REGULATIONS2.8 CANCELLATION OF SERVICE

If a Customer cancels a Service Order or terminates services before the completion of the term for any reason whatsoever other than a service interruption (as defined in Section 2.6.1 above), the Customer agrees to pay to the Company termination liability charges, as defined below. These charges shall become due and owing as of the effective date of the cancellation or termination and be payable within the period, set forth in Section 2.5.2.

The Customer's termination liability for cancellation of service shall be equal to:

- A) all unpaid Non-Recurring charges and out-of-pocket expenses reasonably expended by the Company to establish service to the Customer; plus
- B) any disconnection, early cancellation or termination charges reasonably incurred and paid to third parties by the Company on behalf of the Customer; plus
- C) all Recurring Charges specified in the applicable Service Order Tariff for the balance of the then current term discounted at the prime rate announced in the Wall Street Journal on the third business day following the date of cancellation; minus
- D) a reasonable allowance for costs avoided by the Company as a direct result of the Customer's cancellation.

2.9 TRANSFERS AND ASSIGNMENTS

Neither the Company nor the Customer may assign or transfer its rights or duties in connection with the services and facilities provided by the Company without the written consent of the other party, except that the Company may assign its rights and duties:

- A) to any subsidiary, parent company or affiliate of the Company; or

---

REGULATIONS

2.9 TRANSFERS AND ASSIGNMENTS (Cont'd)

- B) pursuant to any sale or transfer of substantially all the assets of the Company; or
- C) pursuant to any financing, merger or reorganization of the Company.

2.10 NOTICES AND COMMUNICATIONS

- A) The Customer shall designate on the Service Order an address to which the Company shall mail or deliver all notices and other communications, except that the Customer may also designate a separate address to which the Company's bills for service shall be mailed.
- B) The Company shall designate on the Service Order an address to which the Customer shall mail or deliver all notices and other communications, except that Company may designate a separate address on each bill for service to which the Customer shall mail payment on that bill.
- C) All notices or other communications required to be given pursuant to this tariff will be in writing. Notices and other communications of either party, and all bills mailed by the Company, shall be presumed to have been delivered to the other party on the third business day following placement of the notice, communication or bill with the U.S. Mail or a private delivery service, prepaid and properly addressed, or when actually received or refused by the addressee, whichever occurs first.
- D) The Company or the Customer shall advise the other party of any changes to the addresses designated for notices, other communications or billing, by following the procedures for giving notice set forth herein.

---

APPLICATION OF RATES

3.1 INTRODUCTION

The regulations set forth in this section govern the application of rates for services contained in other sections of this tariff.

3.2 CHARGES BASED ON DURATION OF USE

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- A) Calls are measured in durational increments identified for each service. All calls that are fractions of a measurement increment are rounded-up to the next whole unit.
- B) Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- C) Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- D) Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- E) All times refer to local time.

---

Pennsauken, NJ 08110

Effective:

---

APPLICATION OF RATES

3.3 RATES BASED UPON DISTANCE

Where charges for a service are specified based upon distance, the following rules apply:

- A) Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in the Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

---

APPLICATION OF RATES3.3 RATES BASED UPON DISTANCE (Cont'd)

B) The airline distance between any two rate centers is determined as follows:

- 1) Obtain the "V" (vertical) and "H" (horizontal) coordinates for each rate center from the Bellcore Local Exchange Routing guide referenced in Section 3.3(A).
- 2) Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- 3) Square each difference obtained in step (2) above.
- 4) Add the square of the "V" difference and the square of the "H" difference obtained in step (3) above.
- 5) Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- 6) Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.
- 7) FORMULA =

$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

---

SERVICE AREAS

4.1 EXCHANGE ACCESS SERVICE AREAS (EASA)

Exchange Access Services are provided in limited geographic areas as contained in Appendix A to this tariff.

4.2 CALLING AREAS

Geographically-defined Local Calling Areas are associated with each Exchange Access Service provided pursuant to Appendix A. The applicable Local Calling Areas are contained in Appendix A of this tariff.

---

DATA SERVICES

5.1 BUSINESS ISDN-PRI SERVICE

5.1.1 GENERAL

Business ISDN-PRI is an optional service arrangement for local exchange access based on the Primary Rate Interface (PRI) arrangement of the ISDN. ISDN-PRI is a high capacity access path for communications providing voice or data transmission over the public network.

Integrated Services Digital Network (ISDN) describes the end-to-end digital telecommunications network architecture which provides for the simultaneous access, transmission and switching of voice, data and image services. These functions are provided via channelized transport facilities over a limited number of standard user-network interfaces. The ISDN architecture consists of digital switching systems which connect Primary Rate Interface lines to their serving central office.

Business ISDN-PRI is provisioned on the 1.544 Mbps bandwidth and uses the ISDN architecture of 23 B channels and one D channel or 24 B channels to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.

Circuit Switching

Circuit Switching is a switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call.

DATA SERVICES5.2 BUSINESS ISDN – BRI SERVICE5.2.1 GENERAL

Integrated Services Digital Network (ISDN) describes the end-to-end digital telecommunications network architecture which provides for the simultaneous access, transmission and switching of voice, data and image services. These functions are provided via channelized transport facilities over a limited number of standard user-network interfaces. The ISDN architecture consists of digital switching systems which connect Basic Rate Interface lines to their serving central office.

Business ISDN-BRI Arrangement provides ISDN capabilities from an ISDN equipped switch in the central office. The BRI Arrangement consists of two "B" (Bearer) channels and one "D" channel (2B+D) which are defined as:

B Channels

The B channels are 64 kilobit per second (kbps) channels used for information transfer between users. The B channels may be used in conjunction with circuit-switched service.

D Channel

The D channel is a 16 kilobit per second packet-switched channel that carries signaling and control for the B channels.

Circuit Switching

Circuit Switching is a switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call.

DATA SERVICES

5.4 SECRETARIAL LINES AND ASSOCIATED TELEPHONE ANSWERING EQUIPMENT

5.4.1 GENERAL

A. Function

These services are furnished to permit a telephone answering company to answer incoming calls on the central office lines of one or more of their clients by means of customer-provided secretarial equipment.

B. Concentrator - Identifier Used In Telephone Answering Service

This equipment permits common use of up to six interoffice lines to connect telephone answering bureaus with their clients in central office districts other than those in which the telephone answering bureau is located, thus eliminating the necessity of providing a separate channel extension from each client's line to the telephone answering bureau.

1. TYPE 2 (1)

Type 2 concentrator-identifier equipment may serve a maximum of 100 clients. one signaling channel and two to six telephone channels are required between the concentrator located at a central office and identifier equipment located on the same premises as the secretarial equipment. Concentrators equipped for less than 100 secretarial lines may be expanded to a larger capacity only when the number of connected secretarial lines equals 90% of the equipped capacity and after notification from the telephone secretarial service bureau.

This service is furnished subject to the working limits of the concentrator-identifier equipment.

---

DATA SERVICES5.4 SECRETARIAL LINES AND ASSOCIATED TELEPHONE ANSWERING EQUIPMENT (Cont'd)5.4.1 GENERAL (Cont'd)B. Concentrator-Identifier Equipment2. Type 3 (1)

Type 3 concentrator equipment may serve a maximum of five client lines, which must be located in the same central office district as the concentrator, and be served by the central office equipment with which the concentrator is associated. No identifier equipment is available with Type 3 concentrator equipment. One telephone channel is required between the concentrator located at a central office and the secretarial equipment. A customer-provided switching key is required at each telephone station of lines connected to the concentrator. The customer-provided key is used to connect or disconnect the line from the concentrator. When the customer-provided key is operated, the client's line is disconnected from the concentrator, and outgoing calls can be made by the client. When the key is in the normal position, incoming calls can be answered only at the telephone secretarial bureau via the concentrator, and no outgoing calls can be made by the client.

## NOTE:

(1) Furnished only to the extent of available stock.

---

DATA SERVICES5.4 SECRETARIAL LINES AND ASSOCIATED TELEPHONE ANSWERING EQUIPMENT (Cont'd)5.4.2 RATES AND CHARGES

[RESERVED FOR FUTURE USE]

5.5 SWITCHED 56 KILOBIT SERVICE5.5.1 GENERAL

This service will provide the end user with the ability to send and receive data at a speed of 56,000 bits per second over the Public Switched Network (PSN). This service will be provided from specially equipped Telephone Company Wire Centers in conjunction with loop plant and inter-office facilities (Local or Remote Channels) designed to accommodate only 56 kilobits/second full duplex, synchronous transmission.

5.5.2 RATES AND CHARGES

[RESERVED FOR FUTURE USE]

5.6 SWITCHED MULTIMEGABIT DATA SERVICE5.6.1 GENERAL

Switched Multimegabit Data Service ("SMDS") is a connectionless, packet-switched data service, allowing for the interconnection of Local Area Networks ("LANS") and computers across a wide metropolitan area. A low-speed SMDS Subscriber Network Access Line ("SNAL") is a dedicated digital line, utilizing the SMDS Data Exchange Interface ("DXI"). The low-speed dedicated digital line operates over metallic facilities or fiber facilities at a maximum data transmission rate of 56 Kbps. A high-speed SMDS Subscriber Network Access Line is a dedicated digital line, utilizing the SMDS Interface Protocol ("SIP") or the DXI. There are two types of high-speed dedicated lines. The first type operates electrical facilities or fiber facilities at a maximum data transmission rate of 1.17 Mbps via SIP or 1.54 Mbps via DXI. The second type operates over fiber facilities at a maximum sustained throughput rate of 34 Mbps for sustained periods may subscriber to a lower rate via an Access Class arrangement. The Access Classes are 4 Mbps, 10Mbps, 16 Mbps, 25 Mbps and 34 Mbps.

SMDS Access Paths require special equipment and facilities and will only be provided from digitally equipped central offices. SMDS will be offered on a 24-hour day, 7-day per week basis except during occasional periods where network upgrades must be performed to meet customer requirements.

5.7 FRAME RELAY SERVICE

5.7.1 GENERAL

Frame Relay Service is a high performance, cost-effective offering for connecting multiple Local Area Networks (“LAN”) or Synchronous Network Architecture (“SNA”) locations. Frame Relay Service is accessible at speeds of up to 1.536 Mbps. The service elements for frame relay service include access facilities, ports and Permanent Virtual Circuits (“PVCS”). The minimum service term requirement for Frame Relay Service is one (1) year.

DATA SERVICES

5.8 HIGH CAPACITY - 1.544 MBPS SERVICE

5.8.1 GENERAL

High Capacity Channels provide simultaneous two-way transmission of serial, bipolar, return to zero isochronous digital signals. The transmission speed of a High Capacity Channel is 1.544 Megabits Per Second (Mbps). A pulse density restriction, plus a constraint on customer-provided framing are part of the format constraint on High Capacity Channels. The format constraints permit the Telephone Company the use of every 193rd bit position for future use, therefore, the effective throughput rate available to the customer is 1.536 Mbps.

Commencing on the date of installation, the monthly rate for this service when furnished for intraLATA service as described in A.3 preceding will not increase for a period of 24 months.

High Capacity Channels are provided between customer premises, between a customer premises and a Telephone Company hub or between serving wire centers.

5.9. HIGH CAPACITY - 44,736 MBPS LIGHTWAVE SERVICE

5.9.1 GENERAL

High Capacity/Lightwave Service utilizes lightwave technology to provide point-to-point channels between customer locations. This service will be provided by utilizing existing interoffice/ interexchange and local distribution facilities. The Telephone Company retains the right to refuse to accept customer requests for this service.

The type of facilities and the route of the facilities, other than as specifically requested by the customer and agreed to by the Telephone Company, will be determined by the Telephone Company.

This service is furnished on a full time basis, 24 hours a day, 7 days a week for the contract period.

LOCAL EXCHANGE SERVICES6.1 LOCAL EXCHANGE SERVICE6.1.1 GENERAL

Local Exchange Service provides a Customer with a telephonic connection to, and a unique telephone number address on, the public switched telecommunications network. Each Local Exchange Service enables users to:

- A) receive calls from other stations on the public switched telecommunications network;
- B) originate telephone calls through DTMF, i.e., the use of pushbuttons transmitting alternating currents in lieu of rotary dial or push buttons transmitting direct current.
- C) access other services offered by the Company as set forth in this tariff;
- D) access certain intrastate, interstate and international calling services provided by the Company;
- E) access (at no additional charge) the Company's operators and business office for service related assistance;
- F) access (at no additional charge) emergency services by dialing 0- or 9-1-1; and
- G) access other services (at the Customer's expense) provided by other common carriers on a per-call basis.

Each Local Exchange Service is available on a "Full" service basis, whereby service is delivered to a demarcation/connection block at the Customer's premises.

---

LOCAL EXCHANGE SERVICES6.2 RESIDENTIAL EXCHANGE SERVICE6.2.1 GENERAL

Residential Exchange Service provides residential Customers with the ability to originate calls from a Company provided access line to all other stations on the public switched network bearing the designation of any central office exchanges, areas, and zones introduced in the Customer's local calling area. All calls to destinations outside the basic local calling area but within the same state and LATA will be charged the intraLATA or interLATA rates of the Customer's chosen intraLATA or interLATA toll carrier. Rates for Residential Exchange Service are composed of the following elements:

- Dial Tone Line
- Usage Package(s)
- Measured Use

6.2.2 DIAL TONE LINE

The Dial Tone Line provides Customers with access to the telephone network. For residential exchange service, the Dial Tone Line applies to individual and two-party lines and is based upon the exchange area cell classification and the grade of service (individual or party line). Dial Tone Line Cell classifications are defined in Section 11.1.

6.2.3 USAGE PACKAGES

Local exchange service is provided to residential Customers under options which vary according to the way rates applicable to outgoing usage are charged. Each of the Usage Packages described herein provide customers unlimited incoming calls at no extra charge. The exchange service areas and calling areas for each Usage Package are defined in Section 11 of this tariff. The following Usage Packages may be purchased by residential Customers:

LOCAL EXCHANGE SERVICES6.2 RESIDENTIAL EXCHANGE SERVICE (Cont'd)6.2.3 USAGE PACKAGES (Cont'd)A) Metropolitan Area Unlimited

Under this option, the residential Customer pays a stipulated monthly rate for an unlimited number of calls within the designated calling exchange area. Metropolitan Area Unlimited is available to Customers in the service exchanges listed in Sections 11.2, 11.4 and 11.5 of this tariff.

B) Metropolitan Area Unlimited Plus

Under this option, the Customer pays a stipulated monthly rate for an unlimited number of outgoing calls within the Customer's local calling area, the extended calling area plus additional exchanges as identified in the underlying carrier's tariffs. Metropolitan Area Unlimited Plus is available to Customers in the service exchange areas listed in Sections 11.2, 11.4 and 11.5 of this tariff.

C) Extended Area Unlimited

Under this option, the Customer pays a stipulated monthly rate for an unlimited number of outgoing calls within the Customer's local calling area plus additional exchanges outside the Customer's local calling areas as identified in the underlying carrier's tariff. Extended Area Unlimited is available to Customer in the service exchange areas listed in Section 11.2 of this tariff.

D) Local Area Unlimited

Under this option, the residential Customer pays a stipulated rate for an unlimited number of outgoing calls within a specified local calling area. Local Area Unlimited is available to all residential Customers in the service exchange areas listed in Section 11.2 of this tariff.

---

Issued:

SNiP Link, LLC

Pennsauken, NJ 08110

Effective:

---

LOCAL EXCHANGE SERVICES6.2 RESIDENTIAL EXCHANGE SERVICE (Cont'd)6.2.3 USAGE PACKAGES (Cont'd)E) Local Area Standard Usage

Under this option, the Customer pays a stipulated monthly rate for up to a specified amount of outgoing measured use within a specified local calling area. This option also includes an allowance which is only applied to charges that accumulate on the Customer's account. Allowances, which are calculated on a pro rata basis, accumulate when standard service is established or discontinued during a billing month. No credit is given for unused allowances. Local Area Standard Usage is available to all residential customers located in any service exchange areas listed Section 11.7 of this tariff.

F) Hometown-Plus Usage

Under this option, the Customer pays a stipulated monthly rate for an unlimited number of outgoing calls within the Home Exchange plus one or two other contiguous intraLATA toll exchanges. For purposes of this service option, an intraLATA toll exchange is an exchange to which toll charges would apply absent selection of that exchange under the Hometown Plus Usage Option. Hometown-Plus Usage is available to individual line Customers in the service exchange areas listed in Section 11.3 of this tariff.

G) Budget Usage

Under this option, the Customer is charged the applicable rate for each completed outgoing local call. This option also includes an allowance that is applied only to charges that accumulate on the Customer's account. Allowances are calculated on a pro rata basis and accumulate when standard service is established or discontinued during a billing month. No credit is given for unused allowances during a billing month, nor is any unused allowance accumulated and/or carried forward over billing months. Budget Usage is available to Customers in the service exchange areas listed in Sections 11.4, 11.5 and to individual line customers listed in Section 11.6 of this tariff.

---

LOCAL EXCHANGE SERVICES6.2 RESIDENTIAL EXCHANGE SERVICE (Cont'd)6.2.4 MEASURED USE

Measured Use charges are based upon rates shown in Section 10 of this tariff and applicable to completed Metropolitan messages placed on a dial station-to-station basis. Measured Use is available in the service exchange areas listed in Sections 11.4 and 11.5 of this tariff. Accumulations for measured use charges are based upon the day of the week and the time of day that each initial or additional message period begins. Measured Use rates accumulate on a monthly basis by Metro Call Band and rate application periods commencing on the billing date of the exchange designation. Measured Use rates do not apply to messages placed to official numbers located on the service provider's premises within the local calling area that the general public calls to transact business with the service provider.

LOCAL EXCHANGE SERVICES6.3 BUSINESS EXCHANGE SERVICE

Business Exchange Service provides business Customers with the ability to originate calls from a Company-provided access line to all other stations on the public switched network bearing the designation of any central office exchanges, areas and zones included in the Customer's local calling area. All calls to destinations outside the basic local calling area but within the same state and LATA will be charged the intraLATA or interLATA rates of the customer's chosen intraLATA or interLATA toll carrier. Rates for Business Exchange Service are composed of the following elements:

- Dial Tone Line
- Usage Package(s)
- Measured Use

6.3.1 DIAL TONE LINE

The Dial Tone Line provides Customers with access to the telephone network. The Dial Tone Line applies to individual, multi-lines and party lines and is based upon the exchange area cell classification and the grade of Service. Dial Tone Line cell classifications are defined in Section 11.1.

6.3.2 USAGE PACKAGES

Local exchange service is provided to business Customers under options which vary according to the way rates applicable to outgoing usage are charged. The exchange service area and calling service area is listed in Section 11 of this tariff. The following Usage Packages are available to business exchange customers:

A) Extended Area Unlimited

Under this option, the Customer pays a stipulated monthly rate for an unlimited number of outgoing calls within the Customer's local calling area plus additional exchanges as identified in the underlying carrier's tariffs. Extended Area Unlimited is available to Customers in the service exchange areas listed in Section 11.2 of this tariff.

---

LOCAL EXCHANGE SERVICES6.3 BUSINESS EXCHANGE SERVICE (Cont'd)6.3.2 USAGE PACKAGES (Cont'd)B) Local Area Unlimited

Under this option, the Customer pays a stipulated monthly rate for an unlimited number of outgoing calls within a specified local calling area. Usage within the specified local calling area is not measured. This option is available only to existing business exchange Customers who continue such service at their present location. Local Area Unlimited is available to Customers in the service exchange area listed in Section 11.2 of this tariff.

C) Local Area Unlimited Valu-Pak

Under this option, the Customer pays a stipulated monthly rate for an unlimited number of outgoing calls within a specified calling area. Usage within the specified local calling area is not measured. This option is available only to existing business customers who continue such services at their present location. Local Area Unlimited Valu-Pak is available to Customers in the service exchange areas listed in Sections 11.4 and 11.5 of this tariff.

