RE: Letter of Notification of PPL Electric Utilities Corporation, Filed Pursuant to 52 Pa. Code Chapter 57 Subchapter G, With Respect to the Tobyhanna #1 and #2 138/69 kV Tap Line to Serve the United States Army Depot in Coolbaugh Township, Monroe County - Docket No. A-2011-

Dear Secretary Chiavetta:

Enclosed, for filing, are an original and six (6) copies of the Letter of Notification of PPL Electric Utilities Corporation, together with seven (7) copies of the accompanying exhibits and appendices which are contained in a separately-bound volume in the above-referenced proceeding. Also enclosed is a CD containing copies of the exhibits and appendices, as well as a check in the amount of \$350 for the filing fee.

As indicated on the certificate of service, copies of the Letter of Notification and accompanying exhibits and appendices are being served by certified mail, return receipt requested upon the property owners and the involved governmental agencies and municipalities. If you have any questions concerning this matter, please contact me at the address or telephone numbers provided above.

Respectfully Submitted,

John H. Isom

138/69 kV Tap Line To Serve The United :
States Army Depot in Coolbaugh :
Township, Monroe County :

RECEIVED
2011 MAR -9 PM 4:05
PA PUC
SECRETARY'S BUREAU

LETTER OF NOTIFICATION

TO THE PENNSYLVANIA PUBLIC UTILITY COMMISSION:

PPL Electric Utilities Corporation (“PPL Electric”), hereby files, pursuant to 52 Pa. Code §57.72(d), this Letter of Notification requesting Pennsylvania Public Utility Commission (“Commission”) approval to construct the Tobyhanna #1 and #2 138/69 kV Tap Line to serve the United States Army Depot in Coolbaugh Township, Monroe County, Pennsylvania. PPL Electric seeks approval to site and construct a new double-circuit 138/69 kV tap line to replace the existing single-circuit 69 kV tap which is used for the sole purpose of supplying the United States Army Depot in Tobyhanna (“Tobyhanna Army Depot”). The proposed tap line to be constructed by PPL Electric, and a new substation to be constructed by the United States Army, are required to improve reliability of service at the Tobyhanna Army Depot. In support thereof, PPL Electric states as follows:

I. INTRODUCTION AND OVERVIEW

1. This Letter of Notification is filed by PPL Electric, a public utility that provides electric distribution, transmission, and provider of last resort services in Pennsylvania subject to the regulatory jurisdiction of the Commission.

2. PPL Electric's address is:

Two North Ninth Street
Allentown, Pennsylvania 18101

3. PPL Electric's attorneys are:

Fax: 610.774.6726
E-mail: perussell@pplweb.com

PPL Electric's attorneys are authorized to receive all notices and communications regarding this Letter of Notification.

4. PPL Electric furnishes electric service to approximately 1.4 million customers throughout its certificated service territory, which includes all or portions of twenty-nine counties and encompasses approximately 10,000 square miles in eastern and central Pennsylvania. PPL Electric is a “public utility” and an “electric distribution company” as defined in Sections 102 and 2803 of the Pennsylvania Public Utility Code, 66 Pa. C.S. §§ 102, 2803.

5. PPL Electric owns approximately 5,000 miles of transmission lines operating at 69 kV (kilovolts) or higher, approximately 330 substations with a capacity of 10 MVA (megavolt amperes) or more, and approximately 43,000 miles of distribution lines operating at less than 69 kV.

6. This Letter of Notification includes the following accompanying attachments:

- Attachment 1 Necessity Statement.
- Attachment 2 Engineering Description.
- Attachment 3 Environmental Assessment.
- Attachment 4 PPL Electric Design Criteria and Safety Practices.
- Attachment 5 PPL Electric Field Management Program.
- Attachment 6 List of Owners of Property Within the Right-of-Way
- Attachment 7 List of Involved Governmental Agencies, Municipalities, and Other Public Entities.

7. The Tobyhanna Army Depot is an existing customer of PPL Electric in Coolbaugh Township, Monroe County, Pennsylvania. The Tobyhanna Army Depot is the largest, full-service electronics maintenance facility in the Department of Defense and is the largest employer in the Pocono Northeast region of Pennsylvania. Total employment at the depot is about 5,800. Due to growth in load at the Tobyhanna Army Depot over the years, the Army’s

electrical facilities, including its substation, are no longer sufficient. Tobyhanna Army Depot has indicated that it regularly experiences brownouts due to its inadequate substation facilities.

8. In order to address these problems, the United States Army has initiated on-premise electrical system improvements and upgrades, which include a new dual supply substation to improve the electrical service and station reliability. In order to obtain a second source of supply for its new substation, meet design specifications, and to adequately meet the Tobyhanna Army Depot's load both now and into the future, the existing single circuit 69 kV tap line presently supplying the customer will be replaced with a double circuit 138/69 kV tap line. This upgrade will improve service reliability by providing the customer with a double-circuit 138/69 kV tap line.

