TO WHOM IT MAY CONCERN:

TO COMMISSION RE: AGRON VATA vs PHILADELPHIA GAS WORKER.

Exceptions:

Dear Judge Wayne L. Weismandel; after reading the decision made on the case of Agron Vata vs. Philadelphia Gas Worker, we decided to appeal for the following reasons:

1. The lean placed on my property on the amount of \$ 1,445 is a service: requested, used and signed from Miss. Patricia Mcmillan and not me. The PGW turned ON the service with her request and not mine. But the lean is on my name.

2. Second, as a landlord I didn't collect rent from Miss Mcmillan for several months and I was not capable of evicting her without a Court Order, but in contrast PGW, let Miss Mcmillan use the service for more than six months with out paying and never tuned the service OFF. PGW does not need a Court Order to do so.

3. As a landlord I tried to do everything in my power to prevent it from happening . I called PGW and asked the representative but the answer was: " It is against the Law to give any information since the account is not on my name"

I tried to registered with the Landlord program on line and it took me three long moths for somebody to even answer my numerous complaining e-mails for not being able to register.

4. After Miss. Mcmillan was evicted from the property, PGW contacted me right away for access to the property so PGW can shut off the service. Every thing was solved in 30 minutes.....Wouldn't have been more easy to all of us if PGW would have contacted me months and months in advance? We would not be here today!

5. The last and the most important, as a landlord I don't know in the future what more I can do to prevent this, from happening again. Every time I tried to reach PGW, I hit the wall and I can't afford to go through the same thing over and over again.

Those are our main reasons for appealing the court decision. We are hard working people and strong believers on the Law and Justice. Please consider our complains and the request for an Appeal, so our voice can be heard too.

With respect : AGRON VATA