D) Local Area Valu-Pak

Under this option, Customers pay a stipulated monthly rate for up to a specified amount of outgoing measured use with a specified measured local calling area. Additional charges accrue for local outgoing measured use in excess of the Valu-Pak allowance. The Local Area Valu-Pak also includes an allowance that is applied only to charges that accumulate on the Customer's account. Allowances are calculated on a pro rata basis and accumulate when service is established or discontinued during a billing month. No credit is given for unused allowances accumulated and/or carried forward over billing months. This option is available to Dial Tone Line Customers and Centrex Customers in the service exchange areas listed in Sections 11.4 and 11.5 of this tariff.

---

LOCAL EXCHANGE SERVICES6.3 BUSINESS EXCHANGE SERVICE (Cont'd)6.3.2 USAGE PACKAGES (Cont'd)E) Local Area Standard

Under this option, the Customer pays a stipulated monthly rate for up to a specified amount of outgoing measured use within a specified measured local calling area. Additional charges accrue for local outgoing measured use in excess of the standard option. The Local Area Standard option is available to business Dial Tone Line Customers and Centrex Customers. The Local Area Standard option also includes an allowance that applies only to charges that accumulate on the Customer's account. Allowances are calculated on a pro rata basis and accumulate when standard service is established or discontinued during a billing month. No credit is given for unused allowances during a billing month, nor are any unused allowances accumulated and/or carried forward over billing months. Local Area Standard is available to all Customers in any service exchange areas listed in Sections 11.4 and 11.5 of this tariff.

6.3.3 MEASURED USE RATE SCHEDULE

Measured use charges are applicable to completed local calls placed on a dial station-to-station basis. Measured use rates accumulate on a monthly basis by Metro Call Band commencing on the billing date of the exchange designation. Measured rates do not apply to calls for Directory Assistance or Call Verification. The service exchange areas for Measured Use are listed in Sections 11.4 and 11.5 of this tariff.

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES6.6.1 DESCRIPTION

The following central office-based call management services are available to individual line customers where Telephone Company facilities and customer configuration permit:

1. Call Waiting

Call Waiting permits the customer engaged in a call to receive a tone signal indicting a second call is waiting, and by operation of the switchhook to place the first call on hold and answer the waiting call. The customer may alternate between the two calls by operation of the switchhook.

Where facilities permit, Tone Block is automatically included with Call Waiting. Tone Block permits Call Waiting subscribers to deactivate Call Waiting prior to initiating a call. The customer deactivates Call Waiting by dialing a special code. The Call Waiting will be automatically reactivated when the call or call attempt is terminated. There is no additional charge for the Tone Block feature of Call Waiting. Call Waiting is available to individual line customers by monthly subscription, which provides unlimited use.

2. Call Forwardinga. Call Forwarding Variable (Subscription)

Call Forwarding Variable permits the customer to automatically transfer all incoming class to a telephone number at another local or toll location. The customer activates Call Forwarding Variable by dialing a special code followed by the telephone number of the location to which calls are to be transferred. The service may be deactivated by dialing another code. The customer must activate and deactivate this service from the station forwarding the calls. The customer may still make outgoing calls while Call Forwarding Variable is active, even while a transferred call is in progress. Calls can not be answered at the base station while Call Forwarding Variable is active.

Call Forwarding Variable is available to individual line customers by monthly subscription, which provides unlimited use of the service.

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)2. Call Forwarding (Cont'd)b. Call Forwarding-Busy Line, Don't Answer

Call Forwarding-Busy Line, Don't Answer (CF-BL, DA) is a service offering that consists of two separate features, Call Forwarding-Busy Line (CF-BL) and Call Forwarding-Don't Answer (CF-DA). On a monthly basis customers may subscribe to one feature or to both features combined. This offering is available to individual line Residence and Business customers, excluding Exchange Access Lines associated with Direct Inward Dialing, WATS, Semipublic, COCOT, Mobile service or other services as determined by The Telephone Company. CF-DA is a Remote Change Service.

Call Forwarding-Busy Line

This feature allows incoming calls to a line that is busy to be forwarded to another line specified by the customer.

Call Forwarding-Don't Answer

This feature allows incoming calls to a line that is not answered after a specific number of rings designated by the customer and within parameters defined by The Telephone Company to be forwarded to another line specified by the customer.

Call Forwarding-Busy Line, Don't Answer features are furnished from central offices where facilities are available, as determined by the Telephone Company. Certain restrictions as to the telephone number to which calls may be forwarded may apply. When calls are forwarded to other services, restrictions or regulations governing those services are applicable. CF-DA is a Remote Change Service.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)2. Call Forwarding (Cont'd)

## b. (Cont'd)

At the time service is ordered, the customer will specify the telephone number to which calls will be forwarded (fixed arrangement) and in the case of CF-DA, the number of rings at the called number before the calls are to be forwarded. When both features are provided, the number to which calls are forwarded may be different for each feature.

Once CF-BL or CF-DA are installed, they will remain in effect until changed by the customer. Any change in the numbers to which the calls are forwarded will require a change order(s) for which the appropriate Product/Service charge will apply.

For CF-DA, the number of rings is subject to limitations as determined by the Telephone Company. Where available, a customer may change the number of rings by calling into a Remote Access Directory Number at no charge. Customer requests for the Telephone Company to change the number of rings are subject to a Product/Service charge. A customer may request that Remote Change capability be blocked from their line at no charge.

It is the responsibility of the CF-BL, DA customer to obtain the necessary permission from the customer to whom the calls will be forwarded.

For each call forwarded, measured local use or toll charges based on the customer's class of service will apply to the line on which CF-BL, DA is installed.

LOCAL EXCHANGE SERVICES

6.6 AUXILLIARY SERVICES (Cont'd)

6.6.1 DESCRIPTION (Cont'd)

3. Forward Service

Forward Service combines Call Forwarding Variable with remote access capability. In addition to the current Call Forwarding Variable feature access method, Special Forward Service provides customers access from any touch-tone or tone-signaling-capable telephone. The customer will dial a Remote Access Directory Number (RADN) and then be guided by voice prompts to enter required information, including a Personal Identification Number (PIN). Calls forwarded by this feature may be subject to local or toll charges as appropriate. Special Forward Service is only offered on a monthly subscription basis. Special Forward is a Remote Change Service.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)4. Three-Way Calling

Three-Way Calling permits the customer, by operation of the switchhook, to place an existing call on hold, dial the telephone number of a third party and establish a local or toll three-way conference call. The customer may talk privately with the third party before establishing the three-way connection and may disconnect the third party to re-establish the original connection. The customer's line establishing the conference call must remain open for the duration of the call or the connection for all callers will be terminated. In addition, where facilities permit, Three-Way Calling may be used by a customer who has Call Waiting with Tone Block to deactivate Call Waiting during a call.

Customers can either pay per use so that a separate charge applies to each activation of this service; or subscribe to the service and incur a monthly charge for unlimited use.

5. Speed Calling (Competitive Service – See Tariff)

Speed Calling (8 and 30) permits the customer to place calls to local or toll numbers by dialing abbreviated codes instead of the complete telephone numbers. Two arrangements of Speed Calling Service are available. Eight-number capacity using one-digit abbreviated codes, and 30-number capacity using two-digit codes. Customers may make changes or entries to their Speed Calling set-up by dialing special codes.

Easy Voice permits the customer to place calls to local or toll numbers by voice commands instead of dialing the complete telephone numbers. Up to 50 names/destinations can be added to a customer's personal directory by dialing a special code. Thereafter, calls to these destinations can be placed by picking up the phone and saying "Call" followed by a name/destination from the customer's personal directory. The system will repeat the name/destination to the customer, for confirmation, and will then place the call to the selected destination.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)6. Home Intercom

Home Intercom allows telephone extensions sharing the same telephone number to be used as an intercom system. This service permits the user to signal other extensions sharing the same telephone number by dialing the telephone number associated with the residence customer's access line. When a Home Intercom call is initiated, all extensions ring with a distinctive ringing pattern. Home Intercom functions on Touch-Tone or dial pulse equipped access lines and will be provided to individual line residence customers by monthly subscription only.

7. Ultra Com Service

Ultra Com Service provides the following capabilities in addition to the Home Intercom feature: a) Intercom Code Dialing which permits the user to initiate intercom calls by dialing one of two available activation codes for a distinctive ringing pattern instead of dialing the telephone number of the user's access line; b) Selective Call Transfer which permits the user to transfer an outside call to an extension by dialing one of the two activation codes provided with Intercom Code Dialing for distinctive ringing; c) Call Hold which permits the user to place an outside call on hold by dialing an activation code, hang up the telephone to consult privately with other household members or to continue the call from another extension; d) Three-Way Calling capability (same as the Three-Way Calling feature description in A.3. preceding). Ultra Com Service will be provided to individual line residence customers by monthly subscription only.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)8. Ring Identification Service

Ring Identification Service enables an individual line subscriber to have up to two telephone numbers (referred to as ("Dependent" numbers) assigned to one dial tone line in addition to the main number (referred to as the "Master" number). Each number when dialed will result in a distinctive ring which facilitates the ability of the customer to determine which number is being called. Where facilities permit, a distinctive Call Waiting tone for each telephone number will be provided for customers who subscribe to Ring Identification Service and Call Waiting. Ring Identification Service is associated with incoming calls only and does not provide a separate dial tone line to place outgoing calls. Ring Identification Service is only offered on a monthly subscription basis.

LOCAL EXCHANGE SERVICES6.6 AUXILIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)

The following central office-based call management services forward the calling party's number to the terminating end, where facilities permit. The services work only on calls that originate from and terminate to appropriately equipped offices. These services provide a variety of subscription and usage-sensitive priced, user-programmable features that manage calls based on customer input directions to the network. These services are automatically available to any single line customer connected to the appropriately equipped offices. The customer has various billing and/or blocking options for the use of these services.

9. Repeat Call

Repeat Call Service allows a calling party to automatically redial the last number dialed, provided there have been no intervening calls. If the called line is found busy, a 30-minute queuing process begins. The calling party is then given an indication that the network will attempt to set up the call when the called line is idle. The Network periodically tests the busy status of the called line until both lines are found idle or the queuing process expires.

Customers can subscribe to this service and pay a monthly charge or use it on a per activation basis. If a customer subscribes to this service, the monthly rate includes unlimited usage. When the customer uses the service on a per activation basis, a usage charge applies each time the service is activated where or not the called party answers.

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)10. Return Call

This service allows a customer to return the most recent incoming call and hear an announcement of the last telephone number that called. To activate Return Call, the customer dials a code, then hears an announcement of the telephone number of the last party that called. If the customer wishes to return the call right away, voice prompts will instruct the customer to dial a certain digit and the call will automatically be returned.

If the called line is found to be busy, a 30-minute queuing process begins. The customer is then given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy/idle status of the called line until both lines are found idle or the queuing process expires.

If a caller uses per call or line blocking, a called party who activates Return Call will not receive the voiceback of the calling party's telephone number and will not be able to return the call through the use of Return Call Service.

A Return Call activation is considered complete and billable after the feature is activated by dialing the first code, regardless of whether or not the call is returned, except in cases where the calling number is not available from the network (e.g., calls from areas not equipped to provide this service) or the originating caller is using per call or line blocking.

All telephone numbers, including Non-Published and Non-Listed telephone numbers will be announced to a Return Call user unless blocked on the originating end.

Customers can either pay per use so that a separate charge applies to each activation of this service; or subscribe to the service and incur a monthly charge for unlimited use.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)11. Priority Call

This service provides one distinctive audible signal to the called customer when a call from one of up to six prespecified telephone numbers. Through an interactive dialing sequence, the customer creates a screening list of up to six telephone numbers in the switching machines. This list can only be created from and for telephone numbers located in appropriately equipped offices. When a call arrives from one of the prespecified telephone numbers, the Priority Call rings distinctively. If the called customer subscribes to Call Waiting, and the call arrives while the line is busy, the Call Waiting tone has a distinctive pattern. For calls from a dial tone line with multiline hunting, the distinctive signal is only produced when the main telephone number has been entered in the screening list.

Customers can either incur a daily usage charge that applies for each day the Priority Call list is active; or subscribe to the service and incur a monthly charge for unlimited use.

12. Select Forward

This service allows the customer to select a maximum of six telephone numbers for forwarding. The customer activates this service by dialing a code to create a screening list via an interactive dialing sequence. This list can only be created from and for telephone numbers located in appropriately equipped offices. Only calls from those telephone numbers in the screening list may be forwarded to the designated telephone number.

For calls from a line within multiline hunting, the call is selectively forwarded only where the main telephone number has been entered in the screening list.

Customers can either incur a daily usage charge that applies for each day the list is active, or subscribe to the service and incur a monthly charge for unlimited use.

Pennsauken, NJ 08110

Effective:

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)13. Call Block

This service gives the customer the ability to prevent future calls from specific telephone numbers and can be activated after receipt of an unwanted call or after entering a telephone number from which the calling party does not wish to receive future calls. To activate the service, the Call Block customer regains dial tone and dials a code, which creates a screening list for a maximum of six numbers. This list can only be created from and for telephone numbers located in appropriately equipped offices. Further calls to the Call Block customer from telephone numbers in the screening list are connected to an announcement stating that the called party is not accepting calls and the Call Block customer's telephone does not ring.

For calls from a line within multiline hunting, the call is blocked only where the main telephone number has been entered in the screening list.

Customers can either incur a daily usage charge that applies for each day the list is active; or subscribe to the service and incur a monthly charge for unlimited use.

14. Call Trace

This service allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only. After receiving the call which is to be traced, the customer dials a code and the traced telephone number is automatically sent to the Telephone Company. The customer using Call Trace is required to contact the Telephone Company for further action. The customer originating the trace will not receive the traced telephone number. The results of a trace will be furnished only to legally constituted authorities upon proper request by them.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)15. Caller ID Service

Caller ID is an optional service which allows a customer to see the telephone number of incoming calls. The calling telephone number will be displayed on a customer-provided display unit. The calling telephone number will be displayed between the first and second rings. All telephone numbers, including Non-Published and Non-Listed telephone numbers, will be displayed unless blocked on the originating end. When a calling party is using blocking, the Caller ID subscriber will receive an indication that the number is blocked.

In addition to the ability to see the telephone number of incoming calls, Caller ID Service may also, as facilities permit, provide a customer with the ability to reject calls from callers who have chosen to block the passage of their telephone numbers on outgoing calls. This feature, called Anonymous Call Rejection (ACR), can be activated or deactivated as the Caller ID subscriber desires by dialing specific codes. When initially provided, ACR is deactivated. ACR will remain on or off until the customer makes a change. When a caller, who has blocked the passage of his/her telephone number, calls a Caller ID subscriber who has activated ACR, he/she will receive an announcement that the customer is not accepting calls from callers who are blocking their telephone number. In addition, in this situation, the Caller ID subscriber's telephone will not ring.

There are several ways to complete a call to a Caller ID subscriber who has activated Anonymous Call Rejection: (1) place the call through a Telephone Company operator; (2) place the call on the Telephone Company network using a Telephone Company telephone calling card; or (3) place the call without blocking. Options (1) and (2) involve charges in addition to the cost of the call.

Caller ID Service is available to customers by monthly subscription only, which provides unlimited use of the service.

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)16. Caller ID Deluxe Service

Caller ID Deluxe is an optional service which, in addition to providing the same capabilities as Caller ID, allows a customer to see the main listed name associated with the telephone number of incoming calls. All telephone numbers, including Non-Published and Non-Listed telephone numbers, will be displayed unless blocked on the originating end. When a calling party is using blocking, the Caller ID Deluxe subscriber will receive an indication that the name and number are blocked.

Caller ID Deluxe may also, as facilities permit, provide a customer with Anonymous Call Rejection, the feature that provides the ability to reject calls from callers who have chosen to block the passage of their telephone numbers and associated main listed names on outgoing calls.

Caller ID Deluxe Service is available to customers by monthly subscription only, which provides unlimited use of the service.

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)17. Blocking

A calling party may block the passage of his/her telephone number, associated main listed name and voiceback of calling identification information to users or subscribers to Optional Central Office Services which utilize Signaling System 7 (SS7) technology. Blocking will also prevent call completion through the use of Return Call Service.

Customers have two blocking options as follows:

a. Per-Call Blocking

To activate per-call blocking, a customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per-call blocking, and it is provided on an unlimited basis. Per-call blocking is available to all customers in the Telephone Company's serving territory.

b. Line Blocking

Line Blocking must be added to a customer's line by contacting the Telephone Company's business office and having a service order issued. All calls are automatically blocked when a customer subscribes to line blocking unless the blocking feature is deactivated.

If a customer subscribes to line blocking, he/she can deactivate blocking by dialing a special code prior to placing a call. Blocking will be deactivated for that outgoing call only.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)17. Blocking (Cont'd)

As facilities permit, a line blocking customer will be provided with a separate code to deactivate blocking, which is different from the per call blocking code. Where this separate code is not available, the code for per-call blocking and the code to deactivate line blocking will be the same. Line blocking is available to all customers in the Telephone Company's serving territory.

Line blocking is provided without charge, except as discussed in the rate section of this Tariff.

Customers who use either per-call blocking or line blocking may be unable to complete calls to Caller ID/Caller ID Deluxe subscribers who have activated the Anonymous Call Rejection feature of Caller ID/Caller ID Deluxe Service. If a customer using blocking calls a Caller ID/Caller ID Deluxe subscriber who has activated Anonymous Call Rejection, he/she will hear an announcement that the Caller ID/Caller ID Deluxe subscriber is not accepting blocked calls. There are several ways to complete a call to a Caller ID/Caller ID Deluxe subscriber who has activated Anonymous Call Rejection: (1) place the call through a Telephone Company operator; (2) place the call on the telephone Company network using a Telephone Company telephone calling card; or (3) place the call without blocking. Options (1) and (2) involve charges in addition to the cost of the call.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)18. Additional Central Office Based Call Management Services

## A. Description

The following Open Network Architecture Complementary Network Services (CNS) will be provided, upon request, on an Individual Case Basis where facilities permit. These CNS are not subject to the regulations as set forth in this tariff.

a. Call Forwarding - Multiple Simultaneous Calls Interswitch

Call Forwarding - Multiple Simultaneous Calls Interswitch is an arrangement which provides the capability to specify the number of simultaneous incoming calls to forward from the same number to a hunt group or equivalent arrangement such as DID when the forwarding number and the hunt group (or equivalent) are served by a different central office switch.

The maximum number of multiple simultaneous call forwarding arrangements is Telephone Company-defined on a per-line basis, and on the basis of the type of call forwarding, at the time of service order entry.

---

LOCAL EXCHANGE SERVICES6.6 AUXILLIARY SERVICES (Cont'd)6.6.1 DESCRIPTION (Cont'd)18. Additional Central Office Based Call Management ServicesA Description (Cont'd)b. Call Forwarding – Variable - Activation Without Courtesy Call

Call Forwarding – Variable - Activation Without Courtesy Call is an arrangement which provides the customer with the ability to activate the call forwarding variable feature without completing a call to the forward-to number.

c. Shared Speed Calling

Shared Speed Calling is an arrangement which will permit a customer's clients to access a speed calling list and to call a customer by dialing one or two digit(s) instead of seven or ten digits. The customer controls the speed calling list and determines which telephone numbers the clients will be able to access via shared speed calling, as well as the abbreviated code assigned to each number. The customer must order the service from the Telephone Company before a customer's client can have access to the shared speed calling list. Each customer's client's line must be associated in the switch software with the customer established list.

6.6.2 RESIDENTIAL RATES

A. Nonrecurring Rates

The following nonrecurring service charges apply to change orders for subscription Optional Central Office Services. One charge applies per line, per order regardless of the number of services being changed or added. The nonrecurring Product/Service Charge is in addition to applicable charges for other work being performed.

	<u>Nonrecurring Product/Service Charge*</u>
a. Change orders for subscription Optional Central Office Services, per line, per order	\$5.00
b. Optional Central Office Usage Services Service Reactivation, per line#	5.00
c. Change PIN for Remote Access Service, per change by Telephone Company**	5.00
d. Change Ring Identification Service, per change** (Change Call Forwarding Arrangement, standard ringing and associated tone patterns, or telephone number of dependent number)	5.00

NOTES:

- \* Appropriate residence rates are applicable to Feature Group A and Lineside Basic Service Arrangement (BSA) Switched Access Service.
- # Applies to customers who have previously had usage service(s) removed. These charges are not subject to any waiver stated in this or any other sections of this tariff. One charge applies per line regardless of the number of services reactivated.
- \*\* Applies to customers who have previously established service. These charges are not subject to any waiver stated in this or any other sections of this tariff.

e. Line Blocking++	\$10.00
f. For subscription requests received within a 90-day-period following the initial provision of central office facilities, the introduction of new services, or the enhancement of existing services, the Company will waive the nonrecurring Product/Service Charge for the establishment of selected Optional Central Office Services. This provision does not apply to Centrex customers.	

