Customers may use services and facilities provided under this tariff to obtain access to services offered by other service providers. The Company is responsible under this tariff only for the services and facilities provided herein, and it assumes no responsibility for any service provided by any other entity that purchases access to the Company network in order to originate or terminate its own services, or to communicate with its own Customers.

- 1.2.4 The Company shall not be liable for: (a) any act or omission of any entity furnishing the Company or the Company's Customers facilities or equipment used for or with the services the Company offers; or (b) for the acts or omissions of other common carriers or warehousemen.

Notwithstanding the enforcement of the above provisions, the Company further reserves the right to require each Customer to sign an agreement acknowledging acceptance of the provisions of this section as a condition precedent to such installations.
- 1.2.7 The Company shall not be liable for any defacement of or damage to Customer premises resulting from the furnishing of services or equipment on such premises or the installation or removal thereof, unless such defacement or damage is caused by gross negligence or willful misconduct of the Company's agents or employees. No agents or employees of other participating carriers, or supplying carriers to the Company, shall be deemed to be agents or employees of the Company.
- 1.2.8 Notwithstanding the Customer's obligations as set forth in Section 1.4.2, the Company shall be indemnified, defended, and held harmless (including costs and reasonable attorney's fees) by the Customer or by others authorized by it to use the service against any claim, loss or damage arising directly or indirectly from Customer's use of services furnished under this tariff, including:
- A. claims for libel, slander, invasion of privacy or infringement of copyright arising from the material, data, information, or other content transmitted via the Company's service; or

- 1.2.9 The entire liability of the Company for any claim, loss, damage or expense from any cause whatsoever shall in no event exceed an amount in liquidated damages equivalent to the greater of five hundred dollars (\$500.00) or twice the applicable allowance for interruption as set forth in Section 1.10, below, and no action or proceeding against the Company shall be commenced more than one year after the service related to the claim is rendered.
- 1.2.10 **THE COMPANY MAKES NO WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.**
- 1.2.11 The Company shall not be liable for any act or omission of any other company or companies supplying a portion of the service, or for damages associated with service, channels, or equipment which it does not furnish, or for damages which result from the operation of Customer-provided systems, equipment, facilities or services which are interconnected with Company services.
- 1.2.12 The Company shall not be liable for damages arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission or other injury, including but not limited to injuries to persons or property from voltages or currents transmitted over the service of the Company, (1) caused by Customer-provided equipment (except where a contributing cause is the malfunctioning of a Company-provided connecting arrangement, in which event the liability of the Company shall not exceed an amount equal to a proportional amount of the Company billings for the period of service during which such mistake, omission, interruption, delay, error, defect in transmission or injury occurs), or (2) not prevented by Customer-provided equipment but which would have been prevented had Company-provided equipment been used.
- 1.2.13 The Company does not guarantee nor make any warranty with respect to service installations at locations at which there is present an atmosphere that is explosive, prone to fire, dangerous or otherwise unsuitable for such installations. The Customer shall indemnify and hold the Company harmless from any and all loss, claims, demands, suits or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the Customer or by any other party, for any personal injury to, harm, or death of, any person or persons, or for any loss, damage or destruction of any property, whether owned by the Customer or others, caused or claimed to have been caused, directly or indirectly, by the installation, operation, failure to operate, maintenance, removal, presence, condition, locations or use of service furnished by the Company at such locations.

1.2.14 The Company shall not be liable for the Customer's failure to fulfill its obligations to take all necessary steps including, without limitation, obtaining, installing and maintaining all necessary equipment, materials and supplies, for interconnecting the terminal equipment or communications system of the Customer, or any third party acting as its agent, to the Company's network. The Customer shall secure all licenses, permits, rights-of-way, and other arrangements necessary for such interconnection. In addition, the Customer shall ensure that its equipment and/or system or that of its agent is properly interfaced with the Company's service, that the signals emitted into the Company's network are of the proper mode, band-width, power, data speed, and signal level for the intended use of the Customer and in compliance with the criteria set forth in Section 1.3.1 following, and that the signals do not damage Company equipment, injure its personnel or degrade service to other Customers. If the Customer or its agent fails to maintain and operate its equipment and/or system or that of its agent properly, with resulting imminent harm to Company equipment, personnel, or the quality of service to other Customers, the Company may, upon written notice, require the use of protective equipment at the Customer's expense. If this fails to produce satisfactory quality and safety, the Company may, upon written notice, terminate the Customer's service without liability.

