I. Executive Summary

Section 54.203 of the PA Code requires electric distribution companies (EDCs) to file quarterly reports on retail sales activity of electric generation suppliers (EGSs) operating in their service territory. These filings provide aggregate EGS market-share data for the number of customer accounts and MWh sales. Additionally, Section 54.203 of the PA Code requires active EGSs to file an annual report by April 30 for the previous calendar year. These filings provide aggregate data on the number of accounts served, as well as customer accounts that participate in various EGS programs. The programs include flat and time-varying rates, fixed-term contracts, green power and curtailable contract information, as well as information on which EGSs are providing supplier billing services.

(b) “MWh Sales” data is the quarterly sum of each quarter reported during the year.

A. Number of Customer Accounts

1. Residential and Non-Residential

During 2014, the total number of EGS customer accounts decreased 4 percent. EGS customer accounts in the residential and non-residential classes decreased 4 percent and 3 percent respectively.

PPL Electric Utilities Corp. (PPL), PECO Energy Company (PECO) and Duquesne Light Company (Duquesne) had the highest number of EGS customer accounts, predominantly in the residential class. EGS market share in these EDC service territories generally decreased during each quarter of the period.

2. Small, Medium and Large Non-Residential

As of Dec. 31, 2014, the category of small non-residential customers had the highest number of EGS non-residential customer accounts, while large non-residential was the category with the most EGS MWh sales. On a total basis, the category of large non-residential had the highest percentage of customer accounts and MWhs served by EGSs. B. MWh Sales

1. Residential and Non-Residential

EGS sales in Pennsylvania totaled 81,319,726 MWhs during the 12-month period from Jan. 1, 2014 to Dec. 31, 2014. This represents an increase of 891,441 MWhs (1 percent) compared to 80,428,285 MWhs during the 12-month period from Jan. 1, 2013 to Dec. 31, 2013. From the first quarter to fourth quarter of 2014, EGS sales decreased 11 percent. EGS MWh sales in the residential and non-residential classes decreased 29 percent and 5 percent, respectively.

For the year, PECO, West Penn Power Company (West Penn) and Duquesne had the highest EGS MWh sales in 2014, predominantly in the non-residential sector. However, as shown below, EGS MWh sales in these EDC service territories increased or decreased depending on the quarter. This variation could be due to seasonal weather factors.

PECO, Metropolitan Edison Company (Met-Ed), Pennsylvania Electric Company (Penelec), PPL and UGI Utilities (UGI) reported TOU customer accounts, predominantly in the residential class. The medium non-residential class had the most non-residential EDC TOU customer accounts. See the Appendix for definitions of small, medium and large non-residential classes.

B. Hourly/Real-Time Price

During 2014, the number of EDCs' hourly/real-time price customer accounts increased 2 percent, while MWh sales decreased 4 percent. PECO, Duquesne, Met-Ed, Penelec, West Penn, Pennsylvania Power Company (Penn Power), PPL and UGI reported hourly/real-time price customer accounts only for the non-residential class. The large non-residential class had the most hourly/real-time price customer accounts. See Appendix for definitions of small, medium and large non-residential classes.

IV. Number of Active EGSs in EDC Service Territories

This section summarizes the number of active EGSs serving customer accounts in EDC service territories on Dec. 31, 2013, and Dec. 31, 2014. An active EGS is defined as “an EGS that is licensed to provide retail electric generation service and is providing that service to one or more customers.” The data is presented for residential/non-residential and small, medium and large non-residential classes.

From Dec. 31, 2013, through Dec. 31, 2014, the number of active EGSs increased in Citizens, Duquesne, UGI, Met-Ed, Penelec, PennPower, PECO, PPL and West Penn service territories. PPL, PECO and Duquesne reported the most active EGSs during this period, predominantly in the non-residential class. The small non-residential class had the most active non-residential EGSs. See Appendix for definitions of small, medium and large non-residential classes.
