**REQUEST FOR EXCLUSION OF MAJOR OUTAGE FOR
RELIABILITY REPORTING PURPOSES TO
PENNSYLVANIA PUBLIC UTILITY COMMISSION
P O BOX 3265
HARRISBURG, PA 17105-3265**

Reports require an original and one copy to be filed with the Secretary's Bureau.

Information Required:

1. Reporting Utility: Duquesne Light Company
Address: 2839 New Beaver Avenue
Pittsburgh PA 15233

2. Name and title of person making report:

Patrick Conti
Operations Center Manager

3. Telephone Number:

(412) 393-8401

4. Interruption or Outage:

(a) Number of customers affected:

82,125 customers were affected throughout the course of this storm from a total of approximately 580,000 customers in our service territory.

985,497 KVA affected (14% of System Load)
System Connected Load of 7,050,027 KVA

At the peak of this storm, 52,000 customers experienced service interruptions.

(b) Number of troubled locations in each geographic area affected listed by county and local political subdivision:

ALLEGHENY COUNTY MUNICIPALITIES					
ARLINGTON	CHURCHILL	GREENTREE	MCKEESPORT	PENNSBURY VILLAGE	TURTLE CREEK

AMBRIDGE	HARMONY	ROCH BORO			
BADEN	INDEPENDENCE	WEST MAYFIELD			
BEAVER FALLS	OLD ECONOMY				

(c) Reason for interruption or outage, including weather data where applicable:

At approximately 1600 hours on Wednesday, September 22, 2010, severe thunderstorms with damaging lightning, rain and winds gusting to 68 mph, moved through Duquesne Light's service area in Allegheny and Beaver counties. This storm caused extensive damage to our infrastructure, including downed power lines and broken poles. A significant amount of damage, due to fallen trees, occurred in the South Hills section of Allegheny County.

The weather forecast for Wednesday, September 22, 2010 called for partly sunny skies with a slight chance of showers and thunderstorms in the morning and then mostly cloudy with a chance of showers and thunderstorms in the afternoon. The high was forecasted to be in the low 80s, with southwest winds around 10 mph, with gusts up to 20 mph and a 40 percent chance of rain. Wednesday night's forecast was mostly cloudy, with a slight chance of showers and thunderstorms in the evening with the temperature dropping to the lower 60s.

At 1435 hours on September 22, 2010 the National Weather Service (NWS) issued a severe thunderstorm watch for our service area. At 1521 hours on September 22, 2010, the NWS issued a severe thunderstorm warning until 1615 hours. A wind gust of 68 mph was reported in Bethel Park on Wednesday, September 22, 2010 at 1620 hours.

Duquesne immediately activated its storm response team. Our lineworker crews and troubleshooters worked around the clock, in 16-hour shifts, until the last customer was restored on Sunday, September 26, 2010. Duquesne brought in 361 outside resources through contractors and utility mutual assistance crews to assist with this restoration effort.

Dates and times reports were provided to the Commission:

Wednesday, September 22, 2010 at 1827 hours

Thursday, September 23, 2010 at 0001 hours, 0930 hours and 1600 hours

Friday, September 24, 2010 at 0915 hours and 1700 hours

Saturday, September 25, 2010 at 1025 hours

Sunday, September 26, 2010 at 1008 hours

Updates were also provided to the Allegheny County Emergency Operations Center throughout the course of the storm and concerns were addressed.

The hardest hit areas in the South Hills section of Allegheny County are made up of older communities with trees lining both sides of the street. A large amount of this area is served by rear-lot distribution where the distribution lines are behind the houses. Rear-lot distribution sites take longer to restore because they are not accessible with bucket trucks.

Duquesne responded to over 60,300 reports of service-related trouble from our customers which included: 1,700 wires down, 2,100 emergencies, 700 trees on lines, 100 damaged poles and 55,700 no-lights.

Repair work included replacing 263 primary wires & equipment, 450 secondary wires, 59 broken poles and 28 transformers. Over 22 miles of wire had been replaced. A total of 93 circuits locked out at the peak of this storm including: 2 - transmission, 31 - sub-transmission, 22 - 23KV distribution and 38 - 4KV distribution.

This storm response effort included: 194 overhead workers, 47 troubleshooters, 46 underground workers and 148 contractor vegetation workers. Mutual Assistance utility workers included: 71 - Penelec, 58 - Ohio Edison, 43- AEP and 30 - Toledo Edison. Other contractors included: 44 - Thompson, 39 - Didado, 29 - Main Lite, 28 - Henkels, 13 - Sargent, and 6 - New River.

