

**Tariff Wastewater PA P.U.C. No.11
Canceling Wastewater PA P.U.C. No. 6**

Pennsylvania-American Water Company
Claysville Wastewater Operations
(Hereinafter referred to as the "Company")

D/B/A

Pennsylvania American Water

RATES, RULES AND REGULATIONS
GOVERNING THE PROVISION OF WASTEWATER
COLLECTION TREATMENT AND/OR DISPOSAL SERVICE
TO THE PUBLIC IN CLAYSVILLE BOROUGH, DONEGAL
TOWNSHIP, WASHINGTON COUNTY

ALL IN THE COMMONWEALTH OF PENNSYLVANIA

This tariff makes increases and changes to existing
rates, rules and regulations.

Issued: April 23, 2010

Effective: June 22, 2010

By: Kathy Pape, President
Pennsylvania-American Water Company
800 West Hersheypark Drive
Hershey, PA 17033

LIST OF CHANGES

Increases/Decreases

This tariff provides for one set of uniform rates for the Company's Claysville Wastewater Operations. All metered and unmetered charges have been increased for an overall increase of 157.73%.

The Company is proposing to change service charges and increase volumetric charges for each bill class, thus moving revenues more in-line with the cost of providing service.

A \$100 service lateral inspection fee has been added.

A \$30 service reconnection and discontinuance fee has been added.

A \$20 return check fee has been added.

The Company is adding a service charge discount of 65% for qualifying low income customers.

Changes

The entire set of Rules and Regulations has been revised to more closely align with the Commission's generic set of Wastewater Rules and Regulations and to also better reflect the actual operations of the Claysville Wastewater system, therefore this section has not been redlined.

TERRITORIES SERVED

Washington County

Claysville Borough and portions of the Township of Donegal.

Part I: Rates

Schedule of Rates Applicable to Claysville Wastewater Operations (I)

Metered Rates

Service Charges:

All metered customers shall be subject to a monthly service charge.

<u>Bill Class</u>	<u>Monthly Service Charge</u>
Residential	<u>\$25.00</u>
Commercial	<u>40.00</u>

Usage Charge For All Bill Classes:

Per 100 gallons of metered water or wastewater usage \$2.100

Flat Rates

Residential Flat Rate of \$92.75 per month shall be billed to each unmetered customer.

Schedule of Miscellaneous Fees and Charges

A. Service Lateral Inspection Fee (C) (I)

A \$100 inspection fee will be charged for the Company's time involved in the inspection of a service lateral tie-in to the Company's wastewater system.

B. Service Reconnection and Discontinuance Fee (C) (I)

A fee will be charged for the shut-off and turn-on of any service. The fee for service performed during regularly scheduled hours shall be \$30.00. For non-regularly-scheduled working hours, the fee is equivalent to the cost incurred by the Company. The Service Reconnection and Discontinuance Fee will apply only once if the customer is both a water and wastewater customer of the Company.

C. Return Check Charges (C) (I)

The customer will be responsible for the payment of a \$20.00 charge for each time a check presented to the Company for payment on that customer's utility bill is returned by the payer bank for any reason including, but not limited to, insufficient funds, account closed, payment stopped, two signatures required, post-dated, stale date, account garnished, or unauthorized signature. This charge is in addition to any charge which may be assessed against the Customer by the bank. The Return Check Charge will apply only once if the customer is both a water and wastewater customer of the Company.

Schedule of Rates Applicable to All Rate Zones
For Qualifying Low-Income Customers (C)

Tariff Qualifications

In order to qualify to be billed under this tariff, a customer must meet the low-income criteria of 150% based on the Federal Poverty Level. After qualifying to be billed under this tariff, customers must continually make timely payments on the discounted bills.

Rates for Service

The rates for the service charge or minimum bill under this tariff will be 35% of the prevailing service charge or minimum bill in the rate zone where service is received.

The rate for wastewater usage shall be billed at the existing rates applicable to the rate zone where service is received.

STATE TAX ADJUSTMENT SURCHARGE

In addition to the net charges provided for in this Tariff, a surcharge of negative 0.00% will apply to all services rendered.

The above surcharges will be recomputed, using the elements prescribed by the Commission whenever any of the tax rates used in calculation of the surcharge are changed.

The above recalculations will be submitted to the Commission within 10 days after the occurrence of the event or date which occasioned such recomputations. If the recomputed surcharge is less than the one in effect, the Company will, and if the recomputed surcharge is more than the one in effect the Company may, submit with such recomputation a Tariff or Supplement to reflect such recomputed surcharge, the effective date of which shall be 10 days after filing.

PART II: DEFINITIONS

The following words and phrases, when used in this tariff, shall have the meanings assigned below unless the context clearly indicates otherwise:

1. **Applicant:** A person, association, partnership, corporation, municipality, authority, state or federal governmental agency or other entity who applies to become a customer of the Company in accordance with Part III, Section A, of this tariff.

2. **B.O.D. (Biochemical Oxygen Demand):** The quantity of oxygen, expressed in milligrams per liter, utilized in the biochemical oxidation of organic matter under the standard laboratory procedure for five (5) days at twenty (20) degrees Centigrade. The standard laboratory procedure shall be that found in the latest approved edition of "Standard Methods for the Examination of Water and Sewage" published by the American Public Health Association.

3. **Commission:** The Pennsylvania Public Utility Commission.

4. **Company:** Pennsylvania-American Water Company and its duly authorized officers, agents and employees, each acting within the scope of his authority and employment.

5. **Company Service Lateral:** Company owned wastewater service lateral from the sewer main of the Company which connects to the Customer Service Lateral at the edge of the right-of-way or actual property line.

6. **Customer:** A person or entity who is an owner, occupant or who contracts with the Company for or who takes or receives wastewater collection, treatment and/or disposal service.
7. **Customer Service Lateral:** Customer owned wastewater service lateral extending from the end of the Company Service lateral or connection to and within the customer's premise.
8. **Domestic Wastewater:** The liquid waste or liquid borne waste: (1) resulting from the non-commercial preparation, cooking and handling of food; (2) consisting of human excrement; or (3) consisting of wastewater, non-commercial laundering water, domestic housekeeping wastewater, and similar types of wastes from sanitary uses, whether generated in residences or sanitary facilities in commercial or industrial facilities, but does not include any storm water or ground water introduced from facilities such as roof leaders, sump pumps, floor drains or industrial wastewater. Domestic Wastewater includes sanitary wastes having suspended solids (SS) less than 300mg/L, 5 day Biochemical Oxygen Demand (BOD%) less than 300 mg/L, and a chlorine demand less than 25mg/L.
9. **Dwelling Unit:** A structure or dwelling intended to be occupied as a whole by one family.
10. **Equivalent Dwelling Units (EDU):** The EDU is a measure based upon the estimated average daily wastewater flow for the type of business, as calculated by the PaDEP Regulation at 25 Pa Code: 73.17 divided by the typical estimated average daily wastewater flow from a current single-family unit (One EDU shall be equal to 262.5 gallons per day of sewage for a single-family unit, unless modified by the Company).
11. **Garbage:** The solid wastes from domestic cooking and dispensing of food, and from the handling and storage of produce.
12. **Garbage Properly Shredded:** The term "Properly Shredded Garbage", as used herein, shall mean the wastes from the preparation, cooking, and dispensing of food that have been shredded to such degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half inch in dimension.

13. **Grinder pump:** Any mechanical or powered device, owned by the Customer, used to grind, macerate or fluidize garbage so that it can be discharged into the Sanitary Sewer.
14. **Industrial/Commercial Wastes:** Any liquid, gaseous or water borne wastes from industrial processes or commercial establishments, as distinct from domestic wastewater.
15. **Industrial/Commercial Waste Permit:** A wastewater permit issued as required by the Company to an Industrial/Commercial user which discharges Industrial/Commercial Waste.
16. **Industrial/Commercial Waste Pretreatment Program:** A program established by the Company that requires industrial and commercial dischargers to monitor, test, treat and control as necessary pollutants in their wastewater prior to discharge into the Sanitary Sewer.
17. **Line extension (for line extension purposes):** An addition to the Company's main line which is necessary to serve the premises of a Customer. Refer to Section G.
18. **Main:** The Company's pipe, excluding service connections, located in a public highway, street, alley or private right-of-way which pipe is used in transporting wastewater.
19. **Meter:** Any device supplied by the Company or other for the purpose of measuring water consumption or wastewater discharge.
20. **Nonresidential Service:** Wastewater service supplied to a commercial or industrial building, including a hotel or motel, or to a master-metered trailer park or multi-tenant apartment building, or to any customer who purchases wastewater service from the Company for the purpose of resale.
21. **Pretreatment:** The application of physical, chemical and/or biological processes to reduce the amount of pollutants in, or alter the nature of the polluting properties of, an industrial/commercial process wastewater prior to discharging such wastewater into the Sanitary Sewer.
22. **Public Utility:** Persons or corporations owning or operating equipment or facilities in this Commonwealth for water, electric, and natural gas service, or wastewater collection, treatment, or disposal, to or for the public for compensation.

23. **Residential Service:** Wastewater service supplied to an individual single-family residential dwelling unit.
24. **Regulatory Agency:** Agencies, including but not limited to the Commission, the Pennsylvania Department of Environmental Protection (DEP), U.S. Environmental Protection Agency (EPA), which have authority over the operations of and/or discharges into and/or from the Company's treatment facilities.
25. **Sanitary Sewer:** A sewer which primarily carries sanitary wastewater, together with such storm, surface and ground water as may be present.
26. **Storm Sewer:** A sewer which carries surface, ground water, or storm water from the buildings, ground, streets, or other areas.
27. **Suspended Solids:** Solids that either float on the surface of, or are in suspension in water, wastewater, or other liquids, and which are largely removable by filtration.
28. **Tariff:** All of the service rates, rules and regulations issued by the Company, together with any supplements or revisions thereto, officially approved by the Commission and contained in this document.
29. **Toxic Substances:** Any substances where gaseous, liquid or solid waste which, when discharged to a public sewer in sufficient quantities, will be detrimental to any biological wastewater treatment process, constitute a hazard to human beings or animals, inhibit aquatic life, or create a hazard to recreation in receiving waters of the effluent from a wastewater treatment plant, or as defined pursuant to PL 92500 (Federal Water Pollution Control Act Amendments of 1972) or its amendments.
30. **Wastes:** Any liquid, gaseous, or solid substances or combination thereof which are discarded, leached, or spilled substances or combination thereof including sanitary wastewater but excluding storm-water.
31. **Wastewater:** The liquid and water-carried wastes from dwellings, commercial facilities, industrial facilities and institutions, together with any groundwater, surface water, and storm water that may be present, whether treated or untreated, in the Company's sewer system.

PART III: RULES AND REGULATIONS

Section A - Applications for Service

1. **Service Application Required:** All applications for service must be in writing on a form provided by the Company and signed by the owner or owners of the property to which wastewater collection service will be provided; except that where a lessee of property occupies or uses the property under a lease having a fixed term of more than six (6) months, the lessee may request service as an applicant. The Company may, at its sole discretion, require that a separate contract for service be signed by the applicant.

Non residential service customers which desire to discharge Industrial/Commercial Wastes into the Sanitary Sewer or existing industrial/commercial users which desire to commence operations of a new facility or a new or different process that will affect the characteristics of the wastewater discharging into the Sanitary Sewer, shall notify the Company prior to the commencement of the new or different operations at the facility and provide such other information regarding the proposed discharge as the Company may request, including an application for an Industrial Waste Discharge Permit when deemed necessary.

2. **Change in Ownership or Tenancy:** A new application must be made to the Company upon any change in ownership where the owner of the property is the Customer, or upon any change in the identity of a lessee where the lessee of the property is the Customer. The Company shall have the right to discontinue or otherwise interrupt wastewater collection service upon three (3) days notice if a new application has not been made and approved for the new customer.
3. **Acceptance of Application:** An application for service shall be considered accepted by the Company only upon oral or written approval by the Company. The Company may provide service to the applicant pending formal review and acceptance of the application.
4. **Temporary Service:** In the case of temporary service for less than a 12-month period, the Company may require the Customer to pay all costs of making the service connection and for its removal after the service has been discontinued, or to pay a fixed amount in advance to cover such expenses. If the actual costs differ from the estimate, the Applicant will pay to the Company any excess amount due or the Company will refund to the Applicant any excess amount paid.

Section B - Construction and Maintenance of Facilities

1. **Customer Service lateral:** The Customer service lateral shall be furnished, installed, maintained and/or replaced, when necessary, by and at the sole expense of the Customer. The Company reserves the right to determine the size, type, quality, depth, and connection location of the customer service laterals. Prior to connection to the Company service lateral, the Customer, at their sole cost, shall have the Customer service lateral air pressure tested and checked for alignment by a Company approved qualified person under the supervision of a Company representative.
2. **Separate Trench:** The customer wastewater service lateral shall not be laid in the same trench with drain or water pipe, the facilities of any other public utility or of any municipality or municipal authority that provides a public utility service.
3. **Customer's Responsibilities:** All service laterals, connections and fixtures furnished by the customer shall be maintained by the Customer in good working order. All valves, meters and appliances furnished by the Company and on property owned or leased by the Customer shall be protected properly by the customer. All leaks in the Customer service line or any pipe or fixtures in or upon the customer's premises must be repaired immediately by the Customer as determined solely by the Company.
4. **Customer Grinder Pump:** In areas of the collection system where the Company has installed a pressure sewage collection system or where required as determined by the Company, the Customer, in conjunction with the construction of their service lateral, shall install, own, operate, and maintain and replace a grinder pump and holding tank at the Customer's expense as specified by the Company prior to connection and shall maintain such facilities in good order and repair. The pump shall meet specifications as provided by the Company.
5. **Right to Reject:** The Company may refuse to connect with any customer service lateral or furnish wastewater collection, treatment and/or disposal through a service already connected if such system or service is not properly installed or maintained.

6. Water Use Standards for Certain Plumbing Fixtures: This rule establishes maximum water use criteria for certain plumbing fixtures installed in all new construction or renovation. Such standards have been implemented to achieve maximum efficiency of water use which the Commission has determined is technologically feasible and economically justified.

(a) Maximum permitted water usage levels shall be as follows:

<u>Plumbing</u> <u>Fixture</u>	<u>Maximum</u> <u>Water Use</u>
water closets	1.6 gallons/flush
urinals	1.5 gallons/flush

(b) The Company may exempt particular customers, or classes of customers, when it is determined that the water use standards for plumbing fixtures listed above are unreasonable, cannot be accommodated by existing technology or are otherwise inappropriate.

7. Individual Service Laterals: Except as otherwise expressly authorized by the Company, each individual customer shall be served only through a separate service lateral connected directly to the Company Service lateral, and that Customer Service lateral shall not cross over the property of or serve any other customer or premise. The maximum service lateral length shall be two hundred and fifty (250) feet from the point of connections with clean-outs every 50 feet. The Company shall have the right to waive this maximum length requirement at its sole discretion. No additional attachment may be made to any Customer Service lateral for any purpose without the express written approval of the Company.

8. Connection to Company Mains: No connection shall be made to the Company's main, nor detachment from it, except under the direction and control of the Company. All such connections shall be property of the Company and shall be accessible to it and under its control. The Company will furnish, install and maintain all service laterals from the main to the property line or right-of-way.

Section C - Discontinuance, Termination and Restoration of Service

1. **Discontinuance by Customer:** Where a customer requests the Company to discontinue service, the following rules shall apply:

(a) A customer who wishes to have service discontinued shall give at least three (3) days notice to the Company, specifying the date on which service is to be discontinued. In the absence of proper notice, the Customer shall be responsible for all service rendered until the time that the Company shall have actual or constructive notice of the Customer's intent to discontinue service. The Customer shall not begin to use nor cease to use wastewater service without the prior consent of the Company. A customer discontinuing service remains a customer for purposes of paying turn-on fees pursuant to Rule 3 of this Section for a period of nine (9) months.

