

Q.2. Provide comparisons in either graphical or tabular form showing cost, as defined in the cost of service study, and proposed base rate revenues and usage for all residential and demand/energy rate schedules. Demand shall be for representative loads for each demand/energy rate schedule.

A.2. Attachment IV-E-2 provides cost comparison curves for specific general service rate schedules. The following tabulation shows representative KW loads used for each rate schedule.

Present Rate Schedule	KW Values			
GH-1	10	25	46	244
GS-1	5<	5	6	16
GS-3	25	33	55	212
LP-4	116	401	812	2,250
ISP	673	793	1272	1,346
LP-5	595	2909	4201	10,162

Cost data for other rate schedules, which contain both a demand and energy charge, are not available.

The curves shown in Attachment IV-E-2 use load research, factorial relationships, and unit cost information. The cost portion of the curves should be viewed as an approximation of the cost trends developed from limited data and observations. Curves for Rate Schedules RS, RTS, and RTD are not available due to insufficient load research and cost data.
