Dear Secretary McNulty:

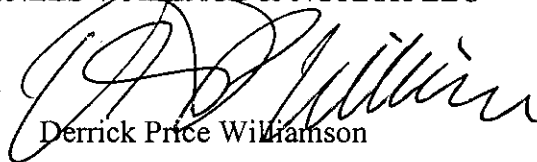

Please find enclosed for filing with the Commission the original and three (3) copies of the Petition to Intervene of West Penn Power Industrial Intervenors in the above referenced proceeding.

As reflected on the attached Certificate of Service, all parties have been duly served. Please date stamp the extra copy of this transmittal letter and kindly return it to our messenger for our filing purposes. Thank you.

Respectfully submitted,

**WEST PENN POWER INDUSTRIAL INTERVENORS'
PETITION TO INTERVENE**

TO THE HONORABLE PENNSYLVANIA PUBLIC UTILITY COMMISSION:

Pursuant to Sections 5.71 through 5.74 of the Commission's Regulations, West Penn Power Industrial Intervenors ("WPPII" or "Petitioner") hereby file this Petition To Intervene in the above-captioned proceeding. In support thereof, WPPII avers as follows:

1. Petitioner is WPPII, which for purposes of this proceeding includes the companies listed on Attachment "A" to this Petition. The list and Attachment "A" will be updated, as necessary, if the composition of WPPII changes during the course of this proceeding.

2. The names and address of WPPII's counsel are:

Derrick Price Williamson
Susan E. Bruce
Barry A. Naum
McNEES WALLACE & NURICK LLC
100 Pine Street
P.O. Box 1166
Harrisburg, PA 17108-1166
Phone: (717) 237-5446
Fax: (717) 237-5300
dwilliamson@mwn.com
sbruce@mwn.com
bnaum@mwn.com

3. WPPII is an *ad hoc* coalition of large, energy-intensive industrial and institutional consumers of electricity located within West Penn Power Company's d/b/a Allegheny Power ("Allegheny Power," "West Penn," or "Company") service territory. WPPII members purchase service from Allegheny Power primarily under Rate Schedules 20, 30, 40, 44, and 46.

4. On April 13, 2007, Trans-Allegheny Interstate Line Company ("TrAILCo" or "Company") filed with the Commission an Application for a Certificate of Public Convenience ("Application") to construct and operate portions of the Trans-Allegheny Interstate Line ("TrAIL") in Pennsylvania, including areas within the Allegheny Power service territory. This filing was apparently based on PJM Interconnection's ("PJM") approval in 2006 of a five-year Regional Transmission Expansion Plan ("RTEP"), in which PJM designated Allegheny Power as the transmission owner primarily responsible for constructing this three-state 500kV electric transmission line intended to upgrade the PJM transmission system. Allegheny Power has delegated its responsibility for construction and operation of the TrAIL to TrAILCo, an affiliate.

5. In Pennsylvania, TrAILCo now proposes to construct and operate approximately 52 miles of transmission line that includes a 500/138kV substation in Washington County (the "Prexy Substation"), a 500kV substation in Greene County (the "502 Junction Substation"), a

500kV line to connect the Prexy Segment to the 502 Junction Substation (the "Prexy Segment"), three 138kV double circuit transmission lines from the Prexy Substation to connect to current Allegheny Power transmission lines (the "Prexy 138kV lines"), and a 500kV line from the 502 Junction Substation to the Pennsylvania-West Virginia state line (the "Pennsylvania 502 Junction Segment"). See TrAILCo Application at 3. PJM and TrAILCo claim that the facilities from the Prexy Substation to the Prexy 138kV lines (collectively, the "Prexy Facilities") are necessary in order "to prevent anticipated electric reliability problems caused by conditions that may occur solely within the Allegheny Power Zone of PJM if the facilities are not constructed," while the Pennsylvania 502 Junction Segment and the rest of the project located outside of Pennsylvania are proposed in order to ensure reliability outside of the Allegheny Power Zone.

6. WPPII is confident that the Commission will address all issues attendant to whether construction of the TrAIL is in the interests of West Penn's ratepayers, and WPPII is eager to participate actively in that assessment. Of primary importance, among other issues, is the question of how the costs for the TrAIL Project will be allocated to Pennsylvania ratepayers and to West Penn customers in particular. Although TrAILCo includes detailed testimony regarding cost allocation, WPPII notes that the Federal Energy Regulatory Commission ("FERC") has yet to determine the final appropriation and level of the costs for this massive, multi-state project. In fact, on April 19, 2007, FERC issued an Order accepting PJM's proposal "to fully allocate, on a region-wide basis, the costs of new, centrally-planned facilities that operate at or above 500kV." See *PJM Interconnection, L.L.C.*, 119 FERC ¶61,063, at ¶ 76 (2007). This decision to accept socialized distribution of new transmission facilities costs essentially renders moot the cost allocation discussions contained in TrAILCo's Application here, which proposed an allocation of revenue requirements based on cost-causation principles

whereby only the beneficiaries of the construction projects would be responsible for paying the attendant costs. See TrAILCo Application at 27.

7. In accordance with FERC's decision, PJM is now expected to re-file its proposal for allocating costs for these transmission upgrades. As such, the cost impact on West Penn's ratepayers as a result of the TrAIL Project is entirely unknown. Importantly, the Commission cannot properly evaluate whether the Application is in the public interest without knowing what costs will be borne by Pennsylvania customers. In light of these undetermined cost recovery issues affecting West Penn customers, WPPII members are in position to suffer adverse and *significant rate increases as a result of the Commission's determination in this proceeding*. As large industrial and institutional customers already contributing significant revenues to West Penn, WPPII members have interests that are not represented by any other party in this proceeding.

8. Further, the TrAILCo project, as proposed, may impact the reliability and quality of service for WPPII members and other Pennsylvania ratepayers. Chairman Wendell F. Holland, in a statement issued at the April 24, 2007, Public Meeting, indicated a number of these public interest concerns that must also be resolved in evaluating TrAILCo's Application. Specifically, Chairman Holland notes that the Commission must conduct a "delicate balance" of questions regarding the project's potential enhancement of reliability, benefits to retail competition, reduction in retail electric generation costs, and strengthening of the regional interstate grid, against concerns over the project's potential impact on economic development, private property value, health, safety, and the environment. See *Statement of Chairman Wendell F. Holland*, Docket Nos. A-110172, et al., (Public Meeting held April 24, 2007).¹ Until these

¹ Chairman Holland also raises important questions regarding the effect of a potential US Department of Energy designation of the TrAIL as a National Infrastructure Electric Transmission Corridor.

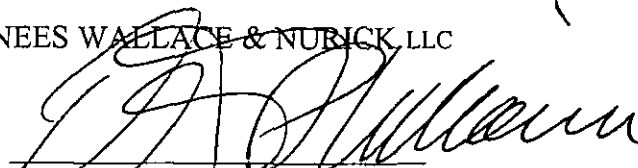

issues are resolved, the Commission cannot find TrAILCo's Application to be in the public interest. It is therefore appropriate for the Commission to receive input and representation from diverse classes of ratepayers—including WPPII's large industrial and institutional customers—who will undoubtedly be affected by the Commission's resolution of these important issues.

WHEREFORE, the West Penn Power Industrial Intervenors respectfully request that the Commission grant this Petition to Intervene and provide the West Penn Power Industrial Intervenors with full-party status in this proceeding.

Respectfully submitted,

McNEES WALLACE & NURICK, LLC

Dated: May 3, 2007

PUBLIC STATEMENT OF THE
OFFICE OF CONSUMER ADVOCATE
PURSUANT TO 71 P.S. SECTION 309-4(e)

Act 161 of the Pennsylvania General Assembly, 71 P.S. § 309-2, as enacted July 19, 1976, authorizes the Consumer Advocate to represent the interests of Pennsylvania consumers before the Pennsylvania Public Utility Commission ("PUC" or "Commission"). In accordance with Act 161, and for the following reasons, the Consumer Advocate determined to intervene in this matter.

On April 13, 2007, Trans-Allegheny Interstate Line Company (TrAILCo or Company) filed with the Commission an Application for a Certificate of Public Convenience (Application) to construct and operate portions of the Trans-Allegheny Interstate Line (TrAIL) in Southwestern Pennsylvania. Under the five-year PJM approved regional expansion plan (RTEP), Allegheny Power and its affiliates were designated to build and operated the TrAIL facilities. As proposed, TrAIL consists of 52 miles of transmission line including substations in Washington and Green Counties.

Through its participation in this proceeding, the OCA seeks to represent the interests of the customers of Allegheny Power and all those consumers who may be affected by the construction and operation of the TrAIL.

**ANSWER OF TRANS-ALLEGHENY INTERSTATE LINE COMPANY TO
PETITION TO INTERVENE OF WEST PENN POWER INTERVENORS**

Trans-Allegheny Interstate Line Company ("TrAILCo"), by and through its attorneys, hereby files, pursuant to 52 Pa. Code § 5.66, the following Answer to the Petition to Intervene of the West Penn Power Industrial Intervenors ("WPII") as follows:

1. WPII filed its Petition to Intervene ("Petition") in the above referenced proceeding on April 30, 2007.
2. Without taking any position on any factual allegations or legal conclusions contained in the Petition and without prejudice to any future position TrAILCo may take on the issues addressed in that pleading, TrAILCo has no objection to the intervention of WPII in this proceeding. By not opposing this intervention, TrAILCo is not conceding

the proposed intervenor has a direct, substantial or immediate interest that has been aggrieved in this proceeding.

Docket Nos. A-110172; A-110172F0002; A-110172F0003;
A-110172F0004; G-00071229

Dear Secretary McNulty:

In a letter dated April 24, 2007 to Chairman Holland, the Board of Commissioners of Greene County, Pennsylvania ("Greene County") alleged certain errors in connection with the Application filed by Trans-Allegheny Interstate Line Company ("TrAILCo") in the above-referenced matter on April 13, 2007. Since this proceeding is in the initial stages and it is not clear whether the Greene County letter constitutes a formal pleading requiring an affirmative response, TrAILCo is submitting this letter to preserve its position and to clarify some of the errors contained in that correspondence.

First, TrAILCo has complied completely with all Pennsylvania law applicable to the filing and notification of the Application. In recognition of the multiple requests for relief contained in the Application, TrAILCo met with representatives from the

44

Pennsylvania Public Utility Commission ("Commission") and the typical "statutory parties" to provide them advance notice of the filing and to clarify the specific type and form of notification the Commission desired in order to fully inform the affected parties of the relief requested. TrAILCo has complied with all of the Commission's requests and directives with respect to notice, as well as the existing regulations.

Second, TrAILCo fully complied with all due process requirements to assure that all potentially affected parties, including property owners, intervenors and statutory parties, are fully informed of the relief requested in the Application. These requirements have been satisfied in this case by TrAILCo's adherence to previously established Commission rules governing the filing and notice of transmission line siting applications and related proceedings. In fact, as demonstrated in paragraph 36 of the Application, TrAILCo has provided notice to property owners that exceeds the Commission's notice requirements.

Third, the issues raised by Greene County constitute a challenge to the existing regulatory structure and, because of TrAILCo's full compliance with the Commission's due process requirements, should not be considered allegations of any alleged act or failure to act by TrAILCo in contravention of the Commission's requirements. For example, Greene County states in the third paragraph of its letter that "Allegheny Power has not proposed a process for property owners that is appropriately informative and allows them the opportunity for them to be heard." In reality, neither Allegheny Power nor the real applicant in this proceeding, TrAILCo, has "proposed" anything with respect to the *process* for filing the Application, notification of affected property owners or how the Commission should afford property owners the opportunity to be heard. The "process" predated the filing of the Application and reflects requirements previously established by the Commission. TrAILCo has fully complied with those requirements.

Fourth, some of Greene County's concerns result from its apparent lack of knowledge about siting proceedings, rather than anything relating to TrAILCo's conduct or the Commission process itself. For example, Greene County's concern about the lack of detail regarding the prehearing conference (¶ 2) is misplaced since the Commission and/or the presiding Administrative Law Judges will be issuing a separate notice advising of the date, location and other the information to be addressed in the prehearing conference. TrAILCo simply provided the *form* of notice. In addition, the Commission's regulations at 52 Pa. Code §§ 5.221-5.224 specifically address prehearing conferences. In a similar vein, Greene County does not appear to understand that *before* TrAILCo and its right-of-way representatives can lawfully commence discussions with affected property owners, the condemnation notice that accompanied the Application was required by law to be given. (*See*, 52 Pa. Code § 57.91). Rather than constituting the end of the right-of-way process, that notice marks the start of that process, under which TrAILCo's representatives can now begin to contact property owners directly to provide information, answer questions, and generally engage in a dialogue with potentially affected property owners. Greene County's letter mistakenly implies that the information property owners have now received is the sum total of what they will know about the underlying transmission line project. This assumption is incorrect.

