December 21, 2009

Mr. James McNulty, Secretary Pennsylvania Public Utility Commission Commonwealth Keystone Building 400 North Street Harrisburg, PA 17105-3265

RE: PECO Energy Supplement No. 1 to Tariff Electric PA PUC No. 4
2009 Electric Tariff price changes in compliance with the Order at
Docket No. M-2009-2093215 approving the PECO Energy's Energy Efficiency and
Conservation Plan

Dear Mr. McNulty:

Enclosed for filing with the Commission are eight copies of PECO Energy Company's Supplement No. 1 to Tariff Electric PA PUC No. 4 ("Default Service Rates"), issued December 21, 2009, to become effective **January 1, 2011**, containing the Energy Efficiency and Conservation Surcharge as allowed by the Commission in its Final Order at Docket Number M-2009-2093215 entered October 28, 2009.

Would you please acknowledge receipt of the foregoing on the enclosed copy of this letter. A business reply envelope is enclosed for your convenience.

Richard G. Webster fr. / por

Sincerely,

PENNSYLVANIA PUBLIC UTILITY COMMISSION

PECO Energy Company

Docket No. M-2009-2093215

GENERATION SUPPLY ADJUSTMENT FOR PROCUREMENT CLASSES 1,2,3 LOADS UP TO 500KW

Applicability: This adjustment shall apply to all customers taking default service from the Company with demands up to 500 kW. The rate contained herein shall be calculated to the nearest one hundredth of a cent. The GSA shall contain the cost of generation supply for each tariff rate.

Pricing: The rates below shall include the cost of procuring power to serve the default service customers plus associated administrative expenses incurred in acquiring power and gaining regulatory approval of any procurement strategy and plan. The pricing for default service will represent the estimate of the cost to serve the specific tariff rate for the next quarter. The rates in this tariff shall be updated quarterly unless the balance of over/(under) recovery gets too large, at which time the Company can file for a shorter reconciliation period. The generation service charge shall be calculated using the following formula:

$GSA(n) = (C+E+A)/S*1/(1-T)* (1-ALL)/(1-LL) \times PF$ where;

C= The sum of the amounts paid to the full requirements suppliers providing the power for the quarter, the spot market purchases for the quarter, plus the cost of any other energy acquired through short or long term contracts during the period being reconciled. Cost shall include energy, capacity and ancillary services, distribution line losses, cost of complying with the Alternative Energy Portfolio Standards, and any other load serving entity charges other than network transmission service and costs assigned under the Regional transmission Expansion Plan. Ancillary services shall include any allocation by PJM to PECO default service associated with the failure of a PJM member to pay its bill from PJM as well as the load serving entity charges listed in the Supply Master Agreement Exhibit D as the responsibility of the supplier.

E = experienced over or under-collection calculated under the reconciliation provision of the tariff to be effective during the same period as the GSA.

A = Administrative Cost - This includes the cost of the auction or RFP monitor, consultants providing guidance on the development of the procurement plan, legal fees incurred gaining approval of the plan, and any other costs associated with designing and implementing a procurement plan. Also included in this component shall be the cost to implement real time pricing or other time sensitive pricing such as super-peak pricing that is requied of the Company or is approved in its Act 129 filing. (C

S = Estimated sales for the period the rate is in effect for the classes to which the rate is applicable.

T = The currently effective gross receipts tax rate

n = The procurement class for which the GSA is being calculated

ALL = average line losses for the procurement class

LL = line losses for the specific rate class provided in the Company's Electric Generation Supplier Coordination Tariff rule 6.6

PF = Phase-out factor to implement the phase out of demand charges and declining blocks

In general the line loss adjustment is applicable to Procurement Class 2 and 3 only as those classes contain rate classes with three different line loss factors.

(C) Denotes Change

PECO Energy Company

RECONCILIATION

Applicability: This adjustment shall apply to all customers who received default service during the quarter the cost of which is being reconciled. Customers taking default service during the reconciliation period that leave default service prior to the assessment of the collection of the over/(under) adjustment shall still pay or receive credit for the over/(under) adjustment through the migration provision. The Company shall notify the Commission and parties to the Default Service Settlement 15 days in advance of the quarterly or monthly filling if the Migration Provision will be implemented in the filling.