(b) Where a customer requests turn-on of service within six (6) months of disconnection, the Customer shall be subject to monthly minimum billing for the period of disconnection.

2. **Termination by Company:** Wastewater and/or water service to the Customer may be terminated for good cause, including, but not limited to, the following:

- (a) making an application for wastewater service that contains material misrepresentations;
- (b) failure to repair leaks in sewer pipes or fixtures;
- (c) tampering with any Company Service lateral, or installing or maintaining any unauthorized connection;
- (d) theft of sewer service, which shall include taking service without having made a proper application for service under Part III, Section A;
- (e) failure to pay, when due, any charges accruing under this tariff;
- (f) discharge of any prohibited substance listed in Section F into the wastewater system;

- (g) receipt by the Company of an order or notice from the Department of Environmental Protection, a health agency, local plumbing inspector or other similar authority, to terminate service to the property served on the grounds of violation of any law or ordinance, or upon notice to the Company from any such authority that has ordered an existing violation on the property to be corrected and that such order has not been complied with or
- (h) material violation of any provisions of the tariff;
- (i) failure to properly install and maintain a grinder pump, including its replacement when improperly functioning as solely determined by the Company;
- (j) any unauthorized, un-inspected, or improper connection, as herein defined, found to exist will be required to be disconnected within ten (10) days. The Company may require a plumber's sworn statement or certificate as evidence that the connection has been discontinued.
- (k) Not abiding by the provisions of the Company's Industrial/Commercial Waste Pretreatment Program.
- (l) Failure to remove direct connections to the Customer Service lateral that allow surface, subsurface, storm water, or roof run off water into the Sanitary Sewer.
- (m) Not complying with any part of this tariff.
- (n) Supplying sewer service to other units, buildings or premises when Capacity Reservation Fees have not been paid for in accordance with tariff.

In order to terminate wastewater service, the Company can at its discretion install a shut off valve on the Company's Service lateral to terminate service. The cost for the installation of the shut off valve and all the other charges accruing under this tariff shall be paid to the Company before service is restored.

3. **Turn-on Charge:** Whenever service is discontinued or terminated pursuant to Rule 1 or Rule 2 of this Section, service shall be permitted by the Company only upon the payment by the Customer of a turn-on fee and the curing of the problem that gave rise to the termination if under Rule 2. Refer to Schedule of Miscellaneous Fees and Charges.

Section D - Billing and Collection

1. **Issuance of Bills:** The Company will bill each customer within fifteen (15) days of the last day of each billing period.
2. **Billing Due Date:** The due date for payment of a bill for nonresidential service shall be no less than fifteen (15) days from the date of transmittal. The due date for payment of a bill for residential service shall be no less than twenty (20) days from the date of transmittal. If the last day for payment falls on a Saturday, Sunday or bank holiday, or on any day when the offices of the Company are not open to the general public, the due date shall be extended to the next business day. The Company may not impose a late-payment charge unless payment is received more than five (5) days after the stated due date.
3. **Late-Payment Charge:** All amounts not paid when due shall accrue a late-payment charge at the rate not to exceed one and fifty one-hundredths percent (1.50%) per billing period, not to exceed eighteen percent (18%) per year when not paid as prescribed in Rule 2 of this Section.
4. **Change in Billing Address:** Where a customer fails to notify the Company of a change in billing address, the Customer shall remain responsible to remit payment by the billing due date.
5. **Application of Payment:** Utility bills rendered by the Company shall include only the amount due for utility service. Where a customer remittance to the Company includes payment for any non-utility services, proceeds will be applied first to pay all outstanding regulated utility charges.
6. **Return Check Charge:** The customer will be responsible for return check charge as provided in the Schedule of Miscellaneous Fees and Charges section of the tariff.

7. **Disputed Bills:** In the event of a dispute between the Customer and the Company with respect to any bill, the Company will promptly make such investigation as may be required by the particular case and report the result to the Customer. The Customer is not obligated to pay the disputed amount during the pendency of the Company's investigation. When the Company has made a report to the Customer sustaining the bill as rendered, the Customer shall have fifteen (15) days from the date of such report in which to pay the bill. If the Company determines that the bill originally rendered is incorrect, the Company will issue a corrected bill with a new due date for payment. Any amount received by the Company in excess of the amount determined to be due by the Company's investigation of the dispute shall be refunded to the Customer.

Section E - Deposits

1. Residential Customers:

- (a) New Applicants—The Company will provide service without requiring a deposit unless the applicant was terminated for nonpayment within the prior twelve (12) months or has an unpaid balance for prior service from the Company. Then the Company may require a deposit that will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.
- (b) Existing Customers—If a customer has paid late on two (2) consecutive occasions or a total of three (3) times within the prior 12-month period, the Company may send a letter informing the Customer that a deposit may be required if another late payment is received within the next twelve (12) months. An existing customer may be required to pay a deposit as a condition to having service restored after termination for non-payment or for failure to comply with a payment agreement. The amount of the deposit will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.

- (c) Deposit Refunds and Interest—A deposit will be refunded if service is discontinued and the final bill is paid or if the customer has paid the bills for the prior 12-month period without having been late on more than two (2) occasions and is not currently delinquent. Deposits from residential customers shall bear simple interest at the rate of the average of one-year Treasury Bills for September, October and November of the previous year, payable annually without deductions for taxes thereon unless otherwise required by law. The applicable interest rate for each year shall be determined as of January 1 of that year.

2. Nonresidential Customers:

- (a) New Applicants - A deposit may be required from any new applicant who does not have prior satisfactory credit history with the Company. The amount of the deposit will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.
- (b) Existing Customers—Deposit requirements for existing nonresidential customers shall be as established for residential customers in Rule 1 of this Section.
- (c) Deposit Refunds and Interest— A deposit will be refunded if the customer pays all bills on time over a 12-month period or if service is disconnected and the final bill has been paid. There will be no interest paid on deposits for nonresidential accounts.

Section F- Wastewater Control Regulations

1. General Prohibitions:

- (a) No storm water from pavements, area ways, runoff basins, roof runoff water, foundation drains, subsurface drains, water from springs, cooling water, basement sump pumps, unpolluted industrial or commercial process water or other sources shall be admitted to the Company Sanitary Sewer.
- (b) The discharge of garbage to the Sanitary Sewer is expressly prohibited. Properly shredded biodegradable garbage may be discharged into the Sanitary Sewer with no particle greater than one-half inch in dimension.

2. Sampling and Analysis:

- (a) All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in the Company's rules may be determined in accordance with the latest DEP and EPA approved editions of "Standard Methods for the Examination of Water and Wastewater" under Act 252 as prepared by DEP and approved and published jointly by the American Public Health Association, the American Water Works Association, and/or the Water Pollution Control Federation or other reference sources specified by regulatory agency requirements, such as "Methods for Chemical Analysis of Water and Wastes," U.S.E.P.A. 1974 or its subsequent updated version.
- (b) All measurements, test, inspections and analyses deemed by the Company to be necessary under this Section or any other part of the Rules and Regulations of the Company, shall be done by the Company or its agents, employees or contractors. If the measurements, test, inspections and/or analyses determine that a customer has created a situation which is in violation of any statute, ordinance, rule or regulation then the customer shall be required to pay all costs incurred in order to measure, test, inspect, analyze and remedy the situation. Otherwise, the costs involved are to be borne by the Company. Costs assessed against a Customer pursuant to this Section shall be in addition to any other fees charged by the Company. The costs shall be payable within 30 days of presentation of a bill for such costs by the Company to the Customer(s).

- (c) Where the Company deems it advisable, it may require any customer discharging wastes to install and maintain, at his or her own expense, in a manner approved by the Company or its representative, a suitable device to continuously measure and record the pH of the wastes so discharged.
- (d) In the event any person, firm or corporation producing any industrial wastes otherwise excluded from the Sanitary Sewer, desires to discharge the same into any portion of the Company's sanitary sewer system, the Company may at its option, consent to such discharge at a charge in accordance with the Company's established Schedule of Rates, Surcharges and discounts applicable to such Industrial/Commercial Wastes, as provided in Section K.8 entitled "Surcharge for Industrial Wastes." Such consent may be made contingent upon the applicant providing and maintaining apparatus for regulating the rate of discharge and/or treating the wastes at his or its expense prior to discharge as the Company may deem necessary. Such consent will stipulate the location and type of metering device to be used for measuring the quantity of such wastes discharged to the sewage system, and will also stipulate the method and frequency of sampling such wastes. Each analysis will be made on a composite of twenty-four (24) hourly (or a larger number of more frequent) samples of wastes collected over a singly twenty-four (24) hour day; the volume of each of the samples will be proportional to the rate of Waste flow. The average suspended solid content or acid equivalent of the wastes for the quarter will be calculated in such a manner as to be as truly representative of the entire quarterly flow and composition of the waste as possible. Particular care will be exercised to insure that the difference in character or composition of the wastes during the week ends or nights when industrial operations are at a minimum, are properly considered in arriving at quarterly averages.

3. **Prohibited Discharges:** The Company reserves the right to refuse connection to its Sanitary Sewer and/or to compel the discontinuance of the use of any system, or to require pre-treatment of Wastes by any Customer, in order to prevent the discharge of any Wastes to the Sanitary Sewer system which may be deemed harmful to the Sanitary Sewer system, or to have an adverse effect on the sewage treatment processes. Except from the written consent of the Company, there shall be excluded from the sewage system but not limited to, any wastes having suspended solids (SS) in excess of 300 mg/L, 5 day Biochemical Oxygen Demand (BOD5) in excess of 300 mg/L, a chlorine demand in excess of 25 mg/L and Wastes having any or all of the following characteristics:
- (a) Wastes containing any gasoline, naphtha, fuel, oil or other liquids, solids or gases which by reason of their nature or quality may cause fire or explosion or be in any other way injurious to persons, the structures of the wastewater system or its operation.
 - (b) Wastes having a temperature in excess of 120 degrees F. or less than 32 degrees F that enters the Sanitary Sewer or Wastes entering the plant that increase the temperature of the Wastewater at the headworks of the plant to exceed 104 degrees F.
 - (c) Wastes having a pH lower than 6.0 or higher than 9.0, or having any corrosive property capable of causing damage or hazards to structures, equipment or personnel of the wastewater system.
 - (d) Wastes containing any noxious or malodorous gas or substance that either singly or by interaction with sewage or other wastes is likely in the opinion of the Company to create a public nuisance or hazard to life or prevent entry to sewers for their maintenance and repair.
 - (e) Wastes containing ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, hair, chemical or paint residues, greases, paunch, manure, dairy products, cotton, wool, plastic or other fibers, lime, slurry or any other solid or viscous material of such character or in such quantity as in the opinion of the Company may cause an obstruction to the flow in sewers or otherwise interfere with the proper operation of the sewer system.

- (f) Wastes containing insoluble, non-flocculent substances having a specific gravity in excess of 2.65.
- (g) Wastes containing soluble substances in such concentrations as to cause the specific gravity to be greater than 1.1.
- (h) Wastes containing any substances which may affect the effluent and may cause violation of the National Pollutant Discharge Elimination System Permit.
- (i) Wastes containing other matter detrimental to the operation of a sewage treatment plant or Sanitary Sewers causing erosion, corrosion or deterioration in sewers, equipment and structures of a sanitary or sewage treatment plant.
- (j) Wastes containing fats, wax, tar, grease or oil of petroleum origin, whether emulsified or not, in excess of one hundred mg/L, or petroleum oil, non biodegradable cutting oil or petroleum products of mineral oil origin in amounts that will cause interference or pass through at the wastewater treatment facilities.
- (k) Wastes containing an average concentration of oils and greases, of the Hydrocarbon variety or any Freon extractables which are not biodegradable in excess of 10 mg/L.
- (l) Wastes containing more than 10 mg/L of any of the following gases: hydrogen sulfide; sulfur dioxide; nitrous oxide; or any of the halogens.

- (m) Wastes containing a toxic or poisonous substance, in a sufficient quantity to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals or create any hazard in the sewer system operation. Toxic pollutants or substances shall include but not limited to Wastewater containing cyanide, chromium, cadmium, mercury, copper, nickel, or materials listed as hazardous materials.
- (n) Any waste containing toxic substances in quantities sufficient to interfere with the biochemical/biological processes of the sewage treatment works or that will pass through the sewage treatment works and exceed the state and/or federal requirements in respect thereof.
- (o) Any waste containing radioactive isotopes or other radioactive materials.
- (p) Sludges resulting from the treatment of concentrated solutions that are not acceptable for discharge to the Sanitary Sewer.
- (q) Effluent limitations promulgated as categorical standards, 40 C.F.R. Chapter 1, Subchapter N and 40 C.F.R. 403.6 shall apply in any instance where they are more stringent than those in this section.
- (r) The local limits in this section may be supplemented with more stringent limitations if the Company determines that the limitations in subsection (a) through (p) above may not be sufficient to protect the operation of the sewerage system or to enable the water pollution control plant to comply with water quality standards or effluent limitations specified in the Company's NPDES permit.
- (s) Waste introduced into the Sanitary Sewer with any pollutants which cause pass through or interference; whether or not the customer is subject any other national, state, or local pretreatment standards or requirements.
- (t) Waste containing any color which may not be removed in the wastewater treatment process.
4. **Disposal of Wastes From Septic Tanks and Cesspools:** No person shall dispose of wastes from septic tanks, cesspools, or other such sources of sanitary sewage to the Company's Sanitary Sewer, except as designated by the Company.

5. **Penalties:** The Company reserves the right to terminate water and/or wastewater service for violation of any provision of these regulations, subject to PUC rules and regulations.
6. **Damages:** In the event of any damage to the Company's wastewater system caused by a Customer, or a Customer's representative, such damage shall be immediately reported to the Company and said Customer shall reimburse the Company for the costs of such repairs, testing, consulting and all other costs associated with the damage.

Any user violating any of the provisions of these Rules and Regulations shall become liable to the Company for all expenses, losses, or damages occasioned by the Company by reason of such violation, whether incidental or consequential.

Section G- Line Extensions

1. When an extension to serve a Customer is required or requested, such extension will be made under the terms of a "Sewer Main Extension Agreement" or a "Sewer Main Extension Deposit Agreement".
2. Customer shall contribute all facilities required for the Company to directly connect the Customer to the Sanitary Sewer. This includes pumping stations, vaults, manholes, mains or any other apparatuses where applicable. The Company shall have the right to locate the facilities as required to meet the long term system needs of the Customers.
3. **Size of Main and Other Facilities:** The Company shall have the exclusive right to determine the type and size of mains and the other facilities required to render adequate service. However, where the Company decides to install a pipe larger than necessary to render extension of adequate service to the applicant, estimated or actual cost figures in the Sewer Main Extension Agreement or Sewer Main Extension Deposit Agreement shall include only the material and installation cost for a pipe the size of which is necessary to provide adequate service to the applicant. Any incremental costs of a larger pipe will be the responsibility of the Company. All estimated or actual cost figures referred to in the Sewer Main Extension Agreement or Sewer Main Extension Deposit Agreement shall include a reasonable allowance for overhead costs and taxes as appropriate.

4. **Length of Extension:** In determining the necessary length of an extension, the terminal point of such extension shall be at that point in the property line or right-of-way, which is equidistant from the side property lines of the last lot for which service was requested except where the Company, in its sole opinion, determines that it is necessary to extend beyond the last lot and connect to an existing main to provide adequate and reliable wastewater service. A street service connection will be provided only for customer service laterals that extend at right angles from the curb line in a straight line to the premises to be served.

