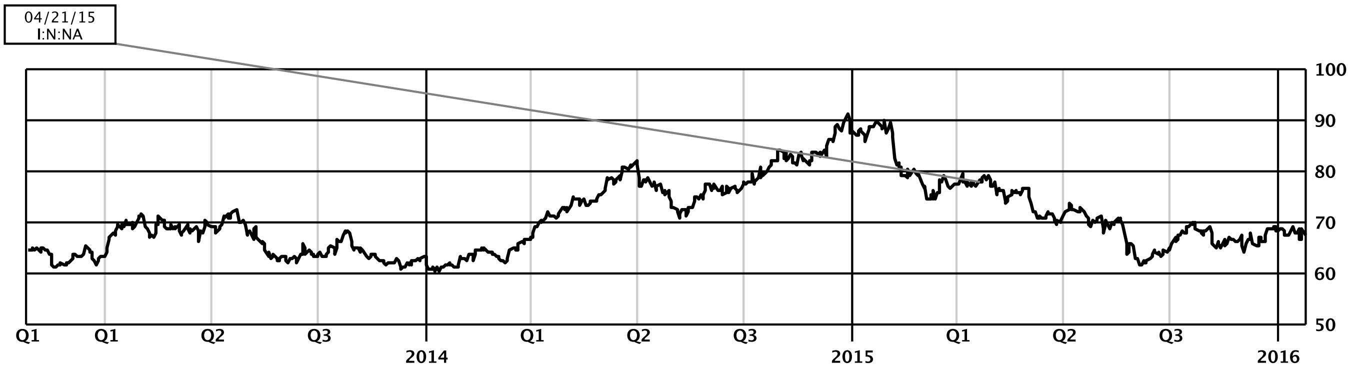


Rating and Price Target History for: American Electric Power Co., Inc. (AEP) as of 01-25-2016



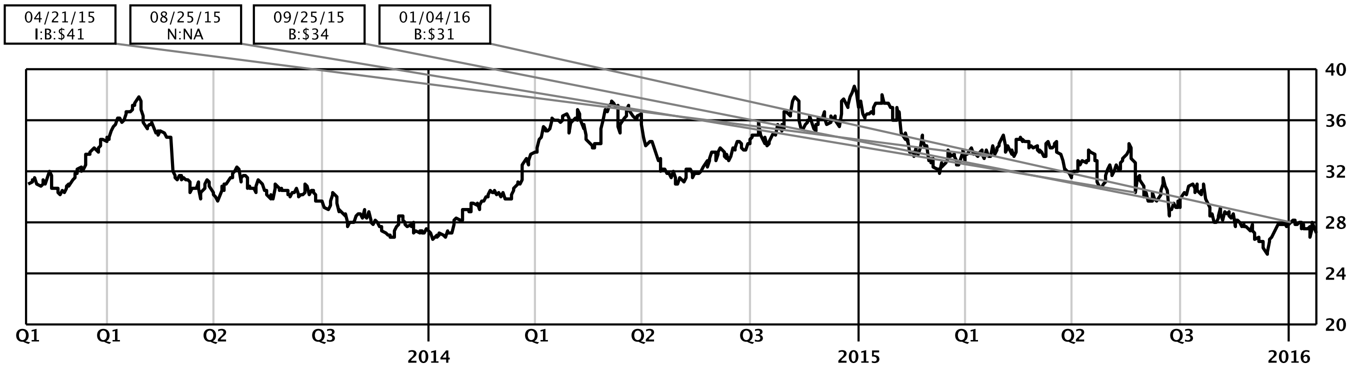
Rating and Price Target History for: FirstEnergy Corp. (FE) as of 01-25-2016

Rating and Price Target History for: Entergy Corporation (ETR) as of 01-25-2016



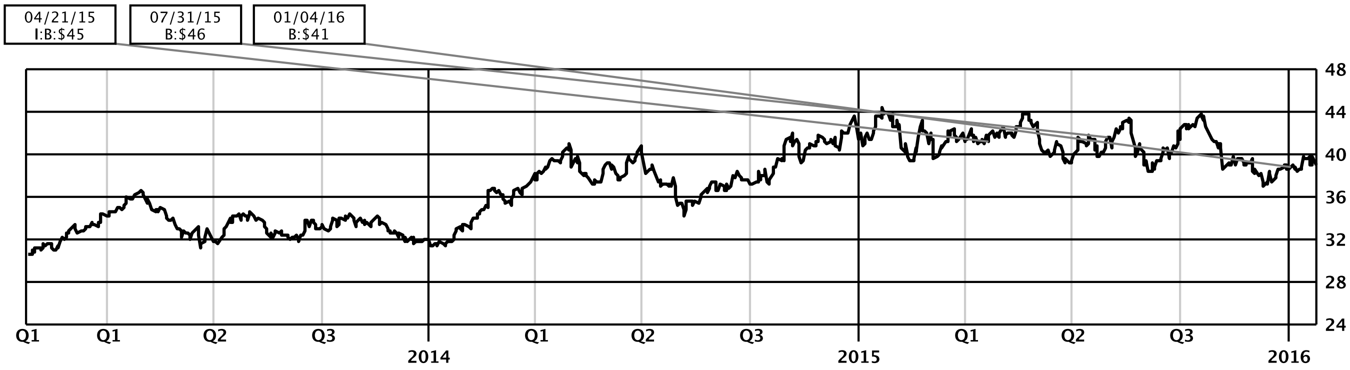
Created by BlueMatrix

Rating and Price Target History for: Exelon Corporation (EXC) as of 01-25-2016



Created by BlueMatrix

Rating and Price Target History for: Public Service Enterprise Group Inc. (PEG) as of 01-25-2016



Created by BlueMatrix

RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 10% or minus 10% within a 12-month period. No price target is assigned.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Restricted - Describes issuers where, in conjunction with Guggenheim Securities, LLC engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Prior to 12/8/14, Guggenheim Securities, LLC's BUY, NEUTRAL, and SELL ratings definitions were as follows (no other ratings definitions were changed):

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 15% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 15% or more within a 12-month period.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgment. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conduct an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

TACTICAL TRADING IDEA DISCLAIMER

Guggenheim Securities, LLC produces "Tactical Trade Ideas" that identify short-term, catalyst-driven trading opportunities impacting companies within the Firm's coverage universe. Tactical Trade Ideas may exist on companies in this report and may be contrary to the analyst's published rating.

Guggenheim's Power & Utilities Daily

Guggenheim's Power and Utilities Daily: SO, D, EXC, ETR, ES, AWK, GXP, CPP, MISO

January 27, 2016

SHAHRIAR POURREZA, CFA ANALYST
212 518 5862
shahriar.pourreza@guggenheimpartners.com

What's New?

EXC/ETR – NY PSC details plan to create “bridge” to save certain nuclear plants
SO – Southern utilities challenge EPA New Source Rule
D – Legislation proposed in VA would make RPS mandatory
CPP – 29 states and agencies appeal stay denial of Clean Power Plan to Supreme Court
MISO – Low natural gas price driving generation changes in MISO
ES – ISO-NE sees continued need for gas pipelines despite low gas prices
GXP – MO wants separate CPP charge on utility bills
AWK – American Water IL acquires Dana/Long Point/Reading/Ancona Public Water District Water System

EXC/ETR – NY PSC details plan to create “bridge” to save certain nuclear plants

- Staff of the NY PSC released a white paper with details on how the state can achieve the NY Governor’s goals to have 50% of electricity generated by renewables by 2030 (Clean Energy Standard).
- Staff recommended a tiered approach for utilities to acquire increasing amounts of renewable sources. Utilities can comply by trading renewable trading credits, or with nuclear “zero emission credits.”
- Tier 1 covers new renewable generation, Tier 2 is for existing renewable generation, and Tier 3 is for existing nuclear plants.
- Only “qualifying” nuclear plants will be eligible for support payments and "must have an in-service date of January 1, 2015, or earlier, be facing financial difficulty as determined by a Staff examination of the books and records of the facility, operating pursuant to a fully renewed license by the [Nuclear Regulatory Commission] until 2029 or beyond, and consistent with any other federal and state authorizations."
- Staff highlighted EXC’s Ginna and Nine Mile Point as well as ETR’s Fitzpatrick that have economic pressures.

Guggenheim takeaway: *The NY PSC’s qualifications for saving nuclear excludes Indian Point as it does not have a fully renewed license by the NRC and is in a legal suit with the State over Water Quality Certification and Coastal Zone Management. As we have highlighted in our research, the NY Governor has been vocal about shutting down Indian Point and saving upstate nuclear. EXC has noted that the implementation timeline proposed is reasonable and that the economics of the proposal is “critical.” In our view, the plan may not be enough to keep Fitzpatrick from retiring in late 2016 or early 2017. Net-net, positive for EXC; negative for other merchant Genco’s. We continue to see signs that legislation mandates are providing a much needed lifeline for nuclear.*

SO – Southern utilities challenge EPA New Source Rule

- Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Southern Power (all subsidiaries of SO) filed against the EPA's New Source Rule for carbon emissions in court.
- The rule aims to reduce emissions from new or modified power plants; in line with the EPA's broader Clean Power Plan to reduce emissions under the Clean Air Act.
- The southern utilities claim the new rule is arbitrary and against the law.

Guggenheim takeaway: *The new rule sets emissions standards close to those of a modern CCGT, requiring carbon capture and sequestration for coal plants – a feature SO has been working on adding to their Kemper plant in Mississippi, which has struggled with schedule delays and cost overruns. SO's utilities also challenged the EPA's broader Clean Power Plan, stressing the retirement of coal generation that would result. This will be a tough battle to win.*

D – Legislation proposed in VA would make RPS mandatory

- Legislation proposed in VA would convert the voluntary renewable portfolio standard to a mandatory program for utilities.
- VA's voluntary RPS calls for 15% renewable by 2025; S.B. 761 would require utilities to invest in solar, wind, and energy efficiency to meet objectives.

Guggenheim takeaway: *VEPCO, D's VA utility, has already committed to renewable development in recent months, in light of environmental regulation and in partnership with the state. Last year, VEPCO announced plans to develop at least 400MW of solar by 2020, with the state of VA agreeing to off-take 110MW of solar from the utility last month. The utility has also sought bids for offshore wind in VA. Net-net, positive for D.*

CPP– 29 states and agencies appeal stay denial of Clean Power Plan to Supreme Court

- 29 states asked for an immediate stay of the Clean Power Plan alleging that the rule is contract to the Clean Air Act.
- On Jan. 21, the U.S. Court of Appeals denied a request for the stay of the Clean Power Plan. The Court established that the petitioners had failed to show that "irreparable harm" would occur while the legal validity of the rule was decided.
- Oral arguments at the U.S. Court of Appeals for legal validity of CPP will begin June 2.
- The 29 states appealing to the Supreme Court will need at least four Justices who want to consider the case in order to hear on CPP.

Guggenheim takeaway: *Similar to the path of MATs, states are attempting to challenge the CPP at the Supreme Court. As we have highlighted in our research, even if the legality of CPP continued to be debated, states will file a State Implementation Plan (SIP) to comply with CPP. We note that utilities and states are working towards compliance even if the state is suing against CPP.*

MISO – Low natural gas price driving generation changes in MISO

- The Markets Committee of the Board of Directors meeting indicated cheap gas caused increased natural gas generation dispatch trends in Dec. 2015.
- Dispatch trends in December 2015 favored gas-fired generators over coal-fired units throughout MISO. Capacity factors for coal-fired resources fell to 45% in December 2015, down from 60% the prior year.
- Gas generation, which is concentrated in MISO South, led to reversed regional transfer flows South-to-North.

- The Markets Committee was concerned that continuing market trends may impact MISO's reliability.

Guggenheim takeaway:*As we continue to highlight in our research, we believe natural gas generation will grow as coal retirements occur. Our analysis shows that natural gas shows the most compelling economics and will displace coal, which could affect reliability and fuel diversity concerns in the region. In our view, MISO's capacity market in its current form is unlikely to keep economically challenged baseload coal from retiring. See our economic analysis of energy generation economics here.*

ES – ISO-NE sees continued need for gas pipelines despite low gas prices

- Local media highlighted continued need for gas pipelines seen by ISO-NE, despite low gas prices.
- ISO-NE referred to continued spikes in prices experienced when demand is high in the winter, and notes more gas is likely needed to account for coal and nuclear retirement.

Guggenheim takeaway: *Much of the gas capacity in New England is secured under firm contract by gas LDCs to meet heating demand, so a cold winter reduces the supply of gas available to fuel power plants. Limited gas supplies during a cold winter can challenge electric reliability and result in volatile prices as we experienced during the polar vortex. ES is developing the Access Northeast project, a gas pipeline that would be supported by contracts with electric utilities securing fuel for their power plants; a variation to the manner in which gas LDC traditionally contract for pipeline capacity.*

GXP – MO wants separate CPP charge on utility bills

- Missouri utility bills are broken down into base charge, a fuel adjustment charge, and municipal taxes.
- The state senator has written bill S. 687, which would require electric utilities to track expenses related to the Clean Power Plan and itemize them on customer bills beginning Jan. 1 the following year.
- MO will still file a State Implementation plan by the Sept. 6 deadline and will request a 2-year extension as allowed.

Guggenheim takeaway: *As we have highlighted in our research, we expect states to file an SIP even though they are suing against CPP. The Senator's bill to separate out CPP costs in a customer's bill could be another tactic to raise protest against CPP.*

AWK – American Water IL acquires Dana/Long Point/Reading/Ancona Public Water District Water System

- Illinois American Water acquires Dana/Long Point/Reading/Ancona Public Water District (Water District) water system for $1.075mm.
- The acquisition was approved on Dec. 16, 2015 and the sale closed on Jan. 26, 2016.
- The acquisition will add ~150 customers to the company's customer base in IL.

Guggenheim takeaway: *The majority of growth in its regulated business is in water acquisitions. We believe AWK will continue to have acquisition opportunities, targeting municipalities that are capital-constrained in states with favorable regulatory constructs.*

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 10% or minus 10% within a 12-month period. No price target is assigned.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Restricted - Describes issuers where, in conjunction with Guggenheim Securities, LLC engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Prior to 12/8/14, Guggenheim Securities, LLC’s BUY, NEUTRAL, and SELL ratings definitions were as follows (no other ratings definitions were changed):

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 15% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 15% or more within a 12-month period.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgment. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conduct an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research.

Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

TACTICAL TRADING IDEA DISCLAIMER

Guggenheim Securities, LLC produces "Tactical Trade Ideas" that identify short-term, catalyst-driven trading opportunities impacting companies within the Firm's coverage universe. Tactical Trade Ideas may exist on companies in this report and may be contrary to the analyst's published rating.

Exelon Corporation

EXC - BUY - Model Update February 1, 2016

- We are updating our EXC model to account for negative weather and bonus depreciation impact for 4Q/2015 FY.

- **Valuation:** Our $31 price target is based on a sum-of-the-parts analysis. We assign ~$13/share for ExGen using a 5.3x weighted average EV/EBITDA applied to ExGen's various assets. We assign $23/share for the regulated utilities combined based on our 2018E EPS of $1.57 applied to a 14.5x regulated utility multiple. Subtracting out ~$3 in parent drag, we then apply a one-year discount to arrive at our 12-month price target.

- **Risks:** Commodity price risk: If natural gas prices fall (rise), wholesale power prices will likely fall (rise), limiting (raising) Power margins. EXC is still inherently a long natural gas call with gas the marginal price setter in PJM. The remaining risks center on the regulated utilities and transmission assets, which encompass traditional risk factors inherent with all utilities including: (1) rate case risk, (2) lower CapEx outlook, and (3) interest rate changes above what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

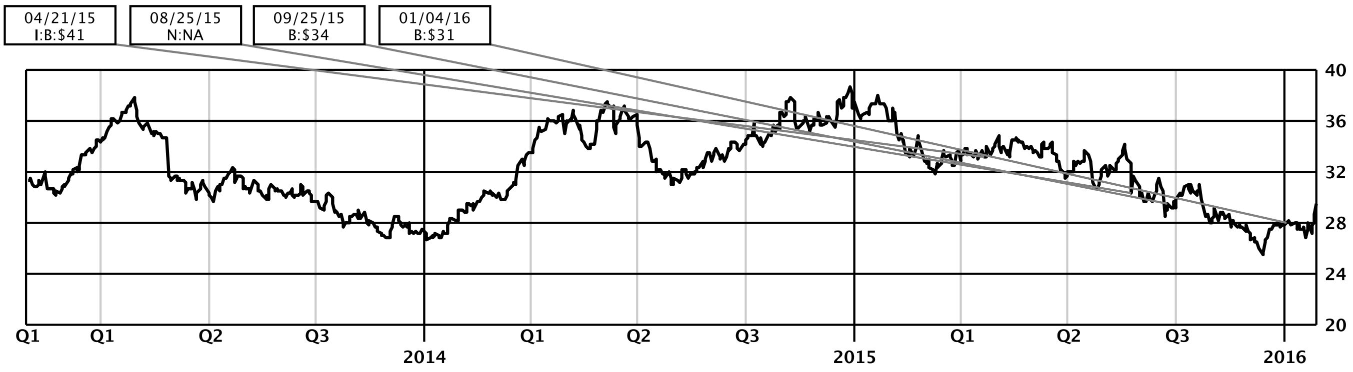
IMPORTANT DISCLOSURES

The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 01-29-2016



Created by BlueMatrix

RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 10% or minus 10% within a 12-month period. No price target is assigned.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Restricted - Describes issuers where, in conjunction with Guggenheim Securities, LLC engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Prior to 12/8/14, Guggenheim Securities, LLC's BUY, NEUTRAL, and SELL ratings definitions were as follows (no other ratings definitions were changed):

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 15% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 15% or more within a 12-month period.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgment. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conduct an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

TACTICAL TRADING IDEA DISCLAIMER

Guggenheim Securities, LLC produces "Tactical Trade Ideas" that identify short-term, catalyst-driven trading opportunities impacting companies within the Firm's coverage universe. Tactical Trade Ideas may exist on companies in this report and may be contrary to the analyst's published rating.

Industry Update

DB Utilities & Power Access - Four Upcoming Events

Four upcoming DB Utilities & Power corporate access events

We wanted to highlight four upcoming DB Utilities & Power Corporate Access Events in one place in case you have missed them. All of these events will be on a request basis and interest should be expressed to your DB Sales contact or to our team directly.

February 11 – Long-Term Power Forecasts with SNL's Steve Piper

On February 11 we will be hosting a client lunch in New York with Steve Piper, Director of Energy Research at SNL Energy. Mr. Piper manages strategic research and forecasting for SNL Energy's clients and was previously managing director of Power Forecasting at Platts. We look forward to hearing perspectives on power, gas and coal pricing fundamentals in context of SNL's most recent quarterly forecast update released in January.

March 29-30 – Texas Power Field Trip

- Austin on 3/29: PUCT (Chairman Nelson, Commissioner Anderson), ERCOT (TBC), Stratus Energy
- Houston on 3/30: Calpine (CPN), Dynegy (DYN), NRG Energy (NRG), Navasota (independent developer)

Our Texas agenda is still being finalized but we will begin in Austin late morning on March 29 and finish in Houston on the afternoon of March 30. Look for full details shortly and in the meantime interested clients can express interest directly via email to Jonathan Arnold (jonathan.arnold@db.com) or Abe Azar (abe.azar@db.com).

April 4-6 – California Utilities & Power Field Trip

- San Diego on 4/4: Sempra Energy (SRE)
- Los Angeles and San Francisco on 4/5: Edison International (EIX), CPUC (President Picker, Commissioner Florio), dinner with Sunrun (RUN)
- San Francisco on 4/6: PG&E Corp. (PCG), Office of Ratepayer Advocates (ORA) and The Utility Reform Network (TURN).

May 9-10 – DB Clean Tech, Utilities & Power Conference

Lastly, we will shortly go live with invitations to our 2016 Clean Tech, Utilities & Power Conference which this year will be held at the Park Plaza Hotel in New York City on May 9-10. The format will be one-on-ones and small group meetings with panel discussions planned for the lunch hours on both days. Look for further details and registration in your inbox over the coming days.

Boosts Dividend 2.5%; POM Deal Still in Question

Event

Exelon reported 4Q15 operating EPS of $0.38 versus $0.48 in 4Q14. 2015 EPS of $2.49 fell short of our and consensus estimates of $2.52. EPS for EXC's three utilities were flat in 4Q15 versus 4Q14 at $0.26, reflecting rate increases at BGE that were offset by unfavorable weather at PECO and ComEd. ExGen's 4Q15 EPS declined $0.12 to $0.27 largely due to nuclear refueling outages, increased costs from the timing of nuclear projects, and higher depreciation. ExGen gross margin guidance for 2016 was unchanged at $7,800 million, while 2017/18 guidance was revised higher by $50 million each year to $7,850 million/$7,900 million.

Impact & Analysis

EXC introduced 2016 operating EPS guidance of $2.40-$2.70, driven primarily by rate increases at both PECO and ComEd, offset by higher O&M at BGE and lower earnings at ExGen due to normalized load margins and higher decommissioning costs. Management announced a 2.5% annual increase in the dividend for the next three years beginning in June; it remains committed to fully funding the dividend from regulated utility earnings by 2018 with a minimum payout of 65%-70%. EXC reiterated its intent to withdraw its offer to acquire POM if it does not receive approval from the DC Commission by 3/4/16, and it then would begin the process of debt reduction (~$1.9 billion) and equity buybacks (~$1.6 billion) related to pre-financing the deal. EXC continues to evaluate the viability of its nuclear assets in Illinois and indicated that despite the support from capacity prices in PJM, weak power prices have put Quad Cities out of the money, while Clinton remains cash flow/earnings negative. EXC will work with state legislators this spring, but indicated that it remains committed to shutting down troubled plants if a solution is not found.

Valuation & Recommendation

We are raising our 2016/17 EPS estimates to $2.57 and $2.64 from $2.52 and $2.61 as we update our model for current forwards and updated hedging disclosures. We maintain our Market Perform rating and $32 SOTP price target, based on a 15x 2017E P/E for the regulated utilities and 8x 2017E EV/EBITDA multiple for ExGen.

Please refer to pages 5 to 8 for Important Disclosures, including the Analyst's Certification.

Key Takeaways From the Conference Call

- EXC reaffirmed its 3-5% EPS growth expectations through 2018, including 7-9% growth at the utilities.
- While its Constellation business recorded higher realized margins in 2015, reflecting lower cost to serve and strong performance of the generation fleet, EXC expects this business's cost to serve and portfolio management to normalize in 2016.
- ExGen earnings will decline in 2016 due to more normalized margins and higher decommissioning costs, which will be only partially offset by fewer planned nuclear refueling outages and cost management improvements. The cost management reductions will likely offset inflationary pressures.
- Bonus depreciation will have a negative $0.09 per share impact on earnings in 2016, including $0.06/share at ExGen and $0.03/share at ComEd. Should the acquisition of POM be approved, it is likely that bonus depreciation will have a further negative impact in 2016. Cash flow, however, is estimated to improve by some $625 million in 2016.
- ExGen's free cash flow over the 2016-18 period is now estimated at $5.35 billion; $3.2 billion after growth capex.
- Cost management initiatives are expected to produce $0.13-$0.18 per share of benefits beginning in 2018. EXC expects that about 35%, or $0.04-$0.06/share of savings, could be achieved by year-end 2016.

Exhibit 1: 2015 Actual Results vs. 2016 EXC Guidance and BMO Estimates (US$/share)

	2015 Actual	2016 Guidance	BMO 2016 Estimates
BGE	$0.31	$0.25-$0.35	$0.31
PECO	$0.43	$0.40-$0.50	$0.46
ComEd	$0.48	$0.50-$0.60	$0.55
ExGen	$1.40	$1.25-$1.35	$1.30
HoldCo	-$0.13	-$0.05	-$0.05
Consolidated EXC	**$2.49**	**$2.40-$2.70**	**$2.57**

Source: BMO Capital Markets estimates, company data

Primary drivers for 2016 estimated earnings include:

- **BGE**: higher O&M expenses for storms and bad debt, partially offset by higher distribution rates
- **PECO**: higher distribution rates, partially offset by higher O&M expenses for storms and bad debt
- **ComEd**: increased capital investments in transmission and distribution
- **ExGen**: normalized load optimization in 2016

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael S. Worms, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA (exceptions: Alex Arfaei and Brodie Woods). These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosure

Disclosure 10: A research analyst, associate, or any person (or their household members) directly involved in the preparation of this research report has a financial interest in securities of this issuer.

Methodology and Risks to Price Target/Valuation

Methodology: Our valuation is based on a 15x 2017E P/E for the regulated utilities and 8x 2017E EV/EBITDA multiple for ExGen.
Risks: A material decline in power prices and / or a change in the regulatory environment could affect our price target.

General Disclaimer
BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters
To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.
The following applies if this research was prepared in whole or in part by Alexander Pearce, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.
To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.
To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Exelon Corporation

EXC: Attractive Value Play--Reiterate Outperform

- **Summary.** We reiterate our Outperform rating and increase our 12-18 month valuation range to $37-39/sh from $32-34/sh to reflect both positive adjustments to our utility EPS outlook and higher peer group multiples. We are adjusting our 16-18E EPS to/from $2.55/$2.62, $2.75/$2.77 & $3.00/$2.85 (our outlook includes POM). We continue to believe EXC shares offer one of the more compelling risk/reward opportunities in the electric universe. On a P/E basis, shares trade at 25-30% discounts to the universe on our 16-18E EPS. While EXC's risk profile is higher than the peer group given power market exposure, we believe the discount reflects too much pessimism around the prospects and value of the company's nuclear fleet. On a present value (PV) basis, we believe EXC is worth $36-37/sh - or 15-20% higher than the current share price – comprised of $26/sh for Utility/Parent and $10-11/sh for ExGen.

- **Valuation Assumptions.** Key assumptions underlying our PV estimate of $36-37/sh. (1) Utility/Parent: we apply a P/E multiple of 15.5X to our 18E EPS of $1.67 to arrive at a PV of $26/sh – we use our 18E EPS because that is the first year when we believe POM will begin to meaningfully add to EXC's EPS (POM is estimated to be $0.20-0.25 accretive to our Utility/Parent EPS and $0.12 accretive to consolidated EPS). (2) ExGen: our $10-11/sh is based on a DCF methodology that contemplates an average remaining life for the nuclear fleet of 20-25 years and average cash flow generation of $1.5B (assuming $1B of non-growth related capex).

- **The Nuclear Question.** While the POM acquisition continues to be a lingering issue (with an estimated valuation implication of $2/sh), we think EXC's potential upside case largely rests on investors' perception of the nuclear fleet's value. Our positive rating is largely predicated on our belief that (the high majority of) ExGen's nuclear fleet would be afforded sufficient revenues either via energy, capacity or some other type of payments to allow the units to remain in service well into the 2030's. At this point, we do not buy into the notion that a combination of renewables/battery storage would begin to force baseload nuclear off the grid within the next 10 years - which we believe is what the current share price embeds.

- **Other Updates.** EXC's Board approved 2.5% annual dividend increases over the next three years beginning with the June payment. In addition, management initiated 2016 EPS guidance of $2.40-2.70 (excl. POM) and affirmed the 3-5% annual growth rate during the period 2016-18 despite headwinds from bonus depreciation. We lowered our 16E & 17E, which largely reflects the impact of bonus depreciation. Our higher 18E EPS reflects a positive reassessment of Utility earnings power after updating our model.

Valuation Range: $37.00 to $39.00 from $32.00 to $34.00

Our $37-39/sh valuation range is premised on a sum-of-the-parts analysis (1) Utility & Parent value of $27/sh (based on a P/E multiple of 16.0-16.5X our 2018E of $1.67) and (2) $10-11/sh for ExGen using a DCF analysis. Risks include commodity price sensitivity and unfavorable regulatory/policy developments.

Investment Thesis:

Our Outperform rating is largely premised on our belief that the share price undervalues ExGen's nuclear fleet. Other positive features include above average utility rate base growth prospects and strong nuclear operational track record.

Please see page 3 for rating definitions, important disclosures and required analyst certifications
All estimates/forecasts are as of 02/03/16 unless otherwise stated.

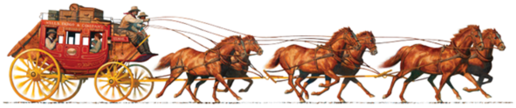
Together we'll go far



Company Description:

Exelon Corporation was formed in October 2000 through the merger of Unicom, which was the parent company of Commonwealth Edison (ComEd) and PECO Energy (PECO). The company's business segments include independent power production (Exelon Generation) and Energy Delivery (ComEd and PECO). Exelon Generation owns approximately 25,000 MW of unregulated electric generating capacity, primarily located in Illinois and Pennsylvania. The company's 17,000 MW nuclear fleet is the largest in the nation. Generation currently accounts for approximately 70% of EXC's overall earnings. The Energy Delivery businesses serve roughly 3.8 million electric distribution customers in Northern Illinois (ComEd) and approximately 1.6 million electric and 0.5 million natural gas distribution customers in Southeastern Pennsylvania (PECO).

Exelon Corporation (Sector Weight)

EXC - ALERT: 4Q15 Results/Guidance in Line, Dividend Growth Announced

Paul T. Ridzon / (216) 689-0270 / pridzon@key.com
John Barta / (216) 689-3386 / john_j_barta@key.com

Key Investment Points

February 2, 2016 Close: $30.14

4Q15 Ongoing EPS: $0.38 vs. $0.48 in 4Q14 / Consensus of $0.38/ KBCM of $0.35

Initial Take: We expect a neutral to positive response to in line 4Q results and 2016 guidance aligned with expectations, bolstered by a commitment to 2.5% dividend hikes for the next three years. We note 4Q results include a tax benefit, which could dampen views.

2015 KBCM EPS Estimate: $2.50 (Consensus: $2.51)

2016 KBCM EPS Estimate: $2.55 (Consensus: $2.53)

Guidance: The Company initiated full-year EPS guidance in the range of $2.40-$2.70 with 1Q16 guidance of $0.60-$0.70 per share vs. expectations and 1Q15 of $0.71.

Highlights:

- Results were in line with consensus expectations, and above our estimate. Relative to our estimate, PECO and Generation results were higher than our forecast. Generation results include a $0.04 benefit from settling tax positions.
- Generation segment ongoing earnings fell ($0.15 vs. $0.27 million) due to project timing (-$0.03), higher outage days (-$0.05) and higher depreciation (-$0.02), a tax settlement (+$0.04), higher shares (-$0.02) and other (-$0.04).
  - EXC Generation is substantially hedged for 2016 at 90-93%, 60-63% hedged in 2017 and 28-31% hedged in 2018.
- ComEd ongoing results were flat ($0.09 million vs. $0.09 million) from the impact of mild weather (-$0.02) and increased rate base (+$0.02). Heating degree days fell 26.8% compared to 4Q14 and were 25.1% below normal. Deliveries fell 4.9%. Weather normalized deliveries fell 2.2%.
- PECO ongoing results fell ($0.09 vs. $0.11), primarily due to weather (-$0.03) partly offset by lower uncollectibles (+$0.01). Electric deliveries fell 5.9% (rose 0.2% on a weather normalized basis). Gas deliveries fell 22.8% (up 1.6% on a weather normalized basis) on higher transport volumes. HDDs were down 34.5% vs. the prior year and were 39.9% below normal.
- BGE earnings rose ($0.08 vs. $0.06 in the prior year) due to increased rates and transmission earnings. BGE has revenue decoupling, so weather minimally impacts earnings.

11:00 a.m. ET Conference Call #: (800) 690-3108 ID#: 97958810

We will be focused on:

- Nuclear plant subsidization.
- Commentary around POM acquisition and approvals.
- Cost cutting opportunities.
- Outlook for nuclear assets.

Exelon Corporation

EXC – BUY – Re-sized, Re-focused and Returning Capital – Raising Price Target

February 3, 2016

EXC refocuses on regulated utilities, shrinking balance sheet, and announcing a return to dividend growth. EXC's strategic focus reflects a more disciplined approach to its capital and balance sheet – inflection point we were looking for. We believe this shift in strategy will provide investors with more confidence that EXC will not make value destructive acquisitions/moves (i.e., not growing Genco). Focus is on regulated growth, shrinking the balance sheet, and returning capital to shareholders – optimal strategy, in our view, in light of the current structural changes going on in de-regulated power markets.

In-line quarter; healthy outlook. EXC reported 4Q operating EPS of $0.38, slightly higher than our $0.37 estimate and slightly below consensus of $0.41. EXC introduced a 2016 guidance range of $2.40-$2.70 versus our prior estimate of $2.51 (now $2.52). Our increased '17 and '18 EPS estimates of $2.69 and $2.87 reflect updates to hedges. We are raising our price target to $37 from $31 and reiterating our BUY rating – our higher valuation includes updated hedges and less financial leverage.

Refocusing on utilities to support dividend growth strategy. With strong performance and continued utility growth, the board approved a 2.5% dividend increase. EXC is targeting a 65-70% payout ratio by 2018 at the utilities. Post-2018, we believe the dividend could potentially grow in-step with consolidated earnings growth of 3-5% as there continues to be growing regulated investment and material free cash flow generation somewhat helped by extension of bonus depreciation, lean initiatives, etc. Our updated dividend estimates for '16/'17/'18 is $1.26/$1.29/$1.32, respectively.

Shrinking the balance sheet, showing financial discipline …*starting* to follow suit with best-in-class? We believe that EXC has adopted a more conservative strategy in deploying capital to de-lever and strengthen/shrink ExGen's balance sheet. As we highlighted in our IPP launch (see here), balance sheet discipline matters – even more for Genco's with high sensitivities to nat gas. EXC's new strategy is working towards PEG's (BUY, $42.15) "tried-and-true" conservative balance sheet strategy, as illustrated by FFO/debt and net Debt/EBITDA metric projections. For EXC, we now estimate 3.4x, 3.3x, and 2.8x net debt/EBITDA and 36%, 38%, and 43% FFO/debt for 2016-2018. For reference purposes, best-in-class PEG remains at 1.9x, 2.0x, and 2.1x net debt/EBITDA and 36%, 33%, and 32% FFO/debt for 2016E-2018E. As EXC plans to retire $3.6B of debt at ExGen over the next five years, coupled with potential upside from Illinois and New York clean carbon programs, we expect credit metrics to further improve NT – policy shifting more favorable.

Nuclear lifeline in IL - NT execution is key. We believe execution on the Low Carbon Portfolio Standard (LCPS) and reforming MISO's capacity market will be necessary to keep economically strained nukes (Clinton, Quad Cities, and Byron) running. EXC has been actively engaging stakeholders to come up with a package resolution for IL's energy outlook (green jobs, utility of the future, and carbon credits for nuclear) to present to the legislature this spring. In our view, the IL legislature will come to a compromise and pass LCPS, but it could take time. While PJM's capacity prices provided uplift, Quad Cities is back out of the money given decline in power prices; the upcoming PJM capacity auction in May could be critical. Clinton, in our view, is more at risk to retire as its cash flow and earnings are negative, and we do not expect MISO capacity market reform (if passed) to become effective until the '17/'18 auction.

Brighter outlook for nuclear in upstate NY. The NY PSC created the zero-emission credit program that gives carbon credits to serve as a "bridge" to the state's 50% renewables by 2030 plan. Under the current RSSA, Ginna's revenues will be capped at $510mm and no less than $425mm in aggregate and is also entitled to 30% of revenues from NY energy and capacity markets. Ginna's RSSA will expire on March 30 2017, so details on compensation for this program will need to be worked out in next 3-4 months. The PSC will develop a framework by June on how utilities could be required to procure a share of zero emission credits to support nuclear units starting as soon as 2017.

POM decision from DC Commission in NT. The DC Commission will make a decision before March 4, and could hold a special meeting outside of the scheduled meetings in February to announce their decision. The DC Commission could announce a special meeting on 48 hours' notice anytime in February. If the deal is not approved, EXC has immediate contingency plans to buy back its 57.5mm shares within the first five months (management estimates a total $0.07 drag on 2016 EPS). Given the settlement terms, we believe the DC Commission will approve the merger this month.

Valuation

Our $37 price target is based on a sum-of-the-parts analysis. We assign ~$18/share for ExGen using a 7.1x weighted average EV/EBITDA applied to ExGen's various assets. We assign $23/share for the regulated utilities combined based on our 2018E EPS of $1.56 applied to a 14.5x regulated utility multiple. Subtracting out ~$2 in parent drag, we then apply a one-year discount to arrive at our 12-month price target.

Risks

Commodity price risk: If natural gas prices fall (rise), wholesale power prices will likely fall (rise), limiting (raising) Power margins. EXC is still inherently a long natural gas call with gas the marginal price setter in PJM. The remaining risks center on the regulated utilities and transmission assets, which encompass traditional risk factors inherent with all utilities including: (1) rate case risk, (2) lower CapEx outlook, and (3) interest rate changes above what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

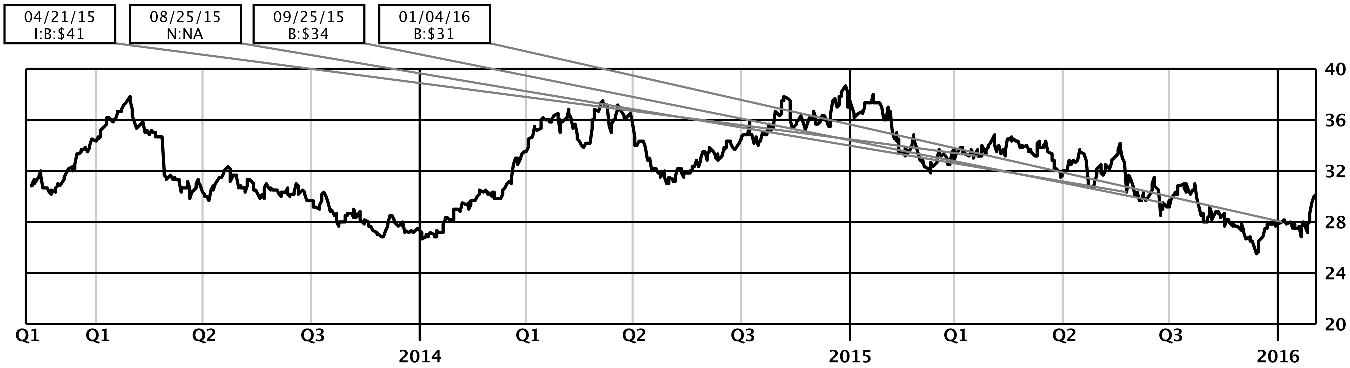
IMPORTANT DISCLOSURES

The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation and Public Service Enterprise Group Inc. in the next 3 months.

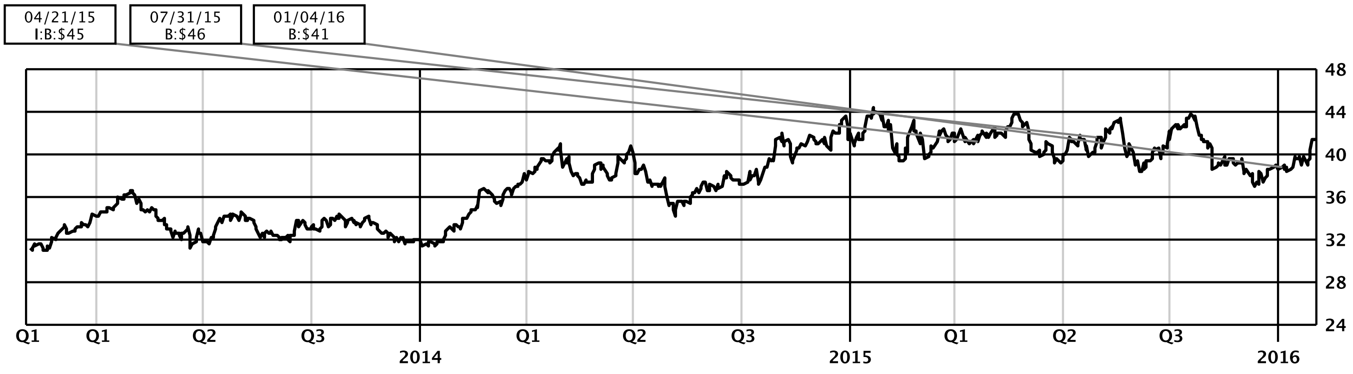
Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 02-02-2016



Created by BlueMatrix

Rating and Price Target History for: Public Service Enterprise Group Inc. (PEG) as of 02-02-2016



Created by BlueMatrix

RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 10% or minus 10% within a 12-month period. No price target is assigned.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Restricted - Describes issuers where, in conjunction with Guggenheim Securities, LLC engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Prior to 12/8/14, Guggenheim Securities, LLC's BUY, NEUTRAL, and SELL ratings definitions were as follows (no other ratings definitions were changed):

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 15% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 15% or more within a 12-month period.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgment. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conduct an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Exelon

4Q15 in line with Street; set to annually raise the dividend by 2.5%

Reiterate Rating: NEUTRAL | PO: 32.00 USD | Price: 31.61 USD

Bank of America Merrill Lynch

Equity | 03 February 2016

Exelon meets on 4Q15 EPS; FY16 EPS guidance of $2.55

Exelon reported 4Q15 ongoing EPS of $0.38, below our estimate of $0.41 and in line with consensus expectations. The company also set expectations for FY16 with EPS guidance between $2.40-2.70. In addition, 1Q16 is expected to have a midpoint EPS of $0.65. The forecasted regulated earnings were lowered in 2017/18 by $25 million due to the extension of bonus depreciation. Over the next three years, bonus depreciation is expected to contribute a cumulative $1.9 billion of additional cash flow, which is anticipated to be used to fund additional regulated growth and pay down excess debt. The ExGen business saw a slight bump up in total gross margin guidance from the last update, primarily due to the approval of the RSSA on the R.E. Ginna nuclear plant in New York. In our view, 4Q15 was largely in line with our expectations, but we were surprised by the timing of management's decision to start growing the dividend.

Dividend raise of 2.5% annually comes as a surprise

Exelon declared the intent to raise the dividend by 2.5% annually starting in June; the dividend strategy is expected to last until 2018. The dividend yield for EXC is currently at 4.1%, and the dividend raise will likely create some degree of near-term valuation floor support.

However, we do not believe the dividend raise will, in and of itself, be a catalyst that materially changes EXC relative performance. A) The 2016 dividend payout ratio for regulated earnings we estimate will be 69% by 2018 if one assumes the Pepco deal is approved. In comparison, the typical regulated electric utility has a dividend payout ratio in the low 60% range in 2016, and those that are growing the rate base at 7-9% like Exelon tend to have payout ratios closer to 50-60%. If the Pepco deal is not approved, the regulated payout ratio in our estimates is close to 100%. B) The dividend raise means there is simply less cushion for dividend security from volatile natural gas prices. Exelon went through a significant dividend adjustment two years ago due to the perceived need to reassure dividend security vis a vis regulated earnings. While Exelon's regulated earnings have grown considerably since then, we also note natural gas prices have fallen also sharply since then. It is in this context that we view the dividend raise as not likely leading to a 1:1 upwards revision in EXC's valuation, even if we grant that on balance the dividend boost is likely a marginal positive near term. C) Notably, the dividend raise seems at odds with the company's recent quest for a clean energy policy in Illinois and for better terms at the Ginna New York facility. Should the company seek to further other clean or reliability policies elsewhere, the dividend raise could compromise that effort.

Dividend boost a marginal positive; Maintain Neutral

On balance, we agree the dividend raise is a marginal positive as it provides marginal yield support. But we do not view the dividend raise as a major EXC inflection point (that in our view can in the near term only occur if natural gas bounces or if energy equities regain risk appetite.) Based on updated peer group price multiple of 15.5x from 14.0x, raising our PO to $32 from $29. Overall we believe EXC's risk/reward outlook remains generally balanced relative to valuation; Maintain Neutral view.

BofA Merrill Lynch does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

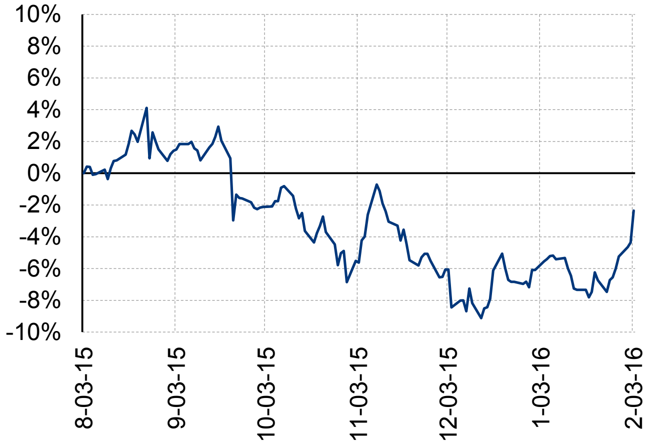
Chart 2: EXC relative performance vs. integrated electrics average



Source: BofA Merrill Lynch Global Research, Bloomberg

Price objective basis & risk

Exelon (EXC)

Our $32/share price objective for EXC shares is derived from our sum of the parts valuation model, where we assign approximately $8 of value to ExGen, $(4) for the parent, and approximately $28 of value to the regulated utility. We value integrated electric utilities, including Exelon, using a sum of the parts valuation model based on 2018E earnings and EBITDA. For Exelon specifically we use a target 6.8x EV/EBITDA multiple to value the deregulated generation segment, in line with peers. We apply a target 15.0 P/E multiple to value the regulated side of the business, which is a discount to regulated peers at 15.5x to reflect the generally below-average ROEs allowed by the state commissioners for the states in which Exelon has regulated operations.

Downside (upside) risks to our price objective are: 1) increasing (decreasing) of forward power prices driven by rising natural gas prices, heat rates, or Northeast and Midwest gas basis to Henry Hub, 2) regulatory outcomes as well as changes in nuclear regulation, 3) deterioration (improvements) in operating efficiency beyond our base scenario, and 4) risks to the successful completion of the Pepco Holdings acquisition

The Investment Opinion System is contained at the end of the report under the heading "Fundamental Equity Opinion Key". Dark grey shading indicates the security is restricted with the opinion suspended. Medium grey shading indicates the security is under review with the opinion withdrawn. Light grey shading indicates the security is not covered. Chart is current as of December 31, 2015 or such later date as indicated.

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	69	47.26%	Buy	58	84.06%
Hold	40	27.40%	Hold	32	80.00%
Sell	37	25.34%	Sell	27	72.97%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1673	50.16%	Buy	1244	74.36%
Hold	777	23.30%	Hold	545	70.14%
Sell	885	26.54%	Sell	533	60.23%

* Companies that were investment banking clients of BofA Merrill Lynch or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Merrill Lynch Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Merrill Lynch report referencing the stock.

Exelon Corp (EXC):

Sentiment Indicator : neutral

Posted by Tucker, Shelby on Wednesday, February 03, 2016, 09:05 AM ET

Our View: While we are encouraged to see management's forecast for future dividend increases, we are somewhat surprised at the timing of the announcement, given on-going uncertainty with the Pepco acquisition, which should be resolved by March 6 at the lastest (the merger termination date). In addition, while management's 2016 guidance assumes a certain level of share buybacks (in our estimate) and an unwinding of Pepco-related debt financing, we do not think there is a large read-through to the deal decision itself. We continue to assume that the deal does not go through; our model assumes a much larger buyback.

Exelon (EXC; Outperform; $32 PT) reported 4Q15 and 2015 adjusted earnings of $0.38 and $2.49 per share, respectively, mostly in-line with our estimate of $0.38 and $2.50 per share as well as consensus estimates. The result is also in the middle of management's 2015 adjusted EPS guidance of $2.40-$2.60 and $0.10 above 2014 EPS of $2.39, a 4% increase year-over-year (YoY).

ExGen gross margin guidance slightly higher for 2017-2018. The revised numbers for 2016-2018 (versus 3Q15 disclosure) are $7.8 billion (unchanged), $7.85 billion (+$50 million), and $7.90 billion (+$50 million), with the increase based on higher open gross margins and hedges as of December 31, 2015.

Initiating 2.5% annual dividend increase starting June 2016. We note that this would be the first dividend increase since 1Q09 and after cutting the dividend 41% in 2Q13 due to continued commodity and power price pressure on the generation business.

2016 EPS guidance initiated at $2.40-$2.70... The guidance range for the various businesses is as follows: ExGen at $1.25-$1.35 (vs RBCe $1.34), ComEd at $0.50-$0.60 (vs RBCe $0.51), and HoldCo at -$0.05 (vs RBCe -$0.01). PECO at $0.40-$0.50 (vs RBCe $0.49), BGE at $0.25-$0.35 (vs RBCe $0.34)

... But assumes Pepco-related equity/debt issuance is unwound. In the company's slide deck, the footenote to the 2016 guidance makes the assumption of an 890 million average shares outstanding for the year. Given the 4Q15 shares outstanding of 921 million, we believe management has incorporated around $900 million of share buybacks (if conducted in 1Q16 at $30/share). Our estimate of $2.65 incorporates $3 billion in share buybacks (and paydown of Pepco-related debt) in 1Q16 per our assumption that the Pepco acquisition does not materialize. If we adjust down our buyback assumption to $900 million, our estimate would be $2.45, all else being equal. We are uncertain whether most estimates that make up the $2.53 consensus number incorporates Pepco or a level of buybacks.

Conference call at 11 AM ET. The dial-in number is (800) 690-3108, pass code 97958810.

Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs and generate large profits even with currently depressed power prices.
- Higher natural gas and coal prices, rising electricity demand and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.
- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.
- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow moat distribution earnings.
- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

Exelon Surprises With 2.5% Dividend Growth Target

Travis Miller, Sector Director, 06 October 2015

Investment Thesis

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and made a $12 billion bid for Pepco in April 2014, both including debt. Management's political negotiations appear to have revived the deal in Washington, D.C., where regulators had rejected it in August 2015. We now expect it has a 75% chance of closing. Exelon has received all other regulatory approvals.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our outlook for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can grow earnings 10% annually the next three years.

Travis Miller, Sector Director, 03 February 2016

Analyst Note

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Economic Moat

Entergy Corp ETR	USD	12,744	11,836	2.32	0.00

Travis Miller, Sector Director, 06 October 2015

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat characteristics, with returns on capital above costs of capital for the foreseeable future. However, that spread between long-term returns on capital and Exelon's cost of capital have shrunk based on our midcycle outlook for power prices in the eastern U.S. Exelon's increasing diversification into narrow- and no-moat businesses together with the shrinking returns at its nuclear generation business supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources like coal and natural gas reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must continue to have access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Valuation

Travis Miller, Sector Director, 06 October 2015

We are reaffirming our $35 per share fair value estimate after raising our probability of the Pepco acquisition closing to 75% from 25% as a result of an agreement the companies reportedly reached with the Washington, D.C., mayor's office on Oct. 6. Although we think the deal is value-dilutive, it is too small to have a material impact on our fair value estimate. Exelon's $27.25-per-share cash offer represents a 30% premium to our $21 per share standalone fair value estimate for Pepco.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities (Ill.), Oyster Creek (N.J.), and Three Mile Island (Pa.)--as well as the Clinton (Ill.) plant. We now assume a 50% probability that the Byron (Ill.) plant will retire given it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★★ 10 Feb 2016	31.12 USD 10 Feb 2016	35.00 USD	0.89	3.88 10 Feb 2016	28.62 10 Feb 2016	Utilities - Diversified	Standard

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is 50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Our midcycle earnings forecast at Exelon Generation is based on a $4/mcf midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

We assume a 9% cost of equity and a 7.1% cost of capital. Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Risk

Travis Miller, Sector Director, 06 October 2015

Investors should pay the most attention to political developments that would re-regulate competitive electricity markets in the Midwest and Mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source.

As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket. Reregulation also would destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.

As Exelon's regulated utilities generate a greater share of earnings, investors will be subject more acutely to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management

Travis Miller, Sector Director, 06 October 2015

We give Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities.

President and CEO Chris Crane and Executive Chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and Chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition in 2015. This will increase Exelon's share of regulated utilities earnings and dilute shareholders' exposure to wholesale power markets. Management has shown strong conviction in the value of the deal based on their efforts to gain support for the deal from all parties, particularly in Washington, D.C.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants absent significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creation opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8 million shares or vested options as of January 2015.

Exelon Surprises With 2.5% Dividend Growth Target

Travis Miller, Sector Director, 03 February 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Supreme Court Sides With Demand Response; No Fair Value Impacts

Andrew Bischof, CFA, Eq. Analyst, 25 January 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal

Travis Miller, Sector Director, 11 November 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the 2017-18 reduction was based on Pepco's reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals

Travis Miller, Sector Director, 30 October 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year

Charles Fishman, Eq. Analyst, 26 October 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C. commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco

Charles Fishman, Eq. Analyst, 06 October 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners

Charles Fishman, Eq. Analyst, 30 September 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Postpones Nuclear Plant Retirement Decision; No Fair Value Impact

Travis Miller, Sector Director, 10 September 2015

We are reaffirming our $35 per share fair value estimate for Exelon after management announced it will delay a decision whether to close at least three of its struggling nuclear plants. We recently incorporated into our fair value estimate and financial projections the assumption that it was more likely than not that Exelon would close those three plants in 2018. We also assume a 50% likelihood that Exelon will close its Byron (Illinois) nuclear plant in 2019.

Results of the recent 2016-18 PJM transitional capacity auctions and management's decision to delay potential retirements do not change our assumptions that those plants ultimately will close, absent significant energy market or public policy changes. The Quad Cities (Illinois), Three Mile Island (Pennsylvania), and Oyster Creek (New Jersey) plants are obligated to run at least through mid-2018, and the Byron plant is obligated to run through mid-2019 based on results from PJM's recent capacity auctions.

The key development for Exelon in last week's 2017-18 transitional capacity auction was that the Quad Cities and Byron plants cleared and are now obligated to run. Neither cleared PJM's 2017-18 base capacity auction last year at $120/megawatt-day but did clear last week's capacity performance transitional auction at $151.50/MW-day. Including those plants and the uplift for the rest of the fleet adds about $400 million of EBITDA in 2017-18.

The Clinton (Illinois) plant is the fourth that we assume will close by 2018. It is not part of PJM. It is obligated to run at least through 2016 as part of the Mid-Continent ISO. Exelon continues to lobby Illinois politicians to adopt a subsidy-like scheme that would improve the economics for its six Illinois nuclear plants. We do not include any benefits from policy changes in our fair value estimate.

D.C. Commission Rejects Pepco-Exelon Merger; Lowering Pepco Fair Value Estimate

Charles Fishman, Eq. Analyst, 26 August 2015

We are lowering our fair value estimate of Pepco Holdings Inc. to $23 per share from $27 per share, following the decision by the Public Service Commission of the District of Columbia to deny the merger with Exelon Corp, which caused Pepco shares to close down 16.5% on Tuesday. At the time of the merger in April 2014, we had believed the transaction would be value-dilutive for Exelon, and we are reviewing our $35 per share fair value estimate. We note that Exelon shares were down almost 7% on Tuesday, on which day the overall market and utilities were also weak. Our narrow moat and stable moat trend are unchanged for both companies.

Exelon and Pepco issued a joint press release indicating that they were reviewing their options and will respond once the process is complete. A summary of the decision indicated that the D.C. commission did not believe the merger would provide sufficient benefits to customers or guarantees for improvements in reliability. The commission was also concerned that under the new management structure Pepco would become "a second-tier company in a much larger corporation whose primary interest is not in distribution, but in generation." The full decision is due Wednesday, and the companies have 30 days to appeal the decision.

We were surprised by the decision, as we had believed the most difficult regulatory hurdle would be in Maryland. Pepco and Exelon agreed to stringent conditions and additional customer benefits imposed by the Maryland Public Service Commission on May 18. We thought the commission in D.C., the last jurisdiction needed to approve the deal, would agree to similar conditions. They did not.

Our new fair value estimate assumes that there is now only a 25% chance of the transaction being restructured to satisfy the D.C. regulators. If the deal is abandoned, our standalone fair value estimate for Pepco is $21 per share.

PJM Auction Results In Line With Our Forecast in First Auction With Capacity Performance Inclusion

Andrew Bischof, CFA, Eq. Analyst, 24 August 2015

Capacity prices across most of the 13-state PJM Interconnection region cleared at $165/MW-day for capacity performance, or CP, and $150/MW-day for base generation for 2018-19. This is comparable to $120/MW-day for last year's 2017-18 results, in which there was no separate CP auction. The results are in line with our auction expectations, in which we previously expected CP to clear at $150/MW-day and base capacity at $140/MW-day for the 2018-19 auction. We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities we cover, as we are maintaining our midcycle capacity assumptions.

Capacity revenue provides significant pretax earnings for our independent power producers and diversified utilities for any one auction year. Dynegy in our opinion is the largest winner from strong base capacity results, as half of its generation is now in PJM. For every $100/MW-day change in capacity prices, we estimate that Dynegy benefits $385 million in pretax earnings. Exelon's fleet also benefited from a strong clearing in the Commonwealth Edison, or COMED, locational deliverability area, or LDA, with CP clearing at $215/MW-day and $200/MW-day for base generation capacity. However, we do not believe that Exelon's Illinois Quad Cities and Byron nuclear units cleared the auction at these prices. Based on recent management commentary, we continue to expect Exelon to close these two plants by the end of 2016, with a final decision expected in September. Public Service Enterprise Group, or PSEG, also benefits from strong base results for the second year in a row, with base capacity clearing in the Eastern Mid-Atlantic Area Council, or EMAAC, LDA clearing at $210/MW-day for base generation and $225/MW-day for CP. The premium clearing price in the PSEG region shows the competitive advantage of PSEG's fleet and supports our positive moat trend. Higher capacity prices also benefit Calpine, FirstEnergy, and NRG Energy.

Upcoming PJM Capacity Auction Could Prove Disappointing

Andrew Bischof, CFA, Eq. Analyst, 17 August 2015

We are reaffirming our fair value estimates and our moat and moat trend ratings for our independent power producers and diversified utilities ahead of the upcoming 2018/19 Planning Year auction for Capacity Performance, or CP. The capacity auction is currently under way, with results posted Aug. 21.

In June, the Federal Energy Regulatory Commission approved the proposal from PJM Interconnection to implement CP in its 2018/19 base residual auction, which PJM began on Aug. 10. CP increases the marginal capacity cost for marginal generators, but the bullish impact should be less than the market expects. We maintain our previous estimate that the combination of CP, reduced impact from demand response, and increased confidence of marginal generators to raise prices will cause CP to clear at $150 per megawatt-day and base capacity at $140/MW-day for the 2018-19 auction.

We believe that previous auctions already priced in existing non-CP performance penalties, such as those a generator must pay if it cannot deliver energy during reserve shortages. CP is a further-reaching, stricter penalty structure for nonperformance outside of reserve shortages. Although generators participating in CP will not be constrained by their avoidable cost rates this year, which will allow generation to offer up to net cost of new entry times the balancing ratio, we suspect that few generators will raise offer prices for this reason alone. We also highlight the possible expected increase in dark spreads over the 2018–19 time frame due to the large increase in LNG exports over this time period; this could add downside pressure to capacity offers from coal generation in PJM.

Morningstar Equity Research Methodology

Fundamental Analysis

At Morningstar, we believe buying shares of superior businesses at a discount and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are our primary focus. Occasionally, this approach causes our recommendations to appear out of step with the market, but willingness to be contrarian is an important source of outperformance and a benefit of Morningstar's independence. Our analysts conduct primary research to inform our views on each firm's moat, fair value and uncertainty.

Economic Moat

The economic moat concept is a cornerstone of Morningstar's investment philosophy and is used to distinguish high-quality companies with sustainable competitive advantages. An economic moat is a structural feature that allows a firm to sustain excess returns over a long period of time. Without a moat, a company's profits are more susceptible to competition. Companies with narrow moats are likely to achieve normalized excess returns beyond 10 years while wide-moat companies are likely to sustain excess returns beyond 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe lower-quality no-moat companies will see their returns gravitate toward the firm's cost of capital more quickly than companies with moats will. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

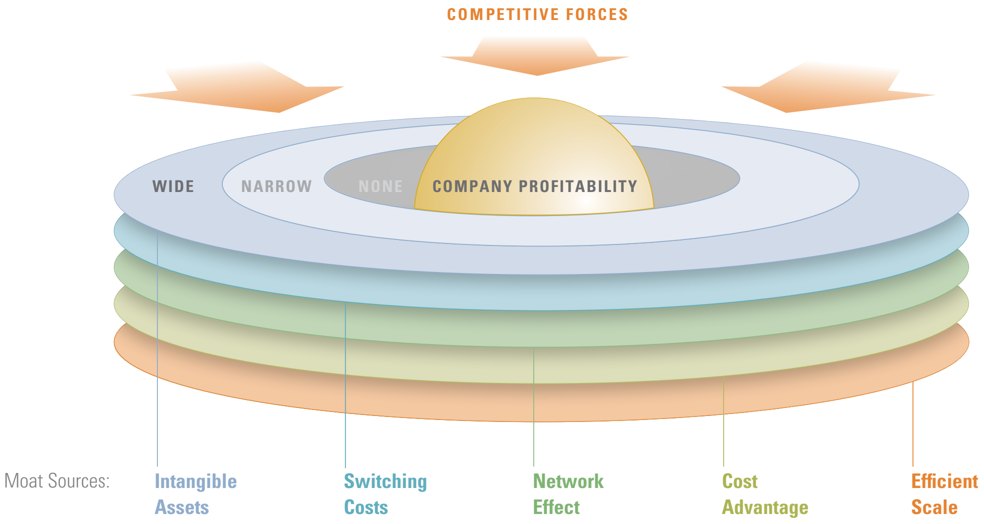
Fair Value Estimate

Our analyst-driven fair value estimate is based primarily on Morningstar's proprietary three-stage discounted cash flow model. We also use a variety of supplementary fundamental methods to triangulate a company's worth, such as sum-of-the-parts, multiples, and yields, among others. We're looking well beyond next quarter to determine the cash-generating ability of a company's assets because we believe the market price of a security will migrate toward the firm's intrinsic value over time. Economic moats are not only an important sorting mechanism for quality in our framework, but the designation also directly contributes to our estimate of a company's intrinsic value through sustained excess returns on invested capital.

Uncertainty Rating

The Morningstar Uncertainty Rating demonstrates our assessment of a firm's cash flow predictability, or valuation risk. From this rating, we determine appropriate margins of safety: The higher the uncertainty, the wider the margin of safety around our fair value estimate before our recommendations are triggered. Our uncertainty ratings are low, medium, high, very high, and extreme. With each uncertainty rating is a corresponding set of price/fair value ratios that drive our recommendations: Lower price/fair value ratios (<1.0) lead to positive recommendations, while higher price/fair value

Economic Moat



Morningstar Equity Research Methodology

ratios (>1.0) lead to negative recommendations. In very rare cases, the fair value estimate for a firm is so unpredictable that a margin of safety cannot be properly estimated. For these firms, we use a rating of extreme. Very high and extreme uncertainty companies tend to have higher risk and volatility.

Quantitatively Driven Valuations

To complement our analysts' work, we produce Quantitative Ratings for a much larger universe of companies. These ratings are generated by statistical models that are meant to divine the relationships between Morningstar's analyst-driven ratings and key financial data points. Consequently, our quantitative ratings are directly analogous to our analyst-driven ratings.

Quantitative Fair Value Estimate (QFVE): The QFVE is analogous to Morningstar's fair value estimate for stocks. It represents the per-share value of the equity of a company. The QFVE is displayed in the same currency as the company's last close price.

Valuation: The valuation is based on the ratio of a company's quantitative fair value estimate to its last close price.

Quantitative Uncertainty: This rating describes our level of uncertainty about the accuracy of our quantitative fair value estimate. In this way it is analogous to Morningstar's fair value uncertainty ratings.

Quantitative Economic Moat: The quantitative moat rating is analogous to Morningstar's analyst-driven economic moat rating in that both are meant to describe the strength of a firm's competitive position.

Understanding Differences Between Analyst and Quantitative Valuations

If our analyst-driven ratings did not sometimes differ from our quantitative ratings, there would be little value in producing both. Differences occur because our quantitative ratings are essentially a highly sophisticated analysis of the analyst-driven ratings of comparable companies. If a company is unique and has few comparable companies, the quantitative model will have more trouble assigning correct ratings, while an analyst will have an easier time recognizing the true characteristics of the company. On the other hand, the quantitative models incorporate new data efficiently and consistently. Empirically, we find quantitative ratings and analyst-driven ratings to be equally powerful predictors of future performance. When the analyst-driven rating and the quantitative rating agree, we find the ratings to be much more predictive than when they differ. In this way, they provide an excellent second opinion for each other. When the ratings differ, it may be wise to follow the analyst's rating for a truly unique company with its own special situation, and follow the quantitative rating when a company has several reasonable comparable companies and relevant information is flowing at a rapid pace.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

-Further information on Morningstar's conflict of interest policies is available from http://global.morningstar.com/equitydisclosures.

Exelon (EXC)

March Fourth on the Nation's Capital

BUY
Price target $36.00
(from $34.00)
Price $31.61

Key Takeaway

Exelon reported inline earnings of $0.38 driven by lower results at ExGen due to reduced nuclear production. Should the D.C. PSC not approve the PHI merger by March 4th the company will begin to execute on its debt reduction and share buyback plan. Exelon provided the negative impact from bonus depreciation but highlighted its plan does not include the benefit of re-investing the cash from bonus.

Exelon provided 2016 earnings guidance of $2.40-$2.70 (Street at $2.53) and 1Q16 guidance of $0.60-$0.70. Sector guidance is $1.25-$1.35 ExGen, $0.50-$0.60 ComEd, $0.40-$0.50 PECO and $0.25-$0.35 from BGE.

Exelon announced plans to raise the dividend by 2.5% each year over the next three years. Management estimates that by 2018 the utilities will be funding 100% of the dividend.

Bonus Deprecation Impact – Management provided the negative impact of bonus depreciation to be $0.09 in 2016, $0.11 in 2017 and $0.06 in 2018 but also highlighted the significant cash flow that will be generated with $625 million in 2016, $675 million in 2017 and $600 million in 2018. Exelon did not provide the benefit associated with re-investment of this cash into the company's regulated business or share repurchases.

PHI Merger – The company has put a March 4 deadline for the District of Columbia PSC to approve the transaction. If Exelon is unable to close the transaction by then management will execute on the debt reduction and share buyback plan. 2016 earnings include a $0.07 charge associated with the closing of the PHI merger.

Commonwealth Edison (CWE) earnings were unchanged at $0.09 on a year-over-year comparison. Increased capital investment was offset by unfavorable weather.

Valuation/Risks

Our $34.00 price target is based on P/E analysis. Taking our 2017 EPS estimate of $2.70 in conjunction with a P/E group average multiple of 13.4x results in a price target of $36.00. Based on yesterday's closing price of $31.61, this would result in a 12-month price appreciation potential of 14.8% and total return potential of 18.8% including the current yield of 4.0%. **Risks** –Risks include exposure to change in the commodity price for electricity associated with Exelon's merchant generation business, and regulatory issues associated with the company's regulated subsidiaries.

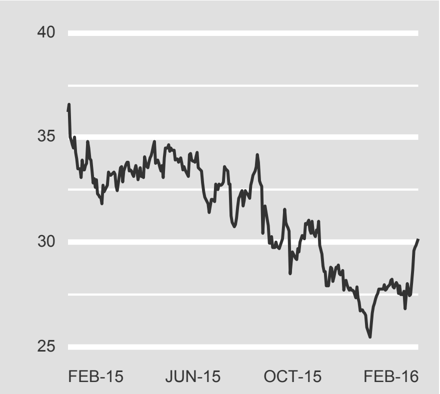
Price Performance



Investment Summary

We believe that EXC is attractive at current levels trading at a discount to other utilities based on our P/E valuation.

Exelon 4Q15 operating EPS was $0.38 on a diluted basis, versus $0.49 for the same period a year ago, our estimate of $0.40, and Consensus of $0.38. The year-over-year decline was primarily driven by reduced earnings at ExGen due to increased nuclear outages at the company's nuclear fleet.

Exelon provided 2016 earnings guidance of $2.40-$2.70 (Street at $2.53) and 1Q16 guidance of $0.60-$0.70. Sector guidance is $1.25-$1.35 ExGen, $0.50-$0.60 ComEd, $0.40-$0.50 PECO and $0.25-$0.35 from BGE.

Exelon announced plans to raise the dividend by 2.5% each year over the next three years. Management estimates that by 2018 the utilities will be funding 100% of the dividend.

Bonus Deprecation Impact – Management provided the negative impact of bonus depreciation to be $0.09 in 2016, $0.11 in 2017 and $0.06 in 2018 but also highlighted the significant cash flow that will be generated with $625 million in 2016, $675 million in 2017 and $600 million in 2018. Exelon did not provide the benefit associated with re-investment of this cash into the company's regulated business or share repurchases.

Illinois Lower Carbon Initiative – No progress has yet been made with management hopeful the legislature comes up with something in the spring time. Even with the constructive results of the PJM capacity auction both Quad Cities and Clinton are money losing plants.

PHI Merger – The company has put a March 4th deadline for the District of Columbia PSC to approve the transaction. If Exelon is unable to close the transaction by then management will execute on the debt reduction and share buyback plan. 2016 earnings include a $0.07 charge associated with the closing of the PHI merger.

PECO Electric Rate Case – On December 17 the Pennsylvania PUC approved a previously filed settlement that provided an increase of $127 million in annual distribution service revenue. New rates went into effect on January 1.

BGE Electric and Gas Distribution Rate Case – On November 6 BGE filed for an increase of $121 million and $79.5 million for the utility's electric and gas business, respectively. BGE requested an electric ROE of 10.6% and a gas ROE of 10.5%. A final order is expected in June 2016.