1.2.15 With respect to Emergency Number 911 Service:

- A. This service is offered solely as an aid in handling assistance calls in connection with fire, police and other emergencies. The Company is not responsible for any losses, claims, demands, suits or any liability whatsoever, whether suffered, made, instituted or asserted by the Customer or by any other party or person for any personal injury to or death of any person or persons, and for any loss, damage or destruction of any property, whether owned by the Customer or others, caused or claimed to have been caused by: (1) mistakes, omissions, interruptions, delays, errors or other defects in the provision of this service, or (2) installation, operation, failure to operate, maintenance, removal, presence, condition, location or use of any equipment and facilities furnishing this service.
- B. The Company will, upon reimbursement for damages, cooperate with the Customer in prosecuting a claim against the person causing such damage and the Customer shall be subjugated to the Company's right of recovery of damages to the extent of such payment;
- C. providing at no charge, as specified from time to time by the Company, any needed personnel, equipment, space and power to operate Company facilities and equipment installed on the premises of the Customer, and the level of heating and air conditioning necessary to maintain the proper operating environment on such premises;

The Company may require the Customer to demonstrate its compliance with this section prior to accepting an order for service;

- E. providing a safe place to work and complying with all laws and regulations regarding the working conditions on the premises at which Company employees and agents shall be installing or maintaining the Company's facilities and equipment. The Customer may be required to install and maintain Company facilities and equipment within a hazardous area if, in the Company's opinion, injury or damage to the Company's employees or property might result from installation or maintenance by the Company. The Customer shall be responsible for identifying, monitoring, removing and disposing of any hazardous material (e.g. friable asbestos) prior to any construction or installation work;
- F. complying with all laws and regulations applicable to, and obtaining all consents, approvals, licenses and permits as may be required with respect to, the location of Company facilities and equipment in any Customer premises or the rights-of-way for which Customer is responsible under Section 1.4.1.D. above; and granting or obtaining permission for Company agents or employees to enter the premises of the Customer at any time for the purpose of installing, inspecting, maintaining, repairing, or upon termination of service as stated herein, removing the facilities or equipment of the Company;
- G. not creating or allowing to be placed or maintained any liens or other encumbrances on the Company's equipment or facilities or Customer premises equipment leased or purchased by the Customer from the Company; and
- H. making Company facilities and equipment available periodically for maintenance purposes at a time agreeable to both the Company and the Customer. No allowance for interruptions in service will be made for the period during which service is interrupted for such purposes.

The Customer is responsible for providing and maintaining any terminal equipment on the Customer premises. The electric power consumed by such equipment shall be provided by, and maintained at the expense of, the Customer. All such terminal equipment must be registered with the FCC under 47 C.F.R., Part 68 and all wiring must be installed and maintained in compliance with those regulations. The Company will, where practicable, notify the Customer that temporary discontinuance of the use of a service may be required; however, where prior notice is not practicable, nothing contained herein shall be deemed to impair the Company's right to discontinue forthwith the use of a service temporarily if such action is reasonable under the circumstances. In case of such temporary discontinuance, the Customer will be promptly notified and afforded the opportunity to correct the condition which gave rise to the temporary discontinuance. During such period of temporary discontinuance, credit allowance for service interruptions as set forth in Section 1.10 following is not applicable.

No credit will be allowed for any interruptions occurring during such inspections.

If the protective requirements for Customer-provided equipment are not being complied with, the Company may take such action as it deems necessary to protect its facilities, equipment, and personnel. The Company will notify the Customer promptly if there is any need for further corrective action. Within ten days of receiving this notice the Customer must take this corrective action and notify the Company of the action taken. If the Customer fails to do this, the Company may take whatever additional action is deemed necessary, including the suspension of service, to protect its facilities, equipment and personnel from harm. 1.5 Establishment of Service

1.5.1 Application for Service

An application for service, whether made orally, in writing, or by action of the Customer (e.g., use of Company's services) establishes the contract between the Company and the Customer on the terms and conditions set forth in this tariff. Neither the contract nor any rights acquired thereunder may be assigned or in any manner transferred.

1.5.2 Minimum Contract Periods

1.5.2.1 Except as otherwise provided, the minimum contract period is one month for all services furnished. However, if a new Residential or single line Business Customer notifies the Company within twenty days after receipt of the first bill that certain services or equipment are not desired, the Company will delete such services or equipment from the Customer's account without a record keeping or service ordering charge. 1.5.2.2 Except as provided in 1.5.2.1 preceding, the length of *minimum contract period* for directory listings, and for joint user service where the listing actually appears in the directory, is the directory period. The directory period is from the day on which the directory is first distributed to the Customers to the day the succeeding directory is first distributed to Customers.

1.5.2.3 The Company may require a minimum contract period longer than one month at the same location in connection with special (non-standard) types or arrangements of equipment, or for unusual construction, necessary to meet special demands and involving extra costs.