NOTES:

- \* Appropriate residence rates are applicable to Feature Group A and Lineside Basic Service Arrangement (BSA) Switched Access Service.
- ++ The initial request for line blocking will be provided free of charge for all new and existing customers upon request to the Telephone Company's business office. However, if a customer subscribes, disconnects, and then reconnects line blocking at the same address, a nonrecurring product/service charge will be charged. The nonrecurring charge will not, under any circumstances, however, be applied to victims of domestic violence receiving services from a domestic violence program or protected by court order, social welfare agencies such as women's shelters, health and counseling centers, public service hotlines and the staff thereof.

## B. Monthly Rates (Subscription)

## 3. Optional Central Office Services Package #1

Residence customers who subscribe to:

- Caller ID Deluxe
- Call Waiting
- Call Forwarding-Busy Line, Call Forwarding-Don't Answer, or
- Call Forwarding-Busy Line/Don't Answer

will be charged \$11.49 per month, per line for these three services and not the Individual Monthly Rate for each service.

This package rate applies only if the customer subscribes to the entire package. If the customer discontinues one or more of the services in the package, the appropriate individual monthly rate for each remaining service applies.

If Optional Central Office Services Package #1 is purchased, Call Waiting will not be discounted as described in 3.b. However, if the customer subscribes to additional Central Office Services, Call Waiting would be included in the number of Optional Central Office Services per line in order to calculate the discount described in 3.b on the additional services.

NOTES:

- \* Appropriate residence rates and charges are applicable to Feature Group A and Lineside Basic Service Arrangement (BSA) Switched Access Service.
- † These discounts apply only to applicable Services purchased from this section and any Competitive Services also subject to this discount.
- # The monthly subscription discount can be any combination of Optional Central Office Services. The discount is applied to each service's nondiscounted monthly rate. Customers who subscribe to Ultra Com Service will not receive a separate discount for Three-Way Calling. Customers who subscribe to Special Forward Service will not receive a separate discount for Call Forwarding Variable.

6.8 REPEAT CALL SERVICE

6.8.1 GENERAL

Repeat Call Service allows a calling party to automatically redial the last number dialed, provided there have been no intervening calls. If the called line is found busy, a 30-minute queuing process begins. If a Customer subscribes to this service, the monthly rate includes unlimited usage.

6.8.2 RATES

1. The following rates apply to Repeat Call Service:

	Product/Service Charge		Recurring Rate
	Res.	Bus.	
Add Repeat Call Service (C orders only) per line, per order	\$5.00	\$10.00	-
Repeat Call usage reactivation, per line, Per order	5.00	10.00	-
Repeat Call Service, per line, per month, Res. And Bus.	-	-	\$3.00
Repeat Call Usage, per activation, Res. and Bus.	N/A		\$.75

NOTE:

\* The Company will waive the recurring rate for one month after a customer subscribes to Simple Voice. This Waiver is limited to one time per customer, per line.

LOCAL EXCHANGE SERVICES6.9 CUSTOM INTERCEPT SERVICES6.9.1 GENERAL

1. Custom Intercept Services (CIS) provide intercept arrangements that offer recorded announcements and/or transfer of calls for a time period specified by the customer. The Company Representative negotiates the type of referrals offered to customers when they permanently disconnect, temporarily suspend, or change their line numbers.

## 2. Custom Intercept Services

a. Direct Cut Through (DCT)

Direct Cut Through provides to the caller of a disconnected, temporarily suspended, or changed line number an automatic call transfer to the referral number, without an announcement of the referral number.

b. Cut Through With Referral (CTWR)

Cut Through With Referral uses a recorded announcement to give the caller of a disconnected, temporarily suspended, or changed line number, the number's status and the referral number and offers to transfer the call to the referral number.

c. Personalized Message (PM)

Personalized Message uses a recorded announcement to give the caller of a disconnected, temporarily suspended, or changed line number, the number's status, the customer's name, the customer's new locality (city/town), and the referral number.

d. Cut Through With Personalized Message (CTWPM)

Cut Through With Personalized Message uses a recorded announcement to give the caller of a disconnected, temporarily suspended, or changed line number, a Personalized Message and offers to transfer the call to the referral number.

LOCAL EXCHANGE SERVICES

6.9 CUSTOM INTERCEPT SERVICES (Cont'd)

6.9.2 APPLICATION OF CHARGES

1. The CIS charge is based on the duration of service requested per line number and will appear on the customer's final bill for that number. Usage charges, either local or toll, resulting from the transfer of calls will appear on the monthly bill relating to the referral number and will be payable by the billed party. Originating calls to the intercepted number will be billed the appropriate message usage charge where facilities permit. Toll charges, if applicable, will apply.
2. Customers requesting termination of service prior to the originally-agreed service termination date will be honored, and credit/reimbursement arrangements are available for the unused portion of service. However, customers are responsible for an initial one-month minimum charge, and the monthly charge for each full or partial subsequent month that service was provided. Billing is based on an entire month of service; partial month adjustments are not available.
3. The applicable CIS charges will be billed in advance as a one-time charge. Installment billing will not be provided.

6.9.3 RATES AND CHARGES

	Line Number (1)
	<u>Charge</u>
1. <u>Direct Cut Through</u>	
Residence per Line Number	\$ 9.00
Business per Line Number	15.00
2. <u>Cut Through With Referral</u>	
Residence per Line Number	9.50
Business per Line Number	17.50
3. <u>Personalized Message</u>	
Residence per Line Number	20.00
Business per Line Number	20.00
4. <u>Cut Through With Personalized Message</u>	
Residence per Line Number	21.00
Business per Line Number	25.00

NOTE:

- (1) The Line Number charge is applied to the status of each line number for the length of service requested and paid in advance. For example, if a customer requests CIS for three (3) months, the Line Number charge would be multiplied by three (3) and paid in advance.

LOCAL EXCHANGE SERVICES6.10 REFERRAL SERVICES6.10.1 GENERAL

1. Referral Services announce to the calling party the status of a called party's number and, when appropriate, refers the calling party to a number(s) where the called party can be reached for a specified time period. These services are provided either through a recorded announcement or by a special operator. The Company Representative negotiates the type of referrals offered to customers when they permanently disconnect, temporarily suspend, or change their numbers, or are involved with a media error. These customers can choose between having their numbers referred or having a disconnect message provided to the calling party. Customers whose telephone services re permanently disconnected because of nonpayment are placed on Disconnect Announcement Service without a referral to another number.

6.10.2 APPLICATION OF CHARGES

1. An additional name and number referred or an extension of service are not offered after the original agreement is processed by the Telephone Company.
2. The applicable charges for this service will be billed in advance as a one-time charge. Installment billing will not be provided.
3. For Number-To-Number Referral Service, customers' requests for termination of service prior to the originally agreed service termination date will be honored, and credit or reimbursement arrangements are available for the unused portion of service. However, customers are responsible for an initial one-month minimum charge, and the monthly charge for each full or partial subsequent month that service was provided. Billing is based on an entire month of service; partial month adjustments are not available.

6.12 REMOTE CALL FORWARDING

6.12.1 DESCRIPTION

Remote Call Forwarding (RCF) is a special reverse charge service whereby a call to a telephone number in one exchange (the call forwarding location) is automatically forwarded by Telephone Company central office equipment to another telephone number in the same or different exchange. One RCF path is required for each call simultaneously forwarded. This service is offered only where the terminating telephone number can be dialed direct via the public switched network.

RCF customers can also subscribe to two optional features described below.

1. One Number Service - Utilizes the 890 NXX to provide customers with a single seven-digit telephone number which callers can use to reach the customer Charge Free from any intrastate intraLATA location. A customer may subscribe to the same seven-digit telephone number for multiple LATA's within the state; however, the customer must have a terminating location within each LATA in which they subscribe to One Number Service.
2. Custom Routing Service - Utilizes the 890 NXX to provide customers that have multiple locations within a LATA within the state with the ability to have a single seven-digit telephone number, yet route calls to that telephone number to different locations based upon the Central Office in which the call originated.

A Custom Routing Arrangement is a group of Central Offices a customer designates to terminate at a single location. Central Offices cannot be divided or split for Custom Routing purposes.

LOCAL EXCHANGE SERVICES6.13 SWITCHED REDIRECT SERVICE6.13.1 GENERAL

Switched Redirect Service will enable a customer to redirect all or part of the customer's incoming switched voice and data calls to other telephone numbers of the customer's choice. The redirection can occur on a permanent basis, automatically according to a predetermined parameter, and/or upon command by the customer. This service may be used in the event of a communications failure, cable cut, fire, flood, or any other form of disaster or to redirect the customer's calls for business purposes.

Switched Redirect Service offers three choices, called option columns, to redirect calls to as many as three telephone numbers. It is assumed that the first telephone number will be the dialed number, but it is not a requirement. If the first number listed is other than the dialed number, calls will be redirected away from the dialed number. The customer may designate that the basic call redirection be used in each of the option columns, or, the customer may select a Switched Redirect optional Feature.

LOCAL EXCHANGE SERVICES

6.14 MAKE BUSY ARRANGEMENT

6.14.1 GENERAL

An exchange access line make busy arrangement may be furnished when a customer wishes to control the volume of incoming calls to an exchange access line or lines operated as a group. Control equipment located in the serving central office, a customer-provided control key on the customer's premises and a Metallic channel for miscellaneous purposes are required to provide this service. The make busy arrangement will not be provided on Toll Free Service, coin telephone service or exchange access lines not operated as a hunting group.

6.14.2 RATES

	<u>Product/ Service Charge</u>	<u>Monthly Rate</u>
Make Busy Arrangement		
Central office control equipment (for each eleven or less exchange access lines made busy)	\$188.00	\$4.22

The rates for a Type 1005 channel for miscellaneous apply for the control channel.

This service is furnished subject to the availability of exchange access facilities.

LOCAL EXCHANGE SERVICES

6.15 HUNTING ARRANGEMENT

6.15.1 GENERAL

Exchange access lines arranged as a hunting group may be furnished by control equipment located in the serving central office to provide the capability of completing multiple calls to a customer by dialing one main telephone number.

6.15.2 RATES

A charge of \$32.00 applies to rearrange the configuration of exchange access lines arranged for hunting (includes the addition or deletion of hunting on any or all lines).

No charge applies to arrange exchange access lines for hunting when the arrangement is made coincident with the establishment of the lines. A charge applies to arrange established lines.

6.16 STOP HUNT FEATURE

6.16.1 GENERAL

The Stop Hunt Feature provides a customer with a means of discontinuing trunk hunting at a predetermined point within a number of exchange access lines operated as a group. Control equipment located in the serving central office, a customer-provided control key on the customer's premises and a Metallic channel for miscellaneous purposes are required to provide this service. The stop hunt feature will not be provided on coin telephone service.

6.16.2 RATES

	<u>Product/ Service Charge</u>	<u>Monthly Rate</u>
Central Office control equipment (to remove hunting)	\$38.00	\$4.22

The rates for a Metallic channel for miscellaneous purposes apply for the control channel.

This service is furnished subject to the availability of central office facilities.

LOCAL EXCHANGE SERVICES

6.17 PREFERRED TELEPHONE NUMBER SERVICE

6.17.1 GENERAL

Preferred Telephone Number Service is an optional feature by which a new Customer may request a specific or unique telephone number and fax number which may have special meaning or value to the Customer for use with the Company provided Exchange Access Services. This service provides for the assignment of a Customer requested telephone number (subject to availability) other than the next available number from the assignment control list. The requested telephone number must be an available number in the Customer's normal serving Wire Center or Foreign Exchange or Foreign Central Office, provided according to the Customer's requirements and at the discretion of the Company. Seven or four digits may be provided according to the Customer's requirements and at the discretion of the Company.

6.17.2 CHARGES

a. Preferred Telephone Number Service Charge:

		Preferred Telephone Number Service Charge (1)
1.	Residence Service, per preferred telephone number assigned.....	\$ 25.00
2.	Business Service, per preferred telephone number assigned.....	100.00

NOTE:

6.19 CALL WATCH SERVICE

6.19.1 GENERAL

This service gives Customers the ability to allow or not to allow outgoing calls from their line. In order to establish or change the numbers to allow or not allow outgoing calls, the Customer dials a specific telephone number and, through an interactive dialing sequence, creates screening lists. The Customer may be prompted to enter a Personal Identification Number (PIN). The Customer must create the screening based on various options and limitations. The Customer may make changes to the screening lists at any time.

6.19.2 RATES

	<u>Residence</u>	<u>Business</u>
Product/Service Charge *	\$5.00 (C)	\$10.00
Monthly Rate, per line	\$4.00 (C)	\$ 4.00

- \* The Product/Service Charge does not apply to:
- orders with Call Gate Service if Call Gate Service is ordered on an additional line
  - Personal Identification Number (PIN) changes
  - business customers who subscribe to Call Gate Service within the 90-day period following the initial provision of the service or enhancement of the service

LOCAL EXCHANGE SERVICES6.20 THREE-WAY CALL TRANSFER ON TRUNKS6.20.1 GENERAL

Three-Way Call Transfer on Trunks is an optional service which permits subscribers (e.g. Enhanced Service Providers or ESPs) utilizing interoffice trunk facilities to offer a variety of additional voice mail services to their customers (end users). For example, callers to an end user who reach a voice mailbox can press or dial a digit for assistance and their call will be transferred to an end user designated number. The ESP equipment completes the call transfer and disconnects the voice mailbox without disconnecting the caller. Other applications include a reminder-type service, where the end user of the ESP can send him/herself a message and the call is transferred back to the requesting end user at the designated time.

6.20.2 RATES

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
1. Three-Way Call Transfer, per trunk	\$30.00	\$5.00
2. The Enhanced Service Provider will be billed the appropriate local and toll usage charges associated with the use of this service.

LOCAL EXCHANGE SERVICES

6.21 BRANCH EXCHANGE SERVICES

6.21.1 CALL DIVERTING

A. GENERAL

This service provides automatic identification of station line numbers for each outgoing dialed message toll call and the total charges for measured local use calls. Subsequent billing of these messages is provided through central office facilities at the serving central office. Each station line associated with this service requires a seven digit telephone number.

Outgoing dialed calls which originate from stations equipped with the Automatic Identified Outward Dialing feature but cannot be identified are charged to the main listed number.

B. RATES

	<u>Product/ Service Charge</u>	<u>Monthly Rate</u>
Automatic Identified Outward Dialing Service		
Common Equipment	\$50.00	\$25.00
AIOD Termination per each Dial Tone Line	5.00	5.00

In addition to the rates shown above, appropriate charges apply for a Voice Grade channel.

When AIOD is furnished on a system equipped for DID, the DID numbers may be used for this purpose. If AIOD is provided without DID, or if AIOD is provided different dial numbers than DID, rates for number assignments as specified in the DID Tariff are applicable.

Dial Tone Lines equipped for AIOD service are charged for at the regular Tariff Dial Tone Line rate.

Charges shown are for central office facilities associated with AIOD.

6.21 BRANCH EXCHANGE SERVICES (Cont'd)

6.21.2 CALL DIVERTING <sup>(1)</sup>

A. GENERAL

Dial branch exchange service can be arranged to provide for the placing of toll calls, or both toll and measured local use calls to Metro Call Bands 2-6 only through the system attendant. All other calls may be dialed directly by the station users.

Call diverting is provided only upon contract for a minimum period of 3.

Call diverting is furnished subject to the availability of facilities in the local central office.

Call diverted dial tone trunk lines which are provided from a central office district or exchange other than the central office district or exchange in which the customer is located, and installed subsequent to December 31, 1976 are subject to Type 2006 or Type 2005 Channel charges.

B. RATES

	<u>Product/ Service Charge</u>	<u>Monthly Rate</u>
Call Diverting		
Each dial tone trunk line equipped	\$50.00(2)	\$ 8.50
Minimum Charge for each central office from which Call Diverting is provided	250.00	42.50

6.21.3 DIAL TONE LINE ARRANGEMENT FOR GUEST DIALING <sup>(1)</sup>

(a) GENERAL

Dial tone line arrangement for guest dialing is provided with hotel/motel guest dialing service requiring toll and measured local use to Metro Call Bands 2-6 call diversion. When the customer's service includes message register equipment the dial tone line arrangement for guest dialing includes equipment for message registration.

NOTES:

(1) A maximum installation charge of \$400.00 applies for all dial tone lines equipped at the same time.

Dial tone line arrangement for guest dialing and message register equipment, each dial tone line	50.00	13.70

6.21.4 DIRECT INWARD DIALING SERVICE (DID)

A. GENERAL

This service permits incoming dialed calls from the exchange network to reach a specific station link without the assistance of an attendant through the use of a seven digit number.

DID service requires special central office equipment and is furnished only where facilities permit, in accordance with currently available list of central office codes.

This service is normally provided from the central office which serves the customer's location, if that central office is considered as equipped in that both the necessary facilities and telephone numbers can be made available. If DID cannot be provided from the customer's local serving office DID can be furnished from another DID equipped central office on an FX or FCO basis. In such cases, the FX or FCO rates and regulations specified elsewhere in this Tariff are applicable, in addition to the rates for DID. DID service is furnished with compatible systems.

The monthly and non-recurring charges specified are in addition to the rates shown elsewhere in this Tariff for the services with which this offering is associated.

PRIVATE LINE SERVICE7.0 PRIVATE LINE SERVICES (PLS)

This tariff applies to services that occupy a channel dedicated to its use, which may be furnished jointly by SNiP and other participating companies, as specified for a particular service. The regulations and rates specified herein may be in addition to the applicable regulations and rates specified in other tariffs of SNiP.

7.1 GENERAL

A PLS channel is a path, for electrical or optical communications, between two or more points furnished by means of any type facilities over any route SNiP may elect to use. Channels will be provided based on the type of communications service(s) the client wants to support.

7.2 REGULATIONS

SNiP has the over responsibility for PLS and the channels associated with it, up to and including (at SNiP's option) the network interface device (NID). Where the NID is not provided SNiP will inform the customer. Service is provided on a 24 hour x 7 day a week basis after it is installed according to specifications. Services will be provided wherever they are available. Certain limitations might apply, depending on the type of service.

7.2.1 EXPLANATION OF TERMS

SNiP Private Line Service offers features that include, but are not limited to:

- Analog
- Digital Data Service (DDS)
- Local channels
- Interexchange channels
- Half-duplex (one-way)

---

7.2 REGULATIONS (Cont'd)

7.2.1 EXPLANATION OF TERMS (Cont'd)

- Full duplex (two-way)
- Point-to-point
- Multi-point
- Dedicated Cable-pair option (providing specified local channels and consisting of dedicated complements of cable pairs between a customer and the serving wire center)
- Served Direct (which allows channels between two customer locations in the same exchange, instead of routing the channels through the individual serving wire centers)
- Transmission speeds from 2.4 kbps – 1.544 kbps, depending on the service selected
- High Capacity Digital Service (1.544 Mbps service that can connect either customer locations or to other 1.544 Mbps services)
- Digital Hand-Off Service (1.544 Mbps connection from the customer's premises to the serving wire center, which might carry multiple channels and media of services)

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS

GENERAL: The following provisions apply to all CENTREX SERVICE offerings unless otherwise indicated under the specific service offering.

For dial or manual access arrangements Foreign Exchange mileage charges apply, but no Special Services local channel charge is applicable.

Station mileage charges apply for each station line at all locations more than one airline mile from the serving central office or extension of such central office via a remote switching vehicle for that location.

For identification per Compatible Special Services group of toll and Measured Local Use calls placed over Compatible Special Services, the monthly rate and product/service charge for an unrestricted main station line applies per Compatible Special Services group so arranged.

Special Services Termination (terminal) charges apply to all Compatible Special Services extended to both other Centrex and non-Centrex locations of the same customer.