5. **Offsite Development Marketing Contracts:** Where it is prudent, reasonable and in the public interest, the Company may, at its option enter into offsite development marketing contracts which depart from the standard terms of the "Sewer Main Extension Agreement" or "Sewer Main Extension Deposit Agreement". These marketing agreements shall become effective 30 days after the Company has filed a copy thereof with the Pennsylvania Public Utility Commission, or in the event that the Commission institutes an investigation, at such time as the Commission grants its approval thereof.

Section H- Service Continuity

1. **Regularity of Service:** The Company may, at any time, shut off service in case of accident or for the purpose of making connections, alterations, repairs or changes, or for other reasons. The Company will, pursuant to Commission regulations at 52 Pa. Code '67.1 and as circumstances permit, notify customers to be affected by service interruptions.

2. **Liability for Damages:**
 - (a) **Limitation of Damages for Service Interruptions:** The Company's liability to a customer for any loss or damage from any excess or deficiency in the wastewater collection service due to any cause other than willful misconduct or negligence by the Company, its employees or agents shall be limited to an amount no more than the Customer charge or minimum bill for the period in question. The Company will undertake to use reasonable care and diligence in order to prevent and avoid interruptions and fluctuations in service, but cannot and does not guarantee that such will not occur.

(b) **Responsibility for Customer Facilities:** The Company shall not be liable for any loss or damage caused by reason of any break, blockage, leak or other defect in a Customer's own service pipe, line, fixtures or other installations, except where the damage is a result of the negligence or willful misconduct of the Company, its employees or agents. The Company shall in no event be responsible for maintenance of, or for damage done by sewage escaping from a blockage of the customer's service lateral or any other pipe or fixture, or from any other cause occurring to any premise or within any house or building.

(c) When the Company incurs costs and the blockage or defect is determined to be on the customer's service lateral, the Company may request reimbursement and the Customer is responsible to reimburse the Company for associated costs.

Section I- Waivers

The Company may, at its sole discretion, waive any of the Rules contained herein that operate for the benefit of the Company; provided, that no such waiver will be valid unless in writing and signed by an authorized representative of the Company, and provided that no waiver will be allowed where the waiver would constitute a violation of the Public Utility Code, the regulations of the Commission or of any other applicable statute, law or regulation.

Section J- Amendment of Commission Regulations

Whenever Commission regulations in Title 52 of the Pennsylvania Code are duly amended in such a way as would produce a difference between Commission regulations and this tariff, this tariff is deemed to be amended so as to be consistent with the amendments to the regulations, except that if application of the amendment to Title 52 is discretionary, this tariff will remain unchanged.

Section K - Industrial and Commercial Service Limitations - Claysville Wastewater Operations

1. **Pretreatment:** All industrial and commercial waste proposed for discharge into the sewer system shall be categorized to determine the degree of pretreatment, if any, necessary in order that the waste will not adversely affect the system or the sewage treatment facilities. The Company will have the authority to properly control any waste discharge into its sewage system by regulating the rate of any waste discharge into its sewer system and/or by requiring necessary pretreatment, and excluding certain waste, if necessary, to protect the integrity of the Company's system.

2. **Customer Limitations:** Customers specifically agree that service applies exclusively for domestic/household sewage. If any Customer discharges industrial or commercial waste that:
- (a) the existing wastewater treatment plant is unable to satisfactorily treat; or,
 - (b) is not in compliance with discharge permit standards, disrupts the normal functioning of the existing wastewater treatment plant; or,
 - (c) is more costly to treat than typical domestic wastewater; or,
 - (d) requires the utilization of more wastewater treatment plant capacity per gallon of effluent than that required by average typical domestic waste water,
- then the customer shall provide, at the customer's own expense, such pretreatment as may be necessary before such waste is discharged into the Company mains. No commercial or industrial waste, whether pretreated or not, may be discharged without prior written authorization from the Company. The Company reserves the right to set the applicable discharge limits on any waste stream entering its collection system. An Industrial Waste Pretreatment Agreement will need to be finalized prior to allowing the discharge to occur.
3. **Flow Limitations:** The Company reserves the right to control quantities and rate of discharge of such industrial wastes on the basis of 24 hours per day and 7 days per week.
4. **Industrial Wastes Permits:** All persons who discharge industrial wastes to the Public Sanitary sewer system shall be required to complete and file with the Company, an industrial waste questionnaire, as prescribed and furnished by the Company, which shall include pertinent data inclusive of flow and analysis of all wastes discharged to the sewer system. Such surveys will be required at a frequency not to exceed five (5) years. All persons altering their discharge streams will be required to consult with the Company prior to finalizing any changes to the process as described in the current questionnaire.
- (a) Failure to comply with the above requirements shall be cause for termination of service in accordance with these Rules and Regulations.

- (b) Acceptance of industrial wastes to the sewage system from major contributing industries will be the basis of an Industrial Waste Pretreatment Permit, issued by the Company, conforming to the parameters required, from time to time, by the United States Environmental Protection Agency, (EPA) to insure compliance with all applicable limitations of the Company's Current National Pollution Discharge Elimination System Permits (NPDES). Issuance of a permit containing parameters to be met, may require pretreatment of industrial wastes regulation of the rate of discharge and providing such metering or monitoring of the industrial wastes, as the Company may require. The Company reserves the right to change the permit parameters from time to time to conform to changes to its NPDES Permits. The Company may impose self-monitoring requirements for targeted parameters, and may conduct its own sampling at the discharge point to the collection system. Penalties and/or surcharges may be placed on certain waste streams.
5. **Company Limitations:** The Company will not be liable nor bound to increase wastewater treatment plant operations to accommodate industrial or commercial waste.
6. **Specific Dangers:** In general, any waste will be considered harmful to the Company wastewater system if it may cause any of the following damaging effects:
- (a) chemical reaction either directly or indirectly with the materials of construction of the system in such a manner as to impair the strength or durability of the sewer structures;
 - (b) mechanical action that will destroy the sewer structures;
 - (c) restriction of the hydraulic capacity of the sewer structures;
 - (d) restriction of the normal inspection or maintenance of the sewer structures;
 - (e) danger to public health and safety; or
 - (f) obnoxious condition contrary to public interest.

7. **Grease, Oil, Sand Traps, and interceptors:** The Company reserves the right to require the installation of grease, oil, sand traps or interceptors at the Company's discretion when necessary for the proper handling of liquid wastes containing grease in excessive amounts, any flammable wastes, sand, or other harmful ingredients. All traps/interceptors shall be of a type and capacity approved by the Company and shall be located as to be readily and easily accessible for cleaning and inspection. Grease, oil, sand traps or interceptors shall be installed in all new filling stations, garages, restaurants, and other new facilities wherein heavy discharge of grease, oil, sand is to be expected. Owners of grease, oil, sand traps or interceptors are required to clean out the device on a regular basis to maintain good operation of the trap. The Company reserves the right to require owners of grease, oil, sand traps or interceptors to submit records of cleaning to the Company at the Company's discretion.

Section L. Privilege to Investigate/Right of Access

The Company's authorized representatives shall have the right of access at all reasonable times to all parts of any premises connected with the system, for the purpose of examining and inspecting connections and fixtures, including the water and/or wastewater metering arrangement, or for disconnecting service for any proper cause.

Pennsylvania-American Water Company
Claysville Wastewater Operations
(Hereinafter referred to as the "Company")

D/B/A

Pennsylvania American Water

RATES, RULES AND REGULATIONS
GOVERNING THE PROVISION OF WASTEWATER
COLLECTION TREATMENT AND/OR DISPOSAL SERVICE
TO THE PUBLIC IN CLAYSVILLE BOROUGH, DONEGAL
TOWNSHIP, WASHINGTON COUNTY

ALL IN THE COMMONWEALTH OF PENNSYLVANIA

This tariff makes increases and changes to existing
rates, rules and regulations.

Issued: April 23, 2010

Effective: June 22, 2010

By: Kathy Pape, President
Pennsylvania-American Water Company
800 West Hersheypark Drive
Hershey, PA 17033

LIST OF CHANGES

Increases/Decreases

This tariff provides for one set of uniform rates for the Company's Claysville Wastewater Operations. All metered and unmetered charges have been increased for an overall increase of 157.73%.

The Company is proposing to change service charges and increase volumetric charges for each bill class, thus moving revenues more in-line with the cost of providing service.

A \$100 service lateral inspection fee has been added.

A \$30 service reconnection and discontinuance fee has been added.

A \$20 return check fee has been added.

The Company is adding a service charge discount of 65% for qualifying low income customers.

Changes

The entire set of Rules and Regulations has been revised to more closely align with the Commission's generic set of Wastewater Rules and Regulations and to also better reflect the actual operations of the Claysville Wastewater system, therefore this section has not been redlined.

TERRITORIES SERVED

Washington County

Claysville Borough and portions of the Township of Donegal.

Part I: Rates

Schedule of Rates Applicable to Claysville Wastewater Operations (I)

Metered Rates

Service Charges:

All metered customers shall be subject to a monthly service charge.

<u>Bill Class</u>	<u>Monthly Service Charge</u>
Residential	\$25.00
Commercial	40.00

Usage Charge For All Bill Classes:

Per 100 gallons of metered water or wastewater usage \$2.100

Flat Rates

Residential Flat Rate of \$92.75 per month shall be billed to each unmetered customer.

Schedule of Miscellaneous Fees and Charges

A. Service Lateral Inspection Fee (C) (I)

A \$100 inspection fee will be charged for the Company's time involved in the inspection of a service lateral tie-in to the Company's wastewater system.

B. Service Reconnection and Discontinuance Fee (C) (I)

A fee will be charged for the shut-off and turn-on of any service. The fee for service performed during regularly scheduled hours shall be \$30.00. For non-regularly-scheduled working hours, the fee is equivalent to the cost incurred by the Company. The Service Reconnection and Discontinuance Fee will apply only once if the customer is both a water and wastewater customer of the Company.

C. Return Check Charges (C) (I)

The customer will be responsible for the payment of a \$20.00 charge for each time a check presented to the Company for payment on that customer's utility bill is returned by the payer bank for any reason including, but not limited to, insufficient funds, account closed, payment stopped, two signatures required, post-dated, stale date, account garnished, or unauthorized signature. This charge is in addition to any charge which may be assessed against the Customer by the bank. The Return Check Charge will apply only once if the customer is both a water and wastewater customer of the Company.

Schedule of Rates Applicable to All Rate Zones
For Qualifying Low-Income Customers (C)

Tariff Qualifications

In order to qualify to be billed under this tariff, a customer must meet the low-income criteria of 150% based on the Federal Poverty Level. After qualifying to be billed under this tariff, customers must continually make timely payments on the discounted bills.

Rates for Service

The rates for the service charge or minimum bill under this tariff will be 35% of the prevailing service charge or minimum bill in the rate zone where service is received.

The rate for wastewater usage shall be billed at the existing rates applicable to the rate zone where service is received.

STATE TAX ADJUSTMENT SURCHARGE

In addition to the net charges provided for in this Tariff, a surcharge of negative 0.00% will apply to all services rendered.

The above surcharges will be recomputed, using the elements prescribed by the Commission whenever any of the tax rates used in calculation of the surcharge are changed.

The above recalculations will be submitted to the Commission within 10 days after the occurrence of the event or date which occasioned such recomputations. If the recomputed surcharge is less than the one in effect, the Company will, and if the recomputed surcharge is more than the one in effect the Company may, submit with such recomputation a Tariff or Supplement to reflect such recomputed surcharge, the effective date of which shall be 10 days after filing.

PART II: DEFINITIONS

The following words and phrases, when used in this tariff, shall have the meanings assigned below unless the context clearly indicates otherwise:

1. **Applicant:** A person, association, partnership, corporation, municipality, authority, state or federal governmental agency or other entity who applies to become a customer of the Company in accordance with Part III, Section A, of this tariff.

2. **B.O.D. (Biochemical Oxygen Demand):** The quantity of oxygen, expressed in milligrams per liter, utilized in the biochemical oxidation of organic matter under the standard laboratory procedure for five (5) days at twenty (20) degrees Centigrade. The standard laboratory procedure shall be that found in the latest approved edition of "Standard Methods for the Examination of Water and Sewage" published by the American Public Health Association.

3. **Commission:** The Pennsylvania Public Utility Commission.

4. **Company:** Pennsylvania-American Water Company and its duly authorized officers, agents and employees, each acting within the scope of his authority and employment.

5. **Company Service Lateral:** Company owned wastewater service lateral from the sewer main of the Company which connects to the Customer Service Lateral at the edge of the right-of-way or actual property line.

6. **Customer:** A person or entity who is an owner, occupant or who contracts with the Company for or who takes or receives wastewater collection, treatment and/or disposal service.
7. **Customer Service Lateral:** Customer owned wastewater service lateral extending from the end of the Company Service lateral or connection to and within the customer's premise.
8. **Domestic Wastewater:** The liquid waste or liquid borne waste: (1) resulting from the non-commercial preparation, cooking and handling of food; (2) consisting of human excrement; or (3) consisting of wastewater, non-commercial laundering water, domestic housekeeping wastewater, and similar types of wastes from sanitary uses, whether generated in residences or sanitary facilities in commercial or industrial facilities, but does not include any storm water or ground water introduced from facilities such as roof leaders, sump pumps, floor drains or industrial wastewater. Domestic Wastewater includes sanitary wastes having suspended solids (SS) less than 300mg/L, 5 day Biochemical Oxygen Demand (BOD%) less than 300 mg/L, and a chlorine demand less than 25mg/L.
9. **Dwelling Unit:** A structure or dwelling intended to be occupied as a whole by one family.
10. **Equivalent Dwelling Units (EDU):** The EDU is a measure based upon the estimated average daily wastewater flow for the type of business, as calculated by the PaDEP Regulation at 25 Pa Code: 73.17 divided by the typical estimated average daily wastewater flow from a current single-family unit (One EDU shall be equal to 262.5 gallons per day of sewage for a single-family unit, unless modified by the Company).
11. **Garbage:** The solid wastes from domestic cooking and dispensing of food, and from the handling and storage of produce.
12. **Garbage Properly Shredded:** The term "Properly Shredded Garbage", as used herein, shall mean the wastes from the preparation, cooking, and dispensing of food that have been shredded to such degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half inch in dimension.

13. **Grinder pump:** Any mechanical or powered device, owned by the Customer, used to grind, macerate or fluidize garbage so that it can be discharged into the Sanitary Sewer.
14. **Industrial/Commercial Wastes:** Any liquid, gaseous or water borne wastes from industrial processes or commercial establishments, as distinct from domestic wastewater.
15. **Industrial/Commercial Waste Permit:** A wastewater permit issued as required by the Company to an Industrial/Commercial user which discharges Industrial/Commercial Waste.
16. **Industrial/Commercial Waste Pretreatment Program:** A program established by the Company that requires industrial and commercial dischargers to monitor, test, treat and control as necessary pollutants in their wastewater prior to discharge into the Sanitary Sewer.
17. **Line extension (for line extension purposes):** An addition to the Company's main line which is necessary to serve the premises of a Customer. Refer to Section G.
18. **Main:** The Company's pipe, excluding service connections, located in a public highway, street, alley or private right-of-way which pipe is used in transporting wastewater.
19. **Meter:** Any device supplied by the Company or other for the purpose of measuring water consumption or wastewater discharge.
20. **Nonresidential Service:** Wastewater service supplied to a commercial or industrial building, including a hotel or motel, or to a master-metered trailer park or multi-tenant apartment building, or to any customer who purchases wastewater service from the Company for the purpose of resale.
21. **Pretreatment:** The application of physical, chemical and/or biological processes to reduce the amount of pollutants in, or alter the nature of the polluting properties of, an industrial/commercial process wastewater prior to discharging such wastewater into the Sanitary Sewer.
22. **Public Utility:** Persons or corporations owning or operating equipment or facilities in this Commonwealth for water, electric, and natural gas service, or wastewater collection, treatment, or disposal, to or for the public for compensation.