Fifth, while the Greene County letter objects to the absence of a statement of need in the Notice accompanying the Application, it ignores that the Application and the accompanying testimony address the "need" for the proposed transmission line. The Application, testimony and accompanying exhibits also address, among other things, the alternatives to the line, the proposed project time schedule, etc. – the very issues Greene County erroneously claims are not addressed.

Sixth, for the reasons discussed above, the Notice accompanying the Application is not deficient in any respect. It complies with applicable law, and reflects pre-filing discussions with the Commission and other statutory parties in Commission proceedings.

Seventh, there is no basis in Pennsylvania law for Greene County's request that stipends be made available to fund legal counsel, property appraisals, surveyors, etc. (§ 7).

From the outset of the TrAIL project, Allegheny Power and TrAILCo have understood and appreciated the need of property owners, public officials and others to receive as much timely information as possible about the project. In that spirit, TrAILCo hosted two open houses in Greene County to provide information about the project. The first was held on December 13, 2006 to provide information about the proposed project and to receive comments from property owners and others that would be useful in determining the proposed route of the line. The second was held on April 2, 2007 to explain the proposed route in advance of the filing of the Application. Announcements of both open houses were made through local newspaper advertising. In addition, for many months leading up to the filing of the Application, TrAILCo has maintained an Internet website to provide potentially affected property owners and others with maps of alternative routes under consideration and other information about the project. Now, the website serves as a public repository for the Application filed by TrAILCo in this proceeding and the detailed testimony and exhibits, including maps, that support the Application. In short, TrAILCo has made substantial amounts of information available to potentially affected property owners, public officials and others through the informal process leading up to the filing of the Application and through the formal process of filing prepared testimony and exhibits with the Application.

The level of public involvement afforded by TrAILCo prior to the filing of the Application and the volume and nature of information about the proposal now available to the public is unprecedented in Pennsylvania. Moreover, in accordance with the Commission's rules and practices developed in past cases, further information will become available in the months to come through the conduct of discovery, public input hearings, further filings of direct and rebuttal testimony, cross-examination at the evidentiary hearing and post-hearing briefs. Therefore, Greene County's allegations that "there is not enough information to give people an adequate understanding of what is being proposed nor adequate time for people to have an opportunity to be heard" are without merit and should be rejected by the Commission.

There is clearly no need for the Commission to require TrAILCo to "revamp their efforts" in any fashion or to "begin the process again" as requested by Greene County. In compliance with the Commission's requirements and applicable law, TrAILCo has carefully prepared and filed a comprehensive Application addressing all issues relevant to the relief requested, along with detailed exhibits and testimony that will facilitate the participation of property owners and others in the Commission's review process. The Commission should reject Greene County's attempt to de-rail this proceeding in its initial stages predicated upon erroneous assumptions and misinformation about TrAILCo's Application and the existing transmission line siting process in Pennsylvania.

Very truly yours,

W. Edwin Ogden

**DOCUMENT
FOLDER**

(SEE ATTACHED LIST)

Application of Trans-Allegheny Interstate Line Company (TrAILCo)

For approval: 1) for a certificate of public convenience to offer, render, furnish or supply transmission service in the Commonwealth of Pennsylvania (A-110172); 2) authorization and to locate, construct, operate and maintain certain high voltage electric substation facilities (A-110172F0002); 3) authority to exercise the power of eminent domain for the construction and installation of aerial electric transmission facilities along the proposed transmission line routes in Pennsylvania (A-110172F0003); 4) approval of an exemption from municipal zoning regulation with respect to the construction of buildings (A-110172F0004); and 5) approval of certain related affiliated interest arrangements (G-00071229)

NOTICE

A Pre-Hearing Conference will be held to discuss the following matters:

- The scheduling of public input hearings in the locales affected by the proposed power lines. Notice of the public input hearings will be provided to the parties and advertised in newspapers of general circulation.
- Identification of the issues raised by the filings.
- Discovery matters.
- The scheduling of evidentiary hearings on the issues raised by the five filings.

NO TESTIMONY WILL BE TAKEN AT THE PRE-HEARING CONFERENCE.

Given the number of potential parties to this proceeding, we will discuss the grouping of parties into interest groups with designated representatives as provided for in 52 Pa. Code § 57.75(c).

Again, the purpose of the Pre-Hearing Conference is to address procedural matters only; **NO TESTIMONY WILL BE TAKEN.**

This is to inform you that a Pre-Hearing Conference on the above-captioned cases will be held as follows:

Date: Tuesday, June 19, 2007

Time: 10:00 a.m.

Location: 11th floor hearing room
Pittsburgh State Office Building
300 Liberty Avenue
Pittsburgh, PA 15222

Presiding: Administrative Law Judge Michael A. Nemeč and
Administrative Law Judge Mark A. Hoyer
1103 Pittsburgh State Office Building
300 Liberty Avenue
Pittsburgh, PA 15222
Telephone: 412-565-3550
Fax: 412-565-5692

If you are a person with a disability, and you wish to attend the hearing, we may be able to make arrangements for your special needs. Please call the scheduling office at the Public Utility Commission at least (2) two business days prior to your hearing:

- Scheduling Office: 717-787-1399
- AT&T Relay Service number for persons who are deaf or hearing-impaired: 1-800-654-5988

Re: Access to my property for surveying, etc.

Dear Mr. Ruberto,

In response to your letter dated May 7 - Allegheny Power does not own a right-a-way on my property and I am not interested in selling such to you.

Therefore, you are not allowed access to perform any surveying, core boring and cultural and environmental assessment. If you or any of your workers should arrive here I will have you escorted off of my property by the State Police for trespassing.

Sincerely,

Rebecca Foley, RN

**ANSWER OF TRANS-ALLEGHENY INTERSTATE LINE COMPANY TO
 PETITION TO INTERVENE OF ALLEGHENY ELECTRIC COOPERATIVE,
 INC. AND PENNSYLVANIA RURAL ELECTRIC ASSOCIATION**

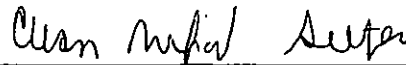

Trans-Allegheny Interstate Line Company ("TrAILCo"), by and through its attorneys, hereby files, pursuant to 52 Pa. Code § 5.66, the following Answer to the Petition to Intervene of Allegheny Electric Cooperative, Inc. and Pennsylvania Rural Electric Association (collectively, "AEC/PREA") as follows:

1. AEC/PREA filed their Petition to Intervene ("Petition") in the above referenced proceeding on May 18, 2007.
2. Without taking any position on any factual allegations or legal conclusions contained in the Petition and without prejudice to any future position TrAILCo may take

DOCKETED
 MAY 24 2007

on the issues addressed in that pleading, TrAILCo has no objection to the intervention of AEC/PREA in this proceeding. By not opposing this intervention, TrAILCo is not conceding the proposed intervenor has a direct, substantial or immediate interest that has been aggrieved in this proceeding.

Respectfully submitted,

W. Edwin Ogden

Re: Application of Trans-Allegheny Interstate Line Company (TrAILCo) For Approval: 1) for a Certificate of Public Convenience to Offer, Render, Furnish or Supply Transmission Service in the Commonwealth of Pennsylvania; 2) Authorization and to Locate, Construct, Operate and Maintain Certain High-Voltage Electric Substation Facilities; 3) Authority to Exercise of Power of Eminent Domain for the Construction and Installation of Aerial Electric Transmission Facilities Along the Proposed Transmission Line Routes in Pennsylvania; 4) Approval of an Exemption From Municipal Zoning Regulation With Respect to the Construction of Building; and 5) Approval of Certain Related Affiliated Interest Arrangements

Docket Nos. A-110172, A-110172F0002, A-110172F0003, A-110172F0004 and G-00071229

Dear Mr. McNulty:

Enclosed please find a copy of the Office of Trial Staff's (OTS) **Petition to Intervene and Request for Expeditious Commission Action and Notice of Appearance.**

OTS seeks Commission action on the Petition prior to the June 19, 2007 pre-hearing conference already scheduled for this proceeding.

Copies are being served upon the Commissioners and active parties of record to date.

SECRETARY'S BUREAU
2007 MAY 24 AM 11:50

OFFICE OF TRIAL STAFF
PETITION TO INTERVENE AND
REQUEST FOR EXPEDITIOUS
COMMISSION ACTION

The Office of Trial Staff ("OTS") of the Pennsylvania Public Utility Commission ("Commission"), by and through its Chief Prosecutor Johnnie E. Simms and Senior Prosecutor Charles Daniel Shields, and pursuant to 66 Pa.C.S.A. §306(b)(1) entitled "Office of Trial Staff (b) Power and duties" hereby petitions the Commission to authorize the OTS intervention in this transmission line siting application proceeding to protect the public interest. Additionally, OTS respectfully requests that the Commission

DOCUMENT
FOLDER

DOCKETED
MAY 25 2007

act expeditiously to approve this Petition given that the Office of Administrative Law Judge (“OALJ”) has scheduled the initial prehearing conference in this matter for June 19, 2007.¹

1. The Office of Trial Staff’s prosecutorial powers and duties are specifically prescribed in Section 306(b)(1) of the Public Utility Code, 66 Pa.C.S.A. §306(b)(1).² Consistent with such statutory grant of authority and enumerated duties, OTS seeks party status in the instant siting proceeding to inter alia, ensure the reliability of the proposed transmission lines.

1 Due to the timing of this proceeding and the extensive list of interested parties evidenced by the certificate of service, OTS is filing this Petition to the Commission simultaneously with a Notice of Appearance at the present dockets for administrative purposes. In the event the Commission for some reason denies this Petition and does not approve the participation of OTS, the filed Notice of Appearance will be withdrawn.

2 And specifically, 66 Pa.C.S. §306(b)(1), provides:

Power and duties. –

(1) The Office of Trial Staff shall be responsible for and shall assist in the development of, challenge of and representation on the record of all matters in the public interest in all commission proceedings except those involving transportation, safety, eminent domain, siting, service issues having no impact on rates and ability to pay, provided that the Director of Trial Staff may petition the commission or may be directed by the commission to intervene to protect the public interest in any proceeding involving transportation, safety, eminent domain, siting, service issues having no impact on rates and ability to pay. To assist in carrying out his powers and duties under this section, the Director of Trial Staff shall supervise the activities of the Office of Trial Staff in all commission proceedings in which he participates. If the Director of Trial Staff is of the opinion that the initiation of a proceeding is necessary to protect the public interest, he shall request that the commission initiate the appropriate proceeding. When he participates in a commission proceeding, it shall be the duty and responsibility of the Director of Trial Staff to prosecute in that proceeding.

2. Specifically, OTS references the language of the Executive Summary accompanying the April 13, 2007, subject Applications filed by Trans-Allegheny Interstate Line Company (“TrAILCo” or “TrAIL”), that provide on the first page:

The “need” for the Pennsylvania-based components of TRAIL is based almost entirely on the critical importance of maintaining electric transmission system reliability in Pennsylvania, which directly impacts West Penn and its Pennsylvania customers.

On page two of the Executive Summary, a representation is also made that:

West Penn Customers in Pennsylvania will be direct beneficiaries of the improved reliability that will result from the construction and operation of TrAIL in Pennsylvania.