9. The new substation will take service from the existing Blooming Grove-Jackson and Peckville-Jackson 138/69 kV lines via a double-circuit 138/69 kV tap line. The new tap line will be named the Tobyhanna #1 and #2 138/69 kV Tap Line. In this Letter of Notification, PPL Electric seeks Commission approval to construct the Tobyhanna #1 and #2 138/69 kV Tap Line.

10. Construction of the proposed Tobyhanna #1 and #2 138/69 kV Tap Line will have minimal incremental land use impacts, as it will be constructed substantially within the existing right-of-way adjacent to the existing 69 kV single circuit tap line. The proposed tap line is located in woodland and open areas and crosses 12 properties. These properties include the Army Depot property, Coolbaugh Township Municipal Park, and 10 privately owned properties. Due to the presence of the existing tap line in the right-of-way, the incremental visual impacts of the project will be minimal.

11. The estimated cost to site, design and construct the tap is \$3.5 million, which is to be paid entirely by the United States Army. Construction is scheduled to begin in Spring of 2012 and be completed by November of 2012.

II. PROJECT SUMMARY

12. The proposed Tobyhanna #1 and #2 138/69 kV Tap Line will be located in Coolbaugh Township, Monroe County. An aerial plot plan is provided at the end of Attachment 2 of this Letter of Notification. The plot plan depicts the location of the existing and proposed facilities.

13. Due to growth in load at the Tobyhanna Army Depot over the years, the Army's electrical facilities, including its substation, are no longer sufficient. The United States Army has initiated electrical system improvements and upgrades, which include a new dual supply substation to improve the electrical service and station reliability.

14. In order to obtain a second source of supply for its new substation, and to adequately meet the Tobyhanna Army Depot's load both now and into the foreseeable future, the existing single circuit 69 kV tap presently supplying the customer will be replaced with a double circuit 138/69 kV tap line. This upgrade will improve service reliability by providing the customer with a double-circuit 138/69 kV tap line. The upgrade also allows the customer to achieve its goal for a dual supply substation.

15. The United States Army plans to build a new substation at the Tobyhanna Army Depot. The substation will be supplied by two 138/69 kV transmission lines, the existing Blooming Grove-Jackson 138/69 kV line and the existing Peckville-Jackson 138/69 kV line via the Tobyhanna #1 and #2 138/69 kV Tap.

16. Currently, the loss of the Blooming Grove-Jackson 138/69 kV line, the Tobyhanna single circuit 69 kV Tap, or the Army's transformer would completely interrupt Tobyhanna Army Depot's entire load. Under the proposed configuration, the loss of any single transmission facility (i.e., transmission line, tap line or transformer) would not interrupt service to the Tobyhanna Army Depot. In addition, the new double circuit tap line and new transformer will be able to serve greater loads which will eliminate brownouts currently being experienced at the Tobyhanna Army Depot. This reconfiguration will significantly improve the reliability of service.

17. Presently, the Tobyhanna Army Depot is supplied by the Tobyhanna 69 kV tap line. Figure 1 to Attachment 1 of this Letter of Notification shows a one-line diagram of the existing transmission system configuration.

18. PPL Electric proposes to reconstruct the tap line. It will be designed and constructed for two 138 kV circuits. Initially both circuits will be operated at 69 kV. The line will be converted to 138 kV operation when load growth makes it appropriate to do so. The reconstruction of the tap line will include the installation of new single shaft steel monopoles and new conductors, and the removal of the existing wood H-frame structures and conductors.

19. Figure 2 to Attachment 1 of this Letter of Notification provides a one-line diagram of the proposed 138/69 kV system.

20. The Tobyhanna #1 and #2 138/69 kV Tap Line will require the construction of approximately 2.08 miles of new double-circuit 138/69 kV line. The line will be designed and constructed for double-circuit 138 kV operation, although it will initially be operated at 69 kV.

21. The proposed Tobyhanna #1 and #2 138/69 kV Tap Line, with two exceptions, will be supported by steel monopoles with an average height of 80 feet. The proposed poles

located on either side of Hap Arnold Boulevard on the Army property will be approximately 100 feet tall to eliminate the need to place poles within wetlands. The poles currently used for the existing 69 kV tap line will be replaced on a one for one basis, where practical. The wood H-frame structures currently in place will be removed.

22. The proposed Tobyhanna #1 and #2 138/69 kV Tap will consist of six power conductors and one overhead ground wire. The power conductors will be 556.5 kcmil (thousands of circular mils)¹ 24/7 strand ACSR.² The overhead ground wire will be 3/8-inch steel and will provide lightning protection for the proposed tap line.

23. The Tobyhanna #1 and #2 138/69 kV Tap will be designed to comply with, and will generally surpass, the applicable minimum standards in the National Electrical Safety Code (“NESC”).

