

15 Feb 2024

Over the course of the last 26 months my daily usage of electricity was negative however the average daily cost was positive. If I average it over 26 months my usage is down 4% but average daily cost is up 7.4%. My monthly bills are well of \$300 a month. In July 2022 my bill states my usage went up \$60 even though I wasn't home for an entire week. Jan 2023 bills \$488 usage charges, Feb 2023 \$541 usage charge, March 2023 \$707 usage charge, April 2023 \$500 usage charges, May \$322. usage charges, June & July 2023 dropped to the \$200 however bill was over \$400 per month. If one is on a budget plan or not, the amount they are being charged is ridiculous.