4Q15 operating EPS excludes $0.05 of non-recurring items as follows: a $0.05 unrealized gain related to nuclear decommissioning trust investments; a $0.01 loss related to merger and integration costs; a $0.01 loss from an asset impairment, a $0.05 loss from the reassessment of state deferred income taxes, a $0.02 loss associated with FENG non-controlling interest, a $0.01 gain related to a reduction in state income tax reserve, a $0.01 loss associated with the amortization of commodity contract intangibles, and a $0.01 loss due to the PHI merger redeemable debt exchange. 4Q14 earnings exclude $0.46 of non-recurring loss primarily associated with asset impairment.

Commonwealth Edison (CWE) earnings were unchanged at $0.09 on a year-over-year comparison. Increased capital investment was offset by unfavorable

Anthony C. Crowdell, Equity Analyst, (212) 284-2563, acrowdell@jefferies.com

weather. Gross margin increased 6.4% to $869 million reflecting increased electric distribution earnings from the impact of greater capital investment. Retail sales decreased 4.9%, or 2.2% on a weather-adjusted projection, during the quarter due to unfavorable weather. Heating degree days were down 26.8% relative to the same period last year and 25.1% below normal. The Company estimates the negative impact of weather relative to last year to be $0.02.

Operating income increased 8.0% to $216 due to greater gross margin reflecting the impacts of increased capital investment. Operating and maintenance expense increased 5% to $402 million. Earnings increased 16.0% to $87 million driven primarily by higher gross margin, offset slightly by higher O&M and depreciation expense. The effective tax rate for the quarter was 38.3% versus 39.5% last year.

In December the Illinois Commerce Commission approved ComEd's $67 million rate reduction based on a 9.14% ROE and an allowed return on capital of 7.02%. New rates went into effect in January 2016. .

PECO earnings decreased by $0.02 to $0.09 due to unfavorable weather. The principal driver for the year-over-year change was a reduction in heating degree days, which were down 34.5% versus the prior year and down 39.9% relative to normal. Gross margin declined 8.9% to $409 million reflecting unfavorable weather and lower volumes. Retail electric sales declined 5.9% but were up 0.2% on a weather adjusted basis. Gas sales declined 22.8% but experienced a 1.6% improvement on a weather adjusted basis. Heating degree days were down 34.5% versus the same period last year and 39.9% below normal. The company estimates the effect of weather to be negative $0.03.

Operating Income declined 19.1% to $127 million due to reduced gross margin partly offset by lower O&M expense. Operating and maintenance expense fell 6.6% to $184 million. Depreciation expense grew by 5.1% to $62 million driven by additional plant in service. Earnings declined 20.2% to $79 million due to lower operating income. The effective tax rate during the quarter was 21.0% versus 24.4% last year.

BGE earnings improved $0.02 to $0.06 during the quarter. The principal drivers of the year-over-year change were increased distribution revenues pursuant to increased rates effective December 2014. Gross margin grew by 9.1% to $478 million based on higher rates.

Operating income increased 26.3% to $144 million reflecting higher gross margin. Operating and maintenance expense increased 5.7% to $185 million. Earnings grew 39.6% to $74 million due to higher operating margin. The effective tax rate during the quarter was 39.3% versus 41.1% last year.

Earnings at Exelon Generation decreased $0.12 to $0.15 during the quarter. The decline in earnings reflects timing of nuclear projects and the impact of greater nuclear refueling outages, as well as increased deprecation, which were slightly offset by the favorable settlement of certain state income tax positions.

Gross margin decreased 1.0% to $2.1 billion due to a decline in in electric sales. Nuclear production (excluding Salem) decreased 2.6% to 43.3 million MWh with a fleet wide capacity factor of 93.3% versus 94.8% during 4Q14. Refueling outage days increased to 103 days from 97 last year. Non-refueling outage days in the quarter were greater at 21 days versus 8 days last year. Fossil and renewables output decreased 31.0% to 4.6 million MWh.

Anthony C. Crowdell, Equity Analyst, (212) 284-2563, acrowdell@jefferies.com

Operating income declined 48.2% to $253 million due to lower gross margin and greater O&M and depreciation. Operating and maintenance expense increased 13.9% to $1.4 billion due to the impact of nuclear refueling outages, and depreciation expense increased 12.9% to $280 million. Earnings decreased 38.5% to $142 million due to lower operating margins partially offset by reduced tax expense. The effective tax rate during the quarter was 40.1%, versus 42.8% last year.

The company updated its open gross margin and hedging assumptions. Since the 3Q15 call 2016 total gross margin was unchanged while 2017-2018 gross margin improved $50 million each year, all largely driven by beneficial mark-to-market hedges.

The company's Other business segment was unchanged at a loss of loss of ($0.04).

We are maintaining our 2016 and 2017 EPS estimates of $2.50, and $2.70 respectively.

Company Description

Exelon Corporation, through its subsidiaries, Commonwealth Edison Company (CWE) and Peco Energy Company (PECO), is engaged in the regulated distribution and transmission of electricity in Chicago and regulated transmission and distribution of electricity and natural gas in Philadelphia. In 2000, the company formed Exelon Generation, LLC to own and operate 25,543 megawatts (MW) of generation. Roughly 2/3 of the total generating capacity (16,945 MW) is nuclear, with the remaining 1/3 comprised of fossil and hydroelectric facilities.

Explanation of Jefferies Ratings

Buy - Describes securities that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

Hold - Describes securities that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 10% within a 12-month period.

Underperform - Describes securities that we expect to provide a total return (price appreciation plus yield) of minus 10% or less within a 12-month period.

The expected total return (price appreciation plus yield) for Buy rated securities with an average security price consistently below $10 is 20% or more within a 12-month period as these companies are typically more volatile than the overall stock market. For Hold rated securities with an average security price consistently below $10, the expected total return (price appreciation plus yield) is plus or minus 20% within a 12-month period. For Underperform rated securities with an average security price consistently below $10, the expected total return (price appreciation plus yield) is minus 20% or less within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Jefferies policies.

CS - Coverage Suspended. Jefferies has suspended coverage of this company.

NC - Not covered. Jefferies does not cover this company.

Restricted - Describes issuers where, in conjunction with Jefferies engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes securities whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Valuation Methodology

Jefferies' methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Jefferies Franchise Picks

Jefferies Franchise Picks include stock selections from among the best stock ideas from our equity analysts over a 12 month period. Stock selection is based on fundamental analysis and may take into account other factors such as analyst conviction, differentiated analysis, a favorable risk/reward ratio and investment themes that Jefferies analysts are recommending. Jefferies Franchise Picks will include only Buy rated stocks and the number can vary depending on analyst recommendations for inclusion. Stocks will be added as new opportunities arise and removed when the reason for inclusion changes, the stock has met its desired return, if it is no longer rated Buy and/or if it triggers a stop loss. Stocks having 120 day volatility in the bottom quartile of S&P stocks will continue to have a 15% stop loss, and the remainder will have a 20% stop. Franchise Picks are not intended to represent a recommended portfolio of stocks and is not sector based, but we may note where we believe a Pick falls within an investment style such as growth or value.

Risks which may impede the achievement of our Price Target

This report was prepared for general circulation and does not provide investment recommendations specific to individual investors. As such, the financial instruments discussed in this report may not be suitable for all investors and investors must make their own investment decisions based upon their specific investment objectives and financial situation utilizing their own financial advisors as they deem necessary. Past performance of the financial instruments recommended in this report should not be taken as an indication or guarantee of future results. The price, value of, and income from, any of the financial instruments mentioned in this report can rise as well as fall and may be affected by changes in economic, financial and political factors. If a financial instrument is denominated in a currency other than the investor's home currency, a change in exchange rates may adversely affect the price of, value of, or income derived from the financial instrument described in this report. In addition, investors in securities such as ADRs, whose values are affected by the currency of the underlying security, effectively assume currency risk.

In Hong Kong, this report is issued and approved by Jefferies Hong Kong Limited and is intended for use only by professional investors as defined in the Hong Kong Securities and Futures Ordinance and its subsidiary legislation. In the Republic of China (Taiwan), this report should not be distributed. The research in relation to this report is conducted outside the PRC. This report does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. In India this report is made available by Jefferies India Private Limited. In Australia this information is issued solely by Jefferies International Limited and is directed solely at wholesale clients within the meaning of the Corporations Act 2001 of Australia (the "Act") in connection with their consideration of any investment or investment service that is the subject of this document. Any offer or issue that is the subject of this document does not require, and this document is not, a disclosure document or product disclosure statement within the meaning of the Act. Jefferies International Limited is authorised and regulated by the Financial Conduct Authority under the laws of the United Kingdom, which differ from Australian laws. Jefferies International Limited has obtained relief under Australian Securities and Investments Commission Class Order 03/1099, which conditionally exempts it from holding an Australian financial services licence under the Act in respect of the provision of certain financial services to wholesale clients. Recipients of this document in any other jurisdictions should inform themselves about and observe any applicable legal requirements in relation to the receipt of this document.

This report is not an offer or solicitation of an offer to buy or sell any security or derivative instrument, or to make any investment. Any opinion or estimate constitutes the preparer's best judgment as of the date of preparation, and is subject to change without notice. Jefferies assumes no obligation to maintain or update this report based on subsequent information and events. Jefferies, its associates or affiliates, and its respective officers, directors, and employees may have long or short positions in, or may buy or sell any of the securities, derivative instruments or other investments mentioned or described herein, either as agent or as principal for their own account. Upon request Jefferies may provide specialized research products or services to certain customers focusing on the prospects for individual covered stocks as compared to other covered stocks over varying time horizons or under differing market conditions. While the views expressed in these situations may not always be directionally consistent with the long-term views expressed in the analyst's published research, the analyst has a reasonable basis and any inconsistencies can be reasonably explained. This material does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this report is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of the investments referred to herein and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments. This report has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of securities. None of Jefferies, any of its affiliates or its research analysts has any authority whatsoever to make any representations or warranty on behalf of the issuer(s).

Jefferies policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis. Any comments or statements made herein are those of the author(s) and may differ from the views of Jefferies.

This report may contain information obtained from third parties, including ratings from credit ratings agencies such as Standard & Poor's. Reproduction and distribution of third party content in any form is prohibited except with the prior written permission of the related third party. Third party content providers do not guarantee the accuracy, completeness, timeliness or availability of any information, including ratings, and are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use of such content. Third party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Third party content providers shall not be liable for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use of their content, including ratings. Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase, hold or sell securities. They do not address the suitability of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice.

Jefferies research reports are disseminated and available primarily electronically, and, in some cases, in printed form. Electronic research is simultaneously available to all clients. Analyst Note 03 Feb 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers at Commonwealth Edison (Illinois), PECO (Pennsylvania), and Baltimore Gas & Electric (Maryland). Exelon also owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. Exelon also is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

Unless otherwise provided in a separate agreement, you may use this Report only in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of this document is Morningstar Inc. Redistribution, in any capacity, is prohibited without permission. The information, data, analyses and opinions presented herein do not constitute investment advice; are provided solely for informational purposes and therefore are not an offer to buy or sell a security; and are not warranted to be correct, complete or accurate, nor may they be construed as a representation regarding the legality of investing in the security/ies concerned, under the applicable investment or similar laws or regulations of any person or entity accessing this report. The opinions expressed are as of the date written and are subject to change without notice. Except as otherwise required by law, Morningstar, its affiliates, and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions or their use. You should seek the advice of your financial, legal, tax, business and/or other consultant, and read all relevant issue documents pertaining to the security/ies concerned, including without limitation, the detailed risks involved in the investment, before making an investment decision.

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. As the price / value / interest rate of a security fluctuates, the value of your investments in the said security, and in the income, if any, derived therefrom may go up or down.

For Recipients in Australia: This report has been authorized by the Head of Equity and Credit Research, Asia Pacific, Morningstar Australasia Pty Limited and is circulated pursuant to RG 79.26(f) as a full restatement of an original report (by the named Morningstar analyst) which has already been broadly distributed. To the extent the report contains general advice it has been prepared without reference to your objectives, financial situation or needs. You should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. Refer to our Financial Services Guide (FSG) for more information at www.morningstar.com.au/fsg.pdf.

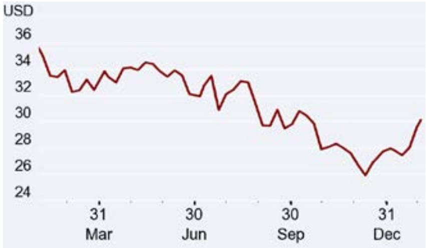
Price (03 Feb 16)	US$31.04
Target price	US$27.00
Expected share price return	-13.0%
Expected dividend yield	4.0%
Expected total return	-9.0%
Market Cap	US$28,543M

Price Performance
(RIC: EXC.N, BB: EXC US)



- **Citi's Take** — Results inline with Citi ($2.49 in EPS vs. Citi at $2.48). EXC's 2016 guidance of $2.40 - $2.70 is also inline with Citi at $2.58.

- **What is the real net debt / EBTIDA at ExGen?** The 2018 net debt/EBITDA of 2.3x in Exelon's investor presentation (page 8) is a net debt number assuming all the FCF generated from 2016-2018 of $3.2B stays at ExGen. As Exelon has indicated, they plan to utilize this ExGen cash to fund utility growth, dividends and renewables investments. So the 2.3x 2018 net/debt to EBITDA is more of a scenario if all cash stays at ExGen. Citi's projected debt/EBITDA in 2018 is 3.3x.

- **ExGen debt paydown of $3.6B by 2020 (as mentioned on the earnings call) is driven by ~$2.9B of debt paydown in 2019, 2020…but where is the cash?** The gross debt paydown as forecasted in Exelon's model through 2018 is only $700m. Two maturities in 2019 and 2020 of $2.9B drive most of the debt reduction through 2020. There is currently no plan to refinance this debt which we think is prudent given our concerns on asset life. Question then is where is the cash to finance this debt paydown? We currently model $1.4B of FCF at ExGen in 2019. Assuming the same amount of FCF in 2020, Exelon wouldn't have any FCF from ExGen in the 2019/2020 timeframe to fund utility growth or dividends. We think this clearly creates a funding gap.

- **Dividend payout rises to ~90% of Utility net income (ex POM) by 2018.** We forecast utility net income at $1.49/share in 2018. Starting with dividends at $1.24/share and growing them at 2.5% we get to $1.34/share in dividends by 2018. This translates to almost a 90% payout. The concern we have is that this dividend profile doesn't fit with the deleveraging being attempted at ExGen in 2019-2020. Also, we think the dividend has been increased assuming Pepco gets approved. While we do think the deal will get approved, we surely will have a problem on our hands if the deal doesn't happen.

- **Implications** — At this point, we remain Neutral on the stock. We would like to get more clarity on a comprehensive capital allocation strategy. This likely comes post Pepco. From a value perspective, we continue to think Exelon is levered to the final rollout of the Clean Power Plan and some form of Carbon tax.

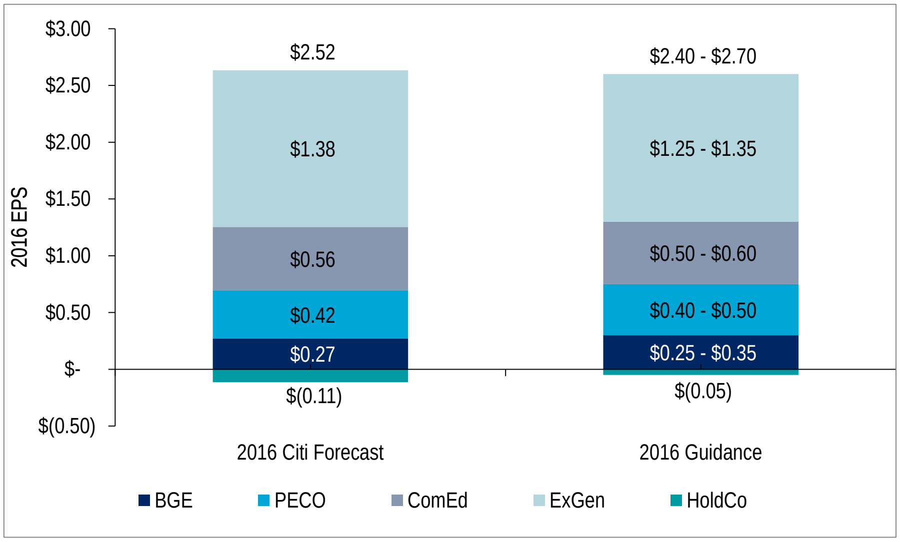
We expect PepCo to deal to be approved: We have written on this deal extensively here and here. EXC is currently awaiting decision before March 4, 2016.

Not surprised that nuclear continues to be challenged: Nuclear plants have an average cash cost of generation of ~$30/MWh. Current 2016 power prices in the Midwest and Mid-Atlantic are at $28/MWh and $35/MWh, respectively. Clearly this is a challenging environment and curves don't suggest much of an improvement in 2017 of 2018. Carbon and some regulatory support is the only real solution, in our view.

Figure 1. 2016 EPS Citi Estimates vs Guidance



Source: Citi Research, EXC Presentation

Exelon Corp

Valuation

We value EXC using a sum-of-the-parts approach. We value ExGen at $10/share and believe ExGen's core nuclear assets will continue to experience weak economics. Valuation is based on a 5.5x 2019 EBITDA multiple that is supported by an UFCF conversion of 45%. The utilities business is valued at $19/share based on a 15x terminal PE multiple. We back out $2/share for the parent to get to our price target

Risks

Commodity price risk affecting merchant generation – If natural gas prices rise, wholesale power prices will likely rise, raising commodity margins.

Exelon is inherently a long natural gas position since natural gas generation sets the price of power in its key generation markets. If forward natural gas prices rise significantly from current prices, Exelon's earnings will likely exceed our forecasts.

Regulatory risk – All regulated utilities are subject to state and federal regulatory agencies that can materially affect shareholder returns. Failure to obtain fair recovery for capital expenditures or increases in operating costs can diminish returns to shareholders and adversely affect the share price.

Credit rating – Exelon's generation business is currently two notches above a high yield credit rating, but declining cash flows at the merchant business presents some risk of a possible credit rating downgrade barring deleveraging through an equity issuance, asset sale, or other means. If ExGen's credit rating is lowered to high yield status, ExGen would likely have to increase their collateral and it could pressure hedging activities going forward, which would reduce our earnings outlook

Appendix A-1

Analyst Certification

The research analyst(s) primarily responsible for the preparation and content of this research report are named in bold text in the author block at the front of the product except for those sections where an analyst's name appears in bold alongside content which is attributable to that analyst. Each of these analyst(s) certify, with respect to the section(s) of the report for which they are responsible, that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc and its affiliates. No part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendation(s) or view(s) expressed by that research analyst in this report.

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of Exelon Corp.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from Exelon Corp.

Citigroup Global Markets Inc. or an affiliate received compensation for products and services other than investment banking services from Exelon Corp in the past 12 months.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as investment banking client(s): Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: Exelon Corp.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to Exelon Corp. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities

transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 28th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating		
Data current as of 31 Dec 2015	Buy	Hold	Sell
Citi Research Global Fundamental Coverage	48%	40%	12%
% of companies in each rating category that are investment banking clients	64%	64%	59%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Prior to May 1, 2014 Citi Research may have also assigned a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the geographic and industry sector over a 3 month period. The relative call may have highlighted a specific near-term catalyst or event impacting the company or the market that was anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) may have indicated the most and least preferred stocks in the universe of stocks under consideration, explaining the basis for this short-term view. This three-month view may have been different from and did not affect a stock's fundamental equity rating, which reflected a longer-term total absolute return expectation.

NON-US RESEARCH ANALYST DISCLOSURES
Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below:

Citigroup Global Markets Inc	Praful Mehta; Sophie K Karp; Tulkin Niyazov; Jesse Chai

OTHER DISCLOSURES

The subject company's share price set out on the front page of this Product is quoted as at 03 February 2016 01:04 PM on the issuer's primary market.

Many European regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Citi Research generally disseminates its research to the Firm’s global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm’s proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author’s previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client’s individual preferences as to the frequency and manner of receiving communications from analysts, the client’s risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Rule 483, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Important Disclosures for Bell Potter Customers: Bell Potter is making this Product available to its clients pursuant to an agreement with Citigroup Global Markets Australia Pty Limited. Neither Citigroup Global Markets Australia Pty Limited nor any of its affiliates has made any determination as to the suitability of the information provided herein and clients should consult with their Bell Potter financial advisor before making any investment decision.

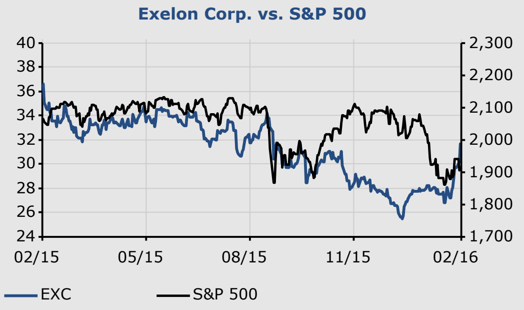
1 Year Price History



Source: FactSet

Valuation and Risks. Our valuation is based on a sum of the parts analysis. We use a P/E multiple on the utility and an EBITDA multiple for the genco business. Lower power prices / capacity prices and unfavorable outcomes in regulatory proceedings would cause our valuation to be lower. Higher interest rates would pull utility earnings up but pressure multiples so the net impact would likely be negative overall. A favorable outcome in the upcoming PJM capacity auctions and/or passage of legislation to bolster the revenue stream of the Illinois nuclear units would be accretive.

Cash Is King! EPS Outlook And Improving Balance Sheet At ExGen Make For A Compelling Investment

Rating Buy, Target $35/Share

EXC reported 4Q15 EPS of $0.38 and earned $2.49 for FY ‘15 year vs. consensus of $2.51 and EVRISI at $2.52. FY ’15 guidance had been $2.40-$2.60. The quarter was negatively impacted YoY by nuclear outages, weather, higher D&A, higher debt and equity costs due to the prefunding of the pending POM deal, offset by higher revenues at COMED and BG&E, lower expenses at BG&E and PECO, and a tax benefit at ExGen.

EPS guidance for ’16 is $2.40-$2.70, which is consistent with our expectations. EXC will raise the dividend 2.5% annually through ’18 beginning in Q2 ’16. Earnings guidance for the three utilities and ExGen takes in to account EPS and cash flow impacts from bonus depreciation on both sides of the house, ExGen’s hedge position and updated (slightly better) O&M cost reduction targets. Exelon’s forecast assumes POM doesn’t close whilst ours assumes it does (modestly dilutive in 2016). We are initiating a 2018 EPS estimate. Our ‘16-‘18 EPS forecast is $2.55, $2.65, $2.85. At the core utility businesses earnings guidance is lower by $.03/share at the mid-point in each of ’16-’18 taking in to account the impact of bonus deprecation after some offsetting cost improvement assumptions. At ExGen EPS is negatively impacted by $0.05-$0.07 across the forecast period due to bonus depreciation impacts but the cash flow impact is enormous, with $1.875bn of incremental cash flow over the three year period versus prior guidance. The gross margin outlook given power market conditions net of hedges is flat to up, and the cost profile is modestly better. Owing to the growing contribution of the utilities to the overall earnings profile and ExGen’s very strong balance sheet position (more on that below), EXC has committed to raise the dividend 2.5% a year through 2018 beginning in Q2 ’16.

The cash flow profile at ExGen could drive debt to EBITDA down to <2.5X by YE ’18. The strength of ExGen’s balance sheet is a meaningful differentiating factor in the value proposition. ExGen has +/-$9bn of debt but between ’16-18 expects to generate $3.2bn of cash after all capital expenditures, which if not reinvested in further rate base growth opportunities, contracted generation or returned to investors would drive the net debt balance to +/-$6bn, which against our estimate of $2.85bn of EBITDA in ’18 is a debt to EBITDA multiple of <2.5X. FFO debt metrics rise to >40%. Open gross margins at ExGen has improved by $50mm in each of ’17 and ’18, as expected generation volumes increased 1,200 GWh. ExGen is 91.5% / 62.5% / 29.5% hedged for 2016-2018, with effective realized hedge prices improving in NYISO and ERCOT, while decreasing in NI hub, PJM West and New England.

The risk / reward looks favorable at this stock price. Target remains $35. Looking at EXC’s current share price we think that its utility business —including the assumption that the close POM--are worth $25/share (they should contribute $1.60 of EPS in ’18, at a 15.5X P/E). That means ExGen is trading at $6 a share or roughly $5.5bn of equity value on ’18 pro-forma shares. If EXC is able to get its net debt down to +/-$6bn by YE ’18 then ExGen will have an enterprise value of $11.5bn against $2.85bn of EBITDA, a multiple of 4X, while generating free cash flow of between $800-$1bn, which equates to an unlevered cash yield of >11%. This valuation is on current low gas and power prices. We think the market is discounting the majority of EXC's generation fleet being uneconomic within 10-13 years, whilst their large duel fuel nuclear units will all likely operate until 2030-2040. Just a $0.50 increase in natural gas prices would increase EBITDA in FY '18 by +/- $350mm, and notwithstanding that these nuclear plants should have increasing economic value over time assuming the implementation of the Clean Power Plan. Using the above mentioned financial framework our $35 12 month target price assumes a 5.5X FY '18 EV/EBITDA multiple without any improvement in gas or power prices. With a 4% current yield our $35 target drives a 15% total return from current levels.

What's next? The D.C. PSC has indicated its intent to render a decision on the proposed Pepco merger before the 3/4/16 deadline. EXC continues working with stakeholders and legislators in Illinois on a plan that will support its distressed nuclear assets in that state, intent on delivering an agreeable package to the legislature in the next few months. The PJM '19/'20 BRA begins on 5/11/16 and results will be posted on 5/24/16. The MD PSC is expected to issue a final order on the pending BGE electric and gas distribution rate case by 6/3/16. Possible action by NY that might create zero emissions credits to subside nuclear generation like Ginna can be beneficial to margins out the curve, though by the company's admission the state would have to move relatively quickly for it to be meaningful beyond expiration of its RSSA.

ANALYST CERTIFICATION

The analysts, Greg Gordon and Phil Covello, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst’s compensation was, is, or will be directly related to the specific recommendations or views in this research report.

DISCLOSURES

This report is approved and/or distributed by Evercore Group LLC (“Evercore Group”), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority (“FINRA”), and International Strategy & Investment Group (UK) Limited (“ISI UK”), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI (“Evercore ISI”). Both Evercore Group and ISI UK are subsidiaries of Evercore Partners Inc. ("Evercore Partners"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Partners.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore Partners’ total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Buy, Hold or Sell) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI, and can be obtained by writing to Evercore Group LLC, Attn. Compliance, 666 Fifth Avenue, 11th Floor, New York, NY 10103.

Evercore Partners and its affiliates, and / or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore Partners and its affiliates may have, or have had, business relationships with the companies mentioned in this report..

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three ratings categories, with the following return guidelines:

Buy – the total forecasted return is expected to be greater than 10%
Hold – the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell – the total forecasted return is expected to be less than 0%
Coverage Suspended – the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended - Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulartory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

* Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended".

Historical Ratings Definitions

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy - Return > 20%
Buy - Return 10% to 20%
Neutral - Return 0% to 10%
Cautious - Return -10% to 0%
Sell - Return < -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight – the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight – the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight – the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended – the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior “Overweight,” “Equal-Weight” and “Underweight” ratings were viewed as “Buy,” “Hold” and “Sell,” respectively.

General Disclosures

This report is provided for informational purposes only. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by registered employees of Evercore ISI. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates. Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel.

Evercore ISI does not provide individually tailored investment advice in research reports. This report has been prepared without regard to the particular investments and circumstances of the recipient. The financial instruments discussed in this report may not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research. Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Electronic research is simultaneously available to all clients. This report is provided to Evercore ISI clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

For investors in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons"). This report must not be acted on or relied on by persons who are not relevant persons.

Sarah Akers, CFA, Senior Analyst (314) 875-2040

Sector Rating: Energy Team, NA

Quick thoughts from Wells Fargo Securities, LLC Energy & Utility Team:

Utilities

It's Like Déjà vu All Over Again (Kalton/Akers). Year-to-date, the S&P Utilities are up nearly 8% (total return) on an absolute basis and have outperformed the S&P 500 by a healthy 15%. For a sector that is generally thought of as providing investors with an annual total return of 8-10% this is all perfectly normal, no? Our electric utility group now trades at forward P/E multiples of 17.5X vs the S&P 500 at 15.5X. Further, our gas and water utility groups trade at 21X & 24X forward estimates and provide median yields of 2.8% and 2.5%, respectively (the yield on the S&P 500 is 2.3%). Remember when growth stocks traded at 20X+ earnings? That said, this is nothing new. We saw similar activity (and valuations) in the group in late 2014 into the early part of 2015 - until 2/6/15. That was the date the U.S. Labor Department issued a better-than-expected jobs report and the bottom fell out of the group (the S&P Utilities declined 4% that day). We don't profess to know the future, particularly when it comes to the global macroeconomic picture. Long-term interest rates could stay at low levels for an extended period and the P/E multiples of our group could, therefore, stay at historically high multiples for an equally long time. However, we do recommend that value-oriented longer-term investors proceed with caution. It is our strong sense that the money flowing into the sector is not driven by a sudden desire to be in the group because of the great industry fundamentals (and they are good, in our view!). Rather, we believe it is simply to hide out from the storm - this is not sticky money. If/when the macro-economic picture improves, as quickly as the group shot up, it could go right back down. So, where do we see value in the sector? It's admittedly harder to find, but we see value in names such as EXC and FE - companies with power market exposure where the sum-of-their-parts is arguably (in our view) worth more than the current valuation. Or, California utilities EIX, PCG & SRE whose valuations have been impacted by lingering issues that have adversely (and arguably overly, in our view) impacted investors' perceptions of the companies - over time, we think the narrative will change for the better in each of these names.

MDU Resource Group, Inc. (MDU/Market Perform) (Akers) - Yesterday (2/3) after the close, MDU initiated adjusted 2016 EPS guidance of $1.00-1.15, which excludes a projected $0.06-0.14 loss from the diesel refinery. The outlook compares with our $1.18 estimate ($1.16 ex-refinery) and consensus of $1.17. This represents the second year in a row where the base outlook (last year ex-E&P and this year ex-refinery) fell short of our expectations. Further, we note that '16 guidance is actually below the initial '15 outlook of $1.05-1.20, which was subsequently revised downward on a lower Services outlook (we expected a rebound based on backlog growth throughout '15), worsening refinery margins, and a few unusual items including weather. While the '16E mid-point represents a 5% increase over '15A ex-refinery EPS of $1.03, it is in line with '14A ex-refinery EPS of $1.08. We are disappointed in the lack of underlying growth. Separately, MDU lowered the long-term compound annual adjusted EPS growth goal to 5-8% from 7-10% - no surprise given the lower capex forecast provided in November.

For some quick valuation context, shares trade at 16.1X using the mid-point of adjusted '16E EPS guidance, a 7% discount to the '16E Regulated Electric Utility median of 17.4X. Keep in mind, however, that only 41% of MDU's EBITDA (now broken out by segment on a guidance basis) is derived from Utility operations. Another 48% is derived from more cyclical Construction operations and 10% is from Pipeline and Midstream. Year-to-date, shares have underperformed the S&P Utilities by 12%, likely reflecting falling construction multiples along with broader economic and energy (Bakken, diesel refinery, etc.) concerns. As such, the market may have been anticipating a challenged outlook, to some degree, though we expect additional weakness today.

MDU is hosting a conference call today at 10am ET.

MDU: Risks include commodity exposure, construction cyclicality, and project delays/cancellations.

Please see Disclosure Appendix for rating definitions, important disclosures, and required analyst certifications.
All estimates/forecasts are as of 02/04/16 unless otherwise stated.

Wells Fargo Securities, LLC does not compensate its research analysts based on specific investment banking transactions. Wells Fargo Securities, LLC's research analysts receive compensation that is based upon and impacted by the overall profitability and revenue of the firm, which includes, but is not limited to investment banking revenue.

STOCK RATING
1 = Outperform: The stock appears attractively valued, and we believe the stock's total return will exceed that of the market over the next 12 months. BUY
2 = Market Perform: The stock appears appropriately valued, and we believe the stock's total return will be in line with the market over the next 12 months. HOLD
3 = Underperform: The stock appears overvalued, and we believe the stock's total return will be below the market over the next 12 months. SELL

SECTOR RATING
O = Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.
M = Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.
U = Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

VOLATILITY RATING
V = A stock is defined as volatile if the stock price has fluctuated by +/-20% or greater in at least 8 of the past 24 months or if the analyst expects significant volatility. All IPO stocks are automatically rated volatile within the first 24 months of trading.

As of: February 4, 2016

Target price raised $1 to $36 on improved cash flow forecast

We will admit to having been in the "don't raise the dividend prematurely" camp ahead of yesterday's call. In the event, the announced plan for modest 2.5% annual increases was well received and reads like a commitment to the regulated growth strategy. Similarly, a new slide showing GenCo free cash (+$0.5B at $3.2B over '16-18) driving leverage down almost a turn (3.2x to 2.3x) serves to further lock in a disciplined "do no harm" financial strategy. With growing regulated earnings, strong GenCo cash flow and an improving balance sheet EXC remains our preferred hybrid and a relatively low-risk way to retain meaningful power and clean energy optionality. Reiterate Buy.

Strategy starting to resonate; staying the course will be key

Aside from a commodity rally, potential catalysts include closing the POM merger (DC PSC decision still targeted by March 4) and state initiatives to recognize value of challenged nuclear units (NY and IL). Assuming POM closes, an in-depth analyst meeting update is expected on a June time frame. Meanwhile we see EXC having embarked on a more prudent financial course, acknowledging existential questions around the less profitable nuclear sites while emphasizing a "fortress balance sheet" strategy to sustain longer-lived assets. This is a very welcome, albeit somewhat new, disciplined tack for EXC; staying on course will be mission-critical in terms of credibility. One nuance worth noting is that GenCo de-levering was shown pre-POM; with POM cash build will be lower.

2016 guidance based on standalone view, DB estimates reflect POM

EXC released 2016 guidance of $2.40-$2.70 versus our $2.45E and $2.52 consensus. Note that our estimate includes POM, and EXC's guidance would have been lower had POM been included as the transaction is expected to be dilutive initially. We are making modest changes to our outlook for EXC's updated GenCo disclosures and utility net income forecasts, raising 2016E and 2017E by a nickel each to $2.50 and $2.65, but maintaining $2.75 for 2018E.

Valuation and risks; increasing PT on higher EBITDA forecast at ExGen

Our Sum-of-the-Parts target includes ~$25 for the T&D utilities (15x blended P/E on 2018E, including POM) and ~$11 for Generation (6.5x GenCo EBITDA). Downside risks are lower power and gas prices; degradation of earned utility ROEs; higher interest rates; higher-than-expected operating expenses; weaker retail margins; and a weaker-than-expected contribution from POM.

Company Profile

Exelon is a diversified utility with ownership of the largest nuclear fleet and retail services business in the U.S. and three regulated utilities serving Chicago, Philadelphia and Baltimore. EXC owns ~35,000MW of merchant generation capacity located primarily in the Midwest and Mid-Atlantic, with smaller gas-fired and nuclear assets in New England, New York, and Texas.

Modest dividend increases to begin in June

EXC management formally announced plans to begin raising the dividend 2.5% per year starting with the June 2016 payment. As a result, EXC's year-end rate would be $1.27/sh in 2016, $1.30 in 2017, and $1.34 in 2018. This implies a projected earnings payout ratio of 50% on consolidated EPS in 2016 but over a 100% payout of Utility and Corp/Other EPS on a standalone basis (no POM). With 7-9% earnings growth expected at EXC's legacy utilities, coverage by the utilities will improve through 2018 (with or without POM). A potential increase has been discussed as a possibility for the past few months and so the modest raise announced today was not a total surprise.

Game time for POM?

Increased regulated exposure still likely trumps other considerations

While some have been skeptical, management reiterated plans to walk away from the Pepco Holdings (POM) transaction as of March 4, if the DC Public Service Commission has not approved the deal by that time. Management reaffirmed plans to promptly initiate repurchase of the financing (equity and debt) issued to fund POM should the deal fail to close. As a reminder, EXC has received approval to purchase POM from all necessary regulatory jurisdictions except the DC Public Service Commission (PSC). DC rejected the deal back in August but has agreed to reconsider after EXC reached a settlement with the Mayor's office and other key constituents in the fall. It's been almost two years since the POM deal was announced, and we continue to have somewhat mixed feelings about the transaction, particularly after management revised EPS accretion forecasts on the last earnings call. On the one hand, POM increases EXC's regulated business mix at a time when many investors continue to question the long-term viability of merchant generation given the current natural gas and power price environment. And others have recently paid substantially higher prices to increase their regulated footprints or shore up organic growth rate shortfalls. On the other hand, POM has a long history of under-earning their allowed returns, a situation that has been aggravated by the merger approval process itself as POM has had to delay filing for much-needed rate relief. Overall though, at this point we believe EXC would be better off with POM than without – at least in terms of execution credibility.

Action still possible in NY and IL to support nuclear

While EXC's large merchant nuclear fleet has been challenged for some time by weak power prices and the company has threatened to close down a number of plants (although has yet to take any formal steps toward decommissioning), they arguably remain very well positioned to benefit from the implementation of EPA's Clean Power Plan (CPP). Compliance is not required to begin until 2020 and the rule could be struck down in courts but we do not believe the stock is reflecting much, if any, benefit for this long-term optionality. In addition, we continue to believe states like IL and NY could take action this year to prevent in-state nuclear generators from shutting down and thereby rendering CPP compliance more challenging. The IL legislature could reconsider legislation that would establish a Low Carbon Portfolio Standard this legislative session. In addition, the NY Public Service Commission is expected to vote on a Clean Energy Standard by early summer. Both would likely result in incremental revenues by next year for EXC's nuclear plants.

Raising estimates modestly

DB estimates reflect POM starting in Q2-16

We are raising our EPS estimates in 2016 and 2017 by a nickel each to $2.50 and $2.65, reflecting modestly higher earnings at the Utility and Generation segments. Our 2018 EPS forecast of $2.75 remains unchanged as a modest increase at Generation offsets a modest decrease at the Utility segment. As a reminder, our estimates continue to assume EXC is able to close on the proposed Pepco Holdings transaction at the start of Q2. Note that EXC's 2016 EPS guidance of $2.40-$2.70 excludes POM and assumes the relevant equity and debt financings are unwound. Also note that our estimates assume EXC uses free cash flow at Generation to pay off close to $2B of ExGen debt through 2018 ($1.2B of commercial paper and $700M of LT debt). We assume the rest of EXC's targeted $3.2B of free cash flow at ExGen (about $1B) will be sent to the parent to invest in the utilities/pay the dividend.

Valuation – SOTP PT raised $1 to $36

We value the utility segment by applying our baseline 15.0x P/E multiple to our 2018 estimates for ComEd and PECO, and a discounted 14.5x multiple for BG&E. We value 2018 POM earnings at a premium as we anticipate faster growth at this segment as EXC closes the gap between authorized and earned returns in 2018 and beyond.

Meanwhile, we value ExGen by applying a 6.5x EV/EBITDA multiple to our 2018 estimate. Our 6.5x multiple is a modest discount to our targeted 7x merchant EV/EBITDA multiple, as we believe a modest discount is merited given ExGen's still more limited free cash flow generation than IPP peers. On the flipside, EXC's nuclear fleet merits some incremental value vs. IPPs given the potential for new revenue streams from clean energy standards or a carbon trading scheme. EXC also has a stronger credit and leverage profile at ExGen than pure-play IPP peers.

Similar to our valuation methodologies for FirstEnergy and Entergy, we take a hybrid approach for the corporate / other segment. We derive a $33 price target when valuing the corporate segment EBITDA at a 6.5x EBITDA multiple and then subtracting corporate debt as a direct offset to equity value (effectively treating parent debt as being on the merchant business). In our other scenario we see a $38 price target valuing EXC's corporate earnings drag of $0.18/sh using our regulated distribution P/E multiple of 15.0x (treats parent debt as being on the utilities). Our $36 price target reflects a 50/50 weighting of these two book-end valuation approaches.

Figure 1: EXC SOTP Analysis

Valuation A

Business Segment	Valuation Metric	2018E	Multiple	Value
ComEd	P/E	$0.57	15.0x	8,237
PECO	P/E	$0.47	15.0x	6,749

Diluted Average Shares Outstanding (2018E)				967
Price Target ($/sh)				**38**

Source: Deutsche Bank

Risks

Downside risks include lower-than-expected forward power prices, worse-than-anticipated rate case outcomes, lower retail margins given heightened competition, higher interest rates, and greater-than-anticipated near-term dilution associated with the POM deal.

Equity rating key

Buy: Based on a current 12- month view of total share-holder return (TSR = percentage change in share price from current price to projected target price plus pro-jected dividend yield) , we recommend that investors buy the stock.
Sell: Based on a current 12-month view of total share-holder return, we recommend that investors sell the stock
Hold: We take a neutral view on the stock 12-months out and, based on this time horizon, do not recommend either a Buy or Sell.
Notes:

1. Newly issued research recommendations and target prices always supersede previously published research.
2. Ratings definitions prior to 27 January, 2007 were:

> Buy: Expected total return (including dividends) of 10% or more over a 12-month period
> Hold: Expected total return (including dividends) between -10% and 10% over a 12-month period
> Sell: Expected total return (including dividends) of -10% or worse over a 12-month period

Aside from within this report, important conflict disclosures can also be found at https://gm.db.com/equities under the "Disclosures Lookup" and "Legal" tabs. Investors are strongly encouraged to review this information before investing.

2.Short-Term Trade Ideas

Deutsche Bank equity research analysts sometimes have shorter-term trade ideas (known as SOLAR ideas) that are consistent or inconsistent with Deutsche Bank's existing longer term ratings. These trade ideas can be found at the SOLAR link at http://gm.db.com.

Additional Information

The information and opinions in this report were prepared by Deutsche Bank AG or one of its affiliates (collectively "Deutsche Bank"). Though the information herein is believed to be reliable and has been obtained from public sources believed to be reliable, Deutsche Bank makes no representation as to its accuracy or completeness.

If you use the services of Deutsche Bank in connection with a purchase or sale of a security that is discussed in this report, or is included or discussed in another communication (oral or written) from a Deutsche Bank analyst, Deutsche Bank may act as principal for its own account or as agent for another person.

Deutsche Bank may consider this report in deciding to trade as principal. It may also engage in transactions, for its own account or with customers, in a manner inconsistent with the views taken in this research report. Others within Deutsche Bank, including strategists, sales staff and other analysts, may take views that are inconsistent with those taken in this research report. Deutsche Bank issues a variety of research products, including fundamental analysis, equity-linked analysis, quantitative analysis and trade ideas. Recommendations contained in one type of communication may differ from recommendations contained in others, whether as a result of differing time horizons, methodologies or otherwise. Deutsche Bank and/or its affiliates may also be holding debt securities of the issuers it writes on.

Analysts are paid in part based on the profitability of Deutsche Bank AG and its affiliates, which includes investment banking revenues.

Opinions, estimates and projections constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Deutsche Bank and are subject to change without notice. Deutsche Bank has no obligation to update, modify or amend this report or to otherwise notify a recipient thereof if any opinion, forecast or estimate contained herein changes or subsequently becomes inaccurate. This report is provided for informational purposes only. It is not an offer or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Target prices are inherently imprecise and a product of the analyst’s judgment. The financial instruments discussed in this report may not be suitable for all investors and investors must make their own informed investment decisions. Prices and availability of financial instruments are subject to change without notice and investment transactions can lead to losses as a result of price fluctuations and other factors. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the investment. Past performance is not necessarily indicative of future results. Unless otherwise indicated, prices are current as of the end of the previous trading session, and are sourced from local exchanges via Reuters, Bloomberg and other vendors. Data is sourced from Deutsche Bank, subject companies, and in some cases, other parties.

Macroeconomic fluctuations often account for most of the risks associated with exposures to instruments that promise to pay fixed or variable interest rates. For an investor who is long fixed rate instruments (thus receiving these cash flows), increases in interest rates naturally lift the discount factors applied to the expected cash flows and thus cause a loss. The longer the maturity of a certain cash flow and the higher the move in the discount factor, the higher will be the loss. Upside surprises in inflation, fiscal funding needs, and FX depreciation rates are among the most common adverse macroeconomic shocks to receivers. But counterparty exposure, issuer creditworthiness, client segmentation, regulation (including changes in assets holding limits for different types of investors), changes in tax policies, currency convertibility (which may constrain currency conversion, repatriation of profits and/or the liquidation of positions), and settlement issues related to local clearing houses are also important risk factors to be considered. The sensitivity of fixed income instruments to macroeconomic shocks may be mitigated by indexing the contracted cash flows to inflation, to FX depreciation, or to specified interest rates – these are common in emerging markets. It is important to note that the index fixings may -- by construction -- lag or mis-measure the actual move in the underlying variables they are intended to track. The choice of the proper fixing (or metric) is particularly important in swaps markets, where floating coupon rates (i.e., coupons indexed to a typically short-dated interest rate reference index) are exchanged for fixed coupons. It is also important to acknowledge that funding in a currency that differs from the currency in which coupons are denominated carries FX risk. Naturally, options on swaps (swaptions) also bear the risks typical to options in addition to the risks related to rates movements.

Derivative transactions involve numerous risks including, among others, market, counterparty default and illiquidity risk. The appropriateness or otherwise of these products for use by investors is dependent on the investors' own circumstances including their tax position, their regulatory environment and the nature of their other assets and liabilities, and as such, investors should take expert legal and financial advice before entering into any transaction similar to or inspired by the contents of this publication. The risk of loss in futures trading and options, foreign or domestic, can be substantial. As a result of the high degree of leverage obtainable in futures and options trading, losses may be incurred that are greater than the amount of funds initially deposited. Trading in options involves risk and is not suitable for all investors. Prior to buying or selling an option investors must review the "Characteristics and Risks of Standardized Options", at http://www.optionsclearing.com/about/publications/character-risks.jsp. If you are unable to access the website please contact your Deutsche Bank representative for a copy of this important document.

Participants in foreign exchange transactions may incur risks arising from several factors, including the following: (i) exchange rates can be volatile and are subject to large fluctuations; (ii) the value of currencies may be affected by numerous market factors, including world and national economic, political and regulatory events, events in equity and debt markets and changes in interest rates; and (iii) currencies may be subject to devaluation or government imposed exchange controls which could affect the value of the currency. Investors in securities such as ADRs, whose values are affected by the currency of an underlying security, effectively assume currency risk.

Unless governing law provides otherwise, all transactions should be executed through the Deutsche Bank entity in the investor's home jurisdiction.

United States: Approved and/or distributed by Deutsche Bank Securities Incorporated, a member of FINRA, NFA and SIPC. Analysts employed by non-US affiliates may not be associated persons of Deutsche Bank Securities Incorporated and therefore not subject to FINRA regulations concerning communications with subject companies, public appearances and securities held by analysts.

Germany: Approved and/or distributed by Deutsche Bank AG, a joint stock corporation with limited liability incorporated in the Federal Republic of Germany with its principal office in Frankfurt am Main. Deutsche Bank AG is authorized under German Banking Law (competent authority: European Central Bank) and is subject to supervision by the European Central Bank and by BaFin, Germany's Federal Financial Supervisory Authority.

United Kingdom: Approved and/or distributed by Deutsche Bank AG acting through its London Branch at Winchester House, 1 Great Winchester Street, London EC2N 2DB. What's Incremental To Our View

Our analysis suggests that EXC's merchant generation portfolio is currently being valued at a 30% discount to the publicly traded merchant power stocks. Based on latest peer valuations, we have raised our price target to $35 from $33.

IMPORTANT POINTS

- EXC reported 4Q results of $0.38 vs $0.48, modestly above our estimate of $0.37 but in line with consensus of $0.38. Relative to our assumptions, higher Regulated Utility earnings were largely offset by lower Generation earnings.

- Based on the latest forward commodity curves, updated hedge disclosures, and cost reduction targets, we have trimmed our 2016 estimate to $2.46 from $2.48. Our 2017 estimate remains $2.54. Our preliminary 2018 estimate is $2.67. Our estimates assume the company achieves 90%-95% of its Power and Non Power new business targets. If the company is successful in hitting 100% of its targets, there could be $0.08-$0.10 annual upside to our 2017-18 estimates.

- We remain confident that the Washington DC PSC will approve the acquisition of Pepco (POM - $26.64; Neutral), and our estimates assume that the acquisition is completed in 1Q 2016. We note that EXC has set a March 4th deadline for the completion of this acquisition. There are two regularly scheduled meetings (February 24th and March 2nd) for the Washington DC PSC prior to that date. In addition, the PSC can hold a special meeting at any time with a 48 hour notice.

- Our analysis suggests that at EXC's current stock price, its merchant generation portfolio is being valued at an implied EV / EBITDA multiple of 5.5x (based on our 2017 estimate), which is a 30% discount to the publicly traded merchant power stocks. If this discount persists, we believe there is an opportunity for management to unlock significant equity value through monetization options for this portfolio. As an illustration, if this portfolio were to be valued in line with the public peers, we calculate an incremental $7/ share equity value for EXC.

- EXC is currently trading at a 9% P/E multiple discount to the peer group (based on our 2017 estimate). Assuming a P/E multiple of 13.6x our 2017

Ali Agha

Roger Song
212-319-3918
roger.song@suntrust.com

estimate of $2.54 (in line with the peer group), we have raised our price target to $35 from $33. Even our higher price target implies a 17% discount for the merchant portfolio. We reiterate our **Buy** recommendation.

- We have included our revised 2016-17 earnings and cash flow models in this report.

Ali Agha 212-319-3920 ali.agha@suntrust.com

Note

1) Our PECO Implied Margin ratios factor in the impact of Gas sales.

2) Rate Base - Com Ed: $8.7bn in 2013, $9.5bn in 2014, $10.8bn in 2015, $11.8bn in 2016, $12.8bn in 2017; PECO: $5.4bn in 2013, $5.7bn in 2014, $6.0bn in 2015, $6.5bn in 2016, $6.9bn in 2017; BGE: $4.6bn in 2013, $4.9bn in 2014, $5.0bn in 2015, $5.3bn in 2016, $5.9bn in 2017; PEPCO: $8.8bn in 2016 and $9.7bn in 2017.

3) Earned ROE - Com Ed: 9.7% in 2013, 8.5% in 2014, 8.0% in 2015, 8.3% in 2016, 8.2% in 2017; PECO: 13.7% in 2013, 11.3% in 2014, 11.7% in 2015, 11.5% in 2016, 11.3% in 2017; BGE: 8.5% in 2013, 7.8% in 2014, 10.7% in 2015, 10.2% in 2016, 10.5% in 2017; PEPCO: 5.5% in 2016 and 5.5% in 2017.

4) We assume the Illinois legislature's changes to Com Ed formula rates represent $0.02 of earnings in 2013 and $0.04 of annual earnings from 2014 onwards.

5) We assume EXC achieves 95% of its growth targets for Power and Non Power new business for 2016 and 90% from 2017 onwards.

6) We assume that the DOE nuclear disposal fee is removed from May 2014; represents $0.06 of earnings in 2014 and $0.11 annually thereafter.

7) We have included the impact of the $1.15bn Equity Units (2.5% interest rate) from mid 2014 and assume conversion to equity (33m shares) on 6/1/17.

8) We have factored in the impact of the $6.8bn PEPCO acquisition from Q2 2016 (including the settlement of the 57.5m share forward equity sale on 7/14/15).

Company Description

Exelon, a utility services holding company, operates through its principal subsidiaries: Generation, ComEd, PECO, and BGE. Generation's business consists of its owned and contracted electric generating facilities, its wholesale energy marketing operations and its competitive retail supply operations. ComEd's energy delivery business consists of the purchase and regulated retail sale of electricity and the provision of distribution and transmission services to retail customers in northern Illinois, including the City of Chicago. PECO's energy delivery business consists of the purchase and regulated retail sale of electricity and the provision of transmission and distribution services to retail customers in southeastern Pennsylvania, including the City of Philadelphia, as well as the purchase and regulated retail sale of natural gas and the provision of distribution services to retail customers in the Pennsylvania counties surrounding the City of Philadelphia. BGE is a regulated electric transmission and distribution utility company and a regulated gas distribution utility company with a service territory that covers the City of Baltimore and all or part of 10 counties in central Maryland.

Investment Thesis

Incremental earnings from the PJM Capacity auctions, earnings accretion and strategic benefits of the POM acquisition (coupled with the ability to offset any dilution if POM deal falls apart), and a discounted stock valuation imply attractive total return prospects.

Valuation and Risks

VALUATION

Based on a P/E multiple of 13.6x our 2017 estimate of $2.54 (in line with the peer group), we derive our price target of $35.

RISKS

- Outlook for forward power prices.
- Timing of upcoming EPA regulations.
- Regulatory approval of the POM acquisition and use of excess capital if the deal falls apart.

Companies Mentioned in This Note

Pepco (POM, $26.64, Neutral)

Investment Thesis 06 Oct 2015

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and made a $12 billion bid for Pepco in April 2014, both including debt. Management's political negotiations appear to have revived the deal in Washington, D.C., where regulators had rejected it in August 2015. We now expect it has a 75% chance of closing. Exelon has received all other regulatory approvals.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our outlook for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can grow earnings 10% annually the next three years.

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers at Commonwealth Edison (Illinois), PECO (Pennsylvania), and Baltimore Gas & Electric (Maryland). Exelon also owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. Exelon also is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

Morningstar Analysis

Exelon Surprises With 2.5% Dividend Growth Target 03 Feb 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

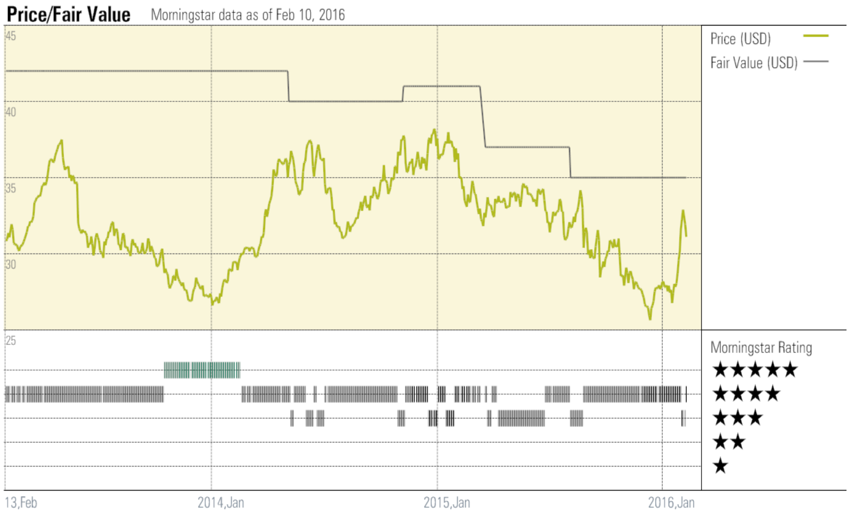
Valuation, Growth and Profitability 06 Oct 2015

We are reaffirming our $35 per share fair value estimate after raising our probability of the Pepco acquisition closing to 75% from 25% as a result of an agreement the companies reportedly reached with the Washington, D.C., mayor's office on Oct. 6. Although we think the deal is value-dilutive, it is too small to have a material impact on our fair value estimate. Exelon's $27.25-per-share cash offer represents a 30% premium to our $21 per share standalone fair value estimate for Pepco.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities (Ill.), Oyster Creek (N.J.), and Three Mile Island (Pa.)--as well as the Clinton (Ill.) plant. We now assume a 50% probability that the Byron (Ill.) plant will retire given it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is 50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Our midcycle earnings forecast at Exelon Generation is based on a $4/mcf midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At



the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

We assume a 9% cost of equity and a 7.1% cost of capital. Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Scenario Analysis

We assign a medium uncertainty rating. Exelon's higher-than-average degree of operating leverage and exposure to volatile power markets leads to a wider range of outcomes in our base, high, and low scenarios. A $5 per megawatt-hour average move in our midcycle power price assumptions with no change in retail margins results in a 15% change in our open midcycle EPS estimate and an $800 million change in EBITDA. Our fair value estimate would change by $6 per share. On a mark-to-market basis as of early August, our fair value estimate would be $31 per share and our midcycle EPS would be $3.00.

If we reduce our assumption for the operating efficiency and utilization of Exelon's nuclear power plants by 2 percentage points to near the industry average, it would change our fair value estimate by $3 per share. If Exelon does not retire the Clinton, Quad Cities, and Byron plants, it would add $3 per share to our fair value estimate.

At the retail segment, every 100 basis points of long-term normalized margin expansion generates $100 million of pretax margin and $1 per share of value.

A 50-basis-point change in our cost of equity changes our fair value estimate by $4 per share.

Economic Moat

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat characteristics, with returns on capital above costs of capital for the foreseeable future. However, that spread between long-term returns on capital and Exelon's cost of capital have shrunk based on our midcycle outlook for power prices in the eastern U.S. Exelon's increasing diversification into narrow- and no-moat businesses together with the shrinking returns at its nuclear generation business supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources like coal and natural gas reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must continue to have access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Moat Trend

We assign Exelon a stable moat trend. The regulatory environments in Illinois, Pennsylvania, and Maryland have stabilized, allowing its distribution utilities to earn more favorable returns. In the power markets, Exelon faces both positive and negative trend developments. We expect returns on capital will continue to face pressure from cheap gas moving west and increasing renewable energy penetration. However, environmental regulations, coal plant closures, and capacity market changes should help returns on capital. On balance, we think these positive and negative dynamics offset each other.

Since the retail supply business is relatively new following power market deregulation in the early 2000s, we're watching to see if any company can build a sustainable competitive advantage. Exelon and others are proving there are some scale and cost advantages, particularly in marketing, customer aggregation, risk mitigation, and supply costs.

The one path we see to achieve excess returns in the supply business is to match customer load with wholesale generation. As liquidity has dried up in power markets, it is increasingly difficult and costly to hedge future expected generation. A retail supply business can improve hedging opportunities by reducing collateral and trading costs. This could give a retail supplier a low-cost advantage. As the nation's largest wholesale power generator and retail supplier, Exelon is well positioned to take advantage of these wholesale-retail pairing benefits.

Bulls Say/Bears Say

Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs and generate large profits even with currently depressed power prices.

- Higher natural gas and coal prices, rising electricity demand and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.

- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.

- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow moat distribution earnings.

- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

Financial Health

Exelon's biggest challenge is warding off cash constraints in unfavorable power markets. The 2007-08 commodity boom led management to raise the dividend and buy back stock. But as power markets have fallen from their 2008 peaks, the company has focused on preserving its investment-grade credit rating. In 2011, the board spent $2.1 billion to reduce its pension liabilities instead of reinstating a $1.5 billion share-repurchase plan approved in September 2008 but never executed. In February 2013, the board cut the dividend 41% to $1.24 per share annualized, freeing up $740 million in annual cash flow. We expect the dividend to stay at this level for at least the next two years.

The Pepco acquisition would increase consolidated leverage, but most of that additional leverage will be debt at the regulated utilities. We don't expect a material change in parentco or Exelon Generation leverage.

We think Exelon will have sufficient cash coverage to keep its investment-grade credit rating and current dividend at least through 2016 based on current market conditions. Even through these lean years, we expect Exelon can generate at least $2 billion of cash flow after incorporating new financing and excluding discretionary growth investments. We project Exelon's consolidated EBITDA/interest coverage will drop from 9 times in 2011 to 6 times by 2015 and leverage to rise to 3.4 times debt/EBITDA in 2015 from 2 times in 2011.

More than half of Exelon's consolidated debt is secured at the regulated utilities. This is in line with the utilities' regulator-approved capital structure, and we don't expect a material change. Apart from the utilities, Exelon has an average $485 million of annual debt maturities at Exelon Generation through 2017. As long as power markets remain relatively stable and Exelon can maintain its investment-grade ratings, we don't expect it to have trouble refinancing those maturities.

Exelon's pension and nuclear decommissioning funds are well-funded now, but if interest rates stay low, Exelon could have to contribute more cash.

Enterprise Risk

Investors should pay the most attention to political developments that would re-regulate competitive electricity markets in the Midwest and Mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source. As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket.Reregulation also would destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.As Exelon's regulated utilities generate a greater share of earnings, investors will be subject more acutely to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management 06 Oct 2015

We give Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities.

President and CEO Chris Crane and Executive Chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and Chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition in 2015. This will increase Exelon's share of regulated utilities earnings and dilute shareholders' exposure to wholesale power markets. Management has shown strong conviction in the value of the deal based on their efforts to gain support for the deal from all parties, particularly in Washington, D.C.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants absent significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creation opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon

formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8 million shares or vested options as of January 2015.

Analyst Notes

Supreme Court Sides With Demand Response; No Fair Value Impacts 25 Jan 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Independent power producers and diversified utilities are trading at a significant discount to our fair value estimates, and the Supreme Court's ruling has no material impact on our long-term thesis. We believe the market reaction was overly pessimistic to the ruling and presents a buying opportunity for those with the appropriate risk appetite. We highlight Dynegy and Exelon as those with the most exposure to PJM. Calpine, FirstEnergy, NRG Energy, and Public Service Enterprise Group also have material levels of generation in PJM.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal 11 Nov 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Industry Group
31.12 USD	35.00 USD	24.50 USD	47.25 USD	Medium	Narrow	Stable	Standard	Utilities - Regulated

Analyst Notes

2017-18 reduction was based on Pepco's reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals 30 Oct 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year 26 Oct 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C.

Exelon Corp EXC (NYSE) | ★★★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Industry Group
31.12 USD	35.00 USD	24.50 USD	47.25 USD	Medium	Narrow	Stable	Standard	Utilities - Regulated

Analyst Notes

commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco 06 Oct 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners 30 Sep 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Postpones Nuclear Plant Retirement Decision; No Fair Value Impact 10 Sep 2015

We are reaffirming our $35 per share fair value estimate for Exelon after management announced it will delay a decision whether to close at least three of its struggling nuclear plants. We recently incorporated into our fair value estimate and financial projections the assumption that it was more likely than not that Exelon would close those three plants in 2018. We also assume a 50% likelihood that Exelon will close its Byron (Illinois) nuclear plant in 2019.

Results of the recent 2016-18 PJM transitional capacity auctions and management's decision to delay potential retirements do not change our assumptions that those plants ultimately will close, absent significant energy market or public policy changes. The Quad Cities (Illinois), Three Mile Island (Pennsylvania), and Oyster Creek (New Jersey) plants are obligated to run at least through mid-2018, and the Byron plant is obligated to run through mid-2019 based on results from PJM's recent capacity auctions.

The key development for Exelon in last week's 2017-18 transitional capacity auction was that the Quad Cities and Byron plants cleared and are now obligated to run. Neither cleared PJM's 2017-18 base capacity auction last year at $120/megawatt-day but did clear last week's capacity performance transitional auction at $151.50/MW-day. Including those plants and the uplift for the rest of the fleet adds about $400 million of EBITDA in 2017-18.

The Clinton (Illinois) plant is the fourth that we assume will close by 2018. It is not part of PJM. It is obligated to run at least through 2016 as part of the Mid-Continent ISO. Exelon continues to lobby Illinois politicians to adopt a subsidy-like scheme that would improve the economics for its six Illinois nuclear plants. We do not include any benefits from policy changes in our fair value estimate.

D.C. Commission Rejects Pepco-Exelon Merger; Lowering Pepco Fair Value Estimate 26 Aug 2015

We are lowering our fair value estimate of Pepco Holdings Inc. to $23 per share from $27 per share, following the decision by the Public Service Commission of the District of Columbia to deny the merger with Exelon Corp, which caused Pepco shares to close down 16.5% on Tuesday. At the time of the merger in April 2014, we had believed the transaction would be value-dilutive for Exelon, and we are reviewing our $35 per share fair value estimate. We note that Exelon shares were down almost 7% on Tuesday, on which day the overall market and utilities were also weak. Our narrow moat and stable moat trend are unchanged for both companies.

Exelon and Pepco issued a joint press release indicating that they were reviewing their options and will respond once the process is complete. A summary of the decision indicated that the D.C. commission did not believe the merger would provide sufficient benefits to customers or guarantees for improvements in reliability. The commission was also concerned that under the new management structure Pepco would become "a second-tier company in a much larger corporation whose primary interest is not in distribution, but in generation." The full decision is due Wednesday, and the companies have 30 days to appeal the decision.

We were surprised by the decision, as we had believed the most difficult regulatory hurdle would be in Maryland. Pepco and Exelon agreed to stringent conditions and additional customer benefits imposed by the Maryland Public Service Commission on May 18. We thought the commission in D. C., the last jurisdiction needed to approve the deal, would agree to similar conditions. They did not.

Our new fair value estimate assumes that there is now only a 25% chance of the transaction being restructured to satisfy the D.C. regulators. If the deal is abandoned, our standalone fair value estimate for Pepco is $21 per share.

PJM Auction Results In Line With Our Forecast in First Auction With Capacity Performance Inclusion 24 Aug 2015

Capacity prices across most of the 13-state PJM Interconnection region cleared at $165/MW-day for capacity performance, or CP, and $150/MW-day for base generation for 2018-19. This is comparable to $120/MW-day for last year's 2017-18 results, in which there was no separate CP auction. The results are in line with our auction expectations, in which we previously expected CP to clear at $150/MW-day and base capacity at $140/MW-day for the 2018-19 auction. We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities we cover, as we are maintaining our midcycle capacity assumptions.

Capacity revenue provides significant pretax earnings for our independent power producers and diversified utilities for any one auction year. Dynegy in our opinion is the largest winner from strong base capacity results, as half of its generation is now in PJM. For every $100/MW-day change in capacity prices, we estimate that Dynegy benefits $385 million in pretax earnings. Exelon's fleet also benefited from a strong clearing in the Commonwealth Edison, or COMED, locational deliverability area, or LDA, with CP clearing at $215/MW-day and $200/MW-day for base generation capacity. However, we do not believe that Exelon's Illinois Quad Cities and Byron nuclear units cleared the auction at these prices. B ased on recent management commentary, w e continue to expect Exelon to close these two plants by the end of 2016, with a final decision expected in September. Public Service Enterprise Group, or PSEG, also benefits from strong base results for the second year in a row, with base capacity clearing in the Eastern Mid-Atlantic Area Council, or EMAAC, LDA clearing at $210/MW-day for base generation and $225/MW-day for CP. The premium clearing price in the PSEG region shows the competitive advantage of PSEG's fleet and supports our positive moat trend. Higher capacity prices also benefit Calpine, FirstEnergy, and NRG Energy.

After delaying the base residual auction 3 months to gain FERC approval of the new CP product, PJM posted the results of the 2018-19 auction Friday afternoon. CP in the RTO region cleared slightly above expectations at $164.77/MW-day, above the market’s tempered expectations of ~$155/MW-day before the auction. The big upside surprise to the market was the base capacity resource constraint, clearing only ~$15 below CP in every region except PPL. While base capacity only represents 20% of total generation clearing, market participants had expected ~$80-$100 base discount to CP in all regions. Breakout regions that reached transmission limits and had to bid on costlier internal generation include EMAAC and COMED, which cleared $225 and $215, respectively. The COMED breakout is likely

Analyst Notes

due to the increased generation needed after PJM abolished the short-term resource procurement target (629 MW in 2017-18). We also believe that Byron and Quad Cities continue to submit uncompetitive offers and did not clear. In all, 166,836 unforced megawatts were procured in the auction, with 133,468 MW exposed to the new CP penalties. Almost 3,000 MW of new generation cleared the auction, the vast majority of which came from gas combined-cycle and combustion turbine plants. As previously detailed, the increases in pricing were driven by increased penalties imposed in a CP world, but were tempered by penalties already priced into the existing regime (shortage pricing).

We recently highlighted the distinct possibility that base capacity would clear only at a small discount to CP. Our forecast called for only a $10 discount between the CP and base clears for two reasons: the marginal cost of capacity for the types of units offering into the base auction could actually be higher due to lower expected total energy revenues (low capacity factors) and because the base auction also has penalty risk (just with tighter stop-losses and June-September compliance). We caution our readers not to infer that the $15 spread between CP and base was the “CP Premium”. The more appropriate measure, although not perfect, would be to compare the 2017-18 auction with the 2018-19 CP auction, which increased from $120 in the RTO to $164, a $44 premium.

Given the uncertainty surrounding DR with respect to Supreme Court hearing EPSA vs. FERC and shorter lead times imposed on DR by PJM, we expected DR clearing the auction to trend downward. This was not the case. 11,084 MW of DR cleared the 2018-19 auction, an increase of 110 MW. We expected DR to drop off substantially and PJM to clear new combined cycle generation as replacement. The DR resilience was the reason only 2,919 MW of new generation cleared, versus 5,927 last year, as DR will always have a lower cost of capacity than new generation. We suspect that DR views the Supreme Court review as a free option and will continue to offer until resolved.

We presented a detailed analysis of the PJM power markets in our Utilities Observer, "Mid-Atlantic Market Outlook: May the Power Be With You," published in May. Additionally, we analyzed the impacts of capacity performance on upcoming capacity auctions in "PJM Capacity Performance: Don't Get Too Excited."

Upcoming PJM Capacity Auction Could Prove Disappointing 17 Aug 2015

We are reaffirming our fair value estimates and our moat and moat trend ratings for our independent power producers and diversified utilities ahead of the upcoming 2018/19 Planning Year auction for Capacity Performance, or CP. The capacity auction is currently under way, with results posted Aug. 21.

In June, the Federal Energy Regulatory Commission approved the proposal from PJM Interconnection to implement CP in its 2018/19 base residual auction, which PJM began on Aug. 10. CP increases the marginal capacity cost for marginal generators, but the bullish impact should be less than the market expects. We maintain our previous estimate that the combination of CP, reduced impact from demand response, and increased confidence of marginal generators to raise prices will cause CP to clear at $150 per megawatt-day and base capacity at $140/MW-day for the 2018-19 auction.

