SMART METER COST RECOVERY SURCHARGE (SMCRS)

Purpose: The purpose of this surcharge is to provide for full and current cost recovery of all incremental costs associated with the Company's PaPUC-approved Smart Meter Program.

Applicability: The surcharge shall be a per-customer charge calculated to the nearest one cent, which shall be added to the fixed distribution rates for billing purposes for all commercial and industrial customers with metered service. The surcharge shall be on a cents per kWh basis for residential customers, included in the variable distribution rates, calculated to the nearest one hundredth of a cent. The rate shall be calculated separately for each customer class (residential, small commercial and industrial, and large commercial and industrial).

Billing Provisions: The surcharge shall be calculated on a quarterly basis using the following formula:

$SM(n) = (C+E+I)/R(n)$ where:

C – the incremental cost of the Company's Smart Meter Program. These costs shall include the following:

Capital and expense items relating to all plan elements, equipment and facilities, as well as incremental administrative costs and the cost of the Company's customer acceptance program and the cost upon approval by the Commission of acquiring a grant under the American Reinvestment and Recovery Act of 2009 as well as the cost of complying with the rules necessary to receive the grant. Specifically, these costs shall include, but are not limited to, the capital costs of capital expenditures for any equipment, software and facilities required to implement the Smart Meter Program, including depreciation, a return on the un-depreciated investment, and taxes, as well as operating and maintenance expenses. The rate of return to be used in calculating capital costs shall be at the Company's weighted average cost of capital. Consistent with the settlement in PECO's base rate case at Docket No. R-2010-2161575, the first surcharge filing shall use a return on equity of 10.0%. However, if at any time in the future, PECO's last litigated case is more than three years old, the quarterly rate of return for the electric utility barometer group from the Report on Quarterly Earnings of Jurisdictional Utilities prepared by the Commission's Bureau of Fixed Utility Services shall be used until a rate of return is determined in a subsequent litigated case, to be effective for the subsequent three-year period. The capital structure and the cost of debt and preferred stock shall be as filed in the Company's most recent quarterly earnings report. Administrative costs shall include incremental costs related to plan development and approval, cost analysis, measurement and verification, reporting, testing, upgrades, maintenance and personnel training plus any other incremental cost necessary to implement the PaPUC-approved Smart Meter Program. Costs recoverable under this surcharge shall also include cost, whether capital or expense that is stranded due to the implementation of the approved Smart Meter Program. Any reductions in operating expenses or avoided capital expenditures due to the Smart Meter Program will be deducted from the incremental costs of the Smart Meter Program to derive the net incremental cost of the Program that is recoverable. Such reductions shall include any reductions in the Company's current meter and meter reading costs.

SM(n) = smart meter cost for customer class "n" including over or under recovery and associated interest.

E – The estimated over or under recovery from the prior year. The reconciliation period shall be the 12 months ended June 30.

I – Interest on any over or under recovery balance. Interest shall be a rate of 6% and shall be calculated from the month of over or under collection to the mid-point of the recovery period.

n – rate class where: 1 = residential, 2 = small C&I, 3 = large C&I

Residential – Rates R and RH = 0.31¢/kWh
Small C&I – Rate GS = \$2.27/Fixed Distribution Charge
Large C&I – Rates HT, PD, EP = \$2.65/Fixed Distribution Charge

(C)

R – The total delivery service customers for the commercial and industrial rate class for the application period where the application period shall be as defined in the filing schedule. In the case of the residential class it shall represent delivered sales for the application period.

Filing Schedule: The estimated surcharge shall be filed 15 days prior to the start of the application period. Quarterly rates shall be effective on the first full billing cycle starting after January 29, April 1, July 1 and October 1. The quarterly rates will only be updated if the rate changes by more than 5%. The reconciliation filing shall be made on August 1 of each year. The resultant over or under recovery shall be included in the Smart Meter surcharge commencing on January 29 following the reconciliation filing.