1.5.4 Establishing Credit

1.5.4.1 The Company, in order to assure the payment of its charges for service, may require Applicants and Customers to establish and maintain acceptable credit.

1.5.4.2 The establishment or re-establishment of acceptable credit as provided in this Section shall not relieve the Applicant or Customer from compliance with other provisions of this tariff as to advance payments and the payment of bills, and shall in no way modify the provisions regarding disconnection and termination of service for failure to pay bills due for service furnished.

1.5.4.3 Applicants for Service

The Company may refuse to furnish service to an Applicant that has not established acceptable credit or has not paid charges for service of the same classification (Residence or Business) previously furnished by the Company or another carrier at the same or another address, until arrangements suitable to the Company, including deposit arrangements, have been made to pay such charges.

The Company may also refuse to furnish service to an Applicant that has not paid charges for same Class of Service (Residence or Business), previously furnished by any Carrier at the same or another address, until deposit arrangements suitable to the Company are made.

A. Residence service Applicants may establish credit in one of the following ways:

1. Responding in a manner satisfactory to the Company to a set of standard questions, known as the Credit Evaluation Process (CEP). The Applicant may be required to provide proof in support of these responses. The written procedures for the CEP are available for public inspection at the Company's main office with the Controller or Treasurer of the Company at 10 South Riverside Plaza, Suite 401, Chicago, Illinois.

2. Paying a cash deposit to the Company in accordance with section 1.5.5 below.

SECTION 10

Original Sheet No. 552

1.5.4.3 Applicants for Service (continued)

- B. Business service Applicants may establish credit by meeting the requirements of the Company's Business Credit Evaluation Plan or of 1.5.4.3.A.2. or 1.5.4.3.A.4.
- C. Where verification of an Applicant's credit is expected to take more than 3 business days, the Company may permit service to be installed upon the Advance Payment by the Applicant of an amount equal to applicable service charges and initial non-recurring charges applicable for service installation plus the estimated amount of the Applicant's bill based upon one month's service. Such Advance Payment will be credited to the Applicant's service account but does not relieve the Applicant of the responsibility to subsequently establish credit in accordance with 1.5.4.3.A. or 1.5.4.3.B.

If credit is not so established, the Customer's service may be suspended not sooner than seven (7) days after a suspension notice is sent to the Customer. After the suspension, the Customer's service may be disconnected not sooner than ten (10) days after written notice of intention to disconnect is sent to the Customer.

When a Customer's service has been disconnected in accordance with the above, service will not be reconnected until the Customer has established credit.

- D. If deposit or payment of an outstanding Residential account is required before furnishing service, the Company shall inform the applicant in writing of the reasons for denial of credit and how to obtain service.

1.5.4.4 Existing Customers

- A. A Customer may be required to reestablish credit by the payment or increase of a cash deposit in accordance with section 1.5.5 following when any of the following conditions occur:
 - 1. The Customer makes payment of two consecutive bills, or of more than two bills within the preceding 12 months, after the payment due date.
 - 2. As a condition to the reconnection of service after suspension or termination of service for non-payment of a delinquent account.
- B. Payment by the Customer of delinquent bills will not of itself relieve the Customer from the obligation of establishing his credit with respect to the account involved or with respect to any other account in connection with the same or any other class of service which the Company may be providing such Customer.
- C. A Customer may be required to reestablish credit in accordance with 1.5.4.3 when the amount of service furnished or the basis on which credit was formerly established has significantly changed.
- E. Before requesting a deposit, the Company shall give the Customer written notice of its intent to request a deposit if current and future bills continue to be paid after the due date. The Company must send a written notice to a *Residential Customer* requesting the reestablishment of credit. If a Customer fails to reestablish his credit as required by the Company, the Customer's service may be suspended not sooner than seven (7) days after a separate suspension notice is sent. Customers will be informed of the reasons for denial of credit before suspension of service. After the suspension, the Customer's service may be disconnected not sooner than ten (10) days after written notice of intention to disconnect is sent.

1.5.4.5 Political Campaign Service Accounts

Special rules for extending credit apply to political campaign service accounts, that is, accounts established by or on behalf of candidates for Federal, State, or Local office.

- A. The Company will require an Applicant for political campaign service to:
1. Make an advance payment in an amount equal to service charges and initial non-recurring charges applicable for service installation for a two (2) month period; and
 2. Provide security in the form of a Cash Deposit, a surety bond or an irrevocable bank letter of credit in an amount equal to the estimated billing for each future two (2) month period. In the case of service for less than two months, the Company will require an Applicant to make an advance payment in an amount equal to the estimated billing for the entire service period.
- B. The Company will require a political account to maintain its security on a continuing basis in an amount equal to the estimated billing for each future two-month period.