23. **Residential Service:** Wastewater service supplied to an individual single-family residential dwelling unit.
24. **Regulatory Agency:** Agencies, including but not limited to the Commission, the Pennsylvania Department of Environmental Protection (DEP), U.S. Environmental Protection Agency (EPA), which have authority over the operations of and/or discharges into and/or from the Company's treatment facilities.
25. **Sanitary Sewer:** A sewer which primarily carries sanitary wastewater, together with such storm, surface and ground water as may be present.
26. **Storm Sewer:** A sewer which carries surface, ground water, or storm water from the buildings, ground, streets, or other areas.
27. **Suspended Solids:** Solids that either float on the surface of, or are in suspension in water, wastewater, or other liquids, and which are largely removable by filtration.
28. **Tariff:** All of the service rates, rules and regulations issued by the Company, together with any supplements or revisions thereto, officially approved by the Commission and contained in this document.
29. **Toxic Substances:** Any substances where gaseous, liquid or solid waste which, when discharged to a public sewer in sufficient quantities, will be detrimental to any biological wastewater treatment process, constitute a hazard to human beings or animals, inhibit aquatic life, or create a hazard to recreation in receiving waters of the effluent from a wastewater treatment plant, or as defined pursuant to PL 92500 (Federal Water Pollution Control Act Amendments of 1972) or its amendments.
30. **Wastes:** Any liquid, gaseous, or solid substances or combination thereof which are discarded, leached, or spilled substances or combination thereof including sanitary wastewater but excluding storm-water.
31. **Wastewater:** The liquid and water-carried wastes from dwellings, commercial facilities, industrial facilities and institutions, together with any groundwater, surface water, and storm water that may be present, whether treated or untreated, in the Company's sewer system.

PART III: RULES AND REGULATIONS

Section A - Applications for Service

- 1. Service Application Required:** All applications for service must be in writing on a form provided by the Company and signed by the owner or owners of the property to which wastewater collection service will be provided; except that where a lessee of property occupies or uses the property under a lease having a fixed term of more than six (6) months, the lessee may request service as an applicant. The Company may, at its sole discretion, require that a separate contract for service be signed by the applicant.

Non residential service customers which desire to discharge Industrial/Commercial Wastes into the Sanitary Sewer or existing industrial/commercial users which desire to commence operations of a new facility or a new or different process that will affect the characteristics of the wastewater discharging into the Sanitary Sewer, shall notify the Company prior to the commencement of the new or different operations at the facility and provide such other information regarding the proposed discharge as the Company may request, including an application for an Industrial Waste Discharge Permit when deemed necessary.

- 2. Change in Ownership or Tenancy:** A new application must be made to the Company upon any change in ownership where the owner of the property is the Customer, or upon any change in the identity of a lessee where the lessee of the property is the Customer. The Company shall have the right to discontinue or otherwise interrupt wastewater collection service upon three (3) days notice if a new application has not been made and approved for the new customer.
- 3. Acceptance of Application:** An application for service shall be considered accepted by the Company only upon oral or written approval by the Company. The Company may provide service to the applicant pending formal review and acceptance of the application.
- 4. Temporary Service:** In the case of temporary service for less than a 12-month period, the Company may require the Customer to pay all costs of making the service connection and for its removal after the service has been discontinued, or to pay a fixed amount in advance to cover such expenses. If the actual costs differ from the estimate, the Applicant will pay to the Company any excess amount due or the Company will refund to the Applicant any excess amount paid.

Section B - Construction and Maintenance of Facilities

1. **Customer Service lateral:** The Customer service lateral shall be furnished, installed, maintained and/or replaced, when necessary, by and at the sole expense of the Customer. The Company reserves the right to determine the size, type, quality, depth, and connection location of the customer service laterals. Prior to connection to the Company service lateral, the Customer, at their sole cost, shall have the Customer service lateral air pressure tested and checked for alignment by a Company approved qualified person under the supervision of a Company representative.
2. **Separate Trench:** The customer wastewater service lateral shall not be laid in the same trench with drain or water pipe, the facilities of any other public utility or of any municipality or municipal authority that provides a public utility service.
3. **Customer's Responsibilities:** All service laterals, connections and fixtures furnished by the customer shall be maintained by the Customer in good working order. All valves, meters and appliances furnished by the Company and on property owned or leased by the Customer shall be protected properly by the customer. All leaks in the Customer service line or any pipe or fixtures in or upon the customer's premises must be repaired immediately by the Customer as determined solely by the Company.
4. **Customer Grinder Pump:** In areas of the collection system where the Company has installed a pressure sewage collection system or where required as determined by the Company, the Customer, in conjunction with the construction of their service lateral, shall install, own, operate, and maintain and replace a grinder pump and holding tank at the Customer's expense as specified by the Company prior to connection and shall maintain such facilities in good order and repair. The pump shall meet specifications as provided by the Company.
5. **Right to Reject:** The Company may refuse to connect with any customer service lateral or furnish wastewater collection, treatment and/or disposal through a service already connected if such system or service is not properly installed or maintained.

6. **Water Use Standards for Certain Plumbing Fixtures:** This rule establishes maximum water use criteria for certain plumbing fixtures installed in all new construction or renovation. Such standards have been implemented to achieve maximum efficiency of water use which the Commission has determined is technologically feasible and economically justified.

(a) Maximum permitted water usage levels shall be as follows:

<u>Plumbing Fixture</u>	<u>Maximum Water Use</u>
water closets	1.6 gallons/flush
urinals	1.5 gallons/flush

(b) The Company may exempt particular customers, or classes of customers, when it is determined that the water use standards for plumbing fixtures listed above are unreasonable, cannot be accommodated by existing technology or are otherwise inappropriate.

7. **Individual Service Laterals:** Except as otherwise expressly authorized by the Company, each individual customer shall be served only through a separate service lateral connected directly to the Company Service lateral, and that Customer Service lateral shall not cross over the property of or serve any other customer or premise. The maximum service lateral length shall be two hundred and fifty (250) feet from the point of connections with clean-outs every 50 feet. The Company shall have the right to waive this maximum length requirement at its sole discretion. No additional attachment may be made to any Customer Service lateral for any purpose without the express written approval of the Company.

8. **Connection to Company Mains:** No connection shall be made to the Company's main, nor detachment from it, except under the direction and control of the Company. All such connections shall be property of the Company and shall be accessible to it and under its control. The Company will furnish, install and maintain all service laterals from the main to the property line or right-of-way.

Section C - Discontinuance, Termination and Restoration of Service

1. **Discontinuance by Customer:** Where a customer requests the Company to discontinue service, the following rules shall apply:

(a) A customer who wishes to have service discontinued shall give at least three (3) days notice to the Company, specifying the date on which service is to be discontinued. In the absence of proper notice, the Customer shall be responsible for all service rendered until the time that the Company shall have actual or constructive notice of the Customer's intent to discontinue service. The Customer shall not begin to use nor cease to use wastewater service without the prior consent of the Company. A customer discontinuing service remains a customer for purposes of paying turn-on fees pursuant to Rule 3 of this Section for a period of nine (9) months.

(b) Where a customer requests turn-on of service within six (6) months of disconnection, the Customer shall be subject to monthly minimum billing for the period of disconnection.

2. **Termination by Company:** Wastewater and/or water service to the Customer may be terminated for good cause, including, but not limited to, the following:

- (a) making an application for wastewater service that contains material misrepresentations;
- (b) failure to repair leaks in sewer pipes or fixtures;
- (c) tampering with any Company Service lateral, or installing or maintaining any unauthorized connection;
- (d) theft of sewer service, which shall include taking service without having made a proper application for service under Part III, Section A;
- (e) failure to pay, when due, any charges accruing under this tariff;
- (f) discharge of any prohibited substance listed in Section F into the wastewater system;

- (g) receipt by the Company of an order or notice from the Department of Environmental Protection, a health agency, local plumbing inspector or other similar authority, to terminate service to the property served on the grounds of violation of any law or ordinance, or upon notice to the Company from any such authority that has ordered an existing violation on the property to be corrected and that such order has not been complied with or
- (h) material violation of any provisions of the tariff;
- (i) failure to properly install and maintain a grinder pump, including its replacement when improperly functioning as solely determined by the Company;
- (j) any unauthorized, un-inspected, or improper connection, as herein defined, found to exist will be required to be disconnected within ten (10) days. The Company may require a plumber's sworn statement or certificate as evidence that the connection has been discontinued.
- (k) Not abiding by the provisions of the Company's Industrial/Commercial Waste Pretreatment Program.
- (l) Failure to remove direct connections to the Customer Service lateral that allow surface, subsurface, storm water, or roof run off water into the Sanitary Sewer.
- (m) Not complying with any part of this tariff.
- (n) Supplying sewer service to other units, buildings or premises when Capacity Reservation Fees have not been paid for in accordance with tariff.

In order to terminate wastewater service, the Company can at its discretion install a shut off valve on the Company's Service lateral to terminate service. The cost for the installation of the shut off valve and all the other charges accruing under this tariff shall be paid to the Company before service is restored.

3. **Turn-on Charge:** Whenever service is discontinued or terminated pursuant to Rule 1 or Rule 2 of this Section, service shall be permitted by the Company only upon the payment by the Customer of a turn-on fee and the curing of the problem that gave rise to the termination if under Rule 2. Refer to Schedule of Miscellaneous Fees and Charges.

Section D - Billing and Collection

1. **Issuance of Bills:** The Company will bill each customer within fifteen (15) days of the last day of each billing period.
2. **Billing Due Date:** The due date for payment of a bill for nonresidential service shall be no less than fifteen (15) days from the date of transmittal. The due date for payment of a bill for residential service shall be no less than twenty (20) days from the date of transmittal. If the last day for payment falls on a Saturday, Sunday or bank holiday, or on any day when the offices of the Company are not open to the general public, the due date shall be extended to the next business day. The Company may not impose a late-payment charge unless payment is received more than five (5) days after the stated due date.
3. **Late-Payment Charge:** All amounts not paid when due shall accrue a late-payment charge at the rate not to exceed one and fifty one-hundredths percent (1.50%) per billing period, not to exceed eighteen percent (18%) per year when not paid as prescribed in Rule 2 of this Section.
4. **Change in Billing Address:** Where a customer fails to notify the Company of a change in billing address, the Customer shall remain responsible to remit payment by the billing due date.
5. **Application of Payment:** Utility bills rendered by the Company shall include only the amount due for utility service. Where a customer remittance to the Company includes payment for any non-utility services, proceeds will be applied first to pay all outstanding regulated utility charges.
6. **Return Check Charge:** The customer will be responsible for return check charge as provided in the Schedule of Miscellaneous Fees and Charges section of the tariff.

7. **Disputed Bills:** In the event of a dispute between the Customer and the Company with respect to any bill, the Company will promptly make such investigation as may be required by the particular case and report the result to the Customer. The Customer is not obligated to pay the disputed amount during the pendency of the Company's investigation. When the Company has made a report to the Customer sustaining the bill as rendered, the Customer shall have fifteen (15) days from the date of such report in which to pay the bill. If the Company determines that the bill originally rendered is incorrect, the Company will issue a corrected bill with a new due date for payment. Any amount received by the Company in excess of the amount determined to be due by the Company's investigation of the dispute shall be refunded to the Customer.

Section E - Deposits

1. Residential Customers:

- (a) **New Applicants**—The Company will provide service without requiring a deposit unless the applicant was terminated for nonpayment within the prior twelve (12) months or has an unpaid balance for prior service from the Company. Then the Company may require a deposit that will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.
- (b) **Existing Customers**—If a customer has paid late on two (2) consecutive occasions or a total of three (3) times within the prior 12-month period, the Company may send a letter informing the Customer that a deposit may be required if another late payment is received within the next twelve (12) months. An existing customer may be required to pay a deposit as a condition to having service restored after termination for nonpayment or for failure to comply with a payment agreement. The amount of the deposit will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.

- (c) Deposit Refunds and Interest—A deposit will be refunded if service is discontinued and the final bill is paid or if the customer has paid the bills for the prior 12-month period without having been late on more than two (2) occasions and is not currently delinquent. Deposits from residential customers shall bear simple interest at the rate of the average of one-year Treasury Bills for September, October and November of the previous year, payable annually without deductions for taxes thereon unless otherwise required by law. The applicable interest rate for each year shall be determined as of January 1 of that year.

2. Nonresidential Customers:

- (a) New Applicants - A deposit may be required from any new applicant who does not have prior satisfactory credit history with the Company. The amount of the deposit will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.
- (b) Existing Customers—Deposit requirements for existing nonresidential customers shall be as established for residential customers in Rule 1 of this Section.
- (c) Deposit Refunds and Interest— A deposit will be refunded if the customer pays all bills on time over a 12-month period or if service is disconnected and the final bill has been paid. There will be no interest paid on deposits for nonresidential accounts.

Section F- Wastewater Control Regulations

1. General Prohibitions:

- (a) No storm water from pavements, area ways, runoff basins, roof runoff water, foundation drains, subsurface drains, water from springs, cooling water, basement sump pumps, unpolluted industrial or commercial process water or other sources shall be admitted to the Company Sanitary Sewer.
- (b) The discharge of garbage to the Sanitary Sewer is expressly prohibited. Properly shredded biodegradable garbage may be discharged into the Sanitary Sewer with no particle greater than one-half inch in dimension.

2. Sampling and Analysis:

- (a) All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in the Company's rules may be determined in accordance with the latest DEP and EPA approved editions of "Standard Methods for the Examination of Water and Wastewater" under Act 252 as prepared by DEP and approved and published jointly by the American Public Health Association, the American Water Works Association, and/or the Water Pollution Control Federation or other reference sources specified by regulatory agency requirements, such as "Methods for Chemical Analysis of Water and Wastes," U.S.E.P.A. 1974 or its subsequent updated version.
- (b) All measurements, test, inspections and analyses deemed by the Company to be necessary under this Section or any other part of the Rules and Regulations of the Company, shall be done by the Company or its agents, employees or contractors. If the measurements, test, inspections and/or analyses determine that a customer has created a situation which is in violation of any statute, ordinance, rule or regulation then the customer shall be required to pay all costs incurred in order to measure, test, inspect, analyze and remedy the situation. Otherwise, the costs involved are to be borne by the Company. Costs assessed against a Customer pursuant to this Section shall be in addition to any other fees charged by the Company. The costs shall be payable within 30 days of presentation of a bill for such costs by the Company to the Customer(s).

- (c) Where the Company deems it advisable, it may require any customer discharging wastes to install and maintain, at his or her own expense, in a manner approved by the Company or its representative, a suitable device to continuously measure and record the pH of the wastes so discharged.
- (d) In the event any person, firm or corporation producing any industrial wastes otherwise excluded from the Sanitary Sewer, desires to discharge the same into any portion of the Company's sanitary sewer system, the Company may at its option, consent to such discharge at a charge in accordance with the Company's established Schedule of Rates, Surcharges and discounts applicable to such Industrial/Commercial Wastes, as provided in Section K.8 entitled "Surcharge for Industrial Wastes." Such consent may be made contingent upon the applicant providing and maintaining apparatus for regulating the rate of discharge and/or treating the wastes at his or its expense prior to discharge as the Company may deem necessary. Such consent will stipulate the location and type of metering device to be used for measuring the quantity of such wastes discharged to the sewage system, and will also stipulate the method and frequency of sampling such wastes. Each analysis will be made on a composite of twenty-four (24) hourly (or a larger number of more frequent) samples of wastes collected over a singly twenty-four (24) hour day; the volume of each of the samples will be proportional to the rate of Waste flow. The average suspended solid content or acid equivalent of the wastes for the quarter will be calculated in such a manner as to be as truly representative of the entire quarterly flow and composition of the waste as possible. Particular care will be exercised to insure that the difference in character or composition of the wastes during the week ends or nights when industrial operations are at a minimum, are properly considered in arriving at quarterly averages.

