5.4.2 Optional Payment Plans (OPPs) (cont'd)

B) Termination Liability (cont'd)

2) Option 2 (cont'd)

For example:

If a Customer subscribes to a 5-year OPP and terminates service during the 48th month, the longest OPP period that could have been satisfied is three years. The Customer's termination liability would be calculated as follows:

$$(3\text{-year OPP monthly rate} - 5\text{-year OPP monthly rate}) \times 48$$

When a Customer disconnects some, but not all, of its 44.736 Mbps Services, the monthly rates used to calculate termination liability charges are applied in ascending order beginning with the lowest applicable rates.

The termination liability charge applies in addition to applicable minimum period charges.

C) Portability

Portability allows a Customer to replace a service in an OPP with another service for the balance of the commitment period. Termination liability will not apply when the Customer meets the requirements for portability as specified below:

- 1) The replacement service must be of the same speed as the disconnected service and must not already be in an OPP.
- 2) The orders to accomplish the replacement are placed with the Company within sixty (60) days of the disconnect order.
- 3) The number of services included in the OPP remains the same.

D) Additions of Service

When a Customer with an existing OPP wishes to increase the number of services of the same type between the same two locations, it has the following options:

- 1) Subscribe to the additional services under standard rates.
- 2) Subscribe to the additional services under a separate OPP at the then effective OPP rate.

D) Additions of Service (cont'd)

- 3) Cancel the existing OPP and include both the existing and the additional services under a new OPP for a commitment period equal to or longer than the original period. No termination charges apply to such cancellation.

E) Extension of Commitment Period

A Customer may, at any time prior to the expiration of the selected commitment period for an existing OPP or month to month plan, change to an OPP with a longer commitment period at the then effective OPP rates. No termination liability charges will apply for any services extended under the longer commitment period. The monthly rates applicable for the longer commitment period will apply effective with the Customer's next bill day following the request for the change.

F) Rate Regulations

Where an OPP is requested coincident with the connection of new service, it will be effective with the establishment of service.

Where an OPP is requested on existing service, the effective date will be the date negotiated with the Customer.

F) Rate Regulations (cont'd)

At the end of its selected commitment period, the Customer will have the option of subscribing to any then effective OPP or of retaining the service under the standard rates in effect at that time. If the Customer does not notify the Company of its choice prior to the expiration of the commitment period, standard monthly rates will be applied upon expiration of the commitment period.

G) Conversion of Existing Shared Use Facilities

In some instances Customers may choose to mix channels on the same DS-1 or DS-3 facility. When ordering a new facility covered by an OPP or when converting an existing month-to-month facility to an OPP, all channels on the facility must be covered by their respective OPP of the same term length and expiration date.

5.4.4 Optional Features and Functions

Optional features and functions may be ordered to improve the quality or utility of services to meet specific communications requirements. These features and functions are not necessarily identifiable with specific equipment; rather, they represent the overall performance characteristics which may be obtained using various combinations of equipment. Although the equipment necessary to perform a specified function may be installed at various locations on the facility, each optional feature and/or function is charged for as a single rate element.

C) Enhanced Access Diversity (EAD)

Enhanced Access Diversity (EAD) is an optional feature of DS-1 and DS-3 services which provides a choice of three levels of diversity. Diversity is provided on transmission facilities for two or more DS-1 or DS-3 services over two different physical routes. Customers subscribing to the EAD option will be provided a report on a quarterly basis which identifies the routing of each service in the diverse grouping. EAD is offered using existing physically diverse facilities. If diverse facilities are not available, EAD may be provided pursuant to Section 4.1.7.

The Customer must identify the services which will be diverse when placing orders for EAD. The Customer must also provide all appropriate connecting facility assignments (CFA) and any other pertinent information which will allow the Company to provide and maintain EAD. EAD is provided on a per DS-1 or DS-3 basis only, and the rates for EAD are in addition to the rates for DS-1 and DS-3 service.

2) Option 2

Option 2 provides local loop and interoffice facility diversity between serving wire centers. This offering utilizes existing physically diverse local loop and interoffice facilities, excluding equipment and facilities located in a serving wire center extending to the first manhole outside the serving wire center, or from the point of termination to the first manhole outside the Customer premises.
