Dear Sirs: **FILE**

Subject to the proposed
monthly bill increase of \$40.37
from \$21.52. My property at 64 South
Ave. Charlton, Pa. has a waste water
problem, and has had this for
50 yrs. We have a spring on the
South st side and the property
was built one hundred yrs ago
on a pond.

The Charlton town has planned
to cut down 6 trees on the South
st. side. This will add to
the already problem of more
water after storms on South st
and 4th Ave. We have had
many new storm basins
put in on this section. It
has helped for a time. Right
now we have more water
staying at the corner.

The original waste water
system was built in 1929 on
South st. and has never been changed