3. OTS respectfully asserts that the issue of the reliability of electricity arises in Commission base rate and other proceedings prosecuted by OTS involving jurisdictional electric distribution companies – a group that includes West Penn Power Company (“West Penn”).³ Reliability of electric service issues can and does affect the

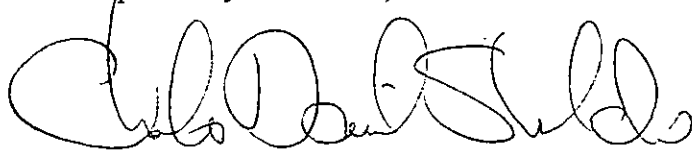

3 As one recent example, the Commission acted on April 25, 2007, in *In re Duquesne Light Co.* 2007 WL 1307796, to approve the acquisition of Duquesne Light Holding, Inc. by Merger, at Docket No. A-110150F0035, and the Application of DQE Communications Network Services, LLC, for a Certificate of Public Convenience under Section 1101(a)(3) of the Public Utility Code approving the acquisition of Duquesne Light Holding, Inc. by Merger, at Docket No. A-311233F0002. Specifically, the Commission adopted the Administrative Law Judge’s Initial Decision approving a settlement entered into by OTS and the other active parties. As noted in page 4 of the Initial Decision, one of the express terms and conditions of the settlement was agreement by Duquesne to a plan that established reporting requirements to allow for the monitoring of the quality of service provided by Duquesne and to identify any significant changes to Duquesne’s **reliability** and service levels. [Emphasis Added]. As also noted in the Office of Consumer Advocate’s Statement in Support of that settlement, “Nothing in the Settlement, however, is meant to preclude the Commission from exercising its full powers to assure that Duquesne’s quality of service and reliability remains consistent with its duty to provide safe and reasonable service to its ratepayers.”

revenues and expenses of electric distribution companies that have an ultimate direct impact upon their level of rates authorized to be charged to customers.

4. If granted intervention by the Commission in this siting proceeding, OTS will investigate and may provide testimony and evidence regarding the potential effect of the proposed transmission lines upon the reliability of electric service provided by West Penn and any other affected Pennsylvania jurisdictional electric distribution companies. As such, OTS avers that its participation as an active party would serve to protect the public interest.

WHEREFORE, for the foregoing reasons, the Office of Trial Staff respectfully requests that the Commission expeditiously grant this petition to intervene to in the instant transmission line siting application proceeding prior to the scheduled June 19, 2007, prehearing conference in Pittsburgh, Pennsylvania.

Respectfully submitted,

Charles Daniel Shields
Senior Prosecutor
Johnnie E. Simms
Chief Prosecutor

Office of Trial Staff

**DOCUMENT
FOLDER**

Dear Secretary McNulty:

This letter is in response to the PUC Application filed on behalf of the Trans-Allegheny Interstate Line Company (TrAILCo).

The Pennsylvania Turnpike Commission (PTC) is in the process of studying highway expansion projects in the southwestern Pennsylvania area. A Draft Environmental Impact Statement (DEIS) is currently being prepared for the Southern Beltway Transportation Project from I-79 to the Mon/Fayette Expressway in Washington County. We anticipate that the DEIS should be circulated for public comment in the near future. Several public meetings have been held during the project development to present the alternatives under investigation.

Based on the information provided in the April 13, 2007 letter regarding TrAILCo's Application, there is a potential conflict between the proposed transmission lines and the proposed Southern Beltway facility. While the Prexy Substation and the 500 kV line serving the substation is located to the south of all of our alternatives, the 138 kV line from the Prexy substation towards the east could have a major impact to our proposed facility including the proposed Sugar Run Road interchange in Nottingham Township. The potential conflicts are located to the north of Barr Road where the right-of-way has not yet been acquired. The existing powerline in the same general area may also have impacts requiring tower relocations.

The PTC concurs that facility improvements are required to meet increased demands, both from a highway transportation perspective as well as from an energy perspective. We take no objection to the general project. We ask that coordination between both parties continue through the design and construction process in order to

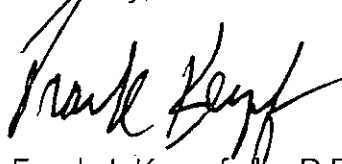

1-877-736-6727
paturndpike.com

Handwritten mark

allow for an economical completion of both facilities. We request that a slight realignment to the proposed 138kV line be considered in the area north of Barr Road and that tower locations be designed and spaced so as not to preclude the proposed Southern Beltway. We request that all costs and expenses related to the powerlines be borne at the sole cost and expense of TrAILCo.

Please contact Mr. P. Gregory Bednar at the PTC's Western Regional office regarding any further coordination. Mr. Bednar can be reached at 724-755-5182 or by email at gbednar@paturnpike.com. We look forward to further coordination regarding these important facility improvements.

Sincerely,

Frank J. Kempf, Jr., P.E.

Dear Mr. McNulty:

Enclosed, please accept for filing on behalf of CPV Warren, LLC an original and three (3) copies of CPV Warren, LLC's Petition to Intervene in the following proceeding: *In re: Application of Trans-Allegheny Interstate Line Company*, Docket Nos. A-110172, A-110172F0002, A-110171F0003, A-110171F0004, G-00071229.

Two additional copies of the Petition to Intervene have been provided. Please date stamp the copies and return them in the self-addressed stamped envelope provided with this filing. Copies of the Petition to Intervene have also been served on the Office of the Administrative Law Judge and the applicant as required by the April 28, 2007 Notice in this proceeding.

Please contact the undersigned if you have any questions concerning this filing. Thank you for your assistance.

Respectfully submitted,

Michael Wentworth

PETITION TO INTERVENE

Pursuant to 52 Pa. Code §§ 5.71 to 5.74 and the Pennsylvania Public Utility Commission's ("PUC") April 28, 2007 notice, CPV Warren, LLC ("CPV Warren") submits this petition to intervene in the captioned docket in which, on April 13, 2007, Trans-Allegheny Interstate Line Company ("TrAILCo") filed an application for approval to locate and construct multiple transmission lines and related facilities in portions of Washington and Greene Counties, Pennsylvania. In support of its petition, CPV Warren states as follows:

I. COMMUNICATIONS

CPV Warren respectfully requests that all pleadings, correspondence and other communications concerning this docket be directed to the following

II. PETITION TO INTERVENE

A. TrAILCo's Application

In June 2006, PJM Interconnection, L.L.C. ("PJM") approved a five year regional electric transmission plan that included authorization for construction of a 500 kilovolt ("kV") transmission line that would extend from Southwestern Pennsylvania to West Virginia and Virginia. In its present application before the PUC, TrAILCo seeks approval to locate and construct the portion of its line that will be located in Pennsylvania. Specifically, it seeks authorization for three 138 kV transmission lines, one 500 kV transmission line and related facilities, collectively, the Trans-Allegheny Interstate Line ("TrAIL"), in portions of two Pennsylvania counties.

B. CPV Warren's Identity, Interest, and Position

CPV Warren is a Silver Spring, Maryland-based limited liability company organized under the laws of Delaware. CPV Warren is a direct, wholly-owned subsidiary of CPV Warren Inc., which, in turn, is a direct, wholly-owned subsidiary of Competitive Power Ventures Holdings, LLC ("CPV Holdings"). CPV Warren is developing a 550 – 600 MW combined-cycle electric generating facility (the "Facility") in Warren County, Virginia, that is located adjacent to one of the proposed TrAIL paths in Virginia. CPV Warren takes no position, at this time, on the TrAILCo's PUC application, but because issues raised in this proceeding may have an impact on TrAILCo's proposed Virginia transmission lines located near the Facility, CPV Warren has a direct and substantial interest in the outcome of the instant proceeding that cannot be adequately represented by any other party. Allowing CPV Warren to actively participate in this proceeding would be in the public interest. Accordingly, the PUC should grant this timely petition to intervene.

CERTIFICATE OF SERVICE

I hereby certify that pursuant to the April 28, 2007 Notice, I have served a copy of the foregoing document upon the Office of the Administrative Law Judge and the applicant in this proceeding.

Dated at Washington, D.C., this 25th day of May, 2007.

COUNTY & MUNICIPAL CONSTRUCTION CODES
COUNTY PLAN & MUNICIPAL ZONING CODES
CONSERVATION BOARD
FARMLAND PRESERVATION BOARD
GREENE COUNTY HISTORIC BOARDS

and therefore,

the County of Greene has a direct and material economic, legal and social interest in the proceeding that cannot be adequately represented by another party,

SUMMARY:

FIRST: THAT the County does not have enough information to reasonably determine whether the application meets the standards set forth in 52 Pa. Code §§ 57.71-57.76, regarding the siting of the high voltage electric transmission line, and

as per 52 Pa. Code § 57.76(a):

- (1) THAT the application does not prove that there is a need for the High Voltage Power Line within the Commonwealth of Pennsylvania, or according to State mandated reliability standards, and
- (2) THAT the application does not prove that there is a need for the High Voltage Power Line outside the boundaries of the Commonwealth of Pennsylvania, and
- (3) THAT the application does not meet the recently approved standards, or according to Federally mandated reliability standards, and guidelines of the Commonwealth of Pennsylvania's Sustainable Energy Plan, as approved by Governor Rendell and DEP Secretary Katie McGinty, and
- (4) THAT such a large High Voltage Power Line will create unreasonable risks of danger to the health and safety of the public, and
- (5) That the High Voltage Power Line application is not in compliance with applicable statutes and regulations providing for the protection of the natural resources of this Commonwealth, and
- (6) That such a High Voltage Power Line will have a extremely adverse environmental impact, considering the electric power needs of the public, the state of available technology and the available alternatives, to include among other goals of the Pennsylvania Sustainable Energy Plan "Distributive Generation."

AND pursuant to 52 Pa. Code § 57.75(e):

- (7) THAT there is no present need for the High Voltage Power Line in servicing Greene County, and the Pennsylvania public, and any future needs can be provided with alternate technology, sources and renewable sources, and
- (8) THAT the safety of the proposed High Voltage Power Line, and its surrounding families and lands, cannot be assured, nor reasonably protected, and which represents what could be a Homeland Security "attractive nuisance" to our Commonwealth, our families and our local communities, and
- (9) THAT the Application does not define what efforts will be made to minimize such impacts to the Commonwealth of Pennsylvania and Greene County, and

SECOND: THAT the Application does not define what efforts will be made in planning and/or construction, to minimize the impacts to the Commonwealth of Pennsylvania and the County of Greene, as to the following:

- (i) Land use.
- (ii) Soil and sedimentation.
- (iii) Plant and wildlife habitats.
- (iv) Terrain.
- (v) Hydrology.
- (vi) Landscape.
- (vii) Archaeologic areas.
- (viii) Geologic areas.
- (ix) Historic areas.
- (x) Scenic areas.
- (xi) Wilderness areas.
- (xii) Scenic rivers.

THIRD: THAT the Application has not fully considered the availability of reasonable alternative to: sources of power, reduction of electric consumption programs, routes designed to be underground, and/or using already established rights-of-ways, to include but not limited to interstate highways, and

FOURTH: THAT the High Voltage Power Line should NOT be exempted from Municipal Zoning Regulation or Construction Codes with respect to the construction of buildings and "certain related affiliated interest arrangements," and

FIFTH: THAT authority should NOT be granted to Applicant approving the exercise the Power of Eminent Domain for the acquisition of Rights-of-ways, Construction and Installation of Aerial Electric Transmission Facilities Along the proposed transmission Line Routes in Pennsylvania, and

SIXTH: THAT the Application does meet the standards nor goals of United States "Environmental Justice (EJ)" law that mandates federal and state agencies ensure nondiscrimination by addressing how low-income and minority populations are affected by this proposal and proposed action of Pennsylvania. No statement has been made in the Application of how the project plans to avoid, minimize or mitigate disproportionately high and adverse human health and environmental effect, including social and economic affects, on minority and low-income populations, and

SEVENTH: THAT costs of construction and maintenance, and other expenses will unfairly increase the future electric rates of Pennsylvania consumers and ratepayers, and

EIGHTH: THAT the High Voltage Power Line would have a devastating effect on the preservation of farm lands, scenic, agricultural landscape which the County has committed to by destroying the sanctity of the scenic and open spaces, and

NINTH: THAT there has not been a environmental impact assessment, and

TENTH: THAT there has not been a public health impact assessment specific to the Application, which applies modern medicine and measurement criteria.

A Pubic Health Assessment must be done in light of the size and scope of the proposed towers, the amount and quality of the electricity to be transmitted, and recent studies that show that Electric and magnetic fields (EMF), and the noise generated by it, can cause an increase in cancers and other related health problems for people, who reside or frequent the public buildings and schools, private homes, farm buildings and farm animals within or near the transmission corridor.

ELEVENTH: THAT there has not been an assessment specific to the Application which documents the potential biological impact, and therefore

CONCLUSION

For the reasons set forth above, the County of Greene respectfully requests the Commission to consider these comments in PROTEST, and, DENY the Application.

Respectfully Submitted,

Greene County Board of Commissioners,
Authorized in a public Regular Meeting, held Thursday, May 24, 2007.

