	:	
v.	:	Docket No. C-2011-2276731
	:	
PPL Electric Utilities Corporation,	:	
	:	
Respondent.	:	

**MOTION OF
PPL ELECTRIC UTILITIES CORPORATION
TO DEFER AND HOLD IN ABEYANCE
THE COMPLAINT OF JOE & VANESSA CAPARO**

TO THE PENNSYLVANIA PUBLIC UTILITY COMMISSION:

PPL Electric Utilities Corporation (“PPL Electric”) hereby files this Motion to defer and hold in abeyance the Complaint of Joe & Vanessa Caparo (“Complainants”) until such time as PPL Electric submits an appropriate and applicable siting application to the Pennsylvania Public Utility Commission (“Commission”) regarding the proposed transmission line project in the Pocono Mountains region of northeast Pennsylvania. In support thereof, PPL Electric states as follows:

I. PROCEDURAL BACKGROUND

1. PPL Electric is a “public utility” and an “electric distribution company” as defined in Sections 102 and 2803 of the Pennsylvania Public Utility Code, 66 Pa. C.S. §§ 102, 2803.

2. Complainants are residential customers of PPL Electric with a service address of 12 Langan Road, Covington Township, Lackawanna County, Pennsylvania 18444.

3. On or about November 21, 2011, Complainants filed the above-captioned Complaint with the Commission. PPL Electric was served with the Complaint by a Secretarial Letter dated December 7, 2011.

4. The Complaint raises issues related to the siting and route selection of a transmission line that PPL Electric proposes to construct in the future.

5. The Complaint raises issues related to the siting and route selection of the proposed transmission line, including the alleged adverse effect on real estate values, the alleged risk of danger to the health and safety of the public, and alleged adverse effect on the aesthetics of Complainants' property. The Complaint requests that PPL Electric select an alternative route and/or that the proposed transmission line be buried. The Complaint seeks, among other things, monetary compensation for the alleged future loss of property value.

6. On December 27, 2011, PPL Electric filed an Answer to the Complaint asserting, among other things, that Complainants' claims regarding the proposed transmission line project are not ripe and should be dismissed without prejudice, and that Complainants' remedy is to participate in the Commission proceeding when PPL Electric files its siting application under 52 Pa. Code §§ 57.71 – 77. PPL Electric plans to file the application later this year.

7. For the reasons explained below, the Complaint should be held in abeyance pending the filing by PPL Electric of the application seeking approval of the siting and construction of the transmission line so that the two related proceedings can be consolidated and considered together and so that the proceedings can be adjudicated in an efficient manner on a complete record and with consistent results.

II. ARGUMENT

8. PPL Electric furnishes electric service to approximately 1.4 million customers throughout its certificated service territory, which includes all or portions of twenty-nine counties and encompasses approximately 10,000 square miles in eastern and central Pennsylvania.

9. PPL Electric owns approximately 5,000 miles of transmission lines operating at 69 kV (kilovolts) or higher, approximately 375 substations with a capacity of 10 MVA (megavolt amperes) or more, and approximately 43,000 miles of distribution lines operating at less than 69 kV.

10. Pursuant to Chapters 15 and 28 of the Public Utility Code, PPL Electric has a statutory obligation to provide adequate, efficient, safe and reasonable service and facilities, and to make all repairs, changes, alterations, substitutions, extensions, or improvements in or to such service or facilities as necessary for the accommodation, convenience, and safety to its customers. PPL Electric is further required to provide reasonably continuous service without unreasonable interruptions or delay.

11. “Electric service is essential to the health and well-being of residents, to public safety and to orderly economic development, and electric service should be available to all customers on reasonable terms and conditions... [r]eliable electric service is of the utmost importance to the health, safety and welfare of the citizens of the Commonwealth.” 66 Pa.C.S. §§ 2808(9), (12).

12. On or about October 11, 2011, PPL Electric announced that it has selected a proposed route for a new power line as part of a multi-year project to meet growing demand for electricity and to improve the reliability of electric service for homes and businesses in the Pocono Mountains region of northeast Pennsylvania.

13. The Complaint raises issues related to the siting and route selection of the proposed transmission line, including the alleged adverse effect on real estate values, the alleged risk of danger to the health and safety of the public, and alleged adverse effect on the aesthetics of Complainants' property. The Complaint requests that PPL Electric select an alternative route and/or that the proposed transmission line be constructed underground. The Complaint seeks, among other things, monetary compensation for the alleged future loss of property value.

14. The project referenced in the Complaint is still in the planning stage and has not yet been submitted to the Commission for review and approval. Once the planning has been completed, PPL Electric intends to submit a full siting application requesting Commission approval of the siting and construction of the proposed transmission line. PPL Electric will provide the public notices for this project as required by Section 69.3102 of the Commission's Interim Siting Guidelines, 52 Pa. Code § 69.3102. Further, copies of the siting application and notifications of filing will be served in accordance with the provisions of Section 57.74 of the Commission's regulations, 52 Pa. Code § 57.74.

15. It is clear that the above-captioned Complaint and the forthcoming siting application are interrelated and raise common issues of law and fact. Because the disposition of each of these matters is interrelated, the consolidation of these proceedings will promote the efficient use of the time and resources of the parties and the Commission. Upon filing the above-mentioned siting application, PPL Electric will timely file a motion to consolidate the Complaint with the siting application for purposes of hearings and a decision.

16. Based on the foregoing, the Complaint should be held in abeyance pending the filing by PPL Electric of the applicable application seeking approval of the siting and construction of the transmission line so that the two related proceedings can be consolidated and

considered together, and so that the proceedings can be adjudicated in an efficient manner on a complete record and with consistent results.

III. CONCLUSION

WHEREFORE, PPL Electric respectfully requests that Complaint of Joe & Vanessa Caparo be deferred and held in abeyance until such time as PPL Electric submits an appropriate siting application to the Pennsylvania Public Utility Commission regarding the proposed transmission line project in northeast Pennsylvania and the Pocono Mountains region, at which time PPL Electric will move to consolidate the related proceedings.