We believe that previous auctions already priced in existing non-CP performance penalties, such as those a generator must pay if it cannot deliver energy during reserve shortages. CP is a further-reaching, stricter penalty structure for nonperformance outside of reserve shortages. Although generators participating in CP will not be constrained by their avoidable cost rates this year, which will allow generation to offer up to net cost of new entry times the balancing ratio, we suspect that few generators will raise offer prices for this reason alone. We also highlight the possible expected increase in dark spreads over the 2018–19 time frame due to the large increase in LNG exports over this time period; this could add downside pressure to capacity offers from coal generation in PJM.

Capacity revenue provides significant pretax earnings for our independent power producers and diversified utilities for any one auction year; however, we are unlikely to change our midcycle capacity assumptions. Dynegy should be either the biggest beneficiary or the biggest loser, given that half of its generation is now in PJM. If capacity prices rise $100/MW-day, we estimate that Dynegy could realize $385 million in additional pretax earnings. We estimate that a similar increase would boost pretax earnings $500 million for Exelon, the largest generator in PJM, and $165 million for Calpine, which has 20% of its fleet in PJM. Higher capacity prices also benefit Public Service Enterprise Group, FirstEnergy, and NRG Energy.

We presented a detailed analysis of the PJM power markets in our Utilities Observer, "Mid-Atlantic Market Outlook: May the Power Be With You," published in May. Additionally, we analyzed the impacts of capacity performance on upcoming capacity auctions in "PJM Capacity Performance: Don't Get Too Excited."

Research Methodology for Valuing Companies

Components of Our Methodology

- Economic Moat™ Rating
- Moat Trend™ Rating
- Moat Valuation
- Three-Stage Discounted Cash Flow
- Weighted Average Cost of Capital
- Fair Value Estimate
- Scenario Analysis
- Uncertainty Ratings
- Margin of Safety
- Consider Buying/Selling
- Stewardship Rating

We believe that a company's intrinsic worth results from the future cash flows it can generate.
The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth. Four key components drive the Morningstar rating: our assessment of the firm's economic moat, our estimate of the stock's fair value, our uncertainty around that fair value estimate and the current market price. This process ultimately culminates in our single-point star rating. Underlying this rating is a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's equity analysts.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our actual calculation of our fair value estimates. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns on invested capital over at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. The assumptions that we make about a firm's economic moat play a vital role in determining the length of "economic outperformance" that we assume in the terminal sections of our valuation model. To assess the sustainability of excess profits, analysts perform ongoing assessments of what we call the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from one year (for companies with no economic moat) to 10-15 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard perpetuity formula. In deciding on the rate at which to discount future cash flows, we use a building block approach,

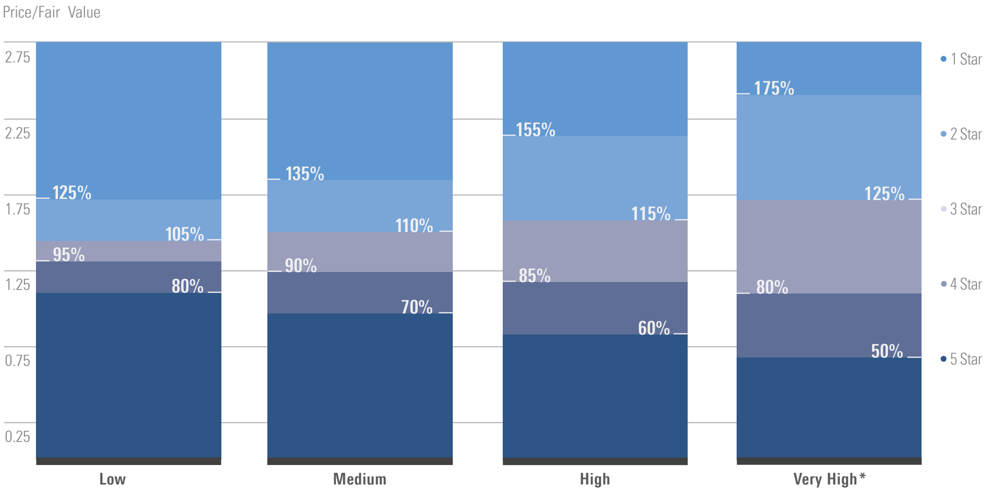
which takes into account expectations for market real return, inflation, country risk premia, corporate credit spread, and any additional systematic risk.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts model three scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of likely potential fair values and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, and other company-specific factors.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions. M

Morningstar Margin of Safety and Star Rating Bands



* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

Exelon Corporation

Waiting for the Pepco saga to conclude

Our view: While we continue to assume that the Pepco acquisition does not materialize, we see a potential relief rally in either scenario as the deal overhang dissipates. We increase our price target to $34 to reflect the possibility of a valuation uplift from a successful acquisition scenario as we await the D.C. commission's final decision in the coming weeks.

Key points:

Prepared for life without Pepco. With one month to go before the merger termination date, Exelon management noted their plan to deal with an unsuccessful acquisition scenario, which would involve buying back the 57.5 million shares of equity issued in 3Q15 as well as unwinding the debt issued for the deal. We had previously incorporated a $3 billion share buyback in 1Q16 with a $2.75 billion debt paydown; we now assume a $1.87 billion share buyback spread across 1H16 (same dollar amount as the original issuance) and a $4.2 billion debt paydown (which includes all of the parent debt issued in 3Q15 for the deal). Our lower EPS estimates reflect this change, resulting in a 4% CAGR through 2018.

Improving balance sheet health. Management announced their focus on maintaining an investment grade rating for the consolidated company as well as for ExGen; they expect a combination of debt reduction and growing free cash flow position to achieve that objective. Our model reflects a 2.4x net debt/EBITDA and 48% FFO/debt for ExGen in 2018, which we believe should comfortably place them in the investment grade range.

The return of the dividend increase. Assuming the Pepco acqusition falls through, we estimate Exelon to have around 900 million shares outstanding in 2018. Our estimates indicate that, with a 2.5% annual dividend increase starting this year, earnings from the three utilities (ComEd, PECO, BGE) should have a 1.15x dividend coverage ratio. Combined with a growing cash position at ExGen, we believe the company's new dividend policy is achievable.

Continuing the push for Illinois nuclear fleet. Despite the delay in the legislature, Exelon management continues to push for a Low Carbon Portfolio Standard (LCPS) to support the struggling Illinois nuclear fleet, with Quad Cities and Clinton plants currently in the red. We continue to estimate that the LCPS, if passed, could boost ExGen earnings by $0.15-$0.25 per share. Our estimates currently do not reflect this potential benefit.

Impressive run YTD, but momentum still positive. While we are uncertain how investors will react to the upcoming Pepco outcome, we believe either scenario could ultimately be positive for the stock given the visibility in management's plans. We reiterate our Outperform rating as we await the conclusion of the Pepco saga.

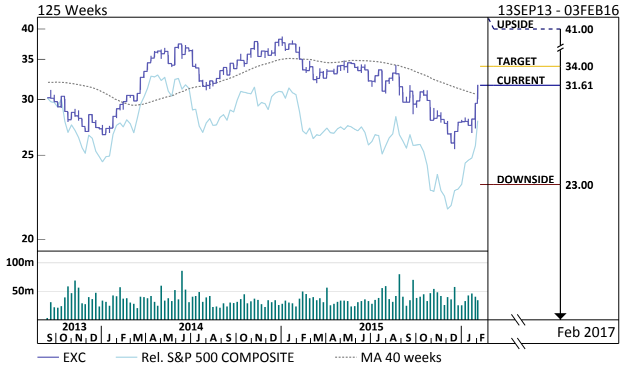
Target/Upside/Downside Scenarios

Exhibit 1: Exelon Corporation



Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

Target price/base case

- Base case price target of $34.
- 16.9x 2017E P/E for ComEd, PECO, and BGE, which represents a 10% premium to our estimated industry average multiple (using 4% secular 10-year Treasury rate and 9.3% U.S. market return requirement). The premium incorporates a possibility of a successful Pepco acquisition and resulting run-rate synergies.
- ExGen gross margin for 2016–2018 of $7.77 billion, $7.79 billion, and $7.81 billion, respectively.
- 7.5x EV/EBITDA multiple on ExGen's discounted 2017 "open" EBITDA.
- $1.87 billion stock buyback in 1H16.

Upside scenario

- Upside scenario of $41.
- 18.2x 2017E P/E for ComEd, PECO, and BGE, which represents a 10% premium to our upside industry average multiple (using 3.25% secular 10-year Treasury rate and 9.3% U.S. market return requirement). The premium incorporates a possibility of a successful Pepco acquisition and resulting run-rate synergies.
- 10% increase in forward power prices.
- 7.5x EV/EBITDA multiple on ExGen's discounted 2017 "open" EBITDA.
- $1.87 billion stock buyback in 1H16.

Downside scenario

- Downside scenario of $23.
- 13.3x 2017E P/E for ComEd, PECO, and BGE, which represents our downside industry average multiple (using 4.25% secular 10-year Treasury rate and 10.25% U.S. market return requirement).
- 10% decrease in forward power prices.
- 6.0x EV/EBITDA multiple on ExGen's discounted 2017 "open" EBITDA.
- $1.87 billion stock buyback in 1H16.

Investment summary

With the final decision in D.C. looming regarding the Pepco acquisition, we believe Exelon is in a good position to deal with and create value with either outcome. We continue to assume that the deal does not materialize, resulting in management buying back shares and paying down Pepco-related debt financing. We expect Exelon to achieve 4% EPS CAGR through 2018, with 7.8% utility CAGR during the same period.

Potential catalysts

- D.C. commission approves the Pepco merger after reconsideration.
- Exelon walks away from Pepco merger but initiates a large share repurchase program.
- Successful implementation of O&M expense control for 2015–2018 help offset impact of low power prices, particularly if the merger with Pepco takes place.
- Illinois passes LCPS legislation to provide financial stability to nuclear plants in the state.

Risks to call

- Further deterioration of forward power curves leads to non-profitable power plant economics, resulting in the company's shutting down several nuclear plants.
- Further compression of retail/wholesale margins.
- Unfavorable turn in regulatory environment in Illinois and Maryland.
- EDF put price is much higher than expected.
- Ratings agencies downgrade parent and/or subsidiary debt to non-investment grade.

Valuation

Our $34 price target uses a sum-of-the-parts analysis. For PECO, ComEd and BGE, we apply a 10% premium to the industry average P/E multiple of 15.4x to the utilities' 2017E net income to reflect the possibility of a successful Pepco acqusiition, which we believe would result in a valuation uplift for the company. For Exelon Generation (ExGen), we apply a 7.5x multiple to its 2017 "open" EBITDA, which reflects the potential value of selling all of its output at the spot price. Finally, we calculate the net present value (NPV) of the value of existing hedges for 2015–2017, which represents an additional cash benefit to the company.

Price target impediments

- Further deterioration or non-recovery of forward power curves leads to non-profitable power plant economics .
- The proposed acquisition of Pepco Holdings is ultimately rejected in 1Q16.
- Less-than-expected merger synergies are realized or delayed further than forecasted.
- Unfavorable turn in regulatory environment in Illinois and Maryland.
- EDF put price is higher than expected.
- Ratings agencies downgrade parent/sub to non-investment grade.

Company description

Exelon Corp. is one of the largest utilities and competitive energy providers in the United States. With its generation portfolio providing approximately 19,300 MW of nuclear capacity, Exelon is also the largest nuclear operator in the United States. Exelon's total generation capacity is approximately 35,000 MW. Through its three regulated wires-only utilities in Maryland, Illinois, and Pennsylvania (BG&E, ComEd, and PECO), Exelon serves 6.6 million electric and gas customers.

Required disclosures

Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1 or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Exelon Corporation in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Exelon Corporation in the past 12 months.

RBC Capital Markets, LLC makes a market in the securities of Exelon Corporation.

RBC Capital Markets is currently providing Exelon Corporation with non-investment banking securities-related services.

RBC Capital Markets is currently providing Exelon Corporation with non-securities services.

RBC Capital Markets has provided Exelon Corporation with investment banking services in the past 12 months.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Ratings

Top Pick (TP): Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

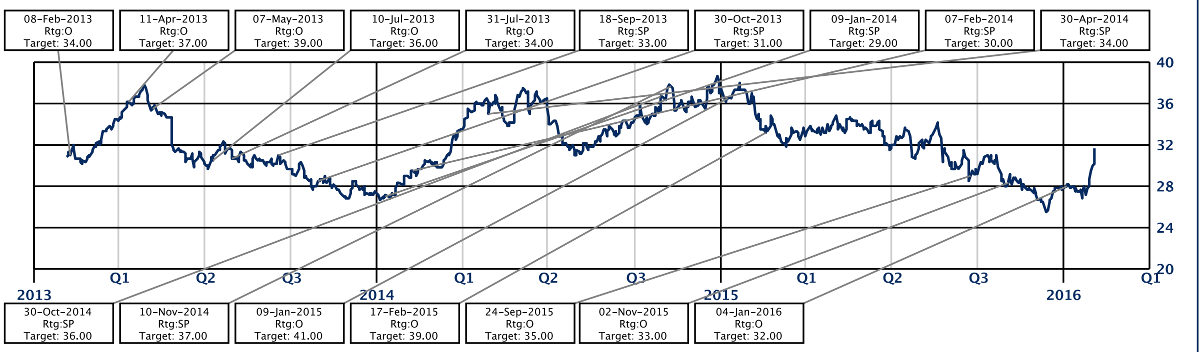
Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Dec-2015

			Investment Banking Serv./Past 12 Mos.	
Rating	**Count**	**Percent**	**Count**	**Percent**
BUY [Top Pick & Outperform]	**933**	**52.59**	**271**	**29.05**
HOLD [Sector Perform]	**727**	**40.98**	**102**	**14.03**
SELL [Underperform]	**114**	**6.43**	**8**	**7.02**

Rating and price target history for: Exelon Corporation as of 03-Feb-2016 (in USD)



Legend:
TP: Top Pick; O: Outperform; SP: Sector Perform; U: Underperform; I: Initiation of Research Coverage; D: Discontinuation of Research Coverage; NR: Not Rated; NA: Not Available; RL: Recommended List - RL: On: Refers to date a security was placed on a recommended list, while RL Off: Refers to date a security was removed from a recommended list; Rtg: Rating.

Created by BlueMatrix

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at https://www.rbcinsight.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

Analyst certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's Financial Services LLC ("S&P") and is licensed for use by RBC. Neither MSCI, S&P, nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. RBC Capital Markets may be restricted from publishing research reports, from time to time, due to regulatory restrictions and/or internal compliance policies. If this is the case, the latest published research reports available to clients may not reflect recent material changes in the applicable industry and/or applicable subject companies. RBC Capital Markets research reports are current only as of the date set forth on the research reports. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE, SIPC), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

To Canadian Residents:
This publication has been approved by RBC Dominion Securities Inc.(member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

To U.K. Residents:
This publication has been approved by RBC Europe Limited ('RBCEL') which is authorized by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ('FCA') and the Prudential Regulation Authority, in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FCA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.

To Persons Receiving This Advice in Australia:
This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product. This research report is not for retail investors as defined in section 761G of the Corporations Act.

To Hong Kong Residents:
This publication is distributed in Hong Kong by RBC Capital Markets (Hong Kong) Limited and Royal Bank of Canada, Hong Kong Branch (both entities which are regulated by the Hong Kong Monetary Authority ('HKMA') and the Securities and Futures Commission ('SFC')). Financial Services provided to Australia: Financial services may be provided in Australia in accordance with applicable law. Financial services provided by the Royal Bank of Canada, Hong Kong Branch are provided pursuant to the Royal Bank of Canada's Australian Financial Services Licence ('AFSL') (No. 246521). RBC Capital Markets (Hong Kong) Limited is exempt from the requirement to hold an AFSL under the Corporations Act 2001 in respect of the provision of such financial services. RBC Capital Markets (Hong Kong) Limited is regulated by the HKMA and the SFC under the laws of Hong Kong, which differ from Australian laws.

To Singapore Residents:
This publication is distributed in Singapore by the Royal Bank of Canada, Singapore Branch, a registered entity granted offshore bank licence by the Monetary Authority of Singapore. Exelon Corp.

EXC: Exelon produces steady results while affirming strong balance sheet commitment

Bank of America Merrill Lynch

Earnings Review

08 February 2016

Reiterating Overweight ratings on Exelon Corp., Generation

We reiterate our Overweight ratings on Exelon Corporation and Exelon Generation as credit spreads remain attractive relative to peers and we view credit quality as stable with very strong management support for a strong balance sheet and investment grade credit ratings. Our Marketweight ratings on Exelon's three utilities reflect fair relative value compared to other high-quality U.S. regulated electric utilities.

Strong operations continue to drive financial results

Exelon reported FY15 operating earnings of $2.23 billion, or $2.49/share, within its guidance range of $2.40-$2.60, and up ten cents from the prior year, although two cents short of consensus. Key factors (Exhibit 2 at right) included the net effect of the consolidation of CENG, higher nuclear volumes at Exelon Generation, the net regulatory impact at the utilities including a rate increase at Baltimore Gas & Electric, and lower supply costs at Exelon Generation, mostly offset by higher O&M expenses, higher interest expense due primarily to the issuance of debt for the Pepco Holdings acquisition and higher debt levels at Exelon Generation, higher depreciation the higher cost of planned nuclear refueling outages. Exelon management introduced FY16 operating EPS guidance of $2.40 to $2.70, split about evenly between the regulated utilities and Exelon Generation, and in line with consensus of $2.53. Also, the Board approved a new financial policy to increase the dividend by 2.5% per year in 2016-2018.

Balance sheet strength, credit quality remain top priorities

Credit spreads of Exelon Generation had widened sharply in recent weeks (see charts on page 4) due to the spillover effect from the high yield market of increasing aversion to exposure to commodity prices, now including natural gas. However, during its earnings call Exelon emphasized statements it has made numerous times in recent years: "balance sheet strength is a priority that guides every strategic decision;" "our top financial priority remains maintaining our investment grade credit rating and ensuring the strength of our balance sheet;" "our strong balance sheet underpins our capital allocation policy;" and "the primary objective of Exelon's hedging program is to manage market risks and protect the value of its generation and its investment-grade balance sheet, while preserving its ability to participate in improving long-term market fundamentals." Exelon Generation plans to use free cash flow to reduce debt, in part by 'pushing down' some debt onto projects that can support non-recourse debt, and reduce its debt/EBITDA ratio from 3.2x in 2016 to 2.3x in 2018 while improving funds from operations to debt from ~30% to ~50%.

Debt financing plans and Pepco Holdings acquisition

Debt financing plans for 2016 include $950 million at Commonwealth Edison ($665 million maturing in 3Q16), $750 million at Baltimore Gas & Electric ($300 million maturing on October 1) and $450 million at PECO Energy ($300 million maturing on October 15). Exelon Corporation will either issue some debt to effectively replace the acquisition-related debt it redeemed in late 2015, or redeem its new 2025, 2035 and 2045 maturities, depending on whether or not it closes its acquisition of Pepco Holdings. The only remaining required approval is that of the District of Columba Public Service Commission, which stated in its order of October 28, 2015 that it expected to issue its decision on or before March 4, 2016.

BofA Merrill Lynch does and seeks to do business with issuers covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Summary Profile

Description

Exelon Corporation is a utility service holding company engaged in the energy generation and energy delivery services. Exelon Generation is one of the largest U.S. competitive U.S. power generators with ~32,000 megawatts of owned capacity, including the largest nuclear fleet and a renewables portfolio. Exelon's Constellation business unit provides energy products and services to ~100,000 business and public sector customers and ~1 million residential customers. Exelon's utilities deliver electricity and natural gas to more than 7.8 million customers in central Maryland (Baltimore Gas & Electric), northern Illinois (Commonwealth Edison) and southeastern Pennsylvania (PECO Energy).

Significant Events

- April 29, 2014: Exelon and Pepco Holdings signed an agreement and plan of merger whereby Exelon will acquire Pepco's common stock with cash; financing plans include a combination of debt, issuance of equity (completed) and proceeds from non-core asset sales (completed). To date, Pepco shareholders, the FERC, Virginia regulators, New Jersey regulators, the Public Service Commission of Delaware, and Maryland have approved the merger. The merger still requires approval by the Public Service Commission of the District of Columbia. On December 23, 2015, the record in the settlement proceedings before the Public Service Commission of the District of Columbia closed; the companies are currently awaiting a decision from the commission.

Comparables

- Public Service Enterprise Group (PEG)
- NextEra Energy (NEE)

Valuation & risk

Exelon Corp. (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

Baltimore (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

Commonwealth Edison (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

Exelon Generation Co (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

PECO Energy Co. (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

BofA Merrill Lynch Credit Opinion Key

BofA Merrill Lynch Global Research provides recommendations on an issuer's bonds (including corporate and sovereign external debt securities), capital securities, equity preferreds and CDS as described below. Convertible securities are not rated. An issuer level recommendation may also be provided for an issuer as explained below. BofA Merrill Lynch Global Research credit recommendations are assigned using a three-month time horizon.
Issuer Recommendations: If an issuer credit recommendation is provided, it is applicable to bonds and capital securities of the issuer except bonds and capital securities specifically referenced in the report with a different credit recommendation. Where there is no issuer credit recommendation, only individual bonds and capital securities with specific recommendations are covered. CDS and equity preferreds are rated separately and issuer recommendations do not apply to them.

BofA Merrill Lynch Global Research credit recommendations are assigned using a three-month time horizon:
Overweight: Spreads and /or excess returns are likely to outperform the relevant and comparable market over the next three months.
Marketweight: Spreads and/or excess returns are likely to perform in-line with the relevant and comparable market over the next three months.
Underweight: Spreads and/or excess returns are likely to underperform the relevant and comparable market over the next three months.

BofA Merrill Lynch Global Research uses the following rating system with respect to **Credit Default Swaps (CDS):**
Buy Protection: Buy CDS, therefore going short credit risk.
Neutral: No purchase or sale of CDS is recommended.
Sell Protection: Sell CDS, therefore going long credit risk.

Corporate Credit Issuer Investment Rating Distribution: Global Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	146	35.96%	Buy	130	89.04%
Hold	155	38.18%	Hold	137	88.39%
Sell	105	25.86%	Sell	91	86.67%

* Issuers that were investment banking clients of BofA Merrill Lynch or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only corporate credit issuer recommendations. A corporate credit issuer rated Overweight is included as a Buy, a corporate credit issuer rated Marketweight is included as a Hold, and a corporate credit issuer rated Underweight is included as a Sell.

Credit Opinion History Tables for the securities referenced in this research report are available at http://pricecharts.baml.com, or call 1-800-MERRILL to have them mailed.
MLPF&S or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Commonwealth Edison, Exelon Corp.
The issuer is or was, within the last 12 months, an investment banking client of MLPF&S and/or one or more of its affiliates: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
MLPF&S or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
The issuer is or was, within the last 12 months, a non-securities business client of MLPF&S and/or one or more of its affiliates: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
MLPF&S or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.

MLPF&S or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of MLPF&S and/or one or more of its affiliates: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
BofA Merrill Lynch Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking revenues.
BofA Merrill Lynch Global Credit Research analysts regularly interact with sales and trading desk personnel in connection with their research, including to ascertain pricing and liquidity in the fixed income markets.

Other Important Disclosures

MLPF&S or one of its affiliates has a significant financial interest in the fixed income instruments of the issuer. If this report was issued on or after the 15th day of the month, it reflects a significant financial interest on the last day of the previous month. Reports issued before the 15th day of the month reflect a significant financial interest at the end of the second month preceding the report: Baltimore, Exelon Corp., Exelon Generation.

This report may refer to fixed income securities that may not be offered or sold in one or more states or jurisdictions. Readers of this report are advised that any discussion, recommendation or other mention of such securities is not a solicitation or offer to transact in such securities. Investors should contact their BofA Merrill Lynch representative or Merrill Lynch Financial Global Wealth Management financial advisor for information relating to fixed income securities
Rule 144A securities may be offered or sold only to persons in the U.S. who are Qualified Institutional Buyers within the meaning of Rule 144A under the Securities Act of 1933, as amended.
SECURITIES DISCUSSED HEREIN MAY BE RATED BELOW INVESTMENT GRADE AND SHOULD THEREFORE ONLY BE CONSIDERED FOR INCLUSION IN ACCOUNTS QUALIFIED FOR SPECULATIVE INVESTMENT.
Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
The securities discussed in this report may be traded over-the-counter. Retail sales and/or distribution of this report may be made only in states where these securities are exempt from registration or have been qualified for sale.
Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
From time to time research analysts conduct site visits of covered issuers. BofA Merrill Lynch policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
This report, and the securities discussed herein, may not be eligible for distribution or sale in all countries or to certain categories of investors.
Information relating to Affiliates of MLPF&S and Distribution of Affiliate Research Reports:

Merrill Lynch (Dubai) is authorized and regulated by the Dubai Financial Services Authority (DFSA). Research reports prepared and issued by Merrill Lynch (Dubai) are prepared and issued in accordance with the requirements of the DFSA conduct of business rules.
BAMLI Frankfurt distributes this report in Germany. BAMLI Frankfurt is regulated by BaFin.
This research report has been prepared and issued by MLPF&S and/or one or more of its non-US affiliates. MLPF&S is the distributor of this research report in the US and accepts full responsibility for research reports of its non-US affiliates distributed to MLPF&S clients in the US. Any US person receiving this research report and wishing to effect any transaction in any security discussed in the report should do so through MLPF&S and not such foreign affiliates.
General Investment Related Disclosures:
Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Merrill Lynch.
This research report provides general information only. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this report and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this report.
Securities and other financial instruments discussed in this report, or recommended, offered or sold by Merrill Lynch, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial

instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

BofA Merrill Lynch is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

This report may contain a trading idea or recommendation which highlights a specific identified near-term catalyst or event impacting a security, issuer, industry sector or the market generally that presents a transaction opportunity, but does not have any impact on the analyst's particular "Overweight" or "Underweight" rating (which is based on a three month trade horizon). Trading ideas and recommendations may differ directionally from the analyst's rating on a security or issuer because they reflect the impact of a near-term catalyst or event.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned in this report. Investors in such securities and instruments effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Merrill Lynch entities located outside of the United Kingdom. BofA Merrill Lynch Global Research policies relating to conflicts of interest are described at http://go.bofa.com/coi.

Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

MLPF&S or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. MLPF&S or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Merrill Lynch, through business units other than BofA Merrill Lynch Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented in this report. Such ideas or recommendations reflect the different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Merrill Lynch is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this report.

In the event that the recipient received this report pursuant to a contract between the recipient and MLPF&S for the provision of research services for a separate fee, and in connection therewith MLPF&S may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom MLPF&S has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by MLPF&S). MLPF&S is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities mentioned in this report.

Copyright, User Agreement and other general information related to this report:

This research report is prepared for the use of BofA Merrill Lynch clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of BofA Merrill Lynch. BofA Merrill Lynch Global Research reports are distributed simultaneously to internal and client websites and other portals by BofA Merrill Lynch and are not publicly-available materials. Any unauthorized use or disclosure is prohibited. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion, or information contained in this report (including any investment recommendations, estimates or price targets) without first obtaining express permission from an authorized officer of BofA Merrill Lynch.

Materials prepared by BofA Merrill Lynch Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Merrill Lynch, including investment banking personnel. BofA Merrill Lynch has established information barriers between BofA Merrill Lynch Global Research and certain business groups. As a result, BofA Merrill Lynch does not disclose certain client relationships with, or compensation received from, such issuers in research reports. To the extent this report discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this report. BofA Merrill Lynch Global Research personnel's knowledge of legal proceedings in which any BofA Merrill Lynch entity and/or its directors, officers and employees may be plaintiffs, issuers mentioned in this report is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Merrill Lynch in connection with the legal proceedings or matters relevant to such proceedings.

This report has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of MLPF&S, any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Merrill Lynch Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Merrill Lynch and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This report may contain links to third-party websites. BofA Merrill Lynch is not responsible for the content of any third-party website or any linked content contained in a third party website. Content contained on such third-party websites is not part of this report and is not incorporated by reference into this report. The inclusion of a link in this report does not imply any endorsement by or any affiliation with BofA Merrill Lynch. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Merrill Lynch is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of the report and are subject to change without notice. Prices also are subject to change without notice. BofA Merrill Lynch is under no obligation to update this report and BofA Merrill Lynch's ability to publish research on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Merrill Lynch will not update any fact, circumstance or opinion contained in this report.

Certain outstanding reports may contain discussions and/or investment opinions relating to securities, financial instruments and/or issuers that are no longer current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with MLPF&S or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Merrill Lynch nor any officer or employee of BofA Merrill Lynch accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this report or its contents.

Analyst Note 11 Feb 2016

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court's decision comes as good news for coal miners that haven't had any for some time. However, we don't view today's announcement as a panacea for the coal industry's woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn't changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody's high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers at Commonwealth Edison (Illinois), PECO (Pennsylvania), and Baltimore Gas & Electric (Maryland). Exelon also owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. Exelon also is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

Price/Fair Value Morningstar data as of Feb 10, 2016

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

For Recipients in India: This research on securities [as defined in clause (h) of Section 2 of the Securities Contracts (Regulation) Act, 1956], such research being referred to for the purpose of this document as “Investment Research”, is issued by Morningstar Investment Adviser India Private Limited.

Morningstar Investment Adviser India Private Limited is registered with the Securities and Exchange Board of India under the SEBI (Investment Advisers) Regulations, 2013, vide Registration number INA000001357, dated March 27, 2014, and in compliance of the aforesaid regulations and the SEBI (Research Analysts) Regulations, 2014, it carries on the business activities of investment advice and research. Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Associates LLC, which is a part of the Morningstar Investment Management group of Morningstar, Inc., and Morningstar, Inc. is a leading provider of independent investment research that offers an extensive line of products and services for individual investors, financial advisors, asset managers, and retirement plan providers and sponsors. In India, Morningstar Investment Adviser India Private Limited has only one associate, viz., Morningstar India Private Limited, and this company predominantly carries on the business activities of providing data input, data transmission and other data related services, financial data analysis, software development etc.

The author/creator of this Investment Research (“Research Analyst”) or his/her associates or his/her relatives does/do not have (i) any financial interest in the subject company; (ii) any actual/beneficial ownership of one per cent or more securities of the subject company, at the end of the month immediately preceding the date of publication of this Investment Research; and (iii) any other material conflict of interest at the time of publication of this Investment Research.

The Research Analyst or his/her associates or his/her relatives has/have not received any (i) compensation from the subject company in the past twelve months; (ii) compensation for products or services from the subject company in the past twelve months; and (iii) compensation or other material benefits from the subject company or third party in connection with this Investment Research. Also, the Research Analyst has not served as an officer, director or employee of the subject company.

The terms and conditions on which Morningstar Investment Adviser India Private Limited offers Investment Research to clients, varies from client to client, and are spelt out in detail in the respective client agreement.

Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs and generate large profits even with currently depressed power prices.
- Higher natural gas and coal prices, rising electricity demand and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.
- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.
- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow moat distribution earnings.
- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

Supreme Court Validates Our View That Carbon Regulation Remains Highly Uncertain

Travis Miller, Sector Director, 06 October 2015

Investment Thesis

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and made a $12 billion bid for Pepco in April 2014, both including debt. Management's political negotiations appear to have revived the deal in Washington, D.C., where regulators had rejected it in August 2015. We now expect it has a 75% chance of closing. Exelon has received all other regulatory approvals.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our outlook for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can grow earnings 10% annually the next three years.

Travis Miller, Sector Director, 11 February 2016

Analyst Note

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court's decision comes as good news for coal miners that haven't had any for some time. However, we don't view today's announcement as a panacea for the coal industry's woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn't changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody's high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Economic Moat

Travis Miller, Sector Director, 06 October 2015

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★★ 10 Feb 2016	31.12 USD 10 Feb 2016	35.00 USD	0.89	3.98 10 Feb 2016	28.62 10 Feb 2016	Utilities - Diversified	Standard

Close Competitors	Currency (Mil)	Market Cap	TTM Sales	Operating Margin	TTM/PE
Public Service Enterprise Group Inc PEG	USD	21,574	10,910	29.67	11.75
FirstEnergy Corp FE	USD	14,227	14,968	11.48	28.57
Entergy Corp ETR	USD	12,744	11,836	2.32	0.00

characteristics, with returns on capital above costs of capital for the foreseeable future. However, that spread between long-term returns on capital and Exelon's cost of capital have shrunk based on our midcycle outlook for power prices in the eastern U.S. Exelon's increasing diversification into narrow- and no-moat businesses together with the shrinking returns at its nuclear generation business supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources like coal and natural gas reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must continue to have access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Valuation

Travis Miller, Sector Director, 06 October 2015

We are reaffirming our $35 per share fair value estimate after raising our probability of the Pepco acquisition closing to 75% from 25% as a result of an agreement the companies reportedly reached with the Washington, D.C., mayor's office on Oct. 6. Although we think the deal is value-dilutive, it is too small to have a material impact on our fair value estimate. Exelon's $27.25-per-share cash offer represents a 30% premium to our $21 per share standalone fair value estimate for Pepco.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities (Ill.), Oyster Creek (N.J.), and Three Mile Island (Pa.)--as well as the Clinton (Ill.) plant. We now assume a 50% probability that the Byron (Ill.) plant will retire given it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★★ 10 Feb 2016	31.12 USD 10 Feb 2016	35.00 USD	0.89	3.98 10 Feb 2016	28.62 10 Feb 2016	Utilities - Diversified	Standard

50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Our midcycle earnings forecast at Exelon Generation is based on a $4/mcf midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

We assume a 9% cost of equity and a 7.1% cost of capital. Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Risk

Travis Miller, Sector Director, 06 October 2015

Investors should pay the most attention to political developments that would re-regulate competitive electricity markets in the Midwest and Mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source.

As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket.

Reregulation also would destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.

As Exelon's regulated utilities generate a greater share of earnings, investors will be subject more acutely to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management

Travis Miller, Sector Director, 06 October 2015

We give Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities.

President and CEO Chris Crane and Executive Chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and Chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition in 2015. This will increase Exelon's share of regulated utilities earnings and dilute shareholders' exposure to wholesale power markets. Management has shown strong conviction in the value of the deal based on their efforts to gain support for the deal from all parties, particularly in Washington, D.C.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants absent significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creation opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8 million shares or vested options as of January 2015.

Supreme Court Validates Our View That Carbon Regulation Remains Highly Uncertain

Travis Miller, Sector Director, 11 February 2016

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court's decision comes as good news for coal miners that haven't had any for some time. However, we don't view today's announcement as a panacea for the coal industry's woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn't changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody's high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Exelon Surprises With 2.5% Dividend Growth Target

Travis Miller, Sector Director, 03 February 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Supreme Court Sides With Demand Response; No Fair Value Impacts

Andrew Bischof, CFA, Eq. Analyst, 25 January 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal

Travis Miller, Sector Director, 11 November 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the 2017-18 reduction was based on Pepco's reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals

Travis Miller, Sector Director, 30 October 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market

Exelon Corp EXC (XNYS)

Morningstar Rating	**Last Price**	**Fair Value Estimate**	**Price/Fair Value**	**Dividend Yield %**	**Market Cap (Bil)**	**Industry**	**Stewardship**
★★★★ 10 Feb 2016	31.12 USD 10 Feb 2016	35.00 USD	0.89	3.98 10 Feb 2016	28.62 10 Feb 2016	Utilities - Diversified	Standard

hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year

Charles Fishman, Eq. Analyst, 26 October 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C. commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco

Charles Fishman, Eq. Analyst, 06 October 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners

Charles Fishman, Eq. Analyst, 30 September 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Postpones Nuclear Plant Retirement Decision; No Fair Value Impact

Travis Miller, Sector Director, 10 September 2015

We are reaffirming our $35 per share fair value estimate for Exelon after management announced it will delay a decision whether to close at least three of its struggling nuclear plants. We recently incorporated into our fair value estimate and financial projections the assumption that it was more likely than not that Exelon would close those three plants in 2018. We also assume a 50% likelihood that Exelon will close its Byron (Illinois) nuclear plant in 2019.

Results of the recent 2016-18 PJM transitional capacity auctions and management's decision to delay potential retirements do not change our assumptions that those plants ultimately will close, absent significant energy market or public policy changes. The Quad Cities (Illinois), Three Mile Island (Pennsylvania), and Oyster Creek (New Jersey) plants are obligated to run at least through mid-2018, and the Byron plant is obligated to run through mid-2019 based on results from PJM's recent capacity auctions.

The key development for Exelon in last week's 2017-18 transitional capacity auction was that the Quad Cities and Byron plants cleared and are now obligated to run. Neither cleared PJM's 2017-18 base capacity auction last year at $120/megawatt-day but did clear last week's capacity performance transitional auction at $151.50/MW-day. Including those plants and the uplift for the rest of the fleet adds about $400 million of EBITDA in 2017-18.

The Clinton (Illinois) plant is the fourth that we assume will close by 2018. It is not part of PJM. It is obligated to run at least through 2016 as part of the Mid-Continent ISO. Exelon continues to lobby Illinois politicians to adopt a subsidy-like scheme that would improve the economics for its six Illinois nuclear plants. We do not include any benefits from policy changes in our fair value estimate.

D.C. Commission Rejects Pepco-Exelon Merger; Lowering Pepco Fair Value Estimate

Charles Fishman, Eq. Analyst, 26 August 2015

We are lowering our fair value estimate of Pepco Holdings Inc. to $23 per share from $27 per share, following the decision by the Public Service Commission of the District of Columbia to deny the merger with Exelon Corp, which caused Pepco shares to close down 16.5% on Tuesday. At the time of the merger in April 2014, we had believed the transaction would be value-dilutive for Exelon, and we are reviewing our $35 per share fair value estimate. We note that Exelon shares were down almost 7% on Tuesday, on which day the overall market and utilities were also weak. Our narrow moat and stable moat trend are unchanged for both companies.

Exelon and Pepco issued a joint press release indicating that they were reviewing their options and will respond once the process is complete. A summary of the decision indicated that the D.C. commission did not believe the merger would provide sufficient benefits to customers or guarantees for improvements in reliability. The commission was also concerned that under the new management structure Pepco would become "a second-tier company in a much larger corporation whose primary interest is not in distribution, but in generation." The full decision is due Wednesday, and the companies have 30 days to appeal the decision.

We were surprised by the decision, as we had believed the most difficult regulatory hurdle would be in Maryland. Pepco and Exelon agreed to stringent conditions and additional customer benefits imposed by the Maryland Public Service Commission on May 18. We thought the commission in D.C., the last jurisdiction needed to approve the deal, would agree to similar conditions. They did not.

Our new fair value estimate assumes that there is now only a 25% chance of the transaction being restructured to satisfy the D.C. regulators. If the deal is abandoned, our standalone fair value estimate for Pepco is $21 per share.

PJM Auction Results In Line With Our Forecast in First Auction With Capacity Performance Inclusion

Andrew Bischof, CFA, Eq. Analyst, 24 August 2015

Capacity prices across most of the 13-state PJM Interconnection region cleared at $165/MW-day for capacity performance, or CP, and $150/MW-day for base generation for 2018-19. This is comparable to $120/MW-day for last year's 2017-18 results, in which there was no separate CP auction. The results are in line with our auction expectations, in which we previously expected CP to clear at $150/MW-day and base capacity at $140/MW-day for the 2018-19 auction. We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities we cover, as we are maintaining our midcycle capacity assumptions.

Capacity revenue provides significant pretax earnings for our independent power producers and diversified utilities for any one auction year. Dynegy in our opinion is the largest winner from strong base capacity results, as half of its generation is now in PJM. For every $100/MW-day change in capacity prices, we estimate that Dynegy benefits $385 million in pretax earnings. Exelon's fleet also benefited from a strong clearing in the Commonwealth Edison, or COMED, locational deliverability area, or LDA, with CP clearing at $215/MW-day and $200/MW-day for base generation capacity. However, we do not believe that Exelon's Illinois Quad Cities and Byron nuclear units cleared the auction at these prices. Based on recent management commentary, we continue to expect Exelon to close these two plants by the end of 2016, with a final decision expected in September. Public Service Enterprise Group, or PSEG, also benefits from strong base results for the second year in a row, with base capacity clearing in the Eastern Mid-Atlantic Area Council, or EMAAC, LDA clearing at $210/MW-day for base generation and $225/MW-day for CP. The premium clearing price in the PSEG region shows the competitive advantage of PSEG's fleet and supports our positive moat trend. Higher capacity prices also benefit Calpine, FirstEnergy, and NRG Energy.

Upcoming PJM Capacity Auction Could Prove Disappointing

Andrew Bischof, CFA, Eq. Analyst, 17 August 2015

We are reaffirming our fair value estimates and our moat and moat trend ratings for our independent power producers and diversified utilities ahead of the upcoming 2018/19 Planning Year auction for Capacity Performance, or CP. The capacity auction is currently under way, with results posted Aug. 21.

In June, the Federal Energy Regulatory Commission approved the proposal from PJM Interconnection to implement CP in its 2018/19 base residual auction, which PJM began on Aug. 10. CP increases the marginal capacity cost for marginal generators, but the bullish impact should be less than the market expects. We maintain our previous estimate that the combination of CP, reduced impact from demand response, and increased confidence of marginal generators to raise prices will cause CP to clear at $150 per megawatt-day and base capacity at $140/MW-day for the 2018-19 auction.

We believe that previous auctions already priced in existing non-CP performance penalties, such as those a generator must pay if it cannot deliver energy during reserve shortages. CP is a further-reaching, stricter penalty structure for nonperformance outside of reserve shortages. Although generators participating in CP will not be constrained by their avoidable cost rates this year, which will allow generation to offer up to net cost of new entry times the balancing ratio, we suspect that few generators will raise offer prices for this reason alone. We also highlight the possible expected increase in dark spreads over the 2018–19 time frame due to the large increase in LNG exports over this time period; this could add downside pressure to capacity offers from coal generation in PJM.

Morningstar Equity Research Methodology

Fundamental Analysis

At Morningstar, we believe buying shares of superior businesses at a discount and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are our primary focus. Occasionally, this approach causes our recommendations to appear out of step with the market, but willingness to be contrarian is an important source of outperformance and a benefit of Morningstar's independence. Our analysts conduct primary research to inform our views on each firm's moat, fair value and uncertainty.

Economic Moat

The economic moat concept is a cornerstone of Morningstar's investment philosophy and is used to distinguish high-quality companies with sustainable competitive advantages. An economic moat is a structural feature that allows a firm to sustain excess returns over a long period of time. Without a moat, a company's profits are more susceptible to competition. Companies with narrow moats are likely to achieve normalized excess returns beyond 10 years while wide-moat companies are likely to sustain excess returns beyond 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe lower-quality no-moat companies will see their returns gravitate toward the firm's cost of capital more quickly than companies with moats will. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

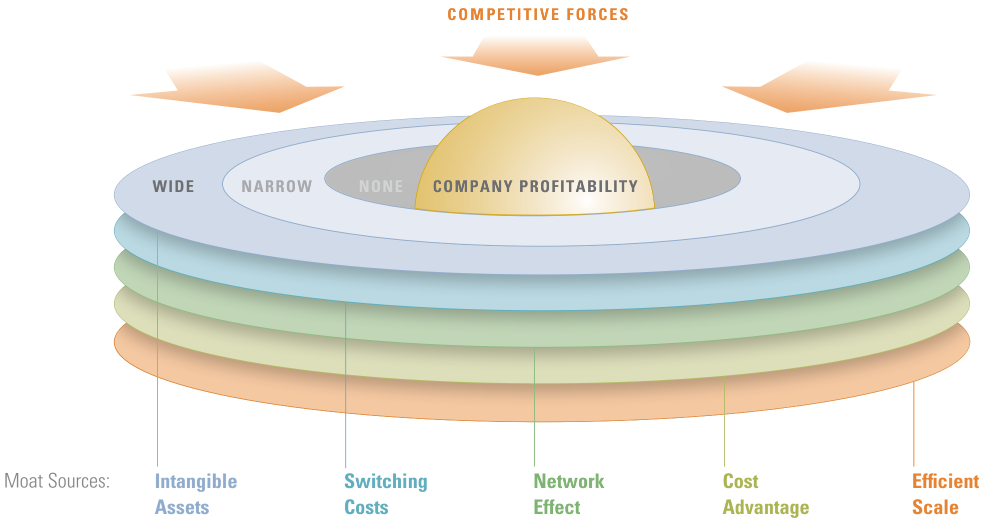
Fair Value Estimate

Our analyst-driven fair value estimate is based primarily on Morningstar's proprietary three-stage discounted cash flow model. We also use a variety of supplementary fundamental methods to triangulate a company's worth, such as sum-of-the-parts, multiples, and yields, among others. We're looking well beyond next quarter to determine the cash-generating ability of a company's assets because we believe the market price of a security will migrate toward the firm's intrinsic value over time. Economic moats are not only an important sorting mechanism for quality in our framework, but the designation also directly contributes to our estimate of a company's intrinsic value through sustained excess returns on invested capital.

Uncertainty Rating

The Morningstar Uncertainty Rating demonstrates our assessment of a firm's cash flow predictability, or valuation risk. From this rating, we determine appropriate margins of safety: The higher the uncertainty, the wider the margin of safety around our fair value estimate before our recommendations are triggered. Our uncertainty ratings are low, medium, high, very high, and extreme. With each uncertainty rating is a corresponding set of price/fair value ratios that drive our recommendations: Lower price/fair value ratios (<1.0) lead to positive recommendations, while higher price/fair value

Economic Moat



ratios (>1.0) lead to negative recommendations. In very rare cases, the fair value estimate for a firm is so unpredictable that a margin of safety cannot be properly estimated. For these firms, we use a rating of extreme. Very high and extreme uncertainty companies tend to have higher risk and volatility.

Quantitatively Driven Valuations

To complement our analysts' work, we produce Quantitative Ratings for a much larger universe of companies. These ratings are generated by statistical models that are meant to divine the relationships between Morningstar's analyst-driven ratings and key financial data points. Consequently, our quantitative ratings are directly analogous to our analyst-driven ratings.

Quantitative Fair Value Estimate (QFVE): The QFVE is analogous to Morningstar's fair value estimate for stocks. It represents the per-share value of the equity of a company. The QFVE is displayed in the same currency as the company's last close price.

Valuation: The valuation is based on the ratio of a company's quantitative fair value estimate to its last close price.

Quantitative Uncertainty: This rating describes our level of uncertainty about the accuracy of our quantitative fair value estimate. In this way it is analogous to Morningstar's fair value uncertainty ratings.

Quantitative Economic Moat: The quantitative moat rating is analogous to Morningstar's analyst-driven economic moat rating in that both are meant to describe the strength of a firm's competitive position.

Understanding Differences Between Analyst and Quantitative Valuations

If our analyst-driven ratings did not sometimes differ from our quantitative ratings, there would be little value in producing both. Differences occur because our quantitative ratings are essentially a highly sophisticated analysis of the analyst-driven ratings of comparable companies. If a company is unique and has few comparable companies, the quantitative model will have more trouble assigning correct ratings, while an analyst will have an easier time recognizing the true characteristics of the company. On the other hand, the quantitative models incorporate new data efficiently and consistently. Empirically, we find quantitative ratings and analyst-driven ratings to be equally powerful predictors of future performance. When the analyst-driven rating and the quantitative rating agree, we find the ratings to be much more predictive than when they differ. In this way, they provide an excellent second opinion for each other. When the ratings differ, it may be wise to follow the analyst's rating for a truly unique company with its own special situation, and follow the quantitative rating when a company has several reasonable comparable companies and relevant information is flowing at a rapid pace.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

-Further information on Morningstar's conflict of interest policies is available from http://global.morningstar.com/equitydisclosures.

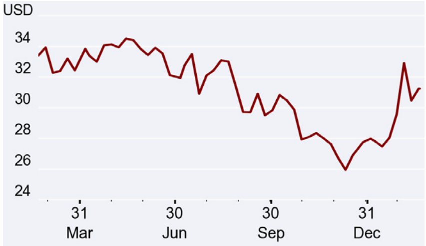
Exelon Corp (EXC)

Pepco = Value Destructive. We assume the deal closes, back to Sell rating.

Sell	**3**
from Neutral	
Price (22 Feb 16)	US$31.61
Target price	US$27.00
Expected share price return	-14.6%
Expected dividend yield	3.9%
Expected total return	**-10.7%**
Market Cap	US$29,079M

Price Performance
(RIC: EXC.N, BB: EXC US)



- **Pepco deal keeps our price target at $27.** Following the Q4 update, our standalone valuation for EXC increased to $28 from our current PT of $27. However, we now incorporate the Pepco deal in our valuation as we expect the deal to get approved. Together with Pepco, our EXC PT stays at $27 as the deal detracts $1/share of value. The reason for this value erosion is that while Pepco adds $5B of equity value to EXC, it also adds $4B of additional parent net debt and 58m shares. With the EXC price now well above our PT of $27, we go back to a SELL rating.
- **Deal EPS accretive but value dilutive. Is that right?** Yes. Our analysis suggests 5, 8 and 11 cents of accretion in 2017, 2018 and 2019, respectively. However, from a value perspective, our stand alone PT reduces by $1. This outcome is possible because: 1) the $1.5B in premium is financed using cheap debt helping EPS but hurting equity value as it increases parent net debt; and 2) the concessions, fees and expenses valued at $500m are ignored for ongoing EPS but reduce value.
- **Is the recent run up in the stock price justified?** We launched with a Sell rating on EXC in September 2015 highlighting weakness of the hybrid business model, a weakening GenCo and a value destructive acquisition. None of these challenges have gone away. We think the positive sentiment of Pepco closing and a higher dividend aren't fundamental value drivers - We go back to our sell rating.
- **Transaction increases leverage at a time when ExGen is weakening.** We forecast EXC's consolidated FFO/Debt going from 25-27% to 20% following the transaction. At a time when ExGen's cash flows and asset life are weakening, we would have preferred EXC retain its financial flexibility.
- **What if the deal is terminated?** We prefer this outcome. We think valuation is higher in this scenario and, more importantly, the balance sheet isn't stretched. Yes, the dividends will need to be lowered but that may happen anyway, just a little later.
- **EXC value CONTINUES to be ALL ABOUT ExGen. We only see further weakness.** ExGen accounts for 35% of value in EXC post Pepco and we believe will continue to be the key driver of the stock. With delays in CPP, weak power prices and likely weakness in PJM capacity prices, we see additional challenges ahead and this is one of the key drivers for our PT and Sell rating.

Pepco Transaction Analysis

Summary

Figure 1. Summary Impact of Pepco Transaction

		Metric	Deal Completed	Deal Terminated
Valuation	↓	- Target Price	- $27	- $28
EPS	↑	- 2017 - 2018 - 2019	- $2.69 - $2.88 - $2.88	- $2.64 - $2.80 - $2.78
Credit	↓	- 2018 FFO/Debt - 2018 Parent debt/Total Debt	- 20.7% - 13.5%	- 26.5% - 1.3%
Dividend	↑	- 2018 Dividend Payout as % of utility earnings	- 77%	- 94%

Source: Citi Research

Figure 2. Financing Implications if Deal is Completed or Terminated

Financing	Amount	Deal Completed	Deal Terminated
Parent notes	$3.3B	- Stays outstanding	- Assumed to be paid down in 2016 - Practically, some ExGen debt will be paid down given parent debt is non-callable
Mandatory Converts	$1.15B	- Converts to $33 shares in 2017	- Shares bought back in 2017 post conversion - Remarketed debt of $1.15B stays outstanding
Shares	$1.87B	- Increased share count by 57.5m shares	- Assumed that 57.5m shares are bought back in Q2, Q3 2016

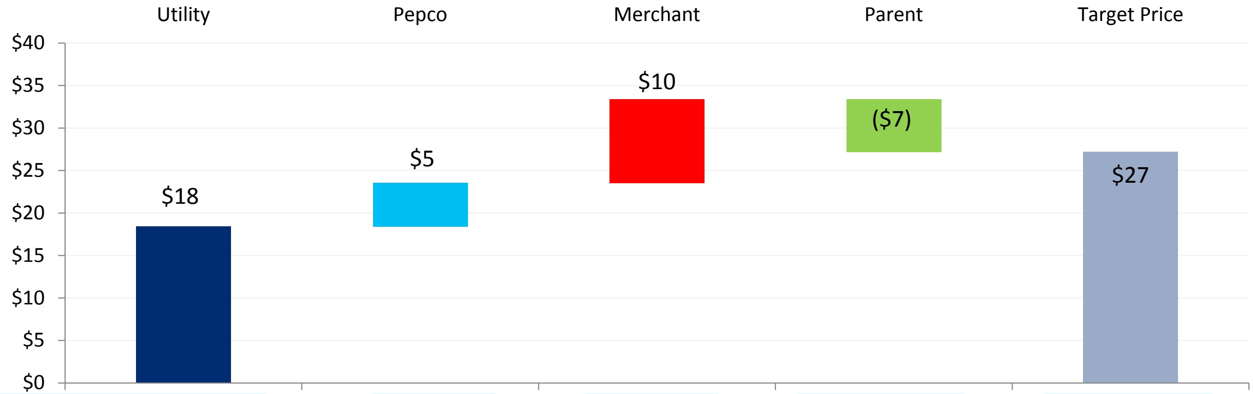
Source: Citi Research

Pepco: Value Impact: ($1) / share

Figure 3 lays out our valuation of Exelon pro forma for the acquisition. The two key factors impacting valuation (vs. standalone) are:

- **Pepco equity value:** Exelon's valuation below represents a $19/share standalone valuation of Pepco which is consistent with its unaffected share price.
- **Parent debt:** The offset to the increased equity value at Pepco is the increase in net debt at Parent and the increase in share count to pay for the acquisition.

Figure 3. EXC Post Merger Valuation ($mm except per share data)



Components	Utility	Pepco	Merchant	Parent	Consolidated
Terminal Multiple	15.0x	15.5x	5.5x		
Discount Rate	6.5%	6.5%	8.5%		
Firm Value	$29,569	$11,020	$17,497		$58,086
Net Debt	(12,534)	(6,260)	(8,382)		(27,175)
Equity Value	$17,034	$4,760	$9,116	($5,749)	$25,162
Share Price	**$18**	**$5**	**$10**	**($6)**	**$27**

Source: Citi Research
Assumed 927 Shares Outstanding

Valuation Bridge – What is driving the reduction in value?

Below is a bridge from EXC's standalone valuation to its pro Forma valuation.

Figure 4. Valuation Bridge from Deal Terminated to Deal Completed EXC ($mm except per share data)

Equity Value as of 9/30/2016	Current	PepCo Adj	Pro Forma
Utilities	$17,034	-	$17,034
PepCo	-	$4,760	$4,760
ExGen	$9,116	-	$9,116
Parent	($1,797)	($3,952)	($5,749)
Total Equity Value	$24,353	$809	$25,162
Shares Outstanding	868	58	926
Value Per Share	**$28**	**($1)**	**$27**

Source: Citi Research

Note that the way to think about the value of the $58m shares is by applying the standalone value of $28/share. Using that math, we value the stock issued at 1.6B (see table below).

Figure 5. Value Impact of Pepco – Approach 2 ($mm except per share data)

Valuation Creation / Destruction From Pepco	
Additional Equity Value from PepCo (1)	$809
Value of Shares issued (2)	($1,613)
Value Creation / (Destruction)	($805)
Value Per Share	**($1)**

Source: Citi Research

[1] Net equity value creation based on Pepco equity value less net debt.

[2] 57m shares times $28/share standalone valuation.

And finally, why is parent net debt going up this much?

EXC already has the financing in place to pay the shareholders of Pepco – see sources and uses below. We think all the money raised is spoken for and the holdco debt will stay outstanding post the deal close. For the converts, we assume that they convert in 2Q of 2017 into 33m of additional EXC shares (conversion price of $35/share, 1.4286 conversion factor) and the remarketed debt is retired using the exercise proceeds.

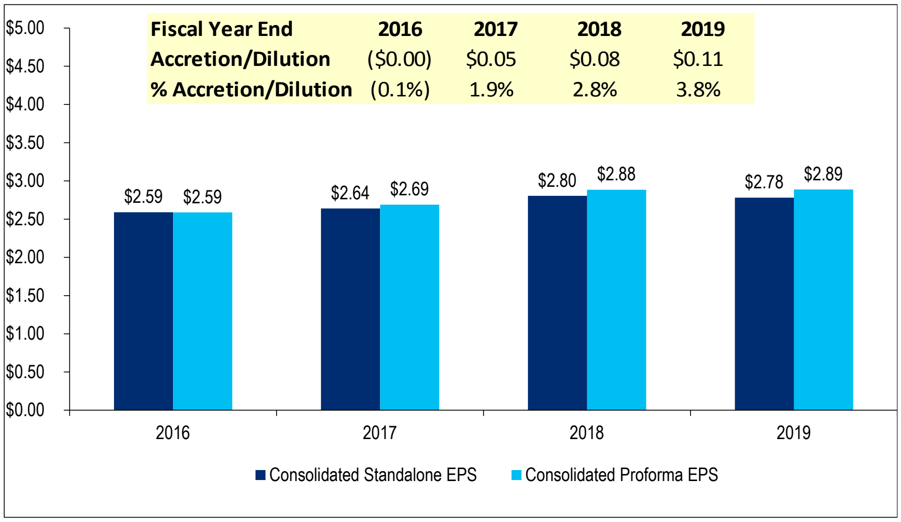
Pepco: EPS Accretive but at what cost?

Figure 8 below shows the EPS both with and without a Pepco deal. Our analysis results in accretion of 5, 8 and 11 cents in 2017, 2018 and 2019 respectively.

Figure 8. Terminated vs Completed EPS and Accretion/Dilution ($ per share)



Fiscal Year End	2016	2017	2018	2019
Accretion/Dilution	($0.00)	$0.05	$0.08	$0.11
% Accretion/Dilution	(0.1%)	1.9%	2.8%	3.8%

Source: Citi Research estimates

Figure 9 below show the drivers for the accretion in 2017 generated primarily by the increased earnings at Pepco net of the impact of increased interest expense and share issuance.

Note that the $430 NPV worth of customer benefits, the $50m of charitable contributions and other fees and expenses are excluded from EPS as one-time impacts.

Figure 9. 2017 EPS Bridge from Terminated to Completed ($ per share)

2017 Segment EPS	Current	PepCo Adj	Pro Forma
Utilities	$1.34	($0.08)	$1.26
PepCo	$0.00	$0.36	$0.36
ExGen	$1.27	($0.08)	$1.19
Parent	($0.03)	($0.14)	($0.17)
Tax Adjustment	$0.05	($0.01)	$0.04
Consolidated	**$2.64**	**$0.05**	**$2.69**

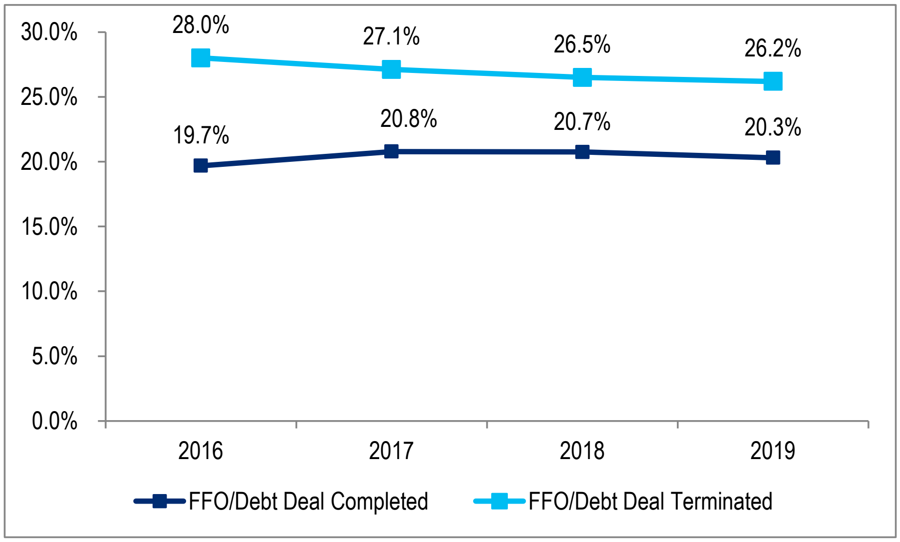
Source: Citi Research

Pepco: Credit clearly Weaker

The transaction weakens the FFO/Debt profile at the consolidated level. We see FFO to debt reducing from 25% down to below 20%. Note that Exelon's current target is 22%. We acknowledge that this decrease in metrics is partially offset with the improved business profile with the increased proportion of utility FFO.

Figure 10 below shows the standalone and proforma FFO/Debt at a consolidated level.

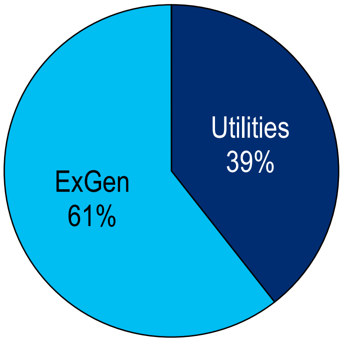
Figure 10. Consolidated FFO/Debt Deal Completed vs. Deal Terminated



Source: Citi Research

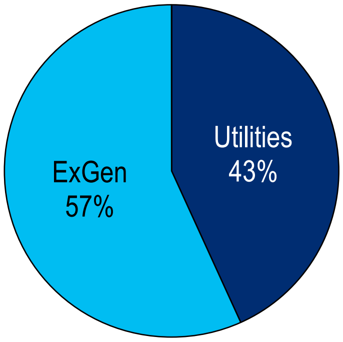
Figure 11 below highlights the improved business profile as reflected in the increased utility contribution to FFO from 39% to 43%.

Figure 11. Relative Contribution to FFO (Deal Terminated) in 2016



Source: Citi Research

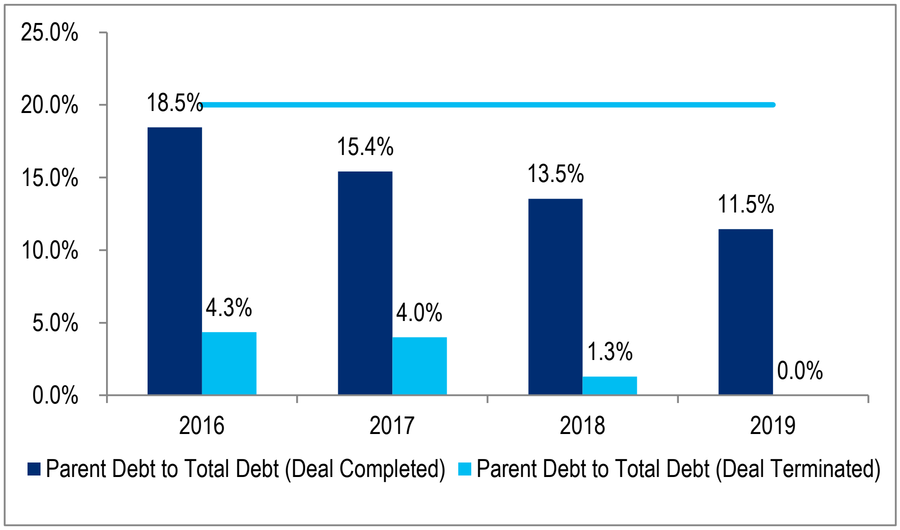
Figure 12. Relative Contribution to FFO (Deal Completed) in 2016



Source: Citi Research

Also note that the parent debt as a percentage of total debt is also increasing following the Pepco transaction. Note that if parent debt goes over 20% of consolidated debt then rating agencies start considering notching down parent credit ratings from the consolidated ratings.

Figure 13. Parent Debt to Total Consolidated Debt Deal Terminated vs. Deal Completed

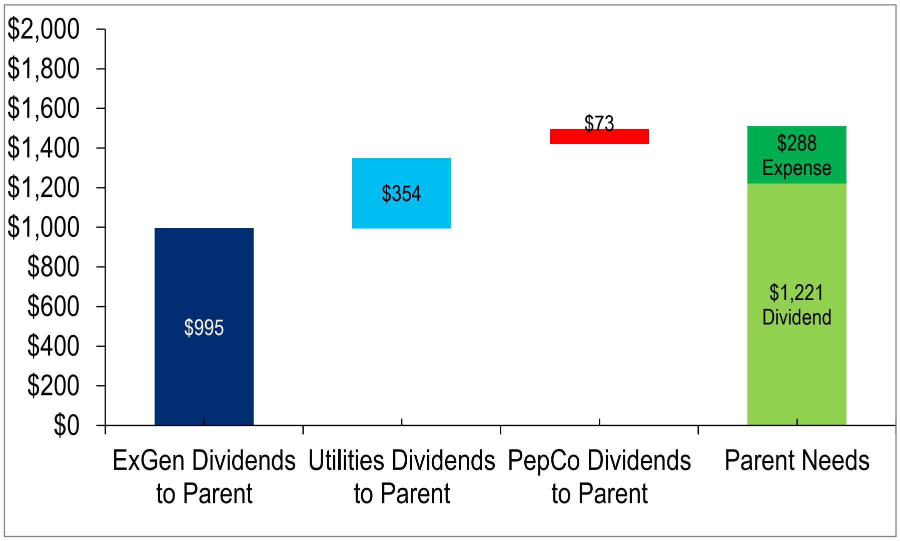


Source: Citi Research

Pepco: Dividend payout improves

Exelon's dividend payout as a percentage of total utility earnings does reduce thanks to the income stream from Pepco. However, the cash flow sources and uses at the parent level do highlight the importance of ExGen and the risks to the story if the ExGen cash flows weaken.

Figure 14. EXC HoldCo Sources and Uses in 2017 ($mm)



Source: Citi Research

We model any shortfall or excess cash as a short term borrowing or debt repayment at the parent level. Tables below show the dividend payout both in a deal completed and a terminated scenario.

Figure 15. Utilities Dividend Coverage Deal Terminated ($ per share)

Source: Citi Research

Pepco Overview and Valuation

POM is comprised of three electric T&D utilities: Potomac, Delmarva (DPL and Atlantic City Electric. In addition to electric, Delmarva has a small gas distribution business (we estimate 290m in rate base at 2014 year end).

Historically, POM struggled to earn up to its allowed state distribution ROEs across all of its utilities, with ACE being the most visible under-earner. The company's relationships with regulators in DC and other jurisdictions have been historically challenging, and up until recently POM lacked contemporaneous recovery mechanisms that could help it eliminate persistent regulatory lag. As such, POM has been relying on annual ratecase filings, cost containing measures and lower investment levels (particularly at ACE) to offset negative impact of their regulatory construct.

Among POM's utilities, ACE has been particularly challenged due to well-advertised weakness in the underlying economy at Atlantic City. ACE has seen negative load growth and restrictive regulatory environment, which throttled its effective earned ROEs into low single digit range. The situation was partially mitigated by 2014-2015 change in tax treatment by the NJ BPU, however ROEs remained depressed.

Citi Projections

We do not expect POM's state earned ROEs to improve dramatically. EXC and POM did not agree to any rate case stay-outs as a part of their settlements, and we expect the strategy of annual rate case filings to continue. We note that POM's FERC rate base is earning formula rate returns, and we expect it to earn close to authorized across all periods. We expect state ROEs to stay flat. Given load growth profile (we assume 0.5% growth at DPL and Pepco and 0% at ACE) and considering projected cost-containment measures (we assume 0% O&M growth and 0.5% property tax creep), maintaining flat ROE will require annual rate increases across all three utilities. Our assumptions and model outputs with respect to POM are summarized in Figure 12.

Figure 17. POM Model Assumptions and Outputs

	DPL	Pepco	ACE
Auth. ROE Auth. Equity Layer	9.70% 49.2%	9.40% 49.2%	8.75% 49.83%
Earned Distr. ROE Forecast 2016-2019	7.3%	8.8%	2.2%
FERC ROE FERC Equity Layer	11.49% 48%	11.65% 50%	11.47% 50%
Earned T&D ROE Forecast: 2016-2019	8.3%	9.3%	4.6%

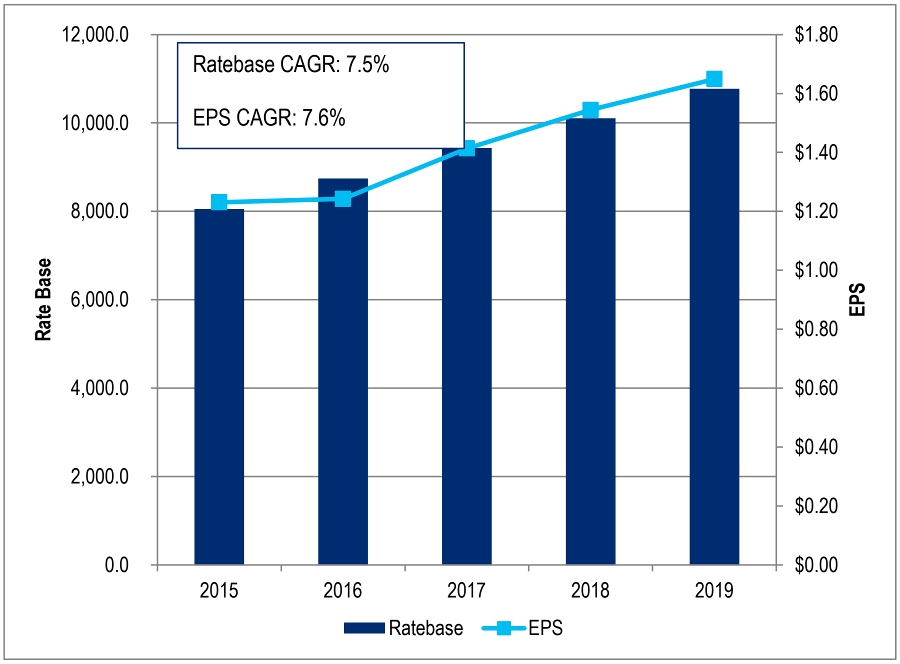
2016	$2.5B	$4.3B	$2.0B
2017	$2.6B	$4.7B	$2.1B
2018	$2.8B	$5.0B	$2.2B
2019	$3.0B	$5.4B	$2.3B
EPS Forecast (standalone):			
2016	$0.42	$0.62	$0.20
2017	$0.48	$0.71	$0.22
2018	$0.55	$0.78	$0.21
2019	$0.58	$0.86	$0.21

Source: Citi Research

Our assumptions translate into 7.5% ratebase CAGR through 2019 and 7.6% theoretical EPS CAGR (calculated using POM flat 254m share count)

Figure 18. POM Ratebase ($mm except per share data) and Earnings Growth



Source: Citi Research

Standalone Valuation

We believe POM's equity is worth $5/share with EXC (assuming 926m shares of EXC after financing). On a standalone basis using POM's sharecount, this value would be $19/share. We use the same DCF approach as with other regulated utilities with 15.5x terminal P/E multiple, which reflects a long-term growth rate of 3.5% which is in line with our view on growth of the average utility post 2019.