DOCKETED
JUN 4 2007

PROTEST OF THE
ENERGY CONSERVATION COUNCIL OF PENNSYLVANIA

The Energy Conservation Council of Pennsylvania ("Energy Conservation Council") hereby files this Protest in the above-captioned proceeding pursuant to the Rules of Practice and Procedure of the Pennsylvania Public Utility Commission ("Commission" or "PUC"); 52 Pa. Code § 5.51 *et seq.*

I. INTRODUCTION

On April 13, 2007, the Trans-Allegheny Interstate Line Company ("TrAILCo") filed an Application, Docket Nos. A-110172, A-110172F0002, A-110172F00003, A-110172F004, and G-00071229 ("Application") with the Pennsylvania Public Utility Commission requesting authority to locate and construct three 138 kV transmission lines and one 500 kV transmission line and related facilities in portions of Washington and Greene counties in southwestern Pennsylvania. The Application also requests that the Commission issue a Certificate of Public Convenience granting TrAILCo authority as a public utility.

Notice of this proposal was published in the *Herald-Standard* on April 23, 2007, establishing the deadline of May 29, 2007 for the submission of Protests.

The Energy Conservation Council now files this Protest objecting to the transmission line project because the project will damage the environment, endanger the health and safety of the public, increase local and regional air pollution, increase electric rates and costs, and is not necessary to meet local energy demands of Washington and Greene counties.

The power of eminent domain should be used sparingly - *only* if there is a clear need that requires the sacrifice of individual property rights for the public good. Because the 500,000 kilovolt power line is not needed, the use of eminent domain - and the exposure of Pennsylvania's residents and businesses to health risks, environmental damage, lower property values, and higher electric rates - must be avoided.

II. ENERGY CONSERVATION COUNCIL'S INTEREST AND STANDING TO PROTEST TRAILCO'S APPLICATION

1. This Protest is filed in the name of the Energy Conservation Council, by and through its undersigned attorneys, Pepper Hamilton L.L.P., and Berger Law Firm, P.C.

2. The Energy Conservation Council is an association comprised of over 600 property owners, local business owners, and residents of Washington and Greene counties in Western Pennsylvania. See Exhibit A for a list of Energy Conservation Council members.

3. The Energy Conservation Council files this Protest to ensure that the interests of its members are protected. The Energy Conservation Council, on behalf of its members, opposes the proposed transmission line project because the project will harm the environment, endanger health, increase local and regional air pollution, increase electric rates and costs, adversely effect property values, and is not necessary to meet local energy demands of Washington and Greene counties.

4. The Energy Conservation Council has representational standing to assert this Protest. See *Pa. Natural Gas Ass'n v. TW Phillips Gas & Oil Co.*, 1991 WL 474870, 75 Pa.

P.U.R. 598 (Pa. P.U.C. 1991); *Tripps Parc Civic Ass'n v. PUC*, 415 A.2d 967, 970 (Pa. Cmwh. Ct. 1980) (both establishing that an association has representational standing to assert the interests and rights of its individual members in a PUC proceeding). The Energy Conservation Council represents members who have a direct, immediate and substantial interest in the subject matter of this proceeding.

5. A protestant's interest in the subject matter of a proceeding "is direct if the protestant's interest is adversely affected by the actions challenged in the protest, is immediate if there is a close causal nexus between the protestant's asserted injury and the actions challenged in the protest, and is substantial if the protestant has a discernible interest other than the general interest of all citizens in seeking compliance with the law." *In re Consumers Pennsylvania Water Company-Shenango Valley Div.*, 2001 WL 1542265, at *8 (Pa. P.U.C. 2001); see *Ken R. ex rel. C.R. v. Arthur Z.*, 682 A.2d 1267 (Pa. 1996); *William Penn Parking Garage, Inc. et al. v. City of Pittsburgh*, 346 A.2d 269 (Pa. 1975).

6. Energy Conservation Council members have a direct, immediate, and substantial interest in TrAILCo's Application because they are property owners, residents, and owners of local businesses whose energy rates and costs, property values, health, and the environment in which they live and work will be adversely affected if the Commission grants TrAILCo authority to locate, construct and operate the proposed transmission lines.

III. GROUNDS FOR PROTEST

A. Legal Framework

7. The Application must be examined pursuant to Sections 1101-1103 and 1504-1505 of the Public Utility Code, Section 1511 of the Business Corporation Law, and Sections 57.71-57.76 of the Commission's Regulations.

8. Section 1101 provides that a “proposed public utility” may offer service in the Commonwealth upon application and approval by the Commission evidenced by a certificate of public convenience. 66 Pa. C.S. § 1101.

9. Section 1102 of the Public Utility Code requires that the Commission issue a certificate of public convenience as a legal prerequisite to offering service, abandoning service and certain property transfers by public utilities or their affiliated interests. 66 Pa. C.S. §1102(a)(1)-(3). The statute provides, in pertinent part, as follows:

Upon the application of any public utility and the approval of such application by the commission, evidenced by its certificate of public convenience first had and obtained, and upon compliance with existing laws, it shall be lawful:

(1) For any public utility to begin to offer, render, furnish or supply within this Commonwealth service of a different nature or to a different territory than that authorized by . . . [a] certificate of public convenience granted under this part.

66 Pa.C.S. § 1102(a)(1).

10. Section 1103 provides: “[a] certificate of public convenience shall be granted by order of the commission, only if the commission shall find or determine that the granting of such certificate is necessary or proper for the service, accommodation, convenience, or safety of the public.” 66 Pa. C.S. § 1103(a).

11. This mandate requires a utility to demonstrate a public need or demand for the proposed service, the inadequacy of existing facilities for service in the proposed service territory, and the applicant’s fitness to provide the service. *Application of Evansburg Water Co.*, 1994 Pa. PUC LEXIS 53 (Pa. PUC 1994); *Application of Newtown Artesian Water Co.*, 2003 Pa. PUC LEXIS 40, at *17 (Pa. PUC 2003); see *Seaboard Tank Lines, Inc. v. Pa. Public Utility*

Commission, 502 A.2d 762, 764 (Pa. Cmwth. Ct. 1985); *Warminster Twp. Mun. Auth. v. Pa. Pub. Util. Com.*, 138 A.2d 240, 243 (Pa. Super. Ct. 1958).¹

12. The “need” required to issue a certificate of public convenience “means a need in existence at the time of the grant of authority and one which will continue in the reasonably foreseeable future.” *Id.* at 244.

13. Similarly, section 1501 of the Public Utility Code, 66 Pa.C.S. § 1501, provides that “[e]very public utility shall ... make all such repairs, changes, alterations, substitutions, extensions, and improvements in or to such service facilities as shall be necessary or proper for the accommodation, convenience, and safety of its patrons, employees, and the public.”

14. Section 1504 gives the Commission authority to prescribe standards, regulations, and practices that public utilities must follow, as well as standards by which the services provided by utilities are measured. 66 Pa. C.S. § 1504.

15. In addition, if the Commission finds that the service or facilities of any public utility are unreasonable, unsafe, inadequate, insufficient, or otherwise in violation of Code, the Commission maintains the authority to order alternative relief, 66 Pa. C.S. § 1505(a), including the power to establish a conservation or load management program. 66 Pa. C.S. § 1505(b).

¹ Chairman Wendell Holland issued a statement requesting that the ALJ evaluate whether certain factors defined under the Energy Policy Act satisfy the requirement that the utility is necessary or proper for the public convenience. However, an evaluation of what qualifies as necessary or proper in regard to the issuance of a certificate of public convenience does not usurp the specific requirements the Commission must consider in evaluating whether to approve TrAILCo’s application to construct the transmission lines. Rather, Commission siting regulations, 52 Pa. Code. §§ 57.71-57.76, set forth detailed factors the Commission must consider and find in order to approve TrAILCo’s siting application.

16. Furthermore, the Commission has adopted regulations regarding the siting of high voltage electric transmission lines. 52 Pa. Code §§ 57.71-57.76. The Commission's regulations at 52 Pa. Code § 57.71 require prior approval before a public utility may locate and construct a high voltage (i.e., greater than 100 kV) transmission line. Section 57.72(c) delineates the information that the Commission requires a public utility to submit with its application for such approval.

17. In determining whether to approve a proposed high voltage transmission line, the Commission must make four principal findings, outlined at 52 Pa. Code § 57.76(a):

(1) That there is a need for it.

(2) That it will not create an unreasonable risk of danger to the health and safety of the public.

(3) That it is in compliance with applicable statutes and regulations providing for the protection of the natural resources of this Commonwealth.

(4) That it will have minimum adverse environmental impact, considering the electric power needs of the public, the state of available technology and the available alternatives.

52 Pa. Code § 57.76(a) (emphasis added). The Commission must establish that each criteria is present—not simply some. See *Application of Pennsylvania Power & Light Co.*, 1994 WL 932344 (Pa. P.U.C. 1994) (“In determining whether to approve a proposed high voltage transmission line, the Commission **must make four principal findings** outlined at 52 Pa. Code § 57.76(a).”) (emphasis added).

18. In considering whether an electric utility has met the above-quoted criteria, the Commission will accept evidence upon and consider the following matters pursuant to 52 Pa. Code § 57.75(e):

(1) The present and future necessity of the proposed line in furnishing service to the public.

(2) The safety of the proposed HV line.

(3) The impact and the efforts which have been and will be made to minimize the impact, if any, of the proposed HV line upon the following:

- (i) Land use.
- (ii) Soil and sedimentation.
- (iii) Plant and wildlife habitats.
- (iv) Terrain.
- (v) Hydrology.
- (vi) Landscape.
- (vii) Archaeologic areas.
- (viii) Geologic areas.
- (ix) Historic areas.
- (x) Scenic areas.
- (xi) Wilderness areas.
- (xii) Scenic rivers.

(4) The availability of reasonable alternative routes.

19. In addition to seeking siting approval of the TrAIL transmission line, TrAILCo is seeking certificates of public convenience authorizing use of the power of eminent domain to acquire the rights-of-way required to install the proposed lines. Upon application, the PUC must determine if a requested exercise of the powers of eminent domain by a public utility is “necessary or proper for the service, accommodation, convenience, or safety of the public.”

15 Pa. C.S. § 1511(c).

20. This section has been interpreted to impose upon the utility seeking to use the power of eminent domain the burden of proving that the proposed transmission line is

necessary and that, in selecting the proposed right-of-way, the utility has not acted wantonly, capriciously, or arbitrarily. *Pa. Dep't of Env'tl. Res. v. Pa. Pub. Utils. Comm'n*, 335 A.2d 860 (Pa. Cmwlth. Ct. 1975).

21. The Application does not demonstrate a need for the transmission line. In addition, the Application is not in compliance with all applicable statutes and regulations, and thus cannot be granted. The transmission line will also create an unreasonable risk of danger to the health and safety of the public and cause severe adverse environmental impacts. As a result, the Energy Conservation Council requests that the Commission deny TrAILCo's Application.

B. Washington and Greene Counties Do Not Need Imported Power.

22. TrAILCo's experts testify that there is a local need for the proposed transmission lines in Washington and Greene counties. TrAILCo also claims that the written testimony "fully supports the requested relief." Application ¶ 68. However, the Application simply indicates the experts' *conclusions* that the proposed line might be needed if at least two (2) existing transmission lines fail simultaneously. *See Hozempa Direct Testimony*, 11; *Gass Direct Testimony*, 8-10. The written testimony does not set forth the facts underlying their conclusions and thus, contrary to TrAILCo's assertions, does not fully support the requested relief.

23. None of the data allegedly supporting these conclusions is listed, mentioned, or included. "An expert may base an opinion on facts of which he has no personal knowledge *so long as those facts are supported by evidence in the record.*" *Application of LP Water & Sewer Company*, 1991 Pa. PUC LEXIS 145, at *9 (Pa. PUC 1991) (citing *Yantos v. Workmen's Comp. Appeal Bd.*, 563 A. 2d 232 (Pa. Cmwlth. Ct. 1989)) (emphasis added). "Also, an expert witness may assume facts and such assumed facts need not be conclusively proven *as*

long as the record tends to establish them.” Id. (citing Vernon v. Stash, 532 A. 2d 424 (Pa. Super. Ct. 1987)) (emphasis added).

24. Contrary to these requirements, TrAILCo’s experts’ conclusions are not established by facts or evidence in the record. TrAILCo fails to demonstrate or provide any factual support for its conclusion that there is a “need” for imported power in Washington and Greene counties.

