PA PUC  
SECRETARY'S BUREAU

Subject: Docket Numb: A-2018-3004933

Dear Sirs:

My wife and I are currently retired and living off Social Security, which the current administration is trying to undermine it and Medicare to justify the **BIG** tax cuts they just gave to the big corporations and super wealthy. We are living on a fixed income and there is no big SS increase planned that I am aware of to offset the rising cost of Health Care, drugs, food, and most everthing else.

Selling the waste water treatment plant to a private corporation, which has as it's first priority to maximize profitable returns to it's stock holders, is just another stab in the back to the average American. Our Health Care system was changed over to "For Profit" system and now we pay double what people in other countries pay, and the cost just keep rising. "**The System**" is grinding the little guy into the ground ! We need our government officals to stand up to the big corporations and stop this systematic beating down of the average person.

Exeter's rates are already higher than Reading's rates and other communities in our area, so why should we have to bear the burden of even higher sewer rates ?

Please do not allow this acquisition to go through !

Sincerly  
Kenneth & Susan Bryant
