ELLEN DONNELLY

PUC DOCKET NO: F2012-233066

PA-P.U.C.  
SECRETARY'S BUREAU

F-2012-2330663

I am responded to you regarding my hearing concerning the SMART that PECO is attempting to install in my residence at 2821 HELLERMAN ST Ph. IN.

You keep reminding me that Gov. Rendell signed this into law 2008. and installation was approved by the PUC 5/6/2010. I do believe that has Gov. Rendell known of the potential danger he would have had more extensive research done.

When Mr Mike Innocenzo PECO senior V-P of operations met with Commissioner James Cawley and other members of PECO & Seniors Utility systems Mr McCormick said they had devised to fix the problem.

Mr Cawley response to this was "So the public can safely assume if this feature is installed the

meters would not overheat'

I dont like the word assume. Perhaps you assume your family is safe but I am not going to assume my family will be safe.

I still feel that time should be given to prove not assume the improvements to the SMART meters are safe. Until that day I object to the meter being installed in my residence not only for my safety but for the safety of my disabled daughter + my two grandchildren. they are so important to me to have their safety assumed not proven.

Looking forward to hearing from you again.

Ellen Donnelly
