Re: Comments on Act 129 Phase Two Tentative Implementation Order, Docket No. M-2012-2289411

Dear Megan Good and Kriss Brown,

As citizens of Pennsylvania, we believe it is critical to reduce energy waste wherever possible. Energy efficiency saves us money, creates jobs, improves public health by reducing pollution, and makes the state's economy more competitive.

Through Act 129, the Energy Efficiency Act, Pennsylvania has been a leader in reducing energy waste. We are pleased that most utilities are on track to exceed their 3% efficiency targets by 2013. To date, these efforts have lowered state electricity consumption by over 2000 GWh, saved PA ratepayers \$278 million annually, created over 4000 jobs, and reduced pollution by an amount equivalent to removing 4 million cars from the road for a year.

However, the Tentative Implementation Order before the Public Utility Commission would lower efficiency targets in Phase II from 3% to 2.3% over three years. This reduction in efficiency targets is unnecessary and will cost Pennsylvania billpayers money.

Given the success of the Phase I Energy Efficiency and Conservation programs, and the fact that most utilities had no problem exceeding their targets, we strongly support a 3% average efficiency target over a three year period in Phase II.

Sincerely,
The Undersigned