3. **Prohibited Discharges:** The Company reserves the right to refuse connection to its Sanitary Sewer and/or to compel the discontinuance of the use of any system, or to require pre-treatment of Wastes by any Customer, in order to prevent the discharge of any Wastes to the Sanitary Sewer system which may be deemed harmful to the Sanitary Sewer system, or to have an adverse effect on the sewage treatment processes. Except from the written consent of the Company, there shall be excluded from the sewage system but not limited to, any wastes having suspended solids (SS) in excess of 300 mg/L, 5 day Biochemical Oxygen Demand (BOD5) in excess of 300 mg/L, a chlorine demand in excess of 25 mg/L and Wastes having any or all of the following characteristics:
- (a) Wastes containing any gasoline, naphtha, fuel, oil or other liquids, solids or gases which by reason of their nature or quality may cause fire or explosion or be in any other way injurious to persons, the structures of the wastewater system or its operation.
 - (b) Wastes having a temperature in excess of 120 degrees F. or less than 32 degrees F that enters the Sanitary Sewer or Wastes entering the plant that increase the temperature of the Wastewater at the headworks of the plant to exceed 104 degrees F.
 - (c) Wastes having a pH lower than 6.0 or higher than 9.0, or having any corrosive property capable of causing damage or hazards to structures, equipment or personnel of the wastewater system.
 - (d) Wastes containing any noxious or malodorous gas or substance that either singly or by interaction with sewage or other wastes is likely in the opinion of the Company to create a public nuisance or hazard to life or prevent entry to sewers for their maintenance and repair.
 - (e) Wastes containing ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, hair, chemical or paint residues, greases, paunch, manure, dairy products, cotton, wool, plastic or other fibers, lime, slurry or any other solid or viscous material of such character or in such quantity as in the opinion of the Company may cause an obstruction to the flow in sewers or otherwise interfere with the proper operation of the sewer system.

- (f) Wastes containing insoluble, non-flocculent substances having a specific gravity in excess of 2.65.
- (g) Wastes containing soluble substances in such concentrations as to cause the specific gravity to be greater than 1.1.
- (h) Wastes containing any substances which may affect the effluent and may cause violation of the National Pollutant Discharge Elimination System Permit.
- (i) Wastes containing other matter detrimental to the operation of a sewage treatment plant or Sanitary Sewers causing erosion, corrosion or deterioration in sewers, equipment and structures of a sanitary or sewage treatment plant.
- (j) Wastes containing fats, wax, tar, grease or oil of petroleum origin, whether emulsified or not, in excess of one hundred mg/L, or petroleum oil, non biodegradable cutting oil or petroleum products of mineral oil origin in amounts that will cause interference or pass through at the wastewater treatment facilities.
- (k) Wastes containing an average concentration of oils and greases, of the Hydrocarbon variety or any Freon extractables which are not biodegradable in excess of 10 mg/L.
- (l) Wastes containing more than 10 mg/L of any of the following gases: hydrogen sulfide; sulfur dioxide; nitrous oxide; or any of the halogens.

- (m) Wastes containing a toxic or poisonous substance, in a sufficient quantity to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals or create any hazard in the sewer system operation. Toxic pollutants or substances shall include but not limited to Wastewater containing cyanide, chromium, cadmium, mercury, copper, nickel, or materials listed as hazardous materials.
- (n) Any waste containing toxic substances in quantities sufficient to interfere with the biochemical/biological processes of the sewage treatment works or that will pass through the sewage treatment works and exceed the state and/or federal requirements in respect thereof.
- (o) Any waste containing radioactive isotopes or other radioactive materials.
- (p) Sludges resulting from the treatment of concentrated solutions that are not acceptable for discharge to the Sanitary Sewer.
- (q) Effluent limitations promulgated as categorical standards, 40 C.F.R. Chapter 1, Subchapter N and 40 C.F.R. 403.6 shall apply in any instance where they are more stringent than those in this section.
- (r) The local limits in this section may be supplemented with more stringent limitations if the Company determines that the limitations in subsection (a) through (p) above may not be sufficient to protect the operation of the sewerage system or to enable the water pollution control plant to comply with water quality standards or effluent limitations specified in the Company's NPDES permit.
- (s) Waste introduced into the Sanitary Sewer with any pollutants which cause pass through or interference; whether or not the customer is subject any other national, state, or local pretreatment standards or requirements.
- (t) Waste containing any color which may not be removed in the wastewater treatment process.

4. **Disposal of Wastes From Septic Tanks and Cesspools:** No person shall dispose of wastes from septic tanks, cesspools, or other such sources of sanitary sewage to the Company's Sanitary Sewer, except as designated by the Company.

5. **Penalties:** The Company reserves the right to terminate water and/or wastewater service for violation of any provision of these regulations, subject to PUC rules and regulations.
6. **Damages:** In the event of any damage to the Company's wastewater system caused by a Customer, or a Customer's representative, such damage shall be immediately reported to the Company and said Customer shall reimburse the Company for the costs of such repairs, testing, consulting and all other costs associated with the damage.

Any user violating any of the provisions of these Rules and Regulations shall become liable to the Company for all expenses, losses, or damages occasioned by the Company by reason of such violation, whether incidental or consequential.

Section G- Line Extensions

1. When an extension to serve a Customer is required or requested, such extension will be made under the terms of a "Sewer Main Extension Agreement" or a "Sewer Main Extension Deposit Agreement".
2. Customer shall contribute all facilities required for the Company to directly connect the Customer to the Sanitary Sewer. This includes pumping stations, vaults, manholes, mains or any other apparatuses where applicable. The Company shall have the right to locate the facilities as required to meet the long term system needs of the Customers.
3. **Size of Main and Other Facilities:** The Company shall have the exclusive right to determine the type and size of mains and the other facilities required to render adequate service. However, where the Company decides to install a pipe larger than necessary to render extension of adequate service to the applicant, estimated or actual cost figures in the Sewer Main Extension Agreement or Sewer Main Extension Deposit Agreement shall include only the material and installation cost for a pipe the size of which is necessary to provide adequate service to the applicant. Any incremental costs of a larger pipe will be the responsibility of the Company. All estimated or actual cost figures referred to in the Sewer Main Extension Agreement or Sewer Main Extension Deposit Agreement shall include a reasonable allowance for overhead costs and taxes as appropriate.

4. **Length of Extension:** In determining the necessary length of an extension, the terminal point of such extension shall be at that point in the property line or right-of-way, which is equidistant from the side property lines of the last lot for which service was requested except where the Company, in its sole opinion, determines that it is necessary to extend beyond the last lot and connect to an existing main to provide adequate and reliable wastewater service. A street service connection will be provided only for customer service laterals that extend at right angles from the curb line in a straight line to the premises to be served.

5. **Offsite Development Marketing Contracts:** Where it is prudent, reasonable and in the public interest, the Company may, at its option enter into offsite development marketing contracts which depart from the standard terms of the "Sewer Main Extension Agreement" or "Sewer Main Extension Deposit Agreement". These marketing agreements shall become effective 30 days after the Company has filed a copy thereof with the Pennsylvania Public Utility Commission, or in the event that the Commission institutes an investigation, at such time as the Commission grants its approval thereof.

Section H- Service Continuity

1. **Regularity of Service:** The Company may, at any time, shut off service in case of accident or for the purpose of making connections, alterations, repairs or changes, or for other reasons. The Company will, pursuant to Commission regulations at 52 Pa. Code '67.1 and as circumstances permit, notify customers to be affected by service interruptions.

2. **Liability for Damages:**
 - (a) **Limitation of Damages for Service Interruptions:** The Company's liability to a customer for any loss or damage from any excess or deficiency in the wastewater collection service due to any cause other than willful misconduct or negligence by the Company, its employees or agents shall be limited to an amount no more than the Customer charge or minimum bill for the period in question. The Company will undertake to use reasonable care and diligence in order to prevent and avoid interruptions and fluctuations in service, but cannot and does not guarantee that such will not occur.

(b) **Responsibility for Customer Facilities:** The Company shall not be liable for any loss or damage caused by reason of any break, blockage, leak or other defect in a Customer's own service pipe, line, fixtures or other installations, except where the damage is a result of the negligence or willful misconduct of the Company, its employees or agents. The Company shall in no event be responsible for maintenance of, or for damage done by sewage escaping from a blockage of the customer's service lateral or any other pipe or fixture, or from any other cause occurring to any premise or within any house or building.

(c) When the Company incurs costs and the blockage or defect is determined to be on the customer's service lateral, the Company may request reimbursement and the Customer is responsible to reimburse the Company for associated costs.

Section I- Waivers

The Company may, at its sole discretion, waive any of the Rules contained herein that operate for the benefit of the Company; provided, that no such waiver will be valid unless in writing and signed by an authorized representative of the Company, and provided that no waiver will be allowed where the waiver would constitute a violation of the Public Utility Code, the regulations of the Commission or of any other applicable statute, law or regulation.

Section J- Amendment of Commission Regulations

Whenever Commission regulations in Title 52 of the Pennsylvania Code are duly amended in such a way as would produce a difference between Commission regulations and this tariff, this tariff is deemed to be amended so as to be consistent with the amendments to the regulations, except that if application of the amendment to Title 52 is discretionary, this tariff will remain unchanged.

Section K - Industrial and Commercial Service Limitations - Claysville Wastewater Operations

1. **Pretreatment:** All industrial and commercial waste proposed for discharge into the sewer system shall be categorized to determine the degree of pretreatment, if any, necessary in order that the waste will not adversely affect the system or the sewage treatment facilities. The Company will have the authority to properly control any waste discharge into its sewage system by regulating the rate of any waste discharge into its sewer system and/or by requiring necessary pretreatment, and excluding certain waste, if necessary, to protect the integrity of the Company's system.

2. **Customer Limitations:** Customers specifically agree that service applies exclusively for domestic/household sewage. If any Customer discharges industrial or commercial waste that:

- (a) the existing wastewater treatment plant is unable to satisfactorily treat; or,
- (b) is not in compliance with discharge permit standards, disrupts the normal functioning of the existing wastewater treatment plant; or,
- (c) is more costly to treat than typical domestic wastewater; or,
- (d) requires the utilization of more wastewater treatment plant capacity per gallon of effluent than that required by average typical domestic waste water,

then the customer shall provide, at the customer's own expense, such pretreatment as may be necessary before such waste is discharged into the Company mains. No commercial or industrial waste, whether pretreated or not, may be discharged without prior written authorization from the Company. The Company reserves the right to set the applicable discharge limits on any waste stream entering its collection system. An Industrial Waste Pretreatment Agreement will need to be finalized prior to allowing the discharge to occur.

3. **Flow Limitations:** The Company reserves the right to control quantities and rate of discharge of such industrial wastes on the basis of 24 hours per day and 7 days per week.

4. **Industrial Wastes Permits:** All persons who discharge industrial wastes to the Public Sanitary sewer system shall be required to complete and file with the Company, an industrial waste questionnaire, as prescribed and furnished by the Company, which shall include pertinent data inclusive of flow and analysis of all wastes discharged to the sewer system. Such surveys will be required at a frequency not to exceed five (5) years. All persons altering their discharge streams will be required to consult with the Company prior to finalizing any changes to the process as described in the current questionnaire.

- (a) Failure to comply with the above requirements shall be cause for termination of service in accordance with these Rules and Regulations.

- (b) Acceptance of industrial wastes to the sewage system from major contributing industries will be the basis of an Industrial Waste Pretreatment Permit, issued by the Company, conforming to the parameters required, from time to time, by the United States Environmental Protection Agency, (EPA) to insure compliance with all applicable limitations of the Company's Current National Pollution Discharge Elimination System Permits (NPDES). Issuance of a permit containing parameters to be met, may require pretreatment of industrial wastes regulation of the rate of discharge and providing such metering or monitoring of the industrial wastes, as the Company may require. The Company reserves the right to change the permit parameters from time to time to conform to changes to its NPDES Permits. The Company may impose self-monitoring requirements for targeted parameters, and may conduct its own sampling at the discharge point to the collection system. Penalties and/or surcharges may be placed on certain waste streams.
5. **Company Limitations:** The Company will not be liable nor bound to increase wastewater treatment plant operations to accommodate industrial or commercial waste.
6. **Specific Dangers:** In general, any waste will be considered harmful to the Company wastewater system if it may cause any of the following damaging effects:
- (a) chemical reaction either directly or indirectly with the materials of construction of the system in such a manner as to impair the strength or durability of the sewer structures;
 - (b) mechanical action that will destroy the sewer structures;
 - (c) restriction of the hydraulic capacity of the sewer structures;
 - (d) restriction of the normal inspection or maintenance of the sewer structures;
 - (e) danger to public health and safety; or
 - (f) obnoxious condition contrary to public interest.

7. Grease, Oil, Sand Traps, and interceptors: The Company reserves the right to require the installation of grease, oil, sand traps or interceptors at the Company's discretion when necessary for the proper handling of liquid wastes containing grease in excessive amounts, any flammable wastes, sand, or other harmful ingredients. All traps/interceptors shall be of a type and capacity approved by the Company and shall be located as to be readily and easily accessible for cleaning and inspection. Grease, oil, sand traps or interceptors shall be installed in all new filling stations, garages, restaurants, and other new facilities wherein heavy discharge of grease, oil, sand is to be expected. Owners of grease, oil, sand traps or interceptors are required to clean out the device on a regular basis to maintain good operation of the trap. The Company reserves the right to require owners of grease, oil, sand traps or interceptors to submit records of cleaning to the Company at the Company's discretion.

Section L. Privilege to Investigate/Right of Access

The Company's authorized representatives shall have the right of access at all reasonable times to all parts of any premises connected with the system, for the purpose of examining and inspecting connections and fixtures, including the water and/or wastewater metering arrangement, or for disconnecting service for any proper cause.

PENNSYLVANIA-AMERICAN WATER COMPANY
(Hereinafter referred to as the "Company")

D/B/A

Pennsylvania American Water

RATES, RULES AND REGULATIONS GOVERNING
THE PROVISION OF WASTEWATER COLLECTION, TREATMENT
AND/OR DISPOSAL SERVICE TO THE PUBLIC IN
CLAYSVILLE BOROUGH, DONEGAL TOWNSHIP,
WASHINGTON COUNTY
ALL IN THE COMMONWEALTH OF PENNSYLVANIA

Filed in compliance with the Pennsylvania Public Utility Commission
Order at A-230073F0012, entered February 15, 2008.

Issued: August 5, 2008

Effective: August 6, 2008

BY: Kathy Pape, President
Pennsylvania American Water
800 West Hersheypark Drive
Hershey, PA 17033

LIST OF CHANGES

Changes

This tariff supplement is being originally filed as Tariff Wastewater PA P.U.C. No. 6, for the Pennsylvania-American Water Company in accordance with Commission approval at A-230073F0012 for the acquisition of Claysville-Donnegal Joint Municipal Authority by Pennsylvania American Water, adopted February 14, 2008.