Incoming access from FX and Toll Free Service lines is furnished on attendant consoles, where provided. Access may also be provided to designated attendant and non-attendant Centrex lines.

8.1 BASIC CENTREX SERVICE

8.1.1 GENERAL: Basic Centrex service is provided where facilities are available and consists of the following features.

- |                                |  |
|--------------------------------|--|
| Add-On Conference - All Calls  | Dial Call Waiting - Selective                      |
| Attendant Consoles(1)          | Direct Inward Dialing                              |
| Attendant Switchboards(2)      | Direct Outward Dialing                             |
| Automatic Callback Calling     | Directed Call Pickup-Barge In or                   |
| Call Forwarding - Busy Line    | Non-Barge In                                       |
| Call Forwarding - Busy Line    | Distinctive Ringing and                            |
| and Don't Answer               | Distinctive Call Waiting Tone                      |
| Call Forwarding - Don't Answer | Intercept to Attendant or Common Call Forwarding - |
| Variable                       | Recorded Announcement                              |
| Call Hold                      | Line Answer - Any Station (where                   |
| Call Pickup                    | console is furnished)                              |
| Call Transfer - Individual -   | Station Line Hunting                               |
| All Calls                      | Station Line Identification                        |
| Call Waiting - Originating     | Station-to-Station Calling                         |
| Call Waiting - Terminating     | System Speed Calling                               |
| Consultation Hold - All Calls  | Touch-Tone   |

NOTES:

- (1) New installations furnished only to extent of existing stock.

## a. Feature Processing Service Charge

A Feature Processing Service Charge applies for each service order required to execute a customer's request for any change, i.e., add, drop, change or rearrange features of existing Centrex lines.

	Nonrecurring Charge
Feature Processing Service Charge	
Change 6 or less appearances of features on a service order	50.00(1)
Change more than 6 appearances of features on a service order	100.00(1)

In addition to the Feature Processing Service Charge, a charge of \$1.00 per line applies for changing the appearances of existing lines in all Centrex Central Office systems appearing in both Sections 2 and 2A of this Informational Tariff, at the customer's request.

A change of line appearance includes:

- changes in telephone numbers
- changes from one pattern of restriction to another
- change unrestricted to restricted or vice versa
- changes in hunting arrangements
- adding features
- dropping features
- changing features
- any combination thereof when the work is performed at the same time on the same line
- changing a Centrex line from loop start to ground start and vice versa.

## NOTE:

- (1) The Feature Processing Service Charge is not applicable when changes are made to existing lines at the same time on the same service order when 4 or more new Centrex main station lines are installed. However, the \$1.00 per line is applicable.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.1 BASIC CENTREX SERVICE (Cont'd)8.1.2 RATES AND CHARGES (Cont'd)

## b. Line Connection Product/Service Charges

A \$45.00 product/service charge applies to each Centrex station line when it is moved to a different demarcation point at the customer's request.

A \$25.00 product/service charge applies to each Centrex station line added to an existing system as part of a conversion from a residence-rated Educational Institution or Hospital Centrex station line or from a station line of another entire Centrex system, when no premises visit is required to perform the work and when ordered in groups of 100 or more station lines, per occasion.

## c. Bulk Partial Disconnection/Reconnection Charge Option for Educational Institutions

In lieu of product/service line connection charges, a non-recurring charge of \$10.00 will apply for each station line disconnected and reconnected under the conditions of this option, when this charge is less than the applicable product/service charges.

To qualify for treatment under this bulk partial disconnection/ reconnection charge option, station lines must be part of an educational institution's Centrex system, must serve the students in their living quarters under the ownership or control of the institution and must be disconnected on a group basis for no longer than a maximum of 120 consecutive calendar days within a 12 month period. The stations must be reconnected within this 120 day period. A full product/service line connection charge will apply to station lines reconnected after this period. One hundred (100) or more Centrex station lines constitute a group for this purpose. For station lines which are bulk disconnected/ reconnected, line swapping via the Centrex Customer Change Feature is not permitted. To initiate line swapping, Telephone Company service orders are required and appropriate tariff charges apply.

Centrex station lines may be disconnected as part of one group and reconnected as part of another group provided that all station lines of a group are ordered, disconnected or reconnected at one time and meet the above conditions.

No referral service will be provided on station lines disconnected on this basis.

The bulk partial disconnect/reconnect charge will apply at the time the affected station lines are reconnected. No monthly rate will be applicable for station lines included under this arrangement while disconnected.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES

As previously stated, Centrex Optional Features are furnished only to the extent that facilities in the central offices permit.

Translation work is required in the central office to add, drop or change features on CENTREX SERVICE. Charges specified elsewhere in this or other Sections of tariff apply, as appropriate, in addition to the following rates and charges.

8.3.1 AUTOMATIC ROUTE SELECTION-BASICGENERAL

Automatic Route Selection - Basic (ARS-B) is an optional feature that provides automatic selection of WATS, Foreign Exchange, compatible Special Services facilities and prearranged alternate routing of direct-out-dialed calls placed from Centrex unrestricted stations and compatible Special Services served from an individual Centrex system. The Automatic Route Selection feature is designed to direct intercity calls to the most economical available route as determined by the subscriber's preselected choice. Automatic Route Selection-Basic is available with final routing to overflow tone. Compatible Special Services may be included as a facility to be selected by ARS-Basic provided these lines can accommodate senderized operation and uniform numbering consistent with the MTS network.

Automatic Route Selection-Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. If no route is available, the call will route to the MTS Network or to overflow tone at the customer's option. Patterns may consist of up to four private routes except when used in conjunction with Outgoing Queuing when the number of permissible routes is diminished to three.

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES (Cont'd)

8.3.1 AUTOMATIC ROUTE SELECTION-BASIC (Cont'd)

A. GENERAL

For calls using FX, WATS or compatible Special Services facilities, the routing may be to entire Number Plan Areas (NPA) or to specified central office codes (NXX) within the NPA's designated by the customer. This is referred to as 3 digit and 6 digit translation respectively.

Following are descriptions of certain terms as used in this offering.

Facility

A facility denotes a specific FX, WATS or compatible Special Services circuit.

Route

A route is a group of one or more facilities of the same type used to complete 7 or 10 digit calls between the same points. (A WATS Band 1 and a WATS Band 3 are considered to be two routes).

Pattern

A pattern is a group of routes arranged to be selected in a fixed sequence specified by the customer, for example:

<u>Pattern #1</u>	<u>Pattern #2</u>	<u>Pattern #3</u>	<u>Pattern #4</u>
FX	WATS Band 1	WATS Band 1	Compatible Special
WATS Band 1	WATS Band 3	WATS Band 2	Services
Compatible Special	WATS Band 5	Compatible Special	FX
Services	Compatible Special	Services	WATS Band 2
DDD	Services	Overflow Tone	WATS Band 3
	DDD		Overflow Tone

PROVISIONS

The customer must subscribe to a sufficient number of facilities which, in the judgment of the Telephone Company, provide an adequate level of service so as to avoid interfering with the service of others or preventing others from making or receiving calls over their telephone service.

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES (Cont'd)

8.3.2 RELEASED LINK OPERATION

Released Link Operation is an arrangement which allows an associated Centrex system to use the attendant service. Incoming calls to the main listed number of the associated system are routed via compatible Special Services to the attendant, who may then perform normal attendant functions on the call. When the call is completed to a station line of the associated system, the compatible Special Services Channel is released from connection and available for other calls.

A monthly rate of \$53.30 applies for each compatible Special Services group which is provided on a Released Link Operation basis.

In addition, apply Special Services mileage and appropriate Special Services Termination.

8.3.3 ADDITIONAL CENTREX STATION LINE CLASSES OF SERVICE

Additional class of service furnished in excess of the allotted number for the particular Centrex serving arrangement.

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Additional Class of Service, each	\$200.00	\$53.30
		<u>Nonrecurring Charges</u>
Subsequent additions within the allotted classes of service, or changes and rearrangements to existing classes of service		\$100.00

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES (Cont'd)

8.3.4 INTERCEPT TO RECORDED ANNOUNCEMENT

Where facilities permit, calls to unassigned and/or disconnected station line numbers may be routed to a recorded announcement which will convey the customer's message.

This feature may not be used by the customer to store, play back, and/or forward messages relating to the customer's internal business.

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Common-Equipment, including four Access Lines	\$200.00	\$106.60
Additional Access Lines, each	15.00	10.65

8.3.5 CIRCULAR HUNTING

Circular Hunting permits the completion of a call to any other station line of a designated group of lines, which is referred to as a hunting group, whether higher or lower numbered, and regardless of which station line in the group was originally dialed.

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Per station line equipped for Circular Hunting	\$15.00	\$8.50

These charges apply in addition to the standard Centrex station line charges.

8.3.6 UNIFORM CALL DISTRIBUTION (UCD)

UCD provides an even distribution of incoming message network and intra-Centrex calls to all available lines of a designated group of station lines, which is designated as a UCD group.

The following optional features are also available for use with UCD service:

- System Control: System Control selectively removes 1 to 20 predetermined station lines from a UCD group, by preventing the associated station line(s) from receiving incoming calls. Operation of a customer-provided Key does not restrict outward calling ability. This feature will be provided only where existing facilities permit.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.6 UNIFORM CALL DISTRIBUTION (UCD) (Cont'd)

- Group Advance

When all station lines of a group are busy, an incoming call can be routed to a designated station line outside of the UCD group, but within the Centrex system, with this feature. Group advance cannot be provided when the UCD has the queuing feature.

- Queuing (UCD/Q)

UCD/Q permits incoming calls, in excess of available Centrex lines in a UCD group, to be held in the central office. Calls held in this manner will be terminated to a station line of the UCD group as it becomes available. The held calls will leave the Queue on a first-in, first-out basis.

Queue slots may not exceed one slot for each Centrex station line in the UCD group, except when Incoming FX/Toll Free Service terminations are provided.

Incoming FX/Toll Free Service terminations are permitted to terminate to a UCD group with Queuing. One additional Queue slot is required for each Foreign Exchange and Toll Free Service line terminated in this manner.

Features of Call Pickup and Call Forwarding - Don't Answer cannot be provided when the UCD group has queuing.

Music on Queue may be provided at the rates shown in Paragraph D.10 following.

- Standard Delay Announcement (SDA)

SDA consists of a common message informing the calling party of a delay before their call will be processed. SDA does not offer individual subscriber identification, and may not be used by the subscriber to store, playback, and/or forward messages relating to the subscriber's internal business. Four access lines must be subscribed to for each individual UCD/Q group accessing the SDA. This service will be provided only where existing facilities permit.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.6 UNIFORM CALL DISTRIBUTION (UCD) (Cont'd)

## - Custom Delay Announcement (CDA)

CDA is an option of UCD with Queuing. It consists of a message informing the calling party of a delay before their call will be processed. The content of the message is dictated by the customer and recorded by Telephone Company personnel. CDA may not be used by the subscriber to store, playback, and/or forward messages relating to the subscriber's internal business. The Telephone Company reserves the right to control the message content.

Four access lines must be subscribed to for each individual UCD with Queuing group accessing the CDA.

This service will be provided only where existing facilities permit.

## - Calls Waiting

Calls Waiting provides the capability to illuminate individual customer-provided lamps, after the oldest call in the Queue has been held for a length of time, pre-determined by the customer. A maximum of three lamps can be associated per Queue. With the multiple lamp option, the second and/or third lamp(s) will generally indicate a progressively longer period of time than the preceding lamps.

NOTES:

- (1) A termination liability of \$3600.00 applies to CDA. This amount decreases by 1/36 per month of service.
- (2) The rates for a Metallic Channel (signal speed up to 75 baud) for miscellaneous purposes from the customer's premises to the central office, as shown in the Special Services Tariff (Pa. P.U.C.-No. 304), apply for the control channel for each customer-provided lamp.

8.3.7 SPEED CALLING

This arrangement permits placing of calls by Centrex station lines to a repertory of frequently called numbers by dialing an abbreviated access code and a speed calling code. Three capacities are available, i.e., a Type I list consisting of between 6 and 10 numbers on a list, a Type II list of up to 30 numbers on a list, and a Type III list consisting of between 70 and 80 numbers on a list of frequently called numbers. The capacities of these lists are dependent on the type of Central Office equipment serving the customer.

Lists of any capacity may be established or changed as required by the control station line user, by dialing the speed calling list access code, the speed calling code and the new number to be placed on the list. Telephone numbers, including routing codes, are limited to a maximum of pre-determined digits as specified by the Telephone Company.

Access to speed calling lists is provided to Centrex station lines on an individual line basis except that station lines of a multi-line hunting group are limited to accessing common speed calling lists.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.8 ELECTRONIC TANDEM SWITCHING (ETS)

Electronic Tandem Switching features are comprised of the following features and will be provided at the customer's option where Central Office facilities permit.

- Automatic Route Selection - Deluxe
- Facilities Restriction Levels
- Time of Day Routing
- Authorization Codes
- Deluxe Queuing
- Station Message Detail Recording To Premises
- Facility Administration and Control
- Traffic Data To Customer (Pollable)
- Uniform Numbering/Automatic Alternate Routing
- Advanced Dialing Plan (ADP)

This service is covered by the Competitive Services Waiver.

Automatic Route Selection - Deluxe (ARS-D)

Automatic Route Selection - Deluxe (ARS-D) provides automatic routing of outgoing calls over alternative customer facilities based on the call destination. The Centrex station user or attendant dials a facilities access code, (e.g., "level 8") followed by a 10-digit DDD number. The Centrex switching equipment routes the call over the first available special facility (such as WATS, FX or other similar compatible facility equipped to accept a DDD-like number), checking in a customer-specified order. DDD overflow may be included as-a final route, or overflow tone (busy) if a Facilities Restriction Level (FRL) is insufficient to complete the call. More Expensive Route tone may be interjected at the customer's option.

When ARS-D is provided in conjunction with Uniform Numbering/Automatic Alternate Routing (UN/AAR), routes may include compatible Special Services to a distant Centrex or PBX system equipped with an ARS-D like capability for subsequent access to the MTS network. When such routing is used, the Facilities Restriction Level (FRL) associated with the call is transmitted to the distant Centrex as a Traveling Class Mark.

Incoming tie lines from subtending locations (i.e., Main, Satellite or Tributary PBX(s)) may be arranged to have automatic access to ARS this permits station users at these PBXs to dial just a single access code-to use-the ARS feature at the Centrex.

Pennsauken, NJ 08110

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.8 ELECTRONIC TANDEM SWITCHING (ETS) (Cont'd)Automatic Route Selection - Deluxe (ARS-D) (Cont'd)With the Time of Day routing

With the Time of Day Routing permits preprogrammed selection of first choice and alternate routes for off-network calls to vary on a time-of-day and day-of-week basis, depending on which of up to three sets of ARS routing patterns is in effect. This permits the customer to take advantage of variations in long distance calling rates or traffic patterns as a function of time. Both Automatic and Manual controls of ARS routing pattern selection are provided.

Preferred routes and alternate routes in patterns will be specified by the customer.

Each WATS band is treated as a separate route.

All rates and charges specified for ARS-D are in addition to the rates and charges for the associated facilities and facility terminations, shown elsewhere in this tariff.

The TOD Routing feature permits a limited number (depending on central office technology) of programmed changes in Pattern Groups per week. When additional ARS-D patterns are required due to TOD changes, rates and charges, as specified in RATES following, apply to each additional pattern.

Centrex call diverting does not function on calls routed via ARS-D.

Facilities Restriction Level (FRL)

The FRL is used in routing calls via Automatic Route Selection-Deluxe. FRL's are associated with each Authorization Code, each station on an ETS Centrex system and each incoming special services group from subtending PBXs to determine both the types of calls and types of facilities within the privileges of the associated user. When the FRL is transmitted over a special services facility to a distant compatible PBX or ETS Centrex system equipped with ARS-D (for call screening at the distant point), it is identified as a Traveling Class Mark (TCM).

The maximum number of Facilities Restriction Levels available for each ETS Centrex system could vary according to available facilities.

All station lines and incoming special services facility terminations with access to ARS-D must be equipped with FRL.

Pennsauken, NJ 08110

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.8 ELECTRONIC TANDEM SWITCHING (ETS) (Cont'd)Controlled Alternate Facilities Restriction Level

Controlled Alternate Facilities Restriction Level is provided only in conjunction with the Customer Administration and Control feature. FRLs associated with stations, incoming Special Services and Authorization Codes may be upgraded or downgraded in accordance with the predetermined alternative set of FRLs.

Authorization Codes

Authorization Codes are an FRL option which provide for a station user to dial a code which overrides the FRL associated with that station line or incoming special services facility. The ETS Centrex requests dialing of the authorization code when the FRL associated with a station line or incoming special services facility has insufficient privileges to complete the call. The Authorization Code is also inspected for validity as a security check. The Authorization Code is recorded in the SMDR-P record of the call when the SMDR-P feature is provided.

Authorization Codes for each customer must consist of a uniform number of digits.

Deluxe Queuing

Deluxe Queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available;

- A Ring-back Queue (RBQ), in which case the calling station goes on hook and is called back when a facility becomes available.
- An Off hook Queue (OHQ), in which case the calling station remains off hook and is held in queue until a facility becomes available.

Calls held in queue beyond a predetermined threshold time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

Deluxe Queuing is available with facilities appearing as the first choice route in ARS-D or UN/AAR patterns.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.8 ELECTRONIC TANDEM SWITCHING (ETS) (Cont'd)Deluxe Queuing (Cont'd)

Calls held in queue with OHQ must be equipped for either a recorded announcement or music.

The text and announcement provided with the Recorded Announcement option will be provided by the Telephone Company.

The music for the Music on Queue option must be provided by the customer.

The Music on Queue option requires a Program Audio channel between the central office and the customer provided music source at the customer premises. This feature is available only with OHQ.

Customer must specify the length of time a call is held in queue (threshold time limit) before overflowing to subsequent routes or to overflow tone.

The customer can select one of two options:

- All OHQ from ETS Centrex stations and Compatible Special Services from subtending locations.
- RBQ on ETS Centrex stations and OHQ on Compatible Special Services from subtending locations.

Station Message Detail Recording to Premises (SMDR-P)

SMDR-P provides a record, on customer-provided magnetic tape equipment located at the customer's premises, of calls originating from Centrex station lines to locations outside of the same Centrex system. Facility groups may also be designated as requiring originating and/or terminating records.

Account Codes are an SMDR-P option which permit a station user to dial a series of digits (code) which will appear in the SHDR-P record for that particular call. The Account Code can be used by the customer for account or project identification. Adding an Account Code to a call, where arrangements have been made to provide this capability, is at the discretion of the station user. Each customer's Account Codes must contain the same number of digits and must not conflict with on-network code assignments.

Pennsauken, NJ 08110

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.8 ELECTRONIC TANDEM SWITCHING (ETS) (Cont'd)Station Message Detail Recording to Premises (SMDR-P)

SMDR-P is not represented to be a provision of billing detail.

Processing of message detail information (SMDR) by the Telephone Company accounting center is not provided with this arrangement.

The customer must designate all station lines in a customer group and/or selected facility groups on which SMDR-P originating and terminating records are to be provided.

Additions or deletions of SMDR-P recording are provided only via Telephone Company service orders.

Where SMDR-P is provided, a detailed record may be made for each completed call. At the option of the customer, arrangements can be made to provide records of calls attempted as well as calls completed.

SMDR-P includes the recording of Account Codes and Authorization-Codes where these optional features are provided.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.8 ELECTRONIC TANDEM SWITCHING (ETS) (Cont'd)Customer Administration and Control

Customer Administration and Control provides access to an ETS Centrex for the purpose of performing administration of ETS capabilities. It is provided by one of two peripheral arrangements - the Customer Administration Center (CAC) and the Local Customer Administration Terminal (LCAT).

Customer Administration Center (CAC)

A customer-provided interactive user terminal provides inputs/outputs to obtain traffic measurements and recent facility assurance data from one or more switching locations.

Local Customer Administration Terminal (LCAT)

A simplified alternative to the CAC, furnished through a customer-provided 300-baud compatible terminal.

The following features may optionally be provided: Facilities Administration and Control, Traffic Data to Customer (Pollable) and Facilities Assurance Reports.

