Francine Schmitt, Advisor

Dear Commissioners:

Please accept the following letter from DCNR. We feel that this letter reinforces the community's position: that the Cross Country route is an exceptional natural resource area, which deserves to be preserved and protected.

In this instance, the utility company has understated the value of region as a natural resource. It also failed to do the necessary comparative studies of the alternative routes.

The community requests and expects that the Commissioners will reject PPL's application based on the merits of this case and the need to set responsible standards for the protection of endangered watershed systems.

Respectfully,

Karl Schwartz  
Vice Chair, Springfield Bucks Undesirable Land Use (Sbulu.org)