If a political account fails to supply the full amount of security required, the Company may disconnect service not sooner than seven (7) days after a suspension notice is sent to the Customer. After the suspension, the Customer's service may be disconnected not sooner than ten (10) days after written notice of intention to disconnect is sent to the Customer.

1.10 Allowances for Interruptions of Service

1.10.1 Credit for Interruptions

When the use of service or facilities furnished by the Company is interrupted due to any cause other than the negligence or willful act of the Customer, or the operation or failure of the facilities or equipment provided by the Customer, a pro rata adjustment of the monthly Recurring Charges subject to interruption will be allowed for the service and facilities rendered useless and inoperative by reason of the interruption whenever said interruption continues for a period of twenty-four (24) hours or more from the time the interruption is reported to or known to exist by the Company, except as otherwise specified in the Company's tariffs. If the Customer reports a service, facility or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.

For calculating credit allowances, every month is considered to have thirty (30) days. A credit allowance is applied on a pro rata basis against the monthly Recurring Charges specified hereunder for Local Line or Local Trunk Service and is dependent upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit. The Customer shall receive a credit of one-thirtieth (1/30) of the tariff monthly rate of services and facilities furnished by the Company rendered useless or inoperative for each of the first three (3) full twenty-four (24) hour periods during which the interruption continues after notice by the Customer to the Company. The Customer shall receive a credit of two-thirtieths (2/30) of the tariff monthly rate for each full twenty-four (24) hour period beyond the first three (3) twenty-four (24) hour periods. However, in no instance shall the allowance for the out-of-service period exceed the total charges in a billing period for the service and facilities furnished by the Company that were rendered useless or inoperative.

SECTION 10

Original Sheet No. 575

1.10.2 Restrictions on Allowance

No credit allowance will be made for:

- A. interruptions due to the negligence or willful act of the Customer, Authorized-User or Joint-User, including but not limited to noncompliance with the provisions of this tariff.
- B. interruptions due to the failure or malfunction of Customer provided facilities or the failure or malfunction of any other non-Company equipment;
- C. interruptions due to electric power failure where the Customer furnishes such electric power;

- F. interruptions of service during any period when the Customer has released service to the Company for maintenance purposes or for implementation of a Customer order for a change in service arrangements;
- G. interruption of service due to circumstances or causes beyond the control of the Company.

1.10.3 Use of Alternative Service Provided by the Company:

 2. The payment period may, at the option of the Customer, be at least as long as the period during which the excess amount accrued or at least as long as necessary so that the total amount billed in 1 month is not greater than the average amount billed for one (1) month plus fifty percent (50%), whichever period is greater. A late payment charge may not be assessed on unbilled service when payments are made as described in this paragraph.
- B. Overbilling: When an overbilling occurs, the Company shall credit the Customer's account in the amount of the overbilling, including applicable taxes, for up to four (4) years before discovery of the overbilling, unless the Customer requests reimbursement in one lump sum. A late payment charge in the amount stated in Section 1.6.3.1 shall be paid on the overbilled amount by the Company to the Customer where at least 30 days have elapsed between payment of the overbilled amount and the credit or refund thereof.
- C. Rebilling: The Company shall notify the Commission of rebilling affecting more than 10% of its Residential Customers within 90 days of the rebilling.
- D. If any of the following conditions are true, however, the Customer will be liable for all charges, including those over four (4) years old:

2. SERVICES

2.1 Application of Rates

2.1.1 Introduction

The regulations set forth in this section govern the application of rates for services contained in other sections of this tariff. An application for service, whether made orally, in writing, or by use of service, establishes a contract between the Company and the Customer pursuant to the terms and conditions included within this tariff. Neither the contract nor any rights acquired thereunder may be assigned or in any manner transferred to a third party by the Customer, without the Company's written approval.

2.1.2 Charges Based on Duration of Use

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- A. Calls are measured in durational increments identified for each service. All calls held for a fraction of a measurement increment are rounded-up to the next whole measurement unit.
- B. Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls starts with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- C. Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- D. Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call and will be billed according to applicable eastern standard or eastern daylight savings time.

2.1.3 Rates Based Upon Distance

Where charges for a service are specified based upon distance, the following rules apply:

Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in the Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

The airline distance between any two rate centers is determined as follows:

- A. Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.
- B. Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- C. Square each difference obtained in 2.1.3.B. above.
- D. Add the square of the "V" difference and the square of the "H" difference obtained in step 2.1.3.C. above.
- E. Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- F. Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

G. FORMULA =
$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$

2.2 Service Area

2.2.1 Exchange Access Service Area

Exchange access services are provided in limited geographic areas. Exchange access services are available only in the operating area of Bell Atlantic - Pennsylvania, Inc.