Facilities Administration and Control

Facilities Administration and Control permits customer control of parameters which determine user calling privileges; i.e., Authorization Codes and associated FUL. In addition, FRL's associated with stations, special services facilities and Authorization Codes may be collectively upgraded or downgraded by invoking a predetermined set of FRL's identified as Controlled Alternative FRL'S. Manual control (override) of TOD Pattern Groups and activation or deactivation of queuing is also provided.

Traffic Data to Customer (Pollable)

Traffic Data to Customer (Pollable) permits the customer to poll the switching equipment on a daily or hourly basis to obtain certain traffic measurements relating to specified dial tone line groups and queues. Measurable data include PEG, CCS usage and overflow, and queue abandons and timeouts. Facilities Assurance Reports are also provided. Equipment must be provided by the customer to record the traffic data.

Facility Assurance Reports (FAR)

Facility Assurance Reports (FAR) provide the customer the ability to obtain automatic circuit assurance data via the same equipment utilized to record traffic data. FAR provides the identity of facilities not accessed or facilities constantly off hook during a specified period of time.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.8 ELECTRONIC TANDEM SWITCHING (ETS) (Cont'd)Uniform Numbering/Automatic Alternate Routing (UN/AAR)

UN/AAR permits station users associated with an ETS Center to place calls via compatible special services using a uniform dialing plan. The user dials an access code, followed by a seven digit number which uniquely identifies a customer station. The number consists of a three digit location code and a four digit station line code. When the same access code is followed by a ten digit exchange number, the call is routed via the ARS-D feature. Reduced plans of 4, 5, or 6 digits are also available. Station users at tributary PBXs may use the same plan with the exception of an additional access code. The feature provides the number translation and supervision necessary to route the call.

Automatic Alternate Routing

This optional feature provides automatic routing of calls over up to four alternate groups. The customer may specify a maximum of 180 UN/ARR routing patterns which are lists of facility choices for routing "on-net" calls.

Automatic Overflow to DDD

When DID is provided at the destination PBX and all routes are busy, this optional feature provides for the call to be routed via the MTS network to the exchange number of the called location. The last four digits of the DID station number and the uniform number must be the same.

The customer must specify the first choice route and each subsequent route to each Centrex or PBX System involved.

The customer must notify the Telephone Company when any change in route or routing sequence is desired.

Where calls are routed via the MTS network, the rates and charges specified for Automatic Overflow to DDD, Dial Tone Lines, and toll messages are applicable.

Advanced Dialing Plan (ADP)

The Advanced Dialing Plan (ADP) feature enables an ETS customer to dial a single access code to place calls outside the Centrex system. This feature may not be used by customers with a private network dialing plan. ADP does not support the dialing of 101XXXX.

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES (Cont'd)

8.3.9 MUSIC ON QUEUE

Music on queue is an option for use with any type of queuing, with the exception of the Centrex Attendant Console. A Special Services channel between the Centrex serving central office and the customer-provided music source at the customer's premises, and a music connection arrangement are required at rates specified in other Sections of this tariff.

The rates are as follows:

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Common equipment, each	\$100.00	\$133.00

8.3.10 OUTGOING QUEUING ON WATS

Outgoing Queuing on WATS is an optional feature that enables station users, by dialing the appropriate access code, to have their call held in queue, if all facilities that would normally be used to complete the call are in use. The call is completed without further dialing when a WATS facility becomes available. If no facility becomes available before a predetermined queue time limit expires, the call is advanced to a preselected option. The calling station must remain off hook to retain the call in queue. This feature cannot be accessed from two-way Special Services or a data link console.

Outgoing Queuing on WATS is only provided for Outward WATS simulated facilities groups either level accessed or accessed through Automatic Route Selection-Basic (ARS-B). When used in conjunction with ARS-B, all facilities in the pattern will be scanned for an available route before the call will queue on the designated WATS facility. The maximum number of permissible routes in ARS-B is reduced to three when outgoing queuing is provided. Outgoing queuing is not available in conjunction with ETS.

The customer determines time in queue thresholds. When the threshold time expires, the call may interflow to a higher numbered WATS band queue, complete via the toll network or route to overflow tone. These options are available on a station class of service basis. In addition, these options may be provided in conjunction with specific outward WATS access codes on Non-ARS-B Centrex Systems. Appropriate class of service charges apply for station class of service rearrangements necessitated by the addition of outgoing queuing.

Pennsauken, NJ 08110

Effective:

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES (Cont'd)

8.3.10 OUTGOING QUEUING ON WATS (Cont'd)

Interflow between WATS facilities queues may be controlled by the attendant by the use of customer-provided inhibit inflow or inhibit outflow keys. The inhibit inflow CPE key prohibits the particular WATS band from accepting calls originated for a lower-numbered WATS band. The inhibit outflow CPE key prohibits calls from interflowing to a higher numbered WATS band. When the inhibit outflow CPE key is operated, the time in queue threshold feature is deactivated for existing calls in queue. These calls will remain in queue indefinitely until an idle facility associated with the queue becomes available or the call attempt is abandoned.

Interflow between WATS bands in conjunction with ARS-B preempts normal pattern selection in ARS-B.

During the time in queue, the customer may select the standard offering of silence or the options of a recorded announcement or customer-provided music source.

Priority calling may be provided on an individual station basis. Priority calls are placed in queues ahead of non-priority calls. Priority calls cannot supplant non-priority calls when the queue is full.

Outgoing Queuing on WATS cannot be provided in combination with Station Message Detail Recording to Premises.

Rates are as follows:

A Service Establishment charge of \$725.00 applies for the initial provision of the Outgoing Queuing on WATS feature on a Centrex system.

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Common Equipment, each	\$550.00	\$90.00
Queue, each	580.00	8.50

Queue Threshold time limit	150.00
Inhibit Inflow arrangement	75.00
Inhibit Outflow arrangement	75.00
Overflow arrangement	80.00
Priority, per station	5.00

To change from silence to music or recorded announcement, applicable Tariff charges for the installation of the respective service apply.

NOTES:

- (1) A Metallic Channel (signal-speed up to 75 baud) is required for each inhibit inflow or inhibit outflow arrangement.
- (2) Rates appear in Paragraphs 8.3.6 and 8.3.9 preceding.

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES(Cont'd)

8.3.11 ATTENDANT CONTROL OF FACILITIES (ACOF)

Attendant Control of Facilities (ACOF) provides the attendant the ability, by operating a customer-provided key, to temporarily deny station dial access to any selected private facility access code or group of access codes.

The rates are as follows:

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Central Office Control Equipment, per arrangement	\$30.00	\$4.25

A Metallic Channel (signal speed up to 75 baud) is required for each customer-provided key. Rates for the channel are found in the tariff.

8.3.12 CUSTOMER TRAFFIC RECORD FEATURE (CTRF)

The Customer Traffic Record Feature (CTRF) provides for the collection of traffic data which is associated with the Centrex customer's attendants, private facility groups, simulated facility groups, queues and other miscellaneous counts, in the ESS central office. This information is transmitted to the customer's premises over a dedicated Special Services channel where it may be printed on a teletypewriter or similar compatible device provided by the customer.

Within the limitations of this optional feature offering, the customer may specify the time interval and format of the CTRF informational reports. The time interval schedule includes both the days of the week and the hours during the day when the informational printout is to occur. Printouts may occur only on the hour, quarter hours, or half hour with a minimum report interval of one-half hour.

Automatic Circuit Assurance is an optional feature of CTRF and provides an informational report called Non-Usage Line Scan report or Locked-up Line Scan report on specific lines within a specified facility group(s) (except those lines provided through simulated facilities) which have been continuously idle or busy for the two hours preceding the printing of the report.

When requested, this report is transmitted to the customer via the associated CTRF dedicated facility and terminal every two hours at 15 minutes after the hour.

8.3.12 CUSTOMER TRAFFIC RECORD FEATURE (CTRF) (Cont'd)

The rates are as follows:

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Common Equipment, each (1)	\$500.00	\$239.00
Per line of traffic measurement transmitted at a maximum of one hour intervals, each (2)	5.00	3.45
Per line of traffic measurement transmitted at a maximum of half-hour intervals, each (2)	5.00	5.85
Automatic Circuit Assurance Report Common Equipment, each (3)	150.00	10.65
Subsequent Additions, Changes and Rearrangements		
	<u>Nonrecurring Charge</u>	
Add, change or rearrange printout format, per occasion	\$75.00	

NOTES:

- (1) Dependent upon the serving ESS machine, traffic measurement information will be transmitted from the central office to the customer's premises via a Telegraph Grade (signal speed up to 150 baud) channel or a Voice Grade channel (with data transmission) and received by customer-provided equipment.
- (2) A line of traffic measurement information is defined as a pre-programmed configuration of the informational characters in the format agreed upon by the customer and the Telephone Company.
- (3) The customer may inhibit the printing of the Circuit Assurance Report by use of a customer-provided control key located at his premises. A Metallic Channel (signal speed up to 75 baud) between the customer's premises and the Central Office is required at rates shown in the Special Services Tariff.

8.3.13 DIAL STATION CONFERENCE (DSC) (2)

The Dial Station Conference feature provides any equipped unrestricted station line or non data link attendant line with the ability to establish a conference call of up to six parties (conferees) including the originator. This feature is activated by dialing the DSC access code (only when required) to seize the conference circuit. The conference is then established by placing the appropriate number of calls and operating the switch-hook after each call is answered. At least one Centrex station line of the system must remain a participant for the duration of the conference call.

This feature is available to customers with Basic Centrex service or equivalent service.

The rates are as follows:

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Common Equipment for up to 6 conferees	\$200.00	\$106.60

NOTES:

- (1) This charge applies in lieu of the product/service charge for each line of traffic measurement at half-hour or one hour intervals when changing from one time interval to the other.
- (2) Customers served by digital technology may have conference arrangements with more than 6 conferees.

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES(Cont'd)

8.3.14 ABBREVIATED DIALING

This feature enables stations within a Centrex System to dial a code(s) to reach predesignated station lines or internal facilities such as dial dictation equipment, paging, etc. Abbreviated Dialing allows a station user to dial a mixture of differing length access codes to reach similar or different facilities within the same Centrex system (Example: access code 42 and station numbers 425 and 4256 may be used on the same system).

This feature is only available from a properly equipped ESS Central Office.

The rates are as follows:

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Dialing Code, to add or change, each	\$150.00	\$26.65

8.3.15 CUSTOMER CONTROLLED STATION RESTRICTION

This feature permits the customer to change the status of individual Centrex station lines or groups of Centrex station lines to one or any combination of the following types of call restrictions.

- Incoming Call Restriction prevents individual or groups of selected Centrex station lines from receiving any direct inward dialed calls. When activated, the restricted calls can be routed to the Centrex attendant, a predetermined station line, or to an optional recorded intercept announcement.
- Outgoing Call Restriction prevents individual or groups of selected Centrex station lines from completing a call outside the Centrex system. When activated, restricted calls will be routed to a reorder tone.
- Station-to-Station Call Restriction prevents individual or groups of selected Centrex station lines from receiving intercommunication calls within the Centrex System. When activated, restricted calls are routed to the Centrex Common intercept announcement.

8.3.15 CUSTOMER CONTROLLED STATION RESTRICTION (Cont'd)

- Total Restriction prevents individual or groups of selected Centrex Station lines from making or receiving any calls. When activated, restricted calls are routed to a reorder tone, to the attendant, to an optional recorded intercept announcement or a predesignated station line as appropriate.
  
- Attendant Emergency Override allows the Centrex attendant to override the incoming call restriction imposed upon a station.

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES(Cont'd)

8.3.15 CUSTOMER CONTROLLED STATION RESTRICTION (Cont'd)

Stations to be restricted can be assigned to a minimum of one and a maximum of eight Line Configuration Packages (LCP). Each LCP consists of a prearranged combination of the various restrictions as they are to apply to selected stations or groups of stations. Only one LCP can be in effect at any one time.

Customer-provided equipment is used for changes and to display or print the status of the lines. Restrictions may also be changed from the attendant console or from designated Touch-Tone Centrex Station Lines. This feature also allows the Centrex attendant to override the termination call restriction imposed upon a station.

Initial training of the customer in the use of the Customer Controlled Station Restriction feature is included at no additional charge at the time the feature is installed. Any customer training required after the initial training is at the option of the customer and a Subsequent Training charge will be applied.

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>	<u>Service Establish-ment Charge</u>
Common Equipment, each	\$1,000.00	\$58.40	\$1,100.00(1)
Station Line, arranged for restriction, each	7.00	.60	
Control Equipment for each Centrex station line or console arranged to control station restrictions, each	60.00	2.15	-
Intercept Announcement for Restrictions	(2)	(2)	-

NOTES:

- (1) Only applies once per customer Centrex System regardless of the number of Common Equipment(s) utilized.
- (2) Use rates and charges for Delay Announcement (Standard and Custom) as provided under the Uniform Call Distribution feature shown elsewhere in this Tariff.

Subsequent change of faceplate/trim panel of Inquiry and Control Console, each occasion	50.00

8.3.16 SELECTIVE CUSTOMER CONTROL OF FACILITIES

This feature permits a customer to control access to a particular facility group (or simulated facility group) through activation and deactivation of a customer-provided key. One customer-provided key is associated with each facility group. All traffic, regardless of the source, is denied access to the affected facility group once Selected Customer Control of Facilities is activated. When the facility group is part of an Automatic Route Selection pattern, calls will automatically route to the next facility group in the routing pattern. If there is no alternate route, the caller will receive a reorder tone.

This feature is only available in a properly equipped ESS Central Office.

The rates are as follows:

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>	<u>Service Establish- ment Charge</u>
Common Equipment, per system	\$200.00	\$10.65	\$350.00
Per Facility Group to which access is desired (1)	15.00	8.50	-

NOTE:

8.3.17 FLEXIBLE INCOMING CALL RESTRICTION

This feature provides the ability to temporarily route incoming calls directed to selected Centrex station lines or group(s) of station lines, to other station lines of the same system, the attendant or to an optional recorded intercept announcement. This feature is activated by a customer-provided control key located at the attendant position, at selected station(s), or other customer designated locations.

The optional recorded announcement feature may not be used by the customer to store, play back, and/or forward messages relating to the customer's internal business.

Flexible Incoming Call Restriction when activated, overrides all individual station line terminating features of the stations being restricted.

This feature also provides attendant emergency override to allow an attendant to override the termination restriction imposed upon a station.

This feature is only available from a properly equipped ESS Central Office.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.18. COMMON CENTREX ARRANGEMENT (CCA)

Common Centrex Arrangement (CCA) is an optional service arrangement which permits, a Centrex Customer-of-Record (COR) to offer its Centrex usage and features for use by patrons located on the same premises. CCA may be provided to one or more Centrex systems only when located on the same premises.

CCA may only be provided to Centrex Customers-of-Record who have Basic Centrex Service arranged for Measured Business Usage service. Patrons may have Basic or Centrex Service as offered in this tariff arranged for either Flat or Measured Business Usage service.

Educational institutions and hospitals may be provided a CCA to connect the administration, students, patients and employees residing at the institution or hospital. Such service will be provided only at locations which are designated by the institution or hospital and are acceptable to the Telephone Company, in buildings or portions thereof which are under the institution's or hospital's ownership or control.

The Telephone Company is not party to and assumes no responsibility for any contractual arrangement between the COR and the CCA patrons.

CCA may be provided to one or more Centrex systems when served by the same Central Office designation code. Requests for other system arrangements may be provided at the Telephone Company's discretion with charges based on cost.

When a single Centrex system is provided for a CCA configuration:

- intercom dialing is permitted between CCA participants
- the subscriber to the CCA automatically becomes the Centrex COR and assumes responsibility for CCA and payment of Centrex system and CCA related charges.

Where multiple Centrex systems are combined into one CCA configuration:

- intercom dialing between Centrex systems is permitted,
- one Centrex system subscriber must be designated Customer-of-Record and assume responsibility for CCA and payment of CCA related charges,
- individual Centrex system identity, responsibility for payment of Centrex system charges, and responsibility for contractual arrangements and control over the manner of participation in CCA remain with the Centrex system's subscriber.

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES (Cont'd)

8.3.18 COMMON CENTREX ARRANGEMENT (CCA) (Cont'd)

RATES:

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Common Centrex Arrangement, each (1)	\$1000.00	\$104.00

- (1) Additions or deletions of lines to individual systems in the CCA arrangement will be permitted at current Tariff rates. Charges based on cost will apply to any additions or deletions of systems or system features to the CCA configurations.

8.3.19 CENTREX CUSTOMER CHANCE FEATURE (CCCF)

GENERAL DESCRIPTION

CCCF permits a CENTREX SERVICE customer to access a portion of the Centrex system program to make certain requests for line and feature activations/deactivations, changes, displays and verifications. Customer-provided equipment (terminal, printer, etc.) located on the customer's premises is used to interact with CCCF.

- a. Centrex Station Rearrangement (CSR) customers' CCCF requests to their Centrex program are transmitted between the terminal and their serving Central Office via the exchange network into a dedicated dial-up data port. Customers' access to the Centrex program is unlimited in time and contention-free. The customers' change requests are executed on an immediate basis.
- b. MACSTAR\* is a shared system and serves multiple Centrex customers. Customers' requests to their Centrex program are transmitted between the terminal and the serving Central Office via the exchange network on a dial-up/dial-back basis to a predetermined telephone number. Centrex customers are permitted unlimited time on the system. However, after a period of inactivity, the Telephone Company will discontinue transmission.

\*Registered Trademark of AT&T Technologies.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.19 CENTREX CUSTOMER CHANGE FEATURE (CCCF) (Cont'd)

## PROVISIONS (CSR and MACSTAR)

Residence-rated patient/student lines may be equipped for CCCF activate and deactivate capability only.

If the Centrex system has the Electronic Tandem Switching (ETS) feature, all lines or group of lines equipped for CCCF capability require a Facility Restriction Level (FRL) at rates and charges shown in this Section of the Tariff.

A log on identification code will be assigned by the Telephone Company. The customer must establish their own password. These codes are used to identify authorized users. The customer is solely responsible for the administration and security of their identification code and password.

The Telephone Company reserves the right to inhibit CCCF service in the event of a service affecting condition to the Central Office or affiliated operating support system.

This service is only furnished from Central Offices where equipment needed to provide this service is available.

CSR ONLY

CSR also requires that the customer subscribes to two dial tone line type facilities (one for the CPE terminal and one for the Central Office dial-up data port). Appropriate tariff rates and charges apply for these services.

All lines of the Centrex system must be equipped for CCCF capability with the exception of the following types of lines for which CCCF cannot be provided:

- Lines associated with REAC®
- Lines in a multi-line hunt group
- Lines terminated on the attendant position
- Lines equipped with a special hardware configuration (e.g., ground start, make busy or stop hunt arrangements, registers, etc.)

®Registered Trademark of Bell Atlantic Corporation.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.19 CENTREX CUSTOMER CHANGE FEATURE (CCCF) (Cont'd)PROVISIONS (CSR AND MACSTAR) (Cont'd)CSR ONLY (Cont'd)

During the time between the end of the customer input command and the beginning of each line of output, an acknowledgement (nod) is provided to assure the customer that the request is being processed. The customer must advise the Telephone Company to provide either:

- 1) terminal printout (Processing) , 2) terminal space-backspace, or 3) an audible terminal arrangement. A customer requested 'nod" change can be accommodated on a charge basis per occasion.

The customer has the option of requesting a greeting to confirm system access. Customer requested greeting changes can be accomplished on a charge basis per occasion.

CSR subscribers are not permitted to change CLASS<sup>SM</sup> on Centrex features.

MACSTAR ONLY

MACSTAR requires that the customer subscribe to one dial tone line type facility for the dial up/dial back arrangement. Appropriate tariff rates and charges apply for this service.

MACSTAR subscribers are only permitted to change CLASS<sup>SM</sup> Feature Packages. Individually subscribed CLASS features may not be added, changed, dropped or rearranged via MACSTAR.

If the Company equipment and/or facilities can be adversely affected by allowing customer control of line configuration or options, those specific configurations or options will not be customer changeable. All changes to lines will be governed by switch capabilities.

