

ALTERNATE ENERGY PORTFOLIO STANDARDS PROGRAM ADMINISTRATOR  
REQUEST FOR PROPOSAL  
PUC RFP 2025-1  
QUESTIONS AND ANSWERS

**1. We noted that another Pennsylvania RFP recently released by the DEP, DEP-RFP005364 Home Efficiency Rebate Program, allows for firm fixed price pricing by task. Would the PUC entertain allowing similar firm fixed price submission by task for the cost submittal for this RFP?**

A. No. The contract is a price not to exceed, fee for service contract. Therefore, an itemization of fees (hourly rates, etc) that will be billed for services is necessary for billing and contract expenditure control throughout the contract term. The pricing methodology proposed by the question is not acceptable in response to the RFP.

**2. Regarding PUC RFP 2025-1 for the Alternative Energy Portfolio Standards Program Administrator, is there guidance on available budget or topline cost? Thank you.**

A. The current AEPS administrator under contract with the Commission is InClime, Inc.

There is no currently designated budget amount for the entire 5 year AEPS administrator project.