2.2.3 Dial Tone Line Cell Information

2.2.3.1 Dial Tone Line Cell Classification

For the purposes of determining an Exchange Area Dial Tone Line monthly rate, the Exchange Areas are classified into one (1) of four (4) Dial Tone Line Cells. The Cell classifications are determined by the following criteria:

<u>Dial Tone Line Cell</u>	<u>Classification Criteria</u>
1	All Philadelphia and Pittsburgh City Exchange Areas or Zones with working pairs per square mile greater than 9,000.
2	All remaining Philadelphia and Pittsburgh City Exchange Areas or Zones.
3	All Philadelphia and Pittsburgh Suburban Exchange Areas or Zones with more than 500 working pairs per square mile. Also, for those Exchange Areas with multi-central offices if one of the multi-central offices meets the 500 working lines per square mile criteria.
4	All remaining Exchange Areas.

2.2.3.2 Dial Tone Line Reclassification

When an annual review indicates that the number of working pairs per square mile of an Exchange Area or Zone or multi-central office of an Exchange Area has exceeded or fallen below the above Dial Tone Line Cell criteria for two (2) consecutive study periods, the Exchange Area will be reclassified. Notice of the reclassification of the Exchange Area Dial Tone Line Cell shall be given by filing revised tariffs with the Commission.

2.3.7 IntraLATA Toll Presubscription

A. General

IntraLATA toll presubscription is a procedure whereby a Customer designates to the Company the entity which the Customer wishes to be the carrier of choice (the "IntraLATA Toll Provider" or "ITP") for the Customer's IntraLATA toll calls without dialing an access code. The Customer may designate an ITP for intraLATA toll, a different carrier for interLATA toll, or the same carrier for both.

B. Presubscription Charge Application

1. Existing Customers may exercise an initial free presubscription choice by contacting the Company or the ITP directly, within 90 days of the Company's presubscription implementation date. The charge for the initial free choice change shall be payable by the new ITP.
2. New Customers who subscribe to service after the Company's presubscription implementation date (including an existing Customer who orders an additional line with a separate number) will be asked to select a primary ITP when they place an order for Company exchange service. If a Customer cannot decide upon an intraLATA toll carrier at that time, the Customer will have thirty days following completion of the Customer's request for service installation to make an intraLATA PIC choice without charge. In the interim, the Customer will be assigned a "No-PIC" and will have to dial an access code to make intraLATA toll calls.
3. Customer choices available as free selections to existing and new Customers under the circumstances identified in Sections 2.3.7.B.1 and 2.3.7.B.2 are:
 - a. Designating an ITP as their primary carrier, thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 1010XXXX or other required codes.
 - b. Choosing no carrier as a primary carrier, thus requiring 1010XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Company. In addition, new Customers that do not select a preferred carrier will be assigned a "No-PIC."

C. Rates and Charges

After expiration of the initial free presubscription choice periods for existing and new Customers, as specified in Sections 2.3.7.B.1 and 2.3.7.B.2, respectively, Customer will be assessed the following intraLATA toll presubscription charge for any subsequent change in presubscription:

2.4.3 Local Usage Service -- Rate Schedule

A. General

All Local Usage Service Rates are applied per minute of use as follows unless otherwise specified.

To determine rates charged for calls between zones, call bands (as defined in Section 2.4.5 of this tariff) are applicable.

B. Exchange Rate Classification

Where usage rate groups are applicable for certain usage packages, classification into such rate groups is made on the basis of the number of lines in the relevant local calling area for the package, adjusted by weighting factors that reflect distance:

1. Lines: The number of lines for each exchange is the sum of the total number of Residence and Business main lines.

2. Weighting Factors:

- For the exchange itself, each line is counted as "1".
- For each other exchange which may be called on a local basis, the number of lines is multiplied by a factor based on the rate center to rate center distance, as follows:

Mileage Bands	1 - 10	11 - 16	17 - 22	23 - 30
Distance Factors	1.0	1.5	2.0	2.5

3. The Weighted Line Rate Groups for Exchange Usage are:

<u>Usage Rate Group</u>	<u>Weighted Lines in Local Calling Area</u>
A	0 - 6,000
B	6,001 - 12,000
C	12,001 - 27,000
D	27,001 - 46,000
E	46,001 - 83,000
F	83,001 - 170,000
G	170,001 - 350,000

For the purposes of determining the Dial Tone Line rate, the Pennsylvania Exchanges are classified in Dial Tone Line Cells as provided in Section 2.2.3.

A termination charge shall apply to a Customer who terminates subscription to all Company services prior to the end of the Customer's one year term of subscription. The termination charge shall be an amount equal to the product of (1) the difference between the one year discount and the month-to-month discount (e.g., 2%) and (2) the Customer's usage during the period prior to termination.

