RE: M-2023-3038060

To Whom it May Concern:

My electric carrier is PPL and my electric bill doubled (and even more) around November, 2022. My bills ran between \$50 and \$75 a month even in winter, then the amounts jumped to over \$150 a month, even hitting \$195 with no change in my daily electricity usage.

I am not at all computer savvy and I'm not even sure I have this in the right place, but, found there is a deadline of 4:30 this afternoon to submit.

A handwritten signature in cursive script that reads "Jerry E. Hauck".
