**RE: A-00122618 – RAILROAD CROSSING ALTERATION – E. PENNVIEW AVENUE –
Shaler, Allegheny, Pennsylvania**

Verizon Business ID: 6203-2010

Dear Sir or Madam:

MCI has been notified by your office regarding the above referenced project.

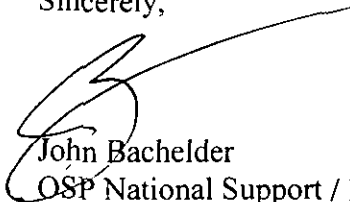

For your records, in reviewing the design prints received from your office, it has been determined that MCI does have facilities within your construction area and a conflict may exist. In order to avoid this conflict, it will be necessary for your construction to maintain a minimum of twenty-four (24) inches vertical clearance when crossing MCI cable and sixty (60) inches horizontal clearance when your running line is parallel to our facilities.

Since we do not have all of the as-builts in-house at this time, **please call our field representative, Ken Montanari at 412-209-4201.**

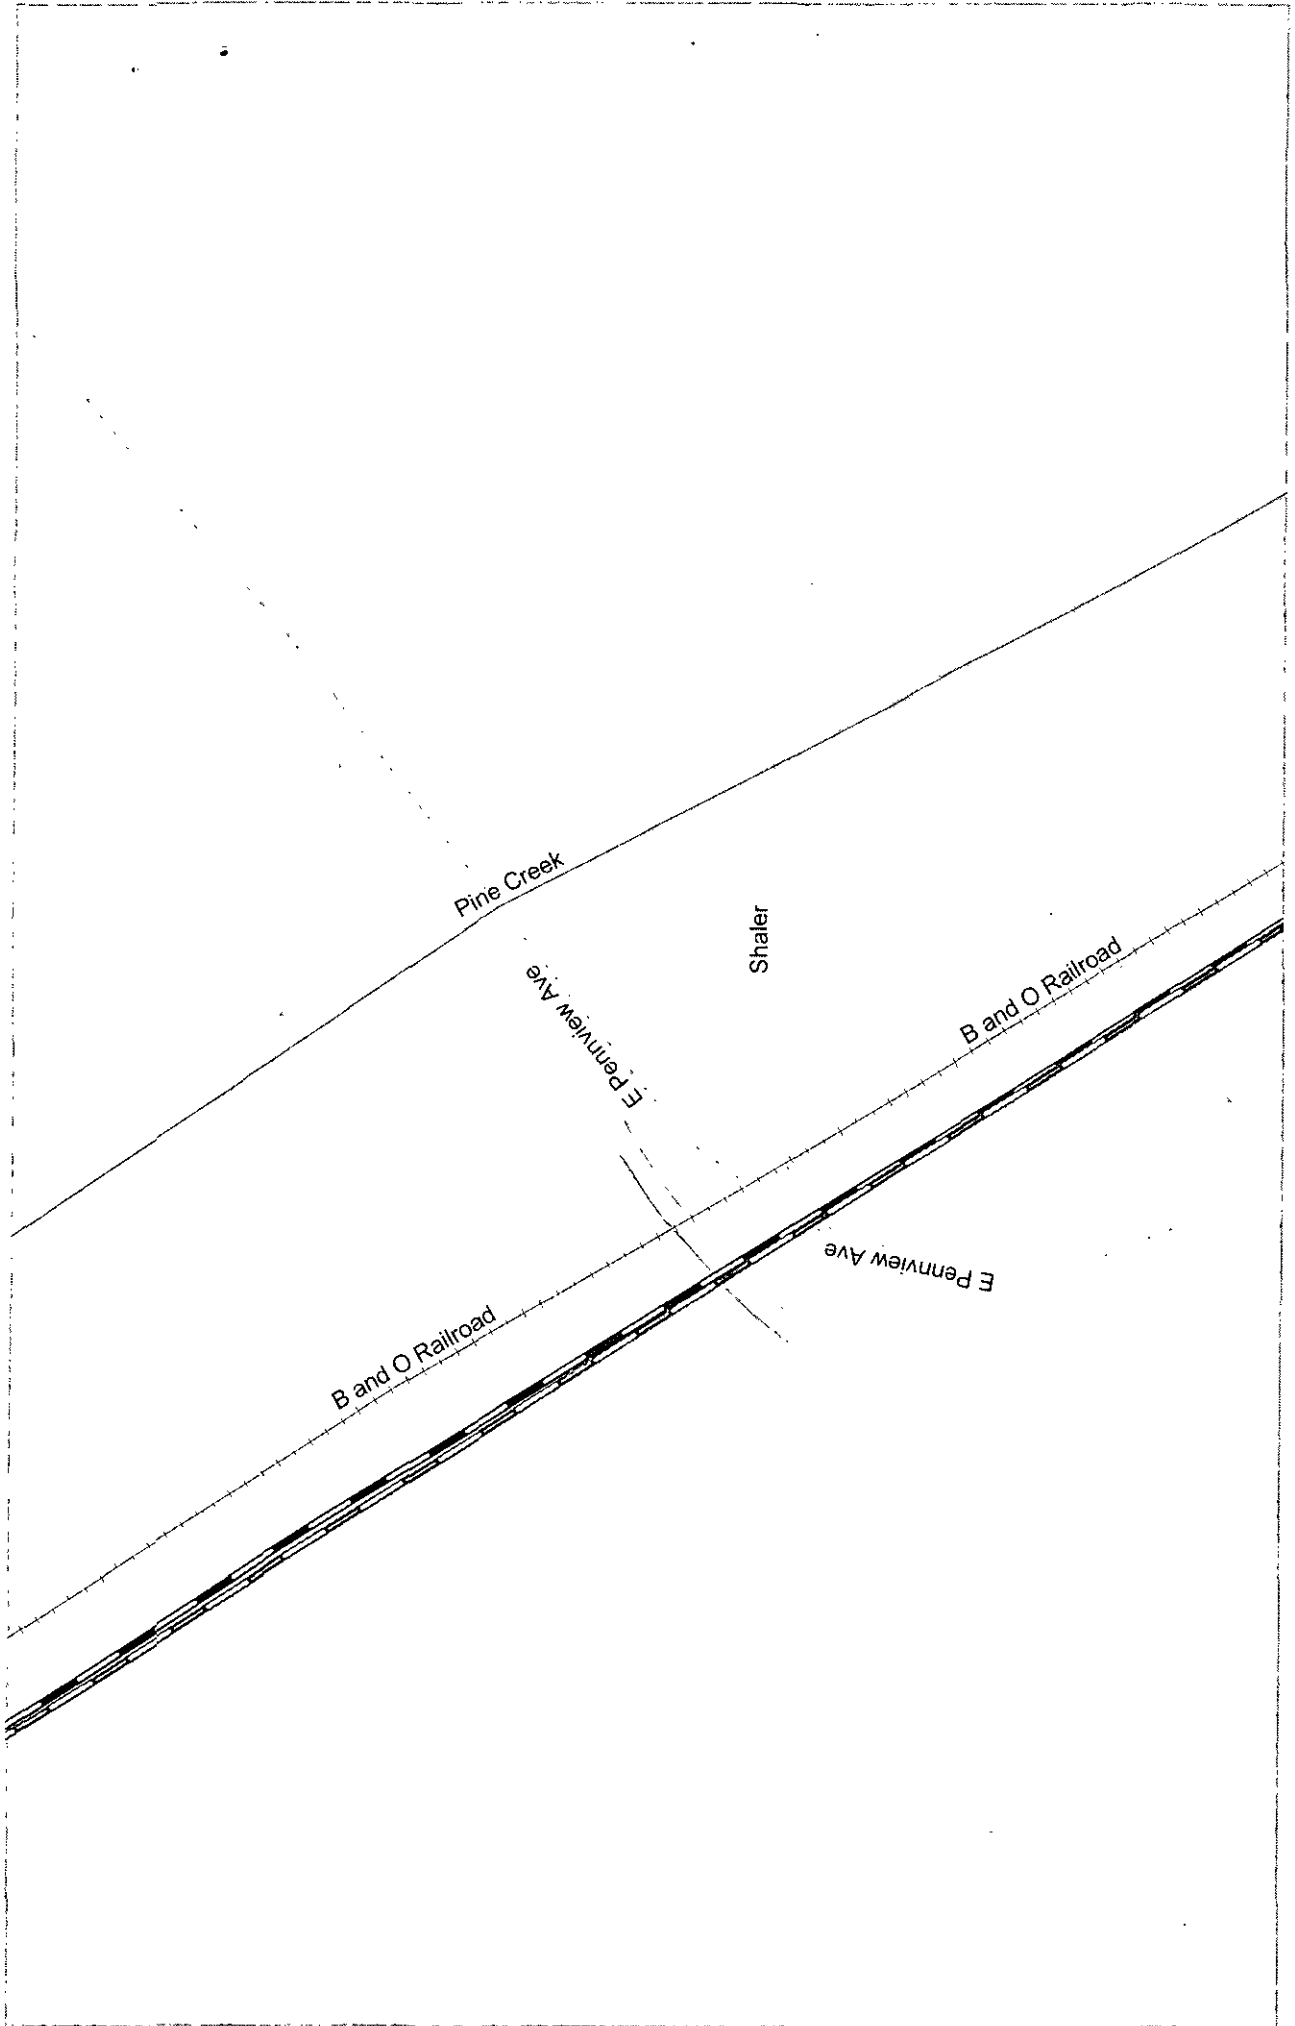

Also, you must contact your local One Call System number at least 48 hours prior to any construction. During construction it will be necessary for us to monitor our facilities.

You should address future correspondence concerning the project to the attention of **OSP National Support/Investigations** at the above address. Please include the above **MCI ID number.**

Sincerely,

John Bachelder