2.4.5 Call Bands

Call bands are used to determine the rates charged for calls between zones.

For example, to find the charges applicable to dial station-to-station messages for the Philadelphia Suburban exchange area, one would consult the chart in Section 2.4.5.B. To find the call band applicable for a call between Zone 13 and Zone 40, find the row for Zone 13 along the horizontal rows of the table, and follow it across to the column for Zone 40. The table shows that the applicable Call Band is Call Band 5. Then refer to Section 2.4.3.2.B.2. to determine the applicable rate for the time period of the call.

2.5 Optional Exchange Access Service Enhancement Features and Rate Schedule

2.5.1 General

Services in this section may be purchased in addition to a Company-provided Exchange Access Service. These features are available only when purchased in combination with a Company provided Exchange Access Service.

2.5.2 Optional Exchange Access Service Enhancement Features

AUTOMATIC CALL BACK

Allows a Customer to return most recent incoming calls whether answered or not. If the line to which the request is made is idle, the calls go through; if the line is busy, the automatic callback continues to attempt until the line is free. The request is deactivated after 30 minutes or six unanswered ring backs if the call is not completed.

BUSY LINE TRANSFER

In the event that the called telephone number is busy, this feature automatically forwards incoming calls to a predetermined telephone number served by the same central office switch, or provides inter-switch forwarding to a predetermined, dialable telephone number where technically available. If incoming calls are transferred to a number served by the same or a different central office switch, multiple calls will be transferred simultaneously provided that there are sufficient facilities to accept the calls. Additional local usage charges can apply (see Section 2.4).

CALL BLOCK

This service allows the Customer to prevent future calls from up to a maximum of six specific telephone numbers. This service can be activated after receipt of an unwanted call of after entering a telephone number from which the calling party does not wish to receive future calls. This list can only be created from and for telephone numbers located in appropriately equipped offices. Further calls to the Call Block Customer from telephone numbers on this screening list are connected to an announcement stating that the called party is not accepting calls and the Call Block Customer's telephone does not ring. For calls from a line within multiline hunting, the call is blocked only where the main telephone number has been entered in the screening list. Customers can either incur a daily usage charge that applies for each day the list is active; or subscribe to the service and incur a monthly charge for unlimited use.

CALL FORWARDING – Busy Line and Don't Answer

In addition to the Call Forwarding – Busy Line services, this feature also allows incoming calls to a line that is not answered after a specific number of rings designated by the customer and within parameters defined by the Company to be forwarded to another line specified by the Customer. On a monthly basis, Customers may subscribe to one feature or to both features combined. This offering is available to individual line Residence and Business Customers, excluding Exchange Access Lines associated with Direct Inward Dialing, WATS, Centrex, Semipublic, COCOT, Mobile service or other services as determined by the Company.

Provides a tone signal when a second call is coming in on a busy line.

CALLER ID

This central office feature provides for the display of the incoming telephone number on a Customer provided display device attached to the Customer's telephone line or on a Customer-provided telephone or answering machine with a built-in display screen. The Caller ID feature will forward the calling number from the appropriately equipped terminating central office to the Customer-provided display device. The Company will forward all telephone numbers subject to technical limitations.

Caller ID may also, as facilities permit, provide a customer with Anonymous Call Rejection, the feature that provides the ability to reject calls from callers who have chosen to block the passage of their telephone numbers and associated main listed names on outgoing calls.

CALLER ID DELUXE

This service, in addition to providing the same capabilities as Caller ID, displays both the incoming telephone number and the main listed name associated with the incoming telephone number. This service will display all telephone numbers, including Non-Published and Non-Listed telephone numbers, unless blocked on the originating end. When a calling party is using blocking, the Caller ID Deluxe subscriber will receive an indication that the name and number are blocked.

Caller ID Deluxe may also, as facilities permit, provide a customer with Anonymous Call Rejection, the feature that provides the ability to reject calls from callers who have chosen to block the passage of their telephone numbers and associated main listed names on outgoing calls.

Caller ID Deluxe Service is available to Customers by monthly subscription only, which provides unlimited use of the service.

2.5.2 Optional Exchange Access Service Enhancement Features

BLOCKING

A calling party may block the passage of his/her telephone number, associated main listed name and voiceback of calling identification information to users or subscribers to Optional Exchange Access Service Enhancement Features. Blocking will also prevent call completion through the use of Automatic Call Back Service. Customers have two blocking options:

Per-Call Blocking

To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per-call blocking, and it is provided on an unlimited basis.

Line Blocking

Line Blocking must be added to a Customer's line by contacting the Company's business office and having a service order issued. All calls are automatically blocked when a Customer subscribes to line blocking unless the blocking feature is deactivated. If a customer subscribes to line blocking, he/she can deactivate blocking by dialing a special code prior to placing a call. Blocking will be deactivated for that outgoing call only. Line blocking is provided without charge, except as discussed in the rate section of this Tariff.