TRAINING

Initial training of two customer employees in the use of the feature is included at the time CCCF is placed in service. Training of additional employees or customer requested training subsequent to the initial training session, will be on an occasion basis.

Subsequent Software Administration of CCCF by the Telephone Company at the customer's request will be charged on an occasion basis.

<sup>SM</sup>Service Mark of Bell Atlantic Corporation.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.20 AUTOMATIC MESSAGE LINK (AML)

## GENERAL DESCRIPTION

The Automatic Message Link (AML) feature enables customer-provided Voice Store and Forward (VSF) and Simplified Message Desk (SMD) systems to automatically interact and connect with Centrex Service via a data-link.

Within the Centrex system, AML is identified as special multi-line hunt group(s) with a dedicated link(s). Multi-line hunt groups may share a data-link. The data-link terminates in a customer-provided modem at the customer's premises. This modem must conform to the Electrical Industries Association (EIA) standard RS232C interface requirements and must:

- operate in a half or full duplex, asynchronous mode,
- use even parity error detection and standard ASCII code.

When a Centrex system is equipped for AML and a call is placed to a Centrex line equipped with Call Forwarding - Don't Answer, Busy Line and/or Variable and is subsequently transferred to a customer's messaging system or a call is directly placed to a messaging system, the data-link simultaneously transmits the following information:

- the called number,
- the type of Call Forwarding or direct call indication,
- the calling number, if within the Centrex system,
- the message system and message desk terminal numbers.

This information may then be used by the VSF system to activate a recorded announcement, allow the caller to leave a message simply by speaking, and place and store the message in the called party's "mailbox". This same information may be used by the live attendant on a SMD system to identify the called party, provide unique, source-related responses to the caller, and store the caller's message.

The customer-provided messaging system may be directly accessed to input new instructions or to retrieve messages. AML provides a message waiting indicator which can be activated, if provided, by the messaging system.

Additional options available to the multi-line hunt group(s) of Centrex lines include but are not limited to Uniform Call Distribution, Queuing, Recorded Announcements, Make Busy, at rates specified in other Sections of this tariff.

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES (Cont'd)

8.3.20 AUTOMATIC MESSAGE LINK (AML) (Cont'd)

PROVISIONS

The customer has the responsibility for determining the quantity of Centrex lines in the multi-line hunt group(s) based on anticipated traffic and call handling capabilities of the customer's messaging system. The customer must contract for an adequate number of multi-line hunt group lines and related customer-provided premises equipment to permit the use of service without injurious effect on general telephone service.

Premier Messaging Services Interface (PMSI) is available to Centrex customers at rates and regulations as specified in this Company's Messaging Services Interface/Premier Messaging Services Interface tariff.

RATES

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Common Equipment per data link (1)	\$3,000.00	\$265.00

NOTE:

- (1) In addition, Special Services Tariff rates apply for at least one 3002 channel (for each AML data link) to the customer's modem from the central office and for the Centrex lines in the multi-line hunt group(s) accessing the customer's messaging system. The number of 3002 channels required is dependent upon the customer's configuration.

A Feature Processing Service Charge applies when adding or deleting the message waiting indicator.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.21 CENTREX CALL ARRANGEMENTGENERAL

Centrex Call Management (CCM) is an optional feature arrangement which provides a detail record of originating calls, placed by Centrex stations, attendants and compatible Special Services users, over Foreign Exchange (FE) dial tone lines, WATS, compatible Special Services and/or the Message Telecommunications Service (MTS) toll network. Summary records are provided on local calls and directory assistance calls placed over Centrex main station lines.

CCM offers customers three types of call detail:

Unrated Detail - The call detail is provided by originating station number and includes date, time of day, calling number, called number, call duration.

Rated Detail - In addition to the level of detail provided with the Unrated Detail, Rated Detail will provide an estimated charge for originating calls. The rating will be based on standard industry rating tables. Interexchange Carrier (IXC) identification and facility type utilized in completing the call is also provided.

Managerial Reports Package - Managerial Reports provide customers with rated call detail in a report format. The standard reports package includes but is not limited to the following:

- Call Summary Reports
- Call Ranking Reports
- Call Detail Reports

LOCAL USAGE DETAIL, OPTIONAL/STAND-ALONE FEATURE

Local Usage Detail (LUD) recording may be provided as an optional feature of CCM, MDR or as a stand-alone feature. LUD is an arrangement which provides a detail record of measured local, flat rated and metropolitan calls on a per station basis. The detail record includes the calling station number, the called station number, date, time of day, length of call, call band, time of day rate classification, and amount of rate.

When provided as a Stand-Alone Feature the record of Local Usage Detail on the customer's telephone bill is provided in two formats, magnetic tape and telephone bill.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.21 CENTREX CALL ARRANGEMENT (Cont'd)

## GENERAL (Cont'd)

## PROVISIONS

Provision of detail records is not intended or represented to be provision of billing details. No rating or other cost allocation function is furnished on a per message basis.

In order to identify the originating location of calls originated by compatible Private Line users, a station number must be assigned for the compatible Private Line Facility group. A maximum of 24 digits can be recorded on the compatible Private Line facility detail record.

When provided with CCM the record of Local Usage Detail is provided in magnetic tape form (based on standard Industry Tables) and/or on the paper reports basis. The magnetic tape form is available only to those customers who already subscribe to CCM. The magnetic tape is in the tape density and format used by the Telephone Company Revenue Accounting Office furnishing the tape(s). If a customer requests LUD details in magnetic tape form and/or paper reports message charges for each would apply.

LUD is not available for FX lines. LUD charges are applicable in addition to usage charges.

This feature is not provided on residence-rated student or patient lines.

CCM Detail Records provided on mag tape or paper reports are available on a calendar month basis only, and are not available on a customer billing month basis.

CCM is offered only where facilities permit. Local Usage Detail is available where facilities permit.

Call Detail Records are provided where carrier record information is compatible with Centrex Call Management formatting.

The customer must designate the services (described above) and the group or groups of facilities on which CCM is to be provided and CCM detail will be provided on all such services and facilities. The Telephone Company will not be responsible for, or liable to, the customer for errors in detail which result from improper service or facility designations by the customer.

---

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.3 CENTREX OPTIONAL FEATURES (Cont'd)

8.3.21 CENTREX CALL ARRANGEMENT (Cont'd)

PROVISIONS (Cont'd)

Customers must subscribe to this service for a minimum contract period of three (3) months. When a CCM system is disconnected within the contract period, termination charges apply. Termination charges will not apply for CCM systems moved to a location in the same or different central office. Termination charges will be determined based on the monthly rate in effect at the time the service is disconnected and will be due for the remainder of the contract period. These termination charges will be based on the monthly rate and not on the per message rates.

The customer will be charged for the number of call records processed.

Customers who select multiple options will be charged for each of the options.

8.3.22 CENTREX AUTOMATIC CALL DISTRIBUTION (ACD)

- a. Centrex Automatic Call Distribution Service is a Centrex optional feature which provides equitable distribution of large volumes of incoming calls to available call answering positions of the customer (agent positions served by the system. The switching function and distribution of calls is performed in a Telephone Company central office. The Standard Features described in this tariff are included with this service.

Centrex ACD Service can also provide an optional data stream of call events to a compatible customer provided computer. The customer can use the computer to prepare management information reports. This feature also enables the customer to reassign agents to different ACD splits (groups) within the same Centrex ACD system and to modify their ACD system parameters (i.e. Number of calls in queue) using various customer changeable programmed instructions to the Centrex ACD system.

A Centrex ACD system consists of agent and supervisor positions that share common central office equipment and a common ACD central office identification.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.22 CENTREX AUTOMATIC CALL DISTRIBUTION (ACD) (Cont'd)c. FEATURE DEFINITIONS

Abandoned Call Clearing - provides for the removal of a call when a caller abandons either while in an agent queue or after the call is presented to an agent position.

ACD Directory Numbers - provides unique directory numbers used to receive incoming ACD calls.

Agent Key - provides the supervisor with the capability to call a specific agent.

Agent Log In/Log Out - allows the end user to assign a digital code to each individual member of an ACD group that would be used as an identification code.

Answer Agent - permits the supervisor to answer calls from agents.

Answer Emergency - supplies an emergency indication to a supervisor and optionally an automatic conference when an agent activates an emergency key.

Automatic Overflow - allows the customer to specify both the maximum number of calls that can be queued and a maximum anticipated waiting time before newly arriving calls will be sent to a customer specified route instead of being placed in queue.

Call Delay Announcement - provides announcements to callers such as the status of a call (in queue, all positions busy, etc.) when the delay exceeds a customer specified threshold. This feature may not be used by the customer to store, playback, and/or forward messages relating to the customer's internal business.

Call Source Identification - provides for the display of the origin identification of the incoming call at the agent's position.

Call Supervisor - allows the agent to contact the supervisor quickly by depressing a single button.

Call Transfer/Three Way Calling to ACD - allows the agent to transfer calls to another ACD agent. Agents equipped with this feature can also establish calls involving three or more parties.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.22 CENTREX AUTOMATIC CALL DISTRIBUTION (ACD) (Cont'd)c. FEATURE DEFINITIONS (Cont'd)

Called Number Display - Provides a display of the directory number dialed to agents using sets with display.

CompuCALL Data Stream - The CompuCALL Data Stream feature provides raw call processing and telephone network data to a customer-provided host computer system in a format determined by the Telephone Company. Also, the CompuCALL Data Stream feature provides customer-initiated call processing capability enabling customers to re-direct or transfer incoming calls, and make outbound calls.

Display Queue Status - allows a supervisor using a set with display to view the current load status statistics for an ACD split (group).

Emergency Alert - allows the agent to immediately conference a supervisor by depressing a single button. The supervisor will also receive an indication that the agent has an emergency.

Incoming Call Queue - allows incoming calls to be placed in a queue when all agents are busy.

Make Set busy - allows agents to make their positions not available to receive a new ACD or non ACD call.

Management Information Data Stream - provides raw call processing data to a customer provided management information system in a format determined by the Telephone Company. Provides customer change (reconfiguration) capability enabling customers to reconfigure their system parameters to handle incoming traffic loads.

Multi Stage Queue Status Display - allows ACD agents and supervisors to quickly and easily determine the length of time calls are held in queue before being answered.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.22 CENTREX AUTOMATIC CALL DISTRIBUTION (ACD) (Cont'd)c. FEATURE DEFINITIONS (Cont'd)

Night Service - allows the customer to route all new incoming calls to a customer specified destination (a night announcement, another ACD group, an external directory number, etc.). Night Announcements inform callers that the call cannot be completed and to call back at a later time. Night Announcements may not be used by the customer to store, play back, and/or forward messages relating to a customer's internal business.

Night Service Control - provides the ability to activate Night Service for one or more agent splits (groups) within the same customer system.

Not Ready - allows agents to make their positions not available to receive new ACD calls. This allows agents to follow up on transactions without being interrupted by the next call.

Position Status Display - provides basic management information and status of agent positions to administrative personnel.

Queue Slots - a central office facility whereby incoming calls are held waiting the availability of an ACD position.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.22 CENTREX AUTOMATIC CALL DISTRIBUTION (ACD) (Cont'd)c. FEATURE DEFINITIONS (Cont'd)

Queue Status - audits incoming call queues to detect overflow. A customer indicator remains on until the audit determines that the calls for that agent group have resumed normal queuing.

Service Supervising - allows the supervisor to establish a listen only path to an agent and incoming/outgoing call. Service Supervising shall be used by the customer only in the ordinary course of its business for lawful business purposes to listen to non-personal business calls. The customer shall notify its agents that Service Supervising has been installed and that calls may be listened to by supervisory employees of the customer.

Customer must comply with all Federal and State laws and regulations applicable to use of the Service Supervising feature. Customer shall indemnify, defend and hold harmless Telephone Company and its agents, servants and employees, against any and all claims, demands, liabilities, losses, judgements, fines, penalties and expenses, arising out of or resulting from the failure of Customer or its agents, servants or employees to comply with Federal and State laws and regulations applicable to use of the Service Supervising feature.

Zip Tone - provides a short burst of tone sound to alert the agent that an incoming call will be immediately connected.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.22 CENTREX AUTOMATIC CALL DISTRIBUTION (ACD) (Cont'd)

## d. PROVISIONS

- (1) Centrex ACD is an optional feature of Centrex. Customers must provide compatible premises equipment.
- (2) Centrex ACD is available under various payment plan options. Multiple payment plans per customer are permitted.
- (3) Payment plans are available on a month to month basis or for periods of 12 to 36, or 37 to 60 months in either high up-front/low monthly or low up-front/high monthly options.
- (4) The month to month minimum period is one month.
- (5) A customer must subscribe to and maintain a minimum of ten ACD service positions per Centrex ACD system.
- (6) The price of Centrex ACD is varied based on the number of ACD service positions. Prices are determined on a sliding scale. Prices for customers apply to all ACD service positions (agents, supervisors or other positions associated with the ACD system) as the quantity of ACD positions pass defined price discount levels.
- (7) Customers receive 30% queuing based on the total number of ACD service positions. Additional queuing will be available at rates and charges specified in this tariff.
- (8) Optional Centrex ACD features are only available on a month to month basis.
- (9) If Centrex ACD customers under an existing payment plan contract move or upgrade their service and retain the same or greater number of Centrex ACD service positions, Centrex ACD termination liability will not apply as long as the customer signs and fulfills the terms of the new payment plan contract of the same or greater duration. However, the customer must still pay the non-recurring charges applicable to the installation of the service. Centrex ACD termination liability charges will apply to customers who terminate or disconnect service before expiration of an existing payment plan contract or who cancel a payment plan contract before expiration of its term.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.3 CENTREX OPTIONAL FEATURES (Cont'd)8.3.22 CENTREX AUTOMATIC CALL DISTRIBUTION (ACD) (Cont'd)d. PROVISIONS (Cont'd)

Centrex ACD termination charges will be determined as follows:

Average number of ACD service positions (based on a review of actual ACD service positions in service on the second workday in February of each year) multiplied by the applicable payment plan contract multiplied by 80% multiplied by the remaining months of the payment plan contract.

- (10) Minimum Line Requirement applies to ACD customers. In each month of the contract, the customer must pay for no less than 85% of the largest number of ACD positions in service during the contract.
- (11) Suspension of Centrex ACD service is not permitted. If service is disconnected for nonpayment, termination liability charges as described in this tariff apply.
- (12) Centrex ACD Termination Liability charges do not apply for: 1) a change in the length of the payment plan, provided the customer selects a new service period equal to or longer than the former service period and for the same or greater number of Centrex ACD service positions, or 2) for moves within the same central office serving area.
- (13) Centrex Main Station Line Termination Liability applies for Centrex Main Station Lines as stated in the appropriate sections of the Centrex tariff.
- (14) Upon expiration of the payment plan contract period, customers may continue their service with either a month to month or 12-36 month payment plan at the prevailing monthly rate at that time. Customers choosing a 12-36 month extension must pay a one-time service continuation charge identified in this tariff.
- (15) Nonrecurring- charges apply when converting from a month to month to a 12-36 or 37-60 month payment plan.

8.3.30 ROUTING CONTROL

a. Description

Routing Control

Routing Control directs Centrex-originated calls made to destinations outside the Centrex System to alternative private or public facilities to provide efficiencies in traffic handling. Up to three alternative routes, Primary Route, Alternate Route and Second Alternate Route, may be specified by the customer.

Time-of-Day Routing

Time-of-Day Routing permits the preprogrammed selection of the Primary Route, Alternate Route and Second Alternate Route to vary based on the time of day or day of week.

Example of a Routing Control Matrix

Destination	Time	Day	Default	Primary	Alternate	2nd Alt.
				Route	Route	Route
466	1	A	Block	1234	5678	2345
703974	2	B		3456	7890	9876
900			Block			
	TIME			DAY		
	1 08:00-17:00			A M-F		
	2 09:00-12:00			B TU		

b. Provisions

Routing Control

Routing Control is available on outgoing calls only.

The traffic routing choices are provided by and the responsibility of the customer.

Up to three alternative routes can be specified for a call; the Primary Route, Alternate Route and Second Alternate Route.

Time-of-day and day-of-week variances in the Routing Control are provided by and are the responsibility of the customer.

8.3.31 GROUND START CENTREX SERVICE

a. Description

Ground Start-Provisioned Centrex Service is a method of signaling on customer lines in which one side of the two-wire line (typically the "Ring" conductor of the Tip and Ring) is momentarily grounded to obtain dial tone.

b. Provisions

Centrex lines with ground start provisioning will be provided in accordance with the parameters stated in this tariff.

The Telephone Company assumes no liability for the limitations of CPE equipment-feature signaling due to the operating and transmission factors for ground start provisioning.

Ground start provisioning is offered where facilities permit.

All other applicable regulations for Centrex Service, as specified in this tariff.

c. Rates

The following rates apply for Ground Start-Provisioned Centrex Service:

	<u>Product/Service Charge</u>	<u>Monthly Rate</u>
Ground Start Provisioning, each Centrex line		\$5.00

8.3.34 CENTREX ULTRA FORWARD<sup>(1)</sup>

A. Description

Ultra Forward allows customers to activate, deactivate, or change his or her call forwarding service from a remote location. This service is available only where facilities permit as determined by the Telephone Company.

B. Provisions

Centrex Ultra Forward provides Centrex customers with a remote access call forwarding-variable service. Centrex Ultra Forward can be accessed from any touch-tone or tone-signaling-capable telephone.

Customers dial a remote access directory number and are then guided by voice messages to enter information such as their Centrex number equipped with the Centrex Ultra Forward feature, a Personal Identification Number (PIN) , and the number to which calls will be forwarded.

Calls forwarded by this feature are subject to local or long distance message charges and are the responsibility of the customer.

Transmission performance quality cannot be guaranteed on forwarded calls.

When Centrex Ultra Forward is active, it will override all other Telephone Company central office based call forwarding services.

The remote access capability may experience occasional interruptions in service. The Telephone Company is not liable for damaged if for any reason, the service is inoperable.

C. Rates <sup>(2)</sup>

8.4 CENTREX ALTERNATE SERVING WIRE CENTER

8.4.1 GENERAL

Alternate Serving Wire Center (ASWC) is an optional feature which provides a direct transmission path (via a Fiber Optic Feeder Cable) for Centrex Service between the customer's designated premises and a serving wire center separate from the normal serving wire center.

8.4.2 TERMS AND CONDITIONS

- a. The Telephone Company will designate the serving wire center to be used as the alternate. The ASWC feature is available where contiguous wire center serving areas with interconnecting fiber feeder routes exist. Where facilities are not available, special construction rates may apply. Where service is available, provisioning is based on a negotiated interval.
- b. The rate for Alternate Serving Wire Center, as specified following, applies per point of termination, and is in addition to the Station Line Rates and Charges for each Centrex Line provided over the alternate path.

Example: Rate application for a Centrex service connecting a customer premises via ASWC.

- c. The customer premises and the ASWC must be located in the serving territory of the Telephone Company.
- d. In addition to the limitation of availability based on interconnecting facilities, all availability conditions for the underlying Centrex service also apply.
- e. All other terms and conditions of Centrex Service apply.

8.4.3 RATES FOR CENTREX ALTERNATE SERVING WIRE CENTER

- a. Rate Provisions
  - (1) All rates and charges for Local Exchange service are based on those of the alternate serving wire center providing the Centrex service.
  - (2) All initial service establishment charges for Centrex service at the ASWC are applicable.
  - (3) The station mileage charge is based on the airline miles for each Centrex main station line to the ASWC.
  - (4) ASWC must be ordered with groups of 24 Centrex lines through the first 96 lines. After 96 lines, additional service can be ordered in any quantity required.
  - (5) Any future additions, disconnects or changes may not result in less than 24 Centrex lines per group for a point of termination with 96 or less lines.
  - (6) When a customer requests that facilities be routed via an ASWC to a Centrex in a different wire center, applicable FX charges for the channel mileage from the ASWC to the wire center providing the Centrex service apply.

