Re: US LEC of Pennsylvania Inc.

Dear Mr. McNulty:

Enclosed please find an original and three copies of the revised initial tariffs of US LEC of Pennsylvania Inc. This tariff is identical to the original filed on March 4, 1999 with the following exceptions:

1. Spacing has been changed so that there are no pages with a single line.
2. Pagination has been changed to ensure that there are no duplicate numbers.
3. In tariff number 3, a change has been made to page 33 to include a reference to Pennsylvania rather than another jurisdiction.
4. Also in tariff number 3, a change has been made to page 70 to delete language which would have required prior notice to the Commission for long distance promotions.
5. In tariff number 2, a page reference was changed in the Table of Contents to accurately reflect that Jurisdictional Reports are located on page 51.

In all other respects, the tariff is identical to that filed on March 4. If you or Commission staff have any questions in regard to this filing, please do not hesitate to call me.

An additional copy has been included to be time stamped and returned.

Very truly yours,

*Linda C. Smith*

SYMBOLS AND TARIFF FORMAT

SYMBOLS

The following symbols shall be used in this tariff for the purpose indicated below:

- C To signify changed regulation or condition.
- D To signify a decrease in rates.
- I To signify an increased rate.

TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.

TARIFF FORMAT (Cont'd)

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

D. Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the check sheet if these are the only changes made to it (*i.e.*, the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

#### 3.1 Introduction

The regulations set forth in this section govern the application of rates for services contained in other sections of this tariff.

#### 3.2 Charges Based on Duration of Use

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- A) Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- B) Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- C) Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- D) Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- E) All times refer to local time.

SECTION 3 - APPLICATION OF RATES

3.3 Rates Based Upon Distance

Where charges for a service are specified based upon distance, the following rules:

- A) Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in the Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

SECTION 3 - APPLICATION OF RATES3.3 Rates Based Upon Distance (Cont'd)

B) The airline distance between any two rate centers is determined as follows:

- 1) Obtain the "V" (vertical) and "H" (horizontal) coordinates for each rate center from the above-referenced Bellcore document.
- 2) Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- 3) Square each difference obtained in step (2) above.
- 4) Add the square of the "V" difference and the square of the "H" difference obtained in step (3) above.
- 5) Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- 6) Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

7) FORMULA =

$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

Operator Handled Calling Services are provided to Customers and Users of Company-provided Local Exchange Services, and to Customers and Users of exchange access lines which the Customer has pre-subscribed to the Company's Pre-Subscribed MTS.

8.1.2 Definitions

Person-to-Person: Calls completed with the assistance of a Company operator to a particular person, station, department, or PBX extension specified by the calling party. Charges may be billed to the Customer's commercial credit card and/or LEC calling card, calling station, called station, or a designated third-party station.