Figure 19. POM Standalone Valuation ($mm except per share data)

POM Utility Valuation	12/31/2016	12/31/2017	12/31/2018	12/31/2019

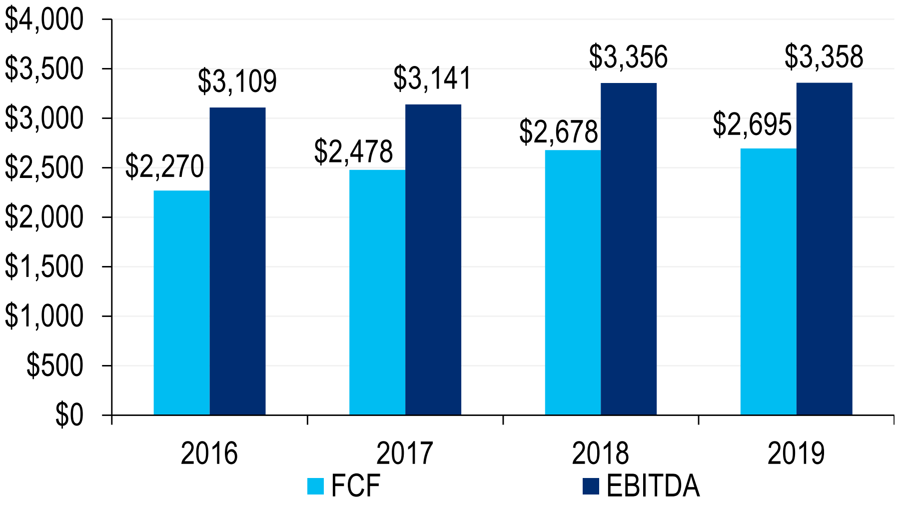
Exelon Generation

Overview

Exelon is one of the hybrids where the generation business is a significant proportion of the total company. ExGen generates over 200TWh of power annually of which 170TWh comes from nuclear generation. ExGen is one of the most respected nuclear operators in the country and generally operates its plants at very high capacity factors.

However, with low baseload prices in Midwest and Mid-Atlantic, ExGen's business has weakened considerably and we do not expect any change in this trajectory. The CP product has provided a boost to ExGen's cash flows with capacity revenues of $1.5B in 2015 going up to $1.8B by 2018. Note that the recent weakness in ISO-NE capacity prices could likely impact PJM as well. While the CP product has been helpful, we see EBITDA remaining flat post 2019 in the $3.1B - $3.3B range

Figure 20. EBITDA and FCF Profile ($mm)



Source: Citi Research

ExGen Valuation

We value ExGen using the following approach:

- DCF through 2019 with a 8.5% WACC and a 5.5x terminal EBITDA multiple
- Our 8.5% WACC is 50bps higher than a standalone IPP given the operational and financial inefficiencies of operating as a hybrid utility
- Our 5.5x terminal EBITDA multiple is based on a 45% unlevered FCF (UFCF) conversion and an assumed 20year asset life. Note that 1.0x of the 5.5x terminal EBITDA multiple is supported by growth related to renewables and some benefit of early plant retirements of Ginna, Clinton and Quad Cities.

Figure 21. ExGen Valuation Summary ($mm except per share data)

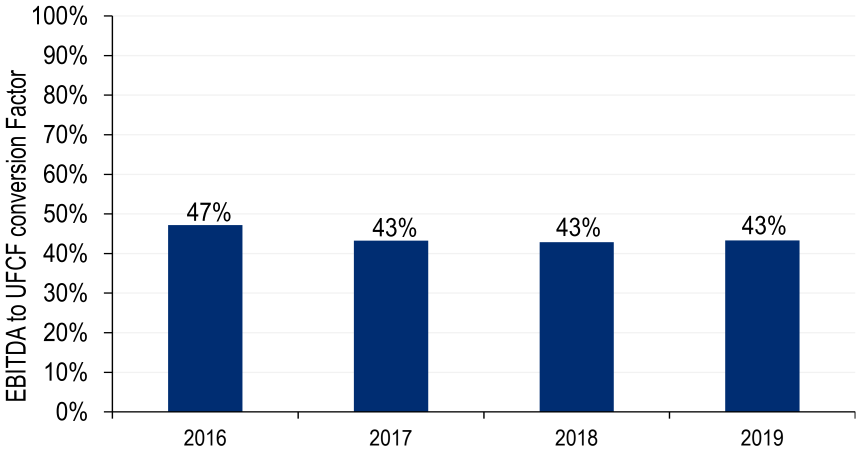
ExGen Valuation	Q4 2016	2017	2018	2019
EBIT	$395	$1,929	$2,069	$1,921
less taxes	(138)	(675)	(724)	(672)
EBIAT	$257	$1,254	$1,345	$1,249
add deferred income taxes	16	21	(70)	(181)
add depreciation	573	2,148	2,130	2,294
Less capex	(756)	(2,575)	(1,950)	(1,850)
Unlevered FCF	$89	$849	$1,455	$1,511
Terminal Value				$18,468

Valuation Summary	**9/30/2016**
Value of cash flows	$3,333
Terminal Value	14,164
Total Firm Value	$17,497
Less Net Debt	(8,382)
Equity Value	$9,116
Shares outstanding	926
Share price	$10

What is the UFCF Conversion?

With high maintenance capex to support nuclear operations and cash taxes, ExGen's unlevered free cash flow conversion (UFCF) is in the 45% range over the forecast period, shown in the chart below.

Figure 22. EBITDA to UFCF Profile

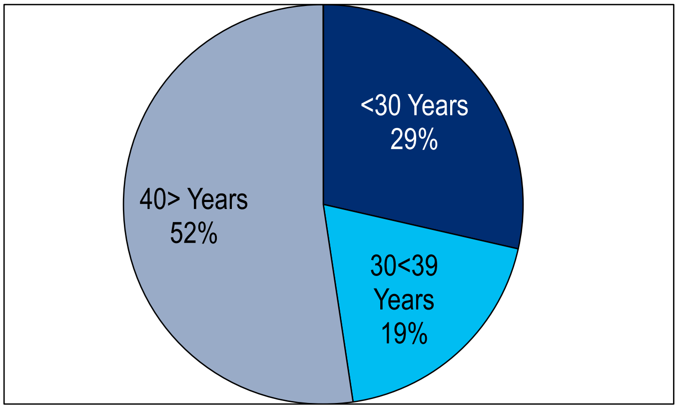


Source: Citi Research

What about asset life?

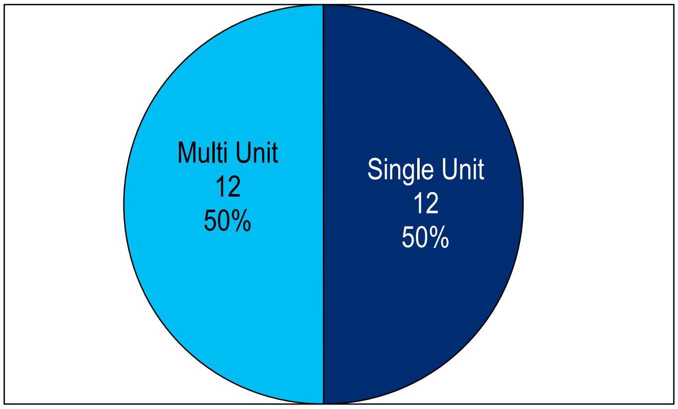
We think the economic life of nuclear assets is challenged by the low power and gas price environment, decreasing load growth and the increasing impact of renewables. This fact, together with the aging fleet of EXC with more than half the fleet greater than 40 years will, we think, limit the average life of this fleet to 20 years.

Figure 23. ExGen - Nuclear Fleet Age



Source: Citi Research

Figure 24. ExGen - Nuclear Fleet Profile

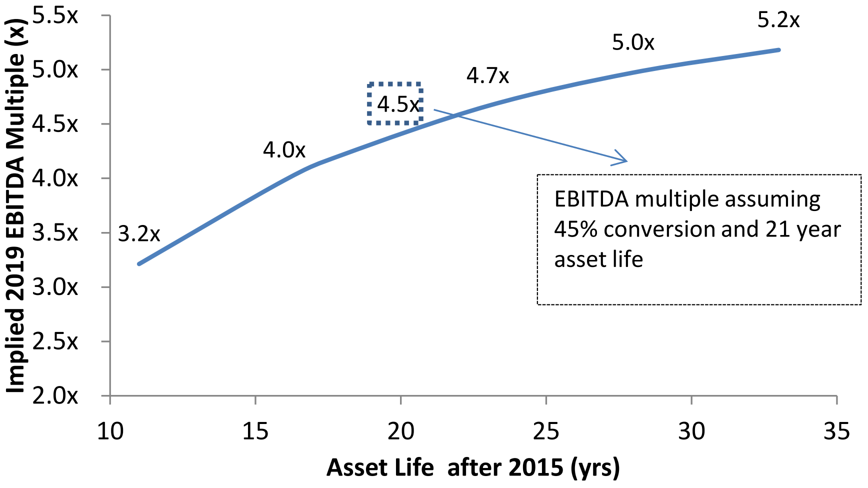


Source: Citi Research

Figure 26 below helps connects the dots between the 45% conversion, the 20year average life and the base terminal multiple we use of 45%.

The line in the figure below represents 45% conversion at varying levels of asset life (x axis) and show the implied terminal EBITDA multiple (y axis).

Figure 25. Case for Terminal Multiple



Asset	Life	ıtion Capacity	Weight	Wtd. Avg.
Nuclear	20	160,063	86%	
Gas/Other	30	25,637	14%	
Total		185,700	100%	21
Conversion level				45%
Implied multiple				**4.5x**

Source: Citi Research

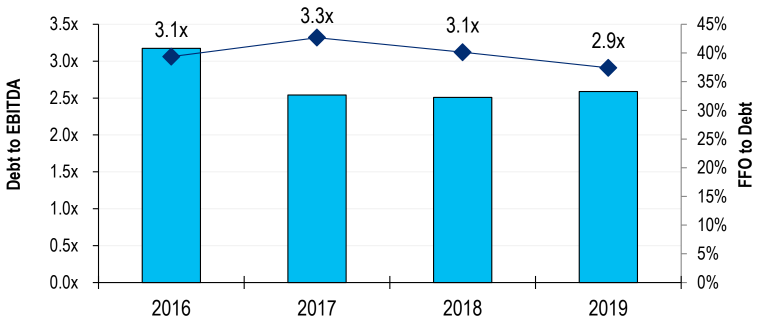
What about ExGen's Leverage?

We think Exelon needs to actively focus on reducing its approximately $10B of leverage at ExGen given the structural weaknesses of nuclear assets and the overall weakness in power and capacity prices.
Note that the average cash cost of nuclear generation is in the $30 - $35/MWh range and at given the current power price trends, many of the smaller single-unit nuclear plants are economically challenged.

We think ExGen should focus on deleveraging not by expecting an EBITDA uplift but by actually paying down some debt. EXC had noted on its last earnings call that they plan to pay down $3.6B of debt by 2020. However, we do not see any free cash flow available at the consolidated level to paydown ExGen debt without raising additional equity.

Based on our EBITDA projections, shown in table below, we believe ExGen will keep its debt-to-ebitda metrics around 2.9-3.1x range. At the same time, we believe FFO-to-debt ratio will come down a bit by 2019 and will settle in 35% range.

Figure 26. Credit Profile



Inputs	Units	2016	2017	2018	2019
FFO	$mm	$3,933	$3,375	$3,353	$3,309
Debt	$mm	9,198	9,393	9,423	9,423
EBITDA	$mm	3,109	3,141	3,356	3,358

Source: Citi Research

Citi's base case scenario does not include any debt pay down.

Byron, Clinton, Quad and Ginna Early Shutdown – Value Implications

We evaluated the financial impact of the early retirement of Clinton, Quad Cities and Ginna as EXC highlights these plants being at most risk related to an early retirement.

- **Byron** is a single unit with net operating capacity of 2347MW. The plant is already obligated to operate through May 2019. Exelon has decided to defer it decision on operations of its Byron plant and will offer it in the 2019/20 auction in May 2016.

- **Clinton** is a single unit plant located in Illinois with 1069MW net capacity. On October 29th, 2015, the company declared deferral of its decision related to future operations of the plant for one year. ExGen plans to bid the plant in MISO capacity auction for 2016/2017 Planning year.

- **Quad Cities** is a two unit plant located in Illinois with 1403MW net capacity. The plant cleared 2017/2018 PJM auction. EXC is planning to operate this unit till atleast May 2018. Exelon has decided to defer it decision on operations of its Quad Cities plant and will offer it in the 2019/20 auction in May 2016.

- **Ginna** is a single unit plant located in New York with 288MW net capacity. The plant is under PPA until March 31, 2017 and its currently under active consideration.

What about the Decommissioning Liabilities?

In case of early retirement, Clinton and Ginna don't meet the NRC minimum funding requirement due to early commencement of decommissioning and Quad Cities would also be at risk. This is because the funds don't get enough time to accrete in value to meet the liability. Given there are different approaches to decommissioning including SAFSTOR the actual liability isn't clear. However, EXC highlights that parental guarantees of $315, $260m and $65m may be needed for Clinton, Ginna and Quad Cities, respectively. ExGen also highlights that some portion of spent fuel management would need to be funded by Generation (Clinton: $165m; Ginna: $115). Given there is still meaningful uncertainty around the costs and type of decommissioning, we don't incorporate the potential additional liability in our analysis.

How much do you save by early decommissioning?

In the table below, we have quantified potential uplift in FCF and value, if these plants were to close in 2017. Our analysis suggests these plants are losing $60m of FCF every year and that shutting down these plants could unlock $560m in value.

Impact of early retirement

We do see $560m of uplift in value from early retirement related to elimination of the negative FCF of these plants. However, after you contrast this uplift with some of the potential decommissioning liabilities, we aren't certain the value uplift will be meaningful.

Exelon Utilities

We have updated our EXC regulated utilities model to reflect reported 2015 figures and impact of bonus depreciation. As a result of the bonus depreciation impact on ratebase, we now see slightly lower EPS profile for the utilities in 2016-2019 timeframe. Our 2016 estimates are within EXC's guidance range. Note that we now model slightly higher capex in 2016-2017 timeframe. The summary of our assumptions and Utilities EPS forecast change is shown below.

Figure 28. EXC Utility Valuation Summary ($mm except per share data)

EXC Utility Valuation	Q4 2016	2017	2018	2019
EBIT	$566	$2,555	$2,728	$2,872

Source: Citi Research

To value the utility business we start by valuing cash flows through 2019, capturing all tax attributes. We then value cash flows beyond 2019 using a 15.0x terminal P/E multiple. To determine the 15.0x terminal P/E multiple, we start with an "average" utility with the following characteristics

- Authorized equity layer of 50%
- Authorized ROE of 10% with minimal regulatory lag and no bonus depreciation
- Growth rate of 3.5% post 2019, going down to 2.5% by twentieth year
- WACC of 6%
- The DCF of this hypothetical utility implies a terminal LTM PE multiple of 15.5x.

To arrive at the 15x multiple of EXC we evaluate the growth EXC's utilities vs. the 'average' utility with the 3.5% growth. The 15x multiple represents a 3.0% long-term growth rate which reduces to 2% over time. We think this growth profile is appropriate given the relatively weak load growth and capex profile.

Exelon Corp

Company description

Exelon Corp (EXC) is an integrated electric and gas utility that operates three utilities in Pennsylvania, Illinois, and Maryland and the largest deregulated nuclear fleet in the United States. Exelon's regulated businesses consist of Commonwealth Edison Company (ComEd) in IL, PECO Energy Company (PECO) in PA, and Baltimore Gas & Electric in MD. Exelon Generation operates the largest nuclear fleet in the United States, with plants located concentrated in the Midwest and the Mid-Atlantic regions.

Investment strategy

We rate the shares of Exelon Corp Sell (3). Our rating is based on concerns around the management team’s strategic vision and execution, downside related to the Pepco transaction, concerns around the economics of Exelon’s nuclear fleet with low unlevered free cash flow conversion (UFCF) of ~45% and a weak utility business with below average growth of ~4% through 2019

Valuation

We value EXC using a sum-of-the-parts approach to get to our $27 target. We value ExGen at $10/share and believe ExGen’s core nuclear assets will continue to experience weak economics. Valuation is based on a 5.5x 2019 EBITDA multiple that is supported by an UFCF conversion of 45%. The utilities business is valued at $18/share based on a 15x terminal PE multiple. We also add $5/share value provided by PepCo. We back out $6/share for the parent to get to our price target

Risks

Commodity price risk affecting merchant generation – If natural gas prices rise, wholesale power prices will likely rise, raising commodity margins.

Exelon is inherently a long natural gas position since natural gas generation sets the price of power in its key generation markets. If forward natural gas prices rise significantly from current prices, Exelon’s earnings will likely exceed our forecasts.

Regulatory risk – All regulated utilities are subject to state and federal regulatory agencies that can materially affect shareholder returns. Failure to obtain fair recovery for capital expenditures or increases in operating costs can diminish returns to shareholders and adversely affect the share price.

Credit rating – Exelon’s generation business is currently two notches above a high yield credit rating, but declining cash flows at the merchant business presents some risk of a possible credit rating downgrade barring deleveraging through an equity issuance, asset sale, or other means. If ExGen’s credit rating is lowered to high yield status, ExGen would likely have to increase their collateral and it could pressure hedging activities going forward, which would reduce our earnings outlook.

If the impact on the company from any of these factors proves to be more negative/positive than we anticipate, the stock will likely have difficulty achieving our financial and price targets.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as investment banking client(s): Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: Exelon Corp.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to Exelon Corp. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 28th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating		
Data current as of 31 Dec 2015	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage	48%	40%	12%
% of companies in each rating category that are investment banking clients	64%	64%	59%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Prior to May 1, 2014 Citi Research may have also assigned a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the geographic and industry sector over a 3 month period. The relative call may have highlighted a specific near-term catalyst or event impacting the company or the market that was anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) may have indicated the most and least preferred stocks in the universe of stocks under consideration, explaining the basis for this short-term view. This three-month view may have been different from and did not affect a stock's fundamental equity rating, which reflected a longer-term total absolute return expectation.

NON-US RESEARCH ANALYST DISCLOSURES
Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below:

Citigroup Global Markets Inc	Praful Mehta; Sophie K Karp; Jesse Chai; Tulkin Niyazov

OTHER DISCLOSURES

The subject company's share price set out on the front page of this Product is quoted as at 22 February 2016 01:04 PM on the issuer's primary market.

Many European regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Citi Research generally disseminates its research to the Firm's global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm's proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author's previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Rule 483, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.
Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product.
Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes the Firm's estimates, data from company reports and feeds from Thomson Reuters. The printed and printable version of the research report may not include all the information (e.g., certain financial summary information and comparable company data) that is linked to the online version available on the Firm's proprietary electronic distribution platforms.

The research data in this report is not intended to be used for the purpose of (a) determining the price or amounts due in respect of one or more financial products or instruments and/or (b) measuring or comparing the performance of a financial product or a portfolio of financial instruments, and any such use is strictly prohibited without the prior written consent of Citi Research. Any unauthorized use, duplication, redistribution or disclosure of this report (the "Product"), including, but not limited to, redistribution of the Product by electronic mail, posting of the Product on a website or page, and/or providing to a third party a link to the Product, is prohibited by law and will result in prosecution. The information contained in the Product is intended solely for the recipient and may not be further distributed by the recipient to any third party. Where included in this report, MSCI sourced information is the exclusive property of Morgan Stanley Capital International Inc. (MSCI). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be reproduced, redisseminated or used to create any financial products, including any indices. Contents

Analyst Note 22 Feb 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Pepco reported in-line 2015 earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining the approval of the District of Columbia Public Service Commission and being completed following an agreement with D.C. Mayor Muriel Bowser that sweetened the benefits for customers and provided other benefits to the district.

Pepco Holdings or Exelon may terminate the merger agreement if the D.C. commission fails to issue a final order approving the merger without condition or modification of the terms of the settlement agreement by March 4. Exelon has made clear that if the D.C. commission does not approve the deal by March 4, it will terminate the agreement. However, Exelon's CEO recently said he believes D.C. will approve the transaction at its next meeting before the termination date.

Pepco reported 2015 adjusted operating earnings of $1.28, in line with our estimate and up from $1.27 per share in 2014. Earnings were favorably affected by rate increases due to infrastructure investment, partially offset by higher operation and maintenance expenses.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers at Commonwealth Edison (Illinois), PECO (Pennsylvania), and Baltimore Gas & Electric (Maryland). Exelon also owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. Exelon also is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

-Further information on Morningstar's conflict of interest policies is available from http://global.morningstar.com/equitydisclosures.

If you wish to obtain further information regarding previous Reports and recommendations and our services, please contact your local Morningstar office.

Unless otherwise provided in a separate agreement, you may use this Report only in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of this document is Morningstar Inc. Redistribution, in any capacity, is prohibited without permission. The information, data, analyses and opinions presented herein do not constitute investment advice; are provided solely for informational purposes and therefore are not an offer to buy or sell a security; and are not warranted to be correct, complete or accurate, nor may they be construed as a representation regarding the legality of investing in the security/ies concerned, under the applicable investment or similar laws or regulations of any person or entity accessing this report. The opinions expressed are as of the date written and are subject to change without notice. Except as otherwise required by law, Morningstar, its affiliates, and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions or their use. You should seek the advice of your financial, legal, tax, business and/or other consultant, and read all relevant issue documents pertaining to the security/ies concerned, including without limitation, the detailed risks involved in the investment, before making an investment decision.

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. As the price / value / interest rate of a security fluctuates, the value of your investments in the said security, and in the income, if any, derived therefrom may go up or down.

For Recipients in Australia: This report has been authorized by the Head of Equity and Credit Research, Asia Pacific, Morningstar Australasia Pty Limited and is circulated pursuant to RG 79.26(f) as a full restatement of an original report (by the named Morningstar analyst) which has already been broadly distributed. To the extent the report contains general advice it has been prepared without reference to your objectives, financial situation or needs. You should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. Refer to our Financial Services Guide (FSG) for more information at www.morningstar.com.au/fsg.pdf.

For Recipients in Hong Kong: The research is distributed by Morningstar Investment Management Asia Limited, which is regulated by the Hong Kong Securities and Futures Commission to provide services to professional investors only. Neither Morningstar Investment Management Asia Limited, nor its representatives, are acting or will be deemed to be acting as an investment advisor to any recipients of this information unless expressly agreed to by Morningstar Investment Management Asia Limited. Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs and generate large profits even with currently depressed power prices.
- Higher natural gas and coal prices, rising electricity demand and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.
- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.
- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow moat distribution earnings.
- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

Pepco Reports In-Line 2015 Earnings; Exelon Believes D.C. Will Approve Merger by March 4

Travis Miller, Sector Director, 06 October 2015

Investment Thesis

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and made a $12 billion bid for Pepco in April 2014, both including debt. Management's political negotiations appear to have revived the deal in Washington, D.C., where regulators had rejected it in August 2015. We now expect it has a 75% chance of closing. Exelon has received all other regulatory approvals.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our outlook for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can grow earnings 10% annually the next three years.

Charles Fishman, CFA, Eq. Analyst, 22 February 2016

Analyst Note

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Pepco reported in-line 2015 earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining the approval of the District of Columbia Public Service Commission and being completed following an agreement with D.C. Mayor Muriel Bowser that sweetened the benefits for customers and provided other benefits to the district.

Pepco Holdings or Exelon may terminate the merger agreement if the D.C. commission fails to issue a final order approving the merger without condition or modification of the terms of the settlement agreement by March 4. Exelon has made clear that if the D.C. commission does not approve the deal by March 4, it will terminate the agreement. However, Exelon's CEO recently said he believes D.C. will approve the transaction at its next meeting before the termination date.

Pepco reported 2015 adjusted operating earnings of $1.28, in line with our estimate and up from $1.27 per share in 2014. Earnings were favorably affected by rate increases due to infrastructure investment, partially offset by higher operation and maintenance expenses.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Economic Moat

Travis Miller, Sector Director, 06 October 2015

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat characteristics, with returns on capital above costs of capital for the foreseeable future. However, that spread

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★ 25 Feb 2016	31.98 USD 25 Feb 2016	35.00 USD	0.91	3.88 25 Feb 2016	29.42 25 Feb 2016	Utilities - Diversified	Standard

Close Competitors	Currency (Mil)	Market Cap	TTM Sales	Operating Margin	TTM/PE
Public Service Enterprise Group Inc PEG	USD	22,131	10,910	29.67	12.05
FirstEnergy Corp FE	USD	14,383	15,026	15.25	24.75
Entergy Corp ETR	USD	13,245	11,836	2.32	0.00

between long-term returns on capital and Exelon's cost of capital have shrunk based on our midcycle outlook for power prices in the eastern U.S. Exelon's increasing diversification into narrow- and no-moat businesses together with the shrinking returns at its nuclear generation business supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources like coal and natural gas reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must continue to have access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Valuation

Travis Miller, Sector Director, 06 October 2015

We are reaffirming our $35 per share fair value estimate after raising our probability of the Pepco acquisition closing to 75% from 25% as a result of an agreement the companies reportedly reached with the Washington, D.C., mayor's office on Oct. 6. Although we think the deal is value-dilutive, it is too small to have a material impact on our fair value estimate. Exelon's $27.25-per-share cash offer represents a 30% premium to our $21 per share standalone fair value estimate for Pepco.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities (Ill.), Oyster Creek (N.J.), and Three Mile Island (Pa.)--as well as the Clinton (Ill.) plant. We now assume a 50% probability that the Byron (Ill.) plant will retire given it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is 50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★ 25 Feb 2016	31.98 USD 25 Feb 2016	35.00 USD	0.91	3.88 25 Feb 2016	29.42 25 Feb 2016	Utilities - Diversified	Standard

Our midcycle earnings forecast at Exelon Generation is based on a $4/mcf midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

We assume a 9% cost of equity and a 7.1% cost of capital. Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Risk

Travis Miller, Sector Director, 06 October 2015

Investors should pay the most attention to political developments that would re-regulate competitive electricity markets in the Midwest and Mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source.

As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket.

Reregulation also would destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.

As Exelon's regulated utilities generate a greater share of earnings, investors will be subject more acutely to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management

Travis Miller, Sector Director, 06 October 2015

We give Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities.

President and CEO Chris Crane and Executive Chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and Chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition in 2015. This will increase Exelon's share of regulated utilities earnings and dilute shareholders' exposure to wholesale power markets. Management has shown strong conviction in the value of the deal based on their efforts to gain support for the deal from all parties, particularly in Washington, D.C.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants absent significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creation opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8

million shares or vested options as of January 2015.

Pepco Reports In-Line 2015 Earnings; Exelon Believes D.C. Will Approve Merger by March 4

Charles Fishman, Eq. Analyst, 22 February 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Pepco reported in-line 2015 earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining the approval of the District of Columbia Public Service Commission and being completed following an agreement with D.C. Mayor Muriel Bowser that sweetened the benefits for customers and provided other benefits to the district.

Pepco Holdings or Exelon may terminate the merger agreement if the D.C. commission fails to issue a final order approving the merger without condition or modification of the terms of the settlement agreement by March 4. Exelon has made clear that if the D.C. commission does not approve the deal by March 4, it will terminate the agreement. However, Exelon's CEO recently said he believes D.C. will approve the transaction at its next meeting before the termination date.

Pepco reported 2015 adjusted operating earnings of $1.28, in line with our estimate and up from $1.27 per share in 2014. Earnings were favorably affected by rate increases due to infrastructure investment, partially offset by higher operation and maintenance expenses.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Supreme Court Validates Our View That Carbon Regulation Remains Highly Uncertain

Travis Miller, Sector Director, 11 February 2016

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court's decision comes as good news for coal miners that haven't had any for some time. However, we don't view today's announcement as a panacea for the coal industry's woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn't changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody's high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Exelon Surprises With 2.5% Dividend Growth Target

Travis Miller, Sector Director, 03 February 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Supreme Court Sides With Demand Response; No Fair Value Impacts

Andrew Bischof, CFA, Eq. Analyst, 25 January 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal

Travis Miller, Sector Director, 11 November 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the 2017-18 reduction was based on Pepco's reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals

Travis Miller, Sector Director, 30 October 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year

Charles Fishman, Eq. Analyst, 26 October 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C. commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco

Charles Fishman, Eq. Analyst, 06 October 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners

Charles Fishman, Eq. Analyst, 30 September 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Postpones Nuclear Plant Retirement Decision; No Fair Value Impact

Travis Miller, Sector Director, 10 September 2015

We are reaffirming our $35 per share fair value estimate for Exelon after management announced it will delay a decision whether to close at least three of its struggling nuclear plants. We recently incorporated into our fair value estimate and financial projections the assumption that it was more likely than not that Exelon would close those three plants in 2018. We also assume a 50% likelihood that Exelon will close its Byron (Illinois) nuclear plant in 2019.

Results of the recent 2016-18 PJM transitional capacity auctions and management's decision to delay potential retirements do not change our assumptions that those plants ultimately will close, absent significant energy market or public policy changes. The Quad Cities (Illinois), Three Mile Island (Pennsylvania), and Oyster Creek (New Jersey) plants are obligated to run at least through mid-2018, and the Byron plant is obligated to run through mid-2019 based on results from PJM's recent capacity auctions.

The key development for Exelon in last week's 2017-18 transitional capacity auction was that the Quad Cities and Byron plants cleared and are now obligated to run. Neither cleared PJM's 2017-18 base capacity auction last year at $120/megawatt-day but did clear last week's capacity performance transitional auction at $151.50/MW-day. Including those plants and the uplift for the rest of the fleet adds about $400 million of EBITDA in 2017-18.

The Clinton (Illinois) plant is the fourth that we assume will close by 2018. It is not part of PJM. It is obligated to run at least through 2016 as part of the Mid-Continent ISO. Exelon continues to lobby Illinois politicians to adopt a subsidy-like scheme that would improve the economics for its six Illinois nuclear plants. We do not include any benefits from policy changes in our fair value estimate.

Morningstar Equity Research Methodology

Fundamental Analysis

At Morningstar, we believe buying shares of superior businesses at a discount and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are our primary focus. Occasionally, this approach causes our recommendations to appear out of step with the market, but willingness to be contrarian is an important source of outperformance and a benefit of Morningstar's independence. Our analysts conduct primary research to inform our views on each firm's moat, fair value and uncertainty.

Economic Moat

The economic moat concept is a cornerstone of Morningstar's investment philosophy and is used to distinguish high-quality companies with sustainable competitive advantages. An economic moat is a structural feature that allows a firm to sustain excess returns over a long period of time. Without a moat, a company's profits are more susceptible to competition. Companies with narrow moats are likely to achieve normalized excess returns beyond 10 years while wide-moat companies are likely to sustain excess returns beyond 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe lower-quality no-moat companies will see their returns gravitate toward the firm's cost of capital more quickly than companies with moats will. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

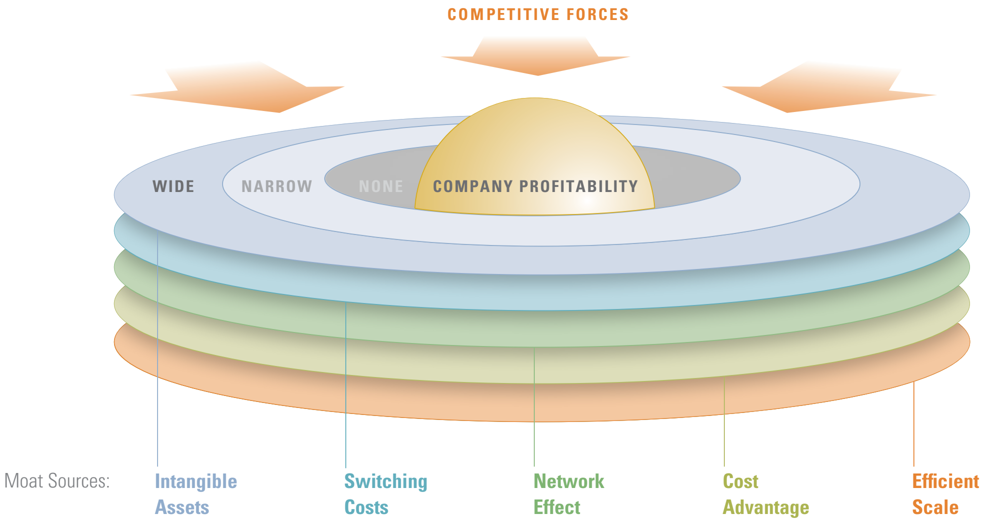
Fair Value Estimate

Our analyst-driven fair value estimate is based primarily on Morningstar's proprietary three-stage discounted cash flow model. We also use a variety of supplementary fundamental methods to triangulate a company's worth, such as sum-of-the-parts, multiples, and yields, among others. We're looking well beyond next quarter to determine the cash-generating ability of a company's assets because we believe the market price of a security will migrate toward the firm's intrinsic value over time. Economic moats are not only an important sorting mechanism for quality in our framework, but the designation also directly contributes to our estimate of a company's intrinsic value through sustained excess returns on invested capital.

Uncertainty Rating

The Morningstar Uncertainty Rating demonstrates our assessment of a firm's cash flow predictability, or valuation risk. From this rating, we determine appropriate margins of safety: The higher the uncertainty, the wider the margin of safety around our fair value estimate before our recommendations are triggered. Our uncertainty ratings are low, medium, high, very high, and extreme. With each uncertainty rating is a corresponding set of price/fair value ratios that drive our recommendations: Lower price/fair value ratios (<1.0) lead to positive recommendations, while higher price/fair value

Economic Moat



Morningstar Equity Research Methodology

ratios (>1.0) lead to negative recommendations. In very rare cases, the fair value estimate for a firm is so unpredictable that a margin of safety cannot be properly estimated. For these firms, we use a rating of extreme. Very high and extreme uncertainty companies tend to have higher risk and volatility.

Quantitatively Driven Valuations

To complement our analysts' work, we produce Quantitative Ratings for a much larger universe of companies. These ratings are generated by statistical models that are meant to divine the relationships between Morningstar's analyst-driven ratings and key financial data points. Consequently, our quantitative ratings are directly analogous to our analyst-driven ratings.

Quantitative Fair Value Estimate (QFVE): The QFVE is analogous to Morningstar's fair value estimate for stocks. It represents the per-share value of the equity of a company. The QFVE is displayed in the same currency as the company's last close price.

Valuation: The valuation is based on the ratio of a company's quantitative fair value estimate to its last close price.

Quantitative Uncertainty: This rating describes our level of uncertainty about the accuracy of our quantitative fair value estimate. In this way it is analogous to Morningstar's fair value uncertainty ratings.

Quantitative Economic Moat: The quantitative moat rating is analogous to Morningstar's analyst-driven economic moat rating in that both are meant to describe the strength of a firm's competitive position.

Understanding Differences Between Analyst and Quantitative Valuations

If our analyst-driven ratings did not sometimes differ from our quantitative ratings, there would be little value in producing both. Differences occur because our quantitative ratings are essentially a highly sophisticated analysis of the analyst-driven ratings of comparable companies. If a company is unique and has few comparable companies, the quantitative model will have more trouble assigning correct ratings, while an analyst will have an easier time recognizing the true characteristics of the company. On the other hand, the quantitative models incorporate new data efficiently and consistently. Empirically, we find quantitative ratings and analyst-driven ratings to be equally powerful predictors of future performance. When the analyst-driven rating and the quantitative rating agree, we find the ratings to be much more predictive than when they differ. In this way, they provide an excellent second opinion for each other. When the ratings differ, it may be wise to follow the analyst's rating for a truly unique company with its own special situation, and follow the quantitative rating when a company has several reasonable comparable companies and relevant information is flowing at a rapid pace.

Price/Fair Value Morningstar data as of Feb 25, 2016

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Three upcoming DB Utilities & Power / Energy corporate access events

We wanted to highlight three pending DB Utilities & Power / Energy Corporate Access Events in case you missed them.

February 26 – White & Case call on FERC issues, focus on OH PPA complaints

This Friday (2/26) at 2pm we will be hosting a call with Dan Hagan and Jane Rueger, Partner and Counsel from White & Case specializing in FERC issues. We expect this call to be of general interest for utility clients and in particular for those focused on the legal merits of pending complaints against AEP and FE regarding their proposed PPAs in Ohio. In these complaints, a group of generators and retail providers filed in late January asking FERC to withdraw previously granted waivers on affiliate power sales restrictions and to review AEP and FE's affiliate PPAs under the FERC's Edgar and Allegheny standards. We expect to discuss procedural considerations, the likelihood of whether FERC would withdraw the waivers, and relevant precedents, such as the Edgar and Allegheny decisions. Other relevant industry topics may also be discussed. Our team or DB sales can provide dial-in details for this call to DB clients on request.

March 2 – State of Global Oil, Gas & Refining Markets Event with Dr. Gary Ross (PIRA) and Wood Mackenzie

On Wednesday next week our energy sector colleagues are hosting an event at our offices (60 Wall Street) featuring Dr. Gary Ross, Founder and Executive Chairman of PIRA Energy Group who also heads up the PIRA Global Oil Group. The event will also feature expert speakers from Wood Mackenzie on Global oil and refining markets as well as North America natural gas. The DB event will run from 12.30pm to 3.30pm and the location will be particularly convenient for those attending the Exxon Mobil analyst meeting at the NYSE that morning. Further details are available from your DB Sales contact or Mike Sullivan in our equity specialty sales group (michael.sullivan@db.com).

April 4-6 – California Utilities & Power Field Trip

We continue to register interest in our California Field Trip and the initial request deadline is coming up soon on March 1. Since we first highlighted this trip we added a meeting with the intervenor group TURN (The Utility Reform Network). Other meetings are unchanged: Sempra (SRE), Edison International (EIX), PG&E Corp. (PCG), Sunrun (RUN), CPUC (President Picker, Commissioner Florio) and the Office of Ratepayer Advocates (ORA). Please contact DB sales or our team soon if you have interest in joining this trip.

Morningstar Analysis

Investment Thesis 06 Oct 2015

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and made a $12 billion bid for Pepco in April 2014, both including debt. Management's political negotiations appear to have revived the deal in Washington, D.C., where regulators had rejected it in August 2015. We now expect it has a 75% chance of closing. Exelon has received all other regulatory approvals.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our outlook for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can grow earnings 10% annually the next three years.

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers at Commonwealth Edison (Illinois), PECO (Pennsylvania), and Baltimore Gas & Electric (Maryland). Exelon also owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. Exelon also is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

Morningstar Analysis

Pepco Reports In-Line 2015 Earnings; Exelon Believes D.C. Will Approve Merger by March 4 22 Feb 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Pepco reported in-line 2015 earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining the approval of the District of Columbia Public Service Commission and being completed following an agreement with D.C. Mayor Muriel Bowser that sweetened the benefits for customers and provided other benefits to the district.

Pepco Holdings or Exelon may terminate the merger agreement if the D.C. commission fails to issue a final order approving the merger without condition or modification of the terms of the settlement agreement by March 4. Exelon has made clear that if the D.C. commission does not approve the deal by March 4, it will terminate the agreement. However, Exelon's CEO recently said he believes D.C. will approve the transaction at its next meeting before the termination date.

Pepco reported 2015 adjusted operating earnings of $1.28, in line with our estimate and up from $1.27 per share in 2014. Earnings were favorably affected by rate increases due to infrastructure investment, partially offset by higher operation and maintenance expenses.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Valuation, Growth and Profitability 06 Oct 2015

We are reaffirming our $35 per share fair value estimate after raising our probability of the Pepco acquisition closing to 75% from 25% as a result of an agreement the companies reportedly reached with the Washington, D.C., mayor's office on Oct. 6. Although we think the deal is value-dilutive, it is too small to have a material impact on our fair value estimate. Exelon's $27.25-per-share cash offer represents a 30% premium to our $21 per share standalone fair value estimate for Pepco.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities (Ill.), Oyster Creek (N.J.), and Three Mile Island (Pa.)--as well as the Clinton (Ill.) plant. We now assume a 50% probability that the Byron (Ill.) plant will retire given it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is 50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Our midcycle earnings forecast at Exelon Generation is based on a $4/mcf midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

We assume a 9% cost of equity and a 7.1% cost of capital.

Price/Fair Value Morningstar data as of Feb 25, 2016

Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Scenario Analysis

We assign a medium uncertainty rating. Exelon's higher-than-average degree of operating leverage and exposure to volatile power markets leads to a wider range of outcomes in our base, high, and low scenarios. A $5 per megawatt-hour average move in our midcycle power price assumptions with no change in retail margins results in a 15% change in our open midcycle EPS estimate and an $800 million change in EBITDA. Our fair value estimate would change by $6 per share. On a mark-to-market basis as of early August, our fair value estimate would be $31 per share and our midcycle EPS would be $3.00.

If we reduce our assumption for the operating efficiency and utilization of Exelon's nuclear power plants by 2 percentage points to near the industry average, it would change our fair value estimate by $3 per share. If Exelon does not retire the Clinton, Quad Cities, and Byron plants, it would add $3 per share to our fair value estimate.

At the retail segment, every 100 basis points of long-term normalized margin expansion generates $100 million of pretax margin and $1 per share of value.

A 50-basis-point change in our cost of equity changes our fair value estimate by $4 per share.

Economic Moat

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat characteristics, with returns on capital above costs of capital for the foreseeable future. However, that spread between long-term returns on capital and Exelon's cost of capital have shrunk based on our midcycle outlook for power prices in the eastern U.S. Exelon's increasing diversification into narrow- and no-moat businesses together with the shrinking returns at its nuclear generation business supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources like coal and natural gas reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must continue to have access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Moat Trend

We assign Exelon a stable moat trend. The regulatory environments in Illinois, Pennsylvania, and Maryland have stabilized, allowing its distribution utilities to earn more favorable returns. In the power markets, Exelon faces both positive and negative trend developments. We expect returns on capital will continue to face pressure from cheap gas moving west and increasing renewable energy penetration. However, environmental regulations, coal plant closures, and capacity market changes should help returns on capital. On balance, we think these positive and negative dynamics offset each other.

Since the retail supply business is relatively new following power market deregulation in the early 2000s, we're watching to see if any company can build a sustainable competitive advantage. Exelon and others are proving there are some scale and cost advantages, particularly in marketing, customer aggregation, risk mitigation, and supply costs.

The one path we see to achieve excess returns in the supply business is to match customer load with wholesale generation. As liquidity has dried up in power markets, it is increasingly difficult and costly to hedge future expected generation. A retail supply business can improve hedging opportunities by reducing collateral and trading costs. This could give a retail supplier a low-cost advantage. As the nation's largest wholesale power generator and retail supplier, Exelon is well positioned to take advantage of these wholesale-retail pairing benefits.

Bulls Say/Bears Say

Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs and generate large profits even with currently depressed power prices.
- Higher natural gas and coal prices, rising electricity demand and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.
- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.
- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow moat distribution earnings.
- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

Financial Health

Exelon's biggest challenge is warding off cash constraints in unfavorable power markets. The 2007-08 commodity boom led management to raise the dividend and buy back stock. But as power markets have fallen from their 2008 peaks, the company has focused on preserving its investment-grade credit rating. In 2011, the board spent $2.1 billion to reduce its pension liabilities instead of reinstating a $1.5 billion share-repurchase plan approved in September 2008 but never executed. In February 2013, the board cut the dividend 41% to $1.24 per share annualized, freeing up $740 million in annual cash flow. We expect the dividend to stay at this level for at least the next two years.

The Pepco acquisition would increase consolidated leverage, but most of that additional leverage will be debt at the regulated utilities. We don't expect a material change in parentco or Exelon Generation leverage.

We think Exelon will have sufficient cash coverage to keep its investment-grade credit rating and current dividend at least through 2016 based on current market conditions. Even through these lean years, we expect Exelon can generate at least $2 billion of cash flow after incorporating new financing and excluding discretionary growth investments. We project Exelon's consolidated EBITDA/interest coverage will drop from 9 times in 2011 to 6 times by 2015 and leverage to rise to 3.4 times debt/EBITDA in 2015 from 2 times in 2011.

More than half of Exelon's consolidated debt is secured at the regulated utilities. This is in line with the utilities' regulator-approved capital structure, and we don't expect a material change. Apart from the utilities, Exelon has an average $485 million of annual debt maturities at Exelon Generation through 2017. As long as power markets remain relatively stable and Exelon can maintain its investment-grade ratings, we don't expect it to have trouble refinancing those maturities.

Exelon's pension and nuclear decommissioning funds are well-funded now, but if interest rates stay low, Exelon could have to contribute more cash.

Enterprise Risk

Investors should pay the most attention to political developments that would re-regulate competitive electricity markets in the Midwest and Mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source. As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket.Reregulation also would destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.As Exelon's regulated utilities generate a greater share of earnings, investors will be subject more acutely to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management 06 Oct 2015

We give Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities.

President and CEO Chris Crane and Executive Chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and Chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition in 2015. This will increase Exelon's share of regulated utilities earnings and dilute shareholders' exposure to wholesale power markets. Management has shown strong conviction in the value of the deal based on their efforts to gain support for the deal from all parties, particularly in Washington, D.C.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants absent significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creation opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon

formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8 million shares or vested options as of January 2015.

Analyst Notes

Supreme Court Validates Our View That Carbon Regulation Remains Highly Uncertain 11 Feb 2016

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court's decision comes as good news for coal miners that haven't had any for some time. However, we don't view today's announcement as a panacea for the coal industry's woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn't changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody's high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Exelon Surprises With 2.5% Dividend Growth Target 03 Feb 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Supreme Court Sides With Demand Response; No Fair Value Impacts 25 Jan 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Independent power producers and diversified utilities are trading at a significant discount to our fair value estimates, and the Supreme Court's ruling has no material impact on our long-term thesis. We believe the market reaction was overly pessimistic to the ruling and presents a buying opportunity for those with the appropriate risk appetite. We highlight Dynegy and Exelon as those with the most exposure to PJM. Calpine, FirstEnergy, NRG Energy, and Public Service Enterprise Group also have material levels of generation in PJM.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal 11 Nov 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the 2017-18 reduction was based on Pepco's reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals 30 Oct 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year 26 Oct 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

Exelon Corp EXC (NYSE) | ★★★

31.98 USD	35.00 USD	24.50 USD	47.25 USD	Medium	Narrow	Stable	Standard	Utilities - Regulated

Analyst Notes

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C. commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco 06 Oct 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners 30 Sep 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same

Exelon Corp EXC (NYSE) | ★★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Industry Group
31.98 USD	35.00 USD	24.50 USD	47.25 USD	Medium	Narrow	Stable	Standard	Utilities - Regulated

Analyst Notes

incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Postpones Nuclear Plant Retirement Decision; No Fair Value Impact 10 Sep 2015

We are reaffirming our $35 per share fair value estimate for Exelon after management announced it will delay a decision whether to close at least three of its struggling nuclear plants. We recently incorporated into our fair value estimate and financial projections the assumption that it was more likely than not that Exelon would close those three plants in 2018. We also assume a 50% likelihood that Exelon will close its Byron (Illinois) nuclear plant in 2019.

Results of the recent 2016-18 PJM transitional capacity auctions and management's decision to delay potential retirements do not change our assumptions that those plants ultimately will close, absent significant energy market or public policy changes. The Quad Cities (Illinois), Three Mile Island (Pennsylvania), and Oyster Creek (New Jersey) plants are obligated to run at least through mid-2018, and the Byron plant is obligated to run through mid-2019 based on results from PJM's recent capacity auctions.

The key development for Exelon in last week's 2017-18 transitional capacity auction was that the Quad Cities and Byron plants cleared and are now obligated to run. Neither cleared PJM's 2017-18 base capacity auction last year at $120/megawatt-day but did clear last week's capacity performance transitional auction at $151.50/MW-day. Including those plants and the uplift for the rest of the fleet adds about $400 million of EBITDA in 2017-18.

The Clinton (Illinois) plant is the fourth that we assume will close by 2018. It is not part of PJM. It is obligated to run at least through 2016 as part of the Mid-Continent ISO. Exelon continues to lobby Illinois politicians to adopt a subsidy-like scheme that would improve the economics for its six Illinois nuclear plants. We do not include any benefits from policy changes in our fair value estimate.

Research Methodology for Valuing Companies

Components of Our Methodology

- Economic Moat™ Rating
- Moat Trend™ Rating
- Moat Valuation
- Three-Stage Discounted Cash Flow
- Weighted Average Cost of Capital
- Fair Value Estimate
- Scenario Analysis
- Uncertainty Ratings
- Margin of Safety
- Consider Buying/Selling
- Stewardship Rating

We believe that a company's intrinsic worth results from the future cash flows it can generate.
The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth. Four key components drive the Morningstar rating: our assessment of the firm's economic moat, our estimate of the stock's fair value, our uncertainty around that fair value estimate and the current market price. This process ultimately culminates in our single-point star rating. Underlying this rating is a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's equity analysts.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our actual calculation of our fair value estimates. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns on invested capital over at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. The assumptions that we make about a firm's economic moat play a vital role in determining the length of "economic outperformance" that we assume in the terminal sections of our valuation model. To assess the sustainability of excess profits, analysts perform ongoing assessments of what we call the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from one year (for companies with no economic moat) to 10-15 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard perpetuity formula. In deciding on the rate at which to discount future cash flows, we use a building block approach,

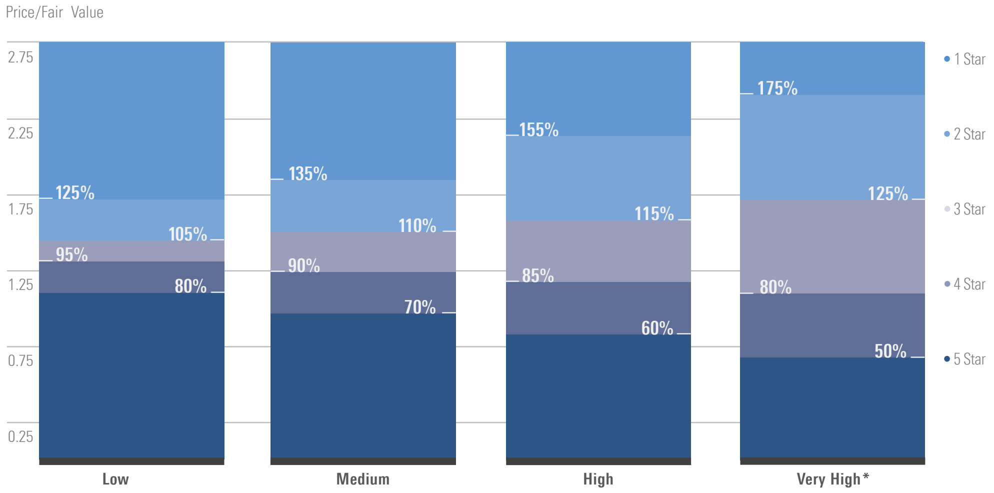
which takes into account expectations for market real return, inflation, country risk premia, corporate credit spread, and any additional systematic risk.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts model three scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of likely potential fair values and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, and other company-specific factors.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

Morningstar Margin of Safety and Star Rating Bands



* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

Exelon Corp (EXC)

Alert: Pepco –Approved with Minimal Conditions. EXC should Walk Away but Won't.

Sell	**3**
Price (26 Feb 16)	US$31.77
Target price	US$27.00
Expected share price return	-15.0%
Expected dividend yield	3.9%
Expected total return	**-11.1%**
Market Cap	US$29,226M

- **The D.C. regulators approved the deal with minimal conditions.** The DC regulators' approval was contingent on EXC accepting the following changes:
  - Decision on how to allocate $25.6m rate credit be deferred to next rate case
  - Some changes on renewables development including requirement for EXC to commit development of 7MW of solar in district before Dec 31, 2018
  - CIF funds to be put into tow ESCROW sub accounts of $21.55m and $11.25m. Helps commission monitor and track funds.
  - Removed language that would have allowed Pepco recovery of four public purpose microgrids of unknown size as it prejudges the outcome of a regulatory proceeding. Added specific commitments for EXC, Pepco to support pilot projects around microgrids.
- **No need to go back to regulators if EXC accepts conditions within 14 days.** EXC could also file for relief but we are assuming that EXC wants to see an end to this process and will likely accept the conditions.
- **Further concessions add to the pain. We think the deal already destroys value for EXC shareholders.** While the concessions aren't really significant from a value perspective, they continue to add to the pain, in our view. Exelon had indicated that they wouldn't give any more concessions. Well, this is the chance to walk away.
- **EXC too committed at this stage we think to walk away but would be the right thing to do, in our view.** EXC had indicated that they wouldn't give any more concessions. This request from D.C. gives them the opportunity to walk away. However, given the strategic importance EXC seems to have placed on Pepco, we think they will find it very difficult to walk away. We think they accept the conditions and close the deal.
- **We reiterate our Sell rating.** We expected the deal to be approved. Please see our detailed report analyzing the deal from a value, EPS, credit and dividend perspective here Exelon Corp (EXC) - Pepco = Value Destructive. We assume the deal closes, back to Sell rating.

Exelon Corp

Valuation

We value EXC using a sum-of-the-parts approach to get to our $27 target. We value ExGen at $10/share and believe ExGen's core nuclear assets will continue to experience weak economics. Valuation is based on a 5.5x 2019 EBITDA multiple that is supported by an UFCF conversion of 45%. The utilities business is valued at $18/share based on a 15x terminal PE multiple. We also add $5/share value provided by PepCo. We back out $6/share for the parent to get to our price target

Risks

Commodity price risk affecting merchant generation – If natural gas prices rise, wholesale power prices will likely rise, raising commodity margins.

Exelon is inherently a long natural gas position since natural gas generation sets the price of power in its key generation markets. If forward natural gas prices rise significantly from current prices, Exelon's earnings will likely exceed our forecasts.

Regulatory risk – All regulated utilities are subject to state and federal regulatory agencies that can materially affect shareholder returns. Failure to obtain fair recovery for capital expenditures or increases in operating costs can diminish returns to shareholders and adversely affect the share price.

Credit rating – Exelon's generation business is currently two notches above a high yield credit rating, but declining cash flows at the merchant business presents some risk of a possible credit rating downgrade barring deleveraging through an equity issuance, asset sale, or other means. If ExGen's credit rating is lowered to high yield status, ExGen would likely have to increase their collateral and it could pressure hedging activities going forward, which would reduce our earnings outlook.

If the impact on the company from any of these factors proves to be more negative/positive than we anticipate, the stock will likely have difficulty achieving our financial and price targets.

Appendix A-1

Analyst Certification

The research analyst(s) primarily responsible for the preparation and content of this research report are named in bold text in the author block at the front of the product except for those sections where an analyst's name appears in bold alongside content which is attributable to that analyst. Each of these analyst(s) certify, with respect to the section(s) of the report for which they are responsible, that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc and its affiliates. No part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendation(s) or view(s) expressed by that research analyst in this report.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to Exelon Corp. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities

transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 28th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating		
Data current as of 31 Dec 2015	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage	48%	40%	12%
% of companies in each rating category that are investment banking clients	64%	64%	59%

Guide to Citi Research Fundamental Research Investment Ratings:

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.

Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Prior to May 1, 2014 Citi Research may have also assigned a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the geographic and industry sector over a 3 month period. The relative call may have highlighted a specific near-term catalyst or event impacting the company or the market that was anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) may have indicated the most and least preferred stocks in the universe of stocks under consideration, explaining the basis for this short-term view. This three-month view may have been different from and did not affect a stock's fundamental equity rating, which reflected a longer-term total absolute return expectation.

NON-US RESEARCH ANALYST DISCLOSURES

Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below:

Citigroup Global Markets Inc	Praful Mehta; Sophie K Karp; Tulkin Niyazov; Jesse Chai

OTHER DISCLOSURES

The subject company's share price set out on the front page of this Product is quoted as at 26 February 2016 09:54 AM on the issuer's primary market.

Many European regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Citi Research generally disseminates its research to the Firm’s global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm’s proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author’s previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client’s individual preferences as to the frequency and manner of receiving communications from analysts, the client’s risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Rule 483, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

D.C. Commission Rejects EXC/POM Merger, But Offers Alternative Path for Approval

This morning, the District of Columbia Public Service Commission (PSC) voted two-to-one, with Commissioner Willie Phillips (D) dissenting, to reject Exelon's proposed acquisition of Pepco Holdings Inc. (POM, $26.72, Not Rated). The PSC noted that its latest rejection of the merger settlement agreement, reached between Exelon/Pepco and various stakeholders, including D.C. Mayor Muriel Bowser, and other parties, in October 2015, is rooted in the belief that the merger agreement, as proposed and modified, is not in the public interest.

Specifically, Commissioner Joanne Doddy Fort (D) and Chairman Betty Ann Kane (D) stated that the modified agreement: **1)** failed to provide a persuasive rationale for excluding non-residential ratepayers from sharing in a proposed $25.6 million allocation to a so-called Customer Investment Fund (CIF) for base rate credit relief; **2)** assigns roles to EXC, as a developer of a solar generation facility in the D.C. area, and to POM, as a developer of four public purpose microgrids, that undermine competition and grid neutrality; **3)** the proposed uses of the CIF for sustainability projects and programs for low-income ratepayers do not improve POM's distribution system; and **4)** the proposed method of allocating the CIF funds to government agencies and certain funds deprives the PSC the ability to ensure those funds are being used appropriately.

Following the rejection, Commissioner Fort outlined certain revisions to the above-mentioned areas, as well as other changes to the proposed agreement, that she believes would satisfy a majority of the PSC's concerns. The PSC voted two-to-one, with Chairman Kane dissenting, to add those conditions set forth by Commissioner Fort to the PSC order for consideration by EXC/POM and other settling parties. All parties involved will have 14 days (March 11, 2016) to review the revised terms and re-submit an updated settlement agreement. If agreed upon, the deal will considered done without another PSC vote.

Our View:

- Not only do EXC and POM need to agree to the updated terms from the PSC, but all settling parties of the agreement do as well. Both companies have stated that they are reviewing the terms of the updated agreement and will respond once a thorough analysis is complete.
- EXC has stated that if an agreement is not reached by the merger deadline of March 4, 2016, both parties could walk away from the deal. However, given that at first read, the conditions set forth by Commissioner Fort do not appear to be onerous, and coupled with EXC's desire to be more regulated and de-risk, we believe that EXC/POM could agree to the conditions. That said, it is not clear that all parties to the settlement will agree.

Please refer to pages 2 to 5 for Important Disclosures, including the Analyst's Certification.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael S. Worms, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA (exceptions: Alex Arfaei and Brodie Woods). These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosure

Disclosure 10: A research analyst, associate, or any person (or their household members) directly involved in the preparation of this research report has a financial interest in securities of this issuer.

Methodology and Risks to Price Target/Valuation

Methodology: Our valuation is based on a combination of our 2017 adjusted EBITDA estimate with an 8x EV/EBITDA multiple and 15x 2017E P/E multiple.
Risks: A material decline in power prices and / or a change in the regulatory environment could affect our price target.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx

General Disclaimer

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Alexander Pearce, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

DC Commission Adds Minor Changes To POM Merger; We Believe Deal Gets Done

Buy

Price: $31.98

- This morning the Washington DC PSC voted to add minor modifications to the settlement agreement related to the acquisition of Pepco (POM, $26.61, Neutral) by EXC for $27.25/share in cash. Assuming the settlement parties agree to the modifications, the merger would be deemed to be approved.

- We believe that the parties will agree to the modifications. Our EXC estimates already incorporate the acquisition of POM, so we anticipate no changes to our estimates.

- We have a **Buy** rating on EXC and **Neutral** rating on POM.

DC PSC Conditionally Approves POM Deal in a 2-1 Vote. We Think the Transaction Will Close.

Rating Buy, Target $35 / Share

In a 2-1 decision this morning, the DC Public Service Commission conditionally approved EXC's acquisition of Pepco. Chairwoman Kane voted against the deal and Commissioner Fort voted to approve the transaction only if the parties to the filed settlement agreed to certain changes to the deal. Commissioner Phillips voted to approve the original settlement and also voted to approve the deal as amended by Commissioner Fort if the parties should consent to the changes. Acceptance of the alternative terms by EXC, POM and the other signatories to the original settlement agreement would result in the deal moving forward to closing without any further regulatory proceedings. The signatories have 14 days to decide. We outline the changes to the settlement below.

The terms of the revised settlement agreement aren't materially different from those proposed in the original non-unanimous settlement agreement. The total size of the customer investment fund (CIF) provided to the District of Columbia is unchanged at $72.8mm, and $14mm of that will still go towards a residential customer bill credit. The customer base rate credit portion of this total was also unchanged at $25.6, however the allocation of that money will be less proscriptive, and ultimately defined in the next Pepco rate case. The $33.2mm balance of the CIF, which had been previously allocated in specific tranches towards various renewable, energy efficiency, sustainability, and low income initiatives will instead be placed in an Escrow Fund, with a subaccount of $21.55mm for a MEDSIS Pilot Project Fund (a project to modernize the energy delivery system) and $11.25mm for an Energy Efficiency and Energy Conservation Initiative fund (targeted towards low income customers). Finally, the new agreement requires that EXC facilitate the development of 12 MW of solar generation, including 5 MW of ground mounted solar at the Blue Plains water facility – with the facility choosing the vendor. This compares to the total of 7-10 MW that were required in the original deal. Effectively, the new terms guarantee development at Blue Plains and require EXC support a bit more solar generation. Finally, the explicit provision that Pepco develop at least four microgrid projects was removed.

In sum, nothing here looks like a game changer that would cause EXC to walk from the deal. However, the parties to the settlement must unanimously agree to the changes. These changes are summarized in the attached Table 1. The parties to the settlement have 14 days to respond to the DC Commission's conditional approval. EXC or POM have the ability to terminate the deal after 3/4/16.

Exhibit 1

Summary of Revisions

Allocation	Original Settlement ($ mm)	New Proposal ($ mm)	Notes
CIF Total	**72.8**	**72.8**	
Customer Base Rate Credit	25.6	25.6	Had been exclusively for residential class, now unallocated.
Residential Customer Bill Credit	14	14	
Renewable	3.5	21.55	Placed in escrow fund for MEDSIS Pilot.
EE Initiative	3.5	11.25	Placed in escrow fund for EE and EC Initiative.
Sustainability	10.05	0.4	Forgive residential customer receivables.
Low Income Assistance	16.15		
Solar Development	**10 MW**, incl. 5 at Blue Plains facility; **7 MW** if no deal at Blue Plains	**12 MW**, incl. 5 MW at Blue Plains	Guarantee development at Blue Plains, facility chooses vendor. **Basically requires 2-5 more MW.**
Microgrid Projects	**YES**	**NO**	But could be outgrowth of MEDSIS Pilot, above.

Source: Evercore ISI Research

VALUATION METHODOLOGY

Our valuation is based on a sum of the parts analysis. We use a P/E multiple on the utility and an EBITDA multiple for the genco business.

RISKS

Lower power prices / capacity prices and unfavorable outcomes in regulatory proceedings would cause our valuation to be lower. Higher interest rates would pull utility earnings up but pressure multiples so the net impact would likely be negative overall. A favorable outcome in the upcoming PJM capacity auctions and/or passage of legislation to bolster the revenue stream of the Illinois nuclear units would be accretive.

ANALYST CERTIFICATION

The analysts, Greg Gordon and Phil Covello, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

DISCLOSURES

This report is approved and/or distributed by Evercore Group LLC ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and International Strategy & Investment Group (UK) Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Partners Inc. ("Evercore Partners"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Partners.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Buy, Hold or Sell) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI, and can be obtained by writing to Evercore Group LLC, Attn. Compliance, 666 Fifth Avenue, 11th Floor, New York, NY 10103.

Evercore Partners and its affiliates, and / or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore Partners and its affiliates may have, or have had, business relationships with the companies mentioned in this report..

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three ratings categories, with the following return guidelines:

Buy – the total forecasted return is expected to be greater than 10%
Hold – the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell – the total forecasted return is expected to be less than 0%
Coverage Suspended – the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended - Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulartory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

* Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended".

Historical Ratings Definitions

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy - Return > 20%
Buy - Return 10% to 20%
Neutral - Return 0% to 10%
Cautious - Return -10% to 0%
Sell - Return < -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight – the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight – the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight – the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended – the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

General Disclosures

This report is provided for informational purposes only. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by registered employees of Evercore ISI. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates. Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel.

Evercore ISI does not provide individually tailored investment advice in research reports. This report has been prepared without regard to the particular investments and circumstances of the recipient. The financial instruments discussed in this report may not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or

indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research. Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Electronic research is simultaneously available to all clients. This report is provided to Evercore ISI clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

For investors in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as “relevant persons”). This report must not be acted on or relied on by persons who are not relevant persons.

Diversified Electric Utilities

District Of Columbia PSC Attaches New Conditions--We Think Deal Gets Done

Neil Kalton, CFA, Senior Analyst (314) 875-2051

Sector Rating: Diversified Electric Utilities, Market Weight

The District of Columbia Public Service Commission voted 2-1 this morning (2/26) to deny the Non-Unanimous Full Settlement Agreement (NSA) as filed. However, Commissioner Fort proposed a series of amendments to the NSA - none of which sounded particularly onerous to us - and the PSC voted 2-1 to APPROVE the revised NSA. (Commissioner Phillips voted to approve both the original NSA and the revised NSA; Chairman Kane remains opposed.) The parties to the original NSA have 14 days to accept the revised NSA or propose further revisions. Key parties include EXC/POM, the Office of the Mayor of the District of Columbia, the Office of the People's Counsel and the attorney general's office. If all parties to the original NSA accept the revised NSA, then the joint application for the EXC/POM merger is approved as being in the public interest.

Assuming our interpretation of the revised conditions are accurate - in that they did not appear to materially alter the value proposition of the merger from EXC's standpoint nor do they weaken the additional concessions offered to D.C. constituents for the public's benefit - then we believe the parties will accept the revised NSA and the merger will finally close after nearly two grueling years of regulatory approval jockeying. After all, why split hairs at this point and risk going back to the DCPSC for minor revisions? We are encouraged that there is a clear path to approval and deal closure for EXC/POM but acknowledge the DCPSC's decision to now conditionally approve the merger surprised us (like Commissioner Phillips said in today's meeting, why not just attach conditions to the original application rather than the outright denial on 8/25/15).

Exelon Corporation (EXC-NYSE)

Please see Disclosure Appendix for rating definitions, important disclosures, and required analyst certifications.
All estimates/forecasts are as of 02/26/16 unless otherwise stated.

-

Rating Basis Information:
EXC Thesis: Our Outperform rating is largely premised on our belief that the share price undervalues ExGen's nuclear fleet. Other positive features include above average utility rate base growth prospects and strong nuclear operational track record.

POM Thesis: We are attracted to POM's regulated growth opportunities and relatively high concentration of transmission earnings. Our Market Perform rating reflects valuation considerations given our belief that the pending acquisition by EXC for $27.25/sh will be approved and close during 1H'16.

Please see Disclosure Appendix for rating definitions, important disclosures, and required analyst certifications.
All estimates/forecasts are as of 02/26/16 unless otherwise stated.

Bank of America Merrill Lynch

Exelon

A New Deal In Washington DC; Exelon-Pepco Merger Update

Maintain Rating: NEUTRAL | PO: 32.00 USD | Price: 31.98 USD

Equity | 26 February 2016 Corrected

Key takeaways

- D.C. Commission provided an alternative avenue set of conditions to close on the Exelon-Pepco deal.
- In our view, the new terms do not appear to require Exelon provide any additional capital.
- We believe it more likely that the alternate terms will be agreed to by Exelon and parties next week; maintain Neutral.

D.C. Commission puts in New Terms

On 2/26/16, the D.C. Public Service Commission rejected the settlement of the Exelon-Pepco proposed merger in a 2-1 vote. However, the Commission provided alternative terms and conditions in the order that, if accepted, would consummate the deal. The commission voted 2-1 in favor of the alternative decision and requested a decision within 14 days.

The alternate proposed decision largely altered funding requirements to energy efficiency and low-income customer programs. Furthermore, the new terms request small additions in solar generation, while removing a request to develop microgrid facilities. Exelon has stated that March 4, 2016, is the last day before it could walk away from the deal, so a decision is likely to be reached before that date.

As far as we can quantify, the additional concessions appear to be relatively minor. In our view, Exelon is more likely to agree to the necessary concessions to acquire Pepco, in order to ensure longer-term support/cushion for the dividend, and we see closing on the deal as a marginal positive for the shares.

Shares remain fairly valued; Maintain Neutral

Despite the strong possibility of closing on the Pepco deal, Exelon remains an integrated utility where strong commodity headwinds continue to deteriorate the profitability of the deregulated business. In addition, the Clean Power Plan stay is likely to push out any potential credit for Exelon's nuclear fleet into the future; we maintain our Neutral rating. Our financial estimates already assume the Pepco merger is closed by 2Q16.