8.5.2 PROVISIONS (Cont'd)

4. Centrex Custom PackageService customers may select one of the following line arrangements for each of their Custom Packagelines:

Unrestricted  
 Long Distance Message Restriction  
 Fully Restricted (Intercommunication Only)  
 700/900/Audiotex Blocked (Originating)

5. Local Usage Options

Standard and Valu-Pak local usage options, as described in Pa. P.U.C.Nos.-180A, 182A, 185B and 185C, are available with Centrex Custom PackageService. One local usage package per Centrex Custom Packagemain station line is available, subject to a maximum number of packages per system as stated below:

<u>System Size</u>	<u>Maximum Number of Local Usage Packages Per System</u>
Up to 20 Lines	15 (C)
21 - 30 Lines	30

6. Transfers from other Centrex Service

No Product/Service Charges will apply for existing lines and features when a customer elects to change from other Centrex Service and Electronic Service Package for Small Business Customers (ESP-SB) to Centrex Custom PackageService providing they are not moving and have completed any current revenue guarantees. Any current termination liability applicable to the existing Centrex Service will apply.

7. Transmission Requirements

A Centrex Custom Packagemain station line is loop start with a 300-400 Hz. bandwidth. The transmission design objectives are a maximum loop resistance of 1300 ohms and no more than 5 DBMS transmission loss at 1004 Hz. Transmission requirements other than those specified may be available if facilities permit at rates developed on an Individual Case Basis.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.5 CENTREX CUSTOM PACKAGE SERVICE (Cont'd)8.5.2 PROVISIONS (Cont'd)

8. When a customer requests a new Centrex Custom Package Service system that requires the installation of additional outside plant or central office facilities and where, in the judgement of the Telephone Company, it is practicable to provide such facilities, the customer will be charged the cost of providing the necessary additional facilities, in addition to the standard rates and charges for Centrex Custom Package Service. The costs for any additional facilities required will be computed on the incremental difference between the costs of new facilities and the costs of existing facilities.
9. Incoming Toll Free Service Access Arrangement incoming calls on Toll Free Service access lines can be terminated on a Centrex Custom Package Service System incoming calls terminated in this manner may be transferred to other lines of the same Centrex Custom Package Service System.
10. Off-Premises Lines  
Centrex Custom Package Service lines can be provided at a separate customer premises. No mileage charges apply to different lines of the same Centrex Custom Package Service system that are located at different premises but situated within the same wire center serving area. However, 2000 and 2012 channel mileage charges apply to different lines of the same Centrex Custom Package system located at different premises and situated in different wire center serving areas.
11. Centrex Custom Package Optional Central office Features  
The features may be available where Telephone Company facilities permit at the rates specified in 8.5.3 following. Feature descriptions and provisions are as specified in this tariff.
12. Optional Centrex Digital Features  
Centrex Digital Service will be provided at the customer's option where the Centrex is served from a compatible digital central office and where Telephone Company facilities permit at the rates specified in 8.5.3 following. Centrex Digital feature descriptions and provisions are as specified in this Section. Only those Centrex Digital Features specified in 8.5.3 following will be available under Centrex Custom Package service.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.5 CENTREX CUSTOM PACKAGE SERVICE (Cont'd)8.5.2 PROVISIONS (Cont'd)13. Split Billing Arrangement

Split billing provides Centrex Custom Package customers with multiple bills for their Centrex Custom Package lines.

Each individual billing number will be treated separately, and the line count will be restarted on each separate bill.

The same billing name, without variation, must appear on all separate bills.

Each location or individual billing number may have one or more Centrex Custom Package lines. The Centrex Custom Package system fails below two lines, it is no longer considered a Centrex Custom Package system and must be converted to Business Dial Tone Lines.

Only one free Directory listing will be provided per Centrex Custom Package system, regardless of the numbers of individual billing numbers or number of bills.

Directory listings for separate, individual billing numbers will be charged at tariff rates.

If a 911 or other surcharge is applicable, it will be restarted on the basis of each separate bill.

Interexchange Carrier Plans may be associated with each separate, individual billed account when requested by the customer. However, the accounts will not be bulked for rating purposes.

14. Custom Package customers must contact the Telephone Company to request the Anonymous Call Rejection (ACR) feature for Caller ID/Caller ID Deluxe Service.15. Rewarding Connections

Centrex Custom Package with Rewarding Connections is an account level discount plan available to Centrex customers who presubscribe all lines on an account to Bell Atlantic's IntraLATA Toll Service. Rewarding Connections offers a discount off of the Custom Package recurring monthly line rate.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.5 CENTREX CUSTOM PACKAGE SERVICE (Cont'd)8.5.2 PROVISIONS (Cont'd)15. Rewarding Connections (Cont'd)

This is an account level discount plan. All numbers billed to a billing telephone number (BTN) are considered an account. Provisioning and functions of Custom Package is not altered in any way.

Customers must presubscribe all Custom Package and non-Custom Package lines on an account to Bell Atlantic's IntraLATA Toll Service. If a customer should presubscribe any line of their account to another IntraLATA toll carrier, the discount for all lines will be discontinued.

Customers with Rewarding Connections may add lines to their Custom Package system and will receive the same discount per line on the additional lines. Except as specified above, all other terms and conditions as specified in Section 2 for Centrex Custom Package service preceding apply.

All other terms and conditions for Rewarding Connections apply.

16. Customer Satisfaction Guarantee

Customers subscribing to this Centrex Custom Package Service are entitled to a full credit of any charges directly associated with the establishment of the service as well as the monthly charges billed for the service, through the date of disconnect. In addition, customers who are not satisfied with their Custom Package Service may have their previous Bell Atlantic Service reinstalled, at no cost, in accordance with the following terms and conditions:

The customer must request that the Telephone Company disconnect the service within 30 calendar days of installation.

Customers who had no previous service and subsequently elect to have their Custom Package Service disconnected will be converted by the Telephone Company to Bell Atlantic Business Dial Tone Lines or Trunks at no cost to them. Customers will not be permitted to convert to a service which has been "Grandfathered".

---

CENTREX SERVICE

8.5 CENTREX CUSTOM PACKAGE SERVICE

8.5.2 PROVISIONS (Cont'd)

16. Customer Satisfaction Guarantee (Cont'd)

The refund of any charges directly associated with the establishment of the service or monthly charges will be applied as a credit to the customer's bill.

Credit refunds will not be available for toll charges incurred, or on E911 and other like surcharges.

Each customer will be entitled to a credit refund, one time per service.

The Customer Satisfaction Guarantee applies to the service as a whole and, not the individual features offered with this service.

The Customer Satisfaction Guarantee does not extend to any Customer Provided Equipment (CPE) used in conjunction with this service, nor does it apply to Time and Material charges incurred.

The Customer Satisfaction Guarantee does not apply to the installation of temporary service.

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS1. Explanation of TermsCustomer Satisfaction Guarantee

Customer subscribing to Centrex Flexibility 2000 Service are entitled to a full credit of any charges directly associated with the establishment of the service and the monthly charges billed for the service through the date of disconnect and may have their previous service reinstalled, at no cost, if not satisfied with their Centrex Flexibility 2000 Service, in accordance with the following terms and conditions.

The guarantee applies to the service as a whole and not individual features offered with this service.

The customer is responsible for notifying the Company to disconnect the service within thirty (30) calendar days of installation and may convert back to their previously subscribed Bell Atlantic service if dissatisfied with their Flexibility 2000 service within the thirty calendar days of the Customer Service Guarantee.

The refund of any charges directly associated with the establishment of service or monthly charges will be applied as a credit on the customer's bill.

Each customer will be entitled to the credit one time per service.

The guarantee applies to the service as a whole and not the individual features offered with this service.

Credit refunds will not be available for toll charges-incurred or E911 or other like surcharges.

The Customer Satisfaction Guarantee does not extend to any Customer Provided Equipment (CPE) used in conjunction with this service.

The Customer Satisfaction Guarantee does not apply to the installation of temporary service.

If a customer elects to have their Flexibility 2000 Service disconnected under the terms of this guarantee, and had no previous Bell Atlantic service, the Company will convert the customer to Business Dial Tone

Lines at no cost to the customer, or they may receive a credit for the charges associated with the establishment of the service. Customers will not be permitted to convert their service to a "Grandfathered" service.

These terms and conditions apply to both month-to-month and contractual payment plan customers.

CENTREX SERVICE

8.0 CENTREX SYSTEM OFFERINGS (Cont'd)

8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)

8.6.2 REGULATIONS (Cont'd)

2. Centrex Location

A Centrex location is defined herein as a physical premises of the customer where Centrex lines are located.

3. Centrex Flexibility 2000 System

A Centrex Flexibility 2000 system consists of the central office switching office equipment and stations connected by Centrex lines (no less than 2) . A system includes only those stations whose inward exchange and toll service is through the customer's main switching location via a single Central Office code (NNX).

4. Minimum Line Requirement

Centrex Flexibility 2000 is provided in the following capacities per system.

<u>Line Capacity Category</u>	<u>Minimum Line Requirement</u>
I	2
II	31
III	76

Centrex Flexibility 2000 Service is offered only as a complete service. The exchange access and intercommunication portions of the Centrex Flexibility 2000 Service lines are not offered separately.

5. Local Usage Options

Standard and Valu-Pak local usage option are available with Centrex Flexibility 2000 Service. One local, usage package per Centrex Flexibility 2000 main station line is available, subject to a maximum number of packages per system as stated below:

<u>Maximum Number of System Size</u>	<u>Local Usage Packages Per System</u>
Up to 20 lines	10
21 to 100 lines	20
Over 100 lines	30 (C)

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)6. Payment Options

A Centrex Flexibility 2000 customer may select either a month-to-month option or a contract period which falls between a minimum of 12 months and a maximum of 120 months for the customer's total system.

Centrex Flexibility 2000 payment options may be selected by billing account number within a customer's system, except as otherwise stated in split billing arrangements.

7. Centrex Line and Revenue Guarantee

Centrex Flexibility 2000 lines are subject to a one-month minimum billing. Centrex Flexibility 2000 contractual agreements for service are subject to a monthly line guarantee for the duration of the contract. The guarantee is based on 80% of the Centrex Flexibility 2000 lines in service at the time the contract is established. Should the customer fall below the minimum line guarantee or disconnect service during the contract period, the current rate per line times the number of lines in deficit will be charged.

8. Changes to a higher Line Capacity Category in the Centrex Flexibility 2000 System

A customer may change to a higher line capacity category at the current rates designed for the higher line capacity category, however, the customer will remain under the original contract period.

9. Changes to a lower Line Capacity Category in the Centrex Flexibility 2000 System

A customer may change to a lower line capacity category at the current rates designated for the lower category, however, the customer will remain under the original contract period and the original minimum line guarantees will apply throughout the original contract period.

---

CENTREX SERVICE8.0 CENTREX SYSTEM OFFERINGS (Cont'd)8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)10. Synchronizing Centrex Flexibility 2000 Service with other service upgrades.

When a Centrex Flexibility 2000 customer with a payment option other than month-to-month upgrades to another Bell Atlantic service of equal or greater revenue value than their Centrex Flexibility 2000 Service, the monthly line guarantee for the Centrex Flexibility 2000 Service will not apply. The contract for the upgraded service must be of the same or greater duration as the Centrex Flexibility 2000 contract and all nonrecurring charges applicable to the installation of the new service apply.

11. Renewal Options and Request for Change in Contract Period

Prior to the expiration of an existing contract period, a customer may extend the contract for another contract period without incurring termination liability charges. The new contract will indicate the designated rates then in effect. The new contract period must be a minimum of 12 months, or as long as the remaining months in the old agreement, whichever is greater, and contain at least as many lines as the original contract. The contract effective date will be the date the customer signs the new contract.

12. Transfer of Contractual Obligation

With the written permission of the Telephone Company, the obligation to pay the Centrex Flexibility 2000 charges for the remainder of the contract period selected may be assigned to another customer, provided there is no change of location, and the new customer is assuming substantially all the assets of the former customer and agrees to pay all amounts that would have been paid by the former customer, and the original customer remains jointly and severably liable for any such amounts. A Transfer Charge of \$100.00 is payable by the new customer.

13. Transfer from Other Centrex Service

When other Centrex Service is changed to Centrex Flexibility 2000 Service under a contractual payment period, the monthly revenue guarantee obligation stipulated in the Telephone Company's applicable tariff may be waived and a new monthly line guarantee, for the duration of the contract period selected, will be established under the Centrex Flexibility 2000 plan.

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)14. Transfer from Other Centrex Service (Cont'd)

The new contract period must be a minimum of 12 months or as long as the remaining months in the old agreement, whichever in greater, and contain at least as many lines as the original contract. No service charges except for the normal Service Order Charge per-order and the one time Common Equipment Charge shall apply to existing Centrex lines provided they are not moved or changed.

15. Disconnects

There is no termination liability for customers who have elected the Centrex Flexibility 2000 month-to-month payment option, except that all Centrex Flexibility 2000 customers with this payment option are subject to a one month minimum revenue guarantee.

When a Centrex Flexibility 2000 system under a contractual payment period, is disconnected prior to the expiration of the contract, the termination liability, which is an amount equal to the monthly line guarantee multiplied by the number of unexpired months in the line guarantee period, will be billed.

16. Relocation

When the customer relocates to a different premises, the contractual obligation will remain in affect. All rates and charges applicable to the Centrex Flexibility 2000 system being relocated still apply.

17. Line Restrictions

Centrex Flexibility 2000 1100 customers may select one of the following arrangements for each of their Centrex Flexibility 2000 lines:

Unrestricted

Long Distance Message Restriction

Fully Restricted (Intercommunication Only) 700/900/Audiotax Blocked (Originating)\*

\*Non-recurring charges per local tariff apply.

---

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)18. Billing Management Services

Centrex Flexibility 2000 Service customers have available the following Billing Management Services:

(A) Billing Agency Code

A billing agency code is defined herein as a code arrangement used to provide billing subtotals for individual agencies within a given customer's account. The billing subtotal will appear as a single customer bill and may not be itemized as separate, split billed accounts.

(B) Split Billing Arrangement

Split billing provides Flexibility 2000 customers with multiple bills for their Centrex Flexibility 2000 lines.

Each Individual billing number will be treated separately, and the line count will be restarted on each separate bill.

The same billing name, without variation, must appear on all separate bills.

Each location or individual billing number, must have at least 1 Centrex Flexibility 2000 line. However, if the Centrex Flexibility 2000 system falls below 2 lines, It will no longer be considered a Centrex Flexibility 2000 system, and will be converted to Business Dial Tone lines.

Only one free Directory listing will be provided Per Centrex Flexibility 2000 system, regardless of the number of individual billing numbers or number of bills.

If a 911 or other surcharge is applicable, it will be restarted on the basis of each separate bill.

---

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)18. Billing Management Services (Cont'd)(C) Split Billing Arrangement (Cont'd)

Interexchange Carrier Plans may be associated with each separate, individual billed account when requested by the customer. However, the accounts will not be bulked for rating purposes.

(D) Installment Billing

A customer who selects the month-to-month payment option may elect to installment bill their nonrecurring charges up to six (6) months. Customers who select a contract payment option may elect to installment bill their nonrecurring charges up to twelve (12) months, but not less than 2 months. Immediate payment of all nonrecurring charges would be assessed if the customer should disconnect their service prior to the end of the installment billing period. If the nonrecurring charges are initially billed in full, the customer may not request a rebilling in installments, installment billing is available on both initial and subsequent activity, and the minimum amount billed on installment cannot be less than \$50.00.

(E) Prepayment

The customer must have a contractual agreement and may prepay up to 100% of the monthly charges contained in Customer's Letter of Election.

The minimum monthly amount that can be prepaid is \$200.00 per month per Prepayment Agreement.

Customers can prepay at any time during their contract. however, customers must prepay for a minimum of six (6) months.

---

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)18. Billing Management Services (Cont'd)(F) Prepayment (Cont'd)

Subscriber Line Charges are not subject to prepayment. customers are subject to normal rate increases.

Any customer who disconnects prior to the expiration of their contractual agreement shall have the Centrex termination charges deducted for the balance of the prepaid amount and the remaining balance, if any, will be credited to the bill. Termination charges in excess of the prepayment balance must still be paid by the customer. Additionally, prepaid amounts will not be refunded.

19. Music On Hold Interface

The Music On Hold feature requires a customer-provided music source and rates and charges for an appropriate central office line to connect customer-provided equipment to the Telephone Company.

20. Other Centrex Features and Capabilities

Except as otherwise specified herein, the regulations, rates and charges for Centrex Service and other Centrex capabilities and features, as specified in this Informational Tariff for Competitive Services, apply.

21. Resale of Centrex Service to Resellers

This Centrex Flexibility 2000 Service is available for resale. The monthly recurring and nonrecurring rates are based on the system size of the user for all payment options.

22. UCD Installation and System Activity Charges

Installation charges are not applicable to Uniform Call Distribution under Centrex Flexibility 2000. All System Activity charges associated with Uniform Call distribution as specified in this Informational Tariff for Competitive Services will apply.

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)23. Standard Line Features

Centrex Flexibility 2000 Standard Line Features will be provided only where adequate facilities permit.

The features Call Transfer, Three-Way Calling, Call Forwarding Busy, Call Forwarding Don't Answer, Call Forwarding Variable, and Conference Arrangement may generate local, IntraLATA toll, or long distance usage charges. If generated, these charges are the responsibility of the customer.

- A. Automatic Callback Calling. This feature permits an originating Centrex Flexibility 2000 line user who attempts an intercommunication call to a busy Centrex Flexibility 2000 line to automatically be connected to that line when both called and calling lines become idle, by dialing an activation code. Automatic Callback Calling will only operate for intercommunication calls between Flexibility 2000 lines of the same Flexibility 2000 system. This feature can be cancelled by the originating station user dialing a deactivation code.
- B. Call Forwarding - Busy Line - All- Calls or Outside. This feature can be provisioned in one of two modes: "All calls", which handles calls from both inside or outside the system, or "Outside", which handles calls from outside the system only. It is a fixed arrangement which routes incoming calls to another specified line, either inside or outside the system, if the intended line is in use.
- C. Call Forwarding - Don't Answer - All Calls or Outside. This feature can be provisioned in one of two modes: "All calls", which handles calls from both inside or outside the system, or "Outside", which handles calls from outside the system only. It is a fixed arrangement which routes incoming calls to another specified line, either inside or outside the system, if the intended line is unanswered, after approximately three ringing cycles.
- D. Call Forwarding - Variable - All Call w/Reminder Ring. This feature is an arrangement which permits a station user to have incoming calls automatically transferred to another line of the system, or to a line outside the system, for temporary periods. The feature is activated by dialing a code, followed by the line number to which calls are forwarded. The feature is deactivated by dialing another code.

Pennsauken, NJ 08110

Effective:

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)23. Standard Line Features (Cont'd)Reminder Ring.

Calls directed to a line in the call forward mode will receive a shortened ring before the call is forwarded. This serves as a reminder to station users that their line is in a call forward mode.

- E. Call Hold This feature is an arrangement which permits an in progress call to be held for extended periods or in order that another incoming call on another line may be answered.
- F. Call Park This feature allows a Centrex Flexibility 2000 station user to park a call against their own telephone number. The parked call can be retrieved from any station by dialing the feature access cods for retrieval and the station line number.
- G. Call Pickup This feature is an arrangement which permits any line of a pickup group to answer incoming calls intended for any other line of the same pickup group.
- H. Call Transfer Inside & Outside Calls. This feature allows an established call to be transferred to another line either within or outside the system,
- I. Call Waiting This feature is an arrangement in which calls to lines of the system which are in use, originated by lines so equipped, are "announced" by a short burst of tone (audible only to the called party) and automatically completed upon termination of the in-progress call, or If the in-progress call is placed on Call Hold by the called party.
- J. Call Waiting – Terminating w/Tone Block. This feature is an arrangement in which all incoming calls on lines already in use are announced, by a short burst of tone (audible only to the called party) and automatically completed upon termination of the in-progress call, or if the in-progress call is placed on hold. Call Waiting - Terminating can be provided on Intragroup nodes (calls originated outside the system) or All Calls made (all intended calls). Call Waiting may be temporarily dedicated prior to initiating a call or during a call in-progress. The station user can deactivate Call Waiting by dialing a special code. The Call Waiting will be automatically reactivated when the call or call attempt is terminated.