25. For example, the Application is devoid of any assessment of expected customer growth, customer demand, peak load measurements, past or projected outages, load interruptions from normal operation, reinforcement provided by transformation capacity vs. installing the new lines, or age/expected service of life of the existing lines. *See Certification Application of Pa. Power & Light Co.*, 1994 WL 932261 (Pa. P.U.C. 1994); *Application of Pa. Elec. Co.*, 1997 Pa. PUC LEXIS 63 (Pa. P.U.C. 1997) (both discussing various factors such as customer load growth, capacity, and reliability in evaluating an applicant’s request to construct new transmission lines under the Commission’s siting regulations).

26. Because TrAILCo fails to provide any factual support or foundation for its experts’ conclusion that there is a local need to import power via the proposed transmission lines, the Energy Conservation Council requests that the Commission dismiss the Application, or in the alternative, require that TrAILCo immediately resubmit their expert testimony—including all the facts upon which the experts’ conclusions are based. The experts must set forth the foundation of their testimony with facts, supported by evidence in the record.

27. The Application does not provide any evidence of the local “need.” There is an abundance of existing generation in Washington and Greene counties that is clearly

sufficient to support local needs. Washington and Greene Counties produce an excess of electricity. There is simply no need to ship power from the south into these counties.

28. The 502 and Prexy substations are part of Allegheny Energy's long-term plans to transport power to other states. These substations are not required by any local needs—or any Pennsylvania-based needs.

29. The Commission is not at liberty to approve a Pennsylvania power line to supply regional energy concerns; the PUC must consider whether the proposed lines are supported by a local need. *See Re Pa. Power & Light Co.*, 74 Pa. P.U.C. 676, 685-86 (Pa. P.U.C. 1991); *Certification Application of Pa. Power & Light Co.*, 1994 WL 932261 (Pa. P.U.C. 1994); *Application of Pa. Elec. Co.*, 1997 Pa. PUC LEXIS 63, at *40-41 (Pa. P.U.C. 1997) (all evaluating local needs under the Commission's siting regulations); *see also Application of Newtown Artesian Water Co.*, 2003 Pa. PUC LEXIS 40 (Pa. PUC 2003) (requiring that there be a need and inadequacy of existing facilities in the locality involved to grant a certificate of public convenience).

C. The Transmission Line Creates an Unreasonable Risk of Danger to the Health and Safety of the Public.

30. The proposed transmission lines will be dangerous to the health and safety of the public. For example, the lines will expose residents and property owners to electric and magnetic fields ("EMF"). EMFs have adverse impacts on human health.

31. TrAILCo's own expert admits that several studies have indicated a statistically significant increased risk of childhood leukemia for populations living near high voltage power lines. Bailey Direct Testimony, 14. The EMFs from high voltage power lines have been characterized by experts as a possible human carcinogen. *See id.*

32. The construction of the proposed lines will also create increased air emissions and decrease the regional air quality. More specifically, the proposed lines will draw power from generation plants on the Ohio River. Western Pennsylvania's residents suffer greatly from the sulfur, nitrogen, acid rain, particulate matter, and mercury deposition from these *generation plants*.

33. Mercury is a neurotoxin, to which women of childbearing age, pregnant women, breast feeding women, and children are most vulnerable. The leading sources of mercury in Western Pennsylvania are power plants upwind of the region, including those that will feed power to TrAILCo's proposed lines. These plants do not control their mercury output because mercury is part of a "cap and trade" program that allows older, dirtier plants to buy mercury credits which allow increased emission levels that pollute the environment. *See* <http://www.fish.state.pa.us/fishpub/summary/>. Indeed, Pennsylvania is currently on a statewide *fishing consumption advisory, primarily due to the regional extent of mercury contamination* from air deposition. When rain washes mercury from the air into streams and lakes, the mercury is transformed to a highly toxic form that accumulates in fish and bioaccumulates as it moves through the food chain. Upon consumption, people are exposed to these toxins.

34. Increased particulate matter is another harmful by-product of the generation TrAILCo will use to generate power for its proposed transmission lines. Particulate matter smaller than 2.5 microns can be inhaled, causing lung cancer, emphysema, heart disease, and other life threatening ailments. The American Lung Association recently found that *particulate matter pollution was increasing in the East and concluded that the increase was linked to an increase in electricity generated by heavy polluting power plants*. *See* <http://www.lungusa.org/>. American Lung Association Chair Terri E. Weaver, PhD, RN, stated,

“The increased particle pollution in the East is a particularly troubling trend, because exposure to particle pollution cannot only take years off your life, it *can threaten your life immediately.*” See *id.* (emphasis added).

35. Similarly, these power-generation plants are a massive source of carbon dioxide—the primary cause of global warming. However, the Application fails to address the impact of increased coal-fired power on global warming and climate change.

36. TrAILCo will use herbicides to maintain the right of way it seeks to gain for the transmission lines. Again, the Application fails to fully evaluate the environmental impact of TrAILCo’s proposed actions. TrAILCo does not identify the herbicides that will be used, their application rates, solubility, or half-lives in surface and ground water, and how TrAILCo will protect against contamination of the springs and shallow wells local residents and landowners use as a drinking source.

37. TrAILCo has failed to consider the security risks inherent in implementing transmission lines of this magnitude. TrAILCo’s proposed lines will consolidate an immense amount of power through lines traversing rural areas. The open and unprotected nature of these areas makes it impossible to prevent an attack to the lines. From a state-wide and/or national perspective, the transmission lines are a potential threat to energy security and reliability. From a local perspective, the lines are a risk to public safety for landowners, visitors, tourists, and local residents who may suffer injury if the transmission lines are a target.

D. The Application Fails to Comply With Applicable Statutes and Regulations.

38. Before the Commission may approve the Application, it must evaluate whether the proposed lines are in compliance with all statutes and regulations providing for the protection of the natural resources of the Commonwealth. 52 Pa. Code §57.76(a)(3). However,

the Application does not comply with § 102(2)(C) of the National Environmental Policy Act (“NEPA”), which requires a project-specific Environmental Impact Statement. 42 U.S.C. § 4332 (requiring an environmental impact statement be prepared for all proposed major federal actions significantly affecting the quality of the environment); 40 C.F.R. § 1508.18(b) (defining major federal action to include “[a]pproval of specific projects ... Projects include actions approved by permit or other regulatory decisions as well as federal and federally assisted activities.”). FERC has approved an incentive rate increase for the project. Therefore, TrAILCo must submit an EIS to comply with NEPA. TrAILCo has failed to do so and has, therefore, failed to comply with all applicable statutes and regulations.

39. Similarly, a Programmatic EIS (“PEIS”) must be prepared at the federal level under NEPA. The Department of Energy has proposed a draft Mid-Atlantic National Interest Energy Corridor (“NIETC”). This corridor is immense and covers parts or the whole of several states. In Pennsylvania, the corridor includes 50 of its 67 counties. This federal action will require a PEIS. The PEIS must consider alternatives to the NIETC, evaluate the best solutions to manage and meet the nation’s energy needs, and review the congestion study.

E. The Transmission Line Will Have Severe Adverse Environmental Impacts.

40. As discussed above, the Application is devoid of any discussion of the inevitable regional air quality degradation and associated environmental harm that is a by-product of the coal-fired generation the transmission lines will utilize. The generation of the power the proposed lines will transmit is inextricably linked to the transmission lines at issue. As a result, TrAILCo cannot ignore the environmental impacts of increased mercury, carbon dioxide and particulate matter caused by the coal-fired generation plants it will utilize to generate

the power it transmits. These are severe environmental impacts that prevent the Commission from approving the proposed transmission line. See 52 Pa. Code §57.76(a)(4).

41. The route of the proposed lines will infiltrate the habitat of the Indiana Bat, a federally protected species. The United States Fish and Wildlife Service (“USFWS”) is responsible for administering the Endangered Species Act. David Densmore, the supervisor of the Pennsylvania Field Office for the USFWS, indicates that TrAILCo’s Application is incomplete:

The project is within the range of the Indiana Bat (*Myotis sodalist*), a species that is federally listed as endangered. Due to the potential harm to this species, we will need additional project information, including project plans and a detailed project description indicating the acreage of forest disturbance, before we can determine whether there will be any potential adverse effects to Indiana bats that might be in the project area.

Densmore Letter, AP TrAIL Route Evaluation and Environmental Report. TrAILCo has failed consider the impact of the proposed lines on this species or others that inhabit the route.

42. The herbicides TrAILCo will use to maintain the right of way it needs to construct the proposed lines may significantly impact the drinking water of local residents as well as water quality and terrestrial and aquatic life. The Application does not adequately assess these risks.

43. In addition, the Application does not sufficiently address the adverse environmental impact of the transmission lines on local wetlands. Rather, the Application relies on the National Wetlands Inventory (NWI) for an inventory of wetlands. However, the NWI is notorious for underestimating forested wetlands, and most wetlands in Western PA are small, forested wetlands. The Commission should require TrAILCo to determine the existence and extent of local wetlands and other vulnerable water bodies (e.g. springs) through the use of field surveys along the proposed route and rights of way.

44. Similarly, TrAILCo used the National Hydrography Dataset ("NHD") to determine the amount of streams and rivers potentially impacted by the proposed transmission. However, the NHD uses a 1:100,000 scale mapping which severely underestimates the amount of streams in the area. Rather, a 1:24,000 scale dataset, not the 1:100,000 scale dataset, provides a more accurate measure. For example, there are approximately 50,000 stream miles in Pennsylvania using the 1:100,000 scale mapping. Conversely, when PADEP used the 1:24,000 scale mapping, the total number of stream miles increased to over 80,000 miles.

45. In evaluating a siting application, the Commission will accept evidence upon and consider the impact and the efforts which have been and will be made to minimize the impact of the proposed line upon archaeological areas. 52 Pa. Code § 57.75(e)(3)(vii). In its Application, TrAILCo developed a GIS layer from the Cultural Resources Geographic Information System (CRGIS), but the report does not indicate that many archeological sites would be impacted. See Table 2-3 of the Route Evaluation and Environmental Report. TrAILCo indicates that only five "cultural resources" (all historic buildings) are in the vicinity of the proposed route. Section 4.8.2 of the Route Evaluation and Environment Report.

46. This report is inaccurate. TrAILCo's contractor apparently only considered historic buildings on the National Register as the only "cultural resources" of value. However, the proposed route for the transmission lines is an area rich with history, dating back to Paleo-Indian times (12,500 to 10,000 years before present) and extending forward in time to the French and Indian War. TrAILCo has failed to survey the entire project line for archeological sites and has done nothing to minimize the impact to these areas should the project be approved.

47. TrAILCo has also failed to consider reasonable alternatives. In determining whether to approve a proposed high voltage transmission line, the Commission must

find that the line “will have minimum adverse environmental impact, considering . . . the available alternatives.” 52 Pa. Code § 57.76(a)(4); see 52 Pa. Code § 57.57 (e)(4). TrAILCo has failed to demonstrate that there are no reasonable alternatives. Moreover, federal law requires that TrAILCo make a project-specific Environmental Impact Statement. See 42 U.S.C. § 4332; 40 C.F.R. § 1508.18(b). Because FERC has already approved an incentive rate increase for the project, an EIS must include a study of all possible alternatives, including a complete analysis and characterization of the supposed need for the lines, and alternatives to meet that need, if a need is demonstrated. Currently, the Application includes a “Route Evaluation Report and Environmental Report” which is inadequate to meet these requirements; the report does not comprehensively address the environmental, historical and cultural impacts, nor does it set forth a study of alternatives to the proposed line.

F. The Commission Cannot Approve TrAILCo’s Request to Use a Fiber Optic Cable.

48. The Application indicates that TrAILCo will include a fiber optic cable along the transmission line towers to help manage the lines. Bodenschatz Direct Testimony, 21. However, by law, the transmission lines cannot be used for anything but the transmission of power. Therefore, TrAILCo cannot market or use the fiber optic cable for other communication means, such as cable or the internet. The Application does not address this limitation and the Commission cannot approve TrAILCo’s request as stated.

G. TrAILCo Must Seek Commission Approval of its Affiliate Agreements.

49. Pursuant to Section 2101 *et seq.* of the Public Utility Code, TrAILCo must file for written approval by the Commission of *any* contract or other arrangement for management, supervisory, construction, or other services entered into between a public utility and any affiliated interest. 66 Pa. C.S. § 2102.