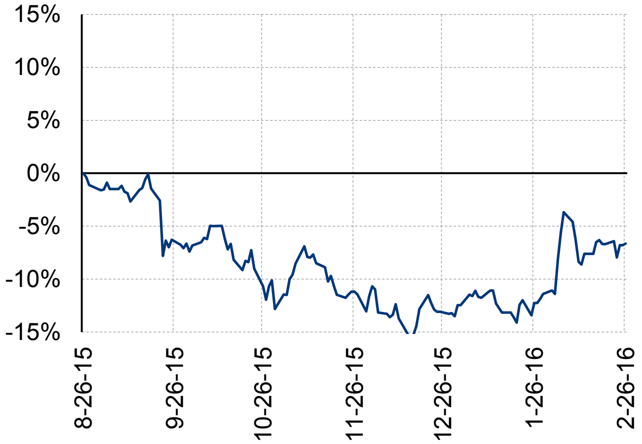
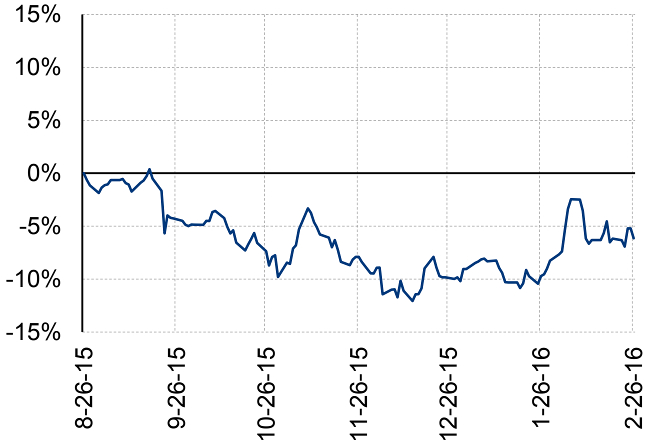
Relative Performance Charts

Chart 1: EXC relative performance vs. utilities group average



Source: BofA Merrill Lynch Global Research, Bloomberg

Chart 2: EXC relative performance vs. integrated electrics average



Source: BofA Merrill Lynch Global Research, Bloomberg

Price objective basis & risk

Exelon (EXC)

Our $32/share price objective for EXC shares is derived from our sum of the parts valuation model, where we assign approximately $8 of value to ExGen, $(4) for the parent, and approximately $28 of value to the regulated utility. We value integrated electric utilities, including Exelon, using a sum of the parts valuation model based on 2018E earnings and EBITDA. For Exelon specifically we use a target 6.8x EV/EBITDA multiple to value the deregulated generation segment, in line with peers. We apply a target 15.0 P/E multiple to value the regulated side of the business, which is a discount to regulated peers at 15.5x to reflect the generally below-average ROEs allowed by the state commissioners for the states in which Exelon has regulated operations.

Downside (upside) risks to our price objective are: 1) increasing (decreasing) of forward power prices driven by rising natural gas prices, heat rates, or Northeast and Midwest gas basis to Henry Hub, 2) regulatory outcomes as well as changes in nuclear regulation, 3) deterioration (improvements) in operating efficiency beyond our base scenario, and 4) risks to the successful completion of the Pepco Holdings acquisition

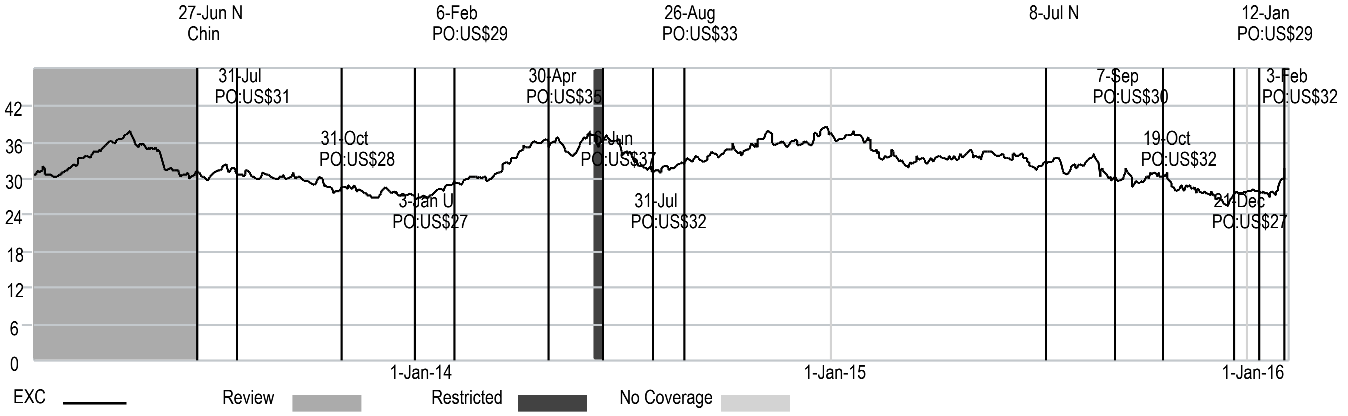
EXC Price Chart



B: Buy, N: Neutral, U: Underperform, PO: Price Objective, NA: No longer valid, NR: No Rating

The Investment Opinion System is contained at the end of the report under the heading "Fundamental Equity Opinion Key". Dark grey shading indicates the security is restricted with the opinion suspended. Medium grey shading indicates the security is under review with the opinion withdrawn. Light grey shading indicates the security is not covered. Chart is current as of January 31, 2016 or such later date as indicated.

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	69	47.26%	Buy	58	84.06%
Hold	40	27.40%	Hold	32	80.00%
Sell	37	25.34%	Sell	27	72.97%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1673	50.16%	Buy	1244	74.36%
Hold	777	23.30%	Hold	545	70.14%
Sell	885	26.54%	Sell	533	60.23%

* Issuers that were investment banking clients of BofA Merrill Lynch or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Merrill Lynch Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Merrill Lynch report referencing the stock.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Merrill Lynch.

This research report provides general information only. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this report and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this report.

Securities and other financial instruments discussed in this report, or recommended, offered or sold by Merrill Lynch, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Merrill Lynch is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned in this report. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Merrill Lynch entities located outside of the United Kingdom. BofA Merrill Lynch Global Research policies relating to conflicts of interest are described at http://go.bofa.com/coi.

Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

MLPF&S or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. MLPF&S or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Merrill Lynch, through business units other than BofA Merrill Lynch Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented in this report. Such ideas or recommendations reflect the different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Merrill Lynch is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this report.

In the event that the recipient received this report pursuant to a contract between the recipient and MLPF&S for the provision of research services for a separate fee, and in connection therewith MLPF&S may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom MLPF&S has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by MLPF&S). MLPF&S is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities mentioned in this report.

DC PSC votes to approve merger on their terms

This morning, the DC Public Service Commission held a public meeting to vote on the proposed Exelon (EXC) and Pepco Holdings (POM) merger. First the PSC voted (2-1) to deny the proposed settlement finding it to be not in the public interest on several counts. The non-unanimous settlement agreement (NSA) had been filed with the PSC back in the fall by EXC, POM, the DC Mayor, the OPC and several other parties. In a somewhat unexpected turn of events, the PSC took a second vote to approve proposed adjustments to the NSA. This vote was also 2-1 with Chairman Kane vocally expressing her opposition in her closing statement. Per the final order, the DC PSC would allow the merger to go through so long as all of the parties to the original NSA agree to the PSC's proposed new terms. Parties have 14 days to either accept the revised NSA or request "other relief". If other relief is requested then non-settling parties would have 7 days to file comments.

Conditions unlikely to be deal-stoppers for EXC; but what about others?

The PSC's proposed adjustments to the NSA do not seem particularly onerous from an EXC standpoint, in our view. The company will be required to contribute a similar amount of money as contemplated by the original NSA but the adjustments would give the DC PSC greater control over how some of these funds are then disbursed, effectively taking control out of the hands of the DC District Government, a key party to the settlement. In addition, residential rate payers will no longer be guaranteed the same base rate credit of $25.6M. This credit could now be shared with non-residential rate payers and parties are invited to propose allocation methodologies to the PSC in the context of the next rate case. We see no reason to think these adjustments would be deal breakers for EXC, but the conditions do reveal something of a turf war between various local interests in DC, and it remains to be seen whether all settling parties will remain on board as the PSC order requires.

EXC now off the hook per merger terms; but unlikely to walk in our view

With the DC PSC requiring modifications to the NSA, we note that EXC could now freely walk away from the merger if they so choose. This also effectively renders the March 4 termination date somewhat moot. We see EXC walking away as a low probability though given management's overall narrative, need for consistency/credibility and overall focus on becoming more regulated.

What's next? Resolution could be quick, but political angle might delay

EXC and POM have indicated they will carefully review the PSC's changes with the other settling parties, and we are likely to have a better idea as to whether the merger will still go forward at some point next week. Given the relatively limited changes it seems plausible parties could reach an agreement as soon as over the weekend, although local political/financial wrangling over the PSC's effective assertion of jurisdiction could conceivably take longer.

EXC: DC PSC again rejects Pepco merger by 2-1, but dissenter offers revised terms

Company Update

26 February 2016

EXC/POM's April 2014 merger pact still at risk but still alive

The Public Service Commission (PSC) of the District of Columbia voted 2-1 to reject the Exelon/Pepco Holdings settlement agreement filed by the companies, the Mayor and Attorney General for the District of Columbia, People's Counsel and several other parties in October 2015. That settlement was the result of extensive negotiations following the PSC's 2-1 rejection of the companies' application on August 25, 2015 on what appeared to us to be narrow and minor grounds. Today, however, Commissioner Fort, who voted against the merger both times, proposed a revised settlement agreement and stipulation (PSC Order's Exhibit A) which she would support if the parties agree to it within 14 days. News services stated Exelon and Pepco would review the proposed revised agreement.

~$1.88B notes redeemable if deal delayed or terminated

Exelon Corporation's 3.95% senior notes of 2025 ($807 million outstanding), 4.95% senior notes of 2035 ($333 million) and 5.10% senior notes of 2045 ($741 million) have a mandatory redemption provision at 101% of par, plus accrued and unpaid interest, upon the earlier of 1) June 30, 2016 (which can be extended by the issuer to August 31) and 2) the date on which the agreement relating to the merger is terminated.

Proposed changes appear very minor in context of merger

We compared the October 2015 settlement agreement and today's revised proposal and found changes to eight of the 142 sections (below). Relative to the scale of the merger, these changes seem very minor to us. Therefore, we assume that the settling parties are more likely than not to agree to the proposed revised agreement.

Section 4 – The *residential customer* base rate credit has been revised to a *customer* base rate credit, thus permitting more customers to share in that $25.6 million credit. Most of the specifics have been deleted; now, the parties to the next Pepco base rate case will have an opportunity to propose how the credit will be allocated among customers and over what period of time. Also, the utility will no longer be permitted to recover the Incremental Offset, reflecting deferred recovery of a residential rate increase before March 31, 2019 not offset by the base rate credit.

Sections 6 through 9 – The allocation of $33.2 million of funds that Exelon would have provided for renewable generation development ($3.5 million), energy efficiency initiatives ($3.5 million), sustainability ($10.05 million),, forgiveness of aged accounts receivable ($0.4 million), low-income home energy assistance ($9 million) and multifamily building energy initiatives ($6.75 million) has been moderately modified.

Section 118 – The solar generation in the District of Columbia that Exelon is to develop or assist in developing has been slightly modified, from A) 10 MW plus good faith effort for 5 MW at Blue Plains (or 7 MW if Blue Plains did not materialize), to B) 7 MW excluding Blue Plains plus expedited interconnection of 5 MW of solar generation at Blue Plains to be constructed by a vendor selected by DC Water.

Section 128 – Development of microgrid facilities was eliminated.

Section 129 – One sentence was added stating that Pepco and Exelon shall support and facilitate the implementation of any pilot projects approved by the Commission that emerge from the Formal Case No. 1130 proceeding (In the Matter of the Investigation into Modernizing the Energy Delivery Structure for Increased Sustainability).

Valuation & risk

Exelon Corp. (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

Baltimore (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

Commonwealth Edison (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

Exelon Generation Co (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

PECO Energy Co. (EXC)

We view Exelon Corporation and Exelon Generation credit spreads as attractive relative to peers with a large, low-emissions baseload generation portfolio, strong operating performance, substantial capacity revenues, ongoing hedging of commodity prices, the commitment to a strong balance sheet and liquidity, and the implicit support of a diversified, regulated utility portfolio. Risks are the rehearing of the Pepco Holdings merger application following the rejection by Washington DC regulators, low natural gas prices and quark spreads.

BofA Merrill Lynch Credit Opinion Key

BofA Merrill Lynch Global Research provides recommendations on an issuer's bonds (including corporate and sovereign external debt securities), capital securities, equity preferreds and CDS as described below. Convertible securities are not rated. An issuer level recommendation may also be provided for an issuer as explained below. BofA Merrill Lynch Global Research credit recommendations are assigned using a three-month time horizon.

Issuer Recommendations: If an issuer credit recommendation is provided, it is applicable to bonds and capital securities of the issuer except bonds and capital securities specifically referenced in the report with a different credit recommendation. Where there is no issuer credit recommendation, only individual bonds and capital securities with specific recommendations are covered. CDS and equity preferreds are rated separately and issuer recommendations do not apply to them.

BofA Merrill Lynch Global Research credit recommendations are assigned using a three-month time horizon:
Overweight: Spreads and /or excess returns are likely to outperform the relevant and comparable market over the next three months.
Marketweight: Spreads and/or excess returns are likely to perform in-line with the relevant and comparable market over the next three months.
Underweight: Spreads and/or excess returns are likely to underperform the relevant and comparable market over the next three months.

BofA Merrill Lynch Global Research uses the following rating system with respect to **Credit Default Swaps (CDS):**
Buy Protection: Buy CDS, therefore going short credit risk.
Neutral: No purchase or sale of CDS is recommended.
Sell Protection: Sell CDS, therefore going long credit risk.

Corporate Credit Issuer Investment Rating Distribution: Global Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	146	35.96%	Buy	130	89.04%
Hold	155	38.18%	Hold	137	88.39%
Sell	105	25.86%	Sell	91	86.67%

* Issuers that were investment banking clients of BofA Merrill Lynch or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only corporate credit issuer recommendations. A corporate credit issuer rated Overweight is included as a Buy, a corporate credit issuer rated Marketweight is included as a Hold, and a corporate credit issuer rated Underweight is included as a Sell.

Credit Opinion History Tables for the securities referenced in this research report are available at http://pricecharts.baml.com, or call 1-800-MERRILL to have them mailed.
MLPF&S or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Commonwealth Edison, Exelon Corp.
The issuer is or was, within the last 12 months, an investment banking client of MLPF&S and/or one or more of its affiliates: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
MLPF&S or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
The issuer is or was, within the last 12 months, a non-securities business client of MLPF&S and/or one or more of its affiliates: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
MLPF&S or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
MLPF&S or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of MLPF&S and/or one or more of its affiliates: Baltimore, Commonwealth Edison, Exelon Corp., Exelon Generation, PECO Energy.
BofA Merrill Lynch Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking revenues.
BofA Merrill Lynch Global Credit Research analysts regularly interact with sales and trading desk personnel in connection with their research, including to ascertain pricing and liquidity in the fixed income markets.

Other Important Disclosures

MLPF&S or one of its affiliates has a significant financial interest in the fixed income instruments of the issuer. If this report was issued on or after the 15th day of the month, it reflects a significant financial interest on the last day of the previous month. Reports issued before the 15th day of the month reflect a significant financial interest at the end of the second month preceding the report: Baltimore, Exelon Corp., Exelon Generation.

This report may refer to fixed income securities that may not be offered or sold in one or more states or jurisdictions. Readers of this report are advised that any discussion, recommendation or other mention of such securities is not a solicitation or offer to transact in such securities. Investors should contact their BofA Merrill Lynch representative or Merrill Lynch Financial Global Wealth Management financial advisor for information relating to fixed income securities
Rule 144A securities may be offered or sold only to persons in the U.S. who are Qualified Institutional Buyers within the meaning of Rule 144A under the Securities Act of 1933, as amended.
SECURITIES DISCUSSED HEREIN MAY BE RATED BELOW INVESTMENT GRADE AND SHOULD THEREFORE ONLY BE CONSIDERED FOR INCLUSION IN ACCOUNTS QUALIFIED FOR SPECULATIVE INVESTMENT.
Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
The securities discussed in this report may be traded over-the-counter. Retail sales and/or distribution of this report may be made only in states where these securities are exempt from registration or have been qualified for sale.
Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
From time to time research analysts conduct site visits of covered issuers. BofA Merrill Lynch policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
This report, and the securities discussed herein, may not be eligible for distribution or sale in all countries or to certain categories of investors.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Merrill Lynch.

This research report provides general information only. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this report and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this report.

Securities and other financial instruments discussed in this report, or recommended, offered or sold by Merrill Lynch, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

BofA Merrill Lynch is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

This report may contain a trading idea or recommendation which highlights a specific identified near-term catalyst or event impacting a security, issuer, industry sector or the market generally that presents a transaction opportunity, but does not have any impact on the analyst's particular "Overweight" or "Underweight" rating (which is based on a three month trade horizon). Trading ideas and recommendations may differ directionally from the analyst's rating on a security or issuer because they reflect the impact of a near-term catalyst or event.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned in this report. Investors in such securities and instruments effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Merrill Lynch entities located outside of the United Kingdom. BofA Merrill Lynch Global Research policies relating to conflicts of interest are described at http://go.bofa.com/coi.

Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

MLPF&S or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. MLPF&S or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Merrill Lynch, through business units other than BofA Merrill Lynch Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented in this report. Such ideas or recommendations reflect the different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Merrill Lynch is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this report.

In the event that the recipient received this report pursuant to a contract between the recipient and MLPF&S for the provision of research services for a separate fee, and in connection therewith MLPF&S may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom MLPF&S has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by MLPF&S). MLPF&S is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities mentioned in this report.

Content contained on such third-party websites is not part of this report and is not incorporated by reference into this report. The inclusion of a link in this report does not imply any endorsement by or any affiliation with BofA Merrill Lynch. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Merrill Lynch is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of the report and are subject to change without notice. Prices also are subject to change without notice. BofA Merrill Lynch is under no obligation to update this report and BofA Merrill Lynch's ability to publish research on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Merrill Lynch will not update any fact, circumstance or opinion contained in this report.

Certain outstanding reports may contain discussions and/or investment opinions relating to securities, financial instruments and/or issuers that are no longer current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with MLPF&S or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Merrill Lynch nor any officer or employee of BofA Merrill Lynch accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this report or its contents.

RBC Credit: DC Commission rejects EXC/POM settlement, but recommends revised terms

Sentiment Indicator : positive

Posted by Leung, Raymond (RBC Capital Markets, LLC) on Friday, February 26, 2016, 12:29 PM ET

Takeaway: Today, the DC Public Service Commission voted 2-1 against the proposed Exelon-Pepco deal as it found the non-unanimous settlement agreement was not in public interest. However, the commission recommended revised settlement terms for which Exelon and Pepco will have 14 days (March 11th) to approve or reject. We view the proposed settlement changes as manageable and a dissenting commissioner, Joanne Fort, on the initial vote indicated that she would support the merger with the revised terms. Should the companies approve the revised terms, there is no further action required by the DC Commission and the deal will close. We remain Outperform on Exelon Corp (3.95% of 2025s at +200bps) as the proposed Pepco deal will raise the contribution of regulated cash flows to about two-thirds from one-half in addition to the recently disclosed credit metric guidance at Exelon Generation which we find supportive of credit spreads. A potential decision from Exelon/Pepco could come prior to the merger termination date of March 4.

The revised terms include:

- The deferral of a decision on the allocation of $25.6 million in customer base rate credits until the next Pepco rate case,
- removing Exelon as a developer of a 5MW solar generation facility, committing Pepco to facilitate this project with DC Water’s choice of developer,
- creating an escrow fund with two sub-accounts (one for modernization projects and one for energy efficiency for low income housing) at Pepco to hold the $72.8 million Customer Investment Fund funded by Exelon, and
- requiring Pepco to facilitate and support pilot projects for micro grids.

In the event the merger is not accepted, the EXC would call the outstanding 25s, 35s, and 45s bonds at $101 that were issued to finance the transaction.

Contents

Analyst Note 29 Feb 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Washington, D.C., regulators again rejected Exelon's offer to acquire Pepco but left open an option for the companies to gain approval.

We still include $1 per share of value dilution in our fair value estimate for Exelon and $5 per share of incremental value for Pepco, based on a 75% probability that the companies will close the transaction at Exelon's $27.25 cash offer. We are reaffirming our narrow moat and stable moat trend ratings for both companies.

Even though Washington, D.C., regulators formally rejected the deal, we think the companies are committed enough to closing the deal that there is a good likelihood they will accept the terms set by regulators. The terms sap additional value from shareholders to benefit customers through rate refunds and benefits, limiting cost reductions, returning merger synergies to customers, and limiting recovery for some costs. However, the D.C. service territory is not big enough for the incremental lost value to have an impact on our valuation of the deal. The terms also set strict ringfencing provisions, but those are typical and don't have any impact on our valuations.

Exelon management had said they would terminate the deal if regulators did not approve it by March 4, but we don't think that date is sacred any longer, as regulators have said the companies have until March 11.

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers at Commonwealth Edison (Illinois), PECO (Pennsylvania), and Baltimore Gas & Electric (Maryland). Exelon also owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. Exelon also is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

-Further information on Morningstar's conflict of interest policies is available from http://global.morningstar.com/equitydisclosures.

If you wish to obtain further information regarding previous Reports and recommendations and our services, please contact your local Morningstar office.

Unless otherwise provided in a separate agreement, you may use this Report only in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of this document is Morningstar Inc. Redistribution, in any capacity, is prohibited without permission. The information, data, analyses and opinions presented herein do not constitute investment advice; are provided solely for informational purposes and therefore are not an offer to buy or sell a security; and are not warranted to be correct, complete or accurate, nor may they be construed as a representation regarding the legality of investing in the security/ies concerned, under the applicable investment or similar laws or regulations of any person or entity accessing this report. The opinions expressed are as of the date written and are subject to change without notice. Except as otherwise required by law, Morningstar, its affiliates, and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions or their use. You should seek the advice of your financial, legal, tax, business and/or other consultant, and read all relevant issue documents pertaining to the security/ies concerned, including without limitation, the detailed risks involved in the investment, before making an investment decision.

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. As the price / value / interest rate of a security fluctuates, the value of your investments in the said security, and in the income, if any, derived therefrom may go up or down.

For Recipients in Australia: This report has been authorized by the Head of Equity and Credit Research, Asia Pacific, Morningstar Australasia Pty Limited and is circulated pursuant to RG 79.26(f) as a full restatement of an original report (by the named Morningstar analyst) which has already been broadly distributed. To the extent the report contains general advice it has been prepared without reference to your objectives, financial situation or needs. You should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement before making any decision to invest. For Recipients in India: This research on securities [as defined in clause (h) of Section 2 of the Securities Contracts (Regulation) Act, 1956], such research being referred to for the purpose of this document as "Investment Research", is issued by Morningstar Investment Adviser India Private Limited.

Morningstar Investment Adviser India Private Limited is registered with the Securities and Exchange Board of India under the SEBI (Investment Advisers) Regulations, 2013, vide Registration number INA000001357, dated March 27, 2014, and in compliance of the aforesaid regulations and the SEBI (Research Analysts) Regulations, 2014, it carries on the business activities of investment advice and research. Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Associates LLC, which is a part of the Morningstar Investment Management group of Morningstar, Inc., and Morningstar, Inc. is a leading provider of independent investment research that offers an extensive line of products and services for individual investors, financial advisors, asset managers, and retirement plan providers and sponsors. In India, Morningstar Investment Adviser India Private Limited has only one associate, viz., Morningstar India Private Limited, and this company predominantly carries on the business activities of providing data input, data transmission and other data related services, financial data analysis, software development etc.

The author/creator of this Investment Research ("Research Analyst") or his/her associates or his/her relatives does/do not have (i) any financial interest in the subject company; (ii) any actual/beneficial ownership of one per cent or more securities of the subject company, at the end of the month immediately preceding the date of publication of this Investment Research; and (iii) any other material conflict of interest at the time of publication of this Investment Research.

The Research Analyst or his/her associates or his/her relatives has/have not received any (i) compensation from the subject company in the past twelve months; (ii) compensation for products or services from the subject company in the past twelve months; and (iii) compensation or other material benefits from the subject company or third party in connection with this Investment Research. Also, the Research Analyst has not served as an officer, director or employee of the subject company.

The terms and conditions on which Morningstar Investment Adviser India Private Limited offers Investment Research to clients, varies from client to client, and are spelt out in detail in the respective client agreement.

Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs and generate large profits even with currently depressed power prices.
- Higher natural gas and coal prices, rising electricity demand and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.
- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.
- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow moat distribution earnings.
- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

The Never-Ending Exelon-Pepco Saga Gets Another Two Weeks of Life, but No Real Changes

Travis Miller, Sector Director, 06 October 2015

Investment Thesis

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and made a $12 billion bid for Pepco in April 2014, both including debt. Management's political negotiations appear to have revived the deal in Washington, D.C., where regulators had rejected it in August 2015. We now expect it has a 75% chance of closing. Exelon has received all other regulatory approvals.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our outlook for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can grow earnings 10% annually the next three years.

Travis Miller, Sector Director, 29 February 2016

Analyst Note

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Washington, D.C., regulators again rejected Exelon's offer to acquire Pepco but left open an option for the companies to gain approval.

We still include $1 per share of value dilution in our fair value estimate for Exelon and $5 per share of incremental value for Pepco, based on a 75% probability that the companies will close the transaction at Exelon's $27.25 cash offer. We are reaffirming our narrow moat and stable moat trend ratings for both companies.

Even though Washington, D.C., regulators formally rejected the deal, we think the companies are committed enough to closing the deal that there is a good likelihood they will accept the terms set by regulators. The terms sap additional value from shareholders to benefit customers through rate refunds and benefits, limiting cost reductions, returning merger synergies to customers, and limiting recovery for some costs. However, the D.C. service territory is not big enough for the incremental lost value to have an impact on our valuation of the deal. The terms also set strict ringfencing provisions, but those are typical and don't have any impact on our valuations.

Exelon management had said they would terminate the deal if regulators did not approve it by March 4, but we don't think that date is sacred any longer, as regulators have said the companies have until March 11.

Economic Moat

Travis Miller, Sector Director, 06 October 2015

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat characteristics, with returns on capital above costs of capital for the foreseeable future. However, that spread between long-term returns on capital and Exelon's cost of capital have shrunk based on our midcycle outlook for power prices in the eastern U.S. Exelon's increasing diversification into narrow- and no-moat businesses

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★ 26 Feb 2016	31.73 USD 26 Feb 2016	35.00 USD	0.91	3.91 26 Feb 2016	29.19 26 Feb 2016	Utilities - Diversified	Standard

Close Competitors	Currency (Mil)	Market Cap	TTM Sales	Operating Margin	TTM/PE
Public Service Enterprise Group Inc PEG	USD	21,529	10,910	29.67	11.72
FirstEnergy Corp FE	USD	13,904	15,026	15.25	23.98
Entergy Corp ETR	USD	12,797	11,836	2.32	0.00

together with the shrinking returns at its nuclear generation business supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources like coal and natural gas reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must continue to have access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Valuation

Travis Miller, Sector Director, 06 October 2015

We are reaffirming our $35 per share fair value estimate after raising our probability of the Pepco acquisition closing to 75% from 25% as a result of an agreement the companies reportedly reached with the Washington, D.C., mayor's office on Oct. 6. Although we think the deal is value-dilutive, it is too small to have a material impact on our fair value estimate. Exelon's $27.25-per-share cash offer represents a 30% premium to our $21 per share standalone fair value estimate for Pepco.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities (Ill.), Oyster Creek (N.J.), and Three Mile Island (Pa.)--as well as the Clinton (Ill.) plant. We now assume a 50% probability that the Byron (Ill.) plant will retire given it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is 50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Our midcycle earnings forecast at Exelon Generation is based on a $4/mcf midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

We assume a 9% cost of equity and a 7.1% cost of capital. Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Risk

Travis Miller, Sector Director, 06 October 2015

Investors should pay the most attention to political developments that would re-regulate competitive electricity markets in the Midwest and Mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source.

As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket.

Reregulation also would destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.

As Exelon's regulated utilities generate a greater share of earnings, investors will be subject more acutely to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management

Travis Miller, Sector Director, 06 October 2015

We give Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities.

President and CEO Chris Crane and Executive Chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and Chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition in 2015. This will increase Exelon's share of regulated utilities earnings and dilute shareholders' exposure to wholesale power markets. Management has shown strong conviction in the value of the deal based on their efforts to gain support for the deal from all parties, particularly in Washington, D.C.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants absent significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creation opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8 million shares or vested options as of January 2015.

The Never-Ending Exelon-Pepco Saga Gets Another Two Weeks of Life, but No Real Changes

Travis Miller, Sector Director, 29 February 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Washington, D.C., regulators again rejected Exelon's offer to acquire Pepco but left open an option for the companies to gain approval.

We still include $1 per share of value dilution in our fair value estimate for Exelon and $5 per share of incremental value for Pepco, based on a 75% probability that the companies will close the transaction at Exelon's $27.25 cash offer. We are reaffirming our narrow moat and stable moat trend ratings for both companies.

Even though Washington, D.C., regulators formally rejected the deal, we think the companies are committed enough to closing the deal that there is a good likelihood they will accept the terms set by regulators. The terms sap additional value from shareholders to benefit customers through rate refunds and benefits, limiting cost reductions, returning merger synergies to customers, and limiting recovery for some costs. However, the D.C. service territory is not big enough for the incremental lost value to have an impact on our valuation of the deal. The terms also set strict ringfencing provisions, but those are typical and don't have any impact on our valuations.

Exelon management had said they would terminate the deal if regulators did not approve it by March 4, but we don't think that date is sacred any longer, as regulators have said the companies have until March 11.

Pepco Reports In-Line 2015 Earnings; Exelon Believes D.C. Will Approve Merger by March 4

Charles Fishman, Eq. Analyst, 22 February 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Pepco reported in-line 2015 earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining the approval of the District of Columbia Public Service Commission and being completed following an agreement with D.C. Mayor Muriel Bowser that sweetened the benefits for customers and provided other benefits to the district.

Pepco Holdings or Exelon may terminate the merger agreement if the D.C. commission fails to issue a final order approving the merger without condition or modification of the terms of the settlement agreement by March 4. Exelon has made clear that if the D.C. commission does not approve the deal by March 4, it will terminate the agreement. However, Exelon's CEO recently said he believes D.C. will approve the transaction at its next meeting before the termination date.

Pepco reported 2015 adjusted operating earnings of $1.28, in line with our estimate and up from $1.27 per share in 2014. Earnings were favorably affected by rate increases due to infrastructure investment, partially offset by higher operation and maintenance expenses.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Supreme Court Validates Our View That Carbon Regulation Remains Highly Uncertain

Travis Miller, Sector Director, 11 February 2016

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court's decision comes as good news for coal miners that haven't had any for some time. However, we don't view today's announcement as a panacea for the coal industry's woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn't changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody's high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Exelon Surprises With 2.5% Dividend Growth Target

Travis Miller, Sector Director, 03 February 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Supreme Court Sides With Demand Response; No Fair Value Impacts

Andrew Bischof, CFA, Eq. Analyst, 25 January 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal

Travis Miller, Sector Director, 11 November 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the 2017-18 reduction was based on Pepco's reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals

Travis Miller, Sector Director, 30 October 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year

Charles Fishman, Eq. Analyst, 26 October 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C. commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco

Charles Fishman, Eq. Analyst, 06 October 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners

Charles Fishman, Eq. Analyst, 30 September 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Postpones Nuclear Plant Retirement Decision; No Fair Value Impact

Travis Miller, Sector Director, 10 September 2015

We are reaffirming our $35 per share fair value estimate for Exelon after management announced it will delay a decision whether to close at least three of its struggling nuclear plants. We recently incorporated into our fair value estimate and financial projections the assumption that it was more likely than not that Exelon would close those three plants in 2018. We also assume a 50% likelihood that Exelon will close its Byron (Illinois) nuclear plant in 2019.

Results of the recent 2016-18 PJM transitional capacity auctions and management's decision to delay potential retirements do not change our assumptions that those plants ultimately will close, absent significant energy market or public policy changes. The Quad Cities (Illinois), Three Mile Island (Pennsylvania), and Oyster Creek (New Jersey) plants are obligated to run at least through mid-2018, and the Byron plant is obligated to run through mid-2019 based on results from PJM's recent capacity auctions.

The key development for Exelon in last week's 2017-18 transitional capacity auction was that the Quad Cities and Byron plants cleared and are now obligated to run. Neither cleared PJM's 2017-18 base capacity auction last year at $120/megawatt-day but did clear last week's capacity performance transitional auction at $151.50/MW-day. Including those plants and the uplift for the rest of the fleet adds about $400 million of EBITDA in 2017-18.

The Clinton (Illinois) plant is the fourth that we assume will close by 2018. It is not part of PJM. It is obligated to run at least through 2016 as part of the Mid-Continent ISO. Exelon continues to lobby Illinois politicians to adopt a subsidy-like scheme that would improve the economics for its six Illinois nuclear plants. We do not include any benefits from policy changes in our fair value estimate.

Morningstar Equity Research Methodology

Fundamental Analysis

At Morningstar, we believe buying shares of superior businesses at a discount and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are our primary focus. Occasionally, this approach causes our recommendations to appear out of step with the market, but willingness to be contrarian is an important source of outperformance and a benefit of Morningstar's independence. Our analysts conduct primary research to inform our views on each firm's moat, fair value and uncertainty.

Economic Moat

The economic moat concept is a cornerstone of Morningstar's investment philosophy and is used to distinguish high-quality companies with sustainable competitive advantages. An economic moat is a structural feature that allows a firm to sustain excess returns over a long period of time. Without a moat, a company's profits are more susceptible to competition. Companies with narrow moats are likely to achieve normalized excess returns beyond 10 years while wide-moat companies are likely to sustain excess returns beyond 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe lower-quality no-moat companies will see their returns gravitate toward the firm's cost of capital more quickly than companies with moats will. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

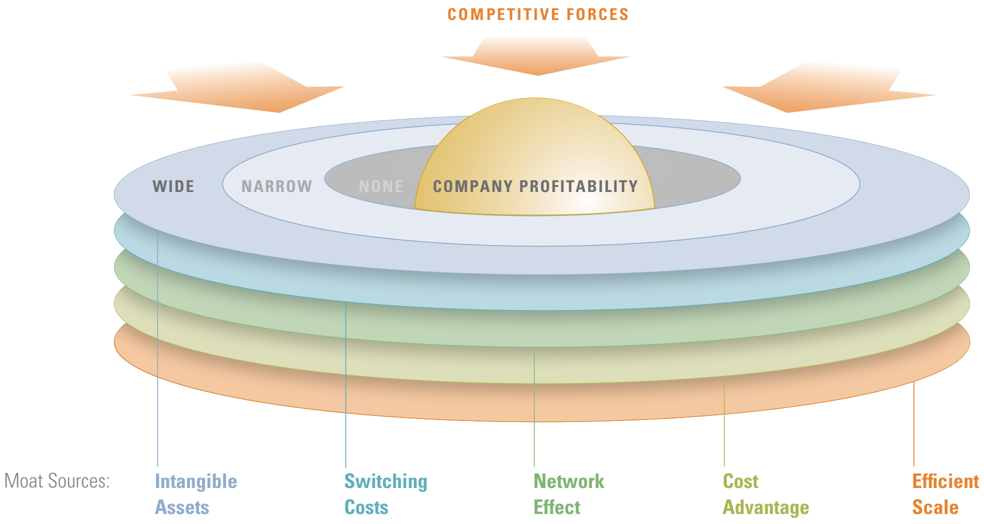
Fair Value Estimate

Our analyst-driven fair value estimate is based primarily on Morningstar's proprietary three-stage discounted cash flow model. We also use a variety of supplementary fundamental methods to triangulate a company's worth, such as sum-of-the-parts, multiples, and yields, among others. We're looking well beyond next quarter to determine the cash-generating ability of a company's assets because we believe the market price of a security will migrate toward the firm's intrinsic value over time. Economic moats are not only an important sorting mechanism for quality in our framework, but the designation also directly contributes to our estimate of a company's intrinsic value through sustained excess returns on invested capital.

Uncertainty Rating

The Morningstar Uncertainty Rating demonstrates our assessment of a firm's cash flow predictability, or valuation risk. From this rating, we determine appropriate margins of safety: The higher the uncertainty, the wider the margin of safety around our fair value estimate before our recommendations are triggered. Our uncertainty ratings are low, medium, high, very high, and extreme. With each uncertainty rating is a corresponding set of price/fair value ratios that drive our recommendations: Lower price/fair value ratios (<1.0) lead to positive recommendations, while higher price/fair value

Economic Moat



Morningstar Equity Research Methodology

ratios (>1.0) lead to negative recommendations. In very rare cases, the fair value estimate for a firm is so unpredictable that a margin of safety cannot be properly estimated. For these firms, we use a rating of extreme. Very high and extreme uncertainty companies tend to have higher risk and volatility.

Quantitatively Driven Valuations

To complement our analysts' work, we produce Quantitative Ratings for a much larger universe of companies. These ratings are generated by statistical models that are meant to divine the relationships between Morningstar's analyst-driven ratings and key financial data points. Consequently, our quantitative ratings are directly analogous to our analyst-driven ratings.

Quantitative Fair Value Estimate (QFVE): The QFVE is analogous to Morningstar's fair value estimate for stocks. It represents the per-share value of the equity of a company. The QFVE is displayed in the same currency as the company's last close price.

Valuation: The valuation is based on the ratio of a company's quantitative fair value estimate to its last close price.

Quantitative Uncertainty: This rating describes our level of uncertainty about the accuracy of our quantitative fair value estimate. In this way it is analogous to Morningstar's fair value uncertainty ratings.

Quantitative Economic Moat: The quantitative moat rating is analogous to Morningstar's analyst-driven economic moat rating in that both are meant to describe the strength of a firm's competitive position.

Understanding Differences Between Analyst and Quantitative Valuations

If our analyst-driven ratings did not sometimes differ from our quantitative ratings, there would be little value in producing both. Differences occur because our quantitative ratings are essentially a highly sophisticated analysis of the analyst-driven ratings of comparable companies. If a company is unique and has few comparable companies, the quantitative model will have more trouble assigning correct ratings, while an analyst will have an easier time recognizing the true characteristics of the company. On the other hand, the quantitative models incorporate new data efficiently and consistently. Empirically, we find quantitative ratings and analyst-driven ratings to be equally powerful predictors of future performance. When the analyst-driven rating and the quantitative rating agree, we find the ratings to be much more predictive than when they differ. In this way, they provide an excellent second opinion for each other. When the ratings differ, it may be wise to follow the analyst's rating for a truly unique company with its own special situation, and follow the quantitative rating when a company has several reasonable comparable companies and relevant information is flowing at a rapid pace.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

-Further information on Morningstar's conflict of interest policies is available from http://global.morningstar.com/equitydisclosures.

If you wish to obtain further information regarding previous Reports and recommendations and our services, please contact your local Morningstar office.

Unless otherwise provided in a separate agreement, you may use this Report only in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of this document is Morningstar Inc. Redistribution, in any capacity, is prohibited without permission. The information, data, analyses and opinions presented herein do not constitute investment advice; are provided solely for informational purposes and therefore are not an offer to buy or sell a security; and are not warranted to be correct, complete or accurate, nor may they be construed as a representation regarding the legality of investing in the security/ies concerned, under the applicable investment or similar laws or regulations of any person or entity accessing this report. The opinions expressed are as of the date written and are subject to change without notice. Except as otherwise required by law, Morningstar, its affiliates, and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions or their use. You should seek the advice of your financial, legal, tax, business and/or other consultant, and read all relevant issue documents pertaining to the security/ies concerned, including without limitation, the detailed risks involved in the investment, before making an investment decision.

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. As the price / value / interest rate of a security fluctuates, the value of your investments in the said security, and in the income, if any, derived therefrom may go up or down.

For Recipients in India: This research on securities [as defined in clause (h) of Section 2 of the Securities Contracts (Regulation) Act, 1956], such research being referred to for the purpose of this document as "Investment Research", is issued by Morningstar Investment Adviser India Private Limited.

Morningstar Investment Adviser India Private Limited is registered with the Securities and Exchange Board of India under the SEBI (Investment Advisers) Regulations, 2013, vide Registration number INA000001357, dated March 27, 2014, and in compliance of the aforesaid regulations and the SEBI (Research Analysts) Regulations, 2014, it carries on the business activities of investment advice and research. Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Associates LLC, which is a part of the Morningstar Investment Management group of Morningstar, Inc., and Morningstar, Inc. is a leading provider of independent investment research that offers an extensive line of products and services for individual investors, financial advisors, asset managers, and retirement plan providers and sponsors. In India, Morningstar Investment Adviser India Private Limited has only one associate, viz., Morningstar India Private Limited, and this company predominantly carries on the business activities of providing data input, data transmission and other data related services, financial data analysis, software development etc.

The author/creator of this Investment Research ("Research Analyst") or his/her associates or his/her relatives does/do not have (i) any financial interest in the subject company; (ii) any actual/beneficial ownership of one per cent or more securities of the subject company, at the end of the month immediately preceding the date of publication of this Investment Research; and (iii) any other material conflict of interest at the time of publication of this Investment Research.

The Research Analyst or his/her associates or his/her relatives has/have not received any (i) compensation from the subject company in the past twelve months; (ii) compensation for products or services from the subject company in the past twelve months; and (iii) compensation or other material benefits from the subject company or third party in connection with this Investment Research. Also, the Research Analyst has not served as an officer, director or employee of the subject company.

The terms and conditions on which Morningstar Investment Adviser India Private Limited offers Investment Research to clients, varies from client to client, and are spelt out in detail in the respective client agreement.

Exelon Corporation

EXC – BUY – Surprise Rejections from Three Key Parties; EXC More Likely to Walk from Deal but Still Hope

SHAHRIAR POURREZA, CFA, ANALYST
shahriar.pourreza@guggenheimpartners.com
212 518 5862

FLASH NOTE

SECTOR: Power and Utilities

March 1, 2016

What's new? Surprise announcements from the DC Mayor, Attorney General, and Office of People's Counsel, three key parties in the settlement, reject the amendments proposed by the DC PSC – the clear path to automatic approval has vanished, in our view. For the merger to move forward, EXC (BUY, $31.77) will have to negotiate with nine parties including the above three stakeholders for new terms by March 11 to respond to the Commission with alternative conditions. While there is time to negotiate any alternative conditions, we believe there is increasing likelihood EXC could walk from the deal.

EXC's buyback program is already planned. If the deal fails, we believe management will start to implement plans to buy back 57.5mm shares within 5 months and retire the debt associated with Pepco. Near-tem drag could equate to $0.07/share as the company completes the buyback program as well as delevers. While EXC is currently guiding to the 57.5mm shares, we note that they raised $3B in equity sales (including $1.15B in forward sale) and could increase their buybacks to be above their planned $1.6B. Although there will be a drag in the near term, we believe the buybacks would likely be accretive in 2017 given the reduction in sharecount and lower interest expense.

If the deal does not close, there could be additional $4-5 downside to POM. Given that POM (NC, $22.81) has been out of a rate case since 2014 and the delays with this merger, POM has materially deteriorated as a standalone company, in our view. We estimate downside to POM stock is another $4-5 based on a 12-13 range multiple on 2018 consensus earnings estimates.

What's next? March 11 is the deadline for alternative conditions, after which all parties have 7 days to comment on these new terms. It remains to be seen what Commission could plan on for addressing the new settlement conditions by either opening hearing or have an internal review. **Discussions are currently happening with various stakeholders behind closed doors, so there is still time to save this deal but the risks have increased.**

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

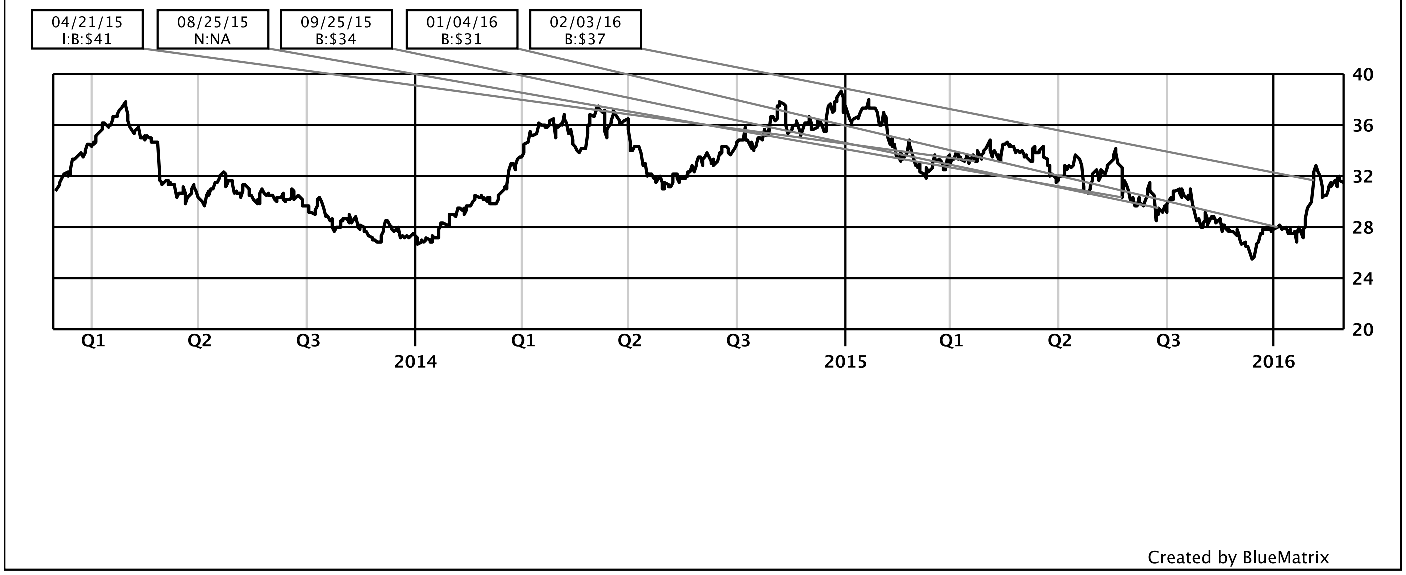
IMPORTANT DISCLOSURES

The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 02-29-2016



RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 10% or minus 10% within a 12-month period. No price target is assigned.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Restricted - Describes issuers where, in conjunction with Guggenheim Securities, LLC engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Prior to 12/8/14, Guggenheim Securities, LLC's BUY, NEUTRAL, and SELL ratings definitions were as follows (no other ratings definitions were changed):

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 15% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 15% or more within a 12-month period.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgment. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conduct an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

TACTICAL TRADING IDEA DISCLAIMER

Guggenheim Securities, LLC produces "Tactical Trade Ideas" that identify short-term, catalyst-driven trading opportunities impacting companies within the Firm's coverage universe. Tactical Trade Ideas may exist on companies in this report and may be contrary to the analyst's published rating.

Exelon

Snatching defeat from the jaws of victory; could SMIDs lose their premium?

Maintain Rating: NEUTRAL | PO: 32.00 USD | Price: 31.49 USD

Bank of America Merrill Lynch

Equity | 01 March 2016

D.C. Mayor and Office of People's Council balk on terms

Two key constituents, D.C. Mayor Bowser and the Office of People's Council announced a lack of support for the alternative settlement. OPC's change in position was largely due to language in the revised settlement that broadens the scope of credits from residential to all customers and further removed a stipulation preventing a rate increase for residential ratepayers through March 2019. With the two largest supporters of the deal opposed to the revised settlement, in our view Exelon will walk away from the Pepco deal, as opposed to a quick resolution as we expected on Friday.

Exelon to begin unwinding capital raise

With the deal likely terminated, Exelon will now focus on beginning repayment of $3.2 billion of debt issued for the deal and look to repurchase $1.6B in equity (this is already in guidance). Without the deal, Exelon will now be near the high-side of the dividend payout ratio and will be close to 100% of regulated earnings – bringing into question the wisdom of announcing a dividend raise prior to the Pepco deal being concluded. Over the two years attempting to acquire Pepco Exelon's earnings have grown into supporting the dividend. We forecast the company can largely support the dividend at this juncture, but dividend growth will be tepid as there is not as much cushion as there would have been had the Pepco deal been consummated.

SMID takeout premium could start to deflate in sector

With the Exelon-Pepco deal now likely to terminate, the Cleco buyout having been rejected by state regulators, and the NextEra – Hawaiian Electric deal experiencing significant local pushback, we believe the SMID caps may finally have reached an inflection point for the removal of premium valuations to the large cap group – as we wrote about in our 2016 Year Ahead Outlook. Large cap companies are likely to be more cautious about M&A in the electric utility sector given these recent outcomes. As we highlighted in our Year Ahead report, Underperform-rated WR, NWE, and PNW are names with takeout premiums embedded in them in our view.

EXC shares fairly valued; Maintain Neutral

With the deal now likely to be abandoned, Exelon's strategy will look to focus on current businesses and potentially look for other strategic opportunities. We continue to believe longer term low commodity price in PJM will weigh on Exelon's outlook. In addition, the dividend growth opportunities may be tempered as the payout ratio needs to be managed within the regulated growth outlook. In contrast, the shares are trading at a substantial discount to peers; these two factors largely offset. Maintain Neutral.

Price objective basis & risk

Exelon (EXC)

Our $32/share price objective for EXC shares is derived from our sum of the parts valuation model, where we assign approximately $8 of value to ExGen, $(4) for the parent, and approximately $28 of value to the regulated utility. We value integrated electric utilities, including Exelon, using a sum of the parts valuation model based on 2018E earnings and EBITDA. For Exelon specifically we use a target 6.8x EV/EBITDA multiple to value the deregulated generation segment, in line with peers. We apply a target 15.0 P/E multiple to value the regulated side of the business, which is a discount to regulated peers at 15.5x to reflect the generally below-average ROEs allowed by the state commissioners for the states in which Exelon has regulated operations.

Downside (upside) risks to our price objective are: 1) increasing (decreasing) of forward power prices driven by rising natural gas prices, heat rates, or Northeast and Midwest gas basis to Henry Hub, 2) regulatory outcomes as well as changes in nuclear regulation, 3) deterioration (improvements) in operating efficiency beyond our base scenario, and 4) risks to the successful completion of the Pepco Holdings acquisition

NorthWestern Corporation (NWE)

We value NorthWestern Energy by assigning a target P/E multiple to our 2018 EPS estimate. We value regulated utilities by assigning a target P/E multiple to our 2018 EPS estimate. Our price objective of $54 is premised on a 14.5x multiple applied to our 2018 EPS estimate. Our 14.5x target multiple is based on the current small-mid cap regulated peer average. Historically, NWE shares have traded mostly in line with the small-mid cap average.

Risks to our price objective are better than expected rate case outcomes and higher earnings from incremental natural gas reserve related capex spending. A downside risk to our PO is a decrease in bond yields.

Pinnacle West Corp (PNW)

Our price objective is $63, based on a 14.5x target PE multiple applied to our 2018 EPS estimate. Our 14.5x target multiple is based on PNW's peer group current average 2018 PE multiple of 14.5x, based on the fact that PNW has historically traded in line with its small/mid cap peers. Upside risks to our price objective are positive regulatory outcomes, load growth beyond our projections, and decreases in bond yields. Downside risks to our price objective are negative regulatory outcomes, slower than expected capex growth, and contraction in small/mid cap utility multiples.

Westar Energy (WR)

Our price objective is $39. This is based on a target 14.5x PE multiple applied to our 2018 PE estimate. Our 14.5x PE reflects a group average current trading multiple of 14.5x for small/mid cap regulated utilities. Upside risks to our price objective are better than expected power demand growth, improvements in operating efficiency beyond our base scenario, and rate case outcomes. A downside risk to our PO is an increase in bond yields and better than expected regulatory outcomes.

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	69	47.26%	Buy	58	84.06%
Hold	40	27.40%	Hold	32	80.00%
Sell	37	25.34%	Sell	27	72.97%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1673	50.16%	Buy	1244	74.36%
Hold	777	23.30%	Hold	545	70.14%
Sell	885	26.54%	Sell	533	60.23%

* Issuers that were investment banking clients of BofA Merrill Lynch or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Merrill Lynch Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Merrill Lynch report referencing the stock.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Merrill Lynch.

This research report provides general information only. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this report and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this report.

Securities and other financial instruments discussed in this report, or recommended, offered or sold by Merrill Lynch, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Merrill Lynch is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned in this report. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Merrill Lynch entities located outside of the United Kingdom. With Mayor and OPC backing away, deal looks more likely to fail

Earlier today, both the DC Mayor and People's Counsel issued statements that they cannot support the adjustments the DC Public Service Commission (PSC) has made to the EXC-POM merger settlement agreement. Last Friday, the DC PSC rejected the original settlement filed by EXC, POM, the DC Mayor, the Office of the People's Counsel (OPC) and other parties. The commission then voted (2-1) to approve adjustments to the agreement. Per the final order, the DC PSC would allow the merger to go through so long as **all of the parties** accept the PSC's new terms. As we said initially, the revised terms proposed by the commission were unlikely to be deal-breakers for EXC or POM, but it was less certain whether other parties would be willing to stay on board.

What are EXC's options?

Exelon could either walk away from the POM transaction and begin to unwind merger-related financings or they along with the other settling parties could request "other relief" at the PSC by next Friday. Given the OPC and Mayor's public statements, chances of the settling parties not reaching agreement on the best path forward would seem to have increased substantially, raising the likelihood that the deal will end up not closing.

What happens to EXC EPS if the POM transaction falls apart?

Our current 2016-2018 EPS estimates assume that the POM deal is completed by the end of Q1 2016. If the merger falls apart, we would likely raise our current 2016 and 2017 EPS estimates of $2.50 and $2.65, respectively, by $0.05-$0.10. This would depend on how quickly EXC unwound deal-related financings and how much stock specifically they decided to repurchase. We had been assuming EXC would pursue a buyback of just over $3B in our estimates this past fall after the DC PSC initially rejected the transaction. It's less clear that not closing the merger would be accretive to our 2018E of $2.75 as we assume a more sizable EPS contribution from POM by that time.

What about valuation?

If the deal fails, we could see a modest benefit to our EXC price target (currently $34) given the above changes. That said, failing to execute on POM would be a strategic setback in EXC's goal to evolve towards a more regulated business mix and one which would likely raise some uncertainty over possible next moves.

Key Settling Party to the EXC/POM Merger Pulls Support for Revised Agreement

News reports surfaced late this morning revealing that the Office of People's Counsel for the District of Columbia, a ratepayers advocacy group and one of the nine settling parties involved in the $6.8 billion merger between Exelon and Pepco Holdings Inc. (POM, $24.13, Not Rated), denounced the revised settlement agreement that was put forth by the District of Columbia Public Service Commission (PSC) last Friday (see our flash for more details).

The settlement agreement, negotiated primarily by D.C. Mayor Muriel E. Bowser's office in October 2015, called for the utilities to pay the District $78 million for its support, including $26 million that would have gone to offset rate increases for residents over the next four years. Last Friday, the D.C. PSC ruled two-to-one against the proposed settlement agreement, but one of the dissenting commissioners, Commissioner Joanne Doddy Fort, offered alternative provisions, that if agreed to by all nine settling parties by March 11, 2016, could render the merger approved by the PSC. Commissioner Willie Phillips, who approved the settlement agreement, was not party to the alternative provisions, but indicated he could still approve the merger under the conditions proposed.

Sandra Mattavous-Frye, the chief advocate for District ratepayers, stated that she cannot support the revised merger plan because it has taken a principal benefit of the merger away from residential electricity customers by removing the guarantee of no rate increases for residential ratepayers through March 2019. She further noted that the Commission's order "eviscerates the benefits and protections essential to render the proposed merger in the public interest…" A spokeswoman for the People's Counsel stated that the group had no counteroffer and wanted parties to return to the agreement that the regulators found flawed.

Our View:

- The news is a major setback for the EXC/POM merger given the lack of support from a key party to the revised settlement agreement.
- It is unclear at this time whether the settling parties will come together to address the issues found to be unacceptable by the D.C. PSC in the original settlement agreement before the March 11 deadline set by the commission.
- EXC has stated that if an agreement is not reached by the merger deadline of March 4, set by both EXC and POM, both parties could walk away from the deal. We believe that today's news now puts the likelihood of an approved merger in further jeopardy.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael S. Worms, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA (exceptions: Alex Arfaei and Brodie Woods). These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosure

Disclosure 10: A research analyst, associate, or any person (or their household members) directly involved in the preparation of this research report has a financial interest in securities of this issuer.

Methodology and Risks to Price Target/Valuation

Methodology: Our valuation is based on a combination of our 2017 adjusted EBITDA estimate with an 8x EV/EBITDA multiple and 15x 2017E P/E multiple.
Risks: A material decline in power prices and / or a change in the regulatory environment could affect our price target.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx

General Disclaimer

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Alexander Pearce, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

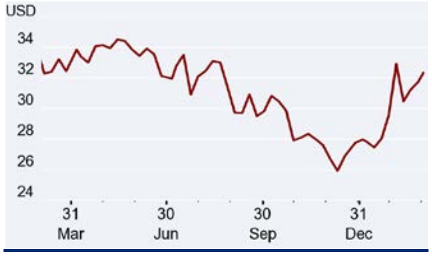
Exelon Corp (EXC)

Alert: Pepco - We think EXC Walks; preferred outcome for EXC shareholders but what next?

Sell	3
Price (02 Mar 16)	US$32.32
Target price	US$27.00
Expected share price return	-16.5%
Expected dividend yield	3.8%
Expected total return	-12.6%
Market Cap	US$29,732M

Price Performance
(RIC: EXC.N, BB: EXC US)



- **EXC will likely walk given path to approval very unclear.** We think EXC will only push to get the deal approved if there is a clear, reasonably quick and visible path to final approval without the need for significant additional concessions. We think the likelihood of getting all parties to agree on a new deal in a timely manner is very low. That is why we believe EXC will walk.

- **If all it took was the $25.6m offset applied to retail customers, EXC would agree. However, nothing about this deal has been easy…why start now?** The application of the offset to retail customers won't trigger the MFN clause and has no value implication. That is why EXC would likely accept this change if that was all it took. However, we think to get a deal done, the 'ask' may include further concessions which will trigger MFN resulting in meaningful value dilution.

- **It will likely take another week for a final decision from EXC.** We expect a final decision in one week after EXC evaluates all its options.

- **EXC shareholders get to look forward to share buybacks.** EXC will likely start the buyback of the 57.5m shares right after the announcement of deal termination. In the near term, this buyback will support the share price of EXC. Note also that $1.8B of the $3.3B debt financing for POM is callable.

- **The good news if the deal is terminated – Value and credit accretive.**

  - Our PT increases to $28 (from $27) if the deal is terminated

  - EXC doesn't lever up at the holding company level at a time when ExGen is getting weaker

- **The bad news if the deal is terminated – Dividends and strategic direction.** If EXC does terminate the deal, it has some key questions to answer:

  - Will EXC pursue separation of the utility and Generation business?

  - Will EXC attempt another utility acquisition to increase its regulated mix? Is the current business mix sustainable? If yes, why the need for Pepco in the first place?

  - What is the target dividend payout on utility earnings? Is the 2.5% growth in dividends sustainable without Pepco?

See Appendix A-1 for Analyst Certification, Important Disclosures and non-US research analyst disclosures.

Exelon Corp

Valuation

We value EXC using a sum-of-the-parts approach to get to our $27 target. We value ExGen at $10/share and believe ExGen's core nuclear assets will continue to experience weak economics. Valuation is based on a 5.5x 2019 EBITDA multiple that is supported by an UFCF conversion of 45%. The utilities business is valued at $18/share based on a 15x terminal PE multiple. We also add $5/share value provided by PepCo. We back out $6/share for the parent to get to our price target

Risks

Commodity price risk affecting merchant generation – If natural gas prices rise, wholesale power prices will likely rise, raising commodity margins.

Exelon is inherently a long natural gas position since natural gas generation sets the price of power in its key generation markets. If forward natural gas prices rise significantly from current prices, Exelon's earnings will likely exceed our forecasts.

Regulatory risk – All regulated utilities are subject to state and federal regulatory agencies that can materially affect shareholder returns. Failure to obtain fair recovery for capital expenditures or increases in operating costs can diminish returns to shareholders and adversely affect the share price.

Credit rating – Exelon's generation business is currently two notches above a high yield credit rating, but declining cash flows at the merchant business presents some risk of a possible credit rating downgrade barring deleveraging through an equity issuance, asset sale, or other means. If ExGen's credit rating is lowered to high yield status, ExGen would likely have to increase their collateral and it could pressure hedging activities going forward, which would reduce our earnings outlook.

If the impact on the company from any of these factors proves to be more negative/positive than we anticipate, the stock will likely have difficulty achieving our financial and price targets.

Appendix A-1

Analyst Certification

The research analyst(s) primarily responsible for the preparation and content of this research report are named in bold text in the author block at the front of the product except for those sections where an analyst's name appears in bold alongside content which is attributable to that analyst. Each of these analyst(s) certify, with respect to the section(s) of the report for which they are responsible, that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc and its affiliates. No part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendation(s) or view(s) expressed by that research analyst in this report.

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of Exelon Corp

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of Exelon Corp.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from Exelon Corp.

Citigroup Global Markets Inc. or an affiliate received compensation for products and services other than investment banking services from Exelon Corp in the past 12 months.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as investment banking client(s): Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: Exelon Corp.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to Exelon Corp. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities

transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 28th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating		
Data current as of 31 Dec 2015	Buy	Hold	Sell
Citi Research Global Fundamental Coverage	48%	40%	12%
% of companies in each rating category that are investment banking clients	64%	64%	59%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Prior to May 1, 2014 Citi Research may have also assigned a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the geographic and industry sector over a 3 month period. The relative call may have highlighted a specific near-term catalyst or event impacting the company or the market that was anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) may have indicated the most and least preferred stocks in the universe of stocks under consideration, explaining the basis for this short-term view. This three-month view may have been different from and did not affect a stock's fundamental equity rating, which reflected a longer-term total absolute return expectation.

NON-US RESEARCH ANALYST DISCLOSURES
Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below:

Citigroup Global Markets Inc	Praful Mehta; Tulkin Niyazov; Jesse Chai

OTHER DISCLOSURES

The subject company's share price set out on the front page of this Product is quoted as at 02 March 2016 04:00 PM on the issuer's primary market.

Many European regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Citi Research generally disseminates its research to the Firm’s global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm’s proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author’s previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client’s individual preferences as to the frequency and manner of receiving communications from analysts, the client’s risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Rule 483, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Analyst Note 02 Mar 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after fissures opened in the settlement negotiations related to Washington, D.C., regulatory approval for the companies' proposed merger. As of midday Wednesday, Pepco was trading at a 10% discount to our fair value estimate and a 15% discount to Exelon's $27.25 per share cash offer price, both of which we think offer good return opportunities.

Our Pepco fair value estimate continues to include a 75% probability that the settling parties--including D.C. Mayor Muriel Bowser's office, the D.C. regulatory staff, the lead consumer advocate group, and the companies--will reach an agreement regulators will approve. We think the companies remain committed to the deal and will accept any final settlement terms regulators approve. The key points of contention appear to involve less than $100 million, an immaterial impact on the $6.8 billion deal value.

However, we think the companies could be losing control over the outcome, and the deal could now be a proxy political fight among several D.C. entities. If we get more information that supports this theory, we would be inclined to cut our probability of the deal closing to 50%, leading to a $2 per share cut in Pepco's fair value estimate. We include $5 per share of incremental value in our fair value estimate for Pepco. A probability change is not likely to have a material impact on the $1 per share of value dilution we include in our Exelon fair value estimate related to the deal.

We continue to think Exelon management would be willing to go past its previously stated March 4 deadline if settlement negotiations move forward.

We are reaffirming our narrow moat and stable moat trend ratings for both companies.

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers at Commonwealth Edison (Illinois), PECO (Pennsylvania), and Baltimore Gas & Electric (Maryland). Exelon also owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. Exelon also is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs and generate large profits even with currently depressed power prices.
- Higher natural gas and coal prices, rising electricity demand and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.
- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.
- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow moat distribution earnings.
- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

Reaffirming Outlook for Now, but Politics Could Yank Cord Out From Exelon-Pepco

Travis Miller, Sector Director, 06 October 2015

Investment Thesis

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and made a $12 billion bid for Pepco in April 2014, both including debt. Management's political negotiations appear to have revived the deal in Washington, D.C., where regulators had rejected it in August 2015. We now expect it has a 75% chance of closing. Exelon has received all other regulatory approvals.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our outlook for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can grow earnings 10% annually the next three years.

Travis Miller, Sector Director, 02 March 2016

Analyst Note

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after fissures opened in the settlement negotiations related to Washington, D.C., regulatory approval for the companies' proposed merger. As of midday Wednesday, Pepco was trading at a 10% discount to our fair value estimate and a 15% discount to Exelon's $27.25 per share cash offer price, both of which we think offer good return opportunities.

Our Pepco fair value estimate continues to include a 75% probability that the settling parties--including D.C. Mayor Muriel Bowser's office, the D.C. regulatory staff, the lead consumer advocate group, and the companies--will reach an agreement regulators will approve. We think the companies remain committed to the deal and will accept any final settlement terms regulators approve. The key points of contention appear to involve less than $100 million, an immaterial impact on the $6.8 billion deal value.

However, we think the companies could be losing control over the outcome, and the deal could now be a proxy political fight among several D.C. entities. If we get more information that supports this theory, we would be inclined to cut our probability of the deal closing to 50%, leading to a $2 per share cut in Pepco's fair value estimate. We include $5 per share of incremental value in our fair value estimate for Pepco. A probability change is not likely to have a material impact on the $1 per share of value dilution we include in our Exelon fair value estimate related to the deal.

We continue to think Exelon management would be willing to go past its previously stated March 4 deadline if settlement negotiations move forward.

We are reaffirming our narrow moat and stable moat trend ratings for both companies.

Economic Moat

Travis Miller, Sector Director, 06 October 2015

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat characteristics, with returns on capital above costs of capital for the foreseeable future. However, that spread between long-term returns on capital and Exelon's cost of capital have shrunk based on our midcycle outlook for power prices in the eastern U.S. Exelon's increasing diversification into narrow- and no-moat businesses together with the shrinking returns at its nuclear generation business supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources like coal and natural gas reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must continue to have access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Valuation

Travis Miller, Sector Director, 06 October 2015

We are reaffirming our $35 per share fair value estimate after raising our probability of the Pepco acquisition closing to 75% from 25% as a result of an agreement the companies reportedly reached with the Washington, D.C., mayor's office on Oct. 6. Although we think the deal is value-dilutive, it is too small to have a material impact on our fair value estimate. Exelon's $27.25-per-share cash offer represents a 30% premium to our $21 per share standalone fair value estimate for Pepco.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities (Ill.), Oyster Creek (N.J.), and Three Mile Island (Pa.)--as well as the Clinton (Ill.) plant. We now assume a 50% probability that the Byron (Ill.) plant will retire given it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is 50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Our midcycle earnings forecast at Exelon Generation is based on a $4/mcf midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

We assume a 9% cost of equity and a 7.1% cost of capital. Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Risk

Travis Miller, Sector Director, 06 October 2015

Investors should pay the most attention to political developments that would re-regulate competitive electricity markets in the Midwest and Mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source.

As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket.

Reregulation also would destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.

As Exelon's regulated utilities generate a greater share of earnings, investors will be subject more acutely to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management

Travis Miller, Sector Director, 06 October 2015

We give Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities.

President and CEO Chris Crane and Executive Chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and Chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition in 2015. This will increase Exelon's share of regulated utilities earnings and dilute shareholders' exposure to wholesale power markets. Management has shown strong conviction in the value of the deal based on their efforts to gain support for the deal from all parties, particularly in Washington, D.C.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants absent significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creation opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8 million shares or vested options as of January 2015.

Analyst Notes Archive

Reaffirming Outlook for Now, but Politics Could Yank Cord Out From Exelon-Pepco

Travis Miller, Sector Director, 02 March 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after fissures opened in the settlement negotiations related to Washington, D.C., regulatory approval for the companies' proposed merger. As of midday Wednesday, Pepco was trading at a 10% discount to our fair value estimate and a 15% discount to Exelon's $27.25 per share cash offer price, both of which we think offer good return opportunities.

Our Pepco fair value estimate continues to include a 75% probability that the settling parties--including D.C. Mayor Muriel Bowser's office, the D.C. regulatory staff, the lead consumer advocate group, and the companies--will reach an agreement regulators will approve. We think the companies remain committed to the deal and will accept any final settlement terms regulators approve. The key points of contention appear to involve less than $100 million, an immaterial impact on the $6.8 billion deal value.

However, we think the companies could be losing control over the outcome, and the deal could now be a proxy political fight among several D.C. entities. If we get more information that supports this theory, we would be inclined to cut our probability of the deal closing to 50%, leading to a $2 per share cut in Pepco's fair value estimate. We include $5 per share of incremental value in our fair value estimate for Pepco. A probability change is not likely to have a material impact on the $1 per share of value dilution we include in our Exelon fair value estimate related to the deal.

We continue to think Exelon management would be willing to go past its previously stated March 4 deadline if settlement negotiations move forward.

We are reaffirming our narrow moat and stable moat trend ratings for both companies.

The Never-Ending Exelon-Pepco Saga Gets Another Two Weeks of Life, but No Real Changes

Travis Miller, Sector Director, 29 February 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Washington, D.C., regulators again rejected Exelon's offer to acquire Pepco but left open an option for the companies to gain approval.

We still include $1 per share of value dilution in our fair value estimate for Exelon and $5 per share of incremental value for Pepco, based on a 75% probability that the companies will close the transaction at Exelon's $27.25 cash offer. We are reaffirming our narrow moat and stable moat trend ratings for both companies.

