Re: Annual Reporting Requirement for PP&L EnergyPlus Co.

Dear Secretary McNulty:

Enclosed is an original and nine (9) copies of an annual report filed by PP&L EnergyPlus Co. (License No. A-110098) for calendar year 1998. This report is required pursuant to Section 54.39(b) and 54.6(a)(2) of the Commission's regulations. 52 Pa. Code § 54.39(b) and 54.6(a)(2).

If you have any questions or comments, please call me at the number above or Joseph M. Kleha at (610) 774-4866.

Respectfully submitted,

Jesse A. Dillon

Section A. Report of Electric Generation Supply by Energy Source

Pursuant to 52 Pa. Code §54.39 (4) and 52 Pa. Code §54.6, PP&L EnergyPlus Co.
 (Name of Company)

Allentown, PA, reports the following percentage of total electricity sales by energy source for the
 (City) (State)

calendar year as indicated:

05/27/99
 A-110098
DOCKETED
 MAY 07 1999
 SECRETARY'S BUREAU

| Year | Coal | Nuclear | Oil | Hydro-power | Natural Gas | Renewable* | Percent of Total Energy Supplied (Based on Sales) |
|------|------|---------|-----|-------------|-------------|------------|---|
| 1998 | - | - | - | - | - | - | 100% |

This report reflects the estimated percent of total sales based on the primary fuel source used in the generation of electricity for customer consumption in the Commonwealth of Pennsylvania. Some generators may use a combination of fuel sources, such as oil and coal or oil and natural gas, which may be combined or used alternatively. In this instance, only the primary fuels source is reported. Data may also include negative sales for pumped storage hydroelectric operations, which could require the use of any fuel source except hydropower. If any supply includes sales for Distributed Generation, percentage of these sales by energy source are inclusive of the appropriate energy source categories, separately indicated within parentheses, and based on total energy supplied. If net metering is employed by any Distributed Generation activity, the data is marked with an asterisk.

Disclosure of generation energy sources is defined as electricity transactions which are traceable to specific generation sources by any auditable contract trail or equivalent, such as a tradable commodity system, which provides verification that the electricity source claimed has been sold only once to a retail customer. If generation energy sources are not identifiable, the provider shall disclose this fact in the following space provided:

DOCUMENT FOLDER

***Detailed Break-down of Renewable Source by Technology (if any reported above):**

| Technology | Percent of Total Renewable Energy Supplied | Actual Amount of Energy Supplied (Sales in kWh) |
|---|--|---|
| Solar Photovoltaic Energy | | |
| Solar Thermal Energy | | |
| Wind Power | | |
| Low-Head Hydropower | | |
| Geothermal Energy | | |
| Landfill or Other Biomass-based Methane Gas | | |
| Mine-based Methane Gas | | |
| Energy from Waste | | |
| Sustainable Biomass Energy | | |
| Other (Name) | | |
| Other (Name) | | |
| Total Renewable Sources | 100% | |

Attached is an Affidavit by an Independent Auditor, as required by 52 Pa. Code §54.6(b), verifying that anticipated generation sources (if applicable) or resources identified in the above report are true and accurate and that data based on electricity source and renewable technology has been sold only once to a retail customer.

Note to the Consumer: Electricity is the product of a mix of generation energy sources that is delivered over a system of wires.

Section B - Identify yourself as a electric distribution company, electric generation supplier or both. Attach additional sheets if needed.