SCHEDULE OF RATES
APPLICABLE TO CLAYSVILLE-DONEGAL SYSTEM

Serving the territory of Claysville Borough, Donegal Township, Washington
County

Schedule of Rates for Service

Metered Rate

All metered customers shall be subject to a monthly minimum charge of \$25.50.

Consumption Charges

The following rates shall apply per 100 gallons of water consumption.

Monthly

The First	1,000 gallons	minimum charge
All over	1,000 gallons	\$.575 per hundred

Unmetered Rates

All unmetered customers shall be subject to a monthly charge of \$37.08 per equivalent dwelling unit.

STATE TAX ADJUSTMENT SURCHARGE

In addition to the net charges provided for in this Tariff, a surcharge of negative 0.00% will apply to all services rendered.

The above surcharges will be recomputed, using the elements prescribed by the Commission whenever any of the tax rates used in calculation of the surcharge are changed.

The above recalculations will be submitted to the Commission within 10 days after the occurrence of the event or date which occasioned such recomputations. If the recomputed surcharge is less than the one in effect, the Company will, and if the recomputed surcharge is more than the one in effect the Company may, submit with such recomputation a Tariff or Supplement to reflect such recomputed surcharge, the effective date of which shall be 10 days after filing.

PART II: DEFINITIONS

The following words and phrases, when used in this tariff, shall have the meanings assigned below unless the context clearly indicates otherwise:

1. **Applicant:** A person, association, partnership, corporation, municipality, authority, state or federal governmental agency or other entity who applies to become a customer of the Company in accordance with Part III, Section A, of this tariff.
2. **B.O.D. (Biochemical Oxygen Demand):** The quantity of oxygen, expressed in milligrams per liter, utilized in the biochemical oxidation of organic matter under the standard laboratory procedure for five (5) days at twenty (20) degrees Centigrade. The standard laboratory procedure shall be that found in the latest approved edition of "Standard Methods for the Examination of Water and Sewage" published by the American Public Health Association.
3. **Bona Fide Service Applicant (for line extension purposes):** A person or entity applying for wastewater service to an existing structure for which a valid occupancy permit has been issued or lot for which a building permit has been issued provided the structure or lot is within the Company's certificated service territory, the proposed service connection is consistent with the Act 537 Plan adopted by the municipality and approved by PaDEP, and the structure is either a primary residence of the applicant or a place of business. An applicant shall not be deemed a bona fide service applicant if:
 - (a) applicant is requesting wastewater service to a building lot, subdivision or a secondary residence;
 - (b) the request for service is part of a plan for the development of a residential dwelling or subdivision; or
 - (c) the applicant is requesting special utility service.
4. **Commission:** The Pennsylvania Public Utility Commission.
5. **Company:** Pennsylvania-American Water Company and its duly authorized officers, agents and employees, each acting within the scope of his authority and employment.

6. **Company Service Line:** Company owned wastewater service lateral from the collection facilities of the Company which connects to the customer service line at the edge of the right-of-way or actual property line.
7. **Customer:** A person or entity who is an owner or occupant and who contracts with the Company for or who takes or receives wastewater collection, treatment and/or disposal service without a contract.
8. **Customer Service Line:** Customer owned wastewater service lateral extending from the end of the Company service line or connection to the point of connection into and within the customer's premise
9. **Domestic Wastewater:** The liquid waste or liquid borne waste: (1) resulting from the non-commercial preparation, cooking and handling of food; (2) consisting of human excrement; or (3) consisting of wastewater, non-commercial laundering water, domestic housekeeping wastewater, and similar types of wastes from sanitary uses, whether generated in residences or sanitary facilities in commercial or industrial facilities, but does not include storm water introduced from roof leaders, sump pumps, floor drains or industrial wastewater. To include sanitary wastes having suspended solids (SS) less than 300mg/L, 5 day Biochemical Oxygen Demand (BOD%) less than 300 mg/L, and a chlorine demand less than 25mg/L.
10. **Dwelling Unit:** A structure or dwelling intended to be occupied as a whole by one family.
11. **Equivalent Dwelling Units (EDU):** The EDU is a measure based upon the estimated maximum daily wastewater flow for the type of business, as calculated by the PaDEP Regulation at 25 Pa Code: 73.17 divided by the typical estimated maximum daily wastewater flow from a current single-family unit (One EDU shall be equal to 262.5 gallons per day for a single-family unit, unless modified by the Company).
12. **Garbage:** The solid wastes from domestic cooking and dispensing of food, and from the handling and storage of produce.
13. **Garbage Properly Shredded:** The term "Properly Shredded Garbage", as used herein, shall mean the wastes from the preparation, cooking, and dispensing of food that have been shredded to such degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half inch in dimension.
14. **Grinder pump:** Any mechanical or powered device, owned by the Customer, used to grind, macerate or fluidize garbage so that it can be discharged into the wastewater system of the Company.

15. **Industrial Wastes:** Any liquid, gaseous or water borne wastes from industrial processes or commercial establishments, as distinct from sanitary sewage.
16. **Industrial Waste Permit:** A wastewater permit periodically issued by the Company to an industrial user which discharges industrial waste as provided in Section L-4 of these Rules and Regulations.
17. **Line extension (for line extension purposes):** An addition to the Company's main line which is necessary to serve the premises of a customer.
18. **Main:** The Company's pipe, excluding service connections, located in a public highway, street, alley or private right-of-way which pipe is used in transporting wastewater.
19. **Meter:** Any device supplied by the Company, except as approved by the Commission, for the purpose of measuring water or wastewater consumption.
20. **Nonresidential Service:** Wastewater service supplied to a commercial or industrial building, including a hotel or motel, or to a master-metered water)trailer park or multi-tenant apartment building, or to any customer who purchases wastewater service from the Company for the purpose of resale.
21. **Pretreatment:** The application of physical, chemical and/or biological processes to reduce the amount of pollutants in, or alter the nature of the polluting properties of, an industrial process wastewater prior to discharging such wastewater into the Sewer System.
22. **Public Utility:** Persons or corporations owning or operating equipment or facilities in this Commonwealth for water, electric or wastewater collection, treatment, or disposal for the public for compensation.
23. **Residential Service:** Wastewater service supplied to an individual single-family residential dwelling unit.
24. **Regulatory Agency:** Agencies, including but not limited to the Commission, the Pennsylvania Department of Environmental Protection (DEP), U.S. Environmental Protection Agency (EPA), which have authority over the operations of and/or discharges into and/or from the Company's treatment facilities.
25. **Sanitary Sewer:** A sewer which carries sanitary wastewater and excludes storm, surface and ground water.

26. **Special Utility Service:** Residential or Non-Residential service which exceeds that required for ordinary residential purposes. See additional clarification in Section H, Part 2(d) of this tariff.
27. **Storm Sewer:** A sewer which receives discharges from storm water building sewers and/or carries off surface, subsurface, or storm water from the buildings, ground, streets, or other areas, including street wash.
28. **Suspended Solids:** Solids that either float on the surface of, or are in suspension in water, wastewater, or other liquids, and which are largely removable by filtration.
29. **Tariff:** All of the service rates, rules and regulations issued by the Company, together with any supplements or revisions thereto, officially approved by the Commission and contained in this document.
30. **Toxic Substances:** Any substances where gaseous, liquid or solid waste which, when discharged to a public sewer in sufficient quantities, will be detrimental to any biological wastewater treatment process, constitute a hazard to human beings or animals, inhibit aquatic life, or create a hazard to recreation in receiving waters of the effluent from a wastewater treatment plant, or as defined pursuant to PL 92500 (Federal Water Pollution Control Act Amendments of 1972) or its amendments.
31. **Wastes:** Any liquid, gaseous, or solid substances or combination thereof which are discarded, leached, or spilled substances or combination thereof including sanitary wastewater but excluding storm-water.
32. **Wastewater:** The liquid and water-carried industrial or domestic wastes from dwellings, commercial facilities, industrial facilities and institutions, together with any groundwater, surface water, and storm water that may be present, whether treated or untreated, which is discharged into or permitted to enter the Company's sewer system.

PART III: RULES AND REGULATIONS**Section A - Applications for Service**

1. **Service Application Required:** All applications for service must be in writing on a form provided by the Company and signed by the owner or owners of the property to which wastewater collection service will be provided; except that where a lessee of property occupies or uses the property under a lease having a fixed term of more than six (6) months, the lessee may request service as an applicant. The Company may, at its sole discretion, require that a separate contract for service be signed by the applicant.
2. **Change in Ownership or Tenancy:** A new application must be made to the Company upon any change in ownership where the owner of the property is the customer, or upon any change in the identity of a lessee where the lessee of the property is the customer. The Company shall have the right to discontinue or otherwise interrupt wastewater collection service upon three (3) days notice if a new application has not been made and approved for the new customer.
3. **Acceptance of Application:** An application for service shall be considered accepted by the Company only upon oral or written approval by the Company. The Company may provide service to the applicant pending formal review and acceptance of the application.
4. **Temporary Service:** In the case of temporary service for less than a 12-month period, the Company may require the customer to pay all costs of making the service connection and for its removal after the service has been discontinued, or to pay a fixed amount in advance to cover such expenses. If the actual costs differ from the estimate, the Applicant will pay to the Company any excess amount due or the Company will refund to the Applicant any excess amount paid.

Section B - Construction and Maintenance of Facilities

1. **Customer Service Line:** The customer service line shall be furnished, installed, maintained and/or replaced, when necessary, by and at the sole expense of the customer. The Company reserves the right to determine the size, kind and depth of customer service lines. The Company reserves the right to determine the size, type, quality, depth, and connection location of the customer service lines. Prior to connection to the Company service line, the Customer, at their sole cost, shall have the customer service line air pressure tested and checked for alignment by a certified plumber under the supervision of a Company representative.
2. **Separate Trench:** The customer wastewater service line shall not be laid in the same trench with drain or water pipe, the facilities of any other public utility or of any municipality or municipal authority that provides a public utility service.
3. **Customer's Responsibilities:** All service lines, connections and fixtures furnished by the customer shall be maintained by the customer in good working order. All valves, meters and appliances furnished by the Company and on property owned or leased by the customer shall be protected properly by the customer. All leaks in the customer service line or any pipe or fixtures in or upon the customer's premises must be repaired immediately by the customer as determined solely by the Company.
4. **Customer Grinder Pump:** In areas of the collection system where the Company has installed a pressure sewage collection system or where required as determined by the Company, the Customer, in conjunction with the construction of their service line, shall install, own, operate, and maintain and replace a grinder pump and holding tank at the customer's expense as specified by the Company prior to connection and shall maintain such facilities in good order and repair.
5. **Right to Reject:** The Company may refuse to connect with any piping system or furnish wastewater collection, treatment and/or disposal through a service already connected if such system or service is not properly installed or maintained.
6. **Water Use Standards for Certain Plumbing Fixtures:** This rule establishes maximum water use criteria for certain plumbing fixtures installed in all new construction or renovation. Such standards have been implemented to achieve maximum efficiency of water use which the Commission has determined is technologically feasible and economically justified.

(a) Maximum permitted water usage levels shall be as follows:

<u>Plumbing Fixture</u>	<u>Maximum Water Use</u>
water closets	1.6 gallons/flush
urinals	1.5 gallons/flush

(b) The Company may exempt particular customers, or classes of customers, when it is determined that the water use standards for plumbing fixtures listed above are unreasonable, cannot be accommodated by existing technology or are otherwise inappropriate.

7. **Individual Service Lines:** Except as otherwise expressly authorized by the Company, each individual customer shall be served only through a separate service line connected directly to the Company's collection main, and that service line shall not cross over the property of or serve any other customer or premise. The maximum service line length shall be two hundred and fifty (250) feet from the point of connections and the Company shall have the right to waive this maximum length requirement at its sole discretion. No additional attachment may be made to any customer's service line for any purpose without the express written approval of the Company.
8. **Connection to Company Mains:** No connection shall be made to the Company's main, nor detachment from it, except under the direction and control of the Company. All such connections shall be property of the Company and shall be accessible to it and under its control. The Company will furnish, install and maintain all service lines from the main to the property line or right-of-way.

Section C - Discontinuance, Termination and Restoration of Service

1. Discontinuance by Customer: Where a customer requests the Company to discontinue service, the following rules shall apply:
 - (a) A customer who wishes to have service discontinued shall give at least three (3) days notice to the Company, specifying the date on which service is to be discontinued. In the absence of proper notice, the customer shall be responsible for all service rendered until the time that the Company shall have actual or constructive notice of the customer's intent to discontinue service. The customer shall not begin to use nor cease to use wastewater service without the prior written consent of the Company. A customer discontinuing service remains a customer for purposes of paying turn-on fees pursuant to Rule 3 of this Section for a period of nine (9) months.
 - (b) Where a customer requests turn-on of service within six (6) months of disconnection, the customer shall be subject to monthly minimum billing for the period of disconnection.

2. **Termination by Company:** Water service to the customer may be terminated for good cause, including, but not limited to, the following:
- (a) making an application for service that contains material misrepresentations;
 - (b) failure to repair leaks in pipes or fixtures;
 - (c) tampering with any service line, or installing or maintaining any unauthorized connection;
 - (d) theft of service, which shall include taking service without having made a proper application for service under Part III, Section A;
 - (e) failure to pay, when due, any charges accruing under this tariff;
 - (f) discharge of any prohibited substance listed in Section N into the wastewater system;
 - (g) receipt by the Company of an order or notice from the Department of Environmental Protection, a health agency, local plumbing inspector or other similar authority, to terminate service to the property served on the grounds of violation of any law or ordinance, or upon notice to the Company from any such authority that has ordered an existing violation on the property to be corrected and that such order has not been complied with or
 - (h) material violation of any provisions of the tariff;
 - (i) failure to properly install and maintain a grinder pump, including its replacement when improperly functioning as solely determined by the Company;
 - (j) any unauthorized, un-inspected, or improper connection, as herein defined, found to exist will be required to be disconnected within ten (10) days. The Company may require a plumber's sworn statement or certificate as evidence that the connection has been discontinued.
3. **Turn-on Charge:** Whenever service is discontinued or terminated pursuant to Rule 1 or Rule 2 of this Section, service shall be permitted by the Company only upon the payment by the customer of a turn-on charge and the curing of the problem that gave rise to the termination if under Rule 2. Refer to Section F for turn-on fee.

Section D - Billing and Collection

1. **Issuance of Bills:** The Company will bill each customer within fifteen (15) days of the last day of each billing period.
2. **Billing Due Date:** The due date for payment of a bill for nonresidential service shall be no less than fifteen (15) days from the date of transmittal. The due date for payment of a bill for residential service shall be no less than twenty (20) days from the date of transmittal. If the last day for payment falls on a Saturday, Sunday or bank holiday, or on any day when the offices of the Company are not open to the general public, the due date shall be extended to the next business day. The Company may not impose a late-payment charge unless payment is received more than five (5) days after the stated due date.
3. **Late-Payment Charge:** All amounts not paid when due shall accrue a late-payment charge at the rate not to exceed one and fifty one-hundredths percent (1.50%) per billing period, not to exceed eighteen percent (18%) per year when not paid as prescribed in Rule 2 of this Section.
4. **Change in Billing Address:** Where a customer fails to notify the Company of a change in billing address, the customer shall remain responsible to remit payment by the billing due date.
5. **Application of Payment:** Utility bills rendered by the Company shall include only the amount due for utility service. Where a customer remittance to the Company includes payment for any non-utility services, proceeds will be applied first to pay all outstanding regulated utility charges.
6. **Return Check Charges:** The customer will be responsible for the payment of a \$20.00 charge for each time a check presented to the Company for payment on that customer's utility bill is returned by the payer bank for any reason including, but not limited to, insufficient funds, account closed, payment stopped, two signatures required, post-dated, stale date, account garnished, or unauthorized signature. This charge is in addition to any charge which may be assessed against the customer by the bank.
7. **Disputed Bills:** In the event of a dispute between the customer and the Company with respect to any bill, the Company will promptly make such investigation as may be required by the particular case and report the result to the customer. The customer is not

obligated to pay the disputed amount during the pendency of the Company's investigation. When the Company has made a report to the customer sustaining the bill as rendered, the customer shall have fifteen (15) days from the date of such report in which to pay the bill. If the Company determines that the bill originally rendered is incorrect, the Company will issue a corrected bill with a new due date for payment. Any amounts received by the Company in excess of the amount determined to be due by the Company's investigation of the dispute shall be refunded to the customer.