This workforce was supplemented utilizing our Emergency Response Team in Operations, Transmission & Distribution Construction/Maintenance, Customer Care, Media Relations, Materials and Transportation and other support personnel.

(d) The number of utility workers and others assigned specifically to the repair work:

Overall, an estimated 1,100 personnel contributed to this restoration effort.

(e) The date and time of the first notification of a service interruption:

Wednesday, September 22, 2010, at approximately 1600 hours.

(f) The actual time that service was restored to the last affected customer:

Due to the extensive damage in the South Hills neighborhoods, some customers in the hardest hit areas of Baldwin, Banksville, Beechview, Brookline, Castle Shannon, Dormont, Mt. Lebanon and Scott Township were projected to have their power restored late Sunday morning, September 26, 2010. The remaining affected areas were projected to have their power restored by Saturday morning, September 25, 2010.

Restoration for the last customer affected by this storm was at noon on Sunday, September 26, 2010.

Remarks:

- Weather information is attached. News articles are attached. Photos are attached.
- Outage information was communicated to our customers and the media at regular intervals on Duquesne Light's web site (www.duquesnelight.com). The storm response section of our website was activated on Wednesday, September 22, 2010 and was updated several times a day through Sunday morning, September 26, 2010. Simultaneous updates were provided on Twitter.

Clean Up Efforts Underway After Strong Storms

MOUNT LEBANON (KDKA/AP) —

Salem Drive in Mt. Lebanon. Submitted by Barb Bolt

Emergency and utility crews are out in full force today as clean up efforts continue after strong, quick-moving storms blew through the area Wednesday afternoon.

Power was knocked out to thousands of customers across Pennsylvania by torrential rain and strong winds. It forced some schools to delay classes or close entirely Thursday because of outages.

The storms blew through Pittsburgh just after 4 p.m. and a severe thunderstorm warning was issued for several counties including Allegheny, Beaver and Washington.

The damage was particularly bad in the South Hills where the storms downed trees and power lines. Numerous homes and cars were damaged in the aftermath.

There was also a major impact on T service Wednesday evening. Service was disrupted because of downed trees on the tracks and overhead wires.

In Mount Lebanon, high winds rolled through the area like a speeding train. Some streets had to be closed to traffic, and even transformers were brought down.

"It was just the most tremendous storm I've ever seen," said one Mount Lebanon resident.

People who live on Martha Avenue there found themselves blocked in with a big tree down in their cul-de-sac.

"This street here has been closed since four o'clock [Wednesday]," said Jim Dawson, of Mount Lebanon.

There were other trees down in front yards that barely missed houses, and some fell directly onto houses.

Hundreds of homes businesses and the Mount Lebanon School District remain without power. There was no class today for the district's 5,200 students.

"The electricity's out, there's nothing really to do besides walk around," said Ezra Baun, a sophomore at the high school.

Also, down the road in Dormont, it was lights out at Lighting by Erik. The storm blew out two of the businesses front windows. *There was also damage at the park there.*

Power may remain out for some until Sunday

Thursday, September 23, 2010

By Tim McDonough, Pittsburgh Post-Gazette

Duquesne Light crews reported they are making progress to restore power to 13,000 customers whose service was cut by Wednesday afternoon's powerful thunderstorms.

But the utility warned that some people may not have service returned until Sunday morning.

Mt. Lebanon, particularly, is recovering slowly. The municipality advised residents to stay inside today because numerous power lines are down. Mt. Lebanon public schools and Seton-LaSalle High School are closed.

Nearly 20 residents on the first two floors of a condominium complex on Washington Road in Mt. Lebanon were evacuated last night due to a buildup of carbon monoxide. Emergency officials believe the fumes were created by an emergency generator that switched on when the power went out. Nobody was hurt, and residents have been allowed to return.

Duquesne Light said some customers in the hardest hit areas of Baldwin Borough, Banksville, Beechview, Brookline, Castle Shannon, Dormont, Mt. Lebanon and Scott may not see power restored until late Sunday morning. The remaining affected areas should see restoration by Saturday morning

Duquesne Light said 52,000 customers lost power during the peak of the storm.

Residents are asked to report any outages by calling Duquesne Light at 1-888-393-7000.

As of this afternoon, Allegheny Power had 10,500 customers without service in Pennsylvania, most in Allegheny, Washington and Westmoreland counties.

Some roads remain closed because of downed power lines, but Streets Run Road in Baldwin Borough reopened late this morning.