Per-Call and Line Blocking Services require special central office equipment and are furnished only from central offices where facilities are available, as determined by the Company. The services can be activated by either dial-pulse (rotary) or Touch-Tone line dial tone service. These services can be provided to individual line customers only.

Blocking services, both per-call and line, are available to all Customers in the Company's serving territory. Per-Call Blocking is automatically available for Residence and Business Customers, and Line Blocking can be obtained by contacting the Company's business office and having a service order issued. If a customer chooses to block, the name, number, and voiceback, Blocking will also prevent call completion through the use of Automatic Call Back Service.

2.5.2 Optional Exchange Access Service Enhancement Features (continued)

CALLER ID WITH NAME

This central office feature is only offered to Customers being served by appropriately equipped central offices and subscribing to Caller ID. This feature provides for the display of the listed name associated with the telephone number from which the call is being made. The name will be delivered to a Customer-provided display device. The Company will forward all calling names subject to technical limitations.

CONTROL EQUIPMENT FOR EXCHANGE ACCESS LINES

Make Busy Arrangement

An exchange access line make busy arrangement may be furnished when a Customer wishes to control the volume of incoming calls to an exchange access line or lines operated as a group. Control equipment located in the serving central office, a Customer-provided control key on the Customer's premises and a Metallic channel for miscellaneous purposes are required to provide this service. The make busy arrangement will not be provided on Toll Free Service, coin telephone service or exchange access lines not operated as a hunting group.

Hunting Arrangement

Exchange access lines arranged as a hunting group may be furnished by control equipment located in the serving central office to provide the capability of completing multiple calls to a Customer by dialing one main telephone number

Stop Hunt Feature

The stop hunt feature provides a Customer with a means of discontinuing trunk hunting at a predetermined point within a number of exchange access lines operated as a group. Control equipment located in the serving central office, a Customer-provided control key on the Customer's premises and a Metallic channel for miscellaneous purposes are required to provide this service. The stop hunt feature will not be provided on coin telephone service.

2.5.2 Optional Exchange Access Service Enhancement Features (continued)

FOUR WIRE SERVICE TERMINATING ARRANGMENT

The Four Wire Service Terminating Arrangement permits switching equipment that is designed to use four wire terminations to be connected to the Company's standard two wire Foreign Exchange and Foreign Central Office exchange facilities toll network. While this offering contemplates the use of four wire facilities, between the local serving wire centers and the premises switching equipment, two wire facilities may be used

Transmission performance that meets the established standards of the Company will be obtained over facilities connected to a Four Wire Service Terminating Arrangement. If a Customer requests improvement beyond this, additional equipment will be provided, where facility conditions permit, subject to additional rates and changes based on the costs incurred.

MULTI RING SERVICE

Multi Ring Service enables an individual line subscriber to have up to two telephone numbers (referred to as "Dependent" numbers) assigned to one dial tone line in addition to the main number (referred to as the "Master" number). Customers subscribing to this service will be able to receive calls dialed to two or three separate numbers without having a second or third access line. Distinctive ringing will be provided for each of the additional telephone numbers to facilitate identification of incoming calls. Multi Ring Service is associated with incoming calls only and does not provide a separate dial tone line to place outgoing calls. A distinctive Call Waiting tone for each additional telephone number will be provided, where facilities permit, to Customers subscribing to the Call Waiting feature of Custom Calling Service.

PRIORITY CALL

This service provides one distinctive audible signal to the called Customer when a call is received from one of up to six prespecified telephone numbers. This service is only available with telephone numbers located in appropriately equipped offices. If the called customer subscribes to Call Waiting, and the call arrives while the line is busy, the Call Waiting tone has a distinctive pattern. For calls from a dial tone line with multiline hunting, the distinctive signal is only produced when the main telephone number has been entered in the screening list.

2.5.2 Optional Exchange Access Service Enhancement Features (continued)

REPEAT DIALING

Allows a calling party to automatically redial the last number dialed, provided there has been no intervening calls. If the called line is busy, a 30-minute queuing process begins. The calling party is then given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy status of the called line until both lines are found idle or the queuing process expires.

Customer can subscribe to this service and pay a monthly charge or use it on a per activation basis. If a customer subscribes to this service, the monthly rate includes unlimited usage. When the customer uses the service on a per activation basis, a usage charge applies each time the service is activated whether or not the called party answers.

SELECT FORWARD

This service allows the Customer to select a maximum of six telephone numbers to be forwarded to a second telephone number. This list can only be created from and for telephone numbers located in appropriately equipped offices. Only calls from those telephone numbers in the screening list may be forwarded to the designated telephone number.