50. TrAILCo admits that its proposed project will require TrAILCo and one or more affiliates to enter into certain arrangements subject to Commission approval under Section 2102. Application ¶¶ 56, 61.

51. If the Commission grants TrAILCo the certificate of public convenience it seeks—which it should not do—TrAILCo will become a regulated public utility within the prescript of section 2102.

52. As a result, the Commission should evaluate TrAILCo's affiliate agreements concurrently with the instant Application.

53. In addition, TrAILCo asserts that it intends to acquire certain easements held by its affiliate West Penn for nearly \$4.5 million. Application ¶ 57.

54. In 1996, West Penn expensed these easements and TrAILCo claims that the costs associated with this expense are not "currently reflected in West Penn's retail rates." *Id.*

55. However, TrAILCo does not state that such costs have never been reflected in West Penn's rates. If the expensed easement costs were reflected in increased rates for local ratepayers, the \$4.5 million transfer costs West Penn will acquire from TrAILCo must be used to reimburse ratepayers for the costs recovered against them. Any transfer without such reimbursement is inappropriate.

56. The Commission should thus inquire into this particular affiliate arrangement to ensure appropriate reimbursement to local ratepayers. The Commission should also require TrAILCo to file for written Commission approval of TrAILCo's remaining affiliate agreements to ensure that these arrangements are reasonable and consistent with the public interest. 66 Pa. C.S. § 2102(b).

H. TrAILCo is Not Exempt from Municipal Zoning Regulations.

57. The areas in which TrAILCo seeks to locate and construct the proposed transmission lines fall within many townships and counties, each of which has its own zoning regulations. Application ¶ 47.

58. Municipal Planning Code, 53 P.S. § 10619 provides for an exemption from municipal zoning regulations for any proposed building of a public utility, where the Commission finds, by substantial evidence, that the present or proposed situation of the building in question is reasonably necessary for the convenience or welfare of the public. *See Delaware Unlimited, Inc. v. Pa. P.U.C.*, 513 A.2d 593 (Pa. Cmwlth. Ct. 1986).

59. In its request for exemption, TrAILCo seeks exemption from local zoning regulation for the Prexy Substation, the 502 Substation, and related buildings and facilities. However, TrAILCo fails to demonstrate any specific reason for which it needs such an exemption. *See* Application ¶¶ 46-49.

60. As a result, the Commission should deny TrAILCo's requested exemption because TrAILCo has not shown, by "substantial evidence," that the proposed site of the Substations and related buildings are reasonably necessary for the convenience or welfare of the public.

WHEREFORE, for all the reasons stated herein, the Energy Conservation Council respectfully requests that the Pennsylvania Public Utility Commission:

A. Prior to placing any burden on other parties to produce evidence, require TrAILCo to file additional supportive information and testimony to support the following conclusions:

(1) there is a local need in Washington and Greene counties for the proposed lines;

(2) the project will not create an unreasonable risk to the health and safety of the public;

(3) TrAILCo is in compliance with all applicable regulations and statutes, including the National Environmental Policy Act;

(4) the lines will not unreasonably harm the environment; and

(5) that there are no reasonable alternatives.

B. Provide ample time for the review of the Application, including time to perform thorough discovery, including depositions.

C. Fully evaluate TRAILCo's application on the merits, including a thorough evaluation of:

(1) Potential damage to the environment;

(2) Potential harm to the health and safety of the public;

(3) Potential increases in local and regional air pollution;

(4) The effects of the application on electric rates and costs;

(5) Whether TrAILCo is in compliance with all applicable regulations and statutes, including the National Environmental Policy Act; and

(6) Whether the transmission line is necessary to meet local energy demands of Washington and Greene Counties (or of Pennsylvania residents and business in general).

D. Review TrAILCo's affiliate arrangements for Commission approval pursuant to Section 2101 *et seq.* of the Public Utility Code

E. Find that TrAILCo is not exempt from the authority of the municipal zoning boards under Municipal Planning Code, 53 P.S. § 10619; and

F. Deny and dismiss TrAILCo's Application to the extent that it is not supported by substantial evidence;

G. Order alternative relief, including requiring TrAILCo to establish a conservation or load management program pursuant to 66 Pa. C.S. § 1505;

H. Order such other relief as the Commission deems appropriate after performing a thorough review of the Application.

Dated: May 25, 2007

Respectfully Submitted,

Willard R. Burns, PA ID #39560

Enclosure
cc: all parties record

ORIGINAL

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

IN RE: APPLICATION OF : Docket Nos. A-110172,
TRANS-ALLEGHENY INTERSTATE : A-1107172F0002-F0004,
LINE COMPANY (TRAIL) : and G-00071229

**PROTEST OF THE
OFFICE OF CONSUMER ADVOCATE**

RECEIVED

MAY 25 2007

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

The Pennsylvania Office of Consumer Advocate ("OCA") files this Protest, pursuant to the 71 P.S. Section 310-1, *et seq.*, the Rules of Practice and Procedure of the Pennsylvania Public Utility Commission ("PUC" or "Commission"), 52 Pa. Code Section 5.51 and in accordance with the Notice published at 38 Pennsylvania Bulletin 2058 on April 28, 2007.

On April 13, 2007, Trans-Allegheny Interstate Line Company (TrAILCo or Company) filed the above-captioned Application for a Certificate of Public convenience to construct and operate portions of the Trans-Allegheny Interstate Line (TrAIL) in Southwestern Pennsylvania. On May 3, 2007, the OCA responded by submitting a Notice of Intervention and Public Statement.

In support of this Protest, the OCA provides the following additional information:

1. The Protestant is Irwin A. Popowsky, Consumer Advocate of Pennsylvania, who is authorized by law to represent the interests of Pennsylvania's utility consumers in all matters before the Commission, pursuant to 71 P.S. Section 309-2, *et seq.*

2. The Protestant's attorneys for the purpose of receiving service of all documents in this proceeding are Dianne E. Dusman, Senior Assistant Consumer Advocate, and Darryl A. Lawrence, Christy M. Appleby, and Jennedy E. Santolla, Assistant Consumer Advocates, Office

**DOCUMENT
FOLDER**

1

DOCKETED
MAY 30 2007

of Consumer Advocate, 555 Walnut Street, 5th Floor, Forum Place, Harrisburg, Pennsylvania 17101-1923.

3. Under the five-year PJM-approved regional expansion plan (RTEP), Allegheny Power and its affiliates were designated to build and operate the TrAIL facilities, conditioned upon receipt of any required regulatory approvals and permits, including PUC approval of the portion of the facilities located in Pennsylvania. The OCA submits this Protest to ensure that the interests of the Allegheny Power customers are protected in this proceeding.

4. The TrAIL facilities fall within the draft Mid-Atlantic National Corridor promulgated by the United States Department of Energy and may, therefore, be designated to be within a National Interest Electric Transmission Corridor (NIETC). If the TrAIL facilities do fall within an approved NIETC, the Federal Energy Regulatory Commission (FERC) will have jurisdiction to issue a permit to construct TrAIL if the Commission has withheld approval of the line for more than one year or has conditioned its approval in a manner that “will not significantly reduce transmission congestion in interstate commerce or is not economically feasible.” 16 U.S.C.S. § 824p(b)(1)(C)(i)-(ii).

5. Currently, the PUC has jurisdiction over the siting of the Pennsylvania portion of TrAIL and the Application must be examined pursuant to 52 Pa. Code Sections 57.71-57.77.

6. The PUC may not grant the Application to approve the line in question, unless it finds:

- (1) That there is a need for it;
- (2) That it will not create an unreasonable risk of danger to the health and safety of the public;
- (3) That it is in compliance with applicable statutes and regulations providing for the protection of the natural resources of this Commonwealth, and

(4) That it will have minimum adverse environmental impact, considering the electric power needs of the public, the state of available technology and the available alternatives.

52 Pa. Code § 57.76. The OCA submits that the Commission must determine whether TrAIL is necessary and must examine its potential adverse impact on the residents of the area and the environment as compared with the improved reliability and economic benefit that may result for electric customers. Chairman Wendell F. Holland expressed this need for balancing of the countervailing interests at the April 24, 2007 PUC Public Meeting, when he stated that there are a number of public interest concerns which must be resolved regarding the TrAIL Application. Application of Trans-Allegheny Interstate Line Co., Docket Nos. A-110172, *et seq.*, Secretarial Letter of April 25, 2017. The Application also raises issues of transmission planning and development and impacts upon reliability. The Commission must answer the threshold questions of whether the proposed line is needed to meet local, state or regional needs, whether the line is appropriately sited and sized and whether the Applicant has sufficiently explored alternatives to the proposed line.

7. The Application must also be examined pursuant to Sections 1102 and 1103 of the Public Utility Code, 66 Pa.C.S. §1102-1103.

8. Section 1102 of the Public Utility Code requires that the Commission issue a Certificate of Public Convenience as a legal prerequisite to offering service, abandoning service and certain property transfers by public utilities or their affiliated interests. 66 Pa.C.S. §1102(a)(1)-(3).

9. Section 1103 explicitly allows the Commission to impose conditions upon the issuance of a Certificate of Public Convenience. Section 1103 of the Code provides:

A certificate of public convenience shall be granted by order of the commission, only if the commission shall find or determine that the granting of such certificate

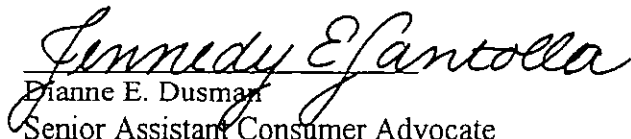

is necessary or proper for the service, accommodation, convenience, or safety of the public. The commission, in granting such certificate, may impose such conditions as it may deem to be just and reasonable.

66 Pa.C.S. §1103(a). The OCA submits that the Commission should consider the imposition of conditions in order to ensure that the public interest standard is met and that the interests of consumers are protected.

10. The Company's request should also be subject to thorough formal investigation and evidentiary hearings. The Commission should allow for notice and opportunity to be heard for all affected parties, including public input hearings throughout the areas affected by this Application. TrAILCo has the burden of proof in a matter in which the Company is seeking a certificate of public convenience and the written testimony submitted in support of its request should be subject to cross-examination by the parties.

WHEREFORE, the Office of Consumer Advocate requests that the Pennsylvania Public Utility Commission investigate and decide the Application, impose conditions if supported by the evidentiary record, and take such other actions as are found to be appropriate under the circumstances.

Respectfully submitted,

Dianne E. Dusman

PROTEST OF WESTLITE PARTNERS

AND NOW, comes the protestor, Westlite Partners ("Westlite"), by and through their attorney, William R. Miller, Esquire, and files this Protest to the Application (the "Application") of Trans-Allegheny Interstate Line Company ("TrAILCO"), averring as follows:

1. Westlite is a limited partnership organized under the law of the Commonwealth of Pennsylvania.

2. Westlite's mailing address is: Westlite Partners, c/o Mosites Development Company, 4839 Campbells Run Road, Pittsburgh, Pennsylvania 15205.

3. The individual making this submission is Westlite's attorney, William R. Miller, Esquire.

4. Notices, correspondence, or other communications with respect to this Protest should be address to the undersigned counsel as follows: William R. Miller, Esquire, P. O. Box 385, Hickory, Pennsylvania 15340.

5. TrAILCO filed the Application with the Pennsylvania Public Utility Commission (the "Commission") on or about April 13, 2007.

6. TrAILCO mailed to Westlite a Notice of Application Filing stating, *inter alia*, that any protest must be filed on or before May 29, 2007, at Docket Nos. A-110172, A-110172F0002, A-110172F0003, A-110172F0004, and G-00071229.

7. Westlite owns real property ("Westlite's Property") situate in the Township of North Strabane, Washington County, Pennsylvania, proximate to the intersection of Interstate Route 79 and Racetrack Road, being part of the premises conveyed to Westlite by deed from the Washington County Industrial Development Authority, dated November 26, 2003, and of record at Instrument No. 200352393 in the Office of the Recorder of Deeds of Washington County, Pennsylvania.

8. Westlite is in the business of owning and leasing Westlite's Property.

9. Development of land and demand for land in the area of Westlite's Property has increased recently as a consequence of the installation of slot machines at the Meadows Racetrack and the proposed Tanger Outlets, both of which are located near Westlite's Property.