PITTSBURGH TRIBUNE-REVIEW

Tens of thousands still powerless after storm

By Margaret Harding, Michael Hasch and Bill Vidonic

PITTSBURGH TRIBUNE-REVIEW

Thursday, September 23, 2010

Thousands of Western Pennsylvanians remain without power today and might not have service restored until Sunday morning.

Wednesday's brief but powerful thunderstorm has left a lasting impression.

Duquesne Light reported 13,000 customers — many in Allegheny County's South Hills neighborhoods — do not have electricity. Customers in Baldwin, Castle Shannon, Dormont, Mt. Lebanon and Scott, as well as Banksville, Beechview and Brookline in the city, might not have service until Sunday, said spokesman Joseph Vallarian.

Allegheny Power reported 14,000 Pennsylvania customers were in the dark. Those in Allegheny, Washington and Westmoreland counties might not have service restored until 11:30 p.m. Friday, the company said.

High winds and lightning yesterday afternoon toppled trees, power lines and even an old church steeple, damaging homes, businesses and cars and prompting schools to cancel classes today. About 30 businesses and schools closed or delayed opening, according to WPXI-TV, the Tribune-Review's news partner.

A generator leaking carbon monoxide forced the evacuation of a Mt. Lebanon apartment building early this morning, a spokeswoman with the township said. No one was injured.

Fourteen people who live in the lower levels of the building on Washington Road took refuge in the nearby municipal building, the spokeswoman said. Their apartments were ventilated, and residents returned about 7 a.m., she said.

Emergency dispatchers fielded calls of sparking electrical wires, downed trees and a transformer fire this morning in Pittsburgh.

Hilltop Road from Breckenridge Drive in Collier to Collier Avenue in Heidelberg was closed because of downed lines and trees, PennDOT said.

Wind gusts estimated at nearly 70 mph sent trees crashing onto cars in Mt. Lebanon and Banksville, according to National Weather Service reports and emergency dispatchers. Small hail was reported across the South Hills, the weather service said.

About 100,000 Duquesne Light and Allegheny Power customers lost power at the height of the storm.

Lightning shattered the steeple at a former South Side church housing the Pittsburgh Action Against Rape offices, sending the wooden, brick and copper structure through the roof and ceilings of the three-story building on South 19th Street.

"There's a steeple on my chair," said Leah Vallone, the center's supervisor of crisis intervention, who escaped injury because she was in a meeting. "I was religious, but I think I will be even more so now."

Five employees of the Lighting by Erik showroom on West Liberty Avenue in Dormont escaped injury when a window exploded under the force of the wind, shards of glass turning into shrapnel as dozens of chandeliers, lamps and glass accessories inside shattered.

"The windows were just shaking and rattling," said Lewis Cantor, whose family has owned the business

since 1965.

Westmoreland 911 dispatchers had reports of homes with structural damage, and downed trees and wires, said spokesman Dan Stevens. He said Greensburg, Unity, Penn and Murrysville as some of the hardest-hit areas.

"I was sitting there, watching the storm, and then all of a sudden the wind became so terrific, and this tree just cracked, and it fell straight in my yard. It missed my house, but it came close," said Jack Zellie of Unity in Westmoreland County. "It happened suddenly. A great, big wind came up it seemed like a wind burst of sorts you could see (the tree) just crack. ... It was overwhelming, to be honest with you."

Damage reports continued to come in this morning, Stevens said.

"This was a fast-moving, widespread storm," he said. "People made it home last night and just didn't go back out.

"They're just going out now and finding that there are trees down in their roads."

Staff writers Cody Francis contributed to this report.

Power Restored For Thousands, But Many Wait

PITTSBURGH (KDKA) —

This picture was taken on Highland Road in Bethel Park. Joe Hannan

(9/23/2010)

The hard-hitting storms that moved through the area Wednesday continue to leave thousands of homes without power.

Crews continue to work to restore electricity.

Allegheny Power has more than 5,500 still in the dark.

As of 10 p.m., Duquesne Light was also reporting about 9,800 customers without electricity service. That's down from 52,000 outages on Wednesday evening.

Baldwin, Brookline, Carrick, Dormont, Mt. Lebanon and Scott Township were among the hardest hit areas.

Duquesne Light crews continue to make repairs to damaged power lines.

But due to the extensive damage in the South Hills neighborhoods, Duquesne Light officials say some customers in the hardest hit areas may not see power restored until late Sunday morning. The remaining affected areas should see restoration by Saturday morning.