24. The total estimated cost to design and construct the proposed project is approximately \$3.5 million.

25. The *in-service* date of this project is November, 2012. In order to meet that date, PPL Electric must start construction by Spring of 2012.

26. The proposed Tobyhanna #1 and #2 138/69 kV Tap Line requires two small modifications to the existing right-of-way agreement with the Army. PPL Electric plans on replacing the existing agreement with a new right-of-way agreement that covers the entire length of the line on the Tobyhanna Army Depot property. The new agreement will modify the existing right-of-way by including the area adjacent to the new substation, and including the area just east of Hap Arnold Boulevard. The Army has agreed to these modifications.

¹ A circular mil is the cross-sectional area of a wire one mil in diameter, where 1 kcmil = 0.5067 mm².

² Aluminum conductor steel reinforced.

27. Because the proposed Tobyhanna #1 and #2 138/69 kV Tap will be installed primarily in the pre-existing right-of-way currently used by the 69 kV tap line, as depicted in an aerial plot plan at the end of Attachment 2 to this Letter of Notification, it is anticipated that proposed construction will have minimal incremental impacts on the area.

28. Accompanying this Letter of Notification is a separately bound volume containing Attachments 1-7, which provide additional information about the proposed Tobyhanna #1 and #2 138/69 kV Tap. This Letter of Notification and accompanying Attachments, which are incorporated herein by reference, contain all the information required by 52 Pa. Code § 57.72(d)(4).

III. LETTER OF NOTIFICATION

29. PPL Electric is proceeding by means of a Letter of Notification, instead of a full Application, pursuant to the Commission's regulations at 52 Pa. Code § 57.72(d). On October 21, 2010, PPL Electric petitioned the Commission for a waiver of certain provisions of the siting regulations in order to file a Letter of Notification in lieu of an Application. The petition was docketed at P-2010-2205755. The Commission approved the petition on February 10, 2011, enabling PPL Electric to file this Letter of Notification.

30. The Necessity Statement for the proposed construction of the Tobyhanna #1 and #2 138/69 kV Tap is provided as Attachment 1 accompanying this Letter of Notification. As explained therein, the purpose of the proposed Tobyhanna #1 and #2 138/69 kV Tap is to provide more reliable service to the Tobyhanna Army Depot by upgrading the 69 kV tap line that currently serves the depot to a double circuit 138/69 kV tap line.

31. The proposed Tobyhanna #1 and #2 138/69 kV Tap will not create any unreasonable risk of danger to the public health or safety. The Tobyhanna #1 and #2 138/69 kV

Tap will be designed, constructed, operated, and maintained in a manner that meets or surpasses all applicable National Electric Safety Code (“NESC”) minimum standards and all applicable legal requirements. Descriptions of NESC standards, PPL Electric’s design criteria, and PPL Electric’s safety practices are provided in Attachment 4 hereto.

32. The Engineering Description of the proposed Tobyhanna #1 and #2 138/69 kV Tap is provided in Attachment 2 accompanying this Letter of Notification.

33. The proposed Tobyhanna #1 and #2 138/69 kV Tap will be located almost entirely within a right-of-way already used by PPL Electric. The additional rights-of-way required for the project are on property owned by the United States Army, which has already approved their use.

34. No communication towers, pipelines, or other utilities will be affected by the proposed Tobyhanna #1 and #2 138/69 kV Tap Line. The nearest airport is approximately 2.8 miles from the project area. PPL Electric will contact the PennDOT Bureau of Aviation and the Federal Aviation Administration to ensure that the proposed Tobyhanna #1 and #2 138/69 kV Tap Line will not be a hazard to flight operations.

35. The proposed Tobyhanna #1 and #2 138/69 kV Tap was reviewed with the Pennsylvania Historical and Museum Commission (“PHMC”). The PHMC has determined that there are no anticipated impacts to National Register eligible or listed historic or archaeological properties and no further investigations are required.³

36. The proposed Tobyhanna #1 and #2 138/69 kV Tap will not affect any unique geological, scenic, or natural areas. The recreational areas located closest to the project site are: the Pennsylvania State Game Lands Number 127, which is located approximately 150 feet east of the project site; Gouldsboro State Park, located approximately 0.5 miles west of the project

³ The applicable File Number is ER 2011-0332-089-A.

site; and Tobyhanna State Park, which is located approximately 0.6 miles north of the project site. There are no anticipated impacts to these features. In addition, with respect to the Coolbaugh Township Municipal Park, the proposed line will remain within the existing right-of-way and shifted further away from the developed portion of the park. Within the municipal park, a skateboarding complex encroaches on the right-of-way and some ramps and jumps are located directly below the existing conductors. With the proposed layout of the new tap, the ramps and jumps will no longer be located directly under the conductors.

