Docket No. A-2011-2231412

4.c) Efficient Energy Solutions will be compensated by the client for services in one of two ways. Most clients elect to have my fee added to the cost quoted by the supplier in which case the supplier will pay Efficient Energy once the electric is delivered, invoiced and paid by the client. Other clients prefer to have a consulting agreement executed and pay a negotiated fee directly to Efficient Energy. The client has the option on how to set up my compensation.

8.) TECHNICAL FITNESS:

Efficient Energy LLC has been a natural gas consultant since April 2004 and its owner, Michael J. Polosky, has been in the natural gas consulting industry since 1997. Efficient Energy has been involved with assisting clients secure electric contracts via the services of other licensed agents or suppliers since the Duquesne Light Co. service area was deregulated several years ago. During these years, Efficient Energy would assist its clients and attend all meetings with suppliers / agents to determine the best supply option for the client. These services were done at no charge to the client by Efficient Energy and that time was used to prepare and learn as much about the electric markets as possible.

Efficient Energy believes it is well trained in understanding the power market and is well situated to advise and sell electricity to its client base of approximately 175 commercial and industrial clients. Efficient Energy is a one man operation with no employees and utilizes the support staff of the various electric suppliers it will do business with.

Similar to the natural gas industry, Efficient Energy will be well situated to be able to offer clients several supply options and be able to neutrally demonstrate to the client the pros and cons of each of the supplier's terms and conditions and make a recommendation to their best offer that meet the client's needs the best.

Efficient Energy attends as many seminars as possible each year. These seminars are mainly conducted by the various suppliers Efficient Energy is able to represent. These seminars include updates on the industry, legal, discussions by their trading desk on the market along with other guest speakers such as State Senators.

Please do not hesitate to contact me if you need any additional information.
