## Peoples Natural Gas Company LLC

§ 53.53 III.E
19. Provide growth patterns of usage and customer numbers per rate class, using historical and projected data.

Refer to pages 2-12 of this response. Pages 2-7 provide the data for Peoples Division. Pages 8-12 provide the data for Equitable Division.

For Equitable Division, the information is presented from 2015 forward. Equitable Division was converted to the SAP billing system in July 2015. Data prior to the conversion is unavailable in the required format and is not consistent with postconversion customer classifications.

22. Provide supporting data detailing curtailment adjustments, procedures and policies.

No curtailment adjustments have been made for the twelve months ended September 30, 2018 (test year) and none are anticipated for the twelve months ended September 30, 2019 (future test year).

Peoples' curtailment procedures and policies are contained in Peoples' tariff which is included in its entirety at Exhibit No. 14, Schedule No. 1 (53.53 IV.B.6).

## Peoples Natural Gas Company LLC

§ 53.53 III.E

38. Identify company's policy with respect to replacing customers lost through attrition.

Peoples actively seeks new business opportunities with residential, commercial and industrial developments to replace customers lost through attrition. Peoples has both Outside and Inside New Business (Sales) Departments. The Outside Sales department engages with residential developers and contractors to bring natural gas service to new and growing neighborhoods. In addition, we promote the use of additional gas appliances other than just for heat. The commercial and industrial specialists in the department assist new customers in the evaluation of the benefits and costs of natural gas in comparison to alternate fuels to encourage the use of low cost, locally produced natural gas. Our goal is to do more than simply deliver natural gas to the customer, we want to be a partner and provide Energy Solutions for them. Whether it's new construction, or a customer evaluating their energy portfolio, we are able to help identify the best solution. Our Inside Sales Department focuses on ease/convenience of applying for and receiving new service. We've recently added a new concierge service to simplify the connection process for builders and developers. This one-stop shop provides a direct phone number to one of our sales representatives. We provide personalized service and direct feedback to them resulting in a more efficient process and a better customer service experience. In addition, a recent renewed focus on temporary construction heat has resulted in a new process which has been embraced by the builder/developer community. This program, administered by our concierge service, ensures that natural gas service is available in the early stages of development. This new process ensures there are no delays in permanent service once they are ready. These programs are offered to both the commercial and residential markets. We plan to grow this market in the future.

The Company manages a robust cold weather survey process which seeks to encourage occupants of homes that do not have active natural gas service to pursue reconnection. The survey process uses multiple outreach methods including letters through US mail, phone calls to the last known phone number and in-person visits to the premises. The information provided to the former customer or current resident includes materials about available energy assistance programs and payment plans to encourage those who may have arrears to apply for service. The survey process begins in the fall and is repeated again in the winter months, resulting in numerous attempts for each contact method.

Rules and regulations regarding service application processes are detailed in the Company's tariff, which is provided as Exhibit No. 14, Schedule 1.

39. Identify procedures developed to govern relationship between the respondent and potential customers-i.e., basically expansion, alternate energy requirements, availability of supply, availability of distribution facilities, ownership of metering and related facilities.

Refer to page 2 of this response for the gas application that the Company requests customers complete to apply for service. Page 3 of this response is the internal service application, used to determine what is needed to service a potential new customer. Page 4 of this response is the process flow diagram describing how an application is processed.

Note: Abbreviations used in process flow diagram represent the following:
CFH - cubic feet per hour
HP - high pressure
MLX - mainline extension
SPL - split
Refer to Peoples Natural Gas - Tariff No. 45, Section 4 in the Rules and Regulations titled "Connections for Service - Extension of Facilities" and Peoples Natural GasEquitable Division - Tariff No. 46, Section 1.2 in the Rules and Regulations titled "Applications For Service Extension of Mains" located in Exhibit 14, Schedule 1.

The following is intended for those attempting to establish gas service at a property that has never before had service or has been disconnected from our main line OR to change the current load or meter requirements at an existing location.

For further assistance or questions, please email Marketing@peoples-gas.com or call (866) 654-4660, Monday-Friday 08:00-16:00 EST. To submit this application, email the completed form to Marketing@peoples-gas.com for processing.

Updated 15 Nov 2018

# Peoples Natural Gas Company LLC <br> Peoples Division 

§ 53.53 III.E
7. Provide details of respondent's attempts to recover uncollectible and delinquent accounts.

When timely payments are not received on customer accounts, the Company sends payment reminders. The first notification to a customer that an adequate payment has not been received is a bill reminder. If the bill reminder does not result in either a payment or payment arrangement, the termination process begins. A written termination notice is issued. If a valid phone number exists on the account, two attempts are made to reach the customer by phone to discuss the termination notice and payment arrangements. If a valid phone number is not available, a field visit is made to post a notice advising the customer that service could be terminated in 72 hours if payment is not made. If these steps fail to bring the customer's account to a current status or the customer does not enter into an acceptable payment arrangement, the customer's gas service is scheduled for termination. In cases of Protection from Abuse (PFA) or winter heating season, Peoples follows all established PA PUC guidelines and regulations.

In order to reduce the level of uncollectible balances, the Company follows the security deposit rules established by the PA PUC, 52 PA Code, Chapter 56. When applicants are identified as credit risks, a security deposit based on two months' average consumption for the property is required. If a current customer's service is terminated for non-payment, the company requires a security deposit as a condition for reconnection.

The Company has a specialized team to monitor and contact customers that start to accrue higher balances.

When a customer's service is discontinued, a final bill is issued. If the final bill is not paid by the due date, a reminder letter is mailed. If merited, customers are able to enter into a reasonable payment agreement on a final bill by contacting the Company. If the account remains delinquent, the account is sent to a third party agency for further collection efforts.

When an applicant applies for service, the Company completes a review of its records to determine if the customer has an outstanding balance from another service address. If one exists, payment in full of the balance or a payment arrangement under PA PUC 52 PA Code, Chapter 56 guidelines is entered.