For calls from a line within multiline hunting, the call is selectively forwarded only where the main telephone number has been entered in the screening list.

Customers can either incur a daily usage charge that applies for each day the list is active, or subscribe to the service and incur a monthly charge for unlimited use.

THREE-WAY CALLING

Adds a third party to an established connection without operator assistance.

2.13.3 Pennsylvania Telecommunications Relay Service

A. General

The Pennsylvania Telecommunications Relay Service (TRS) is a relay telecommunications service for the deaf, hearing and/or speech disabled population of the Commonwealth. The service permits telephone communications between individuals with hearing and/or speech disabilities who must use a Text Telephone and individuals with normal hearing and speech as provided in the tariff filed by AT&T Communications of Pennsylvania, Inc.

B. Surcharge

In addition to the charges provided in this tariff and the Company's other intrastate tariffs, a surcharge will apply to all Residence and Business access lines served by the Company. This surcharge applies regardless of whether or not the access line uses the Pennsylvania Telecommunications Relay Service. This surcharge serves as the funding vehicle for the operation of the Pennsylvania Telecommunications Relay Service, and shall be calculated by the Commission. The Commission shall compute the Pennsylvania Relay Service Surcharge each year and notify local exchange carriers of the surcharge amount to be applied for the twelve-month period commencing with July 1, of each year. The Commission may revise the surcharge more frequently than annually at its discretion.

Tariff revisions will be filed whenever the Commission calculates a new surcharge amount and notifies the Company.

The following surcharge rates apply to all bills issued on or after July 1, 1998:

	<u>Monthly Rate</u>
Per residence access line	\$0.05
Per business access line	\$0.10

Centrex lines will be charged on an equivalency basis as determined by the Commission.

C. Rates

Non-Coin

Local calls will be charged at the applicable local flat rate or local measured service rate. IntraLATA toll calls placed through the Pennsylvania Telecommunications Relay Service will be rated according to the Company's IntraLATA Interexchange Tariff.

Coin

Local calls originating from payphones made through a Telecommunications Relay Service (TRS) are free of charge. Calling Card Customer Dialed toll calls originating from payphones made through a TRS will not exceed the rate applicable for a similar non-TRS toll call made using coin sent-paid service.

3. SPECIAL ARRANGEMENTS

3.1 General

Where the Company furnishes a facility or service for which a rate or charge is not specified in the Company's tariffs, charges will be based on the costs incurred by the Company and may include: (1) non-recurring type charges; (2) recurring type charges; (3) termination liabilities; (4) combinations thereof.

3.2 Basis for Computing Rates for Special Arrangements

The costs referred to in Section 3.1 preceding may include one or more of the following items to the extent they are applicable:

- A. cost of installing the facilities to be provided including estimated costs for the rearrangements of existing facilities. Costs may include the following:
 - 1. equipment and materials provided or used,
 - 2. engineering, labor and supervision,
 - 3. transportation, and
 - 4. rights of way;
- B. cost of maintenance;
- C. depreciation on the estimated cost installed of any facilities provided, based on the anticipated useful service life of the facilities, with an appropriate allowance for the estimated net salvage;
- D. administration, taxes and uncollectible revenue on the basis of reasonable average costs for these items;
- E. license preparation, processing and related fees;
- F. tariff preparation, processing and related fees;
- G. any other identifiable costs related to the facilities provided; or
- H. an amount for return and contingencies.

3.3 Termination Liability for Special Arrangements

To the extent that there is no other requirement for use by the Company, a termination liability may apply for facilities specially constructed at the request of the Customer as follows:

- A. the termination liability period is the estimated service life of the facilities provided,
- B. the amount of the maximum termination liability is equal to the estimated amounts for:
 - 1. Cost installed of the facilities provided including estimated costs for rearrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Cost installed includes the cost of:
 - a. equipment and materials provided or used,
 - b. engineering, labor and supervision,
 - c. transportation, and
 - d. rights of way;
 - 2. license preparation, processing, and related fees;
 - 3. tariff preparation, processing, and related fees;
 - 4. cost of removal and restoration, where appropriate; and
 - 5. any other identifiable costs related to the specially constructed or rearranged facilities.
- C. The applicable termination liability method applies to calculations regarding the unpaid balance of a term obligation. The amount of such charge is obtained by multiplying the sum of the amounts determined as set forth in Section 3.3.B preceding by a factor related to the unexpired period of liability and the discount rate for return and contingencies. The amount determined in Section 3.3.B. preceding shall be adjusted to reflect the redetermined estimate net salvage, including any reuse of facilities provided. This product is adjusted to reflect applicable taxes.