10. Based on Westlite's representative's review of maps which TrAILCO has published on TrAILCO's web site and maps which TrAILCO has made available for public inspection at The Greater Canonsburg Public Library and on Westlite's representative's telephonic discussion with a TrAILCO representative on May 23, 2007, Westlite understands that the relief which TrAILCO requests in the Application affects Westlite and Westlite's Property.

11. The maps referenced in Paragraph No. 10 above and the Application are deficient in their failure to set forth a survey of the alignment and elevations of the infrastructure that TrAILCO proposes to erect on Westlite's Property (the "**Alignment and Elevations**").

12. Based on Westlite's representative's telephonic discussion with a TrAILCO representative on May 23, 2007, Westlite understands that TrAILCO has not, as of that date, determined the Alignment and Elevations.

13. Until TrAILCO designs the Alignment and Elevations, neither Westlite nor the Commission has sufficient information to evaluate whether the Application is reasonable (for example: TrAILCO could unreasonably infringe on Westlite's rights and interests if TrAILCO designs the infrastructure with an alignment through the middle of Westlite's Property and thereby ignores a commercially reasonable alternative closer to the boundary of Westlite's Property).

14. Westlite desires to work with TrAILCO to establish Alignment and Elevations which meet both parties' interests.

15. Westlite objects to:

15.1. the lack of specifics in the Application regarding Alignment and Elevations.

15.2. the absence of any procedure set forth in the Application which would protect Westlite's rights and interests in the event that TrAILCO does not act reasonably when it designs the Alignment and Elevations.

15.3. the request for an exemption from municipal laws, the application of which would provide a forum for Westlite to voice their concerns regarding TrAILCO's development plans following TrAILCO's design of the Alignment and Elevations.

WHEREFORE, Westlite respectfully objects to the Commission's approval of the Application.

Respectfully submitted,

Date: May 29, 2007

SECRETARY'S BUREAU

2007 MAY 29 PM 2:42

**PROTEST OF
REPRESENTATIVE H. WILLIAM DeWEESE**

Representative H. William DeWeese files this Protest, pursuant to the Rules of Practice and Procedure of the Pennsylvania Public Utility Commission (Commission), 52 Pa.Code § 5.51, and in accordance with the public notice published in the Pennsylvania Bulletin on April 28, 2007, 37 Pa.B. 2058, relating to transmission lines.

The Trans-Allegheny Interstate Line Company (TrAILCo or applicant) filed the above captioned application with the Commission on April 13, 2007, for a certificate of

public convenience for approval to locate, construct, and operate segments of the Trans-Allegheny Interstate Line (TrAIL project) in Southwestern Pennsylvania, specifically in Greene and Washington Counties. Representative DeWeese initially submitted comments to the Commission regarding the TrAIL project in February 2007, prior to the filing of the above captioned application. That letter has been or will be forwarded to the Secretary's Bureau for inclusion in the public comment folder.

As a follow-up to the February 2007 communication, Representative DeWeese proffers the following comments in support of this Protest:

1. The Protestant, H. William DeWeese, is Majority Leader of the Pennsylvania House of Representatives and the duly elected State Legislator for the 50th Legislative District, which encompasses all of Greene County and parts of Washington and Fayette Counties in Southwestern Pennsylvania. As such, it is Representative DeWeese's duty of office to assure that the TrAIL project is in the public interest and will provide a public benefit to his constituents of the 50th Legislative District. The proposed 502 Junction Segment of the TrAIL project will be located entirely in the 50th Legislative District and a portion of the proposed Prexy Segment will traverse that Legislative District in Greene County.

2. In its 2006 Regional Transmission Plan (RTEP), The PJM Interconnection, L.L.C. (PJM) approved a five-year transmission expansion program and designated Allegheny Power and its affiliates, West Penn Power (Pennsylvania), Monongahela Power Company (West Virginia), and the Potomac Edison Company (Maryland, Virginia, and West Virginia), to construct of a new 500kV, 210 mile transmission line and related facilities, which would extend from Southwestern Pennsylvania, traverse

parts of West Virginia, and end in Northern Virginia. Construction of the transmission line is conditioned upon receipt of state authorization and the issuance of the necessary permits and certificates from the relevant state's, including the Commission.

Representative DeWeese submits this Protest to assure that the interest of his constituents in the 50th Legislative District who could be personally and adversely impacted by the TrAIL project are protected.

3. Employees of the Protestant designated to receive service of all documents in this proceeding are Audrey P. Powell, Policy Director to the Majority Leader, and Tara L. Smith, Esq., Legal Counsel, 110 Main Capitol Building, P. O. Box 202050, Harrisburg, Pennsylvania 17120-2050.

4. In its March 6, 2006, comments to the United States Department of Energy for early designation of the TrAIL project as a National Interest Electric Transmission Corridor (NIETC), Allegheny Power (AP) revealed that the TrAIL project "will be constructed by one or more of the three AP operating companies, or a subsidiary of Allegheny Energy, the parent of the AP operating companies" (Comments and Request of Allegheny Power for Early Designation of National Interest Electric Transmission Corridor, Attachment A note 3, page 2)

5. The TrAILCo was incorporated in the State of Maryland and in the Commonwealth of Virginia in October 2206 by Allegheny Energy to locate, construct, operate, and maintain the TrAIL project.

6. The TrAILCo is not authorized to do business as a public utility in the Commonwealth of Pennsylvania and must secure a certificate of public convenience from the Commission pursuant to the Pennsylvania Public Utility Code, 66 Pa.C.S. § 1101 et

seq., to engage in or provide electric utility service in this Commonwealth. Section 1103(a) of the Pennsylvania Public Utility Code (PUC code) stipulates that:

A certificate of public convenience shall be granted by order of the commission only if the commission shall find or determine that granting of the certificate is necessary and proper for the for the service, accommodation, convenience or safety of the public. The commission in granting such certificate may impose such conditions as it may deem to be just and reasonable.

(66 Pa.C.S. § 1103(a)) Representative DeWeese submits that the Commission must determine whether the TrAIL project, for which the TrAILCo seeks a certificate of public convenience to do business as a public utility in the Commonwealth of Pennsylvania, is “necessary and proper” for the *service, accommodation, convenience or safety of the public*” in Greene and Washington Counties, and whether the project is in the public interest and will provide a public benefit to Representative DeWeese’s constituents who will be personally and adversely impacted by the TrAIL project. 66 Pa.C.S. § 1103(a) (emphasis added).

7. The PUC Code further directs the Commission to hold public hearings for the purpose of making inquires, physical examinations, valuations, and investigations as may be necessary to enable it to find and determine whether a certificate of public convenience should be granted 66Pa.C.S. § 1103(b). Representative DeWeese submits that the nature of the TrAIL project may warrant several public hearings pursuant to 66 Pa.C.S § 1103(b) to enable it to reach a finding or determination which would be in the public interest.

8. On March 6, 2006, AP filed comments with the United States Department of Energy (DOE) seeking early designation of the TrAIL project as a National Interest Electric Transmission Corridor or national corridor. The Energy Policy Act of 2005

(EPact) gave the DOE the authority to designate NIETCs in any geographic area experiencing electric transmission constraints or congestion that adversely affects consumers.

9. The EPact further gives the Federal Energy Regulatory Commission (FERC) the authority to issue permits for the construction of transmission facilities in a NIETC if a state in which the transmission facility is to be located (1) has “withheld approval for more than one year” after the filing of an application or designation as a NIETC, whichever is later; (2) has conditioned approval so that the proposed construction or modification would not be economically feasible or significantly reduce transmission congestion; or (3) where the state does not have the authority either to approve the siting of the facility or the interstate benefits expected to be achieved by the construction or modification. Energy Policy Act of 2005, Pub.L. No. 109-58 § 1221, 119 Stat.594 (2005). The FERC has further determined that it may issue a permit for the construction or modification of transmission facilities if an applicant for a permit is a transmitting utility under the EPact but does not qualify to apply for a permit or siting approval for the proposed project in a state because the applicant does not serve customers in the state.

10. In April 2007, the DOE issued its draft National Interest Electric Transmission Corridors, including the Mid-Atlantic National Corridor, for public comment. The TrAILCo does not hold a certificate of public convenience in the Commonwealth of Pennsylvania and the TrAIL project may be situated within the geographic boundaries of the draft Mid-Atlantic National Corridor, and, the FERC, therefore, could assume permitting authority over the project. It may be prudent for the Commission to determine the nature of AP’s business decision which resulted in the

formation of the TrAILCo and its subsequent incorporation in the State of Maryland and the Commonwealth of Virginia.

11. As outlined in Commission regulations governing the approval and location of transmission lines, the Commission will not grant an for the location and construction of a transmission line unless it finds (1) that there is a need for it; (2) that it will not create an unreasonable risk of danger to the health and safety of the public; (3) that it is in compliance with applicable statues and regulations providing for the protection of the natural resources of this Commonwealth; (4) that it will have minimum adverse environmental impact, considering the electric power needs of the public, the state of available technology and the available alternatives 52 Pa.Code § 57.76. Representative DeWeese submits that the Commission must find and determine whether the TrAIL project would promote long-term electric reliability in Greene and Washington Counties, and whether reasonable alternatives and new technologies, which would not have the accompanying adverse environmental, public health, security, safety, quality of life, land development, and land use impacts, would be more appropriate. Representative DeWeese submits that the Commission should convene a series of public input hearings in the political subdivisions of Greene and Washington County which will be adversely impacted by the TrAIL project. It is further suggested that the TrAILCo's application be subject to a formal and full investigation and evidentiary hearings, with notice and opportunity for affected parties to be heard.

WHEREFORE, Representative H. William DeWeese request that, pursuant to its authority under the Pennsylvania Public Utility Code, the Commission investigate fully the above captioned application, convene public hearings, including public input hearings the localities of Greene and Washington Counties which will be adversely impacted, and initiate or take any other activities as it may deem necessary and appropriate to make its findings and determinations in this matter.

Respectfully submitted,

ORIGINAL

PETITION TO INTERVENE OF
COLUMBIA GAS TRANSMISSION CORPORATION
AND COLUMBIA GAS OF PENNSYLVANIA, INC.

Columbia Gas Transmission Corporation ("Columbia") and Columbia Gas of Pennsylvania, Inc. ("CPA") respectfully submit this Petition to Intervene in the above-referenced proceeding pursuant to 52 Pa. Code § 5.71 (2007). Columbia and CPA are collectively referred to in this Petition as the "Applicants."

I.

IDENTIFICATION OF THE APPLICANTS

Columbia is an interstate natural gas transmission and gas storage company subject to the jurisdiction of the Federal Energy Regulatory Commission ("FERC") under the Natural Gas Act ("NGA") and pursuant to the mandates of the Federal Department of Transportation ("DOT"). Columbia operates facilities in Delaware, Kentucky, Maryland, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia and West Virginia. CPA is an intrastate natural gas distribution corporation serving more than 410,000 customers in 452

DOCUMENT
FOLDER

MAY 31 2007

communities and 26 counties in Pennsylvania, including Washington County and Greene County through which the above-captioned project is proposed. CPA is subject to the jurisdiction of the Pennsylvania Public Utilities Commission (“PUC”).

II.

BACKGROUND

Trans-Allegheny Intestate Line Company (“TrAILCo”) has filed an application (“Application”) for the Commission’s issuance to TrAILCo of a Certificate of Public Convenience (“Certificate”) for the construction of a new 500/138 kilovolt (“kV”) substation in Washington County, Pennsylvania (the “Prexy Substation”), a new 500 kV substation in Greene County, Pennsylvania (the “502 Junction Substation”), a new 500 kV transmission line to connect the Prexy and 502 Junction Substations, three new 138 kV transmission lines with double circuit construction from the Prexy Substation to connect with existing transmission lines of West Penn Power Company, and a new 500 kV transmission line in Pennsylvania from the 502 Junction Substation to the Pennsylvania-West Virginia state line (the “Proposed Project”). According to TrAILCo’s application in this proceeding, many of the new electric transmission lines would be constructed parallel to and/or crossing Columbia’s high pressure transmission gas pipelines and CPA’s high pressure transmission and distribution gas pipelines.

Although Columbia and CPA will most likely be found to have their respective *facilities in the path of the Proposed Project, each laid, maintained and operated pursuant to validly-held land rights*, neither Columbia nor CPA are found on the list of interested parties with vested land rights included on the Service of Process in this action. As more fully stated below, Columbia and CPA should be permitted to intervene in this action to fully protect their respective rights, to preserve any objections, to have a place at the table to negotiate for

placement of the Proposed Project to promote the safe and efficient use of their natural gas pipeline facilities.

