**Re: Periodic Review of Metropolitan Edison Company's Long-Term
Infrastructure Improvement Plan**

Dear Ms. Giesler:

The Commission is required to review a utility's Long-Term Infrastructure Improvement Plan (LTIIIP) periodically, but at least once every five (5) years.¹ Unless otherwise directed, the review shall begin at the midpoint of the term of the current LTIIIP. Metropolitan Edison Company's (Met-Ed's) current LTIIIP began with calendar year 2020 and thus the midpoint is approximately July 1, 2022.

Met-Ed is hereby notified that the Commission will begin the review of its LTIIIP on April 1, 2022, at the above captioned docket number. The Commission's review will determine:

1. If Met-Ed has adhered to its LTIIIP
2. If changes to the LTIIIP are necessary to maintain and improve the efficiency, safety, adequacy, and reliability of Met-Ed existing distribution infrastructure.

Upon completion of the review, the Commission shall issue an Order with a determination of whether Met-Ed has adhered to its LTIIIP and if any changes to the LTIIIP are necessary. The Commission will direct Met-Ed to revise, update, or resubmit its LTIIIP as appropriate if it determines Met-Ed's approved LTIIIP is no longer adequate to ensure and maintain efficient, adequate, safe, reliable, and reasonable service. Upon such a determination, Met-Ed may elect to withdraw its LTIIIP rather than comply with the Commission's direction. Met-Ed's approved distribution system improvement surcharge (DSIC) mechanism would immediately terminate upon such a withdrawal.

To aid in its review the Commission is establishing a thirty (30) day comment period beginning from the date of this letter and a twenty (20) day reply comment period.² A copy of this letter has been served upon the statutory advocates, the Bureau of Investigation & Enforcement, and the parties of record from Met-Ed's most recent base rate case proceeding, consistent with the LTIIIP filing and review procedures.³ For comments, the Commission strongly encourages