Section E - Deposits

1. Residential Customers:

- (a) New Applicants—The Company will provide service without requiring a deposit unless the applicant was terminated for nonpayment within the prior twelve (12) months or has an unpaid balance for prior service from the Company. The amount of the deposit will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.
- (b) Existing Customers—If a customer has paid late on two (2) consecutive occasions or a total of three (3) times within the prior 12-month period, the Company may send a letter informing the customer that a deposit may be required if another late payment is received within the next twelve (12) months. An existing customer may be required to pay a deposit as a condition to having service restored after termination for nonpayment or for failure to comply with a payment agreement. The amount of the deposit will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.
- (c) Deposit Refunds and Interest—A deposit will be refunded if service is discontinued and the final bill is paid or if the customer has paid the bills for the prior 12-month period without having been late on more than two (2) occasions and is not currently delinquent. Deposits from residential customers shall bear simple interest at the rate of the average of one-year Treasury Bills for September, October and November of the previous year, payable annually without deductions for taxes thereon unless otherwise required by law. The applicable interest rate for each year shall be determined as of January 1 of that year.

2. Nonresidential Customers:

- (a) New Applicants - A deposit may be required from any new applicant who does not have prior satisfactory credit history with the Company. The amount of the deposit will not be greater than an estimated average bill for one (1) billing period plus the estimated bill for one (1) additional month's service.
- (b) Existing Customers-Deposit requirements for existing nonresidential customers shall be as established for residential customers in Rule 1 of this Section.
- (c) Deposit Refunds and Interest-A deposit will be refunded if the customer pays all bills on time over a 12-month period or if service is disconnected and the final bill has been paid. There will be no interest paid on deposits for nonresidential accounts.

Section F- Service Reconnection and Discontinuance Fee

A fee will be charged for the shut-off and turn-on of any service. The fee for service performed during regularly scheduled hours shall be \$30.00. For non-regularly-scheduled working hours, the fee is equivalent to the cost incurred by the Company.

Section G- Wastewater Control Regulations**1. General:**

- (a) No storm water from pavements, area ways, roof runoff water, foundation drains, subsurface drains, water from springs, cooling water, basement sump pumps, unpolluted industrial or commercial process water or other sources shall be admitted to the Company mains.
- (b) The discharge of garbage to the sewer system is expressly prohibited. Properly shredded garbage may be discharged into the sewer system when expressly authorized by the Company.
- (c) This does not exclude or preclude pump-out of manholes by a utility company or of manholes on plant premises which should be kept in dry or reasonably dry condition.

2. Sampling and Analysis:

- (a) All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in the Company's rules may be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater" as prepared, approved and published jointly by the American Public Health Association, the American Water Works Association, and/or the Water Pollution Control Federation or other reference sources specified by regulatory agency requirements, such as "Methods for Chemical Analysis of Water and Wastes," U.S.E.P.A. 1974 or its subsequent updated version.
- (b) All measurements, test, inspections and analyses deemed by the Company to be necessary under this Section or any other part of the Rules and Regulations of the Company, shall be done by the Company or its agents, employees or contractors. If the measurements, test, inspections and/or analyses determine that a customer has created a situation which is in violation of any statute, ordinance, rule or regulation then the customer shall be required to pay all costs incurred in order to measure, test, inspect, analyze and remedy the situation. Otherwise, the costs involved are to be borne by the Company. Costs assessed against a Customer pursuant to this Section shall be in addition to any other fees charged by the Company. The costs shall be payable within 30 days of presentation of a bill for such costs by the Company to the Customer(s).
- (c) Where the Company deems it advisable, it may require any person discharging wastes to install and maintain, at his or her own expense, in a manner approved by the Company or its representative, a suitable device to continuously measure and record the pH of the wastes so discharged.

(d) In the event any person, firm or corporation producing any industrial wastes otherwise excluded from the sewer system, desires to discharge the same into any portion of the Company's sanitary sewer system, the Company may at its option, consent to such discharge at a charge in accordance with the Company's established Schedule of Rates, Surcharges and discounts applicable to such industrial wastes applicable to such industrial wastes, as provided in Section N3 entitled "Surcharge for Industrial Wastes." Such consent may be made contingent upon the applicant providing and maintaining apparatus for regulating the rate of discharge and/or treating the wastes at his or its expense prior to discharge as the Company may deem necessary. Such consent will stipulate the location and type of metering device to be used for measuring the quantity of such wastes discharged to the sewage system, and will also stipulate the method and frequency of sampling such wastes. Each analysis will be made on a composite of twenty-four (24) hourly (or a larger number of more frequent) samples of wastes collected over a singly twenty-four (24) hour day; the volume of each of the samples will be proportional to the rate of Waste flow. The average suspended solid content or acid equivalent of the wastes for the quarter will be calculated in such a manner as to be as truly representative of the entire quarterly flow and composition of the waste as possible. Particular care will be exercised to insure that the difference in character or composition of the wastes during the week ends or nights when industrial operations are at a minimum, are properly considered in arriving at quarterly averages.

3. **Disposal of Wastes From Septic Tanks and Cesspools:** No person shall dispose of wastes from septic tanks, cesspools, or other such sources of sanitary sewage to the Company's wastewater system, except as designated by the Company.
4. **Penalties:** The Company reserves the right to deny wastewater service for violation of any provision of these regulations, subject to PUC rules and regulations.
5. **Damage to System and Indemnification:** In the event of any damage to the Company's wastewater system caused by a customer, such damage shall be immediately reported to the Company and said customer shall reimburse Company for the costs of such repairs.

Section H- Line Extensions

1. **Requests by Bona Fide Service Applicant:** Upon request by a bona fide service applicant, the Company shall construct line extensions within its franchised territory consistent with the following directives:
 - (a) The company will extend existing collection mains a distance of thirty-five (35) feet for each bona fide prospective customer making application in accordance with these Rules and Regulations for sewer service there from for a period of one (1) year or more. Such extensions will be made without cost to such customer(s).
 - (b) When an extension greater than thirty-five (35) feet in length for each bona fide prospective customer is required or requested, such extension will be made under the terms of an Extension Deposit Agreement for Bona Fide Service Applicant, as herein after set forth in Section IV, and subject to the applicable provisions of these Rules and Regulations.
2. **Customer advance financing, refunds and facilities on private property:**
 - (a) When a customer advance is required of a service applicant and an additional customer or customers attach service lines to the line extension within five (5) years, the Company shall refund a portion of the advance to the customer. Deposits made for additional facilities other than the line extension are contributions in aid of construction and need not be refunded.

- (b) The company will refund to the bona fide prospective applicant, during a period of five (5) years from the date of the extension deposit, the average cost of thirty-five (35) feet of main (based on the year of the original installation) for each additional bona fide prospective customer from whom a street service connection shall be directly attached to such main extension as distinguished from extensions or branches thereof. Provided, however, that the total amount refunded shall not exceed the original deposit without interest, and provided that all or any part of the deposit not refunded within said five (5) year period shall become the property of the Company and shall be treated as Contributions in Aid of Construction for ratemaking purposes. The refund period shall be five (5) years from the actual date of the payment of the extension. The bona fide service applicant may request refunds once in each Calendar quarter, furnishing the Company at such time, a listing of additional bona fide service applicants; however, failure on the part of the bona fide service applicant to make such request shall not constitute a waiver of any rights hereunder or relieve the Company of the obligation to make refunds with reasonable promptness.
- (c) The Company shall require a customer to pay, in advance, a reasonable charge for service lines and equipment installed on private property for the exclusive use of the customer.

- (d) When an extension is requested or required to serve a Bona Fide Service Applicant requiring Special Utility Service, as herein after set forth in Section IV, construction of the extension or of any facilities needed to provide such Special Utility Service will not commence until a Special Utility Service Agreement has been executed and all applicable terms and conditions therein have been satisfied by the Applicant including, but not limited to, paying the requisite sum of money for construction of the facilities needed to furnish Special Utility Service, in accordance with the Preliminary Memorandum to such Special Utility Service Agreement, and subject to the applicable provisions of these Rules and Regulations. Special utility service shall mean residential or non-residential service which exceeds that required for ordinary residential purposes. Section H Rule 1 (a) through (b) of this tariff does not apply to special utility service. By way of illustration and not limitation, special utility service shall include: the installation of facilities such as oversized mains and booster pumps as necessary to provide adequate flows, or service to large commercial and industrial facilities. An otherwise bona fide applicant requesting service which includes a "special utility service" component is entitled to bona fide applicant status, including the corresponding Company contribution toward the costs to the line extension which do not meet the special utility service criteria.
3. **Requirement for Extension Deposit Agreement:** Where extension of facilities is not fully funded by the Company pursuant to Rule 2 of this Section, the execution by the applicant of an Extension Deposit Agreement for customer contribution or advance shall be a condition of extending the facilities. Upon notice that the Company is prepared and able to go forward with the work, the applicant will deposit with the Company the amount specified in the Extension Deposit Agreement, including, but not limited to the cost to design, permit, engineer, construct and inspect the extension of facilities.

4. **Size of Main and Other Facilities:** The Company shall have the exclusive right to determine the type and size of mains and the other facilities required to render adequate service. However, where the Company decides to install a pipe larger than necessary to render extension of adequate service to the applicant, estimated or actual cost figures in the Extension Deposit Agreement shall include only the material and installation cost for a pipe the size of which is necessary to provide adequate service to the applicant. Any incremental costs of a larger pipe will be the responsibility of the Company. All estimated or actual cost figures referred to in the Extension Deposit Agreement shall include a reasonable allowance for overhead costs and taxes as appropriate.
5. **Length of Extension:** In determining the necessary length of an extension, the terminal point of such extension shall be at that point in the property line or right-of-way, which is equidistant from the side property lines of the last lot for which service was requested except where the Company, in its sole opinion, determines that it is necessary to extend beyond the last lot and connect to an existing main to provide adequate and reliable wastewater service. A street service connection will be provided only for customer service lines that extend at right angles from the curb line in a straight line to the premises to be served.
6. **Cost True-up:** At the conclusion of the main extension project there shall be a reconciliation of the actual costs incurred to the amount of extension deposit that has been paid by the customer. If the actual cost exceeds the deposit, the applicant shall be responsible for payment to the Company of the difference. If the deposit exceeds the actual cost, the Company shall refund the difference. Costs shall include, but not be limited to, the costs to design, permit, engineer, construct and inspect the extension of facilities.

Section I- Service Continuity

1. **Regularity of Service:** The Company may, at any time, shut off service in case of accident or for the purpose of making connections, alterations, repairs or changes, or for other reasons. The Company will, pursuant to Commission regulations at 52 Pa. Code '67.1 and as circumstances permit, notify customers to be affected by service interruptions.

2. **Liability for Damages:**

- (a) Limitation of Damages for Service Interruptions—The Company's liability to a customer for any loss or damage from any excess or deficiency in the wastewater collection service due to any cause other than willful misconduct or negligence by the Company, its employees or agents shall be limited to an amount no more than the customer charge or minimum bill for the period in question. The Company will undertake to use reasonable care and diligence in order to prevent and avoid interruptions and fluctuations in service, but cannot and does not guarantee that such will not occur.

- (b) Responsibility for Customer Facilities—The Company shall not be liable for any loss or damage caused by reason of any break, leak or other defect in a customer's own service pipe, line, fixtures or other installations, except where the damage is a result of the negligence or willful misconduct of the Company, its employees or agents. The Company shall in no event be responsible for maintenance of, or for damage done by sewage escaping from our blockage of the lateral or any other pipe or fixture, or from any other cause occurring to any premise or within any house or building.

Section J- Waivers

The Company may, at its sole discretion, waive any of the Rules contained herein that operate for the benefit of the Company; provided, that no such waiver will be valid unless in writing and signed by an authorized representative of the Company, and provided that no waiver will be allowed where the waiver would constitute a violation of the Public Utility Code, the regulations of the Commission or of any other applicable statute, law or regulation.

Section K- Amendment of Commission Regulations

Whenever Commission regulations in Title 52 of the Pennsylvania Code are duly amended in such a way as would produce a difference between Commission regulations and this tariff, this tariff is deemed to be amended so as to be consistent with the amendments to the regulations, except that if application of the amendment to Title 52 is discretionary, this tariff will remain unchanged.

Section L - Industrial and Commercial Service Limitations.

1. **Pretreatment:** All industrial and commercial waste proposed for discharge into the sewer system shall be categorized to determine the degree of pretreatment, if any, necessary in order that the waste will not adversely affect the system or the sewage treatment facilities. The Company will have the authority to properly control any waste discharge into its sewage system by regulating the rate of any waste discharge into its sewer system and/or by requiring necessary pretreatment, and excluding certain waste, if necessary, to protect the integrity of the Company's system.

2. **Customer Limitations:** Customers specifically agree that service applies exclusively for domestic/household sewage. If any Customer discharges industrial or commercial waste that:
 - (a) the existing wastewater treatment plant is unable to satisfactorily treat; or,
 - (b) is not in compliance with discharge permit standards, disrupts the normal functioning of the existing wastewater treatment plant; or,
 - (c) is more costly to treat than typical domestic wastewater; or,
 - (d) requires the utilization of more wastewater treatment plant capacity per gallon of effluent than that required by average typical domestic waste water,then the customer shall provide, at the customer's own expense, such pretreatment as may be necessary before such waste is discharged into the Company mains. No commercial or industrial waste, whether pretreated or not, may be discharged without prior written authorization from the Company. The Company reserves the right to set the applicable discharge limits on any waste stream entering its collection system. An Industrial Waste Pretreatment Agreement will need to be finalized prior to allowing the discharge to occur.

3. **Flow Limitations:** The Company reserves the right to control quantities and rate of discharge of such industrial wastes on the basis of 24 hours per day and 7 days per week.

4. **Industrial Wastes Permits:** All persons who discharge industrial wastes to the Public Sanitary sewer system shall be required to complete and file with the Company, an industrial waste questionnaire, as prescribed and furnished by the Company, which shall include pertinent data inclusive of flow and analysis of all wastes discharged to the sewer system. Such surveys will be required at a frequency not to exceed five (5) years. All persons altering their discharge streams will be required to consult with the Company prior to finalizing any changes to the process as described in the current questionnaire.
- (a) Failure to comply with the above requirements shall be cause for termination of service in accordance with these Rules and Regulations.
- (b) Acceptance of industrial wastes to the sewage system from major contributing industries will be the basis of an Industrial Waste Pretreatment Permit, issued by the Company, conforming to the parameters required, from time to time, by the United States Environmental Protection Agency, (EPA) to insure compliance with all applicable limitations of the Company's Current National Pollution Discharge Elimination System Permits (NPDES). Issuance of a permit containing parameters to be met, may require pretreatment of industrial wastes regulation of the rate of discharge and providing such metering or monitoring of the industrial wastes, as the Company may require. The Company reserves the right to change the permit parameters from time to time to conform to changes to its NPDES Permits. The Company may impose self-monitoring requirements for targeted parameters, and may conduct its own sampling at the discharge point to the collection system. Penalties and/or surcharges may be placed on certain waste streams.
5. **Company Limitations:** The Company will not be liable nor bound to increase wastewater treatment plant operations to accommodate industrial or commercial waste.