III.

STATEMENT OF ELIGIBILITY, FACTS AND GROUNDS FOR APPLICANTS' PETITION TO INTERVENE

Applicants are eligible to file their joint Petition to Intervene pursuant to 52 Pa. Code § 5.72. Applicants believe their intervention is necessary and appropriate to the proceeding at hand as Applicants may be directly and indirectly affected by the Application and their respective interests are not adequately represented by existing participants, and Applicants may be bound by the action of the Commission in the proceeding. In addition, Applicants' participation will likely be in the public interest as to health, safety and welfare thereof.

A. Possible Interference with Safe and Efficient Operation of Applicants' Natural Gas Pipeline Facilities by Electric Currents Emitted by the Proposed Project

Because TrAILCo proposes to construct many of the new electric transmission lines in the vicinity of Columbia and CPA facilities, Applicants are intervening in this proceeding to express their concern that, unless the Commission allows for Applicants' input regarding potential safety concerns and potential loss of reliable natural gas delivery to customers as to their natural gas pipelines, the Proposed Project may be harmful to the safe and reliable operation of the Applicants' natural gas facilities. Although the TrAILCo Application does not specify in its body or informational packet whether the proposed current to be carried by the Proposed Project will be AC, DC or AC above ground with DC below, the potential effects of either and/or both of these voltages should be investigated and any potential adverse impact mitigated with Applicants' input. The Applicants stress to the Commission that TrAILCo must include

mutually-acceptable, multi-faceted engineering accommodations in any Certificate issued for the construction of the Proposed Project.

Applicants note that, while impacts to residents, the environment, wetlands, etc., are set forth in the testimony and informational portions of TrAILCo's Application, nowhere is there an in-depth discussion related to potential impact on other utilities in the path of the Proposed Project. The United States Department of Transportation ("DOT"), Pipeline and Hazardous Materials Safety Administration ("PHMSA") Office of Pipeline Safety ("OPS") recognizes potential health and safety concerns related to the proximity of natural gas pipeline systems and high voltage electric transmission lines. In an Advisory Bulletin (ADB-03-06), OPS issued an advisory to operators of natural gas transmission pipelines (and hazardous liquid pipelines) following the discovery of unexpected corrosion on a newly constructed transmission line. It found that corrosion "due to stray current is most often found on pipelines . . . that follow overhead electric transmission lines" and directs that the operator should give specific attention to the physical location of the natural gas pipeline and its proximity to electrical transmission lines, underground facilities, and other possible contributors to accelerated corrosion.

This directive likely was prompted by the DOT's minimum safety standards promulgated to ensure pipeline safety, the applicable portion of which standards are found in 49 CFR 192.467, which Subpart is entitled "Requirements for Corrosion Control." Specifically, subparagraph (f) provides:

"(w)here a pipeline is located in close proximity to electrical transmission tower footings, ground cables or counterpoise, or in other areas where fault currents or unusual risk of lightning may be anticipated, it must be provided with protection against damage due to fault currents or lightning, and protective measures must also be taken at insulating devices."

Particularly with respect to Columbia, this is a serious concern, not only because Columbia is subject to DOT regulations and directives, but also Columbia has invested significant sums and

technology in its cathodic protection system throughout its transmission pipelines which generally runs on DC current. The purpose of cathodic protection is to emit a constant low charge along its lines to stave off the natural tendency of steel pipelines to corrode. Interruption of cathodic protection not only wastes Columbia's investment, but, as stated above, could accelerate corrosion rendering the pipelines less efficient in the long run and impeding Columbia's existing maintenance and replacement plans as to the same.

With respect to both CPA and Columbia, any potential electric charge on its pipelines creates a safety hazard for its employees, contractors and subcontractors. Applicants need to be able to respond to any emergency in a timely manner without the worry of electrocution by anchors, grounding, etc. which is generally present near electric transmission towers. Moreover, any potential leak of natural gas from either distribution lines or transmission lines should not have the increased danger of a potential ignition source in the vicinity. The ability to quickly maintain, repair and/or replace portions of the Applicants' respective lines when necessary, minimizes the safety risks to Applicants' personnel as well as to landowners, first responders and other third parties. Less critical, but important nonetheless, is Applicants' ability to minimize duration of interruption of natural gas transmission and/or distribution, especially during the high usage winter months, ensuring continued provision of gas service to homes, businesses, schools, hospitals, etc. upon demand in Washington and Greene Counties, Pennsylvania.

Applicants note further that the Public Service Commission for the State of New York ("NY PSC") has recognized the danger to gas pipelines situated in the immediate vicinity of alternating current electric transmission facilities, and it noted that AC transmission lines can induce voltages on parallel pipelines that would require the pipeline to monitor and take curative measures to prevent the possibility of electric shock hazard on its pipelines and facilities.

Moreover, stray DC voltage, like those produced by ground faults and leakage currents, may also affect the operation of Applicant Columbia's cathodic protection. These effects must also be investigated and mitigated.

Columbia, along with another party not related to the present action, recently raised similar issues before the NY PSC in its "Application to Intervene," Case No. 06-T-0650. Therein, the New York Regional Interconnect, Inc. ("NYRI") applied for a Certificate of Environmental Compatibility and Public Need with NY PSC. NYRI's request was for a 120 mile High Voltage Direct Current Transmission line which would run essentially parallel to Columbia's existing Line A-5. Although NYRI's request is still pending, Columbia's "Application to Intervene" was granted.

**B. Potential Loss of Applicants' Rights of Way, Easements,
Leases and Other Validly Held Land Rights may Interfere with
Safe and Effective Operation of Applicants' Natural Gas Pipeline Facilities**

Because TrAILCo proposes to construct many of the new electric transmission lines in the vicinity of Columbia and CPA rights of way, easements, leases and other validly-held land rights, Applicants seek to intervene in this proceeding to express their concern that, unless the Commission allows Applicants to address the potential impact on such land rights, Applicants may lose their ability to safely and efficiently operate their respective natural gas pipeline facilities and the improvements, fixtures and appurtenances thereto. Columbia Gas and CPA each maintain and protect their separately held land rights for their respective facilities. Many of these land rights have provisions which provide for additional lines, relocation rights and upsize rights, among others, which are frequently utilized to upgrade, repair, replace, maintain, reroute and remove and/or abandon said pipelines. These rights are integral in the safe and reliable transmission and distribution of natural gas to fulfill Applicants' contractual obligations. Any

eminent domain action by TrAILCo with respect to the Proposed Project would seriously impede Applicants' ability to repair their respective lines and appurtenances, when necessary, and to respond to their respective customers request for increased gas service or continued gas service during peak natural gas consumption months.

Moreover, in many locations, Applicants have specific rights or additional rights related to the use of their respective facilities. Applicants have obtained and maintained rights for regulator stations, above-ground valve settings, and, in the case of Columbia, cathodic protection sites, among other specific rights, which are vital to the safe and efficient provision of natural gas throughout Washington and Greene Counties, Pennsylvania. Unfettered right of eminent domain action by TrAILCo with respect to the Proposed Project would impede Applicants' ability to maintain the rights with the sites they have effectuated and would effectively remove the rights they haven't yet exercised.

As previously noted, neither Columbia nor CPA appear on the Service of Process list for this action. As their respective rights have not been recognized during this the preliminary stages, neither Columbia nor CPA presently have any assurance that their rights in properties potentially impacted by the Proposed Project would be recognized. In light of the complexity of the issues at hand and the vagueness of engineering considerations and discussion of impact on Applicants' gas pipeline facilities, Applicants recommend that the Commission conduct at least one prehearing technical conference, as provided by 52 Pa. Code § 5.222, to permit the parties to investigate these issues. In addition, Applicants would likely need discovery from TrAILCo as to additional information regarding matters either peripherally addressed or not addressed at all in the Application.

V.

CONCLUSION AND PRAYER FOR GRANT OF LEAVE TO INTERVENE

For the foregoing reasons, Applicants Columbia Gas of Pennsylvania, Inc. and Columbia Gas Transmission Corporation respectful move this Commission to:

- (1) grant Applicants leave to intervene and participate fully in this proceeding in order to represent and protect their respective interests;
- (2) investigate the extent to which TrAILCo should be required to take mitigation measures or to compensate Applicants for taking their respective mitigation measures to ensure that TrAILCo's Proposed Project will not pose a threat to the safe and efficient transmission and distribution of natural gas services through their facilities located within the boundaries of the Proposed Project or impacted thereby;
- (3) protect the Applicants' land rights, however held, from interference by any grant of eminent domain powers or other authority by which such rights may be impacted or, in the alternative, to compensate Applicants for any additional land rights or any relocation made necessary by TrAILCo's Proposed Project;
- (4) include in any Certificate issued in this proceeding a provision requiring TrAILCo:
 - (a) to enter into agreements with Applicants specifying the mitigation measures and operating procedures required for the safe and reliable

- operation of TrAILCo's lines and Applicants' pipelines and requiring TrAILCo to pay all costs incurred by Applicants in performing their responsibilities under any of the agreements and as to Applicants contractual, legal and equitable requirements as to any third parties including, but not limited to local, state and federal entities of competent jurisdiction; and
- (b) to the extent that mitigation and/or remediation measures are *ineffective or uneconomic*, to require TrAILCo to obtain alternative land rights for its Proposed project; and
- (5) to require to be held at least one prehearing technical conference to permit the parties to investigate the issues presented herein and require that TrAILCo amend its Application if the findings therein merit such amendment; and
- (6) retain continuing jurisdiction to resolve any future disputes which may arise concerning interpretation or enforcement of these Certificate provisions.

Respectfully submitted:

PETITION TO INTERVENE

AND NOW this 29th day of May, 2007, comes the Commonwealth of Pennsylvania, Pennsylvania Game Commission, (hereinafter, PGC), by and through its Assistant Counsel, and makes this Petition to Intervene as follows:

1. The PGC is an independent administrative agency with its principal office at 2001 Elmerton Avenue, Harrisburg, PA 17110.
2. On or about April 13, 2007 Trans-Allegheny Interstate Line Company (TrAILCo) filed an application (hereinafter, the Application), and on May 7, TrAILCo served the application on the PGC, with respect to a 500 kV electric transmission line in

southwestern Pennsylvania to the above referenced and captioned docket number with the Pennsylvania Public Utility Commission, (hereinafter, PUC).

3. Pursuant to the Application, TrAILCo requested authority to exercise the power of Eminent Domain.

4. If the Application is approved, it would entail granting TrAILCo the authority to cross a portion of State Game Lands No. 223 (SGL 223) in Greene and Dunkard Townships, Greene County.

5. The portion of SGL 223 that the line is expected to cross was purchased with cost sharing funds from the National Park Service through the Land and Water Conservation Fund.

6. The PGC objects to the grant of this right of Eminent Domain as it affects SGL 223.

7. The PGC believes, and therefore avers, there are no other persons with substantially like interests to the PGC.

WHEREFORE, the PGC respectfully requests the PUC to deny TrAILCo the right to exercise Eminent Domain over any property owned by the PGC.

Respectfully submitted,

Bradley C. Bechtel, Assistant Counsel
Pennsylvania Game Commission

RE: Trans-Allegheny Interstate Line Co.
Docket Nos. A-110172, A-110172F0002,
A-110172F0003, A-110172F0004,
G-00071229
("TrAIL Application")

Gentlemen:

The undersigned Board of Supervisors of Whiteley Township, Greene County, Pennsylvania, over the past few months, have followed the various meetings, read articles, and discussed with their constituents, as to the construction of the 500-kilovolt transmission line to and from Virginia, through Greene County, by PJM Interconnection and Allegheny Energy.

Whiteley Township, Greene County, is included within the corridor as a site for the extra high voltage transmission lines. We believe that this project must comply with the Pennsylvania Uniform Construction Code, in order to review the environmental and public health impacts upon the residents of Whiteley Township.

As public officials, we serve our constituents. Our constituents have expressed concerns as to this project relating to its adverse effect upon the health, environment, wildlife, property values, or esthetics of Whiteley Township.

16

As presently proposed, we can not support the proposed location of the power line. We would request that you re-examine the location of the power line in certain portions of Whiteley Township, Greene County, Pennsylvania. For your reference, we include a copy of a map showing the proposed location and a suggested relocation route which would serve the same purpose. This relocated route would have less of an impact upon the health, safety and welfare of our constituents. We thank you for your consideration.