---

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)23. Standard Line Features (Cont'd)

- K. Conference Arrangement (1 6-ports)- This feature allows line users to establish conference connections up to six lines, including the originating line, by dialing an assigned access code.
- L. Consultation Hold – All Calls This feature allows A station user to place on hold an in-progress call by operation of the switchhook. The station user is automatically returned to the original call upon completion of the second call.
- M. Directed Call Park - This feature allows Centrex Flexibility 2000 station users to park a call against any Centrex Flexibility 2000 station number appearance. Station users may be required to enter a security code to retrieve the call if desired.
- N. Direct Call Pickup With and Without Barge-in. This feature provides the ability for a call directed to a station line to be answered by any other station user by dialing a code number followed by the station line number. Only one of two arrangements, per system are permitted,

Barge-in, If the call has already been answered, a burst of tone is applied to alert the answering party of the impending presence of a third party. The third party is then bridged into the existing connection.

Non- Barge-in, If the call has already been answered the station user who dialed the access code receives a busy tape.

---

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)23. Standard Line Features (Cont'd)

- O. Executive Busy Override. This feature allows the station user to invoke an override when encountering a busy condition. The station user gains access to a busy station by flashing the switchhook on a non-button station and dialing a feature code. A warning tone is emitted and a three-way call is established. The station invoking override can then hang up and the prior conversation will continue or flash the switchhook, dropping the third party from the conversation.
- P. Common Intercept - Incoming exchange calls to unassigned and/or non-working Centrex Flexibility 2000 lines will be intercepted by a standard announcement which informs the calling party that the called number is not in service. Intercommunication calls to unassigned Centrex Flexibility 2000 lines will be intercepted by a standard central office recorded announcement for Centrex system calls. This announcement will provide a common message that the number is not in service with advice that the in-house directory should be consulted.
- Q. Intercommunications (Intercom). Station-to-station dialing. An arrangement by which station sets on the same Centrex system may communicate with each other by dialing a code without application of message units charges.
- R. Last Number Redial. This feature enables a customer to redial the last called number (up to 24 digits), by depressing a single button or by dialing an access code rather than dialing the entire number.

---

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)23. Standard Line Features (Cont'd)

- S. Line Restrictions- There are four types of line arrangements which customers may select for each of basic Centrex Flexibility 2000 lines.

Unrestricted - An arrangement that has no restrictions on either incoming or outgoing calling.

Long Distance Message Restriction - An arrangement which permits a Centrex Flexibility 2000 line user to dial local service area calls but prevents the origination all long distance calls. In addition, this arrangement is available both with and without 'zero' dialing capability.

Fully Restricted- An arrangement that allows intercom only calling for the Flexibility 2000 basic line user.

700/900/Audiotex Blocked (Originating) -- An arrangement which denies the Flexibility 2000 basic line user the ability to make outgoing calls to 700/900/Audiotex numbers.

Multipath- Call Forwarding(1 - 5 paths), This feature allow the station user to forward simultaneous messages over one line to a destination.

- U. Music On Hold This feature provides a continuous broadcast of music to callers who are waiting for connection to a called party.

- V. Night Service -- This feature allows the routing of calls normally directed to the attendant to be directed to pre-selected lines within the customer group. This feature is provided on a Call Forwarding - Fixed or Call Forwarding - Variable basin.

---

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)23. Standard Line Features (Cont'd)

W. Speed Calling Short (Individual). This feature allows the user to make frequently dialed numbers by using a two digit code. A customer programmable "short" list is provided per line.

Speed Calling Long Distance. This feature allows the user to make frequently dialed numbers by using a two digit code. A customer programmable "long" list (30) is provided per line.

Speed Calling Short (Shared). This feature allows the customer to share the same speed call short list with other station users on the system.

Speed Calling Long (Shared). This feature allows the customer to share the same speed call long list with other station users on the system.

X. Station Line Hunting. Station lines may be arranged in groups so that a call to a busy line in a group will be completed to another line in the group that is not busy. Station line hunting can be provided in series completion, circular or multiline arrangements.

Y. Three Way Calling. This feature allows a station user to establish a 3-way conference by holding any in-progress call, through operation of the switchhook, and then dialing another call. By again operating the switchhook, the station user can connect the two calls.

Z. Touch-Tone - All lines in a Centrex Flexibility 2000 system are equipped for Touch-Tone calling.

AA. Trunk Answer Any Station. This feature allows the station user to answer an incoming exchange network call directed to the main listed number by any line in the Centrex system when the attendant position is in the "night" mode, via the activation of a three digit code.

BB. Uniform Call Distribution (UCD) w/Queuing. This feature provides for the uniform distribution of incoming calls, in order of their arrival, to telephone lines arranged in a multiline hunt group.

Queuing (1 Queue Slot) Allows the customer to receive more calls than the multiline hunt group is designed to handle. This is accomplished by providing the customer (at no cost) with one queue slot.

---

CENTREX SERVICE8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)8.6.2 REGULATIONS (Cont'd)23. Standard Line Features (Cont'd)

CC. Distinctive Ringing. An arrangement which permits the station user to identify the source of incoming calls by a unique ringing pattern.

24. Optional Features

Centrex Flexibility 2000 Optional Features will be provided only where adequate facilities permit.

A. Additional Multi-Port Conference Arrangement. This feature allows line users to establish conference connections in increments up to six lines, including the originating line, by dialing an assigned access code.

B. Digital Facilities Terminations. This feature allows the connection of High Capacity Digital Service to a Centrex. This arrangement converts a 1.544 Mbps bitstream to 24 channels which terminate in a Centrex.

C. MultiPath Call Forwarding (6+ paths). This feature allows the station user to forward simultaneous messages over one line to a destination.

D. Identa Ring. This feature allows the Centrex customer to have one or two additional local numbers (dependent numbers) assigned to the line. Each will have a distinctive ring pattern that is different from the ring pattern associated with the main number assigned to the line. A dependent number is defined as an additional telephone number, serving off an Identa Ring master number, which allows for incoming calls only. The origination of calls from this number is not permitted.

E. Hot Line Service. This feature allows for the automatic termination of an intercommunication call to a preselected line without the originator dialing the call.

---

CENTREX SERVICE

8.6 CENTREX FLEXIBILITY 2000 SERVICE (Cont'd)

8.6.2 REGULATIONS (Cont'd)

25. Rewarding Connections\*

Centrex Flexibility 2000: with Rewarding Connections is an account level discount plan available to Centrex customers who presubscribe to Telephone Company's IntraLATA Toll Service. Rewarding Connections offers a discount off of the Flexibility 2000 recurring monthly line rate.

This is an account level discount plan. All numbers billed to a billing telephone number (BTN) are considered an account. Provisioning and functions of Flexibility 2000 are not altered in any way.

Customers must presubscribe all Flexibility 2000 and non-Flexibility 2000 lines within an account to the Telephone Company for IntraLATA Toll Service. If a customer should presubscribe any line to another IntraLATA toll carrier, the discount for all lines will be discontinued.

The recurring line discount is limited to the first one hundred (100) Flexibility 2000 lines per account. All lines over the initial 100 are not eligible for the recurring line discount.

Customers with Rewarding Connections may add lines to their Flexibility 2000 system and will receive the same discount per line on the additional lines up to one hundred (100) lines per account.

Except as specified above, all other terms and conditions as specified in Section 2 for Centrex Flexibility 2000 Service preceding apply.

4. Product/Service Charges

Product/Service charges for Centrex Flexibility 2000 will be the same as those for Centrex Service as specified in this Tariff.

No Product/Service charge will apply for Centrex Flexibility 2000 optional features if installed initially with the Centrex Flexibility 2000 system. If installed subsequent to the installation of the Centrex Flexibility 2000 system, the appropriate Product/Service order charges as specified will apply.

No service charge will apply for Centrex Flexibility 2000 Billing Management Services for Split Billing if installed initially with the Centrex' Flexibility 2000 system. If a Split Billed account is installed subsequent to the installation of the Centrex Flexibility 2000 system, a one-time nonrecurring charge of \$100.00 applies.

The Feature Processing Service Charge, as described in Section 2 of this tariff, applies to customer-requested changes, i.e., adding, dropping, changing, or rearranging features on existing Centrex Flexibility 2000 lines.

5. Participants in the Centrex Flexibility 2000 with Rewarding Connections plan will receive a usage discount. In addition, Centrex Flexibility 2000 customers are eligible for the following recurring monthly discounts per line:

<u>Billed Revenue</u>	<u>Per Line Discount</u>
\$0.00 - \$100.00	\$0.00
\$100.01 - \$350.00	\$1.50
\$350.01 - \$500.00	\$2.00
\$500.01 - \$1000.00	\$2.50
\$1000.01	\$3.50

---

CENTREX SERVICE8.7 DIGITAL CENTREX SERVICE8.7.1 GENERAL

Customers who upgrade their service to Digital Centrex Service technology must pay the applicable nonrecurring charges for the installation of the upgraded service. Customers whose present central office is upgraded to a Digital Central Office will not be liable for nonrecurring charges for reinstallation of their Centrex service in connection with the Central Office upgrade.

Digital Centrex Service is comprised of the following enhanced features and feature groups and will be provided at the customer's option where facilities and appropriate digital technology are available.

8.7.2 ENHANCED STATION SERVICE1. Provisions

All rates and charges for Digital Centrex Service are in addition to the rates and charges for all other applicable features and services shown in other sections of this Informational Tariff.

Station line features may be selected individually or as a feature package on a per line basis. All rates for these features are in addition to the Centrex main station line rate.

Feature availability is dependent on the type of station equipment provided by the customer. No credit is given on the package rate for features that are not applicable to the customer's station equipment or are not selected by the customer.

The package rate includes one of each feature. Should the customer require additional appearances of some features, these features must be selected on an individual basis.

Electronic Business Sets and Business Sets with Display Capability (Business/Display Sets) require special hardware in the central office. This hardware (interconnect) provides both the voice signals and feature control signaling information simultaneously on a single pair of wires using two separate frequency bands. Business/Display Set Interconnect does not provide ISDN electronic set service.

Customers with Business/Display sets must provide in writing the information required by the Telephone Company to perform the necessary software changes associated with user-defined keys.

---

CENTREX SERVICE8.7 DIGITAL CENTREX SERVICE (Cont'd)8.7.2 ENHANCED STATION SERVICE (Cont'd)2. Description of Service

- (A) Business Set Interconnect - allows a customer-provided digital compatible electronic telephone set (not ISDN) to work with digital central office switching equipment. Software assignable keys and modular add-on units allow users to customize the set with the features that best suit their particular needs.
- (B) Display Set-Interconnect - Allows a customer-provided digital compatible electronic telephone set with display unit (not ISDN) to operate with digital central office switching equipment. Software assignable keys and modular add-on units allow users to customize the set with the features that best suit their particular needs.

The following Display Features are included as part of the Display Set Interconnect, where compatible with customer-provided equipment and when associated features have been selected.

Display Features

Blind Transfer Recall Identification

Call Park Recall Identification

Call Forward Display

Display Called Number

Display Calling Number

Feature Display

3. Description of Display Features - (Available only on Business Sets with Display capability and are included with the Display Set Service)

- (A) Blind Transfer Recall Identification - An alphanumeric message providing the intra-Centrex user group calling party's directory number on the top line of the display and a Blind Transfer Recall message on the lower line of the display.
- (B) Associated feature: Blind Transfer Recall, which is a System feature.
- (C) Call Park Recall Identification - The user is alerted that a call is parked against his/her number by a flashing directory number key and the display of a recall message. If the Distinctive Ringing option is assigned to the customer group, the call will have a distinctive ring. If the set uses a PRK/DCPK key, the key will also flash to indicate a recalled Call Park.
- (D) Associated features: Call Park or Directed Call Park, which are Station features, and Call Park Recall Identification, which is a System feature.

---

CENTREX SERVICE8.7 DIGITAL CENTREX SERVICE (Cont'd)8.7.2 ENHANCED STATION FEATURES (Cont'd)3. Description of Display Features (Cont'd)

- (E) Call Forward Display - Displays both the intra-Centrex user group caller's telephone number and the number being called.
- (F) Display Called Number - On a business set equipped with the optional 32-character alphanumeric LCD, the Display Called Number feature provides the user with visual feedback concerning the called number during the origination, termination, programming and feature-activation operations. The upper line of the display reflects the condition of the call and the lower line of the two-line display displays the digits as they are dialed.
- (G) Display Calling Number - When an incoming call is received, this feature provides the Business Set user with visual feedback concerning the calling number. Only intra-Centrex user group calls will be displayed.
- (H) Feature Display - For the user of a business set equipped with the 32-character display, provides a visual display of user entered data and intra-Centrex user group incoming call information during the use of other Centrex features.

---

CENTREX SERVICE8.7 DIGITAL CENTREX SERVICE (Cont'd)8.7.2 ENHANCED STATION SERVICE (Cont'd)DESCRIPTION OF BUSINESS/DISPLAY SET FEATURES

Automatic Answerback - (Available only on Business/Display Sets) - Allows incoming calls to the primary number of the set to be automatically answered after four seconds. Conversation takes place through a hands-free unit. When the calling party hangs up, the call is automatically disconnected.

Automatic Dial Line - (Available only on Business/Display Sets) - Allows a station user to call a frequently dialed number by pressing the assigned feature key. Although the feature is assigned to the key through the Service Order system, the user is permitted to change the assigned number stored against the feature key.

Automatic Line - Automatic connection between a calling station that goes off-hook and a predetermined location. The calling station does not receive dial tone. Also available as a feature key on a Business/Display set.

Call Park - Allows a Centrex station user to park calls against its own directory number. The parked calls can be retrieved from any station by dialing the feature access code for retrieval and the station line number against which the calls are parked.

Call Waiting Ringback - Intra-Centrex Only - Certain conditions such as another call already waiting or when the called station has activated Call Forwarding prevent a called party with the Call Waiting Terminating feature from getting a Call Waiting tone. The Call Waiting Ringback feature will allow the caller to hear a distinctive ringing if the called party is hearing the Call Waiting tone. This allows the caller to decide whether or not to wait for the called party to answer. Available only in CLASS equipped central offices.

Directed Call Park - Allows Business/Display Sets and other Centrex stations to park a call against any Centrex station directory number appearance. Stations may be required to enter a security code to retrieve the call if desired.

Executive Busy Override (EBO) - Specifies that the line can invoke an override when encountering a busy station. The station user gains access to a busy station by flashing the switchhook on a basic set and dialing a feature code or pressing the EBO button on the Business/Display set. A warning tone is emitted and a three-way call connection is established. The station invoking override can then hang up, allowing the prior conversation to continue. The station may also drop the third party from the connection, by flashing the switchhook or pressing the EBO button a second time.

---

CENTREX SERVICE8.7 DIGITAL CENTREX SERVICE (Cont'd)8.7.2 ENHANCED STATION SERVICE (Cont'd)DESCRIPTION OF BUSINESS/DISPLAY SET FEATURES (Cont'd)Executive Busy Override (EBO) (Cont'd)

Executive Busy Override shall be used only in the ordinary course of business for lawful business purposes by the customer or persons authorized by the customer. A person using Executive Busy Override shall upon being connected to a call immediately notify the other parties to the call that he has been connected to the call. If any other party to the call states that he objects to the person using Executive Busy Override being connected to the call, the person using Executive Busy Override shall immediately terminate his connection to the call.

The customer shall notify its agents, servants and employees and other persons placing calls from stations on its Centrex System that Executive Busy Override has been installed and that calls may be accessed by another station.

The customer and other persons using Executive Busy Override must comply with all Federal and State laws and regulations applicable to use of Executive Busy Override. The customer shall indemnify, defend and hold harmless Telephone Company and its agents, servants and employees, against any and all claims, demands, liabilities, losses, judgements, fines, penalties and expenses, arising out of or resulting from the failure of the customer, its agents, servants or employees, or other persons using Executive Busy Override, to comply with Federal and State laws and regulations applicable to use of Executive Busy Override.

Override Exempt (EBX) - An option of EBO that specifies that the line cannot have override activated against it.

Group Intercom - (Available only on Business/Display Sets) Enables a business set user to access a member of a predesignated subgroup by using abbreviated dialing. The call will terminate on the Group Intercom button on the dialed station. Groups may have a maximum of either 10 members, 100 members, or 1000 members. A business set may be a member of more than one group; however, each group must be represented by its own feature key. Group Intercom arrangements may be comprised of Basic sets and Business/Display sets. The Group Intercom rate applies only when this feature appears on Business/ Display sets.

---

CENTREX SERVICE8.7 DIGITAL CENTREX SERVICE (Cont'd)8.7.2 ENHANCED STATION SERVICE (Cont'd)DESCRIPTION OF BUSINESS/DISPLAY SET FEATURES (Cont'd)

Intercom -- (Available only on Business/Display -Sets) - Allows a business set user to directly terminate on a predesignated telephone by depressing an access key.

If no directory numbers are active on the set, audible ringing is given. The called party may choose to answer by pressing the Intercom key or, after a two-second delay, an automatic connection is made. If any numbers are active, a tone is given in place of ringing, and no automatic connection is made.

Last Number Redial - Enables a subscriber to redial the last called number (up to 24 digits) by depressing a single key or by dialing an access code rather than the entire number.

Last Number Redial - Set - (Available only on Business/Display Sets) Enables a customer with multiple buttons to customize his set for use with Last Number Redial. Customers may elect to redial calls unanswered received on specific buttons or may elect to redial the last incoming unanswered call, regardless of the button which carried the call. A business set may choose to have this feature, instead of Last Number Redial, that redials the last called number from any directory number on the set.

Make Set Busy - Allows directory number appearances to be made busy to incoming calls. The made-busy set is still able to originate calls from any directory number appearance on the set or program features. Multiple Appearance Directory Number group members and Call Termination features, such as Call Waiting, Camp On and Busy Override, will not be made busy.

Make Set Busy Except Group Intercom - (Available only on Business/ Display Sets) - Allows the business set user to continue to receive Group Intercom calls over the speaker when the Make Set Busy feature is activated. Without this feature, Group Intercom calls receive a busy tone or other designated treatment (such as Call Forwarding).

Originating/Terminating Line Select - (Available only on Business/ Display Sets) - Allows line selection options for originating and terminating calls. No line selection requires the user to manually select the originating or terminating line.

---

CENTREX SERVICE8.7 DIGITAL CENTREX SERVICE (Cont'd)8.7.2 ENHANCED STATION SERVICE (Cont'd)DESCRIPTION OF BUSINESS/DISPLAY SET FEATURES (Cont'd)

Originating Line - User may choose Idle Line Select, which automatically connects the user to an idle line when the handset is lifted.

Terminating Line - User may choose Incoming Call Select which automatically connects the user to the line receiving an incoming call when the handset is lifted.

Query Busy Station - (Available only on Business/Display Sets) - Allows the busy/idle status of a set to be monitored, and the querying set alerted when that set becomes idle. The monitored set can be a business set or a basic set. Groups of up to 128 business sets can query the status of one designated station. Up to eight simultaneous requests may be made to monitor the same station. When the station becomes idle, the lamp associated with the Query Busy Station key will flash, and an optional buzz tone-may be provided.

Key Short Hunt - (Available only on Business/Display Sets) - Permits incoming calls to a station to hunt over the directory number appearances on that station in search of an idle appearance on which to terminate. The appearances may be either standard directory numbers or MADN'S, and can include all or a subset of the numbers.

Station Message-Waiting - Permits a Centrex station user to dial a code to retrieve messages from a message center. The message center may be either an Attendant Console or a designated Business Set that has the Attendant Message Waiting feature.

An illuminated lamp on a customer-provided telephone set, a lamp associated with the Message Waiting key on a business set, or stutter dial tone is activated by the message center to indicate that there is a message for the station user.

The Station Message Waiting feature will also provide the Call Request optional feature at no additional charge.

Call Request - An option of Station Message Waiting that allows a station user to request a return call from another station. If a calling station (A) reaches an idle station (B) that doesn't answer, station A can activate the Call Request feature by flashing the switchhook and dialing the Call Request feature activation code. Station A will then hear a confirmation tone, indicating that the request is queued for station B. Station B receives a Call Request indication by means of the message waiting lamp or they hear a stutter dial tone when the handset is lifted. Station B dials the Call Request Retrieval feature code and Station A is then rung back.