37. Substantial tree clearing is not anticipated off the Tobyhanna Army Depot property since the proposed line will be constructed within the existing maintained right-of-way. Some tree clearing may be required along the edges of the right-of-way and on the Army Depot Property adjacent to the new substation. In addition, some brush removal will be required to access the work areas. PPL Electric will apply its “Specifications for Initial Clearing and Control of Vegetation on or Adjacent to Electric Right-of-Way Through Use of Herbicides, Mechanical, and Hand Clearing Techniques” while completing these activities.

38. The tap line will cross both wetlands and areas designated as “Waters of the U.S.” or “Waters of the Commonwealth.” PPL Electric will obtain all required permits from the Pennsylvania Department of Environmental Protection and the United States Army Corps of Engineers prior to construction, and PPL Electric will comply with all conditions placed on the permits. In addition, PPL Electric will obtain any required soil erosion and sedimentation control permits, and comply with conditions placed on those permits.

39. PPL Electric has coordinated with various state and federal agencies to obtain information regarding threatened and endangered species in close proximity to the project area. A review of the Pennsylvania Natural Diversity Inventory (PNDI) records indicates that *Carex*

Disperma (Soft-leaved Sedge), *Carex paupercula* (Bog Sedge), *Juncus filiformis* (Thread Rush), *Ledum groenlandicum* (Labrador Tea), and *Myrica gale* (Sweetgale) may be impacted by the proposed project.⁴

40. Based on the results of the PNDI review, PPL Electric contracted with Mellon Biological Services to conduct a survey of the project area to identify whether the above identified species were present. The survey identified that two of the above species, *Juncus filiformis* and *Ledum groenlandicum*, were found within the existing right-of-way. A third species, Pennsylvania endangered plant species *Muhlenbergia uniflora* (Bog Muhly), was also identified within the existing right-of-way. Following identification of these three species, Mellon Biological Services delineated the extent of each species and also identified suitable routes that could be utilized to access work areas without impacting these species. These access routes will be included with the engineering drawings and utilized during construction to limit impacts to the species of concern. PPL Electric will coordinate with the appropriate agencies and obtain all required approvals prior to the commencement of construction.

41. In addition, a *Pandion haliaetus* (Osprey) nest was observed on one of the existing tap structures. PPL Electric will submit this finding to the Pennsylvania Game Commission and obtain the appropriate approvals prior to the commencement of construction.

42. The proposed Tobyhanna #1 and #2 138/69 kV Tap was reviewed with representatives of Coolbaugh Township and Monroe County, and neither the Township nor the County has any objection.

43. Attachment 5 accompanying this Letter of Notification explains PPL Electric's standards for Magnetic Field Management. PPL Electric applies these standards to all

⁴ The applicable PNDI Search ID is: 20100719253184.

reconstruction and new line projects. For this project, increased structure height and existing phase transposition will be utilized to reduce magnetic field exposures.

44. Attachment 6 accompanying this Letter of Notification contains a list of property owners within the right-of-way. Copies of this Letter of Notification are being served on the property owners listed in Attachment 6 in accordance with 52 Pa. Code § 57.72(d)(3).

45. Attachment 7 accompanying this Letter of Notification contains a list of the involved governmental agencies, municipalities, and other public entities. Copies of this Letter of Notification are being served on the agencies listed in Attachment 7 in accordance with 52 Pa. Code § 57.72(d)(3).

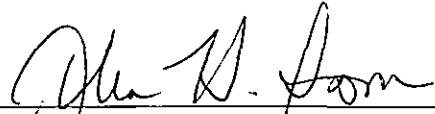

46. As soon as practicable after the filing of this Letter of Notification and the assignment by the Commission of a docket number, PPL Electric will publish notice of the filing in newspapers of general circulation in the area of the proposed Tobyhanna #1 and #2 138/69 kV Tap. Such notice will contain: (a) the date this Letter of Notification was filed with the Commission; (b) a brief description of the proposed project and its location; (c) locations where the complete Letter of Notification may be reviewed by the public; and (d) an instruction for interested parties to contact the Commission.

47. This Letter of Notification is filed on the date set forth below. As provided in 52 Pa. Code § 57.72(d)(5), the Commission will review and, by order, approve or disapprove this Letter of Notification. If the Commission approves this Letter of Notification, the proposed Tobyhanna #1 and #2 138/69 kV Tap will be constructed as proposed herein without the formal application process set forth at 52 Pa. Code §§ 57.71, *et seq.*

IV. CONCLUSION

WHEREFORE, PPL Electric Utilities Corporation respectfully requests that the Pennsylvania Public Utility Commission approve siting and construction of the Tobyhanna #1 and #2 138/69 kV Tap Line in Coolbaugh Township, Monroe County, Pennsylvania, as explained above and in the Attachments hereto.

Respectfully submitted,