Even though Washington, D.C., regulators formally rejected the deal, we think the companies are committed enough to closing the deal that there is a good likelihood they will accept the terms set by regulators. The terms sap additional value from shareholders to benefit customers through rate refunds and benefits, limiting cost reductions, returning merger synergies to customers, and limiting recovery for some costs. However, the D.C. service territory is not big enough for the incremental lost value to have an impact on our valuation of the deal. The terms also set strict ringfencing provisions, but those are typical and don't have any impact on our valuations.

Exelon management had said they would terminate the deal if regulators did not approve it by March 4, but we don't think that date is sacred any longer, as regulators have said the companies have until March 11.

Pepco Reports In-Line 2015 Earnings; Exelon Believes D.C. Will Approve Merger by March 4

Charles Fishman, Eq. Analyst, 22 February 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Pepco reported in-line 2015 earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining the approval of the District of Columbia Public Service Commission and being completed following an agreement with D.C. Mayor Muriel Bowser that sweetened the benefits for customers and provided other benefits to the district.

Pepco Holdings or Exelon may terminate the merger agreement if the D.C. commission fails to issue a final

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★ 01 Mar 2016	31.77 USD 01 Mar 2016	35.00 USD	0.91	3.90 01 Mar 2016	29.23 01 Mar 2016	Utilities - Diversified	Standard

order approving the merger without condition or modification of the terms of the settlement agreement by March 4. Exelon has made clear that if the D.C. commission does not approve the deal by March 4, it will terminate the agreement. However, Exelon's CEO recently said he believes D.C. will approve the transaction at its next meeting before the termination date.

Pepco reported 2015 adjusted operating earnings of $1.28, in line with our estimate and up from $1.27 per share in 2014. Earnings were favorably affected by rate increases due to infrastructure investment, partially offset by higher operation and maintenance expenses.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Supreme Court Validates Our View That Carbon Regulation Remains Highly Uncertain

Travis Miller, Sector Director, 11 February 2016

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court's decision comes as good news for coal miners that haven't had any for some time. However, we don't view today's announcement as a panacea for the coal industry's woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn't changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody's high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Exelon Surprises With 2.5% Dividend Growth Target

Travis Miller, Sector Director, 03 February 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Supreme Court Sides With Demand Response; No Fair Value Impacts

Andrew Bischof, CFA, Eq. Analyst, 25 January 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal

Travis Miller, Sector Director, 11 November 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the 2017-18 reduction was based on Pepco's reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals

Travis Miller, Sector Director, 30 October 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year

Charles Fishman, Eq. Analyst, 26 October 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C. commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco

Charles Fishman, Eq. Analyst, 06 October 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners

Charles Fishman, Eq. Analyst, 30 September 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Postpones Nuclear Plant Retirement Decision; No Fair Value Impact

Travis Miller, Sector Director, 10 September 2015

We are reaffirming our $35 per share fair value estimate for Exelon after management announced it will delay a decision whether to close at least three of its struggling nuclear plants. We recently incorporated into our fair value estimate and financial projections the assumption that it was more likely than not that Exelon would close those three plants in 2018. We also assume a 50% likelihood that Exelon will close its Byron (Illinois) nuclear plant in 2019.

Results of the recent 2016-18 PJM transitional capacity auctions and management's decision to delay potential retirements do not change our assumptions that those plants ultimately will close, absent significant energy market or public policy changes. The Quad Cities (Illinois), Three Mile Island (Pennsylvania), and Oyster Creek (New Jersey) plants are obligated to run at least through mid-2018, and the Byron plant is obligated to run through mid-2019 based on results from PJM's recent capacity auctions.

The key development for Exelon in last week's 2017-18 transitional capacity auction was that the Quad Cities and Byron plants cleared and are now obligated to run. Neither cleared PJM's 2017-18 base capacity auction last year at $120/megawatt-day but did clear last week's capacity performance transitional auction at $151.50/MW-day. Including those plants and the uplift for the rest of the fleet adds about $400 million of EBITDA in 2017-18.

The Clinton (Illinois) plant is the fourth that we assume will close by 2018. It is not part of PJM. It is obligated to run at least through 2016 as part of the Mid-Continent ISO. Exelon continues to lobby Illinois politicians to adopt a subsidy-like scheme that would improve the economics for its six Illinois nuclear plants. We do not include any benefits from policy changes in our fair value estimate.

Morningstar Equity Research Methodology

Fundamental Analysis

At Morningstar, we believe buying shares of superior businesses at a discount and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are our primary focus. Occasionally, this approach causes our recommendations to appear out of step with the market, but willingness to be contrarian is an important source of outperformance and a benefit of Morningstar's independence. Our analysts conduct primary research to inform our views on each firm's moat, fair value and uncertainty.

Economic Moat

The economic moat concept is a cornerstone of Morningstar's investment philosophy and is used to distinguish high-quality companies with sustainable competitive advantages. An economic moat is a structural feature that allows a firm to sustain excess returns over a long period of time. Without a moat, a company's profits are more susceptible to competition. Companies with narrow moats are likely to achieve normalized excess returns beyond 10 years while wide-moat companies are likely to sustain excess returns beyond 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe lower-quality no-moat companies will see their returns gravitate toward the firm's cost of capital more quickly than companies with moats will. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

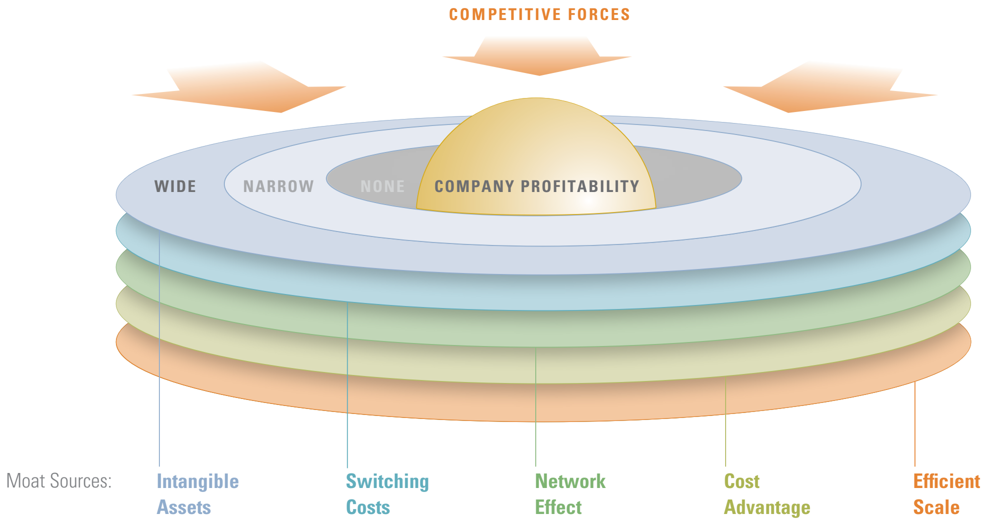
Fair Value Estimate

Our analyst-driven fair value estimate is based primarily on Morningstar's proprietary three-stage discounted cash flow model. We also use a variety of supplementary fundamental methods to triangulate a company's worth, such as sum-of-the-parts, multiples, and yields, among others. We're looking well beyond next quarter to determine the cash-generating ability of a company's assets because we believe the market price of a security will migrate toward the firm's intrinsic value over time. Economic moats are not only an important sorting mechanism for quality in our framework, but the designation also directly contributes to our estimate of a company's intrinsic value through sustained excess returns on invested capital.

Uncertainty Rating

The Morningstar Uncertainty Rating demonstrates our assessment of a firm's cash flow predictability, or valuation risk. From this rating, we determine appropriate margins of safety: The higher the uncertainty, the wider the margin of safety around our fair value estimate before our recommendations are triggered. Our uncertainty ratings are low, medium, high, very high, and extreme. With each uncertainty rating is a corresponding set of price/fair value ratios that drive our recommendations: Lower price/fair value ratios (<1.0) lead to positive recommendations, while higher price/fair value

Economic Moat



Morningstar Equity Research Methodology

ratios (>1.0) lead to negative recommendations. In very rare cases, the fair value estimate for a firm is so unpredictable that a margin of safety cannot be properly estimated. For these firms, we use a rating of extreme. Very high and extreme uncertainty companies tend to have higher risk and volatility.

Quantitatively Driven Valuations

To complement our analysts' work, we produce Quantitative Ratings for a much larger universe of companies. These ratings are generated by statistical models that are meant to divine the relationships between Morningstar's analyst-driven ratings and key financial data points. Consequently, our quantitative ratings are directly analogous to our analyst-driven ratings.

Quantitative Fair Value Estimate (QFVE): The QFVE is analogous to Morningstar's fair value estimate for stocks. It represents the per-share value of the equity of a company. The QFVE is displayed in the same currency as the company's last close price.

Valuation: The valuation is based on the ratio of a company's quantitative fair value estimate to its last close price.

Quantitative Uncertainty: This rating describes our level of uncertainty about the accuracy of our quantitative fair value estimate. In this way it is analogous to Morningstar's fair value uncertainty ratings.

Quantitative Economic Moat: The quantitative moat rating is analogous to Morningstar's analyst-driven economic moat rating in that both are meant to describe the strength of a firm's competitive position.

Understanding Differences Between Analyst and Quantitative Valuations

If our analyst-driven ratings did not sometimes differ from our quantitative ratings, there would be little value in producing both. Differences occur because our quantitative ratings are essentially a highly sophisticated analysis of the analyst-driven ratings of comparable companies. If a company is unique and has few comparable companies, the quantitative model will have more trouble assigning correct ratings, while an analyst will have an easier time recognizing the true characteristics of the company. On the other hand, the quantitative models incorporate new data efficiently and consistently. Empirically, we find quantitative ratings and analyst-driven ratings to be equally powerful predictors of future performance. When the analyst-driven rating and the quantitative rating agree, we find the ratings to be much more predictive than when they differ. In this way, they provide an excellent second opinion for each other. When the ratings differ, it may be wise to follow the analyst's rating for a truly unique company with its own special situation, and follow the quantitative rating when a company has several reasonable comparable companies and relevant information is flowing at a rapid pace.

Price/Fair Value Morningstar data as of Mar 01, 2016

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

-Further information on Morningstar's conflict of interest policies is available from http://global.morningstar.com/equitydisclosures.

For Recipients in India: This research on securities [as defined in clause (h) of Section 2 of the Securities Contracts (Regulation) Act, 1956], such research being referred to for the purpose of this document as "Investment Research", is issued by Morningstar Investment Adviser India Private Limited.

Morningstar Investment Adviser India Private Limited is registered with the Securities and Exchange Board of India under the SEBI (Investment Advisers) Regulations, 2013, vide Registration number INA000001357, dated March 27, 2014, and in compliance of the aforesaid regulations and the SEBI (Research Analysts) Regulations, 2014, it carries on the business activities of investment advice and research. Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Associates LLC, which is a part of the Morningstar Investment Management group of Morningstar, Inc., and Morningstar, Inc. is a leading provider of independent investment research that offers an extensive line of products and services for individual investors, financial advisors, asset managers, and retirement plan providers and sponsors. In India, Morningstar Investment Adviser India Private Limited has only one associate, viz., Morningstar India Private Limited, and this company predominantly carries on the business activities of providing data input, data transmission and other data related services, financial data analysis, software development etc.

The author/creator of this Investment Research ("Research Analyst") or his/her associates or his/her relatives does/do not have (i) any financial interest in the subject company; (ii) any actual/beneficial ownership of one per cent or more securities of the subject company, at the end of the month immediately preceding the date of publication of this Investment Research; and (iii) any other material conflict of interest at the time of publication of this Investment Research.

The Research Analyst or his/her associates or his/her relatives has/have not received any (i) compensation from the subject company in the past twelve months; (ii) compensation for products or services from the subject company in the past twelve months; and (iii) compensation or other material benefits from the subject company or third party in connection with this Investment Research. Also, the Research Analyst has not served as an officer, director or employee of the subject company.

The terms and conditions on which Morningstar Investment Adviser India Private Limited offers Investment Research to clients, varies from client to client, and are spelt out in detail in the respective client agreement.

COMPANY UPDATE
March 3, 2016

Exelon Corporation (EXC)

SunTrust Robinson Humphrey

POM Acquisition Uncertain; However, Balance Sheet Reduction Offsets Dilution

What's Incremental To Our View

While we now believe a lower probability that EXC's acquisition of POM will go through, we estimate that EXC can offset dilution through debt and share buybacks. Based on updated assumptions, we have increased our 2016-17 estimates. Our price target remains $35.

IMPORTANT POINTS

Yesterday, we hosted investor meetings for Jack Thayer (CFO) of EXC. Key takeaways:

- **We are raising our 2016-17 estimates.** We now assume that EXC can achieve its growth targets for Power and Non Power marketing operations (vs our previous assumption of 90%-95% of the targets). In addition, we have updated our estimates based on the latest forward commodity curves. Consequently, we increase our 2016 estimate to $2.47 from $2.46 and our 2017 estimate to $2.58 from $2.54. Our preliminary 2018 estimate is $2.69.

- **In our view, latest regulatory developments in DC reduce the probability of the merger with Pepco (POM, $23.66, Neutral) getting completed.** With the Washington DC Mayor, Attorney General, and Office of People's Council (OPC) publicly opposed to the modifications to the settlement proposed by the commission, the pathway to closure appears exceedingly narrow. EXC needs to respond to the commission’s modifications by March 11. We currently see two potential outcomes: (1) EXC walks away; or (2) all the parties to the original settlement propose alternatives to the commission modifications which are accepted by the commission. Given our view that EXC does not want to prolong this process for much longer, we now believe that cancellation of the merger is the most likely outcome. We note that in the case of a cancellation, the incremental cost to EXC would be $40 million. However, we believe a cancellation of the transaction would have a much greater impact on POM. Based on our assumption that POM would need to cut its dividend and raise equity to preserve its financial integrity as a stand alone entity, we see downside risk for POM to the $18-19 level.

- **In case POM deal is cancelled, we expect EXC to retire a significant amount of the capital raised to pay for the transaction, which should result in a neutral impact to earnings.** Specifically, we assume the following: (1) retirement of 57.5 million shares; (2) retirement of $1.15 billion equity units; and (3) retirement of $2.75 billion of debt. We note that EXC has the capacity to reduce its balance sheet even further than these levels.

FYE Dec					

- **EXC's merchant generation portfolio trades at a significant discount to pure play merchant IPP stocks.** Based on our 2017 estimates, we impute a 5.7x EV/EBITA multiple for this portfolio, which implies a 27% discount to the IPP sector. EXC management acknowledged that it has taken a close look at a potential spin off for these assets, but due to the potential significant capital requirements to maintain investment grade rating and additional collateral postings, has currently decided not to pursue this route. However, we believe that if this large discount persists, management could revisit this issue.

- **On a consolidated basis, EXC trades at a 7% P/E multiple discount to the peer group (based on our 2017 estimate).** Assuming a P/E multiple of 13.5x our 2017 estimate of $2.58 (in line with the peer group), we derive our price target of $35. We reiterate our **Buy** rating.

- We have included our revised 2016-17 earnings and cash flow models in this report.

Note

1) Our PECO Implied Margin ratios factor in the impact of Gas sales.

2) Rate Base - Com Ed: $8.7bn in 2013, $9.5bn in 2014, $10.8bn in 2015, $11.8bn in 2016, $12.8bn in 2017; PECO: $5.4bn in 2013, $5.7bn in 2014, $6.0bn in 2015, $6.5bn in 2016, $6.9bn in 2017; BGE: $4.6bn in 2013, $4.9bn in 2014, $5.0bn in 2015, $5.3bn in 2016, $5.9bn in 2017; PEPCO: $8.8bn in 2016 and $9.7bn in 2017.

3) Earned ROE - Com Ed: 9.7% in 2013, 8.5% in 2014, 8.0% in 2015, 8.3% in 2016, 8.2% in 2017; PECO: 13.7% in 2013, 11.3% in 2014, 11.7% in 2015, 11.5% in 2016, 11.3% in 2017; BGE: 8.5% in 2013, 7.8% in 2014, 10.7% in 2015, 10.2% in 2016, 10.5% in 2017; PEPCO: 5.5% in 2016 and 5.5% in 2017.

4) We assume the Illinois legislature's changes to Com Ed formula rates represent $0.02 of earnings in 2013 and $0.04 of annual earnings from 2014 onwards.

5) We assume EXC achieves its growth targets for Power and Non Power new business for 2016 onwards.

6) We assume that the DOE nuclear disposal fee is removed from May 2014; represents $0.06 of earnings in 2014 and $0.11 annually thereafter.

7) We have included the impact of the $1.15bn Equity Units (2.5% interest rate) from mid 2014 and assume conversion to equity (33m shares) on 6/1/17.

8) We have factored in the impact of the $6.8bn PEPCO acquisition from Q2 2016 (including the settlement of the 57.5m share forward equity sale on 7/14/15).

Sources: Company reports and SunTrust Robinson Humphrey estimates.

Company Description

Exelon, a utility services holding company, operates through its principal subsidiaries: Generation, ComEd, PECO, and BGE. Generation's business consists of its owned and contracted electric generating facilities, its wholesale energy marketing operations and its competitive retail supply operations. ComEd's energy delivery business consists of the purchase and regulated retail sale of electricity and the provision of distribution and transmission services to retail customers in northern Illinois, including the City of Chicago. PECO's energy delivery business consists of the purchase and regulated retail sale of electricity and the provision of transmission and distribution services to retail customers in southeastern Pennsylvania, including the City of Philadelphia, as well as the purchase and regulated retail sale of natural gas and the provision of distribution services to retail customers in the Pennsylvania counties surrounding the City of Philadelphia. BGE is a regulated electric transmission and distribution utility company and a regulated gas distribution utility company with a service territory that covers the City of Baltimore and all or part of 10 counties in central Maryland.

Investment Thesis

Incremental earnings from the PJM Capacity auctions, earnings accretion and strategic benefits of the POM acquisition (coupled with the ability to offset any dilution if POM deal falls apart), and a discounted stock valuation imply attractive total return prospects.

Valuation and Risks

VALUATION

Assuming a P/E multiple of 13.5x our 2017 estimate of $2.58 (in line with the peer group), we derive our price target of $35.

RISKS

- Outlook for forward power prices.
- Timing of upcoming EPA regulations.
- Regulatory approval of the POM acquisition and use of excess capital if the deal falls apart.

Applicants Propose Third Option for D.C. Approval, Suggest PSC Can Approve a Non-Unanimous Agreement

Rating Buy, Target $35 / Share

Today, the joint applicants filed with the D.C Public Service Commission, presenting a third alternative that adjusts the terms of the 2/26/16 Revised Non-unanimous Settlement Agreement (RNSA) conditionally approved by the Commission but rejected by several settling parties. The new option (a “third” option in addition to the original proposed settlement and the RNSA) maintains the overall $72.5mm size of the proposed customer investment fund but effectively restores the original residential customer base rate credit of $25.6mm. It provides a supplementary general customer rate credit of $20mm (which would be created by reducing initial funding for the MEDSIS Pilot from $21.55mm to $1.55mm) to be applied to customers at the PSC’s discretion. Any amount of the $20mm unused in base rate credits could be reallocated back towards MEDSIS or Low Income Assistance. In short, this third option attempts to address the largest concerns of the settling parties that came out in opposition to the RNSA (guaranteed protections for residential customers), while creating flexibility for the Commission to direct some funds for credits to other classes of customers. Further, by maintaining the overall size of customer benefits, the new terms would not trigger most favored nation clauses in other jurisdictions that would otherwise potentially significantly increase the cost of consummating the acquisition. <u>The applicants indicate they are supportive of approval of any of the three options before the PSC - the third option, the RNSA, or the original settlement as proposed.</u>

The applicants also point out that it is within the Commission’s legal purview to approve any of the three options on their merits if they deem them in the public interest, without the unanimous consent of the original settling parties. Commissioner Fort had conditioned her approval of the merger on all the parties to the settlement agreeing to the new terms of the RNSA. Given the assumption that Commissioner Phillips, who supported the deal in its original incarnation would likely once again vote to approve the transaction, the legal path to closing this deal is getting an unconditional "yes" vote from Commissioner Fort. EXC and POM have requested that the other settling parties be given seven days to file their comments on the newly proposed agreement and that the Commission render a decision by 4/7/16.

Overall, we think today’s request for relief is a last and “best effort” by the applicants to salvage a deal that is in the best interest of ratepayers, especially given the degraded financial condition of POM. Given the passage of the 3/4/16 deadline in the merger agreement either EXC or POM are able to walk from a deal at any time. Thus, the ball is now in the D.C. PSC’s court to agree to the proposed timeline and vote on whether or not to approve one of the three options with or without unanimous approval of the prior settling parties. We think a decision to establish a timeline for consideration substantially in excess of that proposed also could push EXC to terminate the deal given the ongoing financing drag of the transaction. A summary of key revisions to the original settlement agreement to date are in the attached *Exhibit 1*. The new proposal in its entirety can be found here.

Exhibit 1

Summary of Revisions

Allocation	*Option 1* Original Settlement ($ mm)	*Option 2* RNSA Proposal ($ mm)	Incremental Changes from *Option 1*	*Option 3* Latest Proposal ($ mm)	Incremental Changes from *Option 2*
CIF Total	**72.8**	**72.8**		**72.8**	
Customer Base Rate Credit	25.6	25.6	Had been exclusively for residential class, now unallocated.	45.6	$25.6 mm reserved for residential customer base rate credit + $20mm from MEDSIS Pilot **.
Residential Customer Bill Credit	14	14		14	
Renewable	3.5	21.55	Placed in escrow fund for MEDSIS Pilot.	1.55 - 21.55 **	$1.55mm initial funding + any unused base rate credit
EE Initiative	3.5	11.25	Placed in escrow fund for EE and EC Initiative.	11.25	
Sustainability	10.05	0.4	Forgive residential customer receivables.	0.4	
Low Income Assistance	16.15			0-20 **	Any unused for base rate credit or MEDSIS Pilot.
Solar Development	**10 MW**, incl. 5 at Blue Plains facility; **7 MW** if no deal at Blue Plains	**12 MW**, incl. 5 MW at Blue Plains	Guarantee development at Blue Plains, facility chooses vendor. **Basically requires 2-5 more MW.**	**12 MW**, incl. 5 MW at Blue Plains	
Microgrid Projects	**YES**	**NO**	But could be outgrowth of MEDSIS Pilot, above.	**NO**	

Source: Evercore ISI Research

VALUATION METHODOLOGY

Our valuation is based on a sum of the parts analysis. We use a P/E multiple on the utility and an EBITDA multiple for the genco business.

RISKS

Lower power prices / capacity prices and unfavorable outcomes in regulatory proceedings would cause our valuation to be lower. Higher interest rates would pull utility earnings up but pressure multiples so the net impact would likely be negative overall. A favorable outcome in the upcoming PJM capacity auctions and/or passage of legislation to bolster the revenue stream of the Illinois nuclear units would be accretive.

ANALYST CERTIFICATION

The analysts, Greg Gordon and Phil Covello, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

DISCLOSURES

This report is approved and/or distributed by Evercore Group LLC ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and International Strategy & Investment Group (UK) Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Partners Inc. ("Evercore Partners"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Partners.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Buy, Hold or Sell) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI, and can be obtained by writing to Evercore Group LLC, Attn. Compliance, 666 Fifth Avenue, 11th Floor, New York, NY 10103.

Evercore Partners and its affiliates, and / or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore Partners and its affiliates may have, or have had, business relationships with the companies mentioned in this report..

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three ratings categories, with the following return guidelines:

Buy – the total forecasted return is expected to be greater than 10%
Hold – the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell – the total forecasted return is expected to be less than 0%
Coverage Suspended – the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended - Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulartory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

* Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended".

Historical Ratings Definitions

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy - Return > 20%
Buy - Return 10% to 20%
Neutral - Return 0% to 10%
Cautious - Return -10% to 0%
Sell - Return < -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight – the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight – the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight – the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended – the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Exelon Corporation

EXC – BUY – Another Round: Filing Amendments to the Commission

SHAHRIAR POURREZA, CFA, ANALYST
shahriar.pourreza@guggenheimpartners.com
212 518 5862

FLASH NOTE

SECTOR: Power and Utilities

March 7, 2016

What's new? EXC (BUY, $33.92) submitted new Settlement amendments to the Commission and also requests three avenues for the merger to be approved. As a response to the public rejections from four settling parties (DC Water, DC Mayor, Attorney General, and Office of People's Counsel), EXC filed alternative conditions that secure $25.6 mm in rate credits to residential customers, the opposing parties' main concern. Under the new amendments, the DC PSC can use their discretion to allocate $20mm in funds to residential, commercial, and additional low-income customer assistance or grid modernization. **We believe the alternative amendments appease both the settling parties and the DC PSC; the merger is more likely to be approved but we have been surprised before.** We will continue to monitor comments from non-settling parties and look to see if the Commission will grant an expedited review (EXC requesting April 7). **A key benefit of the newly filed settlement amendments, which keep total merger benefits as is, is that they should not trigger the "most favored nation" clause with other states that have already approved the merger.**

Allocation; who has control of the funds? While the new amendment preserves the total $78mm in benefits, it redistributes $20mm from the newly created MEDSIS Pilot Project Subaccount (now $1.55mm) to a separate Customer Base Rate Credit fund. The Commission would exercise its discretion to determine how the $20 million fund will be best deployed in POM's next rate case. This addresses the Commission's key concern that they should be able to enforce allocation of the CIF. EXC is proposing three approaches for the Commission to approve the merger **1)** the Settlement agreement, **2)** amendment terms provided by the PSC, or **3)** the new amendments proposed by EXC. **Given that four parties have publicly opposed the PSC's amendments, we believe option 3 is the most viable scenario.**

POM gets rate relief, filing for rate cases. POM (NC, $24.18) was prohibited from filing any new rate cases since 2014 due to the merger agreement, but can now file for rate cases with the DE, MD, and NJ Commissions. We believe POM as a standalone company has materially deteriorated due to regulatory lag (POM has historically filed rate cases every 9-12 months to recover a part of this lag). We believe POM is already prepared to file for rate cases earlier in 2016 for DE, MD, and NJ, followed by a DC (delay due to pending settlement with the Commission). If the merger is approved by April 7, then POM could see rate case approvals earlier in 2017 than if the freeze remained in place – could improve growth prospects pro forma.

What's next? The settlement parties have 7 days to comment on the new agreements. It remains to be seen what Commission could plan on for addressing the new settlement conditions by either opening hearing or have an internal review. EXC requests that the Commission have an expedited review without reopening the record in the proceeding or holding hearings, and to make a decision by made by April 7.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

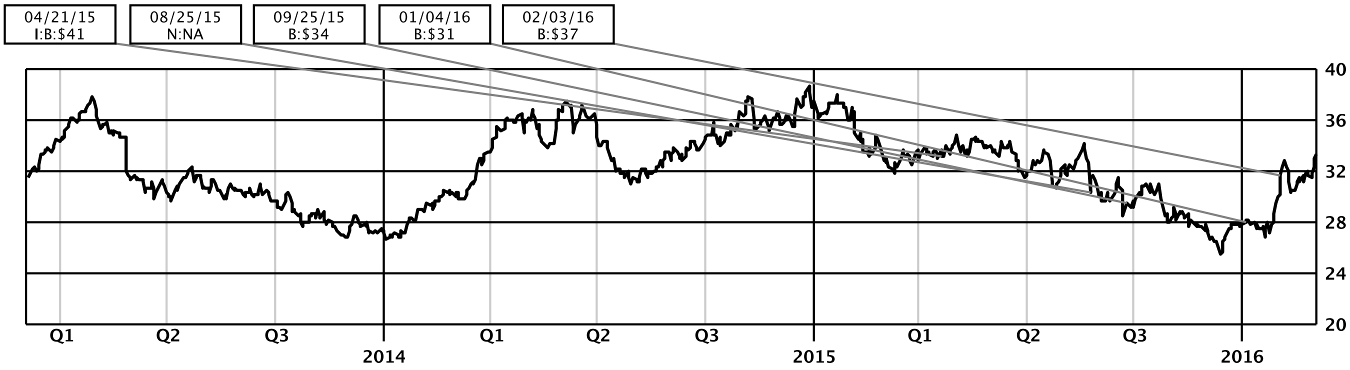
IMPORTANT DISCLOSURES

The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 03-04-2016



Created by BlueMatrix

RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 10% or minus 10% within a 12-month period. No price target is assigned.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Restricted - Describes issuers where, in conjunction with Guggenheim Securities, LLC engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Prior to 12/8/14, Guggenheim Securities, LLC’s BUY, NEUTRAL, and SELL ratings definitions were as follows (no other ratings definitions were changed):

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 15% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 15% or more within a 12-month period.

EXC and POM take a third swing at merger approval in DC

This afternoon Exelon and merger partner Pepco Holdings (POM) made a new filing with the Washington DC Public Service Commission (PSC) in what we imagine must surely be their final attempt to secure PSC approval for their proposed deal. The companies also entered an agreement acknowledging that either party may terminate the merger at any time. And POM agreed not to declare or pay any further dividends on its common stock unless and until the merger is terminated – or risk losing the pre-paid $180M break-up fee and $40M in costs. This is relevant in that on its normal cycle POM would have declared a dividend around now with payment on 3/31.

EXC and POM file for Other Relief; other parties so far silent

Concurrent with the Letter Agreement the companies have filed with the DC PSC requesting "Other Relief" as the PSC indicated they could when rejecting the settlement and proposing alternative terms of its own at the February 26 meeting. EXC and POM suggest three options for the PSC to move the merger forward, namely 1) approve the original settlement; 2) approve the settlement with the PSC's list of conditions, which EXC and POM both accept; and 3) approve an alternative proposal which the companies suggest may balance the views of the PSC and objections voiced by the other settling parties (e.g. the DC Mayor's office and OPC). Options 1 and 2 seem rather unlikely to us given prior positions of the parties, but we imagine the companies are leaving these on the table given the somewhat unusual circumstances where the deal has become caught in a power struggle between some key local interests.

Companies attempt to balance DC parties' competing interests

EXC and POM's third option would restore the $25.6M residential rate credit rather than allowing the PSC to determine allocation. This was a key sticking point for the Mayor and OPC following the PSC's February ruling. Separately, the companies propose taking $20M from the MEDSIS (smart meter) program and adding this to the customer benefits bucket to be allocated among classes at the PSC's discretion, with unused balances flowing to MEDSIS. Importantly therefore this does not constitute net incremental funds from EXC – which a quick first reading of the 8-K might have suggested. As a result it likely would not trigger most favored nation clause adjustments in other jurisdictions.

Third time's the charm? EXC and POM requesting PSC decision by April 7

In or view the third option may elegantly balance competing interests of the PSC and other DC parties, although we note these parties are not signatories to the new filing and – at the time of writing – had not commented publicly. Time-wise the PSC has allowed 7 business days for comments (by 3/16) with EXC and POM requesting a PSC decision – which would be the third one in this case – by April 7. Per their calendar the PSC are due to meet on 3/2, 3/16, 3/23 and 4/13 although special meetings can be called with 48-hours notice.

Exelon and Pepco Offer DC Commission and Settling Parties Alternative Proposal

Exelon and Pepco Holdings (POM, $24.59, Not Rated) filed a proposal today with the District of Columbia PSC that outlined three different approaches, any one of which, if approved, would continue to allow for the distribution of $78 million in benefits for the District and POM customers as agreed to in the original settlement and allow the two companies to complete the merger. Today's proposals offer the PSC considerable flexibility in determining how the funds are allocated.

Exelon and Pepco stated in their joint filing that they are prepared to either: **1)** deliver the benefits of the original merger settlement; **2)** accept all of the alternative terms the PSC outlined in its February 26 filing that would place the merger in the public interest, or **3)** offer an alternative third option that EXC/POM claim would balance the alternate terms the PSC outlined with the views of some of the nine settling parties on the issue of rate credits to residential customers.

EXC/POM's alternative proposal allocates a portion of the $78 million in total customer benefits to a $45.6 million fund - $25.6 million would preserve the original merger settlement's rate credits for residential customers, including low-income households, to offset rate increases through March 2019, and $20 million to be used at the PSC's discretion for purposes including rate credits for customers, grid modernization and additional low-income customer assistance.

According to the PSC's February 26 decision, the nine settling parties will now have seven business days to file comments or request other relief from the PSC. EXC and POM have asked the PSC to rule on this latest proposal by April 7, 2016. While the March 4, 2016 merger deadline has not been extended, both companies will continue to negotiate with all parties, but reserve the right to walk away from the merger at any time.

Our View:

- Among the key priorities of the settling parties and PSC are consumer protections for future rate increases, as well as protections for low-income ratepayers, investment in renewable energy resources and grid modernization.
- On the whole, it appears that this alternative proposal attempts to reconcile several core positions, but stopped short of increasing total customer benefits and would move more funds away from green energy initiatives, a key area for DC Mayor Muriel Bowser, and into the hands of the PSC for use at its discretion.
- It is unclear whether the settling parties, or the PSC, will look favorably upon EXC/POM's updated proposal. We believe EXC's current valuation reflects the expectation that the merger will ultimately be approved.

Rating and Sector Key (as of April 5, 2013):
We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst’s coverage universe on a total return basis
Mkt = Market Perform - Forecast to perform roughly in line with the analyst’s coverage universe on a total return basis
Und = Underperform - Forecast to underperform the analyst’s coverage universe on a total return basis
(S) = speculative investment;
NR = No rating at this time;
R = Restricted – Dissemination of research is currently restricted.

BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Prior BMO Capital Markets Ratings System (January 4, 2010–April 5, 2013):

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx

General Disclaimer

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Alexander Pearce, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Exelon Corp (EXC): EXC/POM Propose Three Options to D.C. Commission for Decision by April 7

Sentiment Indicator : neutral

Posted by Tucker, Shelby (RBC Capital Markets, LLC) on Monday, March 07, 2016, 15:24 PM ET

Our View: We view today's alternative proposal as a last push to complete the merger by satisfying both the settling parties as well as the D.C. commission. However, given that the proposal involves re-allocating some funds earmarked for another purpose (pilot grid modernization project) and not an additional financial concession, we are uncertain whether this change will prompt any dissent from any/all of the involved parties.

This afternoon, Exelon (EXC; Outperform; $34 PT) and Pepco (POM; Not Rated) filed with the D.C. Public Service Commission (DCPSC) asking for an approval of one of three options to complete the merger between the two companies. The options are as follows:

1. The original merger settlement filed on October 6, 2015 (with support of the D.C. Mayor's office, Office of People's Counsel, and other parties);
2. The revised settlement proposed by the DCPSC on February 26, which included deferring the decision on allocation of $25.6 million Customer Base Rate Credit among customer classes. The original settlement had called for full allocation to residential customers; this revision is not supported by all settling parties, including the Mayor's office, Office of People's Counsel, and D.C. Water.
3. A new alternative proposal that addresses both the settling parties' and DCPSC concerns:

- **Maintain the total Customer Investment Fund (CIF) value of $72.8 million.**
- **Increase the Customer Base Rate Credit from $25.6 million to $45.6 million,** with $25.6 million to be allocated to residential customers, and $20 million to used to offset rate increases for any/all customer classes (at the commission's discretion). The DCPSC may also utilize the funds for low-income assistance or for the pilot grid modernization project MEDSIS (Modernizing the Energy Delivery System for Increased Sustainability).
- **Decrease the funding for MEDSIS from $21.55 million to $1.55 million**

Exelon and Pepco have requested a final decision from the DCPSC by April 7 at the latest. The two parties have also entered into Letter agreement that allows for either party to terminate the Merger agreement at any time.

Exelon

While Pepco saga continues, forward power prices continue to slide

Bank of America Merrill Lynch

Maintain Rating: NEUTRAL | PO: 34.00 USD | Price: 34.73 USD

Equity | 10 March 2016

Updating EXC model on 4Q15 results and M-t-M

Our EXC model is updated for the latest 4Q15 results and forecasted capital outlays. The biggest change included in this model update is the removal of Pepco from our EPS estimates, reflecting uncertainty over the DC approval process. However, we have retained a valuation adjustment for Pepco in our price objective reflecting $0.08 of accretion. This change was due to the D.C. Public Service Commission on 2/25/16 denying the settlement terms in the merger application. With the PSC providing an alternative set of terms and Exelon responding on 3/7/16, the likelihood of the deal being consummated is still questionable. Our modeling is now consistent with Exelon's guidance assumptions, namely a paying back of $3.2B in debt and a repurchasing of $1.6B of equity. Further, we now include $100MM of the $350MM cost reduction initiative in our ExGen O&M outlook. Lastly, we are marking to market for recent declines in forward commodity prices. Our forecasted 2016/17/18 EPS are now $2.50/2.66/2.73 as compared to our prior estimates of $2.61/2.80/2.91. Our price objective is now $34 per share; see our detailed valuation on page 3.

ExGen fundamentals continue to slip; Reiterate Neutral

Since the beginning of the year, EXC has outperformed substantially in spite of the continued decline in forward natural gas prices and more so forward power prices. Outperformance largely stems from the dividend raise and a recent rally in commodity sentiment since mid-February. But, forward commodity prices have not bounced as meaningfully. Exelon's next commodity market update should be a marginal negative to the company's gross margin outlook on the 1Q15 earnings call. Our results show the decline is roughly $283MM of EBITDA or $0.22 of EPS since the start of the year on 2018 estimates. Details for the sensitivity analysis are presented on page 4 and changes in forward curves are on page 5. On the other hand, EXC shares continue to look relatively cheap, trading at a consensus 12.2x multiple as compared to the integrated group average of 13.8x. Overall, our concerns over commodity mark to market downside risk to consensus are offset by EXC shares' continued low valuation. Reiterate Neutral.

Company Sector

Electric Utilities

Company Description

Exelon Corp (EXC) is an integrated electric and gas utility that operates three utilities in Pennsylvania, Illinois, and Maryland and the largest deregulated nuclear fleet in the United States. Exelon's regulated businesses consist of Commonwealth Edison Company (ComEd) in IL, PECO Energy Company (PECO) in PA, and Baltimore Gas & Electric (BGE) in MD. Exelon Generation operates the largest nuclear fleet in the United States, with plants concentrated in the Midwest and the Mid-Atlantic regions.

Investment Rationale

In our view, Exelon could benefit from a low carbon producing portfolio of assets in conjunction with potential favorable clean energy legislation.This is alongside a return to growing the dividend, a regulated business that is stable, and potential upside from strategic transactions. These are offset by a combination of lower natural gas prices from the Marcellus Shale and forward spark spreads that continue to fall, suggesting power supply is still abundant in the PJM territory.

Stock Data

Average Daily Volume	9,203,029

Quarterly Earnings Estimates

	2015	2016

Q3	0.83A	0.70E
Q4	0.38A	0.56E

Valuation and Relative Performance

Our EXC Sum-of-the-Parts valuation is provided in Table 1. The average peer group multiple was set at 15.5x and is consistent with our prior model. To this we maintain our 0.5x discount, resulting in 15.0x multiple used on our 2018 forecasted regulated and corporate earnings. Our valuation (not EPS forecast) includes $0.08 of EPS accretion for the inclusion of the Pepco deal.

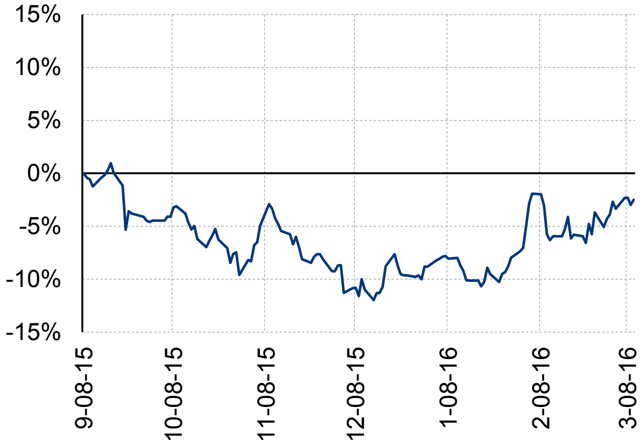
Chart 2: EXC relative performance vs. integrated electrics average



Source: BofA Merrill Lynch Global Research, Bloomberg

Business Breakdown

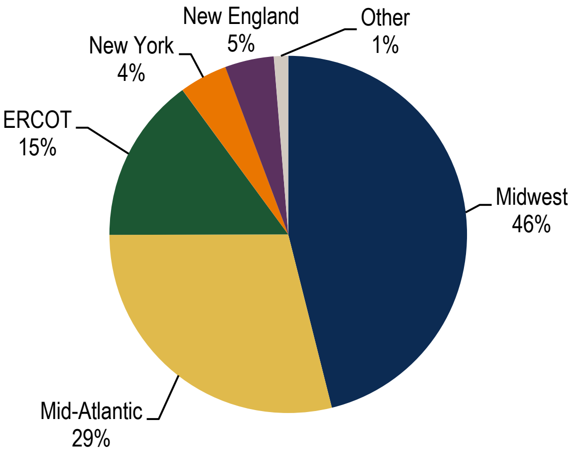
Regulated Businesses: ComEd, PECO, and BG&E

The regulated businesses are expected to contribute roughly $1.3-1.4B of adjusted net income in 2018, according to the company. Our expectations are largely in line with those of the company's guidance as seen in Chart 1. With incorporation of bonus D&A, the outlook on ComEd's rate base was lowered $300MM in 2016, $600MM in 2017, and $600MM in 2018 from prior numbers presented at EEI. The impact of bonus depreciation is expected to be relatively minor on PECO and BG&E. The total adjusted operating net income was only impacted $25MM on 2018.

ExGen struggles continue

The merchant business has continued to see falling power prices. EXC is most exposed to NIHUB and PJM (Midwest and Mid-Atlantic, respectively) power prices as seen by the 2018 expected generation portfolio shown in Chart 2.

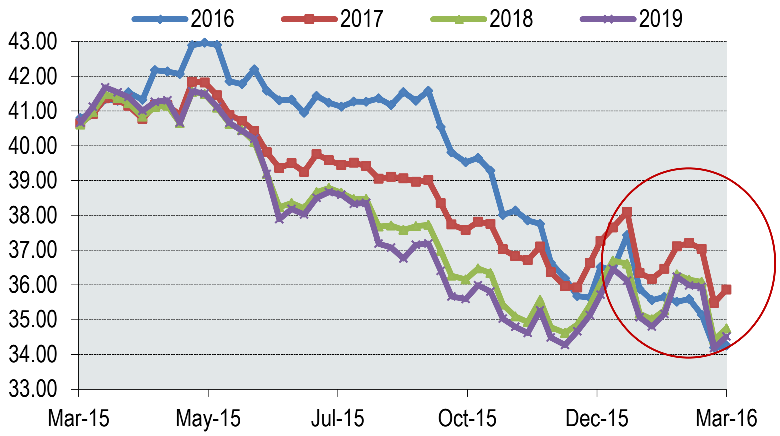
Chart 3: Expected Generation (GWh) by Region



Source: BofA Merrill Lynch Global Research estimates, company report

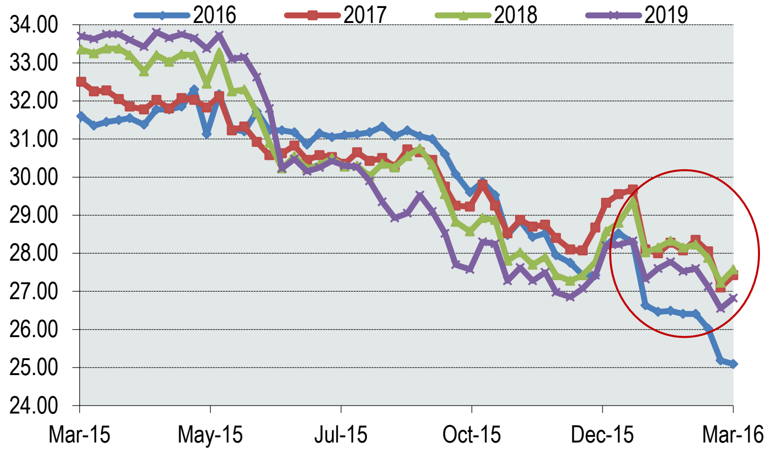
Chart 3 and Chart 5 illustrate the decline in both PJM and NIHUB power prices, showing the strong deterioration in the deregulated power markets. This data is provide in our weekly publication, Alternating Currents Weekly, and can be found in our latest price deck.

Chart 4: PJM ATC Forward Power Trends



Source: BofA Merrill Lynch Global Research estimates

Chart 5: NIHUB ATC Power Forward Trends



Source: BofA Merrill Lynch Global Research estimates

The net impact based on Exelon's stated sensitivities (4Q15 Earnings Presentation) to a $1/mmbtu change in Henry Hub (HH) leads to a $695MM change in EBITDA, the recent decline in HH from $2.91/mmbtu on 12/31/15 to $2.71/mmbtu on 3/3/16 results in an EPS decline of roughly $0.10 of EPS as shown in Table 2.

Table 2: 2018 Natural Gas Price Sensitivity Analysis

Natural Gas Prices	12/31/2015	3/3/2016	Change	Sensitivity	EBITDA Change
2018 Henry Hub	2.91	2.71	(0.20)	695	(139)
Tax Rate @ 33%					(47)
Shares Outstanding					881
EPS					($0.10)

Source: BofA Merrill Lynch Global Research estimates, company report

Digging deeper and comparing the change in power price sensitivities suggests an EBITDA decline of $228MM or $0.17 of EPS, as shown in Table 3. All sensitivities shown are in $ per +1 $/MWh.

Table 3: 2018 Power Price Sensitivity Analysis

ATC Power Prices ($/MWh)	12/31/2015	3/3/2016	Change	Sensitivity	EBITDA Change
Midwest (NiHub)	29.22	27.67	(1.55)	76	(118)
Mid-Atlantic (PJM West)	34.16	32.03	(2.13)	40	(85)
New York (Zone A)	33.60	31.39	(2.21)	5	(11)
ERCOT (North)*	4.49	4.07	(0.42)	15	(6)
New England*	9.71	8.15	(1.56)	5	(8)
Total EBITDA Change					(228)
Tax Rate @ 33%					(75)
Shares Outstanding					881
EPS					$ (0.17)

Source: BofA Merrill Lynch Global Research estimates, company report

*ERCOT and ISO NE sensitivities not provided, used $5 / (+$1/MWh) * (% of Region GWh / 5%)

Finally our results show the decline in 2018 is $283MM or $0.22 of EPS since the start of the year.

Price objective basis & risk

Exelon (EXC)

Our $34/share price objective for EXC shares is derived from our sum of the parts valuation model, where we assign approximately $8 of value to ExGen, $1 for the parent, and approximately $25 of value to the regulated utility. We value integrated electric utilities, including Exelon, using a sum of the parts valuation model based on 2018E earnings and EBITDA. For Exelon specifically we use a target 6.8x EV/EBITDA multiple to value the deregulated generation segment, in line with peers. We apply a target 15.0 P/E multiple to value the regulated side of the business, which is a discount to regulated peers at 15.5x to reflect the generally below-average ROEs allowed by the state commissioners for the states in which Exelon has regulated operations.

Downside (upside) risks to our price objective are: 1) increasing (decreasing) of forward power prices driven by rising natural gas prices, heat rates, or Northeast and Midwest gas basis to Henry Hub, 2) regulatory outcomes as well as changes in nuclear regulation, 3) deterioration (improvements) in operating efficiency beyond our base scenario, and 4) risks to the successful completion of the Pepco Holdings acquisition

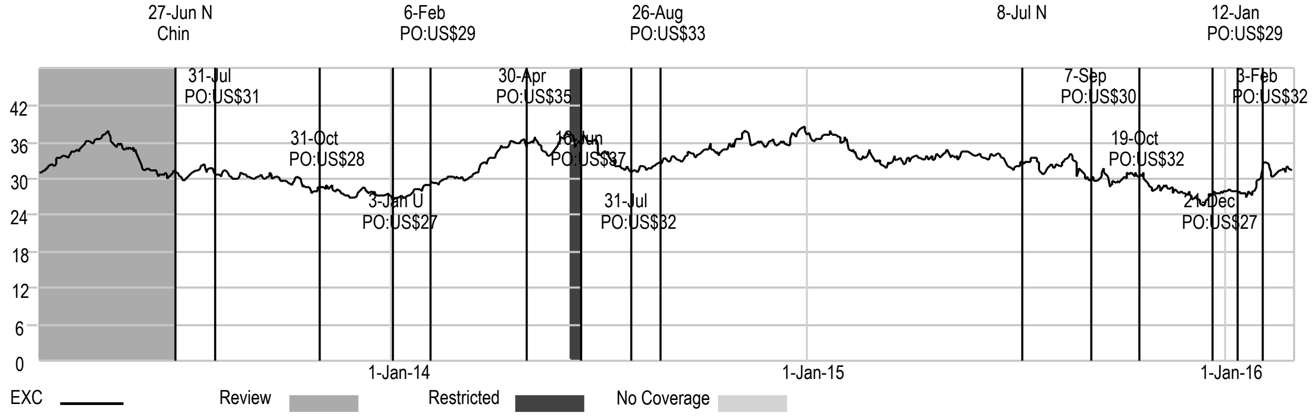
EXC Price Chart



B: Buy, N: Neutral, U: Underperform, PO: Price Objective, NA: No longer valid, NR: No Rating

The Investment Opinion System is contained at the end of the report under the heading "Fundamental Equity Opinion Key". Dark grey shading indicates the security is restricted with the opinion suspended. Medium grey shading indicates the security is under review with the opinion withdrawn. Light grey shading indicates the security is not covered. Chart is current as of February 29, 2016 or such later date as indicated.

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	69	47.26%	Buy	58	84.06%
Hold	40	27.40%	Hold	32	80.00%
Sell	37	25.34%	Sell	27	72.97%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1673	50.16%	Buy	1244	74.36%
Hold	777	23.30%	Hold	545	70.14%
Sell	885	26.54%	Sell	533	60.23%

* Issuers that were investment banking clients of BofA Merrill Lynch or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Merrill Lynch Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Merrill Lynch report referencing the stock.

Price charts for the securities referenced in this research report are available at http://pricecharts.baml.com, or call 1-800-MERRILL to have them mailed.
MLPF&S or one of its affiliates acts as a market maker for the equity securities recommended in the report: Exelon Corp.
MLPF&S or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Exelon Corp.
The issuer is or was, within the last 12 months, an investment banking client of MLPF&S and/or one or more of its affiliates: Exelon Corp.
MLPF&S or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Exelon Corp.
The issuer is or was, within the last 12 months, a non-securities business client of MLPF&S and/or one or more of its affiliates: Exelon Corp.
MLPF&S or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Exelon Corp.
MLPF&S or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Exelon Corp.
MLPF&S together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: Exelon Corp.
MLPF&S or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Exelon Corp.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of MLPF&S and/or one or more of its affiliates: Exelon Corp.
BofA Merrill Lynch Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking revenues.

Other Important Disclosures

Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

From time to time research analysts conduct site visits of covered issuers. BofA Merrill Lynch policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

BofA Merrill Lynch Global Research policies relating to conflicts of interest are described at http://go.bofa.com/coi.

"BofA Merrill Lynch" includes Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S") and its affiliates. Investors should contact their BofA Merrill Lynch representative or Merrill Lynch Global Wealth Management financial advisor if they have questions concerning this report. "BofA Merrill Lynch" and "Merrill Lynch" are each global brands for BofA Merrill Lynch Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Merrill Lynch.

This research report provides general information only. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this report and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this report.

Securities and other financial instruments discussed in this report, or recommended, offered or sold by Merrill Lynch, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Merrill Lynch is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned in this report. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Merrill Lynch entities located outside of the United Kingdom. BofA Merrill Lynch Global Research policies relating to conflicts of interest are described at http://go.bofa.com/coi.

Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

MLPF&S or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. MLPF&S or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Merrill Lynch, through business units other than BofA Merrill Lynch Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented in this report. Such ideas or recommendations reflect the different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Merrill Lynch is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this report.

In the event that the recipient received this report pursuant to a contract between the recipient and MLPF&S for the provision of research services for a separate fee, and in connection therewith MLPF&S may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom MLPF&S has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by MLPF&S). MLPF&S is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities mentioned in this report.

Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Merrill Lynch, including investment banking personnel. BofA Merrill Lynch has established information barriers between BofA Merrill Lynch Global Research and certain business groups. As a result, BofA Merrill Lynch does not disclose certain client relationships with, or compensation received from, such issuers in research reports. To the extent this report discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this report. BofA Merrill Lynch Global Research personnel's knowledge of legal proceedings in which any BofA Merrill Lynch entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this report is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Merrill Lynch in connection with the legal proceedings or matters relevant to such proceedings.

This report has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of MLPF&S, any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Merrill Lynch Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Merrill Lynch and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This report may contain links to third-party websites. BofA Merrill Lynch is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this report and is not incorporated by reference into this report. The inclusion of a link in this report does not imply any endorsement by or any affiliation with BofA Merrill Lynch. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Merrill Lynch is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Merrill Lynch policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports may contain discussions and/or investment opinions relating to securities, financial instruments and/or issuers that are no longer current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with MLPF&S or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Merrill Lynch nor any officer or employee of BofA Merrill Lynch accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this report or its contents.

Exelon Corporation

EXC – BUY – Time to Walk, Buy Back Stock; Shrink B/S and Grow Dividend in NT – Better Opportunities Abound

SHAHRIAR POURREZA, CFA, ANALYST
shahriar.pourreza@guggenheimpartners.com
212 518 5862

FLASH NOTE

SECTOR: Power and Utilities

March 11, 2016

What's new? The DC Office of People's Counsel (OPC), DC Government of Columbia Office of the Attorney General and other parties to the original settlement submitted comments to EXC's settlement amendments filed on March 7. The OPC explicitly opposed all options claiming that they are opposed to the procedural process. Based on the opposition and comments submitted (see table below), we believe EXC (BUY, $34.75) is increasingly likely to walk away from the deal and buy back its stock, unwind the transaction. **NOTE: EXC is our top Integrated Idea and the POM acquisition is not a driver of our thesis.**

Are the options viable? Comments point to minimal agreement. As a reminder the Commission rejected the settlement filed by all settling parties and then provided their own revision for parties to approve. To our surprise, the OPC, DC AG and government rejected the DC PSC's amendments, claiming that it did not secure $25.6mm in rate credits to residential customers. EXC came back and submitted new settlement amendments, which guaranteed the $25.6mm and offered $20mm for the DC PSC to have discretion to allocate. EXC then proposed three approaches for the Commission to approve the merger 1) the Settlement agreement, 2) amendment terms provided by the PSC, or 3) the new amendments proposed by EXC. We believed option 3 was the most viable option, but given that the OPC opposes all three options, the deal will likely not be approved, in our view.

EXC's buyback program is already planned should they terminate deal at any time. If the deal fails, we believe management will start to implement plans to buy back 57.5mm shares within 5 months and retire the debt associated with Pepco. Near-term drag could equate to $0.07/share as the company completes the buyback program as well as call $1.8B in debt. While EXC is currently guiding to the 57.5mm shares, we note that they raised $3B in equity sales (including $1.15B in forward sale) and could increase their buybacks to be above their planned $1.6B. Although there will be a drag in the near term, we believe the buybacks would likely be accretive in 2017 given the reduction in share count and lower interest expense.

If the deal does not close, there could be additional $4-5 downside to POM. Although POM (NC, $24.25) is now able file for rate cases with the DE, MD, and NJ Commissions, we believe POM will continue to be a material under-earner since it has been out a rate case since 2014. While POM is already prepared to file for rate cases earlier in 2016 for DE, MD, and NJ, followed by a DC (delay due to pending settlement with the Commission), the rate case will still take 9-12 months to be approved. We estimate downside to POM stock could be another $4-5 based on a 12-13 range multiple on 2018 consensus earnings estimates.

Settlement Party	Comment	Support/Reject
DC Office of People's Counsel (OPC)	"OPC is ready to move on and address other challenges and opportunities facing the district…OPC encourages the Commission make an expeditious decision and bring closure to this matter.	Rejects all three options
AOBA (Apartment and Office Building Association of Metropolitan Washington)	Supports that the DC Commission's settlement allows all ratepayers to "benefit from the merger, ensure that funds are invented to benefit ratepayers and improve Pepco's electric system"	Supports Option 2 the revised settlement provided by the DC Commission. Rejects Option 1 and 3
DC Government of Columbia Office of the Attorney General	DC AG does not support revisions to the settlement.	Supports only Option 1. Rejects any revisions to the settlement.
National Consumer Law Center	"What will likely prove fatal to the merger is giving the Settling Parties a choice between [the DC Commission's amendments] and no commission approval for any alternative". NCLC/NHT believes that any option is viable.	Supports Option 1 but does not see it as viable. Option 2 includes a revisions they favor but also is a detriment. Option 3: They ask the DC Commission to give "serious consideration."

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

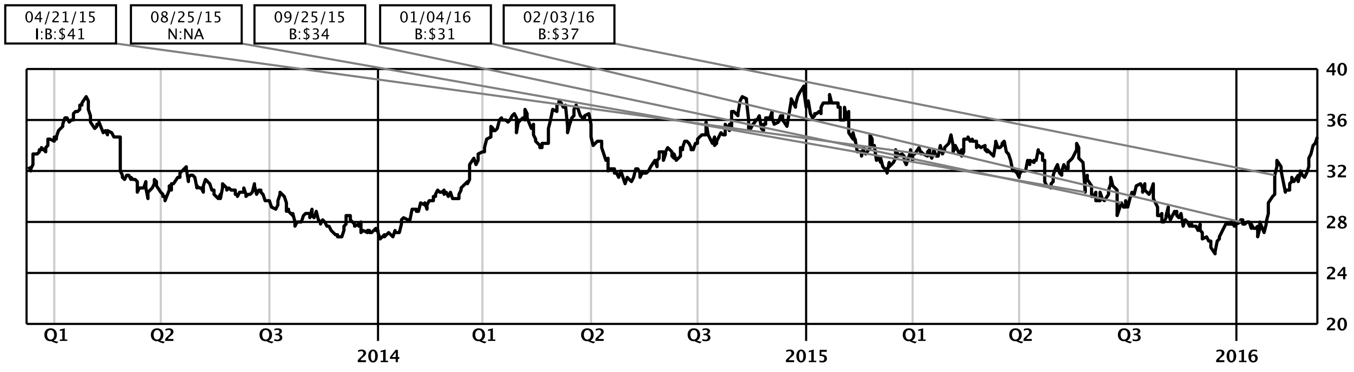
IMPORTANT DISCLOSURES

The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 03-10-2016



Created by BlueMatrix

RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 10% or minus 10% within a 12-month period. No price target is assigned.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Restricted - Describes issuers where, in conjunction with Guggenheim Securities, LLC engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Prior to 12/8/14, Guggenheim Securities, LLC's BUY, NEUTRAL, and SELL ratings definitions were as follows (no other ratings definitions were changed):

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 15% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 15% or more within a 12-month period.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgment. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conduct an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

TACTICAL TRADING IDEA DISCLAIMER

Guggenheim Securities, LLC produces "Tactical Trade Ideas" that identify short-term, catalyst-driven trading opportunities impacting companies within the Firm's coverage universe. Tactical Trade Ideas may exist on companies in this report and may be contrary to the analyst's published rating.

Exelon Corp (EXC)

Alert: Pepco deal on last legs; Imminent buyback supporting EXC stock; Downside post buyback - Reiterate Sell

- **With the Attorney General and the OPC only supporting a deal that the PSC has already rejected, we don't see any path forward.** As we had noted in our previous note, "We think EXC Walks; preferred outcome for EXC shareholders but what next?" we think this deal is stuck in political quicksand with no easy solution.

- **No surprise that EXC's token attempt on March 7th didn't get it done.** With no additional concession dollars in its March 7th filing, we think EXC only made a token attempt to get the deal approved. We understand why – the MFN magnifies every additional dollar of concession by 6-7x. That is why we think EXC won't give any more concessions this time around as well.

- **We expect the official announcement on deal termination in the next 1-2 weeks.** EXC's clock is ticking given the interest expense on acquisition debt and the impact of the 57.5m additional shares issued. With no clear path to approval, we think EXC will announce termination of the deal in the next 1-2 weeks.

- **Near term support coming from the imminent 57.5m share buyback.** We think the market is clearly expecting the share buyback and that may have driven up the stock price of EXC. However, once the buyback is completed, the fundamental challenges and concerns about the EXC story will resurface.

- **Post the buyback fundamental concerns on strategic direction, dividend sustainability, ExGen value / volatility will resurface.** We think a ~95% dividend payout based on utility earnings is too high, especially as ExGen continues to face pressure from declining power prices. On the strategic front, the business mix concerns do resurface and we think EXC should pursue a separation of its utility and generation business.

- **ExGen continues to stay pressured. ExGen's MTM for hedges in 2016 is $1.7B; Retail provides $1B of EBITDA in 2018.** Effectively, ExGen's unhedged or 'open' EBITDA in 2016 is $1.7B lower than its guidance. If power prices stay weak, there is downside to ExGen's 2017, 2018 EBITDA. Also, with $1B of 2018 EBITDA coming from the 'new business / to go', we find the 2018 commodity margin guidance of lower quality vs. today.

- **POM has cost EXC shareholders north of $500m.** EXC has spent $259m on fees and expenses as of Dec 31, 2015. Together with the break fees of $180m and the $40m of POM deal expenses, cost is already close to $500m .With additional costs to undo the financing and repurchase shares, this deal has cost EXC shareholders $500m+ together with a distracted management team for ~2 years.

Sell	**3**
Price (11 Mar 16)	US$34.73
Target price	US$27.00
Expected share price return	-22.3%
Expected dividend yield	3.6%
Expected total return	**-18.7%**
Market Cap	US$31,949M

Exelon Corp

Valuation

We value EXC using a sum-of-the-parts approach to get to our $27 target. We value ExGen at $10/share and believe ExGen's core nuclear assets will continue to experience weak economics. Valuation is based on a 5.5x 2019 EBITDA multiple that is supported by an UFCF conversion of 45%. The utilities business is valued at $18/share based on a 15x terminal PE multiple. We also add $5/share value provided by PepCo. We back out $6/share for the parent to get to our price target

Risks

Commodity price risk affecting merchant generation – If natural gas prices rise, wholesale power prices will likely rise, raising commodity margins.

Exelon is inherently a long natural gas position since natural gas generation sets the price of power in its key generation markets. If forward natural gas prices rise significantly from current prices, Exelon's earnings will likely exceed our forecasts.

Regulatory risk – All regulated utilities are subject to state and federal regulatory agencies that can materially affect shareholder returns. Failure to obtain fair recovery for capital expenditures or increases in operating costs can diminish returns to shareholders and adversely affect the share price.

Credit rating – Exelon's generation business is currently two notches above a high yield credit rating, but declining cash flows at the merchant business presents some risk of a possible credit rating downgrade barring deleveraging through an equity issuance, asset sale, or other means. If ExGen's credit rating is lowered to high yield status, ExGen would likely have to increase their collateral and it could pressure hedging activities going forward, which would reduce our earnings outlook.

If the impact on the company from any of these factors proves to be more negative/positive than we anticipate, the stock will likely have difficulty achieving our financial and price targets.

Appendix A-1

Analyst Certification

The research analyst(s) primarily responsible for the preparation and content of this research report are named in bold text in the author block at the front of the product except for those sections where an analyst's name appears in bold alongside content which is attributable to that analyst. Each of these analyst(s) certify, with respect to the section(s) of the report for which they are responsible, that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc and its affiliates. No part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendation(s) or view(s) expressed by that research analyst in this report.

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of Exelon Corp

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of Exelon Corp.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from Exelon Corp.

Citigroup Global Markets Inc. or an affiliate received compensation for products and services other than investment banking services from Exelon Corp in the past 12 months.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as investment banking client(s): Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: Exelon Corp.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to Exelon Corp. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities

transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 28th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating		
Data current as of 31 Dec 2015	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage	48%	40%	12%
% of companies in each rating category that are investment banking clients	64%	64%	59%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Prior to May 1, 2014 Citi Research may have also assigned a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the geographic and industry sector over a 3 month period. The relative call may have highlighted a specific near-term catalyst or event impacting the company or the market that was anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) may have indicated the most and least preferred stocks in the universe of stocks under consideration, explaining the basis for this short-term view. This three-month view may have been different from and did not affect a stock's fundamental equity rating, which reflected a longer-term total absolute return expectation.

NON-US RESEARCH ANALYST DISCLOSURES
Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below:

Citigroup Global Markets Inc	Praful Mehta; Tulkin Niyazov; Jesse Chai

OTHER DISCLOSURES

The subject company's share price set out on the front page of this Product is quoted as at 11 March 2016 04:00 PM on the issuer's primary market.

Many European regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Citi Research generally disseminates its research to the Firm’s global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm’s proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author’s previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client’s individual preferences as to the frequency and manner of receiving communications from analysts, the client’s risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Rule 483, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Important Disclosures for Bell Potter Customers: Bell Potter is making this Product available to its clients pursuant to an agreement with Citigroup Global Markets Australia Pty Limited. Neither Citigroup Global Markets Australia Pty Limited nor any of its affiliates has made any determination as to the suitability of the information provided herein and clients should consult with their Bell Potter financial advisor before making any investment decision.

The Citigroup legal entity that takes responsibility for the production of the Product is the legal entity which the first named author is employed by. The Product is made available in **Australia** through Citigroup Global Markets Australia Pty Limited. (ABN 64 003 114 832 and AFSL No. 240992), participant of the ASX Group and regulated by the Australian Securities & Investments Commission. Citigroup Centre, 2 Park Street, Sydney, NSW 2000. Exelon Corporation

EXC – BUY - DC Commission Meeting Tomorrow; We Highlight Possible Scenarios

SHAHRIAR POURREZA, CFA, ANALYST
shahriar.pourreza@guggenheimpartners.com
212 518 5862

FLASH NOTE

SECTOR: Power and Utilities

March 22, 2016

What's new? The DC Commission has EXC's (BUY, $34.88) merger case scheduled for its meeting tomorrow, March 23 at 11 AM ET – below we highlight possible scenarios.

Possible options and our takeaways. The DC Commission could choose from either of these options, but we believe some are more likely than others.

1. Approve the Commission's amendment terms that it outlined in Feb. 26 (see our note here) and treat this as a finding on merits rather than a settlement. EXC proposed that the Commission approve this option but opposing parties (DC Mayor, Attorney General, Office of People's Counsel (OPC), and DC Water) could appeal.
2. Adopt the Settlement agreement as presented. We believe this doesn't seem likely since Commissioner Phillips was the only one of three in favor of this option.
3. Adopt the new amendments proposed by EXC and POM (NC, $21.97) on March 7 for $45.6mm in the Customer Investment Fund (see our note here). We highlight that this was rejected by OPC, Attorney General and other parties. The OPC explicitly opposed all options claiming that they are "ready to move on." This would likely be appealed as well.
4. Decide to have more hearings, which would go against EXC and POM's April 7 deadline.
5. EXC and POM could also come up with another settlement, but less likely given that a more favorable settlement could trigger the "most favored nation" clause with other states that have already approved the merger.
6. They could reject the deal again since there is no consensus among parties on settlement conditions. This is a strong likelihood, in our view.

With or without POM, we are indifferent to the deal and remain strong supporters despite the outcome. As we highlighted in the past, the significance of the POM acquisition to us is primarily de-risking of the merchant business; the POM acquisition would have increased EXC's 2017 business mix to ~70% regulated from ~55%, not including synergies and further growth coming from future POM rate cases. **That said, EXC, following the year-end call, is already re-focusing on regulated utilities, shrinking its balance sheet through big de-levering program, announcing a return to dividend growth independent of acquiring POM.** They also highlighted to Market that they have no ambition of making a value destruction transaction by purchasing or growing the merchant Genco. So, EXC has already essentially de-risked its business. EXC's strategic focus reflects a more disciplined approach to its capital and balance sheet – the inflection point we were looking for.

If the deal fails, we believe management will start to implement plans to buy back 57.5mm shares within 5 months and retire the debt associated with Pepco. Although there would be a drag in the near term as they unwind financing, we believe the buybacks would likely be accretive in 2017 given the reduction in share count and lower interest expense.

If the deal does not close, there could be additional $4-5 downside to POM. Although POM is now able to file for rate cases with the DE, MD, and NJ Commissions, we believe POM will continue to be a material under-earner since it has been out a rate case since 2014. While POM is already prepared to file for rate cases earlier in 2016 for DE, MD, and NJ, followed by a DC (delay due to pending settlement with the Commission), the rate case will still take 9-12 months to be approved. We estimate downside to POM stock could be another $4-5 based on a 13-14 range multiple on 2018 consensus earnings estimates, which are very stale.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

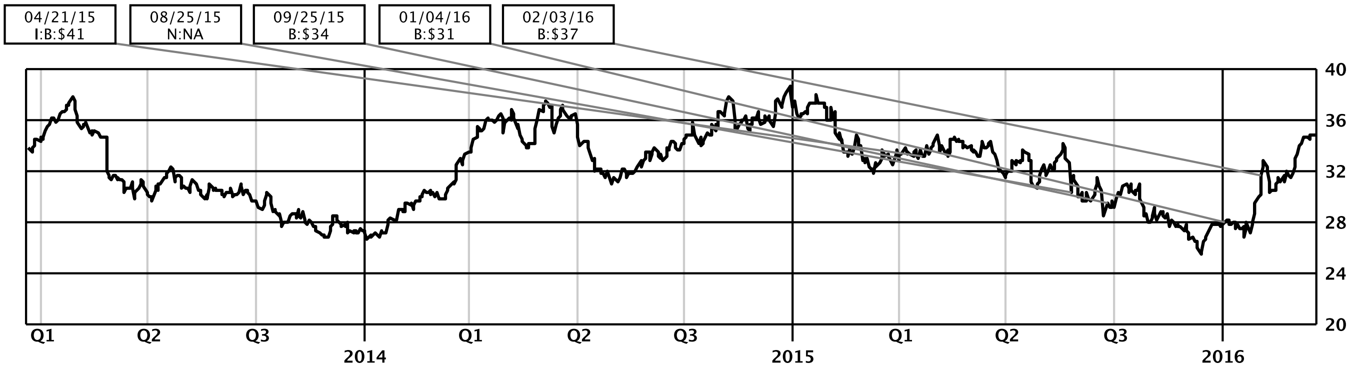
IMPORTANT DISCLOSURES

The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Exelon Corporation in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Exelon Corporation (EXC) as of 03-21-2016



Created by BlueMatrix

RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgment. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conduct an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

TACTICAL TRADING IDEA DISCLAIMER

Guggenheim Securities, LLC produces "Tactical Trade Ideas" that identify short-term, catalyst-driven trading opportunities impacting companies within the Firm's coverage universe. Tactical Trade Ideas may exist on companies in this report and may be contrary to the analyst's published rating.

