#### 2018 Expense

We have calculated 2018 expense for both plans based on the assumptions selected for year-end 2017 disclosure. These expense amounts generally will be final unless there are significant events or changes (e.g., changes in plan provisions, early retirement windows, acquisitions, spinoffs, etc.) which would impact the results.

#### **Entity Splits**

As requested, we have enclosed the December 31, 2017 disclosure and 2018 expense results, split by the various entities in the plan (Peoples TWP, Equitable Gas Company, Peoples Service Company, and Peoples Natural Gas). Liability has been determined for each entity based on the location for participants at the end of 2017. Assets have been allocated to the entities in proportion to the liabilities for each entity. Consistent with last year, all contributions have been allocated to the entity for Peoples Natural Gas.

#### Additional Information Regarding Plan Disclosures

The enclosed information documents the results of the December 31, 2017 accounting actuarial valuations of the pension plans of Peoples Natural Gas Company LLC ("PNG"). The information provided in the letter is intended strictly for documenting the pension cost for the 2017 fiscal year and information relating to company disclosure and reporting requirements as of December 31, 2017. Determinations for purposes other than the financial accounting requirements may be significantly different from the results reported in this letter. Thus, the use of this information for purposes other than those expressed here may not be appropriate.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board. In addition, the valuation results are based on our understanding of the financial accounting and reporting requirements under U.S. Generally Accepted Accounting Principles and set forth in Accounting Standards Codification (ASC) Topic 715, including any guidance or interpretations provided by PNG and reviewed by its auditors prior to the issuance of this letter. The information in this letter is not intended to supersede or supplant the advice and interpretations of PNG's auditors.

Ms. Shelly Zerjav Page 3 January 30, 2018

Future actuarial measurements may differ significantly from the current measurements presented in this report due to (but not limited to) such factors as the following:

- Plan experience differing from that anticipated by the economic or demographic
- Changes in actuarial methods or in economic or demographic assumptions
- Increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status)
- Changes in plan provisions or applicable law

Due to the limited scope of our assignment, we did not perform an analysis of the potential range of such future measurements.

Funded status measurements shown in this report are determined based on various measures of plan assets and liabilities. For company and plan disclosure and reporting purposes, funded status is determined using plan assets measured at market value. These funded status measurements may not be appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations and funded status measurements for company and plan disclosure and reporting purposes may not be appropriate for assessing the need for or the amount of future contributions.

In determining information relating to plan disclosure and reporting requirements, Aon may be assisting the appropriate plan fiduciary as it performs tasks that are required for the administration of an employee benefit plan. Aon also may be consulting with the employer/plan sponsor (PNG) as it considers alternative strategies for funding the plan, or as it evaluates information relating to employer reporting requirements. Thus, Aon potentially will be providing assistance to PNG (and/or certain of its employees) acting in a fiduciary capacity (for the benefit of plan participants and beneficiaries) and to PNG (and/or its executives) acting in a settlor capacity (for the benefit of the employer sponsoring the plans).

In conducting the valuation, we have relied on personnel, plan design, and asset information supplied by PNG as of the valuation date. While we cannot verify the accuracy of all this information, the supplied information was reviewed for consistency and reasonability. As a result of this review, we have no reason to doubt the substantial accuracy or completeness of the information and believe that it has produced appropriate results.

Each significant assumption used in this actuarial valuation represents, in our opinion, a reasonable expectation of anticipated experience under the plan.

The preparation of the valuations included actuaries familiar with the near-term and long-term aspects of pension valuations. These actuaries meet the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinions herein. The information provided in this letter is dependent upon various factors as documented throughout this letter, which may be subject to change.

To our knowledge, no associate of Aon providing services to PNG has any material direct or indirect financial interest in PNG. Thus, we believe there is no relationship existing that might affect our capacity to prepare and certify this actuarial report for PNG.

Please let us know if you have any questions or need additional information.

Sincerely,

Aon

## Peoples Natural Gas Company LLC Standard Data Request Revenue Requirements

RR 39. Please reconcile the historical and future test year SFAS No. 106 expense levels with the amount identified in the actual report.

\* \* \* \* \* \* \* \* \* \* \* \* \* \*

There is a \$234,752 difference between the Gross HTY expense recorded and the expense identified in the Actuarial Report. The difference is due to three months of 2017 expense and nine months of 2018 expense being included in the HTY whereas the Actuarial Report is on a Calendar Year basis. Also, a portion of the Equitable Division expense is allocated to other companies.

There is a \$72,110 difference between the Gross Estimated FTY expense and the FTY OPEB Actuarial projected expense for 2019. The difference is due to a portion of Equitable Division expense being allocated to other companies.

There is a \$67,274 difference between the Gross Estimated FPFTY expense and the FPFTY OPEB Actuarial projected expense for 2020. The difference is due to a portion of Equitable Division expense being allocated to other companies.

Refer to Page 2 for a detailed reconciliation of these periods.

Refer to Exhibit 4, Schedule 3 for the Actuarial Report.