6. **Specific Dangers:** In general, any waste will be considered harmful to the Company wastewater system if it may cause any of the following damaging effects:
- (a) chemical reaction either directly or indirectly with the materials of construction of the system in such a manner as to impair the strength or durability of the sewer structures;
 - (b) mechanical action that will destroy the sewer structures;
 - (c) restriction of the hydraulic capacity of the sewer structures;
 - (d) restriction of the normal inspection or maintenance of the sewer structures;
 - (e) danger to public health and safety; or
 - (f) obnoxious condition contrary to public interest.

Section M. Privilege to Investigate/Right of Access

The Company's authorized representatives shall have the right of access at all reasonable times to all parts of any premises connected with the system, for the purpose of examining and inspecting connections and fixtures, including the water and/or wastewater metering arrangement, or for disconnecting service for any proper cause.

Section N. Industrial Waste for Claysville-Donnegal System**1. Discharges:**

The Company reserves the right to refuse connection to its sewage system and/or to compel the discontinuance of the use of any system, or to require pre-treatment of industrial wastes by any industry, in order to prevent the discharge of any industrial wastes to the sewage system which may be deemed harmful to the sewage system, or to have an adverse effect on the sewage treatment processes. Except from the written consent of the Company, there shall be excluded from the sewage system, any industrial wastes having suspended solids (SS) in excess of 300 mg/L, 5 day Biochemical Oxygen Demand (BOD5) in excess of 300 mg/L, a chlorine demand in excess of 25 mg/L and industrial wastes having any or all of the following characteristics:

- (a) Wastes containing any gasoline, naphtha, fuel, oil or other liquids, solids or gases which by reason of their nature or quality may cause fire or explosion or be in any other way injurious to persons, the structures of the wastewater system or its operation.
- (b) Wastes having a temperature in excess of 120 degrees F. or less than 32 degrees F.
- (c) Wastes having a pH lower than 6.0 or higher than 9.0, or having any corrosive property capable of causing damage or hazards to structures, equipment or personnel of the wastewater system.
- (d) Wastes containing any noxious or malodorous gas or substance that either singly or by interaction with sewage or other wastes is likely in the opinion of the Company to create a public nuisance or hazard to life or prevent entry to sewers for their maintenance and repair.
- (e) Wastes containing ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, hair, chemical or paint residues, greases, paunch, manure, dairy products, cotton, wool, plastic or other fibers, lime, slurry or any other solid or viscous material of such character or in such quantity as in the opinion of the Company may cause an obstruction to the flow in sewers or otherwise interfere with the proper operation of the sewer system.
- (f) Wastes containing insoluble, non-flocculent substances having a specific gravity in excess of 2.65.

- (g) Wastes containing soluble substances in such concentrations as to cause the specific gravity to be greater than 1.1.
- (h) Wastes containing any of the following substances in concentrations exceeding those shown in the following table as measured by an acceptable method:

<u>Substance</u>	<u>Max. Concentration</u>
Aluminum, Total	5 mg/L
Chromium, Trivalent as Cr+3	0.5 mg/L
Chromium, Hexavalent as Cr+6	0.1 mg/L
Copper, Total	1.0 mg/L
Cyanides as CN	0.025 mg/L
Iron, Total	5.0 mg/L
Lead, Total	0.1 mg/L
Mercury, Total	0.002 mg/L
Phenols	0.10 mg/L
Phosphorus	5.0 mg/L
Silver, Total	0.1 mg/L
Zinc, Total	1.0 mg/L

- (i) Wastes containing other matter detrimental to the operation of a sewage treatment plant or sanitary sewers causing erosion, corrosion or deterioration in sewers, equipment and structures of a sanitary or sewage treatment plant.
- (j) Wastes containing grease, oil or other substances that will solidify or become viscous between temperature of 32° F and 160° F.
- (k) Wastes containing an average concentration of oils and greases, of the Hydrocarbon variety or any Freon extractables which are not biodegradable in excess of 10 mg/L.
- (l) Wastes containing more than 10 mg/L of any of the following gases: hydrogen sulfide; sulfur dioxide; nitrous oxide; or any of the halogens.
- (m) Wastes containing a toxic or poisonous substance, in a sufficient quantity to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals or create any hazard in the sewer system operation.
- (n) Any waste containing toxic substances in quantities sufficient to interfere with the biochemical processes of the sewage treatment works or that will pass through the sewage treatment works and exceed the state and/or federal requirements in respect thereof.

- (o) Any waste containing radioactive isotopes.
- (p) Sludges resulting from the treatment of concentrated solutions that are not acceptable for discharge to the sewage system.
- (q) Effluent limitations promulgated as categorical standards, 40 C.F.R. Chapter 1, Subchapter N and 40 C.F.R. 403.6 shall apply in any instance where they are more stringent than those in this section.
- (r) The local limits in this section may be supplemented with more stringent limitations if the Company determines that the limitations in subsection (a) through (p) above may not be sufficient to protect the operation of the sewerage system or to enable the water pollution control plant to comply with water quality standards or effluent limitations specified in the Company's NPDES permit.

3. Surcharge for Industrial Wastes:

- (a) In the event that the Company consents to accept into the sewage system industrial wastes containing more than 300 milligrams per liter by weight (mg/L) of suspended solids and/or 300 mg/L of 5 day biochemical oxygen demand, otherwise prohibited under this Section, there is hereby imposed for such service in addition to the sanitary sewage quantity, a surcharge for the Suspended Solids and 5 day Biochemical Oxygen Demand (BOD5) contained in said wastes in excess of 300 mg/L and a chlorine demand in excess of 25 mg/L in accordance with the following schedule:
 - (i) \$0.10 per pound of BOD5 in excess of 300 mg/L.
 - (ii) \$0.06 per pound of Suspended Solids in excess of 300 mg/L.
 - (iii) Actual chlorine cost per pound of chlorine demand in excess of 25 mg/L.
- (b) In the event the Company elects to accept industrial wastes having a pH below 6.0, the total acid equivalent of such wastes, expressed as 100% sulfuric acid shall be considered as one pound of Suspended Solids. For purposes of calculating Surcharges, the total sum computed by adding the acid equivalent so determined to the actual Suspended Solids content shall be considered to be the Suspended Solids content of the acidic wastes. The charges for treatment of such acidic wastes shall be subject to the same Surcharges as above set forth for wastes containing excessive solids.

PART IV: AGREEMENT TEMPLATES

Section A - Extension Deposit Agreement for Bona Fide Service Applicant

THIS AGREEMENT entered into this _____ day of _____, 20_____, by and between Pennsylvania-American Water Company hereinafter called the "COMPANY," and hereinafter called the "DEPOSITOR."

WHEREAS, the DEPOSITOR desires extension of the wastewater mains of the COMPANY, as hereinafter described;

NOW, THEREFORE, this agreement WITNESSETH:

FIRST: THE COMPANY contracts and agrees to lay the wastewater main(s) (and other facilities, if any) as shown in red on the diagram hereto attached and made a part hereof described and located as follows:

(LEAVE SPACE FOR DESCRIPTION)

SECOND: It is expressly understood and agreed that if the COMPANY shall be delayed or prevented from installing the wastewater main (s) (and other facilities, if any) hereinabove described because of its failure to secure pipe or other construction materials, or for any other causes beyond its control, such failure or delay in performance shall be excused; provided, however, if such failure or delay in performance shall extend for a period of more than one (1) year from the date thereof, the Bona Fide Service Applicant shall have the right to cancel and terminate this agreement on thirty (30) days' written notice to the COMPANY, and thereafter both parties shall be relieved of all duties and obligations arising hereunder. But this right to cancel and terminate by the Bona Fide Service Applicant shall not be invoked if the COMPANY has received the construction material and the Bona Fide Service Applicant has made the deposit as hereinafter required, in which event the COMPANY shall have the obligation to prosecute the work diligently to its completion.

THIRD: The Bona Fide Service Applicant hereby agrees to deposit with the COMPANY, upon notice from the COMPANY that it is prepared and able to go forward with the work provided in Paragraph First hereof, an amount in cash equal to (1) the Estimated Cost less (2) the Applicable Credit, where items (1) and (2) are to be determined as follows:

- (1) The Estimated Cost shall be the estimated cost of the extension, including the estimated cost of said main(s) and the estimated cost of any other facilities which the COMPANY shall have decided are required to render adequate service.
- (2) The Applicable Credit shall be a credit equal to the amount produced by multiplying (a) the average Estimated Cost per foot of the extension by (b) thirty five (35) feet, and by multiplying the product thereof by (c) the number of bona fide prospective customers who will be directly served by said extension.

Upon such written notice, a Preliminary Memorandum in the form attached shall be prepared and signed by both parties showing the deposit required in accordance with foregoing provisions. Upon completion of the installation of the extension, a Final Memorandum in the form attached shall be prepared and signed by both parties showing the deposit required based on the same calculation as set forth above but by using the actual cost of the extension, including the actual installation cost of the mains and other facilities, for

the Estimated Cost and in calculating the Applicable Credit. If the deposit shown to be due on the Final Memorandum differs from that shown on the Preliminary Memorandum, the Bona Fide Service Applicant will deposit any additional amount shown to be due or the COMPANY will refund to the Bona Fide Service Applicant any excess amount shown to have been deposited, it being the intent of this agreement that the deposit required shall be based on actual installation cost. If the actual installation costs exceeds the deposit required as shown on the Preliminary Memorandum, the additional amount of required deposit must be made by the Bona Fide Service Applicant to the COMPANY before the granting of refunds to the Bona Fide Service Applicant.

FOURTH: The COMPANY hereby agrees to refund to the Bona Fide Service Applicant during the period of five (5) years from actual date of deposit as shown on the Preliminary Memorandum a Per-Customer Refund Amount for each additional bona fide prospective Customer for whom a street service connection shall be directly attached to such main extension, as distinguished from extensions or branches thereof; provided however, that the total amount refunded shall not exceed the original deposit, without interest, and that all or any part of the deposit not refunded within said 5-year period shall become the property of the COMPANY. The Per-Customer Refund Amount shall be an amount equal to the average actual completed cost of thirty-five (35) feet of the said extension.

FIFTH: The Bona Fide Service Applicant may request refunds under Paragraph FOURTH, once in each Calendar quarter, furnishing the COMPANY, at such time, a listing of additional bona fide prospective customers; however, failure on the part of the Bona Fide Service Applicant to make such request shall not constitute a waiver of any rights hereunder or relieve the COMPANY of the obligation to make refunds with reasonable promptness.

SIXTH: The ownership of the wastewater main(s) and other facilities installed hereunder shall at all times be in the COMPANY, its successors and assigns.

SEVENTH: This agreement shall be valid and binding on the COMPANY only when executed by its authorized representative.

EIGHTH: This agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the respective parties.

NINTH: Any notice given hereunder shall be deemed sufficient if in writing and sent by registered mail to the COMPANY at

(Address of COMPANY)

and to the Bona Fide Service Applicant AT _____
(Address of APPLICANT)

TENTH: This agreement is entered into pursuant to the legally established Rules and Regulations of the COMPANY, and the words, phrases, and terms hereof are to be understood and interpreted in conformity with said Rules and Regulations, which are hereby incorporated herein by reference.

Executed in triplicate by the parties hereto on the date first above written.

PRELIMINARY MEMORANDUM

This Preliminary Memorandum is executed by the parties hereto under and pursuant to the provisions of Paragraph THIRD of a certain agreement in writing between the parties entered into on the day of _____, 20____, for the installation by the COMPANY of a certain wastewater main(s) therein described. It is, therefore, agreed and stipulated:

- (a) Estimated Cost Main(s) \$ _____
- (b) Estimated cost of other facilities _____
- (c) Total \$ _____
- (d) Credit Allowance:
 - (i) (a) + (b) Above divided by _____ feet of main(s) \$ _____
 - (ii) 35
 - (iii) Number of bona fide prospective customers to be directly served by extension _____
 - (iv) Product of (i), (ii), and (iii) _____
- (e) Amount of deposit: (c) minus (d) _____

This Preliminary Memorandum shall be attached to the original agreement in accordance with the provisions of Paragraph THIRD thereof.

Section B - Special Utility Service Agreement

THIS AGREEMENT entered into this ____ day of _____, 20____, by and between PENNSYLVANIA-AMERICAN WATER COMPANY hereinafter called the "COMPANY," and _____ hereinafter called the "APPLICANT."

WHEREAS, the APPLICANT desires Special Utility Service, as defined in the Company's tariff and as hereinafter described;

NOW, THEREFORE, this agreement WITNESSETH:

FIRST: THE COMPANY contracts and agrees to construct the facilities needed to furnish Special Utility Service shown in red on the diagram hereto attached and made a part hereof and described and located as follow:

(LEAVE SPACE FOR DESCRIPTION)

SECOND: It is expressly understood and agreed that if the COMPANY shall be delayed or prevented from installing facilities herein above described because of its failure to secure construction materials, or for any other causes beyond its control, such failure or delay in performance shall be excused; provided, however, if such failure or delay in performance shall extend for a period of more than one (1) year from the date thereof, the APPLICANT shall have the right to cancel and terminate this agreement on thirty (30) days' written notice to the COMPANY, and thereafter both parties shall be relieved of all duties and obligations arising hereunder. But this right to cancel and terminate by the APPLICANT shall not be invoked if the COMPANY has received the construction material and the APPLICANT has made the deposit as hereinafter required, in which event the COMPANY shall have the obligation to prosecute the work diligently to its completion.

THIRD: The APPLICANT hereby agrees to pay to the COMPANY, upon notice from the COMPANY that it is prepared and able to go forward with the work provided in Paragraph First hereof, an amount in cash equal to the Estimated Cost. The Estimated Cost shall be the estimated cost including material, labor and overheads of the facilities herein above described for providing Special Utility Service, exclusive of the cost of a main and appurtenances, and a street service connection, which the COMPANY shall have determined are required to adequately render the requested service.

Upon such written notice, a Preliminary Memorandum in the form attached shall be prepared and signed by both parties showing the payment required in accordance with foregoing provisions. Upon completion of the installation of the facilities, a Final Memorandum in the form attached shall be prepared and signed by both parties showing the payment required based on the same calculation as set forth above but by using the actual installation cost of the facilities, for the Estimated Cost. If the payment shown to be due on the Final Memorandum differs from that shown on the Preliminary Memorandum, the APPLICANT shall pay any additional amount shown to be due or the COMPANY will refund to the APPLICANT, without interest, any excess amount shown to have been paid, it being the intent of this agreement that the payment required shall be based on actual installation cost. If the actual installation cost exceeds the payment required as shown on the Preliminary Memorandum, the additional amount of required payment must be made by the APPLICANT to the COMPANY before service to the APPLICANT commences.

FOURTH: The ownership of the facilities installed hereunder shall at all times be with the COMPANY, its successors and assigns.

FIFTH: This agreement shall be valid and binding on the COMPANY only when executed by its duly authorized representative.

SIXTH: This agreement shall be binding upon the heirs, executors, administrators, successors and assigns of the respective parties.

SEVENTH: Any notice given hereunder shall be deemed sufficient if in writing and sent by registered mail to the COMPANY at

(Address of COMPANY)

and to the APPLICANT at

(Address of APPLICANT)

EIGHTH: This agreement is entered into pursuant to the legally established Rules and Regulations of the COMPANY, and the words, phrases, and terms thereof are to be understood and interpreted in conformity with said Rules and Regulations, which are hereby incorporated herein by reference.

Executed in triplicate by the parties hereto on the date first above written.