Moody's affirms IG gencos post its revised commodity price assumptions

Sentiment Indicator : positive

Posted by Leung, Raymond (RBC Capital Markets, LLC) on Tuesday, March 22, 2016, 16:55 PM ET

Takeaway: Moody's last night completed its review of the US merchant power sector that was tied to its recent revised view of a sustained low commodity price environment. We view the affirmations as a positive event that should help support current spreads. That said, gas prices remain relatively low and are an overhang for the power sector. We remain Sector Perform on Exelon Generation and FirstEnergy Solutions. We maintain our Underperform on PSEG Power. Although we view PSEG Power's credit profile as the strongest of the three entities, we think event risk may be rising for PSEG Power and will remain an overhang on spreads in our view. PSEG Power 4.3% of 2023s were +222bps (+239 g-spread). Exelon Generation 4.25% of 2022 quoted at +235 bps (+218 g-spread) and FirstEnergy Solutions 6.8% of 2039 quoted at +590bps. We continue to rate Exelon Corp (3.95% of 2025 quoted at +185bps) and FirstEnergy Corp (4.25% of 2023 quoted at +180bps) at Outperform as the focus on regulated investments helps temper the volatility of its generation business.

- PSEG Power's Baa1 senior unsecured rating was affirmed owing to its strong financial profile with cash flow adjusted for maintenance capital and nuclear fuel to debt expected to exceed about 25% over the next few years. PSEG Power's generation assets benefit from its locational advantage and its hedging strategy that provides cash flow visibility.
- Exelon Generation Co., LLC was affirmed at Baa2. The agency expects cash flow to debt in the mid-teens area and FFO to debt to stay near 30% over the next several years.
- FirstEnergy Solutions and Allegheny Energy Supply Co., LLC's ratings were affirmed at Baa3. The affirmation is predicated on expectations that it would gain support from the pending settlement in Ohio to allow for an 8-year PPA tied to 3.2GW of its generation portfolio. Moody's expects the generation business to have a pro-forma cash flow coverage to debt to be in the range of 25-28% while the parent consolidated leverage would be in the range of 14-16%. The Ohio regulators are expected to rule on the settlement in March 2016. Thus, the regulatory support for the PPA is key for the support of the ratings. Moody's did note that the impact of lower power prices since its December 2015 review was less than $50 million annually.
- The agency is currently assuming an average gas price of $2.25/mmbtu for 2016 and $2.50 /mmbtu in 2017.

Exelon Corp (EXC)

Alert: Pepco Approved: Bad outcome for EXC shareholders

- **DC Regulators approved option 2 - the settlement agreement that was originally approved by the settlement parties.**

- **Bad Deal – Value destructive by $1/share**; **PT = $27.** As we said in our note on Feb 22nd, "Exelon Corp (EXC) - Pepco = Value Destructive. We assume the deal closes, back to Sell rating." We think Pepco is a bad deal for EXC shareholders destroying $1/share of value.

- **No share buyback coming.** We had hoped the deal would be terminated and for EXC to buyback 57.5m shares. With this turn of events, the one support for the EXC stock in the near term goes away. Cleary there is no buyback coming now.

- **Remember, deal is EPS accretive but value destructive.** Our analysis suggests 5, 8 and 11 cents of accretion in 2017, 2018 and 2019, respectively. However, from a value perspective, our stand alone PT reduces by $1. This outcome is possible because: 1) the $1.5B in premium is financed using cheap debt helping EPS but hurting equity value as it increases parent net debt; and 2) the concessions, fees and expenses valued at $500m are ignored for ongoing EPS but reduce value.

- **Transaction increases leverage at a time when ExGen should be reducing debt.** We forecast EXC's consolidated FFO/Debt going from 25-27% to 20% following the transaction. At a time when ExGen's cash flows and asset life are weakening, we would have preferred EXC retain its financial flexibility.

- **EXC's core valuation is all about ExGen. We only see further weakness**. ExGen accounts for 35% of value in EXC post Pepco and we believe will continue to be the key driver of the stock. With delays in CPP, weak power prices and likely weakness in PJM capacity prices, we see additional challenges ahead and this is one of the key drivers for our PT and Sell rating.

- **Dividends definitely better positioned in the near term**. Together with Pepco, we do think EXC's dividend increase of 2.5% is relatively more secure given the higher proportion of utility earnings. By our math, the dividend payout on utility earnings is at 75% by 2019.

Sell	3
Price (23 Mar 16)	US$35.25
Target price	US$27.00
Expected share price return	-23.4%
Expected dividend yield	3.5%
Expected total return	-19.9%
Market Cap	US$32,490M

See Appendix A-1 for Analyst Certification, Important Disclosures and non-US research analyst disclosures.

Exelon Corp

Valuation

We value EXC using a sum-of-the-parts approach to get to our $27 target. We value ExGen at $10/share and believe ExGen's core nuclear assets will continue to experience weak economics. Valuation is based on a 5.5x 2019 EBITDA multiple that is supported by an UFCF conversion of 45%. The utilities business is valued at $18/share based on a 15x terminal PE multiple. We also add $5/share value provided by PepCo. We back out $6/share for the parent to get to our price target

Risks

Commodity price risk affecting merchant generation – If natural gas prices rise, wholesale power prices will likely rise, raising commodity margins.

Exelon is inherently a long natural gas position since natural gas generation sets the price of power in its key generation markets. If forward natural gas prices rise significantly from current prices, Exelon's earnings will likely exceed our forecasts.

Regulatory risk – All regulated utilities are subject to state and federal regulatory agencies that can materially affect shareholder returns. Failure to obtain fair recovery for capital expenditures or increases in operating costs can diminish returns to shareholders and adversely affect the share price.

Credit rating – Exelon's generation business is currently two notches above a high yield credit rating, but declining cash flows at the merchant business presents some risk of a possible credit rating downgrade barring deleveraging through an equity issuance, asset sale, or other means. If ExGen's credit rating is lowered to high yield status, ExGen would likely have to increase their collateral and it could pressure hedging activities going forward, which would reduce our earnings outlook.

If the impact on the company from any of these factors proves to be more negative/positive than we anticipate, the stock will likely have difficulty achieving our financial and price targets.

Appendix A-1

Analyst Certification

The research analyst(s) primarily responsible for the preparation and content of this research report are named in bold text in the author block at the front of the product except for those sections where an analyst's name appears in bold alongside content which is attributable to that analyst. Each of these analyst(s) certify, with respect to the section(s) of the report for which they are responsible, that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc and its affiliates. No part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendation(s) or view(s) expressed by that research analyst in this report.

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of Exelon Corp

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of Exelon Corp.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from Exelon Corp.

Citigroup Global Markets Inc. or an affiliate received compensation for products and services other than investment banking services from Exelon Corp in the past 12 months.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as investment banking client(s): Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: Exelon Corp.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: Exelon Corp.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to Exelon Corp. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities

transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 28th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating		
Data current as of 31 Dec 2015	Buy	Hold	Sell
Citi Research Global Fundamental Coverage	48%	40%	12%
% of companies in each rating category that are investment banking clients	64%	64%	59%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Prior to May 1, 2014 Citi Research may have also assigned a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the geographic and industry sector over a 3 month period. The relative call may have highlighted a specific near-term catalyst or event impacting the company or the market that was anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) may have indicated the most and least preferred stocks in the universe of stocks under consideration, explaining the basis for this short-term view. This three-month view may have been different from and did not affect a stock's fundamental equity rating, which reflected a longer-term total absolute return expectation.

NON-US RESEARCH ANALYST DISCLOSURES
Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below:

Citigroup Global Markets Inc	Praful Mehta; Tulkin Niyazov; Jesse Chai

OTHER DISCLOSURES

The subject company's share price set out on the front page of this Product is quoted as at 23 March 2016 01:04 PM on the issuer's primary market.

Many European regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

Citi Research generally disseminates its research to the Firm’s global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm’s proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author’s previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client’s individual preferences as to the frequency and manner of receiving communications from analysts, the client’s risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Rule 483, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

EXC-NYSE--Outperform (1)
POM-NYSE--Market Perform (2)

Diversified Electric Utilities

D.C. Approves EXC/POM Merger

Neil Kalton, CFA, Senior Analyst (314) 875-2051

Sector Rating: Diversified Electric Utilities, Market Weight

What a long, strange trip it's been! Just when we had thought we had seen it all (or close to it), the District of Columbia Public Service Commission (DCPSC) voted 2-1 shortly before 2pm ET today (3/23) to approve the merger of EXC and POM. The DCPSC selected option 2 in EXC/POM's 3/7 motion which approves the merger on the terms outlined in Commissioner Fort's revised Non-Unanimous Full Settlement Agreement (NSA). Today's action goes against the publicly stated positions of prominent interveners in D.C. including the Mayor, the Office of People's Counsel, the Attorney General and the D.C. Water and Sewer Authority who opposed the revised NSA due primarily to the potential reallocation of $25.6M of rate credits originally earmarked for residential customers amongst all customer classes. Per the revised NSA, the allocation is to be made in Pepco's next rate case. While it appears that logic has prevailed at the end of day, we are surprised that the Mayoral-appointed DCPSC elected to approve the merger seemingly against the District's wishes. As of the writing of this comment, we are awaiting statements from EXC/POM regarding the next steps and the official close date. So much for dusting off our standalone POM model over the past few days! Shares of POM are up 28% intraday on the development, just shy of the $27.25 takeout price, while EXC is largely flat. This compares to the S&P utilities which are up nearly 1%.

Exelon Corporation (EXC-NYSE)
Price as of 3/23/2016: $34.99
FY 16 EPS: $2.55
FY 17 EPS: $2.75
Shares Out.: 861.2 MM
Market Cap.: $30,133.39 MM

Pepco Holdings, Inc. (POM-NYSE)
Price as of 3/23/2016: $27.15
FY 16 EPS: $1.05
FY 17 EPS: $1.15
Shares Out.: 253.6 MM
Market Cap.: $6,885.24 MM

Rating Basis Information:
EXC Thesis: Our Outperform rating is largely premised on our belief that the share price undervalues ExGen's nuclear fleet. Other positive features include above average utility rate base growth prospects and strong nuclear operational track record.

Please see page 3 for rating definitions, important disclosures and analyst certifications.
All estimates/forecasts are as of 03/23/16 unless otherwise stated.

POM Thesis: We are attracted to POM's regulated growth opportunities and relatively high concentration of transmission earnings. Our Market Perform rating reflects valuation considerations given our belief that the pending acquisition by EXC for $27.25/sh will be approved and close during 1H'16.

DC Public Service Commission Green-Lights the Exelon/Pepco Merger Agreement

In a two-to-one vote, the Public Service Commission of the District of Columbia (DC PSC) voted in favor of the merger settlement agreement between Exelon and Pepco Holdings Inc. (POM, $27.10, Not Rated). Voting to approve the amended merger settlement agreement were Commissioners Joanne Doddy Fort and Willie L. Phillips; Chairman Betty Ann Kane reaffirmed her vote against the merger. Before today's decision, which was the last hurdle in the merger approval process, the DC PSC had rejected the proposal twice.

On March 7, Exelon and Pepco Holdings filed a proposal with the DC PSC, which had previously rejected the merger settlement, that outlined three different approaches, any one of which, if approved, would continue to allow for the distribution of $78 million in benefits for the District and POM customers as agreed to in the original settlement and allow the two companies to complete the merger. Both companies stated in their joint filing that they were prepared to **1)** deliver the benefits of the original merger settlement; **2)** accept all the alternative terms the DC PSC outlined in its February 26 filing that would place the merger in the public interest; or **3)** offer an alternative third option that EXC/POM claimed would balance the alternate terms the PSC outlined with the views of some of the nine settling parties on the issue of rate credits to residential customers. According to today's proceedings, option 2 was mutually agreed upon.

Our View:

- We view the news positively for EXC shares, as it ends a process of merger discussions with various stakeholders that lasted more than two years.
- As per the latest disclosures from EXC regarding the economics of the merger, the transaction is expected to be a ~$0.07/share drag to earnings in 2016; neutral to 2017 EPS; $0.07-0.12/share accretive to 2018; and $0.15-0.20/share accretion to 2019, assuming EXC receives constructive rate relief.
- We expect to receive further commentary and updates from EXC regarding today's decision.

Please refer to pages 2 to 5 for Important Disclosures, including the Analyst's Certification.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael S. Worms, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA (exceptions: Alex Arfaei and Brodie Woods). These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosure

Disclosure 10: A research analyst, associate, or any person (or their household members) directly involved in the preparation of this research report has a financial interest in securities of this issuer.

Methodology and Risks to Price Target/Valuation

Methodology: Our valuation is based on a combination of our 2017 adjusted EBITDA estimate with an 8x EV/EBITDA multiple and 15x 2017E P/E multiple.
Risks: A material decline in power prices and / or a change in the regulatory environment could affect our price target.

BMO Capital Markets Equity Research is available via our website https://research-ca.bmocapitalmarkets.com/Public/Secure/Login.aspx?ReturnUrl=/Member/Home/ResearchHome.aspx
Institutional clients may also receive our research via Thomson Reuters, Bloomberg, FactSet, and Capital IQ.
Research reports and other commentary are required to be simultaneously disseminated internally and externally to our clients.

Conflict Statement
A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx

General Disclaimer
"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters
To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Alexander Pearce, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

Sector Rating: Energy Team, NA

Quick thoughts from Wells Fargo Securities, LLC Energy & Utility Team:

Utilities

Exelon Corp. (EXC/Outperform) & Pepco Holdings, Inc. (POM/Market Perform) (Kalton) - Clarity in the ongoing saga known as the EXC/POM merger could emerge later today (3/23). The District of Columbia Public Service Commission (DCPSC) meeting starts at 11:00am ET and the merger docket (FC 1119) is listed as the last item on the agenda (according to Bloomberg, the DCPSC intends to vote). EXC/POM's response to Commissioner Fort's revised Non-Unanimous Full Settlement Agreement (NSA) requested a decision by 4/7 and, after today, the next regularly scheduled DCPSC meeting is 4/13. The merger remains on life support with some key intervenors asking for the plug to be pulled while other parties are hoping Commissioner Fort has a change of heart after having rejected the original settlement. Given the surprises that have come out of the DCPSC and other state regulatory bodies recently, we feel like anything COULD still happen despite many arrows pointing to this deal finally breaking.

Ahead of a final decision, investors are asking what a standalone POM looks like (who will be the CEO, how much equity is needed, is the dividend secure, etc.) and what is the appropriate valuation if the deal does fall apart? After trading between $26-27/sh for the first couple months of 2016 (EXC's offer is for $27.25/sh), POM shares have tumbled 20% since the 2/25 close versus a 3% gain for the S&P Utilities. Based on rough math, we believe there could be modest further downside to POM shares from yesterday's $21.24 close. Applying a 10-15% discount to the 2018E Regulated Electric median P/E of 17X to our hypothetical $1.30-1.35 2018E EPS results in a present value of $19-20/sh. Of course the devil will be in the details in terms of the standalone financial strategy POM communicates and the regulatory treatment afforded in the next round (or two) of rate cases - POM filed a NJ rate case on 3/22 and other jurisdictions are expected to follow shortly.

As a reminder, DCPSC approval is the final piece of the puzzle needed to consummate the merger. The DCPSC denied the original NSA on 2/26 before approving a revised NSA for the settling parties to consider adopting. However, key parties such as the Mayor, the Office of People's Counsel, the Attorney General and the D.C. Water and Sewer Authority opposed the revised NSA due primarily to the potential reallocation of $25.6M of rate credits originally earmarked for residential

Please see page 4 for rating definitions, important disclosures and analyst certifications.
All estimates/forecasts are as of 03/23/16 unless otherwise stated.

customers. Seemingly unable to reach a new agreement with the parties, EXC/POM filed a motion on 3/7 requesting the DCPSC approve one of three options: (1) the revised NSA, (2) the original NSA or (3) EXC/POM modifications to the revised NSA - keeps the $78M in promised benefits intact, including the $25.6M for residential rate credits, but would give the DCPSC discretion over $20M of funds previously dedicated to the Modernizing the Energy Delivery System for Increased Sustainability (MEDSIS) subaccount.

CLECO (CNL/Market Perform) (Kalton) - On 3/22, shares of CNL finished down 2.2%, versus the S&P Utilities down 0.4%, likely driven by comments made at the Louisiana Public Service Commission's (LPSC) Business and Executive (B&E) session regarding the proposed acquisition of CNL by an investor group led by Macquarie Infrastructure & Real Assets and British Columbia Investment Management Corp. To get things started, CNL and the investor group withdrew the motion for rehearing shortly before the meeting and proposed a special meeting be held to discuss the transaction (and, potentially, a final decision) early next week. The LPSC countered by proposing that they meet today (3/23); ultimately, the parties settled on a 3/28 hearing. It is our understanding that a final decision on the proposed transaction could be handed down at the 3/28 meeting. The applicants made a strong case for a decision no later than 3/30 indicating that further delay would significantly complicate the process (potentially requiring renegotiation of financial documents).

We find it interesting, and not overly reassuring, that the company wanted to postpone the discussion into next week when the potential for a vote was on the table yesterday. We continue to believe that there is a path to approval given that two of the five commissioners appear to be in favor of the transaction, and a third - the a potential swing vote - offered an avenue to completing the transaction during the B&E meeting. However, the commissioner's terms, which included significantly increasing customer benefits (3-4X the current offer), were met with a less than enthusiastic reception from the applicants, who maintained that the existing offer was the best they could provide under the current circumstances.

Eversource Energy (ES/Outperform) (Kalton) - Yesterday afternoon the Administrative Law Judge (ALJ) in the New England Transmission Owners' second and third ROE complaints issued an initial decision. We believe the initial decision is at least supportive of our ongoing 2016-19E EPS of $3.00, $3.20, $3.35 & $3.55 which reflect no material changes to the current FERC (Federal Energy Regulatory Commission) authorized 10.57% base ROE (11.74% ceiling). While the ALJ's 9.59% base ROE (10.42% ceiling) in the second complaint would result in incremental net refunds due to the lower ROE, the recommendation in the third complaint for a 10.90% base ROE (12.19% ceiling) would represent modest upside potential. A final FERC order is expected late 2016 or early 2017.

Exelon Corporation (EXC-NYSE)
Price as of 3/22/2016: $35.00
FY 16 EPS: $2.55
FY 17 EPS: $2.75
Shares Out.: 861.2 MM
Market Cap.: $30,142.0 MM

Pepco Holdings, Inc. (POM-NYSE)
Price as of 3/22/2016: $21.24
FY 16 EPS: $1.05
FY 17 EPS: $1.15

Eversource Energy (ES-NYSE)
Price as of 3/22/2016: $57.48
FY 16 EPS: $3.00
FY 17 EPS: $3.20
Shares Out.: 317.2 MM
Market Cap.: $18,232.66 MM

Rating Basis Information:
EXC Thesis: Our Outperform rating is largely premised on our belief that the share price undervalues ExGen's nuclear fleet.

Other positive features include above average utility rate base growth prospects and strong nuclear operational track record.

POM Thesis: We are attracted to POM's regulated growth opportunities and relatively high concentration of transmission earnings. Our Market Perform rating reflects valuation considerations given our belief that the pending acquisition by EXC for $27.25/sh will be approved and close during 1H'16.

CNL Thesis: We are attracted to CNL's constructive regulatory environment and healthy financial position. Our Market Perform rating reflects valuation considerations.

ES Thesis: We believe shares of ES warrant a 5-10% premium P/E given an above average EPS & DPS growth profile, heavy concentration of FERC-regulated earnings, proven management team and strong financial position.

Exelon

Exelon receives final approval for Pepco merger from D.C.

Maintain Rating: NEUTRAL | PO: 34.00 USD | Price: 34.72 USD

Bank of America Merrill Lynch

Equity | 23 March 2016

Key takeaways

- D.C. PSC surprisingly approved the Exelon-Pepco merger application based on the revised non-unanimous settlement agreement.
- Deal expected to close in a few days with no impact on our PO as we previously included $0.08 of accretion; maintain Neutral.
- Lateral impact: SMID cap valuations continue to embed takeout premium, but relative performance upside appears to be limited.

Exelon-Pepco merger gets the go-ahead

On 3/23/16, the D.C. Public Service Commission surprisingly approved the Exelon-Pepco merger application by a 2-1 vote. The commission voted in favor of the revised non-unanimous settlement agreement (RNSA) presented during the 2/26/16 commission meeting. As the RNSA was not entirely supported by all parties to the original settlement, the commission decided to base its decision on the overall benefits of the revised terms. With the D.C. approval now in hand, we expect the deal to close in the next few days. Our take: the completion of the deal is a marginal positive for Exelon as the dividend payout ratio is now fundamentally supported by regulated earnings. Furthermore, the success of this merger could be seen as a lateral for the NextEra-Hawaiian deal that is still pending in front of the Hawaiian commission. In that situation, there is a widespread perception that various stakeholders in Hawaii oppose the deal, but the EXC/POM saga is a reminder that the state commissioners are effectively the only deciders that matter. Our rough calculations suggest NEE/HE are pricing in roughly a 35% probability of merger approval.

SMID caps have limited upside on M&A expectations

The state commissions continue to extract sizable customer benefits from the M&A run. In this case, the D.C. commission revised the settlement terms to its liking and proceeded to approve them later. While this is not new, this decision could be seen as providing additional precedent for commissions to revise settlement terms in favor of different consumer groups. Nevertheless, we believe the M&A run appears to be in the late innings (Fed is now raising rates, gas infrastructure spending is slowing), and the SMID caps appear to be fairly valued for the takeout premium. In our view, the SMID caps as a whole have little relative upside performance remaining, and we continue to reiterate our Underperforms on several SMID names.

PO unchanged; Maintain Neutral

With the completion of the Pepco merger expected to be finalized over the next few days, the Exelon regulated story now turns to a focus on execution and to see if the benefits will materialize. Exelon will start filing rate cases for Pepco given the two year delay due to the ongoing merger. Our PO is not expected to change as in our latest model we included $0.08 of accretion for the deal in our valuation (but not our official EPS estimates). Maintain Neutral.

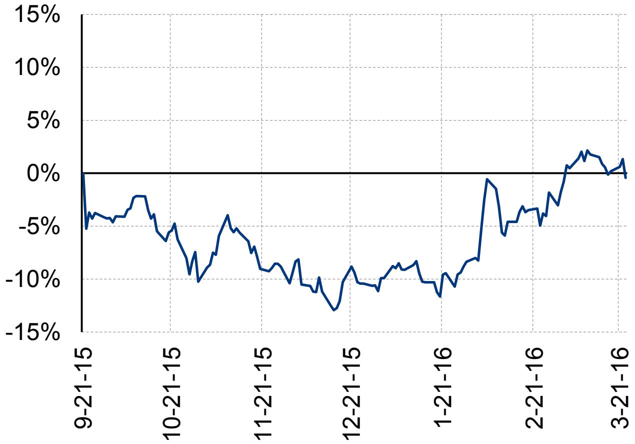
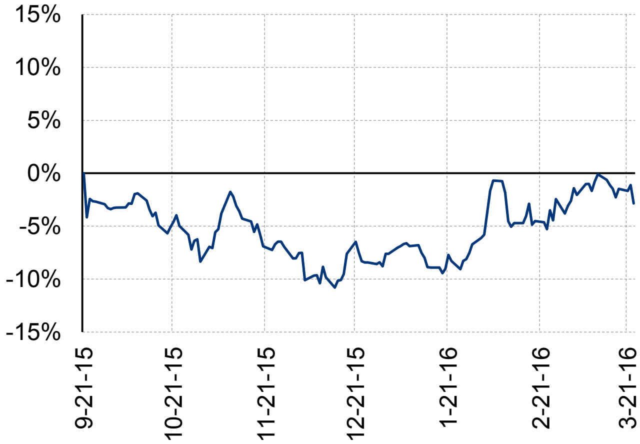
Relative Performance Charts

Chart 1: EXC relative performance vs. utilities group average



Source: BofA Merrill Lynch Global Research, Bloomberg

Chart 2: EXC relative performance vs. integrated electrics average



Source: BofA Merrill Lynch Global Research, Bloomberg

Price objective basis & risk

Exelon (EXC)

Our $34/share price objective for EXC shares is derived from our sum of the parts valuation model, where we assign approximately $8 of value to ExGen, $1 for the parent, and approximately $25 of value to the regulated utility. We value integrated electric utilities, including Exelon, using a sum of the parts valuation model based on 2018E earnings and EBITDA. For Exelon specifically we use a target 6.8x EV/EBITDA multiple to value the deregulated generation segment, in line with peers. We apply a target 15.0 P/E multiple to value the regulated side of the business, which is a discount to regulated peers at 15.5x to reflect the generally below-average ROEs allowed by the state commissioners for the states in which Exelon has regulated operations.

Downside (upside) risks to our price objective are: 1) increasing (decreasing) of forward power prices driven by rising natural gas prices, heat rates, or Northeast and Midwest gas basis to Henry Hub, 2) regulatory outcomes as well as changes in nuclear regulation, 3) deterioration (improvements) in operating efficiency beyond our base scenario, and 4) risks to the successful completion of the Pepco Holdings acquisition

Analyst Certification

The Investment Opinion System is contained at the end of the report under the heading "Fundamental Equity Opinion Key". Dark grey shading indicates the security is restricted with the opinion suspended. Medium grey shading indicates the security is under review with the opinion withdrawn. Light grey shading indicates the security is not covered. Chart is current as of February 29, 2016 or such later date as indicated.

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	69	47.26%	Buy	58	84.06%
Hold	40	27.40%	Hold	32	80.00%
Sell	37	25.34%	Sell	27	72.97%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2015)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1673	50.16%	Buy	1244	74.36%
Hold	777	23.30%	Hold	545	70.14%
Sell	885	26.54%	Sell	533	60.23%

* Issuers that were investment banking clients of BofA Merrill Lynch or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Merrill Lynch Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Merrill Lynch report referencing the stock.

Merrill Lynch (DIFC) is authorized and regulated by the Dubai Financial Services Authority (DFSA). Research reports prepared and issued by Merrill Lynch (DIFC) are prepared and issued in accordance with the requirements of the DFSA conduct of business rules.

BAMLI Frankfurt distributes this report in Germany. BAMLI Frankfurt is regulated by BaFin.

This research report has been prepared and issued by MLPF&S and/or one or more of its non-US affiliates. MLPF&S is the distributor of this research report in the US and accepts full responsibility for research reports of its non-US affiliates distributed to MLPF&S clients in the US. Any US person receiving this research report and wishing to effect any transaction in any security discussed in the report should do so through MLPF&S and not such foreign affiliates. Hong Kong recipients of this research report should contact Merrill Lynch (Asia Pacific) Limited in respect of any matters relating to dealing in securities or provision of specific advice on securities. Singapore recipients of this research report should contact Merrill Lynch International Bank Limited (Merchant Bank) and/or Merrill Lynch (Singapore) Pte Ltd in respect of any matters arising from, or in connection with, this research report.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Merrill Lynch.

This research report provides general information only. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this report and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this report.

Securities and other financial instruments discussed in this report, or recommended, offered or sold by Merrill Lynch, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Merrill Lynch is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned in this report. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Merrill Lynch entities located outside of the United Kingdom. BofA Merrill Lynch Global Research policies relating to conflicts of interest are described at http://go.bofa.com/coi.

Officers of MLPF&S or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

MLPF&S or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. MLPF&S or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Merrill Lynch, through business units other than BofA Merrill Lynch Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented in this report. Such ideas or recommendations reflect the different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Merrill Lynch is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this report.

In the event that the recipient received this report pursuant to a contract between the recipient and MLPF&S for the provision of research services for a separate fee, and in connection therewith MLPF&S may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom MLPF&S has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by MLPF&S). MLPF&S is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities mentioned in this report.

Investors should consult their own legal advisers as to issues of law relating to the subject matter of this report. BofA Merrill Lynch Global Research personnel's knowledge of legal proceedings in which any BofA Merrill Lynch entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this report is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Merrill Lynch in connection with the legal proceedings or matters relevant to such proceedings.

This report has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of MLPF&S, any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Merrill Lynch Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Merrill Lynch and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This report may contain links to third-party websites. BofA Merrill Lynch is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this report and is not incorporated by reference into this report. The inclusion of a link in this report does not imply any endorsement by or any affiliation with BofA Merrill Lynch. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Merrill Lynch is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Merrill Lynch policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports may contain discussions and/or investment opinions relating to securities, financial instruments and/or issuers that are no longer current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with MLPF&S or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Merrill Lynch nor any officer or employee of BofA Merrill Lynch accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this report or its contents.

Breaking News

Third time's a charm

DC PSC shocks again, this time approving POM-EXC deal

After almost two years, the DC Public Service Commission approved Exelon's purchase of Pepco Holdings (POM) in 2-1 vote, allowing the transaction to move forward. All other relevant regulators had already approved the deal, and we now expect the transaction to close shortly. The approval was quite unexpected with most analysts, including us, thinking the deal was likely over. As a result, POM traded up almost 28% after the announcement.

Deal approved subject to revised settlement agreement

In the end, the commission approved the deal largely subject to its own revised settlement agreement, which was issued by the PSC last month. At that time, the PSC denied a settlement reached by many parties in the case this past fall, including the DC Mayor, and indicated the deal could move forward if all of the original settling parties would agree to the PSC's revisions. In the alternative, the PSC suggested that the settling parties get together to request other relief. Neither of these outcomes occurred. Many of the settling parties (OPC, DC Gov't, DC Water) stated they could not accept the revised settlement agreement proposed by the PSC. But they also could not agree as one entity on a path forward. As a result, EXC and POM filed on March 7 recommending three options for approval: 1) approve the original settlement agreement; 2) approve the revised settlement agreement; or 3) approve an alternative agreement. The PSC ultimately selected option 2.

No changes to estimates as model already includes POM

We are maintaining our estimates and price target which we had already updated to assume the merger would close at the end of Q1/early Q2. We would have likely raised our 2016 and 2017 EPS estimates by $0.05-$0.10 had the deal failed. That said, we did not see a material impact on our EXC valuation if the deal had failed to close.

Analyst Day likely on the horizon

Following the close, EXC will likely host an Analyst Day to review the financial outlook for the company including POM. While possible in late Q2, the company may prefer to delay to sometime in the second half.

RBC Insight

Exelon Corp (EXC): D.C. Commission Approves Exelon/Pepco Merger

Sentiment Indicator : **positive**

Posted by Tucker, Shelby (RBC Capital Markets, LLC) on Wednesday, March 23, 2016, 15:08 PM ET

Our View: In the latest turn of events, the D.C. commission approval allows for Exelon (EXC; Outperform; $34 PT) to successfully acquire Pepco Holdings (POM; Not Rated) after a two-year approval process. While the opposing parties to the decision (i.e. Mayor's office and Office of People's Counsel) have the option to challenge this decision with the courts, we believe the length of such a process would make the attempt unlikely to succeed. We were always of the opinion that the deal would not go through, with our estimates incorporating the buyback of 57.5 million shares of equity and redemption of $4.2 billion of debt related to the deal. Thus, our model is currently under review.

Today, the D.C. Public Service Commission (DCPSC) approved the Exelon/Pepco merger with a 2-1 vote; Chair Betty Ann Kane was the dissenting vote. The two approving commissioners adopted the second of the three options submitted by the companies (below), which represents the alternative proposed by Commissioner Joanne Fort.

1. The original merger settlement filed on October 6, 2015 (with support of the D.C. Mayor's office, Office of People's Counsel, and other parties);
2. **(Approved and adopted)** The revised settlement proposed by the DCPSC on February 26, which included deferring the decision on allocation of $25.6 million Customer Base Rate Credit among customer classes. The original settlement had called for full allocation to residential customers; this revision is not supported by all settling parties, including the Mayor's office, Office of People's Counsel, and D.C. Water.
3. An alternative proposal that increased the Customer Base Rate Credit from $25.6 million to $45.6 million (with $25.6 million to be allocated to residential customers and $20 million to be used to offset rate increases for any/all customer classes). The funding for a pilot grid modernization program would be decreased by $20 million.

This represents the last remaining approval needed for deal closure; we expect the parties to complete the transaction this week.

Power & Utilities | North America Power & Utilities

24 March 2016

Exelon Corp.

De-risked and Positioned for Growth

We are reinstating our rating on Exelon Corp. at Overweight following the acquisition of PEPCO Holdings Inc.: We rate the shares Overweight with a $39 price target. Given the above average growth potential for the utilities a premium may be warranted; however until synergy realization and rate construct are rationalized, we think a group average multiple is appropriate. The expectation for solid capacity prices and stabilizing energy prices leads us to use 6.5x EBITDA for generation valuation.

The combination results in a lower risk profile given the higher percentage of earnings from the regulated utilities: Post closure of the merger, over 50% of the earnings come from the regulated companies given the current forward prices for energy and capacity. There should be a solid contribution to earnings growth from the utilities driven by greater than 7% annual rate base growth through 2018. This higher percentage of earnings from regulated should allow for modest multiple expansion over time. Capital investment, synergies and narrowing the spread between earned and allowed ROE provides above-average growth potential for regulated earnings. Capacity performance, plant closures, increased volatility pricing and potential nuclear value from the Clean Power Plan or state initiatives provide potential upside to generation earnings.

Risks to the Call: There are several risks to the call given the volatile nature of power markets and regulatory outcomes. This volatile nature is highlighted by a $3.2B range in gross margin for 2018 for Exelon Generation. Additionally, the ability to obtain rate increases and manage costs to narrow the earned-to-allowed ROE gap is critical in obtaining projected growth metrics. A $50/MW-Day move in capacity moves adjusted EBITDA by approximately $450M, where a $0.50/mmbtu move in gas is nearly a $350M impact in adjusted EBITDA for 2018. A 50bp move in earned ROE is equivalent to $0.09 in eps. Given this, investors should watch regulatory outcomes and associated capital spending, capacity auction results, Clean Power Plan implementation and Illinois nuclear legislation.

Price (23-Mar-2016)	USD 34.72
Price Target	**USD 39.00**

Why Overweight? We believe EXC has strong leverage to a rebound in demand or price in its markets that should be to its advantage if/when markets improve. That said, on current market forwards we do not see a bounce in margins, making the stock fairly valued versus its earnings opportunities over the next 2-3 years.

Upside case	USD 44.00

Our upside case assumes a more bullish commodity outlook that results in margin expansion and corresponding increase in valuation by 10%.

Downside case	USD 29.00

Our downside case assumes a $0.50 reduction in gas prices from the current forward curve, resulting in negative impacts to open EBTIDA and asset-based valuations, and the attribution of a discount due to challenged market location.

Upside/Downside scenarios

Note: FY End Dec

Investment Summary

Regulatory Execution and Power Markets Remain the Key

Exelon Corp post merger has six regulated subsidiaries: Commonwealth Edison, Philadelphia Electric Company, Baltimore Gas and Electric, PEPCO, Delmarva Power and Light and Atlantic City Electric. There is solid ratebase growth anticipated and the ability to reallocate capital to jurisdictions getting more favourable rate treatment allows for potentially higher growth. The 5-year capital plan is $18B for the legacy utilities and $25B for the combined companies. This capital plan drives anticipated earnings growth from the utilities in excess of 7% annually. Also the long-term expectation is to earn at or above a

10% ROE for the legacy utilities, with a significant reduction of the earned to allowed ROE gap for the PHI utilities.

Exelon Generation is a premier genco with over two-thirds of the installed capacity coming from non-carbon-emitting (NCE) sources, with another 29% coming from natural gas/oil fired plants. From a generation production perspective over 85% comes from NCE sources with another 10% coming from natural gas/oil fired generation. This creates a situation where Exelon is significantly more levered to any potential impacts surrounding the Clean Power Plan as Exelon Corp has among the lowest-emitting fleets in the nation. This benefit does come with some issues, as in certain regions under the current lower energy and capacity price environment the economics for the nuclear plants have become challenged. The plants currently at risk from a financial perspective are Ginna, Nine Mile Point, Quad Cities, Clinton and Byron. Until such point as energy and capacity prices rationalize and/or some version of carbon pricing materializes, these plants face an uncertain future. Given the increasing emphasis on clean power both at the state and federal level, nuclear plants with challenged economics either have been granted special treatment or are being considered for such. Examples include Ginna receiving reliability must run (RMR) payments and the proposed Illinois legislation that would allow for payments to the nuclear plants based on their NCE status in front of federal rules on carbon emissions. Additionally, the New York PSC has proposed a clean energy standard that recognizes the environmental and economic benefits of nuclear generation.

Capital Discipline and Dividends

Exelon is focused on investing only where the risk/reward meets their hurdle rates. As previously discussed, there is significant capital allocated for the utility business, given the expectation of earning near 10% returns on equity over the long run. The more difficult question is the investment in Exelon Generation. Obviously, any safety or reliability-based capital spending needs to be undertaken for both monetary and reputational reasons. Beyond these buckets, free cash flow will generally be harvested from Exelon Generation to fund investment in the utilities, to invest in contracted assets meeting required return thresholds, and to return capital to shareholders by retiring debt, repurchasing shares, or increasing the dividend. To that end, the company announced the expectation of annual dividend increases of at least 2.5% beginning in June of 2016.

The Merger

In April 2014, Exelon Corp. (EXC) announced the acquisition of PEPCO Holdings, Inc. (POM). EXC management saw an opportunity to expand their regulated footprint and growth profile, all while derisking the overall business profile. The transaction provided for a nearly 40% increase in ratebase upon closing, with greater than 8% rate base growth from 2015 through 2018. The higher mix of regulated earnings instantly improves credit metrics and the risk profile of the combined company. The management team post merger will be the same as Exelon Corp’s current management team. Chris Crane will remain as Chairman and CEO, Jack Thayer will remain as CFO. With regards to the leadership at each individual utility, in particular the legacy PEPCO Holdings, Inc subsidiaries, the leadership has not yet been announced.

Atlantic City Electric	NJ	Electric	$1,700	50.0%	9.75%

Source: Company Filings, SEC Filings, Barclays Research

Note: values are for 2015 for legacy Exelon utilities and 2014 for legacy PHI utilities.

Illinois

Commonwealth Edison is the largest regulated jurisdiction for Exelon, accounting for approximately 35% of the post merger rate base. The Illinois regulatory environment has been an issue in the past, but is improving. The Energy Infrastructure Modernizaton Act, passed in 2011, cleared the way for a formulaic rate recovery mechanism in Illinois. This formulaic rate plan has made filings and recovery of capital spending much more consistent. This consistency has a price associated with it as the allowed ROE is set at 580 basis points above the 30 year US Treasury Bonds, currently implying an 8.82% allowed ROE. This ROE is lower than most states, but the ability to earn the allowed ROE exists and has been accomplished over the past several years. When interest rates rise, the allowed ROE will also rise providing automatic benefits to Exelon.

Maryland

Maryland will become the second largest regulatory jurisdiction for Exelon as Baltimore Gas and Electric and PEPCO Maryland will account for 24% of the post merger rate base (excluding Delmarva Power and Light's Maryland operations). Maryland has been a challenging regulatory environment as both utilities earned ROEs have fallen over 250bps below their allowed levels. Currently allowed ROE's are in the mid to upper 9% range while earned returns have been in the 5-7% range depending on the jurisdiction. Recently settlements have been reached in cases and allowed returns have been slowly improving. Significant effort and the likelihood of annual rate filings will be need to close the earned to allowed ROE gap. However, following the PHI acquisition, increased operating efficiencies gained through scale should help to narrow this earnings gap.

Pennsylvania

Philadelphia Electric Company (PECO) represents 21% of the post merger rate base and is clearly the top regulatory climate in which Exelon operates. Allowed and earned ROEs top 10%. The PA jurisdiction has consistently earned the best return among the Exelon regulated subsidiaries. A recent filing was made with a request for a 10.95% ROE as well as a request for a distribution investment surcharge (DISC) which reduces regulatory lag, as set levels of investment are tracked into rates. Exelon expects to file in Pennsylvania for rates on a more regular basis going forward but this is likely every other year rather than the annual filings other jurisdictions will experience.

New Jersey, District of Columbia and Delaware

Outside of Maryland, the legacy PEPCO Holdings, Inc utilities represent less than 8% of post-merger rate base in each of these jurisdictions. Delaware has been the best of these three jurisdictions with allowed ROE of 9.75% and an earned ROE in the 8% range, while DC and New Jersey have allowed ROE's of 9.75% and 9.36% respectively with earned returns in the mid 5-6% range. These have been difficult jurisdictions historically and Exelon will need to make annual filings in an attempt to improve the regulatory treatment of these utilities. The good news is there is good earnings leverage to narrowing the allowed versus earned ROE gap, The bad news is PEPCO Holdings, Inc. was unable to make any real strides in narrowing this gap.

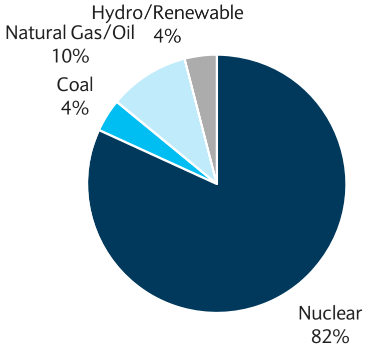
Accretion/Synergies

Exelon assumes that they will be able to achieve $0.20 of accretion by 2020. The near-term profile is $0.05 dilution in 2016, flat accretion/dilution in 2017, $0.10 of accretion in 2018 and $0.18 of accretion in 2019. The accretion over time is premised on reducing the allowed to earned ROE gap at the legacy PHI utilities. Currently the PHI utilities in aggregate are earning below 6%, the expectation is for these utilities to improve to the 8% ROE level by 2020. The corporate overhead should be relatively easy to reduce as duplication of services, building consolidation, and interest savings are all straight forward exercises. These benefits will accrue over time and the company will likely update these synergies within the first year to 2 post merger close.

Exelon Generation

Exelon Generation has among the lowest-emitting fleets in the nation with two-thirds of capacity and 85% of energy produced from non-emitting sources. This positions the fleet well for the alphabet soup of EPA regulations either in place or expected to be put into place in the future (MATS, CSAPR, CPP). This clean power fleet is able to comply with necessary laws without any significant capital investment that other generators are facing. Additionally, to the extent that the Clean Power Plan (CPP) is implemented per schedule, any benefit of carbon pricing on a regional or national level will disproportionately benefit Exelon as compared to their peers.

Figure 3
EXELON 2014 GENERATION PRODUCTION BY FUEL SOURCE



Source: Company filings, Barclays Research, Exelon Generation earns revenues from several sources. The first revenue source is simply from traditional energy sales, that is selling MWhrs to customers either on a wholesale or retail basis. The second revenue source is capacity payments in New England through the LCAP process and in PJM through the RPM process. In addition to these revenue sources, Exelon generation earns revenues through their Power New Business and Non-Power new Business segments which are accounted for separately. Exelon projects all of these revenues on a current and forward basis as gross margin (Revenue less Fuel and Purchased Power). In general, Exelon discloses a range of Open Gross Margin that is reflective of current hedged positions, current market prices and expectations of executed non-power margins combined with Power and Non-Power New Business. The hedging profile for Exelon Generation is done on a pro rata basis with the expectation of 95% or more of generation hedged for the current year, 55-65% hedged for year 2 and 30-40% hedged for year 3. Recently Exelon has been running slightly behind the hedging plan as they feel power prices are suppressed.

As mentioned, capacity prices and energy prices are the true drivers for Exelon Generation. Current views are for capacity prices to remain relatively flat for the 2018/2019 RPM auction for 2019/2020. Energy prices should also be biased to the upside as plant closures and increased volatility and risk should filter into forward prices. As the power sector becomes more consolidated, the remaining players should better understand the market leading to improved pricing for both capacity and energy as players focus more on operations and reliability and away from market share or protecting cash returns. This phenomenon should ultimately benefit all generators, resulting in higher gross margins over time. The flip side to this argument is that higher renewable generation and increased transmission capacity allows for low variable cost generation (wind and solar) to ultimately suppress real time prices at any given hour. This is clearly occurring; however it is more of a real time pricing issue than one that shows up in the forward curves at this point in time.

Federal and state regulation can have significant impacts on the capacity and energy prices impacting Exelon. The major issues currently facing the industry and Exelon are the MATS rule, which was recently remanded back to the DC circuit court from the Supreme Court, the ozone rule, and more importantly the Clean Power Plan (CPP) has become law and was recently upheld by District Court in Washington DC. These rules have largely impacted coal plants by either requiring expensive capital investments or ultimately forcing units to close. The CPP is likely to take this a step further as coal is the largest contributor on a MWhr basis to CO2 production. Whether the CPP results in a price for CO2 allowances or simply requires coal plant closures, power prices should increase and Exelon will benefit. At this point given the expected compliance date of 2022 for the CPP, no benefit is in our numbers for Exelon. Finally on the state front, Illinois is still examining legislation to provide payments for clean power. The timing and form that this payment could take is uncertain at this point. New York is also examining a framework for clean energy and where nuclear fits in given the environmental and economic benefits these plants provide to the state. At risk nuclear plants, Clinton, Nine Mile Point, Quad Cities and Byron will all have their fates decided this fall. Currently, Clinton and Quad Cities are most at risk for closure given economics. Clinton dispatches in MISO, while Quad Cities dispatches into a zone with significant wind resources. These dispatch zones have suppressed energy pricing which impairs the revenue generation from these plants. Capacity pricing helps but, generally is not enough to overcome the weak energy pricing. Byron dispatches at a slight discount to NI-Hub pricing and is challenged economically; however not to the same level as Clinton and Quad Cities. The schedule for deciding upon plant closure is fluid given changes in capacity markets and the potential impacts of the CPP. The potential future earnings associated with closure could be higher or lower depending on how the reduction in capacity impacts energy markets along with any carbon pricing that may occur as a result of the Clean Power Plan.

Senior Management Team

Christopher Crane

Chairman and CEO

Christopher Crane is Chairman and CEO of Exelon Corp. Crane was also Chairman and CEO of Exelon Corp. prior to the acquisition of PEPCO Holdings, Inc. He has held those positions since 2012. He joined Exelon Corp in 1998 and has held the roles of Chief Nuclear Officer, Chief Operating Officer, Generation and Chief Operating Officer, Exelon, as well as President of Generation and President of Exelon. Prior to joining Exelon, he served as Browns Ferry site vice president for Tennessee Valley Authority and worked in new plant start-up at the Comanche Peak Nuclear Power Plant and Palo Verde Nuclear Generating Station.

Jonathan (Jack) W. Thayer

Senior Executive Vice President and CFO

Jack Thayer has been Senior Executive Vice President and CFO since 2012. He joined Exelon as a part of the merger with Constellation Energy, where he held the roles of Senior Vice President and CFO. Prior to those roles he served as Treasurer, Vice President and Managing Director, Corporate Strategy & Development, and Director, Investor Relations for Constellation Energy. He also held financial positions at Deutsche Bank Securities Inc. and SBS Warburg Dillon Read Inc.

William A. Von Hoene, Jr.

Senior Executive Vice President and Chief Strategy Officer

Mr Von Hoene has been Senior Executive Vice President and Chief Strategy Officer since 2012. He Joined Exelon in 2002 and was Executive Vice President, Finance and Legal from 2009-2012 among other positions. Prior to joining Exelon, he was a senior partner at Jenner & Block.

Valuation Methodology

Our $39 target is a sum of the parts valuing the utilities on a PE basis and Exelon Generation on an EV/EBITDA multiple. The utilities are valued on a group average PE multiple of 15.5x on 2018 earnings (adjusted for parent debt associated with the PHI acquisition). The utility net parent earnings for 2018 are $1.53, applying a 16.3x multiple yields $23.65 in value. Exelon Generation is valued at 6.5x EBITDA less debt. The 2018 EBITDA is based on forwards as of 12/31/2015, company assumptions for new business and hedged levels adjusted for the RPM transitional auctions. This led us to a 2018 EBITDA of approximately $3.01B taking off associated debt yields a valuation of $14.00 at 6.5x EBITDA. Combined we end up with a $39 target.

There are several key risks to the valuation analysis. First is power markets continue to weaken based on oversupply. Second is that regulatory outcomes are contentious, providing for both lower earned and allowed ROE’s. Third is that merger synergies and accretion are not realized, or take longer to realize than company projections. Finally, an aging nuclear fleet, while operating on a world class level may experience age related degradation that could impair operation and/or capital needs.

ANALYST(S) CERTIFICATION(S):

I, Daniel Ford, CFA, hereby certify (1) that the views expressed in this research report accurately reflect my personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

IMPORTANT DISCLOSURES

Barclays Research is a part of the Investment Bank of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays"). Where any companies are the subject of this research report, for current important disclosures regarding those companies please send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 13th Floor, New York, NY 10019 or refer to http://publicresearch.barclays.com or call 212-526-1072.

The analysts responsible for preparing this research report have received compensation based upon various factors including the firm's total revenues, a portion of which is generated by investment banking activities.

Analysts regularly conduct site visits to view the material operations of covered companies, but Barclays policy prohibits them from accepting payment or reimbursement by any covered company of their travel expenses for such visits.

Exelon Corp. (EXC, 23-Mar-2016, USD 34.72), Overweight/Neutral, A/CD/CE/D/E/J/K/L/M

Disclosure Legend:

A: Barclays Bank PLC and/or an affiliate has been lead manager or co-lead manager of a publicly disclosed offer of securities of the issuer in the previous 12 months.

B: An employee of Barclays Bank PLC and/or an affiliate is a director of this issuer.

CD: Barclays Bank PLC and/or an affiliate is a market-maker in debt securities issued by this issuer.

CE: Barclays Bank PLC and/or an affiliate is a market-maker in equity securities issued by this issuer.

D: Barclays Bank PLC and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

E: Barclays Bank PLC and/or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer within the next 3 months.

F: Barclays Bank PLC and/or an affiliate beneficially owned 1% or more of a class of equity securities of the issuer as of the end of the month prior to the research report's issuance.

GD: One of the analysts on the fundamental credit coverage team (or a member of his or her household) has a financial interest in the debt or equity securities of this issuer.

GE: One of the analysts on the fundamental equity coverage team (or a member of his or her household) has a financial interest in the debt or equity securities of this issuer.

H: This issuer beneficially owns 5% or more of any class of common equity securities of Barclays PLC.

I: Barclays Bank PLC and/or an affiliate has a significant financial interest in the securities of this issuer.

J: Barclays Bank PLC and/or an affiliate is a liquidity provider and/or trades regularly in the securities of this issuer and/or in any related derivatives.

K: Barclays Bank PLC and/or an affiliate has received non-investment banking related compensation (including compensation for brokerage services, if applicable) from this issuer within the past 12 months.

L: This issuer is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

M: This issuer is, or during the past 12 months has been, a non-investment banking client (securities related services) of Barclays Bank PLC and/or an affiliate.

N: This issuer is, or during the past 12 months has been, a non-investment banking client (non-securities related services) of Barclays Bank PLC and/or an affiliate.

O: Barclays Capital Inc., through Barclays Market Makers, is a Designated Market Maker in this issuer's stock, which is listed on the New York Stock Exchange. At any given time, its associated Designated Market Maker may have "long" or "short" inventory position in the stock; and its associated Designated Market Maker may be on the opposite side of orders executed on the floor of the New York Stock Exchange in the stock.

P: A partner, director or officer of Barclays Capital Canada Inc. has, during the preceding 12 months, provided services to the subject company for remuneration, other than normal course investment advisory or trade execution services.

Q: Barclays Bank PLC and/or an affiliate is a Corporate Broker to this issuer.

R: Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12

IMPORTANT DISCLOSURES CONTINUED

months.

S: Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

T: Barclays Bank PLC and/or an affiliate is providing equity advisory services to this issuer.

U: The equity securities of this Canadian issuer include subordinate voting restricted shares.

V: The equity securities of this Canadian issuer include non-voting restricted shares.

W: Barclays Bank PLC and/or an affiliate should be assumed to be an actual beneficial owner of 1% or more of all the securities (including debt securities) of this issuer as of the end of the month prior to the research report's issuance.

Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

Stock Rating

Overweight - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Equal Weight - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Underweight - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Rating Suspended - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Industry View

Positive - industry coverage universe fundamentals/valuations are improving.

Neutral - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

Negative - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

North America Power & Utilities

AES Corp. (AES)	Alliant Energy (LNT)	Ameren Corp. (AEE)
American Electric Power (AEP)	American States Water Company (AWR)	American Water Works (AWK)
Aqua America (WTR)	Brookfield Infrastructure Partners LP (BIP)	Brookfield Infrastructure Partners LP (BIP_u.TO)
Brookfield Renewable Energy Partners LP (BEP)	Brookfield Renewable Energy Partners LP (BEP_u.TO)	Calpine Corp. (CPN)
Canadian Utilities Ltd. (CU.TO)	CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)
Consolidated Edison (ED)	Dominion Resources (D)	DTE Energy (DTE)
Duke Energy (DUK)	Dynegy Inc. (DYN)	Edison International (EIX)
Emera Inc. (EMA.TO)	Entergy Corp. (ETR)	Eversource Energy (ES)
Exelon Corp. (EXC)	FirstEnergy Corp. (FE)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	ITC Holdings (ITC)
National Grid Plc (NG.L)	National Grid Plc (NGG)	NextEra Energy (NEE)
NextEra Energy Partners, LP. (NEP)	NiSource, Inc. (NI)	NRG Energy (NRG)
NRG Yield Inc. (NYLD)	OGE Energy Corp. (OGE)	Ormat Technologies (ORA)
Pepco Holdings (POM)	PG&E Corp. (PCG)	Pinnacle West Capital (PNW)
PNM Resources (PNM)	Portland General Electric Co. (POR)	PPL Corporation (PPL)
Public Service Enterprise Gp (PEG)	SCANA Corp. (SCG)	Sempra Energy (SRE)
Southern Co. (SO)	Talen Energy Corp. (TLN)	TECO Energy (TE)

Distribution of Ratings:

Barclays Equity Research has 1860 companies under coverage.

41% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 61% of companies with this rating are investment banking clients of the Firm.

40% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 51% of companies with this rating are investment banking clients of the Firm.

15% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 42% of companies with this rating are investment banking clients of the Firm.

Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

Top Picks:

Barclays Equity Research's "Top Picks" represent the single best alpha-generating investment idea within each industry (as defined by the relevant "industry coverage universe"), taken from among the Overweight-rated stocks within that industry. Barclays Equity Research publishes global and regional "Top Picks" reports every quarter and analysts may also publish intra-quarter changes to their Top Picks, as necessary. While analysts may highlight other Overweight-rated stocks in their published research in addition to their Top Pick, there can only be one "Top Pick" for each industry. To view the current list of Top Picks, go to the **Top Picks** page on Barclays Live (https://live.barcap.com/go/keyword/TopPicksGlobal).

To see a list of companies that comprise a particular industry coverage universe, please go to http://publicresearch.barclays.com.

K: Barclays Bank PLC and/or an affiliate has received non-investment banking related compensation (including compensation for brokerage services, if applicable) from Exelon Corp. within the past 12 months.

L: Exelon Corp. is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

M: Exelon Corp. is, or during the past 12 months has been, a non-investment banking client (securities related services) of Barclays Bank PLC and/or an affiliate.

Valuation Methodology: Our $39 price target is premised upon a 2018 group average multiple of 16.3x applied to the utility net parent earnings of $1.53 resulting in $25 of utility value. Exgen is valued at 6.5x 2018 EBTIDA netted against debt resulting in $14 of value for Exgen, The combined value is $39.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: The major risks for the utility are regulatory outcomes given the multiple regulatory districts combines with the expectation of reducing regulatory lag. For Exgen the major risks are commodity price, supply rationalization or lack thereof and unplanned outages.

The Guggenheim Daily Transmission

The Guggenheim Daily Transmission: EXC, DYN, ES, SO, CPP, FERC March 23, 2016

SHAHRIAR POURREZA, CFA ANALYST
212 518 5862
shahriar.pourreza@guggenheimpartners.com

What's New?

NOTE: Guggenheim Utility Corporate Access Calendar updated below – scroll to bottom of email. "TBAs" to be filled in shortly but all companies listed below are confirmed and more are expected to be added.

Guggenheim initiates coverage of IPPs – Boom-Bust: Forget Mid Cycle – Focus on Asset Lives and Cash Flows….Launching on IPPs with Cautious Tone but See Opportunities

2016 Outlook: Liking Utilities but Choose Wisely with a Return to Stock Picking

EXC – DC Commission Meeting; we highlight possible scenarios
DYN – MISO approves DYN announced retirement of IL coal plant
CPP – EPA Administrator provides an update to Clean Power Plan
FERC – FERC will have technical conference to address transmission cost-capped bids
EXC – Per merger agreement, POM files rate case in NJ
ES – FERC issues initial ROE decision
SO – CA regulators approve transfer of ownership for GAS acquisition

EXC – DC Commission Meeting; we highlight possible scenarios

- The DC Commission has EXC's merger case scheduled for 1 PM ET on March 23.

Guggenheim takeaway: *The DC Commission could choose from one of six options, but we believe some are more likely than others. There is a strong likelihood, in our view, that they could reject the deal again since there is no consensus among parties on settlement conditions. With or without POM, we are indifferent to the deal and remain strong supporters despite the outcome (SEE NOTE HERE).*

DYN – MISO approves DYN announced retirement of IL coal plant

- DYN announced in November 2015 that it would retire Wood River, a 473 MW plant in IL in June 2016.
- Retirement decision was due to the plant not clearing MISO's '15/'16 auction coupled with additional environmental compliance spending from EPA's ELG rule.
- MISO's reliability study determined that DYN has the option to close on the requested June 1 date without negatively impacting reliability.

Guggenheim takeaway: *The reliability study was the last test before DYN could make permanent plans to shut down the plant. We note that environmental costs for ELG have decreased since DYN's YE review and that these costs coupled with MISO's capacity auction are major determinants on whether a coal plant will retire sooner than planned.*

CPP – EPA Administrator provides an update to Clean Power Plan

- U.S. EPA Administrator Gina McCarthy provided an update on the status of CPP during the Energy and Water subcommittee meeting.
- McCarthy said 25 states have indicated publicly that they will continue to plan for the rule despite the Supreme Court's stay.
- The 25 states include those that have reached out to the agency or are working with regional entities for compliance.
- EPA is not enforcing the rule, but will be available if the states ask for help.

Guggenheim takeaway: *As we have highlighted in our research, we believe utilities and certain state commissions will continue to plan for the CPP. While the stay could impact NT planning for states to submit SIPs, we believe the CPP will have tailwinds if it winds up at the Supreme Court. See here for our takeaways on potential paths for the CPP.*

FERC – FERC will have technical conference to address transmission cost-capped bids

- FERC found that a declaratory order is not the appropriate means for addressing policy issues and will open a technical conference "related to the potential benefits of cost containment proposals for transmission development projects."
- Bidders are required under FERC Order 100 to specify the full revenue requirement for the life of the transmission project.
- On June 27-28 FERC and stakeholders will "discuss issues related to competitive transmission development processes, including but not limited to use of cost containment provisions, the relationship of competitive transmission development to transmission incentives, and other ratemaking issues."

Guggenheim takeaway: *We believe conversations on transmission rates could be constructive as there have been active debate on how winners selected have likely been the lowest bidders and not the incumbent utility. The RTO evaluates bids based on the revenue requirement of a project, which is driven primarily by a rate construct determined by FERC.*

EXC – Per merger agreement, POM files rate case in NJ

- POM (NC, $21.24) filed a rate case for its NJ Utility Atlantic City Electric Co. for a $78.9mm rate increase and 10.60% ROE as well as a separate 5-year grid resiliency plan.
- POM notes that "rate application does not include the benefits that will be provided by the pending merger with Exelon, which would include cost savings as a result of greater efficiencies from the merged company."

Guggenheim takeaway: *Although POM is now able to file for rate cases with the DE, MD, and NJ Commissions, we believe POM will continue to be a material under-earner since it has been out a rate case since 2014. As we highlighted in our research, POM is already prepared to file for rate cases earlier in 2016 for DE, MD, and NJ, followed by a DC (delay due to pending settlement with the Commission), the rate case will still take 9-12 months to be approved. We estimate downside to POM stock could be another $4-5 based on a 13-14x range multiple on 2018 consensus earnings estimates, which are very stale. See here for our takeaways.*

ES – FERC issues initial ROE decision

- FERC has issued an initial decision in the 2nd (EL13-33-002) and 3rd (EL14-86-000) ISO-NE ROE complaint dockets, agreeing the existing ROE is unjust and unreasonable; however, also agreeing with transmission owners that the base ROE should be set halfway between the midpoint and upper-end of the IBES-based DCF zone of reasonableness.

- The ALJ recommends a base ROE of 9.59% for the 2nd period with a ceiling of 10.42%, and a base ROE of 10.90% for the 3rd period with a ceiling of 12.19%.

Guggenheim takeaway: *The ALJ's initial decision notes similar capital market conditions existed in the first 206 complaint period, which distorted inputs to the DCF model; alternative methodologies would show the midpoint of the DCF range of reasonableness would not be adequate. Therefore, the ALJ finds that mechanically applying the DCF methodology would not be appropriate, and recommends an upward adjustment from the midpoint of the zone of reasonableness – a positive takeaway for ES, particularly if the 10.90-12.19% ROE recommended for the 3rd period is applied going forward.*

SO – CA regulators approve transfer of ownership for GAS acquisition

- The CPUC approved the transfer of ownership of Central Valley Gas Storage from AGL Resources (GAS, NC, $64.97) to SO.
- The transfer is part of SO's pending acquisition of AGL.

Guggenheim takeaway: *SO is going through the usual regulatory approval processes for a utility acquisition, and we do not see any red flags. The transaction has been approved in VA, settlement filed in MD, and requests have been filed in GA, IL, and NJ; management expects to receive necessary approvals by 3Q16. We estimate this transaction could be 6-7% accretive in outer years. See here for our analysis on this transaction.*

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

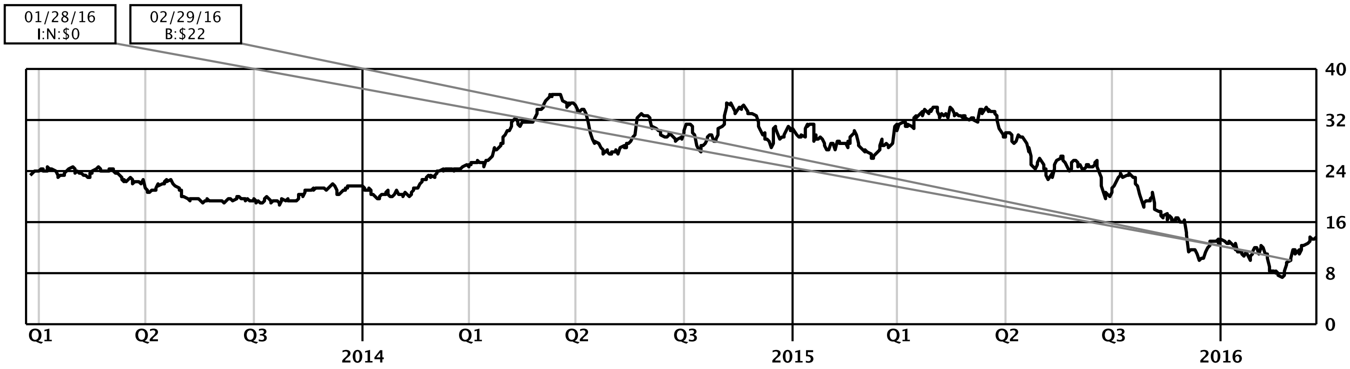
IMPORTANT DISCLOSURES

The research analyst(s) and research associate(s) have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenues, which includes investment banking revenues.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from Dynegy Inc., Eversource Energy, Exelon Corporation and Southern Company in the next 3 months.

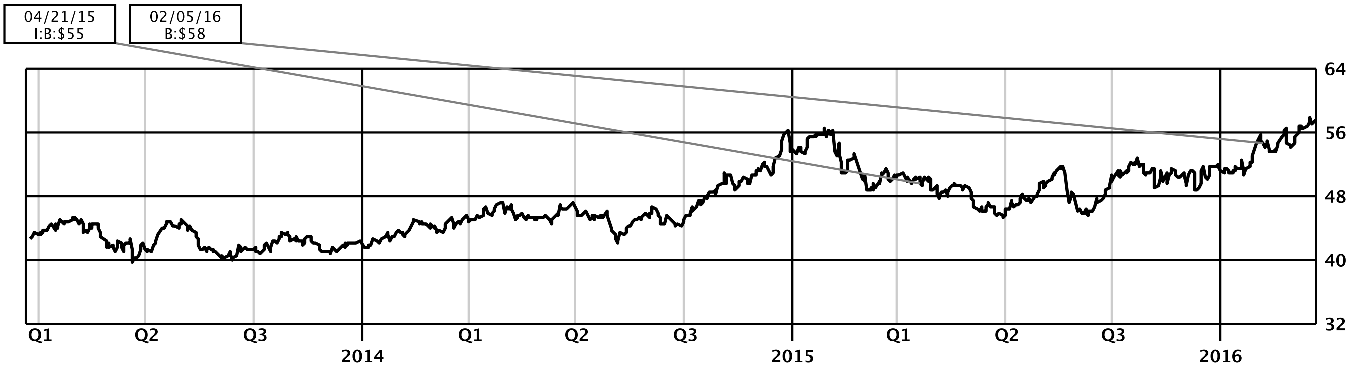
Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: Dynegy Inc. (DYN) as of 03-22-2016



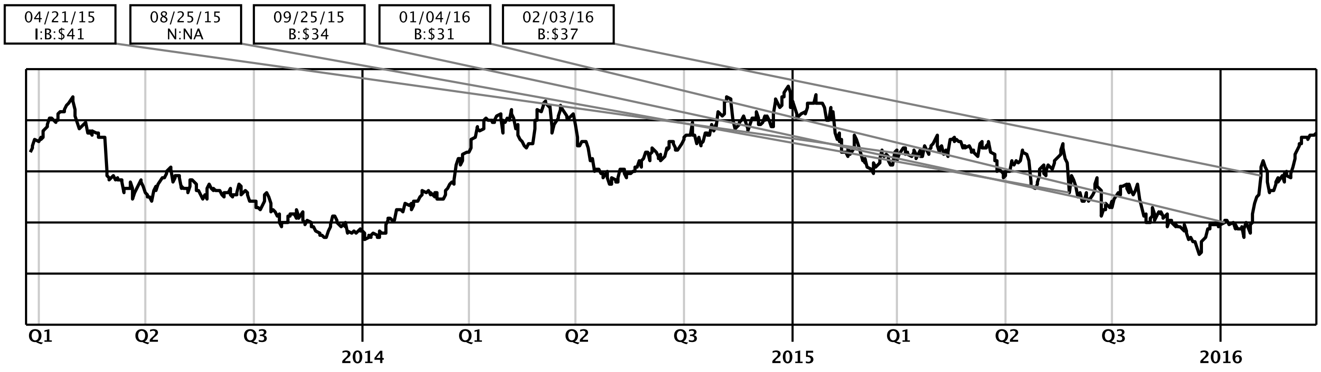
Created by BlueMatrix

Rating and Price Target History for: Eversource Energy (ES) as of 03-22-2016



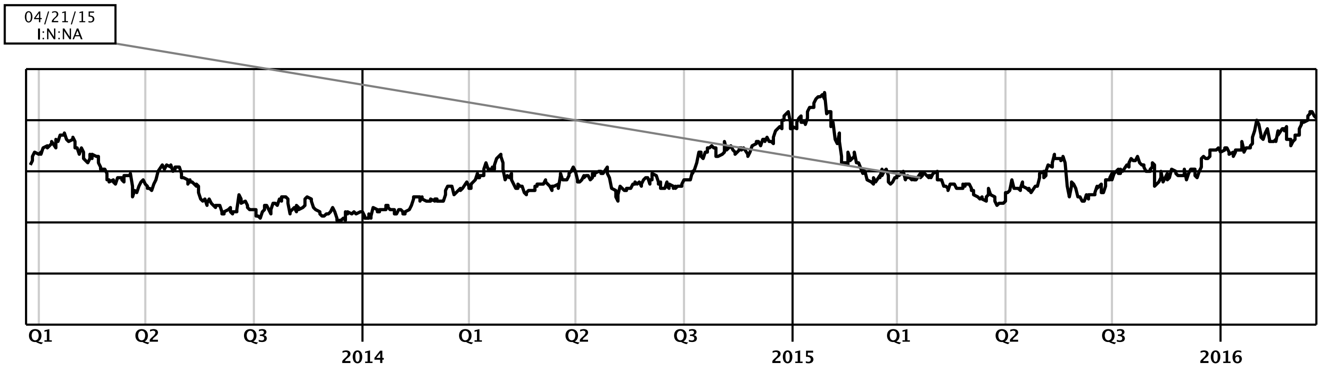
Created by BlueMatrix

Rating and Price Target History for: Exelon Corporation (EXC) as of 03-22-2016



Created by BlueMatrix

Rating and Price Target History for: Southern Company (SO) as of 03-22-2016



Created by BlueMatrix

RATING DEFINITIONS

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 10% or minus 10% within a 12-month period. No price target is assigned.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Restricted - Describes issuers where, in conjunction with Guggenheim Securities, LLC engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Prior to 12/8/14, Guggenheim Securities, LLC’s BUY, NEUTRAL, and SELL ratings definitions were as follows (no other ratings definitions were changed):

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 15% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 15% or more within a 12-month period.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgment. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conduct an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities’ research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

TACTICAL TRADING IDEA DISCLAIMER

Guggenheim Securities, LLC produces "Tactical Trade Ideas" that identify short-term, catalyst-driven trading opportunities impacting companies within the Firm’s coverage universe. Tactical Trade Ideas may exist on companies in this report and may be contrary to the analyst’s published rating.

