- ii Information about appliance energy use and tips on saving energy are available through the Energy Library on our Web site, pplelectric.com/e-power
- ii Before digging around your home or property, you should always call the state's One Call notification system to locate any underground utility lines. You can do this by simply dialing 811, which will connect you to the One Call system. Be safe and call 811 before you dig.
- ii Take showers instead of baths to save energy and water. It takes about 30 gallons of water to fill an average bathtub. A 5-minute shower uses about 20 gallons. Low flow shower heads can cut your hot water use in half.