This adjustment shall be calculated on a quarterly basis. The reconciliation shall be separate for each procurement class. Any resulting over or under recovery shall be assessed on an equal cents per kilowatthour basis to all customers in the relevant procurement group. Any over/(under) recovery shall be collected in the first quarter after the reconciliation is calculated. For purposes of this rider the reconciliation shall be calculated 45 days after the end of the quarter. The over or under recovery shall be calculated using the formula below. The calculation of the over/(under) recovery shall be done separately for the following procurement classes – Class 1 – Residential, Class 2 – Small C&I < 100 kW, and Class 3 – Medium C&I 101 kW to 500 kW and Class 4 Large C&I over 500 kW.

Reconciliation Formula

 $E_N = \Sigma O/(U) + I$

Migration Provision $E_M = [\Sigma O/(U) + I]/S/(1-GRT)*(1-ALL)/(1-LL)$

Where

E = experienced over or under collection plus associated interest

N = Procurement class

M = Mitigation Rider

O/(U) = The monthly difference between revenue billed to the procurement class and the cost of supply as described below in Cost and Administrative Cost

Revenue = amount billed to the tariff rates applicable to the procurement class including approved Real Time Price or other time sensitive rates for the three months of the quarter being reconciled through the GSA.

(C)

Cost = The sum of the amounts paid to all of the

full requirements suppliers providing the power for the quarter, the spot market purchases for the quarter, plus the cost of any other energy acquired through short or long term contracts during the period being reconciled. Cost shall include energy, capacity and ancillary services. Ancillary services shall include any allocation by PJM to PECO default service associated with the failure of a PJM member to pay its bill from PJM as well as those costs listed in the Supply Master Agreement as the responsibility of the seller

Administrative Cost = This includes the cost of the auction or RFP monitor, consultants providing guidance on the development of the procurement strategy, legal fees incurred gaining approval of the strategy, and any other costs associated with designing and implementing a procurement plan. Also included in this component shall be the cost to implement real time pricing or other time sensitive pricing such as super-peak pricing that is required of the Company or approved in its Act 129 filing.

(C)

Full Requirements Supply = A product purchased by the Company that includes a fixed price for all energy consumed. The only cost added by the Company to the full requirements price is for gross receipts tax, distribution line losses, and administrative cost.

Ancillary Services = The following services in the PJM OATT- reactive support, frequency control, operating reserves, supplemental reserves, imbalance charges, PJM annual charges, any PJM assessment associated with non-payment by members, and any other load serving entity charges not listed here but contained in Exhibit D of the Supply Master Agreement.

Capacity = The amount charged to PECO by PJM for capacity for its default service load under the reliability pricing model (RPM)

I = interest on the over or under collection where a rate of 8% is used on over-collection and 6% on under-collections.

S= estimated default service retail sales in kWh for the quarter the cost of which is being reconciled

ALL = the average line losses in a procurement class as a percent of generation

LL = the average line losses for a particular rate (e.g. HT, PD, GS) as provided in the Electric Generation Supplier Coordination Tariff rule 6.6

GRT = The current gross receipts tax rate

Procurement Class - set of customers for which the company has a common procurement plan

Procedural Schedule

The Company shall file within 45 days after the end of the quarter the calculation of the over/under collection and the proposed adjustment to the GSA. The over/under collection adjustment shall then be effective no earlier than the first day in the upcoming quarter such that the recovery shall lag by one quarter. Quarterly adjustments shall be effective on July 1, October 1, January 1, and April 1 of each year. The first reconciliation, however shall be effective on July 1, 2011 and shall be recovered over 12 months. Monthly only customers shall be effective the first of the month.

The data provided in the quarterly reconciliation shall be audited on an annual basis by the PaPUC Bureau of Audits.