Sarah Akers, CFA, Senior Analyst (314) 875-2040

Sector Rating: Energy Team, NA

Quick thoughts from Wells Fargo Securities, LLC Energy & Utility Team:

Utilities

One Down (Akers/Kalton) - Yesterday's (3/23) EXC/POM merger approval serves as another reminder that things are not always what they seem when it comes to the regulatory arena. Regulators and other key constituents often throw up numerous red flags and disperse discouraging rhetoric into the public domain...and sometimes, as in the EXC/POM case (and Iberdrola/UIL), initially deny the deal. That said, investors are generally unwise to take the circus at face value, in our view, given the tendency for all stakeholders to posture in an effort to extract the most value for their constituents.

Had EXC/POM not gained D.C. approval, customers and regulators would have been left with a company diminished by a 2-year merger process and with significant needs for customer rate increases (and no merger credits) - not to mention the frequently criticized, albeit improved, service quality. That's not to say that logic will always prevail. In Hawaii, for example, we think the proposed NEE/HE deal offers clear benefits to customers and to the advancement of the state's clean energy goals. That said, the provincial nature of the state may outweigh what we would call the logical case (we still put deal approval probability at 50%).

Yesterday's EXC/POM approval order could also have implications on deal activity going forward. If deals are denied, prospective sellers and buyers may think twice before going down the M&A path. In particular, management teams could use failed deals as a reason to discourage the Board from entertaining/exploring strategic alternatives. Not that the 2-year EXC/POM saga was a shining green light for potential players, but the final outcome means something. Investors and companies should have more evidence shortly as Texas is expected to vote on a conditional approval order in the Oncor acquisition later today (will the terms be kosher with the Hunt-led consortium?) and Louisiana could rule on the "in jeopardy" CNL deal as early as Monday (3/28). Merger mania continues...

All estimates/forecasts are as of 03/24/16 unless otherwise stated.

Exelon Corporation (EXC-NYSE)
Price as of 3/23/2016: $34.72
FY 16 EPS: $2.55
FY 17 EPS: $2.75
Shares Out.: 861.2 MM
Market Cap.: $29,900.86 MM

Pepco Holdings, Inc. (POM-NYSE)
Price as of 3/23/2016: $26.93
FY 16 EPS: $1.05
FY 17 EPS: $1.15
Shares Out.: 253.6 MM
Market Cap.: $6,829.45 MM

NextEra Energy, Inc. (NEE-NYSE)
Price as of 3/23/2016: $117.69
FY 16 EPS: $6.15
FY 17 EPS: $6.50
Shares Out.: 460.5 MM
Market Cap.: $54,196.24 MM

Hawaiian Electric Industries, Inc. (HE-NYSE)
Price as of 3/23/2016: $31.89
FY 16 EPS: $1.69
FY 17 EPS: $1.80
Shares Out.: 107.4 MM
Market Cap.: $3,424.99 MM

Rating Basis Information:
EXC Thesis: Our Outperform rating is largely premised on our belief that the share price undervalues ExGen's nuclear fleet. Other positive features include above average utility rate base growth prospects and strong nuclear operational track record.

POM Thesis: We are attracted to POM's regulated growth opportunities and relatively high concentration of transmission earnings. Our Market Perform rating reflects valuation considerations given our belief that the pending acquisition by EXC for $27.25/sh will be approved and close during 1H'16.

NEE Thesis: Shares offer attractive total return potential driven by projected annual EPS growth of 6% and roughly 8% projected annual DPS growth. Positive attributes include an attractive regulated utility franchise and a leadership position in renewable development.

HE Thesis: Our neutral rating reflects our assessment that the pending merger withý NEE has a 50% chance of bein completed.

Wells Fargo Securities, LLC maintains a market in the common stock of Hawaiian Electric Industries, Inc., Pepco Holdings, Inc., Exelon Corporation, NextEra Energy, Inc.
Wells Fargo Securities, LLC or its affiliates managed or comanaged a public offering of securities for NextEra Energy, Inc., Exelon Corporation within the past 12 months.
Wells Fargo Securities, LLC or its affiliates intends to seek or expects to receive compensation for investment banking services in the next three months from Exelon Corporation, NextEra Energy, Inc., Pepco Holdings, Inc., Hawaiian Electric Industries, Inc.
Wells Fargo Securities, LLC or its affiliates received compensation for investment banking services from NextEra Energy, Inc., Exelon Corporation in the past 12 months.
Wells Fargo Securities, LLC and/or its affiliates, have beneficial ownership of 1% or more of any class of the common stock of NextEra Energy, Inc., Hawaiian Electric Industries, Inc.
NextEra Energy, Inc., Exelon Corporation currently is, or during the 12-month period preceding the date of distribution of the research report was, a client of Wells Fargo Securities, LLC. Wells Fargo Securities, LLC provided investment banking services to NextEra Energy, Inc., Exelon Corporation.
Hawaiian Electric Industries, Inc., Pepco Holdings, Inc. currently is, or during the 12-month period preceding the date of distribution of the research report was, a client of Wells Fargo Securities, LLC. Wells Fargo Securities, LLC provided noninvestment banking securities-related services to Hawaiian Electric Industries, Inc., Pepco Holdings, Inc.
Wells Fargo Securities, LLC received compensation for products or services other than investment banking services from Pepco Holdings, Inc., Hawaiian Electric Industries, Inc. in the past 12 months.
Wells Fargo Securities, LLC or its affiliates has a significant financial interest in Hawaiian Electric Industries, Inc., Pepco Holdings, Inc., Exelon Corporation, NextEra Energy, Inc.
Wells Fargo Securities, LLC or its affiliates intends to seek or expects to receive compensation for investment banking services in the next three months from an affiliate of NextEra Energy, Inc., Exelon Corporation, Pepco Holdings, Inc.
Wells Fargo Securities, LLC or its affiliates managed or co-managed a public offering of securities for an affiliate of Exelon Corporation, NextEra Energy, Inc. within the past 12 months.
Wells Fargo Securities, LLC or its affiliates received compensation for investment banking services from an affiliate of NextEra Energy, Inc., Exelon Corporation in the past 12 months.

EXC: Risks include commodity price sensitivity and unfavorable regulatory/policy developments.
POM: Risks include the ability to secure merger regulatory approvals and regulatory risks associated with pending/upcoming rate filings.
NEE: Risks include the ability to deliver on wind development plans, FL economic and regulatory concerns and commodity price risk.
HE: Risks to our valuation include failure to secure the necessary regulatory approvals for the pending transaction, regulatory risks from being a single state regulated utility and distributed generation as well as interest rate risk at the bank and utility.

Wells Fargo Securities, LLC does not compensate its research analysts based on specific investment banking transactions. Wells Fargo Securities, LLC's research analysts receive compensation that is based upon and impacted by the overall profitability and revenue of the firm, which includes, but is not limited to investment banking revenue.

STOCK RATING

1 = Outperform: The stock appears attractively valued, and we believe the stock's total return will exceed that of the market over the next 12 months. BUY
2 = Market Perform: The stock appears appropriately valued, and we believe the stock's total return will be in line with the market over the next 12 months. HOLD
3 = Underperform: The stock appears overvalued, and we believe the stock's total return will be below the market over the next 12 months. SELL

SECTOR RATING

O = Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.
M = Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.
U = Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

VOLATILITY RATING

V = A stock is defined as volatile if the stock price has fluctuated by +/-20% or greater in at least 8 of the past 24 months or if the analyst expects significant volatility. All IPO stocks are automatically rated volatile within the first 24 months of trading.

As of: March 24, 2016

Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs, and generate large profits, even with currently depressed power prices.
- Higher natural gas and coal prices, rising electricity demand, and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.
- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.
- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow-moat distribution earnings.
- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

Exelon and Pepco Join to Sing a Duet: At Last

Travis Miller, Sector Director, 24 March 2016

Investment Thesis

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and Pepco Holdings in 2016 for $12 billion, both including debt. The Pepco deal took nearly two years to close as Exelon waded through the regulatory approval process. Management's commitment to keep the deal alive shows its conviction in Exelon's strategic move to add more regulated earnings.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our projections for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups, and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can increase earnings by 10% annually over the next three years.

Travis Miller, Sector Director, 24 March 2016

Analyst Note

We are reaffirming our $35 fair value estimate, narrow moat rating, and stable moat trend rating for Exelon after Washington, D.C., regulators approved its acquisition of Pepco with a 2-1 vote on Wednesday afternoon. The companies closed the acquisition following the vote, nearly two years after initially announcing the deal. Pepco stock will no longer trade as of March 24.

For Exelon, we have already incorporated $1 per share of value dilution into our fair value estimate, based on a 75% probability of the deal closing at Exelon's $27.25 per share cash offer. Using a 100% probability doesn't have a material impact on that dilution estimate.

We were confident that the management teams would negotiate until they received deal approval, even though the companies missed several self-imposed deadlines. The terms of the settlement in Washington, D.C., will benefit customers there, but they are too small to have a material impact on the $12 billion deal, including debt.

Economic Moat

Travis Miller, Sector Director, 24 March 2016

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat characteristics, with returns on capital above costs of capital for the foreseeable future. However, the spread between long-term returns on capital and Exelon's cost of capital has shrunk, based on our midcycle outlook for power prices in the eastern United States. Exelon's increasing diversification into narrow- and no-moat businesses, together with the shrinking returns at its nuclear generation business, supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Trailing Dividend Yield %	Forward Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★ 23 Mar 2016	34.72 USD 23 Mar 2016	35.00 USD	0.99	3.57 23 Mar 2016	3.57 23 Mar 2016	31.94 23 Mar 2016	Utilities - Diversified	Standard

Close Competitors	Currency (Mil)	Market Cap	TTM Sales	Operating Margin	TTM/PE
Public Service Enterprise Group Inc PEG	USD	23,402	10,415	28.44	13.99
FirstEnergy Corp FE	USD	15,243	15,026	15.25	26.25
Entergy Corp ETR	USD	13,947	11,513	-2.60	0.00

large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources, such as coal and natural gas, reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must retain access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns, as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs, or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Valuation

Travis Miller, Sector Director, 24 March 2016

We are reaffirming our $35 per share fair value estimate after Exelon closed its acquisition of Pepco Holdings at its $27.25 per share cash offer. We already included $1 per share of value dilution in our Exelon fair value estimate, based on the 30% premium that Exelon paid over our Pepco fair value estimate.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities, Illinois; Oyster Creek, New Jersey; and Three Mile Island, Pennsylvania--as well as the Clinton, Illinois, plant. We now assume a 50% probability that the Byron, Illinois, plant will retire, given that it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is 50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Our midcycle earnings forecast at Exelon Generation is based on a $4 per thousand cubic feet midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

We assume a 9% cost of equity and a 7.1% cost of capital. Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Risk

Travis Miller, Sector Director, 24 March 2016

Investors should pay the most attention to political developments that would reregulate competitive electricity markets in the Midwest and mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source.

As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket.

Reregulation would also destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.

As Exelon's regulated utilities generate a greater share of earnings, investors will be made more acutely subject to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management

Travis Miller, Sector Director, 24 March 2016

We assign Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities. President and CEO Chris Crane and executive chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition that closed in 2016. This increases Exelon's share of regulated utilities earnings and dilutes shareholders' exposure to wholesale power markets. Management showed strong conviction in the value of the deal based on their efforts to gain support for the deal through nearly two years of regulatory negotiations.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants in the absence of significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creative opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8 million shares or vested options as of January 2015.

Exelon and Pepco Join to Sing a Duet: At Last

Travis Miller, Sector Director, 24 March 2016

We are reaffirming our $35 fair value estimate, narrow moat rating, and stable moat trend rating for Exelon after Washington, D.C., regulators approved its acquisition of Pepco with a 2-1 vote on Wednesday afternoon. The companies closed the acquisition following the vote, nearly two years after initially announcing the deal. Pepco stock will no longer trade as of March 24.

For Exelon, we have already incorporated $1 per share of value dilution into our fair value estimate, based on a 75% probability of the deal closing at Exelon's $27.25 per share cash offer. Using a 100% probability doesn't have a material impact on that dilution estimate.

We were confident that the management teams would negotiate until they received deal approval, even though the companies missed several self-imposed deadlines. The terms of the settlement in Washington, D.C., will benefit customers there, but they are too small to have a material impact on the $12 billion deal, including debt.

Reaffirming Outlook for Now, but Politics Could Yank Cord Out From Exelon-Pepco

Travis Miller, Sector Director, 02 March 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after fissures opened in the settlement negotiations related to Washington, D.C., regulatory approval for the companies' proposed merger. As of midday Wednesday, Pepco was trading at a 10% discount to our fair value estimate and a 15% discount to Exelon's $27.25 per share cash offer price, both of which we think offer good return opportunities.

Our Pepco fair value estimate continues to include a 75% probability that the settling parties--including D.C. Mayor Muriel Bowser's office, the D.C. regulatory staff, the lead consumer advocate group, and the companies--will reach an agreement regulators will approve. We think the companies remain committed to the deal and will accept any final settlement terms regulators approve. The key points of contention appear to involve less than $100 million, an immaterial impact on the $6.8 billion deal value. However, we think the companies could be losing control over the outcome, and the deal could now be a proxy political fight among several D.C. entities. If we get more information that supports this theory, we would be inclined to cut our probability of the deal closing to 50%, leading to a $2 per share cut in Pepco's fair value estimate. We include $5 per share of incremental value in our fair value estimate for Pepco. A probability change is not likely to have a material impact on the $1 per share of value dilution we include in our Exelon fair value estimate related to the deal.

We continue to think Exelon management would be willing to go past its previously stated March 4 deadline if settlement negotiations move forward.

We are reaffirming our narrow moat and stable moat trend ratings for both companies.

The Never-Ending Exelon-Pepco Saga Gets Another Two Weeks of Life, but No Real Changes

Travis Miller, Sector Director, 29 February 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Washington, D.C., regulators again rejected Exelon's offer to acquire Pepco but left open an option for the companies to gain approval.

We still include $1 per share of value dilution in our fair value estimate for Exelon and $5 per share of incremental value for Pepco, based on a 75% probability that the companies will close the transaction at Exelon's $27.25 cash offer. We are reaffirming our narrow moat and stable moat trend ratings for both companies.

Even though Washington, D.C., regulators formally rejected the deal, we think the companies are committed enough to closing the deal that there is a good likelihood they will accept the terms set by regulators. The terms sap additional value from shareholders to benefit customers through rate refunds and benefits, limiting cost reductions, returning merger synergies to customers, and limiting recovery for some costs. However, the D.C. service territory is not big enough for the incremental lost value to have an impact on our valuation of the deal. The terms also set strict ringfencing provisions, but those are typical and don't have any impact on our valuations.

Exelon management had said they would terminate the deal if regulators did not approve it by March 4, but we don't think that date is sacred any longer, as regulators have said the companies have until March 11.

Pepco Reports In-Line 2015 Earnings; Exelon Believes D.C. Will Approve Merger by March 4

Charles Fishman, Eq. Analyst, 22 February 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Pepco reported in-line 2015 earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining the approval of the District of Columbia Public Service Commission and being completed following an agreement with D.C. Mayor Muriel Bowser that sweetened the benefits for customers and provided other benefits to the district.

Pepco Holdings or Exelon may terminate the merger agreement if the D.C. commission fails to issue a final order approving the merger without condition or modification of the terms of the settlement agreement by March 4. Exelon has made clear that if the D.C. commission does not approve the deal by March 4, it will terminate the agreement. However, Exelon's CEO recently said he believes D.C. will approve the transaction at its next meeting before the termination date.

Pepco reported 2015 adjusted operating earnings of $1.28, in line with our estimate and up from $1.27 per share in 2014. Earnings were favorably affected by rate increases due to infrastructure investment, partially offset by higher operation and maintenance expenses.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Supreme Court Validates Our View That Carbon Regulation Remains Highly Uncertain

Travis Miller, Sector Director, 11 February 2016

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court's decision comes as good news for coal miners that haven't had any for some time. However, we don't view today's announcement as a panacea for the coal industry's woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn't changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody's high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Exelon Surprises With 2.5% Dividend Growth Target

Travis Miller, Sector Director, 03 February 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Supreme Court Sides With Demand Response; No Fair Value Impacts

Andrew Bischof, CFA, Eq. Analyst, 25 January 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal

Travis Miller, Sector Director, 11 November 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the 2017-18 reduction was based on Pepco's

Exelon Corp EXC (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Trailing Dividend Yield %	Forward Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★ 23 Mar 2016	34.72 USD 23 Mar 2016	35.00 USD	0.99	3.57 23 Mar 2016	3.57 23 Mar 2016	31.94 23 Mar 2016	Utilities - Diversified	Standard

reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals

Travis Miller, Sector Director, 30 October 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year

Charles Fishman, Eq. Analyst, 26 October 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C. commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco

Charles Fishman, Eq. Analyst, 06 October 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners

Charles Fishman, Eq. Analyst, 30 September 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Morningstar Equity Research Methodology

Fundamental Analysis

At Morningstar, we believe buying shares of superior businesses at a discount and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are our primary focus. Occasionally, this approach causes our recommendations to appear out of step with the market, but willingness to be contrarian is an important source of outperformance and a benefit of Morningstar's independence. Our analysts conduct primary research to inform our views on each firm's moat, fair value and uncertainty.

Economic Moat

The economic moat concept is a cornerstone of Morningstar's investment philosophy and is used to distinguish high-quality companies with sustainable competitive advantages. An economic moat is a structural feature that allows a firm to sustain excess returns over a long period of time. Without a moat, a company's profits are more susceptible to competition. Companies with narrow moats are likely to achieve normalized excess returns beyond 10 years while wide-moat companies are likely to sustain excess returns beyond 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe lower-quality no-moat companies will see their returns gravitate toward the firm's cost of capital more quickly than companies with moats will. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

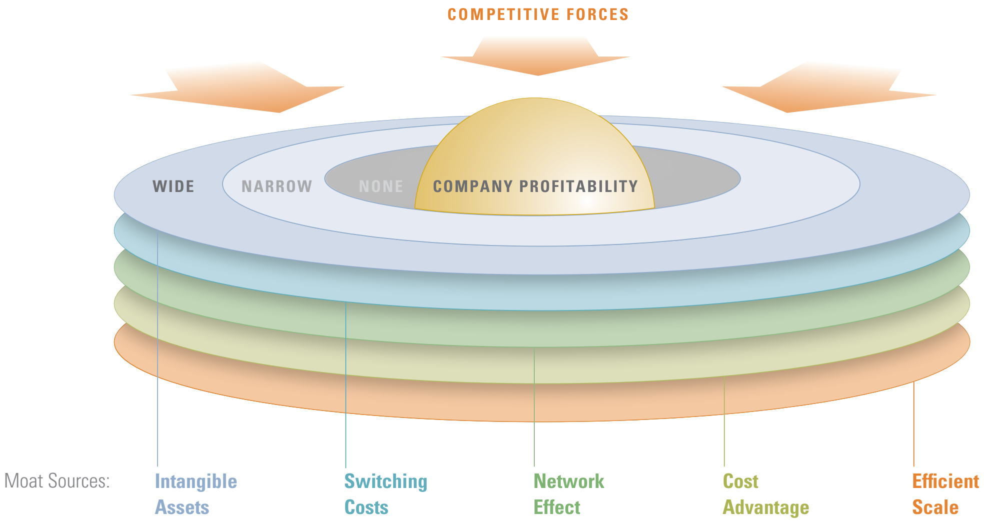
Fair Value Estimate

Our analyst-driven fair value estimate is based primarily on Morningstar's proprietary three-stage discounted cash flow model. We also use a variety of supplementary fundamental methods to triangulate a company's worth, such as sum-of-the-parts, multiples, and yields, among others. We're looking well beyond next quarter to determine the cash-generating ability of a company's assets because we believe the market price of a security will migrate toward the firm's intrinsic value over time. Economic moats are not only an important sorting mechanism for quality in our framework, but the designation also directly contributes to our estimate of a company's intrinsic value through sustained excess returns on invested capital.

Uncertainty Rating

The Morningstar Uncertainty Rating demonstrates our assessment of a firm's cash flow predictability, or valuation risk. From this rating, we determine appropriate margins of safety: The higher the uncertainty, the wider the margin of safety around our fair value estimate before our recommendations are triggered. Our uncertainty ratings are low, medium, high, very high, and extreme. With each uncertainty rating is a corresponding set of price/fair value ratios that drive our recommendations: Lower price/fair value ratios (<1.0) lead to positive recommendations, while higher price/fair value

Economic Moat



Morningstar Equity Research Methodology

ratios (>1.0) lead to negative recommendations. In very rare cases, the fair value estimate for a firm is so unpredictable that a margin of safety cannot be properly estimated. For these firms, we use a rating of extreme. Very high and extreme uncertainty companies tend to have higher risk and volatility.

Quantitatively Driven Valuations

To complement our analysts' work, we produce Quantitative Ratings for a much larger universe of companies. These ratings are generated by statistical models that are meant to divine the relationships between Morningstar's analyst-driven ratings and key financial data points. Consequently, our quantitative ratings are directly analogous to our analyst-driven ratings.

Quantitative Fair Value Estimate (QFVE): The QFVE is analogous to Morningstar's fair value estimate for stocks. It represents the per-share value of the equity of a company. The QFVE is displayed in the same currency as the company's last close price.

Valuation: The valuation is based on the ratio of a company's quantitative fair value estimate to its last close price.

Quantitative Uncertainty: This rating describes our level of uncertainty about the accuracy of our quantitative fair value estimate. In this way it is analogous to Morningstar's fair value uncertainty ratings.

Quantitative Economic Moat: The quantitative moat rating is analogous to Morningstar's analyst-driven economic moat rating in that both are meant to describe the strength of a firm's competitive position.

Understanding Differences Between Analyst and Quantitative Valuations

If our analyst-driven ratings did not sometimes differ from our quantitative ratings, there would be little value in producing both. Differences occur because our quantitative ratings are essentially a highly sophisticated analysis of the analyst-driven ratings of comparable companies. If a company is unique and has few comparable companies, the quantitative model will have more trouble assigning correct ratings, while an analyst will have an easier time recognizing the true characteristics of the company. On the other hand, the quantitative models incorporate new data efficiently and consistently. Empirically, we find quantitative ratings and analyst-driven ratings to be equally powerful predictors of future performance. When the analyst-driven rating and the quantitative rating agree, we find the ratings to be much more predictive than when they differ. In this way, they provide an excellent second opinion for each other. When the ratings differ, it may be wise to follow the analyst's rating for a truly unique company with its own special situation, and follow the quantitative rating when a company has several reasonable comparable companies and relevant information is flowing at a rapid pace.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

-Further information on Morningstar's conflict of interest policies is available from http://global.morningstar.com/equitydisclosures.

If you wish to obtain further information regarding previous Reports and recommendations and our services, please contact your local Morningstar office.

Unless otherwise provided in a separate agreement, you may use this Report only in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of this document is Morningstar Inc. Redistribution, in any capacity, is prohibited without permission. The information, data, analyses and opinions presented herein do not constitute investment advice; are provided solely for informational purposes and therefore are not an offer to buy or sell a security; and are not warranted to be correct, complete or accurate, nor may they be construed as a representation regarding the legality of investing in the security/ies concerned, under the applicable investment or similar laws or regulations of any person or entity accessing this report. The opinions expressed are as of the date written and are subject to change without notice. Except as otherwise required by law, Morningstar, its affiliates, and their officers, directors and employees shall not be responsible or liable for any trading decisions, damages or other losses resulting from, or related to, the information, data, analyses or opinions or their use. You should seek the advice of your financial, legal, tax, business and/or other consultant, and read all relevant issue documents pertaining to the security/ies concerned, including without limitation, the detailed risks involved in the investment, before making an investment decision.

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. As the price / value / interest rate of a security fluctuates, the value of your investments in the said security, and in the income, if any, derived therefrom may go up or down.

Contents

Analyst Note 24 Mar 2016

We are reaffirming our $35 fair value estimate, narrow moat rating, and stable moat trend rating for Exelon after Washington, D.C., regulators approved its acquisition of Pepco with a 2-1 vote on Wednesday afternoon. The companies closed the acquisition following the vote, nearly two years after initially announcing the deal. Pepco stock will no longer trade as of March 24.

For Exelon, we have already incorporated $1 per share of value dilution into our fair value estimate, based on a 75% probability of the deal closing at Exelon's $27.25 per share cash offer. Using a 100% probability doesn't have a material impact on that dilution estimate.

We were confident that the management teams would negotiate until they received deal approval, even though the companies missed several self-imposed deadlines. The terms of the settlement in Washington, D.C., will benefit customers there, but they are too small to have a material impact on the $12 billion deal, including debt.

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers in Illinois, Pennsylvania, Maryland, New Jersey, and Washington, D.C. Exelon owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. The company is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

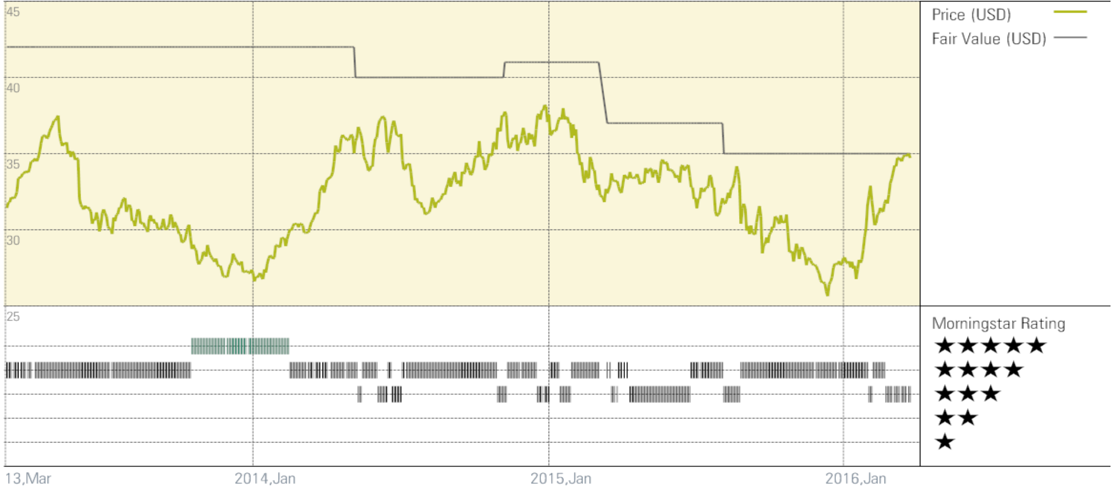
Price/Fair Value Morningstar data as of Mar 23, 2016



Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

Investment Thesis 06 Oct 2015

As the largest nuclear power plant owner in the U.S., Exelon has long been a profit machine and an industry-leading source of shareholder value creation. But power prices have crashed hard since their 2008 highs and appear stuck at current levels for at least the next two years. The drop in Eastern U.S. gas and coal prices have made those generation sources more competitive.

That has resulted in a sharp drop in Exelon's returns, a 41% cut in the dividend in 2013, and a shift in strategy to increase contributions from its countercyclical retail supply and regulated distribution businesses. It acquired Constellation Energy in 2012 for $8 billion and Pepco Holdings in 2016 for $12 billion, both including debt. The Pepco deal took nearly two years to close as Exelon waded through the regulatory approval process. Management's commitment to keep the deal alive shows its conviction in Exelon's strategic move to add more regulated earnings.

Even with increased earnings diversification, Exelon can't escape its overwhelming leverage to Eastern and Midwestern U.S. power prices, which drive almost half of earnings. The low operating costs and clean emission profile of its nuclear fleet make Exelon the utilities sector's biggest winner if our projections for higher power prices and tighter fossil fuel environmental regulations materialize.

Exelon's world-class operating efficiency ensures it can realize that upside. However, persistently low margins are making it difficult to justify continued investment in some of its nuclear plants. Even though we think there is long-term value in these plants, Exelon might choose to close some plants to preserve cash flow. This would reduce Exelon's upside.

We estimate Exelon's regulated distribution utilities will contribute about half of consolidated earnings by 2016, up from just 20% in 2008. Illinois state legislation in 2011 significantly improved the incentives for growth investment by introducing formula rates, annual true-ups, and adjusted allowed returns. Excluding Pepco, we think the regulated utilities can increase earnings by 10% annually over the next three years.

Profile

Exelon's regulated distribution utilities deliver power and gas to 7.8 million customers in Illinois, Pennsylvania, Maryland, New Jersey, and Washington, D.C. Exelon owns 11 nuclear plants and 35 gigawatts of generation capacity throughout North America, producing 22% of U.S. nuclear power and 4% of all U.S. electricity. The company is the largest power retailer in the U.S., serving about 150 terawatt hours of load. In March 2012, Exelon bought Constellation Energy for $7 billion.

Morningstar Analysis

Exelon and Pepco Join to Sing a Duet: At Last 24 Mar 2016

We are reaffirming our $35 fair value estimate, narrow moat rating, and stable moat trend rating for Exelon after Washington, D.C., regulators approved its acquisition of Pepco with a 2-1 vote on Wednesday afternoon. The companies closed the acquisition following the vote, nearly two years after initially announcing the deal. Pepco stock will no longer trade as of March 24.

For Exelon, we have already incorporated $1 per share of value dilution into our fair value estimate, based on a 75% probability of the deal closing at Exelon's $27.25 per share cash offer. Using a 100% probability doesn't have a material impact on that dilution estimate.

We were confident that the management teams would negotiate until they received deal approval, even though the companies missed several self-imposed deadlines. The terms of the settlement in Washington, D.C., will benefit customers there, but they are too small to have a material impact on the $12 billion deal, including debt.

Valuation, Growth and Profitability 24 Mar 2016

We are reaffirming our $35 per share fair value estimate after Exelon closed its acquisition of Pepco Holdings at its $27.25 per share cash offer. We already included $1 per share of value dilution in our Exelon fair value estimate, based on the 30% premium that Exelon paid over our Pepco fair value estimate.

We continue to believe it is more likely than not that Exelon will retire the three nuclear plants that did not clear the 2018-19 PJM base capacity auction--Quad Cities, Illinois; Oyster Creek, New Jersey; and Three Mile Island, Pennsylvania--as well as the Clinton, Illinois, plant. We now assume a 50% probability that the Byron, Illinois, plant will retire, given that it cleared the 2018-19 capacity auction. These closures represent about 25% of Exelon's current nuclear capacity. Lower operating costs and capital expenditures partially offset the lost gross margin from these plants, making them cash flow-neutral in the near term.

We continue to forecast mostly flat consolidated earnings through 2016, excluding contributions from Pepco. On a midcycle basis, we assume Exelon earns $3.80 per share and Exelon Generation earns $3.9 billion EBITDA. This is 50% higher than our 2017 trough mark-to-market EBITDA estimate for Exelon Generation.

Our midcycle earnings forecast at Exelon Generation is based on a $4 per thousand cubic feet midcycle Henry Hub gas price, a negative $0.60/mcf gas basis for PJM West, and heat rates across all regions 10% above current 2017 forward heat rates. At the retail business, we assume 8% long-term normalized gross margins and 1% annual volume growth beyond 2015.

We assume all three regulated utilities earn average 10% returns on equity starting in 2016.

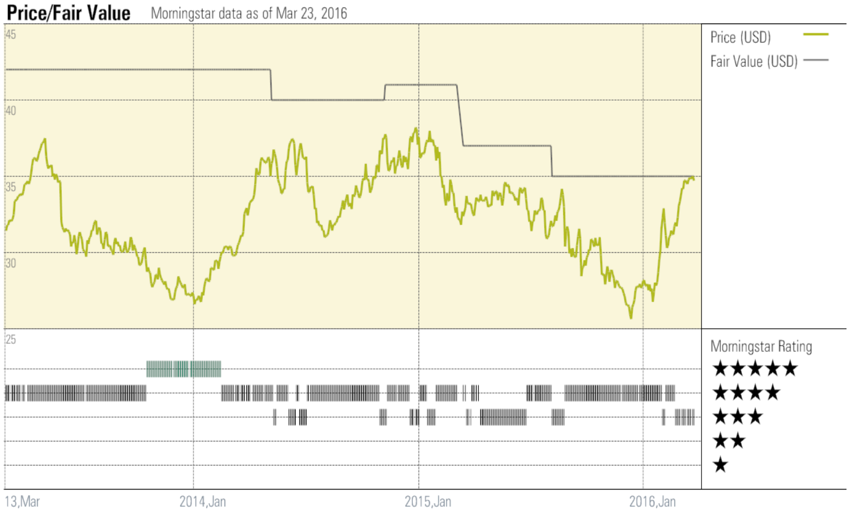
We assume a 9% cost of equity and a 7.1% cost of capital. Our cost of equity assumption is in line with the 9% rate of return we expect investors to demand of a diversified equity portfolio. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

Scenario Analysis

We assign a medium uncertainty rating. Exelon's higher-than-average degree of operating leverage and exposure to volatile power markets lead to a wider range of outcomes in our base, high, and low scenarios. A $5 per megawatt-hour average move in our midcycle power price assumptions with no change in retail margins results in a 15% change in our open midcycle EPS estimate and an $800 million change in EBITDA. Our fair value estimate would change by $6 per share. On a mark-to-market basis as of

Exelon Corp EXC (NYSE) | ★★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Industry Group
34.72 USD	35.00 USD	24.50 USD	47.25 USD	Medium	Narrow	Stable	Standard	Utilities - Regulated



early August, our fair value estimate would be $31 per share and our midcycle EPS would be $3.00.

If we reduce our assumption for the operating efficiency and utilization of Exelon's nuclear power plants by 2 percentage points to near the industry average, it would change our fair value estimate by $3 per share. If Exelon does not retire the Clinton, Quad Cities, and Byron plants, it would add $3 per share to our fair value estimate.

At the retail segment, every 100 basis points of long-term normalized margin expansion generates $100 million of pretax margin and $1 per share of value.

A 50-basis-point change in our cost of equity changes our fair value estimate by $4 per share.

Economic Moat

Considering Exelon's full suite of businesses, we think it earns a narrow economic moat.

Nuclear generation in general still has wide-moat characteristics, with returns on capital above costs of capital for the foreseeable future. However, the spread between long-term returns on capital and Exelon's cost of capital has shrunk, based on our midcycle outlook for power prices in the eastern United States. Exelon's increasing diversification into narrow- and no-moat businesses, together with the shrinking returns at its nuclear generation business, supports our narrow moat rating.

Nuclear generation's wide-moat economics are based on two primary competitive advantages. First, nuclear plants take more than seven years to site and build, cost several billion dollars, and typically face community opposition. These are significant barriers to entry, giving operators an effective low-cost monopoly in a given region. Exelon's large fleet gives it scale advantages that allow it to add capacity at its plants at a fraction of the cost and risk of a greenfield project. It is unlikely a competitor would be able to earn sufficient returns on capital by building a nuclear plant in close proximity to any of Exelon's plants.

Second, no other reliable power generation source can match the cost or scale of a nuclear plant. Nuclear plants' low variable costs and low greenhouse gas emissions relative to competing fossil fuel power generation sources, such as coal and natural gas, reduce substitution threats. Renewable energy, with effectively no marginal costs, has depressed wholesale power prices and hurt Exelon's returns on capital in some of its regions. We believe this is a market distortion that fails to recognize the value of Exelon's nuclear fleet reliability relative to intermittent renewable energy.

As long as electricity remains a critical energy source in the U.S. and nuclear investment requirements remain near current levels, we expect nuclear plants will maintain a low-cost advantage and generate high returns on capital. To monetize this competitive advantage, Exelon must retain access to wholesale power markets. Any reregulation of its generation fleet would shrink its moat. In addition, nuclear

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Industry Group
34.72 USD	35.00 USD	24.50 USD	47.25 USD	Medium	Narrow	Stable	Standard	Utilities - Regulated

generation must maintain regulatory and political support in the U.S. and states where Exelon operates. If that support erodes, it could affect the economics of routine maintenance investments and lead to plant shutdowns, as we've seen elsewhere in the U.S. and overseas.

We believe Exelon's regulated distribution utilities have narrow economic moats. Regulatory caps on profits offsets the service territory monopolies and network efficient scale advantages. Utility regulation in the U.S. aims to fix customer rates at levels that ensure capital providers earn fair returns on their investments while keeping customer costs as low as possible. We believe this regulatory compact ensures Exelon's utilities will earn at least their costs of capital in the long run.

We believe Exelon's retail supply business has no economic moat. Retail power and gas markets are highly competitive with virtually no barriers to entry, switching costs, or product differentiation. Although customer relationships can be sticky, retailers mostly end up competing on price.

Moat Trend

We assign Exelon a stable moat trend. The regulatory environments in Illinois, Pennsylvania, and Maryland have stabilized, allowing its distribution utilities to earn more favorable returns. In the power markets, Exelon faces both positive and negative trend developments. We expect returns on capital will continue to face pressure from cheap gas moving west and increasing renewable energy penetration. However, environmental regulations, coal plant closures, and capacity market changes should help returns on capital. On balance, we think these positive and negative dynamics offset each other.

Since the retail supply business is relatively new following power market deregulation in the early 2000s, we're watching to see if any company can build a sustainable competitive advantage. Exelon and others are demonstrating some scale and cost advantages, particularly in marketing, customer aggregation, risk mitigation, and supply costs.

The one path we see to achieve excess returns in the supply business is to match customer load with wholesale generation. As liquidity has dried up in power markets, it is increasingly difficult and costly to hedge future expected generation. A retail supply business can improve hedging opportunities by reducing collateral and trading costs. This could give a retail supplier a low-cost advantage. As the nation's largest wholesale power generator and retail supplier, Exelon is well positioned to take advantage of these wholesale-retail pairing benefits.

Bulls Say/Bears Say

Bulls Say

- Nuclear power plants run year-round, produce electricity at low costs, and generate large profits, even with currently depressed power prices.
- Higher natural gas and coal prices, rising electricity demand, and environmental regulations help Exelon more than any other utility because of its large nuclear fleet.
- If gas and power prices remain low for many years, Exelon's move to invest in retail and regulated businesses will preserve value.

Bears Say

- Exelon's performance in part is driven by volatile power prices that fluctuate based on natural gas prices, coal prices, and regional electricity demand.
- The Constellation and Pepco acquisitions dilute Exelon's economic moat by adding more no-moat retail business and narrow-moat distribution earnings.
- Many of Exelon's growth projects come with regulated or contracted returns, reducing shareholders' leverage to a rebound in power markets.

Financial Health

Exelon's biggest challenge is warding off cash constraints in unfavorable power markets. The 2007-08 commodity boom led management to raise the dividend and buy back stock. But as power markets have fallen from their 2008 peaks, the company has focused on preserving its investment-grade credit rating. In 2011, the board spent $2.1 billion to reduce its pension liabilities instead of reinstating a $1.5 billion share-repurchase plan approved in September 2008 but never executed. In February 2013, the board cut the dividend 41% to $1.24 per share annualized, freeing up $740 million in annual cash flow. We expect the dividend to stay at this level for at least the next two years.The Pepco acquisition would increase consolidated leverage, but most of that additional leverage will be debt at the regulated utilities. We don't expect a material change in parentco or Exelon Generation leverage.We think Exelon will have sufficient cash coverage to keep its investment-grade credit rating and current dividend at least through 2016, based on current market conditions. Even through these lean years, we expect Exelon can generate at least $2 billion of cash flow after incorporating new financing and excluding discretionary growth investments. We project Exelon's consolidated EBITDA/interest coverage will drop from 9 times in 2011 to 6 times by 2015 and leverage to rise to 3.4 times debt/EBITDA in 2015 from 2 times in 2011.More than half of Exelon's consolidated debt is secured at the regulated utilities, in line with its regulatory targets. Apart from the utilities, Exelon has an average $485 million of annual debt maturities at Exelon Generation through 2017. As long as power markets remain relatively stable and Exelon maintains its investment-grade ratings, we don't expect it to have trouble refinancing those maturities.Exelon's pension and nuclear decommissioning funds are well-funded now, but if interest rates stay low, Exelon could be forced to contribute more cash.

Enterprise Risk

Investors should pay the most attention to political developments that would reregulate competitive electricity markets in the Midwest and mid-Atlantic. Even though sharp increases in power prices would result in an earnings windfall for Exelon, it could lead politicians and regulators to pursue price caps as they did when markets first deregulated. Although we think this is unlikely in the current environment, it could have a substantial negative impact on our fair value estimate. If market power prices are capped or regulated, Exelon loses its primary profit source. As the nation's largest wholesale generator and retail supplier, Exelon's competitive edge requires Eastern U.S. power markets to remain deregulated. In the decade following deregulation, rate caps, and other regulations limited Exelon's profits. Those are gone, and lower power prices have eased concerns about reregulation. But we expect politicians and regulators will continue to monitor customers' utility bills and could intervene if power prices skyrocket.Reregulation would also destroy Exelon's retail business. Although that business is still a relatively small source of consolidated earnings, it would eliminate Exelon's effective hedge against its generation fleet, potentially leading to more volatile earnings.As Exelon's regulated utilities generate a greater share of earnings, investors will be made more acutely subject to the state and federal regulatory risk that all distribution and transmission utilities face. Illinois and Maryland are two historically tough regulatory environments, and punitive rate decisions could have a material impact on earnings and growth.

Management 24 Mar 2016

We assign Exelon's management team a Standard stewardship rating. Since Exelon's earnings are at the mercy of wholesale power market ups and downs, we don't see much link between Exelon's recent underperformance and management's capabilities.

President and CEO Chris Crane and executive chairman Mayo Shattuck III have focused growth investment on the regulated utilities, continuing a strategic shift that former CEO and chairman John Rowe made before his departure in 2013. Crane's biggest move so far is the $12 billion (including debt) Pepco acquisition that closed in 2016. This increases Exelon's share of regulated utilities earnings and dilutes shareholders' exposure to wholesale power markets. Management showed strong conviction in the value of the deal based on their efforts to gain support for the deal through nearly two years of regulatory negotiations.

Crane also faces tough decisions related to flagging profits at several of Exelon's nuclear plants. We wouldn't be surprised if Crane decides to close some plants in the absence of significant public policy support.

We're particularly impressed by management's nuclear fleet operations, the one thing it can control. Crane led the generation segment to world-class results in his five years as COO, and that performance has continued with Crane as CEO. Exelon's nuclear capacity factors routinely approach 94% across its nuclear fleet. The rest of the nuclear industry averages in the mid-80% range. Exelon's operational excellence preserves the value-creative opportunities available if power prices rise.

The Constellation acquisition reshaped the board along with the executive suite. The postmerger addition of four former Constellation board members and the retirement of five legacy Exelon board members, including Rowe, leaves only two of the 16 members who were on the board when Exelon

formed in 2000. In addition, Shattuck has become the largest insider shareholder. He owned 3.8 million shares or vested options as of January 2015.

Analyst Notes

Exelon and Pepco Join to Sing a Duet: At Last 24 Mar 2016

We are reaffirming our $35 fair value estimate, narrow moat rating, and stable moat trend rating for Exelon after Washington, D.C., regulators approved its acquisition of Pepco with a 2-1 vote on Wednesday afternoon. The companies closed the acquisition following the vote, nearly two years after initially announcing the deal. Pepco stock will no longer trade as of March 24.

For Exelon, we have already incorporated $1 per share of value dilution into our fair value estimate, based on a 75% probability of the deal closing at Exelon's $27.25 per share cash offer. Using a 100% probability doesn't have a material impact on that dilution estimate.

We were confident that the management teams would negotiate until they received deal approval, even though the companies missed several self-imposed deadlines. The terms of the settlement in Washington, D.C., will benefit customers there, but they are too small to have a material impact on the $12 billion deal, including debt.

Reaffirming Outlook for Now, but Politics Could Yank Cord Out From Exelon-Pepco 02 Mar 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after fissures opened in the settlement negotiations related to Washington, D.C., regulatory approval for the companies' proposed merger. As of midday Wednesday, Pepco was trading at a 10% discount to our fair value estimate and a 15% discount to Exelon's $27.25 per share cash offer price, both of which we think offer good return opportunities.

Our Pepco fair value estimate continues to include a 75% probability that the settling parties--including D.C. Mayor Muriel Bowser's office, the D.C. regulatory staff, the lead consumer advocate group, and the companies--will reach an agreement regulators will approve. We think the companies remain committed to the deal and will accept any final settlement terms regulators approve. The key points of contention appear to involve less than $100 million, an immaterial impact on the $6.8 billion deal value.

However, we think the companies could be losing control over the outcome, and the deal could now be a proxy political fight among several D.C. entities. If we get more information that supports this theory, we would be inclined to cut our probability of the deal closing to 50%, leading to a $2 per share cut in Pepco's fair value estimate. We include $5 per share of incremental value in our fair value estimate for Pepco. A probability change is not likely to have a material impact on the $1 per share of value dilution we include in our Exelon fair value estimate related to the deal.

We continue to think Exelon management would be willing to go past its previously stated March 4 deadline if settlement negotiations move forward.

We are reaffirming our narrow moat and stable moat trend ratings for both companies.

The Never-Ending Exelon-Pepco Saga Gets Another Two Weeks of Life, but No Real Changes 29 Feb 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Washington, D.C., regulators again rejected Exelon's offer to acquire Pepco but left open an option for the companies to gain approval.

We still include $1 per share of value dilution in our fair value estimate for Exelon and $5 per share of incremental value for Pepco, based on a 75% probability that the companies will close the transaction at Exelon's $27.25 cash offer. We are reaffirming our narrow moat and stable moat

Analyst Notes

trend ratings for both companies.

Even though Washington, D.C., regulators formally rejected the deal, we think the companies are committed enough to closing the deal that there is a good likelihood they will accept the terms set by regulators. The terms sap additional value from shareholders to benefit customers through rate refunds and benefits, limiting cost reductions, returning merger synergies to customers, and limiting recovery for some costs. However, the D.C. service territory is not big enough for the incremental lost value to have an impact on our valuation of the deal. The terms also set strict ringfencing provisions, but those are typical and don't have any impact on our valuations.

Exelon management had said they would terminate the deal if regulators did not approve it by March 4, but we don't think that date is sacred any longer, as regulators have said the companies have until March 11.

Pepco Reports In-Line 2015 Earnings; Exelon Believes D.C. Will Approve Merger by March 4 22 Feb 2016

We are reiterating our $26 fair value estimate for Pepco Holdings and $35 fair value estimate for Exelon after Pepco reported in-line 2015 earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining the approval of the District of Columbia Public Service Commission and being completed following an agreement with D.C. Mayor Muriel Bowser that sweetened the benefits for customers and provided other benefits to the district.

Pepco Holdings or Exelon may terminate the merger agreement if the D.C. commission fails to issue a final order approving the merger without condition or modification of the terms of the settlement agreement by March 4. Exelon has made clear that if the D.C. commission does not approve the deal by March 4, it will terminate the agreement. However, Exelon's CEO recently said he believes D.C. will approve the transaction at its next meeting before the termination date.

Pepco reported 2015 adjusted operating earnings of $1.28, in line with our estimate and up from $1.27 per share in 2014. Earnings were favorably affected by rate increases due to infrastructure investment, partially offset by higher operation and maintenance expenses.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Supreme Court Validates Our View That Carbon Regulation Remains Highly Uncertain 11 Feb 2016

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities and coal miners after the U.S. Supreme Court's 5-4 decision to stay the Environmental Protection Agency's Clean Power Plan. This validates our view that it's too early, and the outcome too uncertain, to make any investment decisions based on the current terms of the CPP or any carbon regulation. We do not include any CPP-related impacts in our fair value estimates.

At a minimum, we expect that the decision will push implementation one or two years past the 2022-30 phase-down period and will embolden political opposition to carbon regulation. In addition, it means that a Supreme Court ruling against the CPP could actually reverse industry trends. When the Supreme Court struck down the EPA's

Exelon Corp EXC (NYSE) | ★★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Industry Group
34.72 USD	35.00 USD	24.50 USD	47.25 USD	Medium	Narrow	Stable	Standard	Utilities - Regulated

Analyst Notes

MATS rule in June, the decision was largely moot because most power plants were proceeding to implement the rule or had already made plans to retire. The CPP timeline is so long that there is plenty of time for the courts or politicians to nullify it or make major revisions to it.

For most utilities, power and gas market economics and renewable energy policies remain the most important variables for investors to consider.

The Supreme Court’s decision comes as good news for coal miners that haven’t had any for some time. However, we don’t view today’s announcement as a panacea for the coal industry’s woes, as natural gas remains at prices at which coal struggles to compete. However, our view that natural gas prices will rise in the coming years hasn’t changed, so we maintain our fair value estimates for both Peabody and Cloud Peak. Peabody’s high leverage means it has less time to wait--the basis for its extreme uncertainty rating.

Exelon Surprises With 2.5% Dividend Growth Target 03 Feb 2016

We are reaffirming our $35 fair value estimate and narrow moat and stable moat trend ratings for Exelon after the company reported earning $2.49 per share on an adjusted basis in 2015. This was in line with our estimate and within management's guidance range.

We think the biggest positive for shareholders was management's announcement that it plans to recommend to the board a 2.5% annual dividend increase for at least the next three years, likely starting in the second half of 2016. We had not expected a dividend increase until at least 2018, given our expected plateau in earnings the next three years.

If the board accepts this policy, we estimate Exelon's payout ratio will top 50% by 2018. This is at the high end of what we think is reasonable for Exelon's cash flow profile and debt load. We're not yet entirely convinced that management has added sufficient regulated distribution earnings and contracted generation revenue to decouple cash flows from volatile energy markets.

Management continues to evaluate the economic viability of at least three nuclear plants. We assume in our long-term forecasts that Exelon closes three plants representing 25% of its fleet capacity. We also expect a final Pepco merger decision by early March, in line with timeline indications from Washington, D.C., regulators. We continue to assume $1 per share of value dilution based on a 75% probability of the deal closing as proposed. We don't think ongoing legal challenges in other states will be an impediment.

We remain long-term bullish on fixed-price PJM power, especially in the East, where we expect gas prices to strengthen as takeaway capacity increases and demand remains more robust than other regions. This drives the bulk of the value upside as of early February. Our $8.4 billion midcycle gross margin outlook for Exelon Generation remains at the high end of management's 2018 outlook range.

Supreme Court Sides With Demand Response; No Fair Value Impacts 25 Jan 2016

We are reaffirming our fair value estimates and our moat and moat trend ratings for U.S. power producers and diversified utilities after the U.S. Supreme Court issued a 6-2 decision effectively supporting the Federal Energy Regulatory Commission's Order No. 745.

The decision on its face appears to be a win for demand response providers and a loss for power producers such as NRG Energy, Dynegy, and Calpine. However, we think the actual impact on energy and capacity prices will be muted. Near-term capacity prices might go down, but energy prices should go up since demand response has much higher marginal costs than conventional generation. We expect the trade-off to be mostly neutral.

Despite the Supreme Court win, demand response faces other challenges. Mid-Atlantic grid operator PJM is implementing rule changes that hurt the economics of demand response and should boost margins for conventional generators. We expect little change in the amount of demand response that clears the 2019-20 base capacity auction and are maintaining our long-term outlook. Demand response participation might even drop if PJM continues to make rule changes recommended by the market monitor. This would be a benefit for conventional generators.

Ultimately we think demand response market saturation will be the limiting factor. As demand response gains market share, capacity values will go down. This will erode the profitability for new demand response entrants since demand response providers typically receive more than 90% of their revenue from capacity payments.

Independent power producers and diversified utilities are trading at a significant discount to our fair value estimates, and the Supreme Court's ruling has no material impact on our long-term thesis. We believe the market reaction was overly pessimistic to the ruling and presents a buying opportunity for those with the appropriate risk appetite. We highlight Dynegy and Exelon as those with the most exposure to PJM. Calpine, FirstEnergy, NRG Energy, and Public Service Enterprise Group also have material levels of generation in PJM.

Management Meeting: Exelon Sticks to March 4 Drop-Dead Date for Pepco Deal 11 Nov 2015

We are reaffirming our $35 and $26 fair value estimates for Exelon and Pepco Holdings, respectively, after meeting with Exelon's senior management at the Edison Electric Institute Financial Conference in Hollywood, Florida. Our narrow moat and stable moat trend ratings for both companies are unchanged.

Management reiterated it will withdraw its offer to acquire Pepco if Washington, D.C., regulators do not approve the transaction by March 4, 2016. We continue to incorporate in our fair value estimates a 75% probability of the deal closing as proposed. D.C. regulators' written approval for rehearing suggested they expect to rule within that time frame. We expect Exelon will be able to close the deal immediately following approval.

The most-favored-states contingencies in other states' approvals would take effect after the deal closed and thus are not an impediment to the deal closing. Exelon would file with those states to offer customer benefits comparable with those offered in D.C. We don't expect this to be material to our assessment of the transaction or our fair value estimate for Exelon, which includes $1 per share of dilution from the deal.

Management pushed out the start of its full $0.15-$0.20 earnings per share run-rate accretion to 2019 from 2017 initially. Apart from the closing delay, management said the 2017-18 reduction was based on Pepco's reassessment of its near-term outlook for earned returns. At this point, most of the earnings accretion should come from the extra leverage Exelon will use. We expect it will take two to three years of operational improvements on Exelon's side before it can achieve more constructive regulatory outcomes.

Management estimated the deal could be $0.25 per share earnings-accretive by 2020 if Pepco can achieve a 9% earned return on equity. We think this is a stretch, but even an 8% achieved ROE could make the deal value-neutral relative to our previous stand-alone forecasts for Pepco.

Exelon Still Awaiting Power Market Upside and Pepco Acquisition Approvals 30 Oct 2015

We are reaffirming our $35 fair value estimate and narrow economic moat and stable moat trend ratings for Exelon after the firm reported adjusted earnings of $0.83 per share in the third quarter, up from $0.78 per share in the third quarter of 2014. Management raised its full-year earnings guidance range $0.05 per share to $2.40-$2.60, in line with our full-year outlook.

Management noted Exelon's retail-wholesale combination was a meaningful contributor to the higher quarterly and year-to-date earnings, amplified by last year's Integrys acquisition. We've long believed Exelon's retail-wholesale combination and scale can be value-accretive for shareholders, and it appears to be paying off, albeit at still a small level. Favorable weather for Exelon's regulated utilities was a key reason for higher earnings in the quarter. On a weather-normalized basis, we expect capital investment and recent rate activity in Pennsylvania and Maryland to be the key earnings growth driver in 2016-18.

Estimated 2015-17 gross margin for Exelon Generation climbed during the quarter primarily due to above-market hedges. Management now projects $7.8 billion gross margin in 2016 and 2017 with a 2017 upside near $9.0 billion based on hedging about half of its projected generation. We think this is a good position given our bullish power market outlook. Management also announced its intention to delay its nuclear plant retirement decision until next year. We continue to assume a high likelihood that it retires four plants by 2018 based on current market conditions.

Management now expects to close the Pepco acquisition in the first quarter of 2016. We continue to incorporate $1 per share fair value dilution. On Oct. 28, the D.C. commission accepted Exelon-Pepco's appeal and said it expects to make a decision in less than 150 days, suggesting mid-March.

Pepco Reports Third-Quarter Earnings; Acquisition by Exelon Likely to Close Early Next Year 26 Oct 2015

We are reiterating our $35 per share fair value estimate for Exelon and $26 fair value estimate for Pepco after Pepco reported third-quarter earnings. Our narrow moat and stable moat trend ratings are also unchanged for both companies.

Pepco reported operating earnings of $0.33 per share versus $0.46 in the same period last year. Earnings were negatively affected by higher operations and maintenance expense, implementation costs associated with a new customer information system, increased transmission revenue reserves related to a return on equity challenge and higher property taxes.

We continue to believe Exelon's proposed acquisition of Pepco has a 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed following the agreement with Washington, D.C., Mayor Muriel Bowser. We expect the D.C. commission to approve Exelon and Pepco's request to reopen the merger proceeding in their meeting on Oct. 28. Assuming the D.C. commission does reopen the proceeding, briefings would not be completed until late December. Therefore, we would not expect the merger to close until early 2016.

Although the merger appears to be on track in D.C., it is unclear whether the proceedings will be reopened in Delaware, New Jersey, and Maryland, jurisdictions that have already approved the transaction. The commitments Exelon made to these states to obtain approval are subject to most-favored-nation clauses and may need to be enhanced.

Exelon Corp EXC (NYSE) | ★★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Industry Group
34.72 USD	35.00 USD	24.50 USD	47.25 USD	Medium	Narrow	Stable	Standard	Utilities - Regulated

Analyst Notes

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Exelon Reaches Agreement With D.C. Mayor to Acquire Pepco 06 Oct 2015

We are reiterating our $35 fair value estimate for Exelon and raising our fair value estimate for Pepco Holdings to $26 per share from $23 per share following the announcement by Washington, D.C., Mayor Muriel Bowser's office that they had reached an agreement with Exelon for its proposed acquisition of Pepco. Exelon has now agreed to invest $78 million in the D.C. electric utility system, up from the $14 million it previously proposed.

Based on the proposed agreement, we now believe the merger has a better than 75% chance of gaining approval of the Public Service Commission of the District of Columbia and being completed. We had previously handicapped the chances of the merger closing at only 25% following the Aug. 25, 2015, outright rejection of Exelon's offer without the PSC providing any solutions for gaining approval. Exelon and Pepco have received all other regulatory approvals although there are some outstanding legal challenges to the conditional approval of the Maryland Public Service Commission that we expect to be dismissed.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer. Despite this premium, the deal as proposed on a probability-adjusted basis is too small to have a material impact on our Exelon fair value estimate.

Pepco and Exelon Refile With D.C. Commission but Offer No Sweeteners 30 Sep 2015

We are reiterating our $35 fair value estimate for Exelon and $23 fair value estimate for Pepco following the firms' filing for reconsideration of their proposed merger to the District of Columbia Public Service Commission. We are maintaining our narrow moat and stable moat trend ratings for both. The filing asserts the merger is in the public interest and the original decision contained numerous errors of law and fact. The companies did not propose any new financial incentives.

We continue to believe that the merger has a 25% chance of closing. Since the D.C. PSC did not provide alternatives to correct its concerns in the original decision, we think the commission is unlikely to reverse itself without any sweeteners. If the companies do offer additional benefits to D.C. customers, the conditional approvals by Delaware, Maryland, and New Jersey will be reopened. Most-favored-nations clauses in these agreements allow for the same incremental benefits, increasing the cost to Exelon of completing the merger. Although incremental customer benefits could be small for the D.C. jurisdiction, making concessions across all of Pepco's service territories could ruin the economics of the merger.

The D.C. commission has 30 days to respond. If it denies the request for rehearing or does not respond, Pepco and Exelon could appeal the decision to the D.C. Court of Appeals. The Washington Post has reported that D.C. Mayor Muriel Bowser has been subject to intense lobbying by business groups favoring the merger and public demonstrations opposing the merger. The Post reported that private negotiations are taking place in the mayor's office trying to determine if a revamped deal is possible.

Our stand-alone fair value estimate for Pepco remains $21 per share, a 23% discount to Exelon's $27.25 cash offer.

Research Methodology for Valuing Companies

Components of Our Methodology

- Economic Moat™ Rating
- Moat Trend™ Rating
- Moat Valuation
- Three-Stage Discounted Cash Flow
- Weighted Average Cost of Capital
- Fair Value Estimate
- Scenario Analysis
- Uncertainty Ratings
- Margin of Safety
- Consider Buying/Selling
- Stewardship Rating

We believe that a company's intrinsic worth results from the future cash flows it can generate.
The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth. Four key components drive the Morningstar rating: our assessment of the firm's economic moat, our estimate of the stock's fair value, our uncertainty around that fair value estimate and the current market price. This process ultimately culminates in our single-point star rating. Underlying this rating is a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's equity analysts.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our actual calculation of our fair value estimates. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns on invested capital over at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. The assumptions that we make about a firm's economic moat play a vital role in determining the length of "economic outperformance" that we assume in the terminal sections of our valuation model. To assess the sustainability of excess profits, analysts perform ongoing assessments of what we call the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from one year (for companies with no economic moat) to 10-15 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard perpetuity formula. In deciding on the rate at which to discount future cash flows, we use a building block approach,

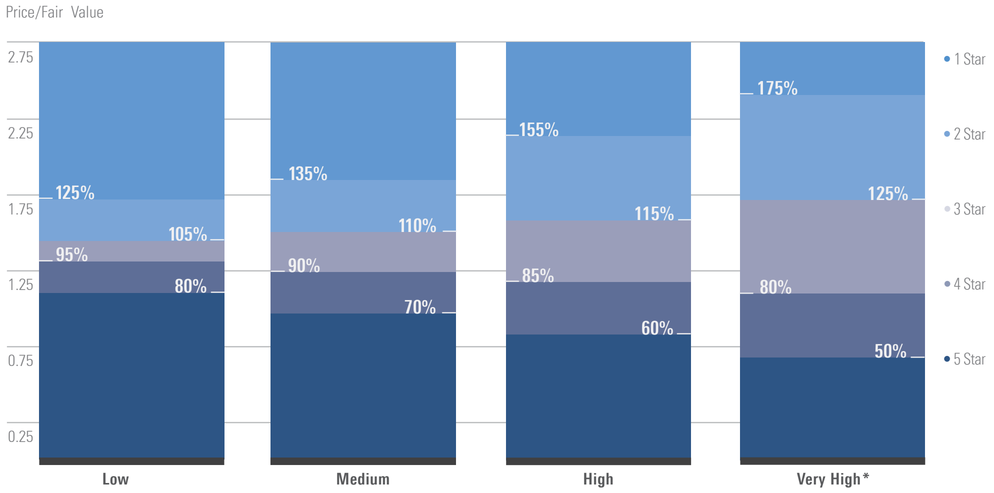
which takes into account expectations for market real return, inflation, country risk premia, corporate credit spread, and any additional systematic risk.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts model three scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of likely potential fair values and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, and other company-specific factors.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

Morningstar Margin of Safety and Star Rating Bands



* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

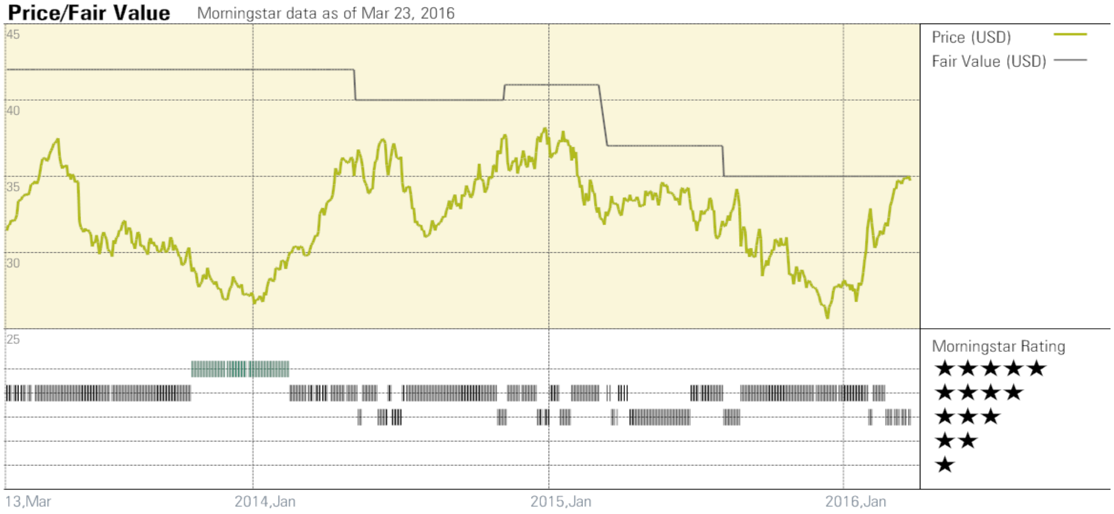
Price/Fair Value Morningstar data as of Mar 23, 2016



Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from http://global.morningstar.com/equitydisclosures.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

-Morningstar may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

For Recipients in India: This research on securities [as defined in clause (h) of Section 2 of the Securities Contracts (Regulation) Act, 1956], such research being referred to for the purpose of this document as "Investment Research", is issued by Morningstar Investment Adviser India Private Limited.

Morningstar Investment Adviser India Private Limited is registered with the Securities and Exchange Board of India under the SEBI (Investment Advisers) Regulations, 2013, vide Registration number INA000001357, dated March 27, 2014, and in compliance of the aforesaid regulations and the SEBI (Research Analysts) Regulations, 2014, it carries on the business activities of investment advice and research. Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Associates LLC, which is a part of the Morningstar Investment Management group of Morningstar, Inc., and Morningstar, Inc. is a leading provider of independent investment research that offers an extensive line of products and services for individual investors, financial advisors, asset managers, and retirement plan providers and sponsors. In India, Morningstar Investment Adviser India Private Limited has only one associate, viz., Morningstar India Private Limited, and this company predominantly carries on the business activities of providing data input, data transmission and other data related services, financial data analysis, software development etc.

The author/creator of this Investment Research ("Research Analyst") or his/her associates or his/her relatives does/do not have (i) any financial interest in the subject company; (ii) any actual/beneficial ownership of one per cent or more securities of the subject company, at the end of the month immediately preceding the date of publication of this Investment Research; and (iii) any other material conflict of interest at the time of publication of this Investment Research.

The Research Analyst or his/her associates or his/her relatives has/have not received any (i) compensation from the subject company in the past twelve months; (ii) compensation for products or services from the subject company in the past twelve months; and (iii) compensation or other material benefits from the subject company or third party in connection with this Investment Research. Also, the Research Analyst has not served as an officer, director or employee of the subject company.

The terms and conditions on which Morningstar Investment Adviser India Private Limited offers Investment Research to clients, varies from client to client, and are spelt out in detail in the respective client agreement.

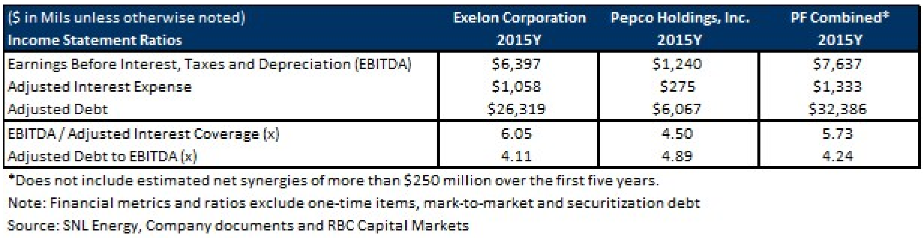
RBC Credit: EXC and POM gain final regulatory approval

Sentiment Indicator : positive

Posted by Leung, Raymond (RBC Capital Markets, LLC) on Thursday, March 24, 2016, 11:05 AM ET

Takeaway: Yesterday, Exelon Corp. and Pepco Holdings Inc. received the final necessary regulatory approval from the D.C regulatory commission and subsequently closed the merger of the two companies. We view the final approval as a modest positive in that it increases Exelon's regulated footprint from about 45% of consolidated 2015 earnings to about two-thirds on a pro-forma basis. We maintain our Outperform rating on Exelon Corp and spreads should grind tighter. Following the news, EXC 3.95% of 2025 notes was quoted at +170 bps.

- After a nearly two-year process, Exelon and Pepco received the final necessary regulatory approval from the D.C. Public Service Commission in a 2-1 vote during an open meeting on March 23.
- The commission accepted the second of the three proposed options provided by the companies on March 7. The second option was largely the settlement presented by the various parties. This option would result in $72.8 million to be allocated toward a "customer investment fund," $11.25 million for energy efficiency programs, and $21.5 million for pilot projects. The decision includes deferring the decision on the allocation of $25.6 million of Customer Base Rate Credit.
- Interveners of the merger may still oppose the merger and potentially appeal through the courts. However, this may be a protracted process and we believe the merger may be difficult to unwind post the integration.
- Subsequently, Exelon and PEPCO announced that the merger closed last night. The merger was initially announced in April 2014.



($ in Mils unless otherwise noted) Income Statement Ratios	Exelon Corporation 2015Y	Pepco Holdings, Inc. 2015Y	PF Combined* 2015Y
Earnings Before Interest, Taxes and Depreciation (EBITDA)	$6,397	$1,240	$7,637
Adjusted Interest Expense	$1,058	$275	$1,333
Adjusted Debt	$26,319	$6,067	$32,386
EBITDA / Adjusted Interest Coverage (x)	6.05	4.50	5.73
Adjusted Debt to EBITDA (x)	4.11	4.89	4.24

*Does not include estimated net synergies of more than $250 million over the first five years.

Note: Financial metrics and ratios exclude one-time items, mark-to-market and securitization debt

Deal Closed! EXC Comes Away With More Regulated Assets in the "POM" of its Hand

Rating Buy. Target $37.50, Up From $35 / Share.

In a 2-1 vote on 3/23/16, the D.C. PSC approved Exelon's acquisition of Pepco Holdings – successfully concluding its bid to acquire POM, which was first announced back in April 2014. All other jurisdictions had approved the merger, with the closing hinging on the outcome of the proceedings in D.C. The approval process in D.C. culminated in a final effort to gain approval on 3/7/16, in which EXC asked for the D.C. PSC to either approve the settlement as originally filed, approve the Revised Non-unanimous Settlement Agreement (RNSA) conditionally approved by the Commission on 2/26/16, or approve a third alternative that adjusted the terms of the RNSA. They pointed out that it was within the Commission's purview to approve the deal on the merits over the objections of settling parties if found in the best interest of ratepayers. The 3/23/16 order approving the deal essentially adopted the RNSA, with Commissioner Fort removing her previous condition that the original settling parties give unanimous approval. Commissioner Kane maintained her dissent. For more information read our 3/7/16 note here.
